

# Thank you for helping young Texans take their first steps toward good health.

Birth registrars help Texas babies take their first steps toward good health by offering parents the opportunity to consent for ImmTrac participation. In 2006, over 120 Texas hospitals successfully implemented the ImmTrac newborn consent process available through the Texas Electronic Registrar (TER) system, earning the *ImmTrac Award for Excellence*.

By enabling newborn participation in ImmTrac, you are helping young Texans take their first steps to a healthy life.
