

Doctor

DSHS radio/0:60

**AUDIO**

**Female VO:**

Children are my life. I've got about a thousand of them. You see, I'm a family doctor and I want the very best for each of my kids.

That's why I tell parents that vaccines are *so* important.

I always stress the risks of not vaccinating are far greater than the small chance of a bad reaction if you do.

You see, vaccines protect our children from diseases that are highly infectious and often deadly.

So make sure your children get all their shots by their second birthday.

**Male announcer:**

Call 1-800-252-9152 for more information.

Once again, that number is 1-800-252-9152.

Visit [ImmunizeTexas.com](http://ImmunizeTexas.com) for a complete vaccination schedule, and talk to your doctor about the importance of vaccines.

**Female VO:**

Do what I've done with my *own* kids.

Build *your* child's health.

**Female announcer:**

This message is brought to you by the Texas Department of State Health Services.
