Without public health and healthcare professionals, our society could not advance. With it, we are making an amazing difference.

“No matter what your interest is in the health professions, there is a place for you in public health. Being a physician and a people person, I gain satisfaction knowing that we are working to improve the lives of others. As I aspire to practice as an occupational physician, an MPH in Occupational Health will certainly go a long way to enhance my career opportunities. The UNTHSC School of Public Health provides excellent opportunities, training and mentors to make this journey promising, enjoyable and fulfilling!”

~ Kirtigandha Salwe

Today, public health is the umbrella over many issues, including some that seem unrelated to health care but ultimately influence every aspect of life.

Public Healthcare professionals:

- Save lives
- Prevent unnecessary death and illness
- Implement policies that address issues related to soaring healthcare costs
- Work to improve the conditions and behaviors that affect the health of each and every one of us

They are employed by:

- Government and non-profit
- Managed care companies
- Hospitals and health systems
- Universities
