

OFFICE OF COURT ADMINISTRATION

CARL REYNOLDS
Administrative Director

Update to the Energy Conservation Plan

This document provides an updated account of how The Office of Court Administration will promote an energy efficient work place.

- A. The agency has not set a percentage goal for reducing its usage of electricity, gasoline, and natural gas due to the fact that OCA cannot physically regulate the temperature, nor does OCA have access to the information on usage.
- B. To reduce its usage of electricity, gasoline, and natural gas, the agency will provide periodic training and/or email updates to OCA employees, evaluate internal procedures, and when applicable, purchase new, more efficient equipment.
- C. The agency is also looking into ways to increase recycling efforts.
