BACKGROUND

The Texas Health Care Information Council (THCIC) was created by Chapter 108 of the Texas Health and Safety Code (THSC) and is responsible, under Sections 108.011 through 108.0135, for collecting hospital discharge data from all state licensed hospitals except those that are statutorily exempt from the reporting requirement. Exempt hospitals include those located in a county with a population less than 35,000, or those located in a county with a population more than 35,000 and with fewer than 100 licensed hospital beds and not located in an area that is delineated as an urbanized area by the United States Bureau of the Census (Section 108.0025). Exempt hospitals also include hospitals that do not seek insurance payment or government reimbursement (Section 108.009). THCIC became part of the Texas Department of State Health Services (DSHS) effective September 1, 2004 and DSHS is now responsible for the collection and release of hospital discharge data.

PUBLIC USE DATA FILE (PUDF)

Section 108.011(a) and 108.012 of the THSC requires THCIC to provide public use data for computer-to-computer access. It also permits THCIC to charge the data requestor a standard fee for using the Public Use Data File (PUDF). The PUDF contains patient-level information for inpatient hospital stays. These data are extracted from THCIC's Hospital Discharge Database (HDD).

The 2005 PUDF is available in two fixed length format text files, the Base Data (logical record length of 1486 bytes) and Charges (logical record length of 80 bytes) files. The files are also available in tab-delimited format. The size of the files is as follows:

First quarter, 466 hospitals:					
Base data	715,593 records	Fixed field format	1016 MB	Tab-delimited	415 MB
Charges	11,292,728 records	Fixed field format	883 MB	Tab-delimited	493 MB
Second quarter, 466 hospital	s:				
Base data	704,780 records	Fixed field format	1001 MB	Tab-delimited	411 MB
Charges	10,899,673 records	Fixed field format	853 MB	Tab-delimited	473 MB
Third quarter, 496 hospitals:					
Base data	714,624 records	Fixed field format	1015 MB	Tab-delimited	417 MB
Charges	10,914,711 records	Fixed field format	854 MB	Tab-delimited	471 MB
Fourth quarter, 501 hospitals	s:				
Base data	719,345 records	Fixed field format	1021 MB	Tab-delimited	421 MB
Charges	11,050,169 records	Fixed field format	865 MB	Tab-delimited	477 MB

The data must be imported into a software package. No software is included with the PUDF. The data file has been tested with several software packages, including Microsoft Access, SAS, and SPSS.

The PUDF, beginning with data collected for 2004, is formatted to accommodate additional data elements available with the collection of data from hospitals using the THCIC 837 format. The following data elements are available in the PUDF beginning with data for 2004 or are not comparable to data collected in years prior to 2004:

BASE DATA FILE

DATA PROCESSING AND QUALITY

Beginning with data submitted for 2004 discharges hospitals required to submit discharged inpatient claims data, moved from the submission of data in the uniform bill (UB-92) format to the THCIC 837 format. The data are validated through a process of automated auditing and verification. Each individual hospital is responsible for the accuracy and completeness of its data. Even so, each record is subjected by THCIC to a series of audits that check for consistency and conformity with the definitions stated in the data specification manual. Records failing an audit check are returned to the hospital for correction and resubmission. Following the correction process, THCIC uses valid claims data to build files of "encounters" where one encounter contains the final discharge and all related interim claims information for a patient. Then, each submitting hospital has an opportunity to review, to make additional corrections, and to certify the encounter data with or without comments. Finally, THCIC builds a final encounter file that includes all corrections submitted by the hospitals. THCIC staff checks and adjusts for missing values and invalid codes in this file before the PUDF is generated. Users are advised to examine every data element to be used for missing values and invalid codes and to read accompanying notes, comments, and other descriptive text.

PATIENT/PHYSICIAN CONFIDENTIALITY

The legislative intent behind the creation of the Hospital Discharge Database (HDD) was that the data and resulting information be used for the benefit of the public. This is specified in Section 108.013 of the Texas Health and Safety Code (THSC). The THSC also stipulates that THCIC may not release and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates the THSC. In addition, under Section 108.013(e) and (f) of the THSC, patient and/or

physician information in the HDD cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding. Pursuant to the THSC, THCIC excludes all direct personal and demographic identifiers (e.g., name, address, social security number, patient identifiers, admission and discharge dates) that might lead to the identification of a specific patient from the PUDF.

To protect patient identities, THCIC has suppressed these data elements in this release of the PUDF:

- The last two digits of the patient's ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code.
- The entire ZIP code is suppressed if a hospital has fewer than fifty discharges in a quarter.
- The ZIP code is changed to '88888' for patients from states other than Texas and the adjacent states.
- The entire ZIP code and gender code are suppressed if the ICD-9-CM code indicates alcohol or drug use or an HIV diagnosis.
- The entire ZIP code and provider name are suppressed if a hospital has fewer than five discharges of a particular gender, including 'unknown'. The provider ID is changed to '999998'.
- The country code is suppressed if a hospital has fewer than five discharges from a particular country.
- Age is represented by 22 age group codes for the general patient population and 5 age group codes for the HIV and alcohol and drug use patient populations.
- Race is changed to 'Other' and ethnicity is suppressed if a hospital has fewer than ten discharges of a race.
- All facility type indicators are suppressed if a hospital has fewer than fifty discharges in a quarter and the provider ID is changed to '999999'.

To protect physician identities, the THSC requires creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available except when the number of physicians represented in a DRG for a hospital do not exceed the minimum cell size of five.

It may be possible in rare instances, through complex analysis and with outside information, to ascertain from the PUDF the identity of individual patients. Considerable harm could result if this were done. PUDF users are required to complete the THCIC Hospital Discharge Data Use Agreement in the Application before shipment of the PUDF. The Data Use Agreement prohibits attempts to identify individual patients.

RESTRICTIONS ON DATA USE

Section 108.010(c) of the THSC prohibits THCIC from releasing provider quality reports until one year of data is available. Users of the PUDF are cautioned about using less than a year of data to make any hospital quality assumptions.

Sections 108.013(c)(1) and (2) and 108.013 (g) of the Texas Health and Safety Code (THSC) prohibit the THCIC) from releasing, and a person or entity from gaining access to, any data that could reveal the identity of a patient or the identity of a physician unless specifically authorized by the Act. Any effort to determine the identity of any person or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the THSC and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify

an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital for the purpose of verifying information supplied in the THCIC Hospital Discharge Data sets. Any questions about the data must be referred to THCIC only. Data analysis assistance is not provided by THCIC. The data are protected by United States copyright laws and international treaty provisions.

In the Data Use Agreement, the purchaser and end-user of the data are referred to as the "licensee". To acquire the data the licensee must give the following assurances with respect to the use of THCIC Hospital Discharge Data sets:

- The licensee will not release nor permit others to release the individual patient records or any part of them to any person who is not a staff member of the organization (specified below), except with the written approval of THCIC;
- The licensee will not attempt to link nor permit others to attempt to link the hospital stay records of patients in this data set with personally identifiable records from any other source;
- The licensee will not release nor permit others to release any information that identifies persons, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;
- The licensee will not nor permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the data covered by this Agreement to any other person or entity, unless approved in writing by THCIC;
- The licensee agrees to read the User Manual and to be cognizant of the limitations of the data;
- The licensee will use the following citation in any publication of information from this file: Texas Hospital Inpatient Discharge Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics-THCIC, Austin, Texas. [date of publication];
- The licensee will indemnify, defend, and hold the THCIC, its members, employees, and the Council's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of THCIC.

The licensee understands that these assurances are collected by THCIC to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements with the knowledge that under Sections 108.014 and 108.0141 of the Texas Health and Safety Code to knowingly or negligently release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the PUDF user has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the PUDF are required to purchase a license to use the data.

DATA LIMITATIONS

(Users are advised to become familiar with the data limitations.)

- The THSC requires that a uniform submission format be used for reporting purposes. Before 2004 data were collected in the UB-92 format. Data for 2004 were collected in both UB-92 and THCIC 837 formats. Because these are billing forms, the data collected are administrative data and not clinical data.
- Records with MDC codes of 15 (newborns and other neonates with conditions originating in the perinatal period), 20 (alcohol/drug induced organic mental disorders), or 22 (burns) and Patient Status codes of 62 (discharged/transferred to inpatient rehabilitation), 71 (discharged/transferred to other outpatient service), or 72 (discharged/transferred to institution outpatient service) contain an APR-DRG of 956 (ungroupable). These Patient Status codes were not valid when version 15 of the 3M APR-DRG Grouper was developed. A valid Patient Status code is required for these MDC codes for APR-DRG assignment and Risk of Mortality and Severity of Illness scoring. Patient status codes 71 and 72 are no longer valid as of October 2003. After October 2003 records with MDC codes of 15, 20, or 22 and Patient Status code of 62 contain an APR-DRG of 956.
- Hospital charges data are available third quarter 2000. Earlier data were not reported correctly by some hospitals.
- Secondary source of payment data are available third quarter 2000. Earlier data were not reported correctly by some hospitals.
- Gender is suppressed for patients with an ICD-9-CM code that indicates drug or alcohol use or an HIV diagnosis.
- The last two digits of the ZIP code are suppressed if there are thirty or fewer patients included in the zip code. All of the ZIP code is suppressed for patients with an ICD-9-CM code that indicates drug or alcohol use or an HIV diagnosis or if a hospital has fewer than five discharges of a particular gender, including 'unknown'. ZIP code is changed to '88888' for patients from a state other than Texas and not from an adjacent state. If ZIP is '88888' the state abbreviation is changed to 'ZZ'. ZIP code is suppressed if a hospital has fewer than five patients of a particular gender, including 'unknown'.
- Admission Source as reported by hospitals is suppressed, as recommended by the Council, when the Admission Type is 'newborn'. Data users can use ICD-9-CM codes to correctly identify the clinical status of newborns.
- Uniform identification numbers for physicians are available first quarter 2000 except for cases which do not exceed the minimum cell.
- Hospitals must submit data no later than 60 days after the close of a calendar quarter. Depending on hospitals' collection and billing cycles, not all discharges may have been billed or reported. This can affect the accuracy of source of payment data, particularly self-pay and charity that may later qualify for Medicaid or other payment sources.
- Beginning with data for 2004 discharges, up to 25 diagnosis codes, up to 25 procedure codes, and up to 10 E-codes can be submitted. For earlier years the number of diagnosis codes collected per patient is limited to 9 and the number of procedure codes to 6. Because of these limitations, sicker patients and the hospitals that treat them may not be accurately represented in the data. This may also result in total volume and percentage calculations for diagnoses and procedures not being complete.

- Race and ethnicity data are generally not collected by hospitals and may be subjectively captured.
- Inaccuracies in the data and incompleteness of the data are addressed in the hospitals' comments.
- County of residence is not collected by hospitals. County Federal Information Processing Standard (FIPS) codes are assigned by THCIC based on patient ZIP code.
- THCIC assigns the Risk of Mortality and Severity of Illness scores using methodology designed by 3M. These scores may be affected by the limited number of diagnoses and procedure codes collected by THCIC and may be understated.
- Comparability of length of stay (LOS) across hospitals is affected by factors such as casemix and severity complexity, payer-mix, market areas and hospital ownership, affiliation or teaching status. Any analysis of LOS at the hospital level should consider the above factors.
- Length of stay is limited to 999 days prior to 2004 discharges.
- Any analysis of mortality should note that the data reflect only patients who died in the hospital and not those who died after discharge from the hospital.
- Conditions present at time of admission cannot be distinguished from those occurring during hospitalization.
- THCIC collects data from all hospitals in the state not specifically exempted by statute. This hospital mix should be considered when drawing conclusions about the data or making comparisons with other data.
- Any conclusions drawn from the data are subject to errors caused by the inability of the hospital to communicate complete data due to form constraints, subjectivity in the assignment of codes, system mapping, and normal clerical error. The data are submitted by hospitals as their best effort to meet statutory requirements.

HOSPITAL COMMENTS

(Users are advised to consider hospital comments in any analysis of the data.)

Included with the PUDF is a separate file containing the unedited comments submitted by hospitals at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals and are not necessarily the views of the THCIC. Hospitals that submitted comments are identified in 'Reporting Status of Texas Hospitals'.

CITATION

Any statistical reporting or analysis based on the data shall cite the source as the following:

Texas Hospital Inpatient Discharge Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics-THCIC, Austin, Texas. [date of publication].

Texas Hospital Inpatient Discharge Public Use Data File

Data Dictionary

The purpose of this document is to provide the user with the necessary information to use and understand the data in the Public Use Data File. The following information is provided:

Field Unique, abbreviated name of the data element

Description Brief explanation of the data element. Descriptions of data elements from the UB-92 are

taken from specifications manuals.

Data Source Provided by the hospital on the claim form (Claim)

Assigned by THCIC (Assigned) Calculated by THCIC (Calculated)

Note: For those data elements that have been temporarily suppressed, the quarter of data

for which the data element will be released is noted following the Data Source.

Type Alphanumeric or numeric

Coding scheme Valid codes for a data field. Values taken from specifications manuals.

Any code provided by a hospital that has been determined to be invalid has been assigned the value '*'. Any data element that is blank should be interpreted as 'missing', no data provided, unless otherwise noted.

BASE DATA FILE

Field 1:	DISCHARGE		
Description:	Discharge Quarter. Year	and quarter of disc	charge. yyyyQn.

Length: 6 **Type:** Alphanumeric

Field 93: PRINC_SURG_PROC_CODE

Code for the principal surgical or obstetrical procedure performed during the period covered by

the bill. ICD-9, HCPCS, or CPT code.

Beginning Position: 706 **Data Source:** Claim

Length: 7 Type: Alphanumeric

Field 94: PRINC_SURG_PROC_DAY

Day of principal surgical procedure *equals* Principal Surgical Procedure Date *minus*

Admission/Start of Care Date

Beginning Position: 713 **Data Source:** Calculated **Length:** 4 **Type:** Alphanumeric

Field 95: PRINC ICD9 CODE

ICD-9-CM diagnosis code for principal surgical procedure, including the 4th and 5th digits if

applicable. Decimal is implied following the third character.

Beginning Position:717Data Source:AssignedLength:5Type:Alphanumeric

Field 96: OTH SURG PROC CODE 1

Code for surgical or obstetrical procedure other than the principal procedure performed during

the period covered by the bill. ICD-9, HCPCS, or CPT code.

Beginning Position: 722 **Data Source:** Claim **Length:** 7 **Type:** Alphanumeric

Field 97: OTH SURG PROC DAY 1

Day of other surgical or obstetrical procedure equals Other Surgical Procedure Date minus

Admission/Start of Care Date

Beginning Position: 729 **Data Source:** Calculated **Length:** 4 **Type:** Alphanumeric

Field 98: OTH_ICD9_CODE_1

ICD-9-CM diagnosis code for surgical or obstetrical procedure other than the principal

procedure, including the 4th and 5th digits if applicable. Decimal is implied following the third

character.

Beginning Position:733Data Source:AssignedLength:5Type:Alphanumeric

Field 99: OTH_SURG_PROC_CODE_2

Code for surgical or obstetrical procedure other than the principal procedure performed during

Claim

the period covered by the bill. ICD-9, HCPCS, or CPT code.

Beginning Position: 738 Data Source:

Length: 7 **Type:** Alphanumeric

Field 100: OTH_SURG_PROC_DAY_2

Day of other surgical or obstetrical procedure equals Other Surgical Procedure Date minus

Admission/Start of Care Date

Beginning Position:745Data Source:CalculatedLength:4Type:Alphanumeric

Field 101: OTH_ICD9_CODE_2

ICD-9-CM diagnosis code for surgical or obstetrical procedure other than the principal

procedure, including the 4th and 5th digits if applicable. Decimal is implied following the third

character.

Beginning Position:749Data Source:AssignedLength:5Type:Alphanumeric

Field 102: OTH_SURG_PROC_CODE_3

Code for surgical or obstetrical procedure other than the principal procedure performed during

the period covered by the bill. ICD-9, HCPCS, or CPT code.

Beginning Position: 754 **Data Source:** Claim

Length: 7 **Type:** Alphanumeric

Field 103: OTH_SURG_PROC_DAY_3

Day of other surgical or obstetrical procedure equals Other Surgical Procedure Date minus

Admission/Start of Care Date

Beginning Position: 761 **Data Source:** Calculated **Length:** 4 **Type:** Alphanumeric

Field 104: OTH ICD9 CODE 3

ICD-9-CM diagnosis code for surgical or obstetrical procedure other than the principal

procedure, including the 4th and 5th digits if applicable. Decimal is implied following the third

character.

Beginning Position: 765 **Data Source:** Assigned Length: Type: Alphanumeric Field 105: OTH SURG PROC CODE 4 Code for surgical or obstetrical procedure other than the principal procedure performed during the period covered by the bill. Field 246: HCFA-MDC

Major Diagnostic Category (MDC) as assigned by Health Care Financing Administration

(HCFA) for hospital payment for Medicare beneficiaries. First available 2004.

Beginning Position:1442Data Source:AssignedLength:2Type:Alphanumeric

Field 247: APR-MDC

Major Diagnostic Category (MDC) as assigned by 3M APR-DRG Grouper, version 20.

Beginning Position: 1444 **Data Source:** Assigned **Length:** 2 **Type:** Alphanumeric

Field 248: HCFA-DRG

Health Care Financing Administration (HCFA) Diagnosis Related Group (DRG) as assigned

for hospital payment for Medicare beneficiaries.

Beginning Position: 1446 **Data Source:** Assigned **Length:** 3 **Type:** Alphanumeric

Field 249: APR-DRG

All Patient Refined (APR) Diagnosis Related Group (DRG) as assigned by 3M APR-DRG

Grouper, version 20.

Beginning Position:1449Data Source:AssignedLength:3Type:Alphanumeric

Field 250: RISK MORTALITY

Assignment of a risk of mortality score from the All Patient Refined (APR) Diagnosis Related Group (DRG) from the 3M APR-DRG Grouper, version 20. Indicates the likelihood of dying.

Coding Scheme: 1 Minor

2 Moderate3 Major4 Extreme

Beginning Position:1452Data Source:AssignedLength:1Type:Alphanumeric

Field 251: ILLNESS SEVERITY

Assignment of a severity of illness score from the All Patient Refined (APR) Diagnosis Related Group (DRG) from the 3M APR-DRG Grouper, version 20. Indicates the extent of physiologic

decompensation.

Coding Scheme: 1 Minor

2 Moderate 3 Major 4 Extreme

Beginning Position: 1453 **Data Source:** Assigned **Length:** 1 **Type:** Alphanumeric

Field 252: ATTENDING_PHYSICIAN_UNIF_ID

Attending Physician Uniform Identifier. Unique identifier assigned to the licensed physician expected to certify medical necessity of services rendered, with primary responsibility for the patient's medical care and treatment. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and

podiatrists authorized by the hospital to admit or treat patients.

Suppression: Suppressed when the number of physicians represented in a DRG for a hospital does not exceed

the minimum cell size of five.

Beginning Position: 1454 **Data Source:** Assigned **Length:** 10 **Type:** Alphanumeric

Field 253: OPERATING_PHYSICIAN_UNIF_ID

Operating or other Physician Uniform Identifier (if applicable). Unique identifier assigned to the operating physician or physician other than the attending physician. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and podiatrists authorized by the hospital to admit or treat patients.

Suppression: Suppressed when the number of physicians represented in a DRG for a hospital does not exceed

the minimum cell size of five.

Coding Scheme:9999999998
Cell size less than 5
Temporary license or license number could not be matched

Beginning Position: 1464 **Data Source:** Assigned **Length:** 10 **Type:** Alphanumeric

Field 254: CERT STATUS

Assignment of a code to indicate the certification of data and submission of comments by the

hospital. First available 3rd quarter 1999.

Coding Scheme:

1 Certified, without comment
2 Certified, with comment

3 Certified, with comment, comment not received by deadline

4 Hospital elected not to certify

5 Hospital closed, data not certified

Beginning Position: 1474 **Data Source:** Assigned **Length:** 1 **Type:** Alphanumeric

Field 255: RECORD_ID

Description: Record Identification Number. Unique number assigned to identify the record. First available

1st quarter 2002.

Beginning Position: 1475 **Data Source:** Assigned **Length:** 12 **Type:** Alphanumeric

References:

There are currently three major versions of the Diagnosis Related Groups (DRGs) in use. The basic DRGs are used by the Health Care Financing Administration (HCFA) for hospital payment for Medicare beneficiaries. The All Patient DRGs (AP-DRGs) are an expansion of the basic DRGs to be more representative of non-Medicare populations such as pediatric patients. The All Patient Refined DRGs (APR-DRGs) incorporate severity of illness and risk or mortality subclasses into the AP-DRGs. The basic HCFA DRGs and the APR-DRGs are included in this data.
