Professors Boubekri, Grubbs, Mirshams. Associate Professors Foster, Kozak, Nasrazadani, Plummer, Vaidyanathan. Assistant Professors Arnold, Kougianos, Wang, Yu. Visiting Assistant Professors Hayes, Huang, Zhang. Lecturers Anaya, Nouri.

Introduction

Engineering technology is the profession in which a knowledge of mathematics and natural sciences gained by higher education, experience and practice is devoted primarily to the implementation and extension of existing technology for the benefit of humanity (Engineering Technology Council, 1994). Increasing technological aspects of all modern activities have led to the need for highly skilled persons to design, construct, install, maintain, manage, operate, produce and sell sophisticated technical systems and products.

Departmental programs emphasize integrated design and the application of theoretical concepts. Classes of carefully coordinated laboratory experiences and lectures are utilized. Courses emphasize theoretical concepts and principles for solutions applicable to modern technological problems. Students are prepared for rapidly changing life experiences with mathematics, science and general education. This preparation is designed to enable graduates to remain current, as well as advance, in their professional field.

Vision

The Department of Engineering Technology is committed to leadership — in education and research — in contemporary and innovative engineering and technology areas, locally, nationally and internationally.

Mission

The Department of Engineering Technology is committed to excellence in teaching, conducting research, and preparing engineering and engineering technology professionals.

Programs of Study

The department offers undergraduate and graduate programs in the following areas:

- Bachelor of Science in Engineering Technology with majors in construction engineering technology, electrical engineering technology, manufacturing engineering technology, mechanical engineering technology and nuclear engineering technology, and
- Master of Science with a major in engineering systems and concentrations in construction management, electronics engineering management, engineering management and mechanical engineering management.

Nuclear engineering technology is available at the Luminant Comanche Peak Steam Electric Station.

Construction Engineering Technology (CNET)

The construction engineering technology major provides educational experiences for the development of technical knowledge and skills necessary in today's construction industry. The program provides education in both the management and technical aspects, thus providing optimum opportunities for employment. The program builds on a strong foundation in mathematics, science, engineering and general education. Knowledge and skills relative to the construction field such as surveying, cost estimating, construction materials, computer design, contracts and management, safety, and structures are acquired. Technical and management skills are enhanced through courses offered by other engineering technology programs and the College of Business. The development of technical communication and presentation skills is a requirement throughout the curriculum.

Electrical Engineering Technology (ELET)

The electrical engineering technology major is designed to develop the technical and personal knowledge and skill necessary to compete successfully in today's electrical industries. The program builds on a strong foundation in mathematics and science and includes courses in network analysis, linear electronics, digital electronics, communication systems and control systems. Computer utilization is an integral part of all electrical courses and most courses include a laboratory to provide the necessary hands-on experience for an applied program of study. The student's technical background

is further enhanced by taking selected courses from other engineering technology majors. The development of technical communication and presentation skills is a requirement throughout the curriculum.

Electrical engineering technology is accredited by the Technology Accreditation Commission of ABET (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Manufacturing Engineering Technology (MFET)

The manufacturing engineering technology major prepares students for professional careers in the manufacturing environment. Manufacturing engineering technologists apply scientific and engineering knowledge and methods in support of engineering activities. Manufacturing engineering technologists share much of the mathematics and science background of engineers. Their academic preparation emphasizes technical skills and product/process manufacturing applications. The major thrust of the manufacturing engineering technology curriculum is that of product/process design and factory automation. Graduates also take positions in research and development, reliability/quality assurance and process support functions.

Manufacturing engineering technology is accredited by the Technology Accreditation Commission of ABET (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Mechanical Engineering Technology (MEET)

The mechanical engineering technology major is built upon a strong foundation of science, mathematics and technical course work designed to meet the diverse needs of the mechanical engineer. Mechanical engineering technology concepts are used in all types of industry and are applied directly to product and tool design and to assist in the manufacturing process. Courses in computer-aided design, product design and development, manufacturing processes and materials, fluid and thermal sciences and quality assurance provide the student with a broad range of applications for the pursuit of a career in mechanical engineering technology.

Mechanical engineering technology is accredited by the Technology Accreditation Commission of ABET (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Nuclear Engineering Technology (NUET)

The nuclear engineering technology major is designed to provide breadth of training for engineers and related technical personnel at the Luminant Comanche Peak Steam Electric Station. The program has a strong foundation in mathematics and science and adds nuclear engineering principles ranging from materials science to reactor

design. Courses in fluid mechanics, thermodynamics, electrical circuit design, electric power generation and automatic control systems augment the curriculum. The program enhances the reactor operator training provided by Luminant by stressing the fundamentals of underlying physical and engineering principles behind many plant operating procedures.

Nuclear engineering technology is accredited by the Technology Accreditation Commission of ABET (111 Market Place, Suite 1050, Baltimore, MD 21202; 410-347-7700).

Bachelor of Science in Engineering Technology

Degree Requirements

- 1. Hours Required and General/College Requirements: A minimum of 124 semester hours, of which 42 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the "General University Requirements" in the Academics section of this catalog and the College of Engineering requirements.
- 2. **Major Requirements:** 70–73 hours from one of five majors listed below, chosen with the advice of an academic advisor within the department.

Major in Construction Engineering Technology (73 hours): BUSI 1340; CNET 1160, 2180, 2300, 3150, 3160, 3190, 3410, 3430, 3440, 3460, 3480, 4170, 4180, 4620, 4780 and 4790; CSCE 1020; ENGR 2301 and 2332; ACCT 2010; BLAW 3430, 4770; ECON 1100.

Major in Electrical Engineering Technology (70 Hours): ELET 3700, 3720, 3740, 3750, 3760, 4710, 4720, 4730, 4770, 4780 and 4790; ENGR 2405, 2720 and 2750; MFET 4190; plus 12 hours of technical electives and 3 advanced hours of technical options.

Major in Manufacturing Engineering Technology (70 Hours): MFET 2100, 3110, 3250, 3520, 4190, 4200, 4210, 4230, 4780 and 4790; ENGR 1304, 2301, 2332, 2405, 3450/3451; MEET 3650, 3660, 4360; ELET 3970; MGMT 3830; CSCE 1020; plus 5 hours of technical electives.

Major in Mechanical Engineering Technology (70 Hours): MEET 3650, 3940, 3990, 4050, 4350, 4360, 4780 and 4790; ENGR 1304, 2301, 2302, 2332, 2405, 3450/3451; MFET 2100, 3110, 4190, 4200 and 4210; ELET 3970; CSCE 1020; plus 3 hours of technical electives and 3 hours of advanced technical options.

Major in Nuclear Engineering Technology (70 Hours): NUET 3910, 3920, 3930, 4050, 4780, 4790, 4930 and 4940; ENGR 2301, 2405; ELET 3970; MEET 3940 and 3990; MFET 4190; MATH 1680; CSCE 1020; plus 3 hours of technical elective and 17 hours (6 advanced) of technical options approved by advisor.

- 3. Other Course Requirements: MATH 1710 and 1720. Students registering for fall or spring term/ semester must register for mathematics until the requirement has been satisfied, unless approved by the department chair. A minimum of 12 semester hours of mathematics is required.
- 4. Minor: Optional.
- 5. Electives: See four-year plan.

6. Other Requirements:

- a. ENGR 1030 (may be used to satisfy the Social and Behavioral Sciences requirement of the University Core Curriculum).
- b. ENGR 2060 (may be used to satisfy a portion of the Understanding the Human Community requirement of the University Core Curriculum and College of Engineering Foundation Requirements).
- c. CSCE 4010, Engineering Ethics.
- d. PHYS 1710/1730 and 2220/2240 and CHEM 1410/1430 (may be used to satisfy the Natural Sciences requirement of the University Core Curriculum).
- e. ENGL 2700 is required instead of ENGL 1320 (satisfies College of Engineering Core requirement).
- f. A 2.5 GPA is required for engineering technology courses in the major.
- g. Courses taken to satisfy the technical options in each major must be approved by the academic advisor.

BS in Engineering Technology Major in Construction Engineering Technology

Minor in Engineering Technology

General Engineering Technology

The minor in general engineering technology requires 18 semester hours (6 advanced), chosen with approval of the engineering technology department chair.

Graduate Degrees

The Master of Science with a major in engineering systems and concentrations in mechanical engineering technology, electronics engineering technology, construction management and engineering management is available at the graduate level. Prospective students should consult with the graduate departmental advisor prior to initial enrollment.

Scholarships

The department offers scholarships designated specifically for studies in engineering technology. For further information, inquire in the departmental office.

Courses of Instruction

All Courses of Instruction are located in one section at the back of this catalog.

Course and Subject Guide

The "Course and Subject Guide," found in the Courses of Instruction section of this book, serves as a table of contents and provides quick access to subject areas and prefixes.

Introduction

The Department of Materials Science and Engineering addresses the education and technological challenges of creating, applying and characterizing new materials for the 21st century. The Department of Materials Science and Engineering is committed to training students at the undergraduate and graduate levels in all aspects of modern materials including metals, ceramics, polymers, electronic and optical materials and materials characterization. Students have opportunities for hands-on instruction and research with modern equipment and facilities. The department has strong collaborative programs with industries in the Dallas–Fort Worth region and with universities both locally and throughout the world.

The department offers bachelor of science, master of science and doctoral degrees, all with a major in materials science and engineering. The undergraduate program was approved in July 2006 and started admitting students immediately. Presently, the department has nine tenured or tenure track faculty who divide their time between teaching and research in the different areas mentioned above. Research support comes from a variety of federal, state and industrial entities. The department has one of the most advanced analytical characterization facilities in the country and both undergraduate and graduate students receive training on state-of-theart equipment. Finally, the department has strong connections to local industries and is setting up
