Tax Specialist

Tax Supervisor/Auditor

As an accounting major, you may participate in a five-year program that will allow you to earn a bachelor's and master's degree simultaneously. (For only a bachelor's degree, consider UNT's accounting control systems program.) The combined B.S./M.S. degree meets the 150-hour requirement for the Certified Public Accountant exam in Texas and many other states.

At UNT, you will study the structure and analysis of financial reports; IRS regulations; product costing; budgeting; auditing; accounting information systems; and international accounting. You may choose to specialize in audit and financial accounting, managerial accounting, accounting information systems, taxation, or accounting with an entrepreneurial perspective after completing your undergraduate courses.
