Dear Manual User:

Welcome to the *2007 Texas Medicaid Provider Procedures Manual*. To enhance usability, this manual is available on a searchable CD-ROM and on the TMHP website at www.tmhp.com.

A *Claims Filing Resources table* is located at the end of each service section with page references to all claim instructions, appendices, Medicaid forms, and claim form examples associated with the service.

This manual contains both the Primary Care Case Management (PCCM) and Texas Health Steps (THSteps) manuals. PCCM information can be found primarily in Section 7, though relevant information can be found in other sections. THSteps information is contained in Section 43 and throughout the manual.

The Texas Medicaid Program policy published in this manual represents policy implemented as of October 31, 2006. Policy updates effective after October 31, 2006, are published bimonthly in the *Texas Medicaid Bulletin*.

The November/December 2006 *Texas Medicaid Bulletin* and all *Texas Medicaid Bulletins* through and including the September/October 2007 *Texas Medicaid Bulletin* supplement the *2007 Texas Medicaid Provider Procedures Manual* and update the policy contained herein.

The *Texas Medicaid Provider Procedures Manual* serves as a comprehensive guide for Texas Medicaid providers, and contains information about Medicaid benefits, policies, and procedures. The manual also includes an overview of the State of Texas Medicaid Managed Care programs to include the State of Texas Access Reform (STAR), STAR+PLUS, Primary Care Case Management (PCCM), and NorthSTAR. The information regarding the State of Texas Managed Care programs, including Section 7, is not an exhaustive policies and procedures guide. For specific managed care information, contact the individual health plans participating in STAR, STAR+PLUS, and NorthSTAR. For PCCM, refer to the TMHP Telephone and Address Guide included in this manual.

Provider Manual Overview

The *2007 Texas Medicaid Provider Procedures Manual* is divided into three parts, including:

Part I: Provider Information

The information in Part I is for all health care providers who are enrolled in the Texas Medicaid Program and provide services to Medicaid clients. In Part I, providers find instructions for providing allowable services and receiving appropriate reimbursement for services. The following sections are included in Part I:

- Introduction
- TMHP Telephone and Address Guide
- Provider Enrollment and Responsibilities
- Texas Medicaid Reimbursement
- TMHP Electronic Data Interchange (EDI)
- Client Eligibility
- Claims Filing
- Appeals
- Managed Care

Part II: Texas Medicaid Services

Part II contains a section for each Texas Medicaid service with information on health care policy, procedures, and claims filing pertaining to each provider type.

Part III: Appendices

Part III contains the following appendices for quick reference to commonly used information:

- *Appendix A.* State and Federal Offices Communication Guide
- *Appendix B.* Forms

CPT only copyright 2005 American Medical Association. All rights reserved.

- *Appendix C.* THSteps Forms
- *Appendix D.* Claim Form Examples
- *Appendix E.* Vendor Drug Program
- *Appendix F.* Acronym Dictionary
- *Appendix G.* HIV/AIDS
- *Appendix H.* Immunizations
- *Appendix I.* Medical Transportation
- *Appendix J.* Lead Screening
- *Appendix K.* Texas Health Steps Statutory State Requirements
- *Appendix L.* Hearing Screening Information
- *Appendix M.* THSteps Quick Reference Guide
- *Appendix N.* THSteps Dental Guidelines

Introduction

Medicaid Program Administration

The Texas Medical Assistance (Medicaid) Program was implemented on September 1, 1967, under the provisions of Title XIX of the federal *Social Security Act* and Chapter 32 of the *Texas Human Resources Code*.

The State of Texas and the federal government share the cost of funding the Medicaid Program. The Health and Human Services Commission (HHSC), the single state Medicaid agency, is responsible for the Title XIX Program. The administration of the program is accomplished through contracts and agreements with medical providers; Texas Medicaid & Healthcare Partnership (TMHP), the claims administrator; Texas Access Alliance (TAA), the enrollment broker; various managed care organizations (MCOs); the Institute for Child Health Program (ICHP), the quality monitor; and state agencies. Medicaid providers are reimbursed for services through contracts with health-insuring contractors, fiscal agents, or direct vendor payments.

By signing a Texas Medicaid Provider Agreement and submitting Medicaid claims, each enrolled provider agrees to abide by the policies and procedures of Medicaid, published regulations, and the information and instructions in manuals, bulletins, and other instructional material furnished to the provider.

Refer to: "State and Federal Offices Communication Guide" on page A-1 for addresses and telephone numbers of HHSC and Department of State Health Services (DSHS) regional offices.

Other TMHP Information

TMHP Contact Center

The TMHP Contact Center is available during the hours of 7 a.m. to 7 p.m., Central Time, Monday through Friday.

The TMHP Contact Center assists with questions such as:

- Provider enrollment procedures
- Claims filing procedures
- Policy information

The TMHP Contact Center is available to assist providers and clients. Please review the telephone and fax communication guides in this section for a list of contact phone and fax numbers.

For questions or information about Medicaid eligibility, clients are referred to their caseworker or the local HHSC office.

Automated Inquiry System (AIS)

AIS provides the following information and services through the use of a touch-tone telephone: claim status, patient eligibility, benefit limitations, Medically Needy case status, Family Planning, current weekly payment amount, and claim appeals.

Eligibility and claim status information is available on AIS 23 hours a day, 7 days a week with scheduled down time between 3 a.m. and 4 a.m., Central Time. All other AIS information is available from 6 a.m. until 6 p.m., Central Time, Monday through Friday. AIS offers 15 transactions per call.

For full instructions on the use and benefits of AIS, refer to the Automated Inquiry System (AIS) User's Guide available on www.tmhp.com or call the TMHP Contact Center at 1-800-925-9126 for faxed instructions.

TMHP Provider Relations

The TMHP Provider Relations Department comprises a staff of Austin- and field-based provider relations representatives whose goal is to serve the healthcare community by furnishing a variety of services and activities designed to inform and educate healthcare providers about Texas Medicaid Program activities and claim submission procedures.

Provider Relations activities include the following:

- *Provider education through planned events*. Provider representatives conduct a planned program of educational workshops, in-services, and training sessions designed to keep all actively-enrolled providers informed of the latest policies, claim processing procedures, and federal and state regulations affecting the Texas Medicaid Program.
- *Problem identification and resolution*. A staff of research coordinators is available to assist providers with clarification of Medicaid policies and assist with in-depth problem claim submission issues after initial inquiries are made with the TMHP Contact Center. Coordinators work closely with field-based regional representatives to coordinate the educational needs of the community.
- *Relationship with professional healthcare organizations*. To ensure that Texas associations that represent healthcare professions have up-to-date information about the requirements for participation in the Medicaid program, the Provider Relations Department maintains a work relationship with these organizations. Also, the Provider Relations Department participates in several events sponsored by Texas healthcare associations, such as conventions and conferences.

Please visit www.tmhp.com for Provider Relations contact information, or call the TMHP Contact Center at 1-800-925-9126 for assistance.

CPT only copyright 2005 American Medical Association. All rights reserved.

TMHP EDI Help Desk

The TMHP Electronic Data Interchange (EDI) Help Desk assists Medicaid providers with EDI transactions. The TMHP EDI Help Desk is available at 1-888-863-3638 from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

TMHP EDI Help Desk activities and responsibilities include, but are not limited to, the following:

- Enrolling providers for electronic billing
- Qualifying vendors for TMHP EDI production through testing
- Diagnosing claim transmission problems through research
- Consulting with provider billing personnel, billing services, and software vendors regarding TMHP EDI

The TMHP Provider Relations Department assists with questions about demonstration and installation of the TDHconnect software.

TMHP EDI Help Desk staff assists with questions about TMHP EDI, TDHconnect software, and electronic transmissions at 1-888-863-3638.

Providers who employ hardware or software vendors should contact those vendors for the resolution of technical problems.

State of Texas Access Reform (STAR) Program

Contact	Telephone
STAR, STAR+PLUS, and NorthSTAR Help Line (Texas Access Alliance [TAA])	1-800-964-2777

Refer to: “Telephone Communication with HHSC and the Department of State Health Services (DSHS)” on page A-4 for agency telephone numbers.

1.1 Provider Enrollment

1.1.1 TMHP Provider Enrollment

A provider of medical services (including an out-of-state provider) who wants to be eligible for Medicaid reimbursement must complete the required Medicaid provider enrollment application forms and enter into a written provider agreement with the Texas Health and Human Services Commission (HHSC). TMHP Provider Enrollment supplies these forms. Request forms from and submit completed forms to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com.

Note: *During the Medicaid enrollment process, the Claims Administrator may waive the mandatory prerequisite for Medicare enrollment for certain providers whose type of practice is pediatric-based and who will never bill Medicare.*

A nine-digit provider identifier is issued when TMHP determines that a provider qualifies for participation.

A new enrollment application must be completed and a new provider identifier must be issued when one of the following changes:

- Medicare Number—If Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location or with a new group.
- Ownership—The new owner must do the following:
  - Obtain recertification as a Title XVIII (Medicare) facility under the new ownership
  - Complete the Texas Medicaid Provider Enrollment Application
  - Provide TMHP with a copy of the Contract of Sale (specifically, a signed agreement that includes the identification of previous and current owners)
  - Provide a listing of all of the provider identifiers affected by the change of ownership
- Provider Status (individual, group, performing provider, or facility)—Providers leaving group practices must send a signed letter on company letterhead to TMHP that states the date of termination. The letter should include the provider identifier, effective date of termination, and the group's provider identifier. The letter should be signed by an authorized representative of the group or the individual provider leaving the group. If the provider is joining a new group practice or enrolling as an individual, the provider must complete and submit a Texas Medicaid Provider Enrollment Application to request enrollment in the new group or as an individual provider.
- Physical Address—If a provider is changing an address, and the address is within the Medicare locality, the provider must complete and submit a Provider Information Change (PIC) Form. A W9 is required if the provider is changing the mailing address. If the address is not within the Medicare locality and Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location. Dental providers must complete a TMHP Dental Provider Enrollment Application for each practice location.
- Provider Type—Providers must submit a separate Texas Medicaid Provider Enrollment Application for each provider type enrollment requested.

TMHP must receive all claims for Medicaid services within 95 days of each date of service or within 95 days of the date the provider identifier is issued, whichever occurs later. Claims will be rejected until TMHP has issued an actual provider identifier.

Note that all claims for services rendered to Medicaid clients who do not have Medicare benefits are subject to a filing deadline from the date of service of:

- 95 days for in-state providers
- 365 days for out-of-state providers

Providers who have not been assigned a provider identifier and have questions about submitting claims may call 1-800-925-9126. Providers who have already been assigned a provider identifier and have questions about submitting claims, may call the same number and select the option to speak with a TMHP call center representative.

Providers must maintain a valid, current license or certification to be entitled for Medicaid reimbursement. Providers cannot enroll in Texas Medicaid if their license or certification is due to expire within 30 days of application. A current license or certification must be submitted, if applicable.

Refer to: "Copy of License/Temporary License/Certification" on page 1-4.

1.1.2 Enrollment in Medicaid Managed Care Programs

Providers may be eligible to enroll in the Medicaid Managed Care programs as primary care providers. To be reimbursed for services provided to Medicaid Managed Care clients, providers must enroll with the Medicaid Managed Care health plan in which their patients are enrolled.

1.1.3 Required Enrollment Forms

The following sections include forms required to enroll in the Texas Medicaid Program.

Refer to: "Enrollment" in each Medicaid service section for more information.

CPT only copyright 2005 American Medical Association. All rights reserved.

1.1.3.1 Texas Medicaid Provider Enrollment Application

The Medicaid Provider Enrollment Application must be submitted by all providers who want to enroll in the Texas Medicaid Program, and it must be signed by the person who is applying for enrollment. If the applicant is an entity, a Principal of the entity must sign the application. "Principal" is defined in "Provider and Principal Information Forms" on page 1-3. If the provider is enrolled in Medicare, the provider must submit a copy of the Medicare Confirmation Letter. Applications must be complete in order to process and issue a provider identifier.

Refer to: "Provider and Principal Information Forms" on page 1-3 for a definition of Principal.

To assist with the application process, providers are advised to complete the enrollment application online at www.tmhp.com. In addition, providers can call the TMHP Contact Center at 1-800-925-9126, Option 2, for help with completing the application. Providers should retain a copy of the original application for future reference.

Providers will be notified of incomplete applications and will have 30 business days to provide the requested missing information. If the information is not provided within 30 business days, TMHP will terminate the enrollment process and a new enrollment application must be submitted. Providers are required to review their enrollment application for correctness and completeness before submitting it to TMHP.

1.1.3.2 HHSC Medicaid Provider Agreement

The HHSC Medicaid Provider Agreement must be submitted by all providers who enroll in the Texas Medicaid Program and must be signed by the person applying for enrollment. If the applicant is an entity, a Principal of the entity must sign the application. "Principal" is defined in "Provider and Principal Information Forms" on page 1-3. This form is an agreement between HHSC and the provider performing services under the State Plan wherein the provider agrees to certain contract provisions as a condition for participation. All pages of the agreement must be present with the enrollment application.

1.1.3.3 Provider and Principal Information Forms

The Provider Information Form (PIF-1) must be personally completed by all providers enrolling in the Texas Medicaid Program. A separate Principal Information Form (PIF-2) must be personally completed by each Principal of the Provider before enrollment in the Texas Medicaid Program. Principals of the Provider include an owner with a direct or indirect ownership or control interest of 5 percent or more. Principals also include corporate officers and/or directors, limited or non-limited partners, or shareholders of a professional corporation, professional association, limited liability company, or other legally designated entity. Principals further include any employee of the Provider who exercises operational or managerial control over the entity, or who directly or indirectly conducts the day-to-day operations of the entity. The Provider Information Form and the Principal Information Form must be signed by the individual to whom it applies or, in the case of an entity, signed by a Principal of the entity and notarized before they are returned to TMHP. These forms were designed across multiple state agencies to help meet the requirements set forth by the 75th Legislature's Senate Bill (SB) 30 to enhance the enrollment requirements for potential providers, meet federal requirements for enrollment, and improve the integrity of the Medicaid program.

1.1.3.4 Disclosure of Ownership and Control Interest Statement

The Disclosure of Ownership and Control Interest Statement must be submitted by all providers, excluding the performing providers of a group. This form provides TMHP Provider Enrollment with the appropriate information to enroll the provider as a sole proprietor, corporation, partnership, or nonprofit organization. This information determines if other enrollment forms are required. Providers are required to submit any change in ownership or corporate officers or directors to TMHP Provider Enrollment within 10 calendar days of the change.

1.1.3.5 Internal Revenue Service (IRS) W-9 Form

The IRS W-9 Form is completed and submitted by all providers excluding performing providers of a group.

1.1.3.6 Medicaid Audit Information Form

The Medicaid Audit Information Form is required by facilities such as hospitals, home health agencies, federally qualified health centers, rural health clinics, and dialysis facilities.

1.1.3.7 Corporate Board of Directors Resolution

All providers who indicate that they are a corporation on the Disclosure of Ownership and Control of Interest Statement are required to submit the Board of Directors Resolution. This form indicates the individual (by name) who is authorized by the corporation to sign the agreement forms. The secretary of the corporation must sign the Board of Directors Resolution and notarize it. If a business is city or government-owned, this form is not required. All other necessary forms are signed by the person who is authorized by the city or government charter. If the potential provider is unsure who is authorized, the following criteria apply: city–mayor; county–judge; government–governor, chancellor, chairman of the board, or president. After becoming a provider or as an owner of a provider, corporations must keep TMHP informed of changes in Officers or Directors and ownership of the corporation if the ownership is five percent or more ownership interest.

CPT only copyright 2005 American Medical Association. All rights reserved.

1.1.3.8 Certificate of Good Standing (Board Corporation Act, Article 2.45)

The Certificate of Good Standing must be submitted by all corporations that are not exempt from Franchise Tax. The Certificate of Good Standing prevents a corporation that is delinquent in Franchise Tax from being awarded a contract or granted a license or permit by the state or agency of the state. Providers must obtain the Certificate of Good Standing from the Comptroller's Office. Corporations that are nonprofit or exempt from Franchise Tax are not required to submit this form. These corporations have what the Comptroller's Office refers to as a "501C IRS Exemption." Indicate this exemption by signing the appropriate line on the Disclosure of Ownership & Control Interest Statement and marking *exempt* on the W-9 form. Out-of-state providers who do not conduct business in Texas are also exempt from submitting this form.

1.1.3.9 Certificate of Formation or Certificate of Filing

The provider must submit the Certificate of Formation or Certificate of Filing form. Obtain the form from the Office of the Secretary of State with which the corporation is registered. The name on this form must match the legal name shown on the provider agreement. Out-of-state providers are exempt from submitting this form.

Note: *Corporations formed prior to January 1, 2006, should submit their Certificate of Incorporation.*

1.1.3.10 Certificate of Authority

The Certificate of Authority and any required certifications to provide certain services must be submitted when a corporation is registered in a state other than Texas. Obtain this form from the Office of the Secretary of State of Texas. It takes the place of the Certificate of Incorporation. The form identifies the legal name of the corporation and is proof that the corporation is registered to do business in Texas.

1.1.3.11 Copy of License/Temporary License/ Certification

A copy of the provider's license must be submitted for all licensed or certified professionals except for dentists licensed by the Texas State Board of Dental Examiners, physician assistants licensed by the Texas Medical Board, and nurses licensed by the Board of Nurse Examiners for the State of Texas. Medicaid accepts temporary or provisional licenses or certifications for physicians and psychologists. A signed official letter of certification from the Board of Nurse Examiners for the State of Texas is acceptable documentation of appropriate licensure and certification for advanced practice nurses that are licensed under the multi-state license compact in a state other than Texas. The license or certification issue date is required on the Provider Information Form. For providers participating in Medicare, the Medicare effective date cannot be prior to the license issue date unless a temporary license is furnished.

All providers are required to submit updated licensure and certification as they are renewed. Providers are also required to submit to TMHP, within 10 calendar days of occurrence, notice that the provider's license or certification has been partially or completely suspended, revoked, voluntarily surrendered, or retired. Not abiding by this license and certification update requirement may impact a provider's qualification for continued participation in the Texas Medicaid Program. Include the nine-digit provider identifier on submission of the license renewal.

1.1.3.12 Group Practices

A provider group participating in the Medicare Program that applies to be a Medicaid group provider must complete a Texas Medicaid Provider Enrollment Application. Groups participating in Medicare must have a current Medicare number before enrolling with Medicaid. A valid and current Medicare number must be maintained. Performing providers of a Medicare group must also have a current Medicare number before enrolling in Medicaid. A current and valid Medicare number must be maintained. Providers must complete Section B of the application to enter the Medicare group provider number and Medicare performing provider numbers for each provider within the group.

During the Medicaid enrollment process, the Claims Administrator may waive the mandatory prerequisite for Medicare enrollment for certain providers whose type of practice is pediatric-based and who will never bill Medicare.

If additions or changes occur in the group's enrollment information (for example, a performing provider leaves or enters the group, changes an address, or a provider is no longer licensed) after the enrollment process is completed, the Medicare/Medicaid provider group must notify Medicare and Medicaid in writing within 10 calendar days of occurrence of the changes. Failure to provide this information may lead to administrative action by HHSC.

1.2 Provider Responsibilities

1.2.1 Compliance with Texas Family Code

1.2.1.1 Child Support

The *Texas Family Code* 231.006 places certain restrictions on child support obligors. Family Code 231.006(d) requires a person who applies for, bids on, or contracts for state funds to submit a statement that the person is not delinquent in paying child support. This law applies to an individual whose business is a sole proprietorship, partnership, or corporation in which the individual has an ownership interest of at least 25 percent of the business entity. This law does not apply to contracts/agreements with governmental entities or nonprofit corporations.

The required statement has been incorporated into the Texas Medicaid Provider Agreement.

CPT only copyright 2005 American Medical Association. All rights reserved.

The law also requires that payments be stopped when notified that the contractor/provider is more than 30 days delinquent in paying child support. Medicaid payments are placed on hold when notified that a provider is delinquent in child support.

1.2.1.2 Reporting Child Abuse or Neglect

Texas Family Code Sec. 261.101:(a) A person having cause to believe that a child's physical or mental health or welfare has been adversely affected by abuse or neglect by any person shall immediately make a report. (b) If a professional has cause to believe that a child has been abused or neglected, or may be abused or neglected, or that a child is a victim of an offense under Section 21.11, *Penal Code*, the professional shall make a report no later than the 48th hour after the hour the professional first suspects that the child has been, or may be abused or neglected, or is a victim of an offense under Section 21.11, *Penal Code*. A professional may not delegate to or rely on another person to make the report. In this subsection, *professional* means an individual who is licensed or certified by the state or who is an employee of a facility licensed, certified, or operated by the state and who, in the normal course of official duties or duties for which a license or certification is required, has direct contact with children. The term includes teachers, nurses, doctors, day-care employees, employees of a clinic or health care facility that provides reproductive services, juvenile probation officers, and juvenile detention or correctional officers.

Important: *A professional may not delegate to or rely on another person to make the report of abuse or neglect.*

According to *Rider 19 of the General Appropriations Act*, 78th Legislative Regular Session, 1999, House Bill 1, all Medicaid providers shall comply with the provisions of state law as set forth in Chapter 261 of the *Texas Family Code* relating to investigations of reports of child abuse and neglect and the provisions of HHSC policy. Reimbursement shall only be made to providers who have demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and HHSC policy. Provider staff shall respond to disclosures or suspicions of abuse or neglect of minors, by reporting to the appropriate agencies as required by law.

All providers shall adopt this policy as their own, report suspected sexual abuse of a child as described in this policy and as required by law, and develop internal policies and procedures that describe how to determine, document, and report instances of abuse, sexual or nonsexual.

This information is also available on the HHSC and TMHP websites at www.hhsc.state.tx.us and www.tmhp.com.

1.2.1.3 Procedures for Reporting Abuse or Neglect

Professionals as defined in the law are required to report no later than the 48th hour after the hour the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child's physical or mental health or welfare has been adversely affected by abuse.

A report shall be made regardless of whether the provider staff suspect that a report may have previously been made.

Reports of abuse or indecency with a child must be made to one of the following:

- Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (the DFPS Texas Abuse/Neglect Hotline, at 1-800-252-5400, operated 24 hours a day, 7 days a week)
- Any local or state law enforcement agency
- The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred
- The agency designated by the court to be responsible for the protection of children

The law requires the report to include the following information if known:

- The name and address of the minor
- The name and address of the minor's parent or the person responsible for the care, custody, or welfare of the child if not the parent
- Any other pertinent information concerning the alleged or suspected abuse

Reports can be made anonymously.

A provider may not reveal whether the child has been tested or diagnosed with HIV or AIDS.

If the minor's identity is unknown (e.g., the minor is at the provider's office anonymously to receive testing for HIV or a sexually transmitted disease [STD]), no report is required.

1.2.1.4 Procedures for Reporting Suspected Sexual Abuse

All providers shall ensure that their employees, volunteers, or other staff report a victim of abuse who is a minor younger than 14 who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has a confirmed STD acquired in a manner other than through perinatal transmission.

Sexual activity may include, but is not limited to, the actions described in *Penal Code* §21.11(a) relating to indecency with a child; §21.01(2) defining *sexual contact*;

CPT only copyright 2005 American Medical Association. All rights reserved.

§43.01(1) or (3)-(5) defining various sexual activities; §22.011(a)(2) relating to sexual assault of a child; or §22.021(a)(2) relating to aggravated sexual assault of a child.

Providers may voluntarily use the HHSC checklist for monitoring all clients younger than 14 who are unmarried and sexually active. The checklist, if used, as well as any report of child abuse, shall be retained as part of the client's record by each provider and made available during any monitoring conducted by HHSC.

Refer to: "Child Abuse Reporting Guidelines, Checklist for HHSC Monitoring" on page B-14.

1.2.1.5 Training

All providers must develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff must receive this training as part of their initial training/orientation. Training must be documented. As part of the training, staff must be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

1.2.2 Maintenance of Provider Information

Providers must, within 10 calendar days of occurrence, report in writing to TMHP Provider Enrollment changes in address (physical location or accounting), telephone number, name, ownership status, tax ID, and any other information pertaining to the structure of the provider's organization (for example, performing providers). Failure to notify TMHP of changes affects accurate processing and timely claims payment. Fax notification of changes to: 1-512-514-4214, Attn: Provider Enrollment.

Providers can update their address information using either the Demographic Update (DU) Form on the TMHP website or the Provider Information Change (PIC) Form on page B-73.

Providers should use the PIC Form to update physical or mailing addresses, telephone numbers, names, tax identification numbers (TIN), provider status, and other provider information on file with the Texas Medicaid and CSHCN Services Programs. The DU Form is only used to make changes to provider addresses on file with TMHP. Providers can use the DU Form on the TMHP website at any time via the My Account link. Providers will be prompted to verify their address(es) and make necessary changes at least once a year. After the update has been completed, the form can be faxed to 1-512-514-4214, or mailed to the address below for processing.

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Providers should keep a copy of the completed DU Form for their records.

Important: *Providers must create a provider administrator account to access the DU Form on the secure pages of the TMHP website. Non administrator users must be assigned by the provider administrator. Only providers or their authorized representatives can access the provider administrator accounts to obtain and complete the DU Form.*

1.2.3 Retention of Records and Access to Records and Premises

The provider must maintain and retain all necessary documentation, records, Remittance and Status (R&S) reports, and claims to fully document the services and supplies provided and delivered to a client with Medicaid coverage, the medical necessity of those, costs included in cost reports or other documents used to determine a payment rate or fee, and records or documents necessary to determine whether payment for those items or services was due and was properly made for full disclosure to HHSC and its designee. A copy of the claim and/or R&S reports only will not meet this requirement.

The provider is required to provide original records to representatives of the above organizations. As mentioned above, these records include, but are not limited to, documents related to clinical medical patient records, other records pertaining to the patient, any other records of services, items, or supplies provided to the patient and payments made for those services, diagnostic tests, documents related to diagnosis, charting billing records, invoices, documentation of delivery of items, equipment, supplies, treatment, service, laboratory results, and X-rays. Accessible information must include information that is necessary for the agencies specified in this paragraph to perform statutory functions. At the discretion of these representatives, the provider may be required to provide copies, in lieu of originals, notarized records/affidavits on each individual record documentation, promptly and at no cost to the state or federal agency. The required information may also include business and accounting records with backup support documentation, statistical documentation, computer records and data, patient sign-in sheets, and schedules. Additionally, it includes all requirements and elements described in Title 1 *Texas Administrative Code* (TAC) §§371.1617(a)(2) and 371.1601 (definition of "failure to grant immediate access"). Failure to supply these records or that which was requested, within the time frame specified, may result in payment hold to the provider's Medicaid payments, recoupment of payments for all claims related to the missing records, and/or contract cancellation and exclusion from the Medicaid program.

These records and claims must be retained for a minimum period of *five* years from the date of service or until all audit questions, appeal hearings, investigations, or court cases are resolved. Freestanding rural health clinics (RHCs) must retain their records for a minimum of *six* years, and hospital-based RHCs must retain their records

CPT only copyright 2005 American Medical Association. All rights reserved.

for a minimum of *ten* years. These records must be made available immediately at the time of the request to employees or agents of HHSC Office of Inspector General (OIG), the Texas Attorney General's Medicaid Fraud Control Unit (MFCU) or Antitrust and Civil Medicaid Fraud Section, TMHP, DFPS, the Department of Aging and Disability Services (DADS), Department of State Health Services (DSHS), Department of Assistive and Rehabilitative Services (DARS), United States Department of Health and Human Services (HHS) representatives, any state or federal agency authorized to conduct compliance, regulatory, or program integrity functions on the provider, person, or the services rendered by the provider or person, or any agent or consultant of any agency or division delineated above. In addition, the provider must meet all requirements of 1 TAC, Part 15, §371.1643(f).

If the provider was originally requested to provide original documents and subsequent requests for copies of these records are made by the provider, any and all costs associated with copying or reproducing any portion of the original records will be at the expense of the provider. This would apply to any request for copies made by the provider at any point in the investigative process until such time as the agency deems the investigation to be finalized. A method of payment for the copying charge, that is approved by the agency, would be utilized to pay for the copying of the records. If copies of records are requested from the provider initially, the provider submits copies of such records at no cost to representatives of the above organizations.

The provider must provide immediate access to the provider's premises and records for purposes of reviewing, examining, and securing custody of records, documents, electronic data, equipment, or other requested items, as determined necessary by the requestor to perform statutory functions.

If the provider places the required information in another legal entity's records, such as a hospital, the provider is responsible for obtaining a copy of these records for use by the state and federal agencies described above.

The records must be available as requested by each of these entities, during any investigation or study of the appropriateness of the Medicaid claims submitted by the provider.

1.2.4 Release of Confidential Information

Information about the diagnosis, evaluation, or treatment of a client with Medicaid coverage by a person licensed or certified to perform the diagnosis, evaluation, or treatment of any medical, mental, or emotional disorder, or drug abuse, is confidential information that the provider may disclose only to authorized people. Family planning information is sensitive, and confidentiality must be ensured for all clients, especially minors.

Only the client may give written permission for release of any pertinent information before client information can be released, and confidentiality must be maintained in all other respects. The client's signature is not required on the claim form for payment of a claim, but HHSC recommends the provider obtain written authorization from the client before releasing confidential medical information. A release may be obtained by having the client sign the indicated block on the claim form after the client has read the statement of release of information that is printed on the back of the form. The client's authorization for release of such information is not required when the release is requested by and made to DADS, HHSC, DSHS, TMHP, DFPS, DARS, HHSC OIG, the Texas Attorney General's Medicaid Fraud Control Unit or Antitrust and Civil Fraud Division, or HHS.

1.2.5 Compliance with Federal Legislation

HHSC complies with HHS regulations that protect against discrimination. All contractors must agree to comply with the following:

- Title VI of the *Civil Rights Act of 1964* (Public Law 88-352), Section 504 of the *Rehabilitation Act of 1973* (Public Law 93-112), *The Americans with Disabilities Act of 1990* (Public Law 101-336), Title 40, Chapter 73, of the TAC, all amendments to each, and all requirements imposed by the regulations issued pursuant to these acts. The laws provide in part that no persons in the United States shall, on the grounds of race, color, national origin, age, sex, disability, political beliefs, or religion, be excluded from participation in or denied any aid, care, service, or other benefits provided by federal and/or state funding, or otherwise be subjected to any discrimination.
- *Health and Safety Code 85.113* as described in "Model Workplace Guidelines for Businesses, State Agencies, and State Contractors" on page I-1 (relating to workplace and confidentiality guidelines on AIDS and HIV).

Exception: *In the case of minors receiving family planning services, only the client may consent to release of medical documentation and information. Providers must comply with the laws and regulations concerning discrimination. Payments for services and supplies are not authorized unless the services and supplies are provided without discrimination on the basis of race, color, sex, national origin, age, or disability. Send written complaints of noncompliance to the following address:*

HHSC Commissioner
1100 West 49th Street
Austin, TX 78756-3172

Reminder: *Each provider must furnish covered Medicaid services to eligible clients in the same manner, to the same extent, and of the same quality as services provided to other patients. Services made available to other patients must be made available to Medicaid clients if the services are covered by the Texas Medicaid Program.*

CPT only copyright 2005 American Medical Association. All rights reserved.

1.2.6 Utilization Control — General Provisions

Title XIX of the *Social Security Act*, Sections 1902 and 1903, mandates utilization control of all Medicaid services under regulations found at Title 42, *Code of Federal Regulations*, Part 456. Utilization review activities required by the Medicaid program are completed through a series of monitoring systems developed to ensure the quality of services provided, and that all services are both medically necessary and billed appropriately. Both clients and providers are subject to utilization review monitoring. Utilization control procedures safeguard against the delivery of unnecessary services, monitor quality, and ensure payments are appropriate and according to Medicaid policies, rules, and regulations. All providers identified as a result of utilization control activities are presented to HHSC OIG to determine any and all subsequent actions.

The primary goal of utilization control activity is to identify providers with practice patterns inconsistent with the federal requirements and the Texas Medicaid Program scope of benefits, policies, and procedures. The use of utilization control monitoring systems allows for identification of providers whose patterns of practice and use of services fall outside of the norm for their peer groups. Providers identified as exceptional are subject to an in-depth review of all Medicaid billings. These review findings are presented to the HHSC OIG to determine any necessary action. Medical records may be requested from the provider to substantiate the medical necessity and appropriateness of services billed to Medicaid. Inappropriate service utilization may result in recoupment of overpayments and/or sanctions, or other administrative actions deemed appropriate by the HHSC OIG. There are instances when a training specialist may be directed to communicate with the provider to offer assistance with the technical or administrative aspects of the program.

At the direction of the HHSC OIG, a provider's claims may be manually reviewed before payment. Parameters are developed for prepayment review based on the specific areas of concern identified in each case. As part of the prepayment review process, providers are required to submit paper claims, rather than electronic claims, along with supporting medical record documentation (e.g., clinical notes, progress notes, diagnostic testing results, other reports, superbills, X-rays, and any related medical record documentation) attached to each claim for all services billed. This documentation is used to ascertain that the services billed were medically necessary, billed appropriately, and according to Medicaid requirements and policies. Services inconsistent with Medicaid requirements and policies are adjudicated accordingly. Claims submitted initially without the supporting medical record documentation will be denied. Additional medical record documentation submitted by the provider for claims denied as a result of the prepayment review process is not considered at a later time. A provider is removed from prepayment review only when determined appropriate by the HHSC OIG. Once removed from prepayment review, a follow-up assessment of the provider's subsequent practice patterns is performed to monitor and ensure continued appropriate use of resources. Noncompliant providers are subject to administrative sanctions up to and including exclusion and contract cancellation, as deemed appropriate by the HHSC OIG as defined in the rules in 1 TAC §371.1643. Providers placed on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership
Attention: Prepayment Review MC-A11 SURS
PO Box 203638
Austin, Texas 78720-3638

1.2.7 Provider Certification/Assignment

Medicaid service providers are required to certify compliance with or agree to various provisions of state and federal laws and regulations. After submitting a signed claim to TMHP, the provider certifies the following:

- Services were personally rendered by the *billing provider* or under the personal supervision of the billing provider if appropriate or under the substitute physician arrangement.
- The information on the claim form is true, accurate, and complete.
- All services, supplies, or items billed were medically necessary for the client's diagnosis or treatment. Exception is allowed for special preventive and screening programs (for example, family planning and Texas Health Steps [THSteps]).
- Medical records document all services billed.
- All billed charges are usual and customary for the services provided. The charges must not be higher than the fees charged to private-pay patients.
- The provider will not bill the Medicaid program for services that are provided or offered to non-Medicaid patients, without charge, discounted or reduced in any fashion including, but not limited to, sliding scales or advertised specials. Any reduced, discounted, free, or special fee advertised to the public must also be offered to Medicaid clients.
- Services were provided without regard to race, color, sex, national origin, age, or handicap.
- The provider of medical care and services files a claim with the Medicaid program agreeing to accept the Medicaid reimbursement as payment in full for those services covered under the Medicaid program. The client with Medicaid coverage, or others on their behalf, must not be billed for the amount above that which is paid on allowed services or for services denied or reduced as a result of errors made in claims filing, claims preparation, missed filing deadlines, or failure to follow the appropriate appeal process. However, the client may be billed for noncovered services for which Medicaid does not make any payment. Before providing services, providers should *always* inform clients of their

CPT only copyright 2005 American Medical Association. All rights reserved.

liability for services not covered by the Medicaid program, including use of the Client Acknowledgment Statement.

- The provider understands that endorsing or depositing a Medicaid check is accepting money from federal and state funds and that any falsification or concealment of material fact related to payment may be grounds for prosecution under federal and state laws.

Providers must not bill for, and agree not to bill for, any service provided for which the client bears no liability to pay (i.e. free services). The only exceptions to this ban on billing for services that are free to the user are:

- Services offered by or through the Title V agency when the service is covered by Medicaid and rendered to an eligible client
- Services included in the Medicaid client's individualized education plan (IEP) or individualized family service plan (IFSP) if the services are covered under the Title XIX state plan, even though they are free to the users of the services

Refer to: "Supervision" on page 36-8.

1.2.7.1 Delegation of Signature Authority

A provider delegating signatory authority to a member of the office staff or to a billing service *remains responsible* for the accuracy of all information on a claim submitted for payment. A provider's employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print "Signature on File" in place of the provider's signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.

1.2.8 Billing Clients

A provider cannot require a down payment before providing Medicaid-allowable services to eligible clients, bill, nor take recourse against eligible clients for denied or reduced claims for services that are within the amount, duration, and scope of benefits of the Texas Medicaid Program if the action is the result of any of the following provider-attributable errors:

- Failure to submit a claim, including claims not received by TMHP
- Failure to submit a claim to TMHP for initial processing within the 95-day filing deadline (or the initial 365-day deadline if applicable)
- Submission of an unsigned or otherwise incomplete claim such as omission of the Hysterectomy Acknowledgment Statement or Sterilization Consent Form with claims for these procedures
- Filing an incorrect claim
- Failure to resubmit a corrected claim or rejected electronic media claim within the 120-day resubmittal period
- Failure to appeal a claim within the 120-day appeal period. Errors made in claims preparation, claims submission, or appeal process
- Failure to submit a claim to TMHP within 95 days of a denial by Titles V or XX for family planning services
- Failure to submit a claim within 95 days from the disposition date from Medicare or a primary third party insurance resource
- Failure to obtain prior authorization for services that require prior authorization under the Texas Medicaid Program

Providers must certify that no charges beyond reimbursement paid under the Texas Medicaid Program for covered services have been, or will be, billed to an eligible client. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business.

Medicaid payment to physicians for covered services includes the incidental services such as completion of required forms submitted by a nursing facility to the physician for signature. It is not acceptable for the physician to charge Medicaid clients, their family, or the nursing facility for telephone calls, telephone consultations, or signing forms. Medicaid payment is considered payment in full. The *visit reimbursement* includes the *incident to* required paperwork.

In accordance with current federal policy, the Medicaid program and Medicaid clients cannot be charged for the client's failure to keep an appointment. Only billings for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider's office policy.

Letters of inquiry about client billing are sometimes sent to providers in lieu of telephone calls from TMHP representatives. In either case, it is mandatory that the questions be answered with the requested pertinent information. Upon receipt, TMHP forwards these letters to HHSC. HHSC uses the information to resolve client billing/liability issues. It is mandatory that these letters be signed, dated, and returned within ten business days.

Refer to: "Outpatient" on page 25-15 for more information about spell of illness.

"Medically Needy Program" on page 4-10.

"Private Pay Agreement" on page B-71.

CPT only copyright 2005 American Medical Association. All rights reserved.

1.2.8.1 Client Acknowledgment Statement

The Texas Medicaid Program reimburses only for services that are medically necessary or benefits of special preventive and screening programs such as family planning and THSteps. Hospital admissions denied by the Texas Medical Review Program (TMRP) also apply under this policy. The provider may bill the client only if:

- A specific service or item is provided at the client's request
- The provider has obtained and kept a written Client Acknowledgment Statement signed by the client that states:
  - "I understand that, in the opinion of (*provider's name*), the services or items that I have requested to be provided to me on (*dates of service*) may not be covered under the Texas Medical Assistance Program as being reasonable and medically necessary for my care. I understand that the HHSC or its health insuring agent determines the medical necessity of the services or items that I request and receive. I also understand that I am responsible for payment of the services or items I request and receive if these services or items are determined not to be reasonable and medically necessary for my care."
  - "Comprendo que, según la opinión del (*nombre del proveedor*), es posible que Medicaid no cubra los servicios o las provisiones que solicité (*fecha del servicio*) por no considerarlos razonables ni médicamente necesarios para mi salud. Comprendo que el Departamento de Salud de Texas o su agente de seguros de salud determina la necesidad médica de los servicios o de las provisiones que el cliente solicite o reciba. También comprendo que tengo la responsibilidad de pagar los servicios o provisiones que solicité y que reciba si después se determina que esos servicios y provisiones no son razonables ni médicamente necesarios para mi salud."

A provider is allowed to bill the following to a client without obtaining a signed Client Acknowledgment Statement:

- Any service that is not a benefit of the Texas Medicaid Program (for example, personal care items).
- All services incurred on noncovered days because of eligibility or spell of illness limitation. Total client liability is determined by reviewing the itemized statement and identifying specific charges incurred on the noncovered days. Spell of illness limitations do not apply to medically necessary stays for THSteps-eligible clients younger than age 21 years.
- The reduction in payment that is because of the medically needy spend down (effective September 1, 2003, the Medically Needy Program [MNP] is limited to children younger than 19 years of age and pregnant women). The client's potential liability would be equal to the amount of total charges applied to the spend down. Charges to clients for services provided on ineligible days must not exceed the charges applied to spend down.
- All services provided as a private pay patient. If the provider accepts the client as a private pay patient, the provider must advise clients that they are accepted as private pay patients at the time the service is provided and responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure that the client signs written notification so there is no question how the client was accepted. Without written, signed documentation that the Medicaid client has been properly notified of the private pay status, the provider cannot seek payment from an eligible Medicaid client.
- The client is accepted as a private pay patient pending Medicaid eligibility determination and does *not* become eligible for Medicaid retroactively. The provider is allowed to bill the client as a private pay patient if retroactive eligibility is not granted. If the client becomes eligible retroactively, the client notifies the provider of the change in status. Ultimately, the provider is responsible for filing timely Medicaid claims. If the client becomes eligible, the provider *must* refund any money paid by the client and file Medicaid claims for all services rendered.

A provider attempting to bill or recover money from a client in violation of the above conditions may be subject to exclusion from the Texas Medicaid Program.

Important: *Ancillary services must be coordinated and pertinent eligibility information must be shared. The primary care physician is responsible for sharing eligibility information with others (e.g., emergency room staff, laboratory staff, and pediatricians).*

1.2.9 General Medical Record Documentation Requirements

The *Administrative Simplification Act* of the *Health Insurance Portability and Accountability Act* (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) *Current Procedural Terminology* (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific code that matches the services provided based on the code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management (E/M) services. The medical record must document the specific elements necessary to satisfy the criteria for the level of service as described in CPT. Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

CPT only copyright 2005 American Medical Association. All rights reserved.

HHSC and TMHP routinely perform retrospective reviews of all providers. This review includes comparing services billed to the client's clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client's medical record subjects the associated services to recoupment.

Important: *HHSC ultimately is responsible for Medicaid utilization review activities.*

Note: *This list is not all-inclusive. Additional and more specific requirements may apply to special services areas.*

- Mandatory–All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider.
- Mandatory–Each page of the medical record documents the patient's name and Medicaid number.
- Mandatory–Allergies and adverse reactions (including immunization reactions) are prominently noted in the record.
- Mandatory–The selection of evaluation and management codes (levels of service) is supported by the client's clinical record documentation. The AMA CPT descriptors of key/contributory components with level of service descriptions are used to evaluate the selection of levels of service.
- Mandatory–The history and physical documents the presenting complaint with appropriate subjective and objective information.
- Mandatory–The services provided are clearly documented in the medical record with all pertinent information regarding the patient's condition to substantiate the need and medical necessity for the services.
- Mandatory–Medically necessary diagnostic lab and X-ray results are included in the medical record and abnormal findings have an explicit notation of follow-up plans.
- Mandatory–Necessary follow-up visits specify time of return by at least the week or month.
- Mandatory–Unresolved problems are noted in the record.
- Desirable–Immunizations are noted in the record as *complete* or *up-to-date*.
- Desirable–Personal data includes address, employer, home/work telephone numbers, sex, marital status, and emergency contacts.

1.2.10 Stale-Date Check Process

TMHP has implemented voiding procedures for checks greater than 180 days old. When a check becomes 120 days old, TMHP sends a reminder letter to the payee. This letter notifies the payee of the check's stale date and states that TMHP will void the check if not cashed by this date. TMHP does not guarantee receipt of the 120-day letter, and all checks are voided after 180 days.

Once a check has been voided, the associated claims may not be payable, and the transaction is considered final.

1.2.11 Informing Pregnant Clients About CHIP Benefits

Section 24, SB 1188, 79th Legislature, Regular Session, 2005, requires that Medicaid providers rendering services to a pregnant Medicaid client must inform the client of the health benefits for which the client or the client's child may be eligible under the Children's Health Insurance Program (CHIP).

CHIP is available to children whose families have low to moderate income, who earn too much money to qualify for Medicaid, and who do not have private insurance. Some clients may have to pay an enrollment fee.

To qualify for CHIP, a child must be:

- A Texas resident
- Younger than 19 years of age
- A U.S. citizen or legal permanent resident
- Must meet all income and resource guidelines

CHIP benefits include:

- Physician, hospital, X-ray, and lab services
- Well-baby and well-child visits
- Immunizations
- Prescription drugs
- Durable medical equipment (DME)
- Prosthetic devices (with a $20,000 limit per 12-month period)
- Case coordination and enhanced services for children with special health care needs and children with disabilities
- Physical, speech, and occupational therapy
- Home health services
- Transplants
- Mental health services
- Vision services
- Chiropractic services

Individuals may apply for CHIP by downloading and completing the application found on the CHIP page of the HHSC website at www.hhsc.state.tx.us/chip or by calling the toll-free CHIP number at 1-800-647-6558.

CPT only copyright 2005 American Medical Association. All rights reserved.

1.3 Medicare/Medicaid Waste, Abuse, and Fraud Policy

Federal and state regulations and statutes require the Medicaid program, through the OIG, to have the ability to identify, investigate, sanction, and refer cases of suspected waste, abuse, and/or fraud in the Medicare, Medicaid, or other health and human services programs to prosecutors or licensure and certification boards and agencies. Additionally, HHSC OIG is:

- Provided the authority to exclude from program reimbursement any provider that defrauds or abuses the Medicaid program
- Required to exclude from Medicaid participation any individual who is receiving reimbursement under the Texas Medicaid Program and has been suspended from Medicare for conviction of a program-related crime or is not eligible to participate in Medicare when the Federal Office of the Inspector General for the HHS directs such action

Important: *Individuals with knowledge about suspected Medicaid waste, abuse, or fraud of provider services must report the information to the HHSC OIG. To report waste, abuse, or fraud, go to www.hhs.state.tx.us and select Reporting Waste, Abuse, or Fraud. Individuals may also call the OIG hotline (1-800-436-6184) to report waste, abuse, or fraud if they do not have access to the Internet. All information provided is protected by HHSC/OIG privacy statement. This means that the information provided will remain confidential.*

Providers may also refer cases of waste, abuse, and fraud to the OIG for civil damages and penalties (previously referred to as civil monetary penalties), authorized by state statute. Providers (individual or corporate) may be assessed in the amount that was paid, plus interest, plus up to double the amount paid, plus an amount not less than $5,000.00 or more than $15,000.00 for each violation that results in injury to an elderly or disabled person or a person younger than 18 years of age or not more than $10,000.00 for each violation that does not result in injury to a person as described above. The assessment for each violation means for each line item and/or occurrence identified on a claim, cost report, or other document resulting in or supporting fraudulent or abusive billing. Additional civil damages and penalties may be assessed under the Federal Civil Monetary Penalties Law contained in the *Social Security Act* for submitting fraudulent or abusive billings. A provider with assessed civil damages and penalties may be excluded or barred from participating in Medicare, Medicaid, or both.

A provider and the provider's staff are responsible for maintaining a current understanding of the requirements for participation in the Texas Medicaid Program and current policies, claims filing and processing procedures, and federal regulations affecting the Texas Medicaid Program through the following means:

- *Provider education*. Attendance of TMHP educational workshops, group meetings, and training sessions.
- *Texas Medicaid publications*. Use of the *Texas Medicaid Bulletin,* R&S reports, and the *Texas Medicaid Provider Procedures Manual* to inform staff of policy changes, Medicaid directives, and claims processing procedures.
- *Identification and resolution of provider problems*. Correction of deficiencies in operations identified by TMHP, the providers, or HHSC and action to resolve them.
- *Adopted agency rules*. Knowledge of the adopted agency rules published in the 1 TAC, Part 15, including, but not limited to those related to fraud and abuse contained in Chapter 371.
- *Excluded provider list*. List of excluded providers to be used by participating providers when hiring new staff or independent contractors and to ensure these persons and current employees are not on the list. Claims paid for services rendered by an excluded provider are subject to recoupment.
- *State and federal statutes*. Statutes pertinent to the Medicaid program and fraud and abuse within the Medicaid program.

Important: *A provider who delegates signature authority for claims preparation to an office staff member or to a billing service is responsible for the accuracy of all information on a claim submitted for payment. This, however, does not absolve these other individuals for their participation in any documents provided to the state or designee with false, inaccurate, or misleading information; or pertinent omissions.*

People who induce, solicit, receive, offer, or pay any remuneration (including, but not limited to, bribes, kickbacks, or rebates) directly or indirectly in relation to referrals, purchases, leases, or arrangements of services covered by Medicare or Medicaid may be in violation of state statutes and guilty of a federal felony offense. Current legislation allows for suspension of providers convicted of a criminal offense related to Medicare or Medicaid. Statutes provide that committing a felony in the Medicaid or Medicare programs may involve punishment ranging from 5 to 99 years, or life in prison and an optional monetary fine. Inducements may include a service, cash in any amount, entertainment or any item of value.

Following is a non-exclusive list of grounds/criteria for the Inspector General's administrative enforcement and/or referral for criminal, civil, or licensure or certification investigation and judicial action regarding program violations by any provider or person. Violations result from a provider or person who knew or should have known the following were violations. The headings of each group listed below are provided solely for organization and convenience and are not elements of any program violation.

1) Claims and Billing.
    a) submitting or causing to be submitted a false statement or misrepresentation, or omitting pertinent facts when claiming payment under Medicaid or other HHS program or when supplying information used to determine the

CPT only copyright 2005 American Medical Association. All rights reserved.

right to payment under Medicaid or other HHS program;

b) submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to obtain greater compensation than the provider is legally entitled to;

c) submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to meet prior authorization requirements;

d) submitting or causing to be submitted under Title XVIII (Medicare) or a state health care program claims or requests for payment containing unjustified charges or costs for items or services that substantially exceed the person's usual and customary charges or costs for those items or services to the public or the private pay patients unless otherwise authorized by law;

e) submitting or causing to be submitted claims with a pattern of inappropriate coding or billing that results in excessive costs to the Medicaid or other HHS program;

f) billing or causing claims to be filed for services or merchandise that were not provided to the recipient;

g) submitting or causing to be submitted a false statement or misrepresentation that, if used, has the potential of increasing any individual or state provider payment rate or fee;

h) submitting or causing to be submitted to the Medicaid or other HHS program a cost report containing costs not associated with the Medicaid or other HHS program or not permitted by Medicaid or other HHS program policies;

i) presenting or causing to be presented to an operating agency or its agent a claim that contains a statement or representation that the person knows or should have known to be false;

j) billing or causing claims to be submitted to the Medicaid or other HHS program for services or items furnished personally by, at the medical direction of, or on the prescription or order of a person who is excluded from the Texas Medicaid, other HHS program, or Medicare or has been excluded from and not reinstated within the Texas Medicaid, other HHS program, or Medicare;

k) billing or causing claims to be submitted to the Medicaid or other HHS program for services or items that are not reimbursable by the Medicaid or other HHS program;

l) billing or causing claims to be submitted to the Medicaid or other HHS program for a service or item which requires a prior order or prescription by a licensed health care practitioner when such order or prescription has not been obtained;

m) billing or causing claims to be submitted to the Medicaid or other HHS program for an item or service substituted without authorization for the item or service ordered, prescribed or otherwise designated by the Medicaid or other HHS program;

n) billing or causing claims to be submitted to the Medicaid or other HHS program by a provider or person who is owned or controlled, directly or indirectly, by an excluded person; *and*

o) billing or causing claims to be submitted to the Medicaid or other HHS program by a provider or person for charges in which the provider discounted the same services for any other types of patient.

2) Records and Documentation.

a) failing to maintain for the period of time required by the rules relevant to the provider in question records and other documentation that the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Medicaid or other HHS program or to provide records or documents upon written request for any records or documents determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation. Such records and documentation include, without limitation, those necessary:

i) to verify specific deliveries, medical necessity, medical appropriateness, and adequate written documentation of items or services furnished under Title XIX or Title XX;

ii) to determine in accordance with established rates appropriate payment for those items or services delivered;

iii) to confirm the eligibility of the provider to participate in the Medicaid or other HHS program; e.g., medical records (including, without limitation, X-rays, laboratory and test results, and other documents related to diagnosis), billing and claims records; cost reports, managed care encounter data, financial data necessary to demonstrate solvency of risk-bearing providers, and documentation (including, without limitation, ownership disclosure statements, articles of incorporation, by-laws, and corporate minutes) necessary to demonstrate ownership of corporate entities; and

iv) to verify the purchase and actual cost of products;

b) failing to disclose fully and accurately or completely information required by the *Social Security Act* and by 42 *Code of Federal Regulations* (CFR) Part 455, Subpart B; 42 CFR Part 420, Subpart C. 42 CFR §1001.1101; and 42 CFR Part 431;

CPT only copyright 2005 American Medical Association. All rights reserved.

c) failing to provide immediate access, upon request by a requesting agency, to the premises or to any records, documents, and other items or equipment the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Medicaid or other HHS program (see subparagraphs (A) and (B) of this paragraph), or failing to provide records, documents, and other items or equipment upon written request that are determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation, including without limitation all requirements specified in 1 TAC §371.1643(f) of this subchapter. "Immediate access" is deemed to be within 24 hours of receiving a written request, unless the requesting agency has reason to suspect fraud or abuse or to believe that requested records, documents, or other items or equipment are about to be altered or destroyed, thereby necessitating access at the actual time the request is presented or, in the opinion of the Inspector General, the request may be completed at the time of the request and/or in less than 24 hours;

d) developing false source documents or failing to sign source documents or to retain supporting documentation or to comply with the provisions or requirements of the operating agency or its agents pertaining to electronic claims submittal; *and*

e) failing as a provider, whether individual, group, facility, managed care or other entity, to include within any subcontracts for services or items to be delivered within the Medicaid program all information that is required by 42 CFR §434.10(b).

3) Program-Related Convictions.

a) pleading guilty or nolo contendere, agreeing to an order of probation without adjudication of guilt under deferred adjudication, or being a defendant in a court judgment or finding of guilt for a violation relating to performance of a provider agreement or program violation of Medicare, the Texas Medicaid program, other HHS program, or any other state's Medicaid program;

b) pleading guilty or being convicted of a violation of state or federal statutes relating to dangerous drugs, controlled substances, or any other drug-related offense;

c) pleading guilty of, being convicted of, or engaging in conduct involving moral turpitude;

d) pleading guilty or being convicted of a violation of state or federal statutes relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct relating to the delivery of a health care item or service or relating to any act or omission in a program operated or financed by any federal, state, or local government agency;

e) being convicted in connection with the interference with or obstruction of any investigation into any criminal offense that would support mandatory exclusion under 1 TAC §371.1655 of this subchapter or any offense listed within paragraph (3) of this subsection regarding program-related convictions; *and*

f) being convicted of any offense that would support mandatory exclusion under 1 TAC §371.1655 of this subchapter.

4) Provider Eligibility.

a) failing to meet standards required for licensure, when such licensure is required by state or federal law, administrative rule, provider agreement, or provider manual for participation in the Medicaid or other HHS program;

b) being excluded, suspended or otherwise sanctioned within any federal program involving the provision of health care;

c) being excluded, suspended or otherwise sanctioned under any state health care program for reasons bearing on the person's professional competence, professional performance or financial integrity;

d) failing to fully and/or correctly complete a Provider Enrollment Agreement, Provider Re-Enrollment Agreement or other enrollment form prescribed by the relevant operating agency or its agent for enrollment; *and*

e) loss or forfeiture of corporate charter.

5) Program Compliance

a) failing to comply with the terms of the Medicaid or other HHS program contract or provider agreement, assignment agreement, the provider certification on the Medicaid or other HHS program claim form, or rules or regulations published by the Commission or a Medicaid or other HHS operating agency;

b) violating any provision of the Human Resources Code, Chapter 32 or 36, or any rule or regulation issued under the Code;

c) submitting a false statement or misrepresentation or omitting pertinent facts on any application or any documents requested as a prerequisite for Medicaid or other HHS program participation;

d) refusing to execute or comply with a provider agreement or amendments when requested;

e) failing to correct deficiencies in provider operations after receiving written notice of them from an operating agency, the commission or their authorized agents;

CPT only copyright 2005 American Medical Association. All rights reserved.

f) failing to abide by applicable federal and state law regarding handicapped individuals or civil rights;

g) failing to comply with Medicaid or other HHS program policies, published Medicaid or other HHS program bulletins, policy notification letters, provider policy or procedure manuals, contracts, statutes, rules, regulations, or interpretation previously sent to the provider by an operating agency or the commission regarding any of the authorities listed above, including statutes or standards governing occupations;

h) failing to fully and accurately make any disclosure required by the *Social Security Act*, §1124 or §1126;

i) failing to disclose information about the ownership of a subcontractor with whom the person has had business transactions in an amount exceeding $25,000 during the previous 12 months or about any significant business transactions (as defined by HHS) with any wholly-owned supplier or subcontractor during the previous five years;

j) failing, as a hospital, to comply substantially with a corrective action required under the *Social Security Act*, §1886(f)(2)(B);

k) failing to repay or make arrangements that are satisfactory to the commission to repay identified overpayments or other erroneous payments or assessments identified by the commission or any Medicaid or other HHS program operating agency;

l) committing an act described in the *Social Security Act*, §1128A (mandatory exclusion) or §1128B (permissive exclusion);

m) defaulting on repayments of scholarship obligations or items relating to health profession education made or secured, in whole or in part, by HHS or the state when they have taken all reasonable steps available to them to secure repayment;

n) soliciting or causing to be solicited, through offers of transportation or otherwise, Medicaid or other HHS program recipients for the purpose of delivering to those recipients health care items or services;

o) marketing, supplying or selling confidential information (e.g., recipient names and other recipient information) for a use that is not expressly authorized by the Medicaid or other HHS program; *and*

p) failing to abide by applicable statutes and standards governing providers.

6) Delivery of Health Care Services.

a) failing to provide health care services or items to Medicaid or other HHS program recipients in accordance with accepted medical community standards or standards required by statute, regulation, or contract, including statutes and standards that govern occupations;

b) furnishing or ordering health care services or items for a recipient-patient under Title XVIII or a state health care program that substantially exceed the recipient’s needs, are not medically necessary, are not provided economically or are of a quality that fails to meet professionally recognized standards of health care; *and*

c) engaging in any negligent practice that results in death, injury, or substantial probability of death or injury to the provider's patients.

7) Improper Collection and Misuse of Funds.

a) charging recipients for services when payment for the services was recouped by Medicaid or another HHS program for any reason;

b) misapplying, misusing, embezzling, failing to promptly release upon a valid request, or failing to keep detailed receipts of expenditures relating to any funds or other property in trust for a Medicaid or other HHS program recipient;

c) failing to notify and reimburse the relevant operating agency or the commission or their agents for services paid by Medicaid or other HHS programs if the provider also receives reimbursement from a liable third party;

d) rebating or accepting a fee or a part of a fee or charge for a Medicaid or other HHS program patient referral;

e) requesting from a recipient in payment for services or items delivered within the Medicaid or other HHS program any amount that exceeds the amount Medicaid or other HHS program paid for such services or items, with the exception of any cost-sharing authorized by the program; *and*

f) requesting from a third party liable for payment of the services or items provided to a recipient under the Medicaid or other HHS program, any payment other than as authorized at 42 CFR §447.20.

8) Licensure Actions

a) having a voluntary or involuntary action taken by a licensing or certification agency or board that requires the provider or employee to comply with professional practice requirements of the board after the board receives evidence of noncompliance with licensing or certification requirements; *and*

b) having its license to provide health care revoked, suspended, or probated by any state licensing or certification authority, or losing a license or certification, because of action based on assessment of the person’s professional competence, professional performance, or financial integrity, non-compliance with Health and Safety Code, statutes governing occupations, or surren-

CPT only copyright 2005 American Medical Association. All rights reserved.

dering a license or certification while a formal disciplinary proceeding is pending before licensing or certification authorities when the proceeding concerns the person's professional competence, professional performance, or financial integrity.

9) Managed Care Organizations and Persons Providing Services or Items Through Managed Care.

   Note: *This paragraph includes those program violations that are unique to managed care; paragraphs (1) - (8) and (11) of this section also apply to managed care.)*

   a) failing, as a managed care organization (MCO), primary care case management system (PCCM), an association, group or individual health care provider furnishing services through an MCO, to provide to recipient enrollee a health care benefit, service or item that the organization is required to provide under its contract with an operating agency;

   b) failing, as a managed care organization, a PCCM or an association, group or individual health care provider furnishing services through an MCO, to provide to an individual a health care benefit, service or item that the organization is required to provide by state or federal law, regulation or program rule;

   c) engaging, as a managed care organization, in actions that indicate a pattern of wrongful denial or payment for a health care benefit, service or item that the organization is required to provide under its contract with an operating agency;

   d) engaging, as a managed care organization, in actions that indicate a pattern of wrongful delay of at least 45 days or a longer period specified in the contract with an operating agency, not to exceed 60 days, in making payment for a health care benefit, service or item that the organization is required to provide under its contract with an operating agency;

   e) engaging, as a managed care organization, a PCCM or an association, group or individual health care provider furnishing services through managed care, in a fraudulent activity in connection with the enrollment in the organization's managed care plan of an individual eligible for medical assistance or in connection with marketing the organization's services to an individual eligible for medical assistance.

   f) discriminating against enrollees or prospective enrollees on any basis, including, without limitation, age, gender, ethnic origin or health status;

   g) failing as a managed care organization, to comply with any term within a contract with a Medicaid or other HHS program operating agency to provide health care services to Medicaid or HHS program recipients; *and*

   h) failing, as a managed care organization, reasonably to provide to the relevant operating agency, upon its written request, encounter data and/or other data contractually required to document the services and items delivered by or through the MCO to Medicaid or other HHS program recipients.

10) Cost Report Violations.

   a) reporting costs of noncovered or nonchargeable services as covered items; e.g., incorrectly apportioning or allocating costs on cost reports; including costs of noncovered services, supplies or equipment in allowable costs; arrangements between providers and employees, related parties, independent contractors, suppliers, and others that appear to be designed primarily to overstate the costs to the program through various devices (such as commissions or fee splitting) to siphon-off or conceal illegal profits;

   b) reporting costs not incurred or which were attributable to nonprogram activities, other enterprises or personal expenses;

   c) including unallowable cost items on a cost report;

   d) manipulating or falsifying statistics that result in overstatement of costs or avoidance of recoupment, such as incorrectly reporting square footage, hours worked, revenues received, or units of service delivered;

   e) claiming bad debts without first genuinely attempting to collect payment;

   f) depreciating assets that have been fully depreciated or sold or using an incorrect basis for depreciation; *and*

   g) reporting costs above the cost to the related party.

11) Kickbacks and Referrals.

   a) violating any of the provisions specified in 1 TAC §371.1721(b) of this subchapter relating to kickbacks, bribes, rebates, referrals, inducements, or solicitation;

   b) as a physician, referring a Medicaid or other HHS program patient to an entity with which the physician has a financial relationship for the furnishing of designated health services, payment for which would be denied under Title XVIII (Medicare) pursuant to §1877 and §1903(s) of the *Social Security Act* (Stark I and II). Neither federal financial participation nor this state's expenditures for medical assistance under the state Medicaid plan may be used to pay for services or items delivered within the program and within a relationship that violates Stark I or II. The Commission hereby references and incorporates within these rules the federal regulations promulgated pursuant to Stark I and II, and expressly recognizes all exceptions to the

CPT only copyright 2005 American Medical Association. All rights reserved.

prohibitions on referrals established within those rules.

c) failing to disclose documentation of financial relationships necessary to establish compliance with Stark I and II, as set forth in subparagraph (b) of this paragraph; *and*

d) offering to pay or agreeing to accept, directly or indirectly, overtly or covertly any remuneration in cash or in kind to or from another for securing or soliciting a patient or patronage for or from a person licensed, certified, or registered or enrolled as a provider or otherwise by a state health care regulatory or health and human service agency.

Involvement in any of the aforementioned items may result in provider or individual exclusion or suspension from the Texas Medicaid Program. Providers or individuals are notified in writing of action taken, including appeal procedures.

Full investigation of criminal Medicaid fraud is the Texas Attorney General's Medicaid Fraud Control Unit's responsibility and may result in a felony or misdemeanor criminal conviction.

1.3.1 Suspected Cases of Provider Waste, Abuse, and Fraud

The HHSC OIG is responsible for minimizing the opportunity for provider waste, abuse, and fraud. HHSC takes appropriate action to protect clients and the Texas Medicaid Program when providers of services are suspected of committing waste, abuse, or fraud. HHSC OIG is responsible for establishing criteria for identifying cases of possible waste, abuse, or fraud and recouping all overpayments from a provider. Some circumstances may result in referral of a provider to the Texas Attorney General's Medicaid Fraud Control Unit or Antitrust and Civil Medicaid Fraud Section for further investigation, whereas other circumstances might result in administrative sanctions or actions deemed appropriate by the HHSC OIG.

1.3.2 Employee Education on False Claims Recovery

In accordance with the *United States Code* (USC), Title 42, §1396a(a)(68), and as a condition for receiving payments, any entity that receives or makes annual Medicaid payments of at least $5,000,000 shall establish written policies for all employees of the entity as well as all employees of any contractor or agent of the entity (including management) that provide detailed information about the following laws and their role in preventing and detecting waste, fraud, and abuse in federal health care programs:

- The federal *False Claims Act* (31 USC §§3729-3733)
- Administrative remedies for false claims and statements as provided in Chapter 38 of Title 31, USC
- Texas law relating to civil and criminal penalties for false claims (including Chapter 36 of the *Human Resources Code*, Section 35A.02 of the *Penal Code*, Title 1, Chapter 371, Subchapter G of the TAC, and other applicable law)
- Whistleblower protections under the above laws (including section 36.115 of the *Human Resources Code*)

The entity must also include, as part of the above written policies, detailed provisions regarding the policies and procedures of the entity for detecting and preventing fraud, waste, and abuse. In addition, the entity must also include in any employee handbook a specific discussion of the following:

- The above laws
- The entity's policies and procedures for detecting and preventing fraud, waste, and abuse
- The rights of employees to be protected as whistleblowers

1.4 Medicaid Program Limitations and Exclusions

Medicaid pays for services on behalf of clients to the provider of service according to the Texas Medicaid Program's limitations and procedures. TMHP does not make Medicaid payments directly to clients.

The following services, supplies, procedures, and expenses are not Medicaid benefits. This list is *not* all inclusive.

- Autopsies
- Biofeedback therapy
- Bladder stimulators (Pacemaker)
- Breast implants
- Cardiac rehabilitation programs
- Care and treatment related to any condition for which benefits are provided or available under Workers' Compensation laws
- Cellular therapy
- Chemolase injection (chymodiactin, chymopapain)
- Chemonucleolysis intervertebral disc
- Custodial care
- Dentures or endosteal implants for adults
- Dermabrasion
- Direct graduate medical education for teaching hospitals
- DME such as wheelchairs, crutches, and walkers, except when these items are prior authorized as a home health benefit
- DME (except THSteps-CCP and home health
- Dressings/supplies billed in physician's office
- Ergonovine provocation test

CPT only copyright 2005 American Medical Association. All rights reserved.

- Excise tax
- Fabric wrapping of abdominal aneurysms
- Fetal fibronectin
- Gastric stapling/bypass
- Hair analysis
- Heart–lung monitoring during surgery
- Histamine therapy–intravenous
- Hyperthermia
- Hysteroscopy for infertility
- Immunizations or vaccines unless they are otherwise covered by the Texas Medicaid Program. (These limitations do not apply to services provided through the THSteps Program)
- Immunotherapy for malignant diseases
- Inborn errors of metabolism
- Infertility
- Inpatient hospital services to a client in an institution for tuberculosis, mental disease, or a nursing section of public institutions for the mentally retarded
- Inpatient hospital tests that are not specifically ordered by a physician/doctor who is responsible for the diagnosis or treatment of the client's condition
- Intestinal bypass surgery and gastric stapling for the treatment of morbid obesity
- Intragastric balloon for obesity
- Intravenous embolization–cerebral, maxillary, and renal
- Joint sclerotherapy
- Keratoprosthesis/refractive keratoplasty
- Laetrile
- Mammoplasty for gynecomastia
- More than $200,000 per client per benefit year (November 1 through October 31) for any medical and remedial care services provided to a hospital inpatient by the hospital. If the $200,000 amount is exceeded because of an admission for an approved organ transplant, the allowed amount for that claim is excluded from the computation. This limitation does not apply to clients eligible for the THSteps-Comprehensive Care Program (THSteps-CCP)
- More than 30 days of inpatient hospital stay per spell of illness–each spell of illness must be separated by 60 consecutive days during which the client has not been an inpatient in a hospital

  Important:*THSteps-CCP provides medically necessary, federally allowable treatment for Medicaid/THSteps-eligible clients younger than 21 years of age. Some medical services that usually would not be covered under Medicaid may be available to CCP-eligible clients. An additional 30-day spell of illness begins with the date of specified covered organ transplant. No spell of illness limitation exists for Medicaid THSteps clients younger than 21 years of age.*

  Note: *Members of the STAR and STAR+PLUS programs are not limited by the spell of illness.*
- Obsolete diagnostic tests
- Oral medications, except when billed by a hospital and given in the emergency room or the inpatient setting (hospital take-home drugs or medications given to the client are not a benefit)
- Orthoptics (except THSteps-CCP)
- Orthotics (except THSteps-CCP)
- Outpatient and nonemergency inpatient services provided by military hospitals
- Outpatient behavioral health services performed by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, social worker, or psychological associate regardless of physician or licensed psychologist supervision
- Oxygen (except THSteps-CCP and home health)
- Payment for eyeglass materials or supplies regardless of cost if they do not meet Medicaid program specifications
- Payment to physicians for supplies is not an allowable charge. All supplies, including anesthetizing agents such as Xylocaine, inhalants, surgical trays, or dressings, are included in the surgical payment
- Penile prosthesis
- Podiatry, optometric, and hearing aid services in long term care facilities, unless ordered by the attending physician
- Private room facilities except when a critical or contagious illness exists that results in disturbance to other patients and is documented as such when it is documented that no other rooms are available for an emergency admission, or when the hospital only has private rooms
- Procedures and services considered experimental or investigational
- Prosthetic and orthotic devices
- Prosthetic eye or facial quarter
- Psychiatric services:
  - Outpatient behavioral health services exceeding 30 visits per calendar year for which no prior authorization has been given
  - Reimbursement is not available for inpatient psychiatric hospital services, including physician fees, delivered to clients between 22 and 64 years of age
  - Outpatient behavioral health services in freestanding psychiatric hospitals for Medicaid (except THSteps-CCP and NorthSTAR Program clients in the Dallas Managed Care Service Area)

CPT only copyright 2005 American Medical Association. All rights reserved.

- Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services.

Refer to: "Licensed Marriage and Family Therapist (LMFT)" on page 29-1, "Licensed Clinical Social Worker (LCSW)" on page 28-1, "Licensed Professional Counselor (LPC)" on page 30-1, "Physician" on page 36-1, and "Psychologist" on page 38-1 for further information.

- Quest test (infertility)
- Recreational therapy
- Review of old X-ray films
- Routine circumcision for clients age one year and older
- Separate fees for completing or filing a Medicaid claim form. The cost of claims filing is to be incorporated in the provider's usual and customary charges to all clients
- Services and supplies to any resident or inmate in a public institution
- Services or supplies for which benefits are available under any other contract, policy, or insurance, or which would have been available in the absence of the Medicaid program
- Services or supplies for which claims were not received within the filing deadline
- Services or supplies not reasonable and necessary for diagnosis or treatment
- Services or supplies not specifically provided by the Texas Medicaid Program
- Services or supplies provided in connection with a routine physical examination, except in connection with family planning services, THSteps, or the Medicaid Managed Care programs
- Services or supplies provided in connection with cosmetic surgery except as required for the prompt repair of accidental injury or for improvement of the functioning of a malformed body member, or when prior authorized for specific purposes by TMHP (including removal of keloid scars)
- Services or supplies provided outside of the United States, except for deductible and coinsurance portions of Medicare benefits as provided for in this manual
- Services or supplies provided to a client after a finding has been made under utilization review procedures that these services or supplies are not medically necessary
- Services or supplies provided to a Medicaid client before the effective date of his or her designation as a client, or after the effective date of his or her denial of eligibility
- Services payable by any health, accident, other insurance coverage, or any private or other governmental benefit system, or any legally liable third party
- Services provided by an interpreter
- Services provided by ineligible, suspended, or excluded providers
- Services provided by the client's immediate relative or household member
- Services provided by Veterans Administration facilities or U.S. public health service hospitals
- Sex change operations
- Silicone injections
- Social and educational counseling except for family planning and genetics education and counseling services
- Sterilization reversal
- Sterilizations (including vasectomies) unless the client has given informed consent 30 days before surgery, is mentally competent, and is 21 years of age or older at the time of consent (This policy complies with 42 CFR §441.250, Subpart F.)
- Take-home and self-administered drugs except as provided under the vendor drug or family planning pharmacy services
- Tattooing
- Telephone calls with clients or pharmacies (except as allowed for case management)
- Thermogram
- Treatment for obesity
- Treatment of flatfoot conditions and the prescription of supportive devices (including special shoes), the treatment of subluxations of the foot and routine foot care more than once every six months, including the cutting or removal of corns, warts, or calluses, the trimming of nails, and other routine hygienic care
- Whole blood or packed red cells when available at no cost to the client

2.1 Reimbursement

Texas Medicaid Program reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT). With EFT, TMHP directly deposits reimbursement into a provider's bank account. Effective immediately, stale-dated checks (i.e., checks that are older than 180 days) that have not been cashed are voided and/or applied to any outstanding accounts receivable. If the balance on a stale-dated check after it has been applied to accounts receivable is over $5,000, written notification is sent to the provider 30 days before the void occurs.

2.1.1 Electronic Funds Transfer

EFT is a method for directly depositing funds into a designated bank account. When providers enroll, TMHP deposits funds from their approved claims directly into their designated bank account. Transactions transmitted through EFT contain descriptive information to help providers reconcile their bank accounts.

2.1.1.1 Using EFT

As a result of the 76th legislature, House Bill 2085 recommends that all Texas Medicaid service providers receive payment by EFT. All providers are strongly encouraged to participate in EFT. EFT does not require special software and providers can enroll immediately. Complete the EFT form, include a deposit slip or canceled check, and mail the items to:

Texas Medicaid & Healthcare Partnership
Attn: Provider Enrollment
PO Box 200795
Austin, TX 78720–0765

Refer to: "Electronic Funds Transfer (EFT) Authorization Agreement" on page B-38

2.1.1.2 Advantages of EFT

- Stop payments are no longer necessary because no paper is involved in the transaction process.
- Payment theft is less likely to occur because the process is handled electronically rather than by paper.
- Deposited funds are available for withdrawal the Thursday morning following the completed financial cycle.
- Upon deposit, the bank considers the transaction immediately collected. No float is attached to EFT deposits for Texas Medicaid funds.
- TMHP includes provider and Remittance and Status (R&S) report numbers with each transaction submitted. If the bank's processing software captures and displays the information, both numbers would appear on the banking statement.

2.1.1.3 Enrollment Procedures

The Electronic Funds Transfer (EFT) Authorization Agreement can be requested by contacting the Provider Enrollment department at 1-800-925-9126. Completed EFT forms can be faxed to 1-512-514-4214. Please include:

- EFT Enrollment Form
- Organization name
- Contact name
- Address
- Contact telephone number
- Contact fax number

To enroll for EFT, providers must submit a completed Electronic Funds Transfer (EFT) Authorization Agreement to TMHP. A voided check or copy of a deposit slip must be attached to the enrollment form. One form should be filled out for each billing provider identifier, including an original signature of the provider.

TMHP issues a prenotification transaction during the next cycle directly to the provider's bank account. This transaction serves as a checkpoint to verify EFT is working correctly.

If the bank returns the prenotification without errors, the provider will begin receiving EFT transactions with the third cycle following the enrollment form processing. The provider will continue to receive paper checks until they begin to receive EFT transactions.

If the provider changes bank accounts, the provider must submit a new Electronic Funds Transfer (EFT) Authorization Agreement to Provider Enrollment. The prenotification process is repeated and, once completed, the EFT transaction is deposited to the new bank account.

Refer to: "Electronic Funds Transfer (EFT) Authorization Agreement" on page B-38.

2.2 Reimbursement Methodology

Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid Program service describes the appropriate reimbursement for each service area.

Note: *Medicaid reimbursement through the State of Texas Access Reform (STAR), STAR+PLUS, and NorthSTAR Program health plans may differ according to the provider's contract with the health plan.*

CPT only copyright 2005 American Medical Association. All rights reserved.

2.2.1 Fee Schedules

The Texas Medicaid Program reimburses certain providers based on rates published in fee schedules. These rates are uniform statewide and by provider type. According to this type of reimbursement methodology, the provider is paid the lower of its billed charges or the Medicaid rate published in the fee schedules available at www.tmhp.com.

The following provider types are reimbursed based on rates published in fee schedules, with the rates calculated in accordance with the referenced reimbursement methodology as published in the *Texas Administrative Code*, Part 1 Administration, Part 15 Texas Health and Human Services Commission, and Chapter 355 Reimbursement Rates.

- *Ambulatory Surgical Center (ASC)*. The Medicaid rates for ASCs are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8121. The current ASC/hospital-based ASC (HASC) fee schedule is available on the TMHP website. There is also an insert to the fee schedule available on the TMHP website. (See also Section 9 of this manual.)
- *Birthing Center*. The Medicaid rates for birthing centers are calculated in accordance with 1 TAC §355.8181 and are listed in Section 10 of this manual.
- *Blind Children's Vocational Discovery and Development Program (BCVDDP)*. The Medicaid rate for this service is calculated in accordance with 1 TAC §355.8381 and is listed in Section 11 of this manual.
- *Case Management for Children and Pregnant Women (CPW)*. The Medicaid rates for this service are calculated in accordance with 1 TAC §355.8401 and are listed in Section 12 of this manual.
- *Case Management for Early Childhood Intervention (ECI)*. The Medicaid rate for this service is calculated in accordance with 1 TAC §§355.8421 and 355.8423 and is listed in Section 13 of this manual.
- *Certified Nurse-Midwife (CNM)*. The Medicaid rates for CNMs are calculated in accordance with 1 TAC §355.8161. The current CNM fee schedule is available on the TMHP website. (See also Section 14 of this manual.)
- *Certified Registered Nurse Anesthetist (CRNA)*. According to 1 TAC §355.8221, the Medicaid rate for CRNAs is 92 percent of the rate reimbursed to a physician anesthesiologist for the same service. The current CRNA fee schedule is available on the TMHP website. (See also Section 15 of this manual.)
- *Certified Respiratory Care Practitioner (CRCP).* The Medicaid rate for CRCP is calculated in accordance with 1 TAC §355.8087 and is $66.68 per daily visit for 1-99503. (See also Section 16 of this manual.)
- *Chemical Dependency Treatment Facility (CDTF)*. The Medicaid rates for CDTF services are calculated in accordance with 1 TAC §355.8241 and are listed in Section 17 of this manual.
- *Chiropractic Services*. The Medicaid rates for chiropractic services are calculated in accordance with 1 TAC §355.8081 and 1 TAC §355.8085 and are listed in Section 18 of this manual.
- *Dental*. The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §355.8085. The procedure codes covered for dentists and the applicable rates are listed in Section 19 of this manual.
- *Durable Medical Equipment (DME)*. The current DME fee schedule is available on the TMHP website at www.tmhp.com. A provider reimbursed according to the fee schedule is reimbursed the lower of the provider's billed charges or the published Medicaid fee. TMHP manually prices DME and expendable supplies other than nutritional products that have no established fee, based on the manufacturer's suggested retail price (MSRP) less 18 percent, with documentation of the MSRP submitted by the provider. If there is no MSRP available, reimbursement is at an established percentage of the provider's invoice cost. Nutritional products that require manual pricing are priced at 89.5 percent of the average wholesale price (AWP). Home Health Agencies (HHAs) are reimbursed for DME and expendable supplies in accordance with 1 TAC §355-8021 (b)-(c). Texas Health Steps (THSteps) is reimbursed for DME and expendable supplies in accordance with 1 TAC §355-8441 (4)-(5).
- *Family Planning Services*. The Medicaid rates for family planning services are calculated in accordance with 1 TAC §355.8584 and are listed in Section 20 of this manual.
- *Genetic Services*. The procedure codes and Medicaid rates for genetic services are listed in Section 22 of this manual. TMHP manually prices genetic laboratory services that have no established fee.
- *Hearing Aid and Audiometric Evaluations*. Newborn hearing screenings are provided at the birthing facility before hospital discharge and, as such, are reimbursed in accordance with the reimbursement methodology for the specific type of birthing facility. Outpatient hearing screening and diagnostic testing services for children are provided by physicians and are reimbursed in accordance with the reimbursement methodology for physician services. (See also Section 23 of this manual.)
- *Texas Medicaid (Title XIX) Home Health Services*. The reimbursement methodology for professional services delivered by home health agencies (HHAs) are statewide visit rates calculated in accordance with 1 TAC §355.8021(a).
- *Independent Laboratory*. The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8081 and §355.8610, and the *Deficit Reduction Act of 1984* (DEFRA). By federal law, Medicaid payments for a clinical laboratory service cannot exceed the Medicare payment for that service. Early Periodic Screening, Diagnosis, and Treatment (EPSDT)/THSteps medical and newborn screening

CPT only copyright 2005 American Medical Association. All rights reserved.

laboratory services provided by the Department of State Health Services (DSHS) Laboratory are reimbursed based on actual costs in accordance with 1 TAC §355.8610. (See also Sections 26 and 43 of this manual.)

- *Indian Health Services*. The reimbursement methodology for outpatient services provided in Indian Health Services Facilities operating under the authority of Public Law 93-638 is located at 1 TAC §355.8620. The procedure code for reimbursing these services is T1015, and the current encounter rate is $223.
- *In-Home Total Parenteral Hyperalimentation Supplier*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8087. The procedure codes reimbursable to these providers are listed in Section 26 of this manual and are reimbursed as a package of services or a global fee of $145 per day, with an annual maximum of $53,000.
- *Licensed Marriage and Family Therapist (LMFT)*. According to 1 TAC §355.8091, the Medicaid rate for LMFTs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. (See also Section 29 of this manual.)
- *Licensed Clinical Social Worker (LCSW)*. According to 1 TAC §355.8091, the Medicaid rate for LCSWs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. (See also Section 28 of this manual.)
- *Licensed Professional Counselors (LPCs)*. According to 1 TAC §355.8091, the Medicaid rate for LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. (See also Section 30 of this manual.)
- *Maternity Service Clinic (MSC)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8201. The procedure codes reimbursable to these providers are listed in Section 31 of this manual, and the Medicaid rates are listed in the current fee schedule, which is available on the TMHP website.
- *Mental Health (MH) Mental Retardation (MR)*. The Medicaid rates for MH case management are calculated in accordance with 1 TAC §355.743 and those for mental retardation (MR) service coordination are calculated in accordance with 1 TAC §355.746. The Medicaid rates for MH rehabilitative services are calculated in accordance with 1 TAC §355.781. The procedure codes covered by these services are listed in Section 32 of this manual.
- *Nurse Practitioners (NPs), Clinical Nurse Specialists (CNSs).* According to Title 1 TAC §355.8281, the Medicaid rate for NPs and CNSs, is 92 percent of the rate paid to a physician (Doctor of Medicine [MD] or Doctor of Osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The current fee schedule for NP and CNS is available on the TMHP website. (See also Section 34 of this manual.)
- *Physical Therapists/Independent Practitioners*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085. The procedure codes reimbursable to these providers are listed in Section 35 of this manual, and the Medicaid rates are listed in the current fee schedule, which is available on the TMHP website.
- *Physician*. The Medicaid rates for physicians and certain other practitioners are calculated in accordance with 1 TAC §355.8085. The current fee schedule is available on the TMHP website. See Section 2.2.1.1, "Physician Services in Outpatient Hospital Setting" on page 2-5. (See also Section 36 of this manual.)
- *Physician Assistant (PA)*. According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The current fee schedule for PAs is available on the TMHP website. (See also Section 34 of this manual.)
- *Psychologist*. The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085. The procedure codes reimbursable to psychologists are listed in Section 38 of this manual, and the Medicaid rates are listed in the current fee schedule, which is available on the TMHP website.
- *Radiological and Physiological Laboratory and Portable X-Ray Supplier*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085. The procedure codes reimbursable to these providers are listed in Section 39 of this manual, and the Medicaid rates are listed in the current fee schedule, which is available on the TMHP website.
- *Renal Dialysis Facility*. The Medicaid rates for these providers are composite rates based on calculations specified by the Centers for Medicare & Medicaid Services (CMS). The procedure codes reimbursable to these providers are listed in Section 40 of this manual, and the Medicaid rates are listed in the current fee schedule, which is available on the TMHP website.
- *School Health and Related Services (SHARS)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8301. The procedure codes reimbursable to these providers and the applicable rates are listed in Section 42 of this manual.
- *Texas Health Steps (THSteps)*. THSteps reimburses by provider type in accordance with 1 TAC §355.8441. Approved providers enrolled in the Texas Medicaid Program are reimbursed for THSteps services in the same manner as they are reimbursed for other Medicaid services. Some of the procedure codes reimbursable under THSteps are listed in Section 43 of this manual. THSteps-Comprehensive Care Program (CCP) reimburses for DME and expendable supplies in accordance with 1 TAC §355.8441(4)-(5).

CPT only copyright 2005 American Medical Association. All rights reserved.

- *Tuberculosis (TB) Clinics*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8341. Procedure codes and applicable rates for these providers are listed in Section 44 of this manual.
- *Vision Care (Optometrists, Opticians)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085. The current fee schedule for optometrists is available on the TMHP website. (See also Section 45 of this manual.)

Call the TMHP Contact Center at 1-800-925-9126 to request one of the referenced fee schedules.

2.2.1.1 Physician Services in Outpatient Hospital Setting

Section 104 of the *Tax Equity and Fiscal Responsibility Act of 1982* (TEFRA) requires that Medicare/Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices. The limit is 60 percent of the Medicaid rate for the service furnished in physician offices. The following table identifies the services applicable to the 60 percent limitation when furnished in outpatient hospital settings:

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215	1-99281	1-99282
1-99283	1-99284	1-99285

These procedures are designated with note code "1" in the current fee schedule, which is available on the TMHP website. The following list shows the services excluded from the 60 percent limitation:

- Services furnished in rural health clinics (RHCs)
- Surgical services that are covered ASC/HASC services
- Anesthesiology and radiology services
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client's health
  - Serious impairment to bodily functions
  - Serious dysfunction of any bodily organ or part

Exception: *Because of TEFRA, Medicaid reimbursement for a payable nonemergency office service performed in the outpatient department of a hospital is limited to 60 percent of the Medicaid rate for that service. If the condition qualifies as an emergency, the 60 percent professional service reimbursement limit does not apply.*

2.2.1.2 Drugs/Biologicals

Physician-administered drugs/biologicals are reimbursed under the Texas Medicaid Program as access-based fees under the physician fee schedule in accordance with 1 TAC §355.8085. Physicians and certain other practitioners are reimbursed for physician-administered drugs/biologicals at the lesser of their usual and customary or billed charges and the Medicaid fee established by the HHSC. The Medicaid fee is an estimate of the provider's acquisition cost for the specific drug/biological.

The following guidelines are effective for dates of service on and after October 1, 2006, with respect to fee decisions for physician-administered drugs/biologicals:

- Vaccines and infusion drugs furnished through an item of implanted durable medical equipment are based on the lesser of documented provider acquisition/invoice cost (if available) or 89.5 percent of the AWP.
- Certain, specific drugs studied by the Office of Inspector General (OIG)/General Accounting Office (GAO) are based on the lesser of documented provider acquisition/invoice cost (if available) or the recommended percentages of AWP resulting from those studies (Table 1 in §20 of Chapter 17 of the *Medicare Claims Processing Manual*, Pub. 100-04).
- The remaining drugs/biologicals not listed in two previous bullets above that are covered by Medicare are based on the lesser of documented provider acquisition/invoice cost (if available) or 106 percent of average sales price (ASP).
- Those remaining drugs/biologicals not listed in the first two bullets above that are not covered by Medicare are based on the lesser of documented provider acquisition/invoice cost or:
  - 89.5 percent of AWP if the drug/biological is considered a new drug/biological (i.e., approved for marketing by the Food and Drug Administration within 12 months of implementation as a benefit of the Texas Medicaid Program); or
  - 85.0 percent of AWP if the drug/biological does not meet the definition of a new drug (above).

HHSC reserves the option to use other data sources to determine Medicaid fees for drugs/biologicals when AWP or ASP calculations are determined to be unreasonable or insufficient.

Payments for drugs/biologicals are excluded from the 2.5 percent Medicaid payment reduction.

Prescriptions are covered under the Texas Medicaid Vendor Drug Program (VDP). The reimbursement methodology for pharmacy services is located at

1 TAC §§355.8541-355.8551. Effective October 13, 2003, the dispensing fee was reduced by 2.5 percent (1 TAC §355.8551).

CPT only copyright 2005 American Medical Association. All rights reserved.

2.2.2 Reasonable Cost/Interim Rates

Outpatient hospital services are reimbursed in accordance with 1 TAC §355.8061. The reimbursement methodology is based on reasonable costs, and providers are reimbursed at an interim rate based on the provider's most recent Medicaid cost report settlement. This interim rate is applied to the provider's allowed amount (per claim detail) to determine the provider's payable amount.

2.2.3 Hospitals

Inpatient hospital services are reimbursed in accordance with 1 TAC §355.8063. Reimbursement for in-state children's hospitals is made in accordance with 1 TAC §355.8063(o). Guidelines for additional reimbursement to disproportionate share hospitals are located at 1 TAC §355.8065, while the reimbursement methodology for disproportionate share hospitals is located at 1 TAC §355.8067. Supplemental payment guidelines to certain rural public hospitals are located at 1 TAC §355.8069.

2.2.4 Provider-Specific Visit Rates

Medicaid provider-specific prospective payment system (PPS) visit rates for RHCs are calculated in accordance with 1 TAC §355.8101, and those for federally qualified health centers (FQHCs) are calculated in accordance with 1 TAC §355.8261. (See also Section 21 for more information regarding FQHCs and Section 41 for RHCs.)

2.2.5 Reasonable Charge Payment Methodology

Ambulance services are reimbursed according to a reasonable charge payment methodology in accordance with 1 TAC §355.8600. (See also Section 8 of this manual.)

2.2.6 Manual Pricing

When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement. The manual pricing methodology for DME and expendable supplies is included with the reimbursement methodology for these products.

2.3 Professional Providers and Outpatient Facilities Reimbursement Reduction

As per Article II of House Bill 1 and Section 2.03 of House Bill 2292, 78th Texas Legislature, Regular Session 2003, Medicaid payments for professional and outpatient services were reduced by 2.5 percent during the claims process.

These payment reductions apply to Medicaid fee-for-service, Medicaid Primary Care Case Management (PCCM), Medicaid Managed Care, Family Planning, and the Children with Special Health Care Needs (CSHCN) Services Programs, with the exceptions noted below. The following services are excluded from the 2.5 percent Medicaid payment reduction:

- Services provided by FQHCs and RHCs
- Services provided by public providers that certify the state portion of their payments
- Family Planning (Title X) services
- Targeted Case Management for ECI services
- DME and expendable supplies, including nutritional products
- Children's hospitals
- CSHCN outpatient and inpatient claims
- CSHCN hemophilia claims, drug co-payments, and transportation of remains
- Drugs/biologicals and supplies for physician/practitioner services
- Medicare crossover claims
- Indian Health Services

Providers should continue to bill their usual and customary charges and not make changes to their billed charges based on any Medicaid payment reduction. For those providers whose usual and customary charges exceed Medicaid fees but use Medicaid fees as their billed charges in order to lessen their accounting adjustments, the billed charges should not change because the Medicaid fees have not changed.

Payments for Medicaid and Medicaid Managed Care inpatient claims are not reduced during the claims payment process, rather the actual calculations of the standard dollar amount (SDA) and TEFRA cost reimbursement for inpatient hospitals are reduced. A notification letter was mailed later to each hospital stating its SDA amount, effective for services delivered on or after September 1, 2004.

Payments to pharmacies for prescriptions are not reduced during the claims process, rather the actual amount of the estimated dispensing expense and inventory management factor were reduced.

2.4 Additional Payments to High-Volume Providers

Primary care providers include the following medical professionals:

- Medical doctors
- Doctors of osteopathy

CPT only copyright 2005 American Medical Association. All rights reserved.

- Independently practicing advanced practice nurses (APNs) defined as family/general practice, internal medicine, obstetrics/gynecology, pediatrics, certified registered nurse midwives, and family and pediatric APNs

Note: *PAs are not eligible for high-volume provider status for dates of service prior to July 1, 2006, because PAs were not eligible to enroll as Medicaid providers during the qualification period, which was State Fiscal Year 2004. However, PAs will be eligible for high-volume provider status for any future qualification period that includes dates of service on or after July 1, 2006.*

To receive high-volume add-on payments, high-volume primary care providers are those providers who were paid a minimum of 3,600 Medicaid units of service for the qualification period. High-volume primary care providers get a 1.9 percent add-on payment for all Medicaid services performed.

High-volume specialty care providers are medical professionals enrolled with a provider specialty from the following list:

- Allergy
- Anesthesiology
- Cardiovascular disease
- CRNA
- Dermatology
- Ear, nose and throat
- Gastroenterology
- General surgery
- Geriatrics
- Hand surgery
- Nephrology
- Neurosurgery
- Nuclear medicine
- Ophthalmology
- Orthopedic surgery
- Pathology
- Physical medicine and rehabilitation
- Plastic surgery
- Proctology
- Psychiatry
- Pulmonary disease
- Radiology
- Thoracic surgery
- Urology

To receive high-volume add-on payments, high-volume specialists are those specialty care providers who provided units of service in the top 50 percent of total services paid within the specialty during the qualification period. High-volume specialists get a 6.1 percent add-on payment for all Medicaid services performed.

To receive high-volume dentist payments, high-volume dentists are those dental providers who were paid a minimum of 3,600 units of service during the qualification period. High-volume dental providers get a 3.7 percent add-on payment for all Medicaid services performed.

Outpatient hospital services are those services provided by outpatient hospitals and ASCs/HASCs. The definition of a high-volume outpatient hospital provider is one that was paid a minimum of $200,000 during the qualifying period. This criterion captured about 95 percent of total outpatient hospital spending. Similar criteria were developed for ASCs/HASCs, such that providers accounting for 95 percent of total payments were designated as high-volume providers. Payments to high-volume outpatient hospitals were increased by 5.2 percent. The new payment amount was implemented by increasing the discount factor for designated high-volume providers of outpatient hospital services from 80.3 percent to 84.48 percent. ASCs/HASCs that qualify as high-volume providers also receive a 5.2 percent increase in payment rates.

Medicaid payments for services provided by physicians, dentists, and other professionals and outpatient services provided in hospitals and ASCs/HASCs are reduced by 2.5 percent at the end of the claims payment process. Therefore, any applicable high-volume add-on payments are first added to the payment amount before being reduced by 2.5 percent.

2.5 Medicaid Service Provided Outside Texas

Any eligible provider in a state other than Texas who provides services to Texans eligible for Medicaid is entitled to bill the Texas Medicaid Program. The provider must contact TMHP Provider Enrollment to obtain the appropriate forms, requirements, and guidelines for claims filing; complete the forms; and return them to TMHP.

The Texas Medicaid Program covers medical assistance services provided to eligible Texas recipients while absent from Texas, as long as they do not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the provider meets one or more of the following requirements of 1 TAC 355.8083:

- The medical services are needed because of a medical emergency documented by the attending physician or other provider.

  Note: *Providers enrolled for this criteria will be enrolled for a period of 90 days from the enrollment date.*

- The services are medically necessary and, in the opinion of the attending physician or other provider, the recipient's health is endangered if he is required to travel to Texas.

  Note: *Providers enrolled for this criteria will be enrolled for a period of 90 days from the enrollment date.*

CPT only copyright 2005 American Medical Association. All rights reserved.

- The department or its designee determines that the medically necessary services are more readily available in the state where the recipient is located.
- The customary or general practice for recipients in a particular locality is to use medical resources in the other state.
- The department makes Title IV-E adoption assistance or Title IV-E foster care maintenance payments for a child who is also eligible for Texas medical assistance benefits.
- Other out-of-state medical care may be considered when prior authorized by the department or its designee.

  Note: *Providers enrolled for this criteria will be enrolled for a period of 90 days from the enrollment date.*

Providers located in a state other than Texas, but within 200 miles of the Texas border, are not considered out-of-state providers and therefore do not need to meet one of the six TAC criteria. Enrollment applications for these providers will be processed as an in-state Medicaid provider.

Payments to out-of-state providers enrolled in the Medicaid program are made according to the usual, customary, and reasonable charges or the stipulated fee for services as appropriate for the provided care. Payment of practitioners, providers, or suppliers who are reimbursed on a reasonable charge basis may not exceed the lesser of:

- The Medicaid reasonable charge or fee determined for the same services in the state of Texas *or*
- When mutually agreed on by the contractor and state agency, 100 percent of the Medicare reasonable charge determination for the same service in the state where the service was provided

Inpatient hospital stays are reimbursed according to the Texas prospective payment methodology (diagnostic related group [DRG]). Payments made on a reasonable cost basis are mutually determined by the state agency and the contractor.

TMHP must receive claims from out-of-state providers within 365 days from the date of service.

Refer to: "Procedure Codes Requiring Prior Authorization" on page 36-343.

2.6 Medicare Crossover Reimbursement

2.6.1 Part A

The payment of the Medicare Part A coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicare payment amount equals or exceeds the Medicaid payment rate, Medicaid does not pay the Medicare Part A coinsurance/deductible on a crossover claim.
- If the Medicare payment amount is less than the Medicaid payment rate, Medicaid pays the Medicare Part A coinsurance/deductible, but the amount of the payment is limited to the lesser of the coinsurance/deductible or the amount remaining after the Medicare payment amount is subtracted from the Medicaid payment rate.

2.6.2 Part B

The payment of the Medicare Part B coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicaid client is eligible for Medicaid only as a qualified Medicare beneficiary, Medicaid pays the Medicare Part B coinsurance/deductible on valid Medicare claims.
- If the Medicaid client is not a qualified Medicare beneficiary, Medicaid pays the client's Part B:
  - Deductible liability on valid, assigned Medicare claims.
  - Coinsurance liability on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program, and would be covered by Medicaid when the services are provided, if Medicare did not exist.

Medicaid payment of a client's coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage.

2.7 Federal Financial Participation (FFP) Rate

The FFP rate for providers who receive the federal matching share portion of Medicaid reimbursement or the enhanced federal matching share portion of Medicaid reimbursement for services provided to Children's Health Insurance Program (CHIP) clients are effective for dates of service on or after October 1, 2006, at an FFP rate of 60.78 percent and an enhanced FFP rate of 72.55 percent The FFP is subject to change on October 1 of each year or as otherwise directed by CMS.

CPT only copyright 2005 American Medical Association. All rights reserved.

3.1 Paper Or Electronic Submissions

Providers may submit claims and other requests using paper forms or faster electronic methods. HHSC and TMHP encourage providers to submit claims and other requests electronically. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP Electronic Data Interchange (EDI) claims processing system. TMHP uses the Health Insurance Portability and Accountability Act (HIPAA) compliant ANSI ASC X12 4010A file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP's electronic services through www.tmhp.com, TDHconnect, vendor software, and billing agents.

3.1.1 Advantages of Electronic Services

- *It's fast.* No more waiting by the mailbox or phone inquiries; know what's happening to claims in less than 24 hours and get paid for approved claims within a week. TDHconnect users can submit individual requests interactively and receive a response immediately.
- *It's free.* All electronic services offered by TMHP are free, as well as the TDHconnect software and it's technical support, upgrades, and training. TDHconnect users can access our website directly, without having to pay for an internet connection.
- *It's easy.* TMHP offers free workshops for TDHconnect, Medicaid billing, and many other topics, as well as a large library of reference materials and manuals on www.tmhp.com.
- *It's safe.* TMHP EDI services use VPN and SSL connections, just like the United States government, banks, and other financial institutions, for maximum security.
- *It's accurate.* TDHconnect and many other software programs have features that let providers know when they've made a mistake, which means fewer rejected and denied claims. Rejected claims are returned with messages that explain what's wrong, so the claim can be corrected and resubmitted right away.
- *It's there when it's needed.* Electronic services are available day and night; from home, the office, or anywhere in the world.
- *It makes record keeping and research easy.* Not only can software be used to send and receive claims, it can retrieve your Remittance and Status (R&S) report electronically, perform claim status inquiries, and archive claims. TDHconnect can generate and print reports on everything it sends, receives, and archives.

3.1.2 Electronic Services Available

- Eligibility Verification
- Claims Submission
- Claim Status Inquiry (CSI)
- Electronic Remittance & Status (ER&S)
- Appeals

3.2 TMHP Website

The TMHP website at www.tmhp.com is a valuable resource that provides:

- Information and registration for upcoming provider education/training sessions
- Publications such as bulletins, banner messages, and provider manuals
- A Headline News section with announcements of program changes and other important information
- TDHconnect 3.0 updates (service packs) and workbooks

Additional advanced features are available for those providers who create an account. All enrolled providers are eligible for this free account. Once an account is activated, providers will have access to:

- Medicaid enrollment information
- CSI
- Eligibility verification
- R&S report download option
- CMS-1500 professional claims submission

New services are always being added to the website. Please visit www.tmhp.com for the latest information on TMHP online services.

Claim submission on the TMHP website is available for select claim types. Please refer to www.tmhp.com for further details and instructions on how to submit claims on the website.

3.3 Electronic Billing

Providers who wish to transition from paper billing to electronic billing should decide how they will submit their claims to TMHP. Providers can use software that submits files directly to TMHP, the TMHP website, or they may use a billing agent (e.g., billing companies, vendors, or clearinghouses) who submit files on the provider's behalf.

3.3.1 Software

Providers that intend to use TMHP's electronic services will need software to create, submit, and retrieve data files. Providers can use TDHconnect (TMHP's free software) or software from any vendor listed on the EDI Submitter List at www.tmhp.com/EDI. Providers who plan to use software other than TDHconnect to submit EDI transactions to TMHP should contact the software vendor for details.

CPT only copyright 2005 American Medical Association. All rights reserved.

3.3.1.1 TDHconnect

TDHconnect is the free Windows-based claims submission software provided by TMHP. Technical support, upgrades, and training for TDHconnect are also available free from TMHP. TDHconnect has a wide variety of features, some of which are not available in most vendor software. Providers can use the software to submit claims, eligibility requests, claim status inquiries, adjustments, appeals, and retrieve ER&S reports. The program includes a reference database of current billing codes, procedure codes, Explanation Of Benefit (EOB) codes, and much more. Providers can even use TDHconnect to interactively submit individual claims that are processed in seconds. To order TDHconnect or to learn more about the program, visit www.tmhp.com, call the EDI Help Desk at 1-888-863-3638, or use the "TDHconnect Order Form" on page B-105. Before attempting to install TDHconnect, verify that the computer on which it will be installed meets the minimum software and hardware requirements listed on the order form. TDHconnect 3.0 is not supported on non-Windows® operating systems or on systems that do not meet the minimum system requirements. Microsoft® and Windows® are either registered trademarks or trademarks of Microsoft® Corporation in the United States and/or other countries.

Important: *A basic knowledge of Windows® operating systems is required to use TDHconnect 3.0. TDHconnect 3.0 (with the latest service pack) works with a standard telephone line and existing internet connections. Providers in rotary dial areas cannot use the direct dial features of TDHconnect 3.0 but may use an existing internet connection.*

3.3.1.2 Vendor Software

Providers may also use vendor software to access TMHP's electronic services. There are hundreds of vendors with a wide assortment of services that have been approved to submit electronic files to TMHP. A complete list of vendors who have completed the testing process and been certified by TMHP can be found on the EDI Submitter List at www.tmhp.com/edi. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain it will meet their needs, and that it has completed testing with TMHP.

3.3.2 Billing Agents

Billing agents are companies or individuals who submit electronic files to TMHP on behalf of the provider. Generally, this means that the provider uses a product that sends billing or other information to the billing agent who processes and transmits it to TMHP and other institutions. A complete list of billing agents who have completed the testing process and been certified by TMHP can be found on the EDI Submitter List at www.tmhp.com/EDI. TMHP does not make billing agent recommendations or provide any assistance for billing agents' software or services. TMHP has no information on the software or other requirements of billing agents. Providers should contact the billing agent to obtain information about their products and processes.

3.4 Setting up Access

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information on installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers who use TDHconnect may use the Quick Start Guide that accompanies the software or contact the EDI Help Desk at 1-888-863-3638. After TDHconnect is installed, providers can access the help manual built into TDHconnect by clicking on the **Help** button and selecting **Contents and Index**.

Providers who use TDHconnect or vendor software must also request a submitter ID. A submitter ID is necessary for all of TMHP's electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. Providers must call the EDI Help Desk at 1-888-863-3638 to order a submitter ID. Providers who use a billing agent do not need a submitter ID.

Providers may receive an ER&S report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway.

Refer to: "Texas Medicaid & Healthcare Partnership Electronic Remittance and Status (ER&S) Agreement (2 Pages)" on page B-100.

3.5 Training

The TMHP EDI Help Desk does not provide training. Providers should contact their TMHP Provider Services representative or attend one of the training workshops provided by TMHP to receive training for TDHconnect and other billing issues. Additional information about training opportunities is available at www.tmhp.com/C18/Workshops. Providers may also use the many reference materials and workbooks available on the website.

3.6 Request for Electronic Transmission Reports

Providers are required to retain all claim and electronic file transmission records. Providers must verify that all claims submitted to TMHP are received and accepted. Additionally, providers must also track claims transmissions against claims payments to detect and correct all claim errors. For further information about provider responsibility and electronic transmissions, refer to "Provider Responsibilities" on page 1-4. If an electronic file transmission record is missing, providers can request a copy of the transmission report(s) by contacting the TMHP EDI Help Desk at 1-888-863-3638 and requesting

CPT only copyright 2005 American Medical Association. All rights reserved.

that the electronic transmission report files be reset. The TMHP EDI Help Desk will then reset the files for the production submitter ID provided. Requests for transmission reports produced in the previous 30 days will be provided at no cost to providers. Requests for transmission reports produced more than 30 days before the request will result in a charge of $500 plus 8.25 percent sales tax of $41.25 for a total charge of $541.25. Providers that hold a tax-exempt certificate will not be assessed the 8.25 percent sales tax. This cost is per transmission report.

3.7 Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. An EDIFECS account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. Upon successful completion of EDIFECS testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. Once end-to-end testing has been completed, the vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor's software. Companion guides and vendor specifications are available at www.tmhp.com/EDI. Vendors who wish to begin testing may either call the EDI Help Desk at 1-888-863-3638 or visit the EDIFECS testing site at https://editesting.tmhp.com and use the *TMHP Support* link.

3.7.1 Supported File Types

TMHP EDI supports the following electronic HIPAA compliant ANSI ASC X12 4010A transaction types:

Electronic Transaction Types	
270	Eligibility request
271	Eligibility response
276	Claim status inquiry
277	Claim status inquiry response
835	ER&S report
837D	Dental claims
837I	Institutional claims
837P	Professional claims

3.8 Forms

The following forms are available in Appendix B, "Forms:"

- “Texas Medicaid & Healthcare Partnership Electronic Remittance and Status (ER&S) Agreement (2 Pages)” on page B-100
- “TDHconnect Order Form” on page B-105
- “Claim Status Inquiry (CSI) Authorization Form” on page B-15

Note: *Photocopy these forms and retain the originals for reuse.*

4.1 General Medicaid Eligibility

Providers are responsible for requesting and verifying current Medicaid eligibility information about the client by asking the client to produce the Medicaid Identification form issued for the month that services are being rendered. Clients should share eligibility information with providers. If clients have lost their identification or forgotten to bring it to appointments, providers may verify their eligibility through the Automated Inquiry System (AIS), TMHP Electronic Data Interchange (EDI) Gateway, or by accessing the TMHP website and treat the clients the same as though they had presented a Medicaid Identification (Form H3087) or Medicaid Verification Letter (H1027A-C).

A person may be eligible for medical assistance through Medicaid if the following conditions are met:

- The applicant must be eligible for medical assistance at the time the service is provided. It is not mandatory that the process of determining eligibility be completed at the time service is provided; the client can receive retroactive eligibility. Services or supplies *cannot* be paid under the Medicaid program if they are provided to a client before the effective date of eligibility for Medicaid or after the effective date of denial of eligibility. Having an application in process for Medicaid eligibility does *not* guarantee the applicant will be eligible.
- The service must be a benefit and determined medically necessary (except for preventive family planning, annual physical exams under the State of Texas Access Reform [STAR] Program, and Texas Health Steps [THSteps] medical or dental checkup services) by the Medicaid program and must be performed by an approved provider of the service.
- Applicants for medical assistance potentially are eligible for Medicaid coverage up to three calendar months before their application for assistance, if they have unpaid or reimbursable Medicaid-covered medical bills and have met all other eligibility criteria during the time the service was provided. The provision also includes deceased individuals when a bona fide agent requests application for services. An application for retroactive eligibility must be filed with HHSC; it is not granted automatically. The applicant must request the prior coverage from an HHSC representative.

Most children in the State of Texas foster care program are automatically eligible for Medicaid. To ensure that these children have access to the necessary health care services for which they are eligible, providers can accept the Medicaid Eligibility Verification Form H1027 as evidence of Medicaid eligibility. Although this form may not have a Medicaid number, it is an official state document that establishes Medicaid eligibility.

Providers should honor Form H1027 as proof of Medicaid eligibility and must bill the Texas Medicaid Program as soon as a Medicaid ID number is assigned. Medicaid ID numbers will be assigned approximately one month from the initial presentation of the Medicaid Eligibility Verification Form H1027. The form includes a Department of Family and Protective Services (DFPS) client number that provides additional means of identification and tracking for children in foster care.

Retroactive Eligibility

Medicaid coverage may be assigned retroactively for a client. For claims for an individual who has applied for Medicaid coverage but has not been assigned a Medicaid client number, the 95-day filing deadline does not begin until the date the notification of eligibility is received from HHSC and added to the TMHP eligibility file. The date the client's eligibility is added to the TMHP eligibility file is the add date. To ensure the 95-day filing deadline is met, providers must verify eligibility and add date information by calling AIS or using TMHP EDI's electronic eligibility verification.

Reminder: *The add date is the date the client's eligibility was added to the TMHP eligibility file.*

If a person is not eligible for medical services under the Texas Medicaid Program on the date of service, reimbursement for all care and services provided must be resolved between the provider and the client receiving the services. Providers are not required to accept Medicaid for services provided during the retroactive eligibility period and may continue to bill the client for those services. If providers accept Medicaid assignment for the services and want to submit a claim for Medicaid-covered services for clients who receive retroactive eligibility, providers must refund payments received from the client before billing Medicaid for the services. Also, if it is the provider's practice not to accept Medicaid for services during the retroactive eligibility period, the provider must use the policy consistently with all clients who request retroactive eligibility. Providers must inform the client about the policy before rendering services.

Note: *The Medicaid Managed Care programs do not generally have retroactive eligibility.*

Clients who are not eligible for Medicaid but meet certain income guidelines may receive family planning services through other family planning funding sources. Clients not eligible for Medicaid are referred to a family planning provider.

Refer to: Department of State Health Services (DSHS) website, www.dshs.state.tx.us/famplan/, for information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding from DSHS.

The provider should also check the date on the Form H3087 under Medicaid Date to see if the client has retroactive coverage for previous bills. Clients with retroactive coverage are only issued one Medicaid Identification showing the retroactive period. Texas Medicaid considers all services between the Medicaid Date and the Valid Through Date for reimbursement. Providers may contact AIS or the TMHP Contact Center, verify eligibility on

CPT only copyright 2005 American Medical Association. All rights reserved.

www.tmhp.com, or transmit an electronic eligibility request to determine if the client has retroactive coverage for previous bills.

Refer to: “Medicaid Identification Form H3087” on page 4-18.

“Medicaid Managed Care” on page 7-4.

Expedited Eligibility (Applies to Medicaid-eligible Pregnant Women Throughout the State)

HHSC processes Medicaid applications for pregnant women within 15 business days of receipt. Once certified, a Medicaid Identification (Form H3087) will be issued to verify eligibility and to facilitate provider reimbursement.

Medicaid Buy-In Program for Employed Individuals with Disabilities

The Medicaid Buy-In Program allows employed individuals with disabilities to receive Medicaid services by paying a monthly premium. Individuals with earnings of up to 250 percent of the federal poverty level are eligible to participate in the program. Applications for the program are accepted through HHSC’s regular Medicaid application process.

Participants will have a Medicaid identification card that indicates the Medicaid services for which they are eligible. Medicaid Buy-In participants in urban service areas will be served through traditional Medicaid (fee-for-service) and participants in Primary Care Case Management (PCCM) expansion counties will be served through PCCM.

4.1.1 Eligibility Verification

To verify client Medicaid eligibility, use the following options:

- Verify the client’s Medicaid Identification using form H1027-A, H1027-B, H1027-C, H1027, or H3087.
- Verify electronically via TMHP EDI. Providers may inquire about a client’s eligibility by electronically submitting the following information for each client:
  - Medicaid or Children with Special Health Care Needs (CSHCN) identification number, *or*
  - One of the following combinations: Social Security number and last name; Social Security number and date of birth; or last name, first name, and date of birth. Narrow the search by entering the client’s county code or sex.
- Submit verifications in batches limited to 5,000 inquiries per transmission.
- Contact AIS at 1-800-925-9126, 1-512-335-5986, 1-512-335-6033, 1-512-335-6217, or 1-512-345-6476.
- Contact the TMHP Contact Center at 1-800-925-9126.
- Submit a hard-copy list of clients to TMHP. This service is only used for clients with eligibility that is *difficult* to verify. A charge of $15 per hour plus $0.20 per page payable to TMHP applies to this eligibility verification. The list includes names, gender, and dates of birth if the Social Security and Medicaid identification numbers are unavailable. TMHP can check the client’s eligibility manually, verify eligibility, and provide the Medicaid identification numbers. Mail the lists to the following address:

  Texas Medicaid & Healthcare Partnership
Contact Center
12357-A Riata Trace Parkway
Suite 100
Austin, TX 78727

PCCM primary care providers can also check the current month’s panel report of clients assigned to their practice to determine whether the client’s name and Medicaid number appear on the list. If the client’s name and Medicaid number are shown, eligibility is guaranteed for that month only.

Refer to: “Monthly Client Panel Report” on page 7-27

4.2 Medicaid Identification, Verification

Providers are responsible for requesting and verifying current eligibility information from the client by asking the client to produce Medicaid Identification (Form H3087 or H1027) issued for the month that services are provided. Providers must accept either of these documents as valid proof of eligibility. Providers should retain a copy for their records to ensure the person is eligible for Medicaid when the services are provided. The provider should request additional identification when unsure the person presenting the form is the person identified on the form. The provider should check the Eligibility Date to see if the client has possible retroactive coverage for previous bills.

Important: *Providers must review limitations identified on the client’s Form H3087. Clients may be limited to one primary provider or pharmacy.*

Only those clients listed on the Medicaid Identification form are eligible for Medicaid. If a person insists he or she is eligible for Medicaid but cannot produce a current Medicaid Identification form, providers can verify eligibility through AIS or TMHP EDI. Providers must document this verification in their records and treat the client as usual.

HHSC issues one of the following only when Form H3087 is lost or stolen or in the event of temporary emergency Medicaid:

- *Form H1027-A*. Medical Eligibility Verification is used to indicate eligibility for clients who receive regular Medicaid coverage.
- *Form H1027-B*. Medicaid Qualified Medicare Beneficiary (MQMB) is issued to clients eligible for MQMB coverage.
- *Form H1027-C*. Qualified Medicare Beneficiary (QMB) is issued to clients who are eligible for QMB coverage only.

Form H1027-A, B, or C (Medicaid Verification Letter) is acceptable as evidence of eligibility during the eligibility period of the letter unless the letter contains limitations that affect the eligibility for the intended service. Providers must accept either of these documents as valid proof of

CPT only copyright 2005 American Medical Association. All rights reserved.

eligibility. If the client is not eligible for medical assistance or certain benefits, the client is treated as a private-pay patient.

Refer to: DSHS's website, www.dshs.state.tx.us/famplan, for information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding.

Note: *When treating a STAR Program member, providers must refer to Form H3087 and, if applicable, the member's health plan ID card.*

If the client is reported as eligible and no other limitations of eligibility affect the intended service, proceed with the service. Eligibility during a previous month does not guarantee eligibility for the current month. Forms H1027A, H1027B, H1027C, H3087, and the PCCM Monthly Panel Report are the *only* documents that are honored as verification of Medicaid eligibility. Check the third party resource (TPR) column on the Form H3087 to determine if the client has other health insurance.

Important: *Emergency THSteps dental services, or THSteps dental or medical checkups services may be provided when medically necessary.*

- Reminders of medical and dental checkups appear under the client's name during the month the client is eligible for routine checkups.
- All Medicaid clients who are younger than 21 years of age and eligible for THSteps are eligible to receive medically necessary dental services.

Providers should update the appropriate columns of the Medicaid Identification to indicate services received by the client. Providers put a slash (/) with an initial and date in the column to indicate the service was provided.

Refer to: "Third Party Resources" on page 4-13 for more information and "Medicaid Identification Form H3087" on page 4-18. The right side of Form H3087 consists of information about limited services provided to clients. A check mark on the line to the right of the client's name indicates eligibility for a particular service.

4.3 Restricted Medicaid Coverage

The following limitations may appear on the Medicaid Identification form, indicating client eligibility is restricted to specific services. Unless otherwise indicated by "LIMITED" appearing on the form, the client is not limited to a single provider.

4.3.1 Emergency Only

The term "EMERGENCY" on the form indicates the client is restricted to coverage for an emergency medical condition. Emergency medical condition is defined under "Emergency Care" on page 4-7.

Note: *Certification for emergency Medicaid occurs after the fact. This coverage is retroactive and limited to the specific dates of service of the emergency.*

Clients limited to emergency care only are not eligible for family planning, THSteps, or THSteps-Comprehensive Care Program (CCP) benefits. Only services directly related to the emergency or life-threatening situations are covered.

Undocumented aliens and aliens with a nonqualifying entry status are identified for limited Medicaid eligibility by the classification of Type Programs (TPs) 30, 31, 32, 33, 34, and 35. Under the Texas Medicaid Program, undocumented aliens are only eligible for emergency services, including emergency labor and delivery.

Any service provided after the emergency condition is stabilized is not payable.

If a client is not eligible for Medicaid and is seeking family planning services, refer the client to one of the clinics listed in the DSHS website, www.dshs.state.tx.us/famplan.

4.3.2 Client Limited Program

In Texas, Medicaid-eligible clients are identified for the Health and Human Services' Limited Program based on federal and state requirements. Traditional Medicaid (non-managed care) clients can be limited to a primary care provider and/or a primary care pharmacy. Medicaid Managed Care members can be limited to a primary care pharmacy.

The client is assigned to a designated provider for access to medical benefits and services when one of the following conditions exists:

- The client received duplicative, excessive, contraindicated, or conflicting health care services, including drugs.
- A review indicates abuse, misuse, or fraudulent actions related to Medicaid benefits and services.

After analysis through the neural network component of the Medicaid Fraud and Abuse Detection System (MFADS), qualified medical personnel validate the initial identification and determine candidates for limited status. The validation process includes consideration of medical necessity. For the limited status designation, medical necessity is defined as the need for medical services as to the amount and frequency established by accepted standards of medical practice for the preservation of health, life, and the prevention of more impairments. Except for specialist consultations, services rendered to a client by more than one provider for the same or similar condition during the same time frame may not be considered medically necessary.

4.3.2.1 Limited Medicaid Identification

Clients with limited status receive a Form H3087 with the printed word "LIMITED." A *limited client is* defined as "a client who is limited to a designated primary care provider and/or primary care pharmacy." The designated provider names are printed on the form under the word "LIMITED." The limited Medicaid Identification identifies a client who has overutilized the services. Only one client is identified

CPT only copyright 2005 American Medical Association. All rights reserved.

on a LIMITED Form H3087. For questions about pharmacy services for clients limited to a primary care pharmacy, contact the Limited Program Hotline at 1-800-436-6184, option 4.

The Limited Program may also alert providers by means of a *special message* on the Form H3087, when the form was reportedly used by an unauthorized person or persons, or for an unauthorized purpose. In these cases, the provider is asked to verify the client's identity by requesting personal identification that carries a photograph, such as a driver's license.

Payment for services to a limited Medicaid client, who is not in a managed care plan, is made to the designated provider only, unless services result from a designated provider referral or emergency. An automated review process determines if the claim includes the limited primary care provider's provider identifier as the billing, performing, or referring provider. When the limited primary care provider's provider identifier is not indicated on the claim, the claim is not paid. Exceptions to this rule include emergency care and services that are included in "Exceptions to Limited Status" on page 4-6. Appeals for denied claims are submitted to TMHP and must include the designated Medicaid provider identifier for reimbursement consideration.

When limited traditional Medicaid clients attempt to obtain nonemergency services from someone other than their limited provider, the provider does one of the following:

- Verify the limited status with HHSC at 1-800-436-6184, option 4, TMHP at 1-800-925-9126, or online at www.tmhp.com.
- Attempt to contact the limited primary care provider for a referral. If no referral is obtained, the provider must inform clients that they are financially responsible for the services.

4.3.2.2 Exceptions to Limited Status

The provider is not required to provide some services. Limited clients may go to any provider for the following services or items:

- Ambulance services
- Anesthesia
- Assistant surgery
- Case management services
- Chiropractic services
- Counseling services provided by a chemical dependency treatment facility
- Eye exams for refractive errors
- Eyeglasses
- Family planning services (regardless of place of service [POS])
- Genetic services
- Hearing aids
- Home health services
- Laboratory services (including interpretations)
- Licensed clinical social worker (LCSW) services
- Licensed professional counselor (LPC) services
- Mental health rehabilitation services
- Mental retardation diagnosis and assessment (MRDA) performed by an MRDA provider
- Nursing facility services
- Obstetrical/Gynecological services

  Note: *The once a year well-woman checkup is covered without a referral. All other OB/GYN services require appropriate referrals.*
- Primary home care
- Psychiatric services
- Radiology services (including interpretations)
- School Health and Related Services (SHARS)
- THSteps-Comprehensive Care Program
- THSteps medical and dental services

For referrals or questions, contact:

HHSC
Office of Inspector General
Limited Program - MC 1323
PO Box 85200
Austin, TX 78708
1-800-436-6184

4.3.2.3 Selection of Designated Provider, Pharmacy

Traditional Medicaid clients identified for limited status can participate in the selection of one primary care provider, primary care pharmacy, or both from a list of participating Medicaid providers. Eligible providers cannot be under administrative action, sanction, or investigation. In general, the designated primary care provider's specialty is general practice, family practice, or internal medicine. Other specialty providers may be selected on a case-by-case basis. Primary care providers can include, but are not limited to: a physician, physician assistant, physician group, advanced practice nurse, outpatient clinic, rural health clinic (RHC), or federally qualified health center (FQHC).

Medicaid Managed Care clients identified for limited status can participate in the selection of pharmacy providers *only* from participating Medicaid providers who are not under administrative action, sanction, or investigation.

If the client does not select a primary care provider and/or primary care pharmacy, HHSC chooses one for the client.

When a candidate for the designated provider is determined, HHSC contacts the provider by letter. When the provider agrees to be the designated provider, HHSC sends letters of confirmation to the designated provider and the client confirming the name of the client, primary care provider or primary care pharmacy, and the effective date of the limited arrangement.

CPT only copyright 2005 American Medical Association. All rights reserved.

Claims for provider services for traditional Medicaid clients must include the provider identifier for the designated primary care provider as the billing or performing provider or a referral number in the prior authorization number (PAN) field.

4.3.2.4 Duration of Limited Status

The Limited Program duration of limited status is the following:

- Initial limited status period–minimum of 36 months.
- Second limited status period–additional 60 months.
- Third limited status period–will be for the duration of eligibility and all subsequent periods of eligibility.
- Clients arrested, indicted, or convicted of a nonfelony crime related to Medicaid fraud will be assigned limited status for 60 months or the duration of eligibility and subsequent periods of eligibility up to or equal to 60 months.

HHSC uses the same time frames for clients whose LIMITED Form H3087 includes a special message.

Clients are removed from limited status at the end of the specified limitation period if their use of medical services no longer meets the criteria for limited status. A medical review also may be initiated at the client's or provider's request. Clients or providers call the Limited Program at 1-800-436-6184 to request this review.

Providers may request to no longer serve as a client's designated provider at any time during the limited period by calling the Limited Program. Providers are asked to serve or refer the client until another arrangement is made. New arrangements are made as quickly as possible.

4.3.2.5 Referral to Other Providers

Traditional Medicaid clients in limited status may be referred by their designated provider to other providers. For the referral or second provider to be paid, the nine-character provider identifier of the referring designated provider must be in Block 17 or 17a of the CMS-1500 claim form. Claims submitted electronically (see “TMHP Electronic Claims Submission” on page 5-10) must have the six-digit Medicare core number of the referring designated provider in the Referring Provider Field. Consult with your vendor for the location of this field in your electronic claims format.

4.3.2.6 Emergency Care

If an emergency medical condition occurs, the limited restriction does not apply. The term *emergency medical condition is defined* as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect that the absence of immediate medical care could result in any of the following conditions:

- Placing the patient's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Important: *A provider who sends in an appeal because a claim was denied with 00066 must include the performing provider identifier, not just a name or group provider identifier. Appeals without a performing provider identifier are denied. The license number of the designated provider must be entered in Block 83 on the HCFA-1450 (UB-92) or in the appropriate electronic field for nonemergency inpatient and outpatient claims to be considered for reimbursement.*

Note: *Only when the designated provider or designated provider representative has given permission for the client to receive nonemergency inpatient and/or outpatient services, including those provided in an emergency room, can the facility use the designated provider's license number for billing.*

4.3.2.7 Hospital Services

An inpatient hospital claim for a limited traditional Medicaid client is considered for reimbursement if the client meets Medicaid eligibility and admission criteria. Hospital admitting personnel are asked to check the name of the designated provider printed under the word “LIMITED” on the client's LIMITED Medicaid Identification and inform the admitting physician of the designated provider's name if the two are different.

Provider claims for nonemergency inpatient services for limited traditional Medicaid clients are considered for payment *only* when the designated provider identifier appears on the claim form as the billing, performing, or referring physician.

Information about claims reimbursement for limited clients may be received by calling the TMHP Contact Center at 1-800-925-9126 or Assessment Utilization Services at 1-800-436-6184.

4.3.3 QMB, MQMB

The term “QMB” or “MQMB” on the form indicates the client is a Qualified Medicare Beneficiary (QMB) or a Medicaid Qualified Medicare Beneficiary (MQMB). The *Medicare Catastrophic Coverage Act of 1988* requires Medicare premiums, deductibles, and coinsurance payments to be paid for individuals who meet the following criteria:

- Client is enrolled in Medicare Part A.
- Income does not exceed 100 percent of the federal poverty level (consistent with federal law).

CPT only copyright 2005 American Medical Association. All rights reserved.

- Resources do not exceed twice the resource limit of Supplemental Security Income (SSI) Program.

Important: *Clients limited to QMB are not eligible for THSteps or THSteps-CCP Medicaid benefits.*

Note: *Clients eligible for STAR+PLUS who have Medicare and Medicaid are MQMBs. Medicaid reimburses for the coinsurance and deductibles as well as Medicaid-only services for the MQMB client.*

QMBs do not receive Medicaid benefits other than Medicare deductible and coinsurance liabilities. MQMBs *do* qualify for Medicaid benefits not covered by Medicare in addition to Medicaid payment of Medicare deductible and/or coinsurance.

4.3.4 Hospice Program

The Department of Aging and Disability Services (DADS) manages the Hospice Program through provider enrollment contracts with hospice agencies. These agencies must be licensed by the state and Medicare-certified as hospice agencies. Coverage of services follows the amount, duration, and scope of services specified in the Medicare Hospice Program. Hospice pays for services related to the treatment of the client's terminal illness and for certain physician services (not the treatments).

Medicaid Hospice provides palliative care to all Medicaid-eligible clients (no age restriction) who sign statements electing hospice services and are certified by physicians to have six months or less to live if their terminal illnesses run their normal courses. Hospice care includes medical and support services designed to keep clients comfortable and without pain during the last weeks and months before death.

When clients elect hospice services, they waive their rights to all other Medicaid services related to their terminal illness. They do not waive their rights to Medicaid services unrelated to their terminal illness. Medicare and Medicaid clients must elect both the Medicare and Medicaid Hospice programs. Individuals who elect hospice care are issued a Medicaid Identification (Form H3087) with "HOSPICE" printed on it. Clients may cancel their election at any time.

Direct policy questions about the hospice program to DADS at 1-512-438-3169.

DADS pays the provider for a variety of services under a per diem rate for any particular hospice day in one of the following categories:

- Routine home care
- Continuous home care
- Respite care
- Inpatient care

When the services are unrelated to the terminal illness, Medicaid (TMHP) pays its providers directly. For questions about hospice billing, call TMHP at 1-800-626-4117.

Providers are required to follow Medicaid guidelines for prior authorization when filing claims to TMHP for hospice clients. Fax authorization requests to 1-512-514-4209.

Nonhospice providers may be reimbursed directly by TMHP for services rendered to a Medicaid hospice client.

Mail paper claims to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200105
Austin, TX 78720-0105

Appeal claims by writing to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200645
Austin, TX 78720-0645

4.3.4.1 Medical Services Not Related to the Terminal Illness

Submit a claim for Medicaid services to TMHP with a statement and documentation from the hospice that the services billed are not related to the client's terminal illness. If TMHP denies the claim, send an appeal with the following information:

- A copy of the Remittance and Status (R&S) report, with the client/claim number in question circled
- Clinical records, which may be obtained from the hospice provider
- Supporting documentation, giving reasons the services billed are not related to the terminal illness

4.3.4.2 Medical Services when Client is Discharged from Hospice

Submit claims to TMHP for Medicaid services with a statement that the services billed were provided after the client was discharged from the hospice program. The nonhospice provider must obtain from the hospice a copy of Form 3071, Medicaid Hospice Cancellation, to support the discharge. If TMHP denies the claim, the nonhospice provider may appeal the decision with the following information:

- A copy of the R&S report, with the client/claim number in question circled
- Supporting documentation stating that the client was not in hospice at the time

4.3.4.3 Lab and X-Ray

Submit claims for services unrelated to the terminal illness to TMHP. Submit claims for services related to the terminal illness to the hospice provider.

4.3.4.4 Physician Claims

Hospice pays physician claims regardless of hospice status.

CPT only copyright 2005 American Medical Association. All rights reserved.

4.3.4.5 Physician Oversight Services

Physician oversight is defined as "physician supervision of clients under the care of home health agencies or hospices that require complex or multidisciplinary care modalities." These modalities involve regular physician client status review of related laboratory and other studies, communication with other health professionals involved in patient care, integration of new information into medical treatment plans, and adjustment of medical therapy. Medicaid hospice does not reimburse for physician oversight services.

4.3.5 Presumptive Eligibility

Presumptive eligibility provides temporary Medicaid coverage to pregnant women whose family income does not exceed the state's Medicaid limit. The intent of presumptive eligibility is to provide the earliest possible access to prenatal care to improve maternal and child health. Clients with presumptive eligibility receive immediate, short-term Medicaid eligibility while their formal Medicaid application is processed.

4.3.5.1 Services

Medicaid-covered services during the presumptive eligibility period are limited to medically necessary medical services provided during pregnancy and certain preventive services such as family planning. Labor, delivery, inpatient services, and THSteps medical or dental services are not covered during the presumptive eligibility period. If the woman is determined eligible for regular Medicaid for the same period of time, regular Medicaid coverage overlays the presumptive eligibility period providing the full range of services. Although the eligibility process for presumptive eligibility coverage is restricted to qualified providers, services may be obtained from any enrolled Medicaid provider.

4.3.5.2 Qualified Provider Enrollment

To be eligible as a qualified provider for presumptive eligibility determinations the following federal requirements must be met. The provider must:

- Be an eligible Medicaid provider
- Provide outpatient hospital services, rural health clinic services, *or* clinic services furnished by or under the direction of a physician without regard to whether the clinic is administered by a physician (includes family planning clinics)
- Receive funds from or participate in one of the following:
  - The migrant health centers
  - Community health centers
  - *The Stewart McKinney Act* (homeless)
  - Maternal and Child Health Services Block Grant Program
  - *The Indian Health Care Improvement Act*
  - Special Supplemental Food Program for Women, Infants, and Children (WIC)
  - The Commodity Supplemental Food Program of the *Agriculture and Consumer Protection Act* of 1973
  - A state perinatal program (including family planning programs)
  - The Indian Health Service must be a health program or facility operated by a tribe or tribal organization under the Indian Self-Determination Act. Indian Health Service providers can refer to "Provider Enrollment" on page 1-2 for more information about the enrollment procedures for the Texas Medicaid Program.
- Be determined by HHSC to be capable of making presumptive eligibility (PE) determinations

Family planning agency providers may be eligible to enroll as PE providers. To enroll as a qualified provider for PE, the provider must request a Presumptive Eligibility Qualified Provider Enrollment Packet from the following address:

HHSC
Attn: Texas Works
Presumptive Eligibility Program
PO Box 149030
Mail Code W-323
Austin, TX 78714-9030

Before final approval as a qualified PE provider, an operating plan must be developed with the regional HHSC client self-support regional director's office. The rules for PE identify minimal agreements that must be included in this plan.

4.3.5.3 Process

A qualified provider designated by HHSC requests that the pregnant woman complete a Medicaid application form. The qualified provider determines eligibility for PE coverage based on verification of pregnancy and a determination that the family's income is less than the current Medicaid limit for pregnant women.

The same application used to determine the woman's PE is forwarded to the local HHSC office for determination of regular Medicaid coverage for the pregnant woman and any other household members. The pregnant woman must follow through with the regular Medicaid application process and be eligible under those requirements to continue receiving Medicaid.

The period of PE begins on the date the qualified provider makes the determination and ends on the last day of the month. HHSC makes the final Medicaid determination.

4.3.5.4 Medicaid Identification (Form H3087)

A Form H3087 with PE printed on top is issued for presumptive eligibility coverage. Medicaid coverage for PE continues through the last day of the month indicated on the form. Form H3087 with PE indicates that Medicaid-covered services during the presumptive eligibility period

CPT only copyright 2005 American Medical Association. All rights reserved.

do not include labor, delivery, inpatient services, and THSteps medical and dental services. The PE ID indicates eligibility for limited Medicaid services during the presumptive eligibility period (e.g., eye exams, eyeglasses, hearing aids, and family planning services). If the woman is certified for regular Medicaid, she receives the regular Form H3087.

If other members in the family are determined to be eligible for Medicaid, they receive a separate Form H3087 from the one issued to the pregnant woman.

Claims filing procedures for clients with PE are the same as those for all clients with Medicaid.

4.4 Medically Needy Program

Important: *The Medically Needy Program (MNP) with spend down is limited to children younger than age 19 years and pregnant women.*

The MNP provides Medicaid benefits to children (younger than 19 years of age) and pregnant women whose income exceeds the eligibility limits under Temporary Assistance for Needy Families (TANF) or one of the Medical Assistance Only (MAO) programs for children but is not enough to meet their medical expenses. Coverage is available for services within the amount, duration, and scope of the Texas Medicaid Program.

Note: *Individuals are considered adults the month after they turn 19 years of age.*

Medicaid benefits, including family planning and THSteps preventive services through the MNP, are available to:

- Pregnant teens (younger than 19 years of age) and women
- Children younger than 19 years of age

The MNP is not an assistance program; MNP provides access to Medicaid benefits. MNP application is made through HHSC. HHSC determines:

- If the applicant meets basic Medicaid eligibility requirements.
- If the applicant is eligible without spend down (the difference between the applicant's net income and the MNP income limits). If over the Medicaid limit, the spend down amount is determined based on the MNP income limit.

If the applicant is eligible without spend down (income is below the medically needy income limits), the caseworker certifies the applicant to be eligible for Medicaid.

If spend down is applicable, the HHSC caseworker issues a Medical Bills Transmittal (Form 1120) to the MNP applicant that indicates the spend down amount, months of potential coverage (limited to the month of application and any of the three months before the application month that the applicant has unpaid medical bills), and the caseworker name and telephone number.

The applicant is responsible for paying the spend down portion of the medical bills. The TMHP Medically Needy Clearinghouse (MNC) determines which bills may be applied to the applicant's spend down according to state and federal guidelines. No Medicaid coverage may be granted until the spend down is met.

Newborns of mothers who must meet a spend down before becoming eligible for Medicaid are *not* automatically eligible for the full year of newborn coverage because the child's mother would not be continuously eligible for Medicaid. If the mother meets spend down in the month pregnancy terminates and the Medicaid effective date is before or on the day pregnancy terminates, then the newborn and mother are eligible for the birth month and the two following months. Hospitals and other providers that complete newborn reporting forms should continue to follow the procedures in "Eligibility Process" on page 25-8 of this manual for these newborns.

4.4.1 Spend Down Processing

Applicants are instructed to submit all their medical bills or completed Centers for Medicare & Medicaid Services (CMS) claim forms for application toward their spend down to TMHP MNC along with Form 1120. Charges from the bills or completed CMS claim forms are applied in date of service order to the spend down amount, which is met when the accumulated charges equal the spend down amount.

Providers can assist medically needy clients with their application by giving them current, itemized statements or completed CMS claim forms to submit to MNC. MNC holds manually completed CMS claim forms used to meet spend down for ten calendar days preceding the completion of the spend down case, then forwards them to claims processing. The prohibition against billing clients does not apply until Medicaid coverage is provided.

Current itemized statements or completed CMS claim forms must include the following:

- Statement date
- Provider name
- Client name
- Date of service
- All services provided and charges
- Current amount due
- Any insurance or client payments with date of payment (the date and amount of any insurance or payments)

Important: *Amounts used for spend down are deducted from the total billed amount by the provider. Using older bills may provide earlier eligibility for the client.*

Unpaid bills incurred before the month of potential eligibility (the month with spend down) may be used to meet spend down. Itemized statements must be dated within 60 days of the date received at TMHP MNC.

Clients have 30 days to submit their bills or completed CMS claim forms. Thirty-day extensions are available to the client as necessary to gather all needed information.

CPT only copyright 2005 American Medical Association. All rights reserved.

The unpaid balance on currently due accounts may be applied toward the spend down regardless of the date of service. All bills or completed CMS claim forms must be itemized showing the provider's name, client's name, dates of service, statement date, services provided, charge for each service, total charges, amounts and dates of payments, and total due.

Bills for past accounts must be current, itemized statements (dated within the last 60 days) from the provider verifying the outstanding status of the account and the current balance due. Accounts that have had payments made by an insurance carrier including Medicare must be accompanied by the carrier's Explanation of Benefits (EOB) or Remittance Advice (RA) showing the specific services covered and amounts paid.

If the MNC requests additional information, the applicant has *30* days from the date of the clearinghouse letter to respond. This response may be the return of the information requested, a request for an extension of the response period, or a request to withdraw the bill from consideration. The provider can assist by furnishing the additional information to the applicant.

All communication about submission of billing information is carried out between MNC and the applicant; however, providers can assist clients by:

- Providing clients with current itemized statements or completed CMS claim forms
- Encouraging clients to submit *all* their medical bills or completed CMS claim forms incurred from *all* providers at the same time
- Submitting manual claim forms directly to MNC or to applicants for the MNP, to be used to meet spend down

Bills or CMS claim forms submitted to MNC are for application toward the spend down only. Submitting a bill or CMS claim forms for spend down is *not* a claim for reimbursement. *No* claims reimbursement is made from such submittals unless the CMS claim form is complete. The provider must file a Medicaid claim after eligibility has been established to have reimbursement considered by the Medicaid program. If the provider assisted the client with submission of a CMS claim form, the MNC retains all CMS claim forms for ten calendar days preceding the completion of the spend down case. The MNC then forwards all CMS claim forms directly to claims processing to have reimbursement considered by the Medicaid program.

MNC informs the applicant and HHSC when the spend down is met. HHSC certifies the applicant for Medicaid and sends the Medicaid Identification form to the applicant when Medicaid eligibility is established. Clients are encouraged to inform medical providers of their Medicaid eligibility and make arrangements to pay the charges used to meet the spend down amount. When notified of Medicaid eligibility, the provider asks if the client has retroactive eligibility for previous periods. All bills submitted to MNC are returned to the client, except for CMS claim forms. An automated letter specific to the client's spend down case is attached, indicating which:

- Bills/charges were used to meet the spend down
- Bills/charges the client is responsible for paying in part or totally
- Bills the provider may submit to Medicaid for reimbursement consideration
- CMS claims are received and forwarded to TMHP claims processing

Providers may inquire about status, months of potential eligibility, Medicaid or case number, and general case information by calling the TMHP Contact Center at 1-800-925-9126.

Medically needy applicants who have a case pending or have not met their spend down are considered private-pay clients and may receive bills and billing information from providers. No claims are filed to Medicaid. A claim that is inadvertently filed is denied because of client ineligibility.

4.4.2 Closing a Medically Needy Program Case

Medically needy cases are closed by MNC for the following reasons:

- Bills were not received within the designated time frame (usually 30 days from the date the case is established by the HHSC worker).
- The client failed to provide requested additional case/billing information within 30 days of MNC request date.
- Insufficient charges were submitted to meet spend down, and the client did not respond to a request for additional charges to be submitted within 30 days of the notification letter.

Charges submitted after the spend down has been met will not reopen the case automatically. The client must call the Client Hotline at 1-800-335-8957.

4.4.3 Medically Needy Program for CSHCN Services Program Clients

The Children with Special Health Care Needs (CSHCN) Services Program requires client participation in MNP. Clients are given 60 days of provisional CSHCN eligibility, and referred to the Medicaid/MNP. Clients must provide CSHCN with a Medicaid and MNP determination of eligibility before the end of the 60-day provisional eligibility period. When clients send CSHCN a copy of the written Medicaid/MNP determination before the end of the 60 days, CSHCN pays for all covered medical services provided during the 60 days if the client is not eligible for Medicaid.

If a client sends the Medicaid/MNP determination after the 60-day period, CSHCN eligibility begins on the date CSHCN receives the determination. CSHCN only pays for prescription drugs (not over-the-counter), meals, lodging, transportation, expendable medical supplies, nutritional supplements, glucose monitors, transportation of remains, and total parenteral nutrition (TPN) during the provisional eligibility period. An additional 30 days of provisional eligibility may be granted under unusual circumstances.

CPT only copyright 2005 American Medical Association. All rights reserved.

Additionally, CSHCN may ask clients to apply to the Medicaid/MNP when $2,000 or more in medical bills has been paid or is expected to be paid by CSHCN. Clients are given 60 days to apply to the Medicaid/MNP and send the determination to CSHCN. A client's CSHCN eligibility is terminated if he or she does not comply with the request to apply to Medicaid/MNP. CSHCN clients receive no limitations on benefits during this period for their program-covered diagnosis or services. For more information, call the CSHCN Medically Needy Program at 1-800-252-8023.

Refer to: "Medically Needy Claims Filing" on page 5-81.

4.5 Medicare/Medicaid Clients

When a service is a benefit of Medicare and Medicaid, and both programs cover the client, the claim must be filed with Medicare first. Additional Medicare/Medicaid coverage information is in the specific service sections. Providers do not file a claim to Medicaid until Medicare has dispositioned the claim. The payment received from Medicare and the coinsurance and/or deductible payment from Medicaid must be considered reimbursement in full.

Providers must accept Medicare assignment to receive coinsurance and deductible amounts from Medicaid on services provided to clients. If a provider has not accepted a Medicare assignment, the provider may receive payment of the Medicare deductible and coinsurance from TMHP on behalf of the QMB or MQMB client.

Providers accepting Medicare/Medicaid assignment cannot legally require the client to pay the Medicare coinsurance and/or deductible amounts.

If the Medicare intermediary is TrailBlazer, Limited Liability Company (LLC), Palmetto, or Mutual of Omaha, the Medicaid portion is transferred to TMHP automatically by the intermediary, if the claim was processed as assigned. This benefit allows providers to receive disposition from both carriers while only filing the claim once. Providers allow 60 days from the date of Medicare's disposition for a claim to be shown on the Medicaid R&S report. Claims totally denied by Medicare are not automatically transferred to TMHP. If the Medicare intermediary is a company other than those listed, the provider must send a paper copy of the intermediary's RA or Remittance Notice (RN) to TMHP for payment of the coinsurance and/or deductibles.

Refer to: "Reimbursement Methodology" on page 2-2 and "Claims Filing Instructions" on page 5-23.

4.5.1 QMB, MQMB Clients

Medicaid pays the beneficiary's Parts A and B deductibles and coinsurance liabilities on valid Medicare claims. These claims must be filed with Medicare first.

These guidelines are for clients not living in a nursing facility who receive a vendor rate for client care through DADS.

Refer to: "Reimbursement Methodology" on page 2-2 for limitations on reimbursement.

4.5.2 Medicare Part B Crossovers

Based on Medicare determination of the beneficiary's eligibility and the status of the annual deductible, the Medicare intermediary pays the provider a percentage of the allowed amount for covered Part B services. Medicaid pays the deductible if any is applied to the Medicare claim. Medicaid also pays the coinsurance liabilities according to Medicaid benefits and limitations.

Federal regulations require that the Medicaid program pay all Medicare deductible and coinsurance payments to nursing facilities, regardless if the provider has filed the claims as assigned to Medicare. The following programs qualify as Medicare Part B crossover claims: QMB, MQMB, and client type programs 13 or 14, with base plan 10, and category R.

Therefore, even if the provider has not accepted Medicare assignment, the provider may receive payment of the Medicare deductible and coinsurance on behalf of the QMB, MQMB, client type programs 13 or 14, base plan 10, and category R client. If the provider has collected money from the client and also received reimbursement from TMHP, the provider is required to refund the client's money.

The *Social Security Act* requires that Medicaid payment for physician services under Medicare Part B be made on an assignment-related basis.

If Medicaid does not reimburse or does not reimburse the full deductible or coinsurance, the provider is not allowed to bill the client.

4.5.3 Clients Without QMB, MQMB Status

Medicare is primary to Medicaid, and providers must bill Medicare first for their claims. Medicaid's responsibility for coinsurance and/or deductible is determined in accordance with the Medicaid benefits and limitations including the 30-day spell of illness. TMHP denies claims if the client's coverage reflects Medicare Part A coverage and Medicare has not been billed first.

Providers must check the client's Medicare card for Part A coverage before billing the Texas Medicaid Program.

Refer to: "Medicare Crossover Reimbursement" on page 2-8.

4.6 Contract with Outside Parties

The *State Medicaid Manual* allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client (Section 2080.18). Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains respon-

CPT only copyright 2005 American Medical Association. All rights reserved.

sible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

4.7 Third Party Resources

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.

A TPR is a source of payment for medical services other than Medicaid or Medicaid managed care organization (MCO), the client, and non-TPR sources. TPR includes payments from any of the following sources:

- Private health insurance including assignable indemnity contracts
- Health maintenance organization (HMO)
- Public health programs available to clients with Medicaid such as Medicare and Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)
- Profit and nonprofit health plans
- Self-insured plans
- No-fault automobile insurance such as personal injury protection (PIP) and automobile medical insurance
- Liability insurance
- Workers' Compensation
- Other liable third parties

Reminder: *Adoption agencies/foster parents are no longer considered a TPR. Medicaid is primary in these circumstances.*

Non-TPR sources are secondary to Texas Medicaid and may only pay benefits after the Texas Medicaid Program. The following are the most common non-TPR sources. If providers have questions about others not listed, they may contact a provider relations representative.

- Texas Rehabilitation Commission
- Department of Assistive and Rehabilitative Services (DARS), Blind Services
- Texas Kidney Health Care Program
- Crime Victims' Compensation Program
- Muscular Dystrophy Association
- CSHCN Services Program
- Texas Band of Kickapoo Equity Health Program
- Maternal and Child Health (Title V)
- State Legalization Impact Assistance Grant (SLIAG)
- Adoption Agencies
- Community-Based Alternatives (CBA)
- Community Living Assistance and Support Services (CLASS)

Denied claims or services that are not a benefit of Medicaid may be submitted to non-TPR sources.

If a claim is submitted inadvertently to a non-TPR source listed above before submission to TMHP, the claim may be submitted to TMHP using the filing deadlines identified under "Filing Deadlines" on page 5-78.

If a non-TPR source erroneously makes a payment for a dual-eligible for services also covered by Medicaid, the payment is refunded to the non-TPR source.

Any indemnity insurance policy that pays cash to the insured for wages lost or for days of hospitalization rather than for specific medical services is considered a TPR *if the policy is assignable to someone else*. HHSC has assignment to any Medicaid applicant's or client's right of recovery from TPRs, to the extent of the cost of medical care services paid by Medicaid. The Texas Medicaid Program requires a provider take all reasonable measures to use a client's TPRs before billing Medicaid.

A provider who furnishes services and participates in the Texas Medicaid Program may not refuse to furnish services to an eligible client because of a third party's potential liability for payment of the services.

Eligible clients may not be held responsible for billed charges that are in excess of the TPR payment for services covered under the Texas Medicaid Program. If the TPR pays less than the Medicaid-allowable amount for covered services, the provider should submit a claim to TMHP for any additional allowable amount. Additionally, eligible clients enrolled in private HMOs must not be charged the copayment amount because the provider has accepted Medicaid assignment.

4.7.1 Workers' Compensation

Payment of covered services under Workers' Compensation constitutes reimbursement in full. The client should not be billed. Those services not covered by Workers' Compensation should be billed to TMHP.

4.7.2 Adoption Cases

- TMHP/Medicaid, not the adoption agency, should be billed for all medical services that are a benefit of Texas Medicaid.
- If a claim is inadvertently sent to the adoption agency before it is sent to TMHP, TMHP must receive the claim within 95 days of the date of disposition from the adoption agency denial, payment, request for refund or recoupment, to be considered for payment.
- If the adoption agency inadvertently makes a payment for services covered by Medicaid, the provider should refund the payment to the agency.

Refer to: "Claims Filing Deadlines" on page 5-4.

A copy of the non-TPR disposition must be submitted with the claim and received at TMHP within 95 days from the date of the disposition (denial, payment, request for refund, or recoupment of payment by the non-TPR source).

4

CPT only copyright 2005 American Medical Association. All rights reserved.

4.7.3 Medicaid Identification (Form H3087)

When Medicaid billing information is obtained from the client, the provider examines the TPR column of the Form H3087 to determine if the client has other health insurance. The following indicators may be found in the TPR column:

- "M" indicates that the client is eligible for Medicare. The provider must file with Medicare before filing with Medicaid. The "M" is followed by a Medicare claim identification number.
- "P" and "M" indicate that the client has other insurance and Medicare coverage. Both must be billed before billing Medicaid.

To ensure receipt of TPR disposition of payment or denial, the provider must obtain an assignment of insurance benefits from the client at the time of service. Providers are asked not to provide claim copies or statements to the client.

Family planning services providers are not required to bill a client's TPRs before filing the claim with TMHP. Federal regulations protect the client's confidential choice of birth control and family planning services. Confidentiality is *jeopardized* when seeking information from TPRs.

SHARS and Early Childhood Intervention (ECI) providers are required to bill private insurance before billing Medicaid. School districts, special education cooperatives, and ECI providers must have parental permission to bill a client's private insurance.

If the provider is aware that a client has other health insurance, and "P" is not recorded in the TPR column of the Medicaid Identification, the provider must notify TMHP of the details concerning the type of policy and scope of benefits.

Contact TPR at 1-800-846-7307 or write to the following address:

Texas Medicaid & Healthcare Partnership
Third Party Resources Unit
PO Box 202948
Austin, TX 78720-9981

4.7.4 THSteps Requirements

THSteps dentists are not required to bill other insurance before billing Medicaid; however, if the provider is aware of other insurance, the provider documents the other insurance in the client's medical record. TMHP processes the claim for payment, determines if a TPR exists, and seeks reimbursement from the TPR.

THSteps medical checkup providers rendering services to clients who are not in a managed care program must file directly to TMHP. THSteps medical checkup providers are not required to pursue TPR. TMHP processes the claim for payment, determines if a TPR exists, and seeks payment from the TPR.

Refer to: "Other Insurance" on page 42-11 for more information.

4.7.5 Other Insurance Reimbursement

To the extent allowed by federal law, a health care service provider must seek reimbursement from available third-party health coverage or insurance that the provider knows about or should know about before billing the Texas Medicaid Program. All claims for clients with other insurance coverage must reference the information (see "Other Insurance Claims Filing" on page 5-76), regardless of whether a copy of the EOB from the insurance company is submitted with the claim.

4.7.6 Refunds to TMHP Resulting from Other Insurance Payments and Conditions Surrounding Provider Billing of Third Party Insurers

Providers are prohibited expressly from receiving payment from Medicaid, billing a TPR, and then refunding to Medicaid the lesser of the two payments. This section outlines some portions of those rules that providers must follow when billing third party insurers. This summary does not include all the TPR provisions to which providers must adhere; thus, providers review the complete text of Title 1 *Texas Administrative Code* (TAC) §§354.2321 and 354.2322 for a full description of provider requirements surrounding recovery from third parties.

Any refunds due to TMHP are not to be held until the end of an accounting year. Because providers must accept assignment, they must accept Medicaid payment as payment in full for covered services and they may not use payment by another TPR to make up the difference between the amount billed and the Medicaid payment. Any payment received from another TPR must be refunded to TMHP if the following conditions are not met.

Providers who identify a TPR within 12 months from the date of service, and wish to submit a claim for payment to a third party health insurer after a claim for payment has been submitted to and paid by TMHP, *must* refund any amounts paid by TMHP before submitting a claim for payment to the third party.

Providers are limited to the Medicaid payable amount and are required to accept the amount paid by TMHP as payment in full if:

- A claim for payment is submitted to and paid by TMHP.
- The provider failed to refund TMHP before submitting a claim for payment to a third party as outlined in the third paragraph above.

Third party payments received after receipt of the TMHP payment must be refunded to TMHP in full, even if the amount paid by the third party insurer exceeds the Medicaid payment.

If the amount paid by a third party health insurer is less than the amount payable for the service by Medicaid, providers may bill TMHP for the difference between the amount paid by the third party health insurer and the Medicaid payable amount, if a claim was filed timely and in accordance with all the applicable rules.

CPT only copyright 2005 American Medical Association. All rights reserved.

In accordance with the TPR rules (1 TAC §§354.2321 [g] and 354.2322 [i]), "any provider who accepts Medicaid payment as payment in full for services and retains any amount in excess of the Medicaid payable amount from a third party and conceals or fails to account to the department for the third party amount, resulting in excessive or duplicate payment for the same service, may be referred for investigation and prosecution for violations of state and/or federal Medicaid or false claims laws."

When making TPR refunds, providers should make the check payable to TMHP and send it with a completed Refund Information Form addressed to the attention of TMHP Cash Reimbursement.

Include the following information with the TPR refund:

- Client name and Medicaid number
- Copy of the R&S report listing the paid claim (if available)
- Date of service
- Provider name, number, or both
- Name, address, policy, and group number of insurance company
- Amount of insurance payment

Refer to: "Texas Medicaid Refund Information Form" on page B-104.

4.7.7 Accident-Related Claims

TMHP monitors all accident claims to determine whether another resource may be liable for the medical expenses of clients with Medicaid coverage. Providers are requested to ask clients whether medical services are necessary because of accident-related injuries. If the claim is the result of an accident, providers enter the appropriate code and date in Block 10 of the CMS-1500 claim form, and Blocks 32ab to 35ab on the HCFA-1450 (UB-92) claim form.

If payment is immediately available from a known third party such as Workers' Compensation or PIP automobile insurance, that responsible party must be billed before Medicaid and the insurance disposition information must be filed with the Medicaid claim. If the third party payment is substantially delayed because of contested liability or unresolved legal action, a claim may be submitted to TMHP for consideration of payment.

TMHP processes the liability-related claim and pursues reimbursement directly from the potentially liable party on a postpayment basis. Include the following information on these claims:

- Name and address of the TPR
- Description of the accident including location, date, time, and alleged cause
- Reason for delayed payment by the TPR

4.7.8 Accident Resources, Refunds

Acting on behalf of HHSC, TMHP has specific rights of recovery from any settlement, court judgment, or other resources awarded to a client with Medicaid coverage (*Texas Human Resources Code*, Chapter 32.033). In most cases, TMHP works directly with the attorneys, courts, and insurance companies to seek reimbursement for Medicaid payments. If a provider receives a portion of a settlement for services also paid by Medicaid, the provider must make a refund to TMHP. Any provider filing a lien for the entire billed amount must contact the Third Party Resources Unit at TMHP for Medicaid postpayment activities to be coordinated. A provider may not file a lien for the difference between the billed charges and the Medicaid payment. A lien may be filed for services not covered by Medicaid. A lien is the liability of the client with Medicaid coverage.

Providers contact the Third Party Resources Unit at TMHP after furnishing an itemized statement and/or claim copies for any accident-related services billed to Medicaid if they received a request from an attorney, a casualty insurance company, or a client.

The provider furnishes TMHP with the following information:

- Client's name
- Medicaid ID number
- Dates of service involved
- Name and address of the attorney or casualty insurance company

This information enables TMHP to pursue reimbursement from any settlement. Use the "Tort Response Form" on page B-114 to report accident information to TMHP. When the form is completed, remit it to the TMHP Third Party Resources Unit (the address and fax number are on the form).

Providers may contact the TMHP Third Party Resources Unit by calling 1-800-846-7307 or mailing to the following address:

Texas Medicaid & Healthcare Partnership
Third Party Resources Unit
PO Box 202948
Austin, TX 78720-9981

4.7.8.1 Providers Filing Liens for Third Party Reimbursement

Any provider filing a lien for the entire billed amount must contact the TMHP Third Party Resources Unit for Medicaid post payment activities to be coordinated.

A provider may file a lien for the entire billed amount only after meeting the criteria in 1 TAC §354.2322, summarized below. Providers who identify a third party, within 12 months from the date of service, and wish to submit a bill or other written demand for payment or collection of debt to a third party after a claim for payment has been submitted and paid by Medicaid must refund any amounts paid before submitting a bill or other written demand for payment or collection of debt to the third party for

CPT only copyright 2005 American Medical Association. All rights reserved.

payment, and they must comply with the provisions set forth in 1 TAC §354.2322, which states: Providers may retain a payment from a third party in excess of the amount Medicaid would otherwise have paid only if the following requirements are met:

- The provider gives notice to the client or the attorney or representative of the client that the provider may not or will not submit a claim for payment to Medicaid and the provider may or will pursue a third party, if one is identified, for payment of the claim. The notice must contain a prominent disclosure that the provider is prohibited from billing the client or a representative of the client for any Medicaid-covered services, regardless of whether there is an eventual recovery or lack of recovery from the third party or Medicaid.
- The provider establishes the right to payment separate of any amounts claimed and established by the client.
- The provider obtains a settlement or award in its own name separate from a settlement obtained by or on behalf of the client or award obtained by or on behalf of the client, or there is an agreement between the client or attorney or representative of the client and the provider, that specifies the amount that will be paid to the provider after a settlement or award is obtained by the client.

4.7.8.2 Submission of Informational Claims

A provider must submit an informational claim to HHSC within the 95 days from the date of service. Informational claims will not be accepted after the 95-day filing deadline.

An informational claim is a paper claim form UB-92 or CMS-1500 submitted to the HHSC/TPR address with an indication that the provider is seeking payment from a third party for a tort-related liability. Providers cannot submit informational claims electronically. *Do not send informational claims to TMHP.* When sending an informational claim, the provider must complete an Informational Inquiry Form. Only one Inquiry Form per client is required.

Refer to: "Informational Inquiry Form" on page B-53.

Providers may inquire on the status of an informational claim by calling HHSC toll-free at 1-800-436-6184. This toll-free line *only* answers questions about informational claims.

To ensure that HHSC Third Party Resources Unit receives the original informational claims, providers should send original informational claims by certified mail to the following address:

HHSC/OIG/TPR
INFOC
PO Box 85200
Austin, TX 78708-5200

Note: *Faxed informational claims will not be accepted.*

4.7.8.3 Informational Claim Conversion to Claim for Payment

Providers who have filed informational claims with HHSC, but have not received payment from the third party within 18 months from the date of service, must choose before the end of the 18th month from the date of service to do one of the following:

- Continue to pursue a claim against the third party for payment and forego the right to submit a written request for the conversion of the informational claim for payment by Medicaid.
- Submit a letter on hospital letterhead by fax or mail requesting the conversion of the informational claim to a claim for payment by Medicaid. The letter must include the following information: client's name, Medicaid ID, Date of Service, and Total Billed amount as originally stated on the UB-92 or CMS-1500. HHSC does not accept or pay any claim for payment after 18 months from the date of service has elapsed, regardless of whether an informational claim has been timely filed. All other filing deadlines apply.

Mailing Address:
HHSC/OIG/TPR
INFOC
PO Box 85200
Austin, TX 78708-5200

Fax: 1-512-833-6043

All payment deadlines are enforced regardless of the provider's decision to pursue a third party claim. Once timely notification has been received by HHSC to convert the informational claim to a claim for payment, HHSC forwards the informational claim to TMHP. Informational claims converted to actual claims are not a guarantee of payment by TMHP.

4.7.9 Long Term Care Providers

A nursing facility, home health services provider, or any other similar long term care services provider that is Medicare-certified must:

- Seek reimbursement from Medicare before billing the Medicaid program for services provided to an individual who is eligible to receive similar services under the Medicare program
- Appeal Medicare claim denials for payment, as directed by the department

A nursing facility, home health services provider, or any other similar long term care services provider that is Medicare-certified is not required to seek reimbursement from Medicare before billing the Medicaid program for a person who is Medicare-eligible and has been determined as not being homebound.

CPT only copyright 2005 American Medical Association. All rights reserved.

4.8 NorthSTAR (Behavioral Health Program in Dallas Service Area Only)

The state implemented a behavioral health organization (BHO) program known as NorthSTAR. NorthSTAR provides mental health and chemical dependency (behavioral health) services.

NorthSTAR replaces traditional Medicaid behavioral health specialty services for those Medicaid clients who are required to join the NorthSTAR Program. Behavioral health specialty providers must not bill TMHP for behavioral health services that are provided to enrollees with behavioral health diagnoses in the NorthSTAR Program. Medicaid providers who are considered behavioral health specialists include psychiatrists, psychologists, licensed professional counselors, licensed marriage and family therapists, licensed master's social workers, and TCADA-licensed chemical dependency programs for children and adolescents. In general, acute care hospitals behavioral health specialty services are defined as inpatient stays in which the primary diagnosis is a behavioral health diagnosis.

Behavioral health specialists and hospitals no longer bill TMHP for behavioral health services provided to clients who are enrolled in or eligible for membership in the NorthSTAR Program. If a claim is submitted to TMHP for a NorthSTAR-enrolled client, it will be denied with instructions for the provider to submit the claim to the client's BHO.

Behavioral health providers follow a new set of rules to receive payment for services provided to Medicaid clients who are enrolled in NorthSTAR.

The new rules are as follows. A behavioral health provider must:

- Be a provider of the plan's NorthSTAR network to receive payment for most services provided to the members.
- Obtain prior approval for some nonemergency services. This rule applies when providing treatment to a NorthSTAR member, whether or not in the Dallas service area.
- Provide services to Medicaid clients not eligible to enroll in a NorthSTAR BHO. TMHP will continue to pay these clients Medicaid claims. These clients live in a nursing facility, Intermediate Care Facility for the Mentally Retarded (ICF-MR), the state hospitals' IMD over age 65 program, or children who are in the custody of the Texas Department of Protective and Regulatory Services (in foster care).
- Bill Medicare for Medicare-covered services. TMHP continues to pay deductible and coinsurance charges for Medicare services for these clients.

Exception: *Exceptions include emergency care and medically necessary treatment episodes that began before the client joined a NorthSTAR Plan.*

Clients enroll in the NorthSTAR plan Value Options. When a Medicaid client requests services, call Value Options at 1-888-800-6799 to verify if the client is a member of NorthSTAR. Also call this number to get information on joining the plan's networks.

If clients would like to join NorthSTAR, they may call the state's enrollment broker, the Texas Access Alliance (TAA), at 1-800-964-2777. The TAA staff is trained to help potential members understand both the STAR and NorthSTAR programs. NorthSTAR also provides behavioral health services to some people who are not Medicaid-eligible. These people are provided a greater variety of services than what is available under the current Medicaid program.

Behavioral health providers do *not* bill TMHP for services provided to NorthSTAR members.

FOR THE CLIENT: About your Medicaid ID Form

This is your MEDICAID IDENTIFICATION form. When you get any health care services, you must have this form with you if you want Medicaid to pay for your serivces.

WHAT IF YOU GET A BILL? If you get a bill from a doctor, hospital, or other health care provider, ask the provider why they are billing you. If you still get a bill, call 1-800-335-8957 for help.

WHAT IF THE SERVICES REQUESTED FOR YOU ARE DENIED? You will receive a letter telling you the request was denied and that you have the right to ask for a fair hearing. You may ask for a hearing in writing or by calling. The address and telephone number will be listed on the letter that you get.

CAUTION: If you accept Medicaid benefits (services or supplies), the state of Texas has the right to receive payment for those services or supplies from other insurance companies and other liable sources, up to the amount needed to cover what Medicaid spent.

FOR QUESTIONS REGARDING MEDICAID ELIGIBILITY, ID FORMS, AND ADDRESS CHANGES: Please contact the Texas Health and Human Services Commission (HHSC) office in your area. The telephone numbers and addresses are listed in your local telephone book.

For Questions About Other Medicaid Programs, You May Call the Following Toll-Free Numbers:

PARA EL CLIENTE: información sobre la forma de identificación de Medicaid

Ésta es su forma de IDENTIFICACIÓN DE MEDICAID. Cuando obtenga cualquier servicio de atención médica, tiene que presentar esta forma si quiere Medicaid pague los servicios que reciba.

¿QUÉ PASA SI RECIBE UNA CUENTA? Si recibe una cuenta de un doctor, un hospital u otro proveedor de atención médica, pregúntele al proveedor por qué le está cobrando. Si de todos modos recibe una cuenta, llame al 1-800-335-8957 para pedir ayuda.

¿QUÉ PASA SI LOS SERVICIOS SOLICITADOS PARA USTED SE NIEGAN? Usted recibirá una carta en la que se le informa que la solicitud fue negada y que tiene el derecho de pedir una audiencia imparcial. Puede pedir una audiencia por escrito o por teléfono. La dirección y el número de teléfono aparecerán el la carta que reciba.

AVERTENCIA. Si usted acepta los beneficios (servicios o artículos), de Medicaid, el estado de Texas tiene el derecho de recibir el pago de esos servicios o artículos de parte de otras compañías de seguro y otras fuentes responsables, hasta la suma necesaria para cubrir la cantidad que gastó Medicaid.

SI TIENE PREGUNTAS SOBRE LA ELEGIBILDAD PARA MEDICAID, LA FORMA DE IDENTIFICACIÓN O CAMBIOS DE DIRECCIÓN: Por favor, comuníquese con la ofician de la Comisión de Salud y Servicios Humanos de Texas (HHSC) de su región. El número de teléfono y la dirección se encuentran en el directorio telefónico de su comunidad.

Si tiene preguntas sobre otros programas de Medicaid, puede llamar gratis a los siguientes números de teléfono:

1-800-252-8263	BENEFICIOS Y NORMAS: para saber qué paga Medicaid o para encontrar a un proveedor.
1-800-335-8957	PROBLEMAS DE CUENTAS DE MEDICAID: para tratar cualquier cuenta médica que reciba.
1-877-847-8377	PASOS SANOS DE TEXAS: para saber sobre los servicios para clientes menores de 21 años, incluso los chequeos médicos y dentales.
1-877-633-8747	PROGRAMA DE TRANSPORTACIÓN MÉDICA: para conseguir ayuda de transporte gratis cuando no tiene ninguna otra manera de ir y venir al doctor, dentista o farmacia.
1-866-566-8989	STARLINK: para tratar problemas relactionados con el Program STAR de atención médica administrada.
1-800-335-8957	PROGRAMA DE SERVICIOS POR NECESIDAD MÉDICA (MNP): para hablar de su caso de cuota prescrita.
1-800-458-9858	ATENCIÓN A LARGO PLAZO (LTC): para hablar de los servicios de una casa para convalecientes.
1-877-511-8858	RECURSOS DE UN TERCERO (TPR): si tiene otro seguro.
1-800-436-6184	FRAUDE: para tratar casos de Medicaid, estampillas para comida, y TANF.
1-800-440-0493	SISTEMA DEL PAGO DE LA PRIMA DEL SEGURO MÉDICO (HIPP): para conseguir ayuda con las primas del seguro médico comercial.
1-800-772-1213	ADMINISTRACIÓN DE SEGURO SOCIAL (SSA): para informar de un cambio de dirección si es cliente de SSI.

HOUSTON TX 77143

ANYONE LISTED BELOW CAN GET MEDICAID SERVICES

You now receive your Medicaid medical care through Primary Care Case Management (PCCM). Your primary care provider (PCP) is listed below. If you want to pick a different PCP, call toll-free 1-888-302-6688.

Your PCP is your first stop for getting medical care. When you are sick or injured, your PCP will help you. Your PCP can also assist with THSteps checkups for children and teenagers, prenatal and well woman care. For more information, read your handbook, Primary Care Provider and Hospital List, or call PCCM toll-free at 1-888-302-6688.

READ BACK OF THIS FORM!

TODA PERSONA NOMBRADA A CONTINUACIÓN PUEDE RECIBIR SERVICIOS DE MEDICAID

Usted ahora recibe la atención médica de Medicaid por medio de Primary Care Case Management (PCCM). El nombre de su Proveedor de Cuidado Primario (PCP) aparece a continuación. Si quiere escoger a otro PCP, llame gratis al 1-888-302-6688.

Su PCP es el primer lugar al que debe ir para recibir atención médica. Cuando esté enfermo o lesionado, su PCP le ayudará. También le puede ayudar con los chequeos de Pasos Sanos de Texas para niños y jóvenes, con la atención prenatal y los chequeos preventivos para la mujer. Para más información, lea el manual titulado Lista de Proveedores de Cuidado Primario y Hospitales, o llame gratis a PCCM al 1-888-302-6688.

I hereby certify, under penalty of perjury and/or fraud, that the above client(s) have lost, have not received, or have no access to the Medicaid Identification (Form H3087) for the current month. I have requested and received Form H1027-A, Medical Eligibility Verification, to use as proof of eligibility for the dates shown above. I understand that using this form to obtain Medicaid benefits (services or supplies) for people not listed above is fraud and is punishable by fine and/or imprisonment.

CAUTION: If you accept Medicaid benefits (services or supplies), you give and assign to the state of Texas your right to receive payments for those services or supplies from other insurance companies and other liable sources, up to the amount needed to cover what Medicaid spent.

Por este medio certifico, bajo pena de perjurio y/o fraude, que los clientes nombrados arriba hemos perdido, no hemos recibido o por otra razón no tenemos en nuestro poder la Identificación para Medicaid (Forma H3087) del corriente mes. Solicité y recibí esta Confirmación de Elegibilidad Médica (Forma H1027-A) para comprobar nuestra elegibilidad para Medicaid durante el periodo cubierto especificado arriba. Comprendo que usar esta confirmación para obtener beneficios (servicios o artículos) de Medicaid para alguna persona no nombrada arriba como beneficiario constituye fraude y es castigable por una multa y/o la cárcel.

ADVERTENCIA: Si usted acepta beneficios de Medicaid (servicios o artículos), otorga y concede al estado de Texas el derecho a recibir pagos por los servicios o artículos de otras compañías de seguros y otras fuentes responsables, hasta completar la cantidad que se requiere para cubrir lo que haya gastado Medicaid.

Form H1027-A
Page 2/09-2005

Medicaid clients do not have to pay bills which Medicaid should pay. It is very important that you tell your doctor, hospital, drugstore, and other health care providers right away that you have Medicaid. If you do not tell them that you have Medicaid, you may have to pay these bills. If you get a bill from a doctor, hospital, or other health care provider, ask the provider why they are billing you. If you still get a bill, call the Medicaid hotline at 1-800-252-8263 for help. If Medicaid will not pay the bill or if Medicaid benefits (services and supplies) are denied, you may request a fair hearing by writing to the address or calling the telephone number listed on the letter you get.

NOTE: Family planning clinics and other providers give free physical exams, lab tests, birth control methods (including sterilization) and contraceptive counseling.

El cliente de Medicaid no tiene que pagar cuentas médicas que Medicaid debe pagar. Es muy importante que usted diga inmediatamente a su médico, al hospital, a la farmacia y a otros proveedores de servicios médicos que usted tiene Medicaid. Si no les dice que tiene Medicaid, puede que usted tenga que pagar estas cuentas. Si usted recibe una cuenta de un doctor, un hospital, u otro proveedor de servicios médicos, pregunte por qué le mandó la cuenta. Si todavía le mandan una cuenta, llame al número directo de Medicaid al 1-800-252-8263 para pedir ayuda. Si Medicaid no va a pagar la cuenta o si se niegan los beneficios de Medicaid (los servicios o los artículos), usted puede pedir por escrito una audiencia imparcial. La dirección y el número de teléfono aparecen en la carta que recibió.

NOTA: Las clínicas de planificación familiar y los otros proveedores ofrecen gratis exámenes físicos, análisis de laboratorio, métodos anticonceptivos (inclusive la esterilización) y consejería sobre los anticonceptivos.

Provider Information/Información para el proveedor

Only those people listed under "CLIENT NAME" have Medicaid coverage. Payment is allowed ONLY for services received during the eligibility dates reflected on the front of this form.

PLEASE NOTE: Payment for Family Planning Services is available without the consent of the client's parent or spouse. Confidentiality is required. Family planning drugs, supplies, and services are exempt from the prescription drug and "LIMITED" restrictions.

Key to terms that may appear on this form:

LIMITED–Except for family planning services, and for Texas Health Steps (EPSDT), medical screening, dental, and hearing aid services, the client is limited to seeing the doctor **and/or** limited to using the pharmacy named on the form for drugs obtained through the Vendor Drug Program. In the event of an emergency medical condition as defined below, the "LIMITED" restriction does not apply.

EMERGENCY–The client is limited to coverage for an emergency medical condition. This means a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson (who possesses an average knowledge of health and medicine) would think that the absence of immediate medical attention could reasonably be expected to result in (1) placing the patient's health in serious jeopardy, (2) serious impairment to bodily functions, or (3) serious dysfunction of any bodily organ or part.

HOSPICE–The client is in hospice and waives the right to receive services related to the terminal condition through other Medicaid programs. If a client claims to have canceled hospice, call the local hospice agency or DHS to verify.

QMB–The Medicaid agency is providing coverage of Medicare premiums, deductible, and coinsurance liabilities, but the client is not eligible for regular Medicaid benefits.

MQMB–The Medicaid agency is providing regular Medicaid coverage as well as coverage of Medicare premiums, deductibles, and coinsurance liabilities.

PE–Medicaid covers only family planning and medically necessary outpatient services.

STAR/STAR+PLUS/PCCM HEALTH PLAN–The client is enrolled in the Medicaid Managed Care program and is assigned to the health plan named on the form.

NOTE TO PHARMACY: Medicaid will pay for more than three prescriptions each month for any Medicaid client who is under age 21, or lives in a nursing facility, or has the STAR/STAR+PLUS Health Plan, or gets services through the Community Living Assistance and Support Services (CLASS), Community Based Alternatives (CBA) and other non-SSI community-based waiver programs. Clients with Medicare who are enrolled in STAR+PLUS may be limited to three prescriptions per month.

5.1 Claims Information

Because Medicaid cannot make payments to clients, the provider who performs the service must file an assigned claim. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business.

5.1.1 TMHP Processing Procedures

TMHP processes claims for the traditional (fee-for-service) Medicaid and Medicaid Managed Care programs.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same Medicaid provider identifier and program ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) report, which may be received either on paper or a Portable Document Format (PDF) downloadable version. A *Health Insurance Portability and Accountability Act* (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

  Weekly claim/financial activity, with or without payments, initiate an R&S report being sent to a provider. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, the provider does not receive an R&S report for the week.

Refer to: "Medicaid Managed Care" on page 7-4 for TMHP claims processing information related to Medicaid Managed Care.

5.1.1.1 Fiscal Agent

TMHP acts as the state's Medicaid fiscal agent. A fiscal agent arrangement is one of two methods allowed under federal law and is used by all other states that contract with outside entities for Medicaid claims payment. Under the fiscal agent arrangement, TMHP is responsible for paying claims, and the state is responsible for covering the cost of claims.

Note: *The fiscal agent arrangement does not affect Long Term Care (LTC) and Family Planning (Titles V, X, XX) providers, since these providers are not reimbursed through the Compass21 (C21).*

Provider Designations

The fiscal agent arrangement requires that providers be designated as either public or nonpublic. By definition, public providers are those that are owned or operated by a city, state, county, or other government agency or instrumentality, according to the Code of Federal Regulations. In addition, any provider or agency that can do intergovernmental transfers to the state would be considered a public provider. This includes those agencies that can certify and provide state matching funds, (i.e., other state agencies). New providers enrolling after January 2004 self-designate (public or private) on the provider enrollment application. Providers who are already enrolled do not need to take any action regarding their designation at this time.

The fiscal agent:

- Rejects all claims not payable under Texas Medicaid rules and regulations.
- Suspends payments to providers according to procedures approved by HHSC.
- Notifies providers of reduction in claim amount or rejection of claim and the reason for doing so.
- Collects payments made in error, affects a current record credit to the department, and provides the department with required data relating to such error corrections.
- Prepares checks or drafts to providers, except for cases in which the department agrees that a basis exists for further review, suspension, or other irregularity within a period not to exceed 30 days of receipt and determination of proper evidence establishing the validity of claims, invoices, and statements.
- Makes provisions for payments to providers who have furnished eligible client benefits.
- Withholds payment of claim when the eligible client has another source of payment.
- Employs and assigns a physician, or physicians, and other professionals as necessary, to establish suitable standards for the audit of claims for services delivered and payment to eligible providers.
- Requires eligible providers to submit information on claim forms.

5.1.2 Claims Filing Instructions

This manual references paper claims when explaining filing instructions. HHSC and TMHP encourage providers to submit claims electronically. TMHP offers specifications for electronic claim formats. These specifications are available from the TMHP website and include a cross-reference of the paper claim filed requirements to the electronic format.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system. The proceeding claim filing instructions in this provider procedures manual apply to paper and electronic submitters. Although the examples of claims filing instructions refer to their inclusion on the paper claim form, claim data requirements apply to all claim submissions, regardless of the media.

CPT only copyright 2005 American Medical Association. All rights reserved.

Claims must contain the provider's complete name, address, and nine-digit provider identifier to avoid unnecessary delays in processing and payment.

Note: *Providers rendering services to State of Texas Access Reform (STAR) and STAR+PLUS Program members must file claims and encounters with the appropriate health plan using the health plan's guidelines.*

Exception: *File Primary Care Case Management (PCCM) claims with TMHP.*

Refer to: "TMHP Electronic Data Interchange (EDI)" on page 3-1 for instructions on accessing the TMHP website and filing electronically and "Medicaid Managed Care" on page 7-4.

5.1.2.1 Quick Tips on Expediting Paper Claims

Using the guidelines in the *Do* table *enhances* the accuracy and timeliness of paper claims processing:

Do
Use 10 X 13-inch envelopes to send quantities of claims.
Circle only one claim per page, when sending Remittance Advice (RA) from Medicare (claims normally filed on a HCFA-1450 [UB-92] must accompany the Medicare RA).
Use black ink only.
Place the claim on top when sending new claims, followed by any medical records or attachments.
Circle the claim on the R&S report page when appealing a claim. Place the R&S report page on top of the appeal.
Number pages appropriately when sending attachments (e.g., 1 of 2, 2 of 2).
Paper clip claims or appeals if they include attachments.
Detach claims at perforated lines before mailing.
Use only approved standard forms.

Conversely, the items in the *Do Not* table *delay* paper claims processing:

Do Not
Fold claims, appeals, or correspondence.
Send duplicate copies of information.
Use red ink. Because scanners do not detect red ink, any note or correction written in red will be ignored.
Use paper sizes smaller or larger than 8 1/2 X 11. Scanner machines used for processing claims only accept 8 1/2 X 11 paper (including pictures and memos).
Mail a claim or other correspondence that goes to another department in the same envelope. When items going to different departments are sent together, they might become delayed or misrouted.
Use highlighters. Scanners will not pick up information that is highlighted (circle information to be highlighted instead).
Use glue, tape, or staples.
Print claim data outside of claim form field boxes.

5.1.3 Claims Filing Deadlines

For questions or assistance about the Texas Medicaid Program, call the TMHP Contact Center at 1-800-925-9126.

For claims payment to be considered, providers must adhere to the time limits described in this section. Claims received after the following claims filing deadlines are not payable because the Medicaid program does not provide coverage for late claims.

Exception: *The Texas Administrative Code allows HHSC to consider exceptions to the 95-day filing deadline under special circumstances. Unless otherwise stated below, claims must be received by TMHP within 95 days from each date of service (DOS). Appeals must be received by TMHP within 120 days of the disposition date on the R&S report on which the claim appears. A 95-day or 120-day appeal filing deadline that falls on a weekend or a holiday is extended to the next business day following the weekend or holiday.*

Only the following holidays extend the deadlines in 2007:

Date	Holiday
January 1, 2007	New Year's Day
January 15, 2007	Martin Luther King, Jr. Day
February 19, 2007	President's Day
May 28, 2007	Memorial Day
July 4, 2007	Independence Day
September 3, 2007	Labor Day
October 8, 2007	Columbus Day
November 22, 2007	Thanksgiving Day
November 23, 2007	Day After Thanksgiving
December 24, 2007	Christmas Eve
December 25, 2007	Christmas Day
December 26, 2007	Day After Christmas

The following are time limits for submitting claims:

- Inpatient claims filed by the hospital must be received by TMHP within 95 days from the discharge date or last DOS on the claim.
- Hospitals reimbursed according to diagnosis-related group (DRG) payment methodology may submit an interim claim because the client has been in the facility 30 consecutive days or longer. A total stay claim is needed after discharge to ensure accurate calculation for potential outlier payments for clients younger than 21 years of age.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Children's hospitals reimbursed according to *Tax Equity and Fiscal Responsibility Act* (TEFRA) *of 1982* methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital's fiscal year end.
- When medical services are rendered to a Medicaid client in Texas, TMHP must receive claims within 95 days of the DOS on the claim. Claims submitted by newly enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the date of service.
- TMHP must receive claims from out-of-state providers within 365 days from the DOS. The DOS is the date the service is provided or performed.
- TMHP must receive claims on behalf of an individual who has applied for Medicaid coverage but has not been assigned a Medicaid number on the DOS within 95 days from the date the eligibility was added to the TMHP eligibility file (add date). Providers should verify eligibility and add date by contacting TMHP (Automated Inquiry System [AIS], TMHP EDI's electronic eligibility verification, or TMHP Contact Center) when the number is received. Not all *applicants* become eligible *clients*.

Important: *Providers should request and keep copies of any Forms 1027 and 3087 submitted by clients. A copy is required during the appeal process if the client's eligibility becomes an issue.*

- If a client becomes retroactively eligible or loses Medicaid eligibility and is later determined to be eligible, the 95-day filing deadline begins on the date that the eligibility start date was added to TMHP files (the add date).
- When a service is a benefit of Medicare and Medicaid, and the client is covered by both programs, the claim must be filed with Medicare first. TMHP only processes one client per Medicare RA. For multiple clients, submit one copy per client. TMHP *must* receive Medicaid claims within 95 days from the date of Medicare disposition. Providers submit the Medicare Remittance Advice Notice (MRAN) with the client's Medicaid number to TMHP.
- When a client is eligible for Medicare Part B only, the inpatient hospital claim for services covered as Medicaid only is sent directly to TMHP and subject to the 95-day filing deadline (from date of discharge).

Note: *It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send. It is also recommended paper claims be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 95-day claims filing deadline has been met. TMHP will accept certification receipts as proof of the 95-day and/or 120-filing deadline. For this, the provider must provide the following: certification receipt, log to include information in the packet, Medicaid number, billed amount, and a signed claim copy. The provider needs to keep such proof about multiple claims submissions if the Medicaid provider identifier is pending.*

- If the provider is trying to obtain prior authorization for services performed or will be performed, TMHP must receive the claim according to the usual 95-day filing deadline.
- The provider bills TMHP directly within 95 days from the DOS. However, if a nonthird party resource (TPR) is billed first, TMHP must receive the claim within 95 days of the claim disposition by the other entity. The provider submits a copy of the disposition with the claim. A non-TPR is secondary to Texas Medicaid and may only pay benefits after the Texas Medicaid Program. Examples of non-TPRs are the Texas Rehabilitation Commission and the Children with Special Health Care Needs (CSHCN) Services Program.
- When a service is billed to another insurance resource, the filing deadline is 95 days from the date of disposition by the other resource.
- When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. However, the federal 365-day filing requirement must still be met.
- A C21 process allows a Title V, X, or XX Family Planning claim to be paid by Title XIX (Medicaid) if the client is eligible for Title XIX (Medicaid) when those services are provided and billed under Title V, X, or XX. In this instance, the Medicaid 95-day filing deadline is in effect and must be met or the claim will be denied.

"Eligibility Verification" on page 4-4.

"Provider Inquiries—Status of Claims" on page 5-76.

5.1.3.1 Exceptions to the 95-Day Filing Deadline

TMHP is not responsible for appeals about exceptions to the 95-day filing deadline. These appeals must be submitted to the HHSC Claims Administrator Contract Management.

HHSC Claims Administrator Contract Management makes the final decision about whether claims fall within one of the exceptions to the 95-day filing deadline. Only providers can submit exception requests. Requests from billing

CPT only copyright 2005 American Medical Association. All rights reserved.

companies, vendors, or clearinghouses are not accepted unless accompanied by a signed authorization from the provider (with each appeal). Without provider authorization, these requests are returned without further action.

HHSC considers exceptions only when one of the following situations exists. The provider must submit an affidavit or statement and any additional information identifying details of cause for the delay, the exception being requested, and verification that the delay was not caused by neglect, indifference, or lack of diligence of the provider or the provider's employee or agent. The person who knows the facts must make the affidavit or statement.

HHSC Claims Administrator Contract Management determines if the claim falls within one of the following exceptions:

1) Catastrophic event that substantially interferes with normal business operations of the provider, or damage or destruction of the provider's business office or records by a natural disaster, including but not limited to fire, flood, or earthquake; or damage or destruction of the provider's business office or records by circumstances that are clearly beyond the provider's control including, but not limited to, criminal activity. The damage or destruction of business records or criminal activity exception does not apply to any negligent or intentional act of an employee or agent of the provider because these people are presumed to be within the provider's control. The presumption can be rebutted only when the intentional acts of the employee or agent leads to termination of employment and filing of criminal charges against the employee or agent.

   Providers requesting an exception based on exception (1) must submit independent evidence of insurable loss claims; medical, accident, or death records; or police or fire report substantiating the exception of damage, destruction, or criminal activity.

2) Delay or error in the eligibility determination of a client or delay because of erroneous written information from the department, another state agency, or health insuring agent.

   Providers requesting an exception based on exception (2) must submit the written document from HHSC or its designee that contains the erroneous information or explanation of the delayed information.

3) Delay because of electronic claim or system implementation problems.

   Providers requesting an exception based on exception (3) must submit the written repair statement, invoice, computer or modem-generated error report (indicating attempts to transmit the data failed for reasons outside the control of the provider), or the explanation for the system implementation problems. The documentation must include a detailed explanation made by the person making the repairs or installing the system specifically indicating the relationship and impact of the computer problem or system implementation to claims submission, and a detailed statement explaining why alternative billing procedures were not initiated after the delay in repairs or system implementation was known.

4) Submission of claims within the 365-day federal filing deadline when services are authorized retroactively.

   Providers requesting an exception based on exception (4) must submit a written, detailed explanation of the facts and documentation to demonstrate the 365-day federal filing deadline was met.

5) Client eligibility is determined retroactively and the provider is not notified of retroactive coverage.

   Providers requesting an exception based on exception (5) must include a written, detailed explanation of the facts and activities illustrating the provider's efforts in requesting eligibility information for the client. The explanation must contain dates, contact information, and any responses from the client.

Exception requests must be submitted in writing to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
PO Box 204077
Austin, TX 78720-4077

Note: *HHSC will only consider exceptions to the 95-day filing deadline for claims that were submitted within the 365-day federal filing deadline from the date of service as outlined in Title 1 Texas Administrative Code (TAC) §354.1003.*

5.1.3.2 Appeal Time Limits

All appeals of denied claims and requests for adjustments on paid claims must be received by TMHP within 120 days from the date of disposition, the date of the R&S report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline will be extended to the next business day.

Refer to: "Claims Filing Instructions" on page 5-23.

Hospitals appealing final technical denials, admission denials, DRG changes, continued-stay denials, or cost/day outlier denials refer to "Appeals" on page 6-1 for complete appeal information.

5.1.3.3 Claims with Incomplete Information and Zero Paid Claims

Claims lacking the information necessary for processing are listed on the R&S report with an Explanation of Benefits (EOB) code requesting the missing information. Providers must resubmit a signed, completed/corrected claim with a copy of the R&S report on which the denied claim appears to TMHP within 120 days from the date on the R&S report to be considered for payment. These claims may be filed electronically only if the following infor-

CPT only copyright 2005 American Medical Association. All rights reserved.

mation remains the same from the original claim: 1) provider identifier, 2) client Medicaid number, 3) dates of service, 4) total billed amount, or these claims may be resubmitted on paper for payment consideration to the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

Each corrected claim submitted must be accompanied by a copy of the corresponding page from the R&S report. Providers are not allowed to designate or resubmit these claims as appeals.

5.1.3.4 Claims Filing Reminders

After filing a claim to TMHP, providers should review the weekly R&S report. If within 30 days the claim does not appear in the *Claims In Process* section, or if it does not appear as a paid, denied, or incomplete claim, the provider should resubmit it to TMHP within 95 days from the DOS.

The provider should allow TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible, coinsurance, or both.

Electronic billers notify TMHP about missing claims when:

- An accepted claim does not appear on the R&S report within ten workdays of the file submittal.
- A claim or file does not appear on a TMHP Electronic Claims Submission Report within ten days of the file submission.

5.1.4 HHSC Payment Deadline

Payment deadline rules, as defined by HHSC, affect all providers with the exception of Long Term Care and Family Planning Titles V, X, and XX.

The new HHSC payment deadline rules for the fiscal agent arrangement ensure that state and federal financial requirements are met. TMHP is required to finalize and/or pay claims, within a determined time frame (see table below), based on provider, claim, or eligibility type.

The following table describes the new payment deadline rules:

Type	Description
All Providers	Medicaid/CSHCN payments, excluding crossovers, cannot be made after 24 months from each DOS on the claim (discharge date for inpatient claims.)
Refugee Clients	The payable period for all refugee Medicaid payments is the federal fiscal year (October-September) in which each DOS (discharge date for inpatient claims) occurs plus 1 additional federal fiscal year.
Medicaid Crossover Claims	The crossover file create date is the date in which the file is received by Medicaid. The state has 24 months from the create date to pay the crossover claim. For paper submissions, the state has 24 months from the MRAN date (attachment date) to pay a crossover claim.
Retroactive SSI Eligibility (clients)	The payment deadline is derived from the client’s eligibility “add date”; to allow 24 months from the add date for the retroactive Supplemental Security Income (SSI)-eligible client.
County Indigent SSI Eligibility (clients)	The payment deadline is derived from the client’s eligibility add date; to allow 24 months from the add date to pay the claim.

Claims and appeals submitted after the designated payment deadlines are denied.

Note: *Providers may appeal HHSC Office of Inspector General (OIG) initiated claims adjustments (recoupments) after the 24-month deadline but must do so within 120 days from the date of the recoupment. Refer to “Paper Appeals” on page 6-3 for instructions. All appeals of OIG recoupments must be submitted by paper, no electronic or telephone appeals will be accepted.*

5.2 TMHP Electronic Claims Submission

Providers must retain all claim and file transmission records. They may be required to submit them for pending research on missing claims or appeals.

Refer to: "TMHP Electronic Data Interchange (EDI)" on page 3-1 for more information.

5.2.1 Electronic Claim Acceptance

Providers should verify that their electronic professional claims were accepted by Texas Medicaid for payment consideration by referring to their Claim Response report, which is in the 27S batch response file (e.g. file name E085LDS1.27S). Providers should also check their Accepted and Rejected reports in the rej and acc batch response files (e.g. E085LDS1.REJ and E085LDS1.ACC) for additional information. Only claims which have been accepted on the Claim Response report (27S file) will be considered for payment and made available for claim status inquiry. Claims that are rejected must be corrected and resubmitted for payment consideration. For more information on electronic claims submissions refer to "Electronic Billing" on page 3-2, visit www.tmhp.com, or call the EDI Help Desk at 1-888-863-3638.

5.2.2 Electronic Rejections

The most common reasons for electronic professional claim rejections are:

- *Client information does not match.* Client information does not match the patient control number (PCN) on the TMHP eligibility file. The name, date of birth, sex, and nine-digit Medicaid identification number must be an exact match with the client's identification number on TMHP's eligibility record. If using TDHconnect, send an interactive eligibility request to obtain an exact match with TMHP's record. If not using TDHconnect, verify through the TMHP website or call AIS at 1-800-925-9126 to verify client information. A lack of complete client eligibility information causes a rejection and possibly delayed payment. To prevent delays when submitting claims electronically:
    - Always include the first and last name of the client on the claim in the appropriate fields.
    - Always enter the client's complete, valid nine-digit Medicaid number. Valid Medicaid numbers begin with 1, 2, 3, 4, or 5. CSHCN client numbers begin with a 9.
    - When submitting claims for newborns, use the guidelines in the following section.
- *Referring/Ordering Physician field blank or invalid.* The referring physician's Medicaid provider identifier, Medicare six-digit core number, or universal provider identification number (UPIN) must be present when billing for consultations, laboratory, or radiology. Consult the software vendor for this field's location on the electronic claims entry form.
- *Performing Physician ID field blank or invalid.* When the billing provider identifier is a *group* practice, the performing provider identifier for the physician who performed the service must be entered. Consult the software vendor for this field's location on the electronic claim form.
- *Facility Provider field blank or invalid.* When place of service (POS) is anywhere other than home or office, the facility's provider identifier must be present. If the provider identifier is not known, enter the name and address of the facility. Consult the software vendor for this field's location on the electronic claims entry form.
- *Invalid Type of Service or Invalid Type of Service/ Procedure code combination.* In certain cases some procedure codes will require a modifier to denote the procedure's type of service.

Note: *The C21 claims processing system can accept only 40 characters (including spaces) in the Comments section of electronic submissions for ambulance and dental claims. If providers include more than 40 characters in that field, C21 will accept only the first 40 characters; the other characters will not be imported into C21. Providers must ensure that all of the information that is required for the claim to process appropriately is included in the first 40 characters.*

Refer to: "Modifier Requirements for TOS Assignment" on page 5-11 for TMHP EDI modifier information.

5.2.2.1 Newborn Claim Hints

The following are to be used for newborns:

- If the mother's name is "Jane Jones," use "Boy Jane Jones" for a male child and "Girl Jane Jones" for a female child.
- Enter "Boy Jane" or "Girl Jane" in first name field and "Jones" in last name field. *Always* use "boy" or "girl" first and then the mother's full name. An exact match must be submitted for the claim to process.
- Do not use "NBM" for newborn male or "NBF" for newborn female.

The following are the most common reasons for electronic hospital HCFA-1450 (UB-92) claim rejections:

- *Admit hour outside allowable range.* (such as 24 hours)
- *Billed amount blank.*
- *Health coverage ID blank or invalid.* This number *must* be the valid nine-digit Medicaid client number. *Incorrect data* includes: a number less than nine digits; PENDING; 999999999; and Unknown.
- *Referring physician information on outpatient claim is blank* when laboratory/radiology services are ordered or a surgical procedure is performed. The referring physician's medical license number or UPIN number is required in Record 80. Consult the software vendor for the location of this field on the electronic claims entry form.

Refer to: "PCCM Expansion" on page 7-21.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.2.3 Resubmission of TMHP EDI Rejections

Providers receiving TMHP EDI rejections must resubmit corrected claims electronically within 120 days of the rejection report to avoid late filing.

5.2.4 TMHP EDI Batch Numbers, Julian Dates

All electronic transactions are assigned an eight-character Batch ID immediately upon receipt by the TMHP EDI Gateway. The batch ID format allows electronic submitters to determine the exact day, year, and hour that a batch was received. The batch ID format is JJJYHSSS, where each character is defined as follows:

- *JJJ—Julian date.* The three J characters represent the Julian date that the file was received by the TMHP EDI Gateway. The first character (J) is displayed as a letter, where E = 0, F = 1, G = 2, and H = 3. The last two characters (JJ) are displayed as numbers. All three characters (JJJ) together represent the Julian date.
- *Y—Year.* The Y character represents the last digit of the calendar year when the TMHP EDI Gateway receives the file. For example, a "5" in this position indicates the year 2005.
- *H—Hour.* The H character is displayed as a letter, representing the hour of the day that the TMHP EDI gateway received the file. The following letter codes represent the 24 hours of military time:

Letter to Hour Conversion			
A = 0	B = 1	C = 2	D = 3
E = 4	F = 5	G = 6	H = 7
I = 8	J = 9	K = 10	L = 11
M = 12	N = 13	O = 14	P = 15
Q = 16	R = 17	S = 18	T = 19
U = 20	V = 21	W = 22	X = 23

- *SSS—Sequence number.* This part of the batch ID is a unique sequence number that is EDI-assigned and does not impact determining the Julian date, year, or hour.

For example, the batch ID E085LDS1 means that the TMHP EDI gateway received the file on January 8, 2005, during the hour of 11 a.m.

Refer to: "Electronic Appeal Submission" on page 6-2 for instructions for using TMHP EDI batch IDs to prove timely filing.

5.2.5 Modifier Requirements for TOS Assignment

Modifiers for type of service (TOS) assignment are *not* required for Texas Health Steps (THSteps) Dental claims (claim type [CT] 021), Inpatient Hospital claims (CT 040), or Medicare Crossover claims (CT 030, 031, 050). Additionally, procedures submitted by specific provider types such as genetics, eyeglass, THSteps medical, and birthing centers are assigned the appropriate type of service based on the provider type and/or specific procedure code, and will not require modifiers.

Most procedure codes do not require a modifier for TOS assignment, but modifiers *are* required for *some* services submitted on professional claims (CT 020) and outpatient hospital claims (CT 023). Services that *require* a modifier for type of service assignment are listed below.

5.2.5.1 Assistant Surgery

For assistant surgical procedures, use one of the following modifiers: 80, 81, 82, and AS. Using these modifiers results in TOS 8 being assigned to the procedure.

5.2.5.2 Anesthesia

For anesthesia procedures, use one of the following modifiers: AA, AD, QK, QS, QX, and QZ. Using these modifiers results in TOS 7 being assigned to the procedure.

5.2.5.3 Interpretations

For interpretations or professional components of laboratory, radiology, or radiation therapy procedures, use modifier 26. Using modifier 26 results in TOS I being assigned to the procedure.

Exception: *The following procedure codes do not require a modifier for TOS assignment and are automatically processed as a professional component with a TOS I:*

Procedure Codes		
I-93014	I-93018	I-93227
I-93233	I-93237	I-93722

5.2.5.4 Technical Components

For technical components of laboratory, radiology, or radiation therapy procedures, use modifier TC. Using this modifier results in TOS T being assigned to the procedure.

Exception: *Outpatient hospitals do not include the TC modifier when they provide technical components of lab and radiology services. These services automatically have TOS 4 or 5 assigned and are subject to the facility's interim reimbursement rate or the clinical lab fee schedule.*

Additionally, the following procedure codes do not require a modifier for TOS assignment and are processed automatically as a technical component with a TOS T:

Procedure Codes		
T-77401	T-77402	T-77403
T-77404	T-77406	T-77407
T-77408	T-77409	T-77411
T-77412	T-77413	T-77414
T-77416	T-77417	T-93005
T-93017	T-93041	T-93225

5

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Codes		
T-93226	T-93231	T-93232
T-93236	T-93721	T-95824

5.2.5.5 Durable Medical Equipment

For durable medical equipment (DME), use one of the following modifiers: NU, RR, or UE.

Using modifier NU results in TOS J being assigned, modifier RR results in TOS L, and modifier UE results in TOS 9.

5.2.5.6 Telemedicine

For telemedicine services, Texas Medicaid-enrolled providers bill using the GT modifier with the appropriate evaluation and management code. Rural health clinic (RHC) and federally qualified health clinic (FQHC) providers bill using encounter codes with the AM and SA modifiers.

Place modifier AM or SA in the *first* modifier field on the claim form together with modifier GT in the *second* modifier field.

5.2.5.7 THSteps Medical Modifiers

The following are modifiers to be used for filing THSteps medical claims: AM, SA, and U7.

An FQHC provider must also use modifier EP.

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for more instructions on billing THSteps medical claims.

5.2.6 Preferred Provider Organization (PPO)

Effective November 03, 2003, PPO discounts are no longer considered a part of other insurance payments. Electronic submitters must supply the PPO discount amount when submitting other insurance information; however, this information is not included in the total other insurance payment during claims processing. Paper submitters are not required to add the PPO discount to the other insurance payment.

5.3 Coding

Electronic billers must code all claims. TMHP encourages all providers to code their paper claims. Claims are processed fast and accurately if providers furnish appropriate information. By coding claims, providers ensure precise and concise representation of the services provided and are assured reimbursement based on the correct code. If providers code claims, a narrative description is not required and does not need to be included unless the code is a not an otherwise classified code.

Important: *Claims for anesthesia must have the Current Procedural Terminology (CPT) anesthesia procedure code narrative descriptions, or CPT surgical codes or the claim will be denied.*

The carrier for the Texas Medicare Program has coding manuals available for physicians and suppliers with codes not available in CPT. To order a CPT Coding Manual, write to the following address:

American Medical Association
Book and Pamphlet Fulfillment
PO Box 2964
Milwaukee, WI 53201

5.3.1 Diagnosis Coding

Texas Medicaid requires providers to provide *International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM)* diagnosis codes on their claims. The *only* diagnosis coding structure accepted by the Texas Medicaid Program is the ICD-9-CM. Diagnosis codes must be to the highest level of specificity available. In most cases a written description of the diagnosis is not required. ICD-9-CM evaluation and management codes are not payable as a primary diagnosis.

All V-codes are acceptable as diagnoses except the following nonspecific codes:

Diagnosis Code	Description
V030	Need for prophylactic vaccination and inoculation against cholera alone
V031	Need for prophylactic vaccination with typhoid-paratyphoid (TAB) vaccine
V032	Need for prophylactic vaccination with tuberculosis (BCG) vaccine
V033	Need for prophylactic vaccination and inoculation against plague
V034	Need for prophylactic vaccination and inoculation against tularemia
V035	Need for prophylactic vaccination and inoculation against diphtheria alone
V036	Need for prophylactic vaccination and inoculation against pertussis alone
V037	Need for prophylactic vaccination with tetanus toxoid alone
V0381	Need for prophylactic vaccination and inoculation against hemophilus influenza, type b [Hib]
V0382	Need for prophylactic vaccination and inoculation against streptococcus pneumoniae [pneumococcus]
V0389	Need for prophylactic vaccination and inoculation against other specified single bacterial disease

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V039	Need for prophylactic vaccination and inoculation against unspecified single bacterial disease
V040	Need for prophylactic vaccination and inoculation against poliomyelitis
V041	Need for prophylactic vaccination and inoculation against smallpox
V042	Need for prophylactic vaccination and inoculation against measles alone
V043	Need for prophylactic vaccination and inoculation against rubella alone
V044	Need for prophylactic vaccination and inoculation against yellow fever
V045	Need for prophylactic vaccination and inoculation against rabies
V046	Need for prophylactic vaccination and inoculation against mumps alone
V047	Need for prophylactic vaccination and inoculation against common cold
V048	Need for prophylactic vaccination and inoculation against other viral diseases
V0481	Need for prophylactic vaccination and inoculation, influenza
V0482	Need for prophylactic vaccination and inoculation, respiratory syncytial virus (RSV)
V0489	Need for prophylactic vaccination and inoculation, other viral diseases
V050	Need for prophylactic vaccination and inoculation against arthropod-borne viral encephalitis
V051	Need for prophylactic vaccination and inoculation against other arthropod-borne viral diseases
V052	Need for prophylactic vaccination and inoculation against leishmaniasis
V053	Need for prophylactic vaccination and inoculation against viral hepatitis
V054	Need for prophylactic vaccination and inoculation against varicella
V058	Need for prophylactic vaccination and inoculation against other specified disease
V059	Need for prophylactic vaccination and inoculation against unspecified single disease
V060	Need for prophylactic vaccination against cholera with typhoid-paratyphoid (cholera + TAB) vaccine
V061	Need for prophylactic vaccination with combined diphtheria-tetanus-pertussis (DTP) (DTaP) vaccine
V062	Need for prophylactic vaccination with diptheria-tetanus- pertussis with typhoid-paratyphoid (DTP + TAB) vaccine
V063	Need for prophylactic vaccination with diptheria-tetanus- pertussis with poliomyelitis (DTP + polio) vaccine
V064	Need for prophylactic vaccination with measles-mumps-rubella (MMR) vaccine
V065	Need for prophylactic vaccination and inoculation against tetanus-diphtheria (TD) (DT)
V066	Need for prophylactic vaccination and inoculation against streptococcus pneumoniae and influenza
V068	Need for prophylactic vaccination and inoculation against other combinations of diseases
V069	Need for prophylactic vaccination with unspecified combined vaccine
V070	Need for isolation
V071	Need for desensitization to allergens
V078	Need for other specified prophylactic measure
V079	Need for unspecified prophylactic measure
V109	Unspecified personal history of malignant neoplasm
V1200	Personal history of unspecified infectious and parasitic disease
V1201	Personal history of tuberculosis
V1202	Personal history of poliomyelitis
V1203	Personal history of malaria
V1209	Personal history of other specified infectious and parasitic disease
V121	Personal history of nutritional deficiency
V122	Personal history of endocrine, metabolic, and immunity disorders
V1260	Personal history, unspecified disease of respiratory system
V1261	Personal history, pneumonia (recurrent)
V1269	Personal history, other diseases of respiratory system
V1270	Personal history of unspecified digestive disease

5

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V1271	Personal history of peptic ulcer disease
V1272	Personal history of colonic polyps
V1279	Personal history of other specified digestive system diseases
V1300	Personal history of unspecified urinary disorder
V1321	Personal history of pre-term labor
V1329	Personal history of other genital system and obstetric disorders
V133	Personal history of diseases of skin and subcutaneous tissue
V134	Personal history of arthritis
V135	Personal history of other musculoskeletal disorders
V1361	Personal history of hypospadias
V1369	Personal history of other congenital malformations
V137	Personal history of perinatal problems
V138	Personal history of other specified diseases
V139	Personal history of unspecified disease
V140	Personal history of allergy to penicillin
V141	Personal history of allergy to other antibiotic agent
V142	Personal history of allergy to sulfonamides
V143	Personal history of allergy to other anti-infective agent
V144	Personal history of allergy to anesthetic agent
V145	Personal history of allergy to narcotic agent
V146	Personal history of allergy to analgesic agent
V147	Personal history of allergy to serum or vaccine
V148	Personal history of allergy to other specified medicinal agents
V149	Personal history of allergy to unspecified medicinal agent
V1501	Allergy to peanuts
V1502	Allergy to milk products
V1503	Allergy to eggs
V1504	Allergy to seafood
V1505	Allergy to other foods
V1506	Allergy to insects
V1507	Allergy to latex

Diagnosis Code	Description
V1508	Allergy to radiographic dye
V1509	Other allergy, other than to medicinal agents
V1541	History of physical abuse
V1542	History of emotional abuse
V156	Personal history of poisoning, presenting hazards to health
V157	Personal history of contraception, presenting hazards to health
V1581	Personal history of noncompliance with medical treatment, presenting hazards to health
V1582	Personal history of tobacco use
V1584	Personal history of exposure to asbestos
V1585	Personal history of exposure to potentially hazardous body fluids
V1586	Personal history of exposure to lead
V1587	History of extracorporeal membrane oxygenation (ECMO)
V1588	History of fall
V1589	Other specified personal history presenting hazards to health
V159	Unspecified personal history presenting hazards to health
V160	Family history of malignant neoplasm of gastrointestinal tract
V161	Family history of malignant neoplasm of trachea, bronchus, and lung
V162	Family history of malignant neoplasm of other respiratory and intrathoracic organs
V1640	Family history of malignant neoplasm of genital organ, unspecified
V1641	Family history of malignant neoplasm of ovary
V1642	Family history of malignant neoplasm of prostate
V1643	Family history of malignant neoplasm of testis
V1649	Family history of malignant neoplasm of other
V1651	Family history of malignant neoplasm of kidney
V1659	Family history of malignant neoplasm of other
V166	Family history of leukemia
V167	Family history of other lymphatic and hematopoietic neoplasms

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V168	Family history of other specified malignant neoplasm
V169	Family history of unspecified malignant neoplasm
V171	Family history of stroke (cerebrovascular)
V172	Family history of other neurological diseases
V173	Family history of ischemic heart disease
V174	Family history of other cardiovascular diseases
V175	Family history of other cardiovascular diseases
V176	Family history of other chronic respi-ratory conditions
V177	Family history of arthritis
V1781	Family history, osteoporosis
V1789	Family history, other musculoskeletal diseases
V1859	Family history, other digestive disorders
V200	Health supervision of foundling
V201	Other healthy infant or child receiving care
V202	Routine infant or child health check
V210	Period of rapid growth in childhood
V211	Puberty
V212	Other development of adolescence
V2130	Unspecified low birth weight status
V2131	Low birth weight status, less than 500 grams
V2132	Low birth weight status, 500 to 999 grams
V2133	Low birth weight status, 1000 to 1499 grams
V2134	Low birth weight status, 1500 to 1999 grams
V2135	Low birth weight status, 2000 to 2500 grams
V218	Other specified constitutional states in development
V219	Unspecified constitutional state in development
V260	Tuboplasty or vasoplasty after previous sterilization
V261	Artificial insemination
V2621	Fertility testing

Diagnosis Code	Description
V2622	Aftercare following sterilization reversal
V2629	Other investigation and testing
V2631	Testing of female for genetic disease carrier status
V2632	Other genetic testing of female
V2633	Genetic counseling
V2634	Testing of male for genetic disease carrier status
V2635	Encounter for testing of male partner of habitual aborter
V2639	Other genetic testing of male
V264	General counseling and advice on procreative management
V2651	Tubal ligation status
V2652	Vasectomy status
V268	Other specified procreative management
V269	Unspecified procreative management
V289	Unspecified antenatal screening
V426	Lung replaced by transplant
V4281	Bone marrow replaced by transplant
V4282	Peripheral stem cells replaced by transplant
V4283	Pancreas replaced by transplant
V4284	Organ or tissue replaced by trans-plant, intestines
V4289	Other specified organ or tissue replaced by transplant
V4574	Acquired absence of organ, other parts of urinary tract
V4575	Acquired absence of organ, stomach
V4576	Acquired absence of organ, lung
V4577	Acquired absence of organ, genital organs
V4578	Acquired absence of organ, eye
V4579	Other acquired absence of organ
V4586	Bariatric Surgery status
V460	Dependence on aspirator
V4611	Dependence on respirator, status
V4612	Encounter for respirator dependence during power failure
V4613	Encounter for weaning from respirator [ventilator]
V4614	Mechanical complication of respirator [ventilator]
V462	Other dependence on machines, supplemental oxygen

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V468	Dependence on other enabling machines
V469	Unspecified machine dependence
V4981	Postmenopausal status (age-related) (natural)
V4982	Dental sealant status
V4983	Awaiting organ transplant status
V4984	Bed confinement status
V4989	Other specified conditions influencing health status
V499	Unspecified problems with limbs and other problems
V500	Elective hair transplant for purposes other than remedying health states
V501	Other plastic surgery for unacceptable cosmetic appearance
V503	Ear piercing
V5041	Prophylactic breast removal
V5042	Prophylactic ovary removal
V5049	Other prophylactic gland removal
V508	Other elective surgery for purposes other than remedying health states
V509	Unspecified elective surgery for purposes other than remedying health states
V520	Fitting and adjustment of artificial arm (complete) (partial)
V521	Fitting and adjustment of artificial leg (complete) (partial)
V522	Fitting and adjustment of artificial eye
V523	Fitting and adjustment of dental prosthetic device
V524	Fitting and adjustment of breast prosthesis and implant
V528	Fitting and adjustment of other specified prosthetic device
V529	Fitting and adjustment of unspecified prosthetic device
V534	Fitting and adjustment of orthodontic devices
V538	Fitting and adjustment of wheelchair
V539	Fitting and adjustment of other and unspecified device
V570	Care involving breathing exercises
V5721	Care involving occupational therapy
V5722	Care involving vocational therapy
V574	Care involving orthoptic training
V5781	Care involving orthotic training

Diagnosis Code	Description
V5789	Care involving other specified rehabilitation procedure
V579	Care involving unspecified rehabilitation procedure
V582	Blood transfusion, without reported diagnosis
V5830	Encounter for change or removal of nonsurgical wound dressing
V5831	Encounter for change or removal of surgical wound dressing
V5832	Encounter for removal of sutures
V585	Orthodontics aftercare
V589	Unspecified aftercare
V5901	Blood donors, whole blood
V5902	Blood donors, stem cells
V5909	Other blood donors
V591	Skin donors
V592	Bone donors
V593	Bone marrow donors
V594	Kidney donors
V595	Cornea donors
V596	Liver donors
V5970	Egg (oocyte) (ovum) donor, unspecified
V5971	Egg (oocyte) (ovum) donor, under age 35,anonymous recipient
V5972	Egg (oocyte) (ovum) donor, under age 35,designated recipient
V5973	Egg (oocyte) (ovum) donor, age 35 and over, anonymous recipient
V5974	Egg (oocyte) (ovum) donor, age 35 and over, designated recipient
V598	Donors of other specified organ or tissue
V599	Donors of unspecified organ or tissue
V600	Lack of housing
V601	Inadequate housing
V602	Inadequate material resources
V603	Person living alone
V604	No other household member able to render care
V605	Holiday relief care
V606	Person living in residential institution
V608	Other specified housing or economic circumstances
V609	Unspecified housing or economic circumstance
V610	Family disruption

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V6110	Unspecified counseling for marital and partner problems
V6111	Counseling for victim of spousal and partner abuse
V6112	Counseling for perpetrator of spousal and partner abuse
V6120	Counseling for parent-child problem, unspecified
V6129	Other parent-child problems
V613	Problems with aged parents or in-laws
V6141	Alcoholism in family
V6149	Other health problems within the family
V616	Illegitimacy or illegitimate pregnancy
V617	Other unwanted pregnancy
V618	Other specified family circumstances
V619	Unspecified family circumstance
V620	Unemployment
V621	Adverse effects of work environment
V622	Other occupational circumstances or maladjustment
V623	Educational circumstances
V624	Social maladjustment
V625	Legal circumstances
V626	Refusal of treatment for reasons of religion or conscience
V6281	Interpersonal problems, not elsewhere classified
V6282	Bereavement, uncomplicated
V6283	Counseling for perpetrator of physical/sexual abuse
V6284	Suicidal ideation
V6289	Other psychological or physical stress, not elsewhere classified
V629	Unspecified psychosocial circumstance
V630	Residence remote from hospital or other health care facility
V631	Medical services in home not available
V632	Person awaiting admission to adequate facility elsewhere
V638	Other specified reasons for unavailability of medical facilities
V639	Unspecified reason for unavailability of medical facilities
V650	Healthy person accompanying sick person

Diagnosis Code	Description
V651	Person consulting on behalf of another person
V6511	Pediatric pre-birth visit for expectant mother
V6519	Other person consulting on behalf of another person
V652	Person feigning illness
V653	Dietary surveillance and counseling
V6540	Other specified counseling
V658	Other reasons for seeking consultation
V659	Unspecified reason for consultation
V665	Convalescence following other treatment
V666	Convalescence following combined treatment
V667	Encounter for palliative care
V669	Unspecified convalescence
V680	Issue of medical certificates
V681	Issue of repeat prescriptions
V682	Request for expert evidence
V6881	Referral of patient without examination or treatment
V6889	Encounters for other specified administrative purpose
V689	Encounters for unspecified administrative purpose
V690	Lack of physical exercise
V691	Inappropriate diet and eating habits
V692	High-risk sexual behavior
V693	Gambling and betting
V694	Lack of adequate sleep
V695	Behavioral insomnia of childhood
V698	Other problems related to lifestyle
V699	Unspecified problem related to lifestyle
V700	Routine general medical examination at a health care facility
V702	General psychiatric examination, other and unspecified
V703	Other general medical examination for administrative purposes
V704	Examination for medicolegal reasons
V706	Health examination in population surveys
V707	Examination for normal comparison or control in clinical research

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V708	Other specified general medical examinations
V709	Unspecified general medical examination
V7211	Encounter for hearing examination following failed hearing screening
V7219	Other examination of ears and hearing
V729	Unspecified examination
V730	Screening examination for poliomyelitis
V731	Screening examination for smallpox
V732	Screening examination for measles
V733	Screening examination for rubella
V734	Screening examination for yellow fever
V735	Screening examination for other arthropod-borne viral diseases
V736	Screening examination for trachoma
V7388	Other specified chlamydial diseases
V7389	Other specified viral diseases
V7398	Screening examination for unspec-ified chlamydial disease
V7399	Screening examination for unspec-ified viral disease
V740	Screening examination for cholera
V741	Screening examination for pulmonary tuberculosis
V742	Screening examination for leprosy (Hansen's disease)
V743	Screening examination for diphtheria
V744	Screening examination for bacterial conjunctivitis
V745	Screening examination for venereal disease
V746	Screening examination for yaws
V748	Screening examination for other specified bacterial and spirochetal diseases
V749	Screening examination for unspec-ified bacterial and spirochetal diseases
V750	Screening examination for rickettsial diseases
V751	Screening examination for malaria
V752	Screening examination for leishmaniasis
V753	Screening examination for trypanosomiasis

Diagnosis Code	Description
V754	Screening examination for mycotic infections
V755	Screening examination for schistosomiasis
V756	Screening examination for filariasis
V757	Screening examination for intestinal helminthiasis
V758	Screening examination for other specified parasitic infections
V759	Screening examination for unspec-ified infectious disease
V762	Screening for malignant neoplasms of the cervix
V763	Screening for malignant neoplasms of the bladder
V7641	Screening for malignant neoplasms of the rectum
V7642	Screening for malignant neoplasms of the oral cavity
V7643	Screening for malignant neoplasms of the skin
V7644	Screening for malignant neoplasms of the prostate
V7645	Screening for malignant neoplasms of the testis
V7646	Special screening for malignant neoplasms, ovary
V7647	Special screening for malignant neoplasms, vagina
V7649	Special screening for malignant neoplasms, other sites
V7650	Special screening for malignant neoplasms, unspecified intestine
V770	Screening for thyroid disorders
V771	Screening for diabetes mellitus
V772	Screening for malnutrition
V773	Screening for phenylketonuria (PKU)
V774	Screening for galactosemia
V775	Screening for gout
V776	Screening for cystic fibrosis
V777	Screening for other inborn errors of metabolism
V778	Screening for obesity
V780	Screening for iron deficiency anemia
V781	Screening for other and unspecified deficiency anemia
V782	Screening for sickle-cell disease or trait

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V783	Screening for other hemoglobinopathies
V788	Screening for other disorders of blood and blood-forming organs
V789	Screening for unspecified disorder of blood and blood-forming organs
V800	Screening for neurological conditions
V801	Screening for glaucoma
V802	Screening for other eye conditions
V803	Screening for ear diseases
V810	Screening for ischemic heart disease
V811	Screening for hypertension
V812	Screening for other and unspecified cardiovascular conditions
V813	Screening for chronic bronchitis and emphysema
V814	Screening for other and unspecified respiratory conditions
V815	Screening for nephropathy
V816	Surinary conditions
V8271	Screening for genetic disease carrier status
V8279	Other genetic screening
V8551	Body Mass Index, less than 5th percentile for age
V8552	Body Mass Index, 5th percentile to less than 85th percentile for age
V8553	Body Mass Index, pediatric, 85th percentile to less than 95th percentile for age
V8554	Body Mass Index, pediatric, greater than or equal to 95th percentile for age
V860	Estrogen receptor positive status (ER+)
V861	Estrogen receptor negative status (ER-)

These nonspecific codes can be used for a general description but may not be referenced to a specific procedure code. Generally, V-codes are supplementary and are used only when the client's condition cannot be classified to categories 001 through 999. The use of observation diagnosis codes V718 and V717 results in claim denial with EOB 00543, "Documentation insufficient to verify medical necessity. Resubmit the claim with signed claim copy, R&S report copy, and complete documentation of medical necessity."

Independent laboratories, pathologists, and radiologists are not required to provide diagnosis codes except when billing for procedures identified under "Diagnosis Requirements" on page 26-10.

5.3.1.1 Place of Service (POS) Coding

The place of service (POS) identifies where services are performed. Indicate the POS by using the appropriate code for each service identified on the claim.

Important: *Attention ambulance providers: POS 41 and 42 are accepted by the Texas Medicaid Program for ambulance claims processing. The two-digit origin and destination codes are still required for claims processing.*

Use the following codes for POS identification where services are performed:

Place of Service	2-Digit Numeric Codes (Electronic Billers)	1-Digit Numeric Codes (Paper Billers)
Office	11, 15, 50, 60, 65, 71, 72	1
Home	12	2
Inpatient hospital	21, 51, 52, 55, 56, 61	3
Outpatient hospital	22, 23, 24, 62	5
Birthing center	25	7
Other location	03, 04, 05, 06, 07, 08, 26, 34, 41, 42, 53, 99	9
Skilled nursing facility, intermediate care facility, intermediate care facility for mentally retarded	31, 32, 54	4
Extended care facility (rest home, domiciliary or custodial care, nursing facility boarding home)	33	8
Independent lab	81	6
Destination of ambulance	Indicate destination using above codes	Indicate destination using above codes

Note: *Family planning and THSteps medical services performed in an RHC are billed using national POS code 72.*

5.3.2 Type of Service (TOS)

The TOS identifies the specific field or specialty of services provided.

Refer to: "Modifier Requirements for TOS Assignment" on page 5-11 for information about modifiers for TMHP EDI.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.3.2.1 TOS Table

Important: *TOS codes are not used for electronic billing but do appear on R&S reports.*

TOS	Description
0	Blood
1	Medical Services
2	Surgery
3	Consultations
4	Radiology (total component)
5	Laboratory (total component)
6	Radiation Therapy (total component)
7	Anesthesia
8	Assistant surgery
9	Other (e.g., prosthetic eyewear, contacts, ambulance)
C	Home health services
D	TB clinic
E	Eyeglasses
F	Ambulatory surgical center (ASC)/hospital-based ambulatory surgical center (HASC)
G	Genetics
I	Professional component for radiology, laboratory, or radiation therapy
J	DME purchase new
L	DME rental
P	Birthing center
R	Hearing aid
S	THSteps medical
T	Technical component for radiology, laboratory, or radiation therapy
W	THSteps dental

5.3.3 Procedure Coding

The procedure coding system used by Texas Medicaid is called the Healthcare Common Procedure Coding System (HCPCS). HCPCS provides health care providers and third party payers a common coding structure.

Important: *TMHP reformats deleted HCPCS codes for three months. The deleted codes are automatically changed to code equivalents or to an unlisted code if no equivalent is available.*

HCPCS is designed around a five-character numeric or alphanumeric base for all codes. HCPCS consists of two levels of codes. HCPCS is updated annually to ensure an up-to-date coding structure. It is updated using the latest edition of the CPT manual and nationally established HCPCS codes released by the Centers for Medicare & Medicaid Services (CMS). Scheduled updates are announced in Medicaid bi-monthly bulletins.

The two levels of codes are as follows:

5.3.3.1 Level I

CPT (The American Medical Association's *Physicians' Current Procedural Terminology*):

- All numeric—consist of five digits
- Represent 80 percent of HCPCS
- Maintenance—responsibility of the American Medical Association (AMA), which updates annually
- Updates by the AMA are coordinated with CMS before their distribution of modifications to third party payers
- Anesthesia codes from CPT

5.3.3.2 Level II

HCPCS Codes

- Approved and released by CMS
- Codes for both physician and non-physician services not contained in CPT (for example, ambulance, durable medical equipment, prosthetics, and some medical codes)
- *Updating*: Responsibility of the CMS Maintenance Task Force
- All *alphanumeric* consisting of a single alpha character (A through V) followed by four numeric digits
- The single alpha character represents the following:

Alpha	Description
A	Supplies, ambulance, administrative, miscellaneous
B	Enteral and parenteral therapy
E	DME and oxygen
G	Procedures/professional (temporary)
H	Rehab and behavioral health services
J	Drugs (administered other than orally)
K	Durable Medical Equipment Regional Carriers (DMERC)
L	Orthotic and prosthetic procedures
M	Medical
P	Laboratory
Q	Temporary procedures
R	Radiology
S	Private payer
T	State Medicaid agency
V	Vision and hearing services

CPT only copyright 2005 American Medical Association. All rights reserved.

5.3.4 Modifiers

Modifiers describe and qualify the Texas Medicaid services provided. A modifier is placed after the five-digit procedure code. Up to two modifiers may apply per service. Examples of frequently used modifiers are listed in the following table:

Modifier	Special Instructions/Notes (if applicable)
Surgeons	
50	
53	Used for physician reporting of a discontinued procedure. For outpatient/ASC reporting of a discontinued procedure, see modifier 73 and 74.
54+	Surgeons who do not provide the postoperative care for a patient *must* bill the surgery code with modifier 54. The modifier will reimburse the surgeon at 80 percent of the allowed amount.
55+	Physicians who provide only the postoperative care may bill the appropriate visit codes and *must* use modifier 55 to indicate only postoperative care services were provided. Services indicated as postoperative care only by use of this modifier will not be denied as part of the global surgical fee.
62+	Cosurgery. Two surgeons perform the specific procedure(s).
66+	Cosurgery. Two surgeons are necessary to perform the highly complex surgical procedure(s).
76+	Use modifier 76 or 77 for transplant procedures if it is a second transplant of the same organ.
77+	Use modifier 76 or 77 for transplant procedures if it is a second transplant of the same organ.
SF	
Assistant Surgeons	
80 *and* KX+	Use modifier 80 and KX together to indicate an assistant surgeon in a teaching facility: • In a case involving exceptional medical circumstances such as emergency or life-threatening situations requiring immediate attention. • When the primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of one of his or her patients. • In a case involving a complex surgical procedure that qualifies for more than one physician.
AS	
+ Modifier is required for accurate claims processing. *** Description is defined by the state.**	

Modifier	Special Instructions/Notes (if applicable)
Excision of Lesions/Masses	
KX+	Use modifier KX if the excision/destruction is due to one of the following signs or symptoms: inflamed, infected, bleeding, irritated, growing, limiting motion or function. Use of this modifier is subject to retrospective review.
Routine Foot Care	
TT+	Use with routine foot care procedures rendered in a nursing home when multiple patients are seen.
Injections	
ET+	
KX+	Use modifier KX to indicate the injection was due to: • Oral route contraindicated or an acceptable oral equivalent is not available. • Injectable medication is the accepted treatment of choice. Oral medication regimens have proven ineffective or are not available. • Patient has a temperature over 102 degrees (documented on the claim) and a high level of antibiotic is needed quickly. • Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare up of a chronic condition.
Visits	
52+	Use with normal newborn care if the service did not comprise a THSteps screen.
76+	
FP+	
TH+	Use with evaluation and management procedures to specify antepartum or postpartum care.
Anesthesia	
One of the following modifiers must be used by physicians in conjunction with the CPT code for anesthesia services:	
AA	
AD	
QK	
Modifier FP must be used when billing anesthesia for a sterilization procedure	
FQHC and RHC	
Services provided by a health care professional require one of the following modifiers:	
AH	
+ Modifier is required for accurate claims processing. *** Description is defined by the state.**	

CPT only copyright 2005 American Medical Association. All rights reserved.

Modifier	Special Instructions/Notes (if applicable)
AJ	
AM	
SA	
TD	For home services provided in areas with a shortage of home health agencies.
TE	For home services provided in areas with a shortage of home health agencies.
U1	
U2	
U7*	Physician assistant services for other than assistant at surgery
The following modifiers may be used in addition to the modifier identifying the health care professional that rendered the service:	
EP	
FP	
GT	If the encounter is using telemedicine, use GT in the second modifier field.
TH	
Certified Registered Nurse Anesthetist (CRNA)	
One of the following modifiers must be used by CRNAs in conjunction with the CPT code for anesthesia services:	
QX	
QZ	
The following modifier must be used when billing anesthesia for a sterilization procedure:	
FP	
Abortion	
G7	
Vision	
RP+	Use modifier RP to indicate replacement lenses and/or frames
VP+	
Laboratory/Radiology	
26+	Used with TOS I (interpretation) for laboratory and radiological procedures.
91+	
FP+	Use with 99000 for lab handling services related to family planning.
SU+	Indicates necessary equipment is in physician's office for RAST/MAST testing or Pap smears.
TC+	The modifier TC is used with TOS T (technical) for radiological procedures.
TS	Use with 76811 or 76812 to indicate a follow-up or repeat ultrasound exam.

+ Modifier is required for accurate claims processing.
*** Description is defined by the state.**

Modifier	Special Instructions/Notes (if applicable)
Q4+	Use for lab/radiology/ultrasound interps by other than the attending physician.
Therapy	
AT+	Must be used to indicate the necessity of an acute condition for occupational therapy (OT), physical therapy (PT), osteopathic manipulation treatment (OMT), or chiropractic services.
GN	
GO	
GP	
U4*	Reassessment Use with 92506 to indicate SLP re-evaluation.
THSteps Medical	
AM	
EP	FQHCs must use modifier EP for services provided under THSteps.
SA	
U7*	Physician assistant services for other than assistant at surgery
Physicians	
Q5	Informal reciprocal arrangement (period not to exceed 14 continuous days)
Q6	Locum tenens or temporary arrangement (up to 90 days)

+ Modifier is required for accurate claims processing.
*** Description is defined by the state.**

Other Common Modifiers				
AE	AF	AG	AK	AR
CB	CD	CE	CF	CG
KC	KD	KF	LT	RD
RT	SW	SY	TL*	UN
UP	UQ	UR	US	

*** Must be used by providers rendering Early Childhood Intervention (ECI)-THSteps/Comprehensive Care Program (CCP) therapy and nutritional services.**

The following modifiers may appear on R&S reports (they are not entered by the provider):

- *CC.* The code used by the provider was changed by TMHP.
- *PT.* The DRG payment was calculated on a per diem basis for an inpatient stay because of patient transfer.
- *PS.* The DRG payment was calculated on a per diem basis because the patient exhausted the 30-day inpatient benefit limitation during the stay (does not apply to admissions after September 1, 1989).

CPT only copyright 2005 American Medical Association. All rights reserved.

- *PE.* The DRG payment was calculated on a per diem basis because the patient was ineligible for Medicaid during part of the stay (does not apply to admissions after September 1, 1989). Also used to adjudicate claims with adjustments to outlier payments.

Note: *Modifiers PT, PS, and PE will appear for DRG claims only.*

5.4 Claims Filing Instructions

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions *carefully* and complete *all* requested information. A correctly completed claim form is processed faster.

This section provides a sample claim form and its corresponding instruction table for each acceptable Texas Medicaid claim form.

All providers, except those on prepayment review, should submit paper claims to TMHP to the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

Providers on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership
Attention: Prepayment Review MC–A11 SURS
P.O. Box 203638
Austin, Texas 78720-3638

5.4.1 Claim Form Requirements

When filing claims for a STAR or STAR+PLUS Program members, providers should follow the client's STAR or STAR+PLUS health plan's claim filing requirements.

5.4.1.1 Provider Signature on Claims

Each *paper claim* form submitted must have the handwritten signature (or signature stamp) of the provider or an authorized representative in the appropriate block of the claim form. Signatory supervision of the authorized representative is required. Providers delegating signature authority to a member of the office staff or to a billing service remain responsible for the accuracy of all information on a claim submitted for payment. Initials are only acceptable for first and middle names. The last name must be spelled out. An acceptable example is J.A. Smith for John Adam Smith. An unacceptable example is J.A.S. for John Adam Smith. Typewritten names *must* be accompanied by a handwritten signature; in other words, a typewritten name with signed initials is *not* acceptable. The signature *must* be contained within the appropriate block of the claim form. Claims prepared by computer billing services or office-based computers may have "Signature on File" printed in the signature block, but it must be in the same font that is used in the rest of the form. For claims prepared by a billing service, the billing service must retain a letter on file from the provider authorizing the service.

Printing the provider's name instead of "Signature on File" is unacceptable. Because space is limited in the signature block, providers should not type their names in the block. Claims not meeting these specifications are in the "Paid or Denied Claims (Hospital) R&S Report" on page 5-63 section of the R&S report.

Refer to: "Sample Letter - XUB Computer Billing Service Inc." on page B-82.

5.4.1.2 Clients Without Medicaid Numbers

If an individual has not been assigned a Medicaid number on the DOS, the provider must wait until a Medicaid client number is assigned to file the claim. The provider writes the number instead of "Pending." The 95-day filing period begins on the "add date," which is the date the eligibility is received and added to the TMHP eligibility file. Providers verify eligibility and add date through TDHconnect or by calling AIS or the TMHP Contact Center at 1-800-925-9126 after the number is received.

Providers must check Medicaid eligibility regularly to file claims within the required 95-day filing deadline.

Refer to: "Client Eligibility" on page 4-1.

5.4.1.3 Multipage Claim Forms

The CMS-1500 claim form is designed to list six line items in Block 24. An approved electronic claims format is designed to list 50 line items. If more than six line items are billed on a paper claim, a provider may attach additional forms (pages) totaling no more than 28 line items. The first page of a multipage claim must contain all the required billing information. On subsequent pages of the multipage claim, the provider should identify the client's name, diagnosis, information required for services in Block 24, and the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the form and indicate "continued" in Block 28. The combined total charges for all pages should be listed on the last page in Block 28. If the services provided exceed 28 line items on an approved electronic claims format or 28 line items on paper claims, the provider must submit another claim for the additional line items.

The paper HCFA-1450 (UB-92) is designed to list 23 lines in Block 43. If services exceed the 23-line limitation, the provider may attach additional pages. The first page of a multipage claim must contain all required billing information. On subsequent pages, the provider identifies the client's name, diagnosis, all information required in Block 43, and the page number of the attachment (e.g., page 2 of 3) in the top right-hand corner of the form and indicate "continued" on Line 23 of Block 47. The combined total charges for all pages should be listed on the last page on line 23 of Block 47.

An approved electronic format of the HCFA-1450 (UB-92) is designed to list 71 lines in Block 43 or its electronic equivalent. C21 merges like revenue codes together to

CPT only copyright 2005 American Medical Association. All rights reserved.

reduce the lines to 28 or less. If the C21 merge cannot reduce the lines to 28 or less, the claim denies, and the provider needs to reduce the lines and resubmit the claim. Providers submitting electronic claims using TDHconnect may not submit more than 28 lines. If the services exceed the 28 lines, the provider may submit another claim for the additional lines or merge codes. When splitting a claim, all pages must contain the required information. Usually, there are logical breaks to a claim. For example, the provider may submit the surgery charges in one claim and the subsequent recovery days in the next claim.

TEFRA hospitals are required to submit all charges.

5.4.1.4 Attachments to Claims

To expedite claims processing, providers must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim. The following claim form attachments are required when appropriate:

- All claims for services associated with an elective sterilization must have a valid Sterilization Consent Form attached or on file at TMHP.
- Nonemergency ambulance transfers must have documentation of medical necessity including out-of-locality transfers.
- Providers filing for coinsurance, deductible, or both on Medicare claims to TMHP must attach the Intermediary RA. This requirement does not apply to claims transferred automatically to TMHP from the Medicare intermediary.
- Medically necessary abortions performed (on the basis of a physician's professional judgement, the life of the mother is endangered if the fetus were carried to term), or abortions provided for pregnancy related to rape or incest must have a signed physician certification statement. Elective abortions are *not* covered by Medicaid.
- Hysterectomies must have a Hysterectomy Acknowledgment Statement attached or on file at TMHP.

Refer to: "Physician Certification for Exceptions" on page 36-73.

5.5 CMS-1500 Claim Filing Instructions

The following providers bill for services using the American National Standards Institute (ANSI) ASC X12 837P 4010A electronic specifications or the CMS-1500 claim form:

Providers
Ambulance
Ambulatory surgical centers (ASC) (freestanding)
Birthing center
Case Management: blind and visually impaired (BVIC), ECI, and Children and Pregnant Women (CPW)
Certified nurse-midwife (CNM)
Certified registered nurse anesthetist (CRNA)
Certified respiratory care practitioner (CRCP)
Chemical dependency treatment facilities
Chiropractor
Clinical nurse specialist (CNS)
Dentist (doctor of dentistry practicing as a limited physician)
DME or durable medical equipment–home health services (DMEH) supplier (CCP and home health services)
Family planning agency that does not also receive funds from Title V, X, or XX
FQHC
Genetic service agency
Hearing aid
In-home total parenteral hyperalimentation supplier
Laboratory
Licensed dietitian (CCP only)
Licensed clinical social worker (LCSW)
Licensed professional counselor (LPC)
Maternity service clinic (MSC)
Mental Health (MH) Rehabilitative services
Nurse practitioner (NP)
Occupational therapist (CCP only)
Optician/optometrist/opthamologist
Orthotic and prosthetic supplier (CCP only)
Physical therapist
Physician (group and individual)
Physician assistant (PA)
Tuberculosis clinic
Podiatrist
Private duty nurse (PDN) (CCP only)
Psychologist
Radiology
School Health and Related Services (SHARS)
Speech language pathologist (CCP only)
THSteps medical

Providers obtain copies of the CMS-1500 claim form from a vendor of their choice; TMHP does not supply them.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.5.1 CMS-1500 Electronic Billing

Electronic billers must submit CMS-1500 claim forms with TDHconnect or approved vendor software that uses the ANSI ASC X12 837P 4010A format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at www.tmhp.com/EDI. Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638. Providers may request TDHconnect by contacting the TMHP EDI Help Desk at 1-888-863-3638.

Refer to: "Electronic Billing" on page 3-2 for information about electronic billing.

5.5.2 CMS-1500 Claim Form (Paper) Billing

Claims must contain the billing provider's complete name, address, or nine-digit provider identifier. A claim without a provider name, address, or provider identifier cannot be processed. Each claim form must have the appropriate signatory evidence in the signature certification block.

Important: *When completing a CMS-1500 claim form, all required information must be included on the claim. Information is* not *keyed from attachments. Superbills or itemized statements are not accepted as claim supplements.*

Refer to: "CMS-1500 Claim Form (Paper) Billing" on page 5-25.

"CMS-1500 Claim Filing Instructions" on page 5-24.

5.5.4 CMS-1500 Instruction Table

The instructions describe what information must be entered in each of the block numbers of the CMS-1500 claim form. Block numbers *not* referenced in the table may be left blank. They are *not* required for claim processing by TMHP.

Block No.	Description	Guidelines
1a	Insured's ID No. (for program checked above, include all letters)	Enter the patient's nine-digit client number from the Medicaid Identification.
2	Patient's name	Enter the patient's last name, first name, and middle initial as printed on the Medicaid Identification Form (H3087).
3	Patient's date of birth Patient's sex	Enter numerically the month, day, and year (MM/DD/YYYY) the client was born. Indicate the patient's sex by checking the appropriate box.
5	Patient's address	Enter the patient's complete address as described (street, city, state, and ZIP code).
9	Other insured's name	For special situations, use this space to provide additional information. Other uses include, but are not limited to the following: • If the patient is deceased, enter the date of death. If the services were rendered on the date of death, indicate the time of death. • If the service is a sterilization, identify the date and time of surgery. • If the patient has chronic renal disease, enter the date of onset of dialysis treatments. **Ambulance Hospital-to-Hospital Transfers** Indicate the services required from the second facility and unavailable at the first facility.
10	Was condition related to: A) Patient's employment B) Auto accident C) Other accident	Indicate by checking the appropriate box. If applicable, enter all available information in Block 11, "Other Health Insurance Coverage."
11	Other health insurance coverage	If another insurance resource has made payment, write "(Name) Insurance Company paid $(Amount) on (Date)." If another insurance resource has been billed and denied the claim, write "(Name) Insurance Company denied claim on (Date)." Attach a copy of the denial letter or form to the Medicaid claim. If the patient has health, accident, or other insurance policies or is covered by private or government benefit system which may pay in full or in part for the services billed on this form, enter all pertinent information available (in Box 9 a-d). If the patient is enrolled in Medicare, enter the patient's Health Insurance Claim (HIC) number from the Medicare Identification Card. The notation of "DENIED" indicates the TPR denied the claim.
12	Patient or authorized person's signature	Providers are encouraged to obtain the patient's signature on claim forms; however, TMHP will process the claim without the signature of the patient. The patient's signature authorizes the release of the claim's medical information.
14	Date of injury or date of last menstrual period	If the services provided are accident or maternity-related, indicate the date of injury of the accident or the date of the last menstrual period.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
17 or 17a	Name of referring physician or other source	Enter the complete name, address, and ZIP code and/or the nine-digit provider identifier or (UPIN in Block 17a) in the following situations: • Electronic billers must enter the provider identifier, six-digit Medicare number, or UPIN. • Clinical pathology consultations to hospital inpatients or outpatients must identify the attending physician. • Nonemergency services provided to limited clients on referral from the designated physician must identify the designated physician's nine-digit provider identifier. • Consultation services must identify the referring physician. • Services provided to a client in an ASC must identify the referring physician. • Services provided to a client in a nursing facility (skilled nursing facility [SNF], intermediate care facility [ICF], or extended care facility [ECF]) must identify the attending physician. • Laboratory and radiology services must identify the ordering physician. • Speech-language therapy must identify the ordering physician. • Physical therapy must identify the ordering physician. • Occupational therapy must identify the ordering physician. • In-home hyperalimentation services must identify the ordering physician. • THSteps-CCP services must identify the referring provider. • Do not use Medicare number for limited clients. For limited clients, use a nine-digit provider identifier in 17A. Electronic billers should use the Medicare six-digit code number or provider identifier. • The referring provider must be the primary care provider if the client is in a STAR or STAR+PLUS health plan. If there is not a referral from the primary care provider, a prior authorization number (PAN) must be on the claim. • Claims received without this information will be returned to the provider. **Physician Claims (Referring Physician)** A referring physician is required for consultation, laboratory, radiology, and radiation therapy procedures. The complete name and address or the provider identifier of the referring physician must be in Block 17 of the claim form. **Freestanding ASC Claims** The performing surgeon/referring physician name/number must be identified.
19	Reserved for Local Use	**Multiple Transfers** Indicate that the claim is part of a multiple transfer and provide the other client's complete name and Medicaid number. Provide information about the accident including the date of occurrence, how it happened, whether it was self-inflicted or employment-related.
20	Was laboratory work performed outside your office?	Check the appropriate box. The information is not required to process claims, but it may be requested for retrospective review. If "YES," enter the name and address or nine-digit provider identifier of the facility that performed the service in Block 32. Medicaid regulations require a provider bill only for those laboratory services that he or she actually performed. Any services performed outside of the provider's office must be billed by the performing laboratory or radiology center.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
21	Diagnosis or nature of illness or injury	Enter the ICD-9-CM diagnosis code to the highest level of specificity available complete to five digits for each diagnosis observed. A pathologist is not required to supply a diagnosis except for: estrogen receptor assays, HLTVIII, plasmapheresis, and anatomical pathology specimens. Radiology groups are required to provide a diagnosis for inflammatory process localization using radioactive tracer (Gallium 67), graphic stress telethermometry, computerized axial tomography (CAT) scans, echography, arteriography, venography, and magnetic resonance imaging (MRI). The statement of medical necessity for abortions and the rationale for the decision must be included if it is not attached to the claim. **Ambulance** Ambulance providers must provide a concise description for each diagnosis observed or enter the ICD-9-CM diagnosis code to the highest level of specificity available complete to five-digits for each diagnosis observed. **Chiropractors** Chiropractors must indicate the exact level of subluxation (use of diagnosis codes 7390, 7391, 7392, 7393, 7394, 7395, 7398, 83900, 83901, 83902, 83903, 83904, 83905, 83906, 83907, 83908, 83920, 83921, and 83949 may be indicated in lieu of a written description) and the date of the X-ray that demonstrates the degree of subluxation. THSteps medical checkups—For paper and electronic billers, the diagnosis code is V202.
23	Prior authorization no. (PAN)	Enter the PAN issued by TMHP, if applicable.
24A	Date of service (DOS)	Enter the DOS for each procedure provided in a MM/DD/YYYY format. If more than one DOS is for a single procedure, each date must be given (such as "03/16, 17, 18/2001"). **Electronic Billers** Medicaid does not accept multiple (to-from) dates on a single line detail. Bill only one date per line. "To" dates of service are not used on electronic claims.
24B	Place of service (POS)	Select the appropriate POS code for each service from the POS table under "Place of Service (POS) Coding" on page 5-19.If the patient is registered at a hospital, the POS must indicate inpatient or outpatient status at the time of service. **Ambulance** The POS for all ambulance transfers will be the destination. THSteps medical checkups - For paper billers, the POS will always be "1" or "O." For electronic billers, the POS will always be "11."
24C	Type of service (TOS)	Enter the appropriate TOS code for each service performed (lab, X-ray, surgery, assistant surgeon, etc.). Physician and radiology facilities may only bill for the professional component of any service rendered to a hospital patient. For a listing of TOS codes, refer to "Type of Service (TOS)" on page 5-19. TOS "T" is used when billing for the technical component of laboratory and X-ray services; TOS "I" is used for the professional component; TOS "4" is used for the total (technical and professional) component for radiology, and TOS "5" is used for the total component for pathology. For THSteps medical checkups use TOS "S."

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
24D	Fully describe procedures, medical services, or supplies furnished for each date given	Enter the appropriate procedure codes for all procedures/services billed. If a procedure code is not available, enter a concise description. Give complete information for: • *Injections.* Provide a breakdown of each injection and separate the charge for an injection from the office visit charge. Indicate the name of the drug, strength, and dosage; and the necessity for the injection by using one of the modifiers under "Modifier Requirements for TOS Assignment" on page 5-11. • *Sutures.* Indicate number of sutures, length, and location of laceration. • *Laboratory.* Indicate the specific type of laboratory procedure. • *X-ray.* Indicate the number of views and type. • When unusual or extenuating circumstances occur, give a brief medical report. • *THSteps medical checkups.* Use a modifier to identify provider. • *Ambulance.* The pick-up point and destination must be indicated on the claim form. • *Anesthesiologists and CRNAs.* Enter the appropriate CPT anesthesia procedure code for all procedures billed. If the anesthesia is given for more than one procedure, identify all procedures performed and indicate what is considered the major procedure. A breakdown of charges is not necessary. The procedure code must be preceded by TOS code "7." Enter the time in minutes. • Enter one of the following modifiers as appropriate - Anesthesiologists use "AA," "AD," or "QK" (located under "Anesthesiology" in the Physician section); CRNAs use "QX" or "QZ." • Use modifiers (for example, acute, left, right) to describe services (refer to "Modifiers" on page 5-21). • *Eyewear.* When billing for eyewear, the prescription must be entered; the new prescription must be placed on Line five and the old prescription on Line 6.
24E	Diagnosis code	Enter the line item reference (1, 2, 3, or 4) for each service or procedure as it relates to each ICD-9-CM diagnosis code identified in Block 21. If a procedure is related to more than one diagnosis, the primary diagnosis the procedure is related must be the one identified. Do not enter more than one reference per procedure. This could result in denial of the service.
24F	Charges	Indicate the usual and customary charges for each service listed. Charges must not be higher than fees charged to private-pay patients.
24G	Days or units	If multiple services are performed on the same day, enter the number of services performed (such as the quantity billed.)
24H	THSteps family planning	Indicate if the services were a result of a THSteps checkup or family planning referral.
24K	Other	Members of a group practice must identify the nine-digit provider identifier of the doctor/clinic within the group who performed the service. The number that identifies the doctor/clinic as a member of that group practice should not appear in Block 33 and must not be used to bill the Medicaid program. The space is also used to provide additional information such as pertinent comments that may explain unusual procedure. The CMS-1500 claim form is designed to list six line items in Block 24. If more than six line items are billed, a provider attaches additional forms with no more than 27 line items.
26	Patient's account number	Optional - Any alphanumeric characters (up to 15) in this block are referenced on the R&S report.
27	Accept assignment	Not optional - All providers of Medicaid services must accept assignment to receive payment. Providers must check "YES." Electronic billers must submit a "Y."
28	Total charge	Enter the total of separate charges for each page of the claim. Enter the total of all pages on last claim if filing a multi-page claim.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
29	Amount paid	Enter any amount paid by an insurance company or other sources known at the time of submission of the claim. Identify the source of each payment and date in Block 11. If the client makes a payment, the reason for the payment must be indicated in Block 11.
30	Balance due	If appropriate, subtract Block 29 from Block 28 and enter the balance.
31	Signature of physician or supplier	The physician/supplier or an authorized representative must sign and date the claim. Billing services may print "Signature on File" in place of the provider's signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice. **Refer to:** "Provider Signature on Claims" on page 5-23.
32	Name and address of facility where services rendered, if other than home or office	If services were provided in a place other than the patient's home or the provider's facility, enter name, address, and ZIP code, or the nine-digit provider identifier of the facility, such as hospital, birthing center, and nursing facility, where the service was provided. For ambulance transfers if the destination is a hospital or nursing facility, enter the name and address, and the nine-digit provider identifier of the facility. Independently practicing health care professionals must enter the name and number of the school district/cooperative where the child is enrolled. For laboratory specimens sent to an outside laboratory for additional testing, the complete name and address or the nine-digit provider identifier of the outside laboratory should be entered. The laboratory should bill the Texas Medicaid Program for the services performed.
33	Physician or supplier's name, address, ZIP code, and telephone number	Enter the nine-digit provider identifier, provider name, street, city, state, ZIP code, and telephone number.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.6 HCFA-1450 (UB-92) Claim Filing Instructions

The following provider types may bill electronically or use the HCFA-1450 (UB-92) claim form when requesting payment:

Provider Types
ASCs (hospital-based)
Comprehensive outpatient rehabilitation facilities (CORFs) (CCP only)
FQHCs ***Note:*** *Must use CMS-1500 when billing THSteps.*
Home health agencies
Hospitals • Inpatient (acute care, rehabilitation, military, and psychiatric hospitals) • Outpatient
Renal dialysis center
RHCs (freestanding and hospital-based)

5.6.1 HCFA-1450 (UB-92) Electronic Billing

Electronic billers must submit HCFA-1450 (UB-92) claims with TDHconnect or approved vendor software that uses the ANSI ASC X12 837I 4010A format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, field locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638. Providers may request TDHconnect by contacting the TMHP EDI Help Desk at 1-888-863-3638.

Refer to: “Electronic Billing” on page 3-2 for more information about electronic billing.

5.6.2 HCFA-1450 (UB-92) Claim Form (Paper) Billing

Providers obtain the HCFA-1450 (UB-92) claim forms from a vendor of their choice.

Note: *To avoid claim denial, only the provider’s Texas license number is preceded by “TX” and should be placed in form locators 82 and 83 of the HCFA-1450 (UB-92) claim form or in the referring provider license number field on the electronic claim unless the client is a limited client.*

Completed HCFA-1450 (UB-92) claims must contain the billing provider’s full name, address, and/or nine-digit provider identifier. A claim *without* a provider name, address, or provider identifier *cannot* be processed.

Refer to: “HCFA-1450 (UB-92) Claim Filing Instructions” on page 5-32.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.6.4 HCFA-1450 (UB-92) Instruction Table

The instructions describe what information must be entered in each of the block numbers of the HCFA-1450 (UB-92) claim form. Block numbers not referenced in the table may be left blank. They are not required for claim processing by TMHP.

Block No.	Description	Guidelines
1	Provider name, address, and telephone number	Enter the hospital name, street, city, state, ZIP code, and telephone number.
3	Patient control number	Optional: any alphanumeric character (limit 16) entered in this Block will be referenced on the R&S report.
4	Type of bill (TOB) Most commonly used: 111 Inpatient hospital 131 Outpatient hospital 141 Nonpatient (laboratory or radiology charges) 331 Home health agency* 711 RHCs 721 RDCs 731 FQHCs * Use TOB 331 only. All other TOBs are invalid and will deny.	Enter the three-digit TOB code First Digit—Type of Facility 1 Hospital 2 Skilled nursing 3 Home health agency 7 Clinic (RHC, FQHC, RDC) 8 Special facility Second Digit—Bill Classification (except clinics and special facilities) 1 Inpatient (including Medicare Part A) 2 Inpatient (Medicare Part B only) 3 Outpatient 4 Other (for hospital-referenced diagnostic services, for example, laboratories and X-rays) 7 Intermediate care Second Digit—Bill Classification (clinics only) 1 Rural health 2 Hospital-based or independent renal dialysis center 3 Free standing 5 CORFs Third Digit—Frequency 0 Nonpayment/zero claim 1 Admit through discharge 2 Interim—first claim 3 Interim—continuing claim 4 Interim—last claim 5 Late charges—only claim 6 Adjustment of prior claim 7 Replacement of prior claim
6	Statement covers period	For inpatient and home health claims, enter the beginning and ending dates of service billed. For inpatient claims, this is usually the dates of admission and discharge.
7	Covered days	For inpatient claims, enter the total days represented on this claim that are to be covered. Usually this is the difference between the admission and discharge dates. In all circumstances the number in this block will be equal to the number of covered accommodation days listed in Block 46.
8	Noncovered days	For inpatient claims, enter the total days represented on this claim that are not covered. The sum of Blocks 7 and 8 must equal the total days billed as reflected in Block 6.
12	Patient name	Enter the patient's last name, first name, and middle initial as printed on the Medicaid Identification Form.
13	Patient address	Enter the patient's complete address as described (street, city, state, and ZIP code).

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
14	Patient birth date	Enter numerically the month, day, and year (MM/DD/YYYY) the client was born.
15	Patient sex	Indicate the patient's sex by entering an "M" or "F."
17	Admission date	Enter numerically the date (MM/DD/YYYY) of admission for inpatient claims; DOS for outpatient claims; start of care (SOC) for home health claims. ***Note:*** *Providers that receive a transfer patient from another hospital must enter the original admission date to identify the payor.*
18	Admission hour (required field)	Military time (00 to 23) must be used for the time of admission for inpatient claims or time of treatment for outpatient claims. Code 99 is not acceptable. This block is not required for nonpatients (TOB 141), home health claims (TOB 331), RHCs (TOB 711), RDCs (TOB 721), or FQHCs (TOB 731).
19	Type of admission	Enter the appropriate type of admission code for inpatient claims: 1 Emergency 2 Urgent 3 Elective 4 Newborn (This code requires the use of special source of admission code in Block 20.) 5 Trauma Center
20	Source of admission	Enter the appropriate source of admission code for inpatient claims. For type of admission 1, 2, or 3 1 Physician referral 2 Clinic referral 3 Health Maintenance Organization (HMO) referral 4 Transfer from a hospital 5 Transfer from skilled nursing facility 6 Transfer from another health care facility 7 Emergency room 8 Court/Law enforcement 9 Information not available For type of admission 4 (newborn) 1 Normal delivery 2 Premature delivery 3 Sick baby 4 Extramural birth 5 Information not available
21	Discharge hour (required field)	For inpatient claims, enter the hour of discharge or death. Use military time (00 to 23) to express the hour of discharge. If this is an interim bill (patient status of "30"), leave the block blank. Code 99 is not acceptable.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
22	Patient status	For inpatient claims, enter the appropriate two-digit code to indicate the patient's status as of the statement "through" date. 01 Routine Discharge 02 Discharged to another short-term general hospital 03 Discharged to SNF 04 Discharged to ICF 05 Discharged to another type of institution 06 Discharged to care of home health service organization 07 Left against medical advice 08 Discharged/transferred to home under care of a Home IV provide 09 Admitted as an inpatient to this hospital (only for use on Medicare outpatient hospital claims) 20 Expired or did not recover 30 Still patient (To be used only when the client has been in the facility for 30 consecutive days if payment is based on DRG) 40 Expired at home (hospice use only) 41 Expired in a medical facility (hospice use only) 42 Expired - place unknown (hospice use only) 43 Federal Hospital (such as a Veteran's Administration [VA] hospital) 50 Hospice—Home 51 Hospice—Medical Facility 61 Medicare-approved swing bed 62 Inpatient rehabilitation facility (IRF), including rehabilitation distinct part of a hospital 63 Long term care hospital (LTCH) 64 Medicaid-only nursing facility 65 Psychiatric hospital or psychiatric distinct part unit of a hospital 66 Discharged/transferred to a critical access hospital (CAH)
23	Medical record number	Enter the patient's medical record number (limited to ten digits) assigned by the hospital.
24-30	Condition codes	Enter the two-digit condition code "05" and date the legal claim was filed for recovery of funds potentially due a patient as a result of legal action initiated by or on behalf of the patient if this condition is applicable to the claim.
32ab-35ab	Occurrence codes and dates	Enter the appropriate code(s) and date(s). Medicaid-required codes are found under "Occurrence Codes" on page 5-41. Blocks 54, 61, 62, and 84 must also be completed as required.
36	Occurrence span codes and dates	For inpatient claims, enter code "71" if this hospital admission is a readmission within seven days of a previous stay. Enter the dates of the previous stay.
39	Value codes	Accident Hour—For inpatient claims, if the patient was admitted as the result of an accident, enter the time of the accident using military time (00 to 23). Use code 99 if the time is unknown.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
42 43	Revenue codes Revenue description	**Inpatient** For inpatient hospital services, enter the description and code for the total charges and each accommodation and ancillary provided. List accommodations first in order of occurrence, ancillaries in ascending order. Write the accommodation rate to the right of the dotted line. ***Note:*** *All claims for services submitted on a HCFA-1450 (UB-92) form based on procedure codes rather than revenue codes will be denied. Claims for services based on procedure codes, including drugs and other injections, must be billed using an CMS-1500 claim form.* a) Revenue code “001” is for the total charge and must be the last revenue code on the list. ***Exception:*** *Electronic billers must not use revenue code “001.” Using this code causes the claim billed amount to be doubled. Electronic billers should not put a code in this block.* b) *Laboratory.* If laboratory work is sent out, the name and address or nine-digit provider identifier of the laboratory where the work was forwarded must be entered. c) *Medical/Surgical Supplies.* Itemize these services provided in the inpatient facility (such as infusion pumps, traction setups, and crutches for inpatient use only). If provided to all admitted patients, admission kits should be billed using revenue code “270.” d) Charges for fetal monitoring must be billed using revenue code “732.”

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
44	HCPCS/rates	**Inpatient** Enter the accommodation rate per day. **Home Health Services** Home health agencies must have the appropriate HCPCS procedure code preceded by TOS C and a description for all services billed. Do *not* use revenue codes for billing these services. Enter the DOS numerically (MM/DD/YY) for each service rendered along with the block number of the diagnoses listed in Blocks 67 through 75 corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary one. Each service and/or supply must be itemized on the claim form. The HCFA-1450 (UB-92) claim form is limited to 27 detail charges. **Outpatient** Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description. Enter the DOS numerically, and the block number of the diagnosis listed in Blocks 67 through 75 corresponding to each procedure. If a procedure corresponds to more than one diagnosis, identify the primary diagnosis. Each service except for medical/surgical and IV supplies and medication must be itemized on the claim by dates of service. For example: a) *Emergency Room.* Bill as “Emergency room” or “Emergency room charge per use.” If the client visits the emergency room more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code. (Revenue code B-450, B-456, or B-459.) b) *Observation Room.* Bill as “observation room.” (Revenue code B-762.) c) *Operating Room.* Bill as “Operating Room.” (Revenue code B-360, B-361, or B-369.) d) *Recovery Room.* Bill as “Recovery Room” or “Cast Room” as appropriate. (Revenue code B-710 or B-719.) e) *Injections.* Must have “Inj. - name of drug; route of administration; the dosage and quantity” or the injection code. f) *Drugs and Supplies.* Take-home drugs and supplies are not a benefit of the Medicaid program. Take-home drugs must be billed with revenue code B-253. Take-home supplies must be billed with revenue code B-273. Self-administered drugs must be billed with revenue code B-637. The drug description must include the name, strength, and quantity. g) *Radiology.* The description should provide the location and the number of views. As an alternative, identify the HCPCS code. The physician must bill professional services by a physician separately. The license number of the ordering physician must be in Block 83. If the client receives the same radiology procedure more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
44	HCPCS/rates (continued)	h) *Laboratory.* Provide a complete description or use the procedure codes for the laboratory procedures. The physician must bill professional services by a physician separately. Block 83 must have the license number of the ordering physician. If laboratory work is sent out, enter the name of the test and name and address or Medicaid number of the laboratory where the work was forwarded. If the client receives the same laboratory procedure more than once in one day, give the time for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code. i) *Nuclear Medicine.* Provide a complete description. j) *Day Surgery.* Day surgery should be billed as an inclusive charge (using TOS "F"). Do *not* bill services provided in conjunction with the surgery (lab, radiology, and anesthesia) separately. File claims for emergency, unscheduled outpatient surgical procedures with separate charges (lab, radiology, anesthesia, and emergency room) for all services using TOB 131 and the hospital's nine-digit provider identifier. ***Note:*** *The HCFA-1450 (UB-92) claim form is limited to 27 items per outpatient claim. If necessary, combine IV supplies and central supplies on the charge detail and considered as single items with the appropriate quantities and total charges by dates of service. Multiple dates of service may not be combined on outpatient claims.*
45	Service date	Enter the corresponding procedure by dates of service numerically on outpatient claims. Multiple dates of service may not be combined on outpatient claims.
46	Units of service	Provide units of service, if applicable. For inpatient services, enter the number of days for each accommodation listed. If applicable, enter the number of pints of blood. When billing for observation room services, the units indicated in Block 46 must represent hours spent in observation.
47	Total charges	Enter the total charges for each service provided.
48	Noncovered charges	If any of the total charges are noncovered, enter this amount.
51	Medicaid No.	Enter the nine-digit provider identifier.
54	Prior payments	Enter amounts paid by any TPR, and complete Blocks 32, 61, 62, and 84 as required.
58	Insured's name	If other health insurance is involved, enter the insured's name.
60	Medicaid identification number	Enter the patient's nine-digit Medicaid number from their Medicaid Identification.
61	Insured group name	Enter the name and address of the other health insurance.
62	Insurance group number	Enter the policy number or group number of the other health insurance.
63	Treatment authorization code	Enter the PAN for home health services, freestanding psychiatric facilities, freestanding rehabilitation facilities, and for surgery if one was issued.
65	Employer name	Enter the name of the client's employer if health/care might be provided. Complete Block 66.
66	Employer location	Enter the complete address if an employer name is identified in Block 65.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
67	Principal diagnosis code	Enter the ICD-9-CM diagnosis code for the principal diagnosis to the highest level of specificity available.
68–75	Other diagnosis codes	Enter the ICD-9-CM diagnosis code to the highest level of specificity available for each additional diagnosis. Enter one diagnosis per block. A diagnosis is not required for clinical laboratory services provided to nonpatients (TOB “141”). ***Exception:*** *A diagnosis is required when billing for estrogen receptor assays, plasmapheresis, and cancer antigen CA 125, immunofluorescent studies, surgical pathology, and alpha-fetoprotein.*
76	Admitting diagnosis	Enter the ICD-9-CM diagnosis code in Block E indicating the cause of admission or include narrative. ***Note:*** *The admitting diagnosis is only for inpatient claims.*
79	Procedure coding method	Enter code “5” for HCPCS or “9” for ICD-9-CM. Code “9” is used only on inpatient hospital billings.
80–81 a, b, c, d, e	Principal and other procedure codes and dates	Enter the ICD-9-CM procedure code for each surgical procedure and the date each was performed.
82	Attending physician ID	For inpatient claims, enter the physician’s license number or UPIN of the provider who performed the service/procedure and/or is responsible for the treatment and plan of care in the following format: 11233333 1 Two-digit state indicator (for example, TX for Texas) 2 Licensing board indicator examples B = Doctor of Medicine (MD) or Doctor of Osteopathy (DO) D = Dentist P = Podiatrist C = Chiropractor 3 License number. Example: TXBL1234 If the provider has a temporary license number, enter “TEMPO.” Example: TXBTEMPO Procedures are defined as those listed in the ICD-9-CM coding manual volume 3, which includes surgical, diagnostic, or medical procedures. For outpatient claims, enter the license number of the physician referring the patient to the hospital.
83 a, b	Other physician ID	For inpatient claims, enter the license number of the provider who performed the principle service/surgical procedure. If same as Block 83, enter that physician’s provider identifier number, license number, and name. For outpatient claims, enter the license number for the following: • The ordering physician for all laboratory and radiology services. (If a different physician ordered laboratory or radiology services enter his license number in Block 82 and enter the referring/attending physician’s license number or UPIN in this block.) • The designated physician for a limited client when the physician performed or authorized nonemergency care. • If the referring physician is a resident, Blocks 82 and 83 must identify the physician who is supervising the resident.

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines
84	Remarks	This block is used to explain special situations such as the following: • The home health agency must document in writing the number of Medicare visits used in the nursing plan of care and also in this block. • If a patient stays beyond dismissal time, indicate the medical reason if additional charge is made. • If billing for a private room, the medical necessity must be indicated and signed by the physician. • If services are the result of an accident the cause and location of the accident must be entered in this block. The time must be entered in Block 39. • If laboratory work is sent out, the name and address or the Medicaid provider identifier of the facility where the work was forwarded must be entered in this field. • If the patient is deceased, enter the date of death. • If services were rendered on the date of death, enter the time of death. • If the services resulted from a family planning provider's referral, write "family planning referral." • If services were provided at another facility, indicate the name and address of the facility where the services were rendered. • Enter the date of onset for patients receiving dialysis services. • Request for 110-day rule for a third party insurance.
85	Provider representative signature	The hospital representative must sign their name. Billing services may print "Signature on File" in place of the provider's signature if the billing service obtains and retains on file a letter signed by a hospital representative authorizing this practice. **Refer to:** "Provider Signature on Claims" on page 5-23.
86	Date bill submitted	Enter the date the bill was signed.

5.6.5 Occurrence Codes

Code	Description	Guidelines
01	Auto accident/auto liability insurance involved	Enter the date of an auto accident. Use this code to report an auto accident that involves auto liability insurance requiring proof of fault.
02	Auto or other accident/ no fault involved	Enter the date of the accident including auto or other where no-fault coverage allows insurance immediate claim settlement without proof of fault. Use this code in conjunction with occurrence codes 24, 50, or 51 to document coordination of benefits with the no-fault insurer.
03	Accident/tort liability	Enter the date of an accident (excluding automobile) resulting from a third party's action. This incident may involve a civil court action in an attempt to require payment by the third party other than no-fault liability. **Refer to:** "Tort Response Form" on page B-114.

CPT only copyright 2005 American Medical Association. All rights reserved.

Code	Description	Guidelines
04	Accident/employment-related	Enter the date of an accident that allegedly relates to the patient's employment and involves compensation or employer liability. Use this code in conjunction with occurrence codes 24, 50, or 51 to document coordination of benefits with Workers' Compensation insurance or an employer. Only services not covered by Workers' Compensation may be considered for payment by Medicaid.
05	Other accident	Enter the date of an accident not described by the above codes. Use this code to report no other casualty related payers have been determined.
06	Crime victim	Enter the date on which a medical condition resulted from alleged criminal action.
10	Last menstrual period	Enter the date of the last menstrual period when the service is maternity-related.
11	Onset of symptoms	Indicate the date the patient first became aware of the symptoms or illness being treated.
16	Date of last therapy	Indicate the last day of therapy services for OT, PT, or speech therapy (ST).
17	Date outpatient OT plan established or last reviewed	Indicate the date a plan was established or last reviewed for occupation therapy.
24	Date other insurance denied	Enter the date of denial of coverage by a TPR.
25	Date benefits terminated by primary payer	Enter the last date for which benefits are being claimed.
27	Date home health plan of treatment was established	Enter the date the current plan of treatment was established.
29	Date outpatient PT plan established or last reviewed	Indicate the date a plan of treatment was established or last reviewed for physical therapy.
30	Date outpatient speech pathology plan established or last reviewed	Indicate the date a plan of treatment for speech pathology was established or last reviewed.
35	Date treatment started for PT	Indicate the date services were initiated for physical therapy.
44	Date treatment started for OT	Indicate when occupational therapy services were initiated.
45	Date treatment started for speech-language pathology (SLP)	Indicate when speech language pathology services were initiated.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.6.6 Filing Tips for Outpatient Claims

The following are outpatient claim filing tips:

- Use HCPCS codes in Block 44 when available, or give a narrative description in Block 43 for all services and supplies provided.

Important: *Services and supplies that exceed the 28 items per claim limitation must be submitted on an additional HCFA-1450 (UB-92) claim form and will be assigned a different claim number by TMHP. Claims may have 71 detail lines for services and supplies plus one detail line for the total amount billed.*

- Combine central supplies and bill as one item. IV supplies may be combined and billed as one item. Include appropriate quantities and total charges for each combined procedure code used. Using combination procedure codes conserves space on the claim form.
- The 28-item limitation per claim: a HCFA-1450 (UB-92) claim form submitted with 28 or fewer items is given an internal claim number (ICN) by TMHP. Multipage claim forms are processed as one claim for that client *if all* pages contain 28 or fewer items.
- Itemized Statements: Itemized statements are not used for assignment of procedure codes. HCPCS codes or narrative descriptions of procedures *must* be reflected on the face of the HCFA-1450 (UB-92) claim form. Attachments will only be used for clarification purposes.
- Physical/occupational therapy (PT/OT) procedures are based on time (initial 30 minutes or additional 15 minutes). Use the quantity billed to reflect the number of additional 15-minute increments.

Line Item	Description	Quantity
Example: one hour of PT service should be billed as two line items.		
#1	Therapeutic exercise	1
#2	Additional 15 minutes	2

Refer to: "Procedure Coding" on page 5-20.

5.7 2002 ADA Dental Claim Filing Instructions

Providers billing for dental services and Intermediate Care Facility for the Mentally Retarded (ICF-MR) dental services may bill electronically or use the 2002 American Dental Association (ADA) claim form.

Note: *TMHP is responsible for reimbursing all THSteps dental services provided by dentists, including services rendered to STAR and STAR+PLUS clients.*

5.7.1 2002 ADA Dental Claim Electronic Billing

Electronic billers must submit THSteps dental claims using TDHconnect or in ANSI ASC X12 837D 4010A format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, field locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638. Providers may request TDHconnect by contacting the TMHP EDI Help Desk at 1-888-863-3638.

Refer to: "TMHP Electronic Data Interchange (EDI)" on page 3-1 for more information about electronic filing.

5.7.2 ADA Dental Claim Form (Paper) Billing

All participating THSteps dental providers are required to submit a 2002 ADA Dental claim form for paper claim submissions to Texas Medicaid. These forms may be obtained by contacting the ADA at 1-800-947-4746.

Important: *Claims must contain the billing provider's full name, address, and/or nine-digit provider identifier.*

5.7.4 2002 ADA Dental Claim Form Instruction Table

The following table is an itemized description of the questions appearing on the form. Thoroughly complete the 2002 ADA Dental claim form according to the instructions in the table to facilitate prompt and accurate reimbursement and reduce follow-up inquiries.

ADA Block No.	ADA Description	Instructions
1	Type of transaction	For Texas Medicaid, check the Statement of Actual Services Box. The other two boxes are not applicable. Do *not* use the 2002 ADA claim form as a Texas Medicaid Prior Authorization form. **Refer to:** "THSteps Dental Mandatory Prior Authorization Request Form" on page B-109.
2	Predetermination/ preauthorization number	Enter Prior Authorization Number if assigned by Medicaid.
3	Name, address, city, state, ZIP code	Enter name and address of Texas Medicaid Program Contractor payer where the claim is to be sent.
4	Other dental or medical coverage?	Leave blank if no other Dental or Medical coverage (skip Blocks 5-11). Check yes if other Dental or Medical coverage is available. If not Medicaid, complete Blocks 5–11.
5	Subscriber name	Subscriber Name if non-Medicaid insurance PAN. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
6	Date of birth (MM/DD/CCYY)	Enter insured's eight-digit date of birth (MM/DD/CCYY) if non-Medicaid insurance. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
7	Gender	Check insured's correct gender if non-Medicaid insurance. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
8	Subscriber identifier	Enter insured's subscriber identifier if non-Medicaid insurance. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
9	Plan/group number	Enter insured's plan/group number if non-Medicaid insurance. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
10	Relationship to primary subscriber	Enter insured's relationship to primary subscriber if non-Medicaid insurance. This line refers to the insured and is not necessarily the patient. May be parent or legal guardian of client receiving treatment.
11	Other carrier name, address, city, state, ZIP code	Information on other carrier, if applicable.
12	Name (last, first, middle initial, suffix), address, city, state, ZIP code	Enter client's last name, first name, and middle initial as exactly written on the Texas Medicaid Identification Form (Form 3087).
13	Date of Birth (MM/DD/CCYY)	Enter client's eight-digit date of birth (MM/DD/CCYY).
14	Gender	Check client's correct gender.
15	Subscriber identifier	Enter client's Medicaid number.
16	Plan/group number	Not applicable for Texas Medicaid.
17	Employer name	Not applicable for Texas Medicaid.
18	Relationship to primary subscriber	Not applicable for Texas Medicaid.

CPT only copyright 2005 American Medical Association. All rights reserved.

ADA Block No.	ADA Description	Instructions
19	Student status	For exception to periodicity, check the full time student (FTS) box and provide a narrative explanation in the Remarks Block 35.
20	Name (last, first, middle initial, suffix), address, city, state, ZIP code	Not applicable to Texas Medicaid.
21	Date of birth (MM/DD/CCYY)	Not applicable to Texas Medicaid.
22	Gender	Not applicable to Texas Medicaid.
23	Patient ID/account number (assigned by dentist)	Used by dental office to identify internal patient account number. This field is optional. Not required to process claim.
24	Procedure date (MM/DD/CCYY)	Enter eight-digit DOS (MM/DD/CCYY).
25	Area of oral cavity	Not applicable for Texas Medicaid.
26	Tooth system	Not applicable for Texas Medicaid.
27	Tooth number(s) or letter(s)	Enter Tooth ID as required for procedure code. Refer to “Tooth Identification (TID) and Surface Identification (SID) Systems” on page 19-8.
28	Tooth surface	Enter Surface ID as required for procedure code. Refer to “Tooth Identification (TID) and Surface Identification (SID) Systems” on page 19-8.
29	Procedure code	Use appropriate Current Dental Terminology (CDT).
30	Description	Enter brief description from the CDT.
31	Fee	Enter usual and customary charges for each line of service used. Charges must not be higher than the fees charged to private pay patients.
32	Other fee(s)	Enter other fees (e.g., other insurance payment).
33	Total fee	Total all fees in column under Block 31.
34	(Place an X on each missing tooth)	Place an “X” on each missing tooth as required for procedure code.
35	Remarks	Use the Remarks space for a narrative explanation for exception to periodicity (Block 19), a facility name and address if Place of Treatment (Block 38) is not a provider office, an emergency narrative (Block 45), or additional information such as reports for 999 codes, multiple supernumerary teeth, or remarks code.
36	Patient/guardian signature	Not applicable for Texas Medicaid.
37	Subscriber signature	Not applicable for Texas Medicaid.
38	Place of treatment	Check only Provider’s Office box or Hospital box. Use Hospital if a day surgery facility was used.
39	Number of enclosures	Texas Medicaid does not require enclosures to accompany a claim. *Do not* submit radiographs with claims.
40	Is treatment for orthodontics?	Check Yes or No as appropriate.
41	Date appliance placed	Not applicable for Texas Medicaid.
42	Months of treatment remaining	Not applicable for Texas Medicaid.
43	Replacement of prosthesis?	Not applicable for Texas Medicaid.
44	Date prior placement	Not applicable for Texas Medicaid.

CPT only copyright 2005 American Medical Association. All rights reserved.

ADA Block No.	ADA Description	Instructions
45	Treatment resulting from (check applicable box)	Providers are required to check Other Accident box for emergency claim reimbursement. If the Other Accident box is checked, information about the emergency must be provided in Block 35.
46	Date of accident (MM/DD/CCYY)	Not applicable for Texas Medicaid.
47	Auto Accident State	Not applicable for Texas Medicaid.
48	Name, address, city, state, ZIP code	Name and Address of Billing Group or Individual provider (*not* the name and address of a provider employed within a group).
49	Provider ID	Must enter *required* billing dentist's nine-digit provider identifier for a group or an individual (*not* a provider identifier for a provider employed within a group.)
50	License number	Not applicable for Texas Medicaid.
51	SSN or TIN	Not applicable for Texas Medicaid.
52	Telephone number	Enter area code and telephone number of billing group or individual (*not* the telephone number for the provider employed within a group).
53	Treating dentist signature	Required signature by treating dentist or authorized personnel must be in Block 53.
54	Provider ID	Must enter *required* performing dentist's nine-digit provider identifier treating the client.
55	License number	Not applicable for Texas Medicaid.
56	Address, city, state, ZIP code	Not applicable for Texas Medicaid.
57	Telephone number	Not applicable for Texas Medicaid.
58	Treating provider specialty	This field is optional.

5.8.1 Family Planning 2017 Claim Form Instructions

Block No.	Description	Guidelines	Required
1	Family planning program	Check the box for the specific entitlement funds to which these family planning services are billed. If the facility also receives Title X funds, the Level of Practitioner (28) must be indicated. ***Note:*** *Claims/Encounters will be cross-checked with Title XIX Medicaid eligibility before Title V, X, or XX processing.*	V, XIX, XX
1a	Title X only	If it is a "Title X Only" encounter, the level of payment must be indicated. If the facility also receives Title X funds, the level of practitioner (28) must be indicated.	X
2	Provider number/provider identifier	Enter the provider's nine-digit provider identifier.	V, X, XIX, XX
3	Provider name	Enter the provider's name as enrolled with TMHP.	V, X, XIX, XX
4	Eligibility date (V or XX)	Enter the date (MM/DD/CCYY) this client was originally designated eligible for Title V or XX services. If client has V or XX eligibility from a previous visit, enter that eligibility date. For a Title XX client, this information comes from the 2025 claim form. For a Title V client, this information comes from the Texas Eligibility Screening System (TESS).	V, XX
5	Family planning No. (Medicaid PCN if XIX)	If previous V, X, and/or XX claims or encounters have been submitted to TMHP, enter the client's nine-digit family planning number, which begins with "F." If the client has Title XIX Medicaid, enter the client's nine-digit client number from the Medicaid Identification form. If this is a new family planning client, without Medicaid, leave this field blank and TMHP will assign a family planning number for the client.	XIX
6	Patient's name (last name, first name, middle initial)	Enter the client's last name, first name, and middle initial as printed on the Medicaid Identification Form, if Title XIX, or as printed in the provider's records, if Title V, X, or XX.	V, X, XIX, XX
7	Address (street, city, state)	Enter the client's complete home address as described by the client (street, city, and state). This reflects the location where the client lives.	V, X, XIX, XX
7a	ZIP code	Enter the client's ZIP code.	V, X, XIX, XX
8	County of residence	Enter the county code that corresponds to the client's address. Please use the HHSC county codes.	V, X, XIX, XX
9	Date of birth	Enter numerically the month, day, and year (MM/DD/CCYY) the client was born.	V, X, XIX, XX
10	Sex	Indicate the client's sex by checking the appropriate box.	V, X, XIX, XX

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
11	Patient status	Indicate if this is the client's first visit to this family planning provider (new patient) or if this client has been to this family planning provider previously (established patient). If the provider's records have been purged and the client appears to be new to the provider, check "New Patient."	V, X, XIX, XX
12	Patient's Social Security number	Enter the client's nine-digit Social Security number (SSN). If the client does not have a SSN, or refuses to provide the number, enter 000-00-0001.	V, X, XIX, XX
13	Race (code #)	Indicate the client's race by entering the appropriate race code number in the box. Aggregate categories used here are consistent with reporting requirements of the Office of Management and Budget Statistical Direction. Race is independent of ethnicity and all clients should be self-categorized as White, Black or African American, American Indian or Native Alaskan, Asian, Native Hawaiian or other Pacific Islander, or Unknown or Not Reported. An "Hispanic" client must also have a race category selected.	V, X, XIX, XX
13a	Ethnicity	Indicate whether the client is of Hispanic descent by entering the appropriate code number in the box. Ethnicity is independent of race and all clients should be counted as either Hispanic or non-Hispanic. The Office of Management and Budget defines Hispanic as "a person of Mexican, Puerto Rican, Cuban, Central, or South American culture or origin, regardless of race."	V, X, XIX, XX
14	Marital status	Indicate the client's marital status by entering the appropriate marital code number in the box.	V, X, XIX, XX

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
15	Family income (all)	Titles V, XX, XX: Use the *gross monthly income* calculated and reported on the eligibility assessment tool. Title XIX providers: Enter the *gross monthly income* reported by the client. Be sure to include all sources of income. No documentation of income is required. For clients who are married (including common-law marriages) or who are 20 years of age or older, enter the gross monthly income of all family members. For unmarried clients age 19 years or younger, enter the gross monthly income of the client only, not the income of all family members. **To calculate gross monthly income for Title XIX:** If income is received in a lump sum, or if it is for a period of time greater than a month (e.g., for seasonal employment), divide the total income by the number of months included in the payment period. If income is paid weekly, multiply weekly income by 4.33. If paid every two weeks, multiply amount by 2.165. If paid twice a month, multiply by 2. Enter $1.00 for clients not wishing to reveal income information.	V, X, XIX, XX
15a	Family size	Titles V, X, XX: Use the family size reported on the eligibility assessment tool. Title XIX providers: Enter the number of family members supported by the income listed in Box 15. Must be at least "one."	V, X, XIX, XX
16	Number times pregnant	Enter the number of times this client has been pregnant. If male, enter zero.	V, X, XIX, XX
17	Number live births	Enter the number of live births for this client. If male, enter zero.	V, X, XIX, XX
18	Number living children	Enter the number of living children this client has. This also must be completed for male clients.	V, X, XIX, XX
19	Primary birth control method before initial visit	Enter the appropriate code letter (a through r) in the box.	V, X, XIX, XX
20	Primary birth control method at end of this visit	Enter the appropriate code letter (a through r) in the box.	V, X, XIX, XX
21	If no method used at end of this visit, give reason (required only if #20=r)	If the primary birth control method at the end of the visit was "no method" (r), you must complete this box with an appropriate code letter from Block 21 (a through g).	V, X, XIX, XX (only if #20=r)
22	Is there other insurance available?	Check the appropriate box.	
23	Other insurance name and address	Enter the name and address of the Health Insurance carrier.	
24	Insured's policy/group No.	Enter the Insurance Policy number or Group number.	
25	Other insurance paid amount	Enter the amount paid by the Other Insurance company. If payment was denied, enter "Denied" in this field.	

5

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
25a	Date of notification	Enter the date of the Other Insurance payment or denial in this field. This must be in the format of MM/DD/CCYY.	
26	Name of referring provider	If a nonfamily planning service is being billed, and the service requires a referring provider, enter the provider's name.	XIX
27	ID No. of referring provider	If a nonfamily planning service is being billed and the service requires a referring provider identifier, enter the referring provider identifier.	XIX
28	Level of practitioner	Enter the level of practitioner that performed the service. Primary care or generalist physicians and specialists are correctly classified as "Physicians." Certified nurse-midwives, nurse practitioners, clinical nurse specialists, and physician assistants providing family planning encounters are correctly categorized as "Midlevel." Family planning encounters provided by a registered nurse or a licensed vocational nurse would be categorized as "Nurse." Encounters provided by staff not included in the preceding classifications would be correctly categorized as "Other." If a client has encounters with staff members of different categories during one visit, select the highest category of staff with whom the client interacted. Optional for agencies not receiving any Title X funding.	X
29	Diagnosis code (relate items 1, 2, 3, or 4 to item 32D by line # in 32E)	Enter the ICD-9-CM diagnosis code to the highest level of specificity available; complete to five digits for each diagnosis observed.	V, X, XIX, XX
30	Authorization number	Enter the authorization number for the client, if appropriate.	
31	Date of occurrence	Use this section when billing for complications related to sterilizations, contraceptive implants, or intrauterine devices (IUDs). This field should contain the date (MM/DD/CCYY) of the original sterilization, implant, or IUD procedure associated with the complications currently being billed.	V, X, XIX, XX, if billing complications
32A	Dates of service	Enter the dates of service for each procedure provided in a MM/DD/CCYY format. If more than one DOS is for a single procedure, each date must be given (such as 3/16, 17, 18/1998). **Electronic Billers** Medicaid does not accept multiple (to-from) dates on a single line detail. Bill only one date per line.	V, X, XIX, XX
32B	Place of service	Enter the appropriate POS code for each service from the POS table under "Place of Service (POS) Coding" on page 5-19. If the client is registered at a hospital, the POS must indicate inpatient or outpatient status at the time of service.	V, X, XIX, XX

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
32C	Type of service	Enter the appropriate TOS code for each service performed (lab, X-ray, surgery, assistant surgeon). Physicians may only bill for the professional component of any service rendered to a hospital patient. For a listing of TOS codes, refer to "Type of Service (TOS)" on page 5-19. TOS "T" is used when billing for the technical component of laboratory and X-ray services; TOS "4" is used for the total component for radiology, and TOS "5" is used for the total component for pathology.	V, X, XIX, XX
32D	Procedures, services, or supplies CPT/HCPCS modifier	Enter the appropriate CPT or HCPCS procedure codes for all procedures/services billed using the family planning services listed in "Family Planning Services" on page 20-1.	V, X, XIX, XX
32E	Dx. ref. (29)	Enter the diagnosis line item reference (1, 2, 3, or 4) for each service or procedure as it relates to each ICD-9-CM diagnosis code identified in Block 29. If a procedure is related to more than one diagnosis, the primary diagnosis the procedure is related to must be the one identified. Do not enter more than one reference per procedure.	V, X, XIX, XX
32F	Units or days (quantity)	If multiple services are performed on the same day, enter the number of services performed (such as the quantity billed).	V, X, XIX, XX
	No. of participants (teen counseling)	For Teen Group Counseling, enter the total number of participants included in the teen group counseling session. Required for Title XX, Teen Group Counseling claims.	# of participants is required for Title XX teen group counseling
32G	$Charges	Indicate the charges for each service listed (quantity times reimbursement rate). Charges must not be higher than fees charged to private-pay clients. Approved rate tables can be found in "Family Planning Services" on page 20-1.	V, X, XIX, XX
32H	Performing provider # (XIX only)	Members of a group practice (except pathology and renal dialysis groups) must identify the nine-digit provider identifier of the doctor/clinic within the group who performed the service. ***Note:*** *We recommend that providers complete this field for Titles V, X, and XX when the procedure code that is entered would normally require a performing provider identifier, if it were billed under Title XIX. If a claim or encounter that was submitted for V, X, or XX is later determined as eligible to be paid from Title XIX and the performing provider identifier is missing, the claim will be denied with a request for this information. To avoid unnecessary claim or encounter denial, complete this information for all claims and encounters.*	XIX
33	Federal Tax ID Number/ EIN (Optional)	Enter the Federal Tax ID Number (TIN) (Employer Identification Number [EIN]) that is associated with the provider identifier enrolled with TMHP.	
34	Patient's account number (optional)	Enter the client's account number that is used in the provider's office for its payment records.	

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
35	Patient copay assessed	If the client was assessed a copayment (V, X, or XX), enter the dollar amount assessed. If no copay was assessed, enter $0.00. Copay cannot be assessed for Title XIX clients. Copayment must not exceed 25 percent of total charges for Title V or XX patients.	V, X, XX
36	Total charges	Enter the total of separate charges for each page of the claim. Enter the total of all pages on last claim if filing a multipage claim.	V, X, XIX, XX
37	Signature of physician or supplier	The physician/supplier or an authorized representative must sign and date the claim. Billing services may print "Signature on file" in place of the provider's signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice. When providers enroll to be an electronic biller, the "Signature on file" requirement is satisfied during the enrollment process.	V, X, XIX, XX
38	Name and address of facility where services were rendered (if other than home or office)	If the services were provided in a place other than the client's home or the provider's facility, enter name, address, and ZIP code, or the nine-digit provider identifier of the facility (such as the hospital or birthing center) where the service was provided. Independently practicing health care professionals must enter the name and number of the school district/cooperative where the child is enrolled (SHARS/ECI). For laboratory specimens sent to an outside laboratory for additional testing, the complete name and address or the nine-digit provider identifier of the outside laboratory should be entered. The laboratory should bill the Texas Medicaid Program for the services performed.	XIX
39	Physician's, supplier's billing name, address, ZIP code, and telephone number	Enter the nine-digit provider identifier, provider name, street, city, state, ZIP code, and telephone number.	

CPT only copyright 2005 American Medical Association. All rights reserved.

Block No.	Description	Guidelines	Required
	Teen group counseling	Providers billing Teen Group Counseling must complete the following fields: 1. Family planning program—should be Title XX 2. Provider number/provider identifier 3. Provider name 5. Family planning No.—Enter 999999999 (electronic billers, enter 999999999 in the Medicaid No. field) 6. Patient's name—Enter "teen group counseling" 12. Patient's Social Security number—should be 999-99-9999 29. Diagnosis code—use V2509 32A. Dates of service 32B. Place of service 32C. Type of service 32D. Procedures, services, or supplies; CPT/HCPCS modifier 32E. Dx. ref. (29) 32F. No. of participants 32G. $Charges 33. Federal Tax ID Number/EIN 36. Total charges 37. Signature of physician or supplier	XX – teen group counseling only

5.9 Vision Claim Form

All vision services must be billed on a CMS-1500 claim form or the appropriate electronic formats. The eyeglass prescription must be in Block 24D (line 5 for the new prescription and line 6 for the old prescription). The Patient Certification Form must be retained in the patient's file – *do not submit to TMHP.* Vision care services are benefits of the Texas Medicaid Program only for clients age 21 years of age and older. Vision claims submitted on other forms are denied with EOB 01145, "Claim form not allowed for this program." Providers have 120 days from the date of the R&S report to resubmit claims to TMHP on the CMS-1500, with the R&S report where the claim appears as denied attached.

The following table shows the fields required for vision claims on a CMS-1500 claim form.

Block Number	Description
1a	Medicaid identification number
2	Patient's name
3	Patient's date of birth
3	Patient's sex
5	Patient's address
9 and 9a–9d	Other insurance or government benefits
10	Was condition related to: Patient's employment Accident or injury
11	Medicare HIC number
12	Patient's or authorized person's signature
13*	Insured or authorized person's signature
17 (for name and/or address of provider) 17a (for provider identifier)	Name and address of prescribing medical doctor or doctor of optometry
21	Diagnosis or nature of illness or injury
24A	DOS

CPT only copyright 2005 American Medical Association. All rights reserved.

Block Number	Description
24B	POS
24D	Describe procedures, medical services, or supplies furnished for each date given
24D, Line "5" for new prescription 24D, Line "6" for old prescription	Prescription/description of lenses and frames
24E	Diagnosis reference
24F	Charges
24K	Other
26*	The account number for the patient that is used in the provider's office for its billing records.
27 Check "YES" or "NO"	Accept assignment?
28	Total charges
29	Amount paid by other insurance
31	Signature of physician or supplier
32	Name and address of facility where services rendered
33	Telephone number
33	Physician's or supplier's name, address, city, state, and ZIP code
No longer used	Referral from screening program (THSteps)
Providers must have patients sign the Patient Certification Form and retain in their records. **Refer to:** "Vision Care Eyeglass Patient (Medicaid Client) Certification Form" on page B-116. Do *not* submit to TMHP.	Selection of eyewear beyond program benefits/replacing lost or destroyed eyewear

5.10 Remittance and Status (R&S) Report

The R&S report provides information on pending, paid, denied, and adjusted claims. TMHP provides weekly R&S reports to give providers detailed information about the status of claims submitted to TMHP. The R&S report also identifies accounts receivables established as a result of inappropriate payment. These receivables are recouped from claim submissions. All claims for the same provider identifier and program processed for payment are paid at the end of the week, either by a single check or with Electric Funds Transfer (EFT). If no claim activity or outstanding account receivables exist during the cycle week, the provider does not receive an R&S report. Providers are responsible for reconciling their records to the R&S to determine payments and denials received.

Note: *Providers receive a single R&S report that details the Medicaid programs' activities and provides individual program summaries. Combined provider payments are made based on the provider's settings for traditional Medicaid.*

Providers must retain copies of all R&S reports for a minimum of five years. Providers must not use R&S report originals for appeal purposes, but must submit copies of the R&S reports with appeal documentation.

Refer to: "TMHP Electronic Data Interchange (EDI)" on page 3-1 for more information.

5.10.1 R&S Report Delivery Options

TMHP offers three options for the delivery of the R&S report. Although providers have the choice of one of the following methods, the initial delivery method of a newly enrolled provider is set up with a *paper* R&S report delivery method.

- *Paper version*. Paper R&S reports are mailed to providers the following Friday after the weekly claims cycle. Reimbursement checks are mailed with the paper R&S report, if the provider has not elected EFT.

  Note: *Additional copies of paper R&S reports will be charged to the provider if requested more than 30 days after the original R&S report was issued. There is an initial charge of $9.75 for the request (additional hours = $9.75) with a charge of $0.32 per page and applicable taxes of 8.25 percent.*

- *Portable Document Format (PDF) version*. Using an Adobe Acrobat format, the PDF file is an exact replica of the paper R&S report. This online version allows a registered user to access the tmhp.com website to download the weekly R&S report. The report is available each Monday morning, immediately after the weekly claims cycle. Payments associated with the R&S report are not released until all provider payments are released the following Friday after the weekly claims cycle. Providers who elect to use the PDF version will not receive paper copies of the R&S report.

In addition to the paper or PDF version of the R&S report, a third, optional R&S report delivery method is also available. Using HIPAA-compliant EDI standards, the Electronic Remittance & Status (ER&S) report can be downloaded through the TMHP EDI Gateway using TDHconnect, the free Windows® -based software available from TMHP, or a third party software. The ER&S report is also available each Monday after the completion of the claims processing cycle. For more information about EDI formats and enrollment for the ER&S report, please refer to "TMHP Electronic Data Interchange (EDI)" on page 3-1.

5.10.2 Banner Pages

Banner pages serve two purposes. First, they print the provider's name and address in a location that appears in the window of the envelope. Second, they are used to inform providers of new policies and procedures. The title pages include the following information:

- TMHP address for submitting paper appeals
- Provider's name, address, and telephone number
- Unique R&S report number specific to each report
- Provider identifier
- Report sequence number (indicates the week number of the year)
- Date of the week being reported on the R&S report
- TIN
- Page number (R&S report begins with page 1)
- AIS provider identifier conversion (provider identifier converted for AIS use)
- AIS telephone number

5.10.3 R&S Report Field Explanation

- *Patient name.* Lists the client's last name and first name, as indicated on the eligibility file.
- *Claim number.* The 24-digit Medicaid ICN for a specific claim. The format for the TMHP claim number is expanded to PPP/CCC/MMM/CCYY/JJJ/BBBBB/SSS.

Acronym	Description
PPP	Program
CCC	Claim type
MMM	Media source (region)
CCYY	Year in which the claim was received
JJJ	Julian date on which the claim was received
BBBBB	TMHP internal batch number
SSS	TMHP internal claim sequence within the batch

CPT only copyright 2005 American Medical Association. All rights reserved.

Program Type

PPP	Program
001	Long Term Care

120	Encounter
121	Encounter Adjustment

- *Medicaid #.* The client's Medicaid number.
- *Patient Account #.* If a patient account number is used on the provider's claim, it appears here.
- *Medical Record #.* If a medical record number is used on the provider's claim, it appears here.
- *Medicare #.* If the claim is a result of an automatic crossover from Medicare, the last ten digits of the Medicare claim number appears directly under the TMHP claim number.
- *Diagnosis.* Primary diagnosis listed on the provider's claim.
- *Service Dates.* Format MMDDYYYY (month, day, year) in "From" and "To" dates of service.
- *TOS/Proc.* Indicates by code the specific service provided to the client. The one-digit TOS appears first followed by a HCPCS procedure code. A three-digit code represents a hospital accommodation or ancillary revenue code. For claims paid under prospective payment methodology, it is the code of the DRG.
- *Billed Quantity.* Indicates the quantity billed per claim detail.
- *Billed Charge.* Indicates the charge billed per claim detail.
- *Allowed Quantity.* Indicates the quantity TMHP has allowed per claim detail.
- *Allowed Charge.* Indicates the charges TMHP has allowed per claim detail. For inpatient hospital claims, the allowed amount for the DRG appears.
- *Place of Service (POS) Column.* The R&S report includes the POS to the left of the Paid Amount. A one-digit numeric code identifying the POS is indicated in this column. Refer to "Place of Service (POS) Coding" on page 5-19 for the appropriate cross-reference among the two-digit numeric POS codes (Medicare), alpha POS codes, and one-digit numeric code on the R&S report. Providers using electronic claims submission should continue using the same POS codes.
- *Paid Amt.* The final amount allowed for payment per claim detail. The total paid amount for the claim appears on the claim total line.
- *EOB (Explanation of Benefit) Codes and Explanation of Pending Status (EOPS) Codes.* These codes explain the payment or denial of the provider's claim. The EOB codes are printed next to or directly below the claim. The EOPS appear only in "The Following Claims Are Being Processed" section of the R&S report. The codes explain the status of pending claims and are not an actual denial or final disposition. An explanation of all EOB and EOPS appearing on the R&S report are printed in the Appendix at the end of the R&S report. Up to five EOB codes are displayed.

CPT only copyright 2005 American Medical Association. All rights reserved.

- *Modifier.* Modifiers have been developed to describe and qualify services provided. For THSteps dental services two modifiers are printed. The first modifier is the TID and the second is the SID.

Refer to: "Modifier Requirements for TOS Assignment" on page 5-11 for a list of the most commonly used modifiers.

5.10.4 R&S Report Section Explanation

5.10.4.1 Claims – Paid or Denied

The heading *Claims – Paid or Denied Claims* is centered on the top of each page in this section. Claims in this section finalized the week before the preparation of the R&S report. The claims are listed by claim status, claim type, and in client name order. The reported status of each claim will not change unless further action is initiated by the provider, HHSC, or TMHP.

The following information is provided on a separate line for all inpatient hospital claims processed according to prospective payment methodology:

- *Age.* Client's age according to TMHP records
- *Sex.* Client's sex according to TMHP records: M = Male, F = Female, U = Unknown
- *Pat-Stat.* Indicates the client's status at the time of discharge or the last DOS on the claim (refer to instructions for HCFA-1450 (UB-92) claim form, Block 22)
- *Proc.* ICD-9-CM code indicates the primary surgical procedure used in determining the DRG

Important: *Only paper claims appear in this section of the R&S report. Claims filed electronically without required information reject. Users are required to retrieve the response file to determine reason for rejections.*

TMHP cannot process incomplete claims. Incomplete claims may be submitted as original claims only if the resubmission is received by TMHP within the original filing deadline.

Refer to: "Claims Information" on page 5-3 for a description of different claim types.

5.10.4.2 Adjustments to Claims

Adjustments – Paid or Denied is centered at the top of each page in this section. Adjustments are listed by claim type then patient name and Medicaid number. Media types 011, 021, 031, 041, 051, 061, 071, and 081 appear in this section. An adjustment prints in the same format as a paid or denied claim.

The adjusted claim is listed first on the R&S report. EOB 00123, "This is an adjustment to previous claim XXXXXXXXXXXXXXXXXXXXXXXX which appears on R&S report dated XX/XX/XX" follows this claim. Immediately below is the claim as originally processed. An accounts receivable is created for the original claim total as noted by EOB 00601, "A receivable has been established in the amount of the original payment: $XXX,XXX,XXX.XX. Future payments will be reduced or withheld until such amount is paid in full." prints below the claim indicating the amount to be recouped. This amount appears under the heading, "Financial Transactions Accounts Receivable." EOB 06065, "Account Receivable is due to the adjusted claim listed. For details, refer to your R&S report for the date listed within the original date field."

Refer to: "Modifier Requirements for TOS Assignment" on page 5-11 for a list of the most commonly used modifiers.

5.10.4.3 Financial Transactions

All claim refunds, reissues, voids/stops, recoupments, backup withholdings, levies, and payouts appear in this section of the R&S report. The Financial Transactions section does not use the R&S report form headings. Additional subheadings are printed to identify the financial transactions. The following descriptions are types of financial items:

5

Accounts Receivable

This label identifies money subtracted from the provider's current payment owed to TMHP. Specific claim data are not given on the R&S report unless the accounts receivable (A/R) control number is provided which should be referenced when corresponding with TMHP. Accounts receivable appear on the R&S report in the following format:

- *Control Number.* A number to reference when corresponding with TMHP.
- *Recoupment Rate.* The percentage of the provider's payment that is withheld each week unless the provider elects to have a specific amount withheld each week.
- *Maximum Periodic Recoupment Amount.* The amount to be withheld each week. This area is blank if the provider elects to have a percentage withheld each week.
- *Original Date.* The date the financial transaction was processed originally.
- *Original Amount.* The total amount owed TMHP.
- *Prior Date.* The date the last transaction on the A/R occurred.
- *Prior Balance.* The amount owed from a previous R&S report.
- *Applied Amount.* The amount subtracted from the current R&S report.
- *FYE.* The fiscal year end (FYE) for cost reports.
- *EOB.* The EOB code that corresponds to the reason code for the A/R.
- *Patient Name.* If the A/R is claim-specific, the name of the patient on the claim.
- *Claim Number.* If the A/R is claim-specific, the ICN of the original claim.
- *Backup Withholding Penalty Information.* A penalty assessed by the Internal Revenue Service (IRS) for noncompliance due to a B-Notice. Although the current

CPT only copyright 2005 American Medical Association. All rights reserved.

payment amount is lowered by the amount of the backup withholding, the provider's 1099 earnings are not lowered.

- *Control Number.* TMHP control number to reference when corresponding with TMHP.
- *Original Date.* The date the backup withholding was set up originally.
- *Withheld Amount.* Amount withheld (31 percent) of the provider's checkwrite.

IRS Levies

The payments withheld from a provider's checkwrite as a result of a notice from the IRS of a levy against the provider appear in the "IRS Levy Information" section of the R&S report. Payments are withheld until the levy is satisfied or released. Although the current payment amount is lowered by the amount of the levy payment, the provider's 1099 earnings are not lowered. IRS levies are reported in the following format:

- *Control Number.* TMHP control number to reference when corresponding with TMHP.
- *Maximum Recoupment Rate.* The percentage of the provider's payment that is withheld each week, unless the provider elects to have a specific amount withheld each week.
- *Maximum Recoupment Amount.* The amount to be withheld periodically.
- *Original Date.* The date the levy was set up originally.
- *Original Amount.* The total amount owed to the IRS.
- *Prior Balance.* The amount owed from a previous R&S report.
- *Prior Date.* The date the last transaction on the levy occurred.
- *Current Amount.* The amount subtracted from the current R&S report and paid to the IRS.
- *Remaining Balance.* The amount still owed on the levy. (This amount becomes the "previous balance" on the next R&S report.)

Refunds

Refunds are identified by EOB 00124, "Thank you for your refund; your 1099 liability has been credited." This statement is verification that dollars refunded to TMHP for incorrect payments have been received and posted. The provider's check number and the date of the check are printed on the R&S report. Claim refunds appear on the R&S report in the following format:

- Claim Specific:
    - *ICN.* The claim number of the claim to which the refund was applied this cycle.
    - *Patient Name.* The first name, middle initial, and last name of the patient on the applicable claim.
    - *Medicaid Number.* The patient's Medicaid or CSHCN number.
    - *Date of Service.* The format MMDDCCYY (month, day, and year) in "From" DOS.
    - *Total Billed.* The total amount billed for the claim being refunded.
    - *Amount Applied This Cycle.* The refund amount applied to the claim.
    - *EOB.* Corresponds to the reason code assigned.
- Nonclaim Specific:
    - *Control Number.* A control number to reference when corresponding with TMHP.
    - *FYE.* The fiscal year for which this refund is applicable.
    - *EOB.* Corresponds to the reason code assigned.

Payouts

Payouts are dollars TMHP owes to the provider. TMHP processes two types of payouts: system payouts that increase the weekly check amount and manual payouts that result in a separate check being sent to the provider. Specific claim data are not given on the R&S report for payouts. A control number is given, which should be referenced when corresponding with TMHP. System and manual payouts appear on the R&S report in the following format:

- *Payout Control Number.* A control number to reference when corresponding with TMHP.
- *Payout Amount.* The amount of the payout.
- *FYE.* The fiscal year for which the payout is applicable.
- *EOB.* Corresponds to the reason code assigned.
- *Patient Name.* Name of the patient (if available).
- *PCN.* Medicaid number of the patient (if available).
- *DOS.* Date of service (if available).

Reissues

The provider's 1099 earnings are not affected by reissues. A messages states, "Your payment has been increased by the amount indicated below:

- *Check Number.* The number of the original check.
- *Check Amount.* The amount of the original check.
- *R&S Number.* The number of the original R&S report.
- *R&S Date.* The date of the original R&S report.

Voids and Stops

The provider's 1099 earnings are credited by the amount of the voided/stopped payment.

- *Check Number.* The number of the voided/stopped payment.
- *Check Amount.* The amount of the voided/stopped payment.
- *R&S Number.* The number of the voided/stopped payment.
- *R&S Date.* The date of the voided/stopped payment.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.10.4.4 Claims Payment Summary

This section summarizes all payments, adjustments, and financial transactions listed on the R&S report. The section has two categories: one for amounts "Affecting Payment This Cycle" and one for "Amount Affecting 1099 Earnings."

If the provider is receiving a check on this particular R&S report, the following information is given: "Payment summary for check XXXXXXXXX in the amount of XXX,XXX,XXX.XX." If the payment is EFT: "Payment summary for direct deposit by EFT XXXXXXXXX in the amount of XXX,XXX,XXX.XX." The check number also is printed on the check that accompanies the R&S report.

Headings for the Payment Summary for "Affecting Payment This Cycle" and "Amount Affecting 1099 Earnings"

- *Claims Paid.* Indicates the number of claims processed for the week and the year-to-date total.
- *System Payouts.* The total amount of system payouts made to the provider by TMHP.
- *Manual Payouts (Remitted by separate check or EFT).* The total amount of manual payouts made to the provider by TMHP.
- *Amount Paid to IRS for Levies.* The amount remitted to IRS and withheld from the provider's payment due to an IRS levy.
- *Amount Paid to IRS for Backup Withholding.* The amount paid to the IRS for backup withholding.
- *Accounts Receivable Recoupments.* The total amount withheld from the provider's payment due to accounts receivable.
- *Amounts Stopped/Voided.* The total amount of the payment that was voided or stopped with no reissuance of payment.
- *System Reissues.* The amount of the reissed payment.
- *Claim Related Refunds.* The total amount of claim-related refunds applied during the weekly cycle.
- *Nonclaim Related Refunds.* The total amount of nonclaim-related refunds applied during the weekly cycle.
- *Approved to Pay/Deny Amount.* The total amount of claim payments that were approved to pay/deny within the week. (This column will not be used at this time.)
- *Pending Claims.* The total amount billed for claims in process as of the cutoff date for the report.

5.10.4.5 The Following Claims are Being Processed

In the "Following Claims are Being Processed" section, the R&S report may list up to five EOPS messages per claim. The claims listed in this section are in process and *cannot be appealed for any reason* until they appear in either the "Claims Paid or Denied," or "Adjustments Paid and Denied" sections of the R&S report. TMHP is listing the pending status of these claims for informational purposes only. *The pending messages should not be interpreted as a final claim disposition.* Weekly, all claims and appeals on claims TMHP has "in process" from the provider are listed on the R&S report. The Following Claims are Being Processed claim prints in the same format as a paid or denied claim.

5.10.4.6 Explanation of Benefit Codes Messages

This section lists the descriptions of all EOBs that appeared on the R&S report. EOBs appear in numerical order.

5.10.4.7 Explanation of Pending Status Codes Appendix

This section lists the description of all EOPs that appeared on the R&S report. EOPs appear in numerical order.

EOBs and EOPs may appear on the same pending claim because some details may have already finalized while others may have questions and are pending.

5.10.5 R&S Report Examples

5.10.7 Provider Inquiries—Status of Claims

TMHP provides several effective mechanisms for researching the status of a claim. Weekly, TMHP provides the R&S report reflecting all claims with a paid, denied, or pending status. Providers verify claim status using the provider's log of pending claims.

Electronic billers allow ten business days for a claim to appear on their R&S reports. If the claim does not appear on an R&S report as paid, pending, or denied, a transmission failure, file rejection, or claims rejection may exist. Providers check records for transmission reports correspondence from the TMHP EDI Help Desk.

The provider allows at least 30 days for a Medicaid paper claim to appear on an R&S report after the claim has been submitted to TMHP. If a claim has not been received by TMHP and must be submitted a second time, the second claim must also meet the 95-day filing deadline.

The provider allows TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible, coinsurance, or both. Claims that fail to cross over from Medicare may be filed to TMHP by submitting a copy of the Intermediary RA including the client's Medicaid number and the billing provider identifier.

If the claim does not appear on an R&S report as paid, pending, or denied, providers use the following procedures to inquire about the status of the claim:

- The provider utilizes claim status inquiry on the TMHP website (www.tmhp.com).
- A registered user of TDHconnect utilizes claim status inquiry within its software options.
- The provider calls AIS at 1-800-925-9126 to determine if the claim is pending, paid, denied, or if TMHP has no record of the claim.
- If any of three options above indicates TMHP has no record of the claim, the provider calls the TMHP Contact Center at 1-800-925-9126 to speak to a TMHP call center representative.
- If the TMHP Contact Center has no record of a claim that was submitted within the original filing deadline, the provider submits a copy of the original claim to TMHP for processing. Electronic billers may refile the claim electronically. For claims submitted by the hospital for inpatient services, the filing deadline is 95 days from the discharge date or the last DOS on the claim. For all other types of providers, the filing deadline is 95 days from each DOS on the claim.
- If the 95-day filing deadline has passed, the provider submits a signed copy of the claim and all documentation supporting the original claim submission to:

Texas Medicaid & Healthcare Partnership
Inquiry Control Unit
12357-A Riata Trace Parkway, Suite 100
Austin, TX 78727

Providers must retain copies of all R&S reports for a minimum of five years. Providers must not send original R&S reports back with appeals. Providers must submit one copy of the R&S report to TMHP per appeal.

Refer to: "Automated Inquiry System (AIS)" on page xiii for more information.

5.11 Other Insurance Claims Filing

The following information must be provided in the "Other Insurance" field on the paper claim and in the appropriate field of electronic claims. On the CMS-1500, Fields 9 or 11, and 29 must contain the appropriate information:

- Name of the other insurance resource
- Address of the other insurance resource
- Policy number and group number
- Policyholder
- Effective date if available
- Date of disposition by other insurance resource (used to calculate filing deadline)
- Payment or specific denial information

5.11.1 Other Insurance Credits

Providing other insurance payment information, even when no additional payment is expected from TMHP, provides benefit to all parties involved in the Medicaid program. When a TPR issues a payment or partial payment to a provider, the other insurance credit *must* be indicated on the claim form submitted to TMHP.

This procedure benefits both providers and TMHP even if the TPR payment exceeds the Medicaid allowed amount. Although additional payment may not be issued by TMHP, informing TMHP of the other insurance credit allows TMHP to track the appropriate use of TPRs. Informing TMHP of a TPR credit provides hospitals with a more accurate standard dollar amount (SDA) rate setting and assists the program in tracking recoveries and reducing Medicaid medical expenditures by informing TMHP of liable third parties.

Providers must report TPR correctly in the appropriate block according to claim form instructions.

Refer to: The corresponding block number:

Claim Form	Reference
CMS-1500	Block 29 on page 5-31
HCFA-1450 (UB-92)	Block 54 on page 5-39
THSteps Dental	Block 31 on page 5-46

CPT only copyright 2005 American Medical Association. All rights reserved.

5.11.1.1 Deductibles

TMHP will consider deductibles for reimbursement when the original third party payor applied the payment amount directly to the clients deductible. The explanation of benefit reflecting the application of the payment by the other insurance (third party payor) and a completed signed claim copy must be submitted to TMHP for consideration.

5.11.1.2 HMO Copayments

The following text contains important information about HMO copayments:

- TMHP processes and pays HMO copayments for private and Medicare HMOs as well as private and Medicare PPO copayments for clients who are eligible for reimbursement under Medicaid guidelines.
- TMHP pays the copayment in addition to the service the HMO or PPO has denied, if the client is eligible for Texas Medicaid and the procedure is reimbursed under Medicaid guidelines. Providers are not allowed to hold the client liable for the copayment.
- An office or emergency room (ER) visit (the ER physician is paid only when the ER is not staffed by the hospital) is reimbursed a maximum copayment of $10 per visit. The hospital ER visit is reimbursed at a maximum of $50 to the facility. TMHP pays up to four copayments per day, per client. ER visits are limited to one per day, per client, and are considered one of the four copayments allowed per day.

Important: *By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and the Texas Medicaid Program when appropriate as payment in full. The client cannot be held liable for any balance related to Medicaid-covered services.*

The following Medicaid codes have been created for copayments, which are considered an atypical service:

POS 1 - Office	Description
1-CP001	Private HMO copayment—professional
1-CP002	Private PPO copayment—professional
1-CP003	Medicare HMO copayment—professional
1-CP004	Medicare PPO copayment—professional
POS 5 - Outpatient	**Description**
1-CP005	Private HMO copayment—outpatient
1-CP006	Private PPO copayment—outpatient
1-CP007	Medicare HMO copayment—outpatient
1-CP008	Medicare PPO copayment—outpatient

Note: *Claims submissions for HMO copayments must be received by TMHP within 95 days of the DOS.*

5.11.1.3 Verbal Denial

Providers may call the other insurance resource and receive a verbal denial. The other insurance record can either be updated when the provider files the claim or calls the TPR Customer Service at 1-800-846-7307. When calling TPR Customer Service line and when filing claims to TMHP, the provider must have the information below before any updates are made.

Verbal denial requirements:

- Date of the telephone call to the other insurance resource
- Insurance company's name and telephone number
- Name of the individual contacted at the insurance company
- Policyholder and group information for the client
- Specific reason for the denial, including the client's type of coverage to enhance the accuracy of future claims processing (for example, a policy that covers inpatient services or physician services only)

If providers have any questions about this information, they may contact the TMHP Contact Center at 1-800-925-9126.

5.11.1.4 110-Day Rule

If a TPR has not responded or delays payment or denial of a provider's claim for more than 110 days after the date the claim was billed, Medicaid considers the claim for reimbursement. The following information is required:

- Name and address of the TPR
- Date the TPR was billed (used to calculate filing deadline)
- Statement signed and dated by the provider that no disposition has been received from the TPR within 110 days of the date the claim was billed

When TMHP denies a claim because of the client's other coverage, information that identifies the other insurance appears on the provider's R&S report. The claim is not to be refiled with TMHP until disposition from the TPR has been received or until 110 days have lapsed since the billing of the claim with no disposition from the TPR. A statement from the client or family member which indicates that they no longer have this resource is *not* sufficient documentation to reprocess the claim.

When a provider is advised by a TPR that benefits have been paid to the client, the information must be included on the claim with the date and amount of payment made to the client if available. If a denial was sent to the client, refer to the verbal denial guidelines above for required information. This enables TMHP to consider the claim for reimbursement.

CPT only copyright 2005 American Medical Association. All rights reserved.

5.11.1.5 Filing Deadlines

Claims that involve filing to a TPR have apply the following deadlines:

- Claims with a valid disposition (payment or denial) must be received by TMHP within 95 days of the date of disposition by the TPR and within 365 days of the DOS. Appeal of claims originally denied with EOB 00260 indicating the provider files with a TPR must be received within 95 days of the date of disposition by the TPR or within 120 days of the date TMHP denied the claim.
- If more than 110 days have passed from the date a claim was filed to the TPR and no response has been received, the claim is submitted to TMHP for consideration of payment.
- In accordance with federal regulations, all claims must be initially filed with TMHP within 365 days of the DOS.

Refer to: "Third Party Resources" on page 4-13 for more information.

5.12 Filing Medicare Primary Paper Claims

Providers are allowed to file Medicare primary paper claims to TMHP for payment of coinsurance and/or deductible, for reasons given in the previous paragraph. Providers who bill on a HCFA-1450 (UB-92) paper claims form must submit the RA or Remittance Notice (RN) with a completed claim form. Providers who bill on the CMS-1500 paper claim form only require an RA or RN submission. Their claim form is optional; however, all of the required information must be included on the RA or RN for Medicaid processing. One RA or RN must be filed for each claim total and Medicare control number. Many providers receive their RAs or RNs electronically instead of on paper from their Medicare intermediary, and are allowed to create paper RAs or RNs to file with TMHP.

Depending on the billing type, the following information is required on the RA or RN for Medicaid processing:

Required Fields	Required on Claim Form?	Required on MRAN?	Must match from claim form to MRAN?

If any of the required claim information is not provided, TMHP denies the claim.

5.12.1 Filing a Medicare Adjusted Claim

When submitting a Medicare-adjusted claim, providers should send only the adjusted Medicare RA or RN. Submission of the original RA or RN or the Medicaid R&S report is not required. The Medicare-adjusted claim is processed as a first time claim submission, which is referenced in the Claims - Paid or Denied section of providers' R&S reports.

Providers billing on a HCFA-1450 (UB-92) paper claim form must submit the RA or RN with a completed claim form. Providers who have received a letter requesting a claim form must also return the letter with their claim form submission.

Providers billing on a CMS-1500 paper claim form are only required to submit an RA or RN submission. The claim form is optional; however, all of the required information must be included on the RA or RN for Medicaid processing.

5.12.2 Medicare/Medicaid Filing Deadlines

Explanation of Medicare Benefits (EOMBs) must be received by TMHP within 95 days from the Medicare date of disposition in order to be considered for processing.

5.13 Medically Needy Claims Filing

TMHP must receive claims for unpaid bills not applied toward spend down within 95 days from the date eligibility was added to the TMHP client eligibility file (add date). These bills must be on the appropriate claim form (for example, CMS-1500 or HCFA-1450 [UB-92]). Providers are allowed to submit completed CMS claim forms directly to the Medically Needy Clearinghouse (MNC) or to applicants for the Medically Needy Program (MNP) to be used to meet spend down. The completed CMS claim forms used to meet spend down are held for ten calendar days by the MNC, then forwarded to TMHP claims processing. Claims for services provided after the spend down is met must be received within 95 days from the date eligibility is added. Inpatient hospital facility claims must be received within 95 days from the date of discharge or last DOS on the claim. This applies when eligibility is not retroactive.

The client's payment responsibilities are as follows:

- If the entire bill was used to meet spend down, the client is responsible for payment of the entire bill.

CPT only copyright 2005 American Medical Association. All rights reserved.

- If a portion of one of the bills was used to meet the spend down, the client is responsible for paying the portion applied toward the spend down, unless it exceeds the Medicaid allowable amount.
- The claim must show the *total* billed amount for the services provided. Charges for ineligible days or spend down amounts should *not* be deducted or noncovered on the claim.
- A client's payment toward spend down is *not* reflected on the claim submitted to TMHP.
- A client is not required to pay the spend down amount before a claim is filed to Medicaid.
- Payments made by the client for services not used in the spend down but were incurred during an eligible period must be reimbursed to the client before the provider files a claim to TMHP.
- Services that require prior authorization and are provided before the client becomes eligible for Medicaid by meeting spend down are not reimbursable by the Texas Medicaid Program.
- If a bill or a completed CMS claim form was not used to meet spend down and the dates of service are within the client's eligible period, submit the total bill to TMHP.

When eligibility has been established, a TP 55 with spend down client can receive the same care and services available to all other Medicaid clients. If eligibility is established through TP 30 with spend down, the client's Medicaid eligibility is restricted to coverage for an emergency medical condition only. Emergency medical condition is defined under "Emergency Care" on page 4-7.

Refer to: "Medicare Crossover Reimbursement" on page 2-8.

6.1 Appeal Methods

An appeal is a request for reconsideration of a previously dispositioned claim.

Providers may use three methods to appeal Medicaid claims to TMHP: electronic, Automated Inquiry System (AIS), or paper.

TMHP must receive all appeals of denied claims and requests for adjustments on paid claims within 120 days from the date of disposition of the Remittance and Status (R&S) report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline is extended to the next business day.

Standard administrative requests and medical appeals must be sent first to TMHP or the claims processing entity as a first-level appeal. After the provider has exhausted all aspects of the appeals process for the entire claim, the provider may submit a second-level appeal to HHSC.

1) A first-level appeal is a provider's initial standard administrative or medical appeal of a claim that has been denied or adjusted by TMHP. This appeal is submitted by the provider directly to TMHP for adjudication and must contain all required information to be considered.
2) A second-level appeal is a provider's final medical or standard administrative appeal of a claim to HHSC that:

   a.) Has been denied or adjusted by TMHP.

   b.) Has been appealed as a first-level appeal to TMHP, *and*

   c.) Has been denied again for the same reason(s) by TMHP.

This appeal is submitted by the provider to HHSC, which may subsequently require TMHP to gather information related to the original claim and the first-level appeal. HHSC is the sole adjudicator of this final appeal.

All providers must submit second-level administrative appeals and exceptions to the 95-day filing deadline appeals to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
PO BOX 204077
Austin, Texas 78720-4077

Note: *TMHP is not responsible for managing appeals as a result of utilization review (UR) decisions by the HHSC UR department. These must be submitted to the HHSC Medical & UR Appeals.*

Refer to: "Utilization Review Appeals" on page 6-7.

6.1.1 Electronic Appeal Submission

Electronic appeal submission is a method of submitting appeals using a personal computer. The electronic appeals feature can be accessed by a business organization (for example, billing organizations, vendors, and clearinghouses, etc.) interfacing directly with the TMHP Electronic Data Interchange (EDI) Gateway or through TDHconnect, the free Windows® -based software available from TMHP.

The Health Insurance Portability and Accountability Act (HIPAA) standard ANSI ASC X12 837 format is accepted by TMHP EDI.

For other information, contact the TMHP EDI Help Desk at 1-888-863-3638.

6.1.1.1 Advantages of Electronic Appeal Submission

Using electronic appeal submission provides the following advantages to the users:

- Increased accuracy of appeals filed to potentially improve cash flow
- Maintained audit trails through print and download capabilities
- Appeal submission windows can be automatically filled in with electronic R&S report information, thereby reducing data entry time

6.1.1.2 Allowed Electronic Appeals

Electronic appeal submission is available to business organizations (for example, billing organizations, vendors, and clearinghouses) interfacing directly with TMHP EDI or through TDHconnect.

The HIPAA standard ANSI ASC X12 837 format is accepted by TMHP EDI.

For other information, contact the TMHP EDI Help Desk at 1-888-863-3638.

6.1.1.3 Disallowed Electronic Appeals

The following claims may *not* be appealed electronically:

- Claims listed on the R&S report as *Incomplete Claims*. A new claim must be resubmitted with the corrected information, i.e., *a new day claim*
- Claims listed on the R&S report with $0 allowed and $0 paid. A new claim must be resubmitted with the corrected information, i.e., *a new day claim*
- Claims requiring supporting documentation (for example, operative report, medical records, home health, hearing aid, and dental X-rays)
- Diagnosis-related group (DRG) assignment
- Medicare crossovers
- Claims listed as *pending* or *in process* with Explanation of Pending Status (EOPS) messages
- Claims denied as *past filing deadline* except when *retroactive* eligibility deadlines apply
- Claims denied as *past the payment deadline*

Exception: *Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed electronically if the requested form has been faxed according to the instructions under "Hysterectomy Services" on page 36-73.*

CPT only copyright 2005 American Medical Association. All rights reserved.

6.1.2 Automated Inquiry System Appeals

The following appeals may be submitted using AIS:

- *Client Eligibility.* The client's correct Medicaid number, name, and date of birth are required.
- *Provider Information (Excluding Medicare Crossovers).* The correct provider identifier is required for the billing provider, performing provider, referring provider, and limited provider. The name and address of the provider are required for the facility and outside laboratory.
- *Claim Corrections.* Providers may correct the following:
  - Patient control number (PCN)
  - Date of birth
  - Date of onset
  - X-ray date
  - Place of service (POS)
  - Type of service (TOS)
  - Quantity billed
  - Prior authorization number (PAN)
  - Beginning date of service
  - Ending date of service
- The following appeals may *not* be appealed through AIS:
  - Claims listed on the R&S report as Incomplete Claims
  - Claims listed on the R&S report with $0 allowed and $0 paid
  - Claims requiring supporting documentation (for example, operative report, medical records, home health, hearing aid, and dental X-rays)
  - DRG assignment
  - Procedure code, modifier, or diagnosis code
  - Medicare crossovers
  - Claims listed as *pending* or *in process* with EOPS messages
  - Claims denied as *past filing deadline* except when retroactive eligibility deadlines apply
  - Claims denied as *past the payment deadline*
  - Inpatient Hospital claims requiring supporting documentation
  - Third party resource (TPR)/Other insurance

Providers may appeal these denials either electronically or on paper.

Refer to: "Disallowed Electronic Appeals" on page 6-2 to determine if these appeals can be billed electronically. If these appeals cannot be billed electronically, a paper claim must be submitted.

Exception: *Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed if the requested form has been faxed according to the instructions under "Hysterectomy Services" on page 36-73.*

6.1.3 Automated Inquiry System Automated Appeals Guide

To access the AIS automated appeals guide, providers can call 1-800-925-9126 (1-800-568-2413 for Children with Special Health Care Needs [CSHCN] Services Program). Providers may submit up to three fields per claim and 15 appeals per call. If during any step invalid information is entered three times, the call transfers to the TMHP Contact Center for assistance.

6.1.4 Paper Appeals

After determining a claim cannot be appealed electronically or by using AIS, appeal the claim on paper by completing the following steps:

1) Copy the R&S page where the claim is paid or denied or other official notification from TMHP.
2) Circle one claim per R&S page.
3) Identify the incorrect information and the corrected information that should be used to appeal the claim. Specify the reason for appealing the claim.
4) Attach a copy of supporting medical documentation that is necessary or requested by TMHP.
5) Attach a copy of the original claim if available. Claim copies are helpful when the appeal involves medical policy or procedure coding issues.

Reminder: *Do not copy supporting documentation on the opposite side of the R&S report.*

Note: *It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It also is recommended that paper documentation be sent via certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 120-day appeals deadline has been met. If providing proof via certified receipt, the certified receipt number must be indicated on the detailed listing. The provider may need to keep such proof regarding multiple claims submissions if the Medicaid provider identifier is pending.*

Medicare crossovers and inpatient hospital appeals related to medical necessity denials or DRG assignment/adjustment *must* be submitted on paper with the appropriate documentation.

Submit correspondence, adjustments, and appeals (including routine inpatient hospital claims) to the following address:

Texas Medicaid & Healthcare Partnership
Appeals/Adjustments
PO Box 200645
Austin, TX 78720-0645

6

CPT only copyright 2005 American Medical Association. All rights reserved.

Exception: *Hospitals appealing the HHSC Office of Inspector General (OIG) UR Department final technical denials, admission denials, DRG revisions, continued-stay denials, or cost/day outliers must appeal to HHSC at the following address:*

Texas Health and Human Services Commission
Medical & UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

6.1.4.1 DRG Adjustment Appeal

Hospital providers who are appealing for a DRG adjustment (higher weight DRG) must provide the original and revised HCFA-1450 (UB-92), the complete medical record, and a statement defining the reason for the requested change. Hospitals have 120 days from the date of the R&S report to request an addition of a diagnosis or procedure resulting in a DRG adjustment.

6.1.4.2 Medical Necessity Denial Appeals

Appeals of denials relating to medical necessity decisions made for all medical services with the exception of HHSC Inpatient Utilization Review cases may be submitted for further review if providers find denials are inappropriate. All necessary documentation must accompany the request for review. Incomplete appeals and adjustment requests are denied by TMHP with an explanation of benefits (EOB) code requesting additional information.

TMHP reviews each appeal (DRG adjustment and medical necessity) and forwards written notice of final action in the form of a letter or an adjustment transaction on the R&S report.

6.1.5 Appeals Submitted Incorrectly

If an incomplete appeal is received, it is returned to the sender with further appeal instructions and a request for more information. Documentation (either by letter or facsimile) that does not clearly indicate the reason for submission is returned to the sender for clarification. If an appeal is received that may be more appropriately addressed in another department, the appeal is forwarded to that department for them to respond.

If the TMHP Medical Director or designee identifies a pattern of ineffective use of the appeals process, the provider may be referred to a provider relations representative for assistance.

6.2 Refunds

The TMHP Cash Reimbursement Unit is responsible for processing financial adjustments when overpayment, duplicate payment, payment to incorrect providers, and overpayments because of overlapping payments by Medicaid and another source occur. An overpayment must be refunded to Medicaid, but the amount refunded to TMHP does not exceed the Medicaid payment except in specific situations regarding other insurance payments as stated in "Refunds to TMHP Resulting from Other Insurance Payments and Conditions Surrounding Provider Billing of Third Party Insurers" on page 4-14.

Providers have the option of refunding by issuing a check to TMHP or requesting a recoupment through the paper appeal process. The paper appeal process does not require a provider to issue a check because the refund amount is reduced from the R&S report. To accurately process claim refunds, the TMHP Cash Reimbursement Unit requests that the refund check be accompanied by a Refund Information Form, found on page B-104, with the following information:

- Refunding provider's name and provider identifier
- Client's name and Medicaid ID number
- The date the medical service was rendered
- A copy of the R&S report showing the claim to which the refund is being applied
- The specific reason for the refund

If private insurance paid on the claim, the provider gives the exact amount paid and the insurance company's name, address, policy number, and group number.

To request the forms, contact the TMHP Contact Center at 1-800-925-9126, or write to the following address:

Texas Medicaid & Healthcare Partnership
Contact Center
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

6.3 Appeals to HHSC Fee-for-Service and PCCM

6.3.1 Administrative Claim Appeals

An administrative appeal is a request for review of (not a hearing on) claims denied by TMHP or claims processing entity for technical and non-medical reasons. There are *two types* of administrative appeals:

1) *Exception requests to the 95-day claim filing deadline.* A provider's formal written request for review of (not a hearing on) a claim that is denied or adjusted by TMHP for failure to meet the 95-day claim filing deadline. This exception should meet the qualifications for one of the five exceptions listed on page 6-5 and should be submitted directly to HHSC.
2) *Standard Administrative Appeal.* A provider's formal written request for review of (not a hearing on) a claim or prior-authorization that is denied by TMHP for technical and/or non-medical reasons.

An administrative claims appeal is a request for a review as defined in Title 1 *Texas Administrative Code* (TAC) §354.2201(2).

An administrative appeal must be:

- Submitted in writing to HHSC Claims Administrator Contract Management by the provider delivering the service or claiming reimbursement for the service.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Received by HHSC Claims Administrator Contract Management after the appeals process with TMHP or the claims processing entity has been exhausted, and must contain evidence of appeal dispositions from TMHP or the claims processing entity:
  - All correspondence and documentation from the provider to TMHP or the claims processing entity including copies of supporting documentation submitted during the appeal process.
  - All correspondence from TMHP or the claims processing entity to the provider including TMHP's final decision letter or such from the claims processing entity.
- Complete and contain all of the information necessary for consideration and determination by HHSC Claims Administrator Contract Management to include the following:
  - A written explanation specifying the reason/ request for appealing the claim.
  - Supporting documentation for the request.
  - All R&S reports identifying the claims/services in question.
  - Identification of the incorrect information and the corrected information that is to be used to appeal the claim.
  - A copy of the original claim, if available. Claim copies are helpful when the appeal involves medical policy or procedure coding issues. Also provide a corrected signed claim.
  - A copy of supporting medical documentation that is necessary or requested by TMHP.
  - Provider's internal notes and logs when pertinent (cannot be used as proof of timely filing).
  - Memos from the state, TMHP, or claims processing entity indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the appeal.
  - Other documents, such as receipts (i.e., certified mail along with a detailed listing of the claims enclosed), in-service notes, minutes from meetings, etc., if relevant to the appeals. Receipts can be helpful when the issue is late filing.
- Received by HHSC Claims Administrator Contract Management within 120 days from the date of disposition by TMHP or the claims processing entity as evidenced by the R&S sent to providers.

Providers that have submitted their claims electronically must identify the batch submission ID with the date on the electronic claims report. This report must indicate the TMHP assigned batch ID. In addition, this report must include the individual claim that is being appealed. This required information constitutes proof of timely filing.

Note: *Only reports accepted/rejected from TMHP or the claims processing entity to the vendor will be honored unless the provider is a direct submitter (TDHconnect). Office notes indicating claims were submitted on time or personal screen prints of claim submissions are not considered proof of timely filing.*

HHSC Claims Administrator Contract Management only reviews appeals that are received within 18 months from the date-of-service. All claims must be paid within 24 months from the date of service as outlined in 1 TAC §354.1003.

Providers must adhere to all filing and appeal deadlines for an appeal to be reviewed by HHSC Claims Administrator Contract Management. The filing and appeal deadlines are described in 1 TAC §354.1003.

Additional information requested by HHSC Claims Administrator Contract Management must be returned to HHSC Claims Administrator Contract Management within 21 calendar days from the date of the letter from HHSC Claims Administrator Contract Management. If the information is not received within 21 calendar days, the case is closed.

A determination made by HHSC Claims Administrator Contract Management is the final decision for claim appeals. No additional consideration is available. Therefore, ensure that all documents pertinent to the appeal are submitted. *New evidence* is required for an additional appeal to HHSC Claims Administrator Contract Management.

Providers mail appeal requests to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
PO Box 204077
Austin, Texas 78720-4077

6.3.1.1 Exceptions to the 95-Day Filing Deadline

HHSC Claims Administrator Contract Management is responsible for reviewing requests for exceptions to the 95-day filing deadline (fee-for-service and Primary Care Case Management [PCCM]). HHSC Claims Administrator Contract Management makes the final decision on whether claims fall within one of the exceptions to the 95-day filing deadline. Exception requests must be in writing and mailed directly to HHSC. Only providers can submit exception requests. Requests from billing companies, vendors, or clearinghouses are *not* accepted unless accompanied by a signed authorization from the provider (with each appeal). Without provider authorization, these requests are returned without further action.

Note: *HHSC will only consider exceptions to the 95-day filing deadline for claims that are submitted within the 365-day federal filing deadline from the date of service as outlined in 1 TAC §354.1003.*

Exceptions to the filing deadline are considered when one of the following situations exists:

- Catastrophic event that substantially interferes with normal business operations of the provider, or damage or destruction of the provider's business office or records by a natural disaster, including but not limited to fire, flood, or earthquake; or damage or destruction of the provider's business office or records by circum-

CPT only copyright 2005 American Medical Association. All rights reserved.

stances that are clearly beyond the control of the provider, including but not limited to criminal activity. The damage or destruction of business records or criminal activity exception does not apply to any negligent or intentional act of an employee or agent of the provider because these people are presumed to be within the provider's control. The presumption can only be rebutted when the intentional acts of the employee or agent lead to termination of employment and filing of criminal charges against the employee or agent.

- Delay or error in the eligibility determination of a client, or delay due to erroneous written information from HHSC, its designee, or another state agency.
- Delay due to electronic claim or system implementation problems.
- Submission of claims occurred within the 365-day federal filing deadline (when services are authorized retroactively), but the claim was not filed within 95 days from the date of service because the service was determined to be a benefit of the Medicaid program, and a retroactive effective date for the new benefit was applied.
- Client eligibility is determined retroactively and the provider is not notified of retroactive coverage.

Under the conditions and circumstances listed above, providers must submit the following documentation, if appropriate, and any additional requested information to substantiate approval of an exception. All claims that are to be considered for an exception must accompany the request. HHSC considers only the claims that are attached to the request.

All exception requests must include an affidavit or statement from the provider stating the details of the cause for the delay, the exception being requested, and verification that the delay was not caused by neglect, indifference, or lack of diligence of the provider or the provider's employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.

- Exception requests for catastrophic events must include evidence of insurable loss; medical, accident, or death records; or police or fire report substantiating the exception of damage, destruction, or criminal activity.
- Exception requests for the delay or error in the eligibility determination of a recipient must include the written document from HHSC or its designee that contains the erroneous information or explanation of the delayed information.
- Exception requests for the delay due to electronic claim or system implementation problems must include the written repair statement, invoice, computer or modem generated error report (indicating attempts to transmit the data failed for reasons outside the control of the provider), or the explanation for the system implementation problems. The documentation must include a detailed explanation made by the person making the repairs or installing the system, specifically indicating the relationship and impact of the computer problem or system implementation to claims submission, and a detailed statement explaining why alternative billing procedures were not initiated after the delay in repairs or system implementation was known.
- Exception requests for service authorized retroactively must include a written, detailed explanation of the facts and documentation to demonstrate the 365-day federal filing deadline for the benefit was met.
- Exception requests for client eligibility determined retroactively and the provider is not notified of retroactive coverage must include a written, detailed explanation of the facts and activities illustrating the provider's efforts in requesting eligibility information for the client. The explanation must contain dates, contact information, and any responses from the client.

Refer to: "Exceptions to the 95-Day Filing Deadline" on page 5-5 for more detailed information.

6.3.1.2 Exceptions to the 120-day Appeal Deadline

HHSC shall consider exceptions to the 120-day appeal deadline. HHSC Claims Administrator Contract Management decides whether a claim falls within one of the exceptions. All claims that are to be considered for an exception must accompany the request. HHSC considers only the claims that are attached to the request.

- An exception request must be received by HHSC within 18 months from the date of service to be considered.
- The following exceptions to the 120-day appeal deadline are considered if the criteria in the previous bullet is met and there is evidence to support one of the bullets below:
  - Errors made by a third party payor that were outside the control of the provider. The provider must submit an affidavit or statement from the third party payer stating the details of the cause for the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence of the provider or the provider's employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.
  - Errors made by the reimbursement entity that were outside the control of the provider. The provider must submit an affidavit or statement from the original payor stating the details of the cause of the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence of the provider or the provider's employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.
  - Claims were adjudicated, but an error in the claim's processing was identified after the 120-day appeal deadline.

Adequate back-up documentation *must* also accompany the exception request. Failure to provide adequate documentation results in the case being closed. Providers

CPT only copyright 2005 American Medical Association. All rights reserved.

are notified of the reason for denial. HHSC may request additional information which must be received within 21 calendar days from the date of the letter from HHSC. If the information is not received within 21 calendar days, the case will remain closed.

HHSC must receive a written exception request within 120 days of TMHP's final action. *Multiple requests submitted simultaneously must be sorted by provider identifier first, and then alphabetically by client name.* The orderly submission of exception requests facilitates the review process. Exception requests are returned to the provider if not submitted in the required format.

Additional claims cannot be added to an exception request after the exception request has been completed by HHSC. Additional claims require completed exception request information and will be considered as an exception request separate from the original request. Information from a previous request is not linked together by HHSC to complete or understand additional claims.

6.3.1.3 Exceptions to the 24-Month Payment Deadline

HHSC shall consider exceptions to the 24-month claims payment deadline for the situations listed below. The final decision about whether a claim falls within one of the exceptions will be made by HHSC.

- *Refugee Eligible Status*: The payable period for all Refugee Medicaid/Medicare eligible recipient claims is the federal fiscal year in which each date of service occurs plus one additional Federal Fiscal year. The date of service for inpatient claims is the discharge date.
- *Medicare/Medicaid Eligible Status*: The payable period for Medicaid/Medicare eligible recipient claims filed electronically is 24 months from the date the file is received from Medicare by TMHP or the claims processing entity. The payable period for Medicaid/Medicare eligible recipient claims filed on paper is 24 months from the date listed on the Medicare Remittance Advice.
- *Retroactive Supplemental Security Income Eligible*: The payable period for Supplemental Security Income (SSI) Medicaid eligible recipients when the Medicaid eligibility is determined retroactively is 24 months from the date the Medicaid eligibility is added to the eligibility file. The date is referred to as the "add date."

Mail exception requests to HHSC at the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
PO Box 204077
Austin, Texas 78720-4077

Note: *Medicaid health maintenance organization (HMO) providers must communicate with their respective HMOs regarding appeals related to the filing deadline or any exception request policy. HHSC Claims Administrator Contract Management does not have the authority to manage these appeals.*

6.3.2 Medical Necessity Appeals

Medical necessity appeals are defined as disputes regarding medical necessity of services. Providers must appeal to TMHP and exhaust the appeal/grievance process before submitting an appeal to HHSC.

Medical necessity appeals related to UR decisions made by HHSC's UR Department *must* be appealed to HHSC *not* TMHP.

When filing appeals to HHSC, providers must submit copies of all supporting documentation, including information sent to TMHP.

6.3.3 Utilization Review Appeals

Hospitals may appeal adverse UR decisions made by the HHSC's OIG UR department to the HHSC Medical & UR Appeals Unit. The written appeal request must be received by the Medical and UR Appeals Unit within 120 days from the date of the original HHSC OIG UR decision letter. If the request is not received within 120 days, the appeal is not conducted, and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request, submission of the complete medical record, or the original properly completed notarized affidavit in the format approved by HHSC. Procedures and specific requirements for appealing these decisions can be found in the sections below.

Hospitals may appeal adverse UR determinations to the following address:

Texas Health and Human Services Commission
Medical & UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

Note: *UR Admission Denials, Continued Stay Denials, DRG Revisions, Cost/Day Outlier Denials or Technical Denials issued by Medicaid managed care organizations (MCOs) must be appealed to the appropriate health plan. HHSC's Medical and UR Appeals Unit does not have the authority to manage these appeals.*

6.3.3.1 Admission Denials, Continued Stay Denials, DRG Revisions, and Cost/Day Outlier Denials

If a hospital is dissatisfied with the original HHSC OIG UR decision, it submits a written request for an appeal to HHSC's Medical & UR Appeals Unit. The request *must* include a copy of the complete medical record, a letter explaining the reasons why the HHSC's OIG UR decision is incorrect, a copy of the HHSC OIG UR decision letter, and an original properly completed notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. If the complete medical record or a properly completed notarized affidavit is not submitted initially with the appeal request, the provider has 21 calendar days to do so. If the required documentation is not received within

CPT only copyright 2005 American Medical Association. All rights reserved.

this time frame, the case is closed without further opportunity for review and the original HHSC OIG UR decision is considered the final decision.

- Complete medical records must be provided to HHSC at no charge. A complete medical record must include, but is not limited to, history and physical examinations, discharge summary, physicians' progress notes, physicians' orders, laboratory reports, X-ray reports, operative reports, pathology reports, nurses' notes, medication sheets, vital signs sheets, therapy notes, specialty consultation reports, emergency room record and special diagnostic and treatment records.
- The HHSC Medical & UR Appeals Unit is responsible for conducting an independent review in response to the provider's appeal. Medical & UR Appeals staff professionals use all documentation in the medical record to determine if an inpatient admission was appropriate and that the diagnoses and procedures are correct. HHSC OIG UR screening criteria as described in 1 TAC §371.204 are not used by this unit to determine the appropriateness of an inpatient admission. The HHSC Medical & UR Appeals Associate Medical Director for Medicaid/CHIP performs a complete review for the medical necessity of the admission, DRG validation, quality of care, continued stay medical necessity and ancillary charges (*Tax Equity and Fiscal Responsibility Act of 1982* [TEFRA] cases) using the medical record documentation submitted on appeal. After completion of the review, the physician renders a final decision on the case. The final decision may include determinations regarding multiple aspects of the admission. The hospital is notified in writing of the final decision. Inpatient admission denials cannot be rebilled as outpatient claims except as noted in "Hospital Outpatient Observation Room Services" on page 25-25.
- If the hospital is dissatisfied with the appeal decision, the attending physician or medical director of the hospital may request an educational conference with the HHSC Associate Medical Director for Medicaid/CHIP. The educational conference is held by telephone and is between the HHSC Associate Medical Director for Medicaid/CHIP and the hospital medical director or attending physician involved with the case. It is an opportunity for the physicians to discuss the deciding factors in the case as well as the hospital's claims billing processes that may have affected the adjudication of the case. This conference will not alter the previous appeal decision.

The Medicaid program recognizes hospital staff may use guidelines, such as the American Hospital Association's *Coding Clinic*, to assist them in identifying diagnoses and/or procedures for statistical and billing purposes. However, the HHSC Medical & UR Appeals Unit determines the appropriate diagnoses and/or procedures for reimbursement purposes using the documentation in the *medical record* (submitted on appeal) and the following guidelines:

- *Principal diagnosis assignment*. The diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The principal diagnosis must be treated or evaluated during the admission to the hospital.
- *Secondary diagnoses assignment*. Conditions that affect patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, or increased nursing care or monitoring, or, in the case of a newborn (up to 28 days of life), which the physician deems to have clinically significant implications for future health care needs. Normal newborn conditions or routine procedures should not be considered as complications or comorbidities for DRG assignment.

If the principal diagnosis, secondary diagnoses, or procedures are not substantiated in the medical record, not sequenced correctly, or have been omitted, the codes may be changed, added, or deleted by the HHSC Associate Medical Director for Medicaid/CHIP. When it is determined the diagnoses or procedures are substantiated and sequenced correctly, a final DRG assignment is made.

6.3.3.2 Final Technical Denials

Hospitals may submit a request for a written appeal to the HHSC's Medical & UR Appeals only if the hospital has evidence the HHSC's UR department issued a final technical denial in error or did not provide proper notification of the final technical denial. The request must include a letter explaining the reasons why the HHSC's decision is incorrect and a copy of the HHSC's UR decision letter.

The written appeal request must be received by HHSC within 120 days from the date of the original HHSC UR decision letter. If the request is not received within the 120 days, the appeal is not conducted and the HHSC's UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request.

If the appeal time frame is met, HHSC's Medical & UR Appeals Unit reviews all the documentation and renders a final decision on the case. If it is determined the technical denial was issued correctly by the HHSC's UR department, the HHSC's decision is upheld. The hospital is notified in writing of the decision. This decision is the final decision of HHSC.

If it is determined the final technical denial decision should be overturned, HHSC's Medical and UR Appeals Unit will request a copy of the complete medical record and an original properly completed notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. The Associate Medical Director for Medicaid/CHIP performs a complete review for the medical necessity of the admission, DRG validation, quality of care or continued stay, and ancillary charges (for TEFRA cases) using the medical record documentation. After completion on the review, the physician renders a final decision on

CPT only copyright 2005 American Medical Association. All rights reserved.

the case. The final decision may include multiple aspects of the admission. The hospital is notified in writing of the final decision.

If the documentation requested above is not received within the required time frame, the case is closed without further opportunity for review and the original HHSC OIG UR decision is considered final.

6.3.4 Complaints to HHSC—Fee-for-Service and PCCM

Fee-for-service and PCCM providers may file complaints to the HHSC Claims Administrator Contract Management if they find they did not receive full due process from TMHP in the management of their appeal. Fee-for-service and PCCM providers must exhaust the appeals/grievance process with TMHP before filing a complaint with the HHSC Claims Administrator Contract Management.

Refer to: "Appeals to HHSC Fee-for-Service and PCCM" on page 6-4 for information about submission of an appeal to HHSC.

A *complaint* is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning the Medicaid program. The term *complaint* does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider's satisfaction and does not include a provider's oral or written dissatisfaction with an adverse determination.

Under the complaint process, the HHSC Claims Administrator Contract Management works with TMHP and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program and contract issues, as applicable.

Complaints must be in writing and received by the HHSC Claims Administrator Contract Management within 60 calendar days from TMHP's written notification of the final appeal decision.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by TMHP is incorrect and copies of the following documentation:

- All correspondence and documentation from the provider to TMHP, including copies of supporting documentation submitted during the appeal process.
- All correspondence from TMHP to the provider, including TMHP's final decision letter.
- All R&S reports of the claims/services in question, if applicable.
- Provider's original claim/billing record, electronic or manual, if applicable.
- Provider's internal notes and logs when pertinent.
- Memos from the state or TMHP indicating any problems, policy changes, or claims' processing discrepancies that may be relevant to the complaint.
- Other documents, such as receipts (i.e. certified mail), original date-stamped envelopes, in-service notes, minutes from meetings, etc., if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
PO Box 204077
Austin, TX 78720-4077

6.3.5 Complaints to HHSC—HMO Services

Medicaid Managed Care providers (HMOs) may file complaints to HHSC Health Plan Operations if they find they did not receive full due process from the HMOs. HHSC is only responsible for the management of complaints from managed care providers. Appeals/grievances, hearings, or dispute resolutions are the responsibility of the health plans. Providers must exhaust their appeals/grievance process with their health plan before filing a complaint with HHSC.

A *complaint* is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of the Medicaid program. The term complaint does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider's satisfaction.

Under the complaint process, HHSC works with the health plans and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program/contract issues, as applicable.

Complaints *must* be in writing and received by HHSC within 60 calendar days from the health plan's written notification of the final action.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by the health plan is incorrect and copies of the following documentation:

- All correspondence and documentation from the provider to the health plan, including copies of supporting documentation submitted during the appeals process.
- All correspondence from the health plan to the provider. Correspondence includes the initial determination letter; all appeal determination letters, and the final decision letter.
- All R&S reports of the claims/services in question, if applicable.
- Provider's original claim/billing record, electronic or manual, if applicable.
- Provider's internal notes and logs when pertinent.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Memos from the state or the health plan indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the complaint.
- Other documents such as receipts (i.e., certified mail), original date-stamped envelopes, in-service notes, minutes from meetings, etc., if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests for HMO's may be mailed to the following address:

Texas Health and Human Services Commission
Re: Provider Complaint
Health Plan Operations, H-320
PO Box 85200
Austin, TX 78708

6.4 Cost Report Settlement Appeal Process

A provider who is dissatisfied with the determination contained in the Notice of Amount of Program Reimbursement (NPR) from TMHP Medicaid Audit may request an appeal as follows:

- The request for appeal must be in writing.
- The request for appeal must be filed within 120 calendar days from the date of receipt of the NPR.
- If the amount in controversy is at least $1,000, the request for the appeal must be filed with TMHP Medicaid Audit.
- If the NPR shows that the provider is indebted to the Medicaid program, TMHP must take the necessary action to recover the overpayment, including a suspension of interim payments. This process will take place even if an appeal has been requested.

6.4.1 Appeals to TMHP Medicaid Audit

A provider's request to appeal his or her NPR must do the following:

- Identify specific individual items in TMHP Medicaid Audit's determination with which the provider disagrees.
- Give the reasons the provider believes these are incorrect.
- Identify the amount in controversy for each item and provide a calculation of that amount.

The appeal may include any materials the provider believes will support its position.

TMHP Medicaid Audit completes a desk review of the appeal within six months of the date of receipt of complete documentation supporting the appeal. TMHP does the following:

- Review the materials submitted by the provider.
- Inform the provider if it appears that the request for an appeal was not timely or the amount of controversy is not at least $1,000.
- Review the record that formed the basis for the determination of the total payment due to the provider.
- Attempt to resolve as many points in controversy as possible with the provider and inform him or her in writing the issues that have been resolved and those that the provider may appeal to HHSC.
- Ensure all available documentation in support of the provider or TMHP Medicaid Audit is part of the record.

To appeal to TMHP Medicaid Audit, send the written notice to the following address within 120 days of receipt of the NPR letter to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit Operations Director
PO Box 200345
Austin, TX 78720-0345

7.1 Medicaid Managed Care

The Texas Medicaid Program, administered by HHSC, operates the Medicaid Managed Care program under the authority of federal waivers and state plan amendments approved by the Centers for Medicare & Medicaid Services (CMS).

7.1.1 Overview

Originally, the Texas Medicaid Managed Care Program was called the State of Texas Access Reform (STAR) Program. The STAR Program was established to explore different methods of building a framework of managed care around segments of the Texas Medicaid Program. In 1995, the Texas Legislature adopted Senate Bill 10 and related legislation that authorized HHSC to undertake a comprehensive restructuring of the Texas Medicaid Program to incorporate managed care delivery systems statewide.

Currently, the Medicaid Managed Care Program consists of two types of health care delivery systems: Health Maintenance Organizations (HMOs) and Primary Care Case Management (PCCM). HMOs provide services in the metropolitan areas, including Nueces. PCCM provides services in the remaining 202 rural counties. (See page 7-21 for a listing of PCCM counties and page 7-19 for a listing of HMO service areas.)

The principal objectives of Medicaid Managed Care are to emphasize early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target population, with a special focus on prenatal and well-child care.

Clients enrolled in any of the Medicaid Managed Care programs may reside in metropolitan or rural areas. These programs include:

- *The State of Texas Access Reform (STAR) Program* operates under a 1915(b) waiver and provides acute care medical assistance in a Medicaid Managed Care environment for clients who reside in the Bexar, Dallas, El Paso, Harris, Lubbock, Nueces, Tarrant, and Travis metropolitan service areas (SAs) (see "STAR Program" on page 7-11)
- *The STAR+PLUS Program* operates under a 1915(b) waiver and 1915(c) waiver and provides integrated acute and long term care in a Medicaid Managed Care environment for clients who reside in the Bexar, Travis, Nueces, and Harris Service Areas (see "STAR+PLUS Program" on page 7-16)
- *The NorthSTAR Program*, administered by the Department of State Health Services (DSHS), operates under a 1915 (b) waiver and provides integrated behavioral health services under contract with a behavioral health organization (BHO) for clients who reside in the Dallas SA (see "NorthSTAR Program" on page 7-18)
- *The PCCM Program*, administered by TMHP, operates under a state plan amendment for clients who reside in the 202 rural Texas counties (see "PCCM Expansion" on page 7-21)

The goals of Medicaid Managed Care are to:

- Improve the access to care for clients enrolled in the programs
- Increase quality and continuity of care for clients
- Decrease inappropriate usage of the health care delivery system, such as emergency rooms for non-emergencies
- Achieve cost-effectiveness and efficiency for the state
- Promote provider and client satisfaction

Additional goals for the STAR+PLUS Program include:

- Integrating acute and long term care services
- Coordinating Medicare services for clients who are dual eligible

Higher use of medical services by traditional Medicaid clients occurs when clients obtain care through emergency rooms or access duplicative services for the same medical condition. In Medicaid Managed Care, clients assume a responsible role in achieving their personal health care by choosing a primary care provider, then actively participating with their primary care provider to access preventive, primary care services. This collaborative approach to health care delivery usually achieves Medicaid cost savings by reducing duplicative services and unnecessary emergency and inpatient care.

Although many of the Medicaid Managed Care requirements are similar, each program has established specific objectives, eligibility and enrollment requirements, and claims filing processes, which are detailed in this section.

7.1.2 Client Eligibility and Effective Date

HHSC has targeted specific client groups within the Texas Medicaid population for managed care enrollment. Refer to each program in this section for eligibility requirements.

In most cases, Medicaid eligibility is not retroactive. For exceptions, see "Enrollment of Pregnant Women (Type Program 40)" on page 7-12.

7.1.2.1 Managed Care Eligibility and Effective Date

Benefits under the STAR, STAR+PLUS, NorthSTAR, and PCCM Programs usually begin on the first day of the next month following selection of a primary care provider and plan. For example, a client who has become eligible for Medicaid benefits for the first time, may be certified and begin to receive benefits under the Texas Medicaid Program on the same day. If the client is also determined to be eligible for managed care, a second and separate enrollment process takes place.

The client does not begin to receive services under Medicaid Managed Care until the first day of the following month (providing enrollment takes place before the *cut-off*

CPT only copyright 2005 American Medical Association. All rights reserved.

date for the following month). Enrollments and disenrollments become effective on the first day of the month (refer to example 1).

Example 1	
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and primary care provider	January 1
Managed Care benefits begin	February 1

If a client selects a primary care provider or, if applicable, a health plan after the *cut-off* date (approximately the 15th of the month) they will not be enrolled in managed care nor appear on a primary care provider's patient list until the second month after their enrollment effective date (refer to example 2).

Example 2	
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and primary care provider	January 20
Managed Care benefits begin	March 1

Clients may receive services under the traditional Medicaid program from the first date of eligibility. Claims for these services are billed to TMHP. Once managed care eligibility is in effect, the provider must bill the client's managed care organization for all capitated services. Providers continue to bill non-capitated services to TMHP.

7.1.2.2 PCCM Expansion

When a client in the PCCM expansion area is determined Medicaid-eligible and is a mandatory enrollee, the client is automatically enrolled in PCCM. Enrollment into PCCM is prospective.

Exception: *Newborn enrollments are retroactive to the date of birth.*

Example	
Client certified for Texas Medicaid	January 2
Medicaid benefits begin	January 1
Managed Care benefits begin	February 1

Refer to: "Client Medicaid Identification (Form H3087) (18 Pages)" on page B-16 for examples of the STAR, STAR+PLUS, NorthSTAR and PCCM Programs' Medicaid Identification Form (Form H3087).

"PCCM Expansion" on page 7-21

7.1.3 Primary Care Provider Changes

7.1.3.1 Client-Initiated Primary Care Provider Changes

A client may change primary care providers *without cause* or for the following reasons:

- The client is dissatisfied with the care or treatment they have received.
- The client's condition or illness would be better treated by another provider type.
- The client's new address is no longer convenient to the primary care provider's location.
- The provider leaves the program (i.e., moves, no longer accepts Medicaid, is removed from Medicaid enrollment, is no longer affiliated with the Medicaid Managed Care Program, or is deceased).
- The client/primary care provider relationship is not mutually agreeable.

7.1.3.2 Provider-Initiated Primary Care Provider Changes

A provider may request a client be reassigned to another primary care provider for any of the following reasons:

- The client is not included in the primary care provider's scope of practice.
- The client is non-compliant with medical advice.
- The client consistently displays unacceptable office decorum.
- The client/primary care provider relationship is not mutually agreeable.

Any request by a provider to reassign a client to another primary care provider must be processed through the applicable managed care program. Before a request for reassignment can be initiated, reasonable measures must be taken to correct the client's behavior. Reasonable measures may include education or counseling by health plan or PCCM staff. The health plan or PCCM will notify the client of the reassignment if all attempts to remedy the situation have failed. Providers should also notify the client about the reassignment in writing and send a copy of the notification to the health plan.

If the client indicates that they have made a primary care provider change, follow the process below:

- Access the daily Primary Care Provider Change List located on the Panel Report webpage to confirm selection as the newly requested primary care provider. If the list verifies the primary care provider change with a future effective date, proceed with scheduling an appointment.
- If the Primary Care Provider Change List does not reflect the newly requested primary care provider, direct the client to call 1-888-302-6688 to request a primary care provider change. Once the provider has ensured that

CPT only copyright 2005 American Medical Association. All rights reserved.

the primary care provider change request appears on the daily Primary Care Provider Change List, the appointment may be scheduled.

Client requests for primary care provider changes received prior to the middle of the month usually become effective on the first day of the following month. If a client's request for a primary care provider change is received after the middle of the month, the change may become effective on the first day of the second month following the request, as shown in the example below.

Example	
Request received on or before	Mid-May
Change effective	June 1
Request received after	Mid-May
Change effective	July 1

7.1.3.3 Medicaid Managed Care-Initiated Primary Care Provider Changes

In addition, a client may be reassigned to another primary care provider for any of the following reasons:

- The primary care provider is sanctioned by HHSC.
- The primary care provider exhibits a documented pattern of unacceptable quality of care.
- The primary care provider inappropriately reduces client's right to access specialty services covered under Medicaid Managed Care.

7.1.4 Health Plan Changes

7.1.4.1 Client-Initiated HMO Plan Changes

Clients have the right to change plans once a month.

Exception: *For clients in the PCCM expansion counties, the only Medicaid Managed Care model available is PCCM along with traditional fee-for-service. HMO health plans do not exist in PCCM expansion counties.*

Clients must call the enrollment broker to initiate a plan change. If a plan change request is received before the middle of the month, the plan change is effective on the first day of the following month. If the request is received after the middle of the month, the plan change will be effective on the first day of the second month following the request, as shown below.

Example	
Request received on or before	Mid-May
Change effective	June 1
Request received after	Mid-May
Change effective	July 1

Note: *All plan change requests must be processed by the enrollment broker.*

7.1.4.2 Health Plan Managed Care Administrator-Initiated Changes

Each health plan has a limited right to request that a client be disenrolled without the client's consent. HHSC must approve any request for such disenrollment.

A health plan may request that a client be disenrolled for the following reasons:

- The client loans his Medicaid Identification Form (Form H3087) to another person to obtain services.
- The client continually disregards the advice of his primary care provider.
- The client repeatedly uses the emergency room inappropriately.

Before a request for disenrollment can be initiated, reasonable measures must be taken to correct the client's behavior. Reasonable measures may include education or counseling conducted by health plan staff. HHSC will notify the client of the disenrollment if all attempts to remedy the situation have failed. HHSC will also notify the client of the availability of appeal procedures and the HHSC fair hearing process.

Neither the health plan nor a provider may request a disenrollment based on an adverse change in the client's health or the utilization of services which are medically necessary for the treatment of a client's condition.

7.1.5 Client Rights and Responsibilities

7.1.5.1 Client Rights

In Texas, Medicaid Managed Care clients have defined rights and responsibilities. Each health plan and primary care provider share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

Note: *Please refer to PCCM Expansion, "Client Rights and Responsibilities" on page 7-23 for information about client rights and responsibilities related to PCCM.*

Medicaid Managed Care clients have the right to:

- Be treated fairly and with dignity and respect
- Know that their medical records and discussions with their providers will be kept private and confidential
- A reasonable opportunity to choose a health care plan and primary care provider (the doctor or health care provider they will see most of the time and who will coordinate their care) and to change to another plan or provider in a reasonably easy manner. These opportunities include the right to:
    - Be informed of available health plans and primary care providers in their areas
    - Be informed of how to choose and change health plans and primary care providers
    - Choose any health plan that is available in their area and choose a primary care provider
    - Change their primary care provider

CPT only copyright 2005 American Medical Association. All rights reserved.

- Change health plans without penalty
- Be educated about how to change health plans or primary care providers

- Ask questions and get answers about anything they don't understand, and that includes the right to:
  - Have their provider explain their health care needs to them and talk to them about the different ways their health care problems can be treated
  - Be told why care or services were denied and not given
- Consent to or refuse treatment and actively participate in treatment decisions, and that includes the right to:
  - Work as part of a team with their provider in deciding what health care is best for them
  - Say yes or no to the care recommended by their provider
- Utilize each available complaint and appeal process through the managed care organization and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
  - Make a complaint to their health plan or to the state Medicaid program about their health care, provider, or health plan
  - Get a timely answer to their complaint
  - Access the health plan appeal process and the procedures for doing so
  - Request a fair hearing from the state Medicaid program and request information about the process for doing so
- Timely access to care that does not have any communication or physical access barriers. That the right to:
  - Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care
  - Get medical care in a timely manner
  - Be able to get in and out of a health care provider's office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the *Americans with Disabilities Act*
  - Have interpreters, if needed, during appointments with their providers and when talking to their health plan. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information
  - Be given an explanation they can understand about their health plan rules, including the health care services they can get and how to get them
- Not be restrained or secluded when doing so is for someone else's convenience, or is meant to force them to do something they do not want to do, or to punish them.

7.1.5.2 Client Responsibilities

Medicaid Managed Care health plans and primary care providers should help clients understand their responsibilities. These include the responsibility to:

- Learn and understand each right they have under the Medicaid program. That includes the responsibility to:
  - Learn and understand their rights under the Medicaid program
  - Ask questions if they do not understand their rights
  - Learn what choice of health plan is available in their area
- Abide by the health plan and Medicaid Managed Care policies and procedures. That includes the responsibility to:
  - Learn and follow their health plan rules and Medicaid rules
  - Choose their health plan and a primary care provider
  - Make any changes in their health plan and primary care provider in the ways established by Medicaid Managed Care and by the health plan
  - Keep their scheduled appointments
  - Cancel appointments in advance when they cannot keep them
  - Always contact their primary care provider first for nonemergency medical needs
  - Be sure they have approval from their primary care provider before going to a specialist (except for self-referred services)
  - Understand when they should and should not go to the emergency room
- Share information relating to their health status with their primary care provider and become fully informed about service and treatment options. That includes the responsibility to:
  - Tell their primary care provider about their health
  - Talk to their providers about their health care needs and ask questions about the different ways their health care problems can be treated
  - Help their providers get their medical records
- Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
  - Work as a team with their provider in deciding what health care is best for them
  - Understand how the things they do can affect their health
  - Do the best they can to stay healthy
  - Treat providers and staff with respect

7

CPT only copyright 2005 American Medical Association. All rights reserved.

7.1.5.3 Advance Directives

Federal and state law require providers to maintain written policies and procedures for informing and providing written information to all adult clients 18 years of age and older about their rights under state and federal law, in advance of their receiving care (*Social Security Act* §§1902[a][57] and 1903[m][1][A]). The written policies and procedures must contain procedures for providing written information regarding the client's right to refuse, withhold, or withdraw medical treatment advance directives. These policies and procedures must comply with provisions contained in 42 Code of Federal Regulations (CFR) §§434.28 and 489, SubPart I, relating to the following state laws and rules:

- A client's right to self-determination in making health care decisions
- The *Advance Directives Act*, Chapter 166, Texas Health and Safety Code, which includes:
    - A client's right to execute an advance written directive to physicians and family or surrogates, or to make a non-written directive to administer, withhold or withdraw life-sustaining treatment in the event of a terminal or irreversible condition
    - A client's right to make written and non-written Out-of-Hospital Do-Not-Resuscitate Orders
    - A client's right to execute a Medical Power of Attorney to appoint an agent to make health care decisions on the client's behalf if the client becomes incompetent

These policies can include a clear and precise statement of limitation if a participating provider cannot or will not implement a client's advance directive. A statement of limitation on implementing a client's advance directive should include at least the following information:

- A clarification of the provider's conscience objections
- Identification of the state legal authority permitting a provider's conscience objections to carrying out an advance directive
- A description of the range of medical conditions or procedures affected by the conscience objection

A provider cannot require a client to execute or issue an advance directive as a condition for receiving health care services. A provider cannot discriminate against a client based on whether or not the client has executed or issued an advance directive.

A provider's policies and procedures must require the provider to comply with the requirements of state and federal law relating to advance directives.

7.1.6 Primary Care Provider Requirements and Information

Under Medicaid Managed Care HMOs, eligible Medicaid clients must select a health plan and a primary care provider. Under Medicaid Managed Care PCCM, eligible Medicaid clients do not have to select a health plan. PCCM eligible Medicaid clients select a primary care provider. The primary care provider furnishes primary care-related services, arranges for and coordinates referrals for all medically necessary specialty services, and is available for urgent or emergency care, directly or through on-call arrangements, 24 hours a day, 7 days a week (see "Continuous Access" on page 7-9). Primary care includes ongoing responsibility for preventive health care, health maintenance, treatment of illness and injuries, and the coordination of access to needed specialist providers or other services.

Primary care providers can choose to contract with PCCM and HMO health plans simultaneously.

Effective December 1, 2006, PCCM Medicaid clients (except SSI-related clients) living in the STAR program service areas of Bexar, Dallas, El Paso, Harris, Harris Expansion, and Lubbock will no longer have PCCM as an option for Medicaid covered health care services. The Health and Human Services Commission mailed out initial notification letters and enrollment kits to affected clients in July 2006.

Although PCCM clients in these service areas will be moving to an HMO, PCCM still needs primary care providers. By remaining enrolled in PCCM, providers ensure continuity of care for each PCCM client in those STAR metropolitan areas as they transition to an HMO. Providers should remember that choosing an HMO does not require that providers terminate their contracts with PCCM. Providers may contract simultaneously with an HMO(s) as well as with PCCM.

PCCM providers in the STAR metropolitan areas are encouraged to continue to provide ongoing health care services to PCCM clients who live in contiguous areas not affected by the changes. There may be instances where PCCM clients may choose a PCCM primary care provider in a metropolitan (STAR) service area.

Provider types who are eligible to serve as a primary care provider include:

- Pediatricians
- Family/general practitioners
- Internists
- Obstetrician/gynecologists
- Nurse practitioners or clinical nurse specialists (family practice, women's health, or pediatrics)
- Certified nurse-midwives
- Physician assistants
- Rural health clinics (RHCs)
- Federally qualified health centers (FQHCs)
- Specialists willing to provide medical homes to clients who have special needs

The primary care provider either furnishes or arranges for all the client's health care needs, including well check-ups, office visits, referrals, outpatient surgeries, hospitalizations, and health-related services.

Texas Health Steps (THSteps) providers must be enrolled with Medicaid to be reimbursed for services provided to clients. THSteps services are self-referred. Medicaid

CPT only copyright 2005 American Medical Association. All rights reserved.

HMOs determine how their clients will access THSteps services. The HMO may require the client to go to an in-network THSteps provider or may allow the client to go to any Medicaid THSteps provider, whether or not they are in the HMO's network. Clients in PCCM are encouraged to access their primary care provider for THSteps services, but may self-refer to any Medicaid THSteps provider. Providers who perform THSteps must work in collaboration with the client's primary care provider to ensure continuity of care.

Female clients may access obstetrical and gynecological providers directly. Although primary care providers are encouraged to assist clients in accessing these services, Medicaid Managed Care enrollees may self-refer for the following services:

- Emergency services
- Family planning
- THSteps services
- Early Childhood Intervention (ECI) case management
- Case Management for Children and Pregnant Women (CPW)
- Obstetric or gynecological services
- School Health and Related Services (SHARS)
- Department of Assistive and Rehabilitative (DARS) case management
- DSHS case management
- Department of Aging and Disability Services (DADS) case management
- Behavioral health services (contact client's health plan for specific requirements)

Behavioral health providers must enroll with each HMO to be reimbursed for services provided to clients. Although Medicaid Managed Care clients may self-refer for behavioral health services, HMO health plan providers should contact the client's health plan for specific in-network requirements. If a behavioral health provider practices in the Dallas SA, he must be enrolled as a network provider in the NorthSTAR BHO.

Refer to: "NorthSTAR Program" on page 7-18.

PCCM operates an open-specialty network. Therefore, behavioral health providers do not have to enroll with PCCM. PCCM clients may access behavioral health services from any Medicaid-enrolled behavioral health provider.

Providers cannot enroll Medicaid clients; however, educating clients is encouraged. Medicaid clients must enroll through the official state enrollment form or by calling the STAR Help Line at 1-800-964-2777.

Providers should follow these rules when educating patients:

- Generally, providers may not influence patients to choose one HMO health plan over another or one PCCM provider over another.
- Under Medicaid Managed Care, HMO providers must inform patients of all Medicaid Managed Care health plans in which the providers participate.
- HMO providers participating in a Medicaid Managed Care HMO may display state-approved, health-related marketing materials in their offices, provided it is done equally for all HMOs in which they participate. HMO providers cannot give out or display plan-specific marketing items or giveaways to patients.
- Providers and subcontractors may only directly contact potential clients with whom they have an established relationship.
- HMO providers may inform patients of special services offered by all Medicaid Managed Care health plans in which the providers participate.
- HMO providers may inform patients of particular hospital services, specialists, or specialty care available in all plans in which the providers participate.
- HMO providers may assist a patient by contacting a plan (or plans) to determine if a particular specialist or service is available, if the patient requests this information.
- HMO providers may not influence patients based on reimbursement rates or methodology used by a particular plan.
- HMO providers can provide the necessary information for the patient to contact a particular plan but cannot promote any plan over another.
- In no instances can HMO providers stock, reproduce, assist in filling out, or otherwise handle the enrollment form. Information can be provided as outlined above, and patients can be reminded that they can easily enroll over the telephone with the enrollment broker. However, the call must be made by the patient, not by the HMO provider or the provider's agent.
- PCCM providers may stock primary care provider selection forms and/or provide a blank primary care provider selection form to the client. They may assist the client in filling out the selection forms. However, they may not in any way influence or coerce the client in making a primary care provider selection. Each client must personally complete and mail their individual form. Providers are prohibited from supplying provider-identified stationary and/or envelopes to the client for this purpose.
- HMO providers may display stickers indicating they participate in a particular Medicaid Managed Care health plan as long as they do not indicate anything more than "(health plan) is accepted or welcomed here."

7.1.6.1 Continuous Access

Continuous access is an important feature of Medicaid Managed Care. Twenty-four-hour primary care provider availability enables clients to access and use services appropriately, instead of relying on emergency rooms for after-hours care.

CPT only copyright 2005 American Medical Association. All rights reserved.

Continuous access can be provided through direct access to a primary care provider's office and/or through on-call arrangements with another office or service. Clients should be informed of the primary care provider's normal office hours and should be instructed how to access urgent medical care after normal office hours.

After-Hours Guidelines

Primary care providers are required to have *at least one* of the following arrangements in place to provide 24-hour, 7-day a week access for managed care clients:

- An office phone answered after hours by a medical exchange or a professional answering service. If an answering service is used, the following must be met:
  - The answering exchange or service must be able to contact the primary care provider or a designated back-up provider for immediate assistance
  - The primary care provider, or designated back-up provider, must be notified of all calls
  - All calls must be returned in a timely manner by the primary care provider or designated back-up
  - The answering service must meet the language requirements of the major Medicaid population groups in the primary care provider's area
- An office phone answered after office hours by an answering machine that instructs the client (in the language of the major Medicaid population groups) to do one of the following:
  - Call the name and phone number of a medical facility where the client can request to speak with a medical professional to determine whether emergency treatment is appropriate
  - Call another number where the primary care provider can be reached
  - Call the name and phone number of a medical professional serving as designated back-up. In this situation, the client must be able to speak with the back-up provider or a clinician who can offer immediate assistance
- An office phone transferred after hours to another location where someone will answer and be able to contact the primary care provider or designated back-up provider

Unacceptable Phone Arrangements

The telephone answering procedures listed below are *not* acceptable:

- An office phone that is answered only during office hours
- An office phone that is answered by a recording or an answering service that directs clients to go to the emergency room
- An office phone answered after hours by an answering machine recording that tells clients to leave a message
- An office phone answering machine recording that informs clients of regular office hours and requests that they call back during those hours
- PCCM providers may not direct clients to call the PCCM nurse helpline in order to meet the primary care provider 24-hour continuous coverage requirements

7.1.6.2 Cultural Competency and Sensitivity

HHSC values the diversity of the Texas Medicaid population and requires TMHP to provide programs to support clients from diverse cultural backgrounds:

- Helplines are staffed by both Spanish- and English-speaking customer service representatives who, at any time, may access a multi-language translation service for assistance.
- Articles in the *Texas Medicaid Bulletin* and educational workshops include topics that focus on cultural sensitivity and the need for culturally competent staff in primary care provider offices.

Providers are expected to comply with the laws concerning discrimination on the basis of race, color, national origin, or sex.

Limited English Proficiency

Medicaid providers are required to provide services in the languages of the major Medicaid population groups they serve and to ensure quality appropriate translations. Title VI, section 601, of the *Civil Rights Act* of 1964 states that "no person in the United States shall on the basis of race, color, or national origin, be excluded from participating in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

HHSC requires Medicaid providers to ensure persons with limited English proficiency have equal access to the medical services to which they are legally entitled.

Meeting the requirements of Title VI may require the primary care provider to take all or some of the following steps at no cost or additional burden to the beneficiary with limited English proficiency:

- Have a procedure for identifying the language needs of patients/clients
- Have access to proficient interpreters during hours of operation
- Develop written policies and procedures regarding interpreter services
- Disseminate interpreter policies and procedures to staff and ensure staff awareness of these policies and procedures and of their Title VI obligations to persons with limited English proficiency

In order to meet interpretation requirements, providers may choose to incorporate into their business practice any of the following (or equally effective) procedures:

- Hire bilingual staff
- Hire staff interpreters
- Use qualified volunteer staff interpreters
- Arrange for the services of volunteer community interpreters (excluding the client's family or friends)
- Contract with an outside interpreter service

CPT only copyright 2005 American Medical Association. All rights reserved.

- Use a telephone interpreter service such as Language Line Services
- Develop a notification and outreach plan for beneficiaries with limited English proficiency

Complaints and reports of non-compliance with Title VI regulations are handled by the Office for Civil Rights (OCR).

Additional information, including the complete guidance memorandum on prohibition of discrimination against persons with limited English proficiency issued by the OCR, can be found on the Internet at www.hhs.gov/ocr/lep/guide.html.

7.1.6.3 Primary Care Provider-to-Client Ratio and Capacity

HHSC oversees all Medicaid Managed Care providers for accessibility and quality of care. If HHSC determines that providers do not have, or fail to maintain, the capacity or capability of providing quality, accessible care, their clients will be reduced through a freeze on new enrollments to the provider's panel. HHSC may disenroll current clients if required accessibility and quality of care to clients is jeopardized.

7.1.7 Medicaid Managed Care Complaints and Fair Hearings

Medicaid Managed Care providers may file complaints with HHSC if they find they did not receive full due process from the respective managed care health plan.

Appeals/grievances or dispute resolution is the responsibility of each managed care health plan or PCCM. Providers must exhaust the complaints/grievance process with their managed care health plan or PCCM before filing a complaint with HHSC.

Please refer to the respective health plan or PCCM for information about specific complaint policies and procedures. For PCCM, please see "Provider Complaints and Appeals" on page 7-39. For NorthSTAR, see "Complaints and Appeals" on page 7-20. For HMOs, refer to the respective health plan's policies and procedures.

7.2 STAR Program

7.2.1 Overview

The principal objectives of the STAR Program are to emphasize early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target population, with a special focus on prenatal and well-child care.

Currently, the STAR Program consists of only one type of health care delivery system (HMO) in select Texas counties. The selected grouping of counties is known as a Service Area (SA).

7.2.1.1 STAR HMO Model

In the HMO model, each STAR health plan is responsible for contracting with providers and/or delegated network to create a health care provider delivery network. Clients who reside in one of the SA counties where this model is an option, and who have selected an HMO, are required to select a primary care provider from the HMO provider directory.

7.2.2 Client Eligibility

HHSC has targeted these client groups within the Texas Medicaid population for STAR Program enrollment:

Type	Program	Enrollment Code
1	Regular Temporary Assistance for Needy Families (TANF)	M
3	MAO RSDI Increases - No Medicare	M*
7	12 months Medicaid denied due to earnings	M
12	Supplemental Security Income (SSI) Manually Certified - No Medicare	M*
13	SSI Recipient - No Medicare	M*
18	Disabled Adult Children denied SSI due to increase in SS benefits - No Medicare	M*
19	Transitional SSI - No Medicare	V
20	04 months Medicaid - TANF	M
22	Early Age Widows/Widowers - No Medicare	M*
29	12 months transitional Medicaid - limited TANF	M
37	12 months transitional Medicaid denied due to earned income; disregards ending	M
40	Pregnant women	M
43	Children under 1 year of age with income below 185% FPIL	M

CPT only copyright 2005 American Medical Association. All rights reserved.

Type	Program	Enrollment Code
44	Children aged 6-19 yrs. with income below 100% FPIL	M
45	Children up to age 1 year, born to Medicaid eligible mothers	M
47	Medicaid for deprived children with step-grandparent income	M
48	Children aged 1-5 yrs. with income below 133% FPIL	M
61	TANF State Program	M
M = Mandatory V = Voluntary M* = Mandatory adults aged 21 and older		

7.2.3 Client Enrollment

A STAR Program client is free to choose a STAR health plan and primary care provider. To maximize enrollment, the STAR Program offers four alternative ways that clients can enroll:

- *Telephone Enrollment*. A client can enroll in the STAR Program by calling 1-800-964-2777. A customer care representative will provide essential education about the program and details needed for enrollment.
- *Mail-in Enrollment*. If calling is not convenient, a client may enroll by completing the STAR Program enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with a brochure explaining the program and provider directories for each plan.
- *Onsite Enrollment*. In addition to telephone and mail-in enrollment, clients can enroll by talking with a STAR Program customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.
- *Default Enrollment*. The final method of enrollment is through an assignment process. If a client does not exercise the right to choose a STAR health plan and primary care provider, the client will be assigned to a plan and primary care provider. The following factors are considered when processing a default enrollment:
    - Client's past claims history, taking into account an established relationship with a STAR or participating primary care provider
    - Client's age
    - Client's sex
    - Client's geographic proximity to the primary care provider

7.2.3.1 STAR Help Line (STAR Enrollment Broker)

Hours	8 a.m. to 8 p.m., Central Time, Monday through Friday
Telephone	1-800-964-2777
Telecommunications device for the deaf (TDD)	1-800-267-5008

7.2.3.2 Automatic Re-enrollment

If a client loses Medicaid eligibility and then regains eligibility within six months, the client is automatically reassigned to his previous health plan and primary care provider.

7.2.3.3 Enrollment of Pregnant Women (Type Program 40)

Women who are on Medicaid type program 40 may be retroactively enrolled in STAR. Women who are certified for Medicaid type program 40 on or before the 10th of the month will be enrolled in STAR beginning the first of the month of certification. Those who are certified after the 10th of the month will be on fee-for-service the month of certification and will be enrolled in STAR beginning the first of the month following the month of certification. There are two exceptions to this rule:

- Women who are certified at any time in their estimated month of delivery will be enrolled in STAR the first of the following month (prospective enrollment).
- Women who are certified at any time in their actual month of delivery (if known by HHSC before certification) will be enrolled in STAR the first of the following month (prospective enrollment).

It is important that providers call the number listed on the Medicaid Identification Form (Form H3087) for plan and provider information.

***Example 1**: Woman Certified in Her 6th Month*

Client certified for Texas Medicaid	August 1
Medicaid benefits begin	August 1
STAR Program benefits begin	August 1

***Example 2**: Woman Certified in Her 6th Month*

Client certified for Texas Medicaid	August 12
Medicaid benefits begin	August 1
STAR Program benefits begin	September 1

***Example 3**: Woman Certified in Her 9th Month*

Client certified for Texas Medicaid	August 5
Medicaid benefits begin	August 1
STAR Program benefits begin	September 1

A pregnant woman who is on type program 40 has 16 days from the date of application to choose a STAR health plan. If she does not choose a STAR health plan, one will be chosen for her.

CPT only copyright 2005 American Medical Association. All rights reserved.

Expedited Medicaid Managed Care Enrollment for Pregnant Women

The enrollment broker contacts the client to begin the enrollment process and assists the client in selecting an HMO. The client may also contact the enrollment broker directly at 1-800-964-2777 (STAR Help Line). To protect continuity of care and client choice, the enrollment broker will work with each pregnant woman to select a health plan that includes her current prenatal care provider or to choose an obstetrical care provider that meets her needs.

Until coverage begins in a Medicaid Managed Care Program, clients will be covered under traditional Medicaid fee-for-service. Clients may initially receive a Medicaid Identification Form (Form H3087) that shows them to be a client of a STAR health plan but does not list the plan name. To ensure proper billing, providers should call the enrollment broker at 1-800-964-2777 (STAR Help Line) to obtain the name of the client's health plan. The health plan name should appear on the Medicaid Identification Form (Form H3087) the following month. However, client eligibility should always be verified.

Within 14 days of enrolling in a new health plan, a plan representative will contact the new client to help arrange the first prenatal appointment. Physicians should also expect contact from the health plans to facilitate prenatal appointments for new clients. Physicians and other prenatal care providers are encouraged to make prenatal appointments within two weeks or as soon as possible.

Enrollment of Newborns

STAR health plans are responsible for all covered services provided to newborn clients. In the STAR Program, newborns are automatically assigned to the mother's STAR health plan. In the STAR+PLUS Program, newborns are enrolled in the STAR plan offered by the mother's STAR+PLUS plan, if available. If the STAR+PLUS plan does not also provide STAR services in the service area, the newborn is automatically enrolled in traditional Medicaid until the mother selects a STAR plan for the newborn.

To ensure reimbursement, it is essential that all health care providers verify eligibility before medical care is provided to STAR Program clients, except in cases of emergency. In situations where emergency care must be provided, the client's STAR health plan and primary care provider should be determined as soon as possible.

STAR Program clients' Medicaid Identification Forms (Form H3087) will indicate their participation in the STAR Program. Additionally, some STAR health plans offer their clients a STAR identification card. If applicable, both forms of identification should be requested when determining whether or not the client is a STAR Program client.

Refer to: "Client Medicaid Identification (Form H3087) (18 Pages)" on page B-16 for examples of the STAR, STAR+PLUS, NorthSTAR, and PCCM Programs' Medicaid Identification Form (Form H3087).

As with the traditional Medicaid program, there may be a delay of up to several months from the date of birth (DOB) for a newborn to receive a Medicaid client number. Providers should check with each STAR health plan for claim filing requirements.

If the newborn has not yet been assigned a primary care provider, the Medicaid Identification Form (Form H3087) will indicate that the client is "Newborn" and instruct the provider to "Call Plan" to inquire about filing a claim.

Refer to: "Newborn Claims Submission" on page 7-16 and "STAR+PLUS Program" on page 7-16.

Timely Notification and Assignment of Medicaid ID for Newborns

Hospitals that submit their birth certificate information utilizing the DSHS, Bureau of Vital Statistics (BVS) electronic Certificate Manager software and the HHSC Form 7484, receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care.

Call 1-512-458-7367 for further questions or comments about this new process.

CPT only copyright 2005 American Medical Association. All rights reserved.

Refer to: "PCCM Expansion" on page 7-21 for details relating to PCCM expansion areas.

7.2.5 STAR Program Benefits

STAR Program clients receive all the benefits of the traditional Texas Medicaid Program and the following additional benefits:

- Adult well-checks
- Removal of the inpatient spell of illness limitation
- Unlimited medically necessary prescription drugs for adults

7.2.5.1 Adult Well-Check

An annual adult physical exam performed by the client's primary care provider is an additional benefit of the STAR Program for clients 21 years of age and older. The annual physical exam is performed in addition to family planning services. This service is provided to healthy individuals for the purpose of promoting health and preventing injury or illness.

The annual examination should be age and health risk appropriate and should include all the clinically indicated elements of history, physical examination, laboratory/diagnostic examination, and patient counseling that are consistent with good medical practice. Providers are encouraged to adopt a nationally recognized, evidence-based standard for the elements of the annual exam, such as the guidelines published by the American Academy of Family Physicians at www.aafp.org.

This service is only reimbursable when performed by the current designated primary care provider on the date of service and is allowed once per state fiscal year (September 1 through August 31), per client.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following appropriate codes may be billed:

- 99385 and 99386 for a new patient
- 99395 and 99396 for an established patient

7.2.5.2 Spell of Illness

STAR clients are entitled to medically necessary care without a time frame limitation. Members younger than 21 years of age already have this benefit under the Comprehensive Care Program (CCP).

7.2.5.3 Prescriptions

STAR Program members who are age 21 years or older are permitted to receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR allows the provider greater flexibility in treating and managing a client's health care needs. Prescription reimbursement continues to be processed through the HHSC Vendor Drug Program. All Medicaid clients who are younger than 21 years of age receive unlimited medically necessary prescription drugs.

7.2.6 Claims Filing Information

All claims for Medicaid Managed Care clients enrolled in a STAR HMO must be submitted to the STAR health plan in which the client is enrolled at the time of service (or date of admission for inpatient hospital claims), except as noted below. The STAR HMO, as a secondary payor, does not determine payment based on the primary payor's authorization of services and/or approval of hospital stays.

TMHP processes claims for the following clients/programs:

- All SSI clients who are in the STAR Program
- The following non-capitated services to STAR clients enrolled in an HMO:
  - ECI targeted case management
  - DSHS case management (except for the Dallas SA where clients are enrolled in NorthSTAR)
  - DADS services (except for the Dallas SA where clients are enrolled in NorthSTAR)
  - CPW Case Management
  - SHARS
  - DARS
  - THSteps Dental (dentist services only)
  - Tuberculosis services provided by DSHS-approved providers
  - Vendor Drug Program (out-of-office drugs)
  - Audiology services and hearing aids for children under the age of 21 (hearing screening services are provided through the THSteps Program and are capitated) through PACT (Program for Amplification for Children of Texas).

A claim must be submitted to TMHP for processing for a patient who was classified as SSI on the date of admission to a hospital. However, if the patient was an HMO client as of the date of admission to the hospital and was admitted as TANF- (i.e., not SSI) certified, but changed to SSI during the same hospital stay, the claim must be submitted to the client's HMO for payment of the entire hospital stay. All PCCM claims are submitted to TMHP, whether TANF or SSI.

If the provider of services is not the client's assigned primary care provider, the primary care provider's name and provider identifier must be entered in the Referring Provider field (boxes 17 and 17a) on the CMS-1500, indicating a referral from the primary care provider. If this information is missing or if the treating provider is not the assigned primary care provider on the dates of service, the claim will be denied.

Providers submitting claims for SSI voluntary clients must follow the client's individual plan requirements for referrals, authorization, admission notification, and concurrent review. The plan is responsible for notifying TMHP of the services that they have approved so those claims can be processed accordingly. Claims for SSI clients who are voluntarily enrolled in PCCM or an HMO will be paid at traditional Medicaid rates.

All traditional Medicaid processing guidelines are followed in processing these claims including the 95-day filing deadline. Send claims through regular mail to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

Claims delivered by UPS or other courier methods are to be addressed to the following:

Texas Medicaid & Healthcare Partnership
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

TMHP Electronic Claims Submission

Electronic claims submission is available to providers filing claims for PCCM clients and all SSI voluntary clients in STAR HMOs. Providers must use their provider identifier when billing. For assistance with enrolling to file electronic claims, contact the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638, or a provider representative. Contact individual plans for information on electronic claims submissions to STAR HMOs (refer to chart, STAR Program SAs).

Refer to: "TMHP Electronic Data Interchange (EDI)" on page 3-1 for more information about electronic claims submission.

7.2.6.1 Pregnant Women (TP40)

Claims for pregnant women who are on type program 40 should be directed to the plan administrator listed on the Medicaid Identification Form (Form H3087). In some instances, a primary care provider will not be assigned for the first month of eligibility. These claims should be filed with the following temporary primary care provider number

CPT only copyright 2005 American Medical Association. All rights reserved.

as the referring provider: PCCTP4001. For clients who do not yet have a primary care provider assigned, call the client's plan administrator for more information. If a health plan name does not appear on a STAR client's Medicaid Identification Form (Form H3087), call the STAR Help Line at 1-800-964-2777. For PCCM clients, call the PCCM Client Helpline at 1-888-302-6688.

7.2.6.2 Newborn Claims Submission

Newborns are automatically enrolled in the mother's STAR health plan. Claims for services provided to newborns should be filed with the mother's STAR health plan. Providers filing claims for services provided to newborns are still responsible for meeting the Medicaid filing deadlines, which in most cases is within 95 days of each date of service.

HMO Newborn Claims Filing

Claims for newborns who are clients of an HMO should be filed directly with the client's HMO.

Health care providers should file newborn claims using the newborn's Medicaid identification number as soon as it is made available to them.

HMOs must pay providers for inpatient and professional services related to neonatal care for up to 48 hours after vaginal delivery and 96 hours after Caesarian delivery. (Prior authorizations and primary care provider assignment cannot be a reason for denial of claims.)

HMOs may require prior authorizations for hospital and professional services beyond the 48/96 hour time limits.

Authorization requests, utilization review questions, and claim status inquiries and appeals should be directed to the STAR health plan in which the client is enrolled.

Note: *Telephone numbers and addresses for claims submission and appeals for STAR HMOs can be found in the appropriate HMO policies and procedures manual for the appropriate SA.*

Refer to: "Claims Filing Information" on page 7-18 for information about claims filing for STAR+PLUS.

"Claims Filing Information" on page 7-19 for information about claims filing for NorthSTAR.

7.3 STAR+PLUS Program

7.3.1 Overview

In 1995, the Texas Legislature adopted Senate Bill 10 and related legislation that authorized HHSC to undertake a comprehensive restructuring of the Texas Medicaid Program to incorporate Medicaid Managed Care delivery systems statewide. STAR+PLUS is the result of Texas Senate Concurrent Resolution 55 of the 74th Legislature (1997), which directed HHSC to develop and implement a long term care integrated model demonstration program.

The STAR+PLUS Program consists of two types of health care delivery systems: an HMO delivery system and a PCCM model.

Clients eligible for Medicaid under the SSI Programs residing in Harris County began enrolling in STAR+PLUS. STAR+PLUS integrates acute care and long term care into a Medicaid Managed Care delivery system for eligible Medicaid clients under the SSI Program. HHSC is the operating agency for STAR+PLUS. It is designed to improve access to care, provide care in the least restrictive setting, and provide more accountability and control on costs.

7.3.1.1 HMO Model

In the HMO model, the STAR+PLUS health plan is responsible for contracting with providers and/or delegated network to create a health care provider delivery network. SSI clients who reside in one of the SA counties where this model is an option, and who have selected an HMO, are required to select a primary care provider from the HMO provider directory if they are not covered by Medicare. SSI clients who are also covered by Medicare (Dual Eligibles) must select a STAR+PLUS HMO to receive Medicaid community based long term care services.

Children born to STAR+PLUS clients will be enrolled with the STAR plan operated by the same HMO if available. If the STAR+PLUS plan does not also operate a STAR plan, the newborn is automatically enrolled into traditional Medicaid until the mother chooses a STAR health plan for the newborn.

7.3.1.2 Service Area

The STAR+PLUS Program is only available to eligible Medicaid clients under SSI programs who reside in Harris County.

The following STAR+PLUS health plans are available:

- AMERIGROUP Texas, Inc. (1-800-600-4441)
- Evercare of Texas, Inc. (1-888-887-9003)
- PCCM (1-888-834-7226)

CPT only copyright 2005 American Medical Association. All rights reserved.

7.3.1.3 Client Eligibility

HHSC has targeted these client groups within the Texas Medicaid population for STAR+PLUS Program enrollment:

- Enrollment for category 01, 03, 04 (SSI aged, blind and disabled clients) and the following program types are *mandatory* for STAR+PLUS:

Type Program	Description
03	Denied SSI clients who are Medicaid-eligible under Pickle provisions.
12	SSI client.
13	SSI client.
14	***Note:*** *Only those client that have been determined eligible for the 1915 (b) Nursing Facility Waiver (CBA) will be enrolled in STAR+PLUS. All other clients in TP 14 are excluded from participation.*
18	Disabled adult children denied SSI dues to increase in Social Security benefits.
22	Denied SSI clients who receive widow/widower Social Security benefits.
51	Medicaid and community-based nursing care services.

- Enrollment for category 03 and 04, SSI Blind and Disabled children, and type program 19, Medicaid and community-based waiver program for children younger than age 21 years, may enroll in a STAR+PLUS HMO.

Refer to: "Client Eligibility and Effective Date" on page 7-4 for more information on eligibility effective dates.

7.3.1.4 Dual Eligible Clients

Many STAR+PLUS clients are eligible for Medicaid and Medicare. STAR+PLUS HMOs are not at risk for the delivery of acute care services needed by these clients.

All STAR+PLUS clients with Medicare and Medicaid are Medicaid Qualified Medicare Beneficiaries (MQMBs). MQMBs receive Medicare benefits through a Medicare Risk Product (HMO) or Medicare fee-for-service insurance program. To reduce confusion, HHSC has mandated that STAR+PLUS MQMBs continue to receive all their acute care services as they do today, with Medicare being the primary payor and traditional Medicaid, through TMHP, the secondary payor. Providers are to continue billing for Medicare acute care services through the client's Medicare HMO or fee-for-service insurer following the rules of the Medicare insurer. If the client is in both a Medicare and Medicaid HMO, the client uses the Medicare primary care provider, and providers follow the Medicare HMO's medical management rules for authorization, concurrent review, etc. MQMBs choose a Medicaid HMO but do not choose a Medicaid primary care provider.

Refer to: Sections on MQMBs in this manual for further instructions.

"Claims Filing Information" on page 7-18 for MQMB reimbursement requirements.

Dual eligible adults continue to be limited to three prescriptions unless they have joined the Medicare HMO also offered by their STAR+PLUS plan. With the implementation of the Medicare prescription benefit in January 2006, dual eligibles no longer receive any prescription benefit through Medicaid.

Medicare Advantage Plans

The two STAR+PLUS plans operating in Harris County also offer a Medicare Advantage plan for Medicare recipients. Dual eligibles who are in STAR+PLUS may join the Medicare Advantage plan offered by their STAR+PLUS HMO or they may join any other Medicare Advantage plan or choose to not join a Medicare Advantage plan.

For those STAR+PLUS members that have joined the Medicare Advantage plan offered by their STAR+PLUS plan, the state pays a capitated payment to cover all Medicaid liabilities that may result from a Medicare covered service being delivered through the Medicare Advantage plan. Payment to Medicare providers for copays and deductibles must be paid by the STAR+PLUS/ Medicare Advantage plan HMO, and providers should not have to bill Medicaid. TMHP will *only* pay Medicaid-only services for these clients (refer to section 7.2.6, in addition to those services that are not a benefit of Medicare). TMHP will deny or recuperate claims submitted and/or paid for Medicare co-insurance, deductibles and co-pays for STAR+PLUS members who have also joined the Medicare Advantage plan offered by their STAR+PLUS HMO. For further information, refer to the appropriate plan's guidelines on benefits and claims submissions.

7.3.1.5 Ineligible Clients

Clients not eligible for STAR+PLUS who will remain in the traditional Medicaid program include clients who are:

- Participating in a Home and Community-Based Waiver other than the Nursing Facility Waiver:
  - Community Living Assistance and Support Services (CLASS) Waiver Program
  - Medically Dependent Children's (MDCP) Waiver Program
  - Home and Community Services (HCS) Waiver Program
  - Mental Retardation Local Authority (MRLA) Waiver Program
  - Deaf/Blind Multiple Disabled Waiver Program
- Residents in a nursing facility
- Residents in intermediate care facilities for the mentally retarded (ICF-MR)

CPT only copyright 2005 American Medical Association. All rights reserved.

- Residents of state hospitals or institutions for mental diseases
- Frail Elderly (or 1929B) Program recipients
- Recipients of In-Home and Family Support Program Services
- Qualified Medicare Beneficiaries (QMBs)
- Undocumented aliens
- Clients who receive limited Medicaid benefits and do not qualify for participation in the Vendor Drug Program

7.3.2 STAR+PLUS Program Benefits

STAR+PLUS Program clients receive all the benefits of the traditional Texas Medicaid Program and the following additional benefits:

- Adult well-checks
- Spell of Illness policy defined in "Spell of Illness" on page 7-15
- Prescriptions policy defined in "Prescriptions" on page 7-15 (for STAR+PLUS members that are not dual eligibles)

7.3.3 Claims Filing Information

The claims filing guidelines found in "Claims Filing Information" on page 7-15, also apply to STAR+PLUS.

In addition to the claim types found on page 7-18, TMHP processes claims for the following STAR+PLUS clients/ programs:

- All PCCM claims for the PCCM model
- All crossovers for deductibles and coinsurance on STAR+PLUS MQMBs
- All claims for Medicaid-only services (refractions, hearing exams, etc.) provided to STAR+PLUS MQMBs

STAR+PLUS MQMBs receive services and have their acute care claims processed as though they are not in a Medicaid Managed Care program. TMHP is responsible for reimbursing all Medicare coinsurance and deductibles that meet Medicaid payment criteria, as well as for all services that are a benefit of the Medicaid program (refractions, hearing exams, etc.) that are not covered under the Medicare program.

STAR+PLUS clients can be enrolled in PCCM as noted above. These clients are mostly children and adolescents with Severe and Persistent Mental Illness (SPMI) and/or Serious Emotional Disturbance (SED). PCCM clients receive all acute care through PCCM and choose a PCCM primary care provider.

7.4 NorthSTAR Program

7.4.1 Overview

NorthSTAR, in the Dallas SA, provides behavioral health services (mental health, chemical dependency, and substance abuse treatment) for Medicaid enrollees through a behavioral health organization (BHO). NorthSTAR is known as a *behavioral health carve-out* of the STAR Program in the Dallas SA. Medicaid provides access to physical health care while NorthSTAR provides mental health and chemical dependency (behavioral health) services.

NorthSTAR provides easier access to a comprehensive array of behavioral health services and providers. The program's goal is to provide clinically necessary covered behavioral health services to enrollees, through a network of qualified and credentialed providers.

In the NorthSTAR Program, ValueOptions is the sole BHO and is responsible for contracting with providers and maintaining a behavioral health care provider delivery network. The BHO also:

- Offers education and support to the provider network
- Performs utilization management through authorization of services, concurrent review, and special studies
- Performs quality assurance monitoring and activities
- Provides client services including education and outreach
- Processes claims

7.4.2 Provider Requirements and Information

In the STAR Program, clients select a primary care provider from among the providers who have contracted with a STAR HMO or PCCM. In the NorthSTAR Program, a client may have several different providers for different specialty behavioral health services. The BHO will arrange behavioral health services and make referrals to specific providers within the BHO network.

Providers are encouraged to coordinate care with physical health providers in the Medicaid Managed Care and traditional Medicaid programs. Behavioral health providers may do this by notifying the Medicaid Managed Care or traditional Medicaid provider. Behavioral health providers may also notify the BHO that the client is receiving services.

Providers interested in becoming a ValueOptions network provider can obtain additional information by contacting ValueOptions at 1-888-800-6799.

Note: *If a behavioral health provider practices in the Dallas SA, he must be enrolled as a network provider in the NorthSTAR BHO (ValueOptions) to provide services to NorthSTAR enrollees. Providers who serve NorthSTAR*

CPT only copyright 2005 American Medical Association. All rights reserved.

enrollees without being in the provider network or without prior authorization in nonemergency situations risk non-payment of claims.

7.4.3 Service Area

The NorthSTAR Program is available in the Dallas SA. The following counties are included: Collin, Dallas, Ellis, Hunt, Kaufman, Navarro, and Rockwall.

The ValueOptions Provider Services contact telephone number is 1-888-800-6799.

7.4.3.1 Client Eligibility

Most Medicaid clients residing in the Dallas SA must enroll in NorthSTAR. All STAR Program enrollees are subject to mandatory enrollment in NorthSTAR. Once enrolled in NorthSTAR, ValueOptions will coordinate enrollee behavioral health services.

Refer to: "Medicaid Identification Form H3087" on page 4-18 for a sample of the Medicaid Identification Form (Form H3087).

Note: *NorthSTAR Program enrollment information is not reflected on the Medicaid Identification Form (Form H3087), but enrollment can be confirmed by the BHO or the enrollment broker.*

Medicaid clients residing in the Dallas SA that are not eligible to enroll in a NorthSTAR BHO are:

- Medicaid clients living in a nursing facility
- Medicaid clients living in an ICF-MR
- Medicaid clients living in state hospitals' Institutions for Mental Disease Over Age 65 Program
- Children who are in the custody of the Department of Family and Protective Services (DFPS) (in foster care)
- Certain Medicaid clients that are ineligible for NorthSTAR such as type program 55

Refer to: "Client Enrollment" on page 7-12 for further information on STAR Program eligible client program types and for further information on STAR Program eligibility effective dates.

7.4.4 Client Enrollment

When a Medicaid enrollee requests services, the provider should contact ValueOptions or the enrollment broker to verify enrollment in NorthSTAR. If the client is not currently enrolled in NorthSTAR, the provider may give the client the telephone number of the enrollment broker so the client may become enrolled in NorthSTAR.

The enrollment broker staff is trained to assist potential clients in their understanding of both the STAR and NorthSTAR programs.

Medicaid clients can enroll in the following ways:

- Telephone enrollment with ValueOptions or the enrollment broker
- Mail-in enrollment using the NorthSTAR enrollment form
- Onsite enrollment at a designated NorthSTAR enrollment site (contact the enrollment broker for a list of enrollment sites)

7.4.4.1 NorthSTAR Enrollment Broker

Hours	8 a.m. to 8 p.m., Central Time, Monday through Friday
Telephone	1-800-964-2777
Telephone TDD	1-800-267-5008

7.4.4.2 Guidelines for Working with NorthSTAR Clients

Clients enrolled in NorthSTAR, like any other clients, have these rights:

- To be treated with respect, dignity, privacy and confidentiality, and without discrimination
- To consent to or refuse treatment and actively participate in treatment decisions
- To use each available complaint process and to receive a timely response to complaints
- To receive timely access to care that does not have any communication or physical access barriers

7.4.5 Claims Filing Information

All behavioral health claims for NorthSTAR enrollees in the Dallas SA must be filed to the NorthSTAR BHO, ValueOptions. Behavioral health specialists and hospitals are not to bill TMHP for behavioral health services provided to clients who are enrolled in or eligible for enrollment in the NorthSTAR Program.

Exception: *Claims with a primary diagnosis of developmental disability (mental retardation, autism, pervasive developmental disorder) are submitted to TMHP.*

If a behavioral health claim is submitted to TMHP for any diagnosis other than a developmental disabilty, it is denied. If it is paid erroneously, TMHP recoups it later.

7.4.5.1 Hospital Billing

In the Dallas SA, SSI clients are subject to mandatory enrollment in Medicaid Managed Care through the NorthSTAR Program. In some instances, general acute care hospitals treat a NorthSTAR client with a primary behavioral health diagnosis. In that instance, the general acute care hospital needs to seek authorization and reimbursement from ValueOptions using the CMS-1500 form for outpatient services and HCFA-1450 (UB-92) for inpatient services.

7.4.5.2 Behavioral Health Billing

Services provided under the STAR Program are billed to the STAR HMO in which the patient is enrolled. PCCM providers submit claims to TMHP. The STAR Program in

CPT only copyright 2005 American Medical Association. All rights reserved.

the Dallas SA covers medically necessary physical health care services and behavioral health services that are delivered by medical providers, such as primary care physicians, FQHCs, and RHCs. STAR also covers ambulatory laboratory and ancillary services required to diagnose or treat behavioral health conditions and psychological testing for certain non-behavioral health diagnoses.

The program-related forms are the CMS-1500 and HCFA-1450 (UB-92).

PCCM providers refer to "Behavioral Health Services" on page 7-30.

7.4.5.3 Prior Authorization Requirements

To receive payment for services to ValueOptions clients, providers must be enrolled with ValueOptions. (Exceptions include emergency care and medically necessary treatment episodes that began before the client joined a NorthSTAR plan.) ValueOptions requires that the provider obtain prior authorization for most nonemergency services. If the provider does not obtain prior authorization, they may not get payment for services. These rules apply whether the provider's practice or facility is located in or out of the Dallas SA.

7.4.6 Complaints and Appeals

A *complaint* is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of the health plan. The term *complaint* does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider's satisfaction.

Appeals/grievances, hearings, or dispute resolution is the responsibility of ValueOptions. Providers must exhaust the appeals/grievance process with ValueOptions before filing a complaint with NorthSTAR Provider Relations. Under the complaint process, NorthSTAR Provider Relations works with ValueOptions and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program/contract issues, as applicable. When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by the NorthSTAR health plan is incorrect and copies of the following documentation:

- All R&S reports of the claims/services in question, if applicable
- Provider's claims/billing records (electronic or manual) related to the complaint
- Provider's internal notes and logs when pertinent
- Memos from the state or the health plan indicating any problems, policy changes, or claims processing
- Discrepancies that may be relevant to the complaint
- Other documents such as receipts (i.e., certified mail)
- Original date-stamped envelopes, in-service notes
- Minutes from meetings, etc., if relevant to the complaint

All NorthSTAR providers must exhaust the ValueOptions complaint and appeals process first. After this process is exhausted and if the outcome is unsatisfactory, NorthSTAR providers may file complaints/appeals with NorthSTAR Provider Relations at the following address:

NorthSTAR Provider Relations
DSHS
909 W. 45th Street
PO Box 12668
Austin, TX 78711-2668

Quality Improvement Monitoring

Direct quality of care concerns to ValueOptions or NorthSTAR Provider Relations at the following address:

NorthSTAR Provider Relations
DSHS
909 W. 45th Street
PO Box 12668
Austin, TX 78711-2668

7.5 PCCM Expansion

7.5.1 Overview

Primary Care Case Management (PCCM), administered by TMHP, is a service delivery model under the Texas Medicaid Managed Care Program. It is not an HMO. PCCM is a network of primary care providers and hospitals under contract with HHSC. PCCM primary care providers and hospitals contract directly with HHSC. PCCM clients select or are assigned a primary care provider from among those who have contracted with HHSC. PCCM was originally implemented as one of the health care delivery options available under the STAR Program, but is no longer part of the STAR Program.

Effective September 1, 2005, PCCM was implemented in the following counties:.

PCCM Counties					
Anderson	Andrews	Angelina	Archer	Armstrong	Austin
Bailey	Bandera	Baylor	Bell	Blanco	Borden
Bosque	Bowie	Brazos	Brewster	Briscoe	Brooks
Brown	Burleson	Callahan	Cameron	Camp	Carson

Community Health Services Helpline

Case Management and Health and Program Benefit Education
Monday through Friday, 8 a.m. to 5 p.m., Central Time
1-888-276-0702

The Nurse Helpline

24 hours a day, 7 days a week
1-800-304-5468

7.5.3 Client Eligibility

HHSC has targeted the following client groups for PCCM expansion enrollment:

Type	Program	Enrollment Code
1	Regular TANF	M
3	MAO RSDI Increases - No Medicare	M*
7	12 months Medicaid denied due to earnings	M
12	SSI Manually Certified - No Medicare	M*
13	SSI Recipient - No Medicare	M*
18	Disabled Adult Children denied SSI due to increase in SS benefits - No Medicare	M*
19	Transitional SSI - No Medicare	V
20	04 months Medicaid - TANF	M
29	12 months transitional Medicaid - limited TANF	M
22	Early Age Widows/Widowers - No Medicare	M*
37	12 months transitional Medicaid denied due to earned income; disregards ending	M
40	Pregnant women	M
43	Children under 1 year of age with income below 185% FPIL	M
44	Children 6-19 yrs. with income below 100% FPIL	M
45	Children up to 1 year of age born to Medicaid eligible mother	M
47	Medicaid for deprived children with step-grandparent income	M
48	Children 1-5 years of age with income below 133% FPIL	M
61	TANF State Program	M
M = Mandatory V = Voluntary M* = Mandatory adults ages 21 yrs. and older		

To verify a client's eligibility and primary care provider, access one of the following eligibility resources:

- Medicaid Identification Form (Form H3087)
- Monthly panel report
- TMHP website at www.tmhp.com
- TDHconnect or other vendor software
- AIS at 1-800-925-9126, option 1
- Contact Center at 1-800-925-9126, option 5

In some situations, an eligibility response may indicate that the provider should contact PCCM to verify the primary care provider information. For more information, please call the TMHP Contact Center at 1-800-925-9126, or the PCCM Provider Helpline at 1-888-834-7226.

7.5.4 Client Enrollment

Enrollment into PCCM is mandatory for Medicaid clients residing in one of the expansion counties and who meet the following criteria:

- Low-income families (primarily women and children)
- Blind and disabled individuals who receive Supplemental Security Income (SSI) and are age 21 years and older.

Children under the age of 21 who receive SSI may enroll on a voluntary basis. Elderly and disabled Medicaid clients who live in a nursing home or who are enrolled in community based long-term care will remain in traditional Medicaid.

- *Telephone Enrollment*. A client can enroll in the PCCM Program by calling 1-800-964-2777. A customer care representative will provide essential education about the program and details needed for enrollment.

CPT only copyright 2005 American Medical Association. All rights reserved.

- *Mail-in Enrollment*. If calling is not convenient, a client may enroll by completing the PCCM Program enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with a brochure explaining the program and provider directories for each plan.
- *Onsite Enrollment*. In addition to telephone and mail-in enrollment, clients can enroll by talking with a PCCM Program customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.
- *Default Enrollment*. The final method of enrollment is through an assignment process. If a client does not exercise the right to choose a PCCM health plan and primary care provider, the client will be assigned to a plan and primary care provider. The following factors are considered when processing a default enrollment:
    - Client's past claims history, taking into account an established relationship with a PCCM or participating primary care provider
    - Client's age
    - Client's sex
    - Client's geographic proximity to the primary care provider

Clients on Medicare and individuals enrolled in the Medically Needy Program are not eligible for PCCM enrollment.

7.5.5 Client Rights and Responsibilities

7.5.5.1 Client Rights

PCCM clients have defined rights and responsibilities. PCCM and primary care providers share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

PCCM clients have the right to:

- Be treated fairly and with dignity and respect
- Know that their medical records and discussions with their providers will be kept private and confidential
- A reasonable opportunity to choose a primary care provider (the doctor or health care provider they will see most of the time and who will coordinate their care) and to change to another provider in a reasonably easy manner. These opportunities include the right to:
    - Be informed of available primary care providers in their areas
    - Be informed of how to choose and change primary care providers
    - Change their primary care provider
- Ask questions and get answers about anything they don't understand, and that includes the right to:
    - Have their provider explain their health care needs to them and talk to them about the different ways their health care problems can be treated
    - Be told why care or services were denied and not given
- Consent to or refuse treatment and actively participate in treatment decisions, and that includes the right to:
    - Work as part of a team with their provider in deciding what health care is best for them
    - Say yes or no to the care recommended by their provider
- Utilize each available complaint and appeal process through PCCM and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
    - Make a complaint to PCCM or to the state Medicaid program about their health care, provider, or PCCM
    - Get a timely answer to their complaint
    - Access the PCCM appeal process and the procedures for doing so
    - Request a fair hearing from the state Medicaid program and request information about the process for doing so
- Timely access to care that does not have any communication or physical access barriers. That includes the right to:
    - Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care
    - Get medical care in a timely manner
    - Be able to get in and out of a health care provider's office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the *Americans with Disabilities Act*
    - Have interpreters, if needed, during appointments with their providers and when talking to PCCM. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information
    - Be given an explanation they can understand about PCCM rules, including the health care services they can get and how to get them
- Not be restrained or secluded when doing so is for someone else's convenience, or is meant to force them to do something they do not want to do, or to punish them.

7.5.5.2 Client Responsibilities

PCCM and primary care providers should help clients understand their responsibilities. These include the responsibility to:

CPT only copyright 2005 American Medical Association. All rights reserved.

- Learn and understand each right they have under the Medicaid program. That includes the responsibility to:
    - Learn and understand their rights under the Medicaid program
    - Ask questions if they do not understand their rights
- Abide by PCCM and Medicaid Managed Care policies and procedures. That includes the responsibility to:
    - Learn and follow PCCM rules and Medicaid rules
    - Choose a primary care provider
    - Make any changes in their primary care provider in the ways established by Medicaid Managed Care
    - Keep their scheduled appointments
    - Cancel appointments in advance when they cannot keep them
    - Always contact their primary care provider first for nonemergency medical needs
    - Be sure they have approval from their primary care provider before going to a specialist (except for self-referred services)
    - Understand when they should and should not go to the emergency room
- Share information relating to their health status with their primary care provider and become fully informed about service and treatment options. That includes the responsibility to:
    - Tell their primary care provider about their health
    - Talk to their providers about their health care needs and ask questions about the different ways their health care problems can be treated
    - Help their providers get their medical records
- Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
    - Work as a team with their provider in deciding what health care is best for them
    - Understand how the things they do can affect their health
    - Do the best they can to stay healthy
    - Treat providers and staff with respect

7.5.6 Primary Care Provider Changes

7.5.6.1 Client Initiated Primary Care Provider Changes

The enrollment broker assigns a primary care provider to clients for the first month. This primary care provider assignment will be based on several factors, including existing provider or physician relationships and geographical location. The client's Medicaid Identification Form (Form H3087) will list the primary care provider name.

PCCM clients may change their primary care provider by calling the PCCM Client Helpline at 1-888-302-6688.

Client requests for primary care provider changes received before the middle of the month usually become effective on the first day of the following month. Client requests for primary care provider changes received after the middle of the month usually become effective on the first day of the second month following the request. A primary care provider change could take up to 45 days to take effect.

7.5.6.2 Provider Initiated Primary Care Provider Changes

Occasionally, the relationship between a client and their primary care provider may become unsatisfactory to one or both parties. A provider may request a client be reassigned to another primary care provider for any of the following reasons:

- The client is not included in the primary care provider's scope of practice.
- The client is non-compliant with medical advice.
- The client consistently displays unacceptable office decorum.
- The client/primary care provider relationship is not mutually agreeable.

If the relationship with the client is unsatisfactory due to behavioral issues on the client's part, the primary care provider should contact PCCM Community Health Services at 1-888-276-0702 to request assistance in resolving the problem. A community health coordinator can intervene and help providers with non-adherent and disruptive patients in most instances. The referral can also be made by submitting the PCCM Community Health Services Referral Request Form via fax to PCCM Community Health Services at 1-512-302-0318. A copy of the PCCM Community Health Services Referral Request Form can be found on page B-66.

If the relationship with the client cannot be improved, the provider must notify TMHP in writing to request reassignment of a client to another primary care provider before the request can be processed. The primary care provider must also notify the client in writing stating the reason for the reassignment. A copy of the letter to the client may serve as notification to TMHP.

TMHP will notify the client of the reassignment in writing and request that the client choose another primary care provider. Primary care provider requests to reassign a client usually take 60 days before the change is made. During this time, the primary care provider is responsible for providing primary care to the client or referring the client to another provider for medically necessary care.

CPT only copyright 2005 American Medical Association. All rights reserved.

7.5.7 Provider Enrollment

Primary care providers can choose to contract with PCCM and HMO health plans simultaneously. A PCCM primary care provider's contractual obligations are identified in the contract between HHSC and each primary care provider. *These obligations are in addition to those required for Medicaid program participation* and are intended to ensure clients have access to quality health care from trained and credentialed providers.

Refer to: "Primary Care Provider Requirements and Information" on page 7-8.

7.5.7.1 Additional Criteria for Primary Care Providers

All primary care providers must meet credentialing/recredentialing criteria. Primary care providers are also required to meet the following criteria:

- *Ability to Perform or Directly Supervise the Ambulatory Primary Care Services of Clients*. Provider performance is monitored on an ongoing basis. The PCCM Administrator follows up on evidence of poor performance and addresses identified problems immediately to ensure that high-quality care is delivered to clients.
- *Admitting Privileges*. The primary care provider must maintain admitting privileges with a hospital which is a participating provider in PCCM, or make arrangements with another Texas licensed physician who is an eligible Medicaid provider and who maintains admitting privileges with a contracted PCCM hospital.
- *Education Sessions*. PCCM disseminates utilization management (UM) and case management policies and procedures to each PCCM primary care provider. PCCM also provides a series of educational sessions regarding all aspects of UM and case management. Primary care providers are encouraged to attend at least one educational session on UM and case management policies and procedures each year.

When a primary care provider's PCCM credentialing file is complete, the TMHP Medical Director and Credentialing Committee verify all credentials and present their findings to the HHSC Medical Director for Medicaid and CHIP Programs (HHSC Medical Director), at the Credentialing Committee meeting. The HHSC Medical Director reviews the credentials and determines whether the applicant meets HHSC credentialing criteria. The decision to accept a provider as a PCCM primary care provider is made by HHSC in accordance with basic credentialing standards.

7.5.7.2 Credentialing Committee

The Credentialing Committee is charged with the responsibility of reviewing each provider applicant's file to ensure that enrolling physicians and other health care professionals are qualified to perform services as PCCM providers.

The committee reviews each provider applicant's file and decides whether the provider should be recommended to the HHSC Medical Director as a primary care provider in the PCCM provider network. If HHSC approves the recommendation, the provider is accepted as a participating provider for three years.

The Credentialing Committee is also charged with the responsibility of recredentialing PCCM providers, which occurs every three years after initial credentialing.

The Credentialing Committee also reviews and approves credentialing policies and procedures for PCCM.

7.5.7.3 Members of the Credentialing Committee

The Credentialing Committee is comprised of the following members:

- Chair: Medical Director, HHSC Medicaid and Children's Health Insurance Program (CHIP) Programs
- Co-Chair: Associate Medical Director, HHSC Medicaid and CHIP Programs
- Co-Chair: Medical Director, TMHP
- Associate Medical Director, TMHP
- Contracting and Credentialing Manager, TMHP
- Quality Services Officer, TMHP

If a committee member is unable to attend a meeting, the member may appoint a designee.

7.5.7.4 Credentialing Committee Frequency/ Logistics

The Credentialing Committee meets monthly, or as required, to review new applications for credentialing/ recredentialing. The PCCM Contracting and Credentialing staff will have previously completed the initial screening for each provider in accordance with the standards of the National Committee for Quality Assurance (NCQA).

7.5.7.5 Credentialing Committee Action

The TMHP Medical Director, as the Co-Chair, is charged with implementing the credentialing and recredentialing standards for participating providers in PCCM. The HHSC Medical Director also reviews submitted documentation and recommends acceptance or rejection of each provider.

Based on this action, the HHSC executes the contract of approved providers. PCCM then notifies each approved applicant in writing of the application's status. For approved providers, the notification includes:

- A fully executed provider contract
- The date upon which the contract is effective
- Conditions of participation in PCCM
- Recredentialing requirements

Applicants who are not approved are notified by certified mail of the denial, the reason for the denial, and the process for reconsideration. Applicants may request reconsideration by submitting evidence that the deficiency(ies) for which the original application was denied has/have been corrected.

CPT only copyright 2005 American Medical Association. All rights reserved.

A provider has 30 days to request a reconsideration of a recredentialing denial to the Credentialing Grievance Committee. Such requests must be in writing and submitted to the following address:

Primary Care Case Management (PCCM)
Credentialing Grievance Committee
Credentialing Mail Code MC-B05
PO Box 204270
Austin, TX 78720-4270

7.5.7.6 Credentialing Grievance Committee

The Credentialing Grievance Committee reviews providers' requests for reconsideration of credentialing decisions.

Members of the Credentialing Grievance Committee

The Credentialing Grievance Committee is composed of the following members:

- Medical Director, HHSC Medicaid and CHIP Programs, or designee
- Medical Director, TMHP
- Contracting and Credentialing Manager, TMHP
- Provider Services Director, TMHP
- Staff person from HHSC Medicaid/CHIP Primary Care Case Management Program

Credentialing Grievance Committee Frequency/ Logistics

The Credentialing Grievance Committee convenes within 60 days after receipt of a grievance or request for reconsideration. The provider is notified of the date, time, and location of the grievance hearing before the Credentialing Grievance Committee. The provider may attend the grievance hearing.

Notification of the Credentialing Grievance Committee's Decision

The provider is notified in writing of the decision of the Credentialing Grievance Committee within 45 days after adjournment of the hearing. The Credentialing Grievance Committee forwards its recommendations to HHSC following the hearing.

A decision of the Credentialing Grievance Committee may be submitted for reconsideration to:

Texas Health and Human Services Commission
Office of General Counsel
4900 N. Lamar, 4th Floor
Austin, TX 78751

7.5.7.7 Primary Care Provider Termination/ Disenrollment

Primary care providers may terminate the PCCM agreement by providing 90 days prior written notice. Ninety days prior notice is requested to allow sufficient time to complete the reassignment process of clients in a primary care provider's panel to new primary care providers.

Individual provider agreements will terminate automatically upon a provider's death, the sale of the provider's practice, or termination as a participant in the Texas Medicaid Program.

Clinics shall notify PCCM within 30 days when a provider employee leaves the employ of or terminates his contract with the clinic, or is no longer willing to function as a primary care provider.

HHSC may terminate an agreement by providing 30 days prior written notice.

Termination or disenrollment notification should be sent to the following address:

Primary Care Case Management (PCCM)
Contracting and Credentialing Department MC-B05
PO Box 204270
Austin, TX 78720-4270

All correspondence must include the primary care provider's contracted provider identifier on signed letterhead. Providers may also contact the Provider Enrollment/Contracting and Credentialing Department at 1-800-925-9126, option 2, to request a Provider Information Change (PIC) form.

Refer to: "Provider Information Change Form" on page B-73.

7.5.7.8 Miscellaneous Provisions

Several other provisions apply to primary care provider participation in PCCM:

- A primary care provider agreement may be modified only by written agreement signed by all parties.
- A primary care provider agreement is not assignable by a primary care provider, either in whole or in part, without the prior written consent of the HHSC.
- primary care provider agreements shall be governed and construed in accordance with the laws of the State of Texas.
- A primary care provider shall be required to bring all legal proceedings against HHSC in the Texas state courts.
- An agreement shall become effective only upon the primary care provider's completion of the provider credentialing process and a determination by the HHSC or its designee that the primary care provider meets all of the requirements for participation in PCCM.

7.5.8 Support Services

7.5.8.1 Provider Support Services

PCCM core support services to primary care providers include:

- *Provider Helpline.* The PCCM Provider Helpline at 1-888-834-7226 is available to assist PCCM providers with a broad range of Medicaid and PCCM issues. Toll-

CPT only copyright 2005 American Medical Association. All rights reserved.

free customer service lines are available Monday through Friday, from 7 a.m. to 7 p.m., Central Time, and are answered directly by call center representatives.

- *Provider Relations Representatives.* Provider relations representatives conduct informational and educational workshops, group meetings, and training sessions for office practices and groups when requested, and can assist in enrolling new primary care providers in PCCM. To contact the provider relations representative serving your area, call the TMHP Contact Center at 1-800-925-9126 or visit the TMHP website at www.tmhp.com.
- *Medical Director Services.* The TMHP Medical Director maintains overall responsibility for utilization management procedures, quality improvement activities and reporting, health education for both clients and providers, authorization requirements, and claim appeals related to the appropriateness of specific medical procedures or services. To contact the Medical Director, call 1-512-506-7000, and press "0" for the operator.
- *Primary Care Provider and Hospital List.* PCCM prepares and distributes to clients a listing of all providers. This listing identifies those providers who are accepting new patients, those whose panels are closed, and those who provide THSteps services. This listing is updated on a quarterly basis. To request a copy of the listing, contact the PCCM Provider Helpline at 1-888-834-7226 or visit the TMHP website at www.tmhp.com.
- *Monthly Panel Report.* PCCM provides to primary care providers a list of clients who have selected or who have been assigned to the primary care provider for management and coordination of their health care. This list is available online at www.tmhp.com, or in hard copy by calling the PCCM Provider Helpline at 1-888-834-7226. Clients on this list are eligible for PCCM services throughout the entire month.

7.5.8.2 Client Support and Education

PCCM provides educational services to its clients. The most significant of these are three helplines:

- *Client Helpline.* The non-clinical Client Helpline at 1-888-302-6688 is the primary resource for clients seeking information or answers to questions. Clients may call the helpline to discuss concerns and file complaints regarding the operation and management of PCCM. The helpline operates from 7 a.m. to 7 p.m., Central Time, Monday through Friday. After hours, a recorded message instructs clients who need assistance with clinical, urgent, or emergent situations to contact the PCCM nurse helpline at 1-800-304-5468.
- *Community Health Services*. PCCM clients are eligible to receive services provided by Community Health Services (CHS). CHS staff includes registered nurses, social workers, nutritionists, and health educators from all over Texas who can educate PCCM clients about the role of a primary care provider, the referral process, or the Medicaid change from fee-for-service to managed care. CHS staff can also provide information about disease prevention, care coordination, and location of resources. CHS staff is available to meet with clients in a provider's office. Providers can refer clients for CHS services by calling the CHS toll-free number at 1-888-276-0702, Monday through Friday, 8 a.m. to 5 p.m., Central Time, or by faxing a PCCM Community Health Services Referral Request Form to 1-512-302-0318. Providers can refer up to four clients on a request form.
- *The Nurse Helpline.* PCCM provides a toll-free clinical nurse helpline at 1-800-304-5468 for its clients. The nurse helpline is staffed (nationally) by registered nurses who use physician-developed, symptom-based algorithms and 1,200 sets of self-care instructions to provide information, triage, and clinical assessment services for health plan clients 24 hours a day, 7 days a week. The nurse helpline nurses do not diagnose; they assess the client's symptoms and guide the client to the most appropriate care setting. The nurse helpline number is widely publicized to PCCM clients. The nurse helpline can:
    - Provide triage, assistance, and reassurance to clients
    - Direct clients to the most appropriate care setting

If a nurse determines that a client needs emergency care, the nurse will direct the client to the nearest emergency facility or contact 9-1-1 on the client's behalf.

In addition, PCCM publishes a semi-annual newsletter in both English and Spanish for client heads of household. The focus of the newsletter is health-related (such as the importance of well-child care, and the significance of early entry into prenatal care), but it also provides useful information about services to improve clients' access to health care, such as nonemergent medical transportation, community child care resources, and clinical services offered during nontraditional hours of operation.

Linguistic Services

It is the provider's responsibility to ensure that interpretive services are available to his practice. Interpretive services include language interpreters, American Sign Language (ASL) interpreters, and RELAY TEXAS (TDD) access. When interpretive services are necessary to ensure effective communications regarding treatment, medical history, or health education, PCCM providers may contact the PCCM nurse helpline at 1-800-304-5468. For assistance to clients who are hearing impaired, call RELAY TEXAS (TDD) at 1-800-735-2988. If the provider's staff is in need of translation services to meet requirements on Limited English Proficiency (LEP), call 1-800-752-0093.

Refer to: "Provider Responsibilities" on page 7-30.

"Cultural Competency and Sensitivity" on page 7-10.

7.5.8.3 Monthly Client Panel Report

Primary care providers can obtain their monthly panel report containing a list of clients assigned to them by accessing the TMHP website at www.tmhp.com. Providers

CPT only copyright 2005 American Medical Association. All rights reserved.

who prefer to receive a monthly panel report by mail may call the PCCM Provider Helpline at 1-888-834-7226 to request a monthly paper report. This report verifies client assignments for the current month and identifies those who have been defaulted to a provider's practice and those that may be eligible for THSteps services.

Clients appearing on the monthly panel report are eligible for services for the entire calendar month.

Based on the number of clients appearing on the monthly panel report, the primary care provider receives a monthly case management fee. This check is issued by TMHP.

Refer to: "Claims Filing Information" on page 7-40.

Panel Closings

PCCM primary care providers may choose to close their panel to new assignments. To close a panel, primary care providers should contact the PCCM Provider Enrollment, Contracting/Credentialing Department in writing (by mail or fax) to request a suspension of new enrollments or assignments to his practice. All correspondence must include the provider's contracted provider identifier on signed letterhead. Should the provider choose to re-open his panel, contact the PCCM Contracting/Credentialing Department in writing (by mail or fax) to request the panel be re-opened to new assignments. Providers should notify PCCM at least 30 days before re-opening their panel. Providers may contact the Provider Enrollment, Contracting/Credentialing Department for a Provider Information Change Form to close and re-open a panel.

Refer to: "Provider Information Change Form" on page B-73.

7.5.9 Covered Services

PCCM clients are entitled to all medically necessary services currently covered under the Texas Medicaid Program. Except as specified below, primary care providers shall provide (directly or through referrals) all Medicaid-covered services.

Refer to: "Referrals" on page 7-33.

Spell of Illness

Reimbursement to hospitals for adult inpatient services is limited to the patient "spell of illness." The spell of illness is defined as "30 days of inpatient hospital care, which may accrue intermittently or consecutively." After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the patient has been out of an acute care facility for 60 consecutive days.

Prescriptions

As in fee-for-service Medicaid, adult PCCM clients 21 years of age and older are limited to three medicine prescriptions each month. When more than three prescriptions per month are needed, providers may prescribe maintenance medication(s) to cover more than a one month supply.

Annual Adult Physical Exams

Annual well visit exams are excluded for PCCM adult clients age 21 years of age and older except for well-woman annual exams provided as part of family planning or OB/GYN medical visits.

7.5.9.1 Self-Referred Services

PCCM clients may select any Medicaid-enrolled provider to access the following services *without a referral*:

- *Emergency Services.* In case of a medical emergency, clients may seek emergency medical services from the nearest facility. To ensure continuity of care, the emergency facility is asked to contact the client's primary care provider within 24 hours or the next business day after providing services. Primary care providers or a primary care provider's designee must be available to respond to an emergency room (ER) call promptly. If the emergency visit results in an admission, the facility also must notify PCCM prior to claims submission.

Refer to: "PCCM Inpatient Authorization Process" on page 7-34.

- *OB/GYN Services.* PCCM clients may select a PCCM-contracted OB/GYN as their primary care provider. As a primary care provider, the OB/GYN is responsible for providing or arranging for all medically necessary services. PCCM clients may also seek direct services of any Medicaid-enrolled OB/GYN who is not their primary care provider for the following services:
  - One well-woman examination per year
  - Care related to pregnancy
  - Care for all active gynecological conditions
  - Diagnosis, treatment, and referral to a Medicaid-enrolled specialist for any disease or condition within the scope of the designated professional practice of a licensed obstetrician or gynecologist, including treatment of medical conditions concerning the breasts
- *Family Planning Services.* Family planning services include preventive health, medical counseling, and educational services that assist individuals in planning and/or preventing pregnancy and achieving optimal reproductive and general health. Primary care providers are encouraged to provide these services if requested by a client. Clients are not required to obtain family planning services through their primary care provider. Family planning is a service that does not require a primary care provider referral. Clients may go to a DSHS Family Planning state-contracted Medicaid facility for family planning services. Inpatient services must be delivered in a PCCM-contracted hospital/facility.

CPT only copyright 2005 American Medical Association. All rights reserved.

- *THSteps.* PCCM clients are free to select any THSteps-enrolled Texas Medicaid provider to perform THSteps services. If a THSteps screening is performed by a provider who is not the client's primary care provider, this information should be forwarded to the client's primary care provider so that the client's medical record can be updated.

Refer to: "Texas Health Steps (THSteps)" on page 43-1.

- *Vision Services.* Clients do not need a referral to access necessary covered vision services for refractive errors. However, any diagnosed condition or abnormality of the eye that requires treatment or additional services beyond the scope of an exam for refractive errors must be referred back to the client's primary care provider. Vision care providers who furnish additional services must have a referral from the client's primary care provider. Covered vision services are:
    - One eye exam each state fiscal year (September 1 through August 31) for clients under age 21 unless there is a diopter change of 0.5 or more
    - Replacement of lost or damaged eyeglasses for clients under age 21
    - One eye exam every 24 months for assessing the need for eyeglasses for adults
    - Unlimited medically necessary eye exams for a diagnosis of illness or injury
- *Behavioral Health Services.* Behavioral health services do not require a primary care provider referral. These services include mental health and substance abuse services by a Medicaid-enrolled psychiatrist, psychologist, licensed professional counselor (LPC), licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), and Texas Commission on Alcohol and Drug Abuse (TCADA) licensed facility.

Refer to: "Behavioral Health Services" on page 7-30.

"Psychiatric Services" on page 36-261.

"Psychologist" on page 38-1.

"Licensed Professional Counselor (LPC)" on page 30-1.

"Licensed Clinical Social Worker (LCSW)" on page 28-1.

"Licensed Marriage and Family Therapist (LMFT)" on page 29-1.

- *ECI.* Case management for Early Childhood Intervention. See "Case Management for Early Childhood Intervention (ECI)" on page 13-1.
- *CPW*. Case Management for Children and Pregnant Women. See "Case Management for Children and Pregnant Women (CPW)" on page 12-1.
- *School Health and Related Services (SHARS).* Clients may select any qualified provider to access medically necessary and reasonable services to ensure that Medicaid-eligible children with disabilities receive the benefits mandated by federal and state legislation that guarantees a free and appropriate public education. See "School Health and Related Services (SHARS)" on page 42-1.
- *School-Based Clinic Services.* Clients may receive services from school-based clinics without a referral from their primary care provider. See "School Health and Related Services (SHARS)" on page 42-1.

7.5.9.2 Community Health Services

The goal of the PCCM Community Health Services program is to facilitate the coordination of health related services required by PCCM clients. This means collaborating with providers, clients, and their families in identifying problems and resources, and removing barriers in accessing treatment and services. PCCM community health coordinators are located in all PCCM service areas. Examples of services offered by staff include:

- The management of high-risk pregnancies in conjunction with the client's physician
- Pediatric care coordination and education services for acute and chronically ill children
- Case management for all chronic and/or complex cases identified and eligible for community health services
- Assistance in accessing state and community resources
- Assistance in improving healthy behaviors and treatment compliance
- Provide health education on a variety of health-related topics

By offering the above services, PCCM assists both providers and clients with early, expedited access and intervention, increasing the likelihood of improved health outcomes.

Clients can be referred for care management and/or education on the following subjects:

- A newly diagnosed condition
- Asthma management
- Coronary artery disease
- Chronic obstructive pulmonary disease
- Dental health
- Diabetes management
- Effective use of benefits
- Hypertension
- Nutrition
- Otitis media
- Prenatal education
- Parenting and child development
- Puberty education
- Safety
- Smoking cessation

CPT only copyright 2005 American Medical Association. All rights reserved.

Community health coordinators can assist clients in obtaining food, clothing, and other resources by linking them with public and/or private community organizations.

Providers interested in scheduling a community health education program in their office or referring a PCCM client for community health services can do so by:

- Completing the "Primary Care Case Management (PCCM) Community Health Services Referral Request Form" on page B-65 and faxing to 1-512-302-0318; or
- Calling the Community Health Services Intake staff at 1-888-276-0702, Monday through Friday, 8 a.m. to 5 p.m., Central Time.

7.5.9.3 Behavioral Health Services

Behavioral health services are provided for the treatment of mental disorders, emotional disorders, and chemical dependency disorders. Behavioral health services do not require a primary care provider referral. PCCM clients may self-refer to any Medicaid-enrolled behavioral health provider for treatment. A referral from the client's primary care provider is not required. A primary care provider may, in the course of treatment, refer a patient to a behavioral health provider for an assessment or for treatment of an emotional, mental, or chemical dependency disorder. A primary care provider may also provide behavioral health services within the scope of his practice.

PCCM clients may receive any behavioral health service that is medically necessary, currently covered by the Texas Medicaid Program, and provided by a Medicaid-enrolled behavioral health provider. Behavioral health providers include psychiatrists, psychologists, LCSWs, LPCs, LMFTs, and TCADA licensed facilities. See each individual aforementioned section for benefits and limitations.

In addition, many services are offered through DADS and DSHS that do not require a referral. These include case management for mental health and mental retardation, mental health rehabilitative services, and mental retardation diagnosis and assessment.

Behavioral health providers are encouraged to contact a client's primary care provider to discuss the patient's general health. Primary care providers are encouraged to maintain contact with the behavioral health provider to document behavioral health assessments and treatments and to inform the behavioral health provider of any condition the client may have that could impact the behavioral health service delivery. However, client approval for any exchange of information between the primary care provider and behavioral health provider is required. Please use the "Primary Care Case Management (PCCM) Behavioral Health Consent Form" on page B-63.

Primary care providers are responsible for documenting referrals to behavioral health providers and any known self-referrals for behavioral health services in each client's medical record.

Outpatient Services

Outpatient Behavioral health services that exceed 30 visits per client, per calendar year must be prior authorized by TMHP. Fax the completed form, "Request for Extended Outpatient Psychotherapy/Counseling Form" on page B-81 to TMHP/Special Medical Prior Authorizations at 1-512-514-4213 for prior authorization. Refer to individual provider sections of this manual for additional information on extension requirements ("Psychologist" on page 38-1, "Psychiatric Services" on page 36-261, "Licensed Clinical Social Worker (LCSW)" on page 28-1, "Licensed Marriage and Family Therapist (LMFT)" on page 29-1, "Licensed Professional Counselor (LPC)" on page 30-1) or contact TMHP at 1-800-925-9126.

Inpatient Services

PCCM requires notification for urgent or emergent inpatient psychiatric care in an acute care facility prior to claims submission for in-network facilities. Scheduled admissions for psychiatric care require prior authorization. Out-of-network admissions require notification within the next business day and submission of clinical information to determine appropriateness for transfer to a contracted facility. Fax the completed PCCM Inpatient/Outpatient Authorization Form to the PCCM Inpatient Prior Authorization Department at 1-512-302-5039 or call 1-888-302-6167.

Prior authorization is required for psychiatric admissions of patients under 21 years of age to a freestanding psychiatric facility. Fax the completed "Psychiatric Hospital Inpatient Admission Form" on page B-74 to 1-512-514-4211 to obtain authorization. Inpatient psychiatric admissions to freestanding facilities for clients 21 years of age and older are not covered under the Medicaid Program.

Refer to "Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)" on page 43-71 for additional information concerning the requirements of freestanding psychiatric admissions, or contact the TMHP Comprehensive Care Inpatient Psychiatric (CCIP) Unit at 1-800-213-8877.

7.5.10 Provider Responsibilities

In addition to the requirements listed in "Provider Requirements and Information" on page 7-18, PCCM primary care providers have clearly defined roles, responsibilities, and contractual requirements.

Verifying Primary Care Provider Assignment

At the time that an appointment is made, the provider should ask the client for the name of the primary care provider on the client's Medicaid Identification Form (Form H3087). If a different primary care provider is listed, direct the client to go to the provider listed on their Medicaid Identification Form H3087 or to request a change.

Note: *Providers may not request primary care provider changes for their clients. Federal guidelines prohibit influence by providers on a patient's choice of their primary care provider.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Primary Care Provider Services

PCCM defines the services to be provided and the responsibilities to be assumed by a PCCM primary care provider as follows:

- The primary care provider agrees to provide primary care services to PCCM clients. Primary care services are all medical services required by a client for the prevention, detection, treatment and cure of illness, trauma, or disease, which are covered and/or required services under the Texas Medicaid Program. The primary care provider must ensure that clients under the age of 21 receive all services required by the THSteps program. All services must be provided in compliance with all generally accepted medical standards for the community in which services are rendered.
- Provide or arrange for medically necessary care within the following guidelines:
    - *Urgent Care.* Within 24 hours after the request
    - *Routine Care*. Within two weeks after the request
    - *Physical/Wellness Exams*. Within four to eight weeks after the request
    - *Prenatal Care.* Initial visit within 14 calendar days of the request or by the 12th week of gestation
- Refer clients to an approved Texas Medicaid provider or PCCM-contracted facility when the needed services are not available through the primary care provider's office or clinic. Specialists to whom primary care providers refer clients also should schedule appointments within the timeframes described above. Primary care providers may contact the PCCM Provider Helpline (1-888-834-7226) for a list of contracted facilities.
- Coordinate, monitor, and document medical treatment and covered services delivered by all providers to each client, including treatment during inpatient stays.
- Comply with all authorization and notification requirements of PCCM.
- Verify the eligibility of each client prior to providing covered services to determine whether the client is eligible for services under PCCM on the date of service.
- Coordinate care for children receiving services from or who have been placed in the conservatorship of DFPS. Primary care providers are responsible for furnishing or arranging for all medically necessary services while the child is under the conservatorship of DFPS and until the child is placed in foster care and is no longer eligible for PCCM enrollment.
- Cooperate with and participate in PCCM UM programs.
- Maintain hospital admitting privileges at a PCCM-contracted facility as applicable or maintain a referral relationship with a provider with admitting privileges.
- Provide preventive services using clinically accepted guidelines and standards.

7.5.10.1 Office and Medical Records Standards

To ensure that each onsite office or facility used to deliver health care to PCCM clients is safe, sanitary, and accessible, PCCM has defined standards for offices and other facilities:

- A site visit is conducted for each location as part of the evaluation process.
- An office compliance audit ensures that the facility meets defined standards.
- Evaluators use the visit as an opportunity to interact with the provider and office staff.
- Evaluators are prepared to explain the program and promote a strong network relationship.

For a provider to be considered for PCCM participation, all office sites must be in compliance with the "conditions of participation" stipulated in the provider contract. PCCM staff conducts an office onsite review at each primary care site prior to the acceptance of the provider into PCCM. Subsequently, Provider Relations staff performs routine audits at primary care office sites every two years.

The "Primary Care Case Management (PCCM) Pre-Contractual/Recredentialing Site and Medical Record Evaluation" on page B-68 is used to evaluate a provider's office:

- Offices that are found to be marginally acceptable receive a follow-up visit within 90 days.
- PCCM may recommend that HHSC cancel a provider's contract if office conditions do not meet defined standards after notice of required corrective action has been provided, and time to make changes has been made available.

7.5.10.2 Medical Records Standards

A PCCM provider is required to maintain comprehensive and accurate medical records to ensure quality and continuity of care. Each provider must maintain and make available medical records in accordance with the applicable provider agreement.

Content of Medical Record

Each patient's medical record must include patient identification information, progress notes, and laboratory, referral, and consultation notes. Data to be maintained includes:

- Patient identification information:
    - Patient's full name, address, and phone number
    - Patient's history, including: past and present medical condition of patient and family, past illnesses and surgeries, X-ray and lab tests, immunizations, documentation of discussion of Advance Directives (patients 21 years of age and older)
- Present physiological condition:
    - Drug or allergy sensitivities
    - Current medications

CPT only copyright 2005 American Medical Association. All rights reserved.

- Progress notes:
  - Patient's complaint or reason for visit
  - Results of physical examinations
  - Tests, procedures, and medications ordered by physician
  - Diagnoses and problems identified
  - Health education/preventive services performed
- Laboratory, referral, and consultation notes:
  - Laboratory and X-ray reports
  - Consultation and referral consultation reports
- Copies of reports concerning hospital admissions including:
  - Authorizations
  - Surgical reports
  - Discharge summaries

Refer to: "General Medical Record Documentation Requirements" on page 1-10.

In addition, PCCM providers performing THSteps comprehensive medical checkups must document all components of the checkup. These documentation requirements are detailed in "Documentation of Completed Checkups" on page 43-14.

Important: *Upon request, a provider will give PCCM copies of client medical records, as outlined in the provider agreement, so that PCCM staff can implement utilization management, quality improvement, and grievance programs.*

Confidentiality of Medical Records

The relationship and all communication between physician and patient are privileged. Accordingly, the medical record containing information about the relationship is confidential.

A physician's code of ethics, as well as Texas and federal laws, protect against the disclosure of the contents of medical records to persons or agencies that are not properly authorized to receive such information.

For a provider to release the contents of a patient's medical record to a third party, the patient must first authorize the disclosure by signing and dating an authorization form. If the record is for a deceased individual, the executor of the estate must authorize the release.

PCCM's policy is to allow only medical personnel and health professionals who are directly involved in the delivery or evaluation of a patient's records to access the medical record. All requests for medical record information must be handled according to policy and law.

An authorization from the patient for release of medical information is not required when the release is requested by and made to PCCM, TMHP, HHSC, the external quality review organization, or the Texas Attorney General's Medicaid Fraud Control Unit.

Medical Records Audits

PCCM Provider Relations staff performs a general medical record review of the primary care provider's practice as part of the credentialing and recredentialing process and as part of the quality improvement program. The "Primary Care Case Management (PCCM) Pre-Contractual/Recredentialing Site and Medical Record Evaluation" on page B-68 is used to evaluate provider medical records as part of the credentialing and recredentialing process.

Medical record audit results are submitted to the Medical Director and, if necessary, to the Credentialing Committee for review. Depending upon review findings, the Credentialing Committee will assist the Medical Director in concluding the audit in one of three ways:

- Recommending that HHSC accept the provider
- Recommending that HHSC reject the provider on the basis of poor medical record documentation and procedures
- Recommending that HHSC accept the provider conditionally with the provision that certain changes must be made and standards must be met within a specified timeframe

These recommendations apply to audits of an initial review of a provider as well as those of subsequent reviews.

If a provider has been found to be marginally in compliance with requirements, he will be given training and education directed at correcting the deficiency. PCCM will establish a system to audit this provider every 60 days for a maximum of three follow-up audits:

- Each audit must show substantial improvement over the previous audit.
- Following the third follow-up audit, if no improvement has been noted, PCCM will work with HHSC to apply sanctions and monitor performance closely.
- Subsequent to these measures, if the provider is still not in full compliance, PCCM will recommend to HHSC that the provider be terminated from the plan.

Medical records may also be reviewed in conjunction with provider profiling to identify opportunities to improve care and services.

Access and Availability Standards

PCCM staff routinely evaluates and monitors provider compliance with scheduling requirements. These scheduling requirements are designed to enhance access to health services and to provide assurance of service availability based on the urgency of need.

Refer to: "Provider Responsibilities" on page 7-30.

"Primary Care Provider Requirements and Information" on page 7-8.

7.5.11 Monitoring Provider Performance

PCCM is responsible for monitoring quality of care and, if necessary, recommending that HHSC disenroll providers who do not meet plan requirements.

CPT only copyright 2005 American Medical Association. All rights reserved.

Among the indicators used to monitor PCCM providers' performance are:

- *Client Comments and Complaints.* The PCCM Complaints Department closely monitors the activities associated with client complaints as they relate to quality assurance and utilization management reviews for specific provider performances. The reports of these activities are used to trigger separate actions and inquiries about performance.
- *Office Site Reviews.* PCCM staff undertakes a variety of assessments as part of quality improvement activities and provider service activities. The results of these reviews are made part of the file of performance factors and indicators assessed during the recredentialing process.
- *Compliance With 24-Hour Access Standards.* PCCM staff conducts audits to assess the degree of compliance with Medicaid Managed Care access standards. Client comments and complaints may trigger reviews of specific providers. The results of these reviews are considered in the recredentialing process.
- *Ability to Perform or Directly Supervise Ambulatory Primary Care Services for Clients.* Provider performance is monitored on an ongoing basis. PCCM staff follows up evidence of poor performance and addresses identified problems immediately to ensure that high-quality care is delivered to plan clients.
- *Admitting Privileges.* PCCM staff verifies that each provider maintains membership on the medical staff with admitting privileges at a minimum of one accredited contracted hospital or has an acceptable (timely and complete transfer of patients and records) arrangement with a primary care provider who has such admitting privileges.
- *Continuing Medical Education Credits.* Provider Enrollment/Contracting and Credentialing staff monitors each provider's activities in the area of continuing medical education credits.
- *Education Sessions.* PCCM provides a series of educational sessions that include aspects of UM and case management. Provider contracts require that each primary care provider attend at least one educational session each year.
- *Valid DEA Certification.* Proof of Drug Enforcement Administration (DEA) certification must be submitted as part of the application process and will be maintained by PCCM in its credentialing files.
- *Performance Within Scope of Individual Licensure and PCCM Credentialing.* PCCM staff provider applications include a statement providing assurance that a certified registered nurse practitioner, nurse midwife, or physician assistant will perform services only within the scope of his licensure, and that the individual will be disciplined immediately if this agreement is violated.
- *Compliance with Fraud and Abuse Policy.* PCCM will recommend to HHSC that a network provider be suspended immediately upon notification from any source that the provider:
    - Has been terminated or suspended from participation in the Medicaid or Medicare Program.
    - Has lost his license.
    - Has been convicted of a criminal act.

PCCM employs the above indicators as part of its oversight function. Findings are cataloged and analyzed for patterns of performance that require special attention. Where warranted, the results are made part of the recredentialing process. Failure to adhere to the above standards of performance will be grounds for suspension or termination.

7.5.12 Referrals

Referrals are an integral component of PCCM's health care delivery program. Referrals ensure that clients gain access to all necessary and appropriate covered services and that care is delivered in the most clinically suitable and cost-effective setting.

Referral procedures are designed to capture the information needed to support and manage the utilization of services by the provider network. Proper documentation of referrals is necessary for accurate medical record keeping.

PCCM primary care providers function as the *medical home* for PCCM clients. Primary care providers are responsible for arranging and coordinating appropriate referrals to other providers, including specialists, and for managing, monitoring, and documenting the services of other providers.

Primary care providers are responsible for the appropriate coordination and referral of PCCM clients for the following services:

- CPW case management services
- DARS case management services
- ECI case management services
- Mental retardation (MR) targeted case management
- SHARS
- Texas Commission for the Blind case management services
- THSteps medical case management
- THSteps dental (including orthodontics)
- Tuberculosis services
- Vendor drugs

7.5.12.1 Open Specialty Referral Network

PCCM operates an open specialty referral network. Primary care providers may refer patients to any Texas Medicaid-approved specialist within the State of Texas that accepts PCCM clients for covered health services. Medically necessary referrals to specialists do not require authorization from PCCM.

CPT only copyright 2005 American Medical Association. All rights reserved.

For all referrals, primary care providers should furnish their provider identifier and complete information on treatment procedures and diagnostic tests performed prior to the referral. The referral should specify the following:

- Initial diagnosis/diagnoses
- Reason for the referral
- Services requested from the referral specialist
- Number of authorized visits (optional)

Primary care providers may make a referral to another primary care provider or a specialist during periods of absence or unavailability. Primary care providers may also make a referral if a client requests a second medical opinion.

After receiving a referral specialist's report, if ongoing treatment for an illness is required, primary care providers have the discretion to specify the period of time or number of visits authorized for ongoing treatments to be given by the specialist.

The referring primary care provider's identifier must be entered on all claims submitted by the treating provider, indicating the primary care provider authorized the services. It is the responsibility of the treating specialist to ensure that the patient continues to be an eligible PCCM client throughout the period of treatment.

7.5.12.2 Referral Form

No form for a referral to a specialist is required. However, primary care providers are encouraged to use the PCCM Referral Form. This form reflects accepted practices in the Texas medical community.

The use of this form will simplify:

- Dissemination of necessary information to the specialist
- Documentation for the client's medical record of the specialist's diagnosis and treatment

Refer to: "Primary Care Case Management (PCCM) Referral Form" on page B-67.

One copy of the referral form should be given to the specialist. One copy should be maintained in the client's medical record.

7.5.13 Specialist Responsibilities

Specialists are responsible for furnishing medically necessary services to PCCM clients who have been referred by their primary care provider for specified treatment or diagnosis. While the specialist does not contract with PCCM, all facility services should be delivered in a contracted PCCM facility.

Specialists are responsible for verifying the eligibility of the referred client prior to providing treatment.

To ensure continuity of care for clients, the specialist must maintain communication with the client's primary care provider. This communication should ensure that the primary care provider's medical records adequately document the specialist services provided, all results or findings, and all recommendations. The specialist may use the lower half of the PCCM Referral Form for this purpose.

When a primary care provider refers a client to a specialist, the specialist should review the case with the primary care provider to fully understand the services being requested. Services requiring more than one visit should be coordinated with the primary care provider for approval of additional visits. Referrals from a primary care provider must be documented in both the primary care provider's and the specialist's records.

If a specialist determines that a client's condition warrants attention (i.e., hospitalization or diagnostic procedures), the specialist should seek authorization from the PCCM Inpatient/Outpatient Prior Authorization Department by telephone at 1-888-302-6167 or by fax at 1-512-302-5039.

Emergency treatment does not require authorization.

Refer to: "Facility/Hospital Services" on page 7-35.

7.5.13.1 Specialist-to-Specialist Referrals

Referrals from one specialist to another for a medically necessary service must be authorized by the client's primary care provider or, if the client does not have a primary care provider, the specialist can call the PCCM Client Helpline to obtain a one-time appointment approval.

7.5.13.2 Claims for Specialist Services

Specialists may bill for health care services provided to PCCM clients if the patient was referred by the client's primary care provider. To indicate a referral from the client's primary care provider, the primary care provider's name and provider identifier must be included in the Referring Physician field (boxes 17 and 17A) on the CMS-1500 claim form. A referral is not required if a specialist is providing a service that does not require a referral from a primary care provider.

Reimbursement for specialists is based on the current Medicaid fee-for-service rates.

Refer to: "Referrals" on page 7-33 and "Self-Referred Services" on page 7-28.

7.5.14 PCCM Inpatient Authorization Process

7.5.14.1 Definitions

Authorization. The process of obtaining approval for the delivery of services.

Routine/Non-Emergent Condition. A symptom or condition that is neither acute nor severe and can be diagnosed and treated immediately, or that allows adequate time to schedule an office visit for a history, physical and/or diagnostic studies prior to diagnosis and treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

Urgent Condition. A symptom or condition that is not an emergency, but requires further diagnostic work-up and/or treatment within 24 hours to avoid a subsequent emergent situation.

Emergent/Emergency. A medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following:

- Placing the health of the individual (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction to any bodily organ or part

Emergency services means covered inpatient and outpatient services that are as follows:

- Furnished by a provider that is qualified to furnish these services under this title
- Needed to evaluate or stabilize an emergency medical condition

Poststabilization Services. Covered services, related to an emergency medical condition that are provided after an enrollee is stabilized in order to maintain the stabilized condition, or to improve or resolve the enrollee's condition.

Observation Services. Services received within a hospital setting, which are "reasonable and necessary" to evaluate an outpatient condition or determine the need for possible admission to the hospital as an inpatient.

Notification. The process by which a facility informs PCCM that a client has been admitted as an inpatient to their facility on an urgent or emergent basis.

7.5.14.2 Professional Services

Emergency Room Services

Primary care providers should become actively involved in educating PCCM clients regarding the appropriate use of the emergency room and other emergency services. Providers should notify PCCM of any client who may need further education by calling the Client Helpline at 1-888-302-6688, or by using the PCCM Community Health Services Referral Request Form.

Refer to: "Primary Care Case Management (PCCM) Community Health Services Referral Request Form" on page B-65.

7.5.14.3 Facility/Hospital Services

All providers requesting prior authorization or notification of admission for a PCCM client must complete the PCCM Inpatient/Outpatient Authorization Form and include the following information:

- Facility name and provider identifier
- Client name, Medicaid number (PCN), and date of birth
- Requesting (admitting) physician's name and provider identifier
- Name of person completing form
- Date completed
- Telephone number
- Fax number
- Admit date
- Diagnosis codes (primary, secondary, etc.)
- Diagnosis Related Groups (DRG) code (for DRG facilities)
- Procedure codes
- Discharge date
- Clinical information to support medical necessity if required

If the provider's request is determined to be incomplete, the Inpatient Prior Authorization Department contacts the provider requesting the specific information needed to make the authorization determination and places the request in pending status. If the requested information is not received by the second business day, the information is requested again. If the information is not received by the fourth business day from the date the request was placed in pending status, the request is denied. A denial letter is sent to the facility and/or the requesting physician. When the requested information is received within four business days from the original pend date, the authorization is processed.

For most admissions, a letter of notification/authorization is faxed to the requesting facility or the requesting physician once the determination is complete. For scheduled inpatient admissions, both the facility and the physician will receive faxed notification.

Authorization is a condition of reimbursement. It is not a guarantee of payment.

Claims are processed based on the authorization completed at the time of claim submission. If there is a change in an existing authorization (i.e., discharge date, change in diagnosis, DRG, or change in procedure), the facility is required to submit an updated PCCM Inpatient/Outpatient Authorization Form or contact the Inpatient Prior Authorization Department with the update prior to claim submission to avoid denial of the claim.

When the billed and authorized DRG are not the same, the lower DRG will be paid. For non-DRG facilities, the claim will pay at the lower number of inpatient days when the length of stay billed and authorized are different.

7.5.14.4 Emergency Room Services

Emergency room (ER) providers are authorized by PCCM to furnish the medically necessary appropriate treatment of PCCM clients. The ER provider must perform the medical screening examination; i.e, assess the medical needs of a PCCM client who appears in the ER to determine the medical necessity of services and the appropriate setting for rendering services.

CPT only copyright 2005 American Medical Association. All rights reserved.

ER providers must determine a patient's status based on the urgent, emergent, and non-emergent definitions noted in "Definitions" on page 7-34. In some cases, medically necessary services are needed to determine the patient's condition. The necessity of these services must be documented in the medical record. ER providers are paid for medically necessary services required to determine and stabilize the patient's condition.

If a determination is made that the client has a *routine/non-emergent* condition, the client's primary care provider should be notified by phone, fax, or electronic mail, so that follow-up care can be arranged by the primary care provider as appropriate.

If a determination is made that the client has an *urgent* condition, the client's primary care provider should be notified by phone, fax, or electronic mail, so that follow-up care can be arranged within 24 hours.

If the client has an *emergent* condition, the ER must treat the client until the condition is stabilized or until the client can be admitted or transferred. Once the client is stabilized, the ER staff must notify the client's primary care provider to arrange for medically necessary hospital admission or follow-up care. If the ER staff is unable to contact the primary care provider (or designated on-call provider) within one hour, the ER staff should treat the client and report the primary care provider's unavailability by contacting the PCCM Provider Helpline at 1-888-834-7226.

Hospitals are eligible to bill for any services required in the medical screening examination and stabilization of a PCCM client. All services must be supported by the clinical record.

When treatment is provided to a PCCM client, *professional* and *facility* services must be billed separately.

Reimbursement of emergency facility and ancillary charges for diagnostic tests, monitoring, and treatment is based on the actual services rendered. The hospital is paid at its current Medicaid reimbursement rate.

7.5.14.5 Observation Services

Observation services are those received within a hospital setting, which are "reasonable and necessary" to evaluate an outpatient condition or determine the need for possible admission to the hospital as an inpatient. Some patients, while not requiring hospital admission, may require a period of observation in the hospital environment as an outpatient. Observation services may be provided in any part of the hospital where a patient placed in observation can be assessed, examined, monitored, and/or treated in the course of the customary handling of patients by the facility. Observation services after the 23rd hour are *not* payable by Medicaid. If the patient is going to be admitted, the patient's status must be changed from observation to inpatient prior to the 24th hour.

If an inpatient admission occurs from an observation status, the Inpatient Prior Authorization Department must be notified. Notification of admission is the responsibility of the admitting facility. If necessary, notification of admission is accepted from the physician's office. The payment for the inpatient admission includes the observation stay. Notification of admission is required prior to claim submission to avoid claim denial.

7.5.14.6 Urgent and Emergent Admissions

Notification of admission is required prior to claim submission to avoid claim denial. Notification of admission is the responsibility of the admitting facility. However, if necessary, notification of admission is accepted from the physician.

Notification is not required for 23-hour observation stays, unless the stay is converted to an inpatient status. The following information should be included on the notification:

- Facility name and provider identifier
- Client name, Medicaid number (PCN), and date of birth
- Requesting (admitting) physician's name and provider identifier
- Name of person completing form
- Date completed
- Phone number
- Fax number
- Admit date
- Diagnosis codes (primary, secondary etc.)
- DRG code (for DRG facilities)
- Procedure codes
- Discharge date
- Clinical information to support medical necessity if required

If the provider's request is determined to be incomplete, the Inpatient Prior Authorization Department contacts the provider requesting the specific information needed to make the authorization determination and places the request in pending status. If the requested information is not received by the second business day, the information is requested again. If the information is not received by the fourth business day from the date the request was placed in pending status, the request is denied. A denial letter is sent to the facility and/or the requesting physician. When the requested information is received within four business days from the original pend date, the authorization is processed.

If an emergent admission is necessary, the hospital must notify PCCM prior to claim submission. Failure to notify the PCCM Inpatient Prior Authorization Department prior to claim submission will result in denial of the claim.

Notification of emergency admissions can be provided by calling the PCCM Inpatient Prior Authorization Department at 1-888-302-6167, or faxing to 1-512-302-5039.

CPT only copyright 2005 American Medical Association. All rights reserved.

7.5.14.7 OB/Newborn Notification

Routine

Authorization is not required for routine obstetrical and newborn care within the routine length of stay (48 hours for vaginal deliveries and 96 hours for C-section deliveries).

Non-Routine

All obstetrical and newborn admissions with non-routine clinical status (complicated condition or DRG) or non-routine length of stay (over 48 hours for vaginal deliveries and 96 hours for C-section deliveries) require notification of admission and clinical documentation prior to claim submission. Notification of admission is the responsibility of the admitting facility. However, if necessary, notification of admission is accepted from the physician. Notification of admission is required prior to claim submission to avoid claim denial.

7.5.14.8 Scheduled Inpatient Admissions

Prior authorization is required for all scheduled inpatient admissions. Prior authorization of admission is a shared responsibility of the admitting facility and physician, but only one provider (admitting facility or physician) is required to submit an authorization request.

7.5.14.9 Appeals of Denied Requests for Authorization

If an authorization request for admission or service is denied, the requesting provider will receive a denial letter from the PCCM Prior Authorization Department. Where appropriate, the hospital or facility involved is also notified of the denial.

Refer to: "Appeals" on page 6-1 and "Authorization Appeals" on page 7-40.

7.5.14.10 Out-of-Network Inpatient Services

Out-of-network hospitals are reimbursed only for inpatient services provided to PCCM clients as the result of an emergency admission. Out-of-network facilities must notify the Inpatient Prior Authorization Department of a client admission within the next business day following the admission. Medical documentation must be submitted with notification to determine appropriateness for transfer to a contracted facility. Scheduled medical and surgical admissions or any non-emergent admission must be precertified indicating the reason why the patient must be admitted or transferred to an out-of-network facility (i.e., the services needed are not provided in a network facility, the patient had an emergent condition requiring admission while away from the service area).

After a patient in an out-of-network hospital is stabilized, additional services are considered non-covered benefits. The out-of-network hospital may, however, request an exception to the stabilization policy by contacting the PCCM Inpatient Prior Authorization Department at 1-888-302-6167:

- The hospital must state the circumstances surrounding the emergency admission and provide an estimate of the additional number of days required until the patient is discharged.
- PCCM grants exceptions based on the information provided by the non-contracted hospital and issues a authorization for billing purposes if an exception is granted.
- Although in some cases the PCCM Inpatient Prior Authorization Department may require additional time to review the circumstances of the request for exception, it normally reviews the request and contacts the out-of-network hospital within 36 hours of its request. The Inpatient Prior Authorization Department will either provide the non-contracted hospital with a authorization or deny the exception request.
- Should a stabilization exception be denied, any inpatient services provided to the PCCM client at the out-of-network hospital will cease to be a covered benefit 24 hours after the hospital is notified.

Nonemergency inpatient admissions are not a covered benefit at out-of-network hospitals and are considered for reimbursement only if authorization has been received from the PCCM Inpatient Prior Authorization Department or the client would experience an undue burden traveling to a network hospital. In this case, a *hardship exemption* may be granted. This exemption permits reimbursement of a nonemergency admission at an out-of-network hospital.

To obtain a hardship exemption, the attending physician or designee must contact the PCCM Inpatient Prior Authorization Department at 1-888-302-6167 before any nonemergency admission to an out-of-network hospital and provide details to substantiate why the client would experience an undue burden traveling to a network hospital.

If the details substantiate undue burden, the PCCM Inpatient Prior Authorization Department will grant the exemption and issue a authorization. The physician can then admit the patient to the out-of-network hospital.

Note: *Under no circumstances will authorization for an undue travel burden be granted after a patient has been admitted for a nonemergency condition to an out-of-network hospital.*

Primary care providers referring clients to specialists should make the specialist aware of the PCCM non-contracted hospital admission policy.

7.5.15 Outpatient Prior Authorization Process

The following outpatient procedures require prior authorization:

- Computed Tomography Imaging (CT)
- Computed Tomography Angiography (CTA)
- Magnetic resonance imaging (MRI)
- Magnetic resonance angiography (MRA)

CPT only copyright 2005 American Medical Association. All rights reserved.

- All laser surgeries
- Some endoscopic procedures
- Some podiatry procedures
- pH probe tests
- Sleep studies
- Some surgical procedures

Refer to: "Prior Authorization for Radiology Services" on page 39-5 for more information about MRI/MRA and CT/CTA authorizations

The following outpatient procedures do not require prior authorization:

- Anesthesia services (type of service 7)
- Surgeries performed on an outpatient emergent basis (retrospective authorization must occur for claims payment)
- Application/removal of casts, splints, or strapping (excluding podiatry office procedures and services)
- Burns — local treatment (does not include skin grafts or long-term wound care)
- Catheterization of blood vessels (excluding heart catheterizations) for diagnosis or therapy (includes venous access, puncture of shunt, etc.)
- Circumcision, newborn and for phimosis (up to 21 years of age)
- Fractures/dislocations (closed or open treatment)
- Incision and drainage of abscesses
- Injection procedures for radiology or in conjunction with surgical procedures
- Intubation/tracheostomy tube changes
- Removal of foreign bodies
- Removal of pressure equalization (PE) tubes with or without grafts
- Repair of lacerations/wounds (includes the eye)
- Replacement of gastrostomy tubes
- Replantation of digits
- Sterilization procedures (male and female)
- Urodynamics
- Esophageal manometry
- Ultrasounds
- Holter monitors
- Tympanostomy
- Tonsillectomy for client's under 12 years of age
- Adenoidectomy for client's under 12 years of age
- Bronchoscopy
- Sigmoidoscopy
- Proctosigmoidoscopy
- Permanent removal of nail/nail matrix
- Colonoscopy (except with endoscopic ultrasound exam or fine needle biopsy)
- Esophageal Endoscopy (except for ablation procedures)
- Appendectomy for ruptured appendix or incidental removal
- Hernia repair (except initial repair under 5 years of age with strangulation or incarceration)
- Upper GI Endoscopy (except for drainage of psuedocyst or placement of gastrostomy tube)

Requests for prior authorization of outpatient services must be faxed to the Outpatient Prior Authorization Department at 1-512-302-5039 on the PCCM Inpatient/Outpatient Authorization Form, or by calling 1-888-302-6167. Other forms will not be accepted for outpatient prior authorizations or updates.

The request must include the following information:

- Facility name and provider identifier
- Client name, Medicaid number (PCN), and date of birth
- Requesting (admitting) physician's name and provider identifier
- Name of person completing form
- Date completed
- Telephone and fax number
- Admit date
- Diagnosis codes (primary, secondary, etc.)
- Procedure codes
- Clinical information to support medical necessity is required

If the prior authorization request is determined to be incomplete, the Outpatient Prior Authorization Department faxes the provider a letter requesting the specific information needed to make the prior authorization determination and places the request in pending status. At least two additional attempts to call and/or fax the provider to obtain this information will be made during the next four business days. If the requested information is not received by the fourth business day, a letter is sent to the client stating that the prior authorization request cannot be processed until the provider responds with the specific information necessary to complete the prior authorization request. This client letter is sent along with a copy of the initial letter to the provider that lists the specific information necessary to make the prior authorization determination. If the provider does not submit the information necessary to complete the prior authorization request within seven calendar days from the date of the letter sent to the client, a letter is sent to the provider and the client notifying them of the denial of service due to incomplete or missing information.

A letter of authorization determination is faxed to the requesting provider once the request is completed.

If there is a change in an existing authorization (i.e., change in diagnosis or change in procedure), the facility/provider is required to submit an updated PCCM Inpatient/Outpatient Authorization Form with clinical

CPT only copyright 2005 American Medical Association. All rights reserved.

documentation supporting the change or contact the Outpatient Prior Authorization Department with the update prior to claim submission to avoid claim denial.

Providers performing urgent or emergent outpatient procedures that require authorization must contact the PCCM Outpatient Prior Authorization Department within 7 calendar days to obtain the authorization.

7.5.16 Transportation Services

7.5.16.1 Nonemergency Transportation

Nonemergency transportation services are available to eligible Medicaid clients who have no other means of transportation. This service is known as the Medical Transportation Program (MTP) and is detailed in "Medical Transportation" on page I-1.

For information on emergency transportation, see "Ambulance" on page 8-1.

7.5.17 Provider Complaints and Appeals

7.5.17.1 Conflict Resolution

The relationship between client and primary care provider may become unsatisfactory to one or both parties. The primary care provider should contact the PCCM Provider Helpline or write to request assistance in resolving the situation.

PCCM will initiate one or more of the following steps:

- Contact the client and the provider to assess the situation and provide educational information that may clarify the situation, if applicable
- Reassign the client to another primary care provider
- Refer the situation to the Complaint Resolution Team, if applicable
- Begin complaint/grievance resolution
- Refer the situation to the Community Health Services staff for education or to help clarify the situation

7.5.17.2 Provider Complaints

PCCM provides for due process in resolving provider complaints. Procedures governing the provider complaints process are designed to identify and resolve provider complaints in a timely and satisfactory manner. The majority of complaints are resolved within 30 business days.

Complaints must be submitted in writing to:

Primary Care Case Management (PCCM)
Complaints Unit MC-C04
PO Box 204270
Austin, TX 78720-4270
Or faxed to: 1-888-235-8399

Question regarding the status of a complaint or the complaint process should be directed to the PCCM Provider Helpline at 1-888-834-7226.

Provider Complaint Policy

PCCM takes seriously and acts on each provider complaint. Depending on the level and nature of the complaint, PCCM works with the provider to resolve the issue or directs the complaint to the appropriate PCCM department.

- *Complaints Unit.* Complaints that concern the relationship between a provider or provider's staff and a client.
- *Medical Affairs Division.* Complaints that relate to utilization of services (including emergency room use), denial of continued stay, and all clinical and access issues. This includes provider's appeal of an adverse authorization decision.
- *PCCM Administration.* Complaints that concern the relationship between a provider and any PCCM staff person or complaints about the overall plan management.

If the complaint relates to a medical issue, the Medical Affairs staff may assist in the resolution of the complaint.

The provider complaints process applies only to the resolution of disputes within the control of PCCM, such as administrative or medical issues. The provider complaint process does not apply to allegations of negligence against third parties, including other participating providers. These complaints are referred to HHSC for review and evaluation and are resolved by HHSC staff with support from PCCM staff.

Provider Complaint Procedures

The PCCM Complaints Unit handles all provider complaints. The processing of provider complaints is described below:

- Providers must submit their complaint in writing to the PCCM Complaints Unit.
- Providers will receive a written acknowledgement letter from PCCM within five business days of receipt of the complaint.
- Referrals to other departments, such as Provider Services or Medical Affairs, are made as appropriate.
- Complaints dealing with the quality of, access to, or continuity of care are referred to the PCCM Primary Care Provider Contract Compliance Department for follow-up and inclusion in the provider file.
- If the complaint cannot be resolved within 30 business days, the provider is notified in writing or by phone of the status of the complaint.

CPT only copyright 2005 American Medical Association. All rights reserved.

If the provider believes he did not receive due process from PCCM, the provider may file a complaint with HHSC. However, providers must exhaust the appeals/grievance process with PCCM before filing a complaint with HHSC.

Refer to: "Medicaid Managed Care Complaints and Fair Hearings" on page 7-11.

"Complaints to HHSC—Fee-for-Service and PCCM" on page 6-9.

7.5.17.3 Authorization Appeals

A denial is issued when an authorization or update to an existing request by a physician or a facility is not approved by the TMHP Medical Director or designee.

A medical necessity denial is issued when the documentation provided fails to support the need for requested service or the client's condition/service requested does not warrant the level or location of care the provider requested.

A denial is also issued when the provider has failed to comply with PCCM policies and procedures. These include failure to:

- Notify of an inpatient stay
- Obtain authorization for an elective/scheduled service prior to the delivery of service

A denial may also be issued if:

- The provider or the location of service is not within the network
- The patient is no longer eligible for coverage
- Texas Medicaid does not cover the service

The appeals or authorization reconsideration process affords the provider the opportunity to dispute a denial and explain or justify the original request.

Refer to: "Appeals" on page 6-1.

Appeal Procedures for Denials Other Than Medical Necessity

Level I: Review by PCCM

The provider may request a reconsideration of a denial if the provider has evidence that he complied with policy. The provider can appeal by resubmitting the authorization request with additional information to support the reconsideration and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the denial prior to submitting the claim.

Level II: Review by HHSC

If a provider believes he did not receive full consideration under the appeals process, he may file an appeal with HHSC. Providers must exhaust the appeals process with PCCM before filing an appeal with the HHSC.

Refer to: "Appeals to HHSC Fee-for-Service and PCCM" on page 6-4.

If it is determined that the provider did not receive full consideration, HHSC will work with the provider and PCCM to ensure that a proper review of the appeal is conducted.

Appeal Procedures for Medical Necessity Denials

Level I: Review by PCCM

Providers can appeal medical necessity denials by resubmitting the authorization request with additional clinical information to support the appeal and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the denial prior to submitting the claim.

Upon receipt of the request:

- The Medical Director or designee reviews the information and makes a determination.
- After the determination is made, the Medical Affairs nurse sends the resolution letter to the appealing provider.

If dissatisfied with the reconsideration decision, a provider can request another reconsideration by resubmitting the authorization request with additional clinical information not previously submitted to support the requested services and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the decision prior to submitting the claim for the services.

Once a provider has submitted a claim for services, reconsiderations for medical necessity cannot be performed by the PCCM Prior Authorizations Departments. The provider will need to follow the process for administrative claims appeals.

Refer to: "Appeals to HHSC Fee-for-Service and PCCM" on page 6-4

Level II: Review by HHSC

If a provider believes he did not receive full consideration under the appeals process, he may file a complaint with HHSC. Providers must exhaust the appeals process with PCCM before filing a complaint with HHSC.

Refer to: "Complaints to HHSC—Fee-for-Service and PCCM" on page 6-9.

"Medicaid Managed Care Complaints and Fair Hearings" on page 7-11.

7.5.18 Claims Filing Information

In addition to fee-for-service payments, providers enrolled as PCCM primary care providers receive a case management fee of $2.93 per client, per month. The fee-for-service reimbursement for PCCM is based on the Texas Medicaid Reimbursement Methodology (TMRM) structure.

7.5.18.1 Case Management Fee

The case management fee is compensation for managing the medical care of PCCM clients who have either selected or who have been assigned to the primary care provider's practice as their *medical home*. The fee:

- Is paid to the primary care provider whether or not the client is seen that month.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Is paid to the primary care provider in a separate check no later than the 10th state business day of each month.

Two reports are made available to primary care providers on a monthly basis. The client panel report lists the PCCM clients who have selected or who have been assigned to each primary care provider's practice. This report is available electronically at www.tmhp.com, or in hard copy by calling the PCCM Provider Helpline at 1-888-834-7226. The second report, a case management summary, is produced by TMHP and accompanies the case management check.

If there are any discrepancies in either report, providers are to contact their TMHP provider relations representative. Providers are to call the Provider Helpline (1-888-834-7226) prior to returning a check. This allows PCCM to provide necessary research and assistance.

Refer to: "Monthly Client Panel Report" on page 7-27.

7.5.18.2 PCCM Newborn Claims Filing

Newborns of PCCM mothers are automatically enrolled in PCCM.Claims filing procedures for PCCM newborns will continue to be handled under the traditional Medicaid billing guidelines through TMHP.

Health care providers should file newborn claims using the newborn's Medicaid Identification number as soon as it is made available to them. Claims submitted for newborns that have not yet been assigned a primary care provider should show PCCNEWB01 as the referring provider identifier. While the provider is listed as PCCNEWB01, any Medicaid provider can see the newborn. Claims submitted for newborns will be accepted even if a primary care provider has not been identified. Depending on when the Medicaid certification date falls within the default cycle, parents of a newborn may have up to 45 days to select a primary care provider for their baby. If parents do not select a primary care provider by the next default date, a primary care provider is selected for the newborn on the basis of geographic criteria.

Once the baby is assigned a primary care provider and a Medicaid number, normal billing and referral procedures will be in effect.

7.5.18.3 Network Hospitals

A network hospital is one that is contracted to provide services to PCCM clients. Individual reimbursement arrangements are negotiated for the HHSC by PCCM Hospital Contracting.

For all service areas, all inpatient services to PCCM clients, including services provided to PCCM clients receiving SSI benefits, are reimbursed at the PCCM rate.

7.5.18.4 Out-of-Network Hospitals

An out-of-network hospital is one that is not contracted to provide services to PCCM clients:

- Out-of-network hospitals are reimbursed only for inpatient services provided to PCCM clients as the result of an emergency admission. Inpatient services are reimbursed at the rate paid by the traditional Medicaid program.
- Reimbursement for emergency treatment will be made at the current Medicaid rates.

Hospitals that are not contracted with PCCM are reimbursed according to traditional Medicaid rates.

7.5.18.5 Emergency Outpatient Services

If the client presents at a hospital emergency outpatient facility, the physician should provide the medically necessary medical screening examination and stabilization services immediately, and the client should be referred back to the primary care provider for follow-up care. Reimbursement for emergency outpatient services requires that the medical record document the medically necessary services.

The hospital should contact the client's primary care provider within 24 hours or the next business day to advise that emergency treatment has been provided. In addition, if a procedure requiring authorization was performed while in the emergency department, the hospital should contact the PCCM Outpatient Prior Authorization Department within 7 calendar days to obtain the authorization. If the condition results in an inpatient admission, the hospital must notify the PCCM Inpatient Prior Authorization Department prior to claim submission. Reimbursement in cases of emergency treatment will be based on the actual services rendered. The hospital will be reimbursed at its current Medicaid reimbursement rate.

Refer to: "PCCM Inpatient Authorization Process" on page 7-34.

"Outpatient Prior Authorization Process" on page 7-37.

7.5.18.6 Nonemergency Outpatient Clinic Services

All hospitals are reimbursed for outpatient clinic services at their current Medicaid outpatient reimbursement rate.

7.5.18.7 PCCM Claims Details

If the provider of the services billed is not the client's assigned primary care provider, the primary care provider's name and provider identifier must be entered in the referring provider field of the claim form (boxes 17 and 17A on the CMS-1500) indicating a referral from the primary care provider.

If this information is missing or if the treating provider is not the assigned primary care provider on the date of service, the claim will be denied.

CPT only copyright 2005 American Medical Association. All rights reserved.

For services requiring authorization, enter the authorization number in the prior authorization field. It is not necessary to send the PCCM Authorization Request Form with the claims submission.

Refer to: "PCCM Inpatient Authorization Process" on page 7-34.

8.1 Enrollment

To enroll in the Texas Medicaid Program, ambulance providers must operate according to the laws, regulations, and guidelines governing ambulance services under Medicare Part B; equip and operate under the appropriate rules, licensing, and regulations of the state in which they operate; acquire a license from the Texas Department of State Health Services (DSHS), approving equipment and training levels of the crew; and enroll in Medicare.

A hospital-operated ambulance provider must be enrolled as an ambulance provider and submit claims using the ambulance provider identifier, not the hospital provider identifier (see “Medicare/Medicaid Coverage” on page 8-7).

Note: *Air ambulance providers are not required to enroll with Medicare.*

Reminder: *When ambulance providers enroll in Medicaid, they accept Medicaid payment as payment in full. They cannot bill clients for Texas Medicaid-covered benefits.*

Refer to: “Provider Enrollment” on page 1-2 for more information about enrollment procedures.

8.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with a Medicaid Managed Care health plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Note: *Services for STAR+PLUS Program Medicaid Qualified Medicare Beneficiaries (MQMBs) must be prior authorized and processed by TMHP.*

Refer to: “Managed Care” on page 7-1 for more information.

8.2 Reimbursement

Ground ambulance emergency and nonemergency transports and mileage are reimbursed in accordance with the reasonable charge methodology in Title 1 *Texas Administrative Code* (TAC) §355.8600. Air ambulance transports and mileage, as well as other ambulance procedure codes, are reimbursed at the lesser of the provider's billed charges or the published Medicaid fee. See also “Ambulance Procedure Codes” on page 8-8 for ambulance procedure codes and fees.

Ambulance providers are reimbursed for the transport plus mileage. Medicaid payments for ambulance services are subject to the 2.5 percent Medicaid payment reduction discussed in “Reimbursement Methodology” on page 2-2.

Refer to: “Reimbursement” on page 2-2 for more information about reimbursement methodologies.

“Medicaid Program Limitations and Exclusions” on page 1-17 for information on Medicaid exclusions.

8.3 Benefits and Limitations

Medicaid reimburses for emergency and nonemergency (for the severely disabled) transports.

For ground transportation, providers must bill procedure codes 9-A0428 and 9-A0425 or 9-A0429 and 9-A0425 with modifier ET. Providers must bill the appropriate mileage with the appropriate base rate procedure code.

For air transportation, providers must bill either with procedure codes 9-A0430 and 9-A0435 or 9-A0431 and 9-A0436. Providers must bill the appropriate mileage with the appropriate base rate procedure code.

When submitting a claim for water transport services, providers are to use procedure code 9-A0999. The claim suspends for manual review and pricing.

Night calls are no longer paid separately.

The payment rates represent a global payment. It is inappropriate to bill for any supplies or other services related to the transport, unless otherwise specified in this section.

The integrity of the information about a client’s condition which requires the transport and the medical necessity of the transport are the responsibility of the ambulance provider. The ambulance provider may be sanctioned, including exclusion from the Medicaid Title XIX programs, for completing or signing a claim form that includes false or misleading representations of the client’s condition or the medical necessity of the transport.

8.3.1 Emergency Ambulance Services

According to 1 TAC §354.1111, an emergency transport is a service provided by a Medicaid-enrolled ambulance provider for a Medicaid client whose condition meets the definition of an emergency medical condition. Conditions requiring cardio pulmonary resuscitation (CPR) in transit or the use of above routine restraints for the safety of the client or crew are also considered emergencies. Facility-to-facility transfers are appropriate as emergencies if the required emergency treatment is not available at the first facility.

8.3.1.1 Prior Authorization for Emergency Out-of-State Transport

All out-of-state (air and ground) transports require authorization before the transport is considered for payment.

To initiate the prior authorization process, providers must call 1-800-540-0694 (7 a.m. to 7 p.m., Monday through Friday, Central Time) *before* the transfer or on the first workday following transfers that occur after hours, on weekends, or on holidays.

TMHP is responsible for processing prior authorization requests for all Medicaid clients, Primary Care Case Management (PCCM) clients, and all STAR+PLUS MQMBs.

Examples of conditions considered for emergency transports include, but are not limited to, acute and severe illnesses, untreated fractures, loss of consciousness,

CPT only copyright 2005 American Medical Association. All rights reserved.

semiconsciousness, having a seizure or receiving CPR during transport, acute or severe injuries from auto accidents, and extensive burns.

Emergencies include medical conditions for which the absence of immediate medical attention could reasonably be expected to result in serious impairment, dysfunction, or failure of one or more organs or body parts, and the required emergency treatment is not available at the first facility. Claims for such transports must document the aforementioned criteria.

Emergency transports do not require prior authorization.

8.3.1.2 Emergency Transport Billing

When billing emergency transports electronically, a minimum of one diagnosis description or the *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) diagnosis code must be written on the claim form or in the diagnosis code field for electronic billers. A claim that has "see attached" as the only information in the diagnosis block is not processed for payment consideration.

Important: *Transports may be appealed as emergency claims only. Emergency transports that are denied cannot be accepted on appeal as nonemergency transports. Emergency transports billed as nonemergency services are denied.*

Note: *Emergency and nonemergency claims may be billed electronically to Medicaid. For electronic billers, the hospital's provider identifier must be entered in the Facility ID field. Providers should consult their software vendor for the location of this field on the electronic claim form.*

All emergency claims submitted on paper are required to have the following documentation:

- Distance of transport traffic patterns
- Time of transport
- Acuity of client

Place of Service Codes

National place of service (POS) codes 41 and 42 are accepted by the Texas Medicaid Program.

Condition Codes

Electronic billers should use as many condition codes as needed to fully describe the patient's condition.

The following condition codes are accepted by the Texas Medicaid Program:

Condition Codes				
01	02	03	04	05
06	07	08	09	60

Condition code 60 is used to notify TMHP that the patient was taken to the nearest facility.

Origin and Destination Codes

All claims submitted on paper or electronically must include the two-digit origin and destination codes. The origin is the first digit, and the destination is the second digit. The following are the origin and destination codes accepted by the Texas Medicaid Program:

Origin and Destination Codes					
D	E	G	H	I	J
N	P	R	S	X	

8.3.2 Nonemergency Ambulance Services

According to 1 TAC §354.1111, *nonemergency transport* is defined as a transport to or from a medical appointment for a Medicaid client who requires treatment in another location and is so severely disabled that the use of an ambulance is the only appropriate means of transport.

Severely disabled is defined as the physical condition of a Medicaid client that limits mobility and requires the client to be bed-confined at all times, unable to sit unassisted at all times, or requires continuous life-support systems (including oxygen or intravenous infusion).

A round-trip transport from the client's home to a scheduled medical appointment (e.g., an outpatient or freestanding dialysis or radiation facility) is a covered service when the client meets the definition of severely disabled. All nonemergency ambulance transfers to a scheduled doctor's appointment require the doctor's name and address, and information that describes the client's condition which requires transport by ambulance.

Nonemergency transports of clients with conditions that do not meet the severely disabled criteria and are not prior authorized are not a covered Medicaid service. Providers may call the TMHP Contact Center at 1-800-925-9126 or their provider relations representative with questions about the nonemergency ambulance transport policy.

Refer to: "Medical Transportation" on page I-1 for more information about nonemergency transportation.

8.3.2.1 Nonemergency Ambulance Transport Prior Authorization

According to *Human Resource Code* (HRC) §32.024 (t), Medicaid enrolled physician, nursing facility, health care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

Providers must request and obtain prior authorization *before* contacting the ambulance provider for the transport of their severely disabled Medicaid clients. In addition, the HRC states that a provider who is denied payment for nonemergency ambulance transport may be entitled to payment from the nursing facility, health care provider, or other responsible party that requested the service if payment under the Medical Assistance Program is denied because of lack of prior authorization and the provider submits a copy of the bill for which payment was denied.

CPT only copyright 2005 American Medical Association. All rights reserved.

TMHP responds to nonemergency transport prior authorization requests within 48 hours of receipt of the request. It is recommended that all requests for a prior authorization number (PAN) be submitted in sufficient time to allow TMHP to issue the PAN before the date of the requested transport. Documentation of a client's condition that meets the severely disabled definition must be provided at the time of request. If the client does not meet the severely disabled criteria, nonemergency ambulance services are not covered. Prior authorization is a condition for reimbursement but is not a guarantee of payment. The client and provider must meet all of the Medicaid requirements, such as eligibility and filing deadlines.

These prior authorization requirements also apply to Medicaid providers who participate in PCCM. Medicaid providers who participate in one of the Medicaid Managed Care health maintenance organization (HMO) plans must follow the requirements of their plan.

Prior authorizations for nonemergency transports require supporting documentation. The TMHP Ambulance Unit reviews the documentation to determine whether the client meets the definition of severely disabled. Incomplete information may cause the request to be denied.

The following information assists TMHP in determining the appropriateness of the transport:

- A detailed explanation of the severity of the client's physical condition that establishes the medical necessity for transport. If the client is bed-confined, documentation must clearly state the reasons for the confinement
- The necessary equipment, treatment, or personnel used during the transport
- The origination and destination points of the client's transport

Important: *TMHP requires prior authorization for all out-of-state ambulance transports.*

8.3.2.2 Nonemergency Prior Authorization Process

Medicaid providers and TMHP use the following prior authorization process:

1) The client's physician, nursing facility, Intermediate Care Facility for the Mentally Retarded (ICF-MR), health care provider, or other responsible party faxes a copy of the "Ambulance Fax Cover Sheet" found on page B-6 to the TMHP Ambulance Unit at 1-512-514-4205. Information and documentation listed on the form must be sent with the request before the transport to the initial or next medical appointment. Documentation requirements are outlined in this section under "Supporting Documentation" on page 8-5.
2) TMHP reviews all of the documentation it receives, and a letter of approval or denial is faxed to the requesting provider. The client is notified by mail if the authorization request is denied or downgraded. Reasons for denial include documentation that does not meet the severely disabled criteria or that the client is not eligible for the dates of services requested. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406.
3) The requester contacts the transporting ambulance provider and supplies the provider with the PAN and the dates of service that were approved.
4) Hospitals may call TMHP at 1-800-540-0694 or fax to 1-512-514-4205 to request a PAN when discharging a client or transporting the client to another facility.

Important: *Ambulance provider claims submitted without a PAN are denied. A provider who is denied payment for nonemergency ambulance transport because of failure to obtain prior authorization or because a request for prior authorization was denied can appeal to TMHP. If the review shows that prior authorization was not obtained before transport, the denial of reimbursement will be upheld. If the review shows that prior authorization was obtained before transport or that the request for prior authorization was improperly denied based on the documentation of medical necessity submitted initially, the denial of reimbursement may be overturned.*

8.3.2.3 Nonemergency Prior Authorization and Retroactive Eligibility

Prior authorization is issued to clients who are Medicaid-eligible and who meet the severely disabled criteria. If a request for a PAN is received and the client's Medicaid coverage is pending, the request will be denied. The client's eligibility may be granted retroactively. The requestor has 95 days from the date that the eligibility was added to TMHP's files to contact the TMHP Ambulance Unit and request that authorization be reconsidered.

To inquire about Medicaid eligibility, providers can contact the Automated Inquiry System (AIS) at 1-800-925-9126.

8.3.2.4 Prior Authorization Types, Definitions

Short Term

Short-term prior authorizations are issued to a client whose condition meets the severely disabled criteria for a short period of time. The length of the prior authorization is determined based on the treating physician's or surgeon's prognosis of recovery. If a recovery period cannot be determined at the time the prior authorization is requested, the TMHP Ambulance Unit defaults the authorization to 60 days with the option for an extension based on updated documentation received before the 60 days have lapsed. Hospital-to-hospital and hospital-to-outpatient medical facility transports are issued a PAN for that transport only. If the client already has a short-term or annual PAN, the PAN may be used for the ambulance transport. The hospital is responsible for obtaining the prior authorization.

CPT only copyright 2005 American Medical Association. All rights reserved.

180-Day

180-day prior authorizations are issued to a client and are granted within 24 hours of the time received, excluding weekends and holidays, for the authorization of nonemergency ambulance services. The request will be effective for a period of 180 days from the date of issuance if the request includes a written statement from a physician. Requests can be submitted up to 60 days before the date of service. The provider who requests this authorization is required to complete the "Physician's Medical Necessity Certification for Nonemergency Ambulance Transports (Texas Medicaid Program)" on page B-70 (certification form) in its entirety. Incomplete forms are not considered as a valid authorization request and are returned with a denial letter. The certification form is not considered documentation after the service is rendered and should not be sent with a claim or an appeal. Texas Medicaid no longer approves authorizations for a year.

8.3.2.5 Supporting Documentation

Providers must submit supporting documentation with all prior authorization requests.Examples include:

- Admit and discharge records with prognosis, including emergency room records
- A history and physical completed within six months or a care plan detailing daily activities from a facility or home health agency
- A letter on the health care provider's letterhead including the patient's primary mode of mobility and diagnosis history

In hospital-to-hospital transports or hospital-to-outpatient medical facility transports, the TMHP Ambulance Unit considers information by telephone from the hospital. Beginning June 1, 2005, providers are no longer required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request the hospital fax the supporting documentation.

8.3.3 Claim Denials and Appeals

Ambulance provider claims submitted for nonemergency transports without the PAN are denied and must be appealed on paper by the provider. The appeal must be accompanied by supporting documentation. Clients may appeal PAN request denials by contacting TMHP Client Notification at 1-800-414-3406.

Important: *All ambulance denials (air or ground) must be appealed on paper. Telephone and electronic appeals are not accepted.*

For claims or appeals related to prior authorization denials for the 180-day authorization request, the certification form is not considered as documentation after the service is rendered.

On appeal, supporting documentation is critical for determining the client's condition. Ambulance providers who file paper claims must include all information that supports the reason for the transport and attach a copy of the run sheet to the claim. The emergency medical technician (EMT) who transported the client must sign the documentation.

Refer to: "Supporting Documentation" on page 8-5.

8.3.4 Ambulance Disposable Supplies

Reimbursement for disposable supplies is separate from the established global fee for ambulance transports. Providers should use one procedure code, 9-A0382, to combine all payable disposable supplies used (e.g., gauze, bandages, tape, suction catheter, gloves, and mask) during emergency and nonemergency ambulance transports. Reimbursement for this procedure code is limited to a maximum of $20.30 per transport (one-way) and $40.60 round trip. A maximum of two supply procedure codes are allowed per round trip. In situations involving multiple transports on the same date of service, the provider may appeal claims denied because they exceed two supply procedure codes per claim. When billing for nonpayable supplies, providers must bill the appropriate national code. Providers must provide medically necessary supplies for the client's safe transport.

8.3.5 Oxygen

Reimbursement for oxygen is the lesser of the provider's customary profile, the prevailing profile, or the provider's actual charge in accordance with 1 TAC §355.8600. A maximum of two oxygen procedure codes are allowed per round trip. In situations involving multiple transports on the same date of service, the provider may appeal claims that have denied for this two-code limit. Providers must bill the appropriate national code.

8.3.6 Waiting Time

Procedure code 9-A0420 may be billed when it is the general billing practice of local ambulance companies to charge for unusual waiting time (longer than 30 minutes). Providers must use the following procedures:

- Separate charges must be billed for all clients, Medicaid and non-Medicaid, for unusual waiting time.
- The circumstances requiring waiting time and the exact time involved must be documented in Block 24 of the CMS-1500 claim form.
- The amount charged for waiting time must not exceed the charge for a one-way transfer.

Important: *Waiting time is reimbursed up to one hour.*

8.3.7 Extra Attendant or Registered Nurse

Charges for an extra attendant or registered nurse (in addition to the two-person crew) for an ambulance transfer are reimbursed when the claim documents the medical necessity of advanced life-support services (e.g., procedure code 9-A0424). Without documentation of the medical need of the third attendant, the third attendant's

CPT only copyright 2005 American Medical Association. All rights reserved.

services are not reimbursable. Medicaid does not reimburse based on each ambulance provider's internal policy.

8.3.8 Night Call

The Texas Medicaid Program does not reimburse an extra charge for a night call.

8.4 Membership Fees

The *Texas Insurance Code* does *not* apply to ambulance providers who finance, in part or in whole, the ambulance service by subscription. HHSC's Bureau of Emergency Management and Bureau of Policy and Operations have specific guidelines about these subscription plans. For more information, providers may contact their regional Emergency Medical Services (EMS) program administrator or the HHSC EMS Division at 1-512-834-6700.

8.5 Types of Transport

8.5.1 Multiple Client Transports

Multiple client transports occur when more than one client with Medicaid coverage is transported in the same vehicle simultaneously. A claim for each client *must* be completed and must reference *multiple transfers* with the names and Medicaid numbers of other clients sharing the transfer in Block 19 of the CMS-1500 claim form. Providers must enter charges on a separate claim for each client. TMHP adjusts the payment to 80 percent of the allowable base rate for each claim and divides mileage equally among the clients who share the ambulance.

Important: *Mileage determinations are based on the Official State Mileage Guide.*

Refer to: "Claims Filing Instructions" on page 5-23.

8.5.2 Out-of-Locality Transports

Transports to out-of-locality providers are covered if a local facility is not adequately equipped to treat the condition. *Out-of-locality* refers to one-way transfers of *50 or more* miles from point of pickup to point of destination.

Important: *Transports may be cut back to the closest appropriate facility.*

8.5.3 Air or Boat Transports

Air ambulance transport services, by means of either fixed or rotary wing aircraft, may be covered only if one of the following conditions exists:

- The client's medical condition requires immediate and rapid ambulance transportation that could not have been provided by ground ambulance.
- The point of client pick-up is inaccessible by ground vehicle.
- Great distances or other obstacles are involved in transporting the client to the nearest appropriate facility.

Important: *Air transport claims may be submitted on paper with supporting documentation. Claims may be submitted electronically with a short description of the client's physical condition in the comment field. If the client's condition cannot be documented, providers must file a paper claim.*

8.5.4 Pregnancy Transports

Transporting a pregnant woman may be covered as an emergency transfer if the client's condition is documented as an emergency situation at the time of transfer.

Claims documenting a home delivery or delivery en route are considered emergency transfers. Premature labor and early onset of delivery (less than 37 weeks gestation) also may be considered an emergency. Active labor without more documentation of an emergency situation is not payable as an emergency transport.

Important: *First day of last menstrual period (LMP) or estimated due date (EDD) must be in Block 14 of the claim form and on the documentation.*

If the pregnant client is transported in an ambulance on a nonemergency basis, all criteria for nonemergency prior authorization must be met.

8.5.5 Transports to or From State Institutions

Ambulance transports to or from a state-funded hospital for admission or following discharge are covered when nonemergency transfer criteria are met. Ambulance transfers of clients while they are inpatients of the institution are not covered. The institution is responsible for routine nonemergency transportation.

8.5.6 Transports for Nursing Facility Residents

Transports from a nursing facility to a hospital are covered if the client's condition meets emergency criteria. Nonemergency transfers for the purpose of required diagnostic or treatment procedures not available in the nursing facility (such as dialysis treatments at a freestanding facility) are also allowable *only* for clients meeting the definition of severely disabled.

The nursing facility is responsible for providing routine nonemergency transportation for services not provided in the nursing facility. The cost of such transportation is included in the nursing facility vendor rate. This nonemergency transport requires the nursing facility to request and obtain a prior authorization number from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

CPT only copyright 2005 American Medical Association. All rights reserved.

Transports of nursing facility residents for rehabilitative treatment (for example, physical therapy) to outpatient departments or physicians' offices for recertification examinations for nursing facility care are *not* reimbursable ambulance services.

Claims for services to nursing facility residents must indicate the medical diagnosis or problem requiring treatment, the medical necessity for use of an ambulance for the transport, and the type of treatment rendered at the destination (for example, admission or X-ray).

If a client is returned by ambulance to a nursing facility following hospitalization, the acute condition requiring hospitalization must be noted on the ambulance claim form. This transport is considered for payment only if the client meets the severely disabled criteria. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Nursing facilities are responsible for providing or arranging transportation for their residents. Arranging transportation for Medicaid clients includes obtaining prior authorizations for nonemergency ambulance transports. Ambulance providers may assist nursing facilities in obtaining prior authorizations.

Ambulance providers may bill a nursing facility or client for a nonemergency ambulance transport only under the following circumstances:

- *Providers may bill the nursing facility* when the nursing facility requests the nonemergency ambulance transport without a prior authorization number.
- *Providers may bill the client* only when the client requests transport that is not an emergency and the client does not meet the severely disabled criteria. The provider must advise the client of acceptance as a private pay patient at the time the service is provided, and the client is responsible for payment of all services. Providers are encouraged to have the client sign the *Private Pay Agreement.*

Providers may refer questions about a nursing facility's responsibility for payment of a transport to the TMHP Contact Center at 1-800-925-9126 or TMHP provider relations representatives.

8.5.7 No-Transport

The Texas Medicaid Program does not reimburse providers for services that do not result in a transport to a facility, regardless of any medical care rendered. If a client contacts an ambulance provider, but the call does not result in a transport, the provider should have the client sign an acknowledgment statement and bill the client for services rendered.

8.6 Medicare/Medicaid Coverage

Medicaid is the secondary payor to other health insurance sources including Medicare. Ambulance claims for Medicaid and Medicare Part B claims must be filed with Medicare first.

MQMBs are eligible for Medicaid benefits such as ambulance transports. Qualified Medicare Beneficiaries (QMBs) are not eligible for Medicaid benefits. The Medicaid program is only required to pay for coinsurance and/or deductibles for QMBs. Therefore, providers should not request prior authorization for ambulance services for these clients.

Important: *Providers must use national procedure codes when billing Medicaid.*

Refer to: "Medicare/Medicaid Clients" on page 4-12.

8.6.1 Medicare Paid

Assigned claims filed with and paid by Medicare should automatically transfer to TMHP for payment of the deductible and coinsurance liability.

Providers must submit Medicare-paid claims that do not cross over to TMHP for the coinsurance and deductible. Providers must send the Medicare Remittance Advice Notice (MRAN) with the client information circled in black ink.

8.6.2 Medicare Denied

All claims denied by Medicare for administrative reasons must be appealed to Medicare before they are sent to Medicaid.

An assigned claim that was denied by Medicare because the client has no Part B benefits or because the transport destination is not allowed can be submitted to TMHP for consideration.

Providers must send claims to TMHP on a CMS-1500 claim form with the ambulance provider identifier, unless they are a hospital-based provider. Hospital-based ambulance providers must send Medicare denied claims to TMHP on a HCFA-1500 claim form with the ambulance provider identifier and a copy of the MRAN.

Note: *All claims for STAR+PLUS clients with Medicare and Medicaid should follow the same requirements used for obtaining prior authorization for Medicaid-only services from TMHP. The STAR+PLUS HMO is not responsible for reimbursement of these services.*

8.7 Relation of Service to Time of Death

Medicaid benefits cease at the time of the client's death. However, if the client dies in the ambulance while en route to the destination, Medicaid covers the transport. If a physician pronounces the client dead after the ambulance is called, Medicaid covers the ambulance service (base rate plus mileage) to the point of pickup. Providers must

CPT only copyright 2005 American Medical Association. All rights reserved.

Indicate the date and time the client died in Block nine of the CMS-1500 claim form. If a physician or coroner pronounces the client dead *before* the ambulance is called, the service is not covered.

Important: *Equipment and supplies are included in the base rate. They are not separately reimburseable, and are considered part of another procedure. Therefore, equipment and supplies cannot be billed to the client.*

8.8 Ambulance Procedure Codes

Use the following procedure codes when billing for ambulance services provided to Medicaid-eligible clients:

Emergency Code	Limitations	Maximum Fee
9-A0382	Maximum allowable fee of $20.30 is per transport, not to exceed $40.60 round trip.	$20.30
9-A0420		*
9-A0422		*
9-A0424		*
9-A0425 with modifier ET	Use modifier ET to denote emergency services. A0425-ET is denied if it is billed without A0429.	*
9-A0429		*
9-A0430		$1,140.08
9-A0431		$609.00
9-A0435		$16.24
9-A0436		$16.24
9-A0999	Use for water ambulance services.	MP
***Reimbursed at reasonable charge, which is the lesser of the provider's customary profile, the prevailing profile, or the provider's actual charge in accordance with 1 TAC §355.8600.**		

Nonemergency Code	Limitations	Maximum Fee
9-A0382	Maximum allowable fee of $20.30 is per transport, not to exceed $40.60 round trip.	$20.30
9-A0420		*
9-A0422		*
9-A0424		*
9-A0425	A0425 is denied if it is billed without A0428	*
9-A0428		*
9-A0430		$1,140.08
9-A0431		$609.00
9-A0435		$16.24
9-A0436		$16.24
***Reimbursed at reasonable charge, which is the lesser of the provider's customary profile, the prevailing profile, or the provider's actual charge in accordance with 1 TAC §355.8600.**		

8.9 Claims Information

Providers must submit ambulance services to TMHP on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from a vendor of their choice. TMHP does not supply them. Providers may file emergency and nonemergency ambulance services claims to TMHP in an approved electronic format. Nonemergency claims filed electronically must include the PAN in the appropriate field.

Reminder: *Providers must submit multiple transports for the same client on the same date of service through one claim submission.*

Refer to: "Reimbursement" on page 2-2.

8.9.1 Modifiers on Ambulance Claims

Ambulance providers may see the HH modifier on their Remittance and Status (R&S) reports, which indicates the transfer is from a noncontracted to a contracted hospital. It does not affect claim payment or processing.

Modifier TG may be used to indicate advanced life support (ALS) services were provided when billing basic life support (BLS) procedure codes.

8.9.2 Claim Filing Resources

Providers may refer to the following sections or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP EDI General Information	3-1
CMS-1500 Claim Filing Instructions	5-24
Communication Guide	A-1

9.5 Claim Filing Resources 9-2

CPT only copyright 2005 American Medical Association. All rights reserved.

9.1 Enrollment

To enroll in the Texas Medicaid Program, ambulatory surgical centers (ASCs) must do the following:

- Meet and comply with applicable state and federal laws, rules, regulations, and provisions of the state plan under Title XIX of the *Social Security Act*
- Be enrolled in Medicare
- Meet and comply with state licensure requirements for ASCs
- If Medicare doesn't issue a hospital a part B ambulance provider number, the hospital must submit a letter from Medicare denying issuance, and a Medicaid-only number will be issued.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

Out-of-state ASCs that are Medicare-certified as an ASC in the state where they are located and provide services to a Texas Medicaid client may be entitled to participate in the Texas Medicaid Program.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Only providers complying with CLIA will be reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Hospital Ambulatory Surgical Center" on page 25-16 for more information about HASCs.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

9.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

9.2 Reimbursement

The Medicaid rates for ASCs are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8121. The current ASC/HASC fee schedule and ASC/HASC fee schedule insert are available on the TMHP website at www.tmhp.com. To request a hard copy of the fee schedule and insert, call the TMHP Contact Center at 1-800-925-9126.

Note: *If billing for a surgical procedure not listed in the fee schedule, providers must bill with an unlisted procedure code.*

Physician and certified registered nurse anesthetist (CRNA) services performed in an ASC must be billed under the physician or CRNA provider identifier and are reimbursed separately.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

"Hospital Ambulatory Surgical Center" on page 25-16 for more information.

9.3 Benefits and Limitations

Refer to: "Family Planning Services" on page 20-1 for implantable contraceptive capsules reimbursement and code information.

"Benefits and Limitations" on page 25-24.

9.4 Claims Information

Freestanding ASC claims must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them. Information on the performing surgeon must be supplied in Block 17 of the CMS-1500 claim form for the claim to be processed. Hospital-based ASCs file a HCFA-1450 (UB-92).

ASCs who wish to bill for nurse anesthetists' services must enroll as a nurse anesthetist group provider and indicate the CRNA performing provider identifier on claims for those services. For specific billing instructions for CRNA services, see "Certified Registered Nurse Anesthetist (CRNA)" on page 15-1.

9.5 Claim Filing Resources

Birthing Center

10.1 Enrollment 10-2
10.1.1 Medicaid Managed Care Enrollment 10-2
10.2 Reimbursement 10-2
10.2.1 Laboratory Services 10-2
10.3 Benefits and Limitations 10-2
10.3.1 Newborn Eligibility Process 10-3
10.4 Claims Information 10-3
10.4.1 Claim Filing Resources 10-3

CPT only copyright 2005 American Medical Association. All rights reserved.

10.1 Enrollment

A birthing center must be licensed as a birthing center by the Department of State Health Services (DSHS) and meet the minimum standards as required by *Health and Safety Code*, Chapter 244.010. To enroll in the Texas Medicaid Program, a birthing center must be licensed to provide a level of service commensurate with the professional services of a Doctor of Medicine (MD), Doctor of Osteopathy (DO), or certified nurse-midwife (CNM) who acts as birth attendant. Texas Medicaid only reimburses birthing centers for services determined by the attending physician or CNM to be reasonable and necessary for the care of the mother or newborn child.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

A birthing center is a place, facility, or institution where a woman is scheduled to give birth following a normal, uncomplicated (low-risk) pregnancy. This term does not include a hospital, ambulatory surgical center, or residence of the woman giving birth.

Birthing centers are *encouraged* to refer clients for THSteps services.

Refer to: “Texas Health Steps (THSteps)” on page 43-1.

“Provider Enrollment” on page 1-2.

“Medicaid Program Administration” on page vii.

Set up referral procedures for family planning services described in “Family Planning Services” on page 20-1.

DSHS website, www.dshs.state.tx.us/famplan/ for information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding from DSHS.

10.1.1 Medicaid Managed Care Enrollment

Birthing centers may be eligible to enroll in the Medicaid Managed Care Program as primary care providers. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: “Managed Care” on page 7-1 for more information.

10.2 Reimbursement

The Medicaid rates for birthing centers are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8181.

Refer to: “Reimbursement” on page 2-2 for more information about reimbursement.

10.2.1 Laboratory Services

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA will not be reimbursed for laboratory services.

Refer to: “Clinical Laboratory Improvement Amendments (CLIA)” on page 26-2.

10.3 Benefits and Limitations

Birthing centers, using their nine-digit provider identifier, can only submit claims for their facility services (e.g., labor and delivery services). The maternity clinic, physician, CNM, nurse practitioner (NP), clinical nurse specialist (CNS), or physician assistant (PA) performing services must submit separate claims for their services because the services they provide (e.g., prenatal, family planning) are not approved birthing center services.

The Medicaid program reimburses procedure codes 1-99431 and 1-99432 when performed in the birthing center and billed by a physician or CNM.

Procedure code 1-99433 is not payable when performed in the birthing center.

Important: *Childbirth education classes and the use of a documented midwife as the birth attendant are not benefits of the Texas Medicaid Program.*

The following table lists the allowable procedure codes for birthing center services with the corresponding maximum fees:

Service	Procedure Code	Maximum Fee
Admission	P-99221	$69.60
Delivery	P-59409	$546.19
Admission and Labor	P-S4005 ***Note:*** *S4005 may not be billed in conjunction with 99221 and/or 59409*	$152.03

Health and Safety Code, Chapter 47, requires birthing centers located in a county with a population of more than 50,000 and that has 100 or more births per year to offer all newborns a hearing screening as a part of the obstetrical care at delivery. For more information regarding newborn hearing screening contact:

DSHS
Program for Amplification for Children of Texas (PACT)
1100 West 49th Street
Austin, TX 78756
1-512-458-7724

Refer all newborns who have abnormal screening results to a local PACT provider for follow-up care. PACT provides services and hearing aids for children ages birth through 20 years of age who have permanent hearing loss and are Medicaid-eligible.

Traditional Medicaid providers are reimbursed for the diagnosis and treatment of abnormal hearing screen follow-up when a local PACT provider is not available.

CPT only copyright 2005 American Medical Association. All rights reserved.

Providers must use procedure codes 5-92585, 5/I/T-92587, and 5/I/T-92588 when billing for follow-up diagnosis of abnormal hearing screens.

Refer to: "Certified Nurse-Midwife (CNM)" on page 14-1.

10.3.1 Newborn Eligibility Process

To provide a Medicaid number to a child born to a mother eligible for Medicaid, birthing centers must complete the "Birthing Center Report (Newborn Child or Children) Form 7484" on page B-11. Use the following guidelines when completing the Form 7484:

- Enter the newborn's name on the form (if known).
- Do not complete the form for stillbirths.
- Submit the form to DSHS within five days of the child's birth. The five-day time frame is not mandatory; however, prompt submission expedites the process of determining the child's eligibility.
- Duplicate Birthing Center Report (Newborn Child or Children) Form 7484 as needed. DSHS and TMHP do not supply this form.

Important: *The use of "Baby Boy" or "Baby Girl" delays the assignment of a Medicaid number.*

Reminder: *Birthing centers are encouraged to refer clients for THSteps services and set up referral procedures for family planning services (refer to "Family Planning Services" on page 20-1).*

Upon receipt of a completed 7484 form, DSHS verifies the mother's eligibility, and within 10 days sends notification letters to the hospital or birthing center, attending physician (if identified), mother, and caseworker. The notice includes the child's Medicaid number and the effective date of coverage. After the child has been added to the eligibility file, DSHS issues a Medicaid Identification Form (Form H3087) to the client.

The attending physician's notification letter is sent to the address on file (by license number) at the Texas Medical Board. This address must be kept current to ensure timely notification. Physicians must submit address changes to the following address:

Texas Medical Board
Customer Information, MC-240
PO Box 2018
Austin, TX 78767-2018

Note: *When billing for a Medicaid Managed Care client, providers must follow the client's health plan guidelines for newborn billing.*

10.4 Claims Information

Claims for birthing center services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

10.4.1 Claim Filing Resources

Blind Children's Vocational Discovery and Development Program

11.1 Enrollment 11-2
11.1.1 Medicaid Managed Care Enrollment 11-2
11.2 Reimbursement 11-2
11.3 Benefits and Limitations 11-2
11.4 Claims Information 11-2
11.4.1 Claim Filing Resources 11-2

CPT only copyright 2005 American Medical Association. All rights reserved.

11.1 Enrollment

The Department of Assistive and Rehabilitative Services (DARS) Division for Blind Services (DBS), is the Medicaid provider of case management for children younger than 16 years of age who are blind and visually impaired.

Providers must meet educational and work experience requirements that are commensurate with their job responsibilities and must be trained in DBS case management activities.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

11.1.1 Medicaid Managed Care Enrollment

DARS DBS providers do not need to enroll with Medicaid Managed Care. All claims for service provided by DARS DBS are submitted to TMHP for all Medicaid clients, including Medicaid Managed Care clients.

11.2 Reimbursement

Case management services for the Blind Children's Vocational Discovery and Development Program (BCVDDP) are reimbursed according to a fixed rate as established by HHSC. DARS DBS providers should bill procedure code G9012.

Refer to: Title 1 *Texas Administrative Code* (TAC) §355.8381 for more information on reimbursement and "Federal Financial Participation (FFP) Rate" on page 2-8 for federal matching percentage.

11.3 Benefits and Limitations

Procedure code G9012 is limited to one per month, per client, regardless of the number of contacts during the month.

Reminder: *A contact is defined as "an activity performed by a Blind Children's Specialist with the client or with another person or organization on behalf of the client to locate, coordinate, and monitor necessary services."*

Refer to: "Department of Assistive and Rehabilitative Services (DARS), Blind Services" on page A-18 of this manual for local addresses of DARS DBS.

Providers must *not* bill a claim when or after the client turns 16 years of age.

Any child with a suspected or diagnosed visual impairment may be referred to BCVDDP. DARS DBS assesses the impact the visual impairment has on the child's development and provides blindness-specific services to increase the child's skill level in the areas of independent living, communication, mobility, social, recreational, and vocational discovery and development. For more information, visit the DARS website at www.dars.state.tx.us.

11.4 Claims Information

Providers must submit case management services to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

12.7 Claims Information 12-3
12.7.1 Claim Filing Resources 12-3

CPT only copyright 2005 American Medical Association. All rights reserved.

12.1 Overview

Case management services are provided to assist eligible clients in gaining access to necessary medical, social, educational, and other services; encourage cost-effective health and health-related care; discourage over utilization or duplication of services; and make appropriate referrals to providers. Case managers provide the necessary coordination to providers of services when these services are needed by a client.

12.1.1 Eligibility

To be eligible for services, a person must:

- Be eligible for Medicaid.
- Be a pregnant woman with a high-risk condition, or a child (birth through 20 years of age) with a health condition or health risk.
- Be in need of services to prevent illnesses or medical conditions, to maintain function, or to slow further deterioration.
- Want to receive case management services.

Pregnant women with a high-risk condition are defined as women who are pregnant and have one or more high-risk medical and/or personal/psychosocial conditions during pregnancy. Children with a health condition are defined as children with a health condition/health risk or children who have, or are at risk for, a medical condition, illness, injury, or disability that results in limitation of function, activities, or social roles in comparison with healthy same-age peers in the general areas of physical, cognitive, emotional, or social growth and development.

12.1.2 Referral Process

To refer a Medicaid client for Children and Pregnant Women (CPW) services, call 1-877-847-8377 or consult the CPW provider list at www.dshs.state.tx.us/caseman/providerRegion.shtm. A referral for CPW services can be received from any source. A case management provider will contact the family to offer a choice of providers and to obtain information necessary to request prior authorization for case management services.

12.2 Enrollment

Enrollment for CPW providers is a two-step process.

Step 1: Potential providers must submit a Department of State Health Services (DSHS) Case Management for Children and Pregnant Women provider application to the DSHS Health Screening and Case Management Unit.

Eligible case managers include registered nurses with a diploma, associate's, bachelor's, or advanced degree or social workers with a bachelor's or advanced degree who are currently licensed by their respective Texas licensure board and whose license is not temporary in nature. Eligible case managers must also have at least two years of cumulative, paid, full-time work experience or two years of supervised full-time, educational, internship/practicum experience in the past ten years. The experience must be with children who are up to 21 years of age and/or pregnant women. The experience must include assessing psychosocial and health needs and making community referrals for these populations.

For more information about provider qualifications and enrollment, contact DSHS at 1-512-458-7111, Ext. 2168, visit the case management website at www.dshs.state.tx.us/caseman/default.shtm, or write to the following address:

Case Management
Health Screening and Case Management Unit
1100 West 49th Street, MC-1938
Austin, TX 78756-3199

***Note:** Before providing services, each case manager must attend DSHS case manager training. Training is conducted by DSHS regional staff.*

Step 2: Upon approval by DSHS, potential providers must enroll as a Medicaid provider for CPW and submit a copy of their DSHS approval letter. Facility providers must enroll as a CPW group, and each eligible case manager must enroll as a performing provider for the group. Federally qualified health center (FQHC) facilities that provide CPW services use their FQHC number and will not apply for an additional provider number for CPW.

Refer to: "Provider Enrollment" on page 1-2 for more information about procedures for enrolling as a Medicaid provider.

12.2.1 Medicaid Managed Care Enrollment

CPW providers are not required to enroll with Medicaid Managed Care. All claims for services provided by CPW providers are submitted to TMHP for all Medicaid clients, including Medicaid Managed Care clients. Medicaid Managed Care health plans are not responsible for reimbursing CPW case management program services.

12.3 Benefits and Limitations

CPW services are limited to one contact per day per client. Additional provider contacts on the same day are denied as part of another service rendered on the same day.

Providers must adhere to CPW case management program rules, policies, and procedures.

All services must be prior authorized. One comprehensive visit is approved for all eligible clients. Follow-up visits are authorized based on contributing factors. Additional visits can be requested and may be authorized based on a continuing need for services. A prior authorization number is required on all claims for CPW services.

***Note:** Prior authorization is a condition of reimbursement, not a guarantee of payment.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Approved case management providers may request prior authorization from DSHS by fax (1-512-458-7574) or on the website at www.dshs.state.tx.us/caseman /subpaweb.shtm.

Note: *CPW providers are not required to file claims with other health insurance before filing with Medicaid.*

Reminder: *Billable services are defined in program rule 25 Texas Administrative Code (TAC) §27.5.*

CPW services are not billable when a client is an inpatient at a hospital or other treatment facility.

Reimbursement for services rendered by providers not approved by the DSHS Health Screening and Case Management Unit will be denied.

Providers must document all services in accordance with program rule, program policy, and Medicaid policy.

12.4 Reimbursement

CPW providers are reimbursed in accordance with Title 1 TAC §355.8401. The procedure code to be used for all CPW services is G9012. Modifiers are used to identify which service component is provided.

Service	Contact Code	Maximum Fee
Comprehensive visit	1-G9012 *with* modifier U5 *and* modifier U2	$54.58
Follow-up face-to-face	1-G9012 *with* modifier U5 *and* modifier TS	$54.58
Follow-up telephone	1-G9012 *with* modifier TS	$18.00

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

Medicaid payments for CPW services are subject to the 2.5 percent Medicaid payment reduction discussed in "Fee Schedules" on page 2-3.

12.5 Reporting Child Abuse or Neglect

All CPW providers are required to report suspected child abuse or neglect as outlined in "Reporting Child Abuse or Neglect" on page 1-5 and "Training" on page 1-6.

12.6 Technical Assistance

Providers may contact DSHS program staff as needed for assistance with program concerns. Providers should contact TMHP provider relations staff as needed for assistance with claims problems or concerns.

12.6.1 Assistance with Program Concerns

Providers who have questions, concerns, or problems with program rule, policy, or procedure contact DSHS program staff. Contact names and numbers can be obtained from the case management website at www.dshs.state.tx.us /caseman/default.shtm, or by calling 1-512-458-7111, Ext. 2168.

Regional staff make routine contact with providers to ensure providers are delivering services as required.

12.6.2 Assistance with Claims Concerns

Providers should review all Medicaid bulletins for any changes to claim filing requirements. Providers that have questions, concerns, or problems about claims should contact the TMHP provider relations representative in their region. Call the TMHP Contact Center at 1-800-925-9126 for more information about provider relations representatives.

12.7 Claims Information

Claims for CPW services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

12.7.1 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number

Case Management for Early Childhood Intervention (ECI)

13.1 Enrollment 13-2
13.1.1 Medicaid Managed Care Enrollment 13-2
13.2 Reimbursement 13-2
13.3 Benefits and Limitations 13-2
13.4 Referral Requirements for Children with Disabilities or Developmental Delays 13-2
13.5 Claims Information 13-3
13.5.1 Claim Filing Resources 13-3

CPT only copyright 2005 American Medical Association. All rights reserved.

13.1 Enrollment

To be a qualified provider, the provider must contact the Texas Early Childhood Intervention (ECI) Program at 1-512-424-6754. ECI providers are eligible to enroll as Texas Medicaid Targeted Case Management providers rendering service to children younger than 3 years of age with a disability and/or developmental delay as defined by ECI criteria. After meeting the case management criteria of the Texas ECI Program, providers must request a Medicaid application from TMHP Provider Enrollment.

To participate in the Texas Medicaid Program, an ECI provider must comply with all applicable federal, state, local laws, and regulations about the services provided. Additionally, facilities must be certified by the Texas ECI Program and must submit a copy of the current contract award with the Texas ECI Program.

Refer to: “Provider Enrollment” on page 1-2 for more information about enrollment procedures.

13.1.1 Medicaid Managed Care Enrollment

ECI case management providers do not need to enroll with Medicaid Managed Care. File all claims for ECI services to TMHP, including those for Medicaid Managed Care clients. Medicaid Managed Care health plans are not responsible for reimbursing ECI case management services.

13.2 Reimbursement

ECI case management services are reimbursed according to a maximum allowable fee established by HHSC. The maximum allowable fee for procedure code 1-G9012 is $141.83 per month. Payment for procedure code 1-G9012 was excluded from the 2.5 percent Medicaid payment reduction effective September 1, 2003.

Refer to: “Reimbursement” on page 2-2 for more information on reimbursement.

Reimbursement for public providers is limited to the federal matching percentage of the maximum allowable fee and is subject to adjustment on October 1 of each year, or as otherwise directed by the Centers for Medicare & Medicaid Services (CMS). Reimbursement for private providers is up to the maximum allowable fee.

The Texas Medicaid Program reimburses covered ECI services when provided in natural environments. Natural environments are defined as settings that individual families identify as natural or normal for their family, including the home, neighborhood, and community settings in which children without disabilities participate. ECI case management services may be provided in the following places of service (POS): office/facility (POS 1), home (POS 2), and other locations (POS 9). POS for ECI case management is determined by the case manager’s location at the time the service is rendered.

13.3 Benefits and Limitations

ECI providers are reimbursed for case management services rendered to children younger than 3 years of age with a disability and/or developmental delay as defined by ECI criteria.

Case management services must be stated in the child’s Individualized Family Service Plan (IFSP).

Important: *ECI services end on the child’s third birthday.*

Reminder: *A contact is defined as an activity performed by the assigned case manager with the client or with another person or organization on behalf of the client to locate, coordinate, and facilitate access to necessary services.*

13.4 Referral Requirements for Children with Disabilities or Developmental Delays

ECI is a statewide system of services available to families of children from birth to 3 years of age with disabilities or developmental delays. The state agency responsible for ECI services is the Department of Assistive and Rehabilitative Services (DARS). DARS contracts with local ECI programs to provide services in every Texas county.

All health care professionals are required under federal and state regulations to refer children younger than 3 years of age to ECI within two business days of identification of a disability or suspected delay in development.

Referrals may be based on professional judgment or a family’s concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

ECI programs determine eligibility on referrals based on no-cost evaluations and assessments. Children are eligible if they meet one or more of the following criteria:

- A delay in one or more areas of development
- Atypical development (children who perform within their appropriate age range on test instruments, but whose patterns of development are different from their peers)
- A medically diagnosed condition (children who have a medically diagnosed condition with a high probability of resulting in developmental delay)

Families and professionals work together to develop an IFSP for appropriate services based on the unique needs of the child and the child’s family.

ECI case management services are provided at no cost to families. Other services may include physical, occupational, speech, and language therapy; service coordination; vision services; auditory services; developmental services; nutrition services; family counseling and education; and assistive technology services and devices.

CPT only copyright 2005 American Medical Association. All rights reserved.

To refer families for services, call the local ECI Program or the DARS Inquiries Line at 1-800-628-5115. For brochures or more information, call the DARS Inquiries Line or visit the DARS website at www.dars.state.tx.us/ecis.

Refer to: "Early Childhood Intervention (ECI) (THSteps-CCP Only)" on page 43-53 for additional services.

13.5 Claims Information

Services by an ECI provider must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

13.5.1 Claim Filing Resources

Certified Nurse-Midwife (CNM)

14.1 Enrollment 14-2
14.1.1 Medicaid Managed Care Enrollment 14-2
14.2 Reimbursement 14-2
14.3 Benefits and Limitations 14-2
14.3.1 Deliveries 14-2
14.3.2 Newborn Exams 14-3
14.4 Claims Information 14-3
14.4.1 Claim Filing Resources 14-3

CPT only copyright 2005 American Medical Association. All rights reserved.

14.1 Enrollment

To enroll in the Texas Medicaid Program, a certified nurse-midwife (CNM) must be a licensed registered nurse recognized by the Board of Nurse Examiners for the State of Texas as an advanced practice nurse (APN) in nurse-midwifery and certified by the American College of Nurse-Midwives. A current copy of the provider's American College of Nurse-Midwives Certificate must be submitted with the Medicaid provider enrollment application. A CNM must also be enrolled as a Medicare provider.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

Refer to: The Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan/ for information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding from DSHS.

Effective September 1, 2005, CNMs must use their individual provider identifier to bill for services they provide to Medicaid clients.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendment's (CLIA) rules and regulations. Providers not complying with CLIA are not reimbursed for laboratory services.

A CNM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. The collaborating physician does not have to be a participating provider in the Texas Medicaid Program. If the arrangement is changed or canceled, the CNM must notify TMHP Provider Enrollment in writing within two weeks after the change or cancellation.

CNMs are encouraged to participate in or make referrals to family planning agencies.

CNMs may enroll as providers of Texas Health Steps (THSteps) medical checkups for newborns younger than two months of age and adolescent females. Specific information may be found in the THSteps section of this manual.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Provider Enrollment" on page 43-5 for more information about enrollment in the THSteps Program.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

"Family Planning Services" on page 20-1.

14.1.1 Medicaid Managed Care Enrollment

CNMs are eligible to enroll in Medicaid Managed Care as primary care providers. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

14.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8281, the Medicaid rate for CNMs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The current CNM fee schedule is available on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

14.3 Benefits and Limitations

CNMs may be reimbursed for primary care services including family planning, gynecology services, treatment of acute minor illnesses, chronic stable conditions provided to women throughout their lives, and to newborns for the first two months of life in addition to the maternity cycle care (antepartum, intrapartum, and postpartum).

CNM-performed services are covered by the Texas Medicaid Program if the services are within the scope of practice for CNMs as defined by state law, consistent with rules and regulations made by the Texas Board of Nurse Examiners or other appropriate state licensing authority, and provided by a licensed physician (MD or DO).

Important: *Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and received within 95 days from the date of service.*

14.3.1 Deliveries

Procedure code 2-59410 must be performed in a participating Medicaid Title XIX general or acute care hospital or special hospital or facility licensed and approved for the operation of maternity and newborn services. Home deliveries by a CNM are reimbursable when the CNM has received prior authorization from TMHP for a home delivery. The CNM must submit a written request for prior authorization during the client's third trimester of pregnancy. The CNM must include a statement signed by a licensed physician who has examined the client during the third trimester and determined at that time that she is not at high risk and is suitable for a home delivery. Requests for home delivery prior authorizations must be submitted to the TMHP Medical Director at the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

CPT only copyright 2005 American Medical Association. All rights reserved.

Home deliveries performed by a CNM without prior authorization are denied.

Important: *Childbirth education classes are not a benefit of the Texas Medicaid Program.*

Reminder: *CNMs must bill procedure code 59410 with type of service (TOS) 2.*

14.3.2 Newborn Exams

CNMs must bill procedure code 1-99431 or 1-99432 if all minimum requirements of an initial newborn examination are performed. If the provider chooses to perform a brief examination (that does not include all the components listed), the provider bills the procedure code 1-99431 or 1-99432 with modifier 52, which does not count as a THSteps checkup. One code may be billed once in a lifetime for each newborn.

A THSteps newborn screening exam includes family and neonatal history:

- Physical exam, including length, weight, and head circumference
- Vision and hearing screening
- Health education
- State-required newborn hereditary/metabolic laboratory testing
- Hepatitis B immunization

A $5 fee is paid for each vaccine administered.

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for information about THSteps-CCP Program.

Bill antepartum/postpartum services using the following codes and modifier TH:

Procedure Code/Modifier	
1-99201-TH	1-99202-TH
1-99203-TH	1-99204-TH
1-99205-TH	1-99211-TH
1-99212-TH	1-99213-TH
1-99214-TH	1-99215-TH
1-99341-TH	1-99342-TH
1-99344-TH	1-99345-TH

Refer to: "Maternity Service Clinic (MSC)" on page 31-1 for more information about antepartum care, risk assessment, document requirements, postpartum care, and frequency of services.

"Family Planning Services" on page 20-1 for more information.

14.4 Claims Information

Submit claims for CNM services to TMHP in an approved electronic format or on a CMS-1500 claim form.

All services must be filed using the nine-character CNM provider identifier regardless of the employment arrangements (e.g., physician-, hospital-, or birthing center-employed).

CNMs must bill maternity services in one of two ways: itemizing each service individually on one claim form and filing at the time of delivery (the filing deadline is applied to the date of delivery) or itemizing each service individually and submitting claims as the services are rendered (the filing deadline is applied to each individual date of service).

Refer to: "General Medicaid Eligibility" on page 4-3 for information about crossover payments.

14.4.1 Claim Filing Resources

Certified Registered Nurse Anesthetist (CRNA)

15.1 Enrollment 15-2
15.1.1 Medicaid Managed Care Enrollment 15-2
15.2 Reimbursement 15-2
15.2.1 Base Units 15-2
15.2.2 Time Units 15-2
15.2.3 Interpreting the R&S Report 15-3
15.3 Benefits and Limitations 15-3
15.3.1 Claims Management Modifiers 15-3
15.3.2 Epidurals, Blood Patch 15-3
15.4 Claims Information 15-3
15.4.1 Claim Filing Resources 15-3

CPT only copyright 2005 American Medical Association. All rights reserved.

15.1 Enrollment

To enroll in the Texas Medicaid Program, a certified registered nurse anesthetist (CRNA) must be a registered nurse (RN) approved as an advance practice nurse (APN) by the state where he practices and is currently certified by the Council on Certification of Nurse Anesthetists or the Council on Recertification of Nurse Anesthetists. Medicare enrollment is a prerequisite for enrollment as a Medicaid provider. A current copy of the provider's Council on Certification of Nurse Anesthetists or Recertification of Nurse Anesthetists Certificate must be submitted with the Medicaid provider enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

Refer to: “Provider Enrollment” on page 1-2 for more information about enrollment procedures.

15.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: “Managed Care” on page 7-1 for more information.

15.2 Reimbursement

A CRNA is reimbursed the lesser of either the CRNA's billed charges or 92 percent of the reimbursement for the same sevice paid a physician (MD or DO) anesthesiologist in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8221. The current CRNA fee schedule is available on the TMHP website at www.tmhp.com. To request a copy, call the TMHP Contact Center at 1-800-925-9126.

CRNAs are eligible for high-volume provider payments as specialists in accordance with “Additional Payments to High-Volume Providers” on page 2-6. Medicaid payments to CRNAs are subject to the 2.5 percent Medicaid payment reduction discussed in “Professional Providers and Outpatient Facilities Reimbursement Reduction” on page 2-6.

The following is an example of Texas Medicaid Reimbursement Methodology for CRNA services:

CRNA Reimbursement Methodology	
Time = 120 min, modifier = QX(15)	120/15 = 8 (quantity billed)
Date of service	06/01/02
Procedure code	7-00851 with 6.00 base units + 8 = 14.00
Conversion factor	14.00 x $18.21 = $254.94 (physician reimbursement before 2.5 percent Medicaid payment reduction)
$254.94 x 92%	$234.54 (CRNA reimbursement before 2.5 percent Medicaid payment reduction)

Refer to: “Reimbursement” on page 2-2 for more information about reimbursement.

15.2.1 Base Units

Base units are the RVUs assigned by Texas Medicaid to each anesthesia service billed. The Texas Medicaid Program uses the uniform relative value guide generated by the Texas Medicare Program.

Refer to: Base units assigned to each Current Procedural Terminology (CPT) anesthesia code can be found in the *Texas Medicaid Fee Schedule* posted on the TMHP website.

Important: *For correct processing, providers must bill anesthesia services (type of service [TOS] 7) as the first line item. Any other service billed on the same day must be billed as a subsequent line item.*

15.2.2 Time Units

Time Units are based on the time in minutes indicated on the claim by the provider, divided by 15-minute increments.

Refer to: “Anesthesia for Labor and Delivery” on page 36-24

For continuous epidural analgesia, the Texas Medicaid Program reimburses for the time when the anesthesia provider is physically present and monitoring the continuous epidural. Reimbursable time refers to the time period between the catheter insertion and the commencement of delivery. Claims for procedure codes 7-01967, 7-01968, and 7-01969 must indicate the time spent administering the epidural and the actual time spent with the client. Insertion and injection of the epidural are not reimbursed separately.

An anesthesia provider who administers epidural anesthesiology and remains with the client throughout labor and delivery or Cesarean section should combine all charges with the appropriate CPT anesthesia code (7-01967 for vaginal delivery or 7-01968 for Cesarean section). The claim must reflect the actual time spent administering the

CPT only copyright 2005 American Medical Association. All rights reserved.

epidural and the actual time spent with the client in the delivery and/or operating room. If the anesthesiologist administers the epidural and leaves the client to return at a later time for the delivery or Cesarean section, the time not spent with the client is not reimbursable.

Note: *The anesthesia provider must be physically present in the room to bill for actual time spent with the client.*

15.2.3 Interpreting the R&S Report

The Billed Qty field on the Remittance and Status (R&S) report reflects only the number of units TMHP processed for time. The RVUs assigned for the procedure code are not shown in the Billed Qty field.

15.3 Benefits and Limitations

Reasonable and medically necessary services performed by a CRNA are covered if the services are within the scope of the CRNA's practice, as defined by state law; prescribed and supervised by and provided under the direction of a supervising physician (MD or DO), dentist, or podiatrist licensed in the state in which they practice; or provided under one of the following conditions:

- No physician anesthesiologist is on the medical staff of the facility where the services are provided (e.g., rural settings).
- No physician anesthesiologist is available to provide the services, as determined by the policies of the facility in which the services are provided.
- The physician performing the procedure requiring the services specifically requests the services of a CRNA.
- The eligible client requiring the services specifically requests the services of a CRNA.
- The CRNA is scheduled or assigned to provide the services according to policies of the facility in which the services are provided.
- The services are provided by the CRNA in connection with a medical emergency.

The Texas Medicaid Program does not reimburse the CRNA for equipment, drugs, or supplies—they are the responsibility of the facility where the CRNA services are provided. If the equipment, drugs, and supplies are covered and reimbursable by the Texas Medicaid Program, payment is considered for the Medicaid-enrolled facility. The basis and amount of reimbursement depends on the reimbursement methodology used by the Texas Medicaid Program for the services and providers involved.

15.3.1 Claims Management Modifiers

CRNAs bill using CPT anesthesia procedure codes and either the QX or QZ modifier.

Refer to: "Anesthesia" on page 36-24 for more information on the reimbursement of anesthesia services.

15.3.2 Epidurals, Blood Patch

Procedure code 2-62273 is payable to provider types 04 (independent CRNA) and 05 (independent CRNA group).

15.4 Claims Information

All CRNA services *must* be billed with a CRNA individual provider identifier or a CRNA group provider identifier. *No* payment for CRNA services will be made under a hospital or physician provider identifier.

Providers are to submit CRNA services to TMHP in an approved electronic format or on a CMS-1500 claim form.

Refer to: "Client Eligibility" on page 4-1 for information on crossover payments.

Certified Respiratory Care Practitioner (CRCP) Services

16.1 Enrollment 16-2
16.1.1 Medicaid Managed Care Enrollment 16-2
16.2 Reimbursement 16-2
16.3 Benefits and Limitations 16-2
16.3.1 Procedure Codes 16-2
16.3.2 Prior Authorization 16-2
16.4 Claims Information 16-2
16.4.1 Claim Filing Resources 16-3

CPT only copyright 2005 American Medical Association. All rights reserved.

16.1 Enrollment

To enroll in the Texas Medicaid Program, a certified respiratory care practitioner (CRCP) must be certified by the Department of State Health Services (DSHS) to practice under *Texas Occupation Code*, Chapter 604. Medicare certification is not a prerequisite for Medicaid enrollment.

A provider cannot be enrolled if his license is due to expire within 30 days; a current license must be submitted.

CRCPs must enroll as individual providers and comply with all applicable federal, state, and local laws and regulations.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

16.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

16.2 Reimbursement

Respiratory therapy services provided by a participating CRCP are reimbursed the lesser of the provider's billed charges or the rate calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8089, which is $66.68 per daily visit for procedure code 1-99503.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

16.3 Benefits and Limitations

TMHP must prior authorize all in-home respiratory therapy services.

Respiratory therapy services provided by a Medicaid provider enrolled as a CRCP may be reimbursed when services are reasonable, medically necessary, and prescribed by the client's physician. These services are for all age groups and do not require the client to be homebound.

Medicaid coverage of CRCP services is available to clients who meet the following criteria:

- Are ventilator-dependent for life support at least six hours per day
- Are ventilator-dependent for at least 30 consecutive days as an inpatient in one or more hospitals, skilled nursing facilities (SNF), or intermediate care facilities (ICF)
- Require respiratory care as an inpatient in a hospital, SNF, or ICF and would be eligible to have payment made for such inpatient care
- Have adequate social support services available for care at home
- Prefer care at home

16.3.1 Procedure Codes

Procedure code 1-99503 is allowable for CRCP services.

The recommended frequency for procedure code 1-99503 is as follows: one visit daily for the initial seven days of home ventilation therapy; one visit every fourth day through the initial 30 days of home ventilation therapy; and one visit every four weeks thereafter.

Procedure code 1-99503 includes, but is not limited to, the following:

- Respiratory therapy services and treatments prescribed by the client's physician
- Education of the client and/or appropriate family members/support people about the in-home respiratory care (must include the use and maintenance of required supplies, equipment, and techniques appropriate to the situation)

Important: *Procedure code 1-99503 may be reimbursed once per day, up to 24 visits per year.*

16.3.2 Prior Authorization

The CRCP must request and receive prior authorization from TMHP for in-home respiratory therapy services. Prior authorization requests must include the dated physician's order, all pertinent medical records, and other information to justify the medical necessity/dependency of ventilator support and/or requested therapy services. Authorization may be given for up to 12 months and may be extended based on an interim report from the physician that documents the medical necessity and appropriateness of continued in-home respiratory therapy services.

All supporting documentation must be included with the request for authorization. Providers should send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-A Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

16.4 Claims Information

CRCP services must be submitted to TMHP in an approved electronic claims format or on an CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

Important: *Electronic billers must submit the Prior Authorization Number (PAN) on the electronic claim form. Providers should consult the software vendor for the location of this field in the software.*

Chemical Dependency Treatment Facility (CDTF)

17.1 Enrollment 17-2
  17.1.1 Medicaid Managed Care Enrollment 17-2
17.2 Reimbursement 17-2
17.3 Benefits and Limitations 17-2
  17.3.1 Outpatient Counseling 17-2
17.4 Claims Information 17-2
  17.4.1 Claim Filing Resources 17-3

CPT only copyright 2005 American Medical Association. All rights reserved.

17.1 Enrollment

Only chemical dependency treatment facilities (CDTFs) licensed by the Department of State Health Services (DSHS) are eligible to enroll and participate in the Texas Medicaid Program. Each facility must submit a copy of its DSHS license with the enrollment packet. State and federally-owned facilities are exempt from the licensing requirement.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

17.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll in Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. A CDTF that provides behavioral health services to clients in NorthSTAR must be a network provider of the NorthSTAR behavioral health organization.

Refer to: "Managed Care" on page 7-1

17.2 Reimbursement

Chemical dependency treatment facilities are reimbursed the lesser of the billed amount or the established maximum allowable fee.

The Texas Medicaid Program covers outpatient counseling services for chemically dependent children and adolescents. The Texas Medicaid Program provides reimbursement for the following outpatient counseling services with modifier HF, Substance abuse program:

Procedure Code	Maximum Fee
9-H0004	$11.75
9-H0005	$16.00

Reimbursable procedure codes that are available to the CDTF/DSHS provider type include 9-H0004 with modifier HF and 9-H0005 with modifier HF. Procedure code 9-H0004 is billed in 15-minute intervals. Procedure code 9-H0005 is billed in 1-hour increments.

Refer to: "Reimbursement" on page 2-2 for more information.

17.3 Benefits and Limitations

17.3.1 Outpatient Counseling

CDTF services must be rendered in accordance with the DSHS Chemical Dependency Treatment Facility Licensure Standards. Eligibility for services and the specific services to be provided must be determined by a qualified credentialed counselor (QCC), as defined by DSHS. To be eligible for admission to a chemical dependency treatment program, an individual must meet the criteria for substance abuse or substance dependence as defined in the latest edition of the *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV). Sufficient documentation must be maintained in the client record to support the diagnosis and justify the placement decision into the program.

The Texas Medicaid Program covers outpatient counseling services for chemically dependent children and adolescents who are 13 through 17 years of age.

Children who are 10 through 12 years of age and young adults who are 18 through 20 years of age may receive chemical dependency outpatient counseling services only when the assessment indicates that the individual's needs, experiences, and behavior are similar to those of adolescent clients. Every age exception must be clinically justified, documented, and approved in writing by a QCC. Supporting documentation, including written approval by the QCC, must be maintained by the facility in the client record.

Outpatient group counseling is limited to 135 hours per client, per calendar year (January 1 through December 31). Outpatient individual counseling is limited to 26 hours per client, per calendar year. Outpatient group and individual counseling is only payable in the outpatient setting, and place of service (POS) code 5 should be indicated on the paper claim. Clients in an inpatient status, such as residing in a DSHS facility, are *not* eligible for these outpatient services.

Modifier HF is required on all procedures billed by CDTF/DSHS.

17.4 Claims Information

Chemical dependency treatment services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

CPT only copyright 2005 American Medical Association. All rights reserved.

17.4.1 Claim Filing Resources

Important: *Electronic billers must bill POS code 22 in the appropriate field and must submit their own nine-character provider identifier in the facility ID field. Providers should consult with their software vendor for the location of this field in the software.*

Refer to the following sections and/or forms when filing claims:

Chiropractic Services

18.1 Enrollment 18-2
18.1.1 Medicaid Managed Care Enrollment 18-2
18.2 Reimbursement 18-2
18.3 Benefits and Limitations 18-2
18.4 Claims Information 18-3
18.4.1 Claim Filing Resources 18-3

CPT only copyright 2005 American Medical Association. All rights reserved.

18.1 Enrollment

To enroll in the Texas Medicaid Program, a doctor of chiropractic medicine (DC) must be licensed by the Texas Board of Chiropractic Examiners and enrolled as a Medicare provider.

Providers cannot be enrolled, if their license is due to expire within 30 days; a current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

18.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

18.2 Reimbursement

The Medicaid rates for chiropractic services are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8085.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

18.3 Benefits and Limitations

Medicaid reimburses the treatment of a spinal subluxation by manual manipulation of the spine. The exact level of subluxation must be indicated by the appropriate *International Classification of Diseases, Ninth Edition, Clinical Modification* (ICD-9-CM) diagnosis code listed in the following table or narrative. Chiropractors are not required to certify that an X-ray is available to demonstrate the existence of a subluxation. However, chiropractors may choose to use an X-ray for this purpose.

Providers who choose to document a subluxation by X-ray may refer to the following guidelines:

- An acute condition is documented by an X-ray taken no more than three months before the date treatment is initiated.
- A chronic condition is documented by an X-ray taken no more than 12 months before the initiation of treatment.
- An older X-ray may be used if the subluxation has existed for more than 12 months and is considered a chronic and permanent condition.

The following diagnoses are accepted in lieu of written documentation to indicate treatment of subluxation and the level:

Diagnosis Code	Description
7390	Nonallopathic lesions of head region, not elsewhere classified
7391	Nonallopathic lesions of cervical region, not elsewhere classified
7392	Nonallopathic lesions of thoracic region, not elsewhere classified
7393	Nonallopathic lesions of lumbar region, not elsewhere classified
7394	Nonallopathic lesions of sacral region, not elsewhere classified
7395	Nonallopathic lesions of pelvic region, not elsewhere classified
7398	Nonallopathic lesions of rib cage, not elsewhere classified
83900	Closed dislocation, cervical vertebra, unspecified
83901	Closed dislocation, first cervical vertebra
83902	Closed dislocation, second cervical vertebra
83903	Closed dislocation, third cervical vertebra
83904	Closed dislocation, fourth cervical vertebra
83905	Closed dislocation, fifth cervical vertebra
83906	Closed dislocation, sixth cervical vertebra
83907	Closed dislocation, seventh cervical vertebra
83908	Closed dislocation, multiple cervical vertebra
83920	Closed dislocation, lumbar vertebra
83921	Closed dislocation, thoracic vertebra
83949	Closed dislocation, other vertebra

Medicaid does not reimburse chiropractors for X-ray services, office visits, injections, supplies, appliances, spinalator treatments, laboratory services, physical therapy, or other adjunctive services furnished by themselves or by others under their orders or directions.

Coverage includes up to 12 treatments per benefit period. For chiropractic services, *a benefit period* is defined as "12 consecutive months, beginning with the date the client receives the first Medicaid-covered chiropractic treatment." Benefits cannot exceed one treatment per day.

CPT only copyright 2005 American Medical Association. All rights reserved.

Coverage is limited to the following procedure codes:

Procedure Code	Place of Service	Maximum Fee
1-98940	1, 2	$20.46
1-98941	1, 2	$25.91
1-98942	1, 2	$31.91

The AT modifier is *required* to identify acute CMT services.

Qualified Medicare Beneficiary (QMB) and Medicaid Qualified Medicare Beneficiary (MQMB) clients are excluded from chiropractic limitations. When chiropractic services are billed for these clients, the service is denied with instructions to bill Medicare first.

18.4 Claims Information

Chiropractic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

18.4.1 Claim Filing Resources

19.1 Communication with TMHP

For assistance with claims or client eligibility questions, dental providers may contact a TMHP call center representative on the Dental Inquiry Line or access the Automated Inquiry System (AIS).

19.1.1 Dental Inquiry Line

The Dental Inquiry Line (1-800-568-2460) is available Monday through Friday, 7 a.m. to 7 p.m., Central Time, and is the main point of contact for information about dental services and appeals.

Any dental service claim denial may be appealed by telephone if it was *not* denied as an incomplete claim and does not require one of the following items or conditions:

- Narratives
- Radiographs
- Models
- Other tangible documentation
- Review by the TMHP Dental Director

19.1.2 AIS

AIS (1-800-925-9126, Option 1) is available 7 days a week, 23 hours a day, with scheduled downtime between 3 a.m. and 4 a.m., and is the main point of contact for client eligibility.

Refer to: "Automated Inquiry System (AIS)" on page xiii for more information. AIS requires a touch-tone telephone.

19.1.3 TMHP Website

Additional information about Medicaid enrollment, general customer service, and provider education/training is available on the TMHP website at www.tmhp.com.

19.1.4 Texas Health Steps (THSteps) and Intermediate Care Facility for the Mentally Retarded (ICF–MR) Dental Prior Authorization

Submit claims, dental correspondence, and THSteps and ICF-MR prior authorization requests to the appropriate address listed in the table below:

Correspondence	Address
American Dental Association (ADA) dental claim forms	Texas Medicaid & Healthcare Partnership PO Box 200555 Austin, TX 78720-0555
All dental correspondence Prior authorization requests	Texas Medicaid & Healthcare Partnership THSteps and ICF-MR Dental Authorization PO Box 202917 Austin, TX 78720-2917

19.2 General Information

Medicaid dental services rules are described under Title 25 *Texas Administrative Code* (TAC) Part 1, Chapter 33, Subchapter G, §§33.301–33.311, §§33.314–33.315, §§33.317–33.320, Subchapter H, §33.331, §33.334, and §§33.351–33.358. The online version of TAC is available at the Secretary of State's website at www.sos.state.tx.us/tac/index.shtml.

19.2.1 THSteps

A broad range of dental services is available to THSteps-eligible clients, including emergency, diagnostic, preventive, therapeutic, and orthodontic services.

Refer to: "THSteps Dental Services" on page 19-5.

19.2.2 Client Rights

Dental providers enrolled in the Texas Medicaid Program enter into a written contract with the HHSC to uphold the following rights of the Medicaid client:

- To receive dental services that meet or exceed the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the Texas State Board of Dental Examiners (TSBDE).
- To receive information following a dental examination regarding the dental diagnosis; scope of proposed treatment, including alternatives and risks; anticipated results; and the need for administration of sedation or anesthesia, including risks.
- To have full participation in the development of the treatment plan and the process of giving informed consent.
- To have freedom from physical, mental, emotional, sexual, or verbal abuse or harm from the provider or staff.
- To have freedom from overly aggressive treatment in excess of that required to address documented medical necessity.

Important: *A provider's failure to ensure any of the client rights may result in termination of the provider agreement or contract and other civil or criminal remedies.*

19.2.3 Reporting Child Abuse or Neglect

All THSteps providers are required to report suspected child abuse or neglect as outlined in "Reporting Child Abuse or Neglect" on page 1-5 through "Training" on page 1-6.

19.2.4 Complaint Management System

The program receives and documents complaints from any source and refers them to the appropriate entity for

CPT only copyright 2005 American Medical Association. All rights reserved.

investigation. Examples of complaints from clients regarding providers include:

- The provider did not consult with the client, explain what services were necessary, or obtain parent/guardian informed consent.
- The treating provider refused to make the child's record available to the new provider.
- The provider did not give the child enough/any local anesthesia or pain medication.
- The provider did not use sterile procedures; the facility and/or equipment were not clean.
- The provider and/or his staff was verbally abusive.
- The client did not receive a service, but the provider billed Medicaid.
- The provider charged a Medicaid client for covered benefits.

19.2.5 ICF-MR

A broad range of preventive and therapeutic dental services is available to Medicaid-eligible residents of ICF-MR facilities who are 21 years of age or older.

Refer to: "ICF-MR Dental Services" on page 19-7.

19.2.6 Emergency Services

A limited range of services is available, with prior authorization, for Medicaid eligibles of *any age* who have a dental-related problem that is secondary to a life-threatening medical problem.

Refer to: "Doctor of Dentistry Practicing as a Limited Physician" on page 36-335 for complete description and details.

19.2.7 Long Term Care (LTC) Emergency Dental Services

The Department of Aging and Disability Services (DADS) provides a limited range of dental services for Medicaid-eligible residents of LTC facilities. For information, providers should contact the appropriate LTC facility or DADS at 1-512-438-2633.

19.3 Provider Enrollment

To become a provider of THSteps or ICF-MR dental services, a dentist must:

- Currently be licensed by the TSBDE or currently be licensed in the state where the service was performed
- Practice within the scope of his professional licensure
- Complete the Dental Provider Enrollment Application and return it to TMHP

Call the TMHP Contact Center at 1-800-925-9126 to request application forms, or download them from the TMHP website at www.tmhp.com. Out-of-state providers should refer to Section 2.5 "Medicaid Service Provided Outside Texas".

A provider cannot be enrolled if his license is due to expire within 30 days; a current license must be submitted. Dental licensure for owners of a dental practice is a requirement of the Occupations Code, *Vernon's Texas Codes Annotated (VTCA),* Subtitle D, Chapters 251-267 (the *Dental Practice Act*).

A dentist must complete the Dental Provider Enrollment Application for each separate practice location and will receive a unique provider identifier if the application is approved.

The application form includes a written agreement with HHSC.

Refer to: "Doctor of Dentistry Practicing as a Limited Physician" on page 19-50 for information on Doctor of Dentistry enrollment.

19.3.1 Provider Enrollment Requirements

Providers interested in enrolling in the Texas Medicaid Program must be actively licensed with the TSBDE or other state where services are provided. Dental licensure for owners of a dental practice is a requirement of the *Dental Practice Act*. All owners of a dental practice must maintain an active license status with the TSBDE to receive reimbursement from Medicaid. Any change in ownership or licensure must be reported in writing to TMHP Provider Enrollment.

Dental providers may enroll in the THSteps Dental and ICF-MR Dental Programs or as a Doctor of Dentistry Practicing as a Limited Physician, or both. The enrollment requirements are different with respect to the category of enrollment.

Dentists must specify a category of practice by choosing one of the specialties listed in "Categories of Practice" on page 19-5 of this manual.

Changes of licensure status or category of practice must be reported immediately and will affect reimbursement by the Medicaid program.

Refer to: "Maintenance of Provider Information" on page 1-6.

"Provider Enrollment" on page 1-2.

19.3.1.1 THSteps Dental Checkup/Treatment Facilities

All THSteps dental checkup/treatment policies apply to examinations and treatment completed in a dentist's office, a health department, clinic setting, or in a mobile/satellite unit. *Enrollment of a mobile/satellite unit must be under a dentist or clinic name*. Mobile units can be a van or any area away from the primary office and are considered extensions of that office and are not separate entities. The physical setting must be appropriate so that all elements of the checkup/treatment can be completed. The checkup must meet the requirements detailed in

CPT only copyright 2005 American Medical Association. All rights reserved.

"Parental Accompaniment" on page 19-39. The provider with a mobile unit must obtain a permit from the TSBDE for the unit.

19.3.1.2 THSteps Dental and ICF-MR

Providers may enroll as a group practice or as an individual dentist.

The individual dentist must designate that primary services will be provided within a specific category of practice.

Regardless of the category of practice type designation under THSteps Dental, providers can only bill for THSteps/ICF-MR services.

Refer to: "Categories of Practice" on page 19-5.

"THSteps" on page 19-3 for more information on the services that are reimbursable.

19.3.1.3 Doctor of Dentistry Practicing as a Limited Physician

Providers may enroll as a dental group or as an individual dentist.To enroll as a Doctor of Dentistry Practicing as a Limited Physician, a dentist must:

- Currently be licensed by the TSBDE or currently be licensed in the state where the service was performed at that time
- Have a *Medicare* provider identification number before applying for and receiving a *Medicaid* provider identifer
- Enroll as a Medicaid provider with a limited physician provider identifier

Refer to: "Doctor of Dentistry Practicing as a Limited Physician" on page 36-335 for a complete description and details.

19.3.1.4 Categories of Practice

All dental providers must declare one of the following categories:

- General practice
- Pediatric dentist
- Periodontist
- Endodontist
- Oral and maxillofacial surgeon
- Orthodontist
- Other (prosthodontist, public health, and others)

19.3.2 THSteps and ICF-MR Provision of Services

All THSteps and ICF-MR dental services shall be performed by the enrolled provider except for permissible work done by a licensed dental hygienist, dental assistant, or dental technician in a dental laboratory on the premises where the dentist practices, or in a commercial laboratory registered with the TSBDE. The *Texas Dental Practice Act* and the rules and regulations of the TSBDE (22 TAC, Part 5) define the scope of work that dental auxiliary personnel may perform. Any deviations from these practice limitations shall be reported to the TSBDE and HHSC, and could result in sanctions or other actions imposed against the provider.

***Note:** According to federal Medicaid guidelines, dental services that are not covered under the THSteps Dental Program that are medically necessary, and for which Federal Financial Participation (FFP) is available, may be considered for THSteps-eligible clients through the Comprehensive Care Program (CCP).*

Refer to: "THSteps Medical and Dental Administrative Information" on page 43-5.

19.4 Medicaid Managed Care Enrollment

THSteps, ICF-MR, and emergency dental service providers do not need to enroll in Medicaid Managed Care.

All claims for services provided by a dentist for THSteps and ICF-MR clients are submitted to TMHP.

All claims for emergency dental services provided to LTC residents are submitted to DADS.

If the client is enrolled in Medicaid Managed Care, the dentist *must request precertification* or approval from the client's Managed Care Organization (MCO) for anesthesia, facility use, and charges. *The dentist must use the MCO's contracted facility and anesthesia provider.* These services are included in the capitation rates paid to health maintenance organizations (HMOs), and the facility/ anesthesiologist risks nonpayment from the HMO without such prior approval. Coordination of all specialty care is the responsibility of the client's primary care provider. The primary care provider must be notified by the dentist and/ or the MCO of the planned services.

19.5 THSteps Dental Services

THSteps is the Texas version of the Medicaid program known as Early and Periodic Screening, Diagnosis, and Treatment (EPSDT).

THSteps dental services are mandated by Medicaid to provide for the early detection and treatment of dental health problems for Medicaid-eligible clients younger than 21 years of age. THSteps dental service standards were designed to meet federal regulations and incorporate the recommendations of representatives of dental professional organizations in the state.

The *Omnibus Budget Reconciliation Act* (OBRA) of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which FFP is available, regardless of the limitations of the Texas Medicaid Program. This expansion is referred to as CCP.

Refer to: "THSteps Medical and Dental Administrative Information" on page 43-5 for more information.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.5.1 How the Program Works

THSteps' designated staff (Texas Department of State Health Services [DSHS], DADS, or contractor), through outreach and information, encourage eligible children to use THSteps dental checkups and prophylactic care when children first become eligible for Medicaid, and each time children are periodically due for their next dental checkup.

A message (THSteps Dental Checkup Due) will appear on the client Medicaid Identification Form (Form H3087) under the child's name when a child is eligible for a THSteps Dental checkup but has not been seen within the last 6 months. This message is intended as a reminder to the parent, not the provider, that the child is due for a periodic dental checkup. The absence of such a message means that a dental provider has provided the child a periodic dental checkup within the last 6 months.

Important: *The provider may provide other covered services to a client as long as the client's Medicaid eligibility is current for that month.*

Children within regular Medicaid have free choice of Medicaid-enrolled providers and are given names of enrolled providers. Call 1-877-847-8377 for a list of THSteps dental providers in a specific area.

Upon request, DSHS (or its contractor) will assist eligible children with scheduling and free transportation to their dental appointment. For transportation arrangements, clients can call the Medical Transportation Program at 1-800-633-8747.

Note: *Children younger than 15 years of age must be accompanied by the child's parent, legal guardian, or other family member, at all dental visits. For additional information and exceptions, see "Parental Accompaniment" on page K-2.*

19.5.2 Dental Referrals

Routine Dental Referrals

Children may receive THSteps dental periodic checkups beginning at 12 months of age, and every 6 months thereafter through 20 years of age. Children younger than 12 months of age are not eligible for *routine* dental examinations; however, they may be referred when a medical checkup identifies the medical necessity for dental services. Children younger than 12 months of age also can be seen for emergency dental services by the dentist at any time for trauma, baby bottle tooth decay, or other oral health problems, such as early childhood caries (cavities).

If a THSteps dental checkup reveals a dental health condition that requires follow-up diagnosis or treatment, the provider performing the dental checkup should assist the client in planning follow-up care or in making a referral to the qualified provider. This manual provides information regarding covered benefits, getting assistance to identify qualified providers, and how to code and bill for services covered by the THSteps, THSteps-CCP, or traditional Medicaid programs.

If the client is enrolled in a Medicaid Managed Care HMO, the dental care will be provided by fee-for-service providers; however, other providers, such as the facility and anesthesiology care, must be HMO network providers or pre-approved by the HMO.

Note: *Clients up to 21 years of age also may self-refer for dental services.*

19.5.3 THSteps Dental Eligibility

The client must be Medicaid- and THSteps-eligible (younger than 21 years of age) at the time of the service request and service delivery. However, orthodontic services already in progress may be continued even after the client loses Medicaid eligibility if treatment is begun before the 21st birthday and is completed within 36 months. The client is *not* eligible for THSteps dental preventive or therapeutic benefits if the client's Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Forms H1027 and H1027 A-C) states *any* of the following:

- Emergency care only
- Presumptive eligibility (PE)
- Qualified Medicare beneficiary (QMB)

A client is eligible for oral evaluations and preventive dental services beginning at 12 months of age and once every 6 months thereafter. A message appears below the client's name on the monthly client Medicaid Identification Form (Form H3087) stating the client is due for a dental checkup, which is a reminder to parents.

Emergency and orthodontic services can be provided within the guidelines specified for each area.

Clients are not eligible for CCP services on or after their 21st birthday, but are eligible for non-CCP THSteps dental services (see fee schedule for CCP and non-CCP reimbursed services) through the end of the month of their 21st birthday.

Note: *If a client has a birthday on any day except the first day during the month, the new eligibility period is considered to begin on the first day of the following month.*

Refer to: "Medicaid Identification Form H3087" on page 4-18.

"Emergency Services" on page 19-4 and "Doctor of Dentistry Practicing as a Limited Physician" on page 36-335.

"Orthodontic Procedure Codes and Fee Schedule" on page 19-43.

"Medicaid Dental Fee Schedule" on page 19-9.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.6 ICF-MR Dental Services

ICF-MR dental services are mandated by Medicaid, and reimbursement is provided for treatment of dental problems for Medicaid-eligible residents of ICF-MR facilities who are 21 years of age or older. Residents of ICF-MR facilities who are younger than 21 years of age receive services through the regular THSteps Program. Eligibility for ICF-MR services is determined by DADS.

Procedure codes without a CCP designation in the *Limitations* column of the dental fee schedule may be billed in a routine manner for ICF-MR clients.

These procedures must be documented as medically necessary and appropriate. ICF-MR clients are *not* subject to periodicity for preventive care.

Important: *For procedure codes with a CCP designation, a provider may request authorization with documentation or provide documentation on the submitted claim.*

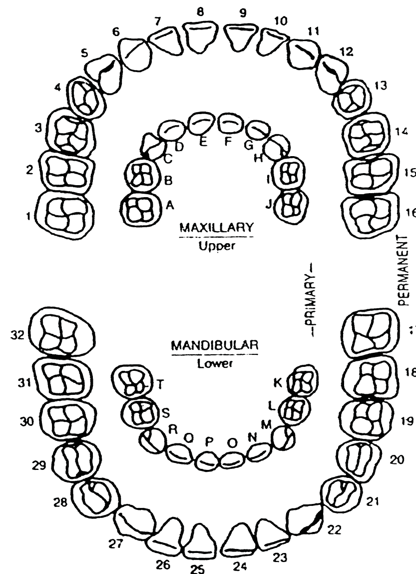
Refer to: "Texas Health Steps (THSteps) and Intermediate Care Facility for the Mentally Retarded (ICF–MR) Dental Prior Authorization" on page 19-3 for questions about ICF-MR services.

"Medicaid Dental Fee Schedule" on page 19-9.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.7 Tooth Identification (TID) and Surface Identification (SID) Systems

Claims are denied if the procedure code is not compatible with TID and/or SID. Use the alpha characters to describe tooth surfaces or any combination of surfaces. Anterior teeth have facial and incisal surfaces only. Posterior teeth have buccal and occlusal surfaces only.



SID	SID	SID	SID
Buccal	DB	DFI	DLIF
Distal	DF	DFL	DOLB
Facial	DI	DFM	MIDF
Incisal	DL	DIL	MIDL
Lingual	DO	DLB	MIDLF

19.7.1 Supernumerary Tooth Identification

Each identified permanent tooth and each identified primary tooth has its own identifiable supernumerary number. This developed system can be found in the *Current Dental Terminology* (CDT) published by the ADA.

The TID for each identified supernumerary tooth will be used for paper and electronic claims and can only be billed with the following procedure codes:

- For primary teeth only: D7111
- For both primary and permanent teeth the following codes are billable: D7140, D7210, D7220, D7230, D7240, D7241, D7250, D7285, D7286, and D7510

19.8 Benefits and Limitations

All dental providers must comply with the rules and regulations of the TSBDE, including standards for documentation and record maintenance as stated in the TSBDE Rules 22 TAC §108.7, *Minimum Standard of Care, General*, and §108.8, *Records of the Dentist*.

19.8.1 Medicaid Dental Fee Schedule

For THSteps clients, procedure limitations may be waived when *all* the following have been met:

- Medically necessary and for which FFP is available
- Prior authorized by the TMHP Dental Director
- Properly documented in the client's record (refer to "Documentation Requirements" on page 19-39)

Important: *For ICF-MR clients, services designated as CCP-type are available.*

In the *Limitations* column of the fee schedule, abbreviations indicate the age range limitations and documentation requirements.

The following abbreviations also appear in a table at the bottom of each page of the fee schedule:

Acronym	Description
A	Age range limitations
CCP	Payable under CCP for clients younger than 21 years of age when THSteps benefits or limits are exceeded
FMX	Intraoral radiographs—complete series
FQHC	Federally qualified health center
MTID	Missing tooth ID(s)
N	Narrative of medical necessity of procedure is required to be retained in the client's record
NC	No charge to Medicaid and may not bill the client
PATH	Pathology report to accompany claims and required to be retained in the client's record
PC	Periodontal charting is required to be retained in the client's record
PHO	Pre- and post-operative photographs required
PPXR	Pre- and post-operative radiographs are required and are to be retained in the client's record; do not send with initial claims
PXR	Preoperative radiographs are required and are to be retained in the client's record; do not send with initial claims

19.8.2 Diagnostic

Procedure Code	Limitations	Maximum Fee
	Clinical Oral Evaluations	
All evaluations are subject to a six-month periodicity, per provider.		
D0120*	Exam performed subsequent to the initial exam with a recall prophylaxis or periodic six-month examination. A 1-20	$14.72
D0140*	An evaluation for a specific oral health problem. When used for emergency claims, the appropriate block must be checked. ET modifier required for electronic claims. A 1-20, N	$19.16
D0150*	May be billed *once* in client's lifetime per provider. A 1-20	$18.02

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Limitations	Maximum Fee
D0160*	Problem-focused detailed and extensive, by report. Not payable for routine post-op follow-up. A 1-20, N, CCP	$15.25
D0170*	A 1-20	$16.88
D0180*	Limited to once per lifetime per provider; may not be paid on the same day as procedure codes D0120, D0140, D0150, D0160, or D0170. A 13-20	$8.02
	Radiographs/Diagnostic Imaging (Including Interpretation)	
D0210	Number of films required is dependent on age of client—in no case are less than eight films required. Adults and children over 12 years of age require 12-20 films, as is appropriate. The Panorex (D0330) with four bitewing radiographs (D0274) may be considered equivalent to the complete or full-mouth series (D0210), and the billed amount for either combination is equivalent to the maximum fee of $36.04. Allowable once every three years by the same dentist. Not allowed as an emergency service. A 2-20	$36.04
D0220	A 1-20	$6.41
D0230	The total cost of periapicals and/or other radiographs cannot exceed the payment for a complete intraoral series. A 1-20	$5.87
D0240	May be billed once per arch. Periapical films taken at an occlusal angle should be billed as periapical radiograph, code D0230. May be billed as an emergency service. A 7-20	$10.00
D0250	A 1-20, N, CCP	$18.75
D0260	A 1-20, N, CCP	$12.50
D0270	A 2-20	$5.00
D0272	A 2-20	$11.93
D0274	A 2-20	$17.66
D0277	Not to be billed within 36 months of D0210 or D0330. A 1-20	$31.75
D0290	A 1-20, N, CCP	$33.75
D0310	A 1-20, N, CCP	$45.00
D0320	A 1-20, N, CCP	$75.00
D0321	A 1-20, N, CCP	$35.00
D0322	A 1-20, N, CCP	$33.75
D0330*	Limited to one panoramic film during 3-9 years of age and one film during 10-20 years of age, by the same dentist or a group. Not allowed on emergency claims unless third molars or a traumatic condition is involved. Supplemental bitewings are payable in addition to a panoramic with reimbursement not to exceed the total reimbursement for a full mouth radiograph ($36.04 each). Under 3 years of age, must document the necessity of a panoramic film. The Panorex (D0330) with four bitewing radiographs (D0274) may be considered equivalent to the complete or full-mouth series (D0210), and the billed amount for either combination is equivalent to the maximum fee of $36.04. A 3-20	$32.54
D0340*	Not reimbursable separately when diagnostic work-up or crossbite therapy work-up performed. A 1-20, N, CCP	$33.75

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Limitations	Maximum Fee
D0350	For all images taken. Not reimbursable separately when diagnostic work-up or crossbite therapy work-up performed. A 1-20	$18.75
***Note:** Radiograph codes do not include the exam. If an exam is also performed, providers must bill the appropriate ADA procedure code.*		
Tests and Examinations		
D0415	A 1-20, N, CCP	$25.00
D0425	Not reimbursable separately, considered part of all other dental procedures.	NC
D0460	Not reimbursable separately when any endodontic procedure code performed. A 1-20, N, CCP	$12.50
D0470*	Not reimbursable separately when crown, fixed prosth-odontics, diagnostic work-up, or crossbite therapy work-up performed. A 1-20, N, CCP	$22.50
Oral Pathology Laboratory		
D0472	By pathology laboratories only. (refer to CPT codes)	NC
D0473	By pathology laboratories only. (refer to CPT codes)	NC
D0474	By pathology laboratories only. (refer to CPT codes)	NC
D0480	By pathology laboratories only. (refer to CPT codes)	NC
D0502	A 1-20, N, CCP	$57.50
D0999	A 1-20, N, CCP	Manually priced
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter		

19.8.3 Preventive

Procedure codes D1110, D1120, D1201, D1203, D1204, D1205, and D1351 are not a benefit when billed on the same date of service as any D4000 series periodontal procedure code.

Procedure Code	Limitations	Maximum Fee
Dental Prophylaxis		
D1110*	Limited to one prophylaxis per client per six-month period (includes oral health instructions). If billed on emergency claim, procedure code will be denied. A 13-20	$28.00
D1120*	Limited to one prophylaxis per client per six-month period (includes oral health instructions). If billed on emergency claim, procedure code will be denied. A 1-12	$18.75
Topical Fluoride Treatment (Office Procedure)		
D1201*	A 1-12 (includes oral health instructions)	$28.68
D1203*	This code (D1203) is payable with codes D4210, D4240, D4260, D4341, or D4355 when billed on the same date of service (includes oral health instructions). A 1-12, N, CCP	$7.50
D1204*	This code (D1204) is payable with codes D4260, D4341, or D4355 when billed on the same date of service (includes oral health instructions). A 13-20, N, CCP	$7.50
D1205*	A 13-20 (includes oral health instructions)	$35.47
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter		

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Limitations	Maximum Fee
	Other Preventive Services	
D1320	A client requiring tobacco counseling may be referred to a THSteps primary care provider.	NC
D1330	Requires documentation of the type of instructions, number of appointments, and content of instructions. This procedure is payable *only* for medically necessary situations that are *non-routine.* May be considered for reimbursement with D4355, D4341, and other periodontal procedures. This procedure refers to services above and beyond routine brushing and flossing instruction and requires that additional time and expertise have been directed toward the client's care. Oral hygiene instruction is denied when billed on the same day as dental prophylaxis (D1110, D1120) and/or topical fluoride treatments with prophylaxis (D1201, D1205) by the same provider. Procedure code D1330 is limited to once per client, per year by *any* provider. A 1-20, N, CCP	$12.50
D1351*	Sealants may be applied at any age to the occlusal, buccal, and lingual pits and fissures of any tooth that is at risk for dental decay and is free of proximal caries and free of restorations on the surface to be sealed. Indicate the tooth numbers and surfaces on the claim form. Reimbursement will be considered on a per-tooth basis, regardless of the number of surfaces sealed. A 1-20	$14.41
	Space Maintenance (Passive Appliances)	
When a client needs a space maintainer and exceeds the listed age limitation, the service can be covered under CCP. The provider must justify medical necessity with radiograph(s) and/or a narrative on the authorization request and receive authorization for payment of the service. Limitation for space maintainers is to hold the space for the loss of one of the *first or second primary molars* (#A, #B, #I, #J, #K, #L, #S, and #T) or the loss of a *permanent first molar* (#3, #14, #19, and #30). There is no payment for replacement if it was previously paid for by Medicaid/THSteps. Fees for space maintainers include maintenance and repair. One space maintainer is reimbursed per TID, per client, per lifetime.		
D1510*	A 1-20 (#A, #B, #I, #J, #K, #L, #S, #T), MTID A 3-20 (#3, #14, #19, #30), MTID	$80.00
D1515*	A 1-20 (#A, #B, #I, #J, #K, #L, #S, #T), MTID A 3-20 (#3, #14, #19, #30), MTID	$118.75
D1520*	A 1-20 (#A, #B, #I, #J, #K, #L, #S, #T), MTID A 3-20 (#3, #14, #19, #30), MTID	$75.00
D1525*	A 1-20 (#A, #B, #I, #J, #K, #L, #S, #T), MTID A 3-20 (#3, #14, #19, #30), MTID	$106.25
D1550*	A 3-12 (#A, #B, #I, #J, #K, #L, #S, #T), MTID A 3-20 (#3, #14, #19, #30), MTID	$18.75

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

CPT only copyright 2005 American Medical Association. All rights reserved.

19.8.4 Therapeutic

19.8.4.1 Medicaid Reimbursement Limitations

Medicaid reimbursement is contingent on compliance with the following limitations:

- For documentation requirements, refer to "Documentation Requirements" on page 19-39.
- Restorations on permanent posterior teeth, except codes D2510, D2520, D2530, D2542, D2543, D2544, D2610, D2620, D2630, D2642, D2643, D2644, D2650, D2651, D2652, D2662, D2663, and D2664, are paid on the basis of the surface or surfaces restored. The maximum amount payable is $90.27.
- Total restorative fee per tooth on primary teeth cannot exceed $78.03, the fee for a stainless steel crown. (Exceptions: D2933 and D2335)
- All fees for tooth restorations include local anesthesia and pulp protective media, where indicated, without additional charges. These services are considered part of the restoration.
- More than one restoration on a single surface is considered a single restoration.
- Multiple surface restoration must show definite crossing of the plane of each surface listed for each primary and permanent tooth completed.
- A multiple surface restoration cannot be billed as two or more separate one-surface restorations.
- Restorations and therapeutic care are provided as a Medicaid service based on medical necessity and reimbursed only for therapeutic reasons and not preventive purposes (refer to CDT).

All dental restorations and prosthetic appliances that require lab fabrication may be submitted for reimbursement using the date the final impression was made as the date of service. If the client did not return for final seating of the restoration or appliance, a narrative must be included on the claim form and in the client's chart in lieu of a post-op radiograph. The 95-day filing deadline is in effect from the date of the final impression. If the client returns to the office after the claim has been filed, the dentist is obligated to attempt to seat the restoration or appliance at no cost to the client or the Texas Medicaid Program. For records retention requirements, refer to "Documentation Requirements" on page 19-39.

19.8.5 Restorative

Procedure Code	Limitations	Maximum Fee
	Amalgam Restorations (Including Polishing)	
D2140*	This procedure code has been changed to include primary and permanent teeth. Reimburse primary TIDs A-T at $30.99; reimburse permanent TIDs 1-5, 12-21, and 28-32 at $32.86. A 1-20, PXR	$32.86
D2150*	This procedure code has been changed to include primary and permanent teeth. Reimburse primary TIDs A-T at $41.45; reimburse permanent TIDs 1-5, 12-21, and 28-32 at $43.73. A 1-20, PXR	$43.73
D2160*	This procedure code has been changed to include primary and permanent teeth. Reimburse primary TIDs A-T at $45.00; reimburse permanent TIDs 1-5, 12-21, and 28-32 at $55.71. A 1-20, PXR	$55.71
D2161*	This procedure code has been changed to include primary and permanent teeth. Reimburse primary TIDs A-T at $52.69; reimburse permanent TIDs 1-5, 12-21, and 28-32 at $60.04. A 1-20, PXR	$60.04

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Limitations	Maximum Fee
Resin-Based Composite Restorations—Direct		
All fees for resin restorations on primary teeth are limited to $78.03, which is the fee for a stainless steel crown (exceptions D2335 and D2933). All fees for resin restorations on permanent teeth are limited to a total of $90.27 for posterior teeth and $150 for anterior teeth. Resin restoration includes composites or glass ionomer.		
D2330*	TID C-H, M-R, #6-11, #22-27. A 1-20, PXR	$39.67
D2331*	TID C-H, M-R, #6-11, #22-27. A 1-20, PXR	$52.57
D2332*	TID C-H, M-R, #6-11, #22-27. A 1-20, PXR	$68.64
D2335*	TID C-H, M-R, #6-11, #22-27. A 1-20, PXR	$85.19
D2390*	TID for primary anterior TIDs C-H, M-R; permanent anterior TIDs 6-11, 22-27. A 1-20, PXR	$68.75 primary; $150.00 permanent
D2391*	TID for primary posterior; TIDs A, B, I, J, K, L, S, T; permanent posterior TIDs 1-5, 12-21, 28-32. A 1-20, PXR	$38.49 primary; $42.04 permanent
D2392*	TID for primary posterior; TIDs A, B, I, J, K, L, S, T; permanent posterior TIDs 1-5, 12-21, 28-32. A 1-20, PXR	$49.49 primary; $55.10 permanent
D2393*	TID for primary posterior; TIDs A, B, I, J, K, L, S, T; permanent posterior TIDs 1-5, 12-21, 28-32. A 1-20, PXR	$58.07 primary; $67.45 permanent
D2394*	TID for primary posterior; TIDs A, B, I, J, K, L, S, T; permanent posterior TIDs 1-5, 12-21, 28-32. A 1-20, PXR	$64.62 primary; $75.06 permanent
Gold Foil Restorations (Permanent Teeth only)		
D2410	A 4-20, N, PPXR, CCP	$75.00
D2420	A 4-20, N, PPXR, CCP	$125.00
D2430	A 4-20, N, PPXR, CCP	$125.00
Inlay/Onlay Restorations (Permanent Teeth only)		
For procedure codes D2510 through D2664 inlay/onlay (permanent teeth only), porcelain is allowed on all teeth, no longer limited to anterior teeth only. Prior authorization is required for any combination of inlays/onlays or permanent crowns that exceed the limit of four inlays/onlays or permanent crowns.		
D2510*	A 4-20, N, PPXR, CCP	$181.25
D2520*	A 13-20, N, PPXR, CCP	$264.00
D2530*	A 13-20, N, PPXR, CCP	$264.00
D2542	Same as D2520. A 13-20, N, PPXR, CCP	$264.00
D2543	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2544	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2610	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2620	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2630	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2642	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2643	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2644	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2650	All materials accepted. A 13-20, N, PPXR, CCP	$264.00

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

Procedure Code	Limitations	Maximum Fee
D2651	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2652	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2662	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2663	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2664	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
Crowns—Single Restorations Only		
For procedure codes D2710 through D2799, single crown restorations (permanent teeth only) the following limitations apply: • Porcelain is allowed on all teeth, and is no longer limited to anterior teeth only. • Prior authorization is required for any combination of onlays or permanent crowns that exceed the limit of four onlays or permanent crowns. • Stainless steel crowns and permanent all-metal cast crowns are not reimbursed on anterior (6–11, 22–27) permanent teeth.		
D2710	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2720	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2721	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2722	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2740	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2750*	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2751*	All materials accepted. A 13-20, N, PPXR	$264.00
D2752	All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2780	A 13-20, N, PPXR, CCP	$264.00
D2781	A 13-20, N, PPXR, CCP	$264.00
D2782	A 13-20, N, PPXR, CCP	$264.00
D2783	Anterior teeth only (#6-11 and #22-27). A 13-20, N, PPXR, CCP	$264.00
D2790	Posterior teeth only (#1-5; #12-21; and #28-32). All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2791*	Posterior teeth only (#1-5; #12-21; and #28-32). All materials accepted. A 13-20, N, PPXR	$264.00
D2792*	Posterior teeth only (#1-5; #12-21; and #28-32). All materials accepted. A 13-20, N, PPXR, CCP	$264.00
D2794	Prior authorization required for any combination of four or more permanent cast crown, inlays or onlays. A 13-20, N, PPXR, CCP	$264.00
D2799	Denied as global fee to any crown placed.	NC
D2915	A 4-20	$18.75
Other Restorative Services		
D2910	A 4-20, PXR	$18.75
D2920	A 1-20, PXR	$20.00
D2930*	A 1-20, PXR	$78.03
D2931*	A 1-20, PXR	$81.25
D2932*	A 1-20, PXR ($68.75 per primary tooth)	$68.75
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

Procedure Code	Limitations	Maximum Fee
D2933*	Limited to anterior primary teeth only (TID C-H, M-R). A 1-20, N, CCP, PXR	$85.51
D2940*	Not allowed on the same date as permanent restoration. A 1-20, PXR	$20.90
D2950*	Provider payments received in excess of $45.00 for restorative work performed within six months of a crown procedure on the same tooth will be deducted from the subsequent crown procedure reimbursement. Not allowed on primary teeth. A 4-20, N, CCP, PXR	$45.00
D2951	Not payable with crowns or D2950. Not allowed on primary teeth. A 4-20, PXR	$12.50
D2952	Not payable with D2950. Not allowed on primary teeth. A 4-20, PXR	$87.50
D2953	Must be used with D2952. Not allowed on primary teeth. A 13-20	$43.75
D2954*	Not payable with codes D2952 or D3950 on the same TID by the same provider. Not allowed on primary teeth. A 4-20, N, CCP, PXR	$75.00
D2955	For removal of posts (for example, fractured posts) not to be used in conjunction with endodontic retreatment (D3346, D3347, D3348). Not allowed on primary teeth. A 4-20, CCP, PXR	$75.00
D2957	Must be used with D2954. Not allowed on primary teeth. A 13-20, PXR, CCP	$37.50
D2960	A 4-20, N, PPXR, CCP	$112.50
D2961	A 4-20, N, PPXR, CCP	$181.25
D2962	A 4-20, N, PPXR, CCP	$212.50
D2980	A 4-20, PXR (permanent teeth only)	$50.00
D2999	A 1-20, N, CCP, PXR	Manually priced
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter		

19.8.6 Endodontics

Root canal fillings cannot be billed in addition to apexification procedures that have been initiated. Codes W-D3351, W-D3352, and W-D3353 include the final root canal filling.

Root canal payments are limited to four permanent teeth for each client. Additional medically necessary root canals can be reimbursed under CCP when documented in the Remarks field of the ADA dental claim form.

If the client is pregnant and does not want radiographs, use alternative treatment (temporary) until after delivery.

Procedure Code	Limitations	Maximum Fee
	Pulp Capping	
D3110	A 1-20, N, PXR, CCP	$16.25
D3120	A 1-20, N, PXR, CCP	$15.00
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

19.8.9 Implant Services

All the following implant services codes require mandatory prior authorization.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).
- Space cannot be filled with removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).

Procedure Code	Limitations	Maximum Fee
D6010	Includes second stage surgery and placement of healing cap. A 16-20, N, PPXR, CCP	$1,125.00
D6040	A 16-20, N, PPXR, CCP	$2,000.00
D6050	A 16-20, N, PPXR, CCP	Manually priced
Implant Supported Prosthetics		
D6053	Deny as global to other services.	NC
D6054	Deny as global to other services.	NC
D6055	A 16-20, N, PXR, CCP	$300.00
D6056*	A connection to an implant that is a manufactured component, made of machined high noble metal, titanium, titanium alloy, or ceramic. Placement included. May include the removal of a temporary healing cap or replacement with an abutment of alternate design. Mandatory prior authorization. A 16-20, N, PPXR, CCP	$350.00
A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

D6080	May include: removal of prosthesis, cleansing of prosthesis and abutments, reinsertion of prosthesis. A 16-20, N, PXR, CCP	$43.75
D6090	A 16-20, N, PXR, CCP	$137.50
D6095	Involves the surgical removal of an implant. A 16-20, N, PPXR, CCP	$175.00
D6100	A 16-20, N, PXR, CCP	$225.00
D6199	A 16-20, N, PXR, CCP	Manually priced

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

19.8.10 Prosthodontics (Fixed)

All the following prosthodontic codes require mandatory prior authorization.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).

CPT only copyright 2005 American Medical Association. All rights reserved.

- The space cannot be filled with a removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).
- Each abutment or each pontic constitutes a unit in a bridge.
- Porcelain is allowed on all teeth and is no longer limited to anterior teeth only.

Procedure Code	Limitations	Max Fee
	Fixed Partial Dental Pontics	
D6210	A 16-20, PPXR, MTID, CCP	$264.00
D6211	A 16-20, PPXR, MTID, CCP	$264.00

19.8.12 Adjunctive General Services

Procedure Code	Limitations	Maximum Fee
Unclassified Treatment		
D9110*	Emergency service only. The type of treatment rendered and TID must be indicated. It must be a service other than a prescription or topical medication. The reason for emergency and a narrative of the procedure actually performed must be documented and the appropriate block for emergency must be checked. A 1-20, N	$18.75
Anesthesia		
Providers must comply with TSBDE Rules, 22 TAC §§108.30–108.35. Any anesthesia type services are paid only to the provider. Criteria for dental therapy under general anesthesia must be used (see page 19-32). A local anesthesia fee is *not* paid in addition to other restorative, operative, or surgical procedure fees. Prior authorization is available for exceptions to periodicity.		
D9210	Claim form narrative should describe the situation if used as a diagnostic tool. A 1-20, N, CCP	$12.50
D9211*	A 1-20, N, CCP	$18.75
D9212*	A 1-20, N, CCP	$31.25
D9215*	Claim form narrative should explain how the doctor initiated a procedure, but could not complete it, and needs to claim the rendered anesthesia. A 1-20, N, CCP	$12.50
D9220	May not be billed with codes D9230 or D9610. Can only be billed with D9221. May be billed twice within a 12-month period. A 1-20	$87.50

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

Procedure Code	Limitations	Maximum Fee
D9221	May not be billed with codes D9230 or D9610. Can only be billed with D9220. A 1-20	$31.25
D9230*	May not be billed with code D9920, D9610, D9220, or D9221. May not be billed more than one per client, per day. A 1-20.	$28.38
D9241	May not be billed with code D9220 or D9221. May not be billed on the same date of service as D9920. A 1-20	$81.25
D9242	Not considered to be medically necessary.	NC
D9248*	May be billed twice within a 12-month period. Must comply with all TSBDE rules and American Academy of Pediatric Dentistry (AAPD) guidelines, including maintaining a current permit to provide non-IV conscious sedation. A 1-20	$125.00
	Professional Consultation	
D9310	An oral evaluation by a specialist of any type who is also providing restorative or surgical services should be billed as D0160. A 1-20, N, CCP	$15.25
	Professional Visits	
D9410	Narrative required on claim form. A 1-20	$25.00
D9420	One charge per hospital or ambulatory surgical center (ASC) case; one case per client in a 12-month period. Documentation supporting the reason that dental services could not be performed in the office setting must be retained in the client's record and may be subject to retrospective review and recoupment. A 1-20, N	$38.00
D9430	Narrative required on claim form. During regularly scheduled hours, no other services performed. Visits for routine post-operative care are included in all therapeutic and oral surgery fees. A 1-20, N	$15.00
D9440	Narrative required on claim form. Visits for routine post-operative care are included in all therapeutic and oral surgery fees. A 1-20, N	$31.25
D9450	Deny as global to other services.	NC
	Drugs	
D9610	Providers must comply with TSBDE *Rules and Regulations*, Chapter 109.175. May not be billed with code D9220, D9221, or D9920. A 1-20, N	$18.75
D9630	Other drugs and/or medicaments by report includes, but is not limited to, oral antibiotics, oral analgesic, and oral sedatives administered in the office. May not be billed with codes D9220, D9221, D9230, D9241, D9248, D9610, and D9920. A 1-20, N	$9.00
	Miscellaneous Services	
D9910	Per whole mouth application, does not include fluoride. Not to be used for bases, liners, or adhesives under or with restorations. A 1-20, N, CCP	$12.50
D9911	Denied as part of D9910.	NC
D9920	The provider must indicate on the claim the client's medical diagnosis of mental retardation or that the client is ICF-MR eligible. A 1-20	$50.00
D9930*	A 1-20, N	$25.00

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Limitations	Maximum Fee
D9940	A 1-20, N, CCP	$118.75
D9950	A 1-20, N, CCP	$56.25
D9951	Full mouth procedure. Limited to once per year, per client, any provider. A 1-20, N, CCP	$37.50
D9952	Full mouth procedure. Payable once per lifetime, any provider. A 1-20, N, CCP	$150.00
D9970	The removal of discolored surface enamel defects resulting from altered mineralization or decalcification of the superficial enamel layer. Not a separate reimbursed service. A 1-20	NC
D9971	Not payable; bill as extractions.	NC
D9972	Not medically necessary.	NC
D9973	Not medically necessary.	NC
D9974*	Same as old code D3960. A 13-20	$56.25
D9999*	A 1-20, N, CCP, PPXR	Manually priced

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Pre- and post-op radiographs required, PXR=Pre-op radiographs required, PHO=pre- and post-operative photographs required, PC=Periodontal charting required, PATH=Pathology report required, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter

19.9 THSteps and ICF-MR Types of Services

The following categories of dental services are available: emergency and trauma-related, diagnostic, preventive, and therapeutic.

19.9.1 Emergency and Trauma-Related Services

Prior authorization is not required for emergency or trauma-related dental services. Claims for these dental services must be filed *separately* from nonemergency dental services. Only one such claim per client, per day may be submitted. Routine therapeutic procedures are *not* considered emergency or trauma-related procedures.

When billing for emergency or trauma-related dental services, the provider must:

- Enter the word “Emergency” or “Trauma” in the description field of the claim form (also enter a brief description of the CDT procedure code used)
- Check the appropriate box in Block 45, *Treatment Resulting From*, of the claim form (the options to check are *Occupational Illness/Injury, Auto Accident*, or *Other Accident*)
- If checking the *Other Accident* box, briefly describe in the *Remarks* field, Block 35 of the ADA claim form, what caused the emergency or trauma

Documentation to support the diagnosis and treatment of trauma must be retained in the client’s record.

Note: *Indicating Trauma in the description field allows the provider to be reimbursed for treatment on an emergency, continuing, and long-term basis without regard to periodicity, subject to the client’s eligibility and program limitations. An exception to periodicity for THSteps dental services is granted automatically for immediate treatment and any future follow-up treatment, as long as each claim submitted for payment is marked “Trauma” in the Description field, Block 30, and the original date of treatment or incident is referenced in the Remarks field, Block 35.*

Refer to: “2002 ADA Dental Claim Filing Instructions” on page 5-43.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.10 Services for Children Younger Than 12 Months of Age

Bill initial visits for children *younger than 12 months of age* as *Emergency* with documentation of need. Bill subsequent visits necessary to complete the case as an exception to periodicity by describing the reason for the exception in the *Remarks* field, Block 35.

19.10.1 Change of Provider

A provider may refer a client to another provider when appropriate.

A provider may discontinue treatment for any of the following reasons:

- Treatment by a dental specialist such as a pediatric dentist, periodontist, oral surgeon, endodontist, or orthodontist is indicated.
- The services needed are outside the skills or scope of practice of the initial provider.
- There is documented failure to keep appointments by the client or parent/guardian, noncompliance with the treatment plan, or conflicts with the client or other family members.

In any such action to discontinue treatment, providers must comply with 22 TAC §108.5, *Patient Abandonment*.

The client may select another provider, if desired.

HHSC may refer the client to another provider as a result of adverse information obtained during a utilization review or resolution of a complaint from either provider or client.

If the client does not return for the completion of services and there is documented failure to keep appointments by the client or parent/guardian, the dental provider who initiated the services may submit a claim for reimbursement to be received by TMHP within the 95-day filing deadline from the last date of service.

19.10.2 Interrupted, Incomplete Treatment Plans

Authorizations for treatment plans that have been issued to a provider are *not* transferable to another provider. If a client's treatment plan is interrupted and the services are not completed, the new provider must request authorization to complete the interrupted, incomplete, and authorized treatment plan initiated by the original provider.

To complete the treatment plan, the client must be eligible for Medicaid with a current client Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Form H1027).

19.10.3 Periodicity for Scheduled Preventive Dental Services

The dental provider may perform any medically necessary dental service that is within the Texas Medicaid Program's guidelines and limitations.

A narrative explaining the reason for the exception to periodicity limitations must be included on the claim to TMHP, whether electronic or paper. The exception must be indicated in the appropriate block whether filing paper claims or electronically. Documentation must be in the client's file.

19.10.4 Exceptions to Periodicity

For THSteps clients, exceptions to the periodicity schedule for dental services may be approved for one of the following reasons:

- Medically necessary service, based on risk factors and health needs (includes clients younger than 12 months of age)
- Required to meet federal/state exam requirements for Head Start, daycare, foster care, or preadoption
- Clients' choice to change service providers (not applicable to referrals)
- Subsequent therapeutic services necessary to complete a case for clients younger than 12 months of age when initiated as emergency services, for trauma, for baby bottle tooth decay, or early childhood caries

The client Medicaid Identification Form (Form H3087) indicates to the provider the eligibility status of the client for Medicaid services for a specific month. The card also reminds the client that he is eligible for a periodic dental checkup that month. If the client does not receive the dental checkup that month, the client is still entitled to a dental checkup in the following months until one is conducted, as well as other covered dental services. If the card's reminder of the periodic dental checkup does not appear on the card for a particular month, the client is still entitled to other covered dental services. If a periodic dental checkup has been conducted within the last six months, the client still may be able to receive another periodic dental checkup in the same six-month period.

Example: *The client requested a second opinion or changed providers.*

The provider should determine if the client is Medicaid-eligible on the day services are to be provided. If the client's Medicaid Identification Form (Form H3087) does not indicate that the client is due for a periodic dental checkup, but the client is requesting one, the same provider may not provide a second periodic checkup during that current six-month period. If the provider did provide one, the provider still may provide other covered dental services.

For ICF-MR clients 21 years of age and older, the periodicity schedule for preventive dental procedures (exams, prophylaxis, fluoride, and radiographs) does not apply.

Refer to: "Preventive" on page 19-11 for periodicity limitations for prophylaxis.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.10.5 Guidelines for Prescribing Dental Radiographs

In November 2004, the ADA in conjunction with the U.S. Food and Drug Administration established Guidelines for Prescribing Dental Radiographs. The guidelines include type of encounter relevant to the patient's age and dental developmental stage.

19.10.6 Billing After Loss of Eligibility

The Texas Medicaid 95-day filing deadline applies to all THSteps and ICF-MR dental services. If a client has lost Medicaid eligibility or turned 21 years of age, continue to file claims for services provided on dates of service the client was eligible. Indicate the actual date of service on the claim form, and enter the authorization number in the appropriate block on each claim filed.

Refer to: "Claims Filing Deadlines" on page 5-4 for more information.

19.11 Mandatory Prior Authorization

Mandatory prior authorization is required for consideration of reimbursement to dental providers who render:

- Orthodontia
- Implants
- Fixed prosthetic services (refer to page 19-23)
- Dental general anesthesia that did not meet the criteria for 22 points
- A combination of inlays/onlays or permanent crowns in excess of four per client, refer to page 19-14 and 19-15
- D7272 (refer to page 19-26)
- D4276
- D7472
- General dental services for clients 21 years of age and older (not residing in an ICF-MR facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition

Refer to: "Doctor of Dentistry Practicing as a Limited Physician" on page 19-5.

The prior authorization number is required on claims for processing. If the client is not eligible on the date of service or the claim is incomplete, it will affect reimbursement. Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

Post-treatment authorization will not be approved for codes that require mandatory prior authorization.

19.12 Criteria for Dental Therapy Under General Anesthesia

The dental provider is responsible for determining whether a client meets the minimum criteria necessary for receiving general anesthesia. Additionally, the dental provider must meet the requirements for chart documentation.

If a client does not meet the criteria for general anesthesia, authorization will be considered with a written request using the THSteps Dental Mandatory Prior Authorization Request Form. Include all appropriate supporting documentation with the submittal. TMHP mails the dental provider a reply to the authorization request. The criteria for general anesthesia applies only to treatment of clients who are younger than 21 years of age or ICF-MR. This form is not required for emancipated minors.

Refer to: "THSteps Dental Mandatory Prior Authorization Request Form" on page B-109 and "Criteria for Dental Therapy Under General Anesthesia" on page 19-33.

CPT only copyright 2005 American Medical Association. All rights reserved.

19.12.1 Criteria for Dental Therapy Under General Anesthesia

Total points needed to justify treatment under general anesthesia=22.

Age of patient at time of examination	Points
Less than 4 years of age	8
4 and 5 years of age	6
6 and 7 years of age	4
8 years of age and older	2

Treatment Requirements (Carious and/or Abscessed Teeth)	Points
1-2 teeth or one sextant	3
3-4 teeth or 2-3 sextants	6
5-8 teeth or 4 sextants	9
9 or more teeth or 5-6 sextants	12

Behavior of Patient**	Points
Definitely negative–unable to complete exam, patient unable to cooperate due to lack of physical or emotional maturity, and/or disability	10
Somewhat negative–defiant; reluctant to accept treatment; disobeys instruction; reaches to grab or deflect operator's hand, refusal to take radiographs	4
Other behaviors such as moderate levels of fear, nervousness, and cautious acceptance of treatment should be considered as normal reponses and are not indications for treatment under general anesthesia	0
** Requires that narrative fully describing circumstances be present in the patient's chart	

Additional Factors**	Points
Presence of oral/perioral pathology (other than caries), anomaly, or trauma requiring surgical intervention**	15
Failed conscious sedation**	15
Medically compromising, handicapping condition**	15
** Requires that narrative fully describing circumstances be present in the patient's chart	

I understand and agree with the dentist's assessment of my child's behavior.

PARENT/GUARDIAN SIGNATURE: ____DATE: ______________

Patients in need of general anesthesia who do not meet the 22-point threshold, by report, will require prior authorization.

To proceed with the dental care and general anesthesia, this form, the appropriate narrative, and all supporting documentation, as detailed in Attachment 1, must be included in the patient chart. The patient chart must be available for review by representatives of TMHP and/or HHSC.

PERFORMING DENTIST'S SIGNATURE: ____

DATE: ______________License No. _________________________

CPT only copyright 2005 American Medical Association. All rights reserved.

19.12.2 Criteria for Dental Therapy Under General Anesthesia, Attachment 1

The following is medical dental policy regarding general anesthesia.

Purpose	To justify general anesthesia for dental therapy, the following documentation is required in the client's dental record.
Elements	Note those required (*) and those as appropriate (**)

1) * Client's Demographics including Date of Birth
2) * Relevant Dental and Medical Health History
   ** including Medical Evaluation Justifying Relevant Medical Condition(s)
3) * Dental Radiographs, Intraoral/Perioral Photography, and/or Diagram of Dental Pathology
4) * Proposed Dental Plan of Care
5) * Signed Consent by Parent/Guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of general anesthesia for dental care has been explained
6) ** Description of Relevant Behavior and Reference Scale
7) ** Other Relevant Narrative Justifying Need for General Anesthesia
8) * Completed Criteria for Dental Therapy Under General Anesthesia form
9) * The dentist's attestation statement and signature may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the chart as a stand-alone form:

I attest that the patient's condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the patient's record and is available in my office.

REQUESTING DENTIST'S SIGNATURE: ________________________________

DATE:________________________

Month Day Year

CPT only copyright 2005 American Medical Association. All rights reserved.

19.13 Hospitalization and ASC/HASC

Dental services performed in an ambulatory surgical center (ASC), hospital ambulatory surgical center (HASC), or a hospital (either as an inpatient or an outpatient) may be covered by THSteps on the medical or behavioral justification provided, or if one of the following conditions exist: the procedures cannot be performed in the dental office, or the client is severely disabled.

Important: *Contact the individual HMO for precertification requirements related to the hospital procedure.*

Reminder: *If services are precertified, the provider receives a precertification number effective for 90 days.*

In those areas of the state with Medicaid Managed Care, precertification or approval is *required* from the client's HMO for anesthesia and facility charges. It is the dental provider's responsibility to obtain precertification from the client's HMO or managed care plan for facility and general anesthesia services.

To be reimbursed by the HMO, the provider *must* use the HMO's contracted facility and anesthesia provider. These services are included in the capitation rates paid to HMOs, and the facility/anesthesiologist risk nonpayment from the HMO without such approval. Coordination of all specialty care is the responsibility of the client's primary care provider. The primary care provider must be notified by the dentist and/or the HMO of the planned services.

Dentists providing sedation/anesthesia services must have the appropriate current permit from the TSBDE for the level of sedation/anesthesia provided.

The dental provider must be in compliance with the guidelines detailed in "Criteria for Dental Therapy Under General Anesthesia" on page 19-32.

Note: *Post-treatment authorization will not be approved for codes that require mandatory prior authorization.*

19.13.1 Billing TMHP

The examining physician, anesthesiologist, hospital, ASC, or HASC must bill TMHP separately for the medical and facility components of their services. The claim forms used are the CMS-1500 or the HCFA-1450 (UB-92):

- Type of service (TOS) 7, CPT code 00170 with modifier EP, is for the anesthesiologist or certified registered nurse anesthetist (CRNA) to use on the claim form.
- TOS F, CPT code 41899 with modifier EP, is for the facility to use on the claim form.
- Diagnosis codes such as 52100 (dental caries) and 5220 (pulpitis) are to be used on the claim form by both provider types.
- Modifier EP identifies that the service is associated with THSteps.

Provider	Diagnosis Code	TOS	CPT Code
HASC	52100, 5220	F	41899 with modifier EP
ASC	52100, 5220	F	41899 with modifier EP
ANES	52100, 5220	7	00170 with modifier EP
CRNA	52100, 5220	7	00170 with modifier EP
Use CMS-1500 or HCFA-1450			

To satisfy the preadmission history and physical examination requirements of the hospital, ASC, or HASC, a THSteps medical checkup for dental rehabilitation/restoration may be performed by the child's primary care provider. Physicians who are not enrolled as THSteps medical providers should bill for the examination of a client before the procedure with the appropriate evaluation and management code from the following table:

Procedure Code	Place of Service (POS)
1-99202	POS 1 (office)
1-99222	POS 3 (inpatient hospital)
1-99282	POS 5 (outpatient hospital)

Providers enrolled in THSteps Medical should refer to "Exceptions to Periodicity" on page 43-9.

Note: *The dental provider should bill TMHP using the "2002 ADA Dental Claim Form" on page 5-44 to be considered for reimbursement through THSteps Dental Services.*

Refer to: "2002 ADA Dental Claim Electronic Billing" on page 5-43.

19.13.2 Claim Form Completion

All claims, including those from the anesthesiologist and the hospital, ASC, or HASC, must include the appropriate national procedure code(s).

CPT only copyright 2005 American Medical Association. All rights reserved.

19.14 Claims Information

All THSteps and ICF-MR claims *must* be received by TMHP within 95 days from each date of service and submitted to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

Claims for services may be filed electronically or on paper.

Claims for emergency, orthodontic, or routine services must each be filed on separate forms. Mixing codes will cause the claim to be denied.

A claim submitted for either emergency or orthodontic services must be marked at the proper box for processing.

A THSteps and ICF-MR dental provider cannot bill Medicaid under his individual performing provider identifier for the services provided by one or more associate dentists practicing in his office as employees or independent contractors with specific employer-employee or contractual relationships. These dentists must enroll as THSteps dental providers regardless of employer relationships. The individual provider billing may be reimbursed into a single accounting office to maintain these described relationships.

Note: *A dentist must not use another dentist's provider identifier.*

In any case, a dental group must provide evidence that the practice is 100 percent owned by currently licensed dentists.

The Texas Medicaid Program cannot be billed by a provider for appointments missed by clients. A client with Medicaid coverage cannot be billed for failure to keep an appointment. Only claims for actual services rendered are considered for payment.

Providers should bill Medicaid their usual and customary fees.

The Remittance and Status (R&S) reports received from TMHP should be filed in sequential order in a binder in the provider's office. Electronic R&S reports should be copied for storage.

Refer to: "2002 ADA Dental Claim Filing Instructions" on page 5-43.

"Billing Clients" on page 1-9.

19.14.1 Claim Appeals

Claims filed for appeal must be received by TMHP within 120 days from the date of the R&S report. A claim denied because of age restrictions listed in the Medicaid dental fee schedule may be considered for reimbursement on appeal when client medical necessity is provided to the TMHP Dental Director.

All denied claim appeals (see "Appeals" on page 6-1) must be submitted to TMHP with the exception of a request to waive late filing deadlines. TMHP does not have the authority to waive state or federal mandates regarding claim filing deadlines.

If after all appeal processes at TMHP are exhausted, and the provider remains dissatisfied with TMHP's decision concerning the appeal, the provider may file a complaint with the HHSC Claims Administrator Contract Management Unit.

Refer to: "Administrative Claim Appeals" on page 6-4.

Note: *Providers must exhaust the appeals process with TMHP before filing a complaint to the HHSC Claims Administrator Contract Management Unit.*

Refer to: "Paper Appeals" on page 6-3.

19.14.2 Dental Claims Appeal Information

Providers may use three methods to appeal Medicaid claims to TMHP: telephone (AIS), paper, or electronically.

All appeals of denied claims or requests for adjustments on paid claims *must* be received by TMHP within 120 days from the date of disposition of the R&S on which the claim appears. If the 120-day appeal deadline falls on a weekend or TMHP-recognized holiday, the deadline will be extended to the next business day.

The following claims must be appealed on paper; they *cannot* be appealed either electronically or by using AIS:

- Claims listed on the R&S report as incomplete. These include claims missing required information, such as the signature on the claim. Resubmit the corrected claim with a copy of the R&S for reprocessing to the TMHP physical address, Attn: Inquiry Control Unit
- Claims requiring supporting documentation (for example, operative reports, dental records, dental radiographs, or narratives)
- Claims listed as pending or in process with an explanation of pending status (EOPS) message. These claims have not been finalized at the time the R&S report was generated; and therefore, they cannot be appealed
- Claims denied as past filing deadline. The provider must provide a copy of a previous R&S report as proof the claim was received by TMHP within the filing deadline

To appeal in writing:

- If a claim cannot be appealed electronically or by telephone, appeal the claim on paper by completing the following steps:
  1) Provide a copy of the R&S page where the claim is reported.
  2) Circle one claim per R&S page.
  3) Identify the information that was incorrectly provided and note the correct information that should be used to appeal the claim. If necessary, specify the reason for appealing the claim.
  4) Attach radiographs or other necessary supporting documentation.

CPT only copyright 2005 American Medical Association. All rights reserved.

5) If available, attach a copy of the original claim. Claim copies are helpful when the appeal involves dental policy or procedure coding issues.
6) Do not copy supporting documentation on the opposite side of the R&S report.
7) It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It is also recommended that paper documentation be sent via certified mail with a return receipt requested to establish TMHP's receipt of the claim and the date the claim was received. The provider is urged to retain copies of multiple claim submissions if the Medicaid provider identifier is pending.

Note: *Providers have 95 days from the issuance of the provider identifier to submit claims.*

8) Submit the paper appeal with supporting documentation and any radiographs and adjustment requests to the following address:

Texas Medicaid & Healthcare Partnership
Inquiry Control Unit
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

To appeal by telephone:

1) Contact the Dental Line at 1-800-568-2460
2) For each claim in question, have the R&S listing the claim and any supporting documents readily available
3) Identify the claim submitted for appeal. The internal control number (ICN) will be requested
4) Supply the information necessary to correct the claim, such as the missing tooth number or letter, the corrected procedure code, surface ID, or Medicaid number

The appeal will appear as finalized or pending on the following week's R&S report.

Providers may also appeal electronically.

Electronic appeal submission is a method of submitting Texas Medicaid appeals using a personal computer (PC). The electronic appeals feature can be accessed by a business organization bridging directly into the TMHP EDI Gateway or by using TDHconnect, the free Windows-based software available from TMHP. For additional information, contact the TMHP EDI Help Desk at 1-888-863-3638.

Electronic appeals can increase accuracy of claims processing, resulting in a more efficient case flow to the provider:

- Download and printout capabilities help maintain audit trails for the provider.
- Appeal submission windows can be automatically filled in with electronic R&S report information, thereby reducing data entry time.

Electronic appeals submission is available to business organizations (for example, billing organizations, vendors, and clearinghouses) and interfaces directly with TMHP EDI or through TDHconnect.

19.14.3 Frequently Asked Questions About Dental Claims

Q Why is routine dental treatment not covered when performed at the same visit as an emergency visit?

A The following are reasons routine dental treatment is not covered when performed at the same visit as an emergency visit:

- The purpose of an emergency claim is to allow the provider to treat a true emergency without the concern that routine dental procedures may be denied.
- Medicaid Program policy guidelines do not allow payment for both types of services to the same provider at the same visit. True emergency claims process through the audit system correctly when "emergency" is checked on either the paper or electronic claim and the Remarks or Narrative section of the claim form describes the nature of the emergency.

Q Why are some claims for oral exams and emergency exams on the same date for the same client denied?

A Medicaid Program policy does not allow an initial oral exam and an emergency exam to be billed on the same date of service for the same client. An emergency exam performed by the same provider in the same six-month time period as an initial exam may be considered for reimbursement only when the claim for the emergency exam indicates it is an emergency and the emergency block is marked. If the claim is not marked as an emergency, the claim will be denied.

Q How are orthodontic bracket replacements reimbursed? Can the client be charged for bracket replacements?

A The provider uses orthodontic procedure code D8690 to claim reimbursement. Medical necessity must be documented in the client record. Payment is subject to retrospective review.

Important: *The client should not be charged for bracket replacement. If the provider charges the client erroneously, the provider refunds any amount paid by the client.*

Q Why could an appeal of a denied claim take a long time?

A An appeal can take a long time if TMHP is required to research the denied claim and determine the reason the claim did not go through the system.

For faster results, providers should submit appeals as soon as possible and not use the entire 120 days allowed to submit the appeal.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following are guidelines on filing claims efficiently:

- Use R&S report dates to track filed claims.
- File claims electronically through TMHP EDI. Electronic billing does not allow a claim with an incorrect date to be accepted and processed, which saves time for the provider submitting claims and TMHP in processing claims. Call 1-888-863-3638, for more information about TMHP EDI.
- File claims with the correct information included. Most denied claims result from the omission of dates, signature, and narrative, or incorrect ID numbers such as client Medicaid numbers or provider identifiers.

Q Why are only ten appeals allowed per call?

A There is a limit on appeals per call to allow all providers equal access.

Q Why do reimbursement checks sometimes take a long time to arrive?

A Reimbursement may be delayed if a provider fails to submit claims in a timely manner.

Q Does electronic billing result in delayed payment?

A No. Providers who bill electronically report faster results than billing on paper. Providers are encouraged to use TMHP EDI for claims submission.

The following are helpful hints to a more efficiently processed claim:

- Ensure the provider identifier is on all claims
- Include a proper signature on all paper claims
- Verify client eligibility for procedures
- Verify if the procedure code requires a narrative on the claim; the narrative is for medical necessity
- Include the required client information, including name, birth date, and client number
- Dental auxiliaries cannot enroll in Medicaid; therefore, they cannot bill Medicaid. Any procedure performed by the auxiliary (i.e., the hygienist or the chairside assistant) must be billed by the supervising dentist, using the dentist's provider identifier

Reminders:

- Procedure code D9630 is not payable for take home fluorides or drugs. Prescriptions are given to clients to be filled by the pharmacy. The pharmacy is reimbursed by the Medicaid Vendor Drug Program.
- Procedure code D8660 is allowed at different age levels, per provider. If D8660 is billed within six months of D8080, the D8080 will be reduced by the amount that was paid for D8660.
- Prior authorization is required with documentation of medical necessity when replacing lost or broken orthodontic retainers (D8680).
- Prior authorization of orthodontic services is nontransferable. If a client changes an orthodontic provider for any reason, the new provider must submit a separate request for prior authorization. The provider requesting and receiving authorization for the service also must perform the service and submit the claim. Codes listed on the authorization letters are the only codes considered for payment. All other codes billed are denied. Providing the authorization number on the submitted claim results in more efficient claims processing.
- General anesthesia (provided in the dentist office, ambulatory service clinic, and inpatient/outpatient hospital settings) does not require prior authorization, but is required to follow the Criteria for Dental Therapy Under General Anesthesia (see page 19-32) to determine if a client meets the minimum required points for general anesthesia. All THSteps dental charts for dental general anesthesia are subject to retrospective, random review for compliance with the Criteria for Dental Therapy Under General Anesthesia and requirements for chart documentation.
- Do not bill a client unless a formal denial for the requested item/service has been issued stating the service is not a Medicaid benefit and the client has signed the Client Acknowledgement Statement for that specific item/service. *A provider must not bill Medicaid clients if the provided service is a Medicaid benefit.*

Refer to: "Client Acknowledgment Statement" on page 1-10.

19.15 Written Informed Consent and Standards of Care

Only THSteps clients or their parents or legal guardians can give written informed consent. THSteps clients or their parents or legal guardians who can give written informed consent must receive information following an oral evaluation about the dental diagnosis, scope of proposed treatment, including alternatives and risks, anticipated results, and need for administration of sedation or anesthesia, including risks. Additionally, they must receive a full explanation of the treatment plan and give written informed consent before implementation. The parent or guardian being present at the time of the dental visit facilitates the provider obtaining written informed consent. Dentists must comply with TSBDE Rule 22 TAC §108.2, *Fair Dealing*.

Important: *All standards of care must be adhered to per TSBDE Rules.*

THSteps clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE
- Dental services free from abuse or harm from the provider or the provider's staff
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of healthcare as recognized by the TSBDE

CPT only copyright 2005 American Medical Association. All rights reserved.

Refer to: "American Academy of Pediatric Dentistry Periodicity Guidelines" on page N-2

"American Dental Association Guidelines for Prescribing Dental Radiographs" on page N-5

19.16 Parental Accompaniment

THSteps providers are required to comply with the current *Texas Human Resources Code* provisions regarding parental accompaniment.

Refer to: "Parental Accompaniment" on page K-2.

19.17 Reimbursement

The fees included in the Medicaid dental fee schedule are determined as access-based fees under 1 TAC §355.8085. The fees are based upon a percentage of billed charges in accordance with 1 TAC §355.8443 and 1 TAC §355.8445. High volume provider payments for dentists are detailed in "Additional Payments to High-Volume Providers" on page 2-6.

Reimbursement for THSteps and ICF-MR dental services is the lesser of the following:

- The provider's usual and customary fee, which is the fee that the provider charges non-Medicaid clients (including private-pay clients) for the same service. If a provider offers or provides services to non-Medicaid clients at no charge, then the provider cannot bill Medicaid for similar services provided to Medicaid clients. If a provider offers or provides services to non-Medicaid clients at discounted fees or fees reduced in any fashion, including, but not limited to, sliding scales or advertised specials, the provider cannot bill Medicaid for similar services provided to Medicaid clients with fees higher than those available to non-Medicaid clients; *or*
- The maximum fee listed in the "Medicaid Dental Fee Schedule" on page 19-9; *or*
- The adjusted fee, which is below the maximum fee for the specific procedure due to payment limitations specified for that code, because HHSC partially pays for services on the same tooth, or because the degree of difficulty, as determined by review of the radiographs or lab charges, does not justify the maximum fee; *or*
- The fee authorized by TMHP for any dental services identified in the Medicaid dental fee schedule as requiring individual consideration (manually priced).

Reimbursement is limited to services for Medicaid and THSteps or ICF-MR clients for the date of service. It is the provider's responsibility to ensure client eligibility by reviewing the client's Medicaid Identification Form (Form H3087), or the Medicaid Eligibility Verification Form (Form H1027), or by calling AIS at 1-800-925-9126.

Reimbursement for THSteps dental services provided in an FQHC is based on an all-inclusive rate per visit calculated in accordance with 1 TAC §355.8261. Specific dental procedure codes that meet the definition of a visit are marked with an asterisk (*). All other dental procedure codes are processed as informational.

Refer to: 1 TAC §355.8443 and 1 TAC §355.8445 for payment of claims for dental services under EPSDT (THSteps).

"Medicaid Identification Form H3087" on page 4-18.

19.18 Third Party Resources (TPR)

For THSteps and ICF-MR dental claims, *TMHP* is responsible for determining if a third party resource (TPR) exists and for recouping payment from the TPR.

When the client's Medicaid Identification Form (Form H3087) shows a P in the TPR column indicating the presence of other health insurance, THSteps and ICF-MR dental providers are *not* required to pursue TPR. The P does not distinguish between medical or dental. Therefore, when clients do not have a readily available private dental insurance identification/verification, dental providers should bill TMHP for reimbursement.

THSteps and ICF-MR dental providers unable to determine whether the client's other insurance provides coverage for dental services should file the claim directly to TMHP. TMHP will reimburse the claim and pursue payment from any other TPR. If a recoupment is made from another payment resource, TMHP will make the appropriate post-payment reconciliation with the dental provider.

Refer to: "Automated Inquiry System (AIS)" on page -xiii.

19.19 Documentation Requirements

The provider should be certain that all staff members, including dentists, are aware of the following documentation requirements and charting procedures:

- For THSteps and ICF-MR dental claims, providers are not required to submit pre- and post-op radiographs unless it is specifically requested by HHSC, the TMHP Dental Director, or is needed for prior authorization and/or pre-payment review.
- Documentation of all restorative, operative, crown and bridge, and fixed and removable prosthodontics procedures must include medical necessity consistent with professionally recognized standards of health care as recognized by TSBDE. Documentation should include appropriate pretreatment, precementation and postcementation radiographs, study models and working casts, lab prescriptions, and invoices. A panoramic radiograph without additional bitewing radiographs is inadequate as a diagnostic tool for caries detection.
- All documentation must be maintained in the client's record for a period of five years to support the medical necessity at the time of any post payment utilization review. All documentation, including radiographs, must be of diagnostic and appropriate quality.

CPT only copyright 2005 American Medical Association. All rights reserved.

- In any situation where radiographs are required but cannot be obtained, then intraoral photographs must be in the chart.
- Any complications, unusual circumstances encountered, morbidity, and mortality must be entered as a complete narrative in the client's record.
- A provider must maintain a minimum standard of care through appropriate and adequate records, including a current history, limited physical examination, diagnosis, treatment plan, and written informed consent as a reasonable and prudent dentist would maintain. These records as well as the actual treatment must be in compliance with all state statutes, the *Dental Practice Act*, and the TSBDE Rules.
- Documentation for endodontic therapy must include the following: the medical necessity, pretreatment, during treatment and post-treatment periapical radiographs, the final size of the file to which the canal was enlarged, and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be entered in the chart. Endodontic therapy must be in compliance with the American Association of Endodontists quality assurance guidelines.
- Documentation for most periodontal services requires a six-point per tooth depth of pocket charting, a complete mouth series of periapical and bitewing radiographs, and any other narratives or supporting documentation consistent with the nationally accepted standards of care of the specialty of periodontics, and which conform to the minimum standard of care for periodontal treatment required of Texas dentists. A panoramic radiograph without additional bitewing or periapical radiographs is considered inadequate for diagnosis of periodontal problems.
- Documentation for surgical procedures requiring a definitive diagnosis for billing a specific ADA code necessitates that a pathology report and a written record of clinical observations be present in the chart, together with any appropriate radiographs, operative reports, and appropriate supporting documentation. All impactions, surgical extractions, and residual tooth root extractions require appropriate preoperative periapical and/or panoramic radiographs (subject to limitations) be present in the chart.
- Any documentation requirements or limitations not mentioned in this manual that are present in the CDT are applicable. The written documentation requirements or limitations in this manual supercede those in the CDT.

19.20 Laboratory Requirements

Dental laboratories must be registered with TSBDE laboratories, and technicians must not be under restrictions imposed by TSBDE or a court.

19.21 Utilization Review

DSHS or a designated entity may conduct utilization reviews through automated analysis of a provider's pattern(s) of practice, including peer group analysis. Such analysis may result in a subsequent on-site utilization review. DSHS or its claims processing contractor may conduct utilization reviews at the direction of the Office of Inspector General (OIG), according to HHSC rules.

Refer to: 25 TAC, Chapter 33, Subchapter H for more information about utilization review.

19.22 Orthodontic Services (THSteps)

19.22.1 Mandatory Prior Authorization

Prior authorization is *required* for THSteps orthodontic services except for procedure code D8660.

If orthodontic treatment is medically indicated, providers are responsible for obtaining authorization for a complete orthodontic treatment plan while the client is eligible for Medicaid and THSteps and younger than 21 years of age.

Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

Upon receipt of authorization of complete treatment plans, providers are to advise clients that they will be able to receive the approved treatment services (e.g. orthodontic adjustments, bracket replacements and retainers), even if they lose Medicaid eligibility or reach 21 years of age. Approved orthodontic treatment *must* be initiated before the loss of Medicaid eligibility and completed within 36 months of the authorization date.

The prior authorization request must contain the date of service that the records were produced.

Important: *The dentist should be certain that radiographs, photographs, and other information are properly packaged to avoid damage. TMHP is not responsible for lost or damaged materials.*

Note: *Submit all orthodontic services for Medicaid Managed Care clients following these guidelines. STAR and STAR+PLUS are not responsible for orthodontic services.*

Requests for orthodontic services *must* be accompanied by all the following documentation:

- An orthodontic treatment plan. The treatment plan must include all procedures required to complete full treatment (such as, extractions, orthognathic surgery, upper and lower appliance, monthly adjustments, appliance removal if indicated, special orthodontic appliances, etc.). The treatment plan should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch will be reviewed for duplication of purpose.
- Cephalometric radiograph with tracing models

CPT only copyright 2005 American Medical Association. All rights reserved.

- Completed and scored Handicapping Labio-Lingual Deviations (HLD) sheet with diagnosis of Angle class (26 points required for approval of non-cleft palate cases)
- Facial photographs
- Treatment plan that *must* include all procedures required to complete full treatment (for example, extractions, orthognathic surgery, upper and lower appliances, monthly adjustment, appliance removal if indicated, special orthodontic appliances, bracket replacements, etc.)
- Full series of radiographs or a panoramic radiograph; diagnostic-quality films are required (original films—copies are not accepted)
- Any additional pertinent information as determined by the dentist or requested by TMHP's Dental Director

Requests for crossbite therapy require properly trimmed models to be retained in the office and must demonstrate the following criteria:

- *Posterior teeth*. Not end to end, but buccal cusp of upper teeth should be lingual to buccal cusp of lower teeth.
- *Anterior teeth*. The incisal edge of upper should be lingual to the incisal of the opposing arch.

19.22.2 Completion of Treatment Plan

If a client reaches 21 years of age or loses Medicaid eligibility before the authorized *orthodontic treatment* is completed, reimbursement is provided to complete the orthodontic treatment that was authorized and initiated while the client was younger than 21 years of age, eligible for Medicaid and THSteps, and completed within 36 months.

Any nonorthodontic service requested (e.g., extractions or surgeries) must be completed before the loss of client eligibility.

Services *cannot* be added or approved after Medicaid THSteps eligibility has expired.

19.22.3 Benefits and Limitations

Orthodontic services include the following:

- Correction of severe handicapping malocclusion as measured on the Handicapping Labio Lingual Deviation (HLD) Index. Refer to page 19-47 for information on how to score the HDL. A minimum score of 26 points is required for full banding approval (only permanent dentition cases are considered)

Exception: *Retained deciduous teeth and cleft palates with gross malocclusion that will benefit from early treatment. Cleft palate cases do not have to meet the HLD 26-point scoring requirement. However, it is necessary to submit a sufficient narrative and/or outline of the proposed treatment plan when requesting authorization for orthodontic services on cleft palate cases.*

- Crossbite therapy
- Head injury involving severe traumatic deviation
- Orthognathic surgery, to include extractions, required or provided in conjunction with the application of braces

The following limitations apply for orthodontic services:

- Orthodontic services for cosmetic purposes only are not a benefit of Medicaid or THSteps.
- Except for D8660, *all* orthodontic procedures require authorization for reimbursement.
- The THSteps client *must* be Medicaid/THSteps-eligible when authorization is requested and the orthodontic treatment plan is initiated. It is the provider's responsibility to see that the client has a current Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Forms H1027 and H1027 A-C) and that the date of birth on the form indicates the client is 21 years of age or younger and no limitations are indicated.
- Authorization is issued to the requesting provider only and is not transferable to another provider. If the client changes providers or if the provider stops practicing dentistry for whatever reason, a new prior authorization must be requested (see "Transfer of Services" on page 19-42).

The following procedure codes, policies, and limitations are applied to the processing and payment of orthodontic services under THSteps dental services:

- Procedure code D8660 is allowed when:
  - The client is referred to an orthodontist for a determination whether orthodontic services are indicated and to determine the appropriate time to initiate such services.
  - The client is referred to an orthodontist and elects to receive services from another orthodontic provider because of justifiable reasons.
  - Repeat visits at different age levels are required to determine the appropriate time to initiate orthodontic treatment.
- Procedure code D8680 is payable for one retainer per arch, per lifetime, and may be replaced once because of loss or breakage (prior authorization is required).
- Procedure code D8670 should be billed only when an adjustment to the appliances is provided and may not be billed before the date the orthodontic adjustment was performed. The number of visits for monthly adjustments to the appliances is restricted to the number that was authorized in the treatment plan.
- Procedure code D8670 is paid only in conjunction with a history of braces (code D8080), unless special circumstances exist.
- All orthodontic codes and appliances are global fees.
- Separate fees for adjustments to retainers are not payable.
- The appropriate code should be billed for those appliances required as part of the treatment of cleft palate cases.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Special orthodontic appliances may also be used with full banding and crossbite therapy with approval by the TMHP Dental Director.
- Procedure codes D5951, D5952, D5953, D5954, D5955, D5958, D5959, and D5960 are to be used as applicable with documentation of medical necessity. Otherwise, use the appropriate special orthodontic appliance code.
- Full banding is allowed on permanent dentition only, and treatment should be accomplished in one stage and is allowed once per lifetime.

Exception: *Cases of mixed dentition when the treatment plan includes extractions of remaining primary teeth or cleft palate.*

- Crossbite therapy is allowed for primary, mixed, or permanent dentition.
- Do not request crossbite correction (limited orthodontics) for a mixed dentition client when there is a need for full banding in the adult teeth. Crossbite therapy is an inclusive charge for treating the crossbite to completion, and additional reimbursement is not provided for adjustments or maintenance.
- If a case is not approved, the dentist may file a claim for payment of the diagnostic work-up necessary to obtain the authorization using procedure codes D0330, D0340, D0350, *and* D0470. The dentist may receive payment under these procedure codes for no more than two cases out of every ten cases denied. The dentist should determine if the client's condition meets orthodontic coverage criteria before performing a diagnostic work-up.
- Procedure codes D8080, D8050, and D8060, are limited to one per lifetime.

19.22.4 Premature Removal of Appliances

The overall fee for orthodontic appliances (braces, procedure code D8080) includes the removal of appliances. Procedure code D7997 may be used only when the appliances were placed by a different provider with an unaffiliated practice (not a partner or office-sharing arrangement) and one of the following conditions exist:

- There is documentation of a lack of cooperation from the client.
- The client requests premature removal and a release form has been signed by the parent, guardian, or client if he is at least 18 years of age.

Providers must keep a copy of the release form on file and are responsible for this documentation during a review process.

19.22.5 Transfer of Services

Authorization issued to a provider for orthodontic services is not transferable to another provider. The new provider must request a new authorization to complete the orthodontic treatment initiated by the original provider.

The following supporting documentation must accompany the new request for orthodontia services and must include the date of service the documentation was obtained (the date of service the records were produced):

- All of the documentation as required for the original provider
- The reason the client left the previous provider
- An explanation of the treatment status
- A compete treatment plan addressing all procedures for which authorization is being requested (such as the number of monthly adjustments or retainers required to complete the case)
- A full diagnostic work-up (D8080) with an HLD Index. The score of 26 points will be modified according to any progress achieved

Exception: *The authorization requests for clients who already have orthodontic appliances and subsequently become eligible for Medicaid do not require models or the HLD score sheet, nor does the client have to meet the HLD Index of 26 points. However, a complete plan of treatment is required.*

Documentation should include the reason for leaving the previous provider and the new plan of treatment. The new provider may submit a full diagnostic work-up (D8080) with scoring. The HLD score of 26 will be modified according to any progress achieved.

Exception: *The authorization requests for clients who already have orthodontic appliances and subsequently become eligible for Medicaid do not require models or the HLD score sheet, nor does the client have to meet the HLD score of 26 (see page 19-48); however, a complete plan of treatment is required.*

To request authorization to complete the orthodontic treatment initiated by another provider, complete a Dental Services Authorization Request Form and send it with the complete plan of treatment and appropriate documentation for orthodontic services and/or crossbite therapy to the TMHP Dental Director at the following address:

Texas Medicaid & Healthcare Partnership
THSteps and ICF-MR Dental Authorization and Information
PO Box 202917
Austin, TX 78720-2917

CPT only copyright 2005 American Medical Association. All rights reserved.

19.22.6 Orthodontic Procedure Codes and Fee Schedule

When submitting claims for orthodontic procedures, use the following procedure codes:

Procedure Code	Limitations	Maximum Fee
	Orthodontic Services	
D0330, D0340, D0350, and D0470*	Payment is limited to two denied cases of every ten cases submitted for authorization. D0330 and D0340 and D0350 and D0470 *These four procedure codes, when billed together, replace local procedure code Z2010.*	$100.00
D7280		$87.50
D7997*	Replaces Z2016. Not payable to the dentist who placed the appliance. Includes removal of arch bar and premature removal of braces.	$50.00
	Interceptive Orthodontic Treatment	
D8050*	Replaces Z2018 and 8110D. Limited to one per lifetime.	$340.00
D8060*	Replaces Z2018 and 8120D. Limited to one per lifetime.	$340.00
* = Services payable to an FQHC based for a client encounter.		

19.22.7 Comprehensive Orthodontic Treatment

With implementation of the *Health Insurance Portability and Accountability Act* (HIPAA) code standardization, certain local orthodontia codes were deleted and mapped to a new national procedure code. Effective October 16, 2003, national procedure code D8080 replaced the three orthodontic local procedure codes Z2009, Diagnostic work-up approved, Z2011, Orthodontic appliance, upper, and Z2012, Orthodontic appliance, lower.

National procedure codes do not allow for any work-in-progress or partial billing by separating the three orthodontic components. Claims from Medicaid providers billed in this manner will be denied.

When billing for these services, the local codes must be submitted as remarks codes along with the national procedure code D8080. Local codes (Z2009, Z2011 or Z2012) are placed in the Remarks Code field on electronic claims or Block 35 on paper claims.

Note: *If the remarks code and procedure code D8080 are not submitted, the claim will be denied.*

Each remarks code pays the correct reimbursement rate which, when combined, totals the maximum payment of $775. D8080 must be billed on three separate details, with the appropriate remarks code, even if billing for the work-up and full banding. Billing only one detail for a total of $775 will not be accepted.

Example 1: A client is approved for full banding, but after the initial work-up, the client discontinues treatment. This provider would bill the national code D8080 and place the local code Z2009, Diagnostic work-up approved, in the Remarks/comment field. The claim would pay $175.

Example 2: A client is approved for full banding. The provider continues treatment and places the maxillary bands. The provider would bill the national procedure code D8080 and place the local code Z2009, Diagnostic work-up approved, and Z2011, Maxillary bands, in the Remarks/comment field. The claim would pay $475.

Important: *All electronic claims for D8080 must have the appropriate remarks code associated with the procedure code.*

Providers should adhere to the following guidelines for electronic claim submission so that TMHP can accurately apply the correct remarks code to the appropriate claim detail.

A Diagnostic Procedure Code (DPC) remarks code must be submitted, only once, in the first three bytes of the NTE02 at the 2400 loop.

CPT only copyright 2005 American Medical Association. All rights reserved.

Example 1: For a claim with one detail, submitted with procedure code D8080 and remarks code Z2009, enter the information as follows: DPCZ2009. The total billed would be $175.

Example 2: For a claim with two details, where details one and two are procedure code D8080 and the remarks codes are Z2009 and Z2011, enter the information as follows: DPCZ2009Z2011. The total billed would be $475.

Example 3: For a claim with three details, where all three details are submitted separately with procedure code D8080, enter the remarks code based on the order of the claim detail as follows: DPCZ2009Z2011Z2012. The total billed would be $775.

This method ensures accurate and appropriate payment for services rendered and addresses the need for partial billing.

Procedure Code	Limitations	Maximum Fee
D8080*	Replaces Z2009, Z2011, and Z2012. Limited to one per lifetime.	$775.00
Minor Treatment to Control Harmful Habits		
D8210*	See separate table for associated remarks field code.	See separate table
D8220*	See separate table for associated remarks field code.	See separate table
Other Orthodontic Services		
D8660*	Replaces Z2008.	$15.00
D8670*	Replaces Z2013.	$68.10
D8680*	Replaces Z2014 and Z2015.	$100.00
D8690*	Bracket replacement.	$20.00
D8691		NC
D8692		NC
D8999		Manually priced
Special Orthodontic Situations		
D5951		$140.00
D5952		$843.75
D5953		$843.75
D5954		$443.75
D5955		$225.00
D5958		$225.00
D5959		$100.00
D5960		$100.00
*** = Services payable to an FQHC based for a client encounter.**		

Effective for dates of service on or after October 16, 2003, all removable or fixed orthodontic appliances must be billed with national procedure code D8210 or D8220. To ensure appropriate claims processing, the DPC remarks code reflecting the specific service is also required. The appropriate remarks codes must be entered on the authorization request form. Place the appropriate remarks code in Block 35 (Remarks) of the dental paper claim form and in the Comments field of the electronic claim to ensure correct authorization, accurate records, and reimbursement. Failure to enter the DPC remarks code and the appropriate procedure code will not result in claim denial; however, manual intervention is required to process the claim, which may result in a delay of payment.

All electronic claims for special appliances (D8210 and D8220) must have the appropriate DPC remarks code associated with the procedure code.

Providers should adhere to the following steps for electronic claim submission (other than TDHconnect) so that TMHP can accurately apply the correct remarks code to the appropriate claim detail.

The prefix, DPC, must be submitted, only once, and in the first three bytes of the NTE02 at the 2400 loop.

CPT only copyright 2005 American Medical Association. All rights reserved.

Example 1: For a claim with three details, where details one and three are submitted with procedure code D8210 and detail two (i.e., D8670) is not submitted with procedure code D8210, enter the information as follows with a space between the DPC remarks codes, as follows: DPC1014D 1046D.

Example 2: For a claim with three details, where details two and three are submitted with procedure code D8210 and detail one (i.e., D8670) is not submitted with procedure code D8210, enter the information with a space after the DPC, as follows: DPC 1014D1046D.

Example 3: For a claim with three details, where all three details are submitted procedure code D8210, in bytes 4–8, submit the DPC remarks code based on the order of the claim detail.

The following table identifies the appropriate DPC remarks codes to use when requesting authorization or billing for procedure code D8210 or D8220:

Procedure Code	Remarks Code	Remarks Code Description	Maximum Fee
		Special Orthodontic Appliances	
D8220*	DPC1000D	Appliance with horizontal projections	$250
D8220*	DPC1001D	Appliance with recurved springs	$250
D8220*	DPC1002D	Arch wires for crossbite correction (for total treatment)	$595
D8220*	DPC1003D	Banded maxillary expansion appliance	$375
D8210*	DPC1004D	Bite plate/bite plane	$100
D8210*	DPC1005D	Bionator	$100
D8210*	DPC1006D	Bite block	$250
D8210*	DPC1007D	Bite-plate with push springs	$250
D8220*	DPC1008D	Bonded expansion device	$225
D8210*	DPC1010D	Chateau appliance (face mask, palatal exp and hawley)	$300
D8210*	DPC1011D	Coffin spring appliance	$275
D8220*	DPC1012D	Crib	$100
D8210*	DPC1013D	Dental obturator, definitive (obturator)	$250
D8210*	DPC1014D	Dental obturator, surgical (obturator, surgical stayplate, immediate temporary obturator)	$250
D8220*	DPC1015D	Distalizing appliance with springs	$250
D8220*	DPC1016D	Expansion device	$375
D8210*	DPC1017D	Face mask (protraction mask)	$350
D8220*	DPC1018D	Fixed expansion appliance	$375
D8220*	DPC1019D	Fixed lingual arch	$225
D8220*	DPC1020D	Fixed mandibular holding arch	$100
D8220*	DPC1021D	Fixed rapid palatal expander	$375
D8210*	DPC1022D	Frankel appliance	$100
D8210*	DPC1023D	Functional appliance for reduction of anterior openbite and crossbite	$375
D8210*	DPC1024D	Headgear (face bow)	$150
D8220*	DPC1025D	Herbst appliance (fixed or removable)	$250
D8220*	DPC1026D	Inter-occlusal cast cap surgical splints	$375
D8210*	DPC1027D	Intrusion arch	$100
D8220*	DPC1028D	Jasper jumpers	$100
D8220*	DPC1029D	Lingual appliance with hooks	$100
D8220*	DPC1030D	Mandibular anterior bridge	$175
*** = Services payable to an FQHC based on an all-inclusive rate per visit.**			

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Remarks Code	Remarks Code Description	Maximum Fee
D8220*	DPC1031D	Mandibular bihelix (similar to a quad helix for mandibular expansion to attempt nonextraction treatment)	$100
D8210*	DPC1032D	Mandibular lip bumper	$100
D8220*	DPC1036D	Mandibular lingual 6x6 arch wire	$100
D8210*	DPC1037D	Mandibular removable expander with bite plane (crozat)	$275
D8210*	DPC1038D	Mandibular ricketts rest position splint	$375
D8210*	DPC1039D	Mandibular splint	$225
D8210*	DPC1040D	Maxillary anterior bridge	$175
D8210*	DPC1041D	Maxillary bite-opening appliance with anterior springs	$100
D8220*	DPC1042D	Maxillary lingual arch with spurs	$100
D8220*	DPC1043D	Maxillary and mandibular distalizing appliance	$100
D8220*	DPC1044D	Maxillary quad helix with finger springs	$325
D8220*	DPC1045D	Maxillary and mandibular retainer with pontics	$175
D8210*	DPC1046D	Maxillary Schwarz	$250
D8210*	DPC1047D	Maxillary splint	$225
D8210*	DPC1048D	Mobile intraoral Arch-Mia (similar to a Bihelix for nonextraction treatment)	$100
D8220*	DPC1049D	Modified quad helix appliance	$275
D8220*	DPC1050D	Modified quad helix appliance (with appliance)	$275
D8220*	DPC1051D	Nance appliance	$100
D8220*	DPC1052D	Nasal stent	$250
D8210*	DPC1053D	Occlusal orthotic device	$175

19.23 Orthodontic Appliances

Effective for dates of service on or after October 16, 2003, all removable or fixed orthodontic appliances must be billed with national procedure code D8210 or D8220. To ensure appropriate claims processing, the local procedure code reflecting the specific service is also required. For paper claim submissions, enter the local procedure code in the remarks section of the claim form. For electronic submissions other than TDHconnect software submissions, follow the steps below to ensure TMHP accurately applies the correct local procedure code to the appropriate claim detail:

1) The DPC prefix must be submitted in the first three bytes of the NTE02 at the 2400 loop. The DPC prefix should only be submitted once.
2) In bytes 4-8, submit the remark code (local procedure code) based on the order of the claim detail. Do not enter any spaces or punctuation between remark codes, unless to designate the detail is not billed with D8210 or D8220.

Example: *For a claim with three details, where details one and three are submitted with procedure code D8210 and detail two is not, enter the following information in the NTE02 at the 2400 loop: DPC1014D 1046D. (The space shows that detail two needs no local code.) If all details require a local code, enter DPC, no spaces, and the appropriate local codes.*

To submit using TDHconnect software, enter the local code into the Remarks Code field, located under the details header. The Remarks Code field is the field directly after the Procedure Code field. TDHconnect submitters are not required to manually enter the DPC prefix as it is placed in the appropriate field on the TDHconnect electronic claim.

Failure to follow the above steps will cause the claims to deny.

The prior authorization request must include both the national code and remarks code. However, prior authorization requests may omit the DPC prefix to the eight-digit remarks code.

19.23.1 How to Score the Handicapping Labio-Lingual Deviation (HLD) Index

The orthodontic provider must complete and sign the diagnosis (Angle class).

Cleft Palate

Submit a cleft palate case in the mixed dentition only if it can be justified in a narrative why there should be treatment before the client is in the full dentition.

Note: *Intermittent treatment requests may exceed the allowable 26 reimbursable treatment visits.*

Severe Traumatic Deviations

Refers to facial accidents only. Points cannot be awarded for congenital deformity. It does not include traumatic occlusions for crossbites.

Overjet in Millimeters

Score the case exactly as measured, then subtract 2 mm (considered the norm), and enter the difference as the score.

Overbite in Millimeters

Score the case exactly as measured, then subtract 3 mm (considered the norm), and enter the difference as the score. This would be double-counting.

CPT only copyright 2005 American Medical Association. All rights reserved.

Mandibular Protrusion in Millimeters
Score the case by measurement in mm by the distance from the labial surface of the mandibular incisors to the labial surface of the maxillary incisor. Do not score both overbite and open bite.

Open Bite in Millimeters

Score the case exactly as measured. Measurement should be recorded from the line of occlusion of the permanent teeth—not from ectopically erupted teeth in the anterior segment. *Caution is advised in undertaking treatment of open bites in older teenagers, because of the frequency of relapse.*

Ectopic Eruption

An unusual pattern of eruption, such as high labial cuspids or teeth that are grossly out of the long axis of the alveolar ridge. Do *not* include (score) teeth from an arch if that arch is to be counted in the following category of Anterior Crowding. For each arch, either the ectopic eruption *or* anterior crowding may be scored, but *not* both.

Anterior Crowding

Anterior teeth that require extractions as a prerequisite to gain adequate room to treat the case. If the arch expansion is to be implemented as an alternative to extraction, provide an estimated number of appointments required to attain adequate stabilization. Arch length insufficiency must exceed 3.5 mm to score for crowding on any arch. Mild rotations that may react favorably to stripping or moderate expansion procedures are not to be scored as crowded.

Labio-Lingual Spread in millimeters

The score for this category should be the total, in millimeters, of the anterior spaces.

Providers should be conservative in scoring. Liberal scoring will not be helpful in the evaluation and approval of the case. The case *must* be considered *dysfunctional* and have a minimum of *26* points on the HLD index to qualify for any orthodontic care other than crossbite correction. Half-mouth cases cannot be approved.

The intent of the program is to provide orthodontic care to clients with handicapping malocclusion to improve function. Although aesthetics is an important part of self-esteem, services that are primarily for aesthetics are not within the scope of benefits of this program.

The proposals for treatment services should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch will be reviewed for duplication of purpose.

If attaining a qualifying score of 26 points is uncertain, provide a brief narrative when submitting the case. The narrative may reduce the time necessary to gain final approval and reduce shipping costs incurred to resubmit records.

Properly label and protect all records (especially plaster diagnostic models) when shipping. TMHP returns records adequately protected.

Refer to: “HLD Score Sheet” on page 19-48.

19.23.2 HLD Score Sheet

This sheet and a Boley Gauge are required to score.

Procedure:

- Occlude client or models in centric position.
- Record all measurements rounded-off to the nearest millimeter.
- Enter score 0 if the condition is absent.
- Overjet is measured from the most protrusive incisor.
- Overbite is measured from the labio-incisal edge of overlapped anterior tooth or teeth to point of maximum coverage.
- Ectopic eruption and anterior crowding: *Do not double-score.* Record the more serious condition.

20.1 Overview

This section of the *Texas Medicaid Provider Procedures Manual* (TMPPM) includes information on family planning services funded by Medicaid and other non-Medicaid funding sources. Family planning services are preventive health, medical, counseling, and educational services that assist individuals in managing their fertility and achieving optimal reproductive and general health. For information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding from the Department of State Health Services (DSHS), refer to the website at www.dshs.state.tx.us/famplan/.

20.2 Funding Sources

TMHP processes family planning claims and encounters for four different funding sources administered through the Community Health Services Section at DSHS and the Texas Health and Human Services Commission (HHSC). These funding sources include Title V, X, XIX, and XX. Agencies across Texas are awarded contracts for Titles V, X, and XX to provide services to low-income individuals who may not qualify for Medicaid services. These awards are granted through a competitive procurement process. DSHS contracts with a variety of providers, including local health departments, universities and medical schools, private nonprofit agencies, rural health clinics, and hospital districts. Some contractors receive more than one type of funding. All contractors serve Medicaid-eligible individuals. Client eligibility requirements, reimbursement methodologies, client copayment guidelines, and covered services differ for each funding source. Family planning funding is not used to provide abortion services.

20.2.1 Title V

Title V, or the Maternal and Child Health Block Grant of the *Social Security Act*, was passed in 1935 to provide a variety of services to low-income pregnant women and recently-delivered low-income mothers and their children. Title V funding can be used for several direct health services to women and children including prenatal care, family planning, dysplasia services, well-child care, sick-child care, and dental care for children. Title V also funds population-based projects. Texas receives a limited annual allocation of Title V funds from the federal government. In turn, contractor agencies across Texas are awarded a portion of the state's Title V grant to provide these needed services in their community.

20.2.2 Title X

Congress passed the *Family Planning Services and Population Research Act* in 1970, which added Title X to the *Public Health Services Act* 42 U.S.C 300 et seq. Title X is the only federal legislation that relates solely to family planning. The funding can be used to support payment for clinic facilities, staff salaries, utilities, medical and office supplies, equipment, and travel, as well as direct medical services. Title X funding in Texas also supports population-based activities. Texas receives a limited annual allocation of Title X funds from the federal government. In turn, contractor agencies across Texas receive a portion of the state's Title X grant annually.

20.2.3 Title XIX (Medicaid)

Medicaid, or Title XIX of the *Social Security Act*, was created in Congress in 1965 as part of the "War on Poverty." Reimbursement is on a fee-for-service basis and paid after the services and supplies have been provided to eligible clients.

20.2.4 Title XX

Title XX, or the Social Services Block Grant of the *Social Security Act*, is the social services component of the *Social Security Act*. Title XX functions much like Title XIX (Medicaid) in that the agencies are reimbursed on a fee-for-service basis for services and supplies that have already been supplied to eligible clients. Title XX funds are used for individual and community-wide educational activities, as well as for direct medical care. DSHS receives an annual allocation of Title XX funds from the federal government and transfers a portion of the allocation to DSHS to provide family planning services. In turn, DSHS allocates these limited dollars to contractor agencies across Texas annually.

20.2.5 Guidelines for Family Planning Providers

Family planning services are provided by a physician or under physician direction, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by a registered nurse (RN), physician assistant (PA), nurse practitioner (NP), or clinical nurse specialist (CNS). Medicaid clients, including limited and managed care clients, are allowed to choose any enrolled family planning service provider.

Family planning clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate. They must also be allowed the freedom to accept or reject services without coercion. Services must be provided without regard to age, marital status, sex, race/ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference. Only family planning clients, not their parents, spouses, or any other individuals may consent to the provision of family planning services funded by Title X, XIX, or combined X and XX funds. However, counseling should be offered to adolescents that encourages them to discuss their family planning needs with a parent, an adult family member, or other trusted adult. For family planning services provided by Title V, the consent of a parent or other adult is governed by the *Texas Family Code*, Chapter 32. For more information, visit www.dshs.state.tx.us/famplan/contractor/rider13.shtm.

CPT only copyright 2005 American Medical Association. All rights reserved.

20.3 Family Planning Claim Billing

20.3.1 Family Planning and Third Party Insurance

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance resources may jeopardize the client's confidentiality, prior insurance billing *is not a requirement for billing family planning for any title program*.

20.3.2 Claims Information

All family planning services (Titles V, X, XIX, and XX) provided by physicians, PAs, NPs, CNSs, and family planning agencies who also contract with DSHS for Title V, X, or XX must be submitted to TMHP in an approved electronic format or on the Family Planning 2017 (Revised January 2005) claim form. Providers may copy the Family Planning 2017 claim form provided in this manual on page 5-48 or download it from the TMHP website at www.tmhp.com. Medicaid family planning providers who do not also contract with DSHS for Title V, X, or XX, may use either the Family Planning 2017 claim form or the CMS-1500 claim form. Hospitals will continue to use the HCFA-1450 (UB-92) when billing family planning services. federally qualified health centers (FQHCs) may use either the HCFA-1450 (UB-92) or the Family Planning 2017 claim form to bill family planning Medicaid services. However, if an FQHC also contracts with DSHS to provide Titles V, X or XX family planning services, the Family Planning 2017 claim form/format must be used to submit all family planning claims, including Title XIX family planning claims. Call the TMHP Contact Center at 1-800-925-9126 for provider inquiries regarding family planning services, such as reimbursement rates, procedures, or claims filing questions.

20.3.2.1 Medicaid Managed Care

Providers *must* use the CMS-1500 (physician, nonfacility) or HCFA-1450 (UB-92) (hospital) claim forms and submit claims directly to Medicaid Health Maintenance Organizations (HMOs) for Title XIX family planning services. Title V, X, or XX claims must always be submitted to TMHP directly using the Family Planning 2017 (Revised January 2005) claims form/format.

Providers submitting claims for family planning services to TMHP for the Primary Care Case Management (PCCM) may use the Family Planning 2017 claim form. FQHCs submitting claims for family planning services to TMHP for the PCCM may use either the Family Planning 2017 claim form or the UB-92 claim form. However, if an FQHC also contracts with DSHS to provide Titles V, X or XX family planning services, the Family Planning 2017 claim form/format must be used to submit all family planning claims, including Title XIX family planning claims.

Hospitals will continue to use the HCFA-1450 (UB-92) when billing family planning services.

20.3.2.2 Billing HMOs for Out-of-Network Family Planning Services

Medicaid Managed Care including STAR+PLUS HMOs are responsible for reimbursing providers for family planning benefits. A family planning provider does not have to contract with the client's HMO to be reimbursed for family planning services. Title XIX (Medicaid) family planning providers should contact the client's health plan for billing instructions.

20.3.3 Sterilization Consent Form and Instructions

Per federal regulation 42 CFR 50, Subpart B, all sterilizations require a valid consent form regardless of the funding source. Providers *must* use the consent form provided in this manual on pages B-92 and B-96. Ensure all required fields are completed for timely processing. These fields are listed in "Required Fields" on page 20-5.

Fax the Sterilization Consent Form five business days before submitting the associated claim(s) to expedite the processing of the Sterilization Consent Form and associated claim(s). Fax fully completed Sterilization Consent Forms to TMHP at 1-512-514-4229. Claims and appeals are not accepted by fax. Only send Family Planning sterilization correspondence to this fax number. Please ensure that both Page 1 and Page 2 of the sterilization consent form are faxed together. Failure to do so may delay claim processing or cause the claim to be denied.

Note: *Hysterectomy Acknowledgment forms discussed in Section 34 are not sterilization consents and should be faxed to 1-512-514-4218.*

20.3.3.1 Sterilization Consent Form Instructions

Clients must be *at least 21 years of age* when the consent form is signed. If the client was not 21 years of age when the consent form was signed, the consent will be denied. Changing signature dates is considered fraudulent and will be reported to the Office of the Inspector General (OIG).

There must be at least 30 days between the date the client signs the consent form and the date of surgery, with the following exceptions:

Exception: *Premature delivery—There must be at least 30 days between the date of consent and the client's expected date of delivery.*

Exception: *Cases of Emergency Abdominal Surgery not associated with pregnancy—There must be at least 72 hours between the date of consent and the date of surgery. Operative reports detailing the need for emergency surgery are required.*

Listed below are field descriptions for the Sterilization Consent Form published in this manual. Completion of *all* sections is required to validate the consent form, with only two exceptions:

1) Race and ethnicity designation is requested but not required.

CPT only copyright 2005 American Medical Association. All rights reserved.

2) The Interpreter's Statement is not required as long as the consent form is written in the client's language, or the person obtaining the consent speaks the client's language. However, if this section is only partially completed, the consent will not be accepted as a valid consent.

This Sterilization Consent Form may be copied for provider use. Providers are encouraged to frequently recopy the original form to ensure legible copies and to expedite consent validation. Fax fully completed Sterilization Consent Forms to TMHP at 1-512-514-4229.

20.3.3.2 Required Fields

All of the fields must be legible in order for the consent form to be valid. Any illegible field will result in a denial of the submitted consent form. Resubmission of legible information must be indicated on the consent form itself. Resubmission with information indicated on a cover page or letter will not be accepted.

Consent to Sterilization

- Name of Doctor or Clinic.
- Name of the Sterilization Operation.
- Client's Date of Birth (month, day, year)
- Client's Name [First and last names are required. This name should match the other *client name* fields on this form as well as on the associated claim(s)].
- Name of Doctor or Clinic
- Name of the Sterilization Operation.
- Client's Signature.
- Date of Client Signature - Client must be at least 21 years of age on this date. This date cannot be altered or added at a later date.

Interpreter's Statement (If applicable)

- Name of Language Used by Interpreter.
- Interpreter's Signature.
- Date of Interpreter's Signature (month, day, year).

Statement of Person Obtaining Consent

- Client's Name (first and last names are required).
- Name of the Sterilization Operation.
- Signature of Person Obtaining Consent-The statement of person obtaining consent must be completed by the person who explains the surgery and its implications and alternate methods of birth control. The signature of person obtaining consent must be completed at the time the consent is obtained. The signature must be an original signature, not a rubber stamp.
- Date of the Person Obtaining Consent's Signature (month, day, year) - Must be the same date as the client's signature date.
- Facility Name - Clinic/office where the client received the sterilization information.
- Facility Address - Clinic/office where the client received the sterilization information.

Physician's Statement

- Client's Name (first and last names are required).
- Date of Sterilization Procedure (month, day, year) - Must be at least 30 days and no more than 180 days from the date of the client's consent except in cases of premature delivery or emergency abdominal surgery.
- Name of the Sterilization Operation.
- Expected Date of Delivery (EDD) - Required when there are less than 30 days between the date of the client consent and date of surgery. Client's signature date must be at least 30 days prior to EDD.
- Circumstances of Emergency Surgery - Operative report(s) detailing the need for emergency abdominal surgery are required.
- Physician's Signature - Stamped or computer-generated signatures are not acceptable.
- Date of Physician's Signature (month, day, year) -This date must be on or after the date of surgery.

Paperwork Reduction Act Statement

This is a required statement and must be included on every Sterilization Consent Form submitted.

Additional Required Fields

- Medicaid or Family Planning Number - Clients submitted as Titles V, X, and XX may not have a Family Planning number. Please simply indicate the appropriate Title below.
- Date Client Signed the Consent (month, day, year)
- Provider identifier - Including the nine-digit provider identification number will expedite the processing of the consent form.
- Provider/Clinic Phone Number.
- Provider/Clinic Fax Number (If available).
- Family Planning Title for Client - Indicate by circling V, X, XIX (Medicaid), or XX.

20.3.4 Use of the Family Planning 2017 Claim Form

To better serve family planning clients and track the family planning services provided, DSHS has mandated the use of the Family Planning 2017 (Revised January 2005) claim form for certain family planning services for Title XIX (Medicaid), if the provider is also a Title V, X, or XX contractor. Use this claim form when submitting claims/encounters for Title V, X, XIX or XX family planning services.

CPT only copyright 2005 American Medical Association. All rights reserved.

Medicaid-only providers who do not also contract with DSHS for Title V, X, or XX may use either the Family Planning 2017 claim (Revised January 2005) form or the CMS-1500 claim form when billing the following family planning services; this list is not all-inclusive:

Procedure Code		
9-A4261	9-A4266	1-A4267
1-A4268	1-A4269	1-A9150 *with* modifier FP
1-H1010	1J1055	1-J1056
1-J3490	1-J7302	1-J7300*†
1-S9445 *with* modifier FP	1-S4993	1-55250

*** = Services payable to an FQHC based on an all-inclusive rate per visit.**
† = Services payable on an all-inclusive rate per visit for an RHC client.

Managed Care providers submitting claims directly to Medicaid HMOs for family planning services must use the CMS-1500 (physician, nonfacility) or HCFA-1450 (UB-92) (hospital) claim forms. Title V, X, or XX claims must always be submitted to TMHP directly using the Family Planning 2017 (Revised January 2005) claims form/format. Providers submitting claims for family planning services to TMHP for the Primary Care Case Management (PCCM) Program may use the Family Planning 2017 claim form. However, FQHCs submitting claims for family planning services to TMHP for the PCCM may use either the Family Planning 2017 claim form or the UB92 claim form.

20.3.4.1 Electronic TDHconnect Claims in a Title X-Supported Clinic

All claims and encounters for clients at Title X clinics must have Title X checked in the Title X Payment *Level* section under the *Patient* tab of the electronic claim form. This selection ensures that the required fields on the claim form will be completed.

Titles V, XIX, and XX

Clients eligible for Title V, XIX or XX must have the *Title X* box *and* the Funding Source box, to which the claim will be billed (Family Planning Program Block) checked on the Patient tab. This selection keeps claims from being rejected and ensures the collection of all information required for the *Family Planning Annual Report*. The level of practitioner, in the General section of the Claim tab of the electronic claim form, must also be selected by a clinic that uses Title X funds.

Title X Only

The Title X box must be checked and the payment level must be selected in the Title X Payment *Level* block under the Patient tab. Depending on family size and income, the agency designates Title X clients as full pay, partial pay, or no pay for services. The Level of Practitioner in the General section of the Claim tab of the electronic claim form must also be selected.

20.3.4.2 Paper Form: Family Planning 2017 Claim Forms in a Title X-Supported Clinic

Titles V, XIX, and XX

Clients eligible for Title V, XIX, or XX must have the funding source to which the claim will be billed checked in Block 1 of the Family Planning 2017 claim form. These clients need to be counted on the *Family Planning Annual Report* and Block 28, Level of Practitioner, must be completed for every Family Planning 2017 claim form submitted by a clinic that uses Title X funds.

Title X Only

The payment level must be selected in the Title X Only section of Block 1a. Depending on family size and income, the agency designates Title X clients as full pay, partial pay, or no pay for services. Block 28, Level of Practitioner, must also be completed.

Refer to: "Family Planning Annual Report" on page 20-8 for more information.

20.3.4.3 Other Electronic Claims in the Title X-Supported Clinic

Electronic claims that do not use TDHconnect must follow the specifications for electronic claim submission. Providers should contact their commercial software vendor or TMHP through the TMHP website at www.tmhp.com or call the TMHP EDI Help Desk at 1-888-863-3638 for more information.

CPT only copyright 2005 American Medical Association. All rights reserved.

20.3.5 Filing Deadlines

Title	Deadline	Appeals
V, X, XX	120 days from the date of service on the claim or date of any third party insurance EOB	120 days from the date of the Remittance and Status (R&S) report on which the claim reached a finalized status
XIX	95 days from the date of service on the claim or date of any third party insurance EOB	120 days from the date of the R&S report on which the claim reached a finalized status

Note: *If the filing deadline falls on a weekend or holiday, the filing deadline is extended until the next business day.*

20.3.6 Claim Appeals

20.3.6.1 Two Appeal Methods to TMHP for Family Planning Titles V, X, and XX

An appeal is a request for reconsideration of a previously dispositioned claim.

Providers may use two methods to appeal Family Planning Program 300 (Titles V, X, and XX) claims to TMHP, electronic or paper.

TMHP must receive all appeals of denied claims and requests for adjustments on paid claims within 120 days from the date of disposition of the R&S on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline is extended to the next business day.

20.3.6.2 Electronic Appeal Submission

Electronic appeal submission is a method of submitting Texas Medicaid appeals using a personal computer (PC). The electronic appeals feature can be accessed by a business organization bridging directly into the TMHP EDI Gateway or by using TDHconnect, the free, Windows-based software available from TMHP.

Advantages of Electronic Appeal Submission

Using electronic appeal submission provides the following advantages to the users:

- Increased accuracy of appeals filed to potentially improve cash flow.
- Print and download capabilities help maintain audit trails.
- Appeal submission windows can be automatically filled in with electronic R&S report information, thereby reducing data entry time.
- Increases speed of payment processing.

Paper Appeals

Appeal the claim on paper by completing the following steps:

- Make a copy of the R&S page where the claim is reported or other official notification from TMHP.
- Circle one claim per R&S page for each adjustment.
- Identify the incorrect and/or missing information and submit changes that should be used to appeal the claim.
- Attach a copy of supporting medical documentation that is necessary or requested by TMHP.
- Attach a copy of the original claim if available, or the corrected claim form for the appeal. Claim copies are helpful when the appeal involves medical policy or procedure coding issues.

Submit correspondence, adjustments, and appeals to the following address:

Texas Medicaid & Healthcare Partnership
Inquiry Control Unit
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

20.3.6.3 Disallowed Appeals

If the provider's claim denies with EOB 00008, "Title X provider must provide level of practitioner information," the provider needs to submit a new claim with the correct level of practitioner. This claim denial cannot be appealed using the above-stated methods.

20.4 Family Planning Information

20.4.1 Title V

Agencies that submit claims for Title V Family Planning services must have a Title V contract with DSHS. The DSHS Title V Program determines client eligibility and services policy. Refer to the DSHS Title V Family Planning Manual for specific eligibility and policy information at www.dshs.state.tx.us/famplan.

20.4.2 Title X

Agencies that submit claims for Title X Family Planning services must have a Title X contract with DSHS. DSHS Community Health Services determines client eligibility and services policy. Refer to the DSHS Title X and Title XX Family Planning manual for specific eligibility and policy information at www.dshs.state.tx.us/famplan.

20.4.2.1 Title X Encounter Filing

In clinics supported by Title X funds, it is important to collect encounter data (such as demographics and services provided) for all family planning clients served, even for full-pay clients, regardless of the funding source to which the claim is billed. This data will be used to compile some of the elements of the *Family Planning Annual Report*. Certain fields on the claim form must be completed for all clients seen at Title X clinics, regardless of the funding source to which the claim will be billed.

CPT only copyright 2005 American Medical Association. All rights reserved.

Based on the clinic(s) indicated as supported by Title X funds on a provider's most recent request for proposal (RFP) application clinic form(s), Compass21 rejects all claims from Title X clinics that do not contain all the required information regardless of the title being billed.

Clients in a Title X clinic who are not billed to another funding source are considered *Title X-only* clients. In some instances (such as when all Title V or XX funds are expended), services provided to a client normally eligible for another funding source are not billed to that funding source. A client whose income according to family size falls outside the eligibility guidelines for Titles V or XX would also be a *Title X only* client. In these cases, a sliding fee scale that has been approved by the DSHS Community Health Services Section must be used to assess client fees for services received.

While it will not result in a payment from DSHS, a Family Planning 2017 Claim Form with the encounter information must be submitted to TMHP for all Title X-only clients, so that the required encounter data (demographics, etc.) are collected. Encounter forms for Title X clients are filled out the same way as for the other funding sources. Diagnosis information must be entered, and each of the services and/or tests provided to that client during the visit must be listed on the claim form. Sterilizations provided to *partial pay* or *no pay* clients must follow the federal guidelines for sterilizations, and a completed Sterilization Consent Form must be faxed to TMHP at 1-512-514-4229. Forward completed encounter forms to TMHP for processing. Payment for Title X services will follow the current voucher submittal process outlined by the DSHS Claims Processing Unit.

20.4.2.2 Family Planning Annual Report

Compass21 compiles encounter data for each Title X provider to complete portions of the federal Family Planning Annual Report. Data elements such as client demographic information, client income level, lab services utilized, and client birth control methods will be compiled by Compass21. DSHS will forward the completed *Family Planning Annual Report* tables containing these data elements to each Title X provider for verification. However, some data elements of the *Family Planning Annual Report* cannot be collected through the Compass21 billing system. These data elements include provider contact information, client health insurance coverage, the number of clients with limited English proficiency (LEP), and provider revenue. Title X providers are still required to submit the tables containing these data elements to DSHS for inclusion in the *Family Planning Annual Report*.

The *Family Planning Annual Report* requires a profile of medical care physicians and midlevel practitioners supported by Title X funds. This profile includes all practitioners working in Title X clinics, whether or not their salaries are paid with Title X funds. For the *Family Planning Annual Report* profile, primary care or generalist physicians and specialists are classified correctly as Physician in Box 28 (Level of Practitioner) on the claim form. Family planning encounters provided by certified nurse-midwives (CNM), NPs. CNSs, and PAs are categorized correctly as midlevel. Family planning encounters provided by a registered nurse or a licensed vocational nurse are categorized as nurse. Encounters provided by staff not included in the preceding classifications are categorized correctly as other. Only one level can be indicated; if services are provided by more than one staff member, the highest-level staff who provided services to the client should be reported. Compass21 determines if the services provided are medical or non medical encounters to compile the *Family Planning Annual Report*.

20.4.2.3 Payments

Title X encounters submitted will not result in payments to the providers. Providers will continue to submit monthly or quarterly Financial Status Reports (FSR) forms, along with a paper payment voucher, to the DSHS Contract Development and Support Branch and Claims Processing Unit. Title X providers will continue to receive reimbursement from the Comptroller.

20.4.3 Title XIX (Medicaid) Enrollment

20.4.3.1 Enrollment

Only these provider types may be used to bill family planning services under Title XIX (Medicaid): physician, NP, CNS, PA, CNM, FQHC, or family planning agency.

Physicians who wish to provide Medicaid Obstetric and Gynecological (OB-GYN) services are allowed to bypass Medicare enrollment and obtain a Medicaid-only provider identifier for OB-GYN services regardless of provider specialty. Similarly, FQHCs do not need to apply for a separate physician or agency number. Family planning services are payable under the existing FQHC provider identifier using the family planning procedure codes in this section.

Family planning services provided by a rural health clinic (RHC) will not be paid if billed using the RHC provider identifier, but may be billed using a physician or nurse practitioner number, or an RHC may apply for enrollment as a family planning agency and bill using the family planning agency provider identifier. These services provided to an RHC client must be billed using modifiers AJ, AM, SA, or U7. These services must be billed using the appropriate national place of service (72) for an RHC setting.

Family planning agencies must apply for enrollment with TMHP to receive an agency provider identifier. To be enrolled in the Medicaid program, family planning agencies must meet the following requirements:

- Complete an agency enrollment application.
- Ensure that all services are furnished by, prescribed by, or provided under the direction of a licensed physician in accordance with the Texas Board of Medical Examiners and/or Texas Board of Nurse Examiners requirements.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Have a medical director who is a physician currently licensed to practice medicine in Texas, and submit a current copy of the medical director's physician license.
- Have an established record of performance in the provision of both medical and educational/counseling family planning services as verified through client records, established clinic hours, and clinic site locations.
- Provide family planning services in accordance with DSHS standards of client care for family planning agencies.
- Be approved for family planning services by the DSHS Family Planning Program.

The effective date for participation is the date an approved provider agreement with Medicaid is established and the provider is assigned a Medicaid provider identifier.

A provider cannot be enrolled if his license is due to expire within 30 days. A current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more detailed information about enrollment procedures.

20.4.4 Billing Procedures for Nonfamily Planning Services Provided During a Family Planning Visit

When a nonfamily planning service is provided during a family planning visit or the client is offered family planning services during a medical visit, the following billing process must be used:

- A family planning agency must bill for nonfamily planning services using a physician or nurse practitioner provider identifier. Use the agency provider identifier to bill family planning services only.
- A physician, nurse practitioner, or FQHC must bill both family planning services and nonfamily planning services, using the correct physician, nurse practitioner, or FQHC provider identifier.
- An RHC may bill a rural health encounter for a nonfamily planning medical condition. Use the physician or nurse practitioner provider identifier to bill for family planning services, or if the RHC also is enrolled as a family planning agency, the family planning services may be billed using the agency's family planning provider identifier, and the appropriate national place of service (72) for an RHC setting.

20.4.5 Limited Medicaid Coverage

Title XIX (Medicaid) family planning services are exempt from the limited program and rules.

20.4.5.1 Family Planning Services for Undocumented Aliens, Legalized Aliens

Undocumented aliens are identified for limited Medicaid eligibility by the classification of Type Program (TP) 30, 31, 34, and 35. Under the Texas Medicaid Program, these clients are only eligible for emergency services, including emergency labor and delivery. Emergency-only services do not cover family planning under the Texas Medicaid Program to prevent future unintended pregnancies. All providers are strongly encouraged to promote the benefits and availability of family planning services under Titles V, X, and XX for this population. The family planning funding sources cover the provision of contraceptive devices, supplies, counseling, and sterilizations for these clients. Providers are asked to be aware of the importance of referral of these clients to family planning providers who receive Titles V, X, and XX funds with the goal of preventing future unintended pregnancies and births.

20.4.6 Title XX

Agencies that submit claims for Title XX Family Planning services must have a Title XX contract with DSHS. DSHS Community Health Services determines client eligibility and services policy.

The *DSHS Title X and Title XX Family Planning* manual for specific eligibility and policy information is available at www.dshs.state.tx.us/famplan

20.5 Diagnosis Codes

Providers should use one of the following diagnosis codes in conjunction with all procedures and services. The choice of diagnosis code should be based on the type of family planning service performed.

Diagnosis Code	Description	Types of Procedures to be Used With
V2502	General counseling on initiation of other contraceptive measures	
V2509	Other general counseling and advice on contraceptive management	All nonsterilization Family Planning procedures
V251	Insertion of intrauterine contraceptive device	
V252	Sterilization	All sterilization and sterilization-related procedures
V2540	Contraceptive surveillance, unspecified	
V2542	Surveillance of intrauterine contraceptive device	
V258	Other specified contraceptive management	

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description	Types of Procedures to be Used With
V259	Unspecified contraceptive management	
V615	Multiparity	All sterilization and sterilization-related procedures

20.6 Procedure Codes and Reimbursement Amounts

The procedure codes and reimbursement amounts listed are authorized for family planning billing by family planning agencies (see also 20.6.2.1). Use only the codes listed. Failure to do so may result in claim denials.

20.6.1 Family Planning Annual Exams

Procedure code 1-99203 or 1-99214 with modifier FP and FP diagnosis consists of a comprehensive health history and physical examination, including medical laboratory evaluations as indicated, an assessment of the client's problems and needs, and the implementation of an appropriate contraceptive management plan. The annual exam is allowed once per year, per client, per provider. Subsequent visits within the same year must be billed as an office visit or other outpatient visit.

Procedure Code	Fees for Titles V, XIX, and XX
1-99203	$48.27
or	
1-99214	
with	
modifier FP*	$41.46
* = Services payable to an FQHC based on an all-inclusive rate per visit.	

20.6.2 Office or Other Outpatient Visit

Procedure code 1-99213 is allowed for routine contraceptive surveillance, family planning counseling/education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit the following must occur:

- An update of the client's relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment and/or referral, if indicated
- Education/counseling or referral, if indicated
- Scheduling of office or clinic visit if indicated

20.6.2.1 Office Visits

Depending on the extent of the services provided during the office visit, providers may bill for the maximum allowable fees. Providers are allowed to use the procedure codes below for office or other outpatient visits. In order to receive reimbursement as family planning services, they must bill using an FP modifier and FP diagnosis. Refer to the following procedure codes: 1-99201, 1-99202, 1-99203, 1-99204, 1-99205 and 1-99211, 1-99212, 1-99213, 1-99214 and 1-99215.

20.6.3 Laboratory Procedures

20.6.3.1 Title V

Laboratory tests for Title V clients may be sent to the DSHS laboratory and/or one of its designated affiliates for processing at no cost to the provider. This cost will be covered by the Title V Program, and the DSHS laboratory.

Providers who choose not to use the DSHS laboratories can send their specimens to another laboratory of their choice, but they will not be reimbursed by DSHS for those services. These tests, whether provided by DSHS or another laboratory facility, must be documented on the Family Planning claim form to track the services provided and to collect accurate statewide data.

Refer to: "Titles V and XX" on page 20-11 to identify which tests are provided by DSHS at no cost to Title V contractors.

20.6.3.2 Title XIX

Medicaid family planning service providers must document all laboratory services ordered in the client's medical record as medically necessary and reference an appropriate diagnosis. Any test specimen sent to a laboratory for interpretation should not be billed on the family planning provider's claim. The laboratory bills Medicaid directly for the tests it performs.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA will not be reimbursed for laboratory services. Only the office or lab actually performing the laboratory test procedure and holding the appropriate CLIA certificate may bill for the procedure.

If a provider does not perform the laboratory procedure, he may be reimbursed one lab-handling fee a day, per client, unless multiple specimens are obtained and sent to different laboratories. Procedure code 1-99000 with modifier FP is paid for handling and/or conveyance of the specimen for transfer from the physician's office to a laboratory.

Handling fees are not paid for Pap smears or cultures. When billing for Pap smear interpretations, the claim must indicate that the screening and interpretation were actually performed in the office (place of service [POS] 1) by using the modifier SU, Procedure performed in physician's office (e.g., 5-88150-SU).

CPT only copyright 2005 American Medical Association. All rights reserved.

Forward the client's name, address, Medicaid number, and a family planning diagnosis with any specimen, including Pap smears, to the reference laboratory so the laboratory may bill the Texas Medicaid Program for its family planning lab services.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service (i.e., procedure must be billed with a family planning diagnosis).

20.6.3.3 Titles V and XX

The following list of laboratory procedures and reimbursements are those authorized for billing by Titles V and XX family planning service providers with appropriate documentation in the client's record.

Procedure Code	Title V Fee	TItle XX Fee
5-80061	$0*	NA
5-81002	$3.54	$3.54
5-81015	$4.20	$4.20
5-81025	$8.74	$8.74
5-81099	$0*	NA
5-82465	$0*	$6.02
5-82947	$0*	$5.42
5-83020	$0*	NA
5-84478	$7.95	$7.95
5-85013	$3.27	$3.27
5-85018	$3.27	$3.27
5-85025	$11.71	$11.71
5-85660	$7.63	$7.63
5-86580	$7.36	$7.36
5-86592	$0*	$5.90
5-86701	$0*	NA
5-86762	$0*	$19.89
5-87070	$11.90	$11.90
5-87205	$5.90	$5.90
5-87797	$0*	$27.71
5-88150	$0*	$14.60
5-88230	$0*	NA

*** Title V providers do not receive reimbursement for services performed free of charge by the DSHS Laboratory. For correct tracking of services performed, providers are required to include these services on their Title V Family Planning claims filed with TMHP.**

Refer to: "Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

20.6.3.4 Title XIX

The following is a list of laboratory procedures and reimbursement amounts authorized for billing by Title XIX family planning service providers with appropriate documentation in the client record. This list is not all-inclusive:

Procedure Code	Title XIX Fee
5-80061	$18.51
5-81000	$4.37
5-81002	$3.54
5-81015	$4.20
5-81025	$8.74
5-81099	MP
5-82465	$6.02
5-82947	$5.42
5-83020	$17.80
5-83718	$11.31
5-83719	$16.08
5-83721	$13.18
5-84478	$7.95
5-84702	$12.07
5-84703	$10.38
5-85013	$3.27
5-85014	$3.27
5-85018	$3.27
5-85025	$10.74
5-85660	$7.63
5-86317	$20.72
5-86403	$14.08
5-86580	$7.36
5-86592	$5.90
5-86689	$26.75
5-86701	$12.28
5-86702	$14.59
5-86703	$18.96
5-86762	$19.89
5-86781	$12.09
5-86850	$16.18
5-86900	$4.12
5-86901	$9.27
5-87070	$11.90
5-87076	$11.16
5-87077	$11.16
5-87086	$11.16
5-87088	$11.18

MP–Manually Priced

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Title XIX Fee
5-87110	$27.08
5-87205	$5.90
5-87797	$27.71
5-88142	$25.00
5-88150	$14.60
5-88230	$161.00
5-88262	$172.25
1-99000 *with* modifier FP	$3.55
MP–Manually Priced	

20.6.4 Radiology

Radiology services are to be performed for the purpose of localization of an intrauterine device.

Procedure Code	Fee for Titles V, XIX, and XX
4-74000	$22.91
4-74010	$27.00
4-76815	$69.55

20.6.4.1 Title XIX (Medicaid) Only

These procedures can be billed on either the Family Planning 2017 claim form or the CMS-1500 claim form. Physicians, NPs, CNSs, PAs, and FQHCs may bill any radiology code that is medically necessary.

20.6.5 Contraceptive Devices and Related Procedures

Procedure Code	Fee for Titles V, XIX, and XX
9-A4261	$24.22
9-A4266	$10.01
1-J7300	$321.13
1-J7302	$426.97
2-11976	$152.25
2-57170	$38.00
2-58300	$69.00
2-58301	$39.01

Contraceptive Devices

- Procedure codes 1-J7300 or 1-J7302 must be billed with 2-58300 on the same date of service to receive reimbursement for the Copper IUD and the insertion of the IUD.
- An IUD insertion/procurement of the IUD may be reimbursed when billed on the same date of service as a dilation and curettage (2-58120). Procedure code 2-58120 is reimbursed at full allowance. Procedure code 2-58300 is denied as part of another service. Procedure codes 1-J7300 and 1-J7302 are reimbursed at full allowance.
- When a vaginal, cervical, or uterine surgery (e.g., cervical cauterization) is billed for the same date of service as the insertion of the IUD, the surgical procedure is paid at full allowance and the IUD insertion billed using procedure code 2-58300 is paid at half the allowed amount.

20.6.5.1 Contraceptive Diagnosis Code Description

Diagnosis Code	Description
V2502	General counseling on initiation of other contraceptive measures
V2509	Other general counseling and advice on contraceptive management
V251	Insertion of intrauterine contraceptive device
V2540	Contraceptive surveillance, unspecified
V2542	Surveillance of intrauterine contra-ceptive device
V258	Other specified contraceptive management
V259	Unspecified contraceptive management
V615	Multiparity

20.6.6 Drugs and Supplies

Procedure Code	Fee for Titles V, XIX, and XX
9-A4261	$24.22
9-A4266	$10.01
1-A4267	$0.22
1-A4268	$2.00
1-A4269	$4.00
1-A9150 * *with* modifier FP	$14.00
1-J1055	$48.10
1-J3490*	$5.90
1-J7304*	$10.62
1-S4993	$2.80
1-90772**	$2.15

*** Titles V and XX only. For Title XIX, clients provide a prescription to be filled through the Vendor Drug Program. **For Title XIX only. Not a payable benefit for Titles V or XX.**

CPT only copyright 2005 American Medical Association. All rights reserved.

20.6.6.1 Dispensing Medication

Family planning providers have a choice of dispensing family planning drugs and supplies directly to the client and billing TMHP or giving clients prescriptions to take to a pharmacy. Family planning drugs and supplies that are dispensed directly to the client are billed to TMHP or a Medicaid Managed Care Organization (MCO), whichever is appropriate for the client. Procedure code J3490 may be billed when a prescription medication to treat a genital infection is provided to the client. Procedure code A9150-FP may be billed when a nonprescription medication to treat a monilia infection is provided to the client. Family planning drugs and supplies are exempt from the *three prescriptions per month* rule. Additionally, pharmacies under the Vendor Drug contract are allowed to fill the prescription for up to six months at a time, rather than a one-month supply.

20.6.6.2 Injection Administration—Title XIX (Medicaid Only)

Injection administration billed by a provider is reimbursed separately from the medication. When billing procedure code J1055, the injection administration should be billed using procedure code 1-90772. If billed without procedure code J1055, the procedure must be billed with a family planning diagnosis and a family planning (FP) modifier or with a family planning diagnosis and a description of the medication in the Remarks field of the claim. Injection administration is not payable to outpatient hospitals.

20.6.7 Medical Counseling and Education

Procedure Code	Fee for Titles V, XIX, and XX
1-H1010**	$7.61
1-S9445 *with* modifier FP	$7.00
1-S9470*	$30.00
1-99401 *with* modifier FP	$8.42
1-99402 *with* modifier FP	$10.45
1-99411***	$1.50 per person for groups of 5 to 49 $75.00 flat rate for groups of 50 or more
1-99429 *with* modifier FP	$11.67

*** Title V only**
**** This consists of two sessions. Each session may be billed separately or the two sessions may be billed together for a total of $15.22.**
***** Title XX only**

20.6.7.1 Instruction in Natural Family Planning Methods (Per Session)

Procedure code 1-H1010 is intended to instruct a couple or an individual in methods of natural family planning and may consist of two sessions. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.

20.6.7.2 Introduction to Family Planning in Hospital Setting/Auspices

Procedure code 1-S9445 with modifier FP consists of an overview of family planning benefits to encourage pregnant or postpartum women to use family planning services following delivery.

20.6.7.3 Title V Only: Nutritionist Visit

Procedure code 1-S9470 is provided by a licensed dietician for clients with a high-risk condition; for example, diabetes, hypertension, lipid disorders, and others. This procedure code may only be billed for clients with a high-risk condition.

20.6.7.4 Method-Specific Education/Counseling

Procedure code 1-99401 with modifier FP provides information about the contraceptive method chosen for use by the client, including its proper use, the possible side effects and complications, its reliability, and its reversibility. The service is provided when initiating a contraceptive method, when changing contraceptive methods, or when having difficulty with a current method.

The educational counseling must include at least the following:

- Verbal and written instructions for correct use of the method and self-monitoring.
- Information regarding the method's mode of action, safety, benefits and effectiveness.
- Information regarding risks, potential side effects, and complications of the method and what to do if they occur.
- Backup method: review when appropriate and instructions on the correct use.

CPT only copyright 2005 American Medical Association. All rights reserved.

- When prescribing a diaphragm or cervical cap, include a demonstration of the correct insertion and removal procedures.

20.6.7.5 Problem Counseling

Procedure code 1-99402 with modifier FP is billed when clients have problems they wish to discuss that are not related to a contraceptive method.

Examples include pregnancy, sexually transmitted diseases, social and marital problems, health disorders, sexuality concerns, preconception counseling, and options counseling for an unintended pregnancy. Clients who may become pregnant and in whom the assessment reveals potential pregnancy risks, must receive preconception counseling regarding the modification/reduction of that risk.

20.6.7.6 Title XX Only: Teen Group Counseling

Procedure code 1-99411 is used for group presentations and/or discussions conducted with a minimum of five adolescents 19 years of age and younger. Sessions are reimbursed at $1.50 per person for 5 to 49 people, and a total of $75 for 50 or more participants. Topics for discussion include, but are not limited to, human anatomy, human sexuality, personal physical care and hygiene, skills to resist sexual coercion, methods of family planning, and sexually transmitted diseases. The provider should prepare a written statement for each session which indicates where and when the session was held, the specific topic(s) discussed, and the number of participants. These statements are kept by the provider, and may be reviewed by the DSHS Management Branch staff during site visits.

20.6.7.7 Initial Patient Education

Procedure code 1-99429 with modifier FP is provided to facilitate selection of an effective contraceptive method. Every new client requesting contraceptive services or family planning medical services must be provided initial client education either verbally, in writing, or by audiovisual materials. Over-the-counter contraceptive methods may be provided before the client receives the initial client education but must be accompanied by written instructions on correct use. The initial client education may vary according to the educator's evaluation of the client's current knowledge. It may include the following:

- General benefits of family planning services and contraception
- Information on male and female basic reproductive anatomy and physiology
- Information regarding the benefits and potential side effects and complications of all available contraceptive methods
- Information about all of the clinic's available services, the purpose and sequence of clinic procedures, and routine schedule of return visits
- Breast self-examination rationale and instruction, unless provided during physical exam (for females)
- Information on Human Immunodeficiency Virus (HIV)/Sexually Transmitted Disease (STD) infection and prevention and safer sex discussion

20.6.8 Sterilization and Sterilization-Related Procedures

Sterilization services are a benefit when billed by an agency or physician. Physicians must use the most appropriate Current Procedural Terminology (CPT) procedure code for payment. The codes with the global fees listed in the following table are developed for family planning agencies only:

Procedure Code	Fee for Titles V and XX
1-55250*	$253.75
1-58600*	$1,800.00
*** Global fee (includes all services, i.e., facility, physician, anesthesia, recovery, and pre- and postsurgical care).**	

Note: *Type of service (TOS) 1 must be used by family planning agencies when billing sterilization procedures.*

20.6.8.1 Incomplete Sterilizations

Title V and XX only

For incomplete procedures, one of the following diagnoses must be present on the claim in addition to the diagnosis for sterilization. Use the most appropriate for each situation. Incomplete sterilizations are billed at cost. All charges related to the procedure are tracked cumulatively.

Diagnosis Code	Description
V641	Surgical or other procedure not carried out because of contraindication
V642	Surgical or other procedure not carried out because of patient's decision
V643	Procedure not carried out for other reasons

20.6.8.2 Tubal Ligation

Procedure code 58600 should be used for any sterilization procedure performed on a female client by a family planning agency using Title V, X, XIX, or XX. When billing a sterilization procedure for Title V, X, or XX, include TOS 1 on the claim form. It is paid as a global fee to include preoperative, intraoperative, and postoperative services by all parties involved, (i.e., physician, anesthesiologist, facility, laboratory, etc.). Sterilizations are considered to be permanent, once per lifetime procedures. When a client's claim history shows a previous sterilization, providers will be asked to appeal and must provide supporting documentation for the need for repeat steril-

CPT only copyright 2005 American Medical Association. All rights reserved.

ization. *Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.*

Refer to: "Sterilization Consent Form and Instructions" on page 20-4.

20.6.8.3 Vasectomy

Procedure code 55250 should be used for any sterilization procedure performed on a male by a family planning agency using Title V, X, XIX, or XX. It is paid as a global fee to include preoperative, intraoperative, and postoperative services by all parties involved (i.e., physician, anesthesiologist, facility, laboratory, etc.). Vasectomies are considered to be permanent, once per lifetime procedures. When a client's claim history shows a previous vasectomy, providers will be asked to appeal and must provide supporting documentation for the need for repeat sterilization. *Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.*

Refer to: "Sterilization Consent Form and Instructions" on page 20-4.

20.6.8.4 Anesthesia for Sterilization

Use modifier FP, when reporting anesthesia services for a sterilization procedure.

The following procedure codes require modifier FP, in addition to the regular anesthesia modifier, if the service is sterilization CPT Anesthesia Code.

Procedure Code	
7-00840	7-00851
7-00920	7-00921
7-00922	7-00940
7-00950

CPT only copyright 2005 American Medical Association. All rights reserved.

21.1 Enrollment

To enroll in the Texas Medicaid Program, a federally qualified health center (FQHC) must be receiving a grant under Section 329, 330, or 340 of the *Public Health Service Act* or designated by the U.S. Department of Health and Human Services (HHS) to have met the requirements to receive this grant. FQHCs and their satellites are required to enroll in Medicare to be eligible for Medicaid enrollment. The Centers for Medicare & Medicaid Services (CMS) has granted a waiver for the Medicare prerequisite at the time of initial enrollment of FQHC parents and satellites. FQHC *look-alikes* are *not* required to enroll in Medicare but may elect to do so to receive reimbursement for crossovers.

Refer to: "Medicare-Medicaid Crossover Claims Pricing" on page 21-2.

A copy of the Public Health Service-issued Notice of Grant Award reflecting the project period and the current budget period must be submitted with the enrollment application. A current notice of grant award must be submitted to TMHP Provider Enrollment annually. FQHCs are required to notify TMHP of all satellite centers that are affiliated with the parent FQHC and their actual physical addresses. All FQHC satellite centers billing Medicaid for FQHC services must also be approved by the Public Health Service. For accounting purposes, centers may elect to enroll the Public Health Service-approved satellites using a Federally Qualified Satellite (FQS) provider identifier that ties back to the parent FQHC provider identifier and tax ID number (TIN). This procedure allows for the parent FQHC to have one provider agreement and one cost report that combines all costs from all approved satellites and the parent FQHC. If an approved satellite chooses to bill the Texas Medicaid Program directly, the center must have a separate provider identifier from the parent FQHC and will be required to file a separate cost report.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA will not be reimbursed for laboratory services.

Refer to: "Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

"Provider Enrollment" on page 1-2 for more information about enrollment procedures.

New FQHCs must file a projected cost report within 90 days of their designation as an FQHC to establish an initial payment rate. The cost report will contain the FQHC's reasonable costs anticipated to be incurred during the FQHC's initial fiscal year. The FQHC must file a cost report within five months of the end of the FQHC's initial fiscal year. The cost settlement must be completed within 11 months of the receipt of a cost report. The cost per visit rate established by the cost settlement process shall be the base rate. Any subsequent increases shall be calculated as provided herein. A new FQHC location established by an existing FQHC participating in the Texas Medicaid Program will receive the same effective rate as the FQHC establishing the new location. An FQHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

21.1.1 Medicaid Managed Care Enrollment

FQHCs may be eligible to enroll in Medicaid Managed Care as primary care providers. An FQHC that wants to enroll in Medicaid Managed Care as a primary care provider or specialty provider must contact the individual Medicaid Managed Care health plans for enrollment information.

21.2 Reimbursement

FQHCs are reimbursed provider-specific prospective payment system encounter rates in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8261.

To be reimbursed for case management for children and pregnant women (CPW) an FQHC must be approved by the Department of State Health Services (DSHS), Case Management Branch, as a provider of case management services. The FQHC must bill these services using its FQHC provider identifier and the appropriate procedure code for case management of CPW.

Refer to: "Prospective Payment Methodology" in TAC §355.8261 for more information.

"Case Management for Children and Pregnant Women (CPW)" on page 12-1.

21.2.1 Medicare-Medicaid Crossover Claims Pricing

For FQHC Medicare-Medicaid crossover claims, the Texas Medicaid Program pays the difference between the Medicaid encounter rate and any Medicare payment up to a maximum of the Medicaid encounter rate. If the Medicare payment is larger, no payment is made by Medicaid.

21.2.2 Provider Cost Reporting

FQHC providers are required to submit a copy of their Medicare audited cost report with the fiscal year ending on or after January 1 within 15 days of receipt from Medicare. Submit to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

21.3 Benefits and Limitations

Medicaid coverage is limited to services provided by the center that are covered by the Texas Medicaid Program and are reasonable and medically necessary.

When furnished to a client of the FQHC, medically necessary services include physician services; physician assistant services (PA); nurse practitioner (NP) services;

CPT only copyright 2005 American Medical Association. All rights reserved.

clinical nurse specialist (CNS) services; clinical psychologist services; clinical social worker services; other mental health services; vision care services; services and supplies necessary for services that would be covered otherwise, if furnished by a physician or a physician service; visiting nurse services to a homebound individual, in the case of those FQHCs located in an area with a shortage of home health agencies; and other ambulatory services included in Medicaid such as family planning, Texas Health Steps (THSteps), birthing center, and maternity service clinic (MSC).

A visit is a face-to-face encounter between an FQHC client and a physician, physician assistant, nurse practitioner, certified nurse-midwife (CNM), visiting nurse, qualified clinical psychologist, clinical social worker, other health professional for mental health services, dentist, dental hygienist, or an optometrist. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The FQHC client has a medical visit and an *other* health visit.

A medical visit is a face-to-face encounter between an FQHC client and a physician, physician assistant, nurse practitioner, nurse-midwife, or visiting nurse.

An *other* health visit includes, but is not limited to, a face-to-face encounter between an FQHC client and a qualified clinical psychologist, clinical social worker, other health professional for mental health services, a dentist, a dental hygienist, an optometrist, or a THSteps medical checkup.

All services provided that are incident to the encounter should be included in the total charge for the encounter and are not billable as a separate encounter. For example, if an office visit was provided at a charge of $30 and a lab test for $15, the center would bill TMHP procedure code 1-T1015 for $45 and would be reimbursed at the center's encounter rate.

Reminder: *An encounter is defined as "a face-to-face meeting between a client and a physician, physician assistant, NP, CNS, certified nurse midwife (CNM), psychologist, social worker, or a visiting nurse."*

All services (except for family planning, THSteps medical, THSteps dental, immunizations, and case management for high-risk pregnant women and infants) provided during an encounter *must* be billed using procedure code 1-T1015.

Laboratory and radiology services or the services of a licensed vocational nurse (LVN), registered nurse (RN), nutritionist, or dietitian are *not* considered an encounter, because they are incidental to an encounter with one of the above-mentioned health care professionals. Providers should continue to include the cost associated with these services on their cost report (they are allowable but do not constitute an encounter).

When an FQHC sees a client younger than 21 years of age for immunizations that are not part of a THSteps checkup, the FQHC should bill for the administration of the immunization on the HCFA-1450 (UB-92) or CMS-1500 claim form using their FQHC provider identifier and the appropriate Medicaid procedure code. If the client is seen only for immunizations, an encounter should not be billed. There is no change in the billing procedures for those services noted as exceptions. The total billed amount for the service should be the total charge for all services provided during the encounter or incident to the encounter.

Claims should be filed as follows:

Services	Claim Form
CPW case management services	HCFA-1450 (UB-92) or CMS-1500 claim form
THSteps dental services	American Dental Association (ADA) claim form
THSteps medical services	CMS-1500 claim form.

All claims must be filed using the FQHC provider identifier.

Services provided by a health care professional require one of the following modifiers with procedure code 1-T1015, to designate the health care professional providing the services: AH, AM, SA, TD or TE with place of service (POS) 2, or U7.

If more than one health care professional is seen during the encounter, the modifier should indicate the primary contact. The primary contact is defined as the health care professional who spends the greatest amount of time with the client during that encounter.

If the encounter is for antepartum care or postpartum care, the modifier TH must be indicated.

The electronic format or the paper claim form allows for multiple modifiers; therefore, if the antepartum or postpartum care or delivery is provided by a CNM, then modifier SA must be indicated on the claim in addition to the appropriate modifier above.

If a physician of the FQHC provides a service in the hospital such as delivery, the FQHC may elect to bill for that service using the physician's provider identifier, if the contract with the physician indicates this occurrence. If the service is billed using the physician number rather than the FQHC's provider identifier, the costs associated

CPT only copyright 2005 American Medical Association. All rights reserved.

with the service must be *excluded* from the cost report and will not be considered during the cost settlement/ encounter rate setting process.

Refer to: The following sections for benefit limitation information:

"Benefits and Limitations" on page 36-8 in the Physician section.

"Benefits and Limitations" on page 38-2 in the Psychologist section.

"Benefits and Limitations" on page 19-9 in the Dental section.

"Benefits and Limitations" on page 10-2 in the Birthing Center section.

"Benefits and Limitations" on page 31-2 in the Maternity Service Clinic section.

"Benefits and Limitations" on page 12-2 in the Case Management for Children and Pregnant Women (CPW) section.

"Benefits and Limitations" on page 29-2 in the Licensed Marriage and Family Therapist (LMFT) section.

"Benefits and Limitations" on page 28-2 in the Licensed Clinical Social Worker (LCSW) section.

"Benefits and Limitations" on page 30-2 in the Licensed Professional Counselors (LPCs) section.

"Benefits and Limitations" on page 45-2 in the VIsion Care (Optometrists, Opticians) section.

21.3.1 Telemedicine

A remote site provider can be an FQHC, RHC, or health care provider such as a physician, APN, or CNM who is able to independently bill the Texas Medicaid Program for an office visit.

FQHC telemedicine providers must submit their claims using the appropriate encounter code and modifiers. Use modifier AM, U7, or SA in the *first* modifier field on the claim form with the modifier GT in the *second* modifier field.

Refer to: "Telemedicine Services" on page 36-19 for more information.

21.3.2 Newborn Eligibility Process for FQHCs

A child is deemed eligible for Medicaid for up to one year if:

- The mother is receiving Medicaid at the time of the child's birth and
- If the child continues to live with the mother
- and if the mother continues to be eligible for Medicaid or would be eligible for Medicaid if she were pregnant.

Therefore, it is not acceptable to require a deposit for newborn care from a Medicaid client. The child's eligibility ceases if the mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother's household.

Important: *Filing a claim for a newborn client under the mother's client number can delay a claim payment.*

Note: *When billing for a Medicaid Managed Care client, providers must adhere to the client's health plan's guidelines for newborn billing.*

Claims with charges for newborn care are submitted separately from charges for the mother. Claims submitted for services provided to a newborn child should be filed using the newborn child's Medicaid number. To expedite the claims processing, enter the mother's name in Block 84 of the Remarks field of the HCFA-1450 (UB-92) claim form. Include this information in Block 4 of the CMS-1500.

To provide information about each child born to a mother eligible for Medicaid, FQHCs with birthing centers should complete Form 7484 *Hospital Report of Newborn Child or Children*. If the newborn's name is known, include it on the form. The use of *Baby Boy* or *Baby Girl* delays the assignment of a number. Filing this form expedites the assignment of a Medicaid number for the newborn child. Do not complete this form for stillbirths.

The FQHC should complete the form within five days of the child's birth and send it to DSHS. This five-day time frame is not mandatory; however, prompt submission will expedite the process of determining the child's eligibility. FQHCs should duplicate the form as needed because HHSC and TMHP do *not* supply this form.

Upon receipt of a completed form, DSHS verifies the mother's eligibility and sends notices within ten days to the hospital or birthing center, attending physician (if identified), mother, and caseworker. The notice includes the child's Medicaid number and the effective date of coverage. HHSC will issue a client Medicaid Identification form (Form H3087) after the child has been added to the eligibility file.

The attending physician's notification letter is sent to the address on file for the license number at the Texas Medical Board. This address must be kept current to ensure timely notification of attending physicians. Physicians should submit address changes to the following address:

Texas Medical Board
Customer Information, MC-240
PO Box 2018
Austin, TX 78767-2018
"Hospital Report (Newborn Child or Children) HHSC Form 7484" on page B-51.

21.4 Claims Information

FQHC services must be submitted to TMHP in approved electronic format or on a HCFA-1450 (UB-92) or CMS-1500 claim form. When filing claims for clients who only have Medicaid, providers may use either a

CPT only copyright 2005 American Medical Association. All rights reserved.

HCFA-1450 (UB-92) or CMS-1500 claim form. When filing claims for THSteps medical services, providers must use the CMS-1500 claim form and not the HCFA-1450 claim form. For providers who also have Titles V, X, and XX funding, family planning claims are filed on the “Family Planning 2017 Claim Form” on page 5-48. When filing for a client who has Medicare and Medicaid coverage, providers must file on the same claim form that was filed to Medicare. Providers may purchase claim forms from the vendor of their choice. TMHP does not supply them. The THSteps Dental (ADA) claim form described under FQHC services, Family Planning, Case Management for Children and Pregnant Women, and THSteps services may be submitted electronically.

22.1 Enrollment

Only full-service genetic providers may enroll in the Texas Medicaid Program. Before enrolling, the provider must contract with the Department of State Health Services (DSHS), for the provision of genetic services. Basic contract requirements are as follows:

- The provider's medical director must be a clinical geneticist (Doctor of Medicine [MD] or Doctor of Osteopathy [DO]) who is licensed by the Texas Medical Board and board eligible/certified by the American Board of Medical Geneticists (ABMG).
- The provider must use a team of professionals to provide genetic evaluative, diagnostic, and counseling services. The team rendering the services must consist of the following professional staff: a clinical geneticist (MD or DO) and at least one of the following: nurse, social worker, medical geneticist (Ph.D.), or genetic counselor.

The provider's clinical laboratory (if it has a clinical laboratory) must have received federal Clinical Laboratory Improvement Amendments (CLIA) accreditation from the Centers for Medicare & Medicaid Services (CMS) and must be Medicare-approved. If the provider does not have a clinical laboratory, then the laboratory or laboratories it uses must have at least the same credentials.

Genetic services are administered through the DSHS Case Management and Health Screening Unit. A genetic provider wishing to enroll should contact TMHP, which in turn contacts the DSHS Case Management and Health Screening Unit. DSHS sends a contract application to the interested provider, which should be completed and returned to DSHS. DSHS evaluates the application, and if approved, notifies TMHP to enroll the provider.

For more information, contact:

DSHS Case Management and Health Screening Unit
1100 West 49th Street, MC 1918
Austin, TX 78756-3199
1-512-458-7111, Ext. 2193

TMHP will issue a provider identifier number for genetic services to the provider. Additionally, each genetic professional providing clinical services must obtain a performing provider identifier from TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

A provider cannot be enrolled if his or her license is due to expire within 30 days; a current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

22.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with a Medicaid Managed Care health plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information on Medicaid Managed Care programs.

22.2 Reimbursement

Genetic providers are reimbursed according to the established allowable maximum fee schedule.

TMHP manually prices genetic laboratory services that have no established fee.

Clinical laboratory services billed by a genetic services provider are reimbursed according to reimbursement methodology for these services in accordance with Title 1 *Texas Administrative Code* (TAC) §§355.8081 and §§355.8610, and the *Deficit Reduction Act* (DEFRA) of 1984.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

22.3 Benefits and Limitations

Genetic providers are reimbursed for the provision of genetic services to evaluate clients for the possibility of a genetic disorder, diagnose such disorders, counsel clients regarding such disorders and their implications for family planning, and provide follow-up of clients with known or suspected disorders. These services must be prescribed by a physician (MD, DO) and performed by or under the supervision of a clinical geneticist (MD, DO). These services may include genetic history and physical examination, psychosocial genetic assessment, laboratory services and echography, radiological services, diagnostic procedures, and counseling. Genetic services are payable when provided in the office setting (place of service [POS 1]), in the inpatient hospital setting (POS 3), and in the outpatient hospital setting (POS 5).

The following services are not allowed:

- Genetic services for conditions that usually have no serious psychosocial or medical implications for a client
- Prenatal diagnosis for sex determination of the fetus only, without implications for genetic disease
- Genetic services provided to clients eligible for emergency care only

22.3.1 Genetic Evaluation

The genetic evaluation consists of health history, medical genetics physical examination, and psychosocial genetic assessment.

CPT only copyright 2005 American Medical Association. All rights reserved.

22.3.1.1 Health History

Detailed family genetic health history. The interviewer meets with the family to gather extensive medical and family history covering four matriarchal and patriarchal generations. A pedigree is constructed. This history includes any affected individuals in the immediate or extended family, information on pregnancy, plus a developmental, educational, and social history.

Family genetic health history update. This is performed to update the health history. It consists of noting changes, such as the loss of eyesight or change in muscle control, in the health of the client under evaluation. Genetic-related problems identified in newborns or in other family members should also be included in the interval history update.

22.3.1.2 Medical Genetics Physical Examination

This examination varies according to specific client needs, but typically consists of extensive anthropomorphic measurements, including occipital frontal circumference, height, weight, and measurement of inner canthal and outer canthal distances with calculations of interpupillary distances; ear size and ear placement on the head; philtrum length; internipple distance; and finger and palm lengths. The physical examination itself usually entails examination of:

- The head
- The eyes, including funduscopic examination
- The nose, mouth, and oral pharynx
- The ears, including assessment of tympanic membranes
- The neck, including assessment of thyroid gland size
- The chest, including breasts and heart
- The abdomen, including assessment for organ size and assessment for abnormal masses
- Genitalia, and often measurement of size of genital components
- The back
- The extremities, including specific measurement of any joint limitations
- The skin for abnormalities, which often includes Woods light examination for fluorescent depigmented areas
- Neurological assessment, including cranial nerve examination, examination of deep tendon reflexes, and cerebellar and long track motor functions

Photographs are also taken of the client AP (AP means a full frontal [anterior-posterior] not from the side, the diagonal, or from the back) and lateral, both face and total body. Additional photographs are taken of any abnormalities noted upon physical examination for further consultative work and review.

- *Physical Examination (Standard).* The examination is appropriate for follow-up examinations. This examination includes a review of all the information derived from the health history and detailed family genetic history or pedigree construction. The examination is appropriate for:
  - New referrals in which minimum criteria for genetic services are indicated, or in which minimal time is required to make a medical diagnosis or disposition.
  - More complex problems when all pertinent medical data accompanies the referral.
  - Biased evaluation of family members referred for a specific disease.
  - Most follow-up of clients of whom more complete studies have been performed.

  This physical usually encompasses most of the examinations outlined under medical genetic physical examination except for highly specific anthropomorphic tests, such as dermatoglyphics. The standard genetic physical examination is reimbursable once every six months per provider.
- *Physical Examination (Complex).* This examination is applicable for referred clients in whom genetic diseases of a more complex nature are suspected or partially confirmed. All criteria outlined under the medical genetics physical examination will be used, and the information from the health history and detailed family genetic history or pedigree construction will be reviewed.
- *Physical Examination (Comprehensive).* This examination is used for referred clients in whom complex genetic diseases are suspected that require complete and extensive workup. This examination includes the completion of all tasks outlined in the section on the medical genetic physical examination and requires extensive time to make a diagnosis and disposition.

22.3.1.3 Psychosocial Genetic Assessment

Standard. A detailed social history related to the stated reason for referral is obtained to assess family dynamics and psychosocial functioning. The client's primary psychosocial problems and needs are evaluated. The standard psychosocial genetic assessment is reimbursable once per lifetime per provider.

Complex. Clients may receive additional counseling services when more severe family or individual dysfunction is evident as related to the primary reason for referral. The complex psychosocial genetic assessment is reimbursable once per lifetime per provider.

22.3.2 Genetic Counseling

Genetic counseling consists of medical genetic and psychosocial genetic counseling.

CPT only copyright 2005 American Medical Association. All rights reserved.

22.3.2.1 Medical Genetic Counseling

Prenatal Counseling. Includes a review of all information obtained in the health history, detailed family genetic history and pedigree construction, as well as the diagnosis established after completion of the medical genetic physical examination. The family is counseled as to how the prenatal diagnosis applies to their case regarding the recurrence risks as well as prenatal diagnostic procedures.

Medical Genetic Counseling. The family is advised of the results of the health history, detailed family genetic history and pedigree construction, and the nature of the diagnosis. It is the counselor's responsibility to explain the diagnosis and establish the implications for the affected individual, immediate family, and extended family. This counseling includes prognosis, recurrence risks, family planning implication, and the options available to family members who are at increased risk for giving birth to individuals with the same condition.

Follow-up Genetic Counseling. Conducted to review the medical genetic counseling results and provide additional information as indicated.

22.3.2.2 Psychosocial Genetic Counseling

Initial psychosocial genetic counseling. Client reactions relating to the genetic disorder are explored and a practical plan of action concerning the client and the family is formulated using the information obtained from the interpretation of the genetic assessment.

Follow-up psychosocial genetic counseling. Conducted to review the psychosocial genetic counseling and provide additional information as indicated.

22.3.3 Cytogenetic Tests Reimbursed to Providers

Certain cytogenetic tests may be reimbursed as a type of service (TOS) 5 to providers other than those enrolled as full-service genetic providers. Reimbursement to those providers is limited to the diagnoses of leukemia and lymphoma.

Refer to: "Cytogenetics Testing for Leukemia and Lymphoma" on page 36-191 for more information.

22.3.4 Genetic Benefit Schedule

22.3.4.1 Genetic Evaluation and Counseling

Service	Procedure Code	Limitations	Maximum Fee
Follow-up Medical Genetic Counseling Follow-up Psychosocial Genetic Counseling	G-99213 *with* modifier TG	One per six months, per provider	$50.76
Family Genetic Health History Update Standard Genetic Physical Exam	G-99214 *with* modifier TG	One per six months, per provider	$81.20
Medical Genetic Counseling Initial Psychosocial Genetic Counseling	G-99215 *with* modifier TG	One per lifetime, per provider	$147.18
Detailed Family Genetic Health History Complex Genetic Physical Exam Standard Psychosocial Genetic Assessment	G-99244 *with* modifier TG	One per lifetime, per provider	$248.68
Detailed Family Genetic Health History Comprehensive Genetic Physical Exam Complex Psychosocial Genetic Assessment	G-99245 *with* modifier TG	One per lifetime, per provider	$370.48
Prenatal Counseling	G-99402 *with* modifier TG	One per pregnancy, per provider*	$50.75
Detailed Family Genetic Health History Prenatal Counseling	G-99404 *with* modifier TG	One per lifetime, per provider	$152.25

*** Exception: Additional services are allowed when documentation of medical necessity to repeat a procedure accompanies the claim.**

22.3.4.3 Genetic DNA Testing and Laboratory Enzyme Tests

Effective for dates of service on or after October 16, 2003, DNA testing and laboratory enzyme tests must be billed with procedure code 84999. To ensure appropriate claims processing, the remarks code reflecting the specific service is also required.

Providers should adhere to the following steps for electronic claim submissions so that TMHP can accurately apply the correct remarks code to the appropriate claim detail:

CPT only copyright 2005 American Medical Association. All rights reserved.

- A GPC prefix must be submitted in the first three bytes of the NTE02 at the 2400 loop. The GPC prefix should only be submitted once.
- In bytes 4-8, submit the remarks code based on the order of the claim detail (see the following examples).

Example 1: For a claim with three details, where details one and three are submitted with procedure code 84999 and detail two is not submitted with procedure code 84999, enter the following information in the NTE02 at the 2400 loop: GPC4841Z 4964Z, leaving a space between remarks codes for details one and three.

Example 2: For a claim with three details, where details two and three are submitted with procedure code 84999 and detail one is not submitted with procedure code 84999, enter the following information in the NTE02 at the 2400 loop: GPC 4841Z4964Z, leaving a space between the GPC prefix and the remarks code for detail two, and no space between the remarks code for details two and three.

Example 3: For a claim with three details, where all three details are submitted with procedure code 84999, enter the following information in the NTE02 at the 2400 loop: GPC4941Z4861ZY8158, with no spaces between remarks codes.

For paper claim submissions, enter the remarks code in Block 19 of the CMS-1500 claim form.

The following tables identify the appropriate remarks codes to use when billing procedure code 84999.

DNA Testing

The following table identifies exceptions when additional services are allowed:

Remarks Code	Laboratory Test Provided	Limitations	Maximum Fee
4838Z	Cystic fibrosis	One per lifetime, per provider*	$152.25
4839Z	Duchenne muscular dystrophy	One per lifetime, per provider*	$304.50
4840Z	Fragile X mental retardation	One per lifetime, per provider*	$253.75
4841Z	Myotonic dystrophy	One per lifetime, per provider*	$253.75

22.3.4.4 Genetic Ultrasound Testing Procedures

Procedure Code	Limitations	Maximum Fee
G-76805	One per pregnancy, per provider*	$104.19
G-76810	One per pregnancy, per provider*	$207.57
G-76811	One per pregnancy, per provider*	$177.63
G-76811 *with* modifier TS	One per pregnancy, per provider*	$97.44
G-76812	One per pregnancy, per provider*	$177.63
G-76812 *with* modifier TS	One per pregnancy, per provider*	$97.44
G-76815	One per pregnancy, per provider*	$69.56
G-76816	One per pregnancy, per provider*	$57.28
G-76818	One per pregnancy, per provider*	$80.47
G-76819	One per pregnancy, per provider*	$70.37
G-76825	One per pregnancy, per provider*	$90.01
G-76826	One per pregnancy, per provider*	$61.92
G-76827	One per pregnancy, per provider*	$83.46
G-76941	One per pregnancy, per provider*	$98.19
G-76945	One per pregnancy, per provider*	$79.92
G-76946	One per pregnancy, per provider*	$60.55
*** Exception: Additional services are allowed when documentation of medical necessity to repeat a procedure accompanies the claim.**		

General Genetic Services Limitations

When multiple ultrasound procedure codes are billed on the same day for the same client, the most inclusive code will be paid and all other codes will be denied.

Reimbursement for genetic ultrasound services will be made for the total component (TOS G) only. Professional (TOS I) and technical (TOS T) components are considered a part of the total service.

Reimbursement for referred genetic services will only be made upon proof of formal referral of a client to the consultant by the genetics provider.

Independent consultant, laboratory, counseling, and radiological genetic services:

- Must be billed through the genetic provider under contract with DSHS
- Related to the genetic workup of a client is not a covered benefit

A fetal biophysical profile (G-76818 and G-76819) and an echography (G-76805, G-76810, G-76811, G-76812, G-76815, and G-76816) may be billed on the same day for the same client.

22.4 Claims Information

Genetic services must be submitted to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

TMHP representatives are available for provider questions about genetic services, such as reimbursement rates and procedures. For more information, call the TMHP Contact Center at 1-800-925-9126.

23.1 Enrollment

To enroll in the Texas Medicaid Program, hearing aid professionals (physicians, audiologists, and fitters and dispensers) who provide hearing evaluations or fitting and dispensing services must be licensed by the licensing board of their profession to practice in the state where the service is performed. Hearing aid providers are only eligible to enroll as individuals and facilities. Additionally, audiologists not wanting to enroll as a hearing aid provider are allowed to enroll separately as audiologists.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information on enrollment procedures.

23.1.1 Medicaid Managed Care Enrollment

Hearing aid providers must enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients.

23.2 Reimbursement

Hearing aids and audiometric services are reimbursed in accordance with 1 Texas Administrative Code (TAC) 355.8141. Hearing evaluations and the first and second revisits are reimbursed according to the maximum allowable fee. Procedure codes 99211 and 99212 should be billed for the first and second revisits, respectively.

Reimbursement for ear molds and the fitting and dispensing fee is limited to the established maximum fee.

Hearing aid procedures indicated with "MR" (Manually Review) must be submitted with the Manufacturer's Suggested Retail Price (MSRP) in the *Comments* field of the claim. If the MSRP is not included in the comments field on the original submission, the claim will be denied. Providers will be required to submit their request as an appeal, and must include an invoice validating the cost of the instrument. The maximum allowable fee for the hearing aid instrument includes:

- Acquisition cost of the hearing aid (the actual cost or net cost of the hearing aid after any discounts have been deducted)
- Manufacturer's postage and handling charges
- All necessary tubing, cords, and connectors
- Bone conduction headbands
- Telephone coils
- Compression circuits
- Contralateral Routing of Offside Signal (CROS)/ Bilateral Contralateral Routing of Offside Signal (BICROS) features
- Instructions for care and use
- One-month supply of batteries

Charges for hearing aid components must be verified by the manufacturer's invoice and price lists. The fitting and dispensing fee includes the postfitting check of the hearing aid within five weeks after the dispensing date.

Note: *Charges to the client for covered services constitute a breach of the Medicaid contract.*

Refer to: "Reimbursement Methodology" on page 2-2 for more information on reimbursement.

"Billing Clients" on page 1-9 for more information.

23.3 Benefits

Hearing aid services are payable by the Texas Medicaid Program for clients 21 years of age and older. Services for clients younger than 21 are reimbursed through the Program for Amplification for Children of Texas (PACT).

Hearing aid services, including hearing aid instruments are reimbursed when medically necessary. The benefits that are reimbursable for hearing aid services are determined by statutory and fiscal limitations.

23.3.1 Medicaid Clients Younger Than 21 Years of Age

Payment for these services for clients who are Medicaid-eligible and younger than 21 years of age are made through the Department of State Health Services (DSHS) PACT. An appropriate hearing screening is a mandatory part of each medical checkup. When suspicion or indication of a hearing problem occurs, refer Medicaid clients younger than 21 years of age to an enrolled PACT provider. For a list of PACT providers, visit the PACT website at http://www.dshs.state.tx.us/audio/program.shtm, or write to:

DSHS
Program for Amplification for Children of Texas (PACT)
1100 West 49th Street
Austin, TX 78756-3199
1-512-458-7724

23.3.2 Hearing Screenings

23.3.2.1 Newborn Hearing Screening

Health Safety Code, Chapter 47, *Vernon's Texas Codes Annotated* mandates that a newborn hearing screening occur at the birthing facility before hospital discharge. The hospital is responsible for the purchase of equipment, training of personnel, screening of the newborns, certification of the program according to DSHS standards, and notification to the provider, parents, and DSHS of screening results. There is no additional Medicaid reimbursement for the newborn hearing screening because the procedure is part of the newborn hospital diagnosis related group (DRG) payment. Hospitals must use procedure code 09547 to report this newborn hearing screen on the HCFA-1450 (UB-92) claim form.

CPT only copyright 2005 American Medical Association. All rights reserved.

This facility-based screening also meets the physician's required component for hearing screening in the inpatient newborn Texas Health Steps (THSteps) checkup. The physician must ensure that the hearing screening is completed before discharging the newborn or, when the birthing facility is exempt under the law, that there is an appropriate referral for a hearing screening to a birthing facility participating in the newborn hearing screening program.

The physician must discuss the screening results with the parents, especially if the hearing screening results are abnormal, and order an appropriate referral for further diagnostic testing. If the results are abnormal, the parent's or legal guardian's consent must be obtained to send information to DSHS for tracking and follow-up purposes.

If a physician has any concerns about this process, the physician should contact the hospital administrator or the DSHS Audiology Services Program at 1-512-458-7724.

23.3.2.2 Initial Test at Birth

The provider must do the following:

- Verify that the parents received the results of the hearing screen at the birthing facility.
- Check for obvious physical abnormalities.
- Supply a hearing checklist for parents and instructions on its use (this checklist is discussed at the first in-office THSteps medical checkup).
- Provide a referral for further diagnostic audiological testing for an infant with abnormal screening results or who is at high-risk for hearing impairment.

23.3.2.3 Outpatient Hearing Screening and Diagnostic Testing for Children

As part of the THSteps medical checkup, physicians are required to complete the hearing screening component. Separate procedure codes must not be billed when hearing screenings are part of medical checkups or day care/school requirements. Medicaid does not reimburse separately.

For children who are seen in the office setting, THSteps requires a puretone audiometer for visits where objective screening is required. In other childcare settings (e.g., day care; preschool; Head Start; and elementary, middle, and high school), the DSHS Vision and Hearing Screening Program requires that a puretone audiometer be used for hearing screening.

Impedance testing is usually used in the physician's office to monitor children who have a documented history of repeated bouts of otitis media and may be billed separately as a diagnostic hearing test with a THSteps checkup. Impedance testing does not meet the requirements for the sensory screening component of the THSteps checkup.

23.3.2.4 Birth Through Three Years of Age

A hearing screening must be completed during each THSteps medical checkup. A THSteps hearing screening consists of the following:

- An observation and history recording obtained from a responsible adult familiar with the child
- Completion of the Hearing Checklist for Parents form
- Referral of a high-risk child to a physician who renders audiology services

23.3.2.5 Three Through 20 Years of Age

The provider should do the following:

- Assess children with a puretone audiometric hearing screen (1000, 2000, 4000 Hz) at 4 through 10 years of age.
- Perform a subjective hearing evaluation, to include client history and observation of the child for the ability to answer questions and follow directions at all other medical checkups where an audiometric screen is not required.
- Document the results of any school screening audiometric testing program in the 12 months preceding the medical check-up.
- Refer any child or adolescent in preschool through twelfth grade who does not respond to a 25 dB tone at any frequency.

23.3.2.6 Adults Hearing Screening 21 Years of Age and Older

Auditory brainstem response (ABR) and otoacoustic emissions (OAE) audiometry are a benefit of the Texas Medicaid Program for infants, children, and adults and may be used in addition to conventional audiometry for further diagnosis.

23.3.2.7 Hearing Referrals

For all age groups, refer Medicaid-eligible children identified during the THSteps medical checkup as needing a diagnostic hearing evaluation or other hearing services, including hearing aids, to an approved hearing services provider. DSHS provides payment to providers for hearing services provided to low-income children who are not eligible for Medicaid. Services for children whose family income is under 150 percent of the federal poverty income limit (whether or not the child is eligible for Medicaid) are administered through the PACT.

Separate procedure codes may be billed for children who require diagnostic hearing testing. The following diagnostic audiometric testing codes may be billed as appropriate 5/I-92567, 5/I/T-92585, 5-92586, 5/I/T-92587, and 5/I/T-92588.

CPT only copyright 2005 American Medical Association. All rights reserved.

23.3.3 Hearing Aid Instrument

Medicaid reimbursement for hearing aid instruments is limited to eligible clients, 21 years of age and older, whose air conduction puretone average in the better ear is 45 dB or greater. The client must have medical necessity for a hearing aid instrument and have no medical contraindications for using a hearing aid. Each client must be offered an appropriate new hearing aid instrument within the Medicaid allowable fee schedule. A hearing aid instrument is reimbursable once every six years.

Important: *TMHP may refer people to the Texas Rehabilitation Commission whose jobs are contingent on possession of a hearing aid as well as people appearing to have vocational potential and who need a hearing aid.*

23.3.3.1 Warranty

Each hearing aid instrument dispensed through the Texas Medicaid Program must be a new and current model that meets the performance specifications indicated by the manufacturer and the client's individual hearing needs. A new hearing aid is one that has never been used and carries a full 12-month manufacturer's warranty. The manufacturer's warranty must be effective for 12 months after the dispensing date.

23.3.3.2 30-Day Trial Period

Providers must allow each Medicaid client a 30-day trial period that gives the client time to determine satisfaction with a purchased hearing aid instrument. The trial period consists of 30 consecutive days beginning with the dispensing date. During the trial period, providers may dispense additional hearing aids as medically necessary until the client is satisfied with the results of the aid, or the provider determines that the client cannot benefit from the dispensing of an additional hearing aid. A new trial period begins with the dispensing date of each hearing aid. Under the Texas Medicaid Program, if the client is not satisfied with the purchased hearing aid instrument, the client may return it to the provider, who must accept it. If the aid is returned within 30 days, the provider may charge the client a rental fee. Obtain a client-signed acknowledgment statement stating the client is responsible for paying the hearing aid rental fees and keep it in the client's file. Providers must allow 30 days to elapse from the hearing aid dispensing date before completing a 30-Day Trial Period Certification Statement.

23.3.3.3 Fitting and Dispensing Visit

This visit includes the hearing aid instrument's fitting, dispensing, and post-fitting check.

23.3.3.4 First Revisit

Additional counseling is available as needed within a period of six months after the post-fitting check. The first revisit, 99211, includes a hearing aid check.

23.3.3.5 Second Revisit

The second revisit procedure code 99212, includes aided sound field testing performed by a contracted evaluator according to the guidelines specified for the hearing evaluation. If the aided sound field test scores suggest a decrease in hearing acuity, the provider must include puretone and speech audiometry on Form 3503, *Hearing Aid Evaluation Report*. The second revisit is available as needed after the post-fitting check and the first revisit.

The following table lists hearing aid instrument, assessment, and revisit procedure codes.

Note: *Hearing aid procedures indicated with "MR" must be submitted with the MSRP in the Comments field of the claim. If the MSRP is not included in the comments field on the original submission, the claim will be denied. Providers will be required to submit their request as an appeal, and must include an invoice validating the cost of the instrument.*

23.4 Limitations and Exclusions

The following limitations and exclusions apply:

- Reimbursement for a hearing aid instrument is limited to eligible clients, 21 years of age and older, whose air conduction puretone average in the better ear is 45 dB or greater.
- Hearing aid purchases are limited to one every six years with the exception of clients younger than age 21 through PACT.
- Clients younger than age 21 must be referred to PACT.
- Services for residents in nursing facilities (skilled nursing facility [SNF], intermediate care facility [ICF], or extended care facility [ECF]) must be ordered by the attending physician. The order must be on the client's chart and state the condition necessitating hearing aid services and must be signed by the attending physician.
- No payment is made for replacement of batteries or cords.
- No payment is made for repairs or replacements of lost, destroyed, or inappropriate hearing aids.
- No binaural fittings are available except in certain documented cases of legally blind, hearing-impaired clients who have no other available resources. This information must be documented in the client's file as well as on the claim submitted for payment for hearing aid services.
- U.S.-manufactured hearing aids must be considered when the purchase price and quality are comparable to those of foreign manufacturers.
- Home visit hearing evaluations and fittings are permitted only with the physician's written recommendation.
- Not included are auditory training, speech, reading, or other rehabilitative services.

23

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24.

23.5 Documentation Requirements

TMHP does not require prior authorization for hearing aids and related procedures. Retain reported audiological and medical information in the client's file until requested. The hearing evaluation must be recommended by a physician (with written medical clearance) for the fitting of a hearing aid by completing the Physician's Examination Report. The Hearing Aid Evaluation Report must include an audiometric assessment. This form must provide objective documentation to support improved communication ability with amplification.

Refer to: "Physician's Examination Report" on page B-69.

"Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)" on page B-41.

23.6 Client Eligibility

The provider determines a client's eligibility for hearing aid services by:

- Asking to see the client's current Medicaid eligibility form (possession of a current Medicaid eligibility form with a check mark in the hearing aid box indicates the client's eligibility for the month)
- Using the Automated Inquiry System (AIS) to determine eligibility for Medicaid and for a hearing aid
- Verifying client eligibility on the TMHP website at www.tmhp.com

Important: *AIS provides claim status, client eligibility, benefit limitations, and current check amount.*

Refer to: "Eligibility Verification" on page 4-4.

"Automated Inquiry System (AIS)" on page -xiii for instructions or contact TMHP Customer Service at 1-800-925-9126.

CPT only copyright 2005 American Medical Association. All rights reserved.

23.7 Claims Information

Submit claims for hearing aid services to TMHP on a CMS-1500 claim form or in an approved electronic claims format. Providers must purchase CMS-1500 claim forms from the vendor of their choice; TMHP does not supply them.

Providers supplying hearing aids for STAR+PLUS Medicaid Qualified Medicare beneficiary (MQMB) clients should bill TMHP, not the STAR+PLUS HMO for the hearing aid.

23.7.1 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

24.1 Enrollment

To enroll in the Title XIX Texas Medicaid Program, home health services providers must complete the Texas Medicaid Provider Enrollment Application. Medicare certification is required for providers that are licensed as a Licensed and Certified Home Health Agency. Providers that are licensed as a Licensed Home Health Agency are not required to enroll in Medicare as a prerequisite to enrollment with Texas Medicaid.

Enrolled providers of durable medical equipment (DME) and/or expendable medical supplies will be issued a Durable Medical Equipment-Home Health Services Provider Identifier that is specific to home health providers.

Providers may obtain the application by writing to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
1-800-925-9126
Fax: 1-512-514-4214

For prior authorization requests on the Title XIX Home Health Services contact:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977
1-800-925-8957
Fax: 1-512-514-4209

For general questions, such as claims history information, prior authorization history, procedure codes, procedural matters, or to verify if prior authorization has already been issued, call the TMHP Comprehensive Care Program (CCP)-Home Health Provider Line at 1-800-846-7470.

Refer to: "Provider Enrollment" on page 1-2 for information about enrollment procedures.

24.1.1 Change of Address/Telephone Number

A current physical and mailing address and telephone number must be on file for the agency/company to receive Remittance & Status (R&S) reports, reimbursement checks, Medicaid provider procedures manuals, the *Texas Medicaid Bulletin* (bimonthly update to the *Texas Medicaid Provider Procedures Manual*), and all other TMHP correspondence. Promptly send all address and telephone number changes to TMHP Provider Enrollment at the address listed above in Section 24.1, "Enrollment."

24.1.2 Pending Agency Certification

Home health agencies and DMEH suppliers submitting claims before the enrollment process is complete or without authorization for services issued by TMHP Home Health Services will not be reimbursed. The effective date of enrollment is when all Medicaid provider enrollment forms are received and approved by TMHP.

Upon the receipt of notice of Medicaid enrollment, the agency/supplier must contact TMHP's Home Health Services before serving a Medicaid client for services that require a prior authorization number. Prior authorization cannot be issued before Medicaid enrollment is complete. Regular prior authorization procedures are followed at that time.

Home health agencies that provide laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Important: *Do not submit Home Health Services claims for payment until Medicaid certification is received and a prior authorization number (PAN) is assigned.*

Refer to: "Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

24.2 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with a Medicaid Managed Care plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Medicaid Managed Care" on page 7-4.

24.3 Reimbursement

The reimbursement methodology for professional services delivered by home health agencies are statewide visit rates calculated in accordance with 1 *Texas Administrative Code* (TAC) §355.8021(a). The current home health agency fee schedule is available on the TMHP website at www.tmhp.com.

A SN and/or home health aide visit may be provided up to a maximum of 2.5 hours per visit. A combined total of three SN and/or home health aide visits may be reimbursed per day.

All unique procedure codes must be billed according to the description of the procedure code. The quantity billed must be identified and each procedure code must be listed as separate line items on the claim. SN, home health aide, physical therapy (PT), and occupational therapy (OT) visits must be billed in 15 minute increments.

Procedural modifiers are required when billing SN, home health aide, PT, and OT visits.

Modifier	Visit Service Category
U2	SN or home health aide second visit per day
U3	SN or home health aide third visit per day

CPT only copyright 2005 American Medical Association. All rights reserved.

Modifier	Visit Service Category
GP	PT
GO	OT

Home health agencies are reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8021. The current DME fee schedule is available on the TMHP website at www.tmhp.com. Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126.

TMHP manually prices DME and expendable supplies other than nutritional products that have no established fee, based on the manufacturer's suggested retail price (MSRP) less 18 percent, with documentation of the MSRP submitted by the provider. If there is no MSRP available, reimbursement is at an established percentage of the provider's invoice cost. Nutritional products that require manual pricing are priced at 89.5 percent of the average wholesale price (AWP).

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

24.3.1 Eligibility

To verify client Medicaid eligibility and retroactive eligibility, the home health agency or DMEH/medical supplier should contact the Automated Inquiry System (AIS) at 1-800-925-9126 or the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638.

Effective for dates of service on or after November 14, 2002, home health clients no longer need to meet the homebound criteria to qualify for services. Providers who have received previous denials based on homebound criteria need to appeal their claims with appropriate documentation to include a copy of the claim, R&S statements, and authorization requests.

The Medicaid client must be eligible on the date(s) of services (DOS) and must meet all the following requirements to qualify for Texas Medicaid (Title XIX) Home Health Services:

- Have a medical need for home health professional services, DME, or supplies covered under Home Health Services and as documented in the client's plan of care (POC)
- Receive services that meet the client's existing medical needs and can be safely provided in the client's home
- Receive prior authorization from TMHP for all home health professional services, DME, or supplies

Certain DME/supplies may be obtained without prior authorization although providers must retain a Title XIX Home Health DME/Medical Supplies Physician Order Form reviewed and signed by the treating physician for these clients.

Refer to: "Automated Inquiry System (AIS)" on page xiii.

Note: *Medicaid beneficiaries who are under 21 years of age are entitled to all medically necessary private duty nursing (PDN) services and/or home health SN services. Nursing services are medically necessary when the requested services are nursing services as defined in the Texas Nursing Practice Act and its implementing regulations; the requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition; and there is no third-party resource that is financially responsible for the services. Requests for nursing services must be submitted on the required Medicaid forms and must include supporting documentation. The supporting documentation must clearly and consistently describe the beneficiary's current diagnosis, functional status and condition; consistently describe the treatment throughout the documentation; and provide a sufficient explanation of how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition. Medically necessary nursing services will be authorized either as PDN services or as Home Health SN services, depending on whether the beneficiary's nursing needs can be met on a per visit basis.*

24.3.1.1 Retroactive Eligibility

When a home health agency is providing services to a client who is pending Medicaid coverage, the agency is responsible for finding out the effective dates for eligibility, which can be done by contacting AIS at 1-800-925-9126 or the TMHP EDI Help Desk at 1-888-863-3638.

Important: *TMHP must receive all documentation and claims for clients with retroactive eligibility within 95 days from the date eligibility was added to TMHP's eligibility file.*

24.3.1.2 Authorization of Retroactive Eligibility

After the client's eligibility is on TMHP's eligibility file, the agency has *95 days from the add date to obtain authorization for services already rendered.* The agency must contact TMHP Home Health Services to obtain authorization for *current services within three business days of the client's eligibility being added to TMHP's eligibility file.* The nurse who made the initial assessment visit in the client's home should make this call.

24.3.2 Prior Authorization

Prior authorization of initial coverage of home health services (SN, home health aide, PT, OT) for an eligible client can be obtained by calling the TMHP Contact Center Home Health Services line at 1-800-925-8957, or by fax to 1-512-514-4209.

- If a client's primary coverage is private insurance, and Medicaid is secondary, prior authorization is required for Medicaid reimbursement.

CPT only copyright 2005 American Medical Association. All rights reserved.

- If the primary coverage is Medicare, and Medicare approves the service, and Medicaid is secondary, prior authorization is not required. TMHP will only pay the coinsurance.
- If Medicare denied the service, then Medicaid prior authorization is required. Contact Medicaid within 30 days of receipt of Medicare's final denial letter. The final denial letter from Medicare *must* accompany the authorization request.
- If the service is a Medicaid-only service, prior authorization is required.

The provider is responsible for determining if eligibility is effective by using AIS or an electronic eligibility inquiry through TMHP EDI gateway.

The provider must contact TMHP Home Health Services within three business days of the start of care (SOC) for professional services or the DOS for DME/medical supplies to obtain authorization. Following the registered nurse's (RN) assessment/evaluation of the client in the home setting, the nurse who made the initial assessment visit in the client's home should make this call to answer questions about the client's condition as it relates to the medical necessity.

If inadequate or incomplete information is provided or is lacking medical necessity, the provider will be requested to furnish additional documentation as required to make a decision on the request. Providers have two weeks to submit the requested documentation because it often must be obtained from the client's physician. If the additional documentation is received within the two-week period, authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks from the request for the documentation, authorization is not considered before the date the additional documentation is received. It is the DME/supplier/home health agency's responsibility to contact the physician to obtain the requested additional documentation.

TMHP's Home Health Services toll-free number is 1-800-925-8957. The Home Health Services Authorization Checklist is a useful resource for home health agency providers completing the authorization process. This optional form offers the nurse a detailed account of the client's needs when completed. Contact TMHP In-Home Care Contact Center at 1-800-846-7470 for more information.

Refer to: "Durable Medical Equipment (DME) and Supplies" on page 24-25 for DME/medical supplies prior authorization and "Medicaid Relationship to Medicare" on page 24-59.

Important: *Client eligibility for Medicaid is for one month at a time. Providers should verify eligibility every month. Prior authorization does not guarantee payment.*

24.4 Home Health Services

The benefit period for home health professional services is up to 60 days with a current POC. In chronic and stable situations, DME and supplies ordered on a Title XIX Home Health (DME)/Medical Supplies Physician Order Form may be au*thorized for up to six months* with medical necessity determination. Because a Medicaid client's eligibility period is for one month, providers should bill for a one month supply at a time, even though prior authorization may be granted for up to six months. This extended authorization period begins on the date that clients receive their first authorized home health service. The Texas Medicaid Program allows additional visits, DME, or supplies that have been determined to be medically necessary and have been authorized by TMHP Home Health Services. Providers must retain all orders, Title XIXs, delivery slips, and invoices for all supplies provided to a client and must disclose them to the HHSC or its designee on request. These records and claims must be retained for a minimum of five years from the date of service or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

24.4.1 Client Evaluation

When a home health agency receives a referral to provide home health services, supplies, or DME for a Medicaid-eligible client, the agency-employed RN should evaluate the client in the home before calling TMHP for prior authorization. Although recommended, a home visit is not required if only DME or supplies are needed and being requested by the physician on a Title XIX form. DME or supplies requested on a Home Health Services POC require an RN home evaluation. It is expected that appropriate referrals will be made between home health agencies and DME suppliers for care. It is recommended that DME suppliers keep open communication with the client's physician for current reporting.

This evaluation should include assessment of the following:

- Medical necessity for home health services, supplies, or DME
- Safety
- Appropriateness of care in the home setting
- Capable caregiver available if clients are unable to perform their own care or monitor their own medical condition

Following the RN's assessment/evaluation of the client in the home setting for home health services needs, the agency RN who completed the home evaluation must contact TMHP for prior authorization within three business days of the SOC.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.4.2 Physician Supervision—Plan of Care

For the Home Health Services POC to be *valid*, the treating physician must sign and date it, and indicate when the services will begin. The home health agency must update and maintain the POC at least every 60 days or as necessitated by a change in condition.

Important: *Medicare Form 485 is not accepted as a POC. The Texas Medicaid Home Health Services POC is the only acceptable form for reimbursement from Medicaid.*

24.4.2.1 Written Plan of Care

A Home Health Services POC is required for SN services, home health aide services, PT, and OT services. The POC is not required as an attachment with the claim, but it must be retained in the client's medical record with the provider and requesting physician. The client's attending physician must recommend, sign, and date a POC. The POC does not need to be signed by the physician before contacting TMHP for authorization when orders for home care have been received from the physician. The POC shall be initiated by the RN in a clear and legible format. The POC must contain the following information:

- Client Medicaid number
- Physician license number
- Provider Medicaid number
- SOC date for home health services
- All pertinent diagnoses
- Mental status
- Types of services including amount, duration, and frequency
- Equipment/supplies required
- Prognosis
- Rehabilitation potential
- Functional limitations
- Activities permitted
- Nutritional requirements
- Medications
- Treatments, including amount and frequency
- Safety measures to protect against injury
- List all community or state agency services the client receives in the home (e.g., primary home care [PHC], community based alternative [CBA], Medically Dependent Children's Program [MDCP])
- Instructions for timely discharge or referral
- Date the client was last seen by the physician. The client must be seen by a physician within *30 days* of the initial SOC and at least once every six months thereafter unless a diagnosis has been established by the physician and the client is currently undergoing physician care and treatment. The physician visit may be waived when a diagnosis has already been established by the physician and the recipient is under the continuing care and medical supervision of the physician. Any waiver must be based on the physician's written statement that an additional evaluation visit is not medically necessary. The original must be maintained by the requesting physician and a copy must be maintained in the providing provider's files.

Physician orders for physical and/or occupational therapy services must include the *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) diagnosis codes for an acute or exacerbated event, if the following conditions apply:

- Physical/occupational therapy is being requested
- Specific procedures and modalities are to be used
- Amount, frequency, and duration of therapy needed
- Physical and/or occupational therapy and goals
- Name of therapist who participated in developing the POC is listed

The physician and home health agency nursing, PT, and OT personnel must review the POC as often as the severity of the patient's condition requires or at least once every 60 days. This documentation must be maintained in the client's medical record with the ordering physician and requesting provider. This applies to all written and verbal orders, and plans of care.

Verbal physician orders may only be given to people authorized to receive them under state and federal law. They must be reduced to writing, signed, and dated by the RN or qualified therapist responsible for furnishing or supervising the ordered service, and placed in the client's chart. The physician must sign the written copy of the verbal order within two weeks or per agency policy if less than two weeks. A copy of the written verbal order must be maintained in the client's chart prior to and after being signed by the physician.

The type and frequency of visits, supplies, or DME must appear on the POC before the physician signs the orders, and may not be added after the physician has signed the orders. If any change in the POC occurs during an authorization period (additional visits, supplies, or DME), the home health agency must call TMHP Home Health Services for authorization and maintain a completed revised request POC signed by the physician.

Coverage periods do not necessarily coincide with calendar weeks or months but instead cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization. The agency *must* contact TMHP up to three business days after the SOC date for prior authorization.

Refer to: "Home Health Services Plan of Care (POC)" on page B-49.
"Physical Therapy (PT) Services" on page 24-11.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5 Benefits

Home health services include skilled nurse services, home health aide visits, physical therapy visits, occupational therapy visits, DME, and expendable medical supplies that are provided to eligible Medicaid clients at their place of residence.

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary DME. DME is medically necessary when it is required to correct or ameliorate disabilities or physical or mental illnesses or conditions. Any numerical limit on the amount of a particular item of DME can be exceeded for Medicaid beneficiaries under 21 years of age if medically necessary. Likewise, time periods for replacement of DME will not apply to Medicaid beneficiaries under 21 years of age if the replacement is medically necessary. When prior authorization is required, the information submitted with the request must be sufficient to document the reasons why the requested DME item or quantity is medically necessary.

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary private duty nursing (PDN) services and/or home health SN services. Nursing services are medically necessary when the requested services are nursing services as defined by the Texas *Nursing Practice Act* and its implementing regulations; the requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition; and there is no third party resource financially responsible for the services. Requests for nursing services must be submitted on the required Medicaid forms and include supporting documentation. The supporting documentation must: clearly and consistently describe the beneficiary's current diagnosis, functional status and condition; consistently describe the treatment throughout the documentation; and provide a sufficient explanation as to how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition. Medically necessary nursing services will be authorized either as PDN services or as Home Health SN services, depending on whether the beneficiary's nursing needs can be met on a per visit basis.

Important: *When a Medicaid client requires in-home lab related services only, the client must be confined to bed and require ambulance transfer to get to a lab, clinic, or physician's office for authorization to be considered.*

For reimbursement, providers should note the following:

- The client's attending physician must request professional and/or home health aide services through a home health agency, and sign the POC.

Prior authorization is obtained for all professional services, some supplies, and most DME from TMHP within *three business days of SOC*. Although providers may supply some DME and medical supplies to a client without prior authorization, they must still retain a copy of the Title XIX Home Health DME/Medical Supplies Physician Order Form that has been completed and signed by the client's attending physician.

- Claims are approved or denied according to the eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a quantity of 1 month for supplies billed.
- Nursing, nurse aide, PT, and OT services must be provided through a Medicaid-enrolled home health agency. These services must be billed using the home health agency's provider identifier. File these services on a HCFA-1450 (UB-92) claim form.
- Physical, occupational, and/or speech therapy are always billed as (POS) 2 and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client's day care facility, or the client's school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only Texas Health Steps-Comprehensive Care Program (THSteps-CCP) therapy that can be delivered in the client's school during regular school hours are those delivered by school districts as School Health and Related Services (SHARS) in POS 9.
- DME/supplies *must* be provided by either a Medicaid enrolled home health agency's Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both *must* enroll and bill using the provider identifier enrolled as a DME supplier. File these services on a CMS-1500 claim form.

Use the following type of service (TOS) codes when providing home health services:

TOS	Description
1	Medical services (including some injectable drugs)
9	Medical supplies
C	Home Health Procedure
J	Purchase (new)
L	Rental, monthly

24.5.1 Skilled Nursing Services

Home health SN services must be provided by an RN and/or a licensed vocational nurse (LVN) who is currently licensed by the Board of Nurse Examiners for the State of Texas. These services are provided on a part-time or intermittent basis and furnished through an enrolled home health agency. *Part-time* means SN services provided any number of days per week and less than eight hours per day. *Intermittent* means SN services that are not provided daily and are less than eight hours per day. A client can be self-referred, physician referred, or a client's family can request an assessment. The assessment visit determines the need for nursing, PT, OT, DME/supplies, and nursing aide services. SN and/or home health aide visit may be provided up to a maximum of 2.5 hours per visit. A combined total of three SN and/or home health aide visits may be prior authorized per day.

Billable home health SN visits may also include:

CPT only copyright 2005 American Medical Association. All rights reserved.

- Nursing visits required to teach the client, the primary caregiver, a family member, and/or neighbor how to administer or assist in a service or activity that is necessary in the care and/or treatment of the client in a home setting
- Nursing visits for SN observation, assessment, and evaluation, provided a physician specifically requests that a nurse visit the client for this purpose (the physician's request must reflect the need for the assessment visit)
- Nursing visits for general supervision of nursing care provided by a home health aide and/or others over whom the RN is administratively or professionally responsible

Note: *Nursing visits for the primary purpose of assessing a client's care needs to develop a POC are considered administrative and not billable. These visit costs are reflected on the cost report.*

Home health visits may be used to teach the client or caregiver to safely and effectively perform certain nursing tasks in the home that usually require the skills of a nurse but can be taught to a client or caregiver.

Examples of services that may require the skills of a nurse but can be taught to the client or caregiver are:

- Administration of medication that can be self-administered (subcutaneous [SQ/SC], intramuscular [IM], or intravenous [IV])
- Changing of indwelling catheters
- Application of dressings involving prescribed medications and sterile techniques

Visits to teach the client or caregiver administration of sub-Q, IM, and/or IV injections constitute professional nursing services; however, visits are *not* covered if the following conditions exist:

- The medication is not considered medically necessary to the treatment of the individual's illness or is not Food and Drug Administration (FDA)-approved.
- The administration of medication exceeds therapeutic frequency or duration by accepted standards of medical practice.
- A medical reason does not prohibit the administration of the medication by mouth.
- The client, a primary caregiver, a family member, and/or neighbor has previously been taught to administer subcutaneous, IM, and IV medications and has demonstrated competency. Nursing visits are not medically necessary once competency has been demonstrated. Non-compliance is not medical necessity for skilled visits.
- The client, a primary caregiver, a family member, and/or neighbor have previously been taught to perform the specific wound care and has demonstrated competency. Nursing visits are not medically necessary once competency has been demonstrated. Non-compliance is not a medical necessity for skilled visits.
- The purpose of the visit is to administer chemotherapeutic agents or blood products.
- The purpose of the visit is pain management.
- Nursing visits to administer long-term SQ/SC, IM, oral, or topical medications, such as insulin, vitamin B_{12}, or deferoxamine, or to set up medications such as prefill insulin syringes or medication boxes, on a long-term basis are not a benefit of Title XIX Home Health Services.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP.*

Home health visits are allowed for short-term teaching of insulin administration and regimen for clients with diabetes. The agency must contact TMHP Home Health Services for further coverage if initial prior authorization is not adequate.

TMHP does not require prior approval for up to two PRN SN visits per 60-day authorization (one per 30 days when necessary), when the following criteria are met:

- These visits must be within a 60-day authorization period when at least one SN visit has been prior authorized.
- If a PRN visit is necessary, *PRN* should be noted on the claim form. For electronic billing, indicate date of PRN in the comment section.
- A 30-day period is calculated from the beginning date of coverage recorded on the confirmation letter and is not to be equated with the calendar months.

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for PDN information.

Important: *TMHP Home Health Services will not issue authorization of SN visits addressing hyperbilirubinemia if the client has an open authorization for phototherapy. Phototherapy is reimbursed as a daily global fee and includes coverage of visits by a registered nurse for teaching and monitoring the client, customary and routine laboratory work.*

Important: *TMHP Home Health Services will not issue authorization of SN visits addressing total parenteral nutrition (TPN)/hyperalimentation if the client has open authorization for the TPN/hyperalimentatin. TPN/hyperalimentation is reimbursed as a daily global fee and includes coverage of visits by a registered nurse for teaching and monitoring the client, customary and routine laboratory work, and enteral supplies and equipment.*

Refer to: "In-Home Total Parenteral Hyperalimentation Supplier" on page 27-1 and "Home Phototherapy Devices" on page 24-34.

Skilled Nursing Visits Procedure Code

Use procedure code C-G0154 to submit claims for SN visits provided through a home health agency.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.1.1 Supplies Submitted With a Plan of Care

The cost of incidental supplies used during a SN visit or a home health aide visit may be added to the charge of the visit ($10 maximum for supplies and included in C-G0154 visit code).

Medical supplies left at the home for the client or a subsequent home health nurse to use must be billed with the provider identifier enrolled as a DME supplier after prior authorization has been granted by the TMHP Home Health Services unit.

A home health agency provider may request prior authorization for supplies/DME by utilizing either the Home Health Services POC or the Title XIX Home Health DME/Medical Supplies Physician Order Form.

The home health agency may utilize the Home Health Services POC to submit a prior authorization of supplies/DME that will be used in conjunction with the professional services provided by the agency, such as SN, PT, or OT. The home health agency's DMEH provider identifier must be submitted on the POC and all of the supplies that are requested must be listed in the supplies section of the POC. The POC does not require an MD signature prior to submission for prior authorization of professional services/DME and supplies.

If the home health agency utilizes the Title XIX Home Health DME/Medical Supplies Physician Order Form, the agency must complete Section A. The physician must complete Section B, and sign prior to submission to TMHP for prior authorization of the requested supplies/DME.

The following information is required to consider these supplies for authorization:

- Item description
- Procedure code
- Quantity of each supply requested
- MSRP for items that do not have a maximum fee assigned

24.5.1.2 Canceling an Authorization

The client has the right to choose their home health agency provider and to change providers. If the client changes providers, TMHP must receive a change of provider letter with a new POC or Title XIX form. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Title XIX form.

24.5.2 Medication Administration Limitations

Nursing visits for the purpose of administering medications are not covered if one of the following conditions exists:

- The medication is not considered medically necessary to the treatment of the individual's illness or is not FDA-approved.
- The administration of medication exceeds the therapeutic frequency or duration by accepted standards of medical practice.
- A medical reason does not prohibit the administration of the medication by mouth.
- The client, a primary caregiver, a family member, and/or neighbor has been taught or can be taught to administer SQ/SC, IM, and IV injections and has demonstrated competency.
- The medication is a chemotherapeutic agent or blood product SQ/SC, IM, and IV injections.

24.5.3 Home Health Aide Services

Home health aide services to provide personal care under the supervision of an RN, licensed PT, or OT employed by the home health agency are covered benefits. A SN and/or home health aide visit may be provided up to a maximum of 2.5 hours per visit. A combined total of three SN and/or home health aide visits may be prior authorized per day. Home health aide criteria includes:

- The primary purpose of a home health aide visit must be to provide personal care services when there is no available caregiver and the client is bed bound.
- Home health aide services are for short-term needs. If a client has long-term needs, home health aide services can be considered on a short-term basis to allow long-term arrangements to be made.
- Duties of a home health aide include the performance of simple procedures such as personal care, ambulation, exercise, range of motion, safe transfer, positioning, and household services essential to health care at home, assistance with medications that are ordinarily self-administered, reporting changes in the patient's condition and needs, and completing appropriate records.
- An RN or therapist must prepare legible written instructions for home health aide services as appropriate.
- The requirements for home health aide supervision are as follows:
    - When only home health aide services are being furnished to a client, an RN must make a supervisory visit to the client's residence at least once every 60 days. The RN *must* complete the supervisory visit when the home health aide is present and providing services, to observe the care the client is receiving and to update the POC.
    - When SN care, PT, or OT are also being furnished to a client, an RN must make a supervisory visit

CPT only copyright 2005 American Medical Association. All rights reserved.

to the client's residence at least every two weeks.

- When only PT or OT is furnished in addition to the home health aide services, the appropriate skilled therapist may make the supervisory visits in place of an RN.
- All supervisory visits must be in writing and maintained in the client's medical record.

- Visits made primarily for performing housekeeping services are not covered.

Important: *Refer clients requiring extended attendant care to HHSC In-Home and Family Support Services.*

24.5.3.1 Home Health Aide Procedure Code

Use procedure code C-G0156 to submit claims for home health aide visits provided through a home health agency.

24.5.4 Physical Therapy (PT) Services

To be payable as a Texas Medicaid (Title XIX) Home Health Services benefit, physical therapy services must be:

- Requested for a payable ICD-9-CM diagnosis code.
- Provided by a PT who is currently licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners, or PT assistant who is licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners who assists and is supervised by a licensed PT.
- For the treatment of an acute musculoskeletal or neuromuscular condition or an acute exacerbation of a chronic musculoskeletal or neuromuscular condition.
- The evaluation and function-oriented treatment of individuals whose ability to function in life roles is impaired by recent or current physical illness, injury, or condition.
- Specific goal-directed activities to achieve a functional level of mobility and communication and prevent further dysfunction within a reasonable length of time based on the therapist's evaluation and physician's assessment and POC.
- PT plan of care should encourage the client and other caregivers to learn self-therapy skills to the greatest extent possible while still providing all medically necessary services.
- Provided only until the patient has reached the maximum level of improvement. Repetitive services designed to maintain function when the maximum level of improvement has been reached are not reimbursed. Services related to activities for the general good and welfare of patients, such as general exercises to promote overall fitness and flexibility, and activities to provide diversion or general motivation are not reimbursed.
- Services are billed by the home health agency and reimbursed to the home health agency.
- Independently-enrolled therapists are not paid under Texas Medicaid (Title XIX) Home Health Services.

Important: *PT authorization must be requested by the home health agency's RN and recommended to be done after the RN home assessment. Requests are not accepted, nor authorization granted, directly to the PT or assistant PT.*

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit will receive those services through THSteps-CCP.*

Refer to: Section 24.3.1, "Eligibility."

24.5.4.1 Physical Therapy Prior Authorization Procedures

To obtain prior authorization for PT services provided through a home health agency, providers should contact TMHP Home Health Services at 1-800-925-8957. To facilitate a determination of medical necessity and avoid unnecessary denials, home health agencies must provide physical therapy goals, accurate diagnostic information (including ICD-9-CM diagnosis codes and physical therapy procedure codes) at the time a request is made using the POC.

Use the procedure codes listed in "Physical Therapy/ Occupational Therapy Procedure Codes" on page 24-12 of this manual to submit claims for PT services provided through a home health agency. Indicate modifier AT (indicating the service procedure is an acute treatment) on each PT procedure code for the PT service billed on a HCFA-1450 (UB-92) claim form.

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for physical therapy services that are not billed as home health services.
"Modifiers" on page 5-21.

24.5.4.2 Limitations

Physical therapy must be billed with the AT modifier and must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary. Physical therapy is to be billed with current procedural terminology (CPT) procedure codes.

The AT modifier is described as representing treatment provided for an acute condition, or an exacerbation of a chronic condition, which persists less than 180 days from the start of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing.

Plateauing is the point at which maximal improvement has been documented and further improvement ceases. The PT-only procedure codes C-97001 and C-97002 are used.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.5 Physical Therapy/Occupational Therapy Procedure Codes

Procedure Code		
C-97012	C-97014	C-97016
C-97018	C-97024	C-97026
C-97028	C-97032	C-97033
C-97035	C-97039	C-97110
C-97112	C-97116	C-97124
C-97139	C-97140	C-97530
C-97535	C-97542	

Therapy services that can be designated either as PT or OT must be requested and billed with the correct procedural modifier.

Modifier	Visit Service Category
GP	PT
GO	OT

24.5.6 Occupational Therapy (OT) Services

To be payable as a Texas Medicaid (Title XIX) Home Health Services benefit, occupational therapy services must be:

- Requested for a payable ICD-9-CM diagnosis code.
- Provided by an occupational therapist who is currently registered and licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners or by an OT assistant who is licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners to assist in the practice of occupational therapy and is supervised by a licensed occupational therapist.
- For the treatment of an acute musculoskeletal or neuromuscular condition or an acute exacerbation of a chronic musculoskeletal or neuromuscular condition.

Important: *OT authorization must be requested by the home health agency's RN and recommended to be done after the RN assessment. Requests are not accepted, nor authorization granted, directly to the occupational therapist or OT assistant.*

- For the evaluation and function-oriented treatment of individuals whose ability to function in life roles is impaired by recent or current physical illness, injury, or condition.
- For specific goal-directed activities to achieve a functional level of mobility and communication and prevent further dysfunction within a reasonable length of time based on the therapist's evaluation.
- Billed by the home health agency. Independently enrolled therapists are not paid directly for home health services.
- Provided only until the patient has reached the maximum level of improvement. Repetitive services designed to maintain function when the maximum level of improvement has been reached are not reimbursed.

  Services related to activities for the general good and welfare of patients, such as general exercises to promote overall fitness and flexibility, and activities to provide diversion or general motivation are not reimbursed.

Refer to: "Occupational Therapists (THSteps-CCP Only)" on page 43-55.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit will receive those services through THSteps-CCP.*

Refer to: Section 24.3.1, "Eligibility."

24.5.6.1 Occupational Therapy Prior Authorization Procedures

To obtain prior authorization for OT services provided through a home health agency, providers should contact TMHP Home Health Services at 1-800-925-8957. To facilitate a determination of medical necessity and avoid unnecessary denials, home health agencies must provide accurate diagnostic information, including ICD-9-CM diagnosis codes, occupational therapy procedure codes, and the occupational therapy treatment plan and goals.

Use the codes listed under "Physical Therapy/Occupational Therapy Procedure Codes" on page 24-12 of this manual to submit claims for OT services that are provided through a home health agency. Bill OT services on a HCFA-1450 (UB-92) claim form.

24.5.6.2 Limitations

Occupational therapy must be billed with the AT modifier. Services must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary. Occupational therapy is billed using CPT procedure codes.

The AT modifier is described as "representing treatment provided for an acute condition, or an exacerbation of a chronic condition, which persists less than 180 days from the start of therapy." If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing.

Plateauing is the point at which maximal improvement has been documented and further improvement ceases. The OT-only procedure codes C-97003 and C-97004 are used.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.7 Medical Supplies

Medical supplies are covered benefits if they meet the following criteria:

- A completed Title XIX Home Health DME/Medical Supplies Physician Order Form, prescribing the DME and/or supplies must be signed and dated by a physician familiar with the client before requesting prior authorization for all DME and supplies. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed Title XIX form must include the procedure codes and quantities for the services requested. A copy of the completed Title XIX form must be maintained by the DME provider and the original must be kept by the prescribing physician in the client's medical file.
- The provider *must* contact TMHP within three business days of providing the supplies to the client and obtain authorization, if required.
- The requesting provider and ordering physician must keep all Title XIX Home Health DME/Medical Supplies Physician Order Form and Addendum to Title XIX Home Health DME/Medical Supplies Physician Order Form on file. The physician must maintain the original signed Title XIX copy in their records. Providers *must retain* individual delivery slips or invoices for each DOS that document the date of delivery for all supplies provided to a client and must disclose them to HHSC or its designee upon request. Documentation of delivery must include *one* of the following:
    - Delivery slip or invoice signed and dated by client/caregiver
    - A dated carrier tracking document with shipping date and delivery date, which must be attached to the delivery slip or invoice

Important: *These records and claims must be retained for a minimum of five years from the date of service or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*

- The requesting provider or ordering physician must document medical supplies as medically necessary in the client's POC or on a *completed* Title XIX Home Health DME/Medical Supplies Physician Order Form and Addendum to Title XIX Home Health DME/Medical Supplies Physician Order Form. TMHP must prior authorize most medical supplies. They must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client's POC.

HHSC/TMHP reserves the right to request the Title XIX Home Health DME/Medical Supplies Physician Order Form (Title XIX form) and/or Addendum to Title XIX Home Health DME/Medical Supplies Physician Order Form at any time.

- Some medical supplies may be obtained without prior authorization; however, the provider must retain a copy of the completed POC or Title XIX form in the client's file. For medical supplies not requiring prior authorization, a completed Title XIX form may be valid for a maximum of six months, unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than six months, then a new Title XIX form is required at the end of the determined duration of need.

Refer to: The list of DME/medical supplies that may be provided without prior authorization in "Diabetic Supplies/Equipment" on page 24-14; "Nebulizers" on page 24-46; "Vaporizers" on page 24-47; "Incontinence Supplies" on page 24-18; and "Procedure Codes Removed From Prior Authorization" on page 24-56. The items must be used for therapeutic purposes and directly relate to the client's needs and POC.

Note: *All purchased equipment must be new upon delivery to client. Used equipment may be utilized for lease, but when purchased, must be replaced with new equipment.*

Important: *Client eligibility can change monthly. Providers are responsible for verifying eligibility before providing supplies.*

- Clients with ongoing needs may receive up to six months of prior authorizations for some expendable medical supplies under Home Health Services when requested on a Title XIX form. Providers may deliver medical supplies as ordered on a Title XIX form for up to six months from the date of the physician's signature. In these instances, a review of the supplies requested by the physician familiar with the client's condition, and a new Title XIX form is required for each new prior authorization request. Requests for authorization can be made up to 60 days before the start of the new authorization period. Professional Home Health Services prior authorization requests require a review by the physician familiar with the client's condition and a physician signature every 60 days when requested on a POC.

Important: *These records and claims must be retained for a minimum of five years from the date of service or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*

- If a client or caregiver has been instructed and supervised on proper wound care technique and no longer requires SN services, the home health agency (enrolled as a DMEH provider) can continue to provide supplies that enable the client or caregiver to administer care. Supplies may be provided as long as the client meets home health services criteria. The following supplies are those considered essential to the physician-prescribed treatment of an ill or injured client in their own home. Items not listed may, in selected instances, be required for a particular client. Consideration is given on an individual case basis to items not on this list that are medically documented by the physician's POC. *An RN must evaluate the client in the home setting before the initiation of the POC or have a Title XIX Home*

CPT only copyright 2005 American Medical Association. All rights reserved.

Health Durable DME/Medical Supplies Physician Order Form completed and signed by a treating physician serving as a POC for DME and/or supplies.

The DOS is the date on which supplies are delivered to the client and/or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date. The provider must maintain the records supporting documentation that an item was not billed prior to delivery. These records are subject to retrospective review.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP.*

Refer to: "Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions (2 Pages)" on page B-44 and "Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form" on page B-46 for copies of forms.

"Durable Medical Equipment Supplier (THSteps-CCP Only)" on page 43-39 for specific information about certain DME and medical supplies.

"Medicare/Medicaid Authorization" on page 24-60 for a list of supplies that do not require prior authorization.

"Eligibility" on page 24-5.

24.5.7.1 Supply Procedure Codes

When submitting supplies on the CMS-1500 claim form, itemize the supplies, including quantities, and also provide the Healthcare Common Procedure Coding System (HCPCS) national procedure codes.

24.5.7.2 Canceling an Authorization

The client has the right to choose their DME/medical supply provider and to change providers. If the client changes providers, TMHP must receive a change of provider letter with a new POC or Title XIX form. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Title XIX form.

24.5.8 Diabetic Supplies/Equipment

Diabetic supplies and equipment are a benefit through Title XIX Home Health services. The following requirements must be met to qualify for reimbursement under Medicaid Home Health Services:

- The client must be eligible for home health benefits.
- The equipment must be medically necessary.
- The criteria appropriate for the requested equipment must be met.
- Federal financial participation must be available.
- The requested equipment or supplies must be safe for use in the home.

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client's medical record.

Glucose monitors and external insulin pumps that have been purchased are anticipated to last a minimum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer repairable. The durable medical equipment may then be considered for prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate or applicable, and the measures to be taken to prevent reoccurrence must be submitted. Additional services may be reimbursed with prior authorization based on documentation of medical necessity.

In situations where the equipment has been abused or neglected by the client, the client's family or the caregiver, a referral to the Department of State Healthcare Services (DSHS) THSteps Case Management unit will be made by the Home Health Services unit for clients under 21 years of age. Providers will be notified that the State will be monitoring this client's services to evaluate the safety of the environment for both the client and the equipment.

A Texas Medicaid-eligible client may obtain diabetic supplies and related testing equipment through Title XIX Home Health Services. The following requirements must be met to qualify for reimbursement under Medicaid Home Health Services:

A completed Home Health (Title XIX) DME/Medical Supplies Physician Order Form that prescribes the durable medical equipment and/or medical supplies must be signed and dated by a prescribing physician who is familiar with the client before supplying any medical equipment or supplies. All signatures must be current, unaltered, original, and hand written. Computerized or stamped signatures will not be accepted. The completed Title XIX form must be maintained by the provider and the prescribing physician in the client's medical record. The physician must maintain the original signed copy of the Title XIX form. The completed Title XIX form is valid for a period up to six months from the physician's signature date.

The physician must indicate on the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form how many times a day the client is required to test blood glucose levels.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.8.1 Blood Testing Supplies

Blood testing supplies for diagnoses other than those listed in Table B may be considered for prior authorization with documentation of medical necessity. Quantities will be prior authorized based on the documentation of medical necessity related to the number of tests ordered per day by the physician.

Quantities of blood testing supplies beyond those listed in Table A, when requested for a diagnosis listed in Table B, may be considered for prior authorization with documentation of medical necessity related to the number of tests the physician ordered per day. Blood testing supplies will be reimbursed for the quantities listed in Table A or the quantity that was prior authorized.

The quantity of blood testing supplies billed for a one month supply should relate to the number of tests ordered per day by the physician.

Requests for a quantity greater than those listed in Table A require prior authorization through TMHP Home Health Services.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP. Glucose tabs/gel may be billed with procedure code 9-A9150.*

Blood glucose test/reagent strips (9-A4253) and home glucose disposable monitors with test strips (9-A9275) are limited to a combined total of four per month without prior authorization.

The procedure codes for the diabetic supplies listed in Table A do not require prior authorization, up to the quantities listed in the table, when provided to a client with a diagnosis from Table B.

Table A: Diabetic Supplies, Procedures, and Limitations

Procedure Code	Maximum Limit
1-A9150	1 per six months
9-A4233	1 per 6 months
9-A4234	1 per 6 months
9-A4235	1 per 6 months
9-A4236	1 per 6 months
9-A4250	2 boxes per month
9-A4253	4 boxes per month *combined total with 9-A9275*
9-A4256	2 per year
9-A4258	2per year
9-A4259	2 boxes per month
9-A9275	4 per month *combined total with 9-A4253*

Table B: Diagnosis Codes

Diagnosis Code	Description
25000	Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled
25001	Diabetes mellitus without mention of complication, type I [juvenile type], not stated as uncontrolled
25002	Diabetes mellitus without mention of complication, type II or unspecified type, uncontrolled
25003	Diabetes mellitus without mention of complication, type I [juvenile type], uncontrolled
25010	Diabetes with ketoacidosis, type II or unspecified type, not stated as uncontrolled
25011	Diabetes with ketoacidosis, type I [juvenile type], not stated as uncontrolled
25012	Diabetes with ketoacidosis, type II or unspecified type, uncontrolled
25013	Diabetes with ketoacidosis, type I [juvenile type], uncontrolled
25020	Diabetes with hyperosmolarity, type II or unspecified type, not stated as uncontrolled
25021	Diabetes with hyperosmolarity, type I [juvenile type], not stated as uncontrolled
25022	Diabetes with hyperosmolarity, type II or unspecified type, uncontrolled
25023	Diabetes with hyperosmolarity, type I [juvenile type], uncontrolled
25030	Diabetes with other coma, type II or unspecified type, not stated as uncontrolled
25031	Diabetes with other coma, type I [juvenile type], not stated as uncontrolled
25032	Diabetes with other coma, type II or unspecified type, uncontrolled
25033	Diabetes with other coma, type I [juvenile type], uncontrolled
25040	Diabetes with renal manifestations, type II or unspecified type, not stated as uncontrolled
25041	Diabetes with renal manifestations, type I [juvenile type], not stated as uncontrolled
25042	Diabetes with renal manifestations, type II or unspecified type, uncontrolled

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
25043	Diabetes with renal manifestations, type I [juvenile type], uncontrolled
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I [juvenile type], not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I [juvenile type], uncontrolled
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
25061	Diabetes with neurological manifestations, type I [juvenile type], not stated as uncontrolled
25062	Diabetes with neurological manifestations, type II or unspecified type, uncontrolled
25063	Diabetes with neurological manifestations, type I [juvenile type], uncontrolled
25070	Diabetes with peripheral circulatory disorders, type II or unspecified type, not stated as uncontrolled
25071	Diabetes with peripheral circulatory disorders, type I [juvenile type], not stated as uncontrolled
25072	Diabetes with peripheral circulatory disorders, type II or unspecified type, uncontrolled
25073	Diabetes with peripheral circulatory disorders, type I [juvenile type], uncontrolled
25080	Diabetes with other specified manifestations, type II or unspecified type, not stated as uncontrolled
25081	Diabetes with other specified manifestations, type I [juvenile type], not stated as uncontrolled
25082	Diabetes with other specified manifestations, type II or unspecified type, uncontrolled
25083	Diabetes with other specified manifestations, type I [juvenile type], uncontrolled
25090	Diabetes with unspecified complication, type II or unspecified type, not stated as uncontrolled
25091	Diabetes with unspecified complication, type I [juvenile type], not stated as uncontrolled
25092	Diabetes with unspecified complication, type II or unspecified type, uncontrolled
25093	Diabetes with unspecified complication, type I [juvenile type], uncontrolled
64800	Diabetes mellitus of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64801	Diabetes mellitus of mother, with delivery
64802	Diabetes mellitus of mother, with delivery, with mention of postpartum complication
64803	Antepartum diabetes mellitus
64804	Postpartum diabetes mellitus
64880	Abnormal glucose tolerance of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64881	Abnormal glucose tolerance of mother, with delivery
64882	Abnormal glucose tolerance of mother, with delivery, with mention of postpartum complication
64883	Abnormal glucose tolerance of mother, antepartum
64884	Abnormal glucose tolerance of mother, postpartum
7751	Neonatal diabetes mellitus

Diagnoses not listed above may be considered by HHSC with supporting documentation of medical necessity.

Diabetic supplies and related testing equipment do not require prior authorization unless otherwise specified by HHSC.

24.5.8.2 Blood Glucose Monitors

A blood glucose monitor is a portable battery-operated meter used to determine the level of blood sugar (glucose). Home glucose monitor procedure codes J-E0607, J/L-E2101, and J/L-E2100 are a benefit of Texas Medicaid (Title XIX) Home Health Services.

Prior authorization is not required for the purchase of a standard blood glucose monitor (J-E0607), but is limited to the diagnoses listed in Table B above. Diagnoses not listed will be considered with a prior authorization request and supporting documentation of medical necessity.

Continuous glucose monitors are not a benefit of Texas Medicaid Title XIX Home Health Services.

CPT only copyright 2005 American Medical Association. All rights reserved.

Blood glucose monitors with special features (J-E2100 and J-E2101) may be considered for prior authorization with documentation that supports the medical necessity of the special feature requested.

Purchase of a blood glucose monitor with integrated voice synthesizer (J-E2100) may be prior authorized with documentation that includes a diagnosis of diabetes and significant visual impairment and a statement from the physician that the client is unable to use a regular monitor and the visual impairment is not correctable.

Purchase of a blood glucose monitor with integrated lancing/blood sample (J-E2101) may be prior authorized with documentation that includes a diagnosis of diabetes and significant manual dexterity impairment related to, but not limited to, neuropathy, seizure activity, cerebral palsy, or Parkinson's. The documentation must include a statement from the physician that the client is unable to use a regular monitor and has a significant manual dexterity impairment that is not correctable.

The documentation and a completed Title XIX form must be submitted to the Medicaid Home Health Unit for prior authorization.

24.5.8.3 Insulin and Insulin Syringes

Insulin and insulin syringes, all sizes, are reimbursed through the Vendor Drug Program pursuant to a physician’s prescription. The Vendor Drug Program enrolls pharmacies only.

24.5.8.4 Insulin Pump

The following procedure codes for the external insulin pumps and associated supplies are a benefit of the Texas Medicaid Program. Note that a replacement leg bag may be requested with procedure code 9-A9900. *The initial leg bag is part of the purchase of the pump.*

Table C: Insulin Pump Crosswalk Procedure Codes and Limitations

Procedure Code	Maximum Limitation
9-A4230	10 per month
9-A4231	15 per month
9-A4232	10 per month
9-A4632	1 per month
9-A6257	15 per month
9-A6258	15 per month
9-A6259	15 per month
9-A9900	Replacement only
J-E0784	1 per 5 years
L-E0784	3 months trial

Prior authorization is required for external insulin pumps (J/L-E0784) with carrying cases and their related supplies. The external insulin pump supplies may be reimbursed separately in addition to the external insulin pump rental.

The following information, which must be documented on the External Insulin Infusion Pump form, is the minimum documentation required for consideration of medical necessity:

- Lab values, current and past blood glucose levels, including glycosylated hemoglobin (Hb/A1C) levels
- History of severe glycemic excursions, brittle diabetes, hypoglycemic/hyperglycemic reactions, nocturnal hypoglycemia, any extreme insulin sensitivity and/or very low insulin requirements
- Any wide fluctuations in blood glucose before mealtimes
- Any Dawn phenomenon where fasting blood glucose level often exceeds 200 mg/dL
- Day-to-day variations in work schedule, mealtimes and/or activity level, which require multiple insulin injections
- Completed, signed, and dated Title XIX Home Health DME/Medical Supplies Physician Order Form

The external insulin pump may be considered for purchase after it has been rented for three months and the physician provides documentation that it is the appropriate equipment for the client and the client is compliant with use. This documentation and a newly completed Title XIX form and new External Insulin Infusion Pump form must be submitted to TMHP Home Health Services for prior authorization. The external insulin pump supplies are not included in the external insulin pump rental.

An internal insulin pump will not be prior authorized, because reimbursement for the pump is included in the reimbursement for the surgery to place the insulin pump.

A determination will be made by the prior authorization nurse as to whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and the age of the equipment.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the diabetic equipment or supplies.

24.5.9 Incontinence Supplies and Equipment

Incontinence supplies and DME are defined as disposable supplies, such as diapers/briefs/liners, wipes, underpads, or DME, such as a bedside commode, used by a client who has a medical condition that results in an impairment of urination and/or stooling, or renders them unable to ambulate safely to the bathroom (with or without mobility aids). For the purpose of this policy, permanent impairment of urination and/or stooling is defined as a condition that is not expected to be medically or surgically corrected and that is of long and indefinite duration (at least three months).

CPT only copyright 2005 American Medical Association. All rights reserved.

Incontinence supplies, urinals, and bed pans do not require prior authorization up to their allowed maximum limitations. Prior authorization is required for incontinence supplies if amounts greater than the maximum limits are medically necessary. Incontinence supplies billed for a one-month period should be based on the frequency/ quantity ordered by the physician on the Title XIX form.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health benefit will receive those services through THSteps-CCP.*

Refer to: Section 24.3.1, "Eligibility."

24.5.9.1 Incontinence Supplies

Skin Sealants/Protectants/Moisturizers/Ointments may be considered for reimbursement with prior authorization for clients who have a medical condition that results in chronic incontinence and increased risk of skin breakdown. Skin sealants, protectants, moisturizers and ointments are limited to a maximum of two per month. Prior authorization for clients younger than 4 years of age must be obtained through THSteps-CCP.

Note: Diapers *are defined as incontinence items attached with tabs.* Briefs *are defined as incontinence items that do not attach with tabs and are slip-on items, such as pull-ups.*

Diapers/briefs/liners may be considered for reimbursement without prior authorization for clients 4 years of age and older who have a medical condition that results in chronic incontinence. A combination of diapers/briefs/liners may be considered for reimbursement. A total accumulation of one or more of the following products is limited to a maximum of 300 per month: diapers/briefs/liners. Amounts beyond 300 per month require prior authorization. Reusable diapers/ briefs are not a benefit of Texas Medicaid Title XIX Home Health.

Note: *Gloves used to change diapers/briefs (including pull-ups) are not a benefit of Texas Medicaid Title XIX Home Health.*

Diaper wipes may be considered for reimbursement without prior authorization for clients 4 years of age and older who also receive diapers/briefs. Diaper wipes are limited to a maximum of two boxes per month.

Note: *Providers are to bill procedure code A4335 instead of procedure code A5120 when providing diaper wipes. Inappropriate billing of A5120 will cause the procedure to deny.*

Underpads may be considered for reimbursement without prior authorization for clients who also receive diapers/ briefs, urine collection devices, or bowel management supplies. Underpads are limited to a maximum of 150 per month without prior authorization. Reusable underpads are *not* a benefit of Texas Medicaid Home Health.

Note: *The Title XIX form for the supplies listed above must reflect a one month's supply of the incontinence product. More than the maximum allowed amount should not be on the Title XIX form, unless it has been prior authorized.*

Ostomy supplies may be considered for reimbursement without prior authorization. The physician must specify the type of ostomy device/system to be used and how often it is to be changed on the Title XIX form. The quantity of ostomy supplies billed for a one-month period should relate to the number of changes per month based on the frequency ordered by the physician.

Urine Collection Devices. The home setting is considered a clean environment, not a sterile one. Sterile incontinence supplies will not be reimbursed in the home setting except when requested by a physician familiar with the client for the following:

- Indwelling urinary catheters
- Intermittent catheters for clients who:
    - Are immunosuppressed
    - Have radiologically documented vesicoureteral reflux
    - Are pregnant and have a neurogenic bladder
    - Have a history of distinct, recurrent urinary tract infections, defined as a minimum of two within the prior 12-month period, while on a program of clean intermittent catheterization

Note: *Nonsterile gloves may be considered for reimbursement with prior authorization when a family member or friend is performing the catheterization. Sterile gloves for catheterization are not a benefit of Texas Medicaid Title XIX Home Health except as noted above. Nonsterile/sterile gloves for use by a health care provider in the home setting, such as an RN, LVN, or attendant, are not a benefit of Texas Medicaid Title XIX Home Health.*

Indwelling catheters and related supplies may be considered for reimbursement without prior authorization for clients who have a documented medical condition that results in a permanent impairment of urination. Indwelling catheters and related supplies are limited to a maximum of two per month. More than two indwelling catheters and related insertion supplies per month requires prior authorization. The physician must indicate on the Title XIX form how often the client is required to change their indwelling catheter.

Intermittent catheters and related supplies may be considered for reimbursement for those who have a documented medical condition that results in a permanent impairment of urination. Intermittent catheters and related supplies are limited to a maximum of 120 per month. More than 120 intermittent catheters and related insertion supplies requires prior authorization. The physician must indicate on the Title XIX form how often the client is required to perform intermittent catheterization.

External urinary collection devices, such as male external catheters and female collection devices, and related supplies may be considered for reimbursement for clients who have a documented and/or diagnosed medical condition that results in a permanent impairment of urination. External urinary collection devices are limited to 31 per month. Prior authorization is required for medically necessary services beyond the limits listed in the Inconti-

CPT only copyright 2005 American Medical Association. All rights reserved.

nence Procedures and Limitations table. The physician must indicate on the Title XIX form how often the client is required to change their external urinary collection device.

External urinary collection devices for clients younger than 4 years of age require prior authorization through THSteps-CCP. Documentation of a medical condition that results in an increased urine and/or stool output beyond the typical output for this age group is required for reimbursement consideration.

24.5.9.2 Incontinence Equipment

Incontinence equipment may be considered for reimbursement for clients 4 years of age and older who have a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Urinals and bed pans may be considered for reimbursement without prior authorization for clients who have a documented and/or diagnosed medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids). Urinals and bed pans are purchase only. Urinals and bed pans are limited to two per year.

Commode chairs and foot rests will be considered for reimbursement based on the level of need. The client must meet the criteria for the level commode chair or foot rest requested.

Reimbursement may be considered for a commode chair with or without foot rest if the client also has a stationary bath chair without a commode cutout.

Level 1: Stationary Commode Chair

A stationary commode chair may be considered for reimbursement with prior authorization for clients who have a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Use procedure codes J-E0163 or J-E0165 when filing a claim for a stationary commode chair.

Level 2: Mobile Commode Chair

A mobile commode chair may be considered for reimbursement for clients who have a documented medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Mobile commode chair with fixed or removable arms:

- In addition to meeting the criteria for a Level 1 commode chair, the client must be on a bowel program and require a combination commode/bath chair for performing the bowel program and bathing after.
- A mobile commode chair will be considered for reimbursement with prior authorization only if the client does not also have any type of bath chair. If the client meets the criteria for a stationary bath chair, prior authorization of a stationary chair may be considered.
- Use the procedure codes J-E0164 and J-E0166 for a mobile commode chair.

Level 3: Custom Commode Chair

A custom stationary or mobile commode chair may be considered for reimbursement with prior authorization for clients who have a documented medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Custom stationary or mobile commode chair with fixed or removable arms and head, neck, and/or trunk support attachments:

- In addition to meeting the criteria for a Level 1 or 2 commode chair, the client must have a medical condition that results in an inability to support their head, neck, and/or trunk without assistance.
- A mobile custom commode chair may be considered for reimbursement only if the client does not also have any type of bath chair.
- Use procedure codes J-E0163-TG, J-E0164-TG, J-E0165-TG, or J-E0166-TG when billing for a custom stationary or mobile commode chair.

24

An extra wide/heavy-duty commode chair is defined as one with a width greater than or equal to 23 inches and capable of supporting a patient who weighs 300 pounds or more.

- The client must meet the criteria for a Level 1, 2, or 3 commode chair and weigh 300 pounds or more.
- Use procedure code J-E0168 and modifiers TF and TG for an extra-wide/heavy-duty commode chair.

A *foot rest* is used to support feet during use of commode chair.

The client must meet the criteria for a Level 1, 2, or 3 commode chair and the foot rest is necessary to support contractures of the lower extremities; for a client who is paraplegic or quadriplegic.

Commode chairs are limited to one per five years and replacement pails or pans are limited to a maximum of one per year. Commode chairs with a seat lift mechanism are not a benefit of Texas Medicaid Home Health Services. Documentation must support the medical necessity of a customized commode chair or the addition of attachments to a standard commode chair.

24.5.9.3 Incontinence Procedure Codes With Limitations

Note: *Any service or combination of services not identified with a # next to the procedure code, except diaper wipes, requires prior authorization if the maximum limitation is exceeded. Items identified with a # always require prior authorization. Requests for prior authorization of diaper wipes that exceed more than two boxes per month will not be considered through Home Health Services.*

24.5.9.4 Modifiers

Modifier	
TF	TG

24.5.10 Wound Care Supplies and/or Systems

Wound care supplies and systems are designed to assist in healing of wounds in conjunction with an individualized wound care therapy regimen prescribed by a physician. A wound care system includes a medical device and its component supplies designed to assist in healing of wounds unresponsive to conventional wound care therapy. Wound care supplies and wound care systems may be considered for reimbursement through Texas Medicaid Title XIX Home Health.

Refer to: “Wound Care Supplies and/or Systems” on page 24-21 for more information.

Prior authorization is required for all the medical supplies and wound care systems addressed in this policy and provided through TMHP Home Health Services.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP.*

24.5.10.1 Wound Care Supplies

Nonsterile/clean wound care supplies may be considered for prior authorization when documentation supports medical necessity. The home setting is considered a clean environment, not a sterile environment.

Sterile wound care supplies, other than those required with a wound care system, may be considered for prior authorization when documentation supports medical necessity and justifies that nonsterile/clean wound care supplies will not meet the client’s needs.

Note: *Established tracheostomies and/or enteral feeding tubes/buttons are not considered wounds, and dressing supplies will not be considered for prior authorization.*

To request prior authorization for wound care supplies, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client’s overall health status
- Appropriate medical history related to the current wound:

CPT only copyright 2005 American Medical Association. All rights reserved.

- Wound measurements to include length, width and depth, any tunneling and/or undermining
- Wound color, drainage (type and amount) and odor, if present
- The prescribed wound care regimen, to include frequency, duration and supplies needed
- Treatment for infection, if present

- The client's use of a pressure reducing mattress and/or cushion, when appropriate
- Identification of the client, family member, or friend who will be instructed how to perform and will be responsible for the wound care

Note: *Nonsterile gloves may be considered for reimbursement when necessary to perform medical wound care provided by the client, a family member, or a friend. The home health nursing agency must provide their staff with the appropriate safety supplies as stated in the Occupational Safety and Health Administration (OSHA) requirements.*

24.5.10.2 Wound Care System

A wound care system includes a medical device and its component supplies designed to assist in healing of wounds unresponsive to conventional wound care therapy. Wound care systems may be considered for reimbursement through TMHP Home Health Services when prior authorized.

A wound care system may be considered for reimbursement for clients with a Stage III or IV chronic, nonhealing wound, such as a pressure, venous stasis, diabetic ulcer, postsurgical wound dehiscence, nonadhering skin grafts, or surgical flaps required for covering such wounds.

Types of wound care systems include the following:

- *Thermal wound care system.* A heating element provides and maintains a warm, moist wound environment and protects the wound during the healing process by sealing it with an adhesive drape and applying intermittent heat to the surrounding tissue.
- *Sealed suction wound care system.* Sealed intermittent suction provides and maintains a moist wound environment and protects the wound during the healing process by sealing it with an adhesive drape and applying continuous or intermittent suction.
- *Pulsatile jet irrigation wound care system.* Pulsatile jet irrigation uses antibiotics or water under pressure to irrigate the wound and uses suction to remove the irrigation fluid and debris.

Note: *Portable hyperbaric oxygen chambers that are placed directly over the wound and provide higher concentrations of oxygen to the damaged tissue are not a benefit of Texas Medicaid Title XIX Home Health Services.*

24.5.10.3 Thermal Wound Care System

A thermal wound care system consists of an occlusive pocketed wound cover with foam buffer to cover the wound, a warming card that is placed in the wound cover pocket and an electric temperature control unit (TCU). A thermal wound care system delivers safe, controlled warmth to the wound site and peri-wound tissue—without touching the wound. This warmth temporarily increases blood flow and subcutaneous oxygen to the wound and surrounding area to facilitate healing.

Dressing changes associated with a thermal wound care system are performed every one to three days, depending on the amount of exudate produced by the wound. The warming card is used on a single client, but is not required to be changed during treatment except to accommodate a decreasing wound size. The TCU is rented monthly. The client, family, or caregiver can be taught to perform a thermal wound care system dressing change.

The procedure codes 9-A6000, L-E0231, and L-E0232 are used for a thermal wound care system.

24.5.10.4 Sealed Suction Wound Care System

A sealed suction wound care system consists of a cell foam dressing that is placed in the wound bed, a suction catheter tip, an adhesive drape to cover the wound, suction tubing, and a computerized vacuum pump. A sealed suction wound care system uses continuous or intermittent subatmospheric pressure to evacuate the excess interstitial fluid and remove growth factor inhibitors. The removal of inhibitors allows the growth factor to stimulate cell proliferation and migration. Removal of excess fluid also helps decrease peri-wound induration.

Dressing changes associated with a sealed suction wound care system are performed every one to three days depending on the amount of exudate produced by the wound. The computerized vacuum pump is rented monthly. An RN is required to perform a sealed suction wound care system dressing change.

Use the procedure codes L-E2402 and 9-A655 for a sealed suction wound care system.

24.5.10.5 Pulsatile Jet Irrigation Wound Care System

A pulsatile jet irrigation wound care system consists of a pistol-style hand piece with a trigger to control the pulsatile jet. A suction pump is used to remove the fluid. The wound is then dressed using standard wound care supplies.

Dressing changes associated with a pulsatile jet irrigation wound care system are performed every one to three days depending on the amount of exudate produced by the wound. An RN is required to perform a pulsatile jet irrigation wound care system dressing change.

Use procedure code L-E1399 for a pulsatile jet irrigation wound care system.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.10.6 Wound Care System Criteria

Initial Criteria

Initial prior authorization for a wound care system may be considered for reimbursement for up to a 30-day period.

Extension Criteria

Medically necessary prior authorized extensions may be considered for reimbursement for 30-day periods up to a maximum of four months when documentation supports continued significant improvement in wound healing. Wound care systems may be considered for reimbursement beyond four months of treatment on a case-by-case basis after review by the medical director or designee.

24.5.10.7 Prior Authorization

To request prior authorization for a wound system, the documentation listed below must be provided on the Statement of Initial Wound Therapy System In-Home Use Form or the Statement for Recertification of Wound Therapy System In-Home Use Form and submitted with the Title XIX form. The original documentation must be maintained by the prescribing physician in the client's medical record. A copy of these documents must be maintained by the requesting provider.

- Accurate diagnostic information pertaining to the underlying diagnosis/condition and any other medical diagnoses/conditions, including the client's overall health status.
- The client's use of a pressure reducing mattress, when appropriate.
- Albumin level within the last 30 days:
    - If the albumin level is below 3.0, documentation must show that nutritional supplement is in place.
- Hemoglobin A1c obtained within last 30 days if the client has a diagnosis of diabetes mellitus.
- Appropriate medical history related to the current wound:
    - Documentation that the wound is free of necrotic tissue and infection, or if infection is present, that it is being treated with antibiotics, including the name of the antibiotic, dosage, frequency, and route of administration.
    - Wound measurements to include length, width, and depth, any tunneling and/or undermining.
    - For recertification, documentation that the wound is improving.
    - Wound color, drainage (type and amount), and odor if present.
- The prescribed wound care regimen, to include frequency, duration, and supplies needed.
- Identification of the family member, friend, or caregiver who agrees to be available to assist client during this time and agreement of this person not to operate the negative pressure or the pulsatile jet irrigation system if used.
- Documentation that a registered nurse is performing the wound care when a negative pressure or pulsatile jet irrigation wound care system is used. All requirements for SN care must be met.

Wound care system supplies are limited to a maximum of:

- 15 dressing kits or supplies for 15 dressings per wound per month unless documentation supports that the wound size requires more than one dressing kit for each dressing change or if the physician has ordered more frequent dressing changes.
- 10 suction canister sets per month for wound care systems that require suction unless documentation supports evidence of high-volume drainage, defined as greater than 90 ml per day. For high-volume exudative wounds, a stationary pump with the largest capacity canister must be used. Extra canisters related to equipment failure are not considered medically necessary.

Wound care systems and related supplies will not be considered for reimbursement, nor prior authorized, when:

- The client has one of the following contraindications:
    - A fistula to the body
    - Wound ischemia
    - Gangrene
    - Skin cancer in the wound margins
    - Presence of necrotic tissue, including bone (nonapplicable to the pulsatile jet irrigation wound care system)
    - Osteomyelitis (unless it is being treated; the treatment must be identified)
    - Less than six months to live
- In the documented judgement of the treating physician, adequate wound healing has occurred and the wound care system is no longer required.
- No measurable wound healing has occurred over the previous 30-day period.
- A wound care system was used for four months or more in the inpatient setting before discharge, except when documentation supports continued significant improvement in wound healing.
- The wound care equipment and supplies are no longer being used by the client. Stand-by use equipment and supplies are not a benefit of Texas Medicaid Home Health Services.

24.5.11 Durable Medical Equipment (DME) and Supplies

To be reimbursed as a home health benefit:

- The client must be eligible for home health benefits.
- The criteria listed for the requested equipment must be met.
- The equipment requested must be medically necessary, and federal financial participation must be available.
- The client's health status would be compromised without the requested equipment.
- The requested equipment or supplies must be safe for use in the home.
- The client must be seen by a physician within one year of the date of service.

A completed Title XIX Home Health DME/Medical Supplies Physician Order Form (Title XIX form) prescribing the DME and/or supplies must be signed and dated by a physician familiar with the client before requesting prior authorization for all DME equipment and supplies. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed Title XIX form must include the procedure codes and quantities for services requested. The completed Title XIX form must be maintained by the DME provider and the prescribing physician in the client's medical record. The completed Title XIX form with the original signature must be maintained by the prescribing physician.

Prior authorization is required for most DME and services provided through Medicaid Home Health. These services include accessories, modifications, adjustments, and repairs for the equipment.

The date last seen by the physician must be within the past 12 months unless a physician waiver is obtained. The physician's signature on the Title XIX is only valid for 90 days prior to the initiation of services.

Obtain authorization within *three business days* of providing the service by calling TMHP Home Health Services, or faxing the Title XIX form to Home Health Services. A determination will be made as to whether the equipment will be rented, purchased, repaired, modified, or denied based on the client's medical necessity.

To facilitate a determination of medical necessity and avoid unnecessary denials when requesting prior authorization, the physician must provide correct and complete information supporting the medical necessity of the equipment and/or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client's overall health status.
- Diagnosis/condition causing the impairment resulting in a need for the equipment and/or supplies requested.

The provider must have the client sign the DME Certification and Receipt Form on page B-35 for all purchased DME for Medicaid clients before submitting a claim for payment. *The client's signature means the DME is the property of the client.* The certification form also requires the name of the item and the date the client received the DME. The DME supplier should retain this form, not submit it with the claim.

The provider must keep all Title XIX Home Health DME/Medical Supplies Physician Order Forms and Addendum to Title XIX Home Health DME/Medical Supplies Physician Order Forms on file. Providers must retain delivery slips or invoices and the DME Certification and Receipt Form documenting the item and date of delivery for all DME provided to a client and must disclose them to HHSC or its designee on request.

- The DME must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client's POC.
- These records and claims must be retained for a minimum of five years from the date of service or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

CPT only copyright 2005 American Medical Association. All rights reserved.

Note: *All purchased equipment must be new upon delivery to client. Used equipment may be utilized for lease, but when purchased, must be replaced with new equipment.*

Important: *HHSC/TMHP reserves the right to request the Title XIX Home Health DME/Medical Supplies Physician Order Form and/or Addendum to Title XIX Home Health DME/Medical Supplies Physician Order Form at any time.*

DME must meet the following requirements to qualify for reimbursement under Medicaid Home Health Services:

- The client received the equipment as prescribed by the physician.
- The equipment has been properly fitted to the client and/or meets the client's needs.
- The client, the parent or guardian of the client, and/or the primary caregiver of the client, has received training and instruction regarding the equipment's proper use and maintenance.

DME must:

- Be medically necessary due to illness or injury or to improve the functioning of a body part, as documented by the physician in the client's POC or the Title XIX form.
- Be prior authorized by TMHP Home Health Services for rental or purchase of supplies for most equipment. Some equipment does not require prior authorization. Prior authorization for equipment rental can be issued for up to six months based on diagnosis and medical necessity. If an extension is needed, requests can be made up to 60 days before the start of the new authorization period with a new Title XIX form.
- Meet the client's existing medical and treatment needs.
- Be considered safe for use in the home.
- Be provided through an enrolled DMEH provider/supplier.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP.*

DME that has been delivered to the client's home and then found to be inappropriate for the client's condition will not be eligible for an upgrade within the first six months following purchase unless there had been a significant change in the client's condition, as documented by the physician familiar with the client. All adjustments and modifications within the first six months after delivery are considered part of the purchase price.

Important: *All DME purchased for a client becomes the Medicaid client's property upon receipt of the item. This property includes equipment delivered which will not be prior authorized or reimbursed in the following instances:*

- Equipment delivered to the client before the physician signature date on the POC or Title XIX form or Addendum
- Equipment delivered more than three business days before obtaining prior authorization from TMHP Home Health Services and meets the criteria for purchase

Additional criteria:

- TMHP Home Health Services will make the final determination whether DME will be rented, purchased, or repaired based on the client's duration and use needs.
- Periodic rental payments are made only for the lesser of either the period of time the equipment is medically necessary, or when the total monthly rental payments equal the reasonable purchase cost for the equipment.
- Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.
- DME repair will be considered based on the age of the item and cost to repair it.
- A request for repair of DME must include a statement or medical information from the attending physician substantiating that the medical appliance or equipment continues to serve a specific medical purpose and an itemized estimated cost list from the vendor or DME provider of the repairs. Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.
- If a DME/medical supply provider is unable to deliver an authorized piece of equipment or supply, the provider should allow the client the option of obtaining the equipment or supplies from another provider.

Items and/or services addressed are reimbursed at a maximum fee determined by HHSC. If an item is manually priced, the MSRP must be submitted for consideration of rental or purchase with the appropriate procedure codes. Purchases and rentals are reimbursed at the MSRP minus a discount as determined by HHSC.

DME is anticipated to last a minimum of five years and may be considered for replacement when five years have passed and the equipment is no longer functional and repairable. The DME may then be considered for prior authorization. Replacement of equipment will be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate, with the measures to be taken to prevent reoccurrence, must be submitted.

Replacement, adjustments, modifications, or repairs will not be authorized in situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver. A referral to the Department of State Health Services (DSHS) Medical Case Management Unit will be made by TMHP Home Health Services (or CCP unit, where appropriate) for clients younger than 21 years of age. Providers will be notified that the state will be monitoring this client's services.

Prior authorization is required for replacement. Replacement will be considered in at least one of the following situations:

- After the maximum limitation time has elapsed and the DME is no longer functional and/or repairable
- When irreparable damage has occurred

CPT only copyright 2005 American Medical Association. All rights reserved.

Documentation, which must accompany a request, includes a statement from the prescribing physician, which includes:

- A copy of the fire or police report
- The cause of the loss or damage and what measures will be taken to prevent reoccurrence

Important: *Those who supply DME equipment and supplies to Medicaid Managed Care clients must obtain a prior authorization form. Services and supplies for STAR+PLUS Medicaid Qualified Medicare Beneficiary (MQMB) clients should be billed to Medicare first. If denied, submit them to TMHP to consider. The STAR+PLUS health plan is not responsible for these services.*

Cancelling an authorization

The client has the right to choose his DME/medical supply provider and change providers. If the client changes providers, TMHP must receive a change of provider letter with a new Title XIX form. The client must sign and date the letter, which must include the name of the previous provider and the effective date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Title XIX form.

Repairs

Repairs will not be authorized in situations where the equipment has been abused or neglected by the patient, patient's family, or caregiver.

Routine maintenance of rental equipment is the provider's responsibility.

For clients requiring wheelchair repairs only, the date last seen by physician does not need to be filled in on the Title XIX Home Health DME/Medical Supplies Physician Order Form.

Covered medical equipment (rental, purchase, or repairs) includes, but is not limited to:

- Manual or powered wheelchairs: *noncustomized,* including medically justified seating, supports, and equipment, or *customized,* specifically tailored or individualized, wheelchairs, including appropriate medically justified seating, supports, and equipment not to exceed an amount specified by HHSC

Example: *If a wheelchair is requested, the provider should define additional items needed, such as foot rests or crutch holders, removable arms, or special attachments.*

- Canes, crutches, walkers, and trapeze bars
- Bed pans, urinals, bedside commode chairs, elevated commode seats, bath chairs/benches/seats, and bath tub rails that are not wall-mounted
- Electric and nonelectric hospital beds, mattresses, and bed-side rails
- Air flotation or air pressure mattresses and cushions
- Reasonable and appropriate appliances for measuring blood pressure and blood glucose suitable to the client's medical situation to include replacement parts and supplies
- Freestanding lifts for assisting the client to ambulate within their residence or to transfer the client from one piece of equipment to another
- Pumps for feeding tubes and IV administration
- Respiratory or oxygen-related equipment

Payment may be authorized for repair of purchased DME. Maintenance of rental equipment (including repairs) is the supplier's responsibility. The toll-free number for TMHP Home Health Services is 1-800-925-8957. Requests for repairs must include the cost estimate, reasons for repairs, age of equipment, and serial number.

Refer to: "Physician Supervision—Plan of Care" on page 24-7.

"DME Certification and Receipt Form" on page B-35.

"Home Health Services Plan of Care (POC)" on page B-49.

"Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions (2 Pages)" on page B-44 and *Addendum to* "Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form" on page B-46.

"Procedure Codes Removed From Prior Authorization" on page 24-56 for equipment that does not require prior authorization.

"Provider Enrollment" on page 1-2.

24.5.12 Augmentative Communication Device (ACD) System

Augmentative communication device (ACD) systems are a benefit of Texas Medicaid Home Health and require prior authorization. ACD systems for clients younger than 21 years of age who do not meet the criteria for home health services may be considered under THSteps-CCP.

Refer to: "ACD Procedure Codes and Limitations" on page 24-31 for more information.

24.5.12.1 ACD Systems

An ACD system, also known as an augmentative and alternative communication (AAC) device system, allows a client with expressive speech-language disorder to meet their functional speech-language needs. An ACD system electronically represents vocabulary or ideas and expresses messages. For the purpose of this policy, the term "ACD system" refers to the ACD and all medically necessary components and accessories.

An ACD system is a benefit of Texas Medicaid and may be considered for prior authorization as a Texas Medicaid (Title XIX) Home Health Services benefit when the following home health services eligibility criteria are met:

CPT only copyright 2005 American Medical Association. All rights reserved.

- The documentation submitted with the request supports the determination of medical necessity based on the criteria listed in the policy.
- Federal financial participation must be available.
- The requested equipment or supplies must be safe for use in the home.

Note: *ACD systems for clients under 21 years of age who do not meet the criteria for home health services may be considered under the THSteps-CCP Program.*

24.5.12.2 Prior Authorization and Required Documentation

Prior authorization is required for rental or purchase of an ACD system provided through Texas Medicaid (Title XIX) Home Health Services. To obtain prior authorization, the following documentation must be submitted:

Before requesting prior authorization, a completed Title XIX Home Health DME/Medical Supplies Physician Order Form (Title XIX form), prescribing the DME and /or accessories must be signed and dated by a physician familiar with the client. All signatures must be original, unaltered, and handwritten. Computerized or stamped signatures will not be accepted. The date of the Title XIX form can be no more than three months before the service start date. The completed Title XIX form must include the procedure codes and quantities for services requested and must be maintained by the DME provider and the prescribing physician in the client's medical record.

- To facilitate a determination of medical necessity and avoid unnecessary denials when requesting prior authorization for an ACD system, the physician must provide correct and complete information supporting the medical necessity of the equipment and/or supplies requested, including:
  - Diagnosis/condition causing impairment of communication
  - Accurate diagnostic information pertaining to any other medical diagnoses/conditions, to include the client's overall health status

The formal written ACD system evaluation completed, signed, and dated by a speech-language pathologist (SLP), which contains all of the following information:

- Medical status/condition and medical diagnoses underlying the client's expressive speech-language disorder that gives rise to the need for an ACD system
- Current expressive speech-language disorder, including the type, severity, anticipated course of the disorder, and present language skills
- A description of the practical limitations of the client's current aided and unaided modes of communication
- Other forms of therapy/intervention that have been considered and ruled out
- The rationale for the recommended ACD system and each accessory, including a statement as to why the recommended device is the most appropriate, least costly alternative for the client and how the recommended system will benefit the client
- Documentation that the client possesses the cognitive and physical abilities to use the recommended system
- A comprehensive description of how the ACD system will be integrated into the client's everyday life, including home, school, or work
- A treatment plan that includes training in the basic operation of the recommended ACD system necessary to ensure optimal use by the client and, if appropriate, the client's caregiver, and a therapy schedule for the client to gain proficiency in using the ACD system
- A description of the client's speech-language goals and how the recommended ACD system will assist the client in achieving these goals
- A description of the anticipated changes, modifications or upgrades of the ACD system necessary to meet the client's short and long term speech-language needs
- Identification of the assistance/support needed by, and available to, the client to use and maintain the ACD system
- A statement that the SLP is financially independent of the ACD system manufacturer/vendor

Note: *Texas Medicaid may request additional information to clarify or complete a request for an ACD system and accessories.*

The SLP evaluation must be dated before the date on the physician's prescription (Title XIX form).

An ACD system is expected to serve the client's needs for an extended period of time. *Refer to "Replacement" on page 24-31 for additional information.*

24.5.12.3 Procedure Codes for ACD Systems and Accessories

ACDs and Access Devices

A digitized speech device, sometimes referred to as a "whole message" speech output device, utilizes words or phrases that have been recorded by someone other than the ACD system user for playback upon command of the ACD system user. A digitized speech device is identified with one of the procedure codes J/L-E2500, J/L-E2502, J/L-E2504, and J/L-E2506.

A synthesized speech device is a technology that translates a user's input into device-generated speech using algorithms representing linguistic rules. Users of synthesized speech ACD systems are not limited to pre-recorded messages, but can independently create messages as their communication needs dictate.

Synthesized speech devices that produce messages primarily by spelling and require the user to make physical contact with a keyboard, touch screen, or other display are identified with the procedure code J/L-E2508.

CPT only copyright 2005 American Medical Association. All rights reserved.

Other synthesized devices allow multiple methods of message formulation through letters, words, pictures, or symbols. Such devices also allow for multiple methods of access including direct physical contact with a keyboard or touch screen; and one or more tools that aid in direct selection, including joystick, head mouse, infrared and light pointers, scanning device or morse code. These synthesized speech devices are reimbursed with procedure code J/L-E2510.

Items included in the reimbursement for an ACD system and not reimbursed separately include, but are not limited to, the following:

- ACD
- Basic essential software (except for software purchased specifically to enable a client owned computer or personal digital assistant (PDA) to function as an ACD system)
- Batteries
- Battery charger, power supplies, A/C, and/or other adapters
- Interface cables
- Adequate memory to allow for system expansion within a five year time frame
- All basic operational training necessary to instruct the client and family/caregiver(s) in the use of the ACD system
- Manufacturer's warranty
- Computer software that enables a client-owned personal laptop or desktop computer (PC) or PDA to function as an ACD system may be covered as an ACD system.
    - Requests for ACD software may be considered for prior authorization if the software is more cost effective than an ACD system.
    - If an ACD system is more cost-effective than adapting the client owned laptop PC or PDA, an ACD system will be considered for prior authorization instead of the ACD software.
    - If software is purchased, installation of the program and technical support are included in the reimbursement for the software. Rental of ACD system software is not a benefit. Speech generating software is identified with procedure code J/L-E2511.

Note: *Either an ACD system or ACD software for a client-owned laptop or desktop PC or PDA may be authorized, but not both.*

24.5.12.4 ACD System Accessories

Accessories for rental or purchase are a benefit of Texas Medicaid (Title XIX) Home Health Services if the criteria for ACD system authorization are met *and* the medical necessity of *each* accessory is clearly documented in the SLP written evaluation.

All accessories necessary for proper use of an ACD system, including those necessary for the potential growth/expansion of the ACD system (such as a memory card), should be included in the initial prescription/Title XIX for purchase.

The following accessories may be considered for reimbursement using procedure code J/L-E2599. if the criteria for ACD system authorization are met *and* the medical necessity for *each* accessory is clearly documented in the written evaluation:

- Access devices for an ACD system include, but are not limited to, devices that enable selection of letters, words or symbols via direct selection or tools that aid in direct selection techniques such as optical head pointers, joysticks, and ACD scanning devices
- Gross motor access devices, such as switches and buttons, may be considered for clients with poor head and hand control
- Fine motor, head control access devices, such as laser or infrared pointers, may be considered for clients with poor hand control and good head control
- Moisture guard
- Extended warranty if cost beneficial

Use procedure code J/L-E2599 when billing for accessories for speech generating devices.

Mounting systems are devices necessary to place the ACD system, switches and other access devices within the reach of the client. Mounting devices may be considered to attach an ACD. The make, model, and purchase date of the wheelchair or table is required when requesting a wheelchair mounting device. Up to two mounting devices may be considered for prior authorization for the same client. Mounting systems are identified with procedure code J/L-E2512.

24.5.12.5 Noncovered ACD System Items

Items that are not related to the ACD system, or software components which are not necessary to operate the system, are not a benefit of the Texas Medicaid Program. These items include but are not limited to carrying case, printer, voice prosthetic, and artificial larynx.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive these services through THSteps-CCP.*

24.5.12.6 Prior Authorization

Prior authorization for an ACD system and accessories (rental or purchase) must be requested using the information that follows:

- Medical diagnosis and how it relates to the client's communication needs
- Any significant medical information pertinent to ACD system use
- Limitations of client's current communication abilities/system/devices

CPT only copyright 2005 American Medical Association. All rights reserved.

- Statement as to why the prescribed ACD system is the most effective, including a comparison of benefits versus other alternatives
- Complete description of the ACD system with all accessories, components, mounting devices, and/or modifications necessary for client use (must include manufacturer's name, model number, and retail price)
- Documentation that the client is mentally, emotionally, and physically capable of operating the device
- An evaluation and assessment must be conducted by a licensed speech-language pathologist in conjunction with other disciplines, such as physical or occupational therapies. The prescribing physician should base the prescription on the professional evaluation and assessment

The prior authorization request must the include specifications for the ACD system, all component accessories necessary for the proper use of the ACD, and all necessary therapies and/or training. It is recommended that the preliminary evaluation for an ACD system include the involvement of an occupational therapist and/or physical therapist to address the client's seating/postural needs and the motor skills required to utilize the ACD system. An evaluation and assessment by a licensed speech-language pathologist must include the following information:

- Communication status and limitations
- Speech and language skills assessment that includes the prognosis for speech and/or written communication
- Cognitive readiness
- Interactional/behavioral and social abilities
- Capabilities—including intellectual, postural, sensory (visual and auditory), and physical status
- Motivation to communicate
- Residential, vocational, and educational setting
- Alternative ACD system considered with comparison of capabilities
- How the ACD system will be implemented and integrated into environments
- Ability to meet projected communication needs—growth potential and how long it will meet the client's needs
- Anticipated changes, modifications, or upgrades with projected time frames (short and long term)
- Training plan—who, what, when, where

24.5.12.7 Trial Period/Rental/Purchase

In order to ensure and ascertain that the client's needs are met in the most cost effective manner, an ACD system will not routinely be prior authorized for purchase until the client has completed a 30-day trial period that included experience with the requested system. Prior authorization may be provided for rental during this trial period. All components, such as access devices, mounting devices and lap trays necessary for use, must be evaluated during this trial period.

In the situation where an ACD system is not available for rental, purchase can be considered with documentation that the client has had experience with the requested system at school or in another setting.

A trial period is not required when replacing an existing ACD system unless the client's needs have changed and another ACD system or access device is being considered.

To obtain prior authorization for ACD system rental, all of the following documentation must be submitted:

- A formal written evaluation completed by an SLP.
- A Title XIX Home Health DME/Medical Supplies Physician Order Form (Title XIX form) listing the prescribed ACD system, access device and accessories such as a mounting device, must be completed, signed, and dated by the physician.

Purchase

Purchase of an ACD system may be considered for prior authorization when all of the following ACD system criteria are met:

- A formal written evaluation/re-evaluation must be completed by an SLP before requesting an ACD system purchase. The evaluation/re-evaluation must include documentation that the client has had sufficient experience with the requested ACD system through trial/rental, school, or another setting.
- A Title XIX Home Health DME/Medical Supplies Physician Order Form (Title XIX form) listing the prescribed ACD system, access device and accessories such as a mounting device, must be completed, signed and dated by the physician.

24.5.12.8 DME Certification

The DME certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the date the client received the DME, the item(s) name, and the signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client's record.

24.5.12.9 Reimbursement

Items and/or services addressed in this section are either reimbursed at a maximum fee determined by HHSC or through manual pricing. If an item is manually priced, the MSRP must be submitted for consideration of rental or purchase with the appropriate procedure codes. Purchases are reimbursed at MSRP minus a discount as determined by HHSC.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.12.10 Non-Warranty Repairs

Non-warranty repairs of an ACD system may be considered for prior authorization with documentation from the manufacturer explaining why the repair is not covered by the warranty. A request for prior authorization of ACD system repair(s) not covered by warranty must be submitted with the following procedure codes. Use procedure code 9-E1340 and J-E1399 for replacement parts.

24.5.12.11 Replacement

An ACD system is anticipated to last a minimum of five years.

- A formal written evaluation completed by an SLP is required for replacement.
- When appropriate, a copy of the police or fire report, with the measures to be taken to prevent reoccurrence, must be submitted.
- In situations where the equipment has been abused or neglected by the client, the client's family, or the caregivers, the Home Health Services Prior Authorization Unit will make a referral to the DSHS THSteps Case Management Program for clients under 21 years of age. The provider will be notified that the state will be monitoring this client's services to evaluate the safety of the environment for both the client and equipment.

Prior authorization for replacement may be considered within five years or more from the purchase date or when the ACD system is no longer functional, and either cannot be repaired or it is not cost effective to repair.

Prior authorization for replacement may be considered with five years of purchase when there has been a significant change in the client's condition such that the current device no longer meets the client's communication needs or the ACD system is no longer functional and either cannot be repaired or it is not cost effective to repair.

Note: *ACD system replacements for clients under 21 years of age that do not meet the criteria in this section may be considered through THSteps-CCP.*

24.5.12.12 ACD Procedure Codes and Limitations

Procedure Code	Maximum Limitation
9-E1340	As needed, with documentation of warranty coverage
J-E2500	1 per 5 years
J-E2502	1 per 5 years
J-E2504	1 per 5 years
J-E2506	1 per 5 years
J-E2508	1 per 5 years
J-E2510	1 per 5 years
J-E2511	1 per 5 years
J-E2512	1 per 5 years
J-E2599	As needed, with documentation of warranty coverage
L-E2500	1 per month
L-E2502	1 per month
L-E2504	1 per month
L-E2506	1 per month
L-E2508	1 per month
L-E2510	1 per month
L-E2511	1 per month
L-E2512	1 per month
L-E2599	1 per 5 years

24.5.13 Bath and Bathroom Equipment

Bath and bathroom equipment is DME that is included in a treatment protocol, serves as a therapeutic agent for life and health maintenance, and is required to treat an identified medical condition. Bath and bathroom equipment may be considered for reimbursement for those clients who have physical limitations that require assistive equipment for bathing, showering, or bathroom use.

Note: *THSteps eligible clients who qualify for medically necessary services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit may be considered under the Texas Health Steps- Comprehensive Care Program (THSteps-CCP).*

The following criteria must be met to qualify for Title XIX Home Health Services:

- The client must be eligible for home health benefits
- The criteria listed in this policy for the requested supplies/equipment must be met
- Federal financial participation must be available
- The requested equipment must be safe to use in the home

DME covered by Texas Medicaid must have either a well-established history of efficacy or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a covered medical condition or functional disability.

Bath seats are not considered for children younger than one year of age or weighing less than 30 pounds. Authorization is required for all bath and bathroom equipment and related supplies, including any accessories, modifications, adjustments, replacements and repairs to the equipment. The bath and bathroom equipment must be able to accommodate a 20 percent change in the client's height and weight. To request prior authorization for bath or bathroom equipment, the following documentation must be provided:

- Accurate diagnosis/condition information which pertains to the underlying diagnosis/condition and any other medical diagnoses/conditions. The diagnosis

CPT only copyright 2005 American Medical Association. All rights reserved.

information should include the client's overall health status, other medical needs, developmental level, functional mobility of the client, and an explanation of why regular bath or bathroom equipment does not meet the client's needs
- The age, height, and weight of the client
- Assessment of the client's home to ensure the requested equipment can be safely accommodated
- Anticipated changes in the client's needs to include anticipated modifications or accessory needs, as well as the growth potential of any custom shower/bath equipment

Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

Hand-Held Shower Wand

Hand-held shower with attachments will only be authorized if other bath/shower equipment authorization criteria have been met and a shower chair/tub transfer bench has been authorized, or if the client currently owns this equipment. Prior authorization of a handheld shower includes all attachments and accessories. Providers must use procedure code J-E1399 to bill a hand-held shower or shower wand.

Bath/Shower Chairs

Bath/shower chairs may be considered for those clients who cannot safely use a regular bath tub or shower. Bath/shower chairs, tub stool/benches and tub transfer benches are grouped into three levels of design to assist the client based on their physical condition and mobility status.

Level 1 Group

A level 1 bath/shower chair is defined as stationary equipment.

Level 1 devices may be considered if the client meets either of the following two criteria:

- Is unable to stand independently or is unstable while standing
- Is unable to independently enter or exit the shower/tub due to limited functional use of the upper or lower extremities and one of the following:
    - Maintains the ability to ambulate short distances (with or without assistive device)
    - Has a condition that is defined as a short-term disability without a concomitant long-term disability (including, but not limited to postoperative status).

Level 2 Group

A level 2 device is defined as mobile equipment with or without a commode cut out. A level 2 device may be considered if the client has good upper body stability and one of the following:

- Has impaired functional ambulation, including, but not limited to lower body paralysis, osteoarthiritis
- Is nonambulatory.

The client must have a shower that is adapted for rolling equipment; ramps are not acceptable for access to showers.

Level 3 Group

A level 3 device is a custom stationary or mobile chair with or without a commode cut out. A level 3 device may be considered if the client requires trunk and/or head/neck support or positioning to accommodate conditions that include, but are not limited to, spasticity or frequent/uncontrolled seizures.

A bath/shower chair may be prior authorized for clients who meet the level 1, 2, or 3 criteria. A custom bath/shower chair may be considered for reimbursement only if the client does not also have any type of commode chair.

A level 3 custom bath/shower chair may be prior authorized only if the client does not also have any type of commode chair. The client must have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers. A tub transfer bench may be considered if the client meets the Level 1 or 2 criteria. A tub stool/bench may be prior authorized for clients who meet the level 1 criteria.

A heavy duty tub transfer bench may be considered for clients who meet the level 1 or 2 criteria and who weigh more than 200 pounds.

Bathroom Equipment

Non-fixed toilet rails, bathtub rail attachments, and raised toilet seats may be considered for prior authorization for a client who has decreased functional mobility and is unable to safely self-toilet or self-bathe without assistive equipment.

Portable Sitz Bath

A portable sitz bath, may be considered for prior authorization if the client requires any of the following:

- Cleaning, irrigation, or pain relief of a perianal wound
- Relief of pain associated with the pelvic area (hemorrhoids, bladder, vaginal infections, prostate infections, herpes, testicle disorders)
- Muscle toning for bowel and bladder incontinence

Bath Lifts

A bath lift may be considered for prior authorization if the client has:

- An inability to transfer to the bathtub/shower independently using assistive devices (including but not limited to, a cane, walker, bathtub rails)
- The client requires maximum assistance by the caregiver to transfer to the bathtub/shower
- The client's bathroom and tub/shower meet the manufacturer's recommended depth, width, and height for safe bath lift installation and operation

CPT only copyright 2005 American Medical Association. All rights reserved.

Home adaptation for use of medical equipment is not a benefit of Texas Medicaid (Title XIX) Home Health Services. The following are payable procedure codes for bath and bathroom equipment:

Procedure Code	Maximum Limitation
J-E0160	2 per year
J-E0161	2 per year
J-E0240	1 every 5 years
J-E0243	1 every 5 years
J-E0244	1 every 5 years
J-E0245	1 every 5 years
J-E0246	1 every 5 years
J-E0247	1 every 5 years
J-E0248	1 every 5 years
J-E0621	1 per year
J-E0625	1 every 5 years
J-E0630	1 every 5 years
J-E1399	As needed
L-E0161	1 every 5 years
L-E0625	1 per month

Modifications, Adjustments, and Repairs

All modifications/adjustments within the first six months after delivery are considered part of the purchase price.

Modifications to custom equipment may be prior authorized should a change occur in the client's needs, capabilities, or physical/mental status which cannot be anticipated. Documentation must include all projected changes in the clients mobility needs, the date of purchase, the serial number of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months following delivery.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

Bathroom/toilet lift rentals may be prior authorized during the period of repair up to a maximum of four months per lifetime per client.

Routine maintenance of rental equipment is the provider's responsibility.

24.5.14 Blood Pressure Devices

Blood pressure devices are a payable benefit of Texas Medicaid (Title XIX) Home Health Services when:

- Medically necessary and appropriate
- Prescribed by a physician
- The client has one of the following covered diagnoses: essential or secondary hypertension, hypertensive heart disease, hypertensive renal disease, chronic pulmonary heart disease, heart failure, nephritis or nephropathy, acute renal failure, or hypertension complicating pregnancy, childbirth, and the puerperium. When billing for these devices use procedure codes 9-A4660 and 9-A4670

If the client is not eligible for home health services, blood pressure devices may be provided under THSteps-CCP for clients younger than 21 years of age.

Prior authorization is required for blood pressure devices. Electronic blood pressure devices are not a benefit through Texas Medicaid (Title XIX) Home Health Services. Rental of electronic blood pressure devices may be prior authorized through THSteps-CCP for clients *younger than 12 months of age.*

Refer to: "Electronic Blood Pressure Monitoring Device" on page 43-46 for more information.

24.5.15 Breast Pumps

Breast pumps, procedure codes J-E0602 and J-E0603, are payable for mothers or their infants.

Breast pumps must be:

- Prior authorized through TMHP Home Health Services
- Purchased only
- Limited to once every three years

A manual breast pump may be considered for purchase only with the appropriate documentation supporting medical necessity.

An electric breast pump may be considered for purchase only with appropriate documentation supporting medical necessity and an explanation of why a manual breast pump was not effective. Supporting documentation may include an evaluation from a lactation consultant or RN, such as an experienced perinatal nurse.

Replacement of the breast pump will be considered when loss or irreparable damage has occurred, with a copy of the police or fire report when appropriate, and with the measures to be taken to prevent reoccurrence. Replacement will not be authorized in situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver.

Procedure code J/L-E0604 is not a benefit of Texas Medicaid (Title XIX) Home Health Services.

Note: *Breast pumps are also available through the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).*

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.16 Continuous Passive Motion (CPM) Device

A continuous passive motion (CPM) device may be considered for prior authorization through Title XIX Home Health Services. Reimbursement for a CPM device is considered after joint surgery, such as knee replacement, when prescribed by a physician and submitted with clinical documentation of medical necessity/appropriateness.

A CPM device is reimbursed on a daily basis and is limited to once per day. Reimbursement includes delivery, set-up and all supplies. Use procedure code L-E0935 when billing for a CPM machine.

Note: *THSteps eligible clients who qualify for medically necessary services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit may be considered under the THSteps-CCP.*

24.5.17 Elastomeric Devices

Elastomeric devices are a payable benefit of Texas Medicaid (Title XIX) Home Health Services when prescribed by a physician, supported with documentation of medical necessity and appropriateness, and required for short-term medication administration only.

When billing for these devices use procedure code E1399.

Note: *Elastomeric devices for clients under 21 years of age who do not meet criteria for Title XIX Home Health Services may be considered under THSteps-CCP.*

24.5.18 Home Phototherapy Devices

Home phototherapy is an all-inclusive service. Any laboratory and/or nursing services required are included in the reimbursement for the home phototherapy. Home phototherapy must be prior authorized under a provider identifier enrolled as a DME supplier. When billing for home phototherapy, use procedure code L-E0202. Home phototherapy is reimbursed on a daily basis and is limited to once per day. Reimbursement for therapeutic home phototherapy is considered for infants with hyperbilirubinemia who are older than 24 hours of age when the home phototherapy is prescribed by a physician and clinical documentation supports medical necessity/appropriateness.

Authorization is required and providers must maintain documentation of medical necessity, including:

- For clients 24 hours of age to 7 days of age:
    - Onset of jaundice more than 24 hours of age but less than 7 days of age
    - Serum bilirubin 12-20 mg/dL (170-340 umol/L)
- For clients more than 7 days old, the medical director or designee must review the request for prior authorization:
    - Total and direct bilirubin levels before initiation of phototherapy, at 7 days and any serial bilirubins done during therapy
    - Serum bilirubin of 17-20 mg/dL (290-340 umol/L)
    - Type of feeding, whether formula or breast milk
    - Physician's POC for intervention after 7 days

Note: *THSteps eligible clients who qualify for medically necessary services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit may be considered under THSteps-CCP.*

Refer to: Section 24.3.1, "Eligibility."

24.5.19 Hospital Beds

Requests for a hospital bed must include a Title XIX Home Health DME/Medical Supplies Physician Order Form including client height and weight. Include documentation of the following:

- The client's medical need
- The client's condition and functional level
- Growth potential of equipment if applicable
- Necessity of hospital bed versus current bed
- Necessity of manual bed versus electric bed
- Manufacturer's product information and MSRP

Note: *If the client is not eligible for home health services, hospital beds may be provided under THSteps-CCP for clients younger than 21 years of age.*

Hospital beds require prior authorization.

Hospital beds may be considered for those clients who cannot safely use a regular bed. To request prior authorization for a hospital bed, the following documentation must be submitted:

- Accurate diagnostic information pertaining to the underlying medical diagnoses/conditions (e.g., gastrostomy feeding, suctioning, ventilator dependent, other respiratory equipment/ventilation assistance devices) to include the client's overall health status
- The client's height and weight
- The client's condition and functional mobility status
- The client's use of any pressure-reducing support surfaces, if applicable

A hospital bed without side rails and/or mattress is not a benefit of Texas Medicaid (Title XIX) Home Health Services. Side rails or mattresses may be considered for reimbursement for replacement only. A replacement mattress or side rails may be considered if a client's condition requires a replacement of an innerspring mattress or side rails and it is a patient-owned hospital bed.

The following types of hospital beds are addressed in this policy:

- A fixed height hospital bed with manual head and leg elevation adjustments but no height adjustment
- A variable height hospital bed with manual head and leg elevation adjustments and manual height adjustment
- A semielectric bed with manual height adjustment and with electric head and leg elevation adjustments

CPT only copyright 2005 American Medical Association. All rights reserved.

- A full electric bed has an electric head and leg adjustment, plus electric height adjustment
- Heavy-duty hospital beds:
  - A heavy-duty, extra wide hospital bed is capable of supporting a patient who weighs more than 350 pounds, but no more than 600 pounds *or*
  - A extra heavy-duty, extra wide hospital bed is capable of supporting a patient who weighs more than 600 pounds

A hospital bed is not one that is typically sold as furniture. A home furniture bed may consist of a frame, box spring and mattress. It is a fixed height and has no head or leg elevation adjustments.

A fixed height bed may be considered for reimbursement when the following criterion is met:

- The patient requires the head of the bed to be elevated more than 30 degrees most of the time due to conditions such as congestive heart failure, chronic pulmonary disease, or problems with aspiration. Pillows or wedges must have been used and found to be ineffective.

Use procedure code J/L-E0250.

A variable height hospital bed may be considered for reimbursement if the patient meets the criteria for a fixed height hospital bed and requires a bed height different than a fixed height hospital bed to permit transfers to chair, wheelchair or standing position.

Use procedure code J/L-E0255.

A semi-electric hospital bed may be considered for reimbursement if the patient meets the criteria for a variable height bed and requires frequent changes in body position and/or has an immediate need for a change in body position.

Use procedure code J/L-E0260.

A fully electric bed may be considered if the manufacturer's product information and MSRP for manually priced items documentation is included for clients who cannot function without a fully electric bed. A fully electric bed may be considered for reimbursement if found to increase the client's ability to self-care and will not be authorized for the convenience of the care giver.

Use procedure code J/L-E0265.

A heavy-duty, extra wide hospital bed is capable of supporting a patient who weighs more than 350 pounds, but no more than 600 pounds. An extra heavy-duty, extra wide hospital bed is capable of supporting a patient who weighs more than 600 pounds. These beds may be considered for reimbursement if the client meets the criteria for one of the other hospital beds and whose weight meets the description of a heavy-duty hospital bed.

Use procedure codes J/L-E0303 and J/L-E0304.

Accessories

All accessories must be prior authorized.

A trapeze bar attached to a bed (J/L-E0910 or J/L-E0911) may be considered for reimbursement if the client needs this device to sit up, to change body position, for other medical reasons, or to get in or out of bed.

Free standing trapeze equipment (J/L-E0912 or J/L-E0940) may be considered for reimbursement if the patient does not have a covered hospital bed but the patient needs this device to sit up to change body position for other medical reasons, or to get in or out of bed.

An over-bed table (J/L-E0315) may be considered for reimbursement if client is bed bound and needs the equipment for treatments.

A safety enclosure (J/L-E0316) used to prevent a patient from leaving the bed is not a benefit of the Texas Medicaid (Title XIX) Home Health Services.

Traction equipment, such as procedure codes J/L-E0890, J/L-E0947, and J/L-E0948, (excluding procedure codes J/L-E0910 and J/L-E0940 trapeze devices) are not a benefit of Texas Medicaid (Title XIX) Home Health Services.

Pressure-Reducing Support Surfaces

Pressure-reducing support surfaces must be prior authorized.

A pressure-reducing support surface includes three separate groups of mattress/mattress-like equipment designed to assist in the healing of wounds. These devices are used in conjunction with conventional wound care therapy and/or to prevent the occurrence of said wounds in susceptible clients. Pressure-reducing support surfaces are designed to prevent skin breakdown or promote the healing of pressure ulcers by reducing or eliminating tissue interface pressure. Most of these devices reduce interface pressure by conforming to the contours of the body so that pressure is distributed over a larger surface area rather than concentrated on a more circumscribed location.

Pressure-reducing support surfaces are a benefit of Texas Medicaid (Title XIX) Home Health Services on a case-by-case basis. To request prior authorization for a pressure-reducing support surface the following documentation must be provided:

- Client's overall health status and all other medical diagnosis/condition (e.g., history of decubitus)
- Documentation of the client's limited mobility or confinement to a bed
- Previous use of pressure-reducing support surfaces with client outcome, (e.g., wound improvement, stasis, or degradation)
- Current wound therapy if any
- Wound measurements to include location, length, width, depth, any undermining and/or tunneling, and odor if applicable

Pressure-reducing support surfaces containing multiple components are categorized according to the clinically predominant component (usually the topmost layer of a multilayer product).

A support surface that does not meet the characteristics specified in the pressure-reducing support surface policy may be denied as not medically necessary.

CPT only copyright 2005 American Medical Association. All rights reserved.

Texas Medicaid (Title XIX) Home Health Services will only cover alternating air mattresses and low-air-loss beds when they meet the definition of DME. Air mattresses that are not durable or made to withstand prolonged use do not meet the definition of DME.

For all types of pressure-reducing support surfaces, the support surface provided for the client should be one in which the client does not *bottom out*. The Centers for Medicare & Medicaid Services (CMS) defines "bottoming out" as when an outstretched hand, palm up, between the undersurface of the overlay or mattress and in an area under the bony prominence can readily palpate the bony prominence (coccyx or lateral trochanter). This bottoming out criterion should be tested with the client in the supine position with their head flat, in the supine position with their head slightly elevated (no more than 30 degrees), and in the sidelying position.

24.5.19.1 Criteria for Grouping Levels

Group 1 Support Surface

Group 1 Support Surface may be considered if the client is completely immobile without assistance, *or* either of the following first two criteria:

- The client has limited mobility, *or*
- The client has an existing pressure ulcer on the pelvis or trunk, *and*

And at least one of these four criteria:

- Impaired nutritional status
- Fecal or urinary incontinence
- Altered sensory perception
- Compromised circulatory status

Group 2 Support Surface

A Group 2 support surface may be considered if the client has limited mobility.

The client must meet both of the following criteria:

- Multiple stage II ulcers on the trunk or pelvis
- Has been on a comprehensive ulcer treatment program for at least the past month which has included the use of a Group 1 support surface

The client must also have at least one of the following:

- The ulcers have remained the same or worsened over the past month
- There are large or multiple stage III or IV pressure ulcers on the trunk or pelvis
- A myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis within the last 60 days, and have been on a Group 2 or 3 support surface immediately before discharge from the hospital or a nursing facility (discharge within the past 30 days)

Group 3 Support Surface

A Group 3 support surface may be considered if *all* the following criteria are met:

- Presence of a stage III or IV ulcer.
- Severely limited mobility rendering the client bed or chair bound.
- Without an air-fluidized bed, the client would be institutionalized.
- The client has been placed on a Group 2 support surface for at least a month before ordering the air-fluidized bed with the ulcer(s) not improving or worsening.
- There has been at least weekly assessment of the wound by the physician, a nurse or other licensed health care professional and the treating physician has done a comprehensive evaluation of the client's condition within the week before ordering the air-fluidized bed.
- A trained adult caregiver is available to assist the client with activities of daily living, maintaining fluid balance, supplying dietary needs, aiding in repositioning and skin care, administering prescribed treatments, recognizing and managing altered mental status, and managing the air-fluidized bed system and its potential problems, such as leakage.
- The physician continues to reevaluate and direct the home treatment regimen monthly.
- All other alternative equipment has been considered and ruled out.

The existence of any one of the following conditions may result in noncoverage of the air-fluidized bed:

- Coexisting pulmonary disease (the lack of firm back support can render coughing ineffective and dry air inhalation thickens pulmonary secretions.
- Wounds requiring moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material (if wet-to-dry dressings are being utilized, dressing changes must be frequent enough to maintain their effectiveness).
- The caregiver is unwilling or unable to provide the type of care required by the client on an air-fluidized bed.
- The home's structural support or electrical system cannot safely accommodate the air-fluidized bed.

The groups for pressure-reducing support surfaces used in this policy are defined as follows.

24.5.19.2 Group 1 Support Surfaces

Each of the support surfaces described below are covered when medical necessity criteria for Group 1 support surfaces are met.

Pressure pads for mattresses/nonpowered pressure-reducing mattress overlays are designed to be placed on top of a standard hospital or home mattress. Pressure pads/nonpowered pressure-reducing mattress overlays for mattresses with the following features may be considered for reimbursement with documentation of medically necessity:

- A gel or gel-like layer with a height of two inches or greater

CPT only copyright 2005 American Medical Association. All rights reserved.

- An air mattress overlay with interconnected air cells that are inflated with an air pump and a cell height of three inches or greater
- A water mattress overlay with a filled height of three inches or greater
- A foam mattress overlay with *all* the following features:
  - Base thickness of two inches or greater and peak height of three inches or greater if it is a convoluted overlay (e.g., eggcrate) or an overall height of at least three inches if it is a nonconvoluted overlay
  - Foam with a density and other qualities that provide adequate pressure reduction
  - Durable, waterproof cover

Nonpowered pressure-reducing mattresses are designed to be placed directly on a hospital bed frame. Nonpowered pressure-reducing mattresses, with the following features, may be considered for reimbursement with documentation supporting medical necessity:

- A foam mattress with *all* the following features is covered:
  - A foam height of five inches or greater
  - Foam with a density and other qualities that provide adequate pressure reduction
  - Durable, waterproof cover
  - Can be placed directly on a hospital bed frame

An air, water, or gel mattress is designed to be placed directly on a hospital bed frame. An air, water or gel mattress with *all* the following features may be considered for reimbursement:

- A height of five inches or greater
- Durable, waterproof cover

Powered pressure reducing mattress overlay systems (alternating pressure or low air loss) are designed to be placed on top of a standard hospital or home mattress. A powered pressure reducing mattress overlay system, with *all* the following features, may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of air cells, or a low interface pressure throughout the overlay.
- Inflated cell height of the air cells through which air is being circulated is 2.5 inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure provide adequate patient lift, reduces pressure, and prevents bottoming out.

24.5.19.3 Group 2 Support Surfaces

Each of the support surfaces described below are covered when medical necessity criteria for Group 2 support surfaces are met.

Powered pressure-reducing mattress (alternating pressure low air loss, or powered flotation without air loss) is designed to be placed directly on a hospital bed frame. This device with *all* the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the mattress.
- Inflated cell height of the air cells through which air is being circulated is five inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure mattress), and air pressure to provide adequate patient lift, reduce pressure, and prevent bottoming out.
- A surface designed to reduce friction and shear.

A semi-electric hospital bed with fully integrated powered pressure-reducing mattress that has all of the features described above may be considered for reimbursement when documentation supports medical necessity.

An advanced nonpowered pressure-reducing mattress overlay is designed to be placed on top of a standard hospital or home mattress. This device, with *all* the following features, may be considered for reimbursement when documentation supports medical necessity.

- Height and design of individual cells which provide significantly more pressure reduction than Group 1 overlay and prevent bottoming out.
- Total height of five inches or greater.
- A surface designed to reduce friction and shear.
- The manufacture product information substantiates that the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces.

A powered pressure-reducing mattress overlay (low air loss, powered flotation without low air loss, or alternating pressure) is designed to be placed on top of a standard hospital or home mattress designed to reduce friction and shear. This device, with *all* the following features, may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the overlay.
- Inflated cell height of the air cells through which air is being circulated is 3.5 inches or greater.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure to provide adequate patient lift, reduce pressure and prevent bottoming out.

An advanced nonpowered pressure-reducing mattress is designed to be placed directly on a hospital bed frame. This device with *all* the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells which provide significantly more pressure than a Group 1 mattress and prevent bottoming out.
- Total height of five inches or greater.
- A surface designed to reduce friction and shear.
- Documented evidence substantiates that the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces.

Sheepskin and lambs wool pads are covered under the same conditions as alternating pressure pads and mattresses (Group 2 pressure-reducing support surfaces).

24.5.19.4 Group 3 Support Surfaces

Initial prior authorization for a Group 3 pressure-reducing support surface will be for no more than 30 days. Prior authorized extensions may be considered for reimbursement in increments of 30-day periods, up to a maximum of four months, when documentation supports continued significant improvement in wound healing. Coverage beyond four months will be on a case-by-case basis after review by the medical director or designee.

An air-fluidized bed uses warm air under pressure to set small ceramic beads in motion, which simulate the movement of fluid. When the client is placed in the bed, his body weight is evenly distributed over a large surface area, which creates the sensation of floating. Air-fluidized beds may be considered for reimbursement when the medical necessity criteria for Group 3 support surfaces are met.

24.5.19.5 Decubitus Care Accessories

A bed blanket cradle (keeps bed covers from touching affected skin) may be considered for reimbursement when documentation supports medical necessity (e.g., diabetic ulcers, decubiti or burns, or gouty arthritis).

A heel or elbow protector may be considered for reimbursement when documentation supports medical necessity.

The staging of pressure ulcers used in this policy is as follows:

Stage I: Observable pressure related alteration of intact skin whose indicators are as follows:

- Compared to the adjacent or opposite area on the body may include changes in one of more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel) and/or sensation (pain, itching).
- The ulcer appears as a defined area of persistent redness in lightly pigmented skin, whereas in darker skin tones, the ulcer may appear with persistent red, blue or purple hues.

Stage II: Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater.

Stage III: Full thickness skin loss involving damage to, or necrosis of, subcutaneous tissue that may extend down to, but not through, underlying fascia. The ulcer presents clinically as a deep crater with or without undermining of adjacent tissue.

Stage IV: Full thickness skin loss with extensive destruction, tissue necrosis, or damage to muscle, bone, or supporting structures (e.g., tendon, joint capsule). Undermining and sinus tracts also may be associated with Stage IV pressure ulcers.

24.5.19.6 Hospital Beds and Equipment Procedure Code Table

24.5.20 Reflux Slings and Wedges

Texas Medicaid (Title XIX) Home Health Services may cover reflux slings or wedges for clients who are younger than 12 months of age. These may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician as medically necessary and appropriate. Reflux slings, wedges, or covers require prior authorization.

If the client is not eligible for home health services, reflux slings and wedges may be provided under THSteps-CCP.

24.5.21 Special Needs Car Seats and Travel Restraints

Special needs car seats and travel restraints are not services available under Texas Medicaid Home Health.

Refer to: "Special Needs Car Seats and Travel Restraints" on page 43-52 for details about coverage through THSteps-CCP.

24.5.22 Mobility Aids

Medical appliances and equipment including mobility aids such as canes, crutches, walkers, and wheelchairs are reimbursed to assist clients to move about in their environment.

Mobility aids are a benefit through the Title XIX Home Health Services when the following criteria are met:

- The client must be eligible for home health benefits.
- The criteria listed in this policy for the requested equipment must be met.
- The equipment requested must be medically necessary.
- Federal financial participation must be available.
- The client's mobility status would be compromised without the requested equipment.
- The requested equipment or supplies must be safe for use in the home.

Note: *THSteps-eligible clients who have a medical need for services beyond the limits of this Texas Medicaid (Title XIX) Home Health Services benefit may be considered under THSteps-CCP.*

Refer to: Section 24.3.1, "Eligibility."

24.5.22.1 Canes, Crutches, and Walkers

Canes, crutches, and/or walkers may be prior authorized as a home health service with documentation supporting medical necessity and appropriateness of the requested item. This documentation by a physician familiar with the client must include information on the clients impaired mobility.

24.5.22.2 Feeder Seats, Floor Sitters, Corner Chairs, and Travel Chairs

Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary devices and are not a benefit of Texas Medicaid. If a child requires seating support and meets the criteria for a seating system, a stroller may be considered for reimbursement with prior authorization through THSteps-CCP or a wheelchair may be considered for reimbursement with prior authorization from TMHP Home Health Services.

24.5.22.3 Wheelchairs

A wheelchair is a professionally manufactured seating system mounted on a four- or six-wheeled base, with a combination of tires and casters especially for the use of propelling the occupant.

A wheelchair may be considered for prior authorization for short-term use or purchase as a home health service with documentation supporting the medical necessity and appropriateness of the requested item. This documentation by a physician familiar with the client must include information on the client's impaired mobility.

Assessment of the accessibility of the client's residence must be completed and included in the prior authorization documentation to ensure that the wheelchair is usable in the home such as doors and halls wide enough, no obstructions.

Manual Wheelchairs–Standard

Standard manual wheelchairs may be prior authorized for short-term rental or for purchase, if the client has a condition which does not require specialized seating, and

CPT only copyright 2005 American Medical Association. All rights reserved.

the client is unable to ambulate a minimum of 10 feet (e.g., AIDS, sickle cell anemia, fractures, chronic respiratory/cardiac diagnosis, or chemotherapy).

24.5.22.4 Seating Assessment for Manual and Power Custom Wheelchairs

To request prior authorization for a custom manual/power wheelchair, a seating assessment must be completed by a physician or a licensed physical or occupational therapist using the procedure codes 1-97001 and 1-97003.

The following documentation must be provided:

- A seating evaluation and seating measurements, performed by a physician or a licensed occupational or physical therapist, which includes specifications for exact mobility/seating equipment, all necessary accessories, and how the client and/or family will be trained in the use of the equipment.
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the wheelchair. A wheelchair must have a growth potential, which must accommodate 20 percent of height and weight changes.
- Significant medical information pertinent to mobility and requested equipment including intellectual, postural, physical, sensory (visual and auditory), and physical status. Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, as well as any recent changes in the client's physical and/or functional status, and any expected/potential surgeries that will improve or further limit mobility.
- A description of the current mobility/seating equipment, how long the client has been in the current equipment and why it no longer meets the client needs.
- Client's height, weight, and a description of where the equipment is to be used.
- Manufacturer's retail pricing information, with itemized pricing including the description of the specific base, any attached seating system components and any attached accessories.

If the wheelchair assessment form is completed by a physician, reimbursement is considered part of the physician office visit and will not be authorized using the above therapy procedure codes.

24.5.22.5 Manual Wheelchairs—Custom

Custom manual wheelchairs may be considered for reimbursement for those clients who cannot safely use a standard manual wheelchair.

24.5.22.6 Levels for Custom Manual Wheelchairs

Level 1 is a basic standard wheelchair.

Level 2 is a custom system with growth potential, including components for posture support.

Level 3 is a custom system that meets the Level 2 definition with the addition of a molded seating system, tilt and space and reclining capacities.

24.5.22.7 Power Wheelchairs—Standard

Standard power wheelchairs may be prior authorized for short-term rental use up to six months, or for purchase, if the client has a condition which does not require specialized seating, the client is unable to ambulate a minimum of 10 feet and is unable to self-propel a manual wheelchair (e.g., AIDS, sickle cell anemia, fractures, chronic respiratory/cardiac diagnosis, or chemotherapy).

Prior authorization for a standard power wheelchair requires all documentation necessary for a custom manual wheelchair, as well as the following documentation:

- The client's physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client *must* be able to operate a power wheelchair independently. The therapist must provide written documentation that the client is physically and cognitively capable of managing a power wheelchair.
- How the power wheelchair will be operated such as joystick, head pointer, puff and go.
- The capability of the caregiver/client to care for the power wheelchair and accessories.
- The capability of the client to understand how the power wheelchair operates.

Rental of a manual wheelchair may be prior authorized when the client's power wheelchair is being repaired or replaced.

24.5.22.8 Power Wheelchairs—Custom

Custom power wheelchairs may be considered for reimbursement for the client who cannot safely use a manual wheelchair, is unable to ambulate a minimum of 10 feet, is unable to self-propel a manual wheelchair (e.g., AIDS, sickle cell anemia, fractures, chronic respiratory/cardiac diagnosis, or chemotherapy), and is unable to safely use a standard power wheelchair.

Prior authorization for a custom power wheelchair requires all documentation necessary for a custom manual wheelchair, as well as the following:

- The client's physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client *must* be able to operate a power wheelchair independently. The therapist must provide written documentation that the client is physically and cognitively capable of managing a power wheelchair.
- How the power wheelchair will be operated such as joystick, head pointer, or puff and go.
- The capability of the caregiver/client to care for the power wheelchair and accessories.
- The capability of the client to understand how the power wheelchair operates.

CPT only copyright 2005 American Medical Association. All rights reserved.

An attendant control system is not a benefit of the Texas Medicaid Program. For safety, all power chairs are to include a stop switch.

Note: *Seat lift chairs, seat elevators, or mechanisms, including those used for power wheelchairs, are not a benefit of the Texas Medicaid Program.*

24.5.22.9 Levels for Power Wheelchairs

Level 1 is a basic power wheelchair.

Level 2 is a custom system with growth potential, including components for posture support.

Level 3 is a custom system with the addition of a molded seating system, tilt and space and reclining capacities. Labor for the molded seating system is limited to 15 hours or less.

Rental of a manual wheelchair may be prior authorized when the client's power wheelchair is being repaired or replaced.

24.5.22.10 Scooters

A scooter is a professionally manufactured, three or four-wheeled motorized base with a professionally manufactured basic seating system for clients who have little or no positioning needs.

Scooters may be approved for a short term rental or initial three-month trial period based on documentation supporting the medical necessity and appropriateness of the device.

Scooters may be considered for reimbursement for ambulatory impaired clients with good head, trunk and arm/hand control, without a diagnosis of progressive illness such as progressive neuromuscular diseases such as amyotrophic lateral sclerosis (ALS).

Assessment of the accessibility of the client's residence must be completed and included in the prior authorization documentation to ensure that the scooter is usable in the home such as doors and halls wide enough, no obstructions.

All scooters must have a growth potential, which must accommodate 20 percent of height and weight changes.

To request prior authorization for a scooter the client must not own or be expected to require a power wheelchair within five years of the purchase of a scooter.

All documentation required for a standard power wheelchair must be provided, along with the following documentation:

- The client's physical and cognitive ability to receive and follow instructions related to the responsibilities of using the equipment
- The ability of the client to physically and cognitively operate the scooter independently
- The capability of the client to care for the scooter and understand how it operates

Custom seating for scooters is not a benefit of Texas Medicaid (Title XIX) Home Health Services.

Repairs to scooters will be considered only for those scooters purchased by the Texas Medicaid Program.

24.5.22.11 Client Lift

A lift is a portable transfer system used to move a client from bed to chair and chair to bed.

A client lift will not be authorized for the convenience of a caregiver.

24.5.22.12 Hydraulic Lift

Prior authorization for a hydraulic lift may be considered with the following documentation:

- The client must be unable to assist in his own transfers
- The weight of the client and the weight capacity of the requested lift
- The availability of a caregiver
- Training by the provider to the client and the caregiver on the safe use of the lift

24.5.22.13 Electric Lift

Prior authorization for an electric lift may be considered with the above documentation and additional documentation addressing why a hydraulic lift will not meet the client's needs.

Barrier free lifts are not a benefit of the Texas Medicaid Program.

24.5.22.14 Standers

A stander is a device used for the client with neuromuscular conditions who is unable to stand alone. Standers and standing programs can improve digestion, increase muscle strength, decrease contractures, increase bone density, and minimize decalcification.

Standers, including all accessories, require prior authorization.

Prior authorization may be considered for the standers with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory potential
- Anticipated benefits of the equipment
- Frequency and amount of time of a standing program
- Anticipated length of time the client will require this equipment
- Client's height/weight/age
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

Standers, gait trainers, and parapodiums will not be authorized for a client within one year of each other.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.22.15 Gait Trainers

Gait trainers are devices with wheels used to train clients with ambulatory potential. They provide the same benefits as the stander, in addition to assisting with gait training.

Prior authorization for the gait trainer may be considered with the same criteria as the stander, plus documentation by the physician familiar with the client that the client has ambulatory potential and will benefit from a gait training program.

Standers, gait trainers, and parapodiums/standing frames/braces/vertical standers will not be authorized for a client within one year of each other.

24.5.22.16 Batteries and Battery Charger

A battery charger and initial batteries are included as part of the purchase of a power wheelchair.

Replacement batteries or a battery charger may be considered for reimbursement under Texas Medicaid Home Health if they are no longer under warranty.

To request prior authorization for replacement batteries or a battery charger, the provider must document the date of purchase and serial number of the currently owned wheelchair as well as the reason for the replacement batteries or battery charger.

Documentation required supporting the need to replace the batteries or battery charger must include:

- Why the batteries are no longer meeting the client's needs, and/or
- Why the battery charger is no longer meeting the client's needs.

A maximum of one hour of labor may be considered for reimbursement to install new batteries. Labor is not reimbursed with the purchase of a new power wheelchair, or with replacement battery chargers.

24.5.22.17 Accessories

Pressure support cushions for wheelchairs may be considered for prior authorization with documentation of medical necessity.

24.5.22.18 Modifications

Prior authorization may be considered for modifications to custom equipment should a change occur in the client's needs, capabilities, or physical/mental status, which cannot be anticipated. Documentation must include the following:

- All projected changes in the client's mobility needs
- The date of purchase and serial number of the current equipment, and the cost of purchasing new equipment versus modifying current equipment. All modifications within the first six months after delivery are considered part of the purchase price

24.5.22.19 Adjustments

A maximum of one hour of labor for adjustments may be considered for reimbursement through Texas Medicaid (Title XIX) Home Health Services as needed after the first six months from delivery.

All adjustments within the first six months after delivery are considered part of the purchase price.

24.5.22.20 Repairs

Repairs to client-owned equipment may be considered for reimbursement with prior authorization under Texas Medicaid (Title XIX) Home Health Services.

Technician fees are considered part of the labor cost on the repair.

Providers are responsible for maintaining documentation in the client's medical record specifying repairs.

Rentals may be considered for reimbursement during the period of repair.

Routine maintenance of rental equipment is the provider's responsibility.

24.5.22.21 Replacement

A request for replacement of equipment and/or accessories may be considered for reimbursement and must include an order from the prescribing physician familiar with the client and an assessment by a physician, licensed occupational or physical therapist with documentation supporting why the current equipment is no longer meeting the client's needs.

Replacement, adjustments, modifications and repairs will not be authorized in situations where the equipment has been abused or neglected by the client, client's family, or caregiver.

24.5.22.22 Wheelchair Ramp—Portable and Threshold

A portable ramp is defined as a ramp that is a unit able to be carried as needed to access a home. A threshold ramp provides access over elevated thresholds.

Portable wheelchair ramps, defined as weighing no more than 90 pounds and/or measuring no more than 10 feet in length, may be considered for reimbursement under Home Health Services when documentation supports medical necessity and appropriateness of equipment. One portable and/or one threshold ramp for wheelchair access to homes may be considered for prior authorization with the following documentation:

- The date of purchase and serial number of the client's wheelchair or documentation of a wheelchair request being reviewed for purchase
- Diagnosis with duration of expected need

Ramps may be considered for rental for short term disabilities.

Ramps may be considered for purchase for long term disabilities.

CPT only copyright 2005 American Medical Association. All rights reserved.

Mobility aid lifts for vehicles, and vehicle modifications are not reimbursed through Texas Medicaid.

Note: *Permanent ramps, vehicle ramps and home modifications are not a benefit of the Texas Medicaid Program.*

24.5.23 Respiratory Equipment

Respiratory equipment is defined as any device that assists a client's ventilation. Respiratory equipment and supplies may be provided in the home under Texas Medicaid (Title XIX) Home Health Services.

The following respiratory equipment requires prior authorization:

- Intermittent positive pressure breathing device
- Electrical percussor
- Intrapulmonary percussive ventilation (IPV)
- High-frequency chest wall compression system
- Cough-stimulating device
- Continuous positive airway pressure (CPAP) system
- Bi-level positive airway pressure system without backup (such as BPAP S)
- Bi-level positive airway pressure system with backup (such as BiPAP ST)
- All home mechanical ventilation equipment
- Home oxygen systems
- Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts

Note: *Respiratory equipment and related supplies that are not covered under Texas Medicaid (Title XIX) Home Health Services may be considered for reimbursement through THSteps-CCP for clients younger than 21 years of age, who are THSteps-CCP eligible (e.g., clients residing in residential treatment centers).*

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.23.1 Nebulizers

A nebulizer is a device with a compressor that delivers respiratory medications by inhalation in the form of a mist.

Medications for use with the nebulizer will not be reimbursed to a DME company. These medications may be considered under the Vendor Drug Program.

Nebulizers do *not* require prior authorization for the diagnoses listed below. Other diagnoses require prior authorization and may be considered based on review of documentation by HHSC or its designee.

Nebulizers may be reimbursed for purchase only, and that purchase is limited to one every five years.

Procedure code J-E0570 must be used for purchase of the nebulizer.

Diagnosis Code	Description
1363	Pneumocytosis
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations
4660	Acute bronchitis
46611	Acute bronchiolitis due to respiratory syncytial virus (RSV)
46619	Acute bronchiolitis due to other infec-tious organisms
4801	Pneumonia due to respiratory syncytial virus
486	Pneumonia, organism unspecified
4910	Simple chronic bronchitis
4911	Mucopurulent chronic bronchitis
49120	Obstructive chronic bronchititis, without exacerbation
49121	Obstructive chronic bronchitis, with (acute) exacerbation
4918	Other chronic bronchitis
4919	Unspecified chronic bronchitis
4920	Emphysematous bleb
4928	Other emphysema
49300	Extrinsic asthma, unspecified
49301	Extrinsic asthma with status asthmaticus
49302	Extrinsic asthma, with (acute) exacerbation
49310	Intrinsic asthma, unspecified
49311	Intrinsic asthma with status asthmaticus
49312	Intrinsic asthma, with (acute) exacerbation
49320	Chronic obstructive asthma, unspecified
49321	Chronic obstructive asthma with status asthmaticus
49322	Chronic obstructive asthma, with (acute) exacerbation
49381	Exercise induced bronchospasm
49382	Cough variant asthma
49390	Asthma, unspecified type, unspecified
49391	Asthma, unspecified type, with status asthmaticus
49392	Asthma, unspecified type, with (acute) exacerbation
4940	Bronchiectasis without acute exacerbation
4941	Bronchiectasis with acute exacerbation
4950	Farmers' lung
4951	Bagassosis
4952	Bird-fanciers' lung
4953	Suberosis
4954	Malt workers' lung
4955	Mushroom workers' lung
4956	Maple bark-strippers' lung
4957	Ventilation pneumonitis
4958	Other specified allergic alveolitis and pneumonitis
4959	Unspecified allergic alveolitis and pneumonitis
496	Chronic airway obstruction, not elsewhere classified
5070	Pneumonitis due to inhalation of food or vomitus
5071	Pneumonitis due to inhalation of oils and essences
5078	Pneumonitis due to other solids and liquids
5533	Diaphragmatic hernia without mention of obstruction or gangrene
7469	Unspecified congenital anomaly of the heart
769	Respiratory distress syndrome in newborn
7707	Chronic respiratory disease arising in the perinatal period
78609	Other
7861	Stridor

CPT only copyright 2005 American Medical Association. All rights reserved.

The following nebulizer supplies may be billed with the diagnosis codes listed above:

Procedure Codes		
9/J-A4617	9-A7003	9-A7004
9-A7006	9-A7007	9-A7011
9-A7013	9-A7015	9-A7016
9-A7018		

Ultrasonic nebulizers do not require prior authorization for the diagnoses listed below. Procedure code J-E0575 must be used when billing for the ultrasonic nebulizer.

The ultrasonic nebulizer will be reimbursed only for the following diagnosis codes:

Diagnosis Code	Description
1363	Pneumocystosis
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations

The following supplies may be billed with the ultrasonic nebulizer using procedure codes 9-A7009 and 9-A7014.

24.5.23.2 Vaporizers

The vaporizer is a machine that creates a mist, which is released into the air.

Vaporizers do *not* require prior authorization for the diagnoses listed below.

Vaporizers may be reimbursed for purchase only, and that purchase is limited to once every five years.

Procedure code J-E0605 must be used when billing for the vaporizer.

Vaporizers will be reimbursed for the following diagnoses only:

Diagnosis Code	Description
462	Acute pharyngitis
4644	Croup
4650	Acute laryngopharyngitis
4658	Acute upper respiratory infections of other multiple sites
4659	Acute upper respiratory infections of unspecified site
4660	Acute bronchitis
4661	Acute bronchiolitis
46611	Acute bronchiolitis due to respiratory syncytial virus (RSV)
46619	Acute bronchiolitis due to other infectious organisms

24.5.23.3 Humidification Units

Humidification units for nonmechanically ventilated clients will be purchased when a purchase is determined to be more cost effective than leasing the device with supplies. Use procedure code J-E1399 when billing for humidification units for nonmechanically ventilated clients. Procedure code J-E1399 will be reimbursed with a maximum fee of $1,230.00 or MSRP less 18 percent, which ever is the lesser cost. Supplies to be used with client owned humidification units will be considered for purchase and must be billed with the appropriate HCPCS code for each item requested. Documentation of medical necessity must be included with submission of the request.

24.5.23.4 Secretion Clearance Devices

Incentive Spirometer

Incentive spirometers, including electronic spirometers, are not a benefit of the Texas Medicaid (Title XIX) Home Health.

Intermittent Positive-Pressure Breathing (IPPB) Devices

Intermittent positive-pressure breathing is the application of positive pressure, frequently with aerosols or humidity, to a spontaneously breathing client, as a short-term treatment. Each treatment usually does not last more than 15 or 20 minutes.

IPPB devices require prior authorization.

The IPPB machine may be reimbursed for rental only, and that rental is limited to once per month for a maximum of four months per lifetime.

Rental of the IPPB device includes all supplies, such as humidification and tubing.

Procedure code L-E0500 must be used when billing for the IPPB.

Purchase of the IPPB device (J-E0500) is not a benefit.

The IPPB device may be authorized for the following diagnoses:

Diagnosis Code	Description
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
33510	Spinal muscular atrophy, unspecified
33511	Kugelberg-welander disease
33519	Other spinal muscular atrophy
3591	Hereditary progressive muscular dystrophy
496	Chronic airway obstruction, not elsewhere classified
514	Pulmonary congestion and hypostasis
515	Postinflammatory pulmonary fibrosis
5162	Pulmonary alveolar microlithiasis
5163	Idiopathic fibrosing alveolitis
5185	Pulmonary insufficiency following trauma and surgery

Other diagnoses may be considered based on review of documentation by HHSC or its designee.

Mucous Clearance Valve (e.g., Flutter®)

The mucous clearance valve is a small handheld device that provides positive expiratory pressure (PEP) therapy for clients who have chronic obstructive pulmonary disease (COPD), chronic bronchitis, cystic fibrosis, atelectasis, or other conditions producing retained secretions.

The mucous clearance valve requires prior authorization.

The mucous clearance valve is age-restricted to 6 years of age and older.

The mucous clearance valve may be reimbursed for purchase only, and that purchase is limited to one every five years.

Procedure code J-S8185 must be used for the purchase of a mucous clearance valve.

The mucous clearance valve will be reimbursed for the following diagnosis codes only:

Diagnosis Code	Description
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations
490	Bronchitis, not specified as acute or chronic
4910	Simple chronic bronchitis
4911	Mucopurulent chronic bronchitis
49120	Obstructive chronic bronchitis, without exacerbation
49121	Obstructive chronic bronchitis, with (acute) exacerbation
4918	Other chronic bronchitis
4919	Unspecified chronic bronchitis
4920	Emphysema bleb
4928	Other emphysema
49300	Extrinsic asthma, unspecified
49301	Extrinsic asthma with status asthmaticus
49302	Extrinsic asthma, with (acute) exacerbation
49310	Intrinsic asthma, unspecified
49311	Intrinsic asthma with status asthmaticus
49312	Intrinsic asthma, with (acute) exacerbation
49320	Chronic obstructive asthma, unspecified
49321	Chronic obstructive asthma with status asthmaticus
49322	Chronic obstructive asthma, with (acute) exacerbation
49381	Exercise induced bronchospasm
49382	Cough variant asthma
49390	Asthma, unspecified type, unspecified
49391	Asthma, unspecified type, with status asthmaticus
49392	Asthma, unspecified type, with (acute) exacerbation
4940	Bronchiectasis without acute exacerbation
4941	Bronchiectasis with acute exacerbation
4950	Farmers' lung
4951	Bagassosis
4952	Bird-fanciers' lung
4953	Suberosis
4954	Malt workers' lung
4955	Mushroom workers' lung
4956	Maple bark-strippers' lung
4957	Ventilation pneumonitis
4958	Other specified allergic alveolitis and pneumonitis
4959	Unspecified allergic alveolitis and pneumonitis
496	Chronic airway obstruction NEC

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.23.5 Electrical Percussor

An electrical percussor is a device that produces vibrations when applied to the chest wall. The purpose of this device is to improve the effectiveness of chest physiotherapy.

The electrical percussor device requires prior authorization.

The electrical percussor may be reimbursed for rental or purchase depending on the physician's predicted length of treatment. Purchase is limited to one every five years and rental is limited to once per month for a maximum of four months per lifetime.

In addition to the completed Title XIX form, a description of all previous courses of therapy and why they did not adequately assist the client in airway mucus clearance is required to obtain authorization for an electrical percussor.

The procedure codes J-E0480 and L-E0480 must be used when billing for the percussor.

24.5.23.6 Chest Physiotherapy Devices

Either an IPV, cough-stimulating device, *or* the high-frequency chest wall compression system (HFCWCS) generator with vest is prior authorized. These systems are *not* prior authorized simultaneously.

Note: *Chest physiotherapy to promote bronchial drainage that is performed by a therapist or any other health care professional, including a private duty nurse, will not be authorized during the period of time that the high-frequency chest wall compression system, cough-stimulating device, or intrapulmonary percussion ventilation device is prior authorized.*

Prior authorization for the equipment in this section requires a Title XIX form and the Medicaid Certification of Medical Necessity for High-Frequency Chest Wall Compression or Intrapulmonary Percussive Ventilation Initial or Extended Authorization Form completed by a physician familiar with the client.

High-Frequency Chest Wall Compression System

A HFCWCS is composed of an inflatable vest and an air-pulse generator. The generator produces high-frequency pressure pulses, which rapidly inflate and deflate the vest, creating oscillation of the chest wall.

Payment of the HFCWCS is limited to the following diagnosis codes:

Diagnosis Code	Description
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations

A HFCWCS is reimbursed only when it is demonstrated that other mechanical devices or chest physical therapy by a caregiver and/or self have been ineffective.

The HFCWCS requires prior authorization. Requests may be considered for prior authorization for the initial three-month rental of a HFCWCS generator and vest. All of the following information must be provided:

- A description of all previous therapy courses that have been tried and why these treatments did not adequately assist the client in airway mucus clearance. This must include the information that the client has used electrical percussor therapy for a minimum of four months before the request and that this therapy has been ineffective
- A physician's statement of a trial of the high-frequency chest wall compression system in a clinic, hospital, or the home setting documenting the effectiveness and tolerance of the system, including a statement that the client has not exacerbated any gastrointestinal manifestations nor caused aspiration and exacerbation of pulmonary manifestations nor an exacerbation of seizure activity secondary to the use of the system
- Diagnosis and background history including complications, medications used, history of any IV antibiotic therapy with dosage, frequency and duration, history of recent hospitalizations and/or history of school, work, or extracurricular activity absences due to diagnosis-related complications
- Any recent illnesses and/or complications
- Medical diagnosis or other limitations preventing the client/caregiver from doing chest physiotherapy

Prior authorization for an extension of another three months rental may be considered with the above documentation.

Requests for authorization of the purchase of a HFCWCS generator may be considered based on the outcome of a six-month rental period and the following required documentation.

Documentation of vest tolerance and positive outcomes/results of therapy, including:

- Physician's description/assessment of the effectiveness such as decreased medication use, shorter hospital length of stay (LOS), decreased hospitalizations, and fewer school, work or extracurricular activity absences due to diagnosis related complications
- The frequency and compliance graphs for the six-month period showing use of the system at least 50 percent of the maximum time prescribed by the physician for each day
- Respiratory status, including any recent hospitalization
- A statement that the client has not exacerbated any gastrointestinal manifestations nor caused aspiration and exacerbation of pulmonary manifestations nor an exacerbation of seizure activity secondary to the use of the system

Rental cost of the HFCWCS applies toward the purchase price.

CPT only copyright 2005 American Medical Association. All rights reserved.

A HFCWCS generator purchase and vest purchase will be reimbursed only once per lifetime, due to the lifetime warranty provided by the manufacturer.

Procedure code J/L-E0483 must be used when requesting reimbursement.

Intrapulmonary Percussive Ventilation (IPV)

IPV, such as Impulsator® offers a form of physical therapy which is pneumatically delivered. The IPV delivers mini-bursts of gas into the lungs at a high-frequency with aerosol therapy and positive pressure. Its purpose is to mobilize secretions.

The IPV requires prior authorization.

The IPV may be reimbursed for monthly rental only and includes all accessories.

Procedure code L-E0481 must be used when requesting authorization for rental of the IPV.

The IPV may be reimbursed for the following cystic fibrosis diagnosis codes. Other diagnoses may be considered based on review of documentation by HHSC or its designee:

Diagnosis Code	Description
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations
3351	Spinal muscular atrophy
33510	Spinal muscular atrophy, unspecified
33511	Kugelberg-welander disease
33519	Other spinal muscular atrophy
3591	Hereditary progressive muscular dystrophy
496	Chronic airway obstruction, not elsewhere classified

Other diagnoses will be considered based on review of documentation by HHSC or its designee.

The IPV is reimbursed only when it is demonstrated that an electric/pneumatic percussor or chest physical therapy by a caregiver and/or self have not been effective.

The IPV may be approved initially for a three-month rental period based on the following required documentation:

- Diagnosis and background history including recent illnesses, complications, medications used, history of any IV antibiotic therapy with dosage, frequency and duration, history of recent hospitalizations and/or history of school, work, and extracurricular activity absences due to diagnosis related complications.
- Any medical reasons why the client/caregiver cannot do chest physiotherapy.
- A description of all previous therapy courses that have been tried and why these treatments did not adequately assist the client in airway mucus clearance. This must include information on why other treatments have not been tried, and that the client has used electrical percussor therapy for a minimum of four months before the request and that this therapy has been ineffective.

Requests for prior authorization of an extension must include documentation by the physician familiar with the client that the client is compliant with the use of the equipment and that the treatment is effective.

Cough-Stimulating Device (Cofflator)

The cough-stimulating device (cofflator) assists clients in secretion clearance by applying positive pressure to the airway via mask, mouthpiece or tracheostomy adapter. It then cycles to negative pressure stimulating a cough response.

The cough-stimulating device requires prior authorization.

The cough-stimulating device may be reimbursed for monthly rental only and includes all supplies.

Procedure code L-E0482 must be used when requesting rental of a cough-stimulating device.

The cough-stimulating device may be reimbursed for those clients with chronic pulmonary disease and/or neuromuscular disorders that affect the respiratory musculature.

The cough-stimulating device may be approved initially for a three-month rental period based on the following required documentation:

- Diagnosis and background history including recent illnesses, complications, medications used, history of any IV antibiotic therapy with dosage, frequency and duration, history of recent hospitalizations, results of pulmonary function studies if applicable, and/or history of school/work/extracurricular activity absences due to diagnosis related complications.
- Medical reasons why the client/caregiver cannot do chest physiotherapy.
- A description of all previous therapy courses that have been tried and why these treatments did not adequately assist the client in airway mucus clearance. This must include information on why other treatments have not been tried, and that the client has used electrical percussor therapy for a minimum of four months before the request and that this therapy has been ineffective.

Requests for prior authorization of an extension must include documentation by the physician familiar with the client that the client is compliant with the use of the equipment and that the treatment is effective.

Positive Airway Pressure System Devices

In addition to the Title XIX form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy Form must be completed by the physician familiar with the client and submitted by the provider for all positive pressure system devices.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.23.7 Continuous Positive Airway Pressure (CPAP) System

a CPAP system is used to provide noninvasive positive air pressure through the nose with a mask or nasal pillows to prevent the collapse of the oropharyngeal walls during sleep. It is used primarily for the treatment of obstructive sleep apnea.

The continuous positive airway pressure system requires prior authorization.

The continuous positive airway pressure system may be reimbursed for rental or purchase depending on the physician's predicted length of treatment. Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month.

Procedure code J/L-E0601 must be used when requesting authorization for the rental or purchase of the continuous positive airway pressure system.

Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the authorization period expires. After the current authorization period expires, then the criteria in the following paragraph applies to any further authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the beginning of the new authorization period.

The CPAP may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

CPAP may be approved initially for three months if the duration of the symptoms is at least six months and one of the following:

- The Sleep Study Respiratory Disturbance Index (RDI) or Apnea/Hypopnea Index (AHI) is greater than 15 per hour
- The Sleep Study RDI or AHI is greater than 10 per hour with the lowest oxygen saturation during the study is less than 80 percent

24.5.23.8 Pediatric CPAP Changes

One of the following oxygen saturation levels may be used for clients under 21 years of age:

- An oxygen saturation of 89 to 92 percent, taken at rest, breathing room air
- An oxygen saturation less than 92 percent with documentation of medical necessity provided by a physician familiar with the client

Authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Title XIX form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

Rental of CPAP/BiPAP S includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

24.5.23.9 Bilevel Positive Airway Pressure System (BiPAP S) Without Backup

A BiPAP S is used to provide noninvasive inspiratory positive airway pressure and expiratory positive airway pressure through the nose with a mask to prevent the collapse of the oropharyngeal walls during sleep. This equipment is used primarily for obstructive sleep apnea.

The BiPAP S requires prior authorization.

The BiPAP S may be reimbursed for rental or purchase depending on the physician's predicted length of treatment. Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month.

The BiPAP S will not be authorized once a CPAP is purchased.

Procedure code L/J-E0470 must be used when requesting authorization for the rental or purchase of the BiPAP S.

Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the authorization period expires. After the current authorization period expires, then the criteria in the following paragraph applies to any further authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the time of purchase, if the item is purchased after a rental period.

The BiPAP S may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

The BiPAP S may be approved initially for three months if the following conditions are met:

- The client has demonstrated the inability to tolerate the CPAP system, *and*
- Duration of symptoms of at least six months, and
- The Sleep Study RDI or AHI is greater than 15 per hour, *or*
- The Sleep Study RDI or AHI greater than 10 per hour with the lowest oxygen saturation during study is less than 80 percent or oxygen saturation equal to or less than 92 percent for clients under 21 years of age.

Prior authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Title XIX form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

CPT only copyright 2005 American Medical Association. All rights reserved.

Rental of CPAP/BiPAP S includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

24.5.23.10 Bilevel Positive Airway Pressure System With Backup (BiPAP ST)

A BiPAP ST is used to provide timed noninvasive inspiratory positive airway pressure and expiratory positive airway pressure through the nose with a mask when BiPAP S has been proven ineffective or through a tracheostomy.

The BiPAP ST requires prior authorization.

The rental of a BiPAP ST may be reimbursed only once per month.

Purchase of the BiPAP ST is not a benefit.

The BiPAP ST may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

Either procedure code L-E0471 or L-E0472 must be used when requesting authorization for the rental of the BiPAP ST.

BiPAP ST may be approved initially for three months if the following conditions are met:

- A diagnosis of central sleep apnea, or a neuromuscular disease producing respiratory insufficiency, *and*
- Sleep study records central apnea greater than 5 RDI or AHI per hour, *or*
- Sleep study records central sleep apnea greater than 1 RDI or AHI per hour.
- The client has an arterial PO2 at or below 56 mm Hg, or an arterial oxygen saturation at or below 89 percent by transcutaneous oximetry associated with a diagnosis of neuromuscular respiratory insufficiency or failure (not COPD).

Continued authorization for rental after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum four hours per night and has a transcutaneous saturation greater than 88 percent while using the equipment as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with the above documentation plus a new completed Title XIX form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

Home Mechanical Ventilation Equipment

Ventilators are used for clients who do not have adequate respiratory function. Continuous use ventilators are used for 12 or more hours per day. Intermittent use ventilators are used for less than 12 hours per day.

Mechanical ventilation is either provided by positive pressure ventilation (volume ventilator) or negative pressure ventilation (iron lung).

All ventilators require prior authorization.

The completed Title XIX form must specify all ventilator settings and must be maintained by the DME provider and the prescribing physician in the client's medical record.

24.5.23.11 Volume Ventilators

A volume ventilator may operate, using room air and/or oxygen, in various phases, modes and variables, which are time controlled, pressure controlled, volume controlled or a combination of these. A volume ventilator may be operated in any of the following:

Ventilation Modes

- Control
- Assist control
- Synchronized intermittent mandatory ventilation (SIMV)
- CPAP

Breath Types

- Spontaneous (patient triggered and cycled)
- Ventilator assisted (patient or machine triggered and/or cycled) (e.g., pressure support or pressure-assisted)
- Mandatory (machine triggered and/or machine cycled)

The volume ventilator is prior authorized for rental only for those clients who have a tracheostomy.

The monthly ventilator rental includes all ventilator supplies, such as (but not limited to):

- Internal filters
- External filters
- Ventilator circuits with an exhalation valve
- High and low pressure alarms
- All humidification systems including supplies and solutions (i.e., sterile/distilled water)
- Compressors and supplies
- Tracheostomy filters/heating moisture exchangers

The procedure codes L-E0450, L-E0463, and L-E0464 must be used when requesting the volume ventilator.

24.5.23.12 Negative Pressure Ventilators

A negative pressure ventilator decreases atmospheric pressure to a predetermined negative pressure immediately outside the chest or body to allow passive lung expansion from normal air pressure.

Negative pressure ventilators may be prior authorized for rental only for individuals who have the ability to speak, eat, drink and do not have a tracheostomy.

The ventilator rental includes all component parts (pillow, mattress, gaskets, etc.).

Procedure code L–E0460 must be used when requesting a negative pressure ventilator.

One of the following devices may be authorized with a portable negative pressure ventilator using procedure codes J/L-E0457 and J/L-E0459.

The application devices may be reimbursed for an initial *three-month* rental period.

CPT only copyright 2005 American Medical Association. All rights reserved.

The listed application devices may be purchased following the initial three-month rental period depending on the physician's predicted length of treatment and the patient's compliance.

The purchase of a chest shell (cuirass) and chest wrap is limited to a maximum of one every five years. Reimbursement for rental is limited to once per month for a total of four months.

24.5.23.13 Ventilator Service Agreement

A ventilator service agreement may be prior authorized for a client who owns their own ventilator, when documentation supports medical necessity/appropriateness for continued ventilator usage.

A ventilator service agreement requires prior authorization, which must include submission of a completed Title XIX form and the ventilator service agreement. The completed Title XIX form must include all ventilator settings.

The completed Title XIX form and the Ventilator Service Agreement form must be maintained by the provider and the prescribing physician in the client's medical record.

A ventilator service agreement may be reimbursed only once per month.

Procedure code 9-A9900 must be used when requesting the ventilator service agreement.

The client-owned ventilator must be functional at the time of the request for prior authorization and documentation must include the make, model number, serial number, and the date of ventilator purchase and all ventilator settings.

The ventilator service agreement contract may be considered for renewal every six months.

The provider must agree to include all of the following components in the ventilator service agreement:

- Ensure that all routine service procedures as outlined by the ventilator manufacturer are followed
- Provide all internal filters, external filters, tracheostomy filters, and all ventilator circuits (with the exhalation valve) as a part of the ventilator service agreement
- Provide a respiratory therapist and back-up ventilator on a 24-hour call basis
- Provide monthly home visits by a certified respiratory therapist to verify proper functioning of the ventilator system and the client's status. The provider must maintain documentation on monthly visits
- Provide a substitute ventilator while the manufacturer's recommended preventive maintenance is being performed on the client owned ventilator. The substitute ventilator must be provided free for a minimum of six weeks

Ventilator rental will not be authorized during the first six weeks while the client-owned ventilator is being maintained or repaired, per the ventilator service agreement. After these six weeks, a ventilator may be rented until the client-owned ventilator is returned to the client.

Requests for a continued six-month authorization of a ventilator service agreement must include the above documentation and the following:

- The recommended preventive maintenance schedule for the ventilator make and model
- Documentation of the monthly ventilator/client assessments
- Documentation of all service performed during the previous service agreement

24.5.23.14 Oxygen Therapy

Oxygen therapy is defined as supplemental oxygen administration for the purpose of relieving hypoxemia and preventing damage to the tissue cells as a result of oxygen deprivation.

All oxygen therapy and related equipment requires prior authorization.

Oxygen therapy home delivery systems may be reimbursed for rental only once per month.

Rental of oxygen equipment includes all supplies and refills.

Supplies and refills may be prior authorized for those clients that own their own oxygen systems.

One of the following clinical indications should be present when requesting approval for in-home oxygen therapy:

- Bronchopulmonary dysplasia and other respiratory diagnoses due to prematurity
- Respiratory failure or insufficiency
- Cluster headaches
- Hypoxemia-related symptoms and findings that might be expected to improve with oxygen therapy (examples of these symptoms and findings are pulmonary hypertension, recurring congestive heart failure due to chronic corpumonale, erythrocytosis, impairment of the cognitive process, nocturnal restlessness, and morning headache)
- Severe lung disease, such as COPD, diffuse interstitial lung disease, whether known or unknown etiology such as cystic fibrosis, bronchiectasis or widespread pulmonary neoplasm.

Note: *In addition to the completed Title XIX form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form must be completed by the physician familiar with the client and submitted by the provider.*

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.23.15 Initial Oxygen Therapy Medical Necessity Certification

Authorization of home oxygen therapy for the initial period of three months will be granted if the Title XIX form and the Medicaid Certificate of Medical Necessity for CPAP or BiPAP or Oxygen Therapy form is completed and all of the following conditions are met:

- Symptoms have a duration of at least three months (or less with special circumstances)
- For clients under 21 years of age one of the following parameters must be used:
  - An oxygen saturation of 89 to 92 percent, taken at rest, breathing room air
  - An oxygen saturation less than 92 percent with documentation of medical necessity provided by a physician familiar with the client
- An arterial PO2 at or below 56 mm Hg, or an arterial oxygen saturation at or below 89 percent, taken at rest, breathing room air, or during sleep and associated with signs or symptoms reasonably attributed to hypoxemia
- Hypoxemia associated with obstructive sleep apnea must be unresponsive to CPAP or BiPAP therapy before oxygen therapy can be approved. In these cases, coverage is provided only for use of oxygen during sleep, and then only one type of delivery system will be covered
- Portable oxygen systems are covered when the medical documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside the home environment. Portable oxygen systems are not covered when traveling outside the home environment for clients who qualify for oxygen usage based solely on oxygen saturation levels during sleep
- A client who demonstrates an arterial PO2 at or above 56 mm Hg, or an arterial oxygen saturation at or above 89 percent, during the day while at rest and who subsequently experiences a decreased arterial PO2 of 55 mm Hg or below, or decreased arterial oxygen saturation of 88 percent or below during exercise. In this case supplemental oxygen can be provided if there is evidence that the use of oxygen improves the hypoxemia that was demonstrated during exercise when the client was breathing room air.

In-home oxygen therapy can be approved for cluster headaches with the documentation of the following clinical indications:

- Neurological evaluation with diagnosis, *and*
- Documented failed medication therapy

Note: *Lab values are not indicated with this diagnosis.*

24.5.23.16 Oxygen Therapy Recertification

Authorization of oxygen therapy after an initial three-month rental period may be granted with the submission of a new completed Title XIX form and a new Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form and the following:

- Documentation of continued need
- Documentation of client compliance by the physician familiar with the client

Note: *The initial Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy Form cannot be used for recertification purposes.*

24.5.23.17 Oxygen Therapy Home Delivery System Types

The oxygen concentrator systems are the preferred (standard) delivery system of in-home oxygen therapy. This type of system concentrates oxygen molecules from the ambient air, generating concentrations of up to 90 to 98 percent.

Procedure code L-E1390 must be used for the rental of an oxygen concentrator system.

The reimbursement payment for the rental of the procedure code L-E1390 includes, but is not limited to, cannula or mask, tubing, and humidification. These items will not be reimbursed separately.

If other types of oxygen therapy home delivery systems are required, documentation of medical necessity exception must be provided.

Other types of delivery systems include:

- Compressed gas cylinder systems (nonportable tanks) (L-E0424)
- Liquid oxygen reservoir systems (L-E0439)

Note: *The reimbursement for compressed gas cylinder and liquid oxygen reservoir systems includes all of the supplies that are noted in the procedure code description.*

- Portable oxygen systems—Portable oxygen therapy may be authorized if the medical necessity conditions are met, and the medical documentation indicates that the client is mobile in the home and would benefit from the use of a portable oxygen system in the home or at school.
  - Portable oxygen systems are not covered for clients who qualify for oxygen solely based on blood gas studies obtained during sleep.
  - The procedure codes L-E0431 and L-E0434 must be used for the portable oxygen systems.
  - Rental of the portable oxygen system includes all supplies and refills. Refills for a client-owned system must be obtained from a DSHS-licensed vendor.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.5.23.18 Tracheostomy Tubes

A tracheostomy tube fits into a tracheal stoma and is used for those clients who have undergone surgical tracheostomy. The procedure codes and modifiers noted in the following tables may be used when requesting prior authorization for a tracheostomy tube. Prior authorization requests must provide sufficient information to support the determination of medical necessity for the requested item.

A tracheostomy tube may be reimbursed for purchase only and is limited to one per month. Authorization for a tracheostomy tube will be considered with procedure code 9-A7520 or 9-A7521. The manufacturer's retail pricing information and a physician statement addressing the reason the client cannot use a standard tracheostomy tube are required when requesting prior authorization.

Procedure code 9-A4623 may be used when requesting prior authorization for the tracheostomy tube inner cannula.

An inner cannula is limited to one per month and will not be prior authorized when a custom manufactured tracheostomy tube (9-A7520-TG or 9-A7521-TG) is requested.

24.5.23.19 Pulse Oximetry

Pulse oximeters are not a benefit of Texas Medicaid (Title XIX) Home Health Services.

Authorization for reimbursement of sensor probes (reusable or disposable) may be considered only for those with a client owned pulse oximeter (e.g., purchased through another source).

Procedure code 9-A4606 should be used for reimbursement of sensor probes (reusable or disposable).

24.5.23.20 Procedure Codes and Limitations for Respiratory Equipment and Supplies

When procedure code L-K0738 is billed with procedure code L-E0431, procedure code L-E0431 will be denied.

24.5.24 Procedure Codes Removed From Prior Authorization

The procedure codes listed in the following table do *not* require prior authorization for clients receiving services under Texas Medicaid (Title XIX) Home Health Services. Although prior authorization is not required, providers must retain a completed Title XIX Home Health DME/ Medical Supplies Physician Order Form (Title XIX form) for these clients. For medical supplies not requiring prior authorization, a completed Title XIX form may be valid for a maximum of six months unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than six months, then a new Title XIX form is required at the end of the duration of need. It is expected that reasonable, medically necessary amounts will be provided. Use of these services is subject to retrospective review.

Procedure Codes

24.5.25 Enteral Products for Adults

24.5.25.1 Nutritional Products and Supplies

Enternal nutritional products are those food products that are included in an enteral treatment protocol. They serve as a therapeutic agent for health maintenance and are required to treat an identified medical condition. Nutritional products, supplies, and equipment may be provided in the home under Texas Medicaid (Title XIX) Home Health Services.

Enteral products are a benefit under Texas Medicaid (Title XIX) Home Health Services for clients 21 years of age and older who require tube feeding as their sole source of nutrition. Prior authorization is required for all enteral products. Requests are reviewed for reasonable amounts. Enteral products for clients who can take nutrition by mouth and/or used as a supplement will not be prior authorized.

To be reimbursed as a home health benefit:

- The client must be eligible for home health benefits.
- The criteria listed in this policy for the requested supplies/equipment must be met.
- The supplies/equipment requested must be medically necessary.
- Federal financial participation (FFP) must be available.
- The client's nutritional status would be compromised without the requested enteral nutritional products/supplies/equipment.

24.5.25.2 Enteral Nutritional Products

All enteral nutritional products paid under the Texas Medicaid Program are paid based on units of 100 calories (as documented by the manufacturer) with the appropriate "B" code (as documented by the Statistical Analysis DME Regional Carrier [SADMERC] Product Classification List for Enteral Nutrition in effect at the time) and with the appropriate modifier based on the product's average wholesale price (AWP) less 10.5 percent (as documented by the Red Book).

It is the provider's responsibility to know the correct "B" code, the correct units of 100 calories, and the modifier for requesting prior authorization and for payment. Supporting documentation for these components must be maintained in the provider's records and be made available upon request by HHSC or TMHP. Payment is based on the lower of billed charges or the Medicaid allowed fee, with the Medicaid allowed fee based on the appropriate "B" code, modifier, and units of 100 calories.

It is the provider's responsibility to know when products are discontinued by the manufacturer, when container sizes change and when names change. Please submit requests for prior authorization and payment accordingly.

The Palmetto GBA SADMERC Product Classification List is located on its website (www.palmettogba.com).

24.5.25.3 Enteral Feeding Pumps

Enteral feeding pumps are a benefit of Texas Medicaid (Title XIX) Home Health Services for those clients who require enteral feeding. The Title XIX request for enteral feeding pumps and supplies must be completed, signed, and dated by a physician familiar with the client before requesting prior authorization.

Sole source enteral nutrition for clients 21 years of age and older should be prior authorized through TMHP Home Health Services.

Nasogastric and Gastrostomy/Jejunostomy Tubes

Nasogastric feeding tubes require prior authorization. Additional devices may be reimbursed if documentation submitted indicates medical necessity.

Nonobturated gastrostomy/jejunostomy tubes will be limited to two per year. Additional tubes may be reimbursed if documentation submitted indicates medical necessity, such as infection at gastrostomy site, leakage or occlusion. Obturated gastrostomy tube replacements are performed in the physicians office or outpatient setting and are not a benefit of Texas Medicaid (Title XIX) Home Health Services.

Enteral Supplies

Enteral feedings may require some or all the following supplies:

- Needleless syringes, any size
- Enteral extension tubing
- Gravity bags/nutritional containers

Syringes without needles are considered reusable for enteral administration of medication. These syringes are limited to eight per month.

Irrigation syringes, bulb or piston, for enteral administration of nutritional products are limited to four per month.

A food scale is payable for clients on specific diets with foods measured in grams (e.g., ketogenic diets). This service requires prior authorization and has a maximum allowable fee of $60.

Important: *Medical nutritional products for clients younger than 21 years of age remain a benefit of THSteps-CCP.*

Enteral products are a benefit under Texas Medicaid (Title XIX) Home Health Services for clients 21 years of age and older who require tube feeding as their sole source of nutrition. Prior authorization is required for all enteral products. Requests are reviewed for reasonable amounts. Enteral products for clients who can take nutrition by mouth and/or used as a supplement will not be authorized.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through THSteps-CCP.*

Procedure Codes

Modifier	Fee Per Unit
U1	$0.30
U2	$0.50
U3	$0.70
U4	$0.85
U5	$1.05
U6	$1.70
U7	$2.00
U8	$2.50
U9	$3.00
UA	$4.00
UB	$5.00
UC	$6.00
UD	Manually priced

Note: *TMHP Home Health Services will not issue authorization of enteral products/supplies/equipment if the client is receiving TPN/hyperalimentation. TPN/Hyperalimentation is reimbursed as a daily global fee to cover visits by a registered nurse for teaching and monitoring the client, customary and routine laboratory work, and enteral supplies and equipment.*

Refer to: "In-Home Total Parenteral Hyperalimentation Supplier" on page 27-1.

24.5.26 Limitations, Exclusions

Payment cannot be made for any service, supply or equipment for which FFP is not available.

For clients who are younger then 21 years of age and who are eligible to receive THSteps services, refer to "THSteps-Comprehensive Care Program (CCP)" on page 43-33 to find which of these items are covered for THSteps CCP.

Texas Medicaid (Title XIX) Home Health Services does not cover the following:

- Adaptive strollers, travel seats, push chairs, car seats
- Administration of non-FDA-approved medications/treatments or the supplies and equipment used for administration
- Aids for daily living, such as toothpaste, spoons, forks, knives, and reachers
- Allergy injections
- Any services, equipment, or supplies furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services or supplies furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services or supplies furnished without prior approval by TMHP, except as listed
- Any supplies or equipment used in a physician's office, or inserted by a physician (for example, low profile gastrostomy tube)
- Apnea monitors
- Blood products (the administration or the supplies and equipment used to administer blood products)
- Cardiac telemetry monitoring
- Chemotherapy administration or the supplies and equipment used to administer chemotherapy
- Developmental therapy
- Diapers and wipes for clients younger than 4 years of age
- Drugs or biologicals (except as specifically provided for in this manual)
- Dynamic Orthotic Cranioplasty (DOC)
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, heater/air conditioner filters, space heaters, fans, water purification systems, vacuum cleaners, treatments for dust mites, rodents, and insects
- Homemaker services. Clients requiring this type of care should contact their local DSHS office for information about community-based programs for primary home care, day activities, or other related services
- Home whirlpool baths, spas, home exercisers/gym equipment, hemodialysis equipment, safety wall rails, toys/therapy equipment
- Inpatient rehabilitation
- Medical social services
- Mental health psychiatric services
- Nursing visits to administer long-term SQ/SC, IM, oral, or topical medications, such as insulin, vitamin B_{12}, or deferoxamine, or to set up medications such as prefill insulin syringes or medication boxes, on a long-term basis
- Nutritional counseling
- Orthotics, braces, prosthetics
- Pain management, such as a Transcutaneous Electrical Nerve Stimulator (TENS)
- Parapodiums
- Pneumocardiograms
- Private duty nursing
- Respite care (caregiver relief)
- Seat lift mechanisms and seat lift chairs

CPT only copyright 2005 American Medical Association. All rights reserved.

- Services payable by any health, accident, other insurance coverage, or by a private or other governmental benefit system or legally liable third party resource
- Shipping, freight, delivery travel time
- SN visits when:
  - The medication is not considered medically necessary to the treatment of the individual's illness or is not FDA-approved
  - The administration of medication exceeds therapeutic frequency or duration by accepted standards of medical practice
  - A medical reason does not prohibit the administration of the medication by mouth
  - The client, a primary caregiver, a family member, and/or neighbor has previously been taught to administer SQ/SC, IM and IV injections medications and has demonstrated competency
  - The purpose of the visit is to administer chemotherapeutic agents or blood products
  - The purpose of the visit is pain management
- Speech therapy
- Structural changes to homes, domiciles, or other living arrangements
- Vehicle mechanical and/or structural modifications, such as wheelchair lefts
- Visits made primarily for performing housekeeping services are not covered by Texas Medicaid (Title XIX) Home Health Services. These requests should be referred to in-home and family support service at HHSC

Refer to: "Medicaid Program Limitations and Exclusions" on page 1-17.

24.6 Medicaid Relationship to Medicare

24.6.1 Possible Medicare Clients

It is the provider's responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is entitled to receive.

Home health providers should follow these guidelines:

- Clients younger than 65 of age years without Medicare Part A or B:
  - If the agency erroneously submits a SOC notice to Medicare and does not contact TMHP for authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not covered.
- Clients older than 65 years of age without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
  - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the denial letter from Medicare.
  - If the agency receives a Medicare denial letter and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days from the date on the denial letter from Medicare, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the Medicare remittance notice and final review decision letter before considering the request for authorization.

24.6.2 Benefits for Medicare/Medicaid Clients

For eligible Medicare/Medicaid clients, Medicare is the primary coinsurance and providers must contact Medicare first for authorization and reimbursement. Medicaid pays the Medicare deductible on Part B claims for qualified home health clients. Home health service authorizations may be given for home health aide services, certain medical supplies, equipment, or appliances suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) who does not qualify for home health services under Medicare because SN care, physical therapy, or occupational therapy are not a part of the client's care.
- When the medical supplies, equipment, or appliances are not a benefit of Medicare Part B and are a benefit of Texas Medicaid (Title XIX) Home Health Services.

Important: *Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.*

Note: *If the client has Medicare Part B coverage, contact Medicare for authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization. Texas Medicaid will only pay the coinsurance and deductible on the electronic crossover claim.*

TMHP will not authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

Refer to: "Third Party Resources" on page 4-13.

CPT only copyright 2005 American Medical Association. All rights reserved.

24.6.3 Medicare/Medicaid Authorization

Contact TMHP for authorization of Medicaid services (based on medical necessity and benefits of Texas Medicaid (Title XIX) Home Health Services) within 30 days of the date on the Medicare final denial letter.

Note: *For MQMB clients, do not submit authorization requests to TMHP if the Medicare denial reason states "not medically necessary." Medicaid only will consider authorization requests if the Medicare denial states "not a benefit" of Medicare.*

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. The Medicaid program is only responsible for premiums, coinsurance, and/or deductibles on these clients. Providers should not submit prior authorization requests to TMHP Home Health Services on these clients.

24.6.4 Medicare/Medicaid Authorization and Reimbursement

To ensure Medicare benefits are used first in accordance with Texas Medicaid Program regulations, the following procedures apply when requesting Medicaid authorization and payment of home health services for clients.

Contact TMHP for authorization of Medicaid services (based on medical necessity and benefits of Texas Medicaid (Title XIX) Home Health Services) within 30 days of the date on the Medicare final denial letter. Fax a copy of the original Medicare final denial letter and the Medicare appeal review letter to TMHP Home Health Services for prior authorization.

A Medicare denial letter is not required when a client is eligible for Medicare/Medicaid and needs home health aide visits only. However, a skilled supervisory nursing visit must be made on the same day as the initial home health aide visit and at least every 60 days (on the same day a home health aide visit is made) thereafter as long as no skilled need exists. A SN supervisory visit is reimbursable, but a SN visit made for the primary purpose of assessing a client's nursing care is not.

The SOC date will be the date of the first requested Medicare home health services visit as listed on the original Medicare denial letter.

Note: *Claims for STAR+PLUS MQMB clients (those with Medicare and Medicaid) should always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.*

When the client is older than 65 years of age or appears otherwise eligible for Medicare such as blind and disabled, but has no Part A or Part B Medicare, TMHP Home Health Services uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a "pending status" for Medicare determination is 120 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

Refer to: "Skilled Nursing Services" on page 24-8.

24.7 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies home health services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 *Code of Federal Regulations* (CFR) §424.22 (d) states that "a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for home health services care services and may not establish or review a plan of treatment."

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency's assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, supplies, equipment, space, and salaried employment with the home health agency.
- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than $25,000 or five percent of the agency's total operating expenses, whichever is less.

Important: *When providing CCP services and general home health services, the provider must file these on two separate HCFA-1450 (UB-92) forms with the appropriate PAN, and should send them to the appropriate address.*

Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with, the home health agency providing services.

CPT only copyright 2005 American Medical Association. All rights reserved.

Documentation should be sent to TMHP Provider Enrollment at the address indicated in "Written Communication with TMHP" on page xi.

24.8 Claims Information

Use only type of business (TOB) 331 in Form Locator (FL) 4 of the HCFA-1450 (UB-92). Other TOBs are invalid and result in claim denial.

Submit home health professional services to TMHP in an approved electronic format or on a HCFA-1450 (UB-92) claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers may purchase HCFA-1450 (UB-92) and CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

The PAN must appear on the UB-92 claim in Block 63 and in Block 23 of the CMS-1500. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

Refer to: "HCFA-1450 (UB-92) Claim Filing Instructions" on page 5-32.
"Claims Filing" on page 5-1 for more information on electronic billing.

25.1 General Information

25.1.1 Introduction

The information in this section is intended for traditional Texas Medicaid hospital (medical/surgical acute care facility) providers. The section provides information about the Texas Medicaid Program's benefits, policies, and procedures applicable to acute care hospitals in the inpatient and outpatient setting.

***Note:** Although Medicaid Managed Care providers must provide all medically necessary Medicaid-covered services to eligible clients, these providers must refer to the respective health plan documentation for specific information about hospital services, claims filing, etc.*

Refer to: "PCCM Expansion" on page 7-21.

While this section contains some claims filing and appeals information, hospitals should continue to refer to "Claims Filing" on page 5-1 and "Appeals" on page 6-1 for more comprehensive information about these subjects. An effort has been made to provide comprehensive information about hospital services in this section; however, hospital providers are encouraged to review other sections of the manual for specific requirements for special programs such as the Texas Health Steps-Comprehensive Care Program (THSteps-CCP) and other pertinent material impacting health care providers rendering care in the hospital setting.

Refer to: "Procedure Codes Requiring Prior Authorization" on page 36-343 for a list of procedures requiring prior authorization. Also, review the index and individual sections for other information about prior authorization requirements.

25.1.2 Provider Cost and Reporting

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient and outpatient costs in the cost reports submitted annually. The provider must prepare one copy of the applicable Centers for Medicare & Medicaid Services (CMS) Cost Report Form.

If a change of ownership or provider termination occurs, the cost report is due within five months after the date of the change in ownership or termination. Any request for an extension of time to file should be made on or before the cost report due date and sent to TMHP Medicaid Audit at the address indicated under "Written Communication with TMHP" on page xi. For questions or assistance call TMHP Medicaid Audit at 1-512-514-3648.

Annual cost reports must be filed as follows:

- Submit one copy of the cost report to TMHP Medicaid Audit within five months of the end of the hospital's fiscal year along with any amount due to the Texas Medicaid Program.
- TMHP Medicaid Audit performs a desk review of the cost report and makes a tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to the Texas Medicaid Program or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time based on the cost report.
- Field audits are conducted when necessary.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary:
    - Audited or settled without audit Medicare Cost Report
    - Medicare Notice of Amount of Program Reimbursement
    - Medicare Audit Adjustment Report, if applicable

Medicaid hospitals may request copies of their claim summaries for their cost reporting fiscal year. The summaries for tentative settlements include three additional months of claim payments for the fiscal year. The summaries for final settlements include ten months of claim payments for the fiscal year. TMHP Medicaid Audit uses this data to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data are only generated once each month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs are submitted within 30 days after the fiscal year-end. Final settlement log requests are submitted within nine months after the fiscal year-end.

The Medicaid logs can be requested on microfiche or paper by mailing a "Medicaid Audit Request for Claims Summary" on page B-54 to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Allow 45 days for receipt of these logs.

25.1.3 Third Party Liability Reporting

Hospitals and providers enrolled in the Texas Medicaid Program are required to inform TMHP about circumstances that may result in third party liability for health care claims. After receiving this information, TMHP pursues reimbursement from responsible third parties.

Hospitals and Providers should mail or fax the Tort Response Form for accidents and Other insurance Form for Health Insurance to the following address:

Texas Medicaid & Healthcare Partnership
TPR Correspondence
Third Party Resources Unit PO Box 202948
Austin, TX 78720-9981

Fax: 1-512-514-4225

Refer to: "Third Party Resources" on page 4-13 for more information.

"Tort Response Form" on page B-114.

"Other Insurance Form" on page B-62.

CPT only copyright 2005 American Medical Association. All rights reserved.

25.1.4 Medicaid Relationship to Medicare

The Texas Medicaid Program makes coinsurance and deductible payments on valid, assigned Part A (hospital) and Part B (medical) Medicare claims.

Exception: *If the Medicare payment amount equals or exceeds the Medicaid payment rate, HHSC is not required to pay the Medicare Part A and/or Part B deductible/ coinsurance/copay on a crossover claim.*

The Texas Medicaid Program provides 30 inpatient benefit days per spell of illness. When the 30 days coincide with the first 30 days of the Medicare benefit period and the client is eligible for *both* Medicare and Medicaid, Medicaid pays the:

- Inpatient hospital deductible under Medicare Part A
- Medicare Part A deductible for the first three pints of whole blood or packed red cells

When the client only has Medicare Part B coverage, the hospital must follow these guidelines:

- Submit to Medicare the charges for certain inpatient ancillary services on a Medicare Claim Form 1483 for payment under the client's Part B coverage. The ancillary charges include the following:
  - Diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests
  - X-ray, radium, and radioactive isotope therapy, including materials and services of technicians
  - Surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations
  - Prosthetic devices (other than dental) that replace all or part of an internal body organ or member (including contiguous tissue), or all or part of the function of a permanently inoperative or malfunctioning internal body organ or member including replacement or repairs of such devices (e.g., cardiac pacemakers, breast prostheses, maxillofacial devices, colostomy bags, and prosthetic lenses)
  - Leg, arm, back and neck braces, and artificial legs, arms, and eyes, including replacements and adjustments (if required) because of a change in the client's physical condition
  - Physical therapy services
  - Speech pathology services
  - Dialysis treatments
- Submit to Medicaid the remaining Part A charges on a HCFA-1450 (UB-92) claim form (or its electronic equivalent) indicating in Block 84 that the client is eligible for Medicare Part B benefits only. The client's health insurance claim (HIC) number must appear on the Medicaid claim in Block 84. TMHP *must* receive these charges within 95 days of the last date of service on the claim.

Refer to: "Medicare Crossover Reimbursement" on page 2-8 for more information.

25.1.5 Nursing Facility Admission

The revised Client Assessment, Review, and Evaluation (CARE) Form 3652-A must be used for admissions to a nursing facility. Hospital social workers and nurses making referrals and discharge plans that anticipate transfer to a nursing facility must complete this form.

To order new forms, specify that the order is for the CARE Form 3652-A and mail the request to the following address:

Texas Department of Aging and Disability Services
PO Box 149030 (MC E-205, Provider Forms)
Austin, TX 78714-9030
Fax: 1-512-438-3548
www.dads.state.tx.us/handbooks/mpm-ltcf/5000/5720.htm

25.2 Inpatient

25.2.1 Enrollment

To be eligible to participate in the Texas Medicaid Program, a hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA will not be reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2 for more information about CLIA.

25.2.1.1 Hospital Eligibility Through Change of Ownership

Under procedures set forth by CMS and the United States Department of Health and Human Services (HHS), a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued if the hospital obtains recertification as a Title XVIII (Medicare) hospital and a new Title XIX (Medicaid) agreement between the hospital and HHSC.

Contact the TMHP Contact Center at 1-800-925-9126 to obtain the Medicaid hospital participation agreement.

25.2.1.2 Psychiatric Hospital/Facility (THSteps-CCP)

Refer to: "Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)" on page 43-71 for enrollment and other program information.

CPT only copyright 2005 American Medical Association. All rights reserved.

25.2.1.3 Hospital Ambulance

A hospital supplying ambulance services must enroll *separately* from the hospital.

Refer to: “Enrollment” on page 8-2 for ambulance enrollment requirements.

25.2.1.4 Certified Registered Nurse Anesthetist (CRNA) Services

CRNAs must enroll and bill according to the instructions given in “Certified Registered Nurse Anesthetist (CRNA)” on page 15-1. Hospitals *cannot* bill for CRNA services using their hospital ambulatory surgical center (HASC) or hospital provider identifier.

25.2.1.5 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: “Medicaid Managed Care” on page 7-4 for more information.

25.2.1.6 Hospital Transplant Centers

Hospital providers can refer to “Enrollment” on page 25-4 for enrollment and other related information.

25.2.2 Reimbursement

25.2.2.1 Prospective Payment Methodology

Inpatient hospital stays except in children’s hospitals and psychiatric facilities (THSteps-CCP) are reimbursed according to a prospective payment methodology based on diagnosis-related groups (DRGs). The reimbursement method itself does not affect inpatient benefits and limitations. Inpatient admissions must be medically necessary and are subject to the Texas Medicaid Program’s utilization review requirements.

The DRG reimbursement includes all facility charges (for example, laboratory, radiology, and pathology). Hospital-based laboratories and laboratory providers who deliver referred services outside the hospital setting must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. The technical services are not billable to Medicaid clients.

Medicaid does not distinguish types of beds or units within the same acute care facility for the same inpatient stay (i.e., psychiatric or rehabilitation). Because all Medicaid inpatient hospitalizations are included in the DRG database that determines the DRG payment schedule, psychiatric and rehabilitation admissions are not excluded from the DRG payment methodology. To ensure accurate payment, Medicaid requires that only one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. The discharge and admission hours (military time) are required on the HCFA-1450 (UB-92) claim form, to be considered for payment.

Prior authorization is not required for psychiatric admissions to acute care hospitals for reimbursement; however, admissions must be medically necessary and are subject to retrospective utilization review by HHSC.

Reimbursement to acute care hospitals for inpatient services is limited to $200,000 per client, per benefit year (November 1 through October 31). Claims may be subject to retrospective review, which may result in recoupment. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

In accordance with legislative direction included in the 2006-2007 *General Appropriations Act* (Article II, Section 49, S.B. 1, 79th Legislature, Regular Session, 2005), a rate reduction will be applied to inpatient hospital services rendered to non-Medicare Supplemental Security Income (SSI) and SSI-related Medicaid clients. The rate reduction will affect hospital providers within the Bexar, Dallas, El Paso, Lubbock, Tarrant, Nueces, Harris, and Travis service areas that are reimbursed by DRG.

Hospitals with 100 or fewer licensed beds are currently reimbursed the greater of the amount the hospital received under the prospective payment system (the DRG) or the amount the hospital would have received under the *Tax Equity and FIscal Responsibility Act* (TEFRA) *of 1982* principles of reimbursement. If the reimbursement under TEFRA principles is greater than the amount of reimbursement received under the DRG system, the difference is reimbursed to the hospital. This determination is made with a tentative settlement and subsequent adjustments if applicable. A final cost settlement of the hospital’s fiscal year-end applies to hospital fiscal years beginning on or after September 1, 1989.

A new provider is given a reimbursement inpatient interim rate of 50 percent until a cost audit has been performed. A default standard dollar amount (SDA) rate is assigned for newly enrolled providers or newly constructed facilities.

Payment is calculated by multiplying the SDA for the hospital’s payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Refer to: “Children’s Hospitals” on page 25-6.
“Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)” on page 43-71 for more reimbursement information.

25.2.2.2 Client Transfers

When more than one hospital provides care for the same client, the hospital providing the most significant amount of care receives consideration for a full DRG payment. The other hospitals are paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. Services must be medically necessary and are subject to the Texas Medicaid Program’s utilization review requirements.

CPT only copyright 2005 American Medical Association. All rights reserved.

HHSC performs a postpayment review to determine if the hospital providing the most significant amount of care received the full DRG. If the review reveals that the hospital providing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be billed as *one* admission under the provider identifier. Admissions billed inappropriately are identified and denied during the utilization review process and may result in intensified review.

Note: *To ensure correct payor identification, providers that receive transfer patients from another hospital must put the admit date of the billing hospital in Block 17 on the UB-92.*

25.2.2.3 Observation Status to Inpatient Admission

When a client's status changes from observation to inpatient admission, the date of the inpatient admission is the date the client was placed on observation status. This rule always applies regardless of the length of time the client was in observation (less than 24 hours) or whether the date of inpatient admission is the following day. All charges including the observation room are billed on the inpatient claim (type of bill [TOB] 111).

25.2.2.4 Outliers

TMHP makes outlier payment adjustments to DRG hospitals for admissions that meet the criteria for exceptionally high costs or exceptionally long lengths of stay for clients younger than 21 years of age as of the date of the inpatient admission. If a client's admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid. The R&S report reflects the outlier reimbursement payment and defines the type of outlier paid.

Day Outliers

The following criteria must be met to qualify for a day outlier payment. Inpatient days must exceed the DRG day threshold for the specific DRG. Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 70 percent of the per diem amount of a full DRG payment. The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

Hospitals should use the following formula to calculate the day outliers for dates of admission on or after September 1, 2002. To calculate the day outlier payment amount, the number of outlier days must first be determined:

Number of Days Allowed-DRGs Threshold = Outlier Days

SDA x DRG relative weight (Divided by) Mean length of stay	x	Outlier Days	x	0.70	=	Day outlier amount

Cost Outliers

To establish a *cost outlier,* TMHP determines the outlier threshold by using the full DRG payment amount multiplied by 1.5 *or* an amount determined by selecting the lesser of the universal mean of the current base year data multiplied by 11.14 *or* the hospital's SDA multiplied by 11.14. The calculation that yields the amount is used in calculating the actual cost outlier payment. The outlier threshold is subtracted from the amount of reimbursement for the admission established under TEFRA principles, and the remainder multiplied by 70 percent to determine the actual amount of the cost outlier payment.

Hospitals should use the following formulas to calculate the day outliers for dates of admission on or after September 1, 2002. Effective September 1, 2002, (date of admission) the Universal Mean is $3,328.89.

To calculate the cost outlier amount, the cost threshold must first be determined. Three calculations and two comparisons are necessary:

A) 11.14 x Universal Mean ($3,328.89) = $37,083.83

B) 11.14 x SDA = ____________________Comparison 1: Take lesser of number A or B.

C) 1.5 x DRG Relative Weight X SDA = __________________ Comparison 2: Greater of number C and Comparison 1 is the cost threshold

Allowed amount x reimbursement rate = ______________

Result of A minus cost threshold = ___________________

Result of B x0.70 = cost outlier amount

25.2.2.5 Children's Hospitals

Inpatient hospital stays in designated children's hospitals are reimbursed according to the TEFRA reimbursement principles on a reasonable cost basis. Designated children's hospitals are reimbursed on a percentage of the hospital's standard charges derived from the hospital's most recent tentative or final Medicaid cost report settlement.

To be designated as a children's hospital, the hospital must have a provider agreement with Medicare and be engaged in delivering services to patients who are predominantly younger than 18 years of age. A designated children's hospital is excluded from the Medicare/Medicaid prospective payment system per 42 *Code of Federal Regulations* (CFR) (Subsection) 412.23.

Note: *Children's hospitals that are reimbursed according to the TEFRA methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital's fiscal year end.*

CPT only copyright 2005 American Medical Association. All rights reserved.

25.2.2.6 Hospital Transplant Center Approval

In-State Facility Approval Process

All facilities choosing to participate in the Texas Medicaid Transplant Program will be monitored and approved by HHSC. The transplant facility should be approved by Medicare as a transplant center before applying to the Texas Medicaid Program unless the transplant facility is in a designated Children's Hospital. Texas Medicaid will not reimburse for transplants in the hospitals that do not have current approval by HHSC. Exception(s) may be considered if the transplant type is not available in Texas.

All transplant facilities who wish to perform organ transplants for clients of the Texas Medicaid Program must have current certification and be in continuous compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN) criteria, receive certification from the United Network for Organ Sharing (UNOS) or the National Marrow Donor Program (NMDP). The Texas Medicaid Program does not approve or reimburse transplants in facilities that are not certified and in "good standing" with these credentialing organizations.

Those facilities whose status of "good standing" has been suspended for any reason by the national credentialing bodies will not be approved by the Texas Medicaid Program to provide transplant services until this status has been restored.

Important: *The facility must notify HHSC within three working days of any change in compliance or certification status from UNOS and NMDP. Failure to notify HHSC within three working days of any changes in compliance or certification status may result in disapproval of current and pending transplant requests or recoupment of reimbursement. Submit notification information to:*

Texas Health and Human Services Commission
1100 West 49th Street, H-310
Austin, TX 78756
Attn: Medicaid/CHIP Benefits–Transplant Facility Approvals

Out-of-State Facilities

The Texas Medicaid Program requires that all transplant facilities requesting approval to perform transplants for Texas medicaid clients must provide proof of transplant facility certification. HHSC approval is dependent upon compliance with the transplant facility criteria of the OPTN and certification from the UNOS or the NMDP. In order for the Texas Medicaid Program to pay for an out-of-state transplant, the facility and professional providers must be enrolled as Texas Medicaid providers. The out-of state transplant facilities must submit documentation about relevant transplant facility UNOS or NMDP certification as required by HHSC.

Texas licensed physicians may request prior authorization for transplant services to be performed at out-of-state facilities when the:

- Facilities are nationally recognized as Centers of Excellence.
- Required organ transplants are not available in Texas.
- Services are medically necessary, reasonable, and federally allowable.
- The client is enrolled in the Texas Medicaid Program.

25.2.3 Benefits and Limitations

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of patients. The Medicaid program also reimburses for medically necessary services in the outpatient setting to include day surgery and outpatient observation. Services must be medically necessary and are subject to the Texas Medicaid Program's utilization review requirements. Services must also be billed to TMHP per Medicaid policy and procedures.

Inpatient hospital services include the following items and services:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit including meals, special diets, and general nursing services; and an allowance for bed and board in private accommodations including meals, special diets, and general nursing services up to the hospital's charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons as certified by the physician. The authorized signature in Block 85 of the HCFA-1450 (UB-92) claim form certifies that the billing hospital has a record on file that the services provided were ordered by a physician. Additionally, the hospital must document the medical necessity for a private room such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information should be included in Block 84 or attached to the claim.
- Whole blood and packed red cells reasonable and necessary for treatment of illness or injury if they are not available without cost
- Maternity care (includes usual and customary care for all female clients)
- All medically necessary services and supplies ordered by a physician to include laboratory, radiology, and pathology
- Newborn care (includes routine newborn care, routine screenings, and specialized nursery care for newborns with specific problems)

Circumstances requiring the mother and newborn to remain in the hospital longer than two days for a routine vaginal delivery or four days for a Cesarean section must be documented. Continuation of hospitalization is covered for the infant when the mother is required to remain hospitalized for medical reasons and must be documented.

Take-home drugs, self-administered drugs, or personal comfort items are not benefits of the Medicaid program nor THSteps-CCP, except when received by prescription through the Vendor Drug Program.

CPT only copyright 2005 American Medical Association. All rights reserved.

Reimbursement to hospitals for inpatient services is limited to the Medicaid spell of illness. The spell of illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

Exceptions to the spell of illness are the following:

- A prior-approved transplant that is medically necessary because of an emergent, life-threatening condition. This exception allows an additional 30 days of inpatient care that begins with the date of the transplant. For example, if the transplant occurs on the 15th day of an inpatient stay, the additional 30 days would allow a total of 45 days.
- THSteps-eligible clients when a medically necessary condition exists.
- Some Medicaid Managed Care clients. See "Medicaid Managed Care" on page 7-4.

Important: *Medicaid reimbursement for services cannot exceed the limitations.*

Reimbursement to acute care hospitals for inpatient services is limited to $200,000 per client, per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments exceeding $200,000 are recouped. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

Note: *Dollar or day limitations are not applicable for clients younger than 21 years of age.*

25.2.3.1 Hysterectomy Services

Medically necessary hysterectomies are reimbursable when the physician obtains an appropriate acknowledgment statement from the client. Medicaid does not reimburse for hysterectomies performed for the sole purpose of sterilization.

The physician's signature acknowledging the client's sterility is not required on the claim. The acknowledgment statement must be maintained in the physician's files and is subject to retrospective review. A modifier, PM or PS, must continue to be submitted on the claim or a copy of the signed certification may be attached to the paper claim.

When TMHP receives a valid acknowledgment statement, the client's eligibility file is updated to reflect receipt. Subsequent claims TMHP receives for the hysterectomy are referenced to the acknowledgment statement.

Refer to: "Hysterectomy Acknowledgment Form" on page B-52.

25.2.3.2 Newborn Services

Eligibility Process

A child is deemed eligible for Medicaid for up to 12 months of age if the mother is receiving Medicaid at the time of the child's birth, the child continues to live with the mother, and the mother continues to be eligible for Medicaid or would be eligible for Medicaid if she were pregnant. Therefore, it is not acceptable for a hospital to require a deposit for newborn care from a Medicaid client. The child's eligibility ends if the mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother's household.

Hospitals should complete the HHSC Form 7484, "Hospital Report (Newborn Child or Children) HHSC Form 7484" on page B-51, to provide information about each child born to a mother eligible for Medicaid. If the newborn's name is known, the name must be on the form. *The use of Baby Boy or Baby Girl delays the assignment of a number.* Filing this form will expedite the assignment of a Medicaid client number for the newborn child. The form should not be completed for stillbirths. The form should be completed by the hospital within five days of the child's birth and should be sent to HHSC at the address identified on the form. The five-day time frame is not mandatory; however, prompt submission expedites the process of determining the child's eligibility. Hospitals should duplicate the form as needed. HHSC, DADS, and TMHP do not supply the forms.

Note: *Providers may call the HHSC Bureau of Vital Statistics at 1-800-452-9115 for details on how to transmit newborn information electronically.*

After receiving a completed form, HHSC verifies the mother's eligibility and within 10 days sends notices to the hospital, mother, caseworker, and attending physician if identified. The notice includes the child's Medicaid client number and the effective date of coverage. After the child has been added to the eligibility file, HHSC issues a Medicaid Identification Form (Form H3087).

Providers should submit address changes to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

The attending physician's notification letter is sent to the address on file by license number at the Texas Medical Board. It is imperative the address be kept current to ensure timely notification of attending physicians. Physicians should submit address changes to the following address:

Texas Medical Board
Customer Information, MC-240
PO Box 2018
Austin, TX 78767-2018

Claims submitted for services provided to a newborn child eligible for Medicaid are filed using the newborn child's Medicaid client number.

Note: *When billing for a Medicaid Managed Care client, providers must adhere to the Medicaid Managed Care health plans' guidelines for newborn billing.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Screening

A newborn hearing screening must be offered to all newborns as part of their newborn hospital stay. This screening procedure is not diagnostic and will not reimburse separately from the usual newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants.

For more information about newborn hearing screening contact:

Bureau of Children's Health
1100 West 49th Street
Austin, TX 78756
1-512-458-7726
www.dshs.state.tx.us/audio/default.shtm

All newborns who have abnormal screening results should be referred to a local Program for Amplification for Children in Texas (PACT) provider for follow-up care. PACT provides services and hearing aids for children from birth through 20 years of age who have permanent hearing loss and are eligible for Medicaid. Obtain a current list of PACT providers at www.dshs.state.tx.us/audio/program.shtm or the following address:

DSHS
PACT Health Screening Branch
1100 West 49th Street, MC-1918
Austin, TX 78756-3199
1-800-252-8023

Refer newborns with suspected genetic disorders or with a positive newborn screening test for a genetic work-up as appropriate.

Refer to: "Genetic Services" on page 22-1.

Hepatitis B Immunizations

Newborns should be given the first dose of hepatitis B vaccine before discharge from the hospital or birthing center. Hepatitis B vaccine for newborns is provided by the Texas Vaccines for Children (TVFC) Program. Hospitals and birthing centers may obtain vaccine at no cost by enrolling in the TVFC Program. For more information on enrolling in the TVFC Program, refer to "Texas Vaccines for Children Program Packet" on page H-6 or call the DSHS Immunization Division toll-free at 1-800-252-9152.

The recommended administration of the hepatitis B vaccine to newborns before discharge from the hospital has been established as the standard of care and should not be considered as a reason to upcode to a different DRG. The reimbursement for the administration of hepatitis B vaccine to newborns is included in the DRG payment. The Texas Medicaid Program will not reimburse for the cost of the vaccine for newborns. Providers must enroll in the TVFC Program to obtain vaccine at no cost.

Consult the vaccine package insert for information on proper administration and dosing.

25.2.3.3 Psychiatric Services

Inpatient admissions for adults and children to acute care hospitals for psychiatric conditions are a benefit of the Texas Medicaid Program. Admissions must be medically necessary and are subject to the Texas Medicaid Program's retrospective utilization review (UR) requirements. The UR requirements are applicable regardless of the hospital's designation of the psychiatric unit versus medical/surgical unit.

Admissions for the single diagnosis of chemical dependency or abuse (such as alcohol, opioids, barbiturates, and amphetamines) without an accompanying medical complication are not a benefit of the Texas Medicaid Program. Additionally, admissions for chronic diagnoses such as mental retardation, organic brain syndrome, or chemical dependency or abuse are not covered benefits for acute care hospitals without an accompanying medical complication or medical condition. The HCFA-1450 (UB-92) claim form must indicate all relevant diagnoses that necessitate the inpatient stay.

Additional coverage may be allowed for clients who are eligible for Medicaid and younger than 21 years of age through THSteps-CCP.

Note: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. Psychiatrists who provide behavioral health services to clients in NorthSTAR must be members of the NorthSTAR behavioral health organization (BHO).*

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for more information.

"Medicaid Managed Care" on page 7-4 for more information or contact the client's BHO.

Providers rendering services to STAR and STAR+PLUS clients must contact the respective managed care plan.

25.2.3.4 Rehabilitation Services

Inpatient rehabilitation services are covered benefits when provided in a general acute care hospital setting with an acute condition or an acute exacerbation of a chronic illness in which rehabilitation services are medically necessary in the usual course, treatment, and management of the illness.

All services must be documented as medically necessary and ordered by a physician. When submitting the claim, the hospital must include the physician's written treatment plan supporting the medical necessity of the hospitalization and services.

All rehabilitation services are subject to Medicaid benefit limitations including the spell of illness. Extensions beyond the regular scope of Medicaid may be offered under THSteps-CCP.

Refer to: "Physical Therapists/Independent Practitioners" on page 35-1 for more information.

"Benefits and Limitations" on page 43-14.

CPT only copyright 2005 American Medical Association. All rights reserved.

25.2.3.5 Organ/Tissue Transplant Services

Prior Authorization

Prior authorization for a transplant is *mandatory* and approved *only* if the physician indicates the transplant will be performed in an approved Texas Medicaid transplant facility. If the facility indicated on the original authorization request is not a Medicaid-approved transplant facility, the physician needs to designate a different approved facility before the authorization is given. Transplant facilities are reviewed for approval each year. TMHP issues prior authorizations for dates within the facility approval period.

Note: *If the client is a Medicaid Managed Care client, all prior authorizations for transplants will need to be obtained from the client's health plan.*

If the transplant has not been performed by the end of the authorization period, physicians need to apply for an extension. Fax inquiries for authorization extensions to TMHP Special Medical Prior Authorization at 1-512-514-4213. Prior authorization is required for the following services (this noninclusive list is subject to change):

- Stem cell transplant
- Heart transplant
- Single lung transplant with bronchial anastomosis
- Double sequential lung transplant with bilateral bronchial anastomosis
- Combined heart/lung transplant
- Liver transplant
- Kidney transplant

The prior authorization number (PAN) must be entered in Block 63 (Treatment Authorization Code) of the HCFA-1450 (UB-92) claim form.

Cornea transplants do not require prior authorization.

Documentation supplied with the prior authorization request should include a complete history and physical, a statement of the client's current medical problems and status, and meet the criteria specified in the individual transplant policy for which the facility is requesting prior authorization.

If a solid organ transplant is not prior authorized, services directly related to the transplant within the three day preoperative and six weeks postoperative period also will be denied, regardless of who provides the service, (i.e., laboratory services, status-post visits, and radiology services). Services unrelated to the transplant surgery will be paid separately.

A transplant request signed by a physician associated with one of the Texas Medicaid Program approved transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution's transplant protocol.

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Heart Transplants

Heart transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the heart transplant procedure on a long-term basis. In order to be reimbursed by the Texas Medicaid Program, the facility must document a critical medical need with the New York Heart Association (NYHA) Class III or IV cardiac disease as shown below:

- *Class III.* Patients with cardiac disease resulting in marked limitation of physical activity. They are comfortable at rest. Less than ordinary activity (e.g., mild exertion) causes fatigue, palpitation, dyspnea, or anginal pain
- *Class IV.* Patients with cardiac disease resulting in inability to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency or of the anginal syndrome may be present even at rest. If any physical activity is undertaken, discomfort is increased.

Or the facility must document:

- Congenital heart disease
- Valvular heart disease
- Viral cardiomyopathy
- Familial or restrictive cardiomyopathy
- Heart transplant will result in a return to improved functional independence
- Absence of comorbidities, such as:
  - Severe pulmonary hypertension
  - End-stage renal, hepatic, or other organ dysfunction unrelated to primary disorder
  - Uncontrolled HIV infection or AIDS-defining illness
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
- Documented compliance with other medical treatment regimens and plan of care. Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen

Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen

Prior authorization for a heart/lung transplant must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant will be considered on an individual basis.

CPT only copyright 2005 American Medical Association. All rights reserved.

All heart transplant services provided by facilities and professionals must be prior authorized by HHSC or its designee.

Documentation supplied with the prior authorization request must address the criteria above and must be medically necessary, reasonable, and federally-allowable.

Liver Transplants

Authorization of liver transplantation requires documentation of life-threatening complications of acute liver failure or chronic end-stage liver disease.

Liver transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the liver transplant procedure on a long-term basis. In order to be reimbursed by the Texas Medicaid program, the facility must document the following:

- A critical medical need with a likelihood of a successful clinical outcome
- Liver disease in these categories:
    - Primary cholestatic liver disease
    - Other cirrhosis: alcoholic, hepatitis C (non-A, non-B), hepatitis B
    - Fulminant hepatic failure
    - Metabolic diseases
    - Malignant neoplasms
    - Benign neoplasms
    - Biliary atresia
- Absence of comorbidities such as:
    - End-stage cardiac, pulmonary, or renal disease unrelated to primary disorder
    - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
- Documented compliance with other medical treatment regimens and plan of care. Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen

Documented psychiatric instability is a contraindication for transplant if it is severe enough to jeopardize incentive for adherence to medical regimen.

Payment for liver transplant professional services will be made under procedure code 2/8-47135 or 2/8-47136. These procedures include six months of professional postoperative care. Separate charges for a choledochojejunostomy (Roux-en-y) should be denied as part of the liver transplant. Parenteral immunosuppressant therapy is approved for a period of 12 months following the date of discharge from the hospital, conditional upon the Medicaid-eligibility of the client.

Two assistant surgeons will be allowed for liver transplant surgery using procedure codes 2/8-47135 and 2/8-47136.

Lung Transplants

Lung transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the lung (single or double) transplant procedure on a long-term basis. In order to be reimbursed by the Texas Medicaid Program, the facility must document the following:

- A critical medical need with a likelihood of a successful clinical outcome
- Symptoms at rest that are directly related to chronic pulmonary disease and which result in severe functional limitation
- End-stage pulmonary diseases in these categories:
    - Obstructive lung disease
    - Restrictive lung disease
    - Cystic fibrosis
    - Pulmonary hypertension
- Absence of comorbidities such as:
    - End-stage renal, hepatic, or other organ dysfunction unrelated to primary disorder
    - Multiple organ compromise secondary to infection, malignancy, or a condition with no known cure
- Documented compliance with other medical treatment regimens and plan of care. Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen

Documented psychiatric instability is a contraindication for transplant if it is severe enough to jeopardize incentive for adherence to medical regimen.

Prior authorization for a heart/lung transplant must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant will be considered on an individual basis.

Program Limitations

If a transplant has been prior authorized as medically necessary by HHSC or its designee because of an emergent, life-threatening situation, a maximum of 30 days of inpatient hospital services during Title XIX spell of illness may be covered, beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay. Physician services that HHSC or its designee determines to be reasonable and medically necessary also are covered during the 30-day period. Day limitations do not apply for clients under 21 years of age.

Expenses for a single inpatient hospital admission for an authorized transplant are not included in the annual $200,000.00 inpatient expenditure cap. Dollar limitations do not apply for clients under 21 years of age.

All program coverage limits are applied.

CPT only copyright 2005 American Medical Association. All rights reserved.

The above guidelines also apply to one subsequent re-transplant, because of rejection, as a lifetime benefit. A subsequent transplant is not included in the prior authorization for the initial transplant; it must be prior authorized separately.

Reimbursement for transplant is limited to an initial transplant as a lifetime benefit and one subsequent re-transplant because of rejection.

Transplants also are covered under the Medicare program; therefore, for clients eligible for Medicare and Medicaid, Medicaid will pay only the deductible or coinsurance portion as applicable. Prior authorization must be obtained for Medicaid only clients; authorization will not be given for Medicare/Medicaid-eligible clients. Medicaid will not pay a transplant service denied by Medicare for a Medicare-eligible client.

If a Medicaid client receives a transplant in a facility that is not approved by the Texas Medicaid Program, the client must be discharged from the facility to be considered to receive other medical and hospital benefits under the Texas Medicaid Program. Coverage for other services needed as a result of complications of the transplant may be considered when medically necessary, reasonable, and federally allowable. Texas Medicaid will not pay for routine post-transplant services for transplant patients in facilities that are not approved by the Texas Medicaid Program. Services unrelated to the transplant surgery will be paid separately.

Important: *Benefits are not available for any experimental or investigational services (including xenotransplantation and artificial/bioartificial liver transplants), supplies, or procedures.*

The DRG payment for the transplant includes procurement of the organ and services associated with the organ procurement. Medicaid does not pay for solid organs procured by a facility for supply to an organ procurement organization (OPO). The *Omnibus Budget Reconciliation Act* of 1986 (OBRA 86) Public Law 99-509 added Section 1138 of the *Social Security Act,* which defines conditions of participation for institutions in the organ procurement program. Organ procurement costs are not reimbursed to a hospital that fails to meet the conditions of participation. The specific guidelines may be found in the appropriate areas of 42 CFR Parts 405, 413, 441, 482, and 485. Documentation of organ procurement must be maintained in the hospital's medical record. Expenses incurred by a living donor for transplants will not be reimbursed separately.

Refer to: "Reimbursement" on page 2-2.

25.2.4 Utilization Review

Utilization review activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system or TEFRA are required by Title XIX of the *Social Security Act*, Sections 19-02 and 19-03. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need, of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to utilization review monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of the Texas Medicaid Program.

Utilization review may also occur by an examination of particular claims or services not within the usual screening review when a specific utilization review is requested by HHSC or the Texas Attorney General's Office.

25.2.4.1 Responsibilities

The HHSC Office of Inspector General (OIG)/Utilization Review (UR) Unit is responsible for retrospective review of inpatient DRG and TEFRA admissions. These reviews are accomplished through onsite visits or on a mail-in basis.

25.2.4.2 Utilization Review Process

The inpatient utilization review process for admissions reimbursed under the DRG prospective payment system consists of sampling medical records of paid Medicaid claims. The review process consists of three major components:

- *Admission review*. Determination of the medical necessity of the admission. For purposes of the Texas Medical Review Program (TMRP) and TEFRA, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.
- *Quality review*. Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.
- *DRG validation*. Determination that the critical elements necessary to assign a DRG are present in the medical record and the diagnosis and procedures are sequenced correctly. The critical elements are age, sex, admission date, discharge date, discharge status, principal diagnosis, secondary diagnosis (complications or comorbidity), and principal and secondary procedures.

The HHSC OIG UR Unit staff reviews the complete medical record to make decisions about the medical necessity of the admission, validity of the DRG, and quality of care. The medical record must reflect that any services reimbursed

CPT only copyright 2005 American Medical Association. All rights reserved.

by the Texas Medicaid Program were ordered by the attending physician, certified nurse-midwife, or nurse practitioner.

Important: *All services, supplies, or items billed are medically necessary for the client's diagnosis or treatment as certified on claim submission.*

Refer to: "Provider Certification/Assignment" on page 1-8

When an admission denial or a denial of continued stay is issued, or when a technical denial becomes final, all money is recouped from the hospital for the admission or the days of stay denied. When a DRG is reassigned as a result of utilization review, the payment to the hospital is adjusted.

If an inpatient admission is denied, but a physician's order is present documenting the client originally was placed in observation, the UR unit may authorize the rebilling of services rendered during the first 23 hours on an outpatient claim.

Admission Review

Review personnel assess the medical necessity of an admission by comparing documentation present in the medical record with elements in the TMRP Hospitalization Screening Criteria. For an admission to be approved, an indication for hospitalization and treatment criteria must be met. Cases that do not meet both screening criteria are referred to a physician consultant for determination of the medical necessity of the inpatient admission. If the TMRP Hospitalization Screening Criteria are met but the medical necessity of the admission is still questionable, the case is referred to a physician consultant for a determination. If a physician consultant determines the admission is not medically necessary, a denial is issued.

Important: *Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG Medicaid Program Integrity (MPI) for determination of a sanction.*

Important: *Effective for admissions on or after September 1, 2006, the HHSC/OIG/UR Unit will use* evidence-based guidelines *to perform retrospective utilization reviews of inpatient hospital claims for Medicaid clients.*

Readmission Review

If a hospital admission or readmission occurs within 30 days of a previous discharge from the same or a different hospital for the same or closely related diagnosis, or for a condition identified during the previous admission, it may be reviewed for medical necessity.

Transfers from one facility to another and readmissions are also subject to review.

HASC Surgical Procedures

Inpatient admissions for surgical procedures listed as ambulatory surgical codes in the current fee schedule are denied if documentation does not support the need for the inpatient admission.

Quality Review

Each Medicaid case is evaluated for quality client care, adequacy of discharge planning, and medical stability of the patient at discharge. To accomplish this review, CMS Generic Quality Screens and discharge screens included in the TMRP Hospitalization Screening Criteria are used. Potential quality of care issues are identified by the physician. HHSC contracts with physician consultants to review medical records for quality of care. Physician consultants, of the specialty related to the care rendered, may make clinical recommendations or determine corrective actions when deemed appropriate. Child and adolescent psychiatrists may make recommendations based on review of inpatient psychiatric services provided to Medicaid clients younger than 21 years of age. Failure to verify completion of any corrective action recommendation within the specified time frame may result in referral of the case to the HHSC OIG, MPI section, for possible payment hold (withholding Medicaid claims payments until verification of the completed corrective action has been received) and/or exclusion from the Texas Medicaid Program.

Diagnosis-Related Group Validation

Each medical record is reviewed to validate the elements critical to the DRG assignment. These elements are the client's age, sex, admission date, discharge date, discharge status, principal diagnosis, secondary diagnoses (complications or comorbidities), and principal and secondary procedures. Documentation of these critical DRG elements in the medical record is evaluated for the correlation to the information provided on the claim form.

The principal diagnosis is the diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The principal diagnosis must be treated or evaluated during this admission to the hospital.

The secondary diagnoses are conditions that affect patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, increased nursing care and/or monitoring, *or* has clinically significant implications for future healthcare needs.

The coding of diagnoses that have clinically significant implications for future health care needs applies *only* to newborns and *must* be identified by the physician. Normal newborn conditions or routine procedures are not to be considered as complications or comorbidities for DRG assignment.

Refer to: "Medicaid Program Limitations and Exclusions" on page 1-17

If the principal diagnosis, secondary diagnoses (complications or co-morbidities), or procedures are not substantiated in the medical record; sequenced correctly; or have been omitted, codes may be deleted, changed, or added. All diagnosis/procedure coding changes potentially resulting in a DRG change are referred to a physician consultant. When it is determined that the diagnoses and procedures are substantiated and sequenced correctly,

CPT only copyright 2005 American Medical Association. All rights reserved.

the information will be entered into the applicable version of the Grouper software for a DRG determination. The CMS-approved DRG software considers each diagnosis and procedure and the combination of all codes and elements to make a determination of the final DRG assignment. When the DRG is reassigned, the payment to the provider is adjusted.

25.2.4.3 Recommendations to Enhance Compliance with Texas Medicaid Fee-for-Service Hospital Billing

The following information highlights an area for physician and hospital providers where collaboration in client care delivery exists but can improve. The Texas Medicaid Program, through its hospital utilization review activities, has identified this area for both compliance with provider responsibilities and the reduction of the submission of inappropriate inpatient hospital claims. To enhance compliance with Texas Medicaid fee-for-service hospital billing and decrease the submission of inappropriate inpatient hospital claims, adhere to the following suggestions:

- Physicians and hospital personnel, primarily case managers, utilization review, and billing staff, should become familiar with the Hospital Inpatient Screening Criteria used by the HHSC staff in performing reviews of hospital medical records related to paid, inpatient hospital claims. The criteria provide guidelines for review staff to assist with the determination of medical necessity of inpatient stays. The Medicaid Hospital Inpatient Screening Criteria is available on the HHSC website at www.hhs.state.tx.us/OIG/screen/SC_TOC.shtml.
- Initially admit clients in observation status if the physician feels that it is reasonable to expect that the client may be able to be discharged within 24 hours. If the client is initially admitted in observation status (per physician order), the stay is more than 24 hours, and the hospital submits an inpatient claim, the hospital is given the opportunity to rebill the first 24 hours of services on an outpatient claim if the inpatient claim is subsequently denied per retrospective utilization review.
- When a client is admitted to the hospital as an inpatient and is discharged in less than 24 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This billing practice is acceptable when the physician makes the changes to the admitting order before the hospital submits the claim for payment.
- This correction in admission status avoids errors in billing and the potential need for a more lengthy appeal process. If the physician admitting orders do not accurately reflect the services provided, the hospital inpatient claim may be denied and the inappropriate payment recovered from both the hospital and the admitting physician.

25.2.4.4 Hospitals Reimbursed Under TEFRA

For all Medicaid admissions identified for review, the TEFRA review process consists of the following major components:

- *Admission review*. Determination of the medical necessity of the admission. For purposes of the TMRP and TEFRA, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.
- *Continued stay review*. Determination of the medical necessity of each day of stay.
- *Quality of care review*. Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.

Important: *TEFRA Hospitals are required to submit all charges.*

HHSC OIG UR Unit staff review the complete medical record to make decisions about the medical necessity of the admission, continued stay, and quality of care.

25.2.4.5 Technical Denials (DRG Prospective Payment and TEFRA)

On Site Reviews

The following information describes on site reviews:

- If the complete medical record is not made available during the on site review, a preliminary technical denial is issued on site. The hospital is allowed 60 calendar days from the date of the exit conference to provide the complete medical record to HHSC. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.
- If a complete medical record is made available on site, but a copy is required for further review, and the copy is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax machine. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Note: *A notarized business record affidavit is required for paper and electronic copies of requested medical records. A provider failing to provide this documentation must resubmit the requested records with the affidavit.*

Refer to: “Retention of Records and Access to Records and Premises” on page 1-6

Mail-In Reviews

If the complete medical record is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax machine. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the

CPT only copyright 2005 American Medical Association. All rights reserved.

complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Hospital inpatient claim payments that have been recouped because of a technical denial may not be rebilled on an outpatient claim.

Note: *A notarized business record affidavit is required for paper and electronic copies of requested medical records. A provider who fails to provide this documentation must resubmit the requested records with the affidavit.*

Refer to: “Retention of Records and Access to Records and Premises” on page 1-6

25.2.4.6 Acknowledgment of Penalty Notice

Hospitals must have on file a signed acknowledgment from the physician stating that the physician received the following notice:

Notice to Physicians: Medicaid payment to hospitals is based, in part, on each client’s principal and secondary diagnoses and the major procedures performed on the client, as attested to by the client’s attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential information required for payment of federal or state funds, may be subject to fine, imprisonment, or civil penalty under applicable federal and state laws.

Important: *The acknowledgment of penalty notice must be specific to the Texas Medicaid Program. Medicare penalty notices are not accepted.*

25.2.4.7 Sanctions

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG MPI for determination of a sanction.

25.2.4.8 Utilization Review Appeals

Hospital providers may appeal adverse decisions by HHSC’s UR unit to the HHSC UR/Medical Appeals unit. A UR/Medical Appeals decision is the final administrative decision of HHSC. Neither HHSC’s UR unit nor TMHP are responsible for UR appeals.

Refer to: “Utilization Review Appeals” on page 6-7.

25.2.5 Claims Information

Inpatient hospital services must be submitted to TMHP in an approved electronic format or on a HCFA-1450 (UB-92) claim form. Providers must purchase HCFA-1450 claim forms from the vendor of their choice; TMHP does not supply them.

Hospitals may submit *information only* claims to TMHP when one of the following situations exists. Hospitals should use TOB 110 to file these claims:

- Inpatient 30-day spell of illness benefit is exhausted.
- Payment made by a third party resource/other insurance exceeds the Medicaid allowed amount.

Refer to: “HCFA-1450 (UB-92) Claim Filing Instructions” on page 5-32 for claims completion instructions.

25.2.5.1 Claim Filing Resources

Refer to the following sections and forms on the page numbers listed below when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
HCFA-1450 (UB-92) Claim Filing Instructions	5-32
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
Medicaid Audit Request for Claims Summary	B-54
Hospital Report (Newborn Child or Children) HHSC Form 7484	B-51
Hospital-Based ASC Claim Example	D-17
Hospital Inpatient Claim Example	D-18
Hospital Outpatient	D-18
Acronym Dictionary	F-1

25.3 Outpatient

25.3.1 Enrollment

To be eligible to participate in the Texas Medicaid Program, a hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process.

All providers of laboratory services must comply with CLIA rules and regulations. Providers not complying with CLIA will not be reimbursed for laboratory services.

Hospital Eligibility Through Change of Ownership

Under procedures set forth by CMS and HHS, a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued if the hospital obtains recertification as a Title XVIII (Medicare) hospital and a new Title XIX (Medicaid) agreement between the hospital and HHSC.

Contact the TMHP Contact Center at 1-800-925-9126 to obtain the Medicaid hospital participation agreement.

CPT only copyright 2005 American Medical Association. All rights reserved.

25.3.1.1 Hospital Ambulatory Surgical Center

Hospitals certified and enrolled in the Texas Medicaid Program are assigned a nine-digit HASC provider identifier exclusively for billing day surgeries.

Refer to: “Day Surgery” on page 25-16.

“Ambulatory Surgical Center (ASC)” on page 9-1 for more information.

25.3.1.2 Hospital Ambulance

A hospital supplying ambulance services must enroll *separately* from the hospital.

Refer to: “Enrollment” on page 8-2 for ambulance enrollment requirements.

25.3.1.3 Certified Registered Nurse Anesthetist

Hospital-employed CRNAs must enroll and bill according to instructions in “Certified Registered Nurse Anesthetist (CRNA)” on page 15-1.

Note: *Hospitals cannot bill for CRNA services using their HASC or hospital provider identifier.*

25.3.1.4 Medicaid Managed Care Enrollment

To be reimbursed for services provided to Medicaid Managed Care clients, hospital providers must enroll with the Medicaid Managed Care health plan in which the clients are enrolled.

Refer to: “Medicaid Managed Care” on page 7-4 for more information.

25.3.2 Reimbursement

Outpatient services are reimbursed on a reasonable cost based on a percentage of the hospital’s most recent tentative Medicaid cost report settlement. Reimbursement for outpatient hospital services for high-volume providers is 84.48 percent of allowable cost. For the remaining providers, reimbursement for outpatient hospital services is 80.3 percent of allowable cost. A high-volume provider is defined as one that was paid at least $200,000 during calendar year 2000.

All clinical laboratory services are reimbursed at 60 percent of the prevailing charge except for those hospitals identified by Medicare as sole community hospitals. These hospitals are reimbursed at 62 percent of the prevailing charges for services provided to clients in the outpatient setting and 60 percent to clients in the inpatient setting. Clinical pathology consultations continue to be allowed for reimbursement.

Refer to: “Provider Cost and Reporting” on page 25-3 for more information about the calculation of the interim rate.

“Clinical Laboratory Improvement Amendments (CLIA)” on page 26-2 for important information.

25.3.2.1 Day Surgery

Reimbursement for outpatient hospital surgery is limited to the lesser of the amount reimbursed to an ambulatory surgical center (ASC) for similar services, the hospital’s actual charge, or the allowable cost determined by HHSC. Hospitals must bill *all* scheduled day surgeries under their HASC provider identifier using TOB 131.

To avoid delays in claims processing payment, file scheduled outpatient surgical procedures using the hospital’s ASC/HASC provider identifier and appropriate type of service (TOS) F-Healthcare Common Procedure Coding System (HCPCS) procedure code. ASC/HASC providers indicate the appropriate TOS F-HCPCS facility procedure code in Block 44 of the HCFA-1450 (UB-92) claim form, instead of the *International Classification of Diseases Ninth Revision Clinical Modification* (ICD-9-CM) procedure code in Block 80 of the HCFA-1450 (UB-92) claim form.

File claims for emergency, unscheduled outpatient surgical procedures with separate charges (lab, radiology, anesthesia, and emergency room) for all services using TOB 131 and the hospital’s provider identifier.

Reimbursement of ASC/HASC procedures is based on the CMS-approved Ambulatory Surgical Code Groupings (1 through 9 per CMS and Group 10 per HHSC) payment schedule. Providers are sent a list of these codes and payment categories after enrollment with the Texas Medicaid Program and when periodic updates occur. The rates implemented by Medicaid on April 1, 1995, remain in effect. To acquire a list of approved procedures, call the TMHP Contact Center at 1-800-925-9126.

Refer to: “Day Surgery” on page 25-16 for more information on day surgery and outpatient observation.

“Procedure Codes Requiring Prior Authorization” on page 36-343.

“TMHP Website” on page 3-2 for more information on obtaining fee schedules.

ASC/HASC Global Services

The ASC/HASC payment represents a global payment and includes room charges and supplies. Covered services provided are billed as one inclusive charge. All facility services provided in conjunction with the surgery (for example, laboratory, radiology, anesthesia supplies, medical supplies) are considered part of the global payment and cannot be itemized or billed separately.

Routine X-ray and laboratory services, directly related to the surgical procedure being performed, are not reimbursed separately. All nonroutine laboratory and X-ray services, provided with emergency conditions, may be billed separately with documentation that the complicating condition arose after the initiation of the surgery.

No separate payment outside of the ASC/HASC reimbursement rate will be made for prosthetic devices. Medical and prosthetic devices such as implantable pumps and intraocular lenses, may be supplied by the ASC/HASC and implanted, inserted or otherwise applied during a covered surgical procedure.

CPT only copyright 2005 American Medical Association. All rights reserved.

Multiple surgeries

When multiple surgical procedures are performed on the same day, only the procedure with the highest surgical code grouping is reimbursed. Surgical procedures performed in the hospital's outpatient departments (emergency or treatment rooms) are to be billed under the hospital's provider identifier, using TOB 131 (outpatient claim).

Elective/Scheduled Day Surgeries

These procedures are for clients who are scheduled for a day surgery procedure and are not inpatient at the time the day surgery is performed. Providers must bill (TOB 131) the scheduled day surgery as an outpatient procedure using the HASC provider identifier.

Complications following Elective/Scheduled Day Surgeries

If a condition of the scheduled day surgery requires additional care beyond the recovery period, the client may be placed in outpatient observation (stay less than 24 hours). The observation period must be billed on an outpatient claim (TOB 131) using the hospital's provider identifier. If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation placement (excluding the surgical procedure) should be included on the inpatient claim (TOB 111) using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure should still be billed as an outpatient procedure under the HASC provider identifier. Specific guidelines for billing observation placement as an outpatient claim are found under "Hospital Outpatient Observation Room Services" on page 25-25.

Inpatient Admissions After Day Surgery

If a complication occurs for which the client requires inpatient admission immediately following the day surgery (no observation period), the day surgery must be billed as an outpatient procedure (TOB 131), using the hospital's HASC provider identifier. The inpatient admission is to be billed as an inpatient claim (TOB 111), using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure should not be included on the inpatient claim. The inpatient admission *must* be medically necessary and is subject to retrospective review.

Emergency/Unscheduled Day Surgeries

These procedures are for clients who require an unscheduled (emergency) day surgery procedure and are not inpatient at the time the day surgery is performed.

If a client is first treated in the emergency room and then requires emergency surgery as an outpatient, claims for emergency, unscheduled outpatient surgical procedures should be filed itemizing each service, such as room charge, laboratory, radiology, anesthesia, and supplies. Providers must bill unscheduled day surgery procedures and emergency services as outpatient procedures. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status. The observation period must be billed on the same outpatient claim.

Providers *must* bill the unscheduled day surgery procedures and emergency services as outpatient procedures (TOB 131) using the hospital's provider identifier. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status (stay less than 24 hours). The observation period must be billed on the same outpatient claim (TOB 131) using the hospital's provider identifier. Specific guidelines for billing observation placement as an outpatient claim are found under "Hospital Outpatient Observation Room Services" on page 25-25.

Complications following Emergency/Unscheduled Day Surgery

If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation status (excluding surgical procedures and emergency services) should be included on the inpatient claim (TOB 111) using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery and emergency services should not be included on the inpatient claim since they are to be billed (TOB 131) as outpatient procedures under the hospital's provider identifier. Specific guidelines for billing observation placement as an outpatient claim are found under "Hospital Outpatient Observation Room Services" on page 25-25.

ASA Physical Status and Heart Disease Classifications

If a client is admitted for a day surgery procedure—whether scheduled or emergency—and has either an American Society of Anesthesiologists (ASA) Classification of Physical Status of III, IV, or V or Classification of Heart Disease III or IV (refer to Texas Medicaid Hospital Screening Criteria), the procedure may be considered an inpatient procedure and billed on an inpatient claim (TOB 111) using the hospital's provider identifier. The reason for the surgery (principal diagnosis), any additional substantiated conditions, and the procedure must be included on one inpatient claim.

The ASA classifications of physical status consist of five classes:

- *Class I*. A patient who has no organic disease or in whom the disease is localized and causes no systemic disturbance.
- *Class II*. A patient exhibiting *mild* to moderate systemic disturbance that may or may not be associated with the surgical complaint and that interferes only moderately with the patient's regular activities and general physiologic equilibrium.

Example: *Non- or only slightly-limiting organic heart disease, mild diabetes, hypoglycemia, essential hypertension, or anemia; extreme obesity; chronic*

CPT only copyright 2005 American Medical Association. All rights reserved.

bronchitis.

- *Class III*. A patient exhibiting *severe* systemic disturbance that may or may not be associated with the surgical complaint and that seriously interferes with the patient's activities.

Example: *Severely limiting organic heart disease, severe diabetes with vascular complications; moderate to severe degrees of pulmonary insufficiency; angina pectoris or healed myocardial infarction.*

- *Class IV*. A patient exhibiting *extreme* systemic disturbance that may or may not be associated with the surgical complaint, that interferes with the patient's regular activities, and that has already become life-threatening.

Example: *Organic heart disease with marked signs of cardiac insufficiency present (for example, cardiac decompensation); persistent anginal syndrome, or active myocarditis; advanced degrees of pulmonary, hepatic, renal, or endocrine insufficiency present.*

- *Class V*. The rare person who is *moribund* (in a dying state) before operation, whose preoperative condition is such that he or she is expected to die within 24 hours even though not subjected to the additional strain of operation.

Example: *Burst abdominal aneurysm with profound shock; major cerebral trauma with rapidly increasing intracranial pressure; massive embolus.*

The Classification of Heart Disease consists of four classes:

- *Class I*. No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnea, or anginal pain.
- *Class II*. Slight limitation of physical activity. Comfortable at rest, but ordinary physical activity results in fatigue, palpitation, dyspnea, or anginal pain.
- *Class III*. Marked limitation of physical activity. Comfortable at rest, but less than ordinary activity causes fatigue, palpitation, dyspnea, or anginal pain.
- *Class IV*. Unable to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency, or of the anginal syndrome, may be present even at rest. If any physical activity is undertaken, discomfort occurs.

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

Incomplete Day Surgeries

When ASC/HASC providers bill the Texas Medicaid Program for an incomplete surgical procedure, the following information *must* be included on the claim:

- Modifier 73 or 74
- Facilities must use either the following diagnosis codes or modifier to indicate an incomplete surgical procedure, TOS F:

Diagnosis Code	Description
V641	Surgical or other procedure not carried out because of contraindication
V642	Surgical or other procedure not carried out because of patient's decision
V643	Procedure not carried out for other reasons

Claims billed with diagnosis codes V641, V642, V643 and modifier 73 and 74 suspend for review of the medical documentation submitted with the claim. Providers must submit the operative report, the anesthesia report, and state why the operation was not completed.

Reimbursement to ASC/HASC facilities for canceled or incomplete surgeries because of patient complications, is made according to the following criteria, depending on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of ASC group payment schedule for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources
- Reimburse at 33 percent of ASC group payment schedule up to the administration of anesthesia
- Reimburse at 50 percent of ASC group payment schedule after the administration of anesthesia but before incision
- Reimburse at 100 percent of ASC group payment schedule after incision

Surgeries canceled because of incomplete preoperative procedures are *not* reimbursed.

25.3.2.2 Revenue Codes (Outpatient Hospital)

UB-92 revenue codes must be used to bill outpatient hospital facility services. In some instances, a HCPCS procedure code is required in addition to the revenue code for accurate claims processing:

Revenue Code	Description	Comments
	Pharmacy	
B-250	General classification	
B-251	Generic drugs	
B-252	Non-generic drugs	
B-253	Take Home drugs	Not a benefit
B-254	Drugs incident to other diagnostic services	
B-255	Drugs incident to radiology	
B-256	Experimental drugs	Not a benefit
B-257	Nonprescription drugs

25.3.3 Benefits and Limitations

Outpatient hospital services are diagnostic, therapeutic, and rehabilitative services that are provided to clients by or under the direction of a physician in a licensed hospital setting.

Benefits do not include drugs and biologicals taken home by the client. Supplies provided by a hospital supply room for use in physicians' offices in the treatment of clients in the outpatient setting are not reimbursable.

Take-home drugs and supplies are covered in the outpatient setting for outpatients when supplied by prescription through the Vendor Drug Program.

Outpatient hospital services include those services performed in the emergency room (ER) clinic or observation room. In instances of sudden illness or injury, the client may receive treatment in the emergency room and be discharged, placed on observation status, or admitted as an inpatient. If a client goes from the emergency room to an observation room, the hospital is reimbursed only for the observation room charges: not the emergency room charges. If a client visits the emergency room more than once in one day, the times must be given for each visit. If the client ultimately is admitted as an inpatient within 24 hours of treatment in the emergency room or clinic, the emergency room or clinic charges must be billed on the inpatient hospital claim form as an ancillary charge. The date of inpatient admission is the date the client initially was seen in the emergency room or clinic.

Outpatient hospital services must be itemized by date of service. Procedure repeated over a period of time should be billed for each separate date of service. Do *not* combine multiple dates of service on the same line detail.

Medicaid pays the clinic registration fee in lieu of other benefits when a hospital provides outpatient services without charge, and if the fee is less than what the Medicaid payment would be for the service.

Refer to: "Medicaid Program Limitations and Exclusions" on page 1-17 for more information about noncovered items/services.

25.3.3.1 Emergency Department Services

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to clients who present for immediate medical attention. The facility must be available 24 hours a day. Hospital-based emergency departments are reimbursed for services based on a reasonable cost, based on the hospital's most recent tentative Medicaid cost report settlement. The reasonable cost is reduced by a percentage determined by the state.

CPT only copyright 2005 American Medical Association. All rights reserved.

Emergency department room charges may be billed using the following revenue codes:

Revenue Code	Description
B-450 *or* B456 *or* B-459	Emergency room *or* Emergency room, urgent care *or* Emergency room–other
B-761	Treatment room
B-762	Observation room

Emergency department ancillary services include laboratory services, radiology services, respiratory therapy services, and diagnostic studies, such as EKGs, CT scans, and supplies. Ancillary services should be billed on a HCFA-1450 (UB-92) claim form using the appropriate procedure codes such as the Current Procedural Terminology (CPT) code or the HCPCS code indicating the procedures or services performed.

According to federal legislation, if any individual presents at the hospital's emergency department requesting an examination or treatment, the hospital must provide an appropriate medical screening examination and stabilization services within the capability of the hospital's emergency department, including ancillary services routinely available to the emergency department, to determine whether an emergency medical condition exists.

Medicaid claims administrators and Medicaid Managed Care Organizations (MCOs) are prohibited from requiring prior authorization or primary care provider notification for emergency services including those that are needed to evaluate or stabilize an emergency medical condition or emergency behavioral health condition.

The Texas Medicaid Program provides that certain undocumented aliens and legalized aliens who require treatment of an emergency medical condition or emergency behavioral health condition are eligible to receive that treatment. After the emergency condition requiring care is stabilized and no longer an emergency, the coverage ends. If the alien continues to receive ongoing treatment after the emergency ceases, the ongoing treatment is not covered.

The Texas Medicaid Program provides for medical services for eligible clients while out-of-state. The attending physician or other provider must document that the client was treated for an emergency condition. Out-of-state emergency services are covered also when the client's health would be in danger if he or she were required to travel back to Texas.

Emergency department services are subject to retrospective review.

25.3.3.2 Hospital Outpatient Observation Room Services

Outpatient means a client is in an organized medical facility, and receives, professional services for less than a 24-hour period regardless of the hour of admission, whether or not a bed is used, or whether or not the client remains in the facility past midnight.

Some patients, while not requiring an inpatient hospital admission, may require an extended period of observation (less than 24 hours) in the hospital environment on an outpatient basis. The client is considered an outpatient if he or she remains in the hospital for less than 24 consecutive hours and is discharged to home from an outpatient observation status.

Observation services may be provided in any part of the hospital where a patient can be assessed, examined, monitored, or treated.

If a physician's order for outpatient observation is present in the patient's medical record, per Title 1 *Texas Administrative Code* (TAC) §371.206(b), the Texas Medicaid Program considers reimbursement to the hospital for outpatient observation services based on the facility's reimbursement rate.

Hospitals may bill medically necessary outpatient services provided during the initial period of observation on TOB 131. The hospital outpatient observation room service commences with the first clinical contact of the client by professional/licensed staff of the hospital.

Because the unit associated with the observation room charge (B-762) is considered to be *hours*, claims submitted with observation room *units* exceeding 23 hours are denied with EOB code 643, Claim indicates outpatient charges in excess of 23 hours. Facilities should resubmit these outpatient claims as appeals with charges for the initial 23 hours only.

Any service *ordered within* the initial 24 hour period may be included on the outpatient claim *if a physician's order for the service is within* the observation period time frame but hospital scheduling limitations prevent the service from being performed before 23-hours has expired. Any services ordered *after* the initial 24 hours must *not* be included on the outpatient claim nor billed to the client.

To receive reimbursement for physician-*ordered* services that are medically necessary and *exceed* the 24-hour period from the initial point of contact, the claim may be submitted as an inpatient stay. All observation room charges, outpatient charges (except ambulatory surgical procedure codes as listed in the current ASC/HASC fee schedule), and emergency room charges for an inpatient claim are included in the reimbursement methodology and are not reimbursed separately (charges for an observation room on an inpatient claim should be coded with revenue code 760).

It is important to realize that any inpatient stay billed to the Texas Medicaid Program is subject to retrospective review by the HHSC UR unit with the possibility for denial if the admission is determined not medically necessary. If the inpatient admission is denied as not medically necessary, UR may allow services rendered during the

CPT only copyright 2005 American Medical Association. All rights reserved.

first 23 hours (less than 24 hours) to be rebilled to TMHP as an outpatient claim if a physician's order for outpatient observation is present in the hospital medical record (per Title 1 TAC §371.206[b]). The claim must be submitted to THMP within 120 days from the date of the UR notification letter.

The following documentation must accompany the revised bill:

- Revised HCFA-1450 (UB-92) claim form containing the required data for outpatient billing for medically necessary outpatient services
- Copy of the UR notification letter indicating services may be rebilled

When a client is admitted to the hospital as an inpatient and is discharged in less than 24 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This billing practice is acceptable under the Texas Medicaid Program when the physician makes the changes to the admitting order from inpatient status to outpatient observation status before the hospital submits the claim for reimbursement. A hospital is not allowed to convert a patient from observation status to inpatient admission status without a physician's order.

25.3.3.3 Outpatient Total Parenteral Hyperalimentation

Outpatient parenteral hyperalimentation may be administered only as a life-sustaining measure, and the procedure must be prior authorized in writing. Claims for hyperalimentation therapy administered as a nutritional supplement are denied.

25.3.3.4 Aerosol Treatment

Aerosol treatments, including vaporizers, humidifiers, nebulizers, and inhalers are covered by the Texas Medicaid Program. These treatments must be coded with revenue code B-412, Respiratory services–inhalation services.

Effective April 1, 2004, the following revised diagnosis codes will be payable for aerosol treatments:

Diagnosis Code	Description
49120	Obstructive chronic bronchitis, without exacerbation
49121	Obstructive chronic bronchitis, with (acute) exacerbation
49122	Obstructive chronic bronchitis with acute bronchitis
49300	Exstrinsic asthma, unspecified
49302	Extrinsic asthma, with (acute) exacerbation
49310	Instrinsic asthma, unspecified
49312	Instrinsic asthma, with (acute) exacerbation
49320	Chronic obstructive asthma, unspecified
49322	Chronic obstructive asthma, with (acute) exacerbation
49381	Exercise induced bronchospasm
49382	Cough variant asthma
49392	Asthma, unspecified type, with (acute) exacerbation
5173	Acute chest syndrome

Payment for aerosol therapy is limited to the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
0796	Respiratory syncytial virus (RSV)
1363	Pneumocystosis
27700	Cystic fibrosis, without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
46400	Acute laryngitis without mention of obstruction
46401	Acute laryngitis with obstruction
46410	Acute tracheitis without mention of obstruction
46411	Acute tracheitis with obstruction
46420	Acute laryngotracheitis without mention of obstruction
46421	Acute laryngotracheitis with obstruction
46430	Acute epiglottitis without mention of obstruction
46431	Acute epiglottitis with obstruction
4644	Croup
46450	Supraglottitis unspecified without obstruction
46451	Supraglottitis unspecified with obstruction
4660	Acute bronchitis
46611	Acute bronchiolitis due to RSV
46619	Acute bronchiolitis due to other infectious organisms
4786	Edema of larynx
47875	Laryngeal spasm
4788	Upper respiratory tract hypersensitivity reaction, site unspecified
48284	Pneumonia due to legionnaires' disease
490	Bronchitis, not specified as acute or chronic
4910	Simple chronic bronchitis
4911	Mucopurulent chronic bronchitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
49120	Obstructive chronic bronchitis, without exacerbation
49121	Obstructive chronic bronchitis, with acute exacerbation
4918	Other chronic bronchitis
4919	Unspecified chronic bronchitis
4920	Emphysematous bleb
4928	Other emphysema
49300	Extrinsic asthma, unspecified
49301	Extrinsic asthma with status asthmaticus
49302	Extrinsic asthma, with (acute) exacerbation
49310	Intrinsic asthma, unspecified
49311	Intrinsic asthma with status asthmaticus
49312	Intrinsic asthma, with (acute) exacerbation
49320	Chronic obstructive asthma, unspecified
49321	Chronic obstructive asthma with status asthmaticus
49322	Chronic obstructive asthma, with (acute) exacerbation
49390	Asthma, unspecified type, unspecified
49391	Asthma, unspecified type, with status asthmaticus
49392	Asthma, unspecified type, with (acute) exacerbation
4940	Bronchiectasis without acute exacerbation
4941	Bronchiectasis with acute exacerbation
4950	Farmer's lung
4951	Bagassosis
4952	Bird-fanciers' lung
4953	Suberosis
4954	Malt workers' lung
4955	Mushroom workers' lung
4956	Maple bark-strippers' lung
4957	'Ventilation' pneumonitis
4958	Other specified allergic alveolitis and pneumonitis
4959	Unspecified allergic alveolitis and pneumonitis
496	Chronic airway obstruction, not elsewhere classified
5184	Acute edema of lung, unspecified
5186	Allergic bronchopulmonary aspergillosis

Medications used in aerosol therapy are reimbursed separately and must be billed using the appropriate HCPCS procedure code. Saline used in aerosol therapy is denied as part of the aerosol therapy.

Revenue code B-412, Inhalation services, billed for aerosol therapy in the recovery room after outpatient surgery (billed on an outpatient claim) is also allowable as it is a necessary adjunct to the postoperative recovery of a client who has undergone general anesthesia.

Revenue code B-412 includes the inhalers listed below and is payable in the outpatient setting (place of service [POS] 5) when it is the *only* therapy billed on that day:

- Beclomethasone dipropionate (Vanceril or Beclovent oral inhalers)
- Isoproterenol sulfate (Iso-Autohaler, Luf-Iso Inhaler, Medihaler-Iso, Norisodrine Aerohaler)
- Isoproterenol Hydrochloride (Iprenol, Vapo-Iso inhalers)
- Albuterol (Proventil or Ventolin inhalers)
- Metaproterenol Sulfate (Alupent Metered Dose inhaler, Metaprel inhaler, Alupent 10 mL, Alupent 30 mL)
- Epinephrine Bitartrate (Medihaler-Epi and Primatene Mist Suspension inhaler)
- Phenylephrine Bitartrate (Duo-Medihaler)
- Isoetharine Mesylate inhalation aerosol (Bronkometer)
- Dexamethasone Sodium Phosphate (Turbinaire or Respihaler)

When revenue code B-412, Respiratory services–inhalation services, is billed on the same day for both aerosol therapy and inhalers, only one service is allowed, not both.

Intermittent positive pressure breathing (IPPB) treatments have been determined to be inappropriate for the treatment of most respiratory problems and are denied.

25.3.3.5 Pentamidine Aerosol

Aerosol pentamidine treatments will be reimbursed using procedure code 1-94642.

Additionally, the provider may also be reimbursed for the medication using procedure code 1-J2545.

Payment for aerosol pentamadine treatments is limited to the following diagnosis codes:

Diagnosis Code	Description
042	HIV disease
07951	Human t-cell lymphotrophic virus, type I (HTLV-I)
07952	Human t-cell lymphotrophic virus, type II (HTLV-II)
07953	Human immunodeficiency virus, type 2 (HIV-2)
1363	Pneumocystosis
48284	Pneumonia due to legionnaires' disease
5186	Allergic bronchopulmonary aspergillosis

Aerosol pentamidine treatments are limited to one treatment every 28 days.

CPT only copyright 2005 American Medical Association. All rights reserved.

25.3.3.6 Pulmonary Function Studies

When CPT codes 5-94014 and 5-94015 are billed together, CPT code 5-94015 denies as part of CPT code 5-94014.

25.3.3.7 Chemotherapy Administration

Hospitals submit outpatient charges using the appropriate revenue codes for room charges, supplies, IV equipment, and pharmacy.

Use the following revenue codes when administering chemotherapy in the following settings:

Revenue Code	Description
B-264	IV therapy, IV therapy/supplies
B-450 *or* B456 *or* B-459	Emergency room *or* Emergency room, urgent care *or* Emergency room–other
B-510 *or* B-511 *or* B-512 *or* B-514 *or* B-515 *or* B-516 *or* B-517 *or* B-519	Clinic *or* Clinic–chronic pain center *or* Clinic–dental *or* Clinic; OB/GYN *or* Clinic; pediatric *or* Clinic, urgent care clinic *or* Clinic, family practice clinic *or* Clinic–other
B-761	Treatment room
B-762	Observation room

25.3.3.8 Bacillus Calmette-Guerin (BCG) Vaccine

Procedure code 1-J9031, is a covered benefit of the Texas Medicaid Program for the diagnosis codes listed below. Procedure code 1-90586, is also a covered benefit of the Texas Medicaid Program for the following diagnosis codes:

Diagnosis Code	Description
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
2337	Carcinoma in-situ of the bladder

Intravesical BCG vaccines will autodeny for all other diagnoses.

Procedure code 1-90585, is a covered benefit of the Texas Medicaid Program for diagnosis code V032, Need for prophylactic vaccination and inoculation against BCG.

25.3.3.9 Tetanus Injections, Acute Care

Tetanus toxoid absorbed and Tetanus immune globulin, human, are benefits of the Texas Medicaid Program. These injections are diagnosis-restricted to cover injuries listed in the diagnosis table below.

Tetanus toxoid absorbed is an immunization used to prevent tetanus. It produces immunity to tetanus by promoting antibody production. The tetanus immune globulin provides a passive immunity for injuries that are over 24 hours old, extensively contaminated and/or for the client who has had less than two tetanus toxoid injections in a lifetime. Therefore, both of these injections can be given on the same day for the same injury event.

Tetanus toxoid and tetanus immune globulin should be billed with procedure codes 1-J1670 and 1-90703.

Tetanus toxoid and tetanus immune globulin injections are covered for injuries, such as puncture wounds, burns or abrasions. These injections are restricted to the diagnosis codes listed in the following table:

Diagnosis Code	Description
80000	Closed fracture of vault of skull without mention of intracranial injury, with state of consciousness unspecified
80001	Closed fracture of vault of skull without mention of intracranial injury, with no loss of consciousness
80002	Closed fracture of vault of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80003	Closed fracture of vault of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80004	Closed fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80005	Closed fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80006	Closed fracture of vault of skull without mention of intra cranial injury, with loss of consciousness of unspecified duration
80009	Closed fracture of vault of skull without mention of intracranial injury, with concussion, unspecified
80010	Closed fracture of vault of skull with cerebral laceration and contusion, with state of consciousness unspecified
80011	Closed fracture of vault of skull with cerebral laceration and contusion, with no loss of consciousness
80012	Closed fracture of vault of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80013	Closed fracture of vault of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80014	Closed fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80015	Closed fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80016	Closed fracture of vault of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80019	Closed fracture of vault of skull with cerebral laceration and contusion, with concussion, unspecified
80020	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80021	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80022	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness

Diagnosis Code	Description
80023	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80024	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80025	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80026	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80029	Closed fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80030	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80031	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80032	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80033	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80034	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80035	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80036	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80039	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80040	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80041	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80042	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80043	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80044	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80045	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80046	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80049	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
80050	Open fracture of vault of skull without mention of intracranial injury, with state of consciousness unspecified
80051	Open fracture of vault of skull without mention of intracranial injury, with no loss of consciousness
80052	Open fracture of vault of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80053	Open fracture of vault of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80054	Open fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80055	Open fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80056	Open fracture of vault of skull without mention of intracranial injury, with loss of consciousness of unspecified duration
80059	Open fracture of vault of skull without mention of intracranial injury, with concussion, unspecified
80060	Open fracture of vault of skull with cerebral laceration and contusion, with state of consciousness unspecified
80061	Open fracture of vault of skull with cerebral laceration and contusion, with no loss of consciousness
80062	Open fracture of vault of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80063	Open fracture of vault of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80064	Open fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80065	Open fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80066	Open fracture of vault of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80069	Open fracture of vault of skull with cerebral laceration and contusion, with concussion, unspecified
80070	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80071	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80072	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80073	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80074	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80075	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80076	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80079	Open fracture of vault of skull with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80080	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80081	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80082	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80083	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80084	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80085	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80086	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80089	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80090	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80091	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80092	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80093	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80094	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80096	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80099	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
80100	Closed fracture of base of skull without mention of intra cranial injury, with state of consciousness unspecified
80101	Closed fracture of base of skull without mention of intra cranial injury, with no loss of consciousness
80102	Closed fracture of base of skull without mention of intra cranial injury, with brief (less than one hour) loss of consciousness
80103	Closed fracture of base of skull without mention of intra cranial injury, with moderate (1-24 hours) loss of consciousness
80104	Closed fracture of base of skull without mention of intra cranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80105	Closed fracture of base of skull without mention of intra cranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80106	Closed fracture of base of skull without mention of intra cranial injury, with loss of consciousness of unspecified duration
80109	Closed fracture of base of skull without mention of intra cranial injury, with concussion, unspecified
80110	Closed fracture of base of skull with cerebral laceration and contusion, with state of consciousness unspecified
80111	Closed fracture of base of skull with cerebral laceration and contusion, with no loss of consciousness
80112	Closed fracture of base of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness

Diagnosis Code	Description
80113	Closed fracture of base of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80114	Closed fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80115	Closed fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80116	Closed fracture of base of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80119	Closed fracture of base of skull with cerebral laceration and contusion, with concussion, unspecified
80120	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80121	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80122	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80123	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80124	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80125	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80126	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80129	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80130	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80131	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80132	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80133	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80134	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80135	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80136	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80139	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80140	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80141	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80142	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80143	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80144	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

Diagnosis Code	Description
80145	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80146	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80149	Closed fracture of base of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
80150	Open fracture of base of skull without mention of intracranial injury, with state of consciousness unspecified
80151	Open fracture of base of skull without mention of intracranial injury, with no loss of consciousness
80152	Open fracture of base of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80153	Open fracture of base of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80154	Open fracture of base of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80155	Open fracture of base of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80156	Open fracture of base of skull without mention of intracranial injury, with loss of consciousness of unspecified duration
80159	Open fracture of base of skull without mention of intracranial injury, with concussion, unspecified
80160	Open fracture of base of skull with cerebral laceration and contusion, with state of consciousness unspecified
80161	Open fracture of base of skull with cerebral laceration and contusion, with no loss of consciousness
80162	Open fracture of base of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80163	Open fracture of base of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
80164	Open fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80165	Open fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80166	Open fracture of base of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80169	Open fracture of base of skull with cerebral laceration and contusion, with concussion, unspecified
80170	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80171	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80172	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80173	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80174	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80175	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80176	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80179	Open fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80180	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80181	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80182	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80183	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80184	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80185	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80186	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80189	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80190	Open fracture of base of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80191	Open fracture of base of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80192	Open fracture of base of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80193	Open fracture of base of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80194	Open fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80195	Open fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80196	Open fracture of base of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration

Diagnosis Code	Description
80199	Open fracture of base of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
8020	Closed fracture of nasal bones
8021	Open fracture of nasal bones
80220	Closed fracture of unspecified site of mandible
80221	Closed fracture of condylar process of mandible
80222	Closed fracture of subcondylar process of mandible
80223	Closed fracture of coronoid process of mandible
80224	Closed fracture of unspecified part of ramus of mandible
80225	Closed fracture of angle of jaw
80226	Closed fracture of symphysis of body of mandible
80227	Closed fracture of alveolar border of body of mandible
80228	Closed fracture of other and unspecified part of body of mandible
80229	Closed fracture of multiple sites of mandible
80230	Open fracture of unspecified site of mandible
80231	Open fracture of condylar process of mandible
80232	Open fracture of subcondylar process of mandible
80233	Open fracture of coronoid process of mandible
80234	Open fracture of unspecified part of ramus of mandible
80235	Open fracture of angle of jaw
80236	Open fracture of symphysis of body of mandible
80237	Open fracture of alveolar border of body of mandible
80238	Open fracture of body of mandible, other and unspecified
80239	Open fracture of multiple sites of mandible
8024	Closed fracture of malar and maxillary bones
8025	Open fracture of malar and maxillary bones
8026	Closed fracture of orbital floor (blow-out)
8027	Open fracture of orbital floor (blow-out)
8028	Closed fracture of other facial bones
8029	Open fracture of other facial bones

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80300	Other closed skull fracture without mention of intracranial injury, with state of consciousness unspecified
80301	Other closed skull fracture without mention of intracranial injury, with no loss of consciousness
80302	Other closed skull fracture without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80303	Other closed skull fracture without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80304	Other closed skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80305	Other closed skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80306	Other closed skull fracture without mention of intracranial injury, with loss of consciousness of unspecified duration
80309	Other closed skull fracture without mention of intracranial injury, with concussion, unspecified
80310	Other closed skull fracture with cerebral laceration and contusion, with state of consciousness unspecified
80311	Other closed skull fracture with cerebral laceration and contusion, with no loss of consciousness
80312	Other closed skull fracture with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80313	Other closed skull fracture with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80314	Other closed skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80315	Other closed skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80316	Other closed skull fracture with cerebral laceration and contusion, with loss of consciousness of unspecified duration

Diagnosis Code	Description
80319	Other closed skull fracture with cerebral laceration and contusion, with concussion, unspecified
80320	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80321	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80322	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80323	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80324	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80325	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80326	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80329	Other closed skull fracture with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80330	Other closed skull fracture with other and unspecified intracranial hemorrhage, with state of unconsciousness unspecified
80331	Other closed skull fracture with other and unspecified intracranial hemorrhage, with no loss of consciousness
80332	Other closed skull fracture with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80333	Other closed skull fracture with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80334	Other closed skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

Diagnosis Code	Description
80335	Other closed skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80336	Other closed skull fracture with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80339	Other closed skull fracture with other and unspecified intracranial hemorrhage, with concussion, unspecified
80340	Other closed skull fracture with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80341	Other closed skull fracture with intracranial injury of other and unspecified nature, with no loss of consciousness
80342	Other closed skull fracture with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80343	Other closed skull fracture with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80344	Other closed skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80345	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80346	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80349	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with concussion, unspecified
80350	Other open skull fracture without mention of injury, with state of consciousness unspecified
80351	Other open skull fracture without mention of intracranial injury, with no loss of consciousness
80352	Other open skull fracture without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80353	Other open skull fracture without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80354	Other open skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80355	Other open skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80356	Other open skull fracture without mention of intracranial injury, with loss of consciousness of unspecified duration
80359	Other open skull fracture without mention of intracranial injury, with concussion, unspecified
80360	Other open skull fracture with cerebral laceration and contusion, with state of consciousness unspecified
80361	Other open skull fracture with cerebral laceration and contusion, with no loss of consciousness
80362	Other open skull fracture with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80363	Other open skull fracture with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80364	Other open skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80365	Other open skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80366	Other open skull fracture with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80369	Other open skull fracture with cerebral laceration and contusion, with concussion, unspecified
80370	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80371	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80372	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80373	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80374	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80375	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80376	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80379	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80380	Other open skull fracture with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80381	Other open skull fracture with other and unspecified intracranial hemorrhage, with no loss of consciousness
80382	Other open skull fracture with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80383	Other open skull fracture with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80384	Other open skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80385	Other open skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80386	Other open skull fracture with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80389	Other open skull fracture with other and unspecified intracranial hemorrhage, with concussion, unspecified
80390	Other open skull fracture with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80391	Other open skull fracture with intracranial injury of other and unspecified nature, with no loss of consciousness
80392	Other open skull fracture with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80393	Other open skull fracture with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80394	Other open skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80395	Other open skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80396	Other open skull fracture with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80399	Other open skull fracture with intracranial injury of other and unspecified nature, with concussion, unspecified
80400	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with state of consciousness unspecified
80401	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with no loss of consciousness
80402	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80403	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80404	Closed fractures involving skull or face with other bones, without mention or intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80405	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80406	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with loss of consciousness of unspecified duration
80409	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with concussion, unspecified
80410	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with state of consciousness unspecified
80411	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with no loss of consciousness
80412	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80413	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80414	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80415	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80416	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80419	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with concussion, unspecified
80420	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80421	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80422	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80423	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80424	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80425	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80426	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80429	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80430	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80431	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with no loss of consciousness
80432	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80433	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80434	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80435	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80436	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80439	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with concussion, unspecified
80440	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80441	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with no loss of consciousness
80442	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80443	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80444	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80445	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80446	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80449	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with concussion, unspecified
80450	Open fractures involving skull or face with other bones, without mention of intracranial injury, with state of consciousness unspecified
80451	Open fractures involving skull or face with other bones, without mention of intracranial injury, with no loss of consciousness
80452	Open fractures involving skull or face with other bones, without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80453	Open fractures involving skull or face with other bones, without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80454	Open fractures involving skull or face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80455	Open fractures involving skull or face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80456	Open fractures involving skull or face with other bones, without mention of intracranial injury, with loss of consciousness of unspecified duration
80459	Open fractures involving skull or face with other bones, without mention of intracranial injury, with concussion, unspecified
80460	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with state of consciousness unspecified
80461	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with no loss of consciousness
80462	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80463	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80464	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80465	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80466	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80469	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with concussion, unspecified
80470	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80471	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80472	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80473	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80474	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80475	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80476	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80479	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80480	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80481	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with no loss of consciousness
80482	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80483	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80484	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80485	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss consciousness, without return to pre-existing conscious level
80486	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80489	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with concussion, unspecified
80490	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80491	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with no loss of consciousness
80492	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80493	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80494	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80495	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80496	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80499	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with concussion, unspecified
80500	Closed fracture of cervical vertebra, unspecified level
80501	Closed fracture of first cervical vertebra
80502	Closed fracture of second cervical vertebra
80503	Closed fracture of third cervical vertebra
80504	Closed fracture of fourth cervical vertebra
80505	Closed fracture of fifth cervical vertebra
80506	Closed fracture of sixth cervical vertebra
80507	Closed fracture of seventh cervical vertebra
80508	Closed fracture of multiple cervical vertebrae
80510	Open fracture of cervical vertebra, unspecified level
80511	Open fracture of first cervical vertebra
80512	Open fracture of second cervical vertebra
80513	Open fracture of third cervical vertebra
80514	Open fracture of fourth cervical vertebra
80515	Open fracture of fifth cervical vertebra
80516	Open fracture of sixth cervical vertebra
80517	Open fracture of seventh cervical vertebra
80518	Open fracture of multiple cervical vertebrae
8052	Closed fracture of dorsal (thoracic) vertebra without mention of spinal cord injury
8053	Open fracture of dorsal (thoracic) vertebra without mention of spinal cord injury
8054	Closed fracture of lumbar vertebra without mention of spinal cord injury
8055	Open fracture of lumbar vertebra without mention of spinal cord injury
8056	Closed fracture of sacrum and coccyx without mention of spinal cord injury
8057	Open fracture of sacrum and coccyx without mention of spinal cord injury
8058	Closed fracture of unspecified part of vertebral column without mention of spinal cord injury
8059	Open fracture of unspecified part of vertebral column without mention of spinal cord injury
80600	Closed fracture of C1-C4 level with unspecified spinal cord injury
80601	Closed fracture of C1-C4 level with complete lesion of cord
80602	Closed fracture of C1-C4 level with anterior cord syndrome
80603	Closed fracture of C1-C4 level with central cord syndrome
80604	Closed fracture of C1-C4 level with other specified spinal cord injury
80605	Closed fracture of C5-C7 level with unspecified spinal cord injury
80606	Closed fracture of C5-C7 level with complete lesion of cord
80607	Closed fracture of C5-C7 level with anterior cord syndrome
80608	Closed fracture of C5-C7 level with central cord syndrome
80609	Closed fracture of C5-C7 level with other specified spinal cord injury
80610	Open fracture of C1-C4 level with unspecified spinal cord injury
80611	Open fracture of C1-C4 level with complete lesion of cord
80612	Open fracture of C1-C4 level with anterior cord syndrome
80613	Open fracture of C1-C4 level with central cord syndrome
80614	Open fracture of C1-C4 level with other specified spinal cord injury
80615	Open fracture of C5-C7 level with unspecified spinal cord injury
80616	Open fracture of C5-C7 level with complete lesion of cord
80617	Open fracture of C5-C7 level with anterior cord syndrome
80618	Open fracture of C5-C7 level with central cord syndrome
80619	Open fracture of C5-C7 level with other specified spinal cord injury
80620	Closed fracture of T1-T6 level with unspecified spinal cord injury
80621	Closed fracture of T1-T6 level with complete lesion of cord
80622	Closed fracture of T1-T6 level with anterior cord syndrome
80623	Closed fracture of T1-T6 level with central cord syndrome
80624	Closed fracture of T1-T6 level with other specified spinal cord injury
80625	Closed fracture of T7-T12 level with unspecified spinal cord injury

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80626	Closed fracture of T7-T12 level with complete lesion of cord
80627	Closed fracture of T7-T12 level with anterior cord syndrome
80628	Closed fracture of T7-T12 level with central cord syndrome
80629	Closed fracture of T7-T12 level with other specified spinal cord injury
80630	Open fracture of T1-T6 level with unspec-ified spinal cord injury
80631	Open fracture of T1-T6 level with complete lesion of cord
80632	Open fracture of T1-T6 level with anterior cord syndrome
80633	Open fracture of T1-T6 level with central cord syndrome
80634	Open fracture of T1-T6 level with other specified spinal cord injury
80635	Open fracture of T7-T12 level with unspec-ified spinal cord injury
80636	Open fracture of T7-T12 level with complete lesion of cord
80637	Open fracture of T7-T12 level with anterior cord syndrome
80638	Open fracture of T7-T12 level with central cord syndrome
80639	Open fracture of T7-T12 level with other specified spinal cord injury
8064	Closed fracture of lumbar spine with spinal cord injury
8065	Open fracture of lumbar spine with spinal cord injury
80660	Closed fracture of sacrum and coccyx with unspecified spinal cord injury
80661	Closed fracture of sacrum and coccyx with complete cauda equina lesion
80662	Closed fracture of sacrum and coccyx with other cauda equina injury
80669	Closed fracture of sacrum and coccyx with other spinal cord injury
80670	Open fracture of sacrum and coccyx with unspecified spinal cord injury
80671	Open fracture of sacrum and coccyx with complete cauda equina lesion
80672	Open fracture of sacrum and coccyx with other cauda equina injury
80679	Open fracture of sacrum and coccyx with other spinal cord injury
8068	Closed fracture of unspecified vertebra with spinal cord injury

Diagnosis Code	Description
8069	Open fracture of unspecified vertebra with spinal cord injury
80700	Closed fracture of rib(s), unspecified
80701	Closed fracture of one rib
80702	Closed fracture of two ribs
80703	Closed fracture of three ribs
80704	Closed fracture of four ribs
80705	Closed fracture of five ribs
80706	Closed fracture of six ribs
80707	Closed fracture of seven ribs
80708	Closed fracture of eight or more ribs
80709	Closed fracture of multiple ribs, unspecified
80710	Open fracture of rib(s), unspecified
80711	Open fracture of one rib
80712	Open fracture of two ribs
80713	Open fracture of three ribs
80714	Open fracture of four ribs
80715	Open fracture of five ribs
80716	Open fracture of six ribs
80717	Open fracture of seven ribs
80718	Open fracture of eight or more ribs
80719	Open fracture of multiple ribs, unspecified
8072	Closed fracture of sternum
8073	Open fracture of sternum
8074	Flail chest
8075	Closed fracture of larynx and trachea
8076	Open fracture of larynx and trachea
8080	Closed fracture of acetabulum
8081	Open fracture of acetabulum
8082	Closed fracture of pubis
8083	Open fracture of pubis
80841	Closed fracture of ilium
80842	Closed fracture of ischium
80843	Multiple closed pelvic fractures with disruption of pelvic circle
80849	Closed fracture of other specified part of pelvis
80851	Open fracture of ilium
80852	Open fracture of ischium
80853	Multiple open pelvic fractures with disruption of pelvic circle
80859	Open fracture of other specified part of pelvis
8088	Unspecified closed fracture of pelvis
8089	Unspecified open fracture of pelvis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8090	Fracture of bones of trunk, closed
8091	Fracture of bones of trunk, open
81000	Closed fracture of clavicle, unspecified part
81001	Closed fracture of sternal end of clavicle
81002	Closed fracture of shaft of clavicle
81003	Closed fracture of acromial end of clavicle
81010	Open fracture of clavicle, unspecified part
81011	Open fracture of sternal end of clavicle
81012	Open fracture of shaft of clavicle
81013	Open fracture of acromial end of clavicle
81100	Closed fracture of scapula, unspecified part
81101	Closed fracture of acromial process of scapula
81102	Closed fracture of coracoid process of scapula
81103	Closed fracture of glenoid cavity and neck of scapula
81109	Closed fracture of other part of scapula
81110	Open fracture of scapula, unspecified part
81111	Open fracture of acromial process of scapula
81112	Open fracture of coracoid process
81113	Open fracture of glenoid cavity and neck of scapula
81119	Open fracture of other part of scapula
81200	Fracture of unspecified part of upper end of humerus, closed
81201	Fracture of surgical neck of humerus, closed
81202	Fracture of anatomical neck of humerus, closed
81203	Fracture of greater tuberosity of humerus, closed
81209	Other closed fractures of upper end of humerus
81210	Fracture of unspecified part of upper end of humerus, open
81211	Fracture of surgical neck of humerus, open
81212	Fracture of anatomical neck of humerus, open
81213	Fracture of greater tuberosity of humerus, open
81219	Other open fracture of upper end of humerus
81220	Fracture of unspecified part of humerus, closed
81221	Fracture of shaft of humerus, closed
81230	Fracture of unspecified part of humerus, open
81231	Fracture of shaft of humerus, open
81240	Fracture of unspecified part of lower end of humerus, closed
81241	Supracondylar fracture of humerus, closed
81242	Fracture of lateral condyle of humerus, closed
81243	Fracture of medial condyle of humerus, closed
81244	Fracture of unspecified condyle(s) of humerus, closed
81249	Other closed fractures of lower end of humerus
81250	Fracture of unspecified part of lower end of humerus, open
81251	Supracondylar fracture of humerus, open
81252	Fracture of lateral condyle of humerus, open
81253	Fracture of medial condyle of humerus, open
81254	Fracture of unspecified condyle(s) of humerus, open
81259	Other fracture of lower end of humerus, open
81300	Closed fracture of upper end of forearm, unspecified
81301	Fracture of olecranon process of ulna, closed
81302	Fracture of coronoid process of ulna, closed
81303	Monteggia’s fracture, closed
81304	Other and unspecified closed fractures of proximal end of ulna (alone)
81305	Fracture of head of radius, closed
81306	Fracture of neck of radius, closed
81307	Other and unspecified closed fractures of proximal end of radius (alone)
81308	Fracture of radius with ulna, upper end (any part), closed
81310	Open fracture of upper end of forearm, unspecified
81311	Fracture of olecranon process of ulna, open
81312	Fracture of coronoid process of ulna, open
81313	Monteggia’s fracture, open
81314	Other and unspecified open fractures of proximal end of ulna (alone)
81315	Fracture of head of radius, open
81316	Fracture of neck of radius, open

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
81317	Other and unspecified open fractures of proximal end of radius (alone)
81318	Fracture of radius with ulna, upper end (any part), open
81320	Fracture of shaft of radius or ulna, unspecified, closed
81321	Fracture of shaft of radius (alone), closed
81322	Fracture of shaft of ulna (alone), closed
81323	Fracture of shaft of radius with ulna, closed
81330	Fracture of shaft of radius or ulna, unspecified, open
81331	Fracture of shaft of radius (alone), open
81332	Fracture of shaft of ulna (alone), open
81333	Fracture of shaft of radius with ulna, open
81340	Closed fracture of lower end of forearm, unspecified
81341	Colles' fracture, closed
81342	Other closed fractures of distal end of radius (alone)
81343	Fracture of distal end of ulna (alone), closed
81344	Fracture of lower end of radius with ulna, closed
81345	Torus fracture of radius
81350	Open fracture of lower end of forearm, unspecified
81351	Colles' fracture, open
81352	Other open fractures of distal end of radius (alone)
81353	Fracture of distal end of ulna (alone), open
81354	Fracture of lower end of radius with ulna, open
81380	Closed fracture of unspecified part of forearm
81381	Fracture of unspecified part of radius (alone), closed
81382	Fracture of unspecified part of ulna (alone), closed
81383	Fracture of unspecified part of radius with ulna, closed
81390	Fracture of unspecified part of forearm, open
81391	Fracture of unspecified part of radius (alone), open
81392	Fracture of unspecified part of ulna (alone), open
81393	Fracture of unspecified part of radius with ulna, open
81400	Closed fracture of carpal bone, unspecified

Diagnosis Code	Description
81401	Closed fracture of navicular (scaphoid) bone of wrist
81402	Closed fracture of lunate (semilunar) bone of wrist
81403	Closed fracture of triquetral (cuneiform) bone of wrist
81404	Closed fracture of pisiform bone of wrist
81405	Closed fracture of trapezium bone (larger multangular) of wrist
81406	Closed fracture of trapezoid bone (smaller multangular) of wrist
81407	Closed fracture of capitate bone (os magnum) of wrist
81408	Closed fracture of hamate (unciform) bone of wrist
81409	Closed fracture of other bone of wrist
81410	Open fracture of carpal bone, unspecified
81411	Open fracture of navicular (scaphoid) bone of wrist
81412	Open fracture of lunate (semilunar) bone of wrist
81413	Open fracture of triquetral (cuneiform) bone of wrist
81414	Open fracture of pisiform bone of wrist
81415	Open fracture of trapezium bone (larger multangular) of wrist
81416	Open fracture of trapezoid bone (smaller multangular) of wrist
81417	Open fracture of capitate bone (os magnum) of wrist
81418	Open fracture of hamate (unciform) bone of wrist
81419	Open fracture of other bone of wrist
81500	Closed fracture of metacarpal bone(s), site unspecified
81501	Closed fracture of base of thumb (first) metacarpal
81502	Closed fracture of base of other metacarpal bone(s)
81503	Closed fracture of shaft of metacarpal bone(s)
81504	Closed fracture of neck of metacarpal bone(s)
81509	Closed fracture of multiple sites of metacarpus
81510	Open fracture of metacarpal bone(s), site unspecified
81511	Open fracture of base of thumb (first) metacarpal

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
81512	Open fracture of base of other metacarpal bone(s)
81513	Open fracture of shaft of metacarpal bone(s)
81514	Open fracture of neck of metacarpal bone(s)
81519	Open fracture of multiple sites of metacarpus
81600	Closed fracture of phalanx or phalanges of hand, unspecified
81601	Closed fracture of middle or proximal phalanx or phalanges of hand
81602	Closed fracture of distal phalanx or phalanges of hand
81603	Closed fracture of multiple sites of phalanx or phalanges of hand
81610	Open fracture of phalanx or phalanges of hand, unspecified
81611	Open fracture of middle or proximal phalanx or phalanges of hand
81612	Open fracture of distal phalanx or phalanges of hand
81613	Open fracture of multiple sites of phalanx or phalanges of hand
8170	Multiple closed fractures of hand bones
8171	Multiple open fractures of hand bones
8180	Ill-defined closed fractures of upper limb
8181	Ill-defined open fractures of upper limb
8190	Multiple closed fractures involving both upper limbs, and upper limb with rib(s) and sternum
8191	Multiple open fractures involving both upper limbs, and upper limb with rib(s) and sternum
82000	Fracture of unspecified intracapsular section of neck of femur, closed
82001	Fracture of epiphysis (separation) (upper) of neck of femur, closed
82002	Fracture of midcervical section of femur, closed
82003	Fracture of base of neck of femur, closed
82009	Other transcervical fracture of femur, closed
82010	Fracture of unspecified intracapsular section of neck of femur, open
82011	Fracture of epiphysis (separation) (upper) of neck of femur, open
82012	Fracture of midcervical section of femur, open
82013	Fracture of base of neck of femur, open
82019	Other transcervical fracture of femur, open

Diagnosis Code	Description
82020	Fracture of unspecified trochanteric section of femur, closed
82021	Fracture of intertrochanteric section of femur, closed
82022	Fracture of subtrochanteric section of femur, closed
82030	Fracture of unspecified trochanteric section of femur, open
82031	Fracture of intertrochanteric section of femur, open
82032	Fracture of subtrochanteric section of femur, open
8208	Fracture of unspecified part of neck of femur, closed
8209	Fracture of unspecified part of neck of femur, open
82100	Fracture of unspecified part of femur, closed
82101	Fracture of shaft of femur, closed
82110	Fracture of unspecified part of femur, open
82111	Fracture of shaft of femur, open
82120	Fracture of lower end of femur, unspecified part, closed
82121	Fracture of femoral condyle, closed
82122	Fracture of lower epiphysis of femur, closed
82123	Supracondylar fracture of femur, closed
82129	Other fracture of lower end of femur, closed
82130	Fracture of lower end of femur, unspecified part, open
82131	Fracture of femoral condyle, open
82132	Fracture of lower epiphysis of femur, open
82133	Supracondylar fracture of femur, open
82139	Other fracture of lower end of femur, open
8220	Closed fracture of patella
8221	Open fracture of patella
82300	Closed fracture of upper end of tibia
82301	Closed fracture of upper end of fibula
82302	Closed fracture of upper end of fibula with tibia
82310	Open fracture of upper end of tibia
82311	Open fracture of upper end of fibula
82312	Open fracture of upper end of fibula with tibia
82320	Closed fracture of shaft of tibia
82321	Closed fracture of shaft of fibula
82322	Closed fracture of shaft of fibula with tibia
82330	Open fracture of shaft of tibia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
82331	Open fracture of shaft of fibula
82332	Open fracture of shaft of fibula with tibia
8234	Torus fracture
82340	Torus fracture, tibia alone
82341	Torus fracture, fibula alone
82342	Torus fracture, fibula with tibia
82380	Closed fracture of unspecified part of tibia
82381	Closed fracture of unspecified part of fibula
82382	Closed fracture of unspecified part of fibula with tibia
82390	Open fracture of unspecified part of tibia
82391	Open fracture of unspecified part of fibula
82392	Open fracture of unspecified part of fibula with tibia
8240	Fracture of medial malleolus, closed
8241	Fracture of medial malleolus, open
8242	Fracture of lateral malleolus, closed
8243	Fracture of lateral malleolus, open
8244	Bimalleolar fracture, closed
8245	Bimalleolar fracture, open
8246	Trimalleolar fracture, closed
8247	Trimalleolar fracture, open
8248	Unspecified fracture of ankle, closed
8249	Unspecified fracture of ankle, open
8250	Fracture of calcaneus, closed
8251	Fracture of calcaneus, open
82520	Fracture of unspecified bone(s) of foot (except toes), closed
82521	Fracture of astragalus, closed
82522	Fracture of navicular (scaphoid) bone of foot, closed
82523	Fracture of cuboid bone, closed
82524	Fracture of cuneiform bone of foot, closed
82525	Fracture of metatarsal bone(s), closed
82529	Other fracture of tarsal and metatarsal bones, closed
82530	Fracture of unspecified bone(s) of foot (except toes), open
82531	Fracture of astragalus, open
82532	Fracture of navicular (scaphoid) bone of foot, open
82533	Fracture of cuboid bone, open
82534	Fracture of cuneiform bone of foot, open
82535	Fracture of metatarsal bone(s), open
82539	Other fractures of tarsal and metatarsal bones, open

Diagnosis Code	Description
8260	Closed fracture of one or more phalanges of foot
8261	Open fracture of one or more phalanges of foot
8270	Other, multiple and ill-defined fractures of lower limb, closed
8271	Other, multiple and ill-defined fractures of lower limb, open
8280	Multiple fractures involving both lower limbs, lower with upper limb, and lower limb(s) with rib(s) and sternum, closed
8281	Multiple fractures involving both lower limbs, lower with upper limb, and lower limb(s) with rib(s) and sternum, open
8290	Fracture of unspecified bone, closed
8291	Fracture of unspecified bone, open
8300	Closed dislocation of jaw
8301	Open dislocation of jaw
83100	Closed dislocation of shoulder, unspecified site
83101	Closed anterior dislocation of humerus
83102	Closed posterior dislocation of humerus
83103	Closed inferior dislocation of humerus
83104	Closed dislocation of acromioclavicular (joint)
83109	Closed dislocation of other site of shoulder
83110	Open dislocation of shoulder, unspecified
83111	Open anterior dislocation of humerus
83112	Open posterior dislocation of humerus
83113	Open inferior dislocation of humerus
83114	Open dislocation of acromioclavicular (joint)
83119	Open dislocation of other site of shoulder
83200	Closed dislocation of elbow, unspecified site
83201	Closed anterior dislocation of elbow
83202	Closed posterior dislocation of elbow
83203	Closed medial dislocation of elbow
83204	Closed lateral dislocation of elbow
83209	Closed dislocation of other site of elbow
83210	Open dislocation of elbow, unspecified site
83211	Open anterior dislocation of elbow
83212	Open posterior dislocation of elbow
83213	Open medial dislocation of elbow
83214	Open lateral dislocation of elbow
83219	Open dislocation of other site of elbow
83300	Closed dislocation of wrist, unspecified part

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
83301	Closed dislocation of radioulnar (joint), distal
83302	Closed dislocation of radiocarpal (joint)
83303	Closed dislocation of midcarpal (joint)
83304	Closed dislocation of carpometacarpal (joint)
83305	Closed dislocation of metacarpal (bone), proximal end
83309	Closed dislocation of other part of wrist
83310	Open dislocation of wrist, unspecified part
83311	Open dislocation of radioulnar (joint), distal
83312	Open dislocation of radiocarpal (joint)
83313	Open dislocation of midcarpal (joint)
83314	Open dislocation of carpometacarpal (joint)
83315	Open dislocation of metacarpal (bone), proximal end
83319	Open dislocation of other part of wrist
83400	Closed dislocation of finger, unspecified part
83401	Closed dislocation of metacarpophalangeal (joint)
83402	Closed dislocation of interphalangeal (joint), hand
83410	Open dislocation of finger, unspecified part
83411	Open dislocation of metacarpophalangeal (joint)
83412	Open dislocation interphalangeal (joint), hand
83500	Closed dislocation of hip, unspecified site
83501	Closed posterior dislocation of hip
83502	Closed obturator dislocation of hip
83503	Other closed anterior dislocation of hip
83510	Open dislocation of hip, unspecified site
83511	Open posterior dislocation of hip
83512	Open obturator dislocation of hip
83513	Other open anterior dislocation of hip
8360	Tear of medial cartilage or meniscus of knee, current
8361	Tear of lateral cartilage or meniscus of knee, current
8362	Other tear of cartilage or meniscus of knee, current
8363	Dislocation of patella, closed
8364	Dislocation of patella, open
83650	Closed dislocation of knee, unspecified part
83651	Anterior dislocation of tibia, proximal end, closed
83652	Posterior dislocation of tibia, proximal end, closed
83653	Medial dislocation of tibia, proximal end, closed
83654	Lateral dislocation of tibia, proximal end, closed
83659	Other dislocation of knee, closed
83660	Dislocation of knee, unspecified part, open
83661	Anterior dislocation of tibia, proximal end, open
83662	Posterior dislocation of tibia, proximal end, open
83663	Medial dislocation of tibia, proximal end, open
8370	Closed dislocation of ankle
8371	Open dislocation of ankle
83800	Closed dislocation of foot, unspecified part
83801	Closed dislocation of tarsal (bone), joint unspecified
83802	Closed dislocation of midtarsal (joint)
83803	Closed dislocation of tarsometatarsal
83804	Closed dislocation of metatarsal (bone), joint unspecified
83805	Closed dislocation of metatarsophalangeal (joint)
83806	Closed dislocation of interphalangeal (joint), foot
83809	Closed dislocation of other part of foot
83810	Open dislocation of foot, unspecified part
83811	Open dislocation of tarsal (bone), joint unspecified
83812	Open dislocation of midtarsal (joint)
83813	Open dislocation of tarsometatarsal (joint)
83814	Open dislocation of metatarsal (bone), joint unspecified
83815	Open dislocation of metatarsophalangeal (joint)
83816	Open dislocation of interphalangeal (joint), foot
83819	Open dislocation of other part of foot
83900	Closed dislocation, cervical vertebra, unspecified
83901	Closed dislocation, first cervical vertebra
83902	Closed dislocation, second cervical vertebra
83903	Closed dislocation, third cervical vertebra
83904	Closed dislocation, fourth cervical vertebra
83905	Closed dislocation, fifth cervical vertebra

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
83906	Closed dislocation, sixth cervical vertebra
83907	Closed dislocation, seventh cervical vertebra
83908	Closed dislocation, multiple cervical vertebrae
83910	Open dislocation, cervical vertebra, unspecified
83911	Open dislocation, first cervical vertebra
83912	Open dislocation, second cervical vertebra
83913	Open dislocation, third cervical vertebra
83914	Open dislocation, fourth cervical vertebra
83915	Open dislocation, fifth cervical vertebra
83916	Open dislocation, sixth cervical vertebra
83917	Open dislocation, seventh cervical vertebra
83918	Open dislocation, multiple cervical vertebrae
83920	Closed dislocation, lumbar vertebra
83921	Closed dislocation, thoracic vertebra
83930	Open dislocation, lumbar vertebra
83931	Open dislocation, thoracic vertebra
83940	Closed dislocation, vertebra, unspecified site
83941	Closed dislocation, coccyx
83942	Closed dislocation, sacrum
83949	Closed dislocation, other vertebra
83950	Open dislocation, vertebra, unspecified site
83951	Open dislocation, coccyx
83952	Open dislocation, sacrum
83959	Open dislocation, other vertebra
83961	Closed dislocation, sternum
83969	Closed dislocation, other location
83971	Open dislocation, sternum
83979	Open dislocation, other location
8398	Closed dislocation, multiple and ill-defined sites
8399	Open dislocation, multiple and ill-defined sites
8400	Acromioclavicular (joint) (ligament) sprain
8401	Coracoclavicular (ligament) sprain
8402	Coracohumeral (ligament) sprain
8403	Infraspinatus (muscle) (tendon) sprain
8404	Rotator cuff (capsule) sprain
8405	Subscapularis (muscle) sprain
8406	Supraspinatus (muscle) (tendon) sprain
8407	Superior glenoid labrum lesion
8408	Sprain of other specified sites of shoulder and upper arm
8409	Sprain of unspecified site of shoulder and upper arm
8410	Radial collateral ligament sprain
8411	Ulnar collateral ligament sprain
8412	Radiohumeral (joint) sprain
8413	Ulnohumeral (joint) sprain
8418	Sprain of other specified sites of elbow and forearm
8419	Sprain of unspecified site of elbow and forearm
84200	Sprain of unspecified site of wrist
84201	Sprain of carpal (joint) of wrist
84202	Sprain of radiocarpal (joint) (ligament) of wrist
84209	Other wrist sprain
84210	Sprain of unspecified site of hand
84211	Sprain of carpometacarpal (joint) of hand
84212	Sprain of metacarpophalangeal (joint) of hand
84213	Sprain of interphalangeal (joint) of hand
84219	Other hand sprain
8430	Iliofemoral (ligament) sprain
8431	Ischiocapsular (ligament) sprain
8438	Sprain of other specified sites of hip and thigh
8439	Sprain of unspecified site of hip and thigh
8440	Sprain of lateral collateral ligament of knee
8441	Sprain of medial collateral ligament of knee
8442	Sprain of cruciate ligament of knee
8443	Sprain of tibiofibular (joint) (ligament) superior, of knee
8448	Sprain of other specified sites of knee and leg
8449	Sprain of unspecified site of knee and leg
84500	Unspecified site of ankle sprain
84501	Deltoid (ligament), ankle sprain
84502	Calcaneofibular (ligament) ankle sprain
84503	Tibiofibular (ligament) sprain, distal
84509	Other ankle sprain
84510	Unspecified site of foot sprain
84511	Tarsometatarsal (joint) (ligament) sprain
84512	Metatarsaophalangeal (joint) sprain
84513	Interphalangeal (joint), toe sprain
84519	Other foot sprain

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8460	Lumbosacral (joint) (ligament) sprain
8461	Sacroiliac (ligament) sprain
8462	Sacrospinatus (ligament) sprain
8463	Sacrotuberous (ligament) sprain
8468	Other specified sites of sacroiliac region sprain
8469	Unspecified site of sacroiliac region sprain
8470	Neck sprain
8471	Thoracic sprain
8472	Lumbar sprain
8473	Sprain of sacrum
8474	Sprain of coccyx
8479	Sprain of unspecified site of back
8480	Sprain of septal cartilage of nose
8481	Jaw sprain
8482	Thyroid region sprain
8483	Sprain of ribs
84840	Sternum sprain, unspecified part
84841	Sternoclavicular (joint) (ligament) sprain
84842	Chondrosternal (joint) sprain
84849	Other sprain of sternum
8485	Pelvic sprain
8488	Other specified sites of sprains and strains
8489	Unspecified site of sprain and strain
8500	Concussion with no loss of consciousness
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion with loss of consciousness from 31 minutes to 59 minutes
8502	Concussion with moderate loss of consciousness
8503	Concussion with prolonged loss of consciousness and return to pre-existing conscious level
8504	Concussion with prolonged loss of consciousness, without return to pre-existing conscious level
8505	Concussion with loss of consciousness of unspecified duration
8509	Concussion, unspecified
85100	Cortex (cerebral) contusion without mention of open intracranial wound, state of consciousness unspecified
85101	Cortex (cerebral) contusion without mention of open intracranial wound, with no loss of consciousness

Diagnosis Code	Description
85102	Cortex (cerebral) contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85103	Cortex (cerebral) contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85104	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-exisiting conscious level
85105	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85106	Cortex (cerebral) contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85109	Cortex (cerebral) contusion without mention of open intracranial wound, with concussion, unspecified
85110	Cortex (cerebral) contusion with open intracranial wound, without mention of specific state of consciousness
85111	Cortex (cerebral) contusion with open intracranial wound, with no loss of consciousness
85112	Cortex (cerebral) contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85113	Cortex (cerebral) contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85114	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85115	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85116	Cortex (cerebral) contusion with open intracranial wound, with loss of consciousness of unspecified duration
85119	Cortex (cerebral) contusion with open intracranial wound, with concussion, unspecified
85120	Cortex (cerebral) laceration without mention of open intracranial wound, with state of consciousness unspecified
85121	Cortex (cerebral) laceration without mention of open intracranial wound, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85122	Cortex (cerebral) laceration without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85123	Cortex (cerebral) laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85124	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85129	Cortex (cerebral) laceration without mention of open intracranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, with state of consciousness unspecified
85131	Cortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified
85140	Cerebellar or brain stem contusion without mention of open intracranial wound, with state of consciousness unspecified
85141	Cerebellar or brain stem contusion without mention of open intracranial wound, with no loss of consciousness
85142	Cerebellar or brain stem contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusion without mention of open intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusion with open intracranial wound, with state of consciousness unspecified
85151	Cerebellar or brain stem contusion with open intracranial wound, with no loss of consciousness
85152	Cerebellar or brain stem contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85153	Cerebellar or brain stem contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85155	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusion with open intracranial wound, with loss of consciousness of unspecified duration
85159	Cerebellar or brain stem contusion with open intracranial wound, with concussion, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85160	Cerebellar or brain stem laceration without mention of open intracranial wound, with state of consciousness unspecified
85161	Cerebellar or brain stem laceration without mention of open intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85169	Cerebellar or brain stem laceration without mention of open intracranial wound, with concussion, unspecified
85170	Cerebellar or brain stem laceration with open intracranial wound, with state of consciousness unspecified
85171	Cerebellar or brain stem laceration with open intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with open intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with state of consciousness unspecified
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85186	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with state of consciousness unspecified
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with loss of consciousness of unspecified duration
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85201	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85202	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85206	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with loss of conscious-ness of unspecified duration
85209	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified

Diagnosis Code	Description
85210	Subarachnoid hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85211	Subarachnoid hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85213	Subarachnoid hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85214	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85215	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85216	Subarachnoid hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85221	Subdural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85222	Subdural hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85223	Subdural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85226	Subdural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85229	Subdural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85231	Subdural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85232	Subdural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85233	Subdural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85236	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85239	Subdural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85241	Extradural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury, without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85243	Extradural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
85244	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85246	Extradural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85249	Extradural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85250	Extradural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85251	Extradural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85252	Extradural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85253	Extradural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85255	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85256	Extradural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury. without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

Diagnosis Code	Description
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with state of consciousness unspecified
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85409	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with concussion, unspecified
85410	Intracranial injury of other and unspecified nature, with open intracranial wound, with state of consciousness unspecified
85411	Intracranial injury of other and unspecified nature, with open intracranial wound, with no loss of consciousness
85412	Intracranial injury of other and unspecified nature, with open intracranial wound, with brief (less than one hour) loss of consciousness
85413	Intracranial injury of other and unspecified nature, with open intracranial wound, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85414	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85415	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85416	Intracranial injury of other and unspecified nature, with open intracranial wound, with loss of consciousness of unspecified duration
85419	Intracranial injury of other and unspecified nature, with open intracranial wound, with concussion, unspecified
8600	Traumatic pneumothorax without mention of open wound into thorax
8601	Traumatic pneumothorax with open wound into thorax
8602	Traumatic hemothorax without mention of open wound into thorax
8603	Traumatic hemothorax with open wound into thorax
8604	Traumatic pneumohemothorax without mention of open wound into thorax
8605	Traumatic pneumohemothorax with open wound into thorax
86100	Unspecified injury of heart without mention of open wound into thorax
86101	Contusion of heart without mention of open wound into thorax
86102	Laceration of heart without penetration of heart chambers or open wound into thorax
86103	Laceration of heart with penetration of heart chambers, without mention of open wound into thorax
86110	Unspecified injury of heart with open wound into thorax
86111	Contusion of heart with open wound into thorax
86112	Laceration of heart without penetration of heart chambers, with open wound into thorax
86113	Laceration of heart with penetration of heart chambers and open wound into thorax
86120	Unspecified injury of lung without open wound into thorax
86121	Contusion of lung without open wound into thorax

Diagnosis Code	Description
86122	Laceration of lung without open wound into thorax
86130	Unspecified injury of lung with open wound into thorax
86131	Contusion of lung with open wound into thorax
86132	Laceration of lung with open wound into thorax
8620	Injury to diaphragm without mention of open wound into cavity
8621	Injury to diaphragm with open wound into cavity
86221	Injury to bronchus without open wound into cavity
86222	Injury to esophagus without mention of open wound into cavity
86229	Injury to other specified intrathoracic organs without mention of open wound into cavity
86231	Injury to bronchus with open wound into cavity
86232	Injury to esophagus with open wound into cavity
86239	Injury to other specified intrathoracic organs with open wound into cavity
8628	Injury to multiple and unspecified intrathoracic organs without mention of open wound into cavity
8629	Injury to multiple and unspecified intrathoracic organs with open wound into cavity
8630	Injury to stomach without mention of open wound into cavity
8631	Injury to stomach with open wound into cavity
86320	Injury to small intestine, unspecified site, without open wound into cavity
86321	Injury to duodenum without open wound into cavity
86329	Other injury to small intestine without open wound into cavity
86330	Injury to small intestine, unspecified site, with open wound into cavity
86331	Injury to duodenum with open wound into cavity
86339	Other injury to small intestine with open wound into cavity
86340	Injury to colon, unspecified site, without mention of open wound into cavity
86341	Injury to ascending (right) colon without open wound into cavity

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
86342	Injury to transverse colon without open wound into cavity
86343	Injury to descending (left) colon without open wound into cavity
86344	Injury to descending (left) colon without open wound into cavity
86345	Injury to rectum without open wound into cavity
86346	Injury to multiple sites in colon and rectum without open wound into cavity
86349	Other injury to colon and rectum, without open wound into cavity
86350	Injury to colon, unspecified site, with open wound into cavity
86351	Injury to ascending (right) colon with open wound into cavity
86352	Injury to transverse colon with open wound into cavity
86353	Injury to descending (left) colon with open wound into cavity
86354	Injury to sigmoid colon with open wound into cavity
86355	Injury to rectum with open wound into cavity
86356	Injury to multiple sites in colon and rectum with open wound into cavity
86359	Other injury to colon and rectum with open wound into cavity
86380	Injury to gastrointestinal tract, unspecified site, without open wound into cavity
86381	Injury to pancreas head without mention of open wound into cavity
86382	Injury to pancreas body without mention of open wound into cavity
86383	Injury to pancreas tail without mention of open wound into cavity
86384	Injury to pancreas, multiple and unspecified sites, without open wound into cavity
83685	Injury to appendix without open wound into cavity
86389	Injury to other and unspecified gastrointestinal sites without open wound into cavity
86390	Injury to gastrointestinal tract, unspecified site, with open wound into cavity
86391	Injury to pancreas head with open wound into cavity
86392	Injury to pancreas body with open wound into cavity
86393	Injury to pancreas tail with open wound into cavity
86394	Injury to pancreas, multiple and unspecified sites, with open wound into cavity
86395	Injury to appendix with open wound into cavity
86399	Injury to other and unspecified gastrointestinal sites with open wound into cavity
86400	Unspecified injury to liver without mention of open wound into cavity
86401	Hematoma and contusion of liver without mention of open wound into cavity
86402	Laceration of liver, minor, without mention of open wound into cavity
86403	Laceration of liver, moderate, without mention of open wound into cavity
86404	Laceration of liver, major, without mention of open wound into cavity
86405	Laceration of liver, unspecified, without mention of open wound into cavity
86409	Other injury to liver without mention of open wound into cavity
86410	Unspecified injury to liver with open wound into cavity
86411	Hematoma and contusion of liver with open wound into cavity
86412	Laceration of liver, minor, with open wound into cavity
86413	Laceration of liver, moderate, with open wound into cavity
86414	Laceration of liver, major, with open wound into cavity
86415	Laceration of liver, unspecified, with open wound into cavity
86419	Other injury to liver with open wound into cavity
86500	Unspecified injury to spleen without mention of open wound into cavity
86501	Hematoma of spleen, without rupture of capsule, without mention of open wound into cavity
86502	Capsular tears to spleen, without major disruption of parenchyma, without mention of open wound into cavity
86503	Laceration of spleen extending into parenchyma without mention of open wound into cavity
86504	Massive parenchymal disruption of spleen without mention of open wound into cavity
86509	Other injury into spleen without mention of open wound into cavity
86510	Unspecified injury to spleen with open wound into cavity

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
86511	Hematoma of spleen, without rupture of capsule, with open wound into cavity
86512	Capsular tears to spleen, without major disruption of parenchyma, with open wound into cavity
86513	Laceration of spleen extending into parenchyma, with open wound into cavity
86514	Massive parenchyma disruption of spleen with open wound into cavity
86519	Other injury to spleen with open wound into cavity
86600	Unspecified injury to kidney without mention of open wound into cavity
86601	Hematoma of kidney, without rupture of capsule, without mention of open wound into cavity
86602	Laceration of kidney without mention of open wound into cavity
86603	Complete disruption of kidney parenchyma, without mention of open wound into cavity
86610	Unspecified injury to kidney with open wound into cavity
86611	Hematoma of kidney, without rupture of capsule, with open wound into cavity
86612	Laceration of kidney with open wound into cavity
86613	Complete disruption of kidney parenchyma, with open wound into cavity
8670	Injury to bladder and urethra without mention of open wound into cavity
8671	Injury to bladder and urethra with open wound into cavity
8672	Injury to ureter without mention of open wound into cavity
8673	Injury to ureter with open wound into cavity
8674	Injury to uterus without mention of open wound into cavity
8675	Injury to uterus with open wound into cavity
8676	Injury to other specified pelvic organs without mention of open wound into cavity
8677	Injury to other specified pelvic organs with open wound into cavity
8678	Injury to unspecified pelvic organ without mention of open wound into cavity
8679	Injury to unspecified pelvic organ with open wound into cavity
86800	Injury to unspecified intra-abdominal organ without mention of open wound into cavity
86801	Injury to adrenal gland without mention of open wound into cavity

Diagnosis Code	Description
86802	Injury to bile duct and gallbladder without mention of open wound into cavity
86803	Injury to peritoneum without mention of open wound into cavity
86804	Injury to retroperitoneum without mention of open wound into cavity
86809	Injury to other and multiple intra-abdominal organs without mention of open wound into cavity
86810	Injury to unspecified intra-abdominal organ, with open wound into cavity
86811	Injury to adrenal gland, with open wound into cavity
86812	Injury to bile duct and gallbladder, with open wound into cavity
86813	Injury to peritoneum with open wound into cavity
86814	Injury to retroperitoneum with open wound into cavity
86819	Injury to other and multiple intra-abdominal organs, with open wound into cavity
8690	Internal injury to unspecified or ill-defined organs without mention of open wound into cavity
8691	Internal injury to unspecified or ill-defined organs with open wound into cavity
8700	Laceration of skin of eyelid and periocular area
8701	Laceration of eyelid, full-thickness, not involving lacrimal passages
8702	Laceration of eyelid involving lacrimal passages
8703	Penetrating wound of orbit, without mention of foreign body
8704	Penetrating wound of orbit with foreign body
8708	Other specified open wounds of ocular adnexa
8709	Unspecified open wound of ocular adnexa
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
8712	Rupture of eye with partial loss of intraocular tissue
8713	Avulsion of eye
8714	Unspecified laceration of eye
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8717	Unspecified ocular penetration
8719	Unspecified open wound of eyeball
87200	Open wound of external ear, unspecified site, uncomplicated
87201	Open wound of auricle, uncomplicated
87202	Open wound of auditory canal, uncomplicated
87210	Open wound of external ear, unspecified site, complicated
87211	Open wound of auricle, complicated
87212	Open wound of auditory canal, complicated
87261	Open wound of ear drum, uncomplicated
87262	Open wound of ossicles, uncomplicated
87263	Open wound of eustachian tube, uncomplicated
87264	Open wound of cochlea, uncomplicated
87269	Open wound of other and multiple sites, uncomplicated
87271	Open wound of ear drum, complicated
87272	Open wound of ossicles, complicated
87273	Open wound of eustachian tube, complicated
87274	Open wound of cochlea, complicated
87279	Open wound of other and multiple sites, complicated
8728	Open wound of ear, part unspecified, without mention of complication
8729	Open wound of ear, part unspecified, complicated
8730	Open wound of scalp, without mention of complication
8731	Open wound of scalp, complicated
87320	Open wound of nose, unspecified site, uncomplicated
87321	Open wound of nasal septum, uncomplicated
87322	Open wound of nasal cavity, uncomplicated
87323	Open wound of nasal sinus, uncomplicated
87329	Open wound of multiple sites, uncomplicated
87330	Open wound of nose, unspecified site, complicated
87331	Open wound of nasal septum, complicated
87332	Open wound of nasal cavity, complicated
87333	Open wound of nasal sinus, complicated
87339	Open wound of multiple sites, complicated

Diagnosis Code	Description
87340	Open wound of face, unspecified site, uncomplicated
87341	Open wound of cheek, uncomplicated
87342	Open wound of forehead, uncomplicated
87343	Open wound of lip, uncomplicated
87344	Open wound of jaw, uncomplicated
87349	Open wound of other and multiple sites, uncomplicated
87350	Open wound of face, unspecified site, complicated
87351	Open wound of cheek, complicated
87352	Open wound of forehead, complicated
87353	Open wound of lip, complicated
87354	Open wound of jaw, complicated
87359	Open wound of other and multiple sites, complicated
87360	Open wound of mouth, unspecified site, uncomplicated
87361	Open wound of buccal mucosa, uncomplicated
87362	Open wound of gum (alveolar process), uncomplicated
87363	Tooth (broken) (fractured) (due to trauma), without mention of complication
87364	Open wound of tongue and floor of mouth, uncomplicated
87365	Open wound of palate, uncomplicated
87369	Open wound of other and multiple sites, uncomplicated
87370	Open wound of mouth, unspecified site, complicated
87371	Open wound of buccal mucosa, complicated
87372	Open wound of gum (alveolar process), complicated
87373	Tooth (broken) (fractured) (due to trauma), complicated
87374	Open wound of tongue and floor of mouth, complicated
87375	Open wound of palate, complicated
87379	Open wound of other and multiple sites, complicated
8738	Other and unspecified open wound of head without mention of complication
8739	Other and unspecified open wound of head, complicated
87400	Open wound of larynx with trachea, uncomplicated
87401	Open wound of larynx, uncomplicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
87402	Open wound of trachea, uncomplicated
87410	Open wound of larynx with trachea, complicated
87411	Open wound of larynx, complicated
87412	Open wound of trachea, complicated
8742	Open wound of thyroid gland, without mention of complication
8743	Open wound of thyroid gland, complicated
8744	Open wound of pharynx, without mention of complication
8745	Open wound of pharynx, complicated
8748	Open wound of other and unspecified parts of neck, without mention of complication
8749	Open wound of other and unspecified parts of neck, complicated
8750	Open wound of chest (wall), without mention of complication
8751	Open wound of chest (wall), complicated
8760	Open wound of back, without mention of complication
8761	Open wound of back, complicated
8770	Open wound of buttock, without mention of complication
8771	Open wound of buttock, complicated
8780	Open wound of penis, without mention of complication
8781	Open wound of penis, complicated
8782	Open wound of scrotum and testes, without mention of complication
8783	Open wound of scrotum and testes, complicated
8784	Open wound of vulva, without mention of complication
8785	Open wound of vulva, complicated
8786	Open wound of vagina, without mention of complication
8787	Open wound of vagina, complicated
8788	Open wound of other and unspecified parts of genital organs, without mention of complication
8789	Open wound of other and unspecified parts of genital organs, complicated
8790	Open wound of breast, without mention of complication
8791	Open wound of breast, complicated
8792	Open wound of abdominal wall, anterior, without mention of complication
8793	Open wound of abdominal wall, anterior, complicated

Diagnosis Code	Description
8794	Open wound of abdominal wall, lateral, without mention of complication
8795	Open wound of abdominal wall, lateral, complicated
8796	Open wound of other and unspecified parts of trunk, without mention of complication
8797	Open wound of other and unspecified parts of trunk, complicated
8798	Open wound(s) (multiple) of unspecified site(s), without mention of complication
8799	Open wound(s) (multiple) of unspecified site(s), complicated
88000	Open wound of shoulder region, without mention of complication
88001	Open wound of scapular region, without mention of complication
88002	Open wound of axillary region, without mention of complication
88003	Open wound of upper arm, without mention of complication
88009	Open wound of multiple sites of shoulder and upper arm, without mention of complication
88010	Open wound of shoulder region, complicated
88011	Open wound of scapular region, complicated
88012	Open wound of axillary region, complicated
88013	Open wound of upper arm, complicated
88019	Open wound of multiple sites of shoulder and upper arm, complicated
88020	Open wound of shoulder region, with tendon involvement
88021	Open wound of scapular region, with tendon involvement
88022	Open wound of axillary region, with tendon involvement
88023	Open wound of upper arm, with tendon involvement
88029	Open wound of multiple sites of shoulder and upper arm, with tendon involvement
88100	Open wound of multiple sites of shoulder and upper arm, with tendon involvement
88101	Open wound of elbow, without mention of complication
88102	Open wound of wrist, without mention of complication
88110	Open wound of forearm, complicated
88111	Open wound of elbow, complicated
88112	Open wound of wrist, complicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
88120	Open wound of forearm, with tendon involvement
88121	Open wound of elbow, with tendon involvement
88122	Open wound of wrist, with tendon involvement
8820	Open wound of hand except fingers alone, without mention of complication
8821	Open wound of hand except fingers alone, complicated
8822	Open wound of hand except fingers alone, with tendon involvement
8830	Open wound of fingers, without mention of complication
8831	Open wound of fingers, complicated
8832	Open wound of fingers, with tendon involvement
8840	Multiple and unspecified open wound of upper limb, without mention of complication
8841	Multiple and unspecified open wound of upper limb, complicated
8842	Multiple and unspecified open wound of upper limb, with tendon involvement
8850	Traumatic amputation of thumb (complete) (partial), without mention of complication
8851	Traumatic amputation of thumb (complete) (partial), complicated
8860	Traumatic amputation of other finger(s) (complete) (partial), without mention of complication
8861	Traumatic amputation of other finger(s) (complete) (partial), complicated
8870	Traumatic amputation of arm and hand (complete) (partial), unilateral, below elbow, without mention of complication
8871	Traumatic amputation of arm and hand (complete) (partial), unilateral, below elbow, complicated
8872	Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow, without mention of complication
8873	Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow, complicated
8874	Traumatic amputation of arm and hand (complete) (partial), unilateral, level not specified, without mention of complication
8875	Traumatic amputation of arm and hand (complete) (partial), unilateral, level not specified, complicated

Diagnosis Code	Description
8876	Traumatic amputation of arm and hand (complete) (partial), bilateral (any level), without mention of complication
8877	Traumatic amputation of arm and hand (complete) (partial), bilateral (any level), complicated
8900	Open wound of hip and thigh, without mention of complication
8901	Open wound of hip and thigh, complicated
8902	Open wound of hip and thigh, with tendon involvement
8910	Open wound of knee, leg (except thigh), and ankle, without mention of complication
8911	Open wound of knee, leg (except thigh), and ankle, complicated
8912	Open wound of knee, leg (except thigh), and ankle, with tendon involvement
8920	Open wound of foot except toe(s) alone, without mention of complication
8921	Open wound of foot except toe(s) alone, complicated
8922	Open wound of foot except toe(s) alone, with tendon involvement
8930	Open wound of toe(s), without mention of complication
8931	Open wound of toe(s), complicated
8932	Open wound of toe(s), with tendon involvement
8940	Multiple and unspecified open wound of lower limb, without mention of complication
8941	Multiple and unspecified open wound of lower limb, complicated
8942	Multiple and unspecified open wound of lower limb, with tendon involvement
8950	Traumatic amputation of toe(s) (complete) (partial), without mention of complication
8951	Traumatic amputation of toe(s) (complete) (partial), complicated
8960	Traumatic amputation of foot (complete) (partial), unilateral, without mention of complication
8961	Traumatic amputation of foot (complete) (partial), unilateral, complicated
8962	Traumatic amputation of foot (complete) (partial), bilateral, without mention of complication
8963	Traumatic amputation of foot (complete) (partial), bilateral, complicated
8970	Traumatic amputation of leg(s) (complete) (partial), unilateral, below knee, without mention of complication

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8971	Traumatic amputation of leg(s) (complete) (partial), unilateral, below knee, complicated
8972	Traumatic amputation of leg(s) (complete) (partial), unilateral, at or above knee, without mention of complication
8973	Traumatic amputation of leg(s) (complete) (partial), unilateral, at or above knee, complicated
8974	Traumatic amputation of leg(s) (complete) (partial), unilateral, level not specified, without mention of complication
8975	Traumatic amputation of leg(s) (complete) (partial), unilateral, level not specified, complicated
8976	Traumatic amputation of leg(s) (complete) (partial), bilateral (any level), without mention of complication
8977	Traumatic amputation of leg(s) (complete) (partial), bilateral (any level), complicated
90000	Injury to carotid artery, unspecified
90001	Injury to common carotid artery
90002	Injury to external carotid artery
90003	Injury to internal carotid artery
9001	Injury to internal jugular vein
90081	Injury to external jugular vein
90082	Injury to multiple blood vessels of head and neck
90089	Injury to other specified blood vessels of head and neck
9009	Injury to unspecified blood vessel of head and neck
9010	Injury to thoracic aorta
9011	Injury to innominate and subclavian arteries
9012	Injury to superior vena cava
9013	Injury to innominate and subclavian veins
90140	Injury to pulmonary vessel(s), unspecified
90141	Injury to pulmonary artery
90142	Injury to pulmonary vein
90181	Injury to intercostal artery or vein
90182	Injury to internal mammary artery or vein
90183	Injury to multiple blood vessels of thorax
90189	Injury to other specified blood vessels of thorax
9019	Injury to unspecified blood vessel of thorax
9020	Injury to abdominal aorta
90210	Injury to inferior vena cava, unspecified
90211	Injury to hepatic veins
90219	Injury to other specified branches of inferior vena cava
90220	Injury to celiac and mesenteric arteries, unspecified
90221	Injury to gastric artery
90222	Injury to hepatic artery
90223	Injury to splenic artery
90224	Injury to other specified branches of celiac axis
90225	Injury to superior mesenteric artery (trunk)
90226	Injury to primary branches of superior mesenteric artery
90227	Injury to inferior mesenteric artery
90229	Injury to other celiac and mesenteric arteries
90231	Injury to superior mesenteric vein and primary subdivisions
90232	Injury to inferior mesenteric vein
90233	Injury to portal vein
90234	Injury to splenic vein
90239	Injury to other portal and splenic veins
90240	Injury to renal vessel(s), unspecified
90241	Injury to renal artery
90242	Injury to renal vein
90249	Injury to other renal blood vessels
90250	Injury to iliac vessel(s), unspecified
90251	Injury to hypogastric artery
90252	Injury hypogastric vein
90253	Injury to iliac artery
90254	Injury to iliac vein
90255	Injury to uterine artery
90256	Injury to uterine vein
90259	Injury to other iliac blood vessels
90281	Injury to ovarian artery
90282	Injury to ovarian vein
90287	Injury to multiple blood vessels of abdomen and pelvis
90289	Injury to other specified blood vessels of abdomen and pelvis
9029	Injury to unspecified blood vessel of abdomen and pelvis
90300	Injury to axillary vessel(s), unspecified
90301	Injury to axillary artery
90302	Injury to axillary vein
9031	Injury to brachial blood vessels
9032	Injury to radial blood vessels

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9033	Injury to ulnar blood vessels
9034	Injury to palmar artery
9035	Injury to digital blood vessels
9038	Injury to other specified blood vessels of upper extremity
9039	Injury to unspecified blood vessel of upper extremity
9040	Injury to common femoral artery
9041	Injury to superficial femoral artery
9042	Injury to femoral veins
9043	Injury to saphenous veins
90440	Injury to popliteal vessel(s), unspecified
90441	Injury to popliteal vessel(s), unspecified
90442	Injury to popliteal vein
90450	Injury to tibial vessel(s), unspecified
90451	Injury to anterior tibial artery
90452	Injury to anterior tibial vein
90453	Injury to posterior tibial artery
90454	Injury to posterior tibial vein
9046	Injury to deep plantar blood vessels
9047	Injury to other specified blood vessels of lower extremity
9048	Injury to unspecified blood vessel of lower extremity
9049	Injury to blood vessels of unspecified site
9050	Late effect of fracture of skull and face bones
9051	Late effect of fracture of spine and trunk without mention of spinal cord lesion
9052	Late effect of fracture of upper extremities
9053	Late effect of fracture of neck of femur
9054	Late effect of fracture of lower extremities
9055	Late effect of fracture of multiple and unspecified bones
9056	Late effect of dislocation
9057	Late effect of sprain and strain without mention of tendon injury
9058	Late effect of tendon injury
9059	Late effect of traumatic amputation
9060	Late effect of open wound of head, neck, and trunk
9061	Late effect of open wound of extremities without mention of tendon injury
9062	Late effect of superficial injury
9063	Late effect of contusion
9064	Late effect of crushing

Diagnosis Code	Description
9065	Late effect of burn of eye, face, head, and neck
9066	Late effect of burn of wrist and hand
9067	Late effect of burn of other extremities
9068	Late effect of burns of other specified sites
9069	Late effect of burn of unspecified site
9070	Late effect of intracranial injury without mention of skull fracture
9071	Late effect of injury to cranial nerve
9072	Late effect of spinal cord injury
9073	Late effect of injury to nerve root(s), spinal plexus(es), and other nerves of trunk
9074	Late effect of injury to peripheral nerve of shoulder girdle and upper limb
9075	Late effect of injury to peripheral nerve of pelvic girdle and lower limb
9079	Late effect of injury to other and unspecified nerve
9080	Late effect of internal injury to chest
9081	Late effect of internal injury to intra-abdominal organs
9082	Late effect of internal injury to other internal organs
9083	Late effect of injury to blood vessel of head, neck, and extremities
9084	Late effect of injury to blood vessel of thorax, abdomen, and pelvis
9085	Late effect of foreign body in orifice
9086	Late effect of certain complications of trauma
9089	Late effect of unspecified injury
9090	Late effect of poisoning due to drug, medicinal or biological substance
9091	Late effect of toxic effects of nonmedical substances
9092	Late effect of radiation
9093	Late effect of complications of surgical and medical care
9094	Late effect of certain other external causes
9095	Late effect of adverse effect of drug, medicinal or biological substance
9099	Late effect of other and unspecified external causes
9100	Abrasion or friction burn of face, neck, and scalp except eye, without mention of infection
9101	Abrasion or friction burn of face, neck, and scalp except eye, infected

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9102	Blister of face, neck, and scalp except eye, without mention of infection
9103	Blister of face, neck, and scalp except eye, infected
9104	Insect bite, nonvenomous of face, neck, and scalp except eye, without mention of infection
9105	Insect bite, nonvenomous of face, neck, and scalp except eye, infected
9106	Superficial foreign body (splinter) of face, neck, and scalp except eye, without major open wound and without mention of infection
9107	Superficial foreign body (splinter) of face, neck, and scalp except eye, without major open wound, infected
9108	Other and unspecified superficial injury of face, neck, and scalp, without mention of infection
9109	Other and unspecified superficial injury of face, neck, and scalp, infected
9110	Abrasion or friction burn of trunk, without mention of infection
9111	Abrasion or friction burn of trunk, infected
9112	Blister of trunk, without mention of infection
9113	Blister of trunk, infected
9114	Insect bite, nonvenomous of trunk, without mention of infection
9115	Insect bite, nonvenomous of trunk, infected
9116	Superficial foreign body (splinter) of trunk, without major open wound and without mention of infection
9117	Superficial foreign body (splinter) of trunk, without major open wound, infected
9118	Other and unspecified superficial injury of trunk, without mention of infection
9119	Other and unspecified superficial injury of trunk, infected
9120	Abrasion or friction burn of shoulder and upper arm, without mention of infection
9121	Abrasion or friction burn of shoulder and upper arm, infected
9122	Blister of shoulder and upper arm, without mention of infection
9123	Blister of shoulder and upper arm, infected
9124	Insect bite, nonvenomous of shoulder and upper arm, without mention of infection
9125	Insect bite, nonvenomous of shoulder and upper arm, infected

Diagnosis Code	Description
9126	Superficial foreign body (splinter) of shoulder and upper arm, without major open wound and without mention of infection
9127	Superficial foreign body (splinter) of shoulder and upper arm, without major open wound, infected
9128	Other and unspecified superficial injury of shoulder and upper arm, without mention of infection
9129	Other and unspecified superficial injury of shoulder and upper arm, infected
9130	Abrasion or friction burn of elbow, forearm, and wrist, without mention of infection
9131	Abrasion or friction burn of elbow, forearm, and wrist, infected
9132	Blister of elbow, forearm, and wrist, without mention of infection
9133	Blister of elbow, forearm, and wrist, infected
9134	Insect bite, nonvenomous of elbow, forearm, and wrist, without mention of infection
9135	Insect bite, nonvenomous, of elbow, forearm, and wrist, infected
9136	Superficial foreign body (splinter) of elbow, forearm, and wrist, without major open wound and without mention of infection
9137	Superficial foreign body (splinter) of elbow, forearm, and wrist, without major open wound, infected
9138	Other and unspecified superficial injury of elbow, forearm, and wrist, without mention of infection
9139	Other and unspecified superficial injury of elbow, forearm, and wrist, infected
9140	Abrasion or friction burn of hand(s) except finger(s) alone, without mention of infection
9141	Abrasion or friction burn of hand(s) except finger(s) alone, infected
9142	Blister of hand(s) except finger(s) alone, without mention of infection
9143	Blister of hand(s) except finger(s) alone, infected
9144	Insect bite, nonvenomous, of hand(s) except finger(s) alone, without mention of infection
9145	Insect bite, nonvenomous, of hand(s) except finger(s) alone, infected
9146	Superficial foreign body (splinter) of hand(s) except finger(s) alone, without major open wound and without mention of infection

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9147	Superficial foreign body (splinter) of hand(s) except finger(s) alone, without major open wound, infected
9148	Other and unspecified superficial injury of hand(s) except finger(s) alone, without mention of infection
9149	Other and unspecified superficial injury of hand(s) except finger(s) alone, infected
9150	Abrasion or friction burn of fingers, without mention of infection
9151	Abrasion or friction burn of fingers, infected
9152	Blister of fingers, without mention of infection
9153	Blister of fingers, infected
9154	Insect bite, nonvenomous, of fingers, without mention of infection
9155	Insect bite, nonvenomous of fingers, infected
9156	Superficial foreign body (splinter) of fingers, without major open wound and without mention of infection
9157	Superficial foreign body (splinter) of fingers, without major open wound, infected
9158	Other and unspecified superficial injury of fingers without mention of infection
9159	Other and unspecified superficial injury of fingers, infected
9160	Abrasion or friction burn of hip, thigh, leg, and ankle, without mention of infection
9161	Abrasion or friction burn of hip, thigh, leg, and ankle, infected
9162	Blister of hip, thigh, leg, and ankle, without mention of infection
9163	Blister of hip, thigh, leg, and ankle, infected
9164	Insect bite, nonvenomous, of hip, thigh, leg, and ankle, without mention of infection
9165	Insect bite, nonvenomous of hip, thigh, leg, and ankle, infected
9166	Superficial foreign body (splinter) of hip, thigh, leg, and ankle, without major open wound and without mention of infection
9167	Superficial foreign body (splinter) of hip, thigh, leg, and ankle, without major open wound, infected
9168	Other and unspecified superficial injury of hip, thigh, leg, and ankle, without mention of infection
9169	Other and unspecified superficial injury of hip, thigh, leg, and ankle, infected
9170	Abrasion or friction burn of foot and toe(s), without mention of infection

Diagnosis Code	Description
9172	Blister of foot and toe(s), without mention of infection
9173	Blister of foot and toe(s), infected
9174	Insect bite, nonvenomous, of foot and toe(s), without mention of infection
9175	Insect bite, nonvenomous, of foot and toe(s), infected
9176	Superficial foreign body (splinter) of foot and toe(s), without major open wound and without mention of infection
9177	Superficial foreign body (splinter) of foot and toe(s), without major open wound, infected
9178	Other and unspecified superficial injury of foot and toes, without mention of infection
9179	Other and unspecified superficial injury of foot and toes, infected
9180	Superficial injury of eyelids and periocular area
9181	Superficial injury of cornea
9182	Superficial injury of conjunctiva
9189	Other and unspecified superficial injuries of eye
9190	Abrasion or friction burn of other, multiple, and unspecified sites, without mention of infection
9191	Abrasion or friction burn of other, multiple, and unspecified sites, infected
9192	Blister of other, multiple, and unspecified sites, without mention of infection
9193	Blister of other, multiple, and unspecified sites, infected
9194	Insect bite, nonvenomous, of other, multiple, and unspecified sites, without mention of infection
9195	Insect bite, nonvenomous, of other, multiple, and unspecified sites, infected
9196	Superficial foreign body (splinter) of other, multiple, and unspecified sites, without major open wound and without mention of infection
9197	Superficial foreign body (splinter) of other, multiple, and unspecified sites, without major open wound, infected
9198	Other and unspecified superficial injury of other, multiple, and unspecified sites, without mention of infection
9199	Other and unspecified superficial injury of other, multiple, and unspecified sites, infected

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
920	Contusion of face, scalp, and neck except eye(s)
9210	Black eye, not otherwise specified
9211	Contusion of eyelids and periocular area
9212	Contusion of orbital tissues
9213	Contusion of eyeball
9219	Unspecified contusion of eye
9220	Contusion of breast
9221	Contusion of chest wall
9222	Contusion of abdominal wall
92231	Contusion of back
92232	Contusion of buttock
92233	Contusion of interscapular region
9224	Contusion of genital organs
9228	Contusion of multiple sites of trunk
9229	Contusion of unspecified part of trunk
92300	Contusion of shoulder region
92301	Contusion of scapular region
92302	Contusion of axillary region
92303	Contusion of upper arm
92309	Contusion of multiple sites of shoulder and upper arm
92310	Contusion of forearm
92311	Contusion of elbow
92320	Contusion of hand(s)
92321	Contusion of wrist
9233	Contusion of finger
9238	Contusion of multiple sites of upper limb
9239	Contusion of unspecified part of upper limb
92400	Contusion of thigh
92401	Contusion of hip
92410	Contusion of lower leg
92411	Contusion of knee
92420	Contusion of foot
92421	Contusion of ankle
9243	Contusion of toe
9244	Contusion of multiple sites of lower limb
9245	Contusion of unspecified part of lower limb
9248	Contusion of multiple sites, not elsewhere classified
9249	Contusion of unspecified site
9251	Crushing injury of face and scalp
9252	Crushing injury of neck
9260	Crushing injury of external genitalia

Diagnosis Code	Description
92611	Crushing injury of back
92612	Crushing injury of buttock
92619	Crushing injury of other specified sites of trunk
9268	Crushing injury of multiple sites of trunk
9269	Crushing injury of unspecified site of trunk
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9290	Crushing injury of multiple sites, not elsewhere classified
9299	Crushing injury of unspecified site
9300	Corneal foreign body
9301	Foreign body in conjunctival sac
9302	Foreign body in lacrimal punctum
9308	Foreign body in other and combined sites on external eye
9309	Foreign body in unspecified site on external eye
931	Foreign body in ear
932	Foreign body in nose
9330	Foreign body in pharynx
9331	Foreign body in larynx

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9340	Foreign body in trachea
9341	Foreign body in main bronchus
9348	Foreign body in other specified parts bronchus and lung
9349	Foreign body in respiratory tree, unspecified
9350	Foreign body in mouth
9351	Foreign body in esophagus
9352	Foreign body in stomach
936	Foreign body in intestine and colon
937	Foreign body in anus and rectum
938	Foreign body in digestive system, unspecified
9390	Foreign body in bladder and urethra
9391	Foreign body in uterus, any part
9392	Foreign body in vulva and vagina
9393	Foreign body in penis
9399	Foreign body in unspecified site in genitourinary tract
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa
94100	Burn of unspecified degree of unspecified site of face and head
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck)
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part)
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear

Diagnosis Code	Description
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part
94200	Burn of unspecified degree of unspecified site of trunk
94201	Burn of unspecified degree of breast
94202	Burn of unspecified degree of chest wall, excluding breast and nipple
94203	Burn of unspecified degree of abdominal wall
94204	Burn of unspecified degree of back (any part)
94205	Burn of unspecified degree of genitalia
94209	Burn of unspecified degree of other and multiple sites of trunk
94210	Erythema due to burn (first degree) of unspecified site of trunk
94211	Erythema due to burn (first degree) of breast
94212	Erythema due to burn (first degree) of chest wall, excluding breast and nipple
94213	Erythema due to burn (first degree) of abdominal wall
94214	Erythema due to burn (first degree) of back (any part)
94215	Erythema due to burn (first degree) of genitalia
94219	Erythema due to burn (first degree) of other and multiple sites of trunk

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94220	Blisters with epidermal loss due to burn (second degree) of unspecified site of trunk
94221	Blisters with epidermal loss due to burn (second degree) of breast
94222	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94223	Blisters with epidermal loss due to burn (second degree) of abdominal wall
94224	Blisters with epidermal loss due to burn (second degree) of back (any part)
94225	Blisters with epidermal loss due to burn (second degree) of genitalia
94229	Blisters with epidermal loss due to burn (second degree) of other and multiple sites of trunk
94230	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of trunk
94231	Full-thickness skin loss due to burn (third degree NOS) of breast
94232	Full-thickness skin loss due to burn (third degree NOS) of chest wall, excluding breast and nipple
94233	Full-thickness skin loss due to burn (third degree NOS) of abdominal wall
94234	Full-thickness skin loss due to burn (third degree NOS) of back (any part)
94235	Full-thickness skin loss due to burn (third degree NOS) of genitalia
94239	Full-thickness skin loss due to burn (third degree NOS) of other and multiple sites of trunk
94240	Deep necrosis of underlying tissues due to burn (deep third degree) of trunk, unspecified site, without mention of loss of body part
94241	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, without mention of loss of breast
94242	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, without mention of loss of chest wall
94243	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall, without mention of loss of abdominal wall
94244	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), without mention of loss of back
94245	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, without mention of loss of genitalia

Diagnosis Code	Description
94249	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, without mention of loss of body part
94250	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of trunk, with loss of body part
94251	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, with loss of breast
94252	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, with loss of chest wall
94253	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall with loss of abdominal wall
94254	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), with loss of back
94255	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, with loss of genitalia
94259	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, with loss of a body part
94300	Burn of unspecified degree of unspecified site of upper limb
94301	Burn of unspecified degree of forearm
94302	Burn of unspecified degree of elbow
94303	Burn of unspecified degree of upper arm
94304	Burn of unspecified degree of axilla
94305	Burn of unspecified degree of shoulder
94306	Burn of unspecified degree of scapular region
94309	Burn of unspecified degree multiple sites of upper limb, except wrist and hand
94310	Erythema due to burn (first degree) of unspecified site of upper limb
94311	Erythema due to burn (first degree) of forearm
94312	Erythema due to burn (first degree) of elbow
94313	Erythema due to burn (first degree) of upper arm
94314	Erythema due to burn (first degree) of axilla
94315	Erythema due to burn (first degree) of shoulder
94316	Erythema due to burn (first degree) of scapular region

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94319	Erythema due to burn (first degree) of multiple sites of upper limb, except wrist and hand
94320	Blisters with epidermal loss due to burn (second degree) of unspecified site of upper limb
94321	Blisters with epidermal loss due to burn (second degree) of forearm
94322	Blisters with epidermal loss due to burn (second degree) of elbow
94323	Blisters with epidermal loss due to burn (second degree) of upper arm
94324	Blisters with epidermal loss due to burn (second degree) of axilla
94325	Blisters with epidermal loss due to burn (second degree) of shoulder
94326	Blisters with epidermal loss due to burn (second degree) of scapular region
94329	Blisters with epidermal loss due to burn (second degree) of multiple sites of upper limb, except wrist and hand
94330	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of upper limb
94331	Full-thickness skin loss due to burn (third degree NOS) of forearm
94332	Full-thickness skin loss due to burn (third degree NOS) of elbow
94333	Full-thickness skin loss due to burn (third degree NOS) of upper arm
94334	Full-thickness skin loss due to burn (third degree NOS) of axilla
94335	Full-thickness skin loss due to burn (third degree NOS) of shoulder
94336	Full-thickness skin loss due to burn (third degree NOS) of scapular region
94339	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of upper limb, except wrist and hand
94340	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, without mention of loss of a body part
94341	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, without mention of loss of forearm
94342	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, without mention of loss of elbow
94343	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, without mention of loss of upper arm
94344	Deep necrosis of underlying tissues due to burn of axilla, without mention of loss of axilla
94345	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, without mention of loss of shoulder
94346	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, without mention of loss of scapula
94349	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, without mention of loss of upper limb
94350	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, with loss of a body part
94351	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, with loss of forearm
94352	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, with loss of elbow
94353	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, with loss of upper arm
94354	Deep necrosis of underlying tissues due to burn (deep third degree) of axilla, with loss of axilla
94355	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, with loss of shoulder
94356	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, with loss of scapula
94359	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, with loss of upper limb
94400	Burn of unspecified degree of unspecified site of hand
94401	Burn of unspecified degree of single digit (finger (nail) other than thumb
94402	Burn of unspecified degree of thumb (nail)
94403	Burn of unspecified degree of two or more digits of hand, not including thumb
94404	Burn of unspecified degree of two or more digits of hand, including thumb
94405	Burn of unspecified degree of palm of hand
94406	Burn of unspecified degree of back of hand
94407	Burn of unspecified degree of wrist
94408	Burn of unspecified degree of multiple sites of wrist(s) and hand(s)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94410	Erythema due to burn (first degree) of unspecified site of hand
94411	Erythema due to burn (first degree) of single digit (finger [nail]) other than thumb
94412	Erythema due to burn (first degree) of thumb (nail)
94413	Erythema due to burn (first degree) of two or more digits of hand, not including thumb
94414	Erythema due to burn (first degree) of two or more digits of hand including thumb
94415	Erythema due to burn (first degree) of palm of hand
94416	Erythema due to burn (first degree) of back of hand
94417	Erythema due to burn (first degree) of wrist
94418	Erythema due to burn (first degree) of multiple sites of wrist(s) and hand(s)
94420	Blisters with epidermal loss due to burn (second degree) of unspecified site of hand
94421	Blisters with epidermal loss due to burn (second degree) of single digit (finger [nail]) other than thumb
94422	Blisters with epidermal loss due to burn of (second degree) of thumb (nail)
94423	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand, not including thumb
94424	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand including thumb
94425	Blisters with epidermal loss due to burn (second degree) of palm of hand
94426	Blisters with epidermal loss due to burn (second degree) of back of hand
94427	Blisters with epidermal loss due to burn (second degree) of wrist
94428	Blisters with epidermal loss due to burn (second degree) of multiple sites of wrist(s) and hand(s)
94430	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of hand
94431	Full-thickness skin loss due to burn (third degree NOS) of single digit (finger [nail]) other than thumb
94432	Full-thickness skin loss due to burn (third degree NOS) of thumb (nail)
94433	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand, not including thumb
94434	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand including thumb
94435	Full-thickness skin loss due to burn (third degree NOS) of palm of hand
94436	Full-thickness skin loss due to burn (third degree NOS) of back of hand
94437	Full-thickness skin loss due to burn (third degree NOS) of wrist
94438	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of wrist(s) and hand(s)
94440	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, without mention of loss of hand
94441	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger [nail]) other than thumb, without mention of loss of finger
94442	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), without mention of loss of thumb
94443	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, without mention of fingers
94444	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, without mention of loss of fingers
94445	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, without mention of loss of palm
94446	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, without mention of loss of back of hand
94447	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94448	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), without mention of loss of a body part
94450	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, with loss of hand
94451	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger [nail]) other than thumb, with loss of finger
94452	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), with loss of thumb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94453	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, with loss of fingers
94454	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, with loss of fingers
94455	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, with loss of palm of hand
94456	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, with loss of back of hand
94457	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, with loss of wrist
94458	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), with loss of a body part
94500	Burn of unspecified degree of unspecified site of lower limb (leg)
94501	Burn of unspecified degree of toe(s) (nail)
94502	Burn of unspecified degree of foot
94503	Burn of unspecified degree of ankle
94504	Burn of unspecified degree of lower leg
94505	Burn of unspecified degree of knee
94506	Burn of unspecified degree of thigh (any part)
94509	Burn of unspecified degree of multiple sites of lower limb(s)
94510	Erythema due to burn (first degree) of unspecified site of lower limb (leg)
94511	Erythema due to burn (first degree) of toe(s) (nail)
94512	Erythema due to burn (first degree) of foot
94513	Erythema due to burn (first degree) of ankle
94514	Erythema due to burn (first degree) of lower leg
94515	Erythema due to burn (first degree) of knee
94516	Erythema due to burn (first degree) of thigh (any part)
94519	Erythema due to burn (first degree) of multiple sites of lower limb(s)
94520	Blisters, epidermal loss (second degree) of unspecified site of lower limb (leg)
94521	Blisters with epidermal loss due to burn (second degree) of toe(s) (nail)
94522	Blisters with epidermal loss due to burn (second degree) of foot

Diagnosis Code	Description
94523	Blisters with epidermal loss due to burn (second degree) of ankle
94524	Blisters with epidermal loss due to burn (second degree) of lower leg
94525	Blisters with epidermal loss due to burn (second degree) of knee
94526	Blisters with epidermal loss due to burn (second degree) of thigh (any part)
94529	Blisters with epidermal loss due to burn (second degree) of multiple sites of lower limb(s)
94530	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of lower limb
94531	Full-thickness skin loss due to burn (third degree NOS) of toe(s) (nail)
94532	Full-thickness skin loss due to burn (third degree NOS) of foot
94533	Full-thickness skin loss due to burn (third degree NOS) of ankle
94534	Full-thickness skin loss due to burn (third degree NOS) of lower leg
94535	Full-thickness skin loss due to burn (third degree NOS) of knee
94536	Full-thickness skin loss due to burn (third degree NOS) of thigh (any part)
94539	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of lower limb(s)
94540	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of lower limb (leg), without mention of loss of a body part
94541	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), without mention of loss of toe(s)
94542	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, without mention of loss of foot
94543	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, without mention of loss of ankle
94544	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, without mention of loss of lower leg
94545	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, without mention of loss of knee
94546	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), without mention of loss of thigh

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94549	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), without mention of loss of a body part
94550	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site lower limb (leg), with loss of a body part
94551	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), with loss of toe(s)
94552	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, with loss of foot
94553	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, with loss of ankle
94554	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, with loss of lower leg
94555	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, with loss of knee
94556	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), with loss of thigh
94559	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), with loss of a body part
9460	Burns of multiple specified sites, unspecified degree
9461	Erythema due to burn (first degree) of multiple specified sites
9462	Blisters with epidermal loss due to burn (second degree) of multiple specified sites
9463	Full-thickness skin loss due to burn (third degree NOS) of multiple specified sites
9464	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, without mention of loss of a body part
9465	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, with loss of a body part
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9474	Burn of vagina and uterus
9478	Burn of other specified sites of internal organs
9479	Burn of internal organs, unspecified site

Diagnosis Code	Description
94800	Burn (any degree) involving less than 10 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94810	Burn (any degree) involving 10-19 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94811	Burn (any degree) involving 10-19 percent of body surface with third degree burn of 10-19 percent
94820	Burn (any degree) involving 20-29 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94821	Burn (any degree) involving 20-29 percent of body surface with third degree burn of 10-19 percent
94822	Burn (any degree) involving 20-29 percent of body surface with third degree burn of 20-29 percent
94830	Burn (any degree) involving 30-39 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94831	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 10-19 percent
94832	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 20-29 percent
94833	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 30-39 percent
94840	Burn (any degree) involving 40-49 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94841	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 10-19 percent
94842	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 20-29 percent
94843	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 30-39 percent
94844	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 40-49 percent
94850	Burn (any degree) involving 50-59 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94851	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 10-19 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94852	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 20-29 percent
94853	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 30-39 percent
94854	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 40-49 percent
94855	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 50-59 percent
94860	Burn (any degree) involving 60-69 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94861	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 10-19 percent
94862	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 20-29 percent
94863	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 30-39 percent
94864	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 40-49 percent
94865	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 50-59 percent
94866	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 60-69 percent
94870	Burn (any degree) involving 70-79 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94871	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 10-19 percent
94872	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 20-29 percent
94873	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 30-39 percent
94874	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 40-49 percent
94875	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 50-59 percent

Diagnosis Code	Description
94876	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 60-69 percent
94877	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 70-79 percent
94880	Burn (any degree) involving 80-89 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94881	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 10-19 percent
94882	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 20-29 percent
94883	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 30-39 percent
94884	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 40-49 percent
94885	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 50-59 percent
94886	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 60-69 percent
94887	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 70-79 percent
94888	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 80-89 percent
94890	Burn (any degree) involving 90 percent or more of body surface with third degree burn of less than 10 percent or unspecified amount
94891	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 10-19 percent
94892	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 20-29 percent
94893	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 30-39 percent
94894	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 40-49 percent
94895	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 50-59 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94896	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 60-69 percent
94897	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 70-79 percent
94898	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 80-89 percent
94899	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 90 percent or more of body surface
9490	Burn of unspecified site, unspecified degree
9491	Erythema due to burn (first degree), unspecified site
9492	Blisters with epidermal loss due to burn (second degree), unspecified site
9493	Full-thickness skin loss due to burn (third degree NOS), unspecified site
9494	Deep necrosis of underlying tissue due to burn (deep third degree), unspecified site without mention of loss of a body part
9495	Deep necrosis of underlying tissues due to burn (deep third degree, unspecified site with loss of a body part
9500	Optic nerve injury
9501	Injury to optic chiasm
9502	Injury to optic pathways
9503	Injury to visual cortex
9509	Injury to unspecified optic nerve and pathways
9510	Injury to oculomotor nerve
9511	Injury to trochlear nerve
9512	Injury to trigeminal nerve
9513	Injury to abducens nerve
9514	Injury to facial nerve
9515	Injury to acoustic nerve
9516	Injury to accessory nerve
9517	Injury to hypoglossal nerve
9518	Injury to other specified cranial nerves
9519	Injury to unspecified cranial nerve
95200	C1-C4 level spinal cord injury, unspecified
95201	C1-C4 level with complete lesion of spinal cord
95202	C1-C4 level with anterior cord syndrome
95203	C1-C4 level with central cord syndrome
95204	C1-C4 level with other specified spinal cord injury
95205	C5-C7 level spinal cord injury, unspecified
95206	C5-C7 level with complete lesion of spinal cord
95207	C5-C7 level with anterior cord syndrome
95208	C5-C7 level with central cord syndrome
95209	C5-C7 level with other specified spinal cord injury
95210	T1-T6 level spinal cord injury, unspecified
95211	T1-T6 level with complete lesion of spinal cord
95212	T1-T6 level with anterior cord syndrome
95213	T1-T6 level with central cord syndrome
95214	T1-T6 level with other specified spinal cord injury
95215	T7-T12 level spinal cord injury, unspecified
95216	T7-T12 level with complete lesion of spinal cord
95217	T7-T12 level with anterior cord syndrome
95218	T7-T12 level with central cord syndrome
95219	T7-T12 level with other specified spinal cord injury
9522	Lumbar spinal cord injury without spinal bone injury
9523	Sacral spinal cord injury without spinal bone injury
9524	Cauda equina spinal cord injury without spinal bone injury
9528	Multiple sites of spinal cord injury without spinal bone injury
9529	Unspecified site of spinal cord injury without spinal bone injury
9530	Injury to cervical nerve root
9531	Injury to dorsal nerve root
9532	Injury to lumbar nerve root
9533	Injury to sacral nerve root
9534	Injury to brachial plexus
9535	Injury to lumbosacral plexus
9538	Injury to multiple sites of nerve roots and spinal plexus
9539	Injury to unspecified site of nerve roots and spinal plexus
9540	Injury to cervical sympathetic nerve, excluding shoulder and pelvic girdles
9541	Injury to other sympathetic nerve, excluding shoulder and pelvic girdles
9548	Injury to other specified nerve(s) of trunk, excluding shoulder and pelvic girdles

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9549	Injury to unspecified nerve of trunk, excluding shoulder and pelvic girdles
9550	Injury to axillary nerve
9551	Injury to median nerve
9552	Injury to ulnar nerve
9553	Injury to radial nerve
9554	Injury to musculocutaneous nerve
9555	Injury to cutaneous sensory nerve, upper limb
9556	Injury to digital nerve, upper limb
9557	Injury to other specified nerve(s) of shoulder girdle and upper limb
9558	Injury to multiple nerves of shoulder girdle and upper limb
9559	Injury to unspecified nerve of shoulder girdle and upper limb
9560	Injury to sciatic nerve
9561	Injury to femoral nerve
9562	Injury to posterior tibial nerve
9563	Injury to peroneal nerve
9564	Injury to cutaneous sensory nerve, lower limb
9565	Injury to other specified nerve(s) of pelvic girdle and lower limb
9568	Injury to multiple nerves of pelvic girdle and lower limb
9569	Injury to unspecified nerve of pelvic girdle and lower limb
9570	Injury to superficial nerves of head and neck
9571	Injury to other specified nerve(s)
9578	Injury to multiple nerves in several parts
9579	Injury to nerves, unspecified site
9580	Air embolism as an early complication of trauma
9581	Fat embolism as an early complication of trauma
9582	Secondary and recurrent hemorrhage as an early complication of trauma
9583	Posttraumatic wound infection not elsewhere classified
9584	Traumatic shock
9585	Traumatic anuria
9586	Volkmann's ischemic contracture
9587	Traumatic subcutaneous emphysema
9588	Other early complications of trauma
95901	Other and unspecified injury to head
95909	Other and unspecified injury to face and neck
95911	Other injury of chest wall
95912	Other injury of abdomen
95913	Fracture of corpus cavernosum penis
95914	Other injury of external genitals
95919	Other injury of other sites of trunk
9592	Other and unspecified injury to shoulder and upper arm
9593	Other and unspecified injury to elbow, forearm, and wrist
9594	Other and unspecified injury to hand, except finger
9595	Other and unspecified injury to finger
9596	Other and unspecified injury to hip and thigh
9597	Other and unspecified injury to knee, leg, ankle, and foot
9598	Other and unspecified injury to other specified sites, including multiple
9599	Other and unspecified injury to unspecified site

The following diagnosis codes are payable for Tetanus, injections, acute care:

Diagnosis Code	Description
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion, with loss of consciousness from 31 to 59 minutes

25.3.3.10 Deep Brain Stimulators

Implantation of neurostimulator electrodes for the treatment of intractable tremors, diagnosis code 3320, idiopathic Parkinson's Disease, and diagnosis code 3331, Essential tremor, are payable benefits. One of these diagnoses must appear on the claim for reimbursement to be considered. The actual deep brain stimulator device is payable only under the DRG or ASC/HASC reimbursement rate. No separate payment outside of the DRG or ASC/HASC reimbursement rate will be made for the device.

When billing for procedures related to the implantation of a deep brain stimulator, use the following codes. The types of service for which these codes are payable are listed with each code. TOS F should be used by the ASC/HASC.

Professional services for these codes are:

- Payable in the inpatient and outpatient settings
- Subject to the global surgical fee policy, with three weeks precare and six weeks postcare days assigned

CPT only copyright 2005 American Medical Association. All rights reserved.

- Subject to multiple surgery guidelines

Procedure Codes	Types of Service
F-61880	2, 8
F-61885	2
F-61888	2, 8

The following procedure codes are payable without prior authorization for the electronic analysis of the implanted neurostimulator pulse generator:

Procedure Codes			
5-95970	5-95971	5-95972	5-95973
5-95974	5-95975	5-95978	5-95979

25.3.3.11 Hospital Laboratory Services

The American Medical Association (AMA) has discontinued the following general multichannel automated panel codes:

Discontinued Panel Codes			
5-80002	5-80003	5-80004	5-80005
5-80006	5-80007	5-80008	5-80009
5-80010	5-80011	5-80012	5-80013
5-80014	5-80015	5-80016	5-80017
5-80018	5-80019	5-G0058	5-G0059
5-G0060			

These panel codes are being discontinued because the panel does not define exactly what tests are performed.

The new organ and disease panel codes 5-80048, 5-80051, 5-80053, 5-80069, and 5-80076 must be used instead of the general multichannel automated panel codes in the table above.

The CPT codes in the table above should not be used as billing codes, but the payment amounts associated with pricing of these automated profiles will continue.

For example, if two automated profile tests are performed, the individual codes for the two automated tests must be billed instead of code 5-80002. For pricing, count the number of automated profile tests billed, and payment will be at the same rate as the former code 5-80002. CMS continues to provide updated pricing for the deleted profiles of automated tests.

The new organ or disease panels include the following codes:

5-80048 - Basic metabolic panel includes:			
5-82310	5-82374	5-82435	5-82565
5-82947	5-84132	5-84295	5-84520

5-80050 - General health panel includes:		
5-80053	5-85027 or 5-85025	5-84443

5-80051 - Electrolyte panel includes:			
5-82374	5-82435	5-84132	5-84295

5-80053 - Comprehensive metabolic panel includes:			
5-82040	5-82247	5-82310	5-82374
5-82435	5-82565	5-82947	5-84075
5-84132	5-84155	5-84295	5-84450
5-84460	5-84520		

5-80055 - Obstetric panel includes:			
5-85025	5-86592	5-86762	5-86850
5-86900	5-86901	5-87340	

5-80061 - Lipid panel includes:			
5-80069	5-82465	5-83718	5-84478

5-80069 - Renal function panel includes:			
5-82040	5-82310	5-82374	5-82435
5-82565	5-82947	5-84100	5-84132
5-84295	5-84520		

5-80074 - Acute hepatitis panel includes:			
5-86705	5-86709	5-86803	5-87340

5-80076 - Hepatic function panel includes:			
5-82040	5-82247	5-82248	5-84075
5-84155	5-84450	5-84460	

5-80090 - TORCH antibody panel includes:			
5-86644	5-86694	5-86762	5-86777

Outpatient and inpatient claims for laboratory services must reflect only tests actually performed by the hospital laboratory.

Exception: *Hospital laboratories may bill for all the tests performed on a specimen if some but not all the tests are done by another laboratory on referral from the hospital submitting the claim.*

The billing hospital must enter the name and provider identifier of the performing laboratory in Block 84 of the HCFA-1450 (UB-92) claim form and must enter the performing laboratory's nine-digit provider identifier next to the service provided by the performing laboratory.

Hospitals may bill a handling fee procedure code (1-99001) for collecting and forwarding a specimen to a referral laboratory if the specimen is collected by venipuncture or catheterization. Only one handling fee may be charged per day, per client, unless specimens are sent to two or more different laboratories; this must be documented on the claim.

Laboratory tests generally performed as a panel (chemistries, CBC, urinalyses) must be billed with the appropriate HCPCS panel code. The policy applies to laboratory tests performed by a hospital laboratory.

Modifier 91

Modifier 91 should be used for *repeat* clinical diagnostic tests as follows:

CPT only copyright 2005 American Medical Association. All rights reserved.

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the clinical diagnostic retest.
- If more than two services are billed on the same day by the same provider regardless of the use of modifier 91, the claim or detail is denied.
- If a clinical diagnostic retest is performed by the same provider on the same day and is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/ services must be documented on appeal.
- Modifier 91 is not required and must not be used when billing multiple quantities of a supply (for example, disposable diapers or sterile saline).

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, or documentation of times for each repeated procedure.

Modifier 76

The use of modifier 76 is limited as follows:

- Modifier 76 must not be used when billing the initial procedure, it must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider regardless of the use of modifier 76, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 76, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/ services must be documented on appeal.
- Modifier 76 is not required and must not be used when billing multiple quantities of a supply (for example, disposable diapers or sterile saline).

Certain procedure codes have been removed from modifier 76 auditing for dates of service on or after April 3, 1998. These procedure codes have been identified as routinely being performed at the same time, more than twice per day for each antigen (e.g., agglutinins, febrile, [e.g., brucella, francisella, murine typhus, Q fever, Rocky Mountain spotted fever, scrub typhus], each antigen). Providers may still appeal claims for that have been denied for documentation of time. Most procedure codes initially requiring modifier 76 will continue to be audited for the 76 modifier.

When appealing claims with modifier 76 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, or documentation of times for each repeated procedure.

Refer to: "Laboratory Paneling" on page 26-5 for more information about laboratory paneling procedures.

25.3.3.12 Helicobacter Pylori (H. Pylori)

The following procedure codes are covered services: 5-83013, 5-83014, 5-78338, and 5-87339.

These codes are considered to be clinical lab services and must be billed using TOS 5. The interpretation/professional component TOS I is not separately reimbursed.

Refer to: "Helicobacter Pylori (H. Pylori)" on page 36-58 for more information.

25.3.3.13 Colorectal Cancer Screening

The following procedure codes are covered services:

Procedure Codes		
2/F-G0104	2/F-G0105	2-G0121
4/I/T-G0106	4/I/T-G0120	5-G0107

Procedure code 2-G0121 is limited to diagnosis code V7651, Special screening for malignant neoplasms-colon. Procedure codes G0104, G0105, G0106, and G0120 are no longer limited for diagnosis codes 5582, Toxic gastroenteritis), and 5583, Allergic gastroenteritis and colitis. Procedure codes G0104 and G0106 are a benefit when billed with diagnosis code V7651 (limited to once every 5 years). Procedure code 4/I/T-G0122 is *not* covered by Medicaid.

Refer to: "Cancer Screening, Colorectal" on page 36-28 for more information.

25.3.3.14 Pap Smears

Pap or estrogen smears are benefits of the Texas Medicaid Program. Pap smears completed for family planning purposes in the outpatient department should be billed using diagnosis code V2509, Encounter for other contraceptive management. If a specimen is sent to an outside laboratory for processing, the outside laboratory must bill for the test. The hospital is not reimbursed for a collection or handling fee.

Refer to: "Cytopathology Studies – Gynecological, Pap Smears" on page 36-35 for more information on Pap smears.

25.3.3.15 Nonstress Testing and Contraction Stress Test

The following diagnosis codes are payable for *both* nonstress and contraction stress testing:

Diagnosis Code	Description
30393	Other and unspecified alcohol dependence, in remission
30403	Opioid type dependence, in remission
30420	Cocaine dependence, unspecified use
30421	Cocaine dependence, continuous use
30422	Cocaine dependence, episodic use
30423	Cocaine dependence, in remission

25

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30430	Cannabis dependence, unspecified use
30431	Cannabis dependence, continuous use
30432	Cannabis dependence, episodic use
30433	Cannabis dependence, in remission
30440	Amphetamine and other psychostimulant dependence, unspecified use
30441	Amphetamine and other psychostimulant dependence, continuous use
30442	Amphetamine and other psychostimulant dependence, episodic use
30443	Amphetamine and other psychostimulant dependence, in remission
30450	Hallucinogen dependence, unspecified use
30451	Hallucinogen dependence, continuous use
30452	Hallucinogen dependence, episodic use
30453	Hallucinogen dependence, in remission
30460	Other specified drug dependence, unspecified use
30461	Other specified drug dependence, continuous use
30462	Other specified drug dependence, episodic use
30463	Other specified drug dependence, in remission
30470	Combinations of opioid type drug with any other drug dependence, unspecified use
30471	Combinations of opioid type drug with any other drug dependence, continuous use
30472	Combinations of opioid type drug with any other drug dependence, episodic use
30473	Combinations of opioid type drug with any other drug dependence, in remission
30480	Combinations of drug dependence excluding opioid type drug, unspecified use
30481	Combinations of drug dependence excluding opioid type drug, continuous use
30482	Combinations of drug dependence excluding opioid type drug, episodic use
30483	Combinations of drug dependence excluding opioid type drug, in remission
30490	Unspecified drug dependence, unspecified use
30491	Unspecified drug dependence, continuous use
30492	Unspecified drug dependence, episodic use
30493	Unspecified drug dependence, in remission
5851	Chronic kidney disease, stage I
5852	Chronic kidney disease, stage II (mild)
5853	Chronic kidney disease, stage III (moderate)
5854	Chronic kidney disease, stage IV (severe)
5855	Chronic kidney disease, stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
64210	Hypertension secondary to renal disease, complicating pregnancy, childbirth, and the puerperium, unspecified as to episode of care
64211	Hypertension secondary to renal disease, with delivery
64212	Hypertension secondary to renal disease, with delivery, with mention of postpartum complication
64213	Hypertension secondary to renal disease, antepartum
64214	Hypertension secondary to renal disease, postpartum
64220	Other pre-existing hypertension complicating pregnancy, childbirth, and the puerperium, unspecified as to episode of care
64221	Other pre-existing hypertension, with delivery
64222	Other pre-existing hypertension, with delivery, with mention of postpartum complication
64223	Other pre-existing hypertension, antepartum
64224	Other pre-existing hypertension, postpartum
64230	Transient hypertension of pregnancy, unspecified as to episode of care
64231	Transient hypertension of pregnancy, with delivery
64232	Transient hypertension of pregnancy, with delivery, with mention of postpartum complication
64233	Antepartum transient hypertension
64240	Mild or unspecified pre-eclampsia, unspecified as to episode of care
64241	Mild or unspecified pre-eclampsia, with delivery
64242	Mild or unspecified pre-eclampsia, with delivery, with mention of postpartum complication
64243	Mild or unspecified pre-eclampsia, antepartum
64244	Mild or unspecified pre-eclampsia, postpartum
64250	Severe pre-eclampsia, unspecified as to episode of care

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64251	Severe pre-eclampsia, with delivery
64252	Severe pre-eclampsia, with delivery, with mention of postpartum complication
64253	Severe pre-eclampsia, antepartum
64254	Severe pre-eclampsia, postpartum
64260	Eclampsia complicating pregnancy, child-birth or the puerperium, unspecified as to episode of care
64261	Eclampsia, with delivery
64262	Eclampsia, with delivery, with mention of postpartum complication
64263	Eclampsia, antepartum
64264	Eclampsia, postpartum
64270	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64271	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, with delivery
64272	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, with delivery, with mention of postpartum complication
64273	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, antepartum
64400	Threatened premature labor, unspecified as to episode of care
64403	Threatened premature labor, antepartum
64410	Other threatened labor, unspecified as to episode of care
64413	Other threatened labor, antepartum
64510	Post term pregnancy, unspecified episode of care
64513	Post term pregnancy, antepartum condition or complication
64520	Prolonged pregnancy, unspecified episode of care
64523	Prolonged pregnancy, antepartum condition or complication
64700	Syphilis of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64701	Syphilis of mother, complicating pregnancy, with delivery
64702	Syphilis of mother, complicating pregnancy, with delivery, with mention of postpartum complication
64703	Antepartum syphilis
64704	Postpartum syphilis

Diagnosis Code	Description
64710	Gonorrhea of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64711	Gonorrhea of mother, with delivery
64712	Gonorrhea of mother, with delivery, with mention of postpartum complication
64713	Antepartum gonorrhea
64714	Postpartum gonorrhea
64720	Other venereal diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64721	Other venereal diseases of mother, with delivery
64722	Other venereal diseases of mother, with delivery, with mention of postpartum complication
64723	Other antepartum venereal diseases
64724	Other postpartum venereal diseases
64730	Tuberculosis of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64731	Tuberculosis of mother, with delivery
64732	Tuberculosis of mother, with delivery, with mention of postpartum complication
64733	Antepartum tuberculosis
64734	Postpartum tuberculosis
64740	Malaria of mother, complicating pregnancy, childbirth or the puerperium, unspecified as to episode of care
64741	Malaria of mother, with delivery
64742	Malaria of mother, with delivery, with mention of postpartum complication
64743	Antepartum malaria
64744	Postpartum malaria
64750	Rubella of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64751	Rubella of mother, with delivery
64752	Rubella of mother, with delivery, with mention of postpartum complication
64753	Antepartum rubella
64754	Postpartum rubella
64760	Other viral diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64761	Other viral diseases of mother, with delivery

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64762	Other viral diseases of mother, with delivery, with mention of postpartum complication
64763	Other antepartum viral diseases
64764	Other postpartum viral diseases
64780	Other specified infectious and parasitic diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64781	Other specified infectious and parasitic diseases of mother, with delivery
64782	Other specified infectious and parasitic diseases of mother, with delivery, with mention of postpartum complication
64783	Other specified infectious and parasitic diseases of mother, antepartum
64800	Diabetes mellitus of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64801	Diabetes mellitus of mother, with delivery
64802	Diabetes mellitus of mother, with delivery, with mention of postpartum complication
64803	Antepartum diabetes mellitus
65130	Twin pregnancy with fetal loss and retention of one fetus, unspecified as to episode of care or not applicable
65131	Twin pregnancy with fetal loss and retention of one fetus, delivered, with or without mention of antepartum condition
65133	Twin pregnancy with fetal loss and retention of one fetus, antepartum condition or complication
65140	Triplet pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care or not applicable
65141	Triplet pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65143	Triplet pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65150	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care or not applicable
65151	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65153	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65160	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care
65161	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65163	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65633	Fetal distress, affecting management of mother, antepartum
65650	Poor fetal growth, affecting management of mother, unspecified as to episode of care
65651	Poor fetal growth, affecting management of mother, delivered
65653	Poor fetal growth, affecting management of mother, antepartum condition or complication
65660	Excessive fetal growth, affecting management of mother, unspecified as to episode of care
65661	Excessive fetal growth, affecting management of mother, delivered
65663	Excessive fetal growth, affecting management of mother, antepartum
65840	Infection of amniotic cavity, unspecified as to episode of care
65841	Infection of amniotic cavity, delivered
65843	Infection of amniotic cavity, antepartum
V231	Supervision of high-risk pregnancy with history of tropho blastic disease
V232	Supervision of high-risk pregnancy with history of abortion
V233	Supervision of high-risk pregnancy with grand multiparity
V235	Supervision of high-risk pregnancy with other poor reproductive history
V237	Supervision of high-risk pregnancy with insufficient prenatal care
V2381	Supervision of high-risk pregnancy with elderly primigravida
V2382	Supervision of high-risk pregnancy with elderly multigravida
V2383	Supervision of high-risk pregnancy with young primigravida
V2384	Supervision of high-risk pregnancy with young multigravida
V2389	Supervision of other high-risk pregnancy
V239	Supervision of unspecified high-risk pregnancy

Nonstress testing is a form of fetal monitoring in which transducers are applied to the mother's abdomen to monitor fetal heart rate. Tracings of this activity may be obtained from the fetoscope.

Nonstress testing conducted in the outpatient setting should be billed with revenue code B-729.

This revenue code is denied if it is billed more than once per day with the same provider. The provider must appeal with documentation supporting the performance of the test more than once on the same day/same provider.

Revenue code B-729 is payable for outpatient (POS 5) hospital settings and to hospital-based rural health clinics only. The inpatient hospital stay is payable under the hospital's reimbursement methodology.

The following diagnosis codes are payable only for nonstress testing (B-729):

Diagnosis Code	Description
64110	Hemorrhage from placenta previa, unspecified as to episode of care
64111	Hemorrhage from placenta previa, with delivery
64113	Hemorrhage from placenta previa, antepartum
64120	Premature separation of placenta, unspecified as to episode of care
64121	Premature separation of placenta, with delivery
64123	Premature separation of placenta, antepartum
64130	Antepartum hemorrhage associated with coagulation defects, unspecified as to episode of care
64131	Antepartum hemorrhage associated with coagulation defects, with delivery
64133	Antepartum hemorrhage associated with coagulation defects
64180	Other antepartum hemorrhage, unspecified as to episode of care
64181	Other antepartum hemorrhage, with delivery
64183	Other antepartum hemorrhage
64190	Unspecified antepartum hemorrhage, unspecified as to episode of care
64191	Unspecified antepartum hemorrhage, with delivery
64193	Unspecified antepartum hemorrhage
65420	Previous cesarean delivery, unspecified as to episode of care in pregnancy
65421	Previous cesarean delivery, with or without mention of antepartum condition
65423	Previous cesarean delivery, antepartum condition or complication
65570	Decreased fetal movements, affecting management of mother, unspecified as to episode of care
65571	Decreased fetal movements, affecting management of mother, delivered
65573	Decreased fetal movements, affecting management of mother, antepartum condition or complication

Revenue code B-729, Fetal monitoring (external) –labor room/delivery–other and fetal stress testing, is payable for the following diagnosis codes:

Diagnosis Codes			
V2381	V2382	V2383	V2384
V2389	V239		

The contraction stress test is performed to assess the condition of the fetus in utero. This test is done by monitoring the fetus' response to the stress of uterine contractions. Baseline recordings of the fetal heart rate are made by an electronic devise such as a Doppler. IV oxytocin is administered to produce uterine contractions. Fetal heart rate is measured during the contractions. Sustained alterations of the heart rate beyond the contractions may indicate fetal distress and the need for further intervention.

Contraction stress testing conducted in the outpatient setting should be billed with revenue code B-729, Fetal stress testing.

Revenue code B-729 (facility services) is reimbursed on the same day/different provider, without appeal. This procedure code is denied if it is billed more than once per day with the same provider. The provider must appeal with documentation supporting the performance of the test more than once on the same day/same provider.

Revenue code B-729 (facility services) is payable for outpatient hospital stays and to hospital-based rural health clinics only. The inpatient hospital stay is reimbursed under the hospital's DRG.

The following diagnosis codes are payable only for contraction stress testing (B-729):

Diagnosis Code	Description
2825	Sickle-cell trait
28263	Sickle-cell/HB-C disease without crisis
65613	Rhesus isoimmunization, affecting management of mother, antepartum condition
65623	Isoimmunization from other and unspecified blood-group incompatibility, affecting management of mother, antepartum
65803	Oligohydramnios, antepartum

Refer to: "Nonstress Testing, Contraction Stress Testing" on page 36-197 for related physician services.

25.3.3.16 Hospital Radiology Services

CPT codes T-93005 and T-93041 are payable for diagnosis codes 3373, 78071, and 78079.

Effective for dates of service on or after April 1, 2004, the following diagnosis codes will be payable for electrocardiograms:

Diagnosis Code	Description
03282	Diptheritic myocarditis
0362	Meningococcemia
03640	Meningococcal carditis, unspecified
03641	Meningococcal pericarditis
03642	Meningococcal endocarditis
03643	Meningococcal myocarditis
07420	Coxsackie carditis, unspecified
07421	Coxsackie pericarditis
07422	Coxsackie endocarditis
07423	Coxsackie myocarditis
0860	Chagas' disease with heart involvement
08881	Lyme disease
0930	Aneurysm of aorta, specified as syphilitic
0931	Syphilitic aortitis
09320	Syphilitic endocarditis of valve, unspecified
09321	Syphilitic endocarditis of mitral valve
09322	Syphilitic endocarditis of aortic valve
09323	Syphilitic endocarditis of tricuspid valve
09324	Syphilitic endocarditis of pulmonary valve
0938	Other specified cardiovascular syphilis
09381	Syphilitic pericarditis
09382	Syphilitic myocarditis
09389	Other specific cardiovascular syphilis
09883	Gonococcal pericarditis
09884	Gonococcal endocarditis
09885	Other gonococcal heart disease
11281	Candidal endocarditis
11503	Histoplasma capsulatum pericarditis
11504	Histoplasma capsulatum endocarditis
11513	Histoplasma duboisii pericarditis
11514	Histoplasma duboisii endocarditis
11593	Histoplasmosis pericarditis, unspecified
11594	Histoplasmosis endocarditis
124	Trichinosis
1303	Myocarditis due to toxoplasmosis
135	Sarcoidosis
1640	Malignant neoplasm of thymus
1641	Malignant neoplasm of heart
1642	Malignant neoplasm of anterior mediastinum
1643	Malignant neoplasm of posterior mediastinum
1648	Malignant neoplasm of other parts of mediastinum
1649	Malignant neoplasm of mediastinum, part unspecified
19889	Secondary malignant neoplasm of other specified sites
2127	Benign neoplasm of heart
25000	Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled
25001	Diabetes mellitus without mention of complication, type I (juvenile type), not stated as uncontrolled
25002	Diabetes mellitus without mention of complication, type II or unspecified type, uncontrolled
25003	Diabetes mellitus without mention of complication, type I (juvenile type), uncontrolled
2501	Diabetes with ketoacidosis
25010	Diabetes with ketoacidosis, type II or unspecified type, not stated as uncontrolled
25011	Diabetes with ketoacidosis, type I (juvenile type), not stated as uncontrolled
25012	Diabetes with ketoacidosis, type II or unspecified type, uncontrolled
25013	Diabetes with ketoacidosis, type I (juvenile type), uncontrolled
2502	Diabetes with hyperosmolarity
25020	Diabetes with hyperosmolarity, type II or unspecified type, not stated as uncontrolled
25021	Diabetes with hyperosmolarity, type I (juvenile type), not stated as uncontrolled
25022	Diabetes with hyperosmolarity, type II or unspecified type, uncontrolled
25023	Diabetes with hyperosmolarity, type I (juvenile type), uncontrolled
2503	Diabetes with other coma
25030	Diabetes with other coma, type II or unspecified type, not stated as uncontrolled
25031	Diabetes with other coma, type I (juvenile type), not stated as uncontrolled
25032	Diabetes with other coma, type II or unspecified type, uncontrolled
25033	Diabetes with other coma, type I (juvenile type), uncontrolled

Diagnosis Code	Description
2504	Diabetes with renal manifestations
25040	Diabetes with renal manifestations, type II or unspecified type, not stated as uncontrolled
25041	Diabetes with renal manifestations, type I (juvenile type), not stated as uncontrolled
25042	Diabetes with renal manifestations, type II or unspecified type, uncontrolled
25043	Diabetes with renal manifestations, type I (juvenile type), uncontrolled
2505	Diabetes with ophthalmic manifestations
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
2506	Diabetes with neurological manifestations
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
25061	Diabetes with neurological manifestations, type I (juvenile type), not stated as uncontrolled
25062	Diabetes with neurological manifestations, type II or unspecified type, uncontrolled
25063	Diabetes with neurological manifestations, type I (juvenile type), uncontrolled
2507	Diabetes with peripheral circulatory disorders
25070	Diabetes with peripheral circulatory disorders, type II or unspecified type, not stated as uncontrolled
25071	Diabetes with peripheral circulatory disorders, type I (juvenile type), not stated as uncontrolled
25072	Diabetes with peripheral circulatory disorders, type II or unspecified type, uncontrolled
25073	Diabetes with peripheral circulatory disorders, type I (juvenile type), uncontrolled
2508	Diabetes with other specified manifestations
25080	Diabetes with other specified manifestations, type II or unspecified type, not stated as uncontrolled

Diagnosis Code	Description
25081	Diabetes with other specified manifestations, type I (juvenile type), not stated as uncontrolled
25082	Diabetes with other specified manifestations, type II or unspecified type, uncontrolled
25083	Diabetes with other specified manifestations, type I (juvenile type), uncontrolled
2509	Diabetes with unspecified complication
25090	Diabetes with unspecified complication, type II or unspecified type, not stated as uncontrolled
25091	Diabetes with unspecified complication, type I (juvenile type), not stated as uncontrolled
25092	Diabetes with unspecified complication, type II or unspecified type, uncontrolled
25093	Diabetes with unspecified complication, type I (juvenile type), uncontrolled
2512	Hypoglycemia, unspecified
2720	Pure hypercholesterolemia
2721	Pure hyperglyceridemia
2722	Mixed hyperlipidemia
2723	Hyperchylomicronemia
2724	Other and unspecified hyperlipidemia
2725	Lipoprotein deficiencies
2726	Lipodystrophy
2727	Lipidoses
2728	Other disorders of lipoid metabolism
2750	Disorders of iron metabolism
2752	Disorders of magnesium metabolism
2753	Disorders of phosphorus metabolism
27541	Hypocalcemia
27542	Hypercalcemia
2760	Hyperosmolality and/or hypernatremia
2761	Hyposmolality and/or hyponatremia
2762	Acidosis
2763	Alkalosis
2764	Mixed acid-base balance disorder
2765	Volume depletion disorder
27650	Volume depletion, unspecified
27651	Dehydration
27652	Hypovolemia
2766	Fluid overload disorder
2767	Hyperpotassemia
2768	Hypopotassemia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
27730	Amyloidosis, unspecified
27739	Other amyloidosis
3062	Cardiovascular malfunction arising from mental factors
3373	Autonomic dysreflexia
390	Rheumatic fever without mention of heart involvement
391	Rheumatic fever with heart involvement
3910	Acute rheumatic pericarditis
3911	Acute rheumatic endocarditis
3912	Acute rheumatic myocarditis
3918	Other acute rheumatic heart disease
3919	Acute rheumatic heart disease, unspecified
392	Rheumatic chorea
3920	Rheumatic chorea with heart involvement
3929	Rheumatic chorea without mention of heart involvement
393	Chronic rheumatic pericarditis
394	Diseases of mitral valve
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
395	Diseases of aortic valve
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
397	Diseases of other endocardial structures
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified

Diagnosis Code	Description
398	Other rheumatic heart disease
3980	Rheumatic myocarditis
3989	Other and unspecified rheumatic heart diseases
39890	Rheumatic heart disease, unspecified
39891	Rheumatic heart failure (congestive)
39899	Other rheumatic heart diseases
401	Essential hypertension
4010	Malignant essential hypertension
4011	Benign essential hypertension
4019	Unspecified essential hypertension
4020	Malignant hypertensive heart disease
40200	Malignant hypertensive heart disease without congestive heart failure
40201	Malignant hypertensive heart disease with congestive heart failure
4021	Benign hypertensive heart disease
40210	Benign hypertensive heart disease without congestive heart failure
40211	Benign hypertensive heart disease with congestive heart failure
4029	Unspecified hypertensive heart disease
40290	Unspecified hypertensive heart disease without congestive heart failure
40291	Unspecified hypertensive heart disease with congestive heart failure
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40301	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage V or end stage renal disease
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40311	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage V or end stage renal disease
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40391	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease
40400	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
40401	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40402	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage V or end stage renal disease
40403	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage V or end stage renal disease
40410	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40411	Hypertensive heart and chronic kidney disease, benign, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40412	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage V or end stage renal disease
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40490	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40491	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40492	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
40501	Malignant renovascular hypertension
40509	Other malignant secondary hypertension
40511	Benign renovascular hypertension
40519	Other benign secondary hypertension
41000	Acute myocardial infarction of anterolateral wall, episode of care unspecified
41001	Acute myocardial infarction of anterolateral wall, initial episode of care

Diagnosis Code	Description
41002	Acute myocardial infarction of anterolateral wall, subsequent episode of care
4101	Acute myocardial infarction of other anterior wall
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care
4102	Acute myocardial infarction of inferolateral wall
41020	Acute myocardial infarction of inferolateral wall, episode of care unspecified
41021	Acute myocardial infarction of inferolateral wall, initial episode of care
41022	Acute myocardial infarction of inferolateral wall, subsequent episode of care
4103	Acute myocardial infarction of inferopos-terior wall
41030	Acute myocardial infarction of inferopos-terior wall, episode of care unspecified
41031	Acute myocardial infarction of inferopos-terior wall, initial episode of care
41032	Acute myocardial infarction of inferopos-terior wall, subsequent episode of care
4104	Acute myocardial infarction of other inferior wall
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care
4105	Acute myocardial infarction of other lateral wall
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
4106	True posterior wall infarction
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41062	True posterior wall infarction, subsequent episode of care
4107	Subendocardial infarction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of care
41072	Subendocardial infarction, subsequent episode of care
4108	Acute myocardial infarction of other specified sites
41080	Acute myocardial infarction of other specified sites, episode of care unspecified
41081	Acute myocardial infarction of other specified sites, initial episode of care
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
4109	Acute myocardial infarction of unspecified site
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care
411	Other acute and subacute forms of ischemic heart disease
4110	Postmyocardial infarction syndrome
4111	Intermediate coronary syndrome
4118	Other acute and subacute forms of ischemic heart disease
41181	Other acute and subacute forms of ischemic heart disease, acute ischemic heart disease without myocardial infarction
41189	Other acute and subacute forms of ischemic heart disease, other
412	Old myocardial infarction
413	Angina pectoris
4130	Angina decubitus
4131	Prinzmetal angina
4139	Other and unspecified angina pectoris
414	Other forms of chronic ischemic heart disease
4140	Coronary atherosclerosis
41400	Coronary atherosclerosis of unspecified type of vessel, native or graft
41401	Coronary atherosclerosis of native coronary artery
41402	Coronary atherosclerosis of autologous vein bypass graft
41403	Coronary atherosclerosis of nonautologous biological bypass graft

Diagnosis Code	Description
41404	Coronary atherosclerosis of artery bypass graft
41405	Coronary atherosclerosis of unspecified bypass graft
41406	Coronary atherosclerosis of native coronary artery of transplanted heart
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of transplanted heart
4141	Aneurysm of heart
41410	Aneurysm of heart (wall)
41411	Aneurysm of coronary vessels
41412	Dissection of coronary artery
41419	Other aneurysm of heart
4148	Other specified forms of chronic ischemic heart disease
4149	Chronic ischemic heart disease, unspecified
415	Acute pulmonary heart disease
4150	Acute cor pulmonale
4151	Pulmonary embolism and infarction
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
416	Chronic pulmonary heart disease
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
417	Other diseases of pulmonary circulation
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation
4179	Unspecified disease of pulmonary circulation
420	Acute pericarditis
4200	Acute pericarditis in diseases classified elsewhere
4209	Other and unspecified acute pericarditis
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
421	Acute and subacute endocarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
4229	Other and unspecified acute myocarditis
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) II atrioventricular block
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block

Diagnosis Code	Description
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42820	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42983	Takotsubo syndrome
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
43300	Occlusion and stenosis of basilar artery without mention of cerebral infarction
43301	Occlusion and stenosis of basilar artery with cerebral infarction
43310	Occlusion and stenosis of carotid artery without mention of cerebral infarction
43311	Occlusion and stenosis of carotid artery with cerebral infarction
43390	Occlusion and stenosis of unspecified precerebral artery without mention of cerebral infarction
43391	Occlusion and stenosis of unspecified precerebral artery with cerebral infarction
43400	Cerebral thrombosis without mention of cerebral infarction
43401	Cerebral thrombosis with cerebral infarction
43410	Cerebral embolism without mention of cerebral infarction
43411	Cerebral embolism with cerebral infarction
43490	Cerebral artery occlusion, unspecified without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified with cerebral infarction
4359	Unspecified transient cerebral ischemia
4372	Hypertensive encephalopathy
44100	Dissection of aorta, unspecified site
44101	Dissection of aorta, thoracic
44103	Dissection of aorta, thoracoabdominal
4411	Thoracic aneurysm, ruptured
4412	Thoracic aneurysm without mention of rupture
4416	Thoracoabdominal aneurysm, ruptured
4417	Thoracoabdominal aneurysm, without mention of rupture
4439	Peripheral vascular disease, unspecified
4440	Embolism and thrombosis of abdominal aorta
4441	Embolism and thrombosis of thoracic aorta
44421	Arterial embolism and thrombosis of upper extremity
44422	Arterial embolism and thrombosis of lower extremity
4460	Polyarteritis nodosa
4467	Takayasu’s disease
4580	Orthostatic hypotension
45821	Hypotension of hemodialysis
4589	Hypotension, unspecified
4590	Hemorrhage, unspecified
496	Chronic airway obstruction, not elsewhere classified
514	Pulmonary congestion and hypostasis
5173	Acute chest syndrome
5184	Acute edema of lung, unspecified
5185	Pulmonary insufficiency following trauma and surgery
51882	Other pulmonary insufficiency, not elsewhere classified
51884	Acute and chronic respiratory failure
51919	Other diseases of trachea and bronchus
53081	Esophageal reflux
57410	Calculus of gallbladder with other cholecystitis, without mention of obstruction
64201	Benign essential hypertension with delivery
64202	Benign essential hypertension, with delivery, with mention of postpartum complication
64203	Antepartum benign essential hypertension
64204	Postpartum benign essential hypertension
64251	Severe pre-eclampsia, with delivery
64252	Severe pre-eclampsia, with delivery, with mention of postpartum complication
64253	Severe pre-eclampsia, antepartum
64254	Severe pre-eclampsia, postpartum
64850	Congenital cardiovascular disorders of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64851	Congenital cardiovascular disorders of mother, with delivery

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64852	Congenital cardiovascular disorders of mother, with delivery, with mention of postpartum complication
64853	Congenital cardiovascular disorders of mother, antepartum
64854	Congenital cardiovascular disorders of mother, postpartum
65420	Previous cesarean delivery, unspecified as to episode of care in pregnancy
65423	Previous cesarean delivery, antepartum condition or complication
66810	Cardiac complications of anesthesia or other sedation in labor and delivery, unspecified as to episode of care
66811	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered
66812	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered, with mention of postpartum complication
66813	Cardiac complications of anesthesia or other sedation in labor and delivery, antepartum
66814	Cardiac complications of anesthesia or other sedation in labor and delivery, postpartum
66971	Cesarean delivery, without mention of indication, delivered, with or without mention of antepartum condition
67450	Peripartum cardiomyopathy, unspecified as to episode of care or not applicable
67451	Peripartum cardiomyopathy, delivered, with or without mention of antepartum condition
67452	Peripartum cardiomyopathy, delivered, with mention of postpartum condition
67453	Peripartum cardiomyopathy, antepartum condition or complication
67454	Peripartum cardiomyopathy, postpartum condition or complication
7100	Systemic lupus erythematosus
7142	Other rheumatoid arthritis with visceral or systemic involvement
71941	Pain in joint involving shoulder region
7200	Ankylosing spondylitis
7231	Cervicalgia
7295	Pain in limb
7336	Tietze's disease
7450	Common truncus
7451	Transposition of great vessels

Diagnosis Code	Description
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
74519	Other transposition of great vessels
7452	Tetralogy of fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
7456	Endocardial cushion defects
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects
7457	Cor biloculare
7458	Other bulbus cordis anomalies and anomalies of cardiac septal closure
7459	Unspecified defect of septal closure
746	Other congenital anomalies of heart
7460	Anomolies of pulmonary valve, congenital
74600	Congenital pulmonary valve anomaly, unspecified
74601	Atresia of pulmonary valve, congenital
74602	Stenosis of pulmonary valve, congenital
74609	Other congenital anomalies of pulmonary valve
7461	Tricuspid atresia and stenosis, congenital
7462	Ebstein's anomaly
7463	Congenital stenosis of aortic valve
7464	Congenital insufficiency of aortic valve
7465	Congenital mitral stenosis
7466	Congenital mitral insufficiency
7467	Hypoplastic left heart syndrome
7468	Other specified congenital anomalies of heart
74681	Subaortic stenosis, congenital
74682	Cor triatriatum
74683	Infundibular pulmonic stenosis, congenital
74684	Congenital obstructive anomalies of heart, not elsewhere classified
74685	Coronary artery anomaly, congenital
74686	Congenital heart block
74687	Malposition of heart and cardiac apex
74689	Other specified congenital anomalies of heart
7469	Unspecified congenital anomaly of heart

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
747	Other congenital anomalies of circulatory system
7470	Patent ductus arteriosus
7471	Coarctation of aorta
74710	Coarctation of aorta (preductal) (postductal)
74711	Interruption of aortic arch
7472	Other congenital anomalies of aorta
74720	Congenital anomaly of aorta, unspecified
74721	Congenital anomalies of aortic arch
74722	Congenital atresia and stenosis of aorta
74729	Other congenital anomalies of aorta
7473	Congenital anomalies of pulmonary artery
7474	Congenital anomaly of great veins
74740	Congenital anomaly of great veins, unspecified
74741	Total anomalous pulmonary venous connection
74742	Partial anomalous pulmonary venous connection
74749	Other anomalies of great veins
7580	Down's syndrome
7593	Situs inversus
75982	Marfan syndrome
78001	Coma
78002	Transient alteration of awareness
78003	Persistent vegetative state
78009	Alterations of consciousness, other
7802	Syncope and collapse
7804	Dizziness and giddiness
78079	Other malaise and fatigue
7808	Generalized hyperhidrosis
7815	Clubbing of fingers
7823	Edema
7825	Cyanosis
7850	Tachycardia, unspecified
7851	Palpitations
7852	Undiagnosed cardiac murmurs
7853	Other abnormal heart sounds
78550	Shock, unspecified
78551	Cardiogenic shock
78552	Septic shock
78559	Other shock without mention of trauma
78600	Respiratory abnormality, unspecified
78602	Orthopnea
78605	Shortness of breath

Diagnosis Code	Description
78609	Respiratory distress
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
78701	Nausea with vomiting
78702	Nausea alone
78703	Vomiting alone
7871	Heartburn
78900	Abdominal pain, unspecified site
78907	Abdominal pain, generalized
78960	Abdominal tenderness, unspecified site
79001	Precipitous drop in hematocrit
7904	Nonspecific elevation of levels of transaminase or lactic acid dehydrogenase (ldh)
7905	Other nonspecific abnormal serum enzyme levels
7906	Other abnormal blood chemistry
7932	Nonspecific abnormal findings on radiological and other examination of other intrathoracic organs
79430	Unspecified abnormal function study of cardiovascular system
79431	Nonspecific abnormal electrocardiogram (ECG) (EKG)
79439	Other nonspecific abnormal function study of cardiovascular system
7944	Nonspecific abnormal results of function study of kidney
7945	Nonspecific abnormal results of function study of thyroid
7946	Nonspecific abnormal results of other endocrine function study
7947	Nonspecific abnormal results of function study of basal metabolism
7948	Nonspecific abnormal results of function study of liver
7949	Nonspecific abnormal results of other specified function study
7991	Respiratory arrest
8072	Closed fracture of sternum
8073	Open fracture of sternum
8074	Flail chest
8600	Traumatic pneumothorax without mention of open wound into thorax
8601	Traumatic pneumothorax with open wound into thorax

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8602	Traumatic hemothorax without mention of open wound into thorax
8603	Traumatic hemothorax with open wound into thorax
8604	Traumatic pneumohemothorax without mention of open wound into thorax
8605	Traumatic pneumohemothorax with open wound into thorax
86100	Unspecified injury of heart without mention of open wound into thorax
86101	Contusion of heart without mention of open wound into thorax
86102	Laceration of heart without penetration of heart chambers or open wound into thorax
86103	Laceration of heart with penetration of heart chambers, without mention of open wound into thorax
8611	Heart injury with open wound into thorax
86110	Unspecified injury of heart with open wound into thorax
86111	Contusion of heart with open wound into thorax
86112	Laceration of heart without penetration of heart chambers, with open wound into thorax
86113	Laceration of heart with penetration of heart chambers and open wound into thorax
8628	Injury to multiple and unspecified intrathoracic organs without mention of open wound into cavity
8629	Injury to multiple and unspecified intrathoracic organs with open wound into cavity
9000	Injury to carotid artery
90000	Injury to carotid artery, unspecified
90001	Injury to common carotid artery
90002	Injury to external carotid artery
90003	Injury to internal carotid artery
9001	Injury to internal jugular vein
9010	Injury to thoracic aorta
9011	Injury to innominate and subclavian arteries
9012	Injury to superior vena cava
9013	Injury to innominate and subclavian veins
9014	Injury to pulmonary blood vessels
90140	Injury to pulmonary vessel(s), unspecified
90141	Injury to pulmonary artery
90142	Injury to pulmonary vein
90181	Injury to intercostal artery or vein
90182	Injury to internal mammary artery or vein

Diagnosis Code	Description
90183	Injury to multiple blood vessels of thorax
9221	Contusion of chest wall
9584	Traumatic shock
9607	Poisoning by antineoplastic antibiotics
9631	Poisoning by antineoplastic and immunosuppressive drugs
96509	Poisoning by other opiates and related narcotics
9720	Poisoning by cardiac rhythm regulators
9721	Poisoning by cardiotonic glycosides and drugs of similar action
9722	Poisoning by antilipemic and antiarteriosclerotic drugs
9723	Poisoning by ganglion-blocking agents
9724	Poisoning by coronary vasodilators
9725	Poisoning by other vasodilators
9726	Poisoning by other antihypertensive agents
9727	Poisoning by antivaricose drugs, including sclerosing agents
9728	Poisoning by capillary-active drugs
9729	Poisoning by other and unspecified agents primarily affecting the cardiovascular system
9779	Poisoning by unspecified drug or medicinal substance
986	Toxic effect of carbon monoxide
9893	Toxic effect of organophosphate and carbamate
9894	Toxic effect of other pesticides, not elsewhere classified
9895	Toxic effect of venom
9920	Heat stroke and sunstroke
9921	Heat syncope
9940	Effect of lightning
9941	Drowning and nonfatal submersion
9947	Asphyxiation and strangulation
9948	Electrocution and nonfatal effects of electrical current
9950	Other anaphylactic shock, not elsewhere classified
99522	Unspecified adverse effect of anesthesia
99523	Unspecified adverse effect of insulin
99527	Other drug allergy
99600	Mechanical complications of unspecified cardiac device, implant, and graft
99601	Mechanical complication due to cardiac pacemaker (electrode)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
99602	Mechanical complication due to heart valve prosthesis
99603	Mechanical complication due to coronary bypass graft
99604	Mechanical complication of automatic implantable cardiac defibrillator
99609	Other mechanical complication of cardiac device, implant, and graft
99661	Infection and inflammatory reaction due to cardiac device, implant, and graft
99671	Other complications due to heart valve prosthesis
99672	Other complications due to other cardiac device, implant, and graft
99683	Complications of transplanted heart
9971	Cardiac complications, not elsewhere classified
9980	Postoperative shock, not elsewhere classified
9993	Other infection due to medical care, not elsewhere classified
9994	Anaphylactic shock due to serum, not elsewhere classified
V151	Personal history of surgery to heart and great vessels, presenting hazards to health
V252	Sterilization
V421	Heart replaced by transplant
V422	Heart valve replaced by transplant
V426	Lung replaced by transplant
V4321	Organ or tissue replaced by other means, heart assist device
V433	Organ or tissue replaced by other means, fully implantable artificial heart
V4500	Unspecified cardiac device in situ
V4501	Cardiac pacemaker in situ
V4502	Automatic implantable cardiac defibrillator in situ
V4509	Other specified cardiac device in situ
V4581	Postsurgical aortocoronary bypass status
V4582	Percutaneous transluminal coronary angio-plasty status
V472	Other cardiorespiratory problems
V4983	Other cardiorespiratory problems
V5331	Fitting and adjustment of cardiac pacemaker
V5332	Fitting and adjustment of automatic implantable cardiac defibrillator
V5339	Fitting and adjustment of other cardiac device
V5844	Aftercare following organ transplant
V5869	Long-term (current) use of other medications
V717	Observation for suspected cardiovascular disease
V7281	Pre-operative cardiovascular examination
V7284	Pre-operative examination, unspecified

All medically necessary radiology services provided to hospital clients must be ordered by the client's attending or consulting physician. These services must be documented in the client's medical record.

The diagnoses submitted on the claim form should reflect the medical necessity of services rendered. If a diagnosis is not available, TMHP accepts signs and symptoms. TMHP monitors the diagnoses indicated for the following procedures:

- Ambulatory electroencephalograms (A/EEG)
- EKG
- Arteriography
- Venography
- Radiation therapy
- Cardiac blood pool imaging
- Chest X-rays
- Computerized axial tomography (CAT) scans
- Echography
- Magnetic Resonance Angiogram (MRA)
- Mammography
- Magnetic Resonance Imaging (MRI) mammography
- Polysomnography

Repeat Procedures/Modifier 76

The use of modifier 76 is limited as follows:

- Modifier 76 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider regardless of the use of modifier 76, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 76, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/ services must be documented on appeal.
- Modifier 76 is not required and must not be used when billing multiple quantities of a supply (e.g., disposable diapers or sterile saline).

CPT only copyright 2005 American Medical Association. All rights reserved.

When appealing claims with modifier 76 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, or documentation of times for each repeated procedure.

Certain procedure codes have been removed from modifier 76 auditing. These procedure codes have been identified as routinely being performed at the same time, more than twice per day for each antigen (e.g., agglutinins, febrile [e.g., Brucella, Francisella, Murine typhus, Q fever, Rocky Mountain spotted fever, scrub typhus], each antigen). Providers may still appeal claims that have been denied for documentation of time. Most procedure codes initially requiring modifier 76 will continue to be audited for the modifier 76.

25.3.3.17 Computerized Tomography

Scout views and reconstruction are considered part of any CT procedure and are not reimbursed in addition to any other CT. Procedure codes 4-76375 and 4-76380, are denied when billed on the same day as any other CT. Procedure codes 4-76375 and 4-76380 are paid if billed as an independent procedure.

25.3.3.18 Technetium TC 99M Tetrofosmin

Procedure code 9-A9502 is a benefit without age restriction. It is payable in the office, inpatient, and outpatient settings. Payable providers are physicians, radiation treatment centers, and hospitals.

Inpatient settings are reimbursed under their DRG. Services provided in the outpatient hospital setting are paid at the Texas Medicaid Reimbursement Methodology (TMRM). Radiation treatment centers are reimbursed at a maximum fee of $112.46.

Low Osmolar (Nonionic) Contrast Material (LOCM)

LOCM used with intrathecal, intra-arterial, and/or intravenous radiological procedures may be reimbursed separately when medically indicated for clients with but not limited to the following high-risk conditions:

- History of allergic reaction to contrast material with the exception of a heat or flushing sensation or a single episode of nausea or vomiting
- History of asthma
- Significant cardiac dysfunction including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension
- Generalized severe debilitation
- Sickle cell disease

The LOCM is reimbursed as a drug furnished as incidental to a physician's service. Payment is limited to services performed in the office (POS 1), freestanding radiation centers (POS 6), and outpatient facilities (POS 5). LOCM used on clients in the inpatient hospital setting of a DRG reimbursed hospital is included in the DRG payment and no additional payment is made.

Radiological procedures that specify with contrast include payment for *high* osmolar contrast material and no additional payment is made for *low* osmolar contrast material. When using low osmolar contrast material for procedures, bill the codes that specify without contrast. The low osmolar contrast material should be billed separately.

MRI procedures that specify with contrast include payment for para-magnetic contrast; therefore, *low* osmolar contrast material is not reimbursed separately.

Cardiac blood pool imaging (procedure codes 4/I/T-78472, 4/I/T-78473, 4/I/T-78481, 4/I/T-78483, 4/I/T-78494, and 4/I/T-78496) is a covered benefit for the following diagnosis codes:

Diagnosis Code	Description
3526	Multiple cranial nerve palsies
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified
41000	Acute myocardial infarction of anterolateral wall, episode of care unspecified
41001	Acute myocardial infarction of anterolateral wall, initial episode of care
41002	Acute myocardial infarction of anterolateral wall, subsequent episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care
41020	Acute myocardial infarction of inferolateral wall, episode of care unspecified
41021	Acute myocardial infarction of inferolateral wall, initial episode of care
41022	Acute myocardial infarction of inferolateral wall, subsequent episode of care
41030	Acute myocardial infarction of inferoposterior wall, episode of care unspecified
41031	Acute myocardial infarction of inferoposterior wall, initial episode of care
41032	Acute myocardial infarction of inferoposterior wall, subsequent episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41062	True posterior wall infarction, subsequent episode of care
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of care
41072	Subendocardial infarction, subsequent episode of care
41080	Acute myocardial infarction of other specified sites, episode of care unspecified
41081	Acute myocardial infarction of other specified sites, initial episode of care
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care

Diagnosis Code	Description
4110	Postmyocardial infarction syndrome
4111	Intermediate coronary syndrome
41181	Other acute and subacute forms of ischemic heart disease, acute ischemic heart disease without myocardial infarction
41189	Other acute and subacute forms of ischemic heart disease, other
412	Old myocardial infarction
4130	Angina decubitus
4131	Prinzmetal angina
4139	Other and unspecified angina pectoris
41400	Coronary atherosclerosis of unspecified type of vessel, native or graft
41401	Coronary atherosclerosis of native coronary artery
41402	Coronary atherosclerosis of autologous vein bypass graft
41403	Coronary atherosclerosis of nonautologous biological bypass graft
41404	Coronary atherosclerosis of artery bypass graft
41405	Coronary atherosclerosis of unspecified bypass graft
41406	Coronary atherosclerosis of native coronary artery of transplanted heart
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of transplanted heart
41410	Aneurysm of heart (wall)
41411	Aneurysm of coronary vessels
41412	Dissection of coronary artery
41419	Other aneurysm of heart
4148	Other specified forms of chronic ischemic heart disease
4149	Chronic ischemic heart disease, unspecified
4150	Acute cor pulmonale
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4179	Unspecified disease of pulmonary circulation
4200	Acute pericarditis in diseases classified elsewhere
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorder
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block

Diagnosis Code	Description
42612	Mobitz (type) II atrioventricular block
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42820	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
7813	Lack of coordination
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
7991	Respiratory arrest
V4321	Organ or tissue replaced by other means, heart assist device
V4581	Postsurgical aortocoronary bypass status

MRI—Additional High Dose Injection of Contrast Material

MRI, additional high dose injection of contrast material, (for example, procedure code 9-A4643, is a benefit of the Texas Medicaid Program).

A diagnostic technique has been developed in which an MRI of the central nervous system is first performed without contrast material; a second is performed with a standard dosage of contrast material; and a third is performed with a double dose of contrast material. Procedure code 9-A4643 is used for only the high dose injection given for the third MRI. The third MRI itself is not covered. Payment of high dose contrast material is limited to procedure codes 4-70553, 4-72156, 4-72157, and 4-72158. High dose contrast material administered in the inpatient setting (POS 3) is included in the DRG reimbursement, and no separate payment is made.

When submitting a claim for procedure code 9-A4643, the name of the drug and the number of cc or mL used must be indicated. If not, it will deny.

25.3.3.19 Gamma Knife Radiosurgery

The following diagnosis codes are payable for F-61793:

Diagnosis Code	Description
1700	Malignant neoplasm of bones of skull and face, except mandible
1701	Malignant neoplasm of mandible
1702	Malignant neoplasm of vertebral column, excluding sacrum and coccyx
1703	Malignant neoplasm of ribs, sternum, and clavicle
1704	Malignant neoplasm of scapula and long bones of upper limb
1705	Malignant neoplasm of short bones of upper limb
1706	Malignant neoplasm of pelvic bones, sacrum, and coccyx
1707	Malignant neoplasm of long bones of lower limb
1708	Malignant neoplasm of short bones of lower limb
1709	Malignant neoplasm of bone and articular cartilage, site unspecified
1710	Malignant neoplasm of connective and other soft tissue of head, face, and neck
1910	Malignant neoplasm of cerebrum, except lobes and ventricles
1911	Malignant neoplasm of frontal lobe
1912	Malignant neoplasm of temporal lobe
1913	Malignant neoplasm of parietal lobe
1914	Malignant neoplasm of occipital lobe
1915	Malignant neoplasm of ventricles
1916	Malignant neoplasm of cerebellum NOS
1917	Malignant neoplasm of brain stem
1918	Malignant neoplasm of other parts of brain
1919	Malignant neoplasm of brain, unspecified site
1944	Malignant neoplasm of pineal gland
1983	Secondary malignant neoplasm of brain and spinal cord
2251	Benign neoplasm of cranial nerves
2252	Benign neoplasm of cerebral meninges
2254	Benign neoplasm of spinal meninges

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2273	Benign neoplasm of pituitary gland and craniopharyngeal duct
2370	Neoplasm of uncertain behavior of pituitary gland and craniopharyngeal duct
2371	Neoplasm of uncertain behavior of pineal gland
2530	Acromegaly and gigantism
2531	Other and unspecified anterior pituitary hyperfunction
2550	Cushing's syndrome
25511	Glucocorticoid-remediable aldosteronism
25512	Conn's syndrome
25513	Bartter's syndrome
25514	Other secondary aldosteronism
3501	Trigeminal neuralgia
74760	Anomaly of the peripheral vascular system, unspecified site
74781	Congenital anomalies of cerebrovascular system

25.3.3.20 Hospital Radiation Therapy Services

Outpatient radiation therapy is limited to a maximum of five facility services every seven days beginning with the first date of service.

Important: *Take-home drugs given during the course of therapy can be reimbursed separately through the Vendor Drug Program.*

Freestanding radiation therapy facilities (specialty 98) and outpatient hospitals are reimbursed only for the technical component (TOS T) for services rendered in POS 5 for the services listed in the following procedure code tables.

The following radiation therapy services provided in an outpatient setting are allowed only once per day unless documentation of medical necessity supports the need for repeated services: therapeutic radiation treatment planning, therapeutic radiology simulation-aided field setting, teletherapy, brachytherapy isodose calculation, treatment devices, proton beam delivery/treatment, intracavity radiation source application, interstitial radiation source application, remote afterloading high intensity brachytherapy, radiation treatment delivery, localization, and radioisotope therapy.

Clinical Treatment Planning

Procedure Codes			
T-77280	T-77285	T-77290	T-77295
T-77299			

Refer to: "Physician" on page 36-1 for further radiation therapy guidelines.

Medical Radiation Physics, Dosimetry, Treatment Devices, and Special Services

Procedure Codes			
T-77300	T-77305	T-77310	T-77315
T-77326	T-77327	T-77328	T-77332
T-77333	T-77334	T-77399	

Clinical Brachytherapy

Procedure Codes			
T-77781	T-77782	T-77783	T-77784
T-77789	T-77799		

Radiation Treatment Delivery/Port Films

Procedure Codes			
T-77401	T-77402	T-77403	T-77404
T-77406	T-77407	T-77408	T-77409
T-77411	T-77412	T-77413	T-77414
T-77416	T- 77417	T-77421	T-77422
T-77423			

Contrast Materials/Radiopharmaceuticals

Reimbursement for radiological procedures, such as MRI or CT, with descriptions that specify with contrast, include payment for high osmolar, LOCM and paramagnetic contrast materials. These contrast materials will not be reimbursed separately.

Radiopharmaceuticals, when used for therapeutic treatment, may be considered for separate reimbursement.

The following procedure codes may be billed for therapeutic radiopharmaceuticals:

Procedure Codes			
4-79403	9-A9517	9-A9530	9-A9532
9-A9543	9-A9545	9-A9699	

The following services are *not* benefits of the Texas Medicaid Program:

Procedure Codes			
6-77321	6-77331	6-77336	6-77370
6-77470	6–77600	6-77620	6-77790

Procedure code T-77295, is payable to freestanding therapy facilities (specialty 98) and outpatient hospital setting (POS 5). Reimbursement for freestanding radiation treatment centers is at 28.32 relative value units (RVUs). Services provided in the outpatient hospital setting are paid at the TMRM. This code is payable on Medicare crossover claims. Procedure code T-77295 is payable once per day. Procedure codes T-77305, T-77310, and T-77315, are denied when billed on the same day as procedure code T-77295.

Texas Medicaid Program benefits include payment for the technical portion of radiation therapy services provided in an inpatient setting. Covered services include clinical

CPT only copyright 2005 American Medical Association. All rights reserved.

treatment planning and management and clinical brachytherapy. Hospitals use revenue code B-333, Radiation therapy, on the HCFA-1450 (UB-92) claim form when submitting charges for these services.

25.3.3.21 Hyperbaric Oxygen Therapy (HBO)

Hyperbaric oxygen therapy is a type of therapy that is intended to increase the environmental oxygen pressure to promote the movement of oxygen from the environment into the body tissues by means of pressurization that is greater than atmospheric pressure. Such treatment is performed in specially constructed hyperbaric chambers, which may hold one or several patients.

Note: *Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, etc., or applied topically is not considered hyperbaric treatment in itself.*

Hyperbaric oxygen therapy will be limited to one session per day, any provider using procedure code 1-99183.

Outpatient hospital clinics and hospital-based rural health centers must use revenue code B-413, Respiratory services, hyperbaric oxygen therapy, (quantity of one) for reimbursement of the technical component.

The FDA-approved indications for the hyperbaric oxygen chamber (therapy) in accordance with the guidelines established by the Undersea and Hyperbaric Medical Society are as follows:

- Air or gas embolism
- Carbon monoxide/smoke inhalation
- Compromised skin grafts and flaps
- Crush injuries/acute traumatic ischemias
- Decompression sickness
- Enhanced healing in selected problem wounds
- Exceptional blood loss (anemia)
- Gas gangrene (clostridial myonecrosis)
- Intracranial abscess
- Necrotizing soft tissue infections
- Radiation tissue damage (osteoradionecrosis)
- Refractory osteomyelitis
- Thermal burns

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *air or gas embolism* the following diagnosis codes should be used:

Diagnosis Code	Description
6396	Embolism following abortion or ectopic and molar pregnancies
67300	Obstetrical air embolism, unspecified as to episode of care
9580	Air embolism as an early complication of trauma
9991	Air embolism as a complication of medical care, not elsewhere classified

Effective for dates of service on or after April 1, 2004, diagnosis code 78552, Septic shock, will be payable for hyperbaric oxygen therapy.

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *carbon monoxide/smoke inhalation* use diagnosis code 986, Carbon monoxide poisoning and smoke inhalation.

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *compromised skin grafts and flaps* the following diagnosis codes should be used:

Diagnosis Code	Description
99652	Mechanical complication of prosthetic graft of other tissue, not elsewhere classified
99660	Infection and inflammatory reaction due to unspecified device, implant, and graft
99661	Infection and inflammatory reaction due to cardiac device, implant, and graft
99662	Infection and inflammatory reaction due to other vascular device, implant, and graft
99663	Infection and inflammatory reaction due to nervous system device, implant, and graft
99664	Infection and inflammatory reaction due to indwelling urinary catheter
99665	Infection and inflammatory reaction due to other genitourinary device, implant, and graft
99666	Infection and inflammatory reaction due to internal joint prosthesis
99667	Infection and inflammatory reaction due to other internal orthopedic device, implant, and graft
99668	Infection and inflammatory reaction due to peritoneal dialysis catheter
99669	Infection and inflammatory reaction due to other internal prosthetic device, implant, and graft
99670	Other complications due to unspecified device, implant, and graft
99671	Other complications due to heart valve prosthesis
99672	Other complications due to other cardiac device, implant, and graft
99673	Other complications due to renal dialysis device, implant, and graft
99674	Other complications due to other vascular device, implant, and graft

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
99675	Other complications due to nervous system device, implant, and graft
99676	Other complications due to genitourinary device, implant, and graft
99677	Other complications due to internal joint prosthesis
99678	Other complications due to other internal orthopedic device, implant, and graft
99679	Other complications due to other internal prosthetic device, implant, and graft
V423	Skin replaced by transplant

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *crush injuries/acute traumatic ischemias* the following diagnosis codes should be used:

Diagnosis Code	Description
8690	Internal injury to unspecified or ill-defined organs without mention of open wound into cavity
8691	Internal injury to unspecified or ill-defined organs with open wound into cavity
8871	Traumatic amputation of arm and hand (complete) (partial), unilateral, below elbow, complicated
8873	Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow, complicated
8875	Traumatic amputation of arm and hand (complete) (partial), unilateral, level not specified, complicated
8877	Traumatic amputation of arm and hand (complete) (partial), bilateral (any level), complicated
8971	Traumatic amputation of leg(s) (complete) (partial), unilateral, below knee, complicated
8973	Traumatic amputation of leg(s) (complete) (partial), unilateral, at or above knee, complicated
8975	Traumatic amputation of leg(s) (complete) (partial), unilateral, level not specified, complicated
8977	Traumatic amputation of leg(s) (complete) (partial), bilateral (any level), complicated
9251	Crushing injury of face and scalp
9252	Crushing injury of neck
9260	Crushing injury of external genitalia
92611	Crushing injury of back
92612	Crushing injury of buttock
92619	Crushing injury of other specified sites of trunk
9268	Crushing injury of multiple sites of trunk
9269	Crushing injury of unspecified site of trunk
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9290	Crushing injury of multiple sites, not elsewhere classified
9299	Crushing injury of unspecified site
99690	Complications of unspecified reattached extremity
99691	Complications of reattached forearm
99692	Complications of reattached hand
99693	Complications of reattached finger(s)
99694	Complications of reattached upper extremity, other and unspecified
99695	Complication of reattached foot and toe(s)
99696	Complication of reattached lower extremity, other and unspecified
99699	Complication of other specified reattached body part

CPT only copyright 2005 American Medical Association. All rights reserved.

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *decompression sickness* use diagnosis code 9933, Caisson disease.

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *enhanced healing in selected problem wounds* the following diagnosis codes should be used:

Diagnosis Code	Description
25070	Diabetes with peripheral circulatory disorders, type II or unspecified type, not stated as uncontrolled
25071	Diabetes with peripheral circulatory disorders, type I (juvenile type), not stated as uncontrolled
25072	Diabetes with peripheral circulatory disorders, type II or unspecified type, uncontrolled
25073	Diabetes with peripheral circulatory disorders, type I (juvenile type), uncontrolled
44023	Atherosclerosis of native arteries of the extremities with ulceration
44024	Atherosclerosis of native arteries of the extremities with gangrene
44381	Peripheral angiopathy in diseases classified elsewhere
44382	Erythromelalgia
44389	Other peripheral vascular disease
4439	Peripheral vascular disease, unspecified
4540	Varicose veins of lower extremities with ulcer
4542	Varicose veins of lower extremities with ulcer and inflammation
68600	Pyoderma, unspecified
68601	Pyoderma gangrenosum
68609	Other pyoderma
70700	Decubitus ulcer, unspecified site
70701	Decubitus ulcer, elbow
70702	Decubitus ulcer, upper back
70703	Decubitus ulcer, lower back
70704	Decubitus ulcer, hip
70705	Decubitus ulcer, buttock
70706	Decubitus ulcer, ankle
70707	Decubitus ulcer, heel
70709	Decubitis ulcer, other site
70710	Unspecified ulcer of lower limb
70711	Ulcer of thigh
70712	Ulcer of calf
70713	Ulcer of ankle
70714	Ulcer of heel & midfoot
70715	Ulcer other part of foot
70719	Ulcer oth part low limb
7078	Chronic ulcer of other specified sites
7079	Chronic ulcer of unspecified site
9895	Toxic effect of venom
99859	Other postoperative infection

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *exceptional blood loss (anemia)* the following diagnosis codes should be used:

Diagnosis Code	Description
2851	Acute post hemorrhagic anemia
78559	Other shock without mention of trauma
9584	Traumatic shock
9980	Postoperative shock, not elsewhere classified

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *gas gangrene (clostridial myonecrosis)* the following diagnosis codes should be used:

Diagnosis Code	Description
0383	Septicemia due to anaerobes
0400	Gas gangrene

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *necrotizing soft tissue infections* the following diagnosis codes should be used:

Diagnosis Code	Description
72886	Necrotizing fasciitis
7854	Gangrene

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *radiation tissue damage (osteoradionecrisis)* the following diagnosis codes should be used:

Diagnosis Code	Description
73010	Chronic osteomyelitis, site unspecified
73011	Chronic osteomyelitis involving shoulder region
73012	Chronic osteomyelitis involving upper arm
73013	Chronic osteomyelitis involving forearm
73014	Chronic osteomyelitis involving hand
73015	Chronic osteomyelitis involving pelvic region and thigh
73016	Chronic osteomyelitis involving lower leg

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
73017	Chronic osteomyelitis involving ankle and foot
73018	Chronic osteomyelitis involving other specified sites
73019	Chronic osteomyelitis involving multiple sites
7854	Gangrene
9092	Late effect of radiation
990	Effects of radiation, unspecified

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *refractory osteomyelitis* the following diagnosis codes should be used:

Diagnosis Code	Description
73000	Acute osteomyelitis, site unspecified
73001	Acute osteomyelitis involving shoulder region
73002	Acute osteomyelitis involving upper arm
73003	Acute osteomyelitis involving forearm
73004	Acute osteomyelitis involving hand
73005	Acute osteomyelitis involving pelvic region and thigh
73006	Acute osteomyelitis involving lower leg
73007	Acute osteomyelitis involving ankle and foot
73008	Acute osteomyelitis involving other specified sites
73009	Acute osteomyelitis involving multiple sites
73010	Chronic osteomyelitis, site unspecified
73011	Chronic osteomyelitis involving shoulder region
73012	Chronic osteomyelitis involving upper arm
73013	Chronic osteomyelitis involving forearm
73014	Chronic osteomyelitis involving hand
73015	Chronic osteomyelitis involving pelvic region and thigh
73016	Chronic osteomyelitis involving lower leg
73017	Chronic osteomyelitis involving ankle and foot
73018	Chronic osteomyelitis involving other specified sites
73019	Chronic osteomyelitis involving multiple sites
73020	Unspecified osteomyelitis, site unspecified

Osteomyelitis, periotitis, and other infections involving bone.

When requesting reimbursement of hyperbaric oxygen therapy for the treatment of *thermal burns* the following diagnosis codes should be used:

Diagnosis Code	Description
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa
94100	Burn of unspecified degree of unspecified site of face and head
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck

Diagnosis Code	Description
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck)
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part)
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part

Diagnosis Code	Description
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part
94200	Burn of unspecified degree of unspecified site of trunk
94201	Burn of unspecified degree of breast
94202	Burn of unspecified degree of chest wall, excluding breast and nipple
94203	Burn of unspecified degree of abdominal wall
94204	Burn of unspecified degree of back (any part)
94205	Burn of unspecified degree of genitalia
94209	Burn of unspecified degree of other and multiple sites of trunk
94210	Erythema due to burn (first degree) of unspecified site of trunk
94211	Erythema due to burn (first degree) of breast
94212	Erythema due to burn (first degree) of chest wall, excluding breast and nipple
94213	Erythema due to burn (first degree) of abdominal wall
94214	Erythema due to burn (first degree) of back (any part)
94215	Erythema due to burn (first degree) of genitalia
94219	Erythema due to burn (first degree) of other and multiple sites of trunk
94220	Blisters with epidermal loss due to burn (second degree) of unspecified site of trunk
94221	Blisters with epidermal loss due to burn (second degree) of breast
94222	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94223	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94224	Blisters with epidermal loss due to burn (second degree) of back (any part)
94225	Blisters with epidermal loss due to burn (second degree) of genitalia

Diagnosis Code	Description
94229	Blisters with epidermal loss due to burn (second degree) of other and multiple sites of trunk
94230	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of trunk
94231	Full-thickness skin loss due to burn (third degree NOS) of breast
94232	Full-thickness skin loss due to burn (third degree NOS) of chest wall, excluding breast and nipple
94233	Full-thickness skin loss due to burn (third degree NOS) of abdominal wall
94234	Full-thickness skin loss due to burn (third degree NOS) of back (any part)
94235	Full-thickness skin loss due to burn (third degree NOS) of genitalia
94239	Full-thickness skin loss due to burn (third degree NOS) of other and multiple sites of trunk
94240	Deep necrosis of underlying tissues due to burn (deep third degree) of trunk, unspecified site, without mention of loss of body part
94241	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, without mention of loss of breast
94242	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, without mention of loss of chest wall
94243	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall, without mention of loss of abdominal wall
94244	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), without mention of loss of back
94245	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, without mention of loss of genitalia
94249	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, without mention of loss of body part
94250	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of trunk, with loss of body part
94251	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, with loss of breast
94252	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, with loss of chest wall

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94253	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall with loss of abdominal wall
94254	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), with loss of back
94255	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, with loss of genitalia
94259	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, with loss of a body part
94300	Burn of unspecified degree of unspecified site of upper limb
94301	Burn of unspecified degree of forearm
94302	Burn of unspecified degree of elbow
94303	Burn of unspecified degree of upper arm
94304	Burn of unspecified degree of axilla
94305	Burn of unspecified degree of shoulder
94306	Burn of unspecified degree of scapular region
94309	Burn of unspecified degree multiple sites of upper limb, except wrist and hand
94310	Erythema due to burn (first degree) of unspecified site of upper limb
94311	Erythema due to burn (first degree) of forearm
94312	Erythema due to burn (first degree) of elbow
94313	Erythema due to burn (first degree) of upper arm
94314	Erythema due to burn (first degree) of axilla
94315	Erythema due to burn (first degree) of shoulder
94316	Erythema due to burn (first degree) of scapular region
94319	Erythema due to burn (first degree) of multiple sites of upper limb, except wrist and hand
94320	Blisters with epidermal loss due to burn (second degree) of unspecified site of upper limb
94321	Blisters with epidermal loss due to burn (second degree) of forearm
94322	Blisters with epidermal loss due to burn (second degree) of elbow
94323	Blisters with epidermal loss due to burn (second degree) of upper arm
94324	Blisters with epidermal loss due to burn (second degree) of axilla

Diagnosis Code	Description
94325	Blisters with epidermal loss due to burn (second degree) of shoulder
94326	Blisters with epidermal loss due to burn (second degree) of scapular region
94329	Blisters with epidermal loss due to burn (second degree) of multiple sites of upper limb, except wrist and hand
94330	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of upper limb
94331	Full-thickness skin loss due to burn (third degree NOS) of forearm
94332	Full-thickness skin loss due to burn (third degree NOS) of elbow
94333	Full-thickness skin loss due to burn (third degree NOS) of upper arm
94334	Full-thickness skin loss due to burn (third degree NOS) of axilla
94335	Full-thickness skin loss due to burn (third degree NOS) of shoulder
94336	Full-thickness skin loss due to burn (third degree NOS) of scapular region
94339	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of upper limb, except wrist and hand
94340	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, without mention of loss of a body part
94341	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, without mention of loss of forearm
94342	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, without mention of loss of elbow
94343	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, without mention of loss of upper arm
94344	Deep necrosis of underlying tissues due to burn of axilla, without mention of loss of axilla
94345	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, without mention of loss of shoulder
94346	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, without mention of loss of scapula
94349	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, without mention of loss of upper limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94350	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, with loss of a body part
94351	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, with loss of forearm
94352	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, with loss of elbow
94353	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, with loss of upper arm
94354	Deep necrosis of underlying tissues due to burn (deep third degree) of axilla, with loss of axilla
94355	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, with loss of shoulder
94356	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, with loss of scapula
94359	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, with loss of upper limb
94400	Burn of unspecified degree of unspecified site of hand
94401	Burn of unspecified degree of single digit (finger [nail]) other than thumb
94402	Burn of unspecified degree of thumb (nail)
94403	Burn of unspecified degree of two or more digits of hand, not including thumb
94404	Burn of unspecified degree of two or more digits of hand, including thumb
94405	Burn of unspecified degree of palm of hand
94406	Burn of unspecified degree of back of hand
94407	Burn of unspecified degree of wrist
94408	Burn of unspecified degree of multiple sites of wrist(s) and hand(s)
94410	Erythema due to burn (first degree) of unspecified site of hand
94411	Erythema due to burn (first degree) of single digit (finger [nail]) other than thumb
94412	Erythema due to burn (first degree) of thumb (nail)
94413	Erythema due to burn (first degree) of two or more digits of hand, not including thumb
94414	Erythema due to burn (first degree) of two or more digits of hand including thumb
94415	Erythema due to burn (first degree) of palm of hand
94416	Erythema due to burn (first degree) of back of hand
94417	Erythema due to burn (first degree) of wrist
94418	Erythema due to burn (first degree) of multiple sites of wrist(s) and hand(s)
94420	Blisters with epidermal loss due to burn (second degree) of unspecified site of hand
94421	Blisters with epidermal loss due to burn (second degree) of single digit (finger [nail]) other than thumb
94422	Blisters with epidermal loss due to burn of (second degree) of thumb (nail)
94423	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand, not including thumb
94424	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand including thumb
94425	Blisters with epidermal loss due to burn (second degree) of palm of hand
94426	Blisters with epidermal loss due to burn (second degree) of back of hand
94427	Blisters with epidermal loss due to burn (second degree) of wrist
94428	Blisters with epidermal loss due to burn (second degree) of multiple sites of wrist(s) and hand(s)
94430	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of hand
94431	Full-thickness skin loss due to burn (third degree NOS) of single digit (finger [nail]) other than thumb
94432	Full-thickness skin loss due to burn (third degree NOS) of thumb (nail)
94433	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand, not including thumb
94434	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand including thumb
94435	Full-thickness skin loss due to burn (third degree NOS) of palm of hand
94436	Full-thickness skin loss due to burn (third degree NOS) of back of hand
94437	Full-thickness skin loss due to burn (third degree NOS) of wrist
94438	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of wrist(s) and hand(s)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94440	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, without mention of loss of hand
94441	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger [nail]) other than thumb, without mention of loss of finger
94442	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), without mention of loss of thumb
94443	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, without mention of fingers
94444	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, without mention of loss of fingers
94445	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, without mention of loss of palm
94446	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, without mention of loss of back of hand
94447	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94448	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94450	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, with loss of hand
94451	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger [nail]) other than thumb, with loss of finger
94452	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), with loss of thumb
94453	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, with loss of fingers
94454	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, with loss of fingers
94455	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, with loss of palm of hand
94456	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, with loss of back of hand

Diagnosis Code	Description
94457	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, with loss of wrist
94458	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), with loss of a body part
94500	Burn of unspecified degree of unspecified site of lower limb (leg)
94501	Burn of unspecified degree of toe(s) (nail)
94502	Burn of unspecified degree of foot
94503	Burn of unspecified degree of ankle
94504	Burn of unspecified degree of lower leg
94505	Burn of unspecified degree of knee
94506	Burn of unspecified degree of thigh (any part)
94509	Burn of unspecified degree of multiple sites of lower limb(s)
94510	Erythema due to burn (first degree) of unspecified site of lower limb (leg)
94511	Erythema due to burn (first degree) of toe(s) (nail)
94512	Erythema due to burn (first degree) of foot
94513	Erythema due to burn (first degree) of ankle
94514	Erythema due to burn (first degree) of lower leg
94515	Erythema due to burn (first degree) of knee
94516	Erythema due to burn (first degree) of thigh (any part)
94519	Erythema due to burn (first degree) of multiple sites of lower limb(s)
94520	Blisters, epidermal loss (second degree) of unspecified site of lower limb (leg)
94521	Blisters with epidermal loss due to burn (second degree) of toe(s) (nail)
94522	Blisters with epidermal loss due to burn (second degree) of foot
94523	Blisters with epidermal loss due to burn (second degree) of ankle
94524	Blisters with epidermal loss due to burn (second degree) of lower leg
94525	Blisters with epidermal loss due to burn (second degree) of knee
94526	Blisters with epidermal loss due to burn (second degree) of thigh (any part)
94529	Blisters with epidermal loss due to burn (second degree) of multiple sites of lower limb(s)
94530	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94531	Full-thickness skin loss due to burn (third degree NOS) of toe(s) (nail)
94532	Full-thickness skin loss due to burn (third degree NOS) of foot
94533	Full-thickness skin loss due to burn (third degree NOS) of ankle
94534	Full-thickness skin loss due to burn (third degree NOS) of lower leg
94535	Full-thickness skin loss due to burn (third degree NOS) of knee
94536	Full-thickness skin loss due to burn (third degree NOS) of thigh (any part)
94539	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of lower limb(s)
94540	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of lower limb (leg), without mention of loss of a body part
94541	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), without mention of loss of toe(s)
94542	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, without mention of loss of foot
94543	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, without mention of loss of ankle
94544	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, without mention of loss of lower leg
94545	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, without mention of loss of knee
94546	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), without mention of loss of thigh
94549	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), without mention of loss of a body part
94550	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site lower limb (leg), with loss of a body part
94551	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), with loss of toe(s)
94552	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, with loss of foot
94553	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, with loss of ankle

Diagnosis Code	Description
94554	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, with loss of lower leg
94555	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, with loss of knee
94556	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), with loss of thigh
94559	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), with loss of a body part
9460	Burns of multiple specified sites, unspecified degree
9461	Erythema due to burn (first degree) of multiple specified sites
9462	Blisters with epidermal loss due to burn (second degree) of multiple specified sites
9463	Full-thickness skin loss due to burn (third degree NOS) of multiple specified sites
9464	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, without mention of loss of a body part
9465	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, with loss of a body part
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9474	Burn of vagina and uterus
9478	Burn of other specified sites of internal organs
9479	Burn of internal organs, unspecified site
94800	Burn (any degree) involving less than 10 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94810	Burn (any degree) involving 10-19 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94811	Burn (any degree) involving 10-19 percent of body surface with third degree burn of 10-19 percent
94820	Burn (any degree) involving 20-29 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94821	Burn (any degree) involving 20-29 percent of body surface with third degree burn of 10-19 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94822	Burn (any degree) involving 20-29 percent of body surface with third degree burn of 20-29 percent
94830	Burn (any degree) involving 30-39 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94831	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 10-19 percent
94832	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 20-29 percent
94833	Burn (any degree) involving 30-39 percent of body surface with third degree burn of 30-39 percent
94840	Burn (any degree) involving 40-49 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94841	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 10-19 percent
94842	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 20-29 percent
94843	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 30-39 percent
94844	Burn (any degree) involving 40-49 percent of body surface with third degree burn of 40-49 percent
94850	Burn (any degree) involving 50-59 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94851	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 10-19 percent
94852	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 20-29 percent
94853	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 30-39 percent
94854	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 40-49 percent
94855	Burn (any degree) involving 50-59 percent of body surface with third degree burn of 50-59 percent
94860	Burn (any degree) involving 60-69 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94861	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 10-19 percent
94862	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 20-29 percent
94863	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 30-39 percent
94864	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 40-49 percent
94865	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 50-59 percent
94866	Burn (any degree) involving 60-69 percent of body surface with third degree burn of 60-69 percent
94870	Burn (any degree) involving 70-79 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94871	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 10-19 percent
94872	Burn (any degree) involving 70-79 percent of body surface with third degree burn of 20-29 percent

Diagnosis Code	Description
94883	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 30-39 percent
94884	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 40-49 percent
94885	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 50-59 percent
94886	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 60-69 percent
94887	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 70-79 percent
94888	Burn (any degree) involving 80-89 percent of body surface with third degree burn of 80-89 percent
94890	Burn (any degree) involving 90 percent or more of body surface with third degree burn of less than 10 percent or unspecified amount
94891	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 10-19 percent
94892	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 20-29 percent
94893	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 30-39 percent
94894	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 40-49 percent
94895	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 50-59 percent
94896	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 60-69 percent
94897	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 70-79 percent
94898	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 80-89 percent
94899	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 90 percent or more of body surface
9490	Burn of unspecified site, unspecified degree
9491	Erythema due to burn (first degree), unspecified site
9492	Blisters with epidermal loss due to burn (second degree), unspecified site
9493	Full-thickness skin loss due to burn (third degree NOS), unspecified site
9494	Deep necrosis of underlying tissue due to burn (deep third degree), unspecified site without mention of loss of a body part
9495	Deep necrosis of underlying tissues due to burn (deep third degree, unspecified site with loss of a body part

Hyperbaric oxygen therapy that exceeds one session per day, any provider will be denied.

25.3.3.22 Implantable Contraceptive Capsules

ASCs and HASCs billing for removal of implantable contraceptive capsules should use procedure code F-11975, F-11976, and F-11977.

25.3.3.23 Occupational and Physical Therapy Services

Occupational and Physical Therapy Procedure Codes and Limitations

Occupational and physical therapy are benefits of the Medicaid program as outlined in the following sections. Specific codes to occupational and physical therapy as well as information about benefits can be found in these sections.

Occupational and physical therapy procedure codes are listed in the following table:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97020	1-97022	1-97024	1-97026
1-97028	1-97032	1-97033	1-97034
1-97035	1-97036	1-97039	1-97110
1-97112	1-97113	1-97116	1-97124
1-97139	1-97140	1-97150	1-97520
1-97530	1-97750	1-97799	

The following occupational and physical therapy procedure codes are a benefit for *THSteps-CCP clients only*:

Procedure Codes			
1-97504	1-97535	1-97537	1-97542
1-97703			

CPT only copyright 2005 American Medical Association. All rights reserved.

The following procedure codes are limited to one per day:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97022	1-97024	1-97026	1-97028
1-97150			

The following procedure codes may be paid in multiple 15-minute quantities:

Procedure Codes			
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97140	1-97504	1-97520	1-97530
1-97535	1-97537		

Procedure code 1-97010, is not a benefit of the Texas Medicaid Program.

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Procedure codes 1-97703 and 1-97750 are comprehensive codes and include an office visit. If an office visit is billed the same day by the same provider, the office visit will be denied as part of another procedure billed the same day. Procedure code 1-97703 is only payable for clients younger than 21 years of age.

Occupational Therapy Services

Occupational therapy is a payable benefit to physicians and hospitals. Occupational therapy must be billed with the AT modifier and must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary. Occupational therapy is to be billed with the following CPT procedure codes as applicable:

Procedure Codes			
1-97003	1-97004	1-97012	1-97014
1-97016	1-97018	1-97022	1-97024
1-97026	1-97028	1-97032	1-97033
1-97034	1-97035	1-97036	1-97039
1-97110	1-97112	1-97113	1-97116
1-97124	1-97139	1-97140	1-97150
1-97530	1-97535	1-97537	1-97542
1-97750	1-97760	1-97761	1-97762
1-97799			

The AT modifier is described as representing treatment provided for an acute condition, or an exacerbation of a chronic condition, which persists less than 180 days from the start date of therapy.

If a condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

Occupational therapy prescribed primarily as an adjunct to psychotherapy is not a benefit.

Procedure codes 1-97003 and 1-97004 are for occupational therapy only.

Procedure code 1-97003, is payable once per six months, any provider, same facility. Procedure code 1-97004, is payable one time per month, any provider, same facility. These codes are not payable on the same day as the following codes:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97022	1-97024	1-97026	1-97028
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97140	1-97150	1-97504	1-97520
1-97530	1-97750	1-97760	1-97761
1-97762			

Refer to: "Physician" on page 36-1 for more guidelines.

Physical Therapy Services

Physical therapy is the use of physical agents such as heat, massage, electricity, traction, or exercises in the treatment of disease. Payments for physical therapy are limited to acute disorders of the musculoskeletal system or exacerbations of chronic disorders necessitating physical medicine to restore function.

Physical therapy, including functional evaluations, must be provided according to the current written orders of a physician (written within 60 days) and based on medical necessity. It may be performed by auxilliary personnel under the direct supervision of the physician or the independently practicing physical therapist.

The acute modifier AT must be billed for payment to be made. The AT modifier is described as representing treatment provided for an acute condition, or an exacerbation of a chronic condition, which persists less than 180 days from the start date of therapy.

Example: *The following may be considered acute: a new injury, therapy before or after surgery, acute exacerbations of conditions, such as rheumatoid arthritis, and interventions such as a newly implanted intrathecal pump to decrease spasticity or Botulinum Toxin Type A injections.*

If a condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic, and the

CPT only copyright 2005 American Medical Association. All rights reserved.

client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

Payment cannot be made to a physician or an independently practicing physical therapist who provides physical therapy to a resident of a nursing facility. These services must be made available to nursing facility residents on an as-needed basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing facilities should refrain from admitting clients who need goal-directed therapy if the facility is unable to provide these services.

Procedure codes 1-97001 and 1-97002 are for physical therapy only.

Procedure code 1-97001 is payable once per six months, any provider, same facility. Procedure code 1-97002, is payable once per month, any provider, same facility. Procedure codes 1-97001 and 1-97002 are not payable on the same day as the following codes:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97022	1-97024	1-97026	1-97028
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97150	1-97504	1-97520	1-97530
1-97750	1-97760	1-97761	1-97762

The following procedure codes are limited to once per day:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97022	1-97024	1-97026	1-97028
1-97150			

The following procedure codes may be paid in multiple 15-minute quantities:

Procedure Codes			
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97140			

Procedure code 1-97010 is not a benefit of the Texas Medicaid Program.

Procedure codes 1-97703 and 1-97750 are comprehensive codes and include an office visit. If an office visit is billed the same day by the same provider, the office visit will be denied as part of another procedure billed the same day. Procedure code 1-97703 is only payable for clients younger than 21 years of age.

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Refer to: “Claim Filing Resources” on page 24-61.

“THSteps Medical and Dental Administrative Information” on page 43-5 for authorization requirements and coverage or noncoverage of the above physical therapy and rehabilitation codes.

25.3.3.24 Osteopathic Manipulation Treatments (OMT)

OMT is a covered benefit of the Texas Medicaid Program for the acute phase of the acute musculoskeletal injury or the acute phase of an acute exacerbation of a chronic musculoskeletal injury including acute musculoskeletal injury with a neurological component. The acute modifier AT must be submitted with the claim for payment to be made.

The AT modifier is described as representing treatment provided for an acute condition, or an exacerbation of a chronic condition, which persists less than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

Use procedure codes 1-98925, 1-98926, 1-98927, 1-98928, and 1-98929 when billing for OMT to the head, cervical, thoracic, lumbar, sacral, pelvic, lower extremities, upper extremities, rib cage, abdominal, and visceral regions.

When multiples of procedure codes 1-98925, 1-98926, 1-98927, 1-98928, and 1-98929 are billed on the same day by the same provider, the most inclusive code is paid and the others denied.

Procedure code 1-97140 will deny as part of another service if billed on the same date of service as procedure codes 98925, 98926, 98927, 98928, or 98929.

25.3.3.25 Psychiatric Services

Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services. Each individual delegated to perform behavioral health services by a Doctor of Medicine (MD) or Doctor of Osteopathy (DO) is also limited to a combined total of 12 hours. MDs and DOs who delegate and providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day.

CPT only copyright 2005 American Medical Association. All rights reserved.

Retrospective review may occur for both the total hours of services performed per day and for the total hours of services billed per day. If inappropriate payments are identified, the money will be recouped. Documentation requirements for all services billed are listed for each individual specialty in this manual.

Outpatient behavioral health services without prior authorization are limited to 30 encounters/visits per client per calendar year. An encounter/visit is defined as any and all outpatient behavioral health services rendered per hour by any provider, in the office, outpatient, nursing home, and home settings. This limitation includes encounters/visits by all practitioners.

The following services are not counted towards the 30 encounter/visit limitation:

- School Health and Related Services (SHARS) behavioral health rehab services
- Mental Health and Mental Retardation (MHMR) services
- Laboratory and radiology services
- Pharmacological management (1-90862)

Services that exceed 30 encounters/visits per calendar year per client must be prior authorized. Prior authorization must be obtained before providing the 25th service in a calendar year. Prior authorization requests in increments of up to 10 additional encounters/visits may be considered. If the client changes providers during the year and the new provider is unable to obtain complete information on the client, prior authorization may be made when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the 25th encounter/visit and before rendering services. This information must be submitted in addition to the usual medical necessity information.

It is recognized that a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was unable to submit the prior authorization request by the client's 25th encounter/visit.

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30-encounter/visit limitation are limited to 10 encounters/visits per request, and must be submitted on the Extended Outpatient/ Counseling Request Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and provider identifier
- Clinical update, including current specific symptoms and response to past treatment, and treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number and type of services requested and the dates (based on the frequency of visits) that the services will be provided
- All areas of the request must be completed with the information required on the form. If additional room is needed providers may state "see attached." The attachment must contain the specific information required in that section of the form

Prior authorization is not granted to providers who have seen a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. It is recommended that a request for extension of outpatient behavioral health be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits* must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these *additional encounters/visits.* Prior authorization for an extension of outpatient behavioral health services is granted when the treatment is mandated by the courts for court-ordered services. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

The following psychiatric services are not covered by the Texas Medicaid Program:

- The services of a licensed chemical dependency counselor (LCDC), psychological associate (masters level psychologist), psychiatric nurse, or behavioral health worker
- Psychiatric daycare
- Recreational therapy
- Biofeedback
- Music/dance
- Thermogenic therapy

CPT only copyright 2005 American Medical Association. All rights reserved.

Outpatient psychiatric services for the diagnosis or treatment of a mental, psychoneurotic, or personality disorder are reimbursed at the hospital's designated reimbursement rate as determined by the annual cost settlement.

Note: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. Psychiatrists that provide behavioral health services to clients in NorthSTAR must be members of the NorthSTAR BHOs.*

Refer to: "Request for Extended Outpatient Psychotherapy/Counseling Form" on page B-81.

"Medicaid Managed Care" on page 7-4 for more information or contact the client's BHO.

25.3.3.26 Psychological and Neuropsychological Testing

Psychological or neuropsychological testing will be limited to a total of four hours per day per client, any provider. Documentation of medical necessity must be maintained in the client's chart. Each hour of therapy, psychological and/or neuropsychological testing counts as one of the 30-encounter/visit limit.

Refer to: "Psychological and Neuropsychological Testing" on page 38-3 for information on outpatient psychological and neuropsychological testing, including procedure codes and diagnosis code restrictions.

25.3.3.27 Sterilization Services

The Texas Medicaid Program benefits include payment for elective sterilization (performed solely for the purpose of rendering the individual incapable of bearing or fathering children) of eligible clients when providers comply with HHS regulations (42 CFR 441.250, Subpart F).

Payment of elective sterilization is *not* made if the client is:

- Younger than 21 years of age at the time the consent form is signed
- Declared mentally incompetent for the purpose of sterilization (the individual may be adjudicated competent for the purpose of sterilization)
- Institutionalized in a correctional facility, mental hospital, or other rehabilitative facility
- Giving consent during labor or childbirth, under the influence of alcohol or other drugs, or while seeking or obtaining an abortion

Important: *If a client eligible for Medicaid decides not to be sterilized after entering the hospital, the hospital may be reimbursed for its services. The hospital must submit a valid consent form signed by the client. The physician's signature is not required.*

TMHP must have a signed, valid sterilization consent form on file to reimburse elective sterilization procedures. Typewritten, blocked, or facsimile stamped signatures are not acceptable for signature requirements. When TMHP receives a valid consent form, the client's eligibility file is updated to reflect receipt. Subsequent claims received by TMHP for the sterilization covered by the consent are referenced to the valid consent and reimbursed even if they are not accompanied by a valid consent. It is to the provider's benefit to submit a consent form with claims for sterilization rather than relying on a fellow provider. A legible valid copy of the consent is acceptable.

The "Sterilization Consent Form Instructions (2 Pages)" on page B-92 and the HHS-approved form (supplied by TMHP) are the only acceptable forms. Providers may use their own consent form as long as the form has the HHS-approved language and required fields. The only exception is if the provider obtains prior approval from HHS.

Refer to: "Elective Sterilization Services" on page 36-68.

"Sterilization and Sterilization-Related Procedures" on page 20-14 for elective sterilization services requirements and instructions.

25.3.4 Utilization Review

25

Utilization review activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system or TEFRA are required by Title XIX of the *Social Security Act*, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need, of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to utilization review monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of the Texas Medicaid Program.

Utilization review may also occur by an examination of particular claims or services not within the usual screening review when a specific utilization review is requested by HHSC or the Texas Attorney General's Office.

25.3.4.1 Responsibilities

TMHP is responsible for a comprehensive integrated review process to identify misuse and inappropriate billing patterns by outpatient hospitals and HASCs. All providers are subject to TMHP's utilization review monitoring. Providers are selected for review based on a comparison of their individual resource utilization with a peer group of similar specialty and geographic locality. The main goal of the required utilization control is to identify those providers whose practice patterns are aberrant from their peers and provide the necessary educational actions to help the provider achieve Texas Medicaid Program compliance. An analysis of utilization review data is completed by a registered nurse analyst for review by the medical director and staff. If the analyst substantiates that a provider's practice and billing patterns are incon-

CPT only copyright 2005 American Medical Association. All rights reserved.

sistent with the federal requirements and the Texas Medicaid Program's scope of benefits, a TMHP representative contacts the provider. The purpose of the contact is to discuss appropriate billing guidelines and to assist the provider in resolving the inappropriate billing patterns identified in the review.

TMHP uses the following criteria when reviewing all hospital outpatient medical records. Services must be:

- Medically necessary
- Ordered by a physician, signed, and dated. Signature stamps are valid if initialed and dated by the physician
- Billed in the quantities ordered and documented as provided
- Program benefits
- Specifically identified on the charge tickets or itemized statement submitted with the claim or by the HCPCS procedure code on the claim
- Billed to Medicaid only after other medical insurance resources have been exhausted

Refer to: "Medicaid Identification (Form H3087)" on page 4-9.

- Indicated by the documentation in the medical record.

The determination of TMHP's utilization review process may result in the following:

- Educational letters/visits
- Mail-in of medical records for review
- On-site medical record review (outpatient, ASC/HASC, or inpatient records *not* reviewed)
- Referral of questionable claims to HHSC or HHSC OIG
- Recoupment
- Prepayment review

The intent of these actions is to ensure the most effective and appropriate use of available services and facilities and provide appropriate, cost-effective care to clients with Medicaid coverage.

25.3.5 Claims Information

Providers must submit all required claim information on the face of the HCFA-1450 (UB-92) claim form. TMHP no longer accepts the required information on an attachment to the claim (for example, itemized statements). Identification of outpatient charges must be in Block 43, if submitting by narrative description or in Block 44, if submitting by HCPCS code. The Texas Medicaid Program recommends the use of specific HCPCS codes for claim submission. Do *not* use the revenue code description in Block 43. The HCPCS narrative description must be identified on the claim. For example, when submitting charges for physical therapy, do not use the description associated with revenue code 420. To receive reimbursement for physical therapy services, providers must identify the specific modality used (for example, gait training).

Charges on claims must be itemized on the face of the HCFA-1450 (UB-92) claim form instead of submitting attachments or charge tickets. If a claim contains more than 23 line items, continue the claim on additional UB-92s. Total each HCFA-1450 (UB-92) claim form as a stand-alone claim. If you do not total each page, your claim may be denied with EOB 472 (No more than 27 details allowed per claim). Resubmit with 27 or less details and ensure HCFA-1450 (UB-92) claim form and attached statement totals agree. Refer to Provider Manual." TMHP uses information attached to the claim for clarification purposes only.

Providers must purchase HCFA-1450 claim form from the vendor of their choice; TMHP does not supply them.

Refer to: "HCFA-1450 (UB-92) Claim Filing Instructions" on page 5-32 for claims completion instructions.

25.3.5.1 Claim Filing Resources

Refer to the following sections and/or forms on the page numbers listed below when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
HCFA-1450 (UB-92) Claim Filing Instructions	5-32
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
Hospital Audits Request for Claims Summary	B-54

26.1 Enrollment

To enroll in the Texas Medicaid Program, the independent (freestanding) laboratory must do the following:

- Be independent from a physician's office or hospital
- Meet staff, equipment, and testing capability standards for certification by HHSC
- Have Medicare certification
- Submit a current copy of the medical director's physician license, if the lab has physician involvement

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

26.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Medicaid Managed Care" on page 7-4 for more information.

26.2 Clinical Laboratory Improvement Amendments (CLIA)

26.2.1 CLIA Requirements

To be eligible for reimbursement by Medicare and Medicaid, all providers performing laboratory tests must:

- Pay a fee to the Centers for Medicare & Medicaid Services (CMS)
- Contact HHSC at 1-512-834-6650 to receive a Clinical Laboratory Improvement Amendments (CLIA) registration and/or certification number. Submit CLIA applications to the following address:

  Health Facility Licensing and Certification Division
  HHSC
  1100 West 49th Street
  Austin, TX 78756

- Notify TMHP of the assigned CLIA number at the following address:

  Texas Medicaid & Healthcare Partnership
  Provider Enrollment
  PO Box 200795
  Austin, TX 78720-0795

Important: *TMHP monitors claims submitted by clinical laboratories for CLIA numbers. Without a CLIA number on file with TMHP, claims for laboratory services will be denied.*

26.2.2 CLIA Regulations

Effective for dates of service on or after September 1, 1992, CMS implemented CLIA rules and regulations. The CLIA regulations were published in the February 28, 1992, *Federal Register* and have been amended several times since. The regulations are found at Title 42 *Code of Federal Regulations*, Part 493.

The CLIA rules and regulations are available on the CMS website at www.cms.gov.

CLIA regulations set standards designed to improve quality in all laboratory testing and include specifications for quality control (QC), quality assurance (QA), patient test management, personnel, and proficiency testing (PT). These regulations concern all laboratory testing used for the assessment of human health or the diagnosis, prevention, or treatment of disease. Under CLIA 88, all clinical laboratories (including those located in physicians' offices), regardless of location, size, or type of laboratory, must meet standards based on the complexity of the test(s) they perform.

26.2.3 Limits of Waiver and Physician-Performed Microscopy Procedure (PPMP) CLIA Certificates

CLIA certificates may limit the holder to performing only certain tests. Medicaid bills must accurately reflect those services authorized by the CLIA program and no other procedures. Two types of certificates limit holders to only certain test procedures: *Waiver* and *PPMP* certificates. A list of those test procedures follows.

26.2.3.1 Waiver Certificate

Providers holding waiver CLIA certificates are authorized to perform only the following tests. The following tests granted waiver status under CLIA were updated beginning September 27, 2002. The QW modifier is a CLIA requirement for specific codes based on their complexity and must be included or claims will be denied.

Procedure Codes		
5-80061-QW	5-80101-QW	5-81002
5-81003-QW	5-81025	5-82010-QW
5-82044-QW	5-82055-QW	5-82120-QW
5-82270	5-82274-QW	5-82465-QW
5-82523-QW	5-82570-QW	5-82679-QW
5-82947-QW	5-82950-QW	5-82951-QW
5-82952-QW	5-82985-QW	5-83001-QW
5-83002-QW	5-83026	5-83036-QW
5-83518-QW	5-83605-QW	5-83718-QW
5-83880-QW	5-83986-QW	5-84450-QW
5-84460-QW	5-84478-QW	5-84703-QW
5-85013	5-85014-QW	5-85018-QW
5-85576-QW	5-85610-QW	5-85651
5-86294-QW	5-86308-QW	5-86318-QW
5-86618-QW	5-86701-QW	5-87077-QW
5-87210-QW	5-87449-QW	5-87804-QW
5-87880-QW	5-G0107	

CPT only copyright 2005 American Medical Association. All rights reserved.

26.2.3.2 PPMP Certificates

Holders of PPMP certificates are authorized to perform all the procedures listed for waiver certificate in addition to the following tests:

Procedure Codes		
5-81000	5-81001	5-81015
5-81020	5-89190	5-Q0111
5-Q0112	5-Q0113	5-Q0115

26.3 Reimbursement

Medicaid pays up to the amount allowed for the total component for the same procedure, same client, same date of service, any provider. Providers who perform the technical service and interpretation must bill for the total component. Providers who perform only the technical service must bill for the technical component; those who perform only the interpretation must bill for the interpretation component. Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, any provider, are denied. Claims are paid based on the order they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical and/or interpretation component for the same procedure, same dates of service, same client, any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components.

The Medicaid rates for independent laboratories are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8081 and §355.8610, and the *Deficit Reduction Act* (DEFRA) of 1984. By federal law, Medicaid payments for clinical laboratory services cannot exceed the Medicare payment for that service.

As the result of the *Tax Equity and Fiscal Responsibility Act* (TEFRA) of 1982, independent laboratories are not directly reimbursed by Texas Medicaid when providing tests to clients registered as hospital inpatients. Reimbursement must be obtained from the hospital.

These services cannot be billed to the client.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

26.3.1 Texas Health Steps (THSteps) Outpatient Laboratory Services

The Medicaid service, Early and Periodic Screening, Diagnosis, and Treatment (EPSDT), is known in Texas as Texas Health Steps (THSteps).

Refer to: "Eligibility for a Medical Checkup" on page 43-7.

Important: *All required THSteps laboratory work is to be performed by the Department of State Health Services (DSHS) Bureau of Laboratories. DSHS makes these services available free to all enrolled THSteps medical providers for THSteps-eligible children. THSteps services provided in a private laboratory will not be reimbursed. The Bureau of Laboratories is reimbursed at its cost for performing these tests.*

Except for Pap smears, all required THSteps laboratory work must be sent to the DSHS Bureau of Laboratories at the following address:

DSHS Bureau of Laboratories
1100 West 49th Street
Austin, TX 78756-3199
1-512-458-7661

Pap smear specimens must be sent to the following address:

Women's Health Laboratories
Attn: Kathy Allen, Cytology Laboratory
2303 SE Military Drive
San Antonio TX 78223
1-210-534-8857, Ext. 2357
Toll-free: 1-888-440-5002
E-mail: Kathleen.Allen@dshs.state.tx.us

Claims for tests listed in the following table submitted by a THSteps medical provider or an outside laboratory for the same date of service as a THSteps medical checkup will be denied and are subject to retrospective review:

Procedure Codes		
5-80061	5-82465	5-83020
5-83021	5-83655	5-83718
5-84203	5-84478	5-85013
5-85014	5-85018	5-86403
5-86580	5-86592	5-86689
5-86701	5-87490	5-87590
5-88142	5-88147	5-88150
5-88164		

26.4 Benefits and Limitations

The Texas Medicaid Program only covers professional and technical services that an independent laboratory is certified by Medicare to perform.

CPT only copyright 2005 American Medical Association. All rights reserved.

26.4.1 Reference Labs and Lab Handling Fees

An independent laboratory that forwards a specimen to another laboratory without performing any tests on that specimen may *not* bill for any laboratory tests. An independent laboratory may only bill Medicaid for tests referred to another laboratory (independent or hospital) if it performs at least one test (that is Medicare-certified to perform) and forwards a portion of the same specimen to another laboratory (reference laboratory) to have one or more tests performed.

In this instance, the referring laboratory may bill for tests it has performed and *all* tests it is to perform on the specimen. When billing, the *Yes* box in Block 20 of the CMS-1500 claim form must be marked, the name and provider identifier of the *reference lab* to where the specimens have been forwarded must be indicated in Block 32, and the provider identifier of the *reference lab* must be indicated in Block 24-K next to each procedure to be performed by the *reference lab*.

Important: *Only one handling fee may be charged per day, per client, unless specimens are sent to two or more different laboratories; this must be documented on the claim.*

An independent laboratory that forwards a specimen to another laboratory (independent or hospital) may bill a handling fee (1-99001) for collecting and forwarding the specimen to the other laboratory if the specimen is collected by routine venipuncture or catheterization. Routine venipunctures or finger, heel, and ear sticks for collection of specimen(s) (2/5-36415) are not a Medicaid benefit. Family planning agencies must use code 1-99000 with modifier FP to bill their laboratory handling charges for laboratory specimens sent out. As with the physician code 1-99000, only one handling fee may be charged for each laboratory to the agency that sends specimens, regardless of the number of specimens taken.

When family planning test specimens such as Pap smears are collected, providers must direct the laboratory to indicate the claim for the test is to be billed as a family planning service.

If personnel from the independent laboratory are sent to a nursing facility to collect a blood specimen from a client eligible for Medicaid, procedure code 36415 may be billed. When billing on paper, the claim must document the name and address or the nine-digit provider identifier of the nursing facility in Block 32 of the CMS-1500 claim form. If billing electronically, the information must be in the appropriate field.

26.4.2 Repeated Procedures

26.4.2.1 Modifier 91

Effective for dates of service on or after May 5, 2004, modifier 91 should be used for repeat clinical diagnostic tests as follows:

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 91, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/services must be documented on appeal.
- Modifier 91 is not required and must not be used when billing multiple quantities of a supply (for example, disposable diapers or sterile saline).

For dates of service on or after April 3, 1998, certain procedure codes have been removed from modifier 91 auditing. These are procedure codes that have been identified as routinely being performed at the same time, more than twice per day for each antigen (e.g., agglutinins, febrile [e.g., Brucella, Francisella, Murine typhus, Q fever, Rocky Mountain spotted fever, scrub typhus], each antigen). Providers may still appeal claims that have been denied for documentation of time. Most procedure codes initially requiring modifier 91 will continue to be audited for modifier 91.

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

26.4.2.2 Modifier 76

Modifier 76 is limited as follows:

- Modifier 76 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 76, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 76, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/services must be documented on appeal.
- Modifier 76 is not required and must not be used when billing multiple quantities of a supply (e.g., disposable diapers or sterile saline).

Certain procedure codes have been removed from modifier 76 auditing for dates of service on or after April 3, 1998. These procedure codes have been identified as routinely being performed at the same time, more than twice per day for each antigen (e.g., agglutinins, febrile [e.g., Brucella, Francisella, Murine typhus, Q fever, Rocky Mountain spotted fever, scrub typhus], each antigen). Providers may still appeal claims that have

CPT only copyright 2005 American Medical Association. All rights reserved.

been denied for documentation of time. Most procedure codes initially requiring modifier 76 will continue to be audited for modifier 76.

When appealing claims with modifier 76 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

26.4.3 Laboratory Paneling

A *panel* is defined as a group of tests that were performed together or in combination. Chemistry tests, urinalysis, and CBC must be billed as a panel.

When paneling codes, the charge for the panel must reflect the total charge for the laboratory services.

26.4.3.1 Chemistry Tests

Laboratory Paneling

Medicare policy pertaining to laboratory paneling procedures was implemented by the Texas Medicaid Program. Organ and disease panel codes 5-80048, 5-80051, and 5-80053 must be used instead of the general multichannel automated panel codes.

Procedure code 5-84078 is considered a component of the multiple chemistry panels. Procedure code 5-85595 is considered a component of any hemogram with a platelet panel. Hemogram or CBC with platelet panel codes 5-85025 to 5-85027 must be billed when two or more components of a CBC and a platelet count are performed. When two or more components of a CBC and a platelet count are billed separately on the same day, all components are denied with Explanation of Benefits (EOB) 00559, "*These tests must be combined and billed as a CBC/panel. Resubmit with signed claim copy, R&S report copy, and appropriate code (5-85025 and 5-85027)*."

The following chemistry tests must be billed individually unless a complete panel is performed on the same day:

Procedure Codes		
5-82040	5-82150	5-82247
5-82248	5-82310	5-82373
5-82374	5-82435	5-82465
5-82550	5-82565	5-82945
5-82947	5-82948	5-82977
5-83090	5-83615	5-83663
5-83664	5-83690	5-83735
5-83921	5-84075	5-84078
5-84100	5-84132	5-84152
5-84155	5-84160	5-84295
5-84450	5-84460	5-84478
5-84520	5-84550	5-84591

26.4.3.2 Urinalysis

Procedure codes 5-82009, 5-82947, and 5-83986 are payable when billed on the same day as a urinalysis. If procedure code 5-84578 and 5-84583 are billed on the same day as any of the following urinalysis procedure codes, procedure codes 5-84578 and 5-84583 will be denied as part of the urinalysis:

Procedure Codes		
5-81000	5-81001	5-81002
5-81003	5-81005	5-81020

If procedure code 5-81015 is billed in addition to routine urinalysis codes 5-81000 or 5-81001, procedure code 5-81015 will be denied as part of 5-81000 or 5-81001. If procedure code 5-81015 is billed with urinalysis codes 5-81002 or 5-81003, both codes will be denied requiring paneling into either 5-81000 or 5-81001.

When performing bacterial urine culture with antibiotic sensitivities, use procedure code 5-87086.

26.4.4 Cancer Screening, Colorectal

The following procedure codes are covered services:

Procedure Codes		
5–G0103	2/F-G0104	2/F-G0105
4/I/T-G0106	5-G0107	4/I/T-G0120

Procedure code 4/I/T-G0122 is *not* covered by Medicaid.

Screening intervals are recommended once every 48 months for individuals 50 years of age and older. The screening colonoscopy is recommended once every 24 months for individuals at high risk for colorectal cancer.

High-risk individuals include people with one or more of the following:

- Close relative (sibling, parent, or child) who has had colorectal cancer or adenomatous polyposis
- Family history of familial adenomatous polyposis
- Family history of hereditary nonpolyposis colorectal cancer
- Personal history of colorectal cancer
- Inflammatory bowel disease, including Crohn's Disease, and ulcerative colitis

A screening colonoscopy may be covered for the following diagnoses:

26.4.4.1 History

Diagnosis Code	Description
V1005	Personal history of malignant neoplasm of the large intestine
V1006	Personal history of malignant neoplasm of rectum, rectosigmoid junction, and anus

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V160	Family history of malignant neoplasm of gastrointestinal tract
V1851	Family history, colonic polyps

26.4.4.2 Chronic Digestive Disease Condition

Diagnosis Code	Description
5550	Regional enteritis of small intestine
5551	Regional enteritis of large intestine
5552	Regional enteritis of small intestine with large intestine
5559	Regional enteritis of unspecified site
5560	Ulcerative (chronic) enterocolitis
5561	Ulcerative (chronic) ileocolitis
5562	Ulcerative (chronic) proctitis
5563	Ulcerative (chronic) protosigmoiditis
5568	Other ulcerative colitis
5569	Ulcerative colitis, unspecified

26.4.4.3 Inflammatory Bowel

Diagnosis Code	Description
5582	Toxic gastroenteritis and colitis
5583	Allergic gastroenteritis and colitis
5589	Other and unspecified noninfectious gastroenteritis and colitis

26.4.4.4 Complete Blood Count (CBC)

A CBC is a comprehensive service that includes components. A CBC is billed with procedure code 85025, 85027, or 85032.

The components of a CBC are listed in the following table. Any of these procedure codes billed for the same date of service as a CBC procedure code will deny as part of another service.

Procedure Codes		
85007	85008	85009
85013	85014	85018
85041	85048	85049

Procedure code 85049 may be reimbursed separately. If this procedure code is billed for the same date of service as procedure codes 85004, 85007, 85008, 85009, or 85027, it will deny as part of another service.

Reticulocyte procedure codes 85044, 85045, and 85046 may be reimbursed in addition to a CBC.

26.4.5 Helicobacter Pylori (H. Pylori)

Procedure codes 5-83013, 5-83014, 5-87338, and 5-87339 are covered services.

These codes are considered to be clinical lab services and must be billed using type of service (TOS) 5. The interpretation/professional component TOS I is not separately reimbursed.

Procedure codes 5-87338 and/or 5-87339 are not payable on the same date of service to the same provider as procedure codes 5-83013 and/or 5-83014. If a gastrointestinal endoscopy is performed within 90 days of the H. pylori test, procedure codes 2-43200, 2-43202, 2-43234, 2-43235, and 2-43239 will be denied.

These services can be appealed with submission of medical documentation that supports performance of a gastrointestinal endoscopy. The following diagnoses are covered for procedure code 5-87338:

Diagnosis Code	Description
53100	Acute gastric ulcer with hemorrhage, without mention of obstruction
53101	Acute gastric ulcer with hemorrhage, with obstruction
53110	Acute gastric ulcer with perforation, without mention of obstruction
53111	Acute gastric ulcer with perforation, with obstruction
53120	Acute gastric ulcer with hemorrhage and perforation, without mention of obstruction
53121	Acute gastric ulcer with hemorrhage and perforation, with obstruction
53130	Acute gastric ulcer without mention of hemorrhage or perforation, without mention of obstruction
53131	Acute gastric ulcer without mention of hemorrhage or perforation, with obstruction
53140	Chronic or unspecified gastric ulcer with hemorrhage, without mention of obstruction
53141	Chronic or unspecified gastric ulcer with hemorrhage, with obstruction
53150	Chronic or unspecified gastric ulcer with perforation, without mention of obstruction
53151	Chronic or unspecified gastric ulcer with perforation, with obstruction
53160	Chronic or unspecified gastric ulcer with hemorrhage and perforation, without mention of obstruction
53161	Chronic or unspecified gastric ulcer with hemorrhage and perforation, with obstruction
53170	Chronic gastric ulcer without mention of hemorrhage or perforation, without mention of obstruction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
53171	Chronic gastric ulcer without mention of hemorrhage or perforation, with obstruction
53190	Gastric ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, without mention of obstruction
53191	Gastric ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53200	Acute duodenal ulcer with hemorrhage, without mention of obstruction
53201	Acute duodenal ulcer with hemorrhage, with obstruction
53210	Acute duodenal ulcer with perforation, without mention of obstruction
53211	Acute duodenal ulcer with perforation, with obstruction
53220	Acute duodenal ulcer with hemorrhage and perforation, without mention of obstruction
53221	Acute duodenal ulcer with hemorrhage and perforation, with obstruction
53230	Acute duodenal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53231	Acute duodenal ulcer without mention of hemorrhage or perforation, with obstruction
53240	Chronic or unspecified duodenal ulcer with hemorrhage, without mention of obstruction
53241	Chronic or unspecified duodenal ulcer with hemorrhage, with obstruction
53250	Chronic or unspecified duodenal ulcer with perforation, without mention of obstruction
53251	Chronic or unspecified duodenal ulcer with perforation, with obstruction
53260	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, without mention of obstruction
53261	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, with obstruction

Diagnosis Code	Description
53270	Chronic duodenal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53271	Chronic duodenal ulcer without mention of hemorrhage or perforation, with obstruction
53290	Duodenal ulcer, unspecified as acute or chronic, without hemorrhage or perforation, without mention of obstruction
53291	Duodenal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53400	Acute gastrojejunal ulcer with hemorrhage, without mention of obstruction
53401	Acute gastrojejunal ulcer, with hemorrhage, with obstruction
53410	Acute gastrojejunal ulcer with perforation, without mention of obstruction
53411	Acute gastrojejunal ulcer with perforation, with obstruction
53420	Acute gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction
53421	Acute gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53430	Acute gastrojejunal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53431	Acute gastrojejunal ulcer without mention of hemorrhage or perforation, with obstruction
53440	Chronic or unspecified gastrojejunal ulcer with hemorrhage, without mention of obstruction
53441	Chronic or unspecified gastrojejunal ulcer, with hemorrhage, with obstruction
53450	Chronic or unspecified gastrojejunal ulcer with perforation, without mention of obstruction
53451	Chronic or unspecified gastrojejunal ulcer with perforation, with obstruction
53460	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
53461	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53470	Chronic gastrojejunal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53471	Chronic gastrojejunal ulcer without mention of hemorrhage or perforation, with obstruction
53490	Gastrojejunal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, without mention of obstruction
53491	Gastrojejunal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53500	Acute gastritis (without mention of hemorrhage)
53501	Acute gastritis with hemorrhage
53510	Atrophic gastritis (without mention of hemorrhage)
53511	Atrophic gastritis with hemorrhage
53550	Unspecified gastritis and gastroduodenitis (without mention of hemorrhage)
53551	Unspecified gastritis and gastroduodenitis with hemorrhage
53560	Duodenitis (without mention of hemorrhage)
53561	Duodenitis with hemorrhage
5368	Dyspepsia and other specified disorders of function of stomach
78901	Abdominal pain, right upper quadrant
78902	Abdominal pain, left upper quadrant
78906	Abdominal pain, epigastric

Refer to: "Helicobacter Pylori (H. Pylori)" on page 36-58 for more information.

26.4.6 Microquantitative Sweat Test

Procedure code 89230 is a procedure used to diagnose cystic fibrosis (27700 and 27701). Effective for dates of service on or after February 1, 2000, procedure code 89230 is not restricted by diagnosis.

26.4.7 Organ or Disease Panels

Organ panels are specific laboratory studies that have been combined under a problem-oriented classification as an approach to diagnosis. The following list of panels includes all components that must be included to report the panel code.

Individual laboratory studies considered a part of a specific panel are denied when billed on the same day as the panel code by the same provider.

26.4.7.1 Basic Metabolic Panel (5-80048)

This panel must include the following:

5-80048—Basic metabolic panel includes:		
5-82310	5-82374	5-82435
5-82565	5-82947	5-84132
5-84295	5-84520	

5-80050—General health panel includes:		
5-80053	5-85025	5-85027
5-84443		

5-80051—Electrolyte panel includes:		
5-82374	5-82435	5-84132
5-84295		

5-80053—Comprehensive metabolic panel includes:		
5-82040	5-82247	5-82310
5-82374	5-82435	5-82565
5-82947	5-84075	5-84132
5-84155	5-84295	5-84450
5-84460	5-84520	

5-80055—Obstetric panel includes:		
5-85025	5-85027	5-86592
5-86762	5-86850	5-86900
5-86901	5-87340	

5-80061—Lipid panel includes:		
5-80069	5-82465	5-83718
5-84478		

5-80069—Renal function panel includes:		
5-82040	5-82310	5-82374
5-82435	5-82565	5-82947
5-84100	5-84132	5-84295
5-84520		

5-80074—Acute hepatitis panel includes:		
5-86709	5-86705	5-87340
5-86803		

CPT only copyright 2005 American Medical Association. All rights reserved.

5-80076—Hepatic function panel includes:		
5-82040	5-82247	5-82248
5-84075	5-84155	5-84460
5-84450		

5-80090—TORCH Antibody panel includes:		
5-86644	5-86694	5-86762
5-86777		

26.4.8 Ferritin and Iron Studies

Procedure codes 5-82728, 5-83540, 5-83550, 5-84466, and 5-85536, are payable for the following diagnoses:

Diagnosis Code	Description
2750	Disorders of iron metabolism
2800	Iron deficiency anemias, secondary to blood loss (chronic)
2801	Iron deficiency anemias, secondary to inadequate dietary iron intake
2808	Other specified iron deficiency anemias
2809	Iron deficiency anemia, unspecified
2810	Pernicious anemia
2811	Other vitamin B-12 deficiency anemia
2812	Folate-deficiency anemia
2819	Unspecified deficiency anemia
28241	Sickle-cell thalassemia without crisis
28242	Sickle-cell thalassemia with crisis
28249	Other thalassemia
28264	Sickle-cell/Hb-C disease with crisis
28268	Other sickle-cell disease without crisis
2828	Other specified hereditary hemolytic anemias
2829	Hereditary hemolytic anemia, unspecified
2839	Acquired hemolytic anemia, unspecified
2850	Sideroblastic anemia
28521	Anemia in chronic kidney disease
28522	Anemia in neoplastic disease
28529	Anemia of other chronic disease
2859	Anemia, unspecified
5360	Achlorhydria
5728	Other sequelae of chronic liver disease
5738	Other specified disorders of liver
5739	Unspecified disorder of liver
5793	Other and unspecified postsurgical nonabsorption
5798	Other specified intestinal malabsorption
5799	Unspecified intestinal malabsorption
5851	Chronic kidney disease, Stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified
64820	Anemia of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64821	Anemia of mother, with delivery
64822	Anemia of mother, with delivery, with mention of postpartum complication
64823	Antepartum anemia
64824	Postpartum anemia
70900	Dyschromia, unspecified
V560	Aftercare involving extracorporeal dialysis
V5631	Encounter for adequacy testing for hemodialysis
V5632	Encounter for adequacy testing for peritoneal dialysis
V568	Aftercare involving other dialysis

Effective for dates of service on or after April 1, 2004, diagnosis code 2824, thalassemias, is no longer payable for ferritin and iron studies. The following new diagnosis codes are payable for ferritin and iron studies: 28241, 28242, 28249, 28264, and 28268.

If a ferritin and an iron study are billed on the same day, procedure code 5-82728 will be denied and procedure code 5-83540 will be paid. Ferritin and iron studies will be payable on the same day with the diagnosis of 2750, Disorders of iron metabolism.

Effective for dates of service on or after August 1, 2002, procedure codes 5-82728 and 5-83540 are payable on the same day, same provider, with the following diagnoses:

Diagnosis Code	Description
28521	Anemia in chronic kidney disease
5851	Chronic kidney disease, Stage I

26

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified

26.4.9 Laboratory Services for Clients on Dialysis

The Texas Medicaid Program provides reimbursement for laboratory services performed for clients on dialysis.

Charges for routine laboratory tests performed according to the established frequencies are included in the facility's dialysis charge billed to Medicaid regardless of where the tests were performed. Routine laboratory services performed by an outside laboratory are billed to the facility.

Nonroutine laboratory services for clients dialyzing in a facility and all lab work for clients on continuous ambulatory peritoneal dialysis (CAPD) may be billed separately from the dialysis charge. These services and recommended frequencies are listed in "Laboratory and Radiology Services" on page 40-4.

26.4.10 Transfusion Medicine

Procedure code 5-86890 is denied when billed by any provider for the same client for dates of service in excess of two times within four days. The use of modifier 76 does not prevent claim denials. Documentation may be submitted on appeal that supports the medical necessity and appropriateness of more than two predeposited autologous donations in four days.

26.4.11 Diagnosis Requirements

Independent laboratories and pathologists do not have to supply Medicaid with a diagnosis except when billing the following procedures:

Procedure Codes		
5-82728	5-83540	5-84233
5-86950	5-88230	5-88237
5-88239	5-88261	5-88262
5-89230	5-95950	5-95951
5-95953	5-95956	

Claims submitted for the above procedures without a diagnosis are denied. *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) evaluation and management (E/M) codes must not be used as the primary diagnosis.

All *V* codes except those listed under "Coding" on page 5-12 may be used as a primary diagnosis if appropriate. Additionally, any laboratory services provided to clients eligible for emergency services only must have a diagnosis on the claim to ensure accurate claims processing.

26.5 Claims Information

When family planning test specimens such as Pap smears are collected, providers must direct the laboratory to indicate the claim for the test is to be billed as a family planning service using diagnosis code V2509.

Independent laboratory services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

26.5.1 Electronic Filing for Laboratory Providers

Referring provider information is always required on laboratory claims. Failure to submit this data will result in a claim rejection on the TMHP Electronic Data Interchange (EDI).

When the place of service is 6 and the billing provider identifier belongs to a laboratory, there is no need to submit the same provider identifier in the facility ID field. This notation causes the claim to suspend processing unnecessarily, and may cause a delay in the disposition of the claim.

For questions about the electronic fields, contact the commercial software vendor or the TMHP EDI Help Desk at 1-888-863-3638.

26.5.2 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number
AIS (Automated Inquiry System)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1

In-Home Total Parenteral Hyperalimentation Supplier

27.1 Enrollment 27-2
27.1.1 Medicaid Managed Care Enrollment 27-2
27.2 Reimbursement 27-2
27.3 Benefits and Limitations 27-2
27.4 Claims Information 27-3
27.4.1 Claim Filing Resources 27-3

CPT only copyright 2005 American Medical Association. All rights reserved.

27.1 Enrollment

To enroll in the Texas Medicaid Program, providers of in-home total parenteral hyperalimentation must be enrolled in Medicare (the intermediary is Palmetto) as in-home total parenteral hyperalimentation supplier providers.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

27.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Medicaid Managed Care" on page 7-4 for more information.

27.2 Reimbursement

In-home total parenteral hyperalimentation suppliers are reimbursed the lesser of the provider's billed charges or the rate calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8087, which is a global fee for a package of services of $145 per day, with an annual maximum of $53,000. This rate applies to procedure codes 1-S9364, 1-S9365, 1-S9366, 1-S9367, and 1-S9368.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

27.3 Benefits and Limitations

In-home total parenteral hyperalimentation is a covered benefit for eligible clients who require long-term support because of extensive bowel resection and/or severe advanced bowel disease in which the bowel cannot support nutrition. Texas Health Steps (THSteps)-Comprehensive Care Program (CCP) clients younger than 21 years of age with diagnoses other than those mentioned above require prior authorization through CCP. Covered services must be reasonable, medically necessary, appropriate, and prescribed by a physician. Hyperalimentation is not available through the traditional Medicaid program when oral intake will maintain adequate nutrition.

All requests for in-home total parenteral hyperalimentation need to include the prescription for what is actually going to be administered to the client. TMHP must ensure that amino acids and lipids are being prescribed to the client, thus making this in-home total parenteral hyperalimentation rather than the administration of IV fluids and electrolytes, which cannot be billed as in-home total parenteral hyperalimentation. A prescription must accompany a request for prior authorization for all total parenteral hyperalimentation.

Hyperalimentation *must* be prior authorized by TMHP's Medical Director. The request for prior authorization must be submitted by the physician prescribing the treatment and must include the following information:

- Documented diagnosis
- Supplier's name and Medicaid provider identifier
- Client's name and Medicaid number
- Start date of total parenteral hyperalimentation
- Estimated period of time total parenteral hyperalimentation is needed
- Documentation to support the medical necessity of the hyperalimentation, including:
    - A completed letter of medical necessity, signed and dated by the physician
    - A clear copy of the most recent laboratory results (to include potassium, calcium, albumin, and liver function studies)
    - A clear copy of the total parenteral nutrition (TPN) formula/prescription, including amino acids and lipids, signed and dated by the physician. The administration of intravenous fluids and electrolytes cannot be billed as in-home total parenteral hyperalimentation

Requests must include all pertinent medical records as required by HHSC or TMHP to indicate the medical necessity of the long-term total parenteral hyperalimentation. Prior authorization may be given for up to one year, subject to renewal every year with the submission of a supplemental report documenting continued medical necessity for the treatment.

Covered services include, but are not necessarily limited to, the following:

- Parenteral hyperalimentation solutions and additives as ordered by the client's physician
- Supplies and equipment, including refrigeration (if necessary), that are required for the administration of prescribed solutions and additives
- Education of the client and/or caregivers regarding the in-home administration of total parenteral hyperalimentation before administration initially begins. Education must include the use and maintenance of required supplies and equipment
- Visits by a registered nurse appropriately trained in the administration of hyperalimentation. The nurse must visit the client at least once per month to monitor the client's status and to provide ongoing education to the client and/or family members/support people about the administration of hyperalimentation
- Customary and routine laboratory work required to monitor the client's status
- Enteral supplies and equipment, if medically necessary, in *conjunction* with total parenteral hyperalimentation

Important: *Hospitals administering total parenteral hyperalimentation in the hospital outpatient department*

CPT only copyright 2005 American Medical Association. All rights reserved.

should refer to "Hospital (Medical/Surgical Acute Care Facility)" on page 25-1 for the policies and billing instructions.

Total parenteral hyperalimentation is payable only once per day, per client. No more than a one week supply of solutions and additives will be reimbursed if the solutions and additives are shipped and not used because of the client's loss of eligibility, change in treatment, or inpatient hospitalization. Any days that the client is an inpatient in a hospital or other medical facility or institution must be excluded from the daily billing. Payment for partial months will be prorated based on actual days of administration.

Use the following procedure codes for billing hyperalimentation supplies:

Procedure Codes		
1-S9364	1-S9365	1-S9366
1-S9367	1-S9368	9-B4185

Lipids (9-B4185) will be denied if billed on the same date of service as any other TPN procedure code (1-S9364, 1-S9365, 1-S9366, 1-S9367, or 1-S9368).

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

27.4 Claims Information

In-home total parenteral hyperalimentation services must be submitted to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

Reminder: *Claims for total parenteral hyperalimentation must contain the nine-character prior authorization number in Block 23. Providers must consult with their vendor for the location of this field in the electronic claims format. The prescribing physician name and provider identifier must be in Block 17 and 17a or in the appropriate field of the provider's electronic software.*

Licensed Clinical Social Worker (LCSW)

28.1 Enrollment 28-2
    28.1.1 Medicaid Managed Care Enrollment 28-2
28.2 Reimbursement 28-2
28.3 Benefits and Limitations 28-2
28.4 Documentation Requirements 28-3
28.5 Claims Information 28-4
    28.5.1 Claim Filing Resources 28-4

CPT only copyright 2005 American Medical Association. All rights reserved.

28.1 Enrollment

To enroll in the Texas Medicaid Program, whether as an individual or as part of a group, a licensed clinical social worker (LCSW) must be licensed by the Texas State Board of Social Worker Examiners. LCSWs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LCSW is enrolling as part of a Medicare-enrolled group, then the LCSW must also be enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in the Texas Medicaid Program.

A licensed clinical social worker (LCSW) cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

28.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Managed Care clients. Contact the individual health plan for enrollment information.

Important: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. LCSWs who practice in the Dallas service area must be enrolled in the NorthSTAR Behavioral Health Organization to provide services to NorthSTAR clients. Providers must not bill TMHP for services rendered to NorthSTAR clients.*

Refer to: "Managed Care" on page 7-1 for more information.

28.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8091, the Texas Medicaid Program rate for LCSWs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

Under 1 TAC §355.8261, a federally qualified health center (FQHC) is reimbursed according to its specific prospective payment system (PPS) rate per visit for LCSW services.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

28.3 Benefits and Limitations

LCSW counseling services are a benefit for clients suffering from a mental, psychoneurotic, or personality disorder, when performed in the office (place of service [POS] 1), home (POS 2), skilled nursing facility (SNF) (POS 4), outpatient hospital (POS 5), nursing facility (POS 8), or other location (POS 9). When billing for contracted LCSW counseling services provided to Texas Medicaid Program clients who are younger than 21 years of age and reside in a residential treatment facility, providers should use POS 9 (other location).

LCSWs must not bill for services provided by people under their supervision; only the licensed LCSW and Medicaid enrolled practitioner providing the service may bill the Texas Medicaid Program. LCSWs who are employed by or remunerated by another provider may not bill the Texas Medicaid Program directly for counseling services if that billing would result in duplicate payment for the same services.

The following procedure codes are allowable for services provided by an LCSW on an hourly basis:

Procedure Code	Maximum Fee
1-90806	$53.86
1-90847	$53.84*
1-90853	$13.47 per client

* When billing or providing family counseling services, note the following requirements for Medicaid reimbursement:

- The client must be present when family counseling services are provided.
- Family counseling is only reimbursable for one family member per session.

According to the definition of "family" provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in supervision and care of children with Temporary Assistance for Needy Families (TANF). The following specific relatives are included in family counseling services:

- Father or mother
- Grandfather or grandmother
- Brother or sister
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

When billing for family, group, or individual counseling services, the time spent with the client must be reflected on the claim form as follows:

- 30 minutes bills as 0.5 hour
- 60 minutes bills as 1 hour
- 90 minutes bills as 1.5 hours
- 120 minutes bills as 2 hours

The time indicated on the claim form must be the time actually spent with the client.

Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services. Each individual delegated to perform behavioral health services by a doctor of medicine (MD) or doctor of osteopathy (DO) is also limited to a combined total of 12 hours. Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day. Retrospective review may occur for both the total hours of services performed

CPT only copyright 2005 American Medical Association. All rights reserved.

per day and for the total hours of services billed per day. If inappropriate payments are identified, the money will be recouped.

Outpatient behavioral health services are limited per client to 30 encounters/visits per calendar year (January 1 through December 31), regardless of provider unless prior authorized. *This limitation includes encounters/visits by all practitioners.* Laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter/visit limitation. An encounter/visit is defined as each hour of therapy, psychological, and/or neuropsychological testing rendered per hour, per provider. Each Texas Medicaid Program client is limited to 30 encounters/visits per calendar year (January 1 through December 31).

It is anticipated that this limitation, which allows for six months of weekly therapy or 12 months of biweekly therapy, will be adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters/visits. In these situations, prior authorization is required. *A provider who sees a client regularly and anticipates that the client will require encounters/visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit.*

It is recognized that a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the client's 25th encounter/visit.

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30-encounter/visit limitation are limited to ten encounters/visits per request and must be submitted on the Extended Outpatient/Counseling Request Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and provider identifier
- Clinical update, including specific symptoms and response to past treatment, treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters/visits that the services will be provided
- All areas of request must be completed with the information required by the form. If additional room is needed providers may state "see attached," but the attachment must contain the specific information required in that section of the form

Prior authorization will not be granted to providers who have been seeing a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. *It is recommended that a request for extension of outpatient behavioral health services be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided*.

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these additional encounters/visits.* Prior authorization for an extension of outpatient behavioral health services is granted when the treatment is mandated by the courts as a court-ordered service. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

The following services are not covered by the Texas Medicaid Program (except where specifically indicated in other sections):

- Music or dance therapy
- Services provided by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, or a psychologist assistant
- Thermogenic therapy, recreational therapy, psychiatric daycare, and biofeedback
- Hypnosis
- *Adult activity* and *individual activity* (these types of services would be payable only if guidelines of group therapy are met and are termed group therapy)

Refer to: "Managed Care" on page 7-1 for more information, or contact the client's BHO. Do not bill TMHP for services rendered to NorthSTAR clients.

28.4 Documentation Requirements

Those services not supported by required documentation in the client's record will be subject to recoupment.

Each client for whom services are billed must have the following documentation included in their records, and the documentation must comply with the standards indicated (below) in the first listed item:

- All entries must be documented clearly, legible to individuals other than the author, dated (month/day/year), and signed by the performing provider

CPT only copyright 2005 American Medical Association. All rights reserved.

- Notations of the beginning and ending session times
- All pertinent information regarding the client's condition to substantiate the need for services, including but not limited to the following:
  - Diagnosis (background, symptoms, impression)
  - Behavioral observations during the session
  - Narrative description of the counseling session
  - Narrative description of the assessment, treatment plan, and recommendations

28.5 Claims Information

Submit all claims for LCSW services to the Texas Medicaid Program. Services provided by LCSWs must be submitted in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply them.

Providers must bill Medicare before Medicaid when clients are eligible for services under both programs. Medicaid's responsibility for the coinsurance and/or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client's Medicare card for Part B coverage before billing the Texas Medicaid Program. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare. The Texas Medicaid Program is responsible for the coinsurance and deductible of Medicare-allowed services on a crossover basis only.

Refer to: "Part B" on page 2-8.

"Medicare Part B Crossovers" on page 4-12.

29.5.1 Claim Filing Resources 29-4

CPT only copyright 2005 American Medical Association. All rights reserved.

29.1 Enrollment

To enroll in the Texas Medicaid Program, whether as an individual or as part of a group, a licensed marriage and family therapist (LMFT) must be licensed by the Texas State Board of Examiners of Licensed Marriage and Family Therapists. LMFTs are covered as Medicaid-only providers. Therefore, enrollment in Medicare is not a requirement. LMFTs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in the Texas Medicaid Program.

LMFTs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

29.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Important: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. LMFTs practicing in the Dallas service area must be enrolled in the NorthSTAR Behavioral Health Organization to provide services to NorthSTAR clients. Providers must not bill TMHP for services rendered to NorthSTAR clients.*

Refer to: "Managed Care" on page 7-1 for more information.

29.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8091, the Medicaid rate for LMFTs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

According to 1 TAC §355.8261, a federally qualified health center (FQHC) is reimbursed according to its specific prospective payment system (PPS) rate per visit for LMFT counseling services.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

29.3 Benefits and Limitations

LMFT counseling services are a benefit for clients suffering from a mental, psychoneurotic, or personality disorder when provided in the office, (place of service [POS] 1), the home (POS 2), skilled nursing facility (POS 4), outpatient hospital (POS 5), nursing facility (POS 8), or other locations (POS 9). When billing for contracted LMFT counseling services provided to Medicaid clients younger than 21 years of age residing in a residential treatment facility, providers should use POS 9 (other location).

LMFTs must not bill for services provided by people under their supervision; only the licensed LMFT and Medicaid enrolled practitioner providing the services may bill Medicaid. LMFTs employed or remunerated by another provider may not bill Medicaid directly for counseling service if the billing results in duplicate payment for the same services.

The following procedure codes are allowable for services provided by an LMFT on an hourly basis:

Procedure Code	Maximum Fee
1-90806	$53.86
1-90847	$53.84*
1-90853	$13.47 per client

* When billing or providing family/counseling services, note the following requirements for Medicaid reimbursement:

- The client must be present when family/counseling services are provided.
- Family counseling is only reimbursable for one family member per session.

According to the definition of "family" provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in supervision and care of children with Temporary Assistance for Needy Families. The following specific relatives are included in family counseling services:

- Father or mother
- Grandfather or grandmother
- Brother or sister
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

When billing for family, group, or individual counseling services, the time spent with the client must be reflected on the claim form as follows:

- 30 minutes bills as 0.5 hour
- 60 minutes bills as 1 hour
- 90 minutes bills as 1.5 hours
- 120 minutes bills as 2 hours

The time indicated on the claim form must be the time actually spent with the client.

LMFTs must use modifier U8, to identify the provider of the service as an LMFT.

Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services. Each individual delegated to perform behavioral health services by an MD or DO is also limited to a combined total of 12 hours. Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day. Retrospective review may occur for both the total hours of services

CPT only copyright 2005 American Medical Association. All rights reserved.

performed per day and for the total hours of services billed per day. If inappropriate payments are identified, the money will be recouped.

Outpatient behavioral health services are limited per client to 30 encounters/visits per calendar year (January 1 through December 31) regardless of provider, unless prior authorized. *This limitation includes encounters/visits by all practitioners.* Laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter/visit limitation. An encounter/visit is defined as each hour of therapy, psychological, and/or neuropsychological testing rendered per hour, per provider. Each Medicaid client is limited to 30 encounters/visits per calendar year (January 1 through December 31).

It is anticipated that this limitation, which allows for six months of weekly therapy or 12 months of biweekly therapy, will be adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters/visits. In these situations, prior authorization is required. *A provider who sees a client regularly and anticipates that the client will require encounters/visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit.*

It is recognized that there are times when a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services, when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the client's 25th encounter/visit.

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30-encounter/visit limitation are limited to ten encounters/visits per request and must be submitted on the Extended Outpatient/Counseling Request Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and provider identifier
- Clinical update, including specific symptoms and response to past treatment
- Treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters/visits that the services will be provided

All areas of request must be completed with the required information. If additional room is needed, providers may state "see attached," but the attachment must contain the specific information required in that section of the form.

Prior authorization will not be granted to providers who have been seeing a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. It is recommended that a request for extension of outpatient behavioral health be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these additional encounters/visits.* Prior authorization for an extension of outpatient behavioral health services is granted when the treatment is mandated by the courts as a court-ordered service. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

The following services are not covered by the Texas Medicaid Program (except where specifically indicated in other sections):

- Music or dance therapy
- Services provided by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, or psychologist assistant
- Thermogenic therapy, recreational therapy, psychiatric day care, and biofeedback
- Hypnosis
- Adult activity and individual activity (these types of services would be payable only if guidelines of group therapy are met and are termed *group therapy*)

29.4 Documentation Requirements

Those services not supported by required documentation in the client's record will be subject to recoupment.

Each client for whom services are billed must have the following documentation (which meets the standards indicated) included in their records:

- All entries are documented clearly and are legible to individuals other than the author, dated (month/day/year), and signed by the performing provider
- Notations of the beginning and ending session times
- All pertinent information regarding the client's condition to substantiate the need for services, including but not limited to the following:

CPT only copyright 2005 American Medical Association. All rights reserved.

- Diagnosis
- Behavioral observations during the session
- Narrative description of the counseling session
- Narrative description of the assessment, treatment plan, and recommendations

29.5 Claims Information

Services provided by LMFTs must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form available from the vendor of their choice. TMHP does not supply the forms.

29.5.1 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

30.1 Enrollment

To enroll in the Texas Medicaid Program, whether as an individual or as part of a group, a licensed professional counselor (LPC) must be licensed by the Texas Board of Examiners of Professional Counselors. LPCs are covered as Medicaid-only providers; therefore, enrollment in Medicare is not a requirement. LPCs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in the Texas Medicaid Program.

LPCs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

30.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Important: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. LPCs who practice in the Dallas service area must be enrolled in the NorthSTAR Behavioral Health Organization to provide services to NorthSTAR clients. Providers must not bill TMHP for services rendered to NorthSTAR clients.*

Refer to: "Managed Care" on page 7-1 for more information.

30.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8091, the Medicaid rate for LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service under 1 TAC §355.8085.

Under 1 TAC §355.8261 a federally qualified health center (FQHC) is reimbursed according to its specific prospective payment system (PPS) rate per visit for LPC services provided by an LPC.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

30.3 Benefits and Limitations

LPC services are a benefit to clients of any age when performed in the office (place of service [POS] 1), home (POS 2), skilled nursing facility (POS 4), outpatient hospital (POS 5), nursing facility (POS 8), or other location (POS 9) for clients suffering from a mental, psychoneurotic, or personality disorder. When billing for contracted LPC counseling services provided to Medicaid clients who are younger than 21 years of age and reside in a residential treatment facility, providers should use other location (POS 9). LPCs must not bill for services provided by people under their supervision; only the licensed LPC and Medicaid enrolled practitioner providing the service may bill Medicaid. LPCs may only bill for services that they provide to Medicaid clients. LPCs who are employed by or remunerated by another provider may not bill Medicaid directly for counseling services if that billing would result in duplicate payment for the same services.

The following procedure codes are allowable for services provided by an LPC on an hourly basis:

Procedure Code	Maximum Fee
1-90806	$53.86
1-90847	$53.84*
1-90853	$13.47 per client

*When billing or providing family counseling services, note the following requirements for Medicaid reimbursement:

- The client must be present when family counseling services are provided.
- Family counseling is only reimbursable for one family member per session.

According to the definition of "family" provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in the supervision and care of children with Temporary Assistance for Needy Families (TANF). The following specific relatives are included in family counseling services:

- Father or mother
- Grandfather or grandmother
- Brother or sister
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

When billing for family, group, or individual counseling services, the time spent with the client must be reflected on the claim form as follows:

- 30 minutes bills as 0.5 hour
- 60 minutes bills as 1 hour
- 90 minutes bills as 1.5 hours
- 120 minutes bills as 2 hours

The time indicated on the claim form must be the time actually spent with the client.

Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services. Each individual delegated to perform behavioral health services by a Doctor of Medicine (MD) or Doctor of Osteopathy (DO) is also limited to a combined total of 12 hours. Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day. Retrospective review may occur for both the total hours of services performed per day and for the total hours of services billed per day. If inappropriate payments are identified, the money will be recouped.

Outpatient behavioral health services are limited per client to 30 encounters/visits per calendar year (January 1 through December 31), regardless of provider, unless prior authorized. *This limitation includes encounters/visits by all practitioners. Laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter/visit limitation.* An encounter is defined as each hour of therapy, psychological, and/or neuropsychological testing rendered per hour, per provider.

It is anticipated that this limitation, which allows for six months of weekly therapy or 12 months of biweekly therapy, will be adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters/visits. In these situations, prior authorization is required. *A provider who sees a client regularly and anticipates that the client will require encounters/visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit.*

It is recognized that a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the client's 25th encounter/visit.

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30-encounter/visit limitation are limited to ten encounters/visits per request, and must be submitted on the Extended Outpatient/Counseling Request Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and provider identifier
- Clinical update, including current specific symptoms and response to past treatment, and treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters/visits that the services will be provided

All areas of request must be completed with the information required by the form. If additional room is needed providers may state "see attached," but the attachment must contain the specific information required in that section of the form

Prior authorization will not be granted to providers who have been seeing a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. It is recommended that a request for extension of outpatient behavioral health be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these additional encounters/visits*. Prior authorization for an extension of outpatient behavioral health services is granted when the treatment is mandated by the courts as a court-ordered service. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

The following services are not covered by the Texas Medicaid Program (except where specifically indicated in other sections):

- Music or dance therapy
- Services provided by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, or psychologist assistant
- Thermogenic therapy, recreational therapy, psychiatric day care, and biofeedback
- Hypnosis
- *Adult activity and individual activity* (These types of services would be payable only if guidelines of group therapy are met and are termed group therapy)

30.4 Documentation Requirements

Those services not supported by required documentation in the client's record will be subject to recoupment.

Each client for whom services are billed must have documentation that meets the following guidelines included in their records:

- All entries must be documented clearly and legible to individuals that meet the following guidelines than the author, dated (month/day/year), and signed by the performing provider.
- Notations of the beginning and ending session times.
- All pertinent information regarding the client's condition to substantiate the need for services, including, but not limited to the following:
    - Diagnosis (background, symptoms, impression)
    - Behavioral observations during the session
    - Narrative description of the counseling session
    - Narrative description of the assessment, treatment plan, and recommendations

CPT only copyright 2005 American Medical Association. All rights reserved.

31.1 Enrollment

To enroll in the Texas Medicaid Program, maternity service clinics (MSCs) must ensure that the provider providing the services is employed by or has a contractual agreement or formal arrangement with the clinic to assume professional responsibility for the services provided to clinic clients. To meet this requirement, a provider must see the client at least once, prescribe the type of care provided, and if the services are not limited by the prescription, periodically review the need for continued care. Medicare certification is not a prerequisite for MSC enrollment. A current copy of the supervising practitioner's physician license must be submitted at the time of enrollment.

An MSC must be a facility that is:

- Not an administrative, organizational, or financial part of a hospital.
- Organized and operated to provide maternity services to outpatients.
- Compliant with all applicable federal, state, and local laws and regulations.

An MSC wanting to bill and receive reimbursement for case management services to high-risk pregnant adolescents, women, and infants must meet the eligibility criteria specified in "Case Management for Children and Pregnant Women (CPW)" on page 12-1.

To bill and receive reimbursement for family planning services, family planning agencies, providers, advanced practice nurses (APNs), or physicians assistants (PAs) must use their provider identifier.

To bill and receive reimbursement for laboratory procedures, an MSC must meet the requirements for an independent laboratory.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA will not be reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Independent Laboratory" on page 26-1.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

31.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

31.2 Reimbursement

The Medicaid rates for maternity service clinics for procedure codes 1-99201-TH, 1-99202-TH, 1-99203-TH, 1-99204-TH, 1-99205-TH, 2-59430, 1-99211-TH, 1-99212-TH, 1-99213-TH, 1-99214-TH, and 1-99215-TH for antepartum and postpartum care visits are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8201. The applicable rates are reported in the current physician fee schedule, which is available on the TMHP website at www.tmhp.com, or by calling the TMHP Contact Center at 1-800-925-9126 to request a copy.

Refer to: "Reimbursement" on page 2-2 for more information on reimbursement.

31.3 Benefits and Limitations

MSCs are those medical services provided by registered nurses (RNs) and determined with or by a licensed physician to be reasonable and medically necessary for the care of a pregnant adolescent or woman during the prenatal period and subsequent 60-day postpartum period. MSC benefits do *not* include deliveries.

Covered clinic services include, but are not necessarily limited to: risk assessment, medical services, specific laboratory or screening services, case coordination/outreach, nutritional counseling, psychosocial counseling, family planning counseling, and client education about maternal and child health.

Medical services must be furnished on an outpatient basis by the physician, nurse practitioner, physician's assistant, or licensed professional nurse under the physician's supervision, and must be within the staff's scope of practice or licensure as defined by state law. Although the physician does not necessarily have to be present at the clinic when services are provided, the physician must assume professional responsibility for the medical services provided at the clinic, and ensure through approval of the plan of care (POC) that the services are medically appropriate. The physician must spend as much time in the clinic as is necessary to ensure that clients are receiving medical services in a safe and efficient manner in accordance with accepted standards of medical practice.

The physician must see each client as soon as possible after she enters the MSC care and prescribe or approve the POC. The POC must be based on a risk assessment completed by the physician or licensed, professional clinic staff. MSCs must follow the procedures outlined throughout this manual. All service, frequency, and documentation requirements are applicable.

A minimum level of service must be provided by enrolled MSC providers to all Texas Medicaid clients as follows.

31.3.1 Initial Antepartum Care Visit Components

The following initial antepartum care visit components should be done as early as possible in the client's pregnancy.

CPT only copyright 2005 American Medical Association. All rights reserved.

31.3.1.1 History

History includes obstetric and gynecological, present pregnancy, medical/surgical, substance use, environmental, nutritional, psychosocial (including violence), and family/support system.

31.3.1.2 Physical Examination

Physical examination includes height, weight, blood pressure; head, neck, lymph, breasts, heart, lungs, back, abdomen, pelvis, rectum, extremities, and skin; and uterine size, fetal heart rate, and location.

31.3.1.3 Laboratory Tests

The initial hematocrit or hemoglobin and each subsequent hematocrit or hemoglobin is included in the visit fee and is not separately reimbursable to MSCs.

Important: *The laboratory services listed may not be billed using the MSC provider identifier. They may be ordered by MSC personnel and provided by a reference laboratory.*

MSCs referring laboratory work are required to supply the reference laboratory with the client's Medicaid number, as well as the MSC provider identifier for laboratory work including but not limited to:

- Hemoglobin or hematocrit, or CBC
- Urinalysis
- Blood type and Rh
- Antibody screen
- Rubella antibody titer
- Serology for syphilis
- Hepatitis B Surface Antigen
- Cervical cytology
- Other laboratory tests

The following tests may be performed at the initial antepartum care, as indicated:

- Pregnancy test
- Gonorrhea test
- Urine culture
- Sickle cell test
- Tuberculosis (TB) test
- Human Immunodeficiency Virus (HIV) antibody screen
- Chlamydia test

Multiple marker screens for neural tube defects must be offered if the client initiates care between 16 and 20 weeks.

31.3.1.4 Assessment

Assessment includes pregnancy, general health, medical, and psychosocial.

31.3.1.5 Plan

Plan includes pregnancy, preventive health, medical, and referral as indicated.

31.3.1.6 Education/Counseling

Education/counseling includes pregnancy, delivery, nutrition, breast-feeding, family planning, and preventive health.

The complete physical examination may be completed at the second visit if the MSC's routine involves a two-stage initial evaluation.

31.3.2 Subsequent Antepartum Care Visits

The following is a recommended guide for the frequency of subsequent antepartum visits for a regular pregnancy:

- One visit every four weeks for the first 28 weeks of pregnancy
- One visit every two to three weeks from 28 to 36 weeks of pregnancy
- One visit per week from 36 weeks to delivery

More frequent visits may be medically necessary. Physicians, certified nurse midwives (CNM), and MSCs are limited to 20 antepartum care visits per pregnancy and two postpartum care visits per pregnancy after discharge from the hospital, without documentation of a complication of pregnancy.

Each subsequent visit must include the following:

Interim History

- Problems
- Maternal status
- Fetal status

Physical Examination

- Weight, blood pressure
- Fundal height, fetal position and size, and fetal heart rate
- Extremities

Laboratory Tests

- Urinalysis for protein and glucose every visit

Important: *The urinalysis for protein and glucose, hemoglobin, and hematocrit is included in the visit fee and is not separately reimbursable to MSCs.*

- Hematocrit or hemoglobin repeated once a trimester and at 32-36 weeks of pregnancy
- Multiple marker screen for fetal abnormalities offered at 16 to 20 weeks of pregnancy
- Repeat antibody screen for Rh negative women at 28 weeks (followed by Rho immune globulin administration if indicated)
- Screen for gestational diabetes at 24 to 28 weeks of pregnancy, one hour post 50 gram glucose load
- Other laboratory tests as indicated by the medical condition of the client

CPT only copyright 2005 American Medical Association. All rights reserved.

31.3.3 Risk Assessment

A systematic assessment of factors that may compromise the health outcome for the pregnant adolescent or woman, or the fetus must be performed for all prenatal clients at the initial visit. The risk assessment must be ongoing and modified as necessary.

The level of services provided to the client must be appropriate for the risk assessment. Services must be available on-site or through a referral. If the maternity clinic refers the client to a physician, CNM, and/or hospital that does not participate in the Texas Medicaid Program, the maternity clinic must inform the client in advance of the client's potential financial responsibility, according to the requirements of the Texas Medicaid Program.

31.3.3.1 Classification of Risk

Low risk

A client with a normal evaluation without substantial risk factors at the initial examination and each subsequent examination is low risk. The number of antepartum care visits does not usually exceed 20 and the number of usual postpartum visits is two.

High risk

A client with an identified complication or risk factor that might adversely affect the mother or fetus is high risk. Examples of common high-risk pregnancy factors are listed in the following table with the appropriate diagnosis code, but not all high-risk factors are listed. Providers submitting charges for high-risk antepartum care must document the high-risk diagnosis on the claim form.

- Maternal client is younger than 17 years of age or older than 35 years of age (V2381, V2382, V2383, V2384)
- Nutritional problems
  - Underweight—30 percent underweight before pregnancy (V2389). Calculations of weight are based on actual weight compared to the standard height/weight charts nationally
  - Failure to gain weight appropriately (64680)
  - Weight loss greater than 10 pounds during pregnancy (V2389, 64890)

Diagnosis Code	Description
30300	Acute alcoholic intoxication in alcoholism, unspecified drinking behavior
30390	Other and unspecified alcohol dependence, unspecified drinking behavior
30400	Opioid type dependence, unspecified use
30410	Sedative, hypnotic or anxiolytic dependence, unspecified
30420	Cocaine dependence, unspecified use
30430	Cannabis dependence, unspecified use
30440	Amphetamine and other psychostimulant dependence, unspecified use
30450	Hallucinogen dependence, unspecified use
30500	Nondependent alcohol abuse, unspecified drinking behavior
3180	Moderate mental retardation
3181	Severe mental retardation
3182	Profound mental retardation

V234	Supervision of high-risk pregnancy with other poor obstetric history
V235	Supervision of high-risk pregnancy with other poor reproductive history
V2389	Supervision of other high-risk pregnancy

31.3.4 Postpartum Care Visit

Postpartum care provided by MSCs must be billed using procedure code 2-59430. A maximum of two postpartum visits are allowed within 60 days postpartum period for those clients without documentation or a diagnosis of complication of pregnancy. However, it is preferable for the MSC to enroll as a family planning agency and bill the postpartum visits as family planning services.

31.3.5 Documentation Requirements

Each client must have a complete and accepted standard medical record with documentation for the initial visit with procedures, as well as each subsequent visit with procedures. Such records must be made available when requested by Health and Human Services Commission (HHSC) or TMHP for utilization and quality assurance reviews as required by federal regulations. The documentation record or a true copy or narrative abstract must be sent to the hospital of delivery by the client's 35th week of pregnancy. The record must be made available to the client if the client transfers care to another institution. Records completed by licensed professional clinic staff under the direction of a physician must be signed by the supervising physician.

31.4 Claims Information

MSCs must submit claims to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice since TMHP does not supply them. Services other than antepartum and postpartum visits will be denied.

Hemoglobin, hematocrit, and urinalysis procedures are included in the charge for antepartum care. The urinalysis for protein and glucose, Hemoglobin, and Hematocrit is included in the visit fee and is not separately reimbursable to MSCs.

32.4.1 Claim Filing Resources 32-6

CPT only copyright 2005 American Medical Association. All rights reserved.

32.1 Enrollment

To enroll in the Texas Medicaid Program, Mental Health (MH) providers must contact the Texas Department of State Health Services (DSHS) at 1-512-206-4830. Mental Retardation (MR) providers must contact the Texas Department of Aging and Disability Services (DADS) at 1-512-438-3011 to be approved.

Local MR providers are eligible to enroll, with the approval of DADS, for MR service coordination. Local MH providers are eligible to enroll, with the approval of DSHS, for MH case management and MH rehabilitative services.

Community mental health centers (CMHC) can enroll in the Texas Medicaid Program without the approval of DADS, but must be enrolled in Medicare.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

32.1.1 Medicaid Managed Care Enrollment

MR service coordination, MH case management, and MH rehabilitative services providers are not required to enroll with Medicaid Managed Care. Claims for MR services are submitted to TMHP for all Medicaid clients including Medicaid Managed Care clients. MH services are submitted to DSHS for all Medicaid clients including Medicaid Managed Care clients.

Note: *File all claims for MR service coordination with TMHP, including those for* Medicaid Managed Care clients*. File all claims for MH case management and rehabilitative services with DSHS, including those for Medicaid Managed Care clients.*

Exception: *MH providers in the Dallas service area must join the NorthSTAR Behavioral Health Organizations (BHO) to provide services to NorthSTAR clients.*

Important: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. MH providers who provide behavioral health services to clients in NorthSTAR must be members of the NorthSTAR BHOs.*

32.2 Reimbursement

Services are reimbursed according to a maximum allowable fee established by HHSC. Reimbursement is limited to the federal matching percentage of the maximum allowable fee and is subject to adjustment annually.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement and the federal matching percentage.

32.3 Benefits and Limitations

32.3.1 Service Coordination and Case Management

The Texas Medicaid Program provides the following service coordination and case management services:

- Service coordination for people with mental retardation or related condition (adult or child) per consumer, per month
- Case management for people with serious emotional disturbance (child, 3–17 years of age)
- Case management for people with severe and persistent mental illness (adult, 18 years of age and older)

Service	Procedure Code	Modifier	Limitations
Individual Community Support Services			
Service Coordination for people with mental retardation or related condition (adult or child)	G9012		Once per calendar month

CPT only copyright 2005 American Medical Association. All rights reserved.

Service	Procedure Code	Modifier	Limitations
Routine case management (adult)	T1017	TF	32 units (8 hours) per calendar day for people 18 years of age or older.
Routine case management (child and adolescent)	T1017	TF and HA	32 units (8 hours) per calendar day for people less than 18 years of age.
Intensive case management (child and adolescent)	T1017	TG and HA	

An MR service coordination reimbursable *contact* is the provision of a service coordination activity by an authorized service coordinator during a face-to-face meeting with an individual eligible for service coordination. To bill and be paid for one unit of service coordination per month, at least one face-to-face meeting between the service coordinator and the eligible individual must occur during the month billed.

An MH case management reimbursable contact is the provision of a case management activity by an authorized case manager during a face-to-face meeting with an individual authorized to receive that specific type of case management. A billable unit of case management is 15 continuous minutes of contact.

Service coordination and case management services are not reimbursable when provided to a client eligible for Medicaid and receiving services through the Home and Community-Based Services (HCS) waiver. These services are included in the waiver. Claims submitted to TMHP for people receiving services under the HCS waiver are identified quarterly by DADS and payments are recouped.

The Texas Medicaid Program must *not* be billed for service coordination or case management services provided to people who are residents or inpatients of:

- Nursing facilities (for people not mandated by the Omnibus Budget Reconciliation Act [OBRA] of 1987)*
- Intermediate care facilities for mental retardation (ICF_MR)*
- State mental retardation facilities*
- State mental health facilities
- Title XIX participating hospitals including general medical hospitals
- Private psychiatric hospitals
- Medicaid-certified residence not already specified
- Institutions for mental diseases such as a hospital, nursing facility, or other institution of more than 16 beds primarily engaged in providing diagnosis, treatment, or care of people with mental diseases including medical attention, nursing care, and related services
- Jail or public institution

*A contact by the service coordinator to assist in discharge planning from some of the above may be reimbursed, if provided within 180 days before discharge. Service coordination services provided to people who are on predischarge furlough to the community from a nursing facility, intermediate care facility, or state mental retardation facility may be reimbursed. Service coordination services provided to people who are on trial placement from a state mental retardation facility to the community may be reimbursed if the person remains eligible for Medicaid upon release from the facility and receives regular Medicaid coverage.

The Texas Medicaid Program must *not* be billed for MH case management services provided before the establishment of a diagnosis of mental illness and authorization of services.

Refer to: "Managed Care" on page 7-1 for more information or contact the client's BHO. Do not bill TMHP for MH case management services rendered to NorthSTAR clients.

32.3.2 Mental Health Rehabilitative Services

The following rehabilitative services may be provided to individuals who satisfy the criteria of the mental health priority population and who are determined to need rehabilitative services. These services may be provided to a person with a single severe mental disorder (excluding mental retardation, pervasive

CPT only copyright 2005 American Medical Association. All rights reserved.

developmental disorder, or substance use disorder) or a combination of severe mental disorders as defined in the latest edition of the *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*:

Service	Procedure Code	Modifier	Limitations
Day program for acute needs	G0177		6 units (4.5 to 6 hours) per calendar day, in any combination, for people 18 years of age or older

Psychosocial rehabilitative services, Individual, crisis	H2017	ET	96 units (24 hours) per calendar day, in any combination
Psychosocial rehabilitative services, ACT or ACT alternative client, Individual, crisis	H2017	HK and ET	

32.3.2.1 Rehabilitative Services Limitations

The Texas Medicaid Program must *not* be billed for rehabilitative services provided before the establishment of a diagnosis of mental illness and authorization of services; rehabilitative services provided to individuals who reside in an institution for mental diseases; rehabilitative services provided to general acute care hospital inpatients; vocational services; educational services; nursing facility residents who are not mandated to need services by OBRA of 1987; and services provided to individuals in jail or a public institution.

Refer to: Title 25 *Texas Administrative Code* (TAC), Part I, Chapter 419, Subchapter L and the Medicaid MH Rehabilitative Billing Guidelines for more information.

32.3.2.2 Billing Units

All claims for reimbursement for rehabilitative services are based on the actual amount of time the eligible individual or primary caregiver/legal guardian of an eligible individual is engaged in face-to-face contact with a service provider. The billable units are: individual, group (15 continuous minutes); day programs (45-60 continuous minutes).

32.4 Claims Information

Submit MR service coordination services to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

Submit MH case management and rehabilitative services to the DSHS Resiliency and Disease Management (RDM) translator in the approved formats.

Refer to: RDM Medicaid Claims Billing Process for Mental Health Rehabilitative and Case Management Services.

33.5 Claims Information 33-3
    33.5.1 Claim Filing Resources 33-3

CPT only copyright 2005 American Medical Association. All rights reserved.

33.1 Enrollment

To enroll in the Texas Medicaid Program, a military hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Veterans Administration (VA) hospitals are eligible to receive Texas Medicaid payment only on claims that have crossed over from Medicare.

Military hospital providers must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

33.1.1 Medicaid Managed Care Enrollment

Medicaid Managed Care health plans must reimburse military hospital providers for emergency services.

Refer to: "Managed Care" on page 7-1 for more information.

33.2 Reimbursement

Reimbursement is limited to claims submitted for emergency inpatient care only.

Allowed inpatient hospital stays are reimbursed according to a prospective payment methodology based on diagnosis-related groups (DRGs). The reimbursement method itself does not affect inpatient benefits and limitations. The Texas Medicaid Program requires that one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. Providers should submit only one claim per inpatient stay to Medicaid, regardless of the diagnosis, to ensure accurate payment. The DRG reimbursement includes all facility services that were provided to the client while registered as an inpatient.

Reimbursement to hospitals for inpatient services is limited to $200,000 per client, per benefit year (November 1 through October 31). This limitation does not apply to services related to certain organ transplants, services to clients younger than 21 years of age and covered by the Comprehensive Care Program (CCP), or to services for certain clients enrolled in Medicaid Managed Care.

Military hospitals should keep a Medicaid client as an inpatient only for the length of time necessary to stabilize that client. The Medicaid client, once stabilized, should be transferred to the nearest Medicaid acute care hospital facility for further treatment.

When more than one hospital provides care for the same client, the hospital that furnishes the most significant amount of care receives consideration for a full DRG payment.

The other hospital is paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. The DRG modifier PT on the Remittance and Status (R&S) report indicates per diem pricing related to a client transfer.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. Medicaid does not recognize specialty units as separate entities; therefore, these transfers should be billed as *one* admission under the provider identifier. Admissions billed inappropriately are identified and denied during the utilization review process and may result in intensified review.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine if the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

The inpatient DRG reimbursement includes payment for all radiology and laboratory services, including those sent to referral laboratories.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

"THSteps-Comprehensive Care Program (CCP)" on page 43-33.

33.3 Benefits and Limitations

33.3.1 Inpatient Services

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Reimbursement to hospitals for inpatient services is limited to the Medicaid "spell of illness." The *spell of illness* is defined as "30 days of inpatient hospital care, which may accrue intermittently or consecutively." After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. Exceptions are made in the following instances:

- Texas Health Steps (THSteps)-eligible clients do not have a 30-day spell of illness limitation, if medically necessary conditions exist (covered under THSteps-CCP).
- Some Medicaid Managed Care clients do not have a 30-day spell of illness limitation.

Refer to: "Managed Care" on page 7-1 for more information.

Hospitals may submit *information only* claims to TMHP when one of the following situations exists:

- The inpatient 30-day spell of illness benefit is exhausted.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Payment that has been made by a third party resource/other insurance exceeds the Medicaid allowed amount.

Important: *For clients older than 21 years of age and not enrolled in Medicaid Managed Care, an inpatient expenditure cap of $200,000 per benefit year (November 1 through October 31) exists. Claims are reviewed retrospectively, and payments exceeding $200,000 will be recouped.*

Important: *If type of bill (TOB) 110 is used to submit a claim, all charges must be noncovered and the claim will finalize with Explanation of Benefit (EOB) 217, "Payment reduced through hospital action."*

It is appropriate to submit *information only* claims using TOB 110.

The following hospital services must be medically necessary and are subject to the utilization review requirements of the Texas Medicaid Program. Medicaid reimbursement for services cannot exceed the limitations of the Texas Medicaid Program.

Inpatient hospital services include the following items and services:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit, including meals, special diets, and general nursing services; or an allowance for bed and board in private accommodations, including meals, special diets, and general nursing services up to the hospital's charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons, as certified by the physician. The authorized signature in Block 85 of the HCFA-1450 (UB-92) claim form certifies that the billing hospital has a record on file that the services provided were ordered by a physician. Additionally, the hospital must document the medical necessity for a private room, such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information is included in Block 84 or attached to the claim.
- Whole blood and packed red cells that are reasonable and necessary for treatment of illness or injury, provided they are not available without cost.
- All medically necessary services or supplies ordered by a physician.

Medicaid benefits are not available for take-home or self-administered drugs or personal comfort items, except when received by prescription through the Vendor Drug Program.

Only inpatient claims that have an emergency diagnosis on the claim are considered for reimbursement.

33.3.2 Outpatient/Physician Services

Although Medicare reimburses for emergency outpatient and inpatient services, Medicaid does not reimburse for either outpatient or physician services. Military hospitals are not reimbursed for outpatient day surgery.

33.4 Utilization Review

For information about hospital utilization review procedures, refer to "Utilization Review Process" on page 25-12.

33.5 Claims Information

Submit claims for emergency hospital services to TMHP in an approved electronic format or on a HCFA-1450 (UB-92) paper claim form. Providers must purchase HCFA-1450 (UB-92) claim forms from the vendor of their choice. TMHP does not supply them.

Military hospitals may submit total charges in one line with appropriate accommodation revenue codes.

Refer to: "Military Hospital (Emergency Inpatient)" on page D-23.

33.5.1 Claim Filing Resources

34.4.1 Claim Filing Resources 34-3

CPT only copyright 2005 American Medical Association. All rights reserved.

34.1 Enrollment

To enroll in the Texas Medicaid Program, a Nurse Practitioner (NP) or Clinical Nurse Specialist (CNS) must be licensed as a registered nurse and recognized as an APN by the Board of Nurse Examiners (BNE) for the State of Texas. A registered nurse under the multi-state licensure compact can be licensed in another state but certified as an APN by the BNE for the State of Texas. The Texas Medicaid Program accepts a signed letter of certification from the BNE as acceptable documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA are not reimbursed for laboratory services.

All APNs (including certified nurse-midwife [CNM], certified registered nurse anesthetist [CRNA], clinical nurse specialist [CNS], and nurse practitioner [NP]) are enrolled within the categories of practice as determined by the BNE. CNSs and NPs must enroll as an APN; CNMs and CRNAs are allowed to enroll using their specific titles. Specific CNM and CRNA enrollment information may be found in the CNM and CRNA sections of this manual.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"CLIA Requirements" on page 26-2.

"Enrollment" on page 14-2 for more information on certified nurse midwife enrollment.

"Enrollment" on page 15-2 for more information on certified registered nurse anesthetist enrollment.

34.1.1 Enrollment in Texas Health Steps

Family and pediatric nurse practitioners are allowed to enroll in the Texas Health Steps (THSteps) Program to provide medical checkups. Women's health care nurse practitioners can enroll as THSteps providers for adolescents. Specific information is found in the THSteps section of this manual.

Refer to: "Provider Enrollment" on page 43-5 for more information on enrollment procedures.

34.1.2 Medicaid Managed Care Enrollment

NPs and CNSs may be eligible to enroll with Medicaid Managed Care as primary care providers. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

34.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8281, the Medicaid rate for APNs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The current fee schedule is available on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Refer to: "Provider Enrollment" on page 1-2 for more information.

"Reimbursement Methodology" on page 2-2 for more information.

"TMHP Electronic Data Interchange (EDI)" on page 3-1 for information on how to obtain electronic fee schedules from the TMHP website.

34.3 Benefits and Limitations

Services performed by NPs and CNSs are covered if the services meet the following criteria:

- Are within the scope of practice for APNs, as defined by Texas state law
- Are consistent with rules and regulations promulgated by the BNE for the State of Texas or other appropriate state licensing authority
- Are covered by the Texas Medicaid Program when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

NPs and CNSs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill the Texas Medicaid Program for their services if the billing results in duplicate payment for the same services.

Benefit limitation information for services can be found in the physician services, Texas Health Steps medical (includes newborn exams), and family planning sections of this manual.

Note: *Payment to physicians for supplies is not a benefit of the Texas Medicaid Program. Costs of supplies are included in the reimbursement for office visits.*

Important: *Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and received within 95 days from the date of service.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedures billed by an NP or CNS are reviewed retrospectively for appropriateness. Independently enrolled NPs and CNSs with a valid Medicare provider number are eligible to receive payment of deductible and coinsurance amounts as appropriate on Medicare crossover claims.

Refer to: "Family Planning Services" on page 20-1 for more information.

"Physician" on page 36-1 for more information.

"THSteps Medical Checkup Facilities" on page 43-11 for more information on THSteps services.

34.4 Claims Information

Providers must submit APN services in an approved electronic format or on a CMS-1500 paper claim form.

Refer to: "Claims Filing Instructions" on page 5-23 for paper claims completion instructions.

34.4.1 Claim Filing Resources

35.1 Enrollment

To enroll in the Texas Medicaid Program, licensed physical therapists must be enrolled in Medicare.

Providers cannot be enrolled if their license is due to expire within 30 days of application. A current license must be submitted.

The Medicare enrollment requirement is waived for therapists that only provide services to Texas Health Steps (THSteps)-eligible clients who are younger than 21 years of age and who do not receive Medicare benefits. These therapists must enroll as individuals. If providers are currently enrolled with the Texas Medicaid Program or plan to provide regular acute care services to clients with Medicaid coverage, enrollment in the THSteps-Comprehensive Care Program (CCP) is not necessary. All non-CCP physical therapy services must be billed with the current provider identifier.

Refer to: “Provider Enrollment” on page 1-2 for more information about enrollment procedures.

“THSteps-CCP Overview” on page 43-33 for more information about providing services to Medicaid/THSteps clients.

“Texas Medicaid (Title XIX) Home Health Services” on page 24-1 for more information about providing services to clients in the home setting.

35.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: “Managed Care” on page 7-1 for more information.

35.2 Reimbursement

The Medicaid rates for physical therapists and independent practitioners are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8081 and §355.8085. The applicable Medicaid rates are listed in the current physician fee schedule, which is available on the TMHP website at www.tmhp.com. To request a copy, call the TMHP Contact Center at 1-800-925-9126.

Refer to: “Reimbursement Methodology” on page 2-2 for more information.

35.2.1 Benefits and Limitations

Physical therapy is the use of physical agents such as heat, massage, electricity, traction, or exercises in the treatment of disease. Payments for physical therapy will be limited to acute disorders of the musculoskeletal system or exacerbations of chronic disorders necessitating physical therapy to restore function. The acute modifier AT must be billed for payment to be made. The AT modifier represents treatment provided for an acute condition or an exacerbation of a chronic condition that persists less than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

Plateauing is defined as the point that maximum improvement has been documented and more improvement ceases.

Examples of what may be considered acute are as follows:

- A new injury
- Therapy before or after surgery
- Acute exacerbations of conditions such as rheumatoid arthritis
- Interventions such as a newly implanted intrathecal pump to decrease spasticity or Botulinum Toxin Type A injections.

Physical therapy, including functional evaluations, must be provided according to the current written orders of a physician (within 60 days) and based on medical necessity. It may be performed by auxiliary personnel under the direct supervision of the physician or the independently practicing physical therapist.

Payment cannot be made to a provider or an independently practicing physical therapist who provides physical medicine to a resident of a nursing facility. These services must be made available to nursing facility residents on an *as needed* basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing facilities must refrain from admitting clients who need goal-directed therapy, if the facility is unable to provide these services.

The following procedure codes are limited to once per day:

Procedure Codes				
1-97012	1-97014	1-97016	1-97018	1-97022
1-97024	1-97028	1-97150		

The following procedure codes may be paid in multiple 15-minute quantities:

Procedure Codes				
1-97032	1-97033	1-97034	1-97035	1-97036
1-97039	1-97110	1-97112	1-97113	1-97116
1-97124	1-97139	1-97140	1-97530	1-97535
1-97537	1-97760	1-97761		

Procedure codes 1-97535, 1-97537, and 1-97760 are only payable for clients younger than 21 years of age.

Procedure codes 1-97010, 1-97265, 1-97545, 1-97546, 1-97770, 1-97780, and 1-97781 are not a benefit.

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure codes 1-97750 and 1-97762 are comprehensive codes and include an office visit. If an office visit is billed for the same day by the same provider, the office visit will be denied as part of another procedure billed for the same day. Procedure code 1-97762 is only payable for clients younger than 21 years of age.

Procedure code 1-97001 is payable once per six months, any provider, same facility. Procedure code 1-97002, is payable once per month, any provider, same facility. Procedure codes 1-97001 and 1-97002 are not payable on the same day as the following procedure codes:

Procedure Codes				
1-97012	1-97014	1-97016	1-97018	1-97022
1-97024	1-97028	1-97032	1-97033	1-97034
1-97035	1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139	1-97140
1-97150	1-97530	1-97750	1-97760	1-97761
1-97762				

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Physical therapy (PT) services that are not benefits of the regular Texas Medicaid Program may be benefits under THSteps-CCP when they are provided to clients with musculoskeletal or neuromusculoskeletal conditions.

Important: *CCP is for Medicaid THSteps-eligible clients who are younger than 21 years of age. CCP eligibility ends on the day of the client's twenty-first birthday.*

Refer to: "Texas Medicaid (Title XIX) Home Health Services" on page 24-1 for information about authorization requirements and coverage or noncoverage of physical medicine and rehabilitation codes in the home.

35.2.2 Physical Therapy Documentation Requirements

Authorization is not required for therapy services delivered to clients younger than 21 years of age, although authorization is recommended through THSteps-CCP for services delivered in the home. Clients 21 years of age and older receive PT through Home Health Services.

Submit the following documentation for claims payment:

- A physician's prescription:
  - Clients younger than 21 years of age who receive PT services often have chronic conditions that require ongoing medical supervision.
  - The prescription must address medical necessity.
  - A new prescription is required at least every six months.
- Therapy treatment plan:
  - The initial THSteps-CCP treatment plan must include a copy of a current evaluation and documentation of the treatment goals and anticipated measurable progress.
  - Renewal of THSteps-CCP therapy services requires a summary statement of the measurable progress during the previous treatment period and documentation of new treatment goals with anticipated measurable progress for the renewal period.
  - A treatment plan is valid for up to six months.

Refer to: "Home Health Services" on page 24-6 for information about physical therapy services provided in the home setting.

"THSteps-Comprehensive Care Program (CCP)" on page 43-33 for information about PT, occupational therapy (OT), and speech language-pathology (SLP) services.

35.2.2.1 Provisions for Therapy Services Provided Through ECI Programs

Because the state Early Childhood Intervention (ECI) Program requires local ECI providers to follow quality assurance procedures and develop Individualized Family Service Plans (IFSP) for each child, THSteps-CCP does not require copies of therapy evaluations or periodic progress notes to be submitted with therapy claims. (Providers may request copies of the ECI Request for Initial/Renewal Outpatient Therapy form from TMHP.) However, the prescription requirements as stated above must be followed by ECI providers.

35.2.3 Rehabilitative Services

Rehabilitative Services is a program administered by HHSC to nursing facility clients who need rehabilitation. These services must be *prior authorized* before the therapy is provided and paid by HHSC. Covered services include OT, PT, and SLP to clients who are eligible for Medicaid, with an acute onset of an illness or injury, with the expectation that function will be improved measurably. For all rehabilitative services inquiries, call Rehabilitative Services at 1-800-792-1109.

35.3 Claims Information

Submit services provided by an independently practicing physical therapist to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them. Claims may be filed electronically in a CMS-1500 format as long as the nine-digit prior authorization number (PAN) is reflected in the equivalent electronic field.
