BASIC AIR PERMITTING WORKSHOP

FOCUSING ON THE FIBER REINFORCED PLASTICS AND PAINTINGS INDUSTRIES

9 Continuing Education Credits for Professional Engineers

The 2006 TCEQ Coatings Workshop will focus on the fiber reinforced plastic (FRP) and painting industries. The workshop will cover FRP and coating basics, rule applicability, air emission calculations, best available control technology, capture of emissions, air dispersion modeling issues specific to coatings facilities, and a health effects review. In addition, the workshop will include presentations on facility responsibilities after the permit is issued, as well as waste management issues. Hear from the TCEQ technical experts in coatings permitting, air dispersion modeling, toxicology, and enforcement.

This specialty workshop is designed for engineers, facility environmental managers and staff, business owners, and consultants of all levels of expertise with operations in Texas. Each workshop attendee will receive a CD with all of the presentation materials as well as example TCEQ permit applications for cultured marble, fiber reinforced plastics, and painting operations. The applications include text and spreadsheets designed to readily adapt to your facility. Attendees may earn nine (9) hours of continuing education credits for professional engineers.
