36.1 Enrollment

36.1.1 Physicians and Doctors

To enroll in the Texas Medicaid Program to provide medical services, physicians (doctor of medicine [MD] and doctor of osteopathy [DO]) and doctors (dental medical doctor [DMD], doctor of dental surgery [DDS], doctor of optometry [OD], doctor of podiatric medicine [DPM], and doctor of chiropractic medicine [DC]) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled if their licenses are due to expire within 30 days. A current Texas license must be submitted.

Important: *Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.*

All physicians except gynecologists, pediatricians, pediatric sub-specialists, pediatric psychiatrists and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before Medicaid enrollment. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

Refer to: "Provider Enrollment" on page 1-2 for more information.

36.1.2 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with a Medicaid Managed Care health plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information on Medicaid Managed Care programs.

Important: *North State of Texas Access Reform (NorthSTAR) is a pilot managed care program in the Dallas service area that covers behavioral health services. Physicians that provide behavioral health services to clients in NorthSTAR must be a network provider of the NorthSTAR Behavioral Health Organization (BHO) to provide services to NorthSTAR clients.*

36.1.3 Comprehensive Health Centers (CHC)

CHCs and/or physician-operated clinics are funded by federal grants. To apply for participation in the Texas Medicaid Program, they must be certified and participate as a health center under Medicare (Title XVIII).

CHC claims are paid according to each center's encounter rates as established by CMS. Medicaid payment to CHCs is limited to the Medicare deductible and/or coinsurance.

All providers supplying laboratory services in an office setting must be certified and registered with the U.S. Food and Drug Administration (FDA) in accordance with Clinical Laboratory Improvement Amendments (CLIA).

Providers who do not comply with CLIA cannot be reimbursed for laboratory services.

Refer to: "CLIA Requirements" on page 26-2 and "Provider Enrollment" on page 1-2 for more information.

36.2 Reimbursement

The Medicaid rates for physicians and certain other practitioners are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8085. The current physician fee schedule is available at www.tmhp.com. See Section 3.1.1.1, "Physician Services in Outpatient Hospital Setting" on page 2-5.

Section 104 of the *Tax Equity and Fiscal Responsibility Act of 1982* (TEFRA) requires that Medicare/Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices. The limit is 60 percent of the Medicaid rate for the service furnished in physician offices. The following table identifies the services applicable to the 60 percent limitation when furnished in outpatient hospital settings:

Procedure Codes				
1-99201	1-99202	1-99203	1-99204	1-99205
1-99211	1-99212	1-99213	1-99214	1-99215
1-99281	1-99282	1-99283	1-99284	1-99285

These procedures are designated with note code "1" in the current physician fee schedule, which is available at www.tmhp.com. The following list shows the services excluded from the 60 percent limitation:

- Services furnished in rural health clinics (RHCs)
- Surgical services that are covered ambulatory surgical center/hospital-based ambulatory surgical center (ASC/HASC) services
- Anesthesiology and radiology services
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
    - Serious jeopardy to the client's health
    - Serious impairment to bodily functions
    - Serious dysfunction of any bodily organ or part

Because of TEFRA, Medicaid reimbursement for a payable nonemergency office service performed in the outpatient department of a hospital is limited to 60 percent of the

CPT only copyright 2005 American Medical Association. All rights reserved.

Medicaid rate for that service. If the condition qualifies as an emergency, the 60 percent professional service reimbursement limit does not apply.

Note: *STAR, STAR+PLUS, and NorthSTAR programs may follow a different reimbursement methodology. Providers should check each plan's reimbursement policies.*

Refer to: "Reimbursement" on page 2-2 for more information.

"Anesthesia" on page 36-24 for information on anesthesia services that are reimbursed according to relative value units.

"TMHP Website" on page 3-2 for more information on obtaining fee schedules.

36.2.1 Supplies, Trays, and Drugs

Payment to physicians for supplies is not allowed under the Texas Medicaid Program. All supplies, including anesthetizing agents such as Xylocaine, inhalants, surgical trays, or dressings are included in the surgical payment on the day of surgery when the surgery is performed in the office or home setting.

Reimbursement for office visits includes overhead for supplies. If physicians bill separately for any of these items, they are denied as included in the surgical fee. If billed in any other place of service (POS), these supplies are denied as services that must be billed by the hospital, or as services that are included in nursing facility charges.

Silver nitrate applicators, used to treat granulated tissue around gastrostomy tubes and tracheostomies, are considered part of the office/hospital visit. Silver nitrate applicators are not a covered benefit for home use.

36.2.2 Prior Authorization

Prior authorization may be required on several Medicaid benefits. For more information, call the TMHP Contact Center at 1-800-925-9126 with questions.

36.3 Benefits and Limitations

The Administrative Simplification provisions of the *Health Insurance Portability and Accountability Act* (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) *Current Procedural Terminology* (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific code that matches the services provided based on the code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management (E/M) services. The medical record must document the specific elements necessary to satisfy the criteria for the level of services as described in CPT. Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

To receive reimbursement, providers must document the service, the date rendered, pertinent information about the client's condition supporting the need for service, and the care given in the client's medical record.

Important: *If a provider bills for an office visit, documentation must appear in the client's medical record for that date of service (DOS).*

36.3.1 Supervision

Physician services include those reasonable and medically necessary services ordered and performed by physicians or under physicians' personal supervision that are within the scope of practice of their profession as defined by state law. For each encounter, unless an explicit exception is provided, the teaching/supervising physician must:

- Examine the patient.
- Confirm or revise the diagnosis of record.
- Confirm or revise a plan of care.
- Document these tasks in the appropriate medical records for the client before submitting claims.

If such documentation is not present in the appropriate medical record, then any payment made may be recouped. The services are covered if provided in the office, client's home, hospital, nursing facility, or elsewhere.

To be payable by Medicaid, physician services must be performed by the teaching or supervising physician personally, or the person to whom the physician has delegated responsibility. The following describes the level of supervision required may be direct or personal.

Indicate services provided by a physician assistant (PA) and/or an advanced practice nurse (APN) being billed as physician or facility services with the modifiers U7 and SA. The use of modifiers identifies if a PA or an APN performed the service.

36.3.1.1 Definition

Administrative Supervision

The supervision of a PA or an APN must be delivered according to protocols developed jointly with the physician and must be in accordance with the scope of practice and state law governing PAs and APNs. Personal supervision is no longer required.

Resident Physician

The physician is enrolled in good standing in an accredited graduate medical education (GME) program and possesses all appropriate licensure.

CPT only copyright 2005 American Medical Association. All rights reserved.

Teaching Attending Physician and Resident Physician

The roles of the teaching attending physician and resident physician occur in the context of an accredited GME training program.

This policy pertains to the prerequisites necessary for consideration of reimbursement when the teaching attending physician submits claims for Medicaid-covered services that were performed, in whole or in part, by the resident physician. For the purposes of this policy, *attending physician* means the Medicaid-enrolled physician who is professionally responsible for the particular services that were provided and are being claimed. Reimbursement may be reduced, denied or recouped if compliance with the criteria of this policy is not documented in the medical record.

In all cases, the medical record must clearly document that the teaching attending physician provided identifiable supervision of the resident. As defined below, that supervision must be direct, personal or on-call, depending upon the setting and the clinical circumstances. When not otherwise feasible to provide during the normally scheduled medical service operations of the GME program, the needed level of supervision must be available *on-call*, as defined below.

Personal supervision means that the teaching attending physician must be in the building of the office or facility when and where the service is provided.

Direct supervision means that the teaching attending physician must be physically present in the room when and where the service is being provided.

The teaching attending physician must provide direct supervision during all medically complex situations, dangerous procedures, or major surgery. A service or procedure is complex or dangerous if deviation from the expected technique at the time the procedure or service is performed presents a medically reasonable and immediate risk to the patient's life or health. This criterion applies regardless of the place or setting of care.

The teaching attending physician must provide medically appropriate, identifiable personal or on-call supervision for all other services that do not require direct supervision.

On-call means the teaching attending physician is able to provide the appropriate level of personal or direct resident supervision on a prompt, seamless, 24 hours per day, and 7 days per week basis.

Services Provided In An Outpatient Setting

For services provided in an outpatient setting, the teaching attending physician must demonstrate and document that personal and identifiable direction was provided by:

- Reviewing the patient's history and physical examination;
- Confirming or revising the patient's diagnosis;
- Determining the course of treatment to be followed;
- Ensuring that any supervision needed by the interns or residents is provided, and;
- Making appropriate documentation in the patient's medical record of the tasks identified in paragraphs (1)–(4) of this subsection before submitting the claim for payment to the department or its designee. The documentation is made in the same manner as required by federal regulations under Medicare.

Exception for Evaluation & Management Services Furnished in Certain Primary Care Centers

Teaching attending physicians that meet the primary care exception under Medicare, are allowed to bill for low-level and mid-level E/M services for residents. Facilities that meet the primary care exception under Medicare, can bill the Texas Medicaid Program, Family Planning, or the Children with Special Health Care Needs (CSHCN) Services Program for:

- New patient services procedure codes: 1-99201, 1-99202, and 1-99203
- Established patient services: 1-99211, 1-99212, and 1-99213

Note: *All services provided in an outpatient setting that do not qualify for the exception above require that the attending teaching physician personally examine the patient.*

Services Provided In An Inpatient Setting

For services provided in an inpatient setting, the teaching attending physician must demonstrate and document that medically appropriate identifiable personal or direct supervision was provided by:

- Reviewing the patient's history and physical examination and personally examining the patient within a reasonable period of time after the patient's admission and before the patient's discharge;
- Confirming or revising the patient's diagnosis;
- Determining the course of treatment to be followed;
- Ensuring that any supervision needed by the interns or residents is provided; and
- Making appropriate documentation in the patient's medical record of the tasks identified in paragraphs (1)–(4) of this subsection before submitting the claim for payment to the department or its designee. The documentation is made in the same manner as required by federal regulations under Medicare.

Surgical Services and Procedures

The teaching attending surgeon is responsible for the beneficiary's preoperative, operative, and postoperative care. The teaching attending physician must demonstrate that personal and identifiable supervision was provided by:

- Reviewing the patient's history and physical examination by personally examining the patient within a reasonable period of time after the patient's inpatient admission and before the patient's discharge, and by examining the patient during all outpatient encounters;
- Confirming or revising the client's diagnosis;
- Determining the course of treatment to be followed;

CPT only copyright 2005 American Medical Association. All rights reserved.

- Ensuring that any supervision needed by the interns or residents is provided; and
- Making appropriate documentation of the above tasks in the patient's medical record before submitting the claim for payment to the department.

Documentation

The teaching attending physician must document his presence and participation in the major surgical or other complex and dangerous procedure or situation.

36.3.1.2 Benefit Limitations

Effective for dates of service on or after September 1, 2003, the following outpatient professional E/M services changes are in place:

- Procedure code 5-94760 is denied as part of another procedure when billed on the same day by the same provider as an office (1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215) or outpatient consultation visit (3-99241, 3-99242, 3-99243, 3-99244, or 3-99245).
- Procedure codes 1-99050 and 1-99056 are reimbursed only once per day when billed by the same provider.
- Procedure codes 1-99354 and 1-99355 are denied within precare days when billed by the same provider.
- Procedure codes 1-99354 and 1-99355 are denied within extended postcare days with a related diagnosis when billed by the same provider.
- Procedure codes 1-99354 and 1-99355 are denied with 90 days of surgery for a related diagnosis when billed by a different provider unless billed with modifier 55.
- Procedure codes 1-99050, 1-99056, 1-99354, and 1-99355 are denied within six weeks following surgery for the same diagnosis when billed by the same provider.
- Procedure codes 1-99050, 1-99056, 1-99354, and 1-99355 are denied within six weeks following anesthesia service for a related diagnosis billed by the same provider.

36.3.2 Substitute Physician

Physicians may bill for the service of a substitute physician who sees clients in the billing physician's practice under either an informal arrangement of less than 14 days or a formal renewable arrangement of up to 90 days.

The name, address, and Medicaid provider identifier in Block 33 of the claim form must be the billing provider's, not the substituting physician's.

The substitute physician is not required to enroll with Medicaid. The substitute physician's name and address must be documented on the claim.

When a physician bills for a substitute physician, the modifier Q5 or Q6 must follow the procedure code in Block 24D for services provided by the substitute physician.

When physicians in a group practice bill substitute physician services, the performing provider identifier of the physician for whom the substitute provided services must be in Block 24K.

36.3.3 Physician Assistants (PAs)

PAs are eligible to enroll and bill as individual providers for services provided with dates of service on or after July 1, 2006. Enrollment as an individual provider is not mandatory.

Refer to: "Physician Assistant (PA)" on page 37-1, for additional information.

PAs currently treating clients and billing under the supervising physician's number can continue this billing arrangement. Effective for dates of service on or after March 1, 1999, the Texas Medicaid Program will reimburse Medicaid-enrolled physicians or RHCs for services performed by the PA without the physician's personal supervision. These services must be billed using the physician's or RHC's provider identifier. The PA services must be delivered according to protocols developed jointly within the scope of practice and state law governing PAs.

Note: *Personal supervision previously required that the physician be in the building or facility when and where the service is provided; however, with the March 1, 1999, revision, the supervising physician is no longer required to be in the building at the time services are performed.*

Services performed by a PA and billed under a physician's or RHC's provider identifier are reimbursed according to the Texas Medicaid Reimbursement Methodology (TMRM) for physician services. Services provided to Medicaid clients must be documented in the client's medical record to include:

- Services provided
- DOS
- Pertinent information about the client's condition supporting the need for service
- The individual practitioner of the service

Effective on or after December 1, 2002, services provided by a PA being billed as physician or facility services should be indicated with modifier U7, Medicaid level of care 7, as defined by each state (PA services for other than assistant-at-surgery).

The use of modifiers will identify if a PA performed the service.

Claims Information

Claims must be filed to the Texas Medicaid Program according to the policies and procedures described in this manual. Services provided by a PA must be submitted with the modifier U7.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.3.4 Visits

36.3.4.1 Claims Filing Deadlines

Claims submitted to TMHP by physicians for services provided during an inpatient hospital stay must be received by TMHP within 95 days from *each* date of service, *not 95 days from the discharge date.*

Reminder: *Inpatient claims must indicate the facility's nine-digit provider identifier in Block 32 or in the appropriate field of electronic software.*

36.3.4.2 Concurrent Hospital Care

Concurrent hospital care is defined as daily hospital care of a client provided and billed by more than one physician (regardless of specialty). Concurrent care is payable if the client's condition indicates the need for continuing care of more than one physician. Generally, concurrent care is appropriate when major multiple organ failure requires the skills of different specialties concurrently on a daily basis to manage the client to a successful outcome.

Important: *Diagnoses are considered related when the first three digits match the primary International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) diagnosis code.*

Claims for concurrent care are denied when billed by the same or different specialties for the same or related diagnoses. Claims denied for concurrent care are considered on an appeal basis when accompanied by documentation of medical necessity.

Each appeal submitted for concurrent care must contain the following information:

- Explanation of the medical necessity for the services of physicians providing care and treatment
- Diagnosis and an indication of the severity of the client's condition; whether the condition is acute or critical
- Physician's role in the care of the client including the name of the admitting physician
- Specialty and/or subspecialty of each physician and any limitations of practice

Claims appealed without clear documentation of medical necessity as described above are denied.

Important: *If the attending physician requests only a consultation, the request must be clearly stated in the orders.*

All concurrent care is subject to retrospective review. Documentation of medical necessity for concurrent care must be retained by the physician as required by federal law and should include, but is not limited to, documentation of:

- The orders for concurrent care or valid reasons for the request by the attending physician
- The name of the requesting physician by the physician rendering concurrent care

36.3.4.3 Consultations

A *consultation* is defined as rendering an opinion or advice for diagnosis and/or treatment of a client. Office or other outpatient consultations (3-99241, 3-99242, 3-99243, 3-99244, or 3-99245) are payable in the office, (POS 1) or outpatient (POS 5) setting (including emergency department) only. Office or outpatient consultations are limited to one consultation per provider, per client, per six-month period. All other consultations during this period are changed to the appropriate outpatient or office visit code. Claims for consultation services must indicate the referring physician in Block 17 or 17a.

The following information from the attending physician must be documented in the client's medical record and communicated to the requesting physician:

- The request for consultation
- The need for a consultation
- The consultant's opinion
- Any ordered services

Inpatient consultations are provided to hospital inpatients or residents of nursing facilities, and are payable in hospital and nursing facilities (POS 3, 4, or 8) only.

If an emergency department visit and a consultation are billed for the same client by the same physician on the same day, the emergency department visit is paid and the consultation is denied.

Consultations provided to hospital inpatients, residents of nursing facilities, or patients in a partial hospital setting are billed using the following procedure codes:

Procedure Codes		
1-99251	1-99252	1-99253
1-99254	1-99255	

Any E/M visit billed with any consultation on the same day by the same provider is denied with explanation of benefit (EOB) 00117. This procedure is part of another procedure billed on the same day.

An initial psychiatric examination performed within 30 days of any consultation by the same provider is changed to a subsequent consultation (3-99241), regardless of the diagnosis.

Refer to: "Surgeons and Surgery" on page 36-327 for information about consultations and the global fee concept.

36.3.4.4 Home Services

Home services are those services that are provided in a private residence. Providers may utilize the following procedure codes when billing for these services:

New Patient Visits

Procedure Codes		
1-99341	1-99342	1-99343
1-99344	1-99345	

CPT only copyright 2005 American Medical Association. All rights reserved.

Established Visits

Procedure Codes		
1-99347	1-99348	1-99349
1-99350		

New patient visits are limited to one code per day, per provider and will be denied if billed on the same day by the same provider as procedures 1-99281, 1-99282, 1-99283, 1-99284, or 1-99285.

Established patient visits will be denied if billed on the same day by the same provider as a new patient visit.

36.3.4.5 Hospital-Based Emergency Department

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to patients who require immediate medical attention. The facility must be available to provide services 24 hours per day, 7 days a week.

According to federal legislation (*Emergency Medical Transportation and Labor Act*), if any individual arrives at the hospital emergency department requesting an examination or treatment, the hospital must provide an appropriate medical screening examination within the capability of the hospital's emergency department, including ancillary services routinely available to the emergency department, to determine whether an emergency medical condition exists. The following definitions were developed to be consistent with the CMS:

- *Antidumping Statute.* A hospital must provide to any person who seeks emergency services an appropriate medical screening examination sufficient to determine whether he or she has an emergency medical condition.
- *Emergency Behavioral Health Condition.* Any condition, without regard to the nature or cause of the condition which, in the opinion of a prudent layperson possessing an average knowledge of health and medicine, requires immediate intervention and/or medical attention without which the patient would present an immediate danger to himself or others or that renders the patient incapable of controlling, knowing, or understanding the consequences of his or her actions.
- *Emergency Medical Condition.* A medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect that in the absence of immediate medical care could result in one of the following circumstances:
    - Placing the patient's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
    - Causing serious impairment to bodily functions
    - Causing serious dysfunction of any bodily organ or part
- *Emergency Services.* Covered hospital-based emergency department services needed to evaluate or stabilize an emergency medical condition and/or emergency behavioral health condition.
- *Medical Screening Examination.* The process required to determine, with reasonable clinical confidence, that an emergency medical condition or an emergency behavioral health condition exists. Depending on the patient's presenting symptoms, the medical screening examination ranges from a brief history and physical examination to performing ancillary studies and procedures (such as, but not limited to, lumbar punctures, clinical laboratory tests, and computer-aided tomography [CT] scans). A medical screening examination is not an isolated event, it is an ongoing process. The medical records must reflect continued monitoring according to the patient's needs and must continue until he is stabilized or appropriately transferred. There should be evidence of whether the patient is stable or unstable.
- *No Prior Authorization Before Screening or Stabilization.* It is not appropriate for a hospital to request or a health plan to require prior authorization before the patient has received a medical screening examination to determine the presence or absence of an emergency medical condition or before the patient's emergency condition is stabilized.
- *Post-Stabilization Services.* In the case of an emergency medical condition or emergency behavioral health condition, post-stabilization services begin once the patient has been determined stable by the emergency department physician or discharged, transferred, or admitted to the hospital.
- *Prudent Layperson Definition of an Emergency.* A person presenting himself or herself as an emergency onsite in an emergency department, could reasonably expect that the absence of immediate medical attention would result in placing his or her health in serious jeopardy, serious impairment to body functions, or serious dysfunction of any bodily organ or part.
- *Routine Condition.* A health condition, including a behavioral health situation, that can be addressed by a routine office visit within the next several days.
- *Stabilization Services.* In the case of an emergency medical condition or an emergency behavioral health condition, to stabilize is to provide medical services to assure within reasonable medical probability that no deterioration of the condition is likely to result from or occur during discharge, transfer, or admission of the patient from the emergency department.
- *Triage.* The evaluation, by a nurse(s), of people presenting for health care to a medical facility that allows treatment of the most serious cases first.
- *Urgent Behavioral Health Situations.* Conditions that require attention and assessment within 24 hours but that do not place the patient in immediate danger to themselves or others, and the patient is able to cooperate with treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

- *Urgent Condition.* A health condition, including an urgent behavioral health situation, that is not an emergency but is severe or painful enough to cause a prudent layperson possessing the average knowledge of medicine to believe the patient's condition requires medical treatment, evaluation, or treatment within 24 hours by a physician to prevent serious deterioration of the patient's condition or health.

Hospital-based emergency department services are divided as:

- Emergency department services by physicians
- Emergency department services by facilities (room and ancillary)

Refer to: "Hospital (Medical/Surgical Acute Care Facility)" on page 25-1.

Emergency department attending physicians may use procedure codes 1-99281, 1-99282, 1-99283, 1-99284, or 1-99285 when billing for services provided in the hospital-based emergency department (POS 5).

Office-based physicians may use procedure codes 1-99201, 1-99202, 1-99203, 1-99204, or 1-99205 for new patients, and procedure codes 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215 for established patients, when billing for services provided in the office or hospital-based emergency department (POS 5).

Office-based physicians may bill an additional charge (procedure codes 1-99050, 1-99056, or 1-99060) for providing services after routine office hours in the office or the hospital-based emergency department. This charge is in addition to the charge for the office visit or hospital-based emergency department visit, and should be billed separately.

Refer to: Section 36.3.4.7, "Services Outside of Business Hours" on page 36-15 for more information.

Additional charges for after hours (1-99050, 1-99056, or 1-99060) by *emergency department-based physicians or emergency department groups* are denied.

Consulting physicians may use procedure codes 3-99241, 3-99242, 3-99243, 3-99244, or 3-99245 when billing for services provided in the office or hospital-based emergency department (POS 5).

Consulting physicians may bill for critical care services (1-99291 or 1-99292) when provided in the hospital-based emergency department (POS 5). The quantity for procedure code 1-99292 must reflect the number of 30-minute units provided. If the number of units is not on the claim, a quantity of 1 is paid.

The facility may bill separately for the emergency department treatment room, minor surgery room, or observation room. The physician may bill separately for diagnostic procedures performed on the same day as a hospital-based emergency visit using the appropriate procedure codes from the CPT manual.

Emergency department visits are inclusive of components of a diagnostic examination such as a pelvic or rectal examination. These components should not be billed with an unlisted procedure code in addition to the procedure code for the visit. These components are considered part of the examination and no separate reimbursement is provided.

Multiple emergency department visits on the same day, billed by the same provider, must have the times for each visit documented on separate forms, or more than one visit on the same day can be indicated by adding modifier 76 to the claim form.

Emergency department visits may be paid to different providers on the same day, when medically necessary, regardless of specialty and diagnosis.

Payment for an additional emergency department visit by an anesthesiologist following a surgical procedure is denied as part of the global anesthesia payment (base plus time). A distinct and separate diagnosis beyond the diagnosis for which the global anesthesia services were provided should be documented for payment to be considered.

If an emergency department visit is billed on the same day as an initial hospital visit by the same provider, the emergency department visit is denied. Providers may submit documentation of medical necessity on an appeal basis.

If an emergency department visit or an emergency department visit after-hours charge is billed together with a consultation or critical care service on the same day, by the same provider, then the emergency department visit and/or the emergency department visit after-hours charge is paid and the consultation/critical care service is denied.

Other services billed the same day as an emergency department visit (1-99281, 1-99282, 1-99283, 1-99284, or 1-99285), office visit (1-99201, 1-99202, 1-99203, 1-99204, or 1-99205), or consultation (3-99241, 3-99242, 3-99243, 3-99244, or 3-99245), such as 1-99058 and 1-92504, are denied as part of another procedure the same day.

Reimbursement for physicians in the emergency department is based on Section 104 of TEFRA. TEFRA requires that Medicaid limit reimbursement for those physicians' services furnished in hospital outpatient settings that also are ordinarily furnished in physician offices. The diagnoses list of emergent conditions is used to determine the appropriate reimbursement for these services. The reimbursement for each service is determined by establishing a charge base for each professional service and multiplying the charge base by 60 percent.

36.3.4.6 Hospital Visits

Nonintensive Care

Hospital visits are limited to one per day for the same provider. Prolonged physician service and physician standby service without face-to-face contact, procedure codes 1-99358, 1-99359, 1-99360, are not benefits of the Texas Medicaid Program.

CPT only copyright 2005 American Medical Association. All rights reserved.

Only one initial hospital care visit may be paid to the same provider within a 30-day period regardless of diagnosis. Additional hospital visits within the 30 days are paid as subsequent care visits.

Any visit, irrespective of the POS, billed on the same day by the same provider, as an initial hospital care code is denied. An initial hospital visit (1-99221, 1-99222, or 1-99223) or a subsequent hospital visit (1-99231, 99232, or 1-99233) may *not* be paid on the same day to the same provider as visits to the coronary care unit, intensive care unit, respiratory care unit, neonatal intensive care unit (NICU), or the emergency care facility.

An initial hospital care visit billed within three days of a new patient office, home, nursing facility, or skilled nursing facility (SNF) visit, for the same or similar diagnosis billed by the same provider, should be billed as a subsequent care visit.

Subsequent hospital visit codes (1-99231, 99232, or 1-99233) billed on the same day as hospital discharge day management (1-99234, 1-99235, 1-99236, 1-99238, or 1-99239) are denied as part of another procedure billed on the same day.

Subsequent daily hospital care is payable once per day, and if procedure code 1-99234, 1-99235, 1-99236, 1-99238, or 1-99239 is billed on the same day as a subsequent visit (1-99231, 99232, or 1-99233), the subsequent visit is denied.

Refer to: “Prolonged Physician Services” on page 36-17.

Critical Care

Critical care includes the care of critically ill patients who require constant attention of the physician. Critical care is usually given in a critical care area such as the coronary care unit, intensive care unit, respiratory care unit, or the emergency care facility.

Use procedure code 1-99291 for the first 30 to 74 minutes of critical care. Use procedure code 1-99292 for each additional 30 minutes beyond the first 74 minutes of critical care for up to six units (or three hours) per day. The quantity for procedure code 1-99292 must reflect the number of 30-minute units provided. If the number of units is not on the claim, a quantity of 1 is paid.

Critical care codes 1-99291 and 1-99292 are denied when billed by the same/different provider on the same day as neonatal intensive care codes 1-99295, 1-99296, 1-99298, 1-99299, or 1-99300.

Initial hospital visits (1-99221, 1-99222, or 1-99223), billed on the same day as critical care by the same provider, are reimbursed as a subsequent hospital visit (1-99231, 99232, or 1-99233).

Use subsequent hospital care codes (1-99231, 1-99232, or 1-99233) for services to a client who is not critically ill but is in the critical care unit.

The following procedures, when billed on the same day by the same provider, may be paid at full reimbursement in addition to critical care:

Procedure Codes		
2-31500	2-32000	2-32020
2-36620	2-92950	2-92960

The following services are denied as part of another procedure when billed on the same day as hospital critical care codes 1-99291, 1-99292, 1-99354, 1-99355, 1-99356, 1-99357, or 1-99440 by the same provider:

Procedure Codes		
2-36000	2-36410	2-36600
I-71010	I-71020	1-91105
5-93561	5-93562	

Neonatal Intensive Care

Neonatal intensive care should be billed using procedure code 1-99295 for the initial day of neonatal intensive care, irrespective of the time the physician spends with the critically ill neonate or infant that is 30 days of age or less. Procedure code 1-99296 should be billed for subsequent neonatal critical care per day, irrespective of the time that the physician spends with the critically ill neonate or infant that is 30 days of age or less. Procedure codes 1-99298,1-99299, or 1-99300 should be billed for subsequent neonatal intensive care per day, irrespective of the time that the physician spends with the critically ill neonate or infant, as appropriate for the present body weight and intensity of service required by the neonate or infant.

Procedure codes 1-99295, 1-99296, 1-99298, 1-99299, and 1-99300 are limited to one code for payment per day, per provider. Procedure codes 1-99299 and 1-99300 will be denied if billed on the same day by the same provider as procedure codes 1-99295 or 1-99296.

Physicians who provide care to high-risk newborns should use procedure code 1-99440. Initial hospital care codes (1-99221, 1-99222, or 1-99223) billed in addition to 1-99440 on the same day, by the same provider, are reimbursed as a subsequent care code (1-99231, 1-99232, or 1-99233). If the anesthesiologist is required to resuscitate the baby at the same time he or she administers anesthesia for the mother, he or she is to be paid for both services. Newborn resuscitation must be billed only on the baby’s claim.

Prolonged physician service (1-99354, 1-99355, 1-99356, or 1-99357) may be paid when billed on the same day as initial neonatal intensive care (1-99295). Resuscitation of newborn (1-99440) and prolonged physician service (1-99354, 1-99355, 1-99356, or 1-99357) are denied when billed on the same day as neonatal intensive care (1-99291 and 1-99292) by the same provider.

CPT only copyright 2005 American Medical Association. All rights reserved.

When billed on the same day by the same provider, the following procedures may be paid at full reimbursement in addition to neonatal intensive care:

Procedure Codes		
2-32000	2-32020	2-36450
2-36455	2-49080	2-49081
2-61000	2-61001	

Services that deny as part of the neonatal intensive care visit include, but are not limited to, the following procedure codes:

Procedure Codes		
2-31500	2-31502	2-31720
2-31730	2-36400	2-36405
2-36406	2-36420	2-36430
2-36440	2-36510	2-36620
2-36625	2-36640	2-36660
2-51000	2-51005	2-51010
2-62270	2-62272	1-90760
1-94640	1-94656	1-94657
1-S9364	1-S9365	1-S9366
1-S9367	1-S9368	

Pediatric critical care should be used by the physician who provides care to the critically ill pediatric client using procedure codes 1-99293, 1-99294, and 1-99299.

36.3.4.7 Services Outside of Business Hours

Texas Medicaid limits reimbursement to office-based providers providing services after routine hours in the office or emergency department.

An office-based provider may bill a charge in addition to an office or consultation visit for providing services after routine office hours. A provider's routine office hours are those hours posted at the physician's office as the usual office hours. Provider billing practices are reviewed routinely for the appropriate use of these codes. Misuse results in recoupment and/or other administrative sanctions.

Important: *Inconvenience charges are paid in addition to the appropriate E/M visit code in the office (POS 1) or the emergency room (POS 5). Inconvenience charges are not paid in any other POS (for example, inpatient hospital, SNF, or nursing facility [NF]).*

Medicaid reimburses *office-based* physicians an inconvenience charge or after-hours charge when either of the following conditions exists:

- The physician leaves the office or home to see a client in the emergency room
- The physician leaves the home and returns to the office to see a client after the physician's routine office hours
- The physician is interrupted from routine office hours to attend to another client's emergency outside of the office

Use the following procedure codes when billing an inconvenience fee for services in the office (POS 1) or emergency room (POS 5):

Procedure Codes		
1-99050	1-99056	1-99060
The codes listed above are subject to the pre- and post-care global surgical fee limitations. **These codes are denied in addition to hospital or observation room visits.**		

Additional charges for after hours (1-99050, 1-99056, or 1-99560) by *emergency department-based physicians or emergency department groups* are denied.

36.3.4.8 Inpatient Hospital Visits

Refer to: "Hospital Visits" on page 36-13.

36.3.4.9 New Patient Visits

A new patient is defined as a patient who is new to the physician's practice and whose medical and administrative records need to be established. An established patient is defined as a patient whose medical and administrative records are available to the physician.

Refer to: "Texas Health Steps (THSteps)" on page 43-1 for information on checkup visits for clients younger than 21 years of age.

A new patient visit is limited to one every two years, per patient, per provider. A new patient visit in the office (POS 1), home (POS 2), or nursing facility (POS 8) is reimbursed as an established patient visit if history shows that the same physician has furnished a medical service (Type of Service [TOS] 1, excluding routine newborn care and the lab handling fee), a surgical service (TOS 2), or a consultation (TOS 3) within two years. Services coded as new patient visits in excess of this limitation are changed and reimbursed as follows:

If billed as:	Change to:
1-99201 (office)	1-99211
1-99202 (office)	1-99212
1-99203 (office)	1-99213
1-99204 (office)	1-99214

Established patient visits billed on the same day as a new patient visit in POS 1, 2, and 8, by the same provider, for any diagnosis, are denied as part of another procedure on the same day. Established patient care visits are also limited to one per day for the same provider regardless of diagnosis.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.3.4.10 Observation Room Services and Discharge Day Management

Physician outpatient hospital observation room services are professional services provided for a period of more than six hours but less than 24 hours, regardless of the hour of the initial contact, and regardless of whether or not the patient remains under physician care past midnight.

Reminder: *Physicians may bill codes 1-99218, 1-99219, or 1-99220 for the outpatient observation period of less than 24 hours.*

Emergency department visits (1-99281, 1-99282, 1-99283, 1-99284, or 1-99285) and emergency department/office additional charges (1-99056 and 1-99060) are denied the same day as physician outpatient hospital observation room service (1-99218, 1-99219, or 1-99220), when billed by the same provider.

Physicians may use procedure code 1-99217 to report all services provided to patients on discharge from observation status if the discharge is other than the initial date of admission to observation. Procedure code 1-99217 is denied when billed on the same day as initial observation care (1-99218, 1-99219, or 1-99220), when billed by the same provider.

36.3.4.11 Observation Care Codes

The following limitations apply to procedure codes 1-99234, 1-99235, or 1-99236:

- If 1-99234, 1-99235, or 1-99236 are billed on the same day by the same provider as initial observation care codes (1-99218, 1-99219, or 1-99220), procedure codes 1-99234, 1-99235, or 1-99236 are denied.
- If a hospital admission (1-99221, 1-99222, or 1-99223) is billed on the same day by the same provider as outpatient hospital observation (1-99234, 1-99235, or 1-99236), the observation is denied.
- If 1-99234, 1-99235, or 1-99236 are billed on the same day as a subsequent hospital visit (1-99231, 1-99232, or 1-99233), the subsequent visit is denied.
- If 1-99234, 1-99235, or 1-99236 are billed on the same day by the same provider as a consultation, the consultation is denied.
- Code 1-99217 is not payable on the same day as codes 1-99234, 1-99235, 1-99236, 1-99238, or 1-99239.
- Codes 1-99234, 1-99235, or 1-99236 are subject to the global surgical fee pre- and post-care days assigned to certain surgical procedures.

Refer to: "Inpatient Hospital Visits" on page 36-15 for more information.

36.3.4.12 Initial Visits

Physicians may use procedure codes 1-99201, 1-99202, 1-99203, 1-99204, or 1-99205 when billing for new patient services provided in the office (POS 1), or in an outpatient or other ambulatory facility (POS 5).

Established Visits

Physicians may use procedure codes 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215 when billing for established patient services provided in the office (POS 1), or in an outpatient or other ambulatory facility (POS 5).

Preventive Care Visits

With adequate documentation, a preventive care visit may be billed on the same day, by the same provider, as an office or outpatient consultation visit. For example, a physician sees a child for a THSteps visit and the child is wheezing.

Office/Outpatient Consultation Visits

Physicians may use procedure codes 3-99241, 3-99242, 3-99243, 3-99244, or 3-99245 when billing for new or established patient consultation provided in the office (POS 1), or in an outpatient or other ambulatory facility (POS 5).

Procedure codes 1-92504, 5-94760, and 1-99058 are denied as part of another procedure when billed on the same day, by the same provider, using the following codes as an office visit or as an outpatient consultation:

Office Visits

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215		

Outpatient Consultation

Procedure Codes		
3-99241	3-99242	3-99243
3-99244	3-99245	

Prolonged Physician Service Visits

Prolonged physician services provided in the office (POS 1) or in an outpatient setting (POS 5) involving direct (face-to-face) patient contact, that is beyond the usual service, may be paid on the same day as an E/M visit using the following procedure codes:

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215	3-99241	3-99242
3-99243	3-99244	3-99245

Use procedure code 1-99354 to report the *first hour* of prolonged service; it is *limited to one per day*.

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure code 1-99354 may be used to report a total duration of prolonged service of 30–60 minutes on a given date. Prolonged service of less than 30 minutes of total duration is not separately reported.

Use procedure code 1-99355 to report *each additional 30 minutes; it is limited to a quantity of three* units or 1.5 hours per day.

Prolonged service of less than 15 minutes beyond the first hour, or less than 15 minutes beyond the final 30 minutes is not reported separately.

36.3.4.13 Outpatient Professional Evaluation and Management Services

Outpatient services are defined as conditions, including routine, urgent, or emergent, that are evaluated and managed at physicians' offices, freestanding emergency centers, hospital outpatient clinics, or multispecialty clinics.

These are locations other than hospital-based emergency departments and, therefore, are not governed by hospital antidumping legislation.

Outpatient Professional Evaluation and Management Services Limitations

Office visits are limited to one per day for the same provider, regardless of diagnosis, using the following procedure codes:

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215		

If an office visit (1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215) is billed on the same day, by the same physician as a minor procedure, the office visit is paid and the minor procedure is denied, if the following office visit procedure codes are used:

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215		

If an office visit (1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215) is billed on the same day, by the same physician as a more extensive procedure, the procedure is paid and the office visit is denied, if the following office visit procedure codes are used:

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215		

If an initial hospital visit following admission is billed on the same day by the same provider as an emergency department visit (1-99281, 1-99282, 1-99283, 1-99284, or 1-99285), office visit (1-99201 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215), or outpatient consultation (3-99241, 3-99242, 3-99243, 3-99244, or 3-99245), the initial hospital visit is paid and the other visits are denied.

After-hours visits (1-99050, 1-99056, or 1-99060) are reimbursed only once per day when billed by the same provider.

36.3.4.14 Prolonged Physician Services

Physicians may bill for prolonged physician services when a patient requires the presence of the physician. When billing for prolonged physician services, the following procedure codes should be billed:

- Procedure codes 1-99354, 1-99355, 1-99356, or 1-99357 are reported when a physician provides prolonged service involving direct (face-to-face) patient contact beyond the usual service in the appropriate office, outpatient, or inpatient setting.
- Procedure codes 1-99354 and 1-99356 must be used to report the first hour of prolonged service and are limited to one per day. Either code may be used to report a total duration of prolonged service of 30–60 minutes on a given date. Prolonged service of less than 30 minutes total duration is not separately reported.
- Procedure codes 1-99355 and 1-99357 are used to report each additional 30 minutes and are limited to three units or 1.5 hours per day. Prolonged services of less than 15 minutes duration should not be reported separately.
- Procedure codes 1-99354 or 1-99355 are limited to the office (POS 1) and outpatient (POS 5) settings. E/M services performed in the office (1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, or 1-99215) may be reported in addition to prolonged physician services.
- Physician outpatient hospital observation (1-99217, 1-99218, 1-99219, 1-99220, 1-99234, 1-99235, or 1-99236) billed on the same day as a prolonged service (1-99354 or 1-99355) by the same provider is denied as part of another procedure on the same day. Prolonged physician services billed on the same day, same provider, as critical care (1-99291 and 1-99292) are denied.
- Procedure codes 1-99356 and 1-99357 are limited to the inpatient (POS 3) setting. Prolonged service may be paid on the same day as an initial hospital visit (1-99221, 1-99222, or 1-99223), subsequent hospital visit (1-99231, 1-99232, or 1-99233), or initial

CPT only copyright 2005 American Medical Association. All rights reserved.

neonatal intensive care visit (1-99295) when the physician is present for the delivery or newborn resuscitation is required.

- Prolonged services and resuscitation of newborn (1-99440) are denied when billed on the same day as subsequent neonatal intensive care (1-99296, 1-99298, or 1-99299) by the same provider. Procedure codes 1-99356 and 1-99357 are denied when billed on the same day as critical care services (1-99291 or 1-99292) by the same provider.

Prolonged physician service *without* direct (face-to-face) patient contact (1-99358 or 1-99359) and physician standby service (1-99360) are not benefits of the Texas Medicaid Program.

36.3.4.15 Referrals

A *referral* is defined as the transfer of the total or specific care of a patient from one physician to another and does not constitute a consultation. These services should be billed using the appropriate E/M visit code.

When a Medicaid provider refers a Medicaid client to another provider for additional treatment or services, the provider must forward notification of the client's eligibility and nine-digit provider identifier. The referred provider must advise the client whether the provider accepts Medicaid. Some clients not eligible for Medicaid are eligible for family planning through Titles V and XX. These clients should be referred to contracted agency providers for family planning services.

Referral Requirements for Children with Disabilities

All health care professionals are required by state and federal legislation to refer children younger than 3 years of age with developmental delays to early childhood intervention services provided under the authority of the Department of Assistive and Rehabilitative Services (DARS). Referrals must take place within two business days of identifying a delay in development.

DARS is a coordinated system of services available in every Texas county for children from birth to 3 years of age with developmental delays. DARS has served more than 27,000 children younger than 3 years of age through 70 local programs.

Referrals may be based on professional judgment or a family's concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

On referral, DARS programs determine eligibility based on screening and assessments. Children are eligible if they meet at least one of the following criteria:

- A delay in one or more areas of development
- *Atypical development*. Children who perform within their appropriate age range on test instruments, but whose patterns of development are different from their peers
- *A medically diagnosed condition*. Children who have a medically diagnosed condition with a high probability of resulting in developmental delay

Families and professionals work together to plan appropriate services based on the unique needs of the child and the child's family.

Services that are provided at no cost to families may include:

- Physical, occupational, speech, and language therapy
- Service coordination
- Vision services
- Special instruction
- Nutrition services
- Family counseling and education
- Assistive technology (service and devices)

Providers can refer families for services by calling the local DARS program or the statewide DARS Care Line at 1-800-250-2246. Providers can also obtain brochures or more information by calling the DARS Care Line or visiting the DARS website at www.dars.state.tx.us.

36.3.5 Physician Services in a Long Term Care (LTC) Nursing Facility

The Department of Aging and Disability Services (DADS) requires initial certification and recertification of Medicaid clients in nursing facilities by physicians in accordance with guidelines set forth in federal regulations. Physician visits for certification and recertification are considered medically necessary, and are reimbursable by Medicaid whether performed in the physician's office or the nursing facility.

The *Omnibus Budget Reconciliation Act* (OBRA) of 1987 included legislation on Preadmission Screening and Resident Review (PASARR). PASARR requires that *all admissions to a Medicaid-certified distinct part of a nursing facility* be screened for mental illness, mental retardation, or a related condition. This screening prevents inappropriate placement of clients in Medicaid-certified nursing facility beds.

DADS uses the Client Assessment Review and Evaluation (CARE) Form 3652-A to satisfy PASARR screening requirements. All individuals must have a preadmission screening completed before admission to the nursing facility. The screening is performed by the hospital or the nursing facility completing a CARE Form 3652-A with a purpose code *P*. Individuals whose CARE Forms have a *Y* checked in Item 34 must have a Level II screening conducted by DADS.

Physicians and hospitals may obtain written instructions on the completion and processing of the CARE form by visiting the following website at www.dads.state.tx.us/handbooks/instr/3000/F3652-A/.

If the attending physician delegates health care tasks to a qualified PA in an intermediate care/SNF, the physician services are covered if the supervision or delegation is consistent with the Texas Medical Board's rules and regulations. Services provided by PAs in intermediate care/skilled nursing facilities must be consistent with the

CPT only copyright 2005 American Medical Association. All rights reserved.

requirements of DADS agency rules [§§16.1906, 16.1912, 16.3017(c), and 16.3207(a)] as they relate to operating policies and procedures, client-patient care policies, conformance with physician orders, and drug orders. If the supervision of the delegated task is not appropriately documented in the patient's chart, any payment for services may be recouped.

Rehabilitation services (for example, physical therapy [PT], occupational therapy [OT], and speech-language pathology [SLP]) must be made available to nursing facility residents on an as-needed basis as ordered by the attending physician, and must be provided by the nursing facility staff or furnished by the facility through arrangements with outside qualified resources. Clients who need these services cannot be admitted to the nursing facility if the facility is unable to provide these services as needed. Payment for these services is included in the reimbursement made to the nursing facility; they may not be billed to TMHP. If these services cannot be furnished by the extended care facility, it is the facility's responsibility to provide transportation for the client to a provider to render these services. The Texas Medicaid Program must not be billed for the rehabilitation services or the transportation charges in these situations.

36.3.5.1 Long Term Care—Nursing Facilities Discharge Day Management

Procedure codes 1-99315 and 1-99316 are payable to physicians when discharging a client from a nursing home (POS 8) or specialized nursing home (POS 4). Codes 1-99315 and 1-99316 are not both payable on the same day, for the same client. If a subsequent nursing facility visit (code 1-99307, 1-99308, 1-99309, or 1-99310) is billed on the same day by the same provider as 1-99315 or 1-99316, the subsequent visit is denied. If 1-99315 or 1-99316 is billed on the same day by the same provider as an initial hospital care visit (codes 1-99221, 1-99222, or 1-99223), the nursing facility discharge day management is denied.

Physician visits to Medicaid patients confined in an extended care facility are not limited when they are seen for a diagnosis of illness or injury. The CMS-1500 claim form must document the medical necessity of the visit by listing the specific diagnosis in Block 21 or the appropriate electronic field.

36.3.5.2 Physician Nursing Facility Visits

The following visit codes are a benefit when performed in a nursing home or specialized nursing home setting:

Initial Care	Subsequent Care
1-99304	1-99307
1-99305	1-99308
1-99306	1-99309
	1-99310

In addition to the listed codes above, the following codes are also a benefit when performed in a nursing home or specialized nursing home setting:

Procedure Codes		
1-99318	1-99324	1-99325
1-99326	1-99327	1-99328
1-99335	1-99336	1-99337

Procedure codes 1-99339 and 1-99340 are a benefit when performed in the home, nursing home, or specialized nursing home setting.

Procedure codes 1-99304, 1-99305, and 1-99306 are limited to one every six months, per client, per provider. Other encounters billed on the same day as 1-99304, 1-99305, or 1-99306 are denied. Nursing facility visit codes are limited to one per day, regardless of diagnosis.

Procedure codes 1-99304, 1-99305, 1-99306, 1-99307, 1-99308, 1-99309, 1-99310, 1-99315, or 1-99316 billed on the same day as 1-99221, 1-99222, or 1-99223 by the same provider are denied as part of another procedure billed on the same day.

36.3.5.3 Telemedicine Services

Telemedicine is a reimbursable service of Texas Medicaid. Telemedicine is defined as a method of health care service delivery used to facilitate medical consultations by physicians to health care providers in rural or medically underserved areas (MUAs) for purposes of patient diagnosis or treatment that requires advanced telecommunications technologies, including interactive video consultation, teleradiology, and telepathology.

A *rural area* is defined as a county with a population of less than 50,000 people.

An *underserved area* is one that meets the definition of a MUA or medically underserved population (MUP) by the U.S. Department of Health and Human Services (HHS).

No separate reimbursement is made for the cost of telemedicine hardware and/or equipment, videotapes, and transmissions. Telephone conversations, chart reviews, email messages, and faxes alone do not constitute a telemedicine interactive video consultation and, therefore, are not reimbursed. Only those services that involve direct *face-to-face* interactive video communication with the client, remote, and hub site providers are reimbursed; unless the service may currently be reimbursed using telemedicine, without face-to-face contact, i.e., teleradiology and telepathology.

Telemedicine services are reimbursed only when provided through systems meeting minimum technical specification standards, as identified by the Texas Health and Human Services Commission (HHSC), such as those of the Telecommunications Infrastructure Fund Board (TIFB), or as otherwise authorized.

In both the traditional and managed care systems, THSteps (Early and Periodic Screening, Diagnosis, and Treatment [EPSDT]) visits will not be reimbursed if performed using telemedicine services. In the managed

CPT only copyright 2005 American Medical Association. All rights reserved.

care system, THSteps visits, well child checkups, and adult preventive visits will not be reimbursed if performed using telemedicine services. Care provided for abnormalities identified during these preventive health visits may be reimbursed if the care is provided by using telemedicine services.

Information about the diagnosis, evaluation, or treatment of a client with Medicaid coverage by a person licensed or certified to perform the diagnosis, evaluation, or treatment of drug abuse or any medical or emotional disorder is confidential information that the provider may disclose only to authorized people. Only the client may give written permission for release of any pertinent information before client information can be released, and confidentiality must be maintained in all other aspects. The signed consent form or documentation of consent for release of information is to become part of the medical records at the remote site.

Reimbursement for telemedicine services is made only when *both* the hub site provider and remote site provider are acceptable Medicaid provider types for telemedicine services.

Reimbursement for the telemedicine services is made only to the following Texas Medicaid enrolled primary care provider using the GT (telemedicine) modifier with the appropriate E/M code. RHCs and federally qualified health center (FQHC) providers must use encounter codes with modifiers AM (Physician), SA (APN/Certified nurse-midwives [CNM]), and U7 (PA) in addition to the GT modifier (refer to the following):

- Physicians (MDs/DOs)
- PA
- Nurse practitioner (NP)
- Clinical nurse specialist (CNS)
- CNM

Hub site providers are limited to:

- Physician (MD), provider type 20
- Physician (DO), provider type 19

Remote site providers are limited to:

- Physician (MD), provider type 20
- Physician (DO), provider type 19
- NP, CNS, PA, provider type 10
- CNM, provider type 33
- FQHC, provider type 46
- RHC, provider types 78 and 79

The Healthcare Common Procedure Coding System (HCPCS) modifier code GQ (via asynchronous telecommunications system) is not appropriate for the Texas Medicaid telemedicine program, and should not be used.

The remote and hub site providers are to be reimbursed for telemedicine services. Reimbursement for telemedicine services is made at current TMRM for CPT E/M codes and encounter rates for RHCs and FQHCs.

Providers billing for teleradiology and telepathology services are to use the appropriate CPT code and the modifier GT.

The use of these modifiers by providers certifies they have met the criteria set forth by HHSC and that they understand claims data may be monitored for program integrity and provider compliance. Visits, consultations, and encounters are reimbursed based on individual policy guidelines; for example, global fee policy, consultation policy, and so forth (including payable provider types and places of service [POS]). Office or outpatient consultations are limited to one consultation per six-month period, same provider. All other consultations during the period are changed to the appropriate outpatient or office E/M code.

Telemedicine services are reimbursable only in the following places of service:

- Practitioner's office (Hub site)
- Practitioner's office (Remote site)
- RHC
- FQHC
- Inpatient hospital
- Outpatient hospital
- Emergency room
- ICF-MR state schools

Nursing facilities, skilled nursing facilities, and client homes *are not* approved places of service.

Use of telemedicine services in ICF-MR state schools is subject to policies established by HHSC and DADS.

36.3.5.4 Hub Site Provider

A hub site provider must be a physician at an accredited medical or osteopathic school located in Texas, or a physician at one of the following entities affiliated through a written contract or agreement with an accredited medical or osteopathic school located in Texas:

- Hospitals
- Teaching hospitals
- Tertiary centers
- Health clinics

The hub site physician provides consultation and the diagnosis, as well as develops the patient's plan of care and treatment.

Hub site providers may be reimbursed only for consultations via interactive video using procedure codes 3-99241, 3-99242, 3-99243, 3-99244, 3-99245, 3-99251, 3-99252, 3-99253, 3-99254, or 3-99255 billed with the GT modifier.

The hub site physician's findings must be documented in writing in the client's medical records at the remote site. The client's medical records may be faxed to the remote site provider.

CPT only copyright 2005 American Medical Association. All rights reserved.

More than one medically necessary telemedicine consultation may be paid on the same day/time, same POS, if the consultations are billed by physicians of different specialties.

36.3.5.5 Remote Site Provider

Remote site providers must be primary care providers, such as physicians, PAs, NPs, CNSs, or CNMs, who provide visits/encounters in their offices, RHCs, or FQHCs and are able to bill the Texas Medicaid Program independently. Remote site providers must be located in rural or underserved areas. The remote site provider is responsible for carrying out or coordinating the plan of care and treatment after consulting with the hub site provider. Because the office visit or encounter must be through interactive video, the remote site provider must be present with the client during the performance of the interactive video telemedicine consultation. The signed consent form or documentation of consent for release of information must remain in the medical records at the remote site.

Remote site providers may be reimbursed for an office visit (POS 1) using codes 1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, 1-99215 or encounter code 1-T1015 (FQHC, RHC) in POS 1 or 5, as applicable.

FQHC and RHC telemedicine encounter providers must submit their claims using the following modifiers. Use modifier AM, U7, or SA *in the first modifier field* on the claim form together with the modifier GT *in the second field* on the claim form.

If prolonged physician services 1-99354, 1-99355 or special services 1-99050 are provided in addition to a telemedicine office visit (1-99201, 1-99202, 1-99203, 1-99204, 1-99205, 1-99211, 1-99212, 1-99213, 1-99214, 1-99215), these services should also be billed with modifier GT.

36.3.6 Orthognathic Surgery

Orthognathic surgery is a covered benefit only when it is necessary for medical reasons, or when it is necessary as part of an approved plan of care in the Texas Medicaid Dental Program.

Treatment of malocculsion is a benefit of the Texas Medicaid Dental Program. Orthognathic surgery is covered when it is necessary as part of an approved dental benefit.

Maxillary and/or mandibular facial skeletal deformities are associated with clearly abnormal masticatory malocclusion.

Orthognathic surgery may be considered medically necessary for the following client conditions:

- Producing signs or symptoms of masticatory dysfunction.
- Facial skeletal discrepancies associated with documented sleep apnea, airway defects, and soft tissue discrepancies.
- Facial skeletal discrepancies associated with documented speech impairments.
- Structural abnormalities of the jaws secondary to infection, trauma, neoplasia, or congenital anomalies.

Orthognathic surgery may be considered for reimbursement if the surgical service is required in order for the client to access a dental service.

Orthognathic surgery is administered and reimbursed as part of the medical/surgical benefit of Texas Medicaid and not as part of the Texas Medicaid Dental Program.

Orthognathic surgery that is done primarily to improve appearance and not for reasons of medical necessity is considered cosmetic and is not a benefit of Texas Medicaid.

Prior Authorization

The following orthognathic medical surgical services may be considered for reimbursement to oral and maxillofacial surgeons when mandatory prior authorization is received from the TMHP Medical Director or designee. A narrative explaining medical necessity must be provided with the authorization request.

Procedure Codes		
2/F-21010	2-21031	2-21032
2/8/F-21050	2/8/F-21060	2/F-21100
2-21110	2/8-21120	2/8/F-21121
2/8/F-21122	2/8/F-21123	2/8-21125
2/8/F-21127	2/8-21137	2/8-21138
2/8-21139	2/8-21145	2/8-21146
2/8-21147	2/8-21150	2/8-21151

36.4 Procedures and Services

36.4.1 Aerosol Treatment

Aerosol treatments including vaporizers, humidifiers, nebulizers, and inhalers are appropriate methods of treatment for certain *acute* medical problems and should be coded 1-94640 and revenue code B-412.

Payment for professional services for aerosol therapy is limited to the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
0796	Respiratory syncytial virus (RSV)
1363	Pneumocystosis
46400	Acute laryngitis, without mention of obstruction
46401	Acute laryngitis, with obstruction
46410	Acute tracheitis, without mention of obstruction
46411	Acute tracheitis, with obstruction
46420	Acute laryngotracheitis, without mention of obstruction
46421	Acute laryngotracheitis, with obstruction
46430	Acute epiglottitis, without mention of obstruction
46431	Acute epiglottitis, with obstruction
4644	Croup
46450	Unspecified supraglottitis, without mention of obstruction
46451	Unspecified supraglottitis, with obstruction
4660	Acute bronchitis
46611	Acute bronchiolitis due to RSV
46619	Acute bronchiolitis due to other infectious organisms
4786	Edema of larynx
47875	Laryngeal spasm
4788	Upper respiratory tract hypersensitivity reaction, site unspecified
4803	Pneumonia due to SARS-associated coronavirus
48284	Legionnaires' disease
490	Bronchitis, not specified as acute or chronic
4910	Simple chronic bronchitis
4911	Mucopurulent chronic bronchitis
49120	Obstructive chronic bronchitis, without mention of acute exacerbation
49121	Obstructive chronic bronchitis, with acute exacerbation
49122	Obstructive chronic bronchitis with acute bronchitis
4918	Other chronic bronchitis
4919	Unspecified chronic bronchitis
4920	Emphysematous bleb
4928	Other emphysema
49300	Extrinsic asthma, unspecified
49301	Extrinsic asthma with status asthmaticus
49302	Extrinsic asthma with acute exacerbation
49310	Intrinsic asthma without mention of status asthmaticus or acute exacerbation or unspecified
49311	Intrinsic asthma with status asthmaticus
49312	Intrinsic asthma with acute exacerbation
49320	Chronic obstructive asthma without mention of status asthmaticus or acute exacerbation or unspecified
49321	Chronic obstructive asthma with status asthmaticus
49322	Chronic obstructive asthma with acute exacerbation
49390	Asthma, unspecified without mention of status asthmaticus or acute exacerbation or unspecified
49391	Asthma, unspecified with status asthmaticus
49392	Asthma, unspecified with acute exacerbation
4940	Bronchiectasis without acute exacerbation
4941	Bronchiectasis with acute exacerbation
4950	Farmer's lung
4951	Bagassosis
4952	Bird-fanciers' lung
4953	Suberosis
4954	Malt workers' lung
4955	Mushroom workers' lung
4956	Maple bark-strippers' lung
4957	Ventilation pneumonitis
4958	Other specified allergic alveolitis and pneumonitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4959	Unspecified allergic alveolitis and pneumonitis
496	Chronic airway obstruction, not elsewhere classified
5173	Acute chest syndrome
5184	Acute edema of lung, unspecified
5186	Allergic bronchopulmonary aspergillosis
51911	Acute bronchospasm
51919	Other diseases of trachea and bronchus
99527	Other drug allergy

Medications used in aerosol therapy are reimbursed separately and should be billed using the appropriate HCPCS procedure code. A separate charge for saline used in aerosol therapy is denied as part of the aerosol therapy.

Procedure code 5-94664 is generally performed for chronic conditions and is *not a benefit* of the Texas Medicaid Program when billed by a physician or outpatient hospital.

36.4.2 Allergy Services

The Texas Medicaid Program uses the following guidelines for reimbursement of allergy services.

Reminder: *Procedure codes 1-95120, 1-95125, 1-95130, 1-95131, 1-95132, 1-95133, 1-95134 are no longer payable.*

36.4.2.1 Allergy Injections, Vials

A physician may prepare an allergy vial or extract for administration to the patient by another physician or by the patient. An allergy injection is a covered service if the physician who prepares the allergy extract has examined the patient at some time and determined the plan of treatment and dosage regimen. The physician who prepares the allergy extract and provides the vials to the client to self-administer or for another physician to administer may be paid for the extract and preparation. Physicians must use procedure codes 1-95145, 1-95146, 1-95147, 1-95148, 1-95149, 1-95165, or 1-95170 to document the service rendered. Each procedure code must be given a *quantity* to reflect the total volume of the vial (such as the number of cc in the vial). When the number of cc is not stated on the claim, a *quantity of one* is reimbursed.

Use the following procedure codes when a physician administers allergy serum prepared by another physician: 1-95115 and 1-95117.

The physician may bill the antigen vial using procedure codes 1-95145, 1-95146, 1-95147, 1-95148, 1-95149, 1-95165, or 1-95170 with the total number of cc specified and the administration-only code 1-95115 or 1-95117 each time an injection is given from a vial.

Established patient office visits on the same day for the same diagnosis as an antigen or vial are denied unless the claim indicates the visit was for re-evaluation of the patient's condition. If the provider documents that the office visit was for a diagnosis completely unrelated to the allergy diagnosis or re-evaluation of the patient's condition, the claim is considered for payment.

Sublingual antigens are not a benefit of the Texas Medicaid Program. Single-dose vials are not a benefit of the Texas Medicaid Program. Antigen injections are payable to physicians only in POS 1 (office).

36.4.2.2 Allergy Testing

Allergy testing is a benefit of the Texas Medicaid Program. The following procedure codes may be used for allergy testing:

Procedure Codes		
1-95004	1-95010	1-95015
1-95024	1-95028	1-95044
1-95052	1-95056	1-95060
1-95065	1-95070	1-95071
5-86003	5-86005	

The following procedure codes should be billed with the type and *actual number* of allergy tests performed. The quantity listed on the claim must indicate the number of tests performed to ensure proper reimbursement.

Procedure Codes		
1-95004	1-95010	1-95015
1-95024	1-95028	1-95044
1-95052	1-95056	1-95060
1-95065	1-95070	1-95071

The following allergy tests are not benefits of the Texas Medicaid Program and are denied: procedure codes 1-95027, 1-95078, and 1-95199.

Use the following codes for the billing of patch and photo patch allergy tests:

- 1-95044 (specify number of tests) for patch or application tests
- 1-95052 (specify number of tests) for photo patch tests

The type and number of allergy tests performed should be indicated on the claim. When the number of tests is not specified, it is paid as a quantity of one.

Radioallergosorbent tests (R.A.S.T.) and multiple antigen simultaneous tests (M.A.S.T.) are benefits of the Texas Medicaid Program. R.A.S.T. testing is a radioimmuno assay of the blood serum used to detect specific allergens. M.A.S.T. is a R.A.S.T.-type test using an enzyme rather than a radioactive marker. R.A.S.T.and M.A.S.T. testing is usually performed by an independent lab; however, some physicians have the capability to perform these tests in their offices. Physicians who bill R.A.S.T./M.A.S.T. tests in their offices must indicate this

CPT only copyright 2005 American Medical Association. All rights reserved.

by the use of the modifier SU for payment to be allowed. Without the use of the modifier SU, R.A.S.T., and M.A.S.T. testing billed in the office (POS 1) is denied with EOB 00216, "Laboratory or X-ray performed outside your office must be billed by the performing facility."

Use the following codes for the billing of R.A.S.T. and M.A.S.T. testing: 5-86003 and 5-86005.

Procedure code 5-86003 may be used to bill each individual allergen, which is limited to 12 per year per provider. Procedure code 5-86005 should be billed as a quantity of 1 and is limited to four per year per provider. An allergy injection (1-95115, 1-95117, 1-95145, 1-95146, 1-95147, 1-95148, 1-95149, 1-95165, and 1-95170) may be paid in addition to R.A.S.T. and M.A.S.T. testing on the same day. Allergy injections are denied when billed on the same day as any other allergy testing.

An initial evaluation of a new patient is payable in addition to allergy testing on the same day. Established patient visits are not payable in addition to allergy testing on the same day unless documentation is submitted stating the visit was necessary for re-evaluation of the patient's condition or for an unrelated diagnosis. The allergy testing is paid and the visits are denied with the EOB 00117, "This procedure is part of another procedure billed on the same day."

36.4.3 Anesthesia

36.4.3.1 Anesthesia for Abortion

Use the procedure code 7-01965 for abortions.

36.4.3.2 Anesthesia for Sterilization

Use modifier FP, Family Planning, when reporting anesthesia services for a sterilization procedure.

The following procedure codes require modifier FP, in addition to the regular anesthesia modifier, if the service is sterilization:

CPT Anesthesia Codes		
7-00840	7-00920	7-00940
7-00851	7-00922	7-00950

36.4.3.3 Anesthesia for Labor and Delivery

Epidural Anesthesia by the Delivering Obstetrician

The Texas Medicaid Program reimburses the anesthesia services and the delivery at full allowance when provided by the delivering obstetrician. Procedure codes 2-62311 and 2-62319 are reimbursed according to the TMRM fee.

For continuous epidural analgesia, the Texas Medicaid Program reimburses for the time when the physician is physically present and monitors the continuous epidural. Reimbursable time refers to the period between the catheter insertion and when the delivery commences. Claims for procedure codes 7-01967, 7-01968, and 7-01969 must indicate the time spent administering the epidural, as well as the actual time spent with the client. Insertion and injection of the epidural are not reimbursed separately.

Refer to the following procedure codes:

Procedure Codes		
2-59410	2-59515	2-59614
2/8-59622	2-62311	2-62319
7-01960	7-01961	7-01963
7-01967	7-01968	7-01969

Procedure code 1-99140 is not reimbursed for diagnosis codes 650, Normal delivery, or 66970 and 66971, Cesarean delivery, when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition.

Epidural Anesthesia by a Provider other than the Delivering Obstetrician

The following procedure codes must be used for epidural anesthesia when provided by a provider other than the delivering obstetrician or surgeon. Procedure codes 2-62311 and 2-62319 must be used when the anesthesiologist or certified registered nurse anesthetists (CRNA) provides the epidural anesthesia during labor only. Procedure codes 2-62311 and 2-62319 are reimbursed according to the TMRM fee.

An anesthesia provider who administers epidural anesthesiology and remains with the client throughout labor and delivery or Cesarean section should combine all charges with the appropriate CPT anesthesia code (7-01967 for vaginal delivery or 7-01968 for Cesarean section). The claim must reflect the actual time spent administering the epidural and the *actual* time spent with the client in the delivery and/or operating room. If the anesthesiologist administers the epidural and leaves the client to return at a later time for the delivery or Cesarean section, the time not spent with the client is not reimbursable. For continuous epidural analgesia, the Texas Medicaid Program reimburses for the time when the anesthesia provider is physically present and monitoring the continuous epidural.

Note: *The anesthesia provider must be physically present in the room to bill for actual time spent with the client.*

Claims for procedure codes 7-01968 and 7-01967 are inclusive codes for labor and delivery anesthesia services. The labor and delivery minutes will be combined and paid on the higher relative value unit (RVU) detail. The provider must document the actual minutes spent administering the epidural as well as time spent with the client. Insertion and injection of the epidural are not reimbursed separately when billed with the CPT anesthesia delivery codes.

CPT only copyright 2005 American Medical Association. All rights reserved.

Refer to the following procedure codes:

Procedure Codes		
2-62311	2-62319	7-01960
7-01961	7-01963	7-01967
7-01968	7-01969	

Procedure code 1-99140 is not reimbursed for diagnosis codes 650, Normal delivery, or 66970 and 66971, Cesarean delivery, when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition.

36.4.3.4 Anesthesia Provided by the Surgeon (Other than Labor and Delivery)

Local, regional, or general anesthesia provided by the operating surgeon is not reimbursed separately from the surgery. A surgeon billing for a surgery will not be reimbursed for the anesthesia when billing for the surgery, even when using the CPT modifier 47. According to the Texas Medicaid Program, the anesthesia service is included in the global surgical fee.

36.4.3.5 Base Units

Base units are the relative value units (RVUs) assigned by Texas Medicaid to each anesthesia service billed.

36.4.3.6 Central Lines

Placement (insertion) of a central venous catheter is denied as part of another procedure when procedure 2-33970 is billed on the same day. Separate payment for the *insertion* of monitoring lines is not available. Reimbursement for the *insertion* of monitoring lines is included in the anesthesia fee when the time units are calculated.

Total units (as determined by the above guidelines) are multiplied by the Texas Medicaid conversion factor of $15.55. The following procedure codes have a conversion factor of $18.21:

Procedure Codes		
7-01960	7-01961	7-01963
7-01967	7-01968	7-01969
7-00851		

Providers must code the procedures in Block 24D of the CMS-1500 paper claim form with a valid CPT anesthesia code preceded by TOS indicator 7 for anesthesia.

36.4.3.7 Claim Filing

The Texas Medicaid Program reimburses anesthesiologists based on TEFRA. Anesthesiologists must identify the following information on their claims:

- Procedure performed (CPT anesthesia code in Block 24 of the CMS-1500 claim form)
- Person (physician or CRNA) administering anesthesia (modifiers must be used to designate this provider type)
- Time in minutes
- Any other appropriate modifier (refer to “Modifiers” on page 5-21 for a complete listing)

36.4.3.8 Complicated Anesthesia

The following procedure codes are payable in addition to an anesthesia procedure or service: 1-99100, 1-99116, 1-99135, and 1-99140.

Procedure code 1-99140 is not reimbursed for diagnosis codes 650, Normal delivery, or 66970, Cesarean delivery without mention of indication, when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition. An emergency is defined as existing when delay in treatment of the client would lead to a significant increase in the threat to life or body part.

36.4.3.9 Pain Management

Acute pain is defined as pain caused by occurrences such as trauma, a surgical procedure, or a medical disorder manifested by increased heart rate, increased blood pressure, increased respiratory rate, shallow respirations, agitation or restlessness, facial grimace, or splinting.

Chronic pain is defined as persistent, often lasting more than six months; symptoms are manifested similarly to that of acute pain.

Postoperative refers to the time frame immediately following a surgical procedure in which a catheter is maintained in the epidural or subarachnoid space for the duration of the infusion of pain medication.

Epidural and Subarachnoid Infusion (not including Labor and Delivery)

Epidural and subarachnoid infusion for pain management is payable for acute, chronic, and postoperative pain management. Procedure code 1-01996 should be reported as a type of service (TOS) 1 (medical) instead of a TOS 7 (anesthesia).

Procedure code 1-01996 is limited to once per day and is denied when billed on the same day as a surgical/anesthesia procedure (TOS 2, 7, and 8). Procedure code 1-01996 billed longer than 30 days requires medical necessity documentation. Cancer diagnoses are excluded from the 30-day limitation.

Procedure code 1-01996 is payable to the following providers:

- Independent CRNA
- Independent CRNA group
- Family nurse practitioner/pediatric nurse practitioner (FNP/PNP)
- DO
- MD
- Physician group, DO

CPT only copyright 2005 American Medical Association. All rights reserved.

- Physician group, MD

Intrathecal Morphine Pumps

Treatment of intractable pain with an intrathecal morphine pump is a benefit with prior authorization. However, prior authorization is *not* required if used for the treatment of intractable cancer pain.

The request for prior authorization must include required information. The use of the Texas Medicaid Prior Authorization Request Form: Intrathecal Baclofen or Morphine Pump Section I form is not mandatory; however, the information requested on both pages of the form is required.

Providers are to mail or fax prior authorization requests to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Pain management is a benefit of the Texas Medicaid Program. Prior authorization is required for procedure codes 2-62350, 2-62360, 2-62361, and 2-62362 unless used for the treatment of intractable cancer pain.

Procedure codes 2-62350, 2-62351, 2-62355, 2-62360, 2-62361, 2-62362, and 2-62365 billed on the same day as another surgical procedure performed by the same physician are paid according to multiple surgery guidelines.

Procedure codes 2-62350, 2-62351, 2-62355, 2-62360, 2-62361, 2-62362, and 2-62365 billed on the same day as an anesthesia procedure performed by the same physician are denied as included in the total anesthesia time.

Reimbursement to the physician for the surgical procedure is based on the assigned RVUs or maximum fee. Outpatient facilities are reimbursed at their reimbursement rate. Inpatient facilities are reimbursed under the assigned diagnosis-related group (DRG). No separate payment for the intrathecal pump is made.

Use the following codes when billing for the implantation/revision/replacement of the pump/catheter:

Procedure Codes		
2-62350	2-62351	2-62355
2-62360	2-62361	2-62362
2-62365		

Procedure codes I-62367 and I-62368 do not require prior authorization and are payable for the professional component (TOS I) only, with no payment allowed for the technical component.

Refer to: "Chemotherapy" on page 36-29 for more information about implanted pumps.

"Texas Medicaid Prior Authorization Request Form: Intrathecal Baclofen or Morphine Pump Section I" on page B-102

36.4.3.10 Multiple Procedures

When billing for anesthesia and other services on the same claim, the anesthesia charge must appear in the first detail line for correct reimbursement. Any other services billed on the same day must be billed as subsequent line items. Multiple surgical procedures billed on the same day by the same provider are subject to the multiple surgery guidelines.

When billing for multiple anesthesia services, TOS 7, performed on the same day or during the same operative session, use the procedure code with the higher RVU. For accurate reimbursement, apply the total minutes and dollars for *all* anesthesia services rendered on the a higher RVU code.

36.4.3.11 Reimbursement Methodology

Reimbursement for anesthesia services is determined by a calculation using the relative value units for a particular anesthesia procedure (Base Units) plus the quantity billed (anesthesia *Time Units* divided by 15) multiplied by the TMRM conversion factor for physicians. The formula is Base Unit + Time Units x TMRM. The following is an example of physician pricing:

Provider Type Description–Physician Pricing Example				
Modifier	=	120/15	=	8 (quantity billed)
Procedure Code	=	7-00851 (6 RVUs) 6.00 + 8	=	14.00
Time	=	14.00 x 18.21	=	$254.94 (physician reimbursement)

36.4.3.12 Services Incidental to Surgery and/or Anesthesia

Certain services that are performed in conjunction with surgical or anesthesia procedures are considered incidental to the surgery or anesthesia and will be denied as included in the surgical/anesthesia fee. The following table includes, but may not be limited to, services that are incidental to surgery or anesthesia:

Procedure Codes		
1-90760	1-90761	1-90765
1-90766	1-90767	1-90768
1-94656	1-94657	1-96521
1-96522	1-96523	1-99231
1-99232	1-99291	1-99292
1-99233	2-36010	2-36420
2-36425	2-36430	2-36440
2-36620	2-3662	5-82800
5-82803	5-82805	5-82810
5-82820	5/I/T-93561	5/I/T-93562
5/I-94010	5/I-94060	5/I-94680
5/I-94681	5/I-94690	5-94760

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Codes		
5-94761	5/I-94770	T-93005
T-93017	T-93041	

Separate payment for the insertion of monitoring lines is not allowed in addition to the anesthesia fee. Separate charges for insertion of monitoring lines (i.e., central venous pressure lines, arterial lines and Swan-Ganz catheters) will be denied as included in the anesthesia fee, as the reimbursement of monitoring lines is considered to be included in the anesthesia time. The following table includes, but may not be limited to, services that are incidental to the anesthesia fee:

Procedure Codes		
2-33967	2-33970	2-36013
2-36014	2-93503	2-36555
2-36556	2-36568	2-36569

Should the need arise for the insertion of a monitoring line due to a separate incident not related to the original surgery after the postoperative recovery period, reimbursement may be considered on appeal with appropriate documentation. Reimbursement for monitoring lines billed as the sole procedure performed will be allowed.

36.4.3.13 Supervision of Concurrent Anesthesia Procedures

Physicians must supply information on the number of anesthetists being concurrently supervised through the use of the appropriate modifier. The name of each nurse anesthetist supervised and all concurrent procedures performed *do not* have to be submitted on the claim form. Physicians are responsible for maintaining the information that is subject to retrospective review.

The percentage of reduction for each modifier is shown in the following table:

Modifier	Description	Time Divided By	RVU Reduction
AA	Anesthesia services performed personally by the anesthesiologist [RVU + (Minutes/15)] X Conversion Factor = Allowed Amount	15 minutes	0 percent
AD	Medical supervision by a physician; more than four concurrent anesthesia procedures. The AD modifier is also used when a modifier is not submitted on the claim.	NA. Total time units for claim are set to one unit.	0 percent
QK	Medical direction of two, three, or four concurrent anesthesia procedures involving qualified individuals [RVU + (Minutes/30)] X Conversion Factor = Allowed Amount	30 minutes	10 percent
QS	Monitored services. This informational modifier can be billed by a CRNA or physician and must have a pricing modifier billed with it for processing.	NA	NA
QY*	Medical direction of one CRNA by an anesthesiologist [RVU + (Minutes/15)] X Conversion Factor = Allowed Amount	15 minutes	0 percent
*** = Providers should continue to use the AA modifier until further notice.**			

36.4.3.14 Supervision of Anesthesiologist Assistant

For claims to be considered for payment, providers should bill with the appropriate anesthesia procedure code for the service performed and a primary/pricing modifier.

Anesthesiologists must be Board-certified to supervise anesthesiologist assistants, and may medically direct no more than two concurrent sessions including anesthesi-

CPT only copyright 2005 American Medical Association. All rights reserved.

ology assistants. The anesthesiologist will not perform a personal separate anesthesia service while supervising the anesthesiologist assistant(s).

36.4.3.15 Supervision of CRNA

TMHP reimburses an anesthesiologist for supervision of a CRNA. The services of the CRNA must be billed using a CRNA provider identifier.

In situations where the anesthesiologist supervises the CRNA and no concurrent procedures occur, the anesthesiologist or the CRNA should bill for the administration of anesthesia. Payment is not made to both providers when the modifier AA is used by the physician anesthesiologist.

CRNA services are reimbursed the lesser of the actual charge or 92 percent of the rate reimbursed to a physician anesthesiologist for the same service for covered procedures.

Time Units

Time Units is based on the time in minutes indicated on the claim by the provider. It is the result of the following calculation:

- Time in minutes as indicated on the claim by the provider
- Divided by 15-minute or 30-minute increments

The resulting *Time Units* value is added to the *Base Units* value to get the *Total Units* value.

The modifier indicated on the claim determines which time increment is used to divide the total anesthesia time billed.

Providers billing anesthesia time must refer to the CPT manual definition of time. The definition is provided under the title *Time Reporting*:

> "Anesthesia time begins when the anesthesiologist begins to prepare the patient for the induction of anesthesia in the operating room or in an equivalent area and ends when the anesthesiologist is no longer in personal attendance; that is, when the patient may be safely placed under the postoperative supervision."

Refer to: "Supervision of Concurrent Anesthesia Procedures" on page 36-27.

36.4.3.16 Anesthesia (General) for THSteps Dental Restoration

Anesthesia services for THSteps dental procedures must be billed using procedure code 7-00170 with modifier EP and diagnosis code 52100 in Block 21 of the CMS-1500 paper claim form.

Note: *Except for Primary Care Case Management (PCCM), THSteps Dental anesthesia services for clients in the STAR and STAR+PLUS health plans must be billed to the appropriate health plan, not to TMHP. PCCM providers submit claims to TMHP.*

36.4.4 Assessment of Higher Cerebral Function Testing

Physician Payment Reform has grouped assessment of higher cerebral function testing, procedure codes 5-96105, 5-96110, and 5-96111 into the payment for primary services; therefore, no separate payment is made for this testing.

Aphasia, developmental, and cognitive testing must be billed using the appropriate E/M or outpatient code. Procedure codes 5-96105, 5-96110, and 5-96111 are denied as part of the patient's evaluation, whether billed in conjunction with an E/M or outpatient code or as an independent procedure(s).

Assessment of higher cerebral function testing is *not* reimbursed under the Comprehensive Care Program (CCP) because it is part of the patient's evaluation.

36.4.5 Cancer

36.4.5.1 Cancer Screening, Colorectal

The following procedure codes are covered services: 2/F-G0104, 2/F-G0105, 5-G0107, 4/I/T-G0106, and 4/I/T-G0120

Procedure code 4/I/T-G0122 is not covered by Medicaid.

Screening intervals are recommended once every 48 months for individuals 50 years of age and older. The screening colonoscopy is recommended once every 24 months for individuals at high risk for colorectal cancer. High-risk individuals include people with one more of the following factors:

- Close relative (sibling, parent, or child) who has had colorectal cancer or adenomatous polyposis
- Family history of familial adenomatous polyposis
- Family history of hereditary nonpolyposis colorectal cancer
- Personal history of colorectal cancer
- Inflammatory bowel disease, including Crohn's Disease, and ulcerative colitis

A screening colonoscopy may be covered for the following diagnosis codes:

Diagnosis Code	Description
5550	Regional enteritis of small intestine
5551	Regional enteritis of large intestine
5552	Regional enteritis of small intestine with large intestine
5559	Regional enteritis of unspecified site
5560	Ulcerative (chronic) enterocolitis
5561	Ulcerative ileocolitis
5562	Ulcerative (chronic) proctitis
5563	Ulcerative (chronic) proctosigmoiditis
5568	Other ulcerative colitis
* Payable as secondary diagnosis	

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5569	Ulcerative colitis, unspecified
5589	Other and unspecified noninfectious gastroenteritis and colitis
V1005	Personal history of malignant neoplasm of the large intestine
V1006	Personal history of malignant neoplasm of rectum, rectosigmoid junction, and anus
V160	Family history of malignant neoplasm of gastrointestinal tract
V1851*	Family history, Colonic polyps
* Payable as secondary diagnosis	

In addition to the above listed diagnosis codes, procedure codes 2/F-G0104 and 4/I/T-G0106, which are limited to once every five years, are a benefit when billed with diagnosis code V7651 (Special screening for malignant neoplasms, colon). The procedure code 2-G0121 is a covered service when billed with diagnosis code V7651.

36.4.5.2 Chemotherapy

Chemotherapy infusion procedure codes listed in the following table are comprehensive codes that include all supplies, catheters, and solutions necessary to safely administer the necessary chemotherapeutic agents either by or under the supervision of the physician, but do not include the provision of the chemotherapeutic agents:

Procedure Codes		
1-96402	1-96405	1-96406
1-96409	1-96413	1-96420
1-96422	1-96521	1-96522
1-96542	1-96549	

Chemotherapeutic infusion procedure codes are comprehensive codes that include all supplies, catheters, and solutions necessary to safely administer the necessary chemotherapeutic agents under the physician's direct supervision, but do not include the provision of chemotherapeutic agents. These procedure codes also include the appropriate invasive surgical procedure. As a result, a thoracentesis billed with 1-96440 is denied as part of 1-96440; a paracentesis billed with 1-96445 is denied as part of 1-96445; and a lumbar puncture billed with 1-96450 is denied as part of 1-96450.

These codes (1-96440, 1-96445, and 1-96450) may be paid in addition to E/M codes billed on the same day, regardless of the POS billed.

Chemotherapeutic drugs and other injections given in the course of chemotherapy may be billed separately and reimbursed using the appropriate procedure code(s).

Chemotherapeutic codes may be paid in addition to E/M codes provided on the same day if the services occur in a sequential manner in POS 1, 2, or 5 for the following:

Procedure Codes		
1-96401	1-96402	1-96405
1-96406	1-96409	1-96413
1-96420	1-96422	1-96521
1-96522	1-96523	1-96542
1-96549		

If the patient is hospitalized (POS 3), the physician should use the appropriate E/M codes. These chemotherapeutic codes are denied as part of the daily hospital management codes in POS 3. If chemotherapy administration is the only service billed in POS 3, it is reimbursed.

Chemotherapy planning may be considered for reimbursement as a physician service.

When a chemotherapy planning program is billed by the same provider on the same date of service with office visits, consultations, hospital visits, and emergency room visits, the chemotherapy planning is reimbursed, and the visits will deny as part of the chemotherapy planning.

Factors considered for planning chemotherapy treatment include, but are not limited to:

- The type of cancer.
- Where the cancer is located in the body
- Whether the cancer has spread
- Where the cancer has spread (if it has)
- The age and general health of the client
- The frequency of chemotherapy treatment, and how long the treatment lasts, depending on factors that include, but are not limited to:
  - Type of cancer
  - Drugs used
  - How the cancer cells respond to the drugs
  - Any side effects from the drugs.

Procedure code 2-51720 is used for Treatment of bladder lesion.

Chemotherapy Procedure Codes

When billing the following codes to facilitate the administration of chemotherapy, prior authorization is *not* required:

Procedure Codes		
2-61210	2-61215	2-62350
2-62360	2-62361	2-62362

However, if these codes are billed for services provided in treating chronic spasticity with intrathecal baclofen, they *do* require prior authorization.

Prolonged infusion of chemotherapeutic agents is reimbursed as follows: procedure codes 1-96413 and 1-96422.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following procedure codes are not payable: 1-96415, 1-96423, and 1-96425.

Chemotherapy administration by push technique (1-96409 and 1-96420) and by infusion technique (1-96413 and 1-96422) is reimbursed when billed for the same date of service.

Only one 1-96409 and one 1-96420 are allowed per day, regardless of whether separate drugs are given.

The following codes are valid for any date of service:

Procedure Codes		
1-J9062	1-J9080	1-J9090
1-J9091	1-J9092	1-J9094
1-J9095	1-J9096	1-J9097
1-J9110	1-J9140	1-J9182
1-J9250	1-J9290	1-J9291
1-J9375	1-J9380	

Refer to: "Baclofen (Lioresal), Trial Injection and Pump Implantation/Catheter Insertion/Revision/Replacement" on page 36-89.

36.4.5.3 Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer

Bacillus Calmette-Guérin (BCG) intravesical, instillation (1-J9031) and for bladder cancer, live, for intravesical use (1-90586) are covered benefits of the Texas Medicaid Program for the following diagnosis codes:

Diagnosis Code	Description
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
2337	Carcinoma in situ of the bladder

BCG intravesical vaccines will autodeny for all other diagnosis codes. Bladder instillation of anticarcinogenic agent (2-51720) may be reimbursed separately when billed separately.

36.4.6 Casting, Splinting, and Strapping

When a casting, splinting, strapping, or traction device is billed on the same day as surgery, the surgery will be paid and the casting, splinting, strapping, or traction device will deny as part of another procedure billed on the same day if the following procedure codes are used:

Procedure Codes		
29000	29010	29015
29020	29025	29035
29040	29044	29046
29049	29055	29058
29065	29075	29085
29086	29105	29125
29126	29130	29131
29200	29220	29240
29260	29280	29305
29325	29345	29355
29358	29365	29405
29425	29435	29440
29445	29450	29505
29515	29520	29530
29540	29550	29580
29590		

The replacement of a cast, splint, or strapping, using the procedure codes in the table above, is not included in the original surgical fee and may be paid separately.

Payment for cast removal or repair will be denied if billed within six weeks of the initial cast application, splinting, or strapping by the same provider. The procedure codes for cast removal listed in the table below may be paid to a provider other than the provider who applied the initial cast, splint, or strap.

Procedure Codes		
2-29700	2-29705	2-29710
2-29715	2-29720	2-29730
2-29740	2-29750	2-29799

When casting, splinting, strapping, or wedging is performed without surgery and the appropriate E/M code is billed, both may be paid using the following procedure codes:

Procedure Codes		
2-29000	2-29010	2-29015
2-29020	2-29025	2-29035
2-29040	2-29044	2-29046
2-29049	2-29055	2-29058
2-29065	2-29075	2-29085
2-29086	2-29105	2-29125
2-29126	2-29130	2-29131

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Codes		
2-29200	2-29220	2-29240
2-29260	2-29280	2-29305
2-29325	2-29345	2-29355
2-29358	2-29365	2-29405
2-29425	2-29435	2-29440
2-29445	2-29450	2-29505
2-29515	2-29520	2-29530
2-29540	2-29550	2-29580
2-29590	2-29750	

Supplies are not separately payable. This includes the procedure code 9-99070.

36.4.7 Neurostimulators

36.4.7.1 Central Nervous System Stimulators

The implantation of central nervous system electrical nerve stimulators is a benefit of the Texas Medicaid Program with documentation of medical necessity. It may be covered for the relief of chronic intractable pain. Conditions that may indicate chronic intractable pain include, but are not limited to:

- Amputation *ghost* pain

Diagnosis Code	Description
7092	Scar conditions and fibrosis of skin
7295	Pain in limb
V493	Sensory problems with limbs

- Cancer with bone metastasis (too numerous to list)
- Causalgia of upper/lower limb

Diagnosis Code	Description
3544	Causalgia of upper limb
35571	Causalgia of lower limb

- Herniated disc

Diagnosis Code	Description
7220	Displacement of cervical intervertebral disc without myelopathy
72210	Displacement of lumbar intervertebral disc without myelopathy
72211	Displacement of thoracic intervertebral disc without myelopathy
7222	Displacement of intervertebral disc, site unspecified, without myelopathy
72230	Schmorl's nodes of unspecified region
72231	Schmorl's nodes of thoracic region
72232	Schmorl's nodes of lumbar region
72239	Schmorl's nodes of other spinal region
7224	Degeneration of cervical intervertebral disc
72251	Degeneration of thoracic or thoracolumbar intervertebral disc
72252	Degeneration of lumbar or lumbosacral intervertebral disc
7226	Degeneration of intervertebral disc, site unspecified
72270	Intervertebral disc disorder with myelopathy, unspecified region
72271	Intervertebral disc disorder with myelopathy, cervical region
72272	Intervertebral disc disorder with myelopathy, thoracic region

- Radiculitis

Diagnosis Code	Description
7234	Brachial neuritis or radiculitis NOS
7292	Neuralgia, neuritis, and radiculitis, unspecified
09489	Other specified neurosyphilis

- Spinal stenosis

Diagnosis Code	Description
7230	Spinal stenosis in cervical region
7231	Cervicalgia
7232	Cervicocranial syndrome
7233	Cervicobrachial syndrome (diffuse)
7234	Brachial neuritis or radiculitis NOS
7235	Torticollis, unspecified
7236	Panniculitis specified as affecting neck
7237	Ossification of posterior longitudinal ligament in cervical region
7238	Other syndromes affecting cervical region
7239	Unspecified musculoskeletal disorders and symptoms referable to neck
72400	Spinal stenosis of unspecified region
72401	Spinal stenosis of thoracic region
72402	Spinal stenosis of lumbar region
72409	Spinal stenosis of other region

- Spinal surgery, using the following procedure codes:

Procedure Codes		
2-63001	2-63003	2-63005
2-63011	2-63012	2-63015

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Codes		
2-63016	2-63017	2-63020
2-63030	2-63035	2-63040
2-63041	2-63042	2-63043
2-63044	2-63045	2-63046
2-63047	2-63048	2-63050
2-63051	2-63055	2-63056
2-63057	2-63064	2-63066
2-63075	2-63076	2-63077
2-63078	2-63081	2-63082
2-63085	2-63086	2-63087
2-63088	2-63090	2-63091
2-63101	2-63102	2-63103
2-63170	2-63172	2-63173
2-63180	2-63182	2-63185
2-63190	2-63191	2-63194
2-63195	2-63196	2-63197
2-63198	2-63199	2-63200
2-63250	2-63251	2-63252
2-63265	2-63266	2-63267
2-63268	2-63270	2-63271
2-63272	2-63273	2-63275
2-63276	2-63277	2-63278
2-63280	2-63281	2-63282
2-63283	2-63285	2-63286
2-63287	2-63290	2-63295
2-63300	2-63301	2-63302
2-63303	2-63304	2-63305
2-63306	2-63307	2-63308

- Tic douloureux (Trigeminal neuralgia)

Diagnosis Code	Description
3501	Trigeminal neuralgia
3502	Atypical face pain
05312	Postherpetic trigeminal neuralgia
05313	Postherpetic polyneuropathy

The following types of central nervous system stimulators are covered:

- Dorsal column (spinal cord) (2/F-63650, 2/8-63655, 2/F-63660, 2/F-63685, and 2/F-63688)
- Intracranial (2-61850, 2-61860, 2-61863, 2-61864, 2-61867, 2-61868, 2-61870, 2-61875, 2/8/F-61880, 2/F-61885, 2-61886, and 2/F-61888)

Documentation of the following must be submitted with claims for payment of the implantation of a *dorsal column stimulator:*

- Implantation of the stimulator is a last resort in a patient with chronic intractable pain. Other treatment modalities, including pharmacological, surgical, physical, and/or psychological therapies, have been tried and been shown to be unsatisfactory, unsuitable, or contraindicated for the patient.
- The patient has undergone careful screening, evaluation, and diagnosis by a multidisciplinary team before implantation. This screening should include psychological as well as physical evaluation.
- All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment, training, and follow-up of the patient are available.
- Demonstration of pain relief with a temporarily implanted electrode preceded permanent implantation.

Separate payment for the device is not covered for the physician or hospital. It is included in the hospital or facility global payment group. Separate charges for the rental or purchase of the stimulator device (dorsal column, intracranial, deep brain, or vagal) are denied as not a benefit of Medicaid.

The *implantation of intracranial neurostimulators* is payable *only* for the following diagnoses and is subject to multiple surgery audit guidelines. When billing for intracranial neurostimulator implantation (2/F-61850, 2-61860, 2-61863, 2-61864, 2-61867, 2-61868, 2-61870, 2-61875, 2/8/F-61880, 2/F-61885, 2-61886, and 2/F-61888), the documentation required for dorsal column stimulators does *not* need to be submitted. When billing the following codes pertaining to the treatment of intractable pain with a dorsal column stimulator, prior authorization is not required: 2/F-63685 and 2/F-63688.

Documentation must be included in the client's records and is subject to retrospective review.

The following codes are payable through the Texas Medicaid Program without prior authorization for the electronic analysis of an implanted neurostimulator:

Procedure Codes		
5-95970	5-95971	5-95972
5-95973	5-95974	5-95975
5-95978	5-95979	

Payment will not be made for the implantation of CNS stimulators to treat motor function disorders such as multiple sclerosis. However, the implantation, revision, and removal of deep brain stimulators is a payable benefit for the treatment of intractable tremors because of diagnosis code 3320, Paralysis Agitans, or diagnosis code 3331, Essential and other specified forms of tremor.

However, if codes 2/F-63685 or 2/F-63688 are billed for services provided in treating intractable seizures with a vagal nerve stimulator, they *do* require prior authorization.

Refer to: "Deep Brain Stimulators" on page 36-33 for more information about prior authorization.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.7.2 Deep Brain Stimulators

Implantation of neurostimulator electrodes for the treatment of intractable tremors, diagnosis codes 3320, Paralysis agitans, and 3331, Tremor NEC, are payable benefits. One of these diagnoses must appear on the claim for reimbursement to be considered. The actual deep brain stimulator device is payable only under the DRG or ASC/HASC reimbursement rate. *No separate payment outside of the DRG or ASC/HASC reimbursement rate is made for the device.*

Procedure codes 2/8/F-61880, 2/F-61885, and 2/8/F-61888 are:

- Payable in the inpatient and outpatient settings
- Subject to the global surgical fee policy, with three-day pre-care and six week post-care periods assigned
- Subject to multiple surgery guidelines

36.4.7.3 Percutaneous/Transcutaneous Nerve Stimulators

Application of a surface (transcutaneous) neurostimulator is *not a benefit* of the Medicaid program. Implantation of percutaneous peripheral nerve stimulators and electrodes are *not a benefit* of the Medicaid program.

Purchase or rental of electrical nerve stimulators and associated supplies, such as leads/electrodes, rechargeable transcutaneous electrical nerve stimulator (TENS) battery packs, and form-fitting conductive garments, are *not a benefit* of the Medicaid program. Additionally, diagnostic assessments for use of a TENS or percutaneous electrical nerve stimulator (PENS) are not a benefit of the Medicaid program.

36.4.7.4 Sacral Nerve Stimulators

Sacral nerve stimulators are *not a benefit* of the Texas Medicaid Program.

36.4.7.5 Vagal Nerve Stimulators

The implantation, revision, programming/reprogramming, and removal of the vagal nerve stimulator device is a payable benefit for Texas Medicaid clients with medically intractable partial onset seizures.

These procedures are payable for inpatient, ASC, and HASC. If performed in an ASC or HASC, the maximum reimbursement is determined by the payment grouping.

No separate payment for the device is made to either the hospital or the physician. Reimbursement for the device is included in the facility payment.

The following procedure codes are payable for the incision, implantation, revision, or removal of the vagal nerve stimulator: 2/F-61885, 2/F-64573, 2/F-64585, and 2/F-61888.

The following diagnosis codes must be billed for procedure codes 2/F-61885 and 2/F-61888 when requesting the vagal nerve stimulator:

Diagnosis Code	Description
34511	Generalized convulsive epilepsy, with intractable epilepsy
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, with intractable epilepsy
34551	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, with intractable epilepsy

The following procedure codes are payable in an outpatient setting or physician office for the electronic analysis and programming/reprogramming of the implanted neurostimulator: 5-95970, 5-95971, 5-95972, 5-95973, 5-95974, and 5-95975. These procedure codes do not require prior authorization.

Clients with diagnoses with ominous prognoses or other limiting factors would not be considered appropriate candidates for the implantation of the vagal nerve stimulator (for example, clients with an absent left vagus nerve, severe mental retardation, cerebral palsy, stroke, progressive fatal neurologic diseases, or progressive fatal medical diseases).

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for children younger than 21 years of age.

36.4.8 Cochlear Implants

A cochlear implant, when medically indicated, is a payable benefit of the Texas Medicaid Program. Reimbursement is provided only for those patients who meet all the following criteria:

- Diagnosis of total bilateral sensorineural deafness that cannot be mitigated by use of a hearing aid in clients whose auditory cranial nerve is able to be stimulated
- Cognitive ability to use auditory clues and a willingness to undergo an extended program of rehabilitation
- Post-lingual deafness or pre-lingual deafness
- Clients 18 months of age or older
- Freedom from middle ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system
- No contraindications to surgery

CPT only copyright 2005 American Medical Association. All rights reserved.

The payment for cochlear implant is limited to the following diagnosis codes:

Diagnosis Code	Description
38910	Sensorineural hearing loss, unspecified
38911	Sensory hearing loss, bilateral
38912	Neural hearing loss, bilateral
38914	Central hearing loss, bilateral
38915	Sensorineural hearing loss, unilateral
38916	Sensorineural hearing loss, asymmetrical
38918	Sensorineural hearing loss of combined types, bilateral
3892	Mixed conductive and sensorineural hearing loss

Prior authorization is not required for these diagnosis codes.

Diagnostic analysis of the cochlear implant in the event of malfunction may be considered for reimbursement using the following procedure codes: 1-92601, 1-92602, 1-92603, and 1-92604.

36.4.9 Diagnostic Tests

36.4.9.1 Ambulatory Blood Pressure Monitoring

Ambulatory blood pressure monitoring is a covered benefit for patients when hypertension is suspected but not defined by history or physical. Ambulatory blood pressure monitoring has been shown to be effective when used in the differential diagnosis of hypertension not elucidated by conventional studies.

The monitoring unit is 24 hours. Benefits are limited to the following medical necessities:

- Blood pressure measurements taken in the clinic or office are greater than 140/90 mm Hg on at least three separate visits, with two separate measurements made at each visit.
- At least two separately documented blood pressure measurements taken outside of the clinic or office that are less than 140/90 mm Hg.
- There is no evidence of end-organ damage. Indications for the use of this monitoring are for diagnostic purposes only and should not be used for maintenance monitoring.

Use procedure codes 5-93784, 5-93786, 5-93788, 5-93790 to bill for ambulatory blood pressure monitoring. Ambulatory blood pressure monitoring is a benefit when submitted with diagnosis code 7962 (Elevated blood pressure reading without diagnosis of hypertension).

Other diagnoses may be considered on appeal with supporting medical documentation submitted to the TMHP Medical Director.

36.4.9.2 Ambulatory Electroencephalogram (A/EEG)

Ambulatory electroencephalographic monitoring (A/EEG) or 24-hour ambulatory monitoring is a covered benefit for patients in whom a seizure diathesis is suspected but not defined by history, physical, and resting EEG where A/EEG has been shown to be effective when used in the differential diagnosis of syncope and transient cerebral ischemic attacks not elucidated by the conventional studies.

The monitoring unit is 24 hours. Benefits are limited to two units (each unit 24 hours) for each physician for the same client per six months when medically necessary.

Use the following procedure codes to bill A/EEG: 5/I/T-95950, 5/I/T-95951, 5/I/T-95953, and 5/I/T-95956.

Procedure codes 5-95950, 5-95951, 5-95953, and 5-95956 are related. When multiple procedure codes are billed on the same day, the most inclusive code is paid and all other codes are denied.

Procedure codes 5-95950, 5-95951, 5-95953, and 5-95956 are payable when billed with the following diagnosis codes:

Diagnosis Code	Description
2930	Acute delirium, epileptic; confusional state
2948	Other persistent mental disorders due to conditions classified elsewhere
3332	Myoclonus
34500	Generalized nonconvulsive epilepsy, without mention of intractable epilepsy
34501	Generalized nonconvulsive epilepsy, with intractable epilepsy
34510	Generalized convulsive epilepsy, without mention of intractable epilepsy
34511	Generalized convulsive epilepsy, with intractable epilepsy
3452	Petit mal status, epileptic
3453	Grand mal status, epileptic
34540	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, with intractable epilepsy
34550	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, without mention of intractable epilepsy

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
34551	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, with intractable epilepsy
34560	Infantile spasms, without mention of intractable epilepsy
34561	Infantile spasms, with intractable epilepsy
34570	Epilepsia partialis continua, without mention of intractable epilepsy
34571	Epilepsia partialis continua, with intractable epilepsy
34580	Other forms of epilepsy and recurrent seizures, without mention of intractable epilepsy
34581	Other forms of epilepsy and recurrent seizures, with intractable epilepsy
34590	Epilepsy, unspecified, without mention of intractable epilepsy
34591	Epilepsy, unspecified, with intractable epilepsy
64940	Epilepsy complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care or not applicable
64941	Epilepsy complicating pregnancy, childbirth, or the puerperium, delivered, with or without mention of antepartum condition
64942	Epilepsy complicating pregnancy, childbirth, or the puerperium, delivered, with mention of postpartum complication
64943	Epilepsy complicating pregnancy, childbirth, or the puerperium, antepartum condition or complication
64944	Epilepsy complicating pregnancy, childbirth, or the puerperium, postpartum condition or complication
7790	Convulsions in newborn
7797	Preventricular leukomalacia
78031	Febrile convulsions (simple), unspecified
78032	Complex febrile convulsions
78039	Other convulsions
78097	Altered mental status

Other diagnosis codes may be considered on appeal with supporting medical documentation to the TMHP Medical Director.

36.4.9.3 Bone Marrow Aspiration, Biopsy

Procedure code 2-20220 is for bone biopsy and is inappropriate for billing of bone marrow aspiration or bone marrow biopsy.

Physicians may bill procedure code I-85097 if interpretation is for smear interpretation, or 5/I/T-88305 if interpretation is for preparation and interpretation of cell block. If both 5-85097 and 5-88305 are billed, 5-88305 is paid and 5-85097 is denied.

Physicians may bill procedure code 5-85097 or 5-88305 for preparation and interpretation of the specimen.

36.4.9.4 Computerized Axial Tomography (CAT) Scan

Freestanding facilities may bill for CAT scans using the TOS T for the technical component only. The radiologist or neurologist who reads the scan may bill using the TOS I for interpretation only. Additionally, when the client is in the inpatient or outpatient setting, the radiologist or neurologist may bill using the TOS I for interpretation.

Scout views and reconstruction are considered part of any CAT scan procedure and are not reimbursed in addition to any other CAT scan.

36.4.9.5 Cytopathology Studies – Gynecological, Pap Smears

Pap smears are a benefit of the Texas Medicaid Program for early detection of cancer. Family planning clients are eligible for annual Pap smears.

Procurement and handling of the Pap smear are considered part of the E/M of the client and are not reimbursed separately.

The following procedure codes are reimbursed only to pathologists and CLIA-certified laboratories (whose directors providing technical supervision of cytopathology services are pathologists):

Procedure Codes		
I-88141	5-88142	5-88143
5-88147	5-88148	5-88150
5-88151	5-88152	5-88153
5-88154	5-88155	5-88164
5-88165	5-88166	5-88167
5-88174	5-88175	

These procedure codes are payable in the POS where the Pap smear is interpreted: POS 1 (office), POS 3 (inpatient), POS 5 (outpatient), or POS 6 (independent laboratory).

CPT only copyright 2005 American Medical Association. All rights reserved.

The interpretation portion of any gynecological cytopathology test must be reported using procedure code I-88141. It is inappropriate to use the following procedure codes to bill for the interpretation:

Procedure Codes		
I-88142	I-88143	I-88147
I-88148	I-88150	I-88151
I-88152	I-88153	I-88154
I-88155	I-88164	I-88165
I-88166	I-88167	I-88174
I-88175		

Procedure code I-88141 remains a benefit. Its reimbursement is restricted to laboratories and pathologists. It is reimbursed in addition to the technical component. The following procedure codes are payable for TOS 5 only:

Procedure Codes		
5-88142	5-88143	5-88147
5-88148	5-88150	5-88152
5-88153	5-88154	5-88164
5-88165	5-88166	5-88167
5-88174	5-88175	

Procedure code 5-88155 is a benefit but is not reimbursed when billed in addition to the following cytopathology procedure codes:

Procedure Codes		
5-88142	5-88143	5-88147
5-88148	5-88150	5-88151
5-88152	5-88153	5-88154
5-88155	5-88164	5-88165
5-88166	5-88167	5-88174
5-88175		

Procedure code 5-88144 is not a benefit because the procedure it describes has not been FDA-approved.

36.4.9.6 Cytopathology Studies – Other Than Gynecological

Procurement and handling of the specimen for cytopathology of sites other than vaginal, cervical, or uterine is considered part of the client's E/M and will not be reimbursed separately.

Procedure codes 5/I/T-88160, 5/I/T-88161, and 5/I/T-88162 are reimbursed only to pathologists and CLIA-certified laboratories (whose directors providing technical supervision of cytopathology services are pathologists). These procedure codes are reimbursed according to the POS where the cytopathology smear is interpreted.

The following procedures are payable in the office (POS 1), outpatient setting (POS 5), or independent laboratory (POS 6): 5-88160, 5-88161, and 5-88162.

The following procedures are payable to a pathologist in the outpatient (POS 5) and inpatient (POS 3) hospital: I-88160, I-88161, and I-88162.

- Procedure codes 5/I-88160 and/or 5/I-88161 are denied as part of 5/I-88162.
- Procedure code 5/I-88160 is denied as part of procedure code 5/I-88161.

36.4.9.7 Echoencephalography

Echoencephalography (4/I/T-76506) is medically indicated for the following conditions or diagnosis codes:

Diagnosis Code	Description
01300	Tuberculous meningitis, unspecified examination
01301	Tuberculous meningitis, bacteriological or histological examination not done
01302	Tuberculous meningitis, bacteriological or histological examination results unknown (at present)
01303	Tuberculous meningitis, tubercle bacilli found (in sputum) by microscopy
01304	Tuberculous meningitis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01305	Tuberculous meningitis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01306	Tuberculous meningitis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01310	Tuberculoma of meninges, unspecified examination
01311	Tuberculoma of meninges, bacteriological or histological examination not done
01312	Tuberculoma of meninges, bacteriological or histological examination results unknown (at present)
01313	Tuberculoma of meninges, tubercle bacilli found (in sputum) by microscopy
01314	Tuberculoma of meninges, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01315	Tuberculoma of meninges, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
01316	Tuberculoma of meninges, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01320	Tuberculoma of brain, unspecified examination
01321	Tuberculoma of brain, bacteriological or histological examination not done
01322	Tuberculoma of brain, bacteriological or histological examination results unknown (at present)
01323	Tuberculoma of brain, tubercle bacilli found (in sputum) by microscopy
01324	Tuberculoma of brain, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01325	Tuberculoma of brain, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01326	Tuberculoma of brain, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01330	Tuberculous abscess of brain, unspecified examination
01331	Tuberculous abscess of brain, bacteriological or histological examination not done
01332	Tuberculous abscess of brain, bacteriological or histological examination results unknown (at present)
01333	Tuberculous abscess of brain, tubercle bacilli found (in sputum) by microscopy
01334	Tuberculous abscess of brain, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01335	Tuberculous abscess of brain, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01336	Tuberculous abscess of brain, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01340	Tuberculoma of spinal cord, unspecified examination
01341	Tuberculoma of spinal cord, bacteriological or histological examination not done
01342	Tuberculoma of spinal cord, bacteriological or histological examination results unknown (at present)
01343	Tuberculoma of spinal cord, tubercle bacilli found (in sputum) by microscopy
01344	Tuberculoma of spinal cord, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01345	Tuberculoma of spinal cord, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01346	Tuberculoma of spinal cord, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01350	Tuberculous abscess of spinal cord, unspecified examination
01351	Tuberculous abscess of spinal cord, bacteriological or histological examination not done
01352	Tuberculous abscess of spinal cord, bacteriological or histological examination results unknown (at present)
01353	Tuberculous abscess of spinal cord, tubercle bacilli found (in sputum) by microscopy
01354	Tuberculous abscess of spinal cord, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01355	Tuberculous abscess of spinal cord, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01356	Tuberculous abscess of spinal cord, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01360	Tuberculous encephalitis or myelitis, unspecified examination
01361	Tuberculous encephalitis or myelitis, bacteriological or histological examination not done
01362	Tuberculous encephalitis or myelitis, bacteriological or histological examination results unknown (at present)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
01363	Tuberculous encephalitis or myelitis, tubercle bacilli found (in sputum) by microscopy
01364	Tuberculous encephalitis or myelitis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01365	Tuberculous encephalitis or myelitis, tubercle bacilli not found by bacterio-logical examination, but tuberculosis confirmed histologically
01366	Tuberculous encephalitis or myelitis, tubercle bacilli not found by bacterio-logical or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01380	Other specified tuberculosis of central nervous system, unspecified examination
01381	Other specified tuberculosis of central nervous system, bacteriological or histological examination not done
01382	Other specified tuberculosis of central nervous system, bacteriological or histological examination results unknown (at present)
01383	Other specified tuberculosis of central nervous system, tubercle bacilli found (in sputum) by microscopy
01384	Other specified tuberculosis of central nervous system, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01385	Other specified tuberculosis of central nervous system, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01386	Other specified tuberculosis of central nervous system, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inocu-lation of animals)
1700	Malignant neoplasm of bone and articular cartilage; bones of skull and face, except mandible
1901	Malignant neoplasm of eye; orbit
1910	Malignant neoplasm of brain; cerebrum, except lobes and ventricles
1911	Malignant neoplasm of brain; frontal lobe
1912	Malignant neoplasm of brain; temporal lobe
1913	Malignant neoplasm of brain; parietal lobe
1914	Malignant neoplasm of brain; occipital lobe
1915	Malignant neoplasm of brain; ventricles
1916	Malignant neoplasm of brain; cerebellum NOS
1917	Malignant neoplasm of brain; brain stem
1918	Malignant neoplasm of brain; other parts of brain
1919	Malignant neoplasm of brain; unspecified
1920	Malignant neoplasm of other and unspecified parts of nervous system; cranial nerves
1921	Malignant neoplasm of other and unspecified parts of nervous system; cerebral meninges
1943	Malignant neoplasm of other endocrine glands and related struc-tures; pituitary gland and craniopharyngeal duct
1983	Secondary malignant neoplasm of other specified sites; brain and spinal cord
1984	Secondary malignant neoplasm of other specified sites; other parts of nervous system
1985	Secondary malignant neoplasm of other specified sites; bone and bone marrow
19889	Secondary malignant neoplasm of other specified sites; other
2130	Benign neoplasm of bone and articular cartilage; bones of skull and face
2241	Benign neoplasm of eye; orbit
2250	Benign neoplasm of brain and other parts of nervous system; brain
2251	Benign neoplasm of brain and other parts of nervous system; cranial nerves
2252	Benign neoplasm of brain and other parts of nervous system; cerebral meninges
2270	Benign neoplasm of other endocrine glands and related structures; adrenal gland
2340	Carcinoma in situ of other and unspecified sites; eye

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2348	Carcinoma in situ of other and unspecified sites; other specified sites
2375	Neoplasm of uncertain behavior of endocrine glands and nervous system; brain and spinal cord
2376	Neoplasm of uncertain behavior of endocrine glands and nervous system; meninges
2379	Neoplasm of uncertain behavior of endocrine glands and nervous system; other and unspecified parts of nervous system
2380	Neoplasm of uncertain behavior of other and unspecified sites and tissues; bone and articular cartilage
2388	Neoplasm of uncertain behavior of other and unspecified sites and tissues; other specified sites
2392	Neoplasms of unspecified nature; bone, soft tissue, and skin
2396	Neoplasms of unspecified nature; brain
2397	Neoplasms of unspecified nature; endocrine glands and other parts of nervous system
2398	Neoplasms of unspecified nature; other specified sites
29010	Presenile dementia, uncomplicated
3240	Intracranial abscess
3249	Intracranial and intraspinal abscess; of unspecified site
325	Phlebitis and thrombophlebitis of intracranial venous sinuses
3310	Alzheimer's disease
33111	Pick's disease
33119	Other frontotemporal dementia
3312	Senile degeneration of brain
3313	Communicating hydrocephalus
3314	Obstructive hydrocephalus
3317	Cerebral degeneration in diseases classified elsewhere (manifestation code; code first the underlying disease)
33181	Reye's syndrome
33182	Dementia with lewy bodies
33189	Other cerebral degeneration
3319	Cerebral degeneration, unspecified
3480	Cerebral cysts
3482	Benign intracranial hypertension

Diagnosis Code	Description
34830	Encephalopathy, unspecified
34831	Metabolic encephalopathy
34839	Other encephalopathy
3484	Compression of brain
3485	Cerebral edema
37700	Papilledema NOS
37701	Papilledema associated with increased intracranial pressure
37702	Papilledema associated with decreased ocular pressure
37703	Papilledema associated with retinal disorder
37704	Foster-kennedy syndrome
37710	Optic atrophy NOS
37711	Primary optic atrophy
37712	Postinflammatory optic atrophy
37713	Optic atrophy associated with retinal dystrophies
37714	Glaucomatous atrophy (cupping) of optic disc
37715	Partial optic atrophy
37716	Hereditary optic atrophy
37721	Drusen of optic disc
37722	Crater-like holes of optic disc
37723	Coloboma of optic disc
37724	Pseudopapilledema
37730	Optic neuritis, unspecified
37731	Optic papillitis
37732	Retrobulbar neuritis
37733	Nutritional optic neuropathy
37734	Toxic optic neuropathy
37739	Optic neuritis NEC
37741	Ischemic optic neuropthy
37742	Hemorrhage in optic nerve sheaths
37749	Other disorders of optic nerve
37751	Disorders of optic chiasm associated with pituitary neoplasms and disorders
37752	Disorders of optic chiasm associated with other neoplasms
37753	Disorders of optic chiasm associated with vascular disorders
37754	Disorders of optic chiasm associated with inflammatory disorders
37761	Disorders of other visual pathways associated with neoplasms

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37762	Disorders of other visual pathways associated with vascular disorders
37763	Disorders of other visual pathways associated with inflammatory disorders
37771	Disorders of visual cortex associated with neoplasms
37772	Disorders of visual cortex associated with vascular disorders
37773	Disorders of visual cortex associated with inflammatory disorders
37775	Cortical blindness
430	Subarachnoid hemorrhage
431	Intracerebral hemorrhage
4320	Nontraumatic extradural hemorrhage
4321	Subdural hemorrhage
4329	Unspecified intracranial hemorrahge
43400	Cerebral thrombosis; without mention of cerebral infarction
43401	Cerebral thrombosis; with cerebral infarction
43410	Cerebral embolism; without mention of cerebral infarction
43411	Cerebral embolism; with cerebral infarction
43490	Cerebral artery occlusion, unspecified; without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified; with cerebral infarction
436	Acute, but ill-defined, cerebrovascular disease
4371	Other generalized ischemic cerebrovascular disease
4373	Cerebral aneurysm, nonruptured
0065	Amebic brain abscess
67400	Cerebrovascular disorders in the puerperium; unspecified as to episode of care or not applicable
67401	Cerebrovascular disorders in the puerperium; delivered, with or without mention of antepartum condition
67402	Cerebrovascular disorders in the puerperium; delivered, with mention of postpartum complication
67403	Cerebrovascular disorders in the puerperium; antepartum condition or complication
67404	Cerebrovascular disorders in the puerperium; postpartum condition or complication

Diagnosis Code	Description
74100	Spina bifida; with hydrocephalus, unspecified region
74101	Spina bifida; with hydrocephalus, cervical region
74102	Spina bifida; with hydrocephalus, dorsal (thoracic) region
74103	Spina bifida; with hydrocephalus, lumbar region
7420	Other congenital anomalies of nervous system; encephalocele
7421	Other congenital anomalies of nervous system; microcephalus
7422	Other congenital anomalies of nervous system; reduction deformities of brain
7423	Other congenital anomalies of nervous system; congenital hydrocephalus
7424	Other congenital anomalies of nervous system; other specified anomalies of brain
74781	Anomalies of cerebrovascular system
76500	Disorders relating to extreme immaturity of infant unspecified weight
76501	Disorders relating to extreme immaturity of infant less than 500 grams
76502	Disorders relating to extreme immaturity of infant 500–749 grams
76503	Disorders relating to extreme immaturity of infant 750–999 grams
76504	Disorders relating to extreme immaturity of infant 1,000–1,249 grams
76505	Disorders relating to extreme immaturity of infant 1,250–1,499 grams
76506	Disorders relating to extreme immaturity of infant 1,500–1,749 grams
76507	Disorders relating to extreme immaturity of infant 1,750–1,999 grams
76510	Disorders relating to other preterm infants unspecified weight
76511	Disorders relating to other preterm infants less than 500 grams
76512	Disorders relating to other preterm infants 500–749 grams
76513	Disorders relating to other preterm infants 750–999 grams

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
76514	Disorders relating to other preterm infants 1,000–1,249 grams
76515	Disorders relating to other preterm infants 1,250–1,499 grams
76516	Disorders relating to other preterm infants 1,500–1,749 grams
76517	Disorders relating to other preterm infants 1,750–1,999 grams
7670	Birth trauma; subdural and cerebral hemorrhage
76711	Epicranial subaponeurotic hemor-rhage (massive)
76719	Other injuries to scalp
7678	Other specified birth trauma
7712	Infections specific to the perinatal period; other congenital infections
77210	Intraventricular hemorrhage, unspec-ified grade
77211	Intraventricular hemorrhage, Grade I
77212	Intraventricular hemorrhage, Grade II
77213	Intraventricular hemorrhage, Grade III
77214	Intraventricular hemorrhage, Grade IV
7722	Fetal and neonatal hemorrhage; subarachnoid hemorrhage
7790	Convulsions in newborn
7797	Periventricular leukomalacia
78031	Febrile convulsions (simple), unspecified
78039	Other convulsions
7842	Swelling, mass, or lump in head and neck
8500	Concussion with no loss of consciousness
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion, with loss of consciousness from 31 minutes to 59 minutes
8502	Concussion with moderate loss of consciousness
8503	Concussion with prolonged loss of consciousness and return to pre-existing conscious level
8504	Concussion with prolonged loss of consciousness, without return to pre-existing conscious level
8505	Concussion with loss of consciousness of unspecified duration
8509	Concussion, unspecified

Diagnosis Code	Description
85100	Cortex (cerebral) contusion without mention of open intracranial wound, state of consciousness unspecified
85101	Cortex (cerebral) contusion without mention of open intracranial wound, with no loss of consciousness
85102	Cortex (cerebral) contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85103	Cortex (cerebral) contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85104	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85105	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85106	Cortex (cerebral) contusion without mention of open intracranial wound, with loss of consciousness of unspec-ified duration
85109	Cortex (cerebral) contusion without mention of open intracranial wound, with concussion, unspecified
85110	ortex (cerebral) contusion with open intracranial wound, without mention of specific state of consciousness
85111	Cortex (cerebral) contusion with open intracranial wound, with no loss of consciousness
85112	Cortex (cerebral) contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85113	Cortex (cerebral) contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85114	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85115	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85116	Cortex (cerebral) contusion with open intracranial wound, with loss of consciousness of unspecified duration
85119	Cortex (cerebral) contusion with open intracranial wound, with concussion, unspecified
85120	Cortex (cerebral) laceration without mention of open intracranial wound, with state of consciousness unspecified
85121	Cortex (cerebral) laceration without mention of open intracranial wound, with no loss of consciousness
85122	Cortex (cerebral) laceration without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85123	Cortex (cerebral) laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85124	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85129	Cortex (cerebral) laceration without mention of open intracranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, with state of consciousness unspecified
85131	Cortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified
85140	Cerebellar or brain stem contusion without mention of open intracranial wound, with state of consciousness unspecified
85141	Cerebellar or brain stem contusion without mention of open intracranial wound, with no loss of consciousness
85142	Cerebellar or brain stem contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusion without mention of open intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusion with open intracranial wound, with state of consciousness unspecified
85151	Cerebellar or brain stem contusion with open intracranial wound, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85152	Cerebellar or brain stem contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85153	Cerebellar or brain stem contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85155	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusion with open intracranial wound, with loss of consciousness of unspecified duration
85159	Cerebellar or brain stem contusion with open intracranial wound, with concussion, unspecified
85160	Cerebellar or brain stem laceration without mention of open intracranial wound, with state of consciousness unspecified
85161	Cerebellar or brain stem laceration without mention of open intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration

Diagnosis Code	Description
85169	Cerebellar or brain stem laceration without mention of open intracranial wound, with concussion, unspecified
85170	Cerebellar or brain stem laceration with open intracranial wound, with state of consciousness unspecified
85171	Cerebellar or brain stem laceration with open intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with open intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with state of consciousness unspecified
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85186	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with state of consciousness unspecified
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with loss of consciousness of unspecified duration
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85201	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85202	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85206	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85209	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85210	Subarachnoid hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85211	Subarachnoid hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85213	Subarachnoid hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85214	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85215	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85216	Subarachnoid hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85221	Subdural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85222	Subdural hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85223	Subdural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85226	Subdural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85229	Subdural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85231	Subdural hemorrhage following injury, with open intracranial wound, with no loss of consciousness

Diagnosis Code	Description
85232	Subdural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85233	Subdural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85236	Subdural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85239	Subdural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85241	Extradural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury, without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85243	Extradural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85244	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85246	Extradural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85249	Extradural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified 8525,Extradural hemorrhage following injury with open intracranial wound
85250	Extradural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85251	Extradural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85252	Extradural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85253	Extradural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85255	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85256	Extradural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury. without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature without mention of open intracranial wound
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85409	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with concussion, unspecified
85410	Intracranial injury of other and unspecified nature, with open intracranial wound, with state of consciousness unspecific

Diagnosis Code	Description
85411	Intracranial injury of other and unspecified nature, with open intracranial wound, with no loss of consciousness
85412	Intracranial injury of other and unspecified nature, with open intracranial wound, with brief (less than one hour) loss of consciousness
85413	Intracranial injury of other and unspecified nature, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85414	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85415	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85416	Intracranial injury of other and unspecified nature, with open intracranial wound, with loss of consciousness of unspecified duration
85419	Intracranial injury of other and unspecified nature, with open intracranial wound, with concussion, unspecified
95901	Other and unspecified injury to head

36.4.9.8 Intraoperative Echography

Procedure code 4/I/T-76986 is no longer denied as service not a benefit. The code is part of a surgical procedure and is denied as this charge is included in the surgical/anesthesia fee.

36.4.9.9 Electrocardiogram (EKG)

An electrocardiogram (EKG) is a recording of the heart's electrical activity. The EKG provides important information about the spread of excitation to the different chambers of the heart and helps diagnose cases of abnormal cardiac rhythm and myocardial damage.

EKG procedure codes T-93005 and T-93041 are payable for the following diagnosis codes:

Diagnosis Code	Description
03282	Diphtheritic myocarditis
0362	Meningococcemia
03640	Meningococcal carditis, unspecified
03641	Meningococcal pericarditis
03642	Meningococcal endocarditis
03643	Meningococcal myocarditis
07420	Coxsackie carditis, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
07421	Coxsackie pericarditis
07422	Coxsackie endocarditis
07423	Coxsackie myocarditis
0860	Chagas' disease with heart involvement
08881	Lyme disease
0930	Aneurysm of aorta, specified as syphilitic
0931	Syphilitic aortitis
09320	Contusion of chest wall
09321	Syphilitic endocarditis of mitral valve
09322	Syphilitic endocarditis of aortic valve
09323	Syphilitic endocarditis of tricuspid valve
09324	Syphilitic endocarditis of pulmonary valve
09381	Syphilitic pericarditis
09382	Syphilitic myocarditis
09389	Other specified cardiovascular syphilis
09883	Gonococcal pericarditis
09884	Gonococcal endocarditis
09885	Other gonococcal heart disease
11281	Candidal endocarditis
11503	Histoplasma capsulatum pericarditis
11504	Histoplasma capsulatum endocarditis
11513	Histoplasma duboisii pericarditis
11514	Histoplasma duboisii endocarditis
11593	Histoplasmosis pericarditis, unspecified
11594	Histoplasmosis endocarditis
124	Trichinosis
1303	Myocarditis due to toxoplasmosis
135	Sarcoidosis
1640	Malignant neoplasm of thymus
1641	Malignant neoplasm of heart
1642	Malignant neoplasm of anterior mediastinum
1643	Malignant neoplasm of posterior mediastinum
1648	Malignant neoplasm of other parts of mediastinum
1649	Malignant neoplasm of mediastinum, part unspecified
19889	Secondary malignant neoplasm of other specified sites
2127	Benign neoplasm of heart

Diagnosis Code	Description
25000	Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled
25001	Diabetes mellitus without mention of complication, type I (juvenile type), not stated as uncontrolled
25002	Diabetes mellitus without mention of complication, type II or unspecified type, uncontrolled
25003	Diabetes mellitus without mention of complication, type I (juvenile type), uncontrolled
25010	Diabetes with ketoacidosis, type II or unspecified type, not stated as uncontrolled
25011	Diabetes with ketoacidosis, type I (juvenile type), not stated as uncontrolled
25012	Diabetes with ketoacidosis, type II or unspecified type, uncontrolled
25013	Diabetes with ketoacidosis, type I (juvenile type), uncontrolled
25020	Diabetes with hyperosmolarity, type II or unspecified type, not stated as uncontrolled
25021	Diabetes with hyperosmolarity, type I (juvenile type), not stated as uncontrolled
25022	Diabetes with hyperosmolarity, type II or unspecified type, uncontrolled
25023	Diabetes with hyperosmolarity, type I (juvenile type), uncontrolled
25030	Diabetes with other coma, type II or unspecified type, not stated as uncontrolled
25031	Diabetes with other coma, type I (juvenile type), not stated as uncontrolled
25032	Diabetes with other coma, type II or unspecified type, uncontrolled
25033	Diabetes with other coma, type I (juvenile type), uncontrolled
25040	Diabetes with renal manifestations, type II or unspecified type, not stated as uncontrolled
25041	Diabetes with renal manifestations, type I (juvenile type), not stated as uncontrolled
25042	Diabetes with renal manifestations, type II or unspecified type, uncontrolled
25043	Diabetes with renal manifestations, type I (juvenile type), uncontrolled

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
25061	Diabetes with neurological manifestations, type I (juvenile type), not stated as uncontrolled
25062	Diabetes with neurological manifestations, type II or unspecified type, uncontrolled
25063	Diabetes with neurological manifestations, type I (juvenile type), uncontrolled
25070	Diabetes with peripheral circulatory disorders, type II or unspecified type, not stated as uncontrolled
25071	Diabetes with peripheral circulatory disorders, type I (juvenile type), not stated as uncontrolled
25072	Diabetes with peripheral circulatory disorders, type II or unspecified type, uncontrolled
25073	Diabetes with peripheral circulatory disorders, type I (juvenile type), uncontrolled
25080	Diabetes with other specified manifestations, type II or unspecified type, not stated as uncontrolled
25081	Diabetes with other specified manifestations, type I (juvenile type), not stated as uncontrolled
25082	Diabetes with other specified manifestations, type II or unspecified type, uncontrolled
25083	Diabetes with other specified manifestations, type I (juvenile type), uncontrolled
25090	Diabetes with unspecified complication, type II or unspecified type, not stated as uncontrolled
25091	Diabetes with unspecified complication, type I (juvenile type), not stated as uncontrolled

Diagnosis Code	Description
25092	Diabetes with unspecified complication, type II or unspecified type, uncontrolled
25093	Diabetes with unspecified complication, type I (juvenile type), uncontrolled
2512	Hypoglycemia, unspecified
2720	Pure hypercholesterolemia
2721	Pure hyperglyceridemia
2722	Mixed hyperlipidemia
2723	Hyperchylomicronemia
2724	Other and unspecified hyperlipidemia
2725	Lipoprotein deficiencies
2726	Lipodystrophy
2727	Lipidoses
2728	Other disorders of lipoid metabolism
2750	Disorders of iron metabolism
2752	Disorders of magnesium metabolism
2753	Disorders of phosphorus metabolism
27541	Hypocalcemia
27542	Hypercalcemia
2760	Hyperosmolality and/or hypernatremia
2761	Hyposmolality and/or hyponatremi
2762	Acidosis
2763	Alkalosis
2764	Mixed acid-base balance disorder
27651	Dehydration
27652	Hypovolemia
2766	Fluid overload disorder
2767	Hyperpotassemia
2768	Hypopotassemia
27730	Amyloidosis, unspecified
27739	Other amyloidosis
3062	Cardiovascular malfunction arising from mental factors
3373	Autonomic dysreflexia
3889	Unspecified disorder of ear
390	Rheumatic fever without mention of heart involvement
3910	Acute rheumatic pericarditis
3911	Acute rheumatic endocarditis
3912	Acute rheumatic myocarditis
3918	Other acute rheumatic heart disease
3919	Acute rheumatic heart disease, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3920	Rheumatic chorea with heart involvement
3929	Rheumatic chorea without mention of heart involvement
393	Chronic rheumatic pericarditis
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified
3980	Rheumatic myocarditis
39891	Rheumatic heart failure (congestive)
39899	Other rheumatic heart diseases
4010	Malignant essential hypertension
4011	Benign essential hypertension
4019	Unspecified essential hypertension
40200	Malignant hypertensive heart disease without congestive heart failure
40201	Malignant hypertensive heart disease with congestive heart failure
40210	Benign hypertensive heart disease without congestive heart failure
40211	Benign hypertensive heart disease with congestive heart failure

Diagnosis Code	Description
40290	Unspecified hypertensive heart disease without congestive heart failure
40291	Unspecified hypertensive heart disease with congestive heart failure
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40301	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage V or end stage renal disease
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40311	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage V or end stage renal disease
4039	Unspecified hypertensive renal disease
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40391	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease
40400	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40401	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40402	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage V or end stage renal disease
40403	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage V or end stage renal disease
40410	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40411	Hypertensive heart and chronic kidney disease, benign, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
40412	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage V or end stage renal disease
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40490	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40491	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40492	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
40501	Malignant renovascular hypertension
40509	Other malignant secondary hypertension
40511	Benign renovascular hypertension
40519	Other benign secondary hypertension
41000	Acute myocardial infarction of antero-lateral wall, episode of care unspecified
41001	Acute myocardial infarction of antero-lateral wall, initial episode of care
41002	Acute myocardial infarction of antero-lateral wall, subsequent episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care
41020	Acute myocardial infarction of infero-lateral wall, episode of care unspecified
41021	Acute myocardial infarction of infero-lateral wall, initial episode of care

Diagnosis Code	Description
41022	Acute myocardial infarction of infero-lateral wall, subsequent episode of care
41030	Acute myocardial infarction of infero-posterior wall, episode of care unspecified
41031	Acute myocardial infarction of infero-posterior wall, initial episode of care
41032	Acute myocardial infarction of infero-posterior wall, subsequent episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41062	True posterior wall infarction, subsequent episode of care
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of care
41072	Subendocardial infarction, subsequent episode of care
41081	Acute myocardial infarction of other specified sites, initial episode of care
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care
4200	Acute pericarditis in diseases classified elsewhere

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) II atrioventricular block
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42820	Congestive heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42983	Takotsubo syndrome
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
43300	Occlusion and stenosis of basilar artery without mention of cerebral infarction
43301	Occlusion and stenosis of basilar artery with cerebral infarction
43310	Occlusion and stenosis of carotid artery without mention of cerebral infarction
43311	Occlusion and stenosis of carotid artery with cerebral infarction
43390	Occlusion and stenosis of unspecified precerebral artery without mention of cerebral infarction
43391	Occlusion and stenosis of unspecified precerebral artery with cerebral infarction
43400	Cerebral thrombosis without mention of cerebral infarction
43401	Cerebral thrombosis with cerebral infarction
43410	Cerebral embolism without mention of cerebral infarction
43411	Cerebral embolism with cerebral infarction

Diagnosis Code	Description
43490	Cerebral artery occlusion, unspecified without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified with cerebral infarction
4359	Unspecified transient cerebral ischemia
4372	Hypertensive encephalopathy
44100	Dissection of aorta, unspecified site
44101	Dissection of aorta, thoracic
44103	Dissection of aorta, thoracoabdominal
4411	Thoracic aneurysm, ruptured
4412	Thoracic aneurysm without mention of rupture
4416	Thoracoabdominal aneurysm, ruptured
4417	Thoracoabdominal aneurysm, without mention of rupture
4439	Peripheral vascular disease, unspecified
4440	Embolism and thrombosis of abdominal aorta
4441	Embolism and thrombosis of thoracic aorta
44421	Aneurysm of renal artery
44422	Aneurysm of iliac artery
4460	Polyarteritis nodosa
4467	Takayasu’s disease
4580	Hereditary hemorrhagic telangiectasia
45821	Hypotension of hemodialysis
4589	Other and unspecified capillary diseases
4590	Hemorrhage, unspecified
496	Chronic airway obstruction, not elsewhere classified
514	Pulmonary congestion and hypostasis
5173	Acute chest syndrome
5184	Acute edema of lung, unspecified
5185	Pulmonary insufficiency following trauma and surgery
51882	Other pulmonary insufficiency, not elsewhere classified
51884	Acute and chronic respiratory failure
51919	Other diseases of trachea and bronchus
53081	Esophageal reflux
57410	Calculus of gallbladder with other cholecystitis, without mention of obstruction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64201	Benign essential hypertension with delivery
64202	Benign essential hypertension, with delivery, with mention of postpartum complication
64203	Antepartum benign essential hypertension
64204	Postpartum benign essential hypertension
64251	Severe pre-eclampsia, with delivery
64252	Severe pre-eclampsia, with delivery, with mention of postpartum complication
64253	Severe pre-eclampsia, antepartum
64254	Severe pre-eclampsia, postpartum
64850	Congenital cardiovascular disorders of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64851	Congenital cardiovascular disorders of mother, with delivery
64852	Congenital cardiovascular disorders of mother, with delivery, with mention of postpartum complication
64853	Congenital cardiovascular disorders of mother, antepartum
64854	Congenital cardiovascular disorders of mother, postpartum
65420	Previous cesarean delivery, unspecified as to episode of care in pregnancy
65423	Previous cesarean delivery, antepartum condition or complication
66810	Cardiac complications of anesthesia or other sedation in labor and delivery, unspecified as to episode of care
66811	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered
66812	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered, with mention of postpartum complication
66813	Cardiac complications of anesthesia or other sedation in labor and delivery, antepartum
66814	Cardiac complications of anesthesia or other sedation in labor and delivery, postpartum
66971	Cesarean delivery, without mention of indication, delivered, with or without mention of antepartum condition

Diagnosis Code	Description
67450	Peripartum cardiomyopathy, unspecified as to episode of care or not applicable
67451	Peripartum cardiomyopathy, delivered, with or without mention of antepartum condition
67452	Peripartum cardiomyopathy, delivered, with mention of postpartum condition
67453	Peripartum cardiomyopathy, antepartum condition or complication
67454	Peripartum cardiomyopathy, postpartum condition or complication
7100	Systemic lupus erythematosus
7142	Other rheumatoid arthritis with visceral or systemic involvement
71941	Pain in joint involving shoulder region
7200	Ankylosing spondylitis
7231	Cervicalgia
7295	Pain in limb
7336	Tietze’s disease
7450	Common truncus
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
74519	Other transposition of great vessels
7452	Tetralogy of fallot
7452	Tetralogy of fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects
7457	Cor biloculare
7458	Other bulbus cordis anomalies and anomalies of cardiac septal closure
7459	Unspecified defect of septal closure
74600	Congenital pulmonary valve anomaly, unspecified
74601	Atresia of pulmonary valve, congenital
74602	Stenosis of pulmonary valve, congenital
74609	Other congenital anomalies of pulmonary valve

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
7461	Tricuspid atresia and stenosis, congenital
7462	Ebstein's anomaly
7463	Congenital stenosis of aortic valve
7464	Congenital insufficiency of aortic valve
7465	Congenital mitral stenosis
7466	Congenital mitral insufficiency
7467	Hypoplastic left heart syndrome
74681	Subaortic stenosis, congenital
74682	Cor triatriatum
74683	Infundibular pulmonic stenosis, congenital
74684	Congenital obstructive anomalies of heart, not elsewhere classified
74685	Coronary artery anomaly, congenital
74686	Congenital heart block
74687	Malposition of heart and cardiac apex
74689	Other specified congenital anomalies of heart
7469	Unspecified congenital anomaly of heart
7470	Patent ductus arteriosus
74710	Coarctation of aorta (preductal) (postductal)
74711	Interruption of aortic arch
74720	Congenital anomaly of aorta, unspecified
74721	Congenital anomalies of aortic arch
74722	Congenital atresia and stenosis of aorta
74729	Other congenital anomalies of aorta
7473	Congenital anomalies of pulmonary artery
74740	Congenital anomaly of great veins, unspecified
74741	Total anomalous pulmonary venous connection
74742	Partial anomalous pulmonary venous connection
74749	Other anomalies of great veins
7580	Down's syndrome
7593	Situs inversus
75982	Marfan syndrome
78001	Coma
78002	Transient alteration of awareness
78003	Persistent vegetative state
78009	Alteration of consciousness, other
7802	Syncope and collapse
7804	Dizziness and giddiness
78079	Other malaise and fatigue
7808	Generalized hyperhidrosis
7815	Clubbing of fingers
7823	Edema
7825	Cyanosis
7850	Tachycardia, unspecified
7851	Palpitations
7852	Undiagnosed cardiac murmurs
7853	Other abnormal heart sounds
78550	Shock, unspecified
78551	Cardiogenic shock
78552	Septic shock
78559	Other shock without mention of trauma
78600	Respiratory abnormality, unspecified
78602	Orthopnea
78605	Shortness of breath
78609	Other
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
78701	Nausea with vomiting
78702	Nausea alone
78703	Vomiting alone
7871	Heartburn
78900	Abdominal pain, unspecified site
78907	Abdominal pain, generalized
78960	Abdominal tenderness, unspecified site
79001	Precipitous drop in hematocrit
79009	Other abnormality of red blood cells
7904	Nonspecific elevation of levels of transaminase or lactic acid dehydrogenase (ldh)
7905	Other nonspecific abnormal serum enzyme levels
7906	Other abnormal blood chemistry
7932	Nonspecific abnormal findings on radiological and other examination of other intrathoracic organs
79430	Unspecified abnormal function study of cardiovascular system
79431	Nonspecific abnormal electrocardiogram (ECG) (EKG)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
79439	Other nonspecific abnormal function study of cardiovascular system
7991	Respiratory arrest
8072	Closed fracture of sternum
8073	Open fracture of sternum
8074	Flail chest
8600	Traumatic pneumothorax without mention of open wound into thorax
8601	Traumatic pneumothorax with open wound into thorax
8602	Traumatic hemothorax without mention of open wound into thorax
8603	Traumatic hemothorax with open wound into thorax
8604	Traumatic pneumohemothorax without mention of open wound into thorax
8605	Traumatic pneumohemothorax with open wound into thorax
86100	Unspecified injury of heart without mention of open wound into thorax
86101	Contusion of heart without mention of open wound into thorax
86102	Laceration of heart without penetration of heart chambers or open wound into thorax
86103	Laceration of heart with penetration of heart chambers, without mention of open wound into thorax
86110	Unspecified injury of heart with open wound into thorax
86111	Contusion of heart with open wound into thorax
86112	Laceration of heart without penetration of heart chambers, with open wound into thorax
86113	Laceration of heart with penetration of heart chambers and open wound into thorax
8628	Injury to multiple and unspecified intrathoracic organs without mention of open wound into cavity
8629	Injury to multiple and unspecified intrathoracic organs with open wound into cavity
90000	Injury to carotid artery, unspecified
90001	Injury to common carotid artery
90002	Injury to external carotid artery
90003	Injury to internal carotid artery
9001	Injury to internal jugular vein
9010	Injury to thoracic aorta

Diagnosis Code	Description
9011	Injury to innominate and subclavian arteries
9012	Injury to superior vena cava
9013	Injury to innominate and subclavian veins
90140	Injury to pulmonary vessel(s), unspecified
90141	Injury to pulmonary artery
90142	Injury to pulmonary vein
90181	Injury to intercostal artery or vein
90182	Injury to internal mammary artery or vein
90183	Injury to multiple blood vessels of thorax
9221	Contusion of chest wall
9584	Traumatic shock
9607	Poisoning by antineoplastic antibiotics
9631	Poisoning by antineoplastic and immunosuppressive drugs
96509	Poisoning by other opiates and related narcotics
9720	Poisoning by cardiac rhythm regulators
9721	Poisoning by cardiotonic glycosides and drugs of similar action
9722	Poisoning by antilipemic and antiarteriosclerotic drugs
9723	Poisoning by ganglion-blocking agents
9724	Poisoning by coronary vasodilators
9725	Poisoning by other vasodilators
9726	Poisoning by other antihypertensive agents
9727	Poisoning by antivaricose drugs, including sclerosing agents
9728	Poisoning by capillary-active drugs
9729	Poisoning by other and unspecified agents primarily affecting the cardiovascular system
9779	Poisoning by unspecified drug or medicinal substance
986	Toxic effect of carbon monoxide
9893	Toxic effect of organophosphate and carbamate
9894	Toxic effect of other pesticides, not elsewhere classified
9895	Toxic effect of venom
9920	Heat stroke and sunstroke
9921	Heat syncope
9940	Effects of lightning

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9941	Drowning and nonfatal submersion
9947	Asphyxiation and strangulation
9948	Electrocution and nonfatal effects of electric current
9950	Other anaphylactic shock, not elsewhere classified
99522	Unspecified adverse effect of anesthesia
99523	Unspecified adverse effect of insulin
99527	Other drug allergy
99600	Mechanical complications of unspecified cardiac device, implant, and graft
99601	Mechanical complication due to cardiac pacemaker (electrode)
99602	Mechanical complication due to heart valve prosthesis
99603	Mechanical complication due to coronary bypass graft
99604	Mechanical complication of automatic implantable card
99609	Other mechanical complication of cardiac device, implant, and graft
99661	Infection and inflammatory reaction due to cardiac device, implant, and graft
99671	Other complications due to heart valve prosthesis
99672	Other complications due to other cardiac device, implant, and graft
99683	Complications of transplanted heart
9971	Cardiac complications, not elsewhere classified
9980	Postoperative shock, not elsewhere classified
9993	Other infection due to medical care, not elsewhere classified
9994	Anaphylactic shock due to serum, not elsewhere classified
V151	Personal history of surgery to heart and great vessels, presenting hazards to health
V252	Sterilization
V421	Heart replaced by transplant
V422	Heart valve replaced by transplant
V426	Lung replaced by transplant
V4321	Organ or tissue replaced by other means, heart assist device
V433	Heart valve replaced by other means
V4500	Unspecified cardiac device in situ
V4501	Cardiac pacemaker in situ
V4502	Automatic implantable cardiac defibrillator in situ
V4509	Other specified cardiac device in situ
V4581	Postsurgical aortocoronary bypass status
V4582	Percutaneous transluminal coronary angioplasty status
V472	Other cardiorespiratory problems
V4983	Awaiting organ transplant status
V533	Fitting and adjustment of cardiac device
V5331	Fitting and adjustment of cardiac pacemaker
V5332	Fitting and adjustment of automatic implantable cardiac defibrillator
V5339	Fitting and adjustment of other cardiac device
V5631	Encounter for adequacy testing for hemodialysis
V5632	Encounter for adequacy testing for peritoneal dialysis
V5844	Aftercare following organ transplant
V5869	Long-term (current) use of other medications
V717	Observation for suspected cardiovascular disease
V7281	Pre-operative cardiovascular examination
V7284	Pre-operative examination, unspecified

EKG interpretations are payable. The EKG codes for which interpretation components are paid are I-93010, and I-93042.

36.4.9.10 Esophageal pH Probe Monitoring

Esophageal pH monitoring uses an indwelling pH microelectrode positioned just above the esophageal sphincter. The pH electrode and skin reference electrode are connected to a battery-powered pH meter and transmitter worn as a shoulder harness. The esophageal pH is monitored continuously and a strip chart is used to record the pH determinations. The patient is usually monitored for a 24-hour period. Esophageal pH monitoring is a medically appropriate adjunct procedure to help establish the presence or absence of gastroesophageal reflux.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following diagnosis codes are payable for esophageal pH probe monitoring or gastroesophageal reflux study to evaluate esophageal reflux:

Diagnosis Code	Description
5070	Pneumonitis due to inhalation of food or vomitus
53010	Esophagitis, unspecified
53011	Reflux esophagitis
53012	Acute esophagitis
53020	Ulcer of esophagus without bleeding
53021	Ulcer of esophagus with bleeding
53019	Other esophagitis
53081	Esophageal reflux
53085	Barrett's esophagus
53086	Infection of esophagostomy
53087	Mechanical complication of esophagostomy
7700	Congenital pneumonia
77010	Fetal and newborn aspiration, unspecified
77011	Meconium aspiration without respiratory symptoms
77012	Meconium aspiration with respiratory symptoms
77013	Aspiration of clear amniotic fluid without respiratory symptoms
77014	Aspiration of clear amniotic fluid with respiratory symptoms
77015	Aspiration of blood without respiratory symptoms
77016	Aspiration of blood with respiratory symptoms
77017	Other fetal and newborn aspiration without respiratory symptoms
77018	Other fetal and newborn aspiration with respiratory symptoms
7708	Other respiratory problems after birth
77087	Respiratory arrest of newborn
77088	Hypoxemia of newborn
7833	Feeding difficulties and mismanagement
78603	Apnea
78605	Shortness of Breath
78606	Tachypnea
78607	Wheezing
78609	Symptoms involving respiratory system and other chest symptoms; other

Esophageal pH probe monitoring should be coded with the following procedure codes: 2/F-91034, 2/F-91035, and 4/I/T-78262.

36.4.9.11 Electromyography (EMG)

Electromyography (EMG) is reimbursed by the Texas Medicaid Program using the following procedure codes:

Procedure Codes		
5/I/T-95860	5/I/T-95861	5/I/T-95863
5/I/T-95864	5/I/T-95867	5/I/T-95868
5/I/T-95869	5/I/T-95872	5/I/T-95875

Separate charges for more than one extremity EMG is combined and coded as the appropriate multiple extremity EMG code. A maximum of four EMGs may be paid on the same day to the same provider. More than four EMGs are denied with EOB 00103, "Services exceed allowed benefit limitations."

EMG used for the treatment of pathological muscle abnormalities or other disorders of the musculoskeletal system are considered a physical therapy procedure and are paid according to the physical therapy guidelines.

36.4.9.12 Helicobacter Pylori (H. Pylori)

The following procedure codes are covered services: 5-83013, 5-83014, 5-87338, and 5-87339.

These codes are considered to be clinical lab services and must be billed using TOS 5. The interpretation/professional component TOS I is not separately reimbursed.

When a gastrointestinal endoscopy (GED), procedure codes 2-43200, 2-43202, 2-43234, 2-43235, and 2-43239, is performed within 90 days of the H. pylori breath test or stool test, the GED is denied. The TMHP Medical Director reviews claims for payment when submitted with documentation supporting the medical necessity for the GED.

The tests available for the diagnosis of Helicobacter pylori infection differ with respect to sensitivity, specificity, invasiveness, cost, and in the additional information that they provide. The appropriate choice of test depends on the clinical situation. The following clinical scenarios are appropriate for use of the H. pylori breath test:

- Patients with classic relatively uncomplicated symptoms of peptic ulcer disease for whom antibiotic therapy is planned, if the H. pylori breath test is positive, and no GED is planned.
- Patients who have nonspecific dyspeptic symptoms with a positive H. pylori serum antibody test, and no endoscopy is planned.
- An upper gastrointestinal contrast X-ray series has been done that shows a duodenal ulcer or significant gastritis and/or duodenitis, and no endoscopy is planned.
- Persistent or recurrent symptoms occur six weeks after treatment for a documented H. pylori infection, and no endoscopy is planned.

CPT only copyright 2005 American Medical Association. All rights reserved.

The H. pylori breath test is considered not medically necessary for patients who:

- Are being screened for H. pylori infection in the absence of documented upper gastrointestinal tract symptoms and/or pathology.
- Have had upper gastrointestinal endoscopies within the preceding 6 weeks or upper gastrointestinal endoscopies are planned.
- Have nonspecific dyspeptic symptoms with a negative H. pylori serum antibody test.
- Are asymptomatic after treatment of H. pylori infections (either proven or suspected) except in the situation of a history of a major complication of ulcer disease such as bleeding, perforation, penetration, or multiple recurrences, in which case an H. pylori breath test may be used to document eradication of the infection in lieu of a follow-up endoscopy.

Based on cure rates for H. pylori infection with the currently accepted regimens using antibiotics, repeat endoscopy or H. pylori breath test would be expected in less than 30 percent of patients with H. pylori infection associated with duodenal ulcer and/or gastritis/duodenitis.

Reimbursement for the H. pylori stool test is restricted to the following diagnosis codes:

Diagnosis Code	Description
53100	Acute gastric ulcer with hemorrhage, without mention of obstruction
53101	Acute gastric ulcer with hemorrhage, with obstruction
53110	Acute gastric ulcer with perforation, without mention of obstruction
53111	Acute gastric ulcer with perforation, with obstruction
53120	Acute gastric ulcer with hemorrhage and perforation, without mention of obstruction
53121	Acute gastric ulcer with hemorrhage and perforation, with obstruction
53130	Acute gastric ulcer without mention of hemorrhage or perforation, without mention of obstruction
53131	Acute gastric ulcer without mention of hemorrhage or perforation, with obstruction
53140	Chronic or unspecified gastric ulcer with hemorrhage, without mention of obstruction
53141	Chronic or unspecified gastric ulcer with hemorrhage, with obstruction
53150	Chronic or unspecified gastric ulcer with perforation, without mention of obstruction
53151	Chronic or unspecified gastric ulcer with perforation, with obstruction
53160	Chronic or unspecified gastric ulcer with hemorrhage and perforation, without mention of obstruction
53161	Chronic or unspecified gastric ulcer with hemorrhage and perforation, with obstruction
53170	Chronic gastric ulcer without mention of hemorrhage or perforation, without mention of obstruction
53171	Chronic gastric ulcer without mention of hemorrhage or perforation, with obstruction
53190	Gastric ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, without mention of obstruction
53191	Gastric ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53200	Acute duodenal ulcer with hemorrhage, without mention of obstruction
53201	Acute duodenal ulcer with hemorrhage, with obstruction
53210	Acute duodenal ulcer with perforation, without mention of obstruction
53211	Acute duodenal ulcer with perforation, with obstruction
53220	Acute duodenal ulcer with hemorrhage and perforation, without mention of obstruction
53221	Acute duodenal ulcer with hemorrhage and perforation, with obstruction
53230	Acute duodenal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53231	Acute duodenal ulcer without mention of hemorrhage or perforation, with obstruction
53240	Chronic or unspecified duodenal ulcer with hemorrhage, without mention of obstruction
53241	Chronic or unspecified duodenal ulcer with hemorrhage, with obstruction
53250	Chronic or unspecified duodenal ulcer with perforation, without mention of obstruction
53251	Chronic or unspecified duodenal ulcer with perforation, with obstruction
53260	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, without mention of obstruction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
53261	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, with obstruction
53270	Chronic duodenal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53271	Chronic duodenal ulcer without mention of hemorrhage or perforation, with obstruction
53290	Duodenal ulcer, unspecified as acute or chronic, without hemorrhage or perforation, without mention of obstruction
53291	Duodenal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53400	Acute gastrojejunal ulcer with hemorrhage, without mention of obstruction
53401	Acute gastrojejunal ulcer, with hemorrhage, with obstruction
53410	Acute gastrojejunal ulcer with perforation, without mention of obstruction
53411	Acute gastrojejunal ulcer with perforation, with obstruction
53420	Acute gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction
53421	Acute gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53430	Acute gastrojejunal ulcer without mention of hemorrhage or perforation, without mention of obstruction
53431	Acute gastrojejunal ulcer without mention of hemorrhage or perforation, with obstruction
53440	Chronic or unspecified gastrojejunal ulcer with hemorrhage, without mention of obstruction
53441	Chronic or unspecified gastrojejunal ulcer, with hemorrhage, with obstruction
53450	Chronic or unspecified gastrojejunal ulcer with perforation, without mention of obstruction
53451	Chronic or unspecified gastrojejunal ulcer with perforation, with obstruction
53460	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction

Diagnosis Code	Description
53461	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53470	Chronic gastrojejunal ulcer without mention of hemorrhage or perforation, without mention of obstruct
53471	Chronic gastrojejunal ulcer without mention of hemorrhage or perforation, with obstruction s
53490	Gastrojejunal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, without mention of obstruction
53491	Gastrojejunal ulcer, unspecified as acute or chronic, without mention of hemorrhage or perforation, with obstruction
53500	Acute gastritis (without mention of hemorrhage)
53501	Acute gastritis with hemorrhage
53510	Atrophic gastritis (without mention of hemorrhage)
53511	Atrophic gastritis with hemorrhage
53550	Unspecified gastritis and gastroduodenitis (without mention of hemorrhage)
53551	Unspecified gastritis and gastroduodenitis with hemorrhage
53560	Duodenitis (without mention of hemorrhage)
53561	Duodenitis with hemorrhage
5368	Dyspepsia and other specified disorders of function of stomach
78901	Abdominal pain, right upper quadrant
78902	Abdominal pain, left upper quadrant
78906	Abdominal pain, epigastric

36.4.9.13 Mammograms

Mammography is an essential appropriate diagnostic radiology technique for breast cancer detection.

To maximize the diagnosis of breast cancer at the earliest time, the diagnostic radiology procedure of mammography must be used on a reasonable basis in a timely manner. Physical examination supplemented by patient self-examination remains the principle diagnostic modality for women with an examination every year.

CPT only copyright 2005 American Medical Association. All rights reserved.

After 35 years of age, the physical examination should be augmented by the diagnostic radiology procedure of mammography on the following nationally recognized schedule, even if no symptoms are present:

Age Category	Description
Women 35 to 39	Baseline mammogram in conjunction with a professional breast examination
Women 40 and older	Mammogram every year in conjunction with a professional breast examination

The above schedule is recommended; however, claims received for this service will not be monitored for frequency of testing.

Mammography is payable with an appropriate diagnosis.

The use of mammography as an augmentation to the physical examination on the schedule above is limited to females.

The following procedure codes are payable for diagnostic radiological mammography: 4/I/T-76090, 4/I/T-76091, and 4/I/T-76092.

A mammogram may, in rare instances, be indicated in a male, based on medical necessity because of existing signs and symptoms. In such rare circumstances, the procedure codes 4/I/T-76090 and 4/I/T-76091 are payable.

A mammogram may be medically necessary based on existing signs and symptoms, and may be performed without regard to the above schedule when medically indicated.

Other breast diagnostic radiology procedures may be medically necessary based on existing signs and symptoms. When indicated, such procedures are payable. However, the mammography codes 4/I/T-76090, 4/I/T-76091, and 4/I/T-76092 are denied when billed on the same day as the following diagnostic radiological procedures: 4/I/T-76086, 4/I/T-76088, 4/I/T-76095, 4/I/T-76096, and 4/I/T-76098.

Digital mammography may be considered for reimbursement in addition to screening and diagnostic mammography by using the following procedure codes:

- 4/I/T-76082—Computer aided detection (computer algorithm analysis of digital image data for lesion detection) with further physician review for interpretation, with or without digitization of film radiographic images; diagnostic mammography (list separately in addition to code for primary procedure).
- 4/I/T-76083—Computer aided detection (computer algorithm analysis of digital image data for lesion detection) with further physician review for interpretation, with or without digitization of film radiographic images; screening mammography (list separately in addition to code for primary procedure).

36.4.9.14 MRI of the Breast

MRI of the breast requires prior authorization and documentation by the physician explaining the need for the breast MRI. Procedure codes 4/I/T-76093 and 4/I/T-76094 may be considered for reimbursement when billing for a breast MRI.

36.4.9.15 Myocardial Perfusion Imaging

Myocardial perfusion imaging, using radionuclides, is a noninvasive stress test that measures coronary blood flow (perfusion), especially to the left ventricle.

Myocardial perfusion imaging is a covered benefit of the Medicaid program when medically indicated. Myocardial perfusion imaging studies will be limited to one study per day. This service includes, but is not limited to, the following procedures: 4/I/T-78460, 4/I/T-78461, 4/I/T-78464, and 4/I/T-78465.

When multiple procedure codes are billed, the most inclusive code will be paid, and all other codes will be denied.

Myocardial perfusion imaging may be performed at rest and/or during stress using physical exercise or pharmacologicals. The following procedure codes may be used to bill for cardiovascular stress testing: 5-93015, T-93017, and I-93018.

36.4.9.16 Nerve Conduction Studies

Nerve conduction studies are indicated whenever a need exists to locate neurologic or muscular symptomatology more precisely in post-traumatic circumstances or general widespread conditions affecting the entire neuromuscular system.

Code nerve conduction studies are as follows: 5-95900, 5-95903, 5-95904, 5-95934, and 5-95936.

Procedure codes 5-95900, 5-95903, and/or 5-95904 are reimbursed in full for the first nerve study and half for each additional study, regardless of the number of studies. Procedure code 5-95934 and/or 5-95936 are reimbursed in full when performed with procedure codes 5-95900, 5-95903, and/or 5-95904 in addition to the reimbursement for the codes 5-95900, 5-95903, and 5-95904, as outlined previously. If 5-95934 and 5-95936 are billed in multiples, the first is reimbursed in full, and all additional studies are reimbursed at half the fee.

Nerve conduction studies repeated within a three-month period on the same client by the same provider are denied except for the following diagnosis codes:

Diagnosis Code	Description
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
25061	Diabetes with neurological manifestations, type I (juvenile type), not stated as uncontrolled

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
25062	Diabetes with neurological manifestations, type II or unspecified type, uncontrolled
25063	Diabetes with neurological manifestations, type I (juvenile type), uncontrolled
2650	Beriberi
2652	Pellagra
2692	Unspecified vitamin deficiency
2699	Unspecified nutritional deficiency
2771	Disorders of porphyrin metabolism
27730	Amyloidosis, unspecified
27739	Other amyloidosis
27781	Primary carnitine deficiency
27782	Carnitine deficiency due to inborn errors of metabolism
27783	Latrogenic carnitine deficiency
27784	Other secondary carnitine deficiency
27789	Other specified disorders of metabolism
3525	Disorders of hypoglossal (12th) nerve
3541	Other lesion of median nerve
3552	Other lesion of femoral nerve
3553	Lesion of lateral popliteal nerve
3558	Mononeuritis of lower limb, unspecified
3560	Hereditary peripheral neuropathy
3564	Idiopathic progressive polyneuropathy
3569	Unspecified idiopathic peripheral neuropathy
3575	Alcoholic polyneuropathy
3576	Polyneuropathy due to drugs
3577	Polyneuropathy due to other toxic agents
35781	Chronic inflammatory demyelinating polyneuritis
35782	Critical illness polyneuropathy
35789	Other inflammatory and toxic neuropathy
7220	Displacement of cervical intervertebral disc without myelopathy
72210	Displacement of lumbar intervertebral disc without myelopathy
72211	Displacement of thoracic intervertebral disc without myelopathy
7222	Displacement of intervertebral disc, site unspecified, without myelopathy
7234	Brachial neuritis or radiculitis NOS
7292	Neuralgia, neuritis, and radiculitis, unspecified
7295	Pain in limb

36.4.9.17 Pediatric Pneumogram

A pneumogram is a 12-hour to 24-hour recording of breathing effort, heart rate, oxygen level, and airflow to the lungs during sleep. The study is useful in identifying abnormal breathing patterns, with or without bradycardia, especially in premature infants.

Use procedure code 5/I/T-94772 when billing for the pediatric pneumogram.

The following diagnosis codes are payable for a pediatric pneumogram in infants up through 11 months of age:

Diagnosis Code	Description
5300	Achalasia and cardiospasm
53010	Esophagitis, unspecified
53011	Reflux esophagitis
53012	Acute esophagitis
53019	Other esophagitis
53081	Esophageal reflux
7685	Severe birth asphyxia
7686	Mild to moderate birth asphyxia
7689	Unspecified birth asphyxia in liveborn infant
769	Respiratory distress syndrome
7707	Chronic respiratory disease arising in the perinatal period
77081	Primary apnea of newborn
77082	Other apnea of newborn
77083	Cyanotic attacks of newborn
77084	Respiratory failure of newborn
77087	Respiratory arrest of newborn
77088	Hypoxemia of newborn
77089	Other respiratory problems after birth
78603	Apnea
78606	Tachypnea
78607	Wheezing
78609	Other dyspnea and respiratory abnormalities

Electromyograms (EMGs), polysomnography, EEGs, and ECGs will be denied when billed on the same day as a pediatric pneumogram.

Pediatric pneumograms may be reimbursed on the same date of service as an apnea monitor (rented monthly) if documentation supports the medical necessity.

CPT only copyright 2005 American Medical Association. All rights reserved.

Pneumogram supplies are considered part of the technical component of the reimbursement and will be denied if billed separately.

A pediatric pneumogram will be limited to two services without prior authorization based on the diagnosis codes listed in the previous table. Additional studies may be considered under THSteps-CCP with documentation of medical necessity, and will require prior authorization.

36.4.10 Doppler Studies

A Doppler examination is a noninvasive procedure that detects blood flow velocity within an artery or vein. It is commonly used to detect stenosis or occlusion of an artery or vein.

Some of the specific studies done using the Doppler ultrasound are as follows:

- Cerebrovascular evaluation—usually a peripheral flow study (arterial) is performed.
- Thrombosis evaluation—usually a peripheral vascular study (venous) is performed.
- Plethysmography technique—arterial and/or venous outflow studies, usually done as a pre-operative and post-operative evaluation.
- Evaluation of arteriovenous fistula or malformation.
- Evaluation of arteriovenous shunt.

36.4.10.1 Noninvasive Diagnostic Studies

Doppler studies of the *extracranial arteries* (4/I/T-93875, 4/I/T-93880, and 4/I/T-93882) are limited to the following diagnosis codes:

Diagnosis Code	Description
36230	Retinal vascular occlusion, unspecified
36231	Central retinal artery occlusion
36232	Retinal arterial branch occlusion
36233	Partial retinal arterial occlusion
36234	Transient retinal arterial occlusion
36284	Retinal ischemia
36811	Sudden visual loss
36812	Transient visual loss
3682	Diplopia
36840	Visual field defect, unspecified
36841	Scotoma involving central area
36842	Scotoma of blind spot area
36843	Sector or arcuate visual field defects
36844	Other localized visual field defect
36845	Generalized visual field contraction or constriction
36846	Homonymous bilateral field defects
36847	Heteronymous bilateral field defects
43310	Occlusion and stenosis of carotid artery without mention of cerebral infarction
43311	Occlusion and stenosis of carotid artery with cerebral infarction
43320	Occlusion and stenosis of vertebral artery without mention of cerebral infarction
43321	Occlusion and stenosis of vertebral artery with cerebral infarction
43330	Occlusion and stenosis of multiple and bilateral precerebral arteries without mention of cerebral infarction
43331	Occlusion and stenosis of multiple and bilateral precerebral arteries with cerebral infarction
4352	Subclavian steal syndrome
4353	Vertebrobasilar artery syndrome
4358	Other specified transient cerebral ischemias
4359	Unspecified transient cerebral ischemia
436	Acute, but ill-defined, cerebrovascular disease
44100	Dissection of aorta, unspecified site
44321	Aneurysm of renal artery
44281	Aneurysm of artery of neck
44323	Dissection of renal artery
44329	Dissection of other artery
44589	Other peripheral vascular disease
4531	Thrombophlebitis migrans
7802	Syncope and collapse
78094	Early satiety
7843	Aphasia
78552	Septic shock
7859	Other symptoms involving cardiovascular system
90000	Injury to carotid artery, unspecified
90001	Injury to common carotid artery
90002	Injury to external carotid artery
90003	Injury to internal carotid artery
9961	Mechanical complication of other vascular device, implant, and graft

CPT only copyright 2005 American Medical Association. All rights reserved.

Doppler studies of the *intracranial arteries* (4/I/T-93886, 4/I/T-93888, 4/I/T-93890, 4/I/T-93892, and 4/I/T-93893) are limited to the following diagnosis codes:

Diagnosis Code	Description
34830	Encephalopathy, unspecified
34831	Metabolic encephalopathy
34839	Other encephalopathy
3488	Other conditions of brain
430	Ptosis of eyelid, unspecified
43400	Cerebral thrombosis without mention of cerebral infarction
43401	Cerebral thrombosis with cerebral infarction
43410	Cerebral embolism without mention of cerebral infarction
43411	Cerebral embolism with cerebral infarction
43490	Cerebral artery occlusion, unspecified without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified with cerebral infarction
4351	Vertebral artery syndrome
4352	Subclavian steal syndrome
4353	Vertebrobasilar artery syndrome
4358	Other specified transient cerebral ischemias
4359	Unspecified transient cerebral ischemia
4370	Cerebral atherosclerosis
4430	Raynaud's syndrome
44381	Peripheral angiopathy in diseases classified elsewhere
4439	Peripheral vascular disease, unspecified
4471	Stricture of artery
74781	Septic shock
74782	Spinal vessel anomaly
74783	Persistent fetal circulation
74789	Unspecified congenital anomaly of respiratory system
78552	Septic shock

Doppler studies of the *extremity arteries* (4/I/T-93922, 4/I/T-93923, 4/I/T-93924, 4/I/T-93925, 4/I/T-93926, 4/I/T-93930, and 4/I/T-93931) are limited to the following diagnosis codes:

Diagnosis Code	Description
4439	Peripheral vascular disease, unspecified
4440	Embolism and thrombosis of abdominal aorta
4441	Embolism and thrombosis of thoracic aorta
44421	Arterial embolism and thrombosis of upper extremity
44422	Arterial embolism and thrombosis of lower extremity
44481	Embolism and thrombosis of iliac artery
44489	Embolism and thrombosis of other artery
4466	Thrombotic microangiopathy
4467	Takayasu's disease
4470	Arteriovenous fistula, acquired
60782	Vascular disorders of penis
60784	Impotence of organic origin
70710	Unspecified ulcer of lower limb
70711	Ulcer of thigh
70712	Ulcer of calf
70713	Ulcer of ankle
70714	Ulcer of heel and midfoot
70715	Ulcer of other part of foot
70719	Ulcer of other part of lower limb
7854	Gangrene
78552	Septic shock
90300	Injury to axillary vessel(s), unspecified
90301	Injury to axillary artery
9031	Injury to brachial blood vessels
9032	Injury to radial blood vessels
9033	Injury to ulnar blood vessels
9034	Injury to palmar artery
9035	Injury to digital blood vessels
9038	Injury to other specified blood vessels of upper extremity
9039	Injury to unspecified blood vessel of upper extremity
9040	Injury to common femoral artery
9041	Injury to superficial femoral artery
90440	Injury to popliteal vessel(s), unspecified
90441	Injury to popliteal artery
90450	Injury to tibial vessel(s), unspecified
90451	Injury to anterior tibial artery
90453	Injury to posterior tibial artery
92300	Contusion of shoulder region
92301	Contusion of scapular region
92302	Contusion of axillary region

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
92303	Contusion of upper arm
92309	Contusion of multiple sites of shoulder and upper arm
92310	Contusion of forearm
92311	Contusion of elbow
92320	Contusion of hand(s)
92321	Contusion of wrist
9233	Contusion of finger
9238	Contusion of multiple sites of upper limb
9239	Contusion of unspecified part of upper limb
92400	Contusion of thigh
92401	Contusion of hip
92410	Contusion of lower leg
92411	Contusion of knee
92420	Contusion of foot
92421	Contusion of ankle
9243	Contusion of toe
9244	Contusion of multiple sites of lower limb
9245	Contusion of unspecified part of lower limb
9248	Contusion of multiple sites, not elsewhere classified
9249	Contusion of unspecified site
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9961	Mechanical complication of other vascular device, implant, and graft
99690	Complications of unspecified reattached extremity
99691	Complications of reattached forearm
99692	Complications of reattached hand
99693	Complications of reattached finger(s)
99694	Complications of reattached upper extremity, other and unspecified
99695	Complication of reattached foot and toe(s)
99696	Complication of reattached lower extremity, other and unspecified
99699	Complication of other specified reattached body part

Doppler studies of the *extremity veins* (4/I/T-93965, 4/I/T-93970, and 4/I/T-93971) are limited to the following diagnosis codes:

Diagnosis Code	Description
4510	Phlebitis and thrombophlebitis of superficial vessels of lower extremities
45111	Phlebitis and thrombophlebitis of femoral vein (deep) (superficial)
45119	Phlebitis and thrombophlebitis of other
4512	Phlebitis and thrombophlebitis of lower extremities, unspecified
45181	Phlebitis and thrombophlebitis of iliac vein
45182	Phlebitis and thrombophlebotis of superficial veins of upper extremities
45183	Phlebitis and thrombophlebitis of deep veins of upper extremities
45184	Phlebitis and thrombophlebitis of upper extremities, unspecified
45189	Phlebitis and thrombophlebitis of other sites
4519	Phlebitis and thrombophlebitis of unspecified site
4530	Budd-Chiari syndrome
4531	Thrombophlebitis migrans
4532	Embolism and thrombosis of vena cava

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4533	Embolism and thrombosis of renal vein
45340	Venous embolism and thrombosis of unspecified deep vessels of lower extremity
45341	Venous embolism and thrombosis of deep vessels of proximal lower extremity
45342	Venous embolism and thrombosis of deep vessels of distal lower extremity
4538	Embolism and thrombosis of other specified veins
4539	Embolism and thrombosis of unspecified site
4548	Varicose veins of the lower extremities, with other complications
45910	Postphlebetic syndrome without complications
45911	Postphlebetic syndrome with ulcer
45912	Postphlebetic syndrome with inflammation
45913	Postphlebetic syndrome with ulcer and inflammation
45919	Postphlebetic syndrome with other complication
60784	Impotence of organic origin
60785	Peyronie's disease
70710	Unspecified ulcer of lower limb
70711	Ulcer of thigh
70712	Ulcer of calf
70713	Ulcer of ankle
70714	Ulcer of heel and midfoot
70715	Ulcer of other part of foot
70719	Ulcer of other part of lower limb
7823	Edema
78552	Septic shock
90300	Injury to axillary vessel(s), unspecified
90302	Injury to axillary vein
9031	Injury to brachial blood vessels
9032	Injury to radial blood vessels
9033	Injury to ulnar blood vessels
9035	Injury to digital blood vessels
9038	Injury to other specified blood vessels of upper extremity
9039	Injury to unspecified blood vessel of upper extremity
9042	Injury to femoral veins

Diagnosis Code	Description
9043	Injury to saphenous veins
9044	Injury to popliteal blood vessels
90442	Injury to popliteal vein
90450	Injury to tibial vessel(s), unspecified
90452	Injury to anterior tibial vein
90454	Injury to posterior tibial vein
9046	Injury to deep plantar blood vessels
9047	Injury to other specified blood vessels of lower extremity
9048	Injury to unspecified blood vessel of lower extremity
9049	Injury to blood vessels of unspecified site
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9961	Mechanical complication of other vascular device, implant, and graft
99690	Complications of unspecified reattached extremity
99691	Complications of reattached forearm
99692	Complications of reattached hand
99693	Complications of reattached finger(s)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
99694	Complications of reattached upper extremity, other and unspecified
99695	Complication of reattached foot and toe(s)
99696	Complication of reattached lower extremity, other and unspecified
99699	Complication of other specified reattached body part
9972	Peripheral vascular complications, not elsewhere classified

Procedure code 4/I/T-93325 is payable for the following diagnosis codes:

Diagnosis Code	Description
3911	Acute rheumatic endocarditis
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified
39890	Rheumatic heart disease, unspecified
41406	Coronary atherosclerosis of native coronary artery of transplanted heart
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of transplanted heart
41411	Aneurysm of coronary vessels
4150	Acute cor pulmonale
4160	Primary pulmonary hypertension
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4178	Other specified diseases of pulmonary circulation
4210	Acute and subacute bacterial endocarditis
42291	Idiopathic myocarditis
42292	Septic myocarditis
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4251	Hypertrophic obstructive cardiomyopathy
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4259	Secondary cardiomyopathy, unspecified
4280	Congestive heart failure
7450	Common truncus
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
7452	Tetralogy of fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
74600	Congenital pulmonary valve anomaly, unspecified
74601	Atresia of pulmonary valve, congenital
74602	Stenosis of pulmonary valve, congenital
74609	Other congenital anomalies of pulmonary valve
7461	Ostium primum defect
7462	Ebstein's anomaly
7463	Congenital stenosis of aortic valve
7464	Congenital insufficiency of aortic valve
7465	Congenital mitral stenosis
7466	Congenital mitral insufficiency
7467	Hypoplastic left heart syndrome
74681	Subaortic stenosis, congenital
74682	Cor triatriatum
74683	Infundibular pulmonic stenosis, congenital
74685	Coronary artery anomaly, congenital
7470	Patent ductus arteriosus
74710	Coarctation of aorta (preductal) (postductal)
74711	Interruption of aortic arch
74722	Congenital atresia and stenosis of aorta
7473	Congenital anomalies of pulmonary artery
74741	Total anomalous pulmonary venous connection
74742	Partial anomalous pulmonary venous connection
74749	Other anomalies of great veins
7852	Undiagnosed cardiac murmurs
78552	Septic shock
9607	Poisoning by antineoplastic antibiotics
9961	Mechanical complication of other vascular device, implant, and graft
99771	Vascular complications of mesenteric artery
99772	Vascular complications of renal artery
99779	Vascular complications of other vessels
V433	Heart valve replaced by other means

Procedure codes 4/I/T-93922 and 4/I/T-93923 are limited to the following diagnosis codes:

Diagnosis Code	Description
44501	Atheroembolism, upper extremity
44502	Atheroembolism, lower extremity

Procedure codes 4/I/T-93924, 4/I/T-93925 and 4/I/T-93926, Extremity study, are limited to diagnosis code 44502, Atheroembolism, lower extremity.

Procedure codes 4/I/T-93930 and 4/I/T-93931 are limited to diagnosis code 44501, Atheroembolism, upper extremity.

Multiple Doppler procedures (for example, studies of extra-cranial arteries and intracranial arteries) billed on the same day are reimbursed at full fee for the first, and half for each additional study irrespective of the number of services billed.

Procedure codes described as bilateral, right, and left studies billed on the same day are inclusive and reimbursed at a quantity of one.

Procedure codes 4/I/T-93882, 4/I/T-93888, 4/I/T-93926, 4/I/T-934/I/T-931, 4/I/T-93971, 4/I/T-93976, and 4/I/T-93979 are considered unilateral codes. Right and left studies are reimbursed at full and one-half fee.

Procedure codes 4/I/T-93320 and 4/I/T-93321 are reimbursable in addition to procedure codes 4/I/T-93307 and 4/I/T-93308.

Procedure code 4/I/T-93325 may be considered for reimbursement separately from transthoracic and transesophageal echocardiograph procedure codes 4/I/T-93312 and 4/I/T-93350, when billed on the same date of service, by the same provider.

Procedure code 93990 is considered part of the care of the dialysis patient and is not reimbursed separately.

36.4.11 Elective Sterilization Services

The Texas Medicaid Program benefits include payment for elective sterilization (performed solely for the purpose of rendering the individual incapable of bearing or fathering children) of eligible clients when providers comply with HHS regulations (42 Code of Federal Regulations [CFR] 441.250, Subpart F).

Refer to: Section 19.3.3 "Sterilization Consent Form and Instructions" on page 20-4 for further direction.

Payment of elective sterilization is *not* made if the client meets any of the following criteria:

- Is younger than 21 years of age at the time the consent form is signed.
- Has been declared mentally incompetent for the purpose of sterilization (clients are presumed to be mentally competent unless adjudicated incompetent for the purpose of sterilization).
- Is institutionalized in a correctional facility, mental hospital, or other rehabilitative facility.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Gave consent in labor or childbirth, under the influence of alcohol or other drugs, or while seeking or obtaining an abortion.

Note: *All Medicaid clients, electing sterilization services including those in a STAR or STAR+PLUS Program health plan, must sign a Sterilization Consent Form. The form must be submitted to the client's health plan.*

TMHP must have a signed, valid Sterilization Consent Form on file to reimburse an elective sterilization procedure. Typewritten, blocked, or facsimile stamped signatures are *not* acceptable for signature requirements. When a valid consent form is received by TMHP, the Medicaid client's eligibility file is updated to reflect receipt. Subsequent claims received by TMHP for the sterilization covered by the consent are referenced to the valid consent and reimbursed even if they are not accompanied by a valid consent. It is to the provider's benefit to submit a consent form with claims for sterilization rather than relying on a fellow provider. A legible, valid copy of the consent is acceptable.

Providers may copy onto their letterhead the Sterilization Consent Form. Providers may use their own consent form as long as the form has the HHS-approved language and required fields. Providers who want their own consent form must obtain approval from HHS.

A mechanism for processing Sterilization Consent Forms aimed at reducing the number of unnecessary denials for sterilization covered under family planning and billed to Medicaid is used by TMHP. Family planning providers may provide sterilization to their clients after a waiting period of 30 days, defined as 30 full 24-hour periods from the time in which formal consent was obtained from the client. The waiting period prevents the denial of sterilization claims for sterilization conducted on the 30th day, despite the fact that 30 full days (24-hour periods) passed from the time of written consent.

When a sterilization is performed at the time of a premature delivery, the time of the client's consent must be at least 72 hours before the actual delivery *and* 30 days before the expected date of delivery. (The consent form is valid for 180 days from the date of the client's signature.) If emergency abdominal surgery occurs, the time of the client's consent must be at least 72 hours before surgery.

These instructions must be followed when completing the HHS-approved consent form. All blanks should be completed unless otherwise specified.

- The client's nine-digit Medicaid number must be recorded in the blocks provided in the upper right-hand corner of the consent form.
- The first section of the consent form, *Consent to Sterilization*, must be completed in English or Spanish.
- The *Race and Ethnicity Designation* is optional.
- An interpreter must be provided if the consent form is not written in the language of the individual to be sterilized or the person obtaining consent does not speak the individual's language. If an interpreter is used, the *Interpreter's Statement* must be completed.
- The *Statement of the Person Obtaining Consent* must be completed by the person who explains the surgery and its implications, alternate methods of birth control, and the fact that the consent may be withdrawn at any time. The signature of the person obtaining consent must be completed at the time the consent is obtained. The signature must be an original signature, *not* a rubber stamp.
- The physician or the person obtaining consent must allow a witness of the client's choice (if desired) when the consent form is signed, and arrangements must be made for individuals with disabilities.
- The *Physician's Statement* must be completed. The physician must indicate that 30 days or 72 hours have passed between consent and surgery by crossing out paragraph number 1 or 2 as indicated on the consent form.
- The *Physician's Statement* must be signed and dated on or after the day of surgery in all circumstances. The signature must be an original signature, *not* a rubber stamp.
- When the sterilization is performed at the time of a premature delivery, the expected date of delivery must be recorded in the space provided on the consent form and must be 30 days from date of client's signature.
- When the sterilization is performed at the time of emergency abdominal surgery, the circumstances must be described in the space provided on the consent form. If the space is not sufficient, additional documentation may be attached to the consent form.
- The physician must review the consent form with the client shortly before surgery.
- The actual sterilization procedure performed must be identical to that for which the client gave informed, written consent. Each reference to the sterilization procedure on the consent form and the claim form (for example, salpingectomy cannot be interchanged with tubal ligation) must be identical.
- Sterilization Consent forms may be faxed to 1-512-514-4229. Follow the guidelines under "Faxing Forms" on page 36-73.

Refer to: "Sterilization Consent Form Instructions (2 Pages)" on page B-92.
"Sterilization Consent Form (English, 2 Pages)" on page B-94.

36.4.12 Endoscopies

The following endoscopies are covered services in the Texas Medicaid Program:

- Bronchoscopy
- Cystourethroscopy
- Endoscopic Retrograde Cholangiopancreatography (ERCP)
- Lower GED (for example, colonoscopy)

CPT only copyright 2005 American Medical Association. All rights reserved.

- Upper GED (for example, Esophagogastroduodenoscopy [EGD])
- Sinus Endoscopy

Multiple diagnostic or operative endoscopies in the same or different body areas are often billed on the same day. If done by the same provider, they may be paid the full amount allowed for the major procedure and one-half the allowed amount for each additional procedure, following multiple surgical guidelines.

If the physician bills separate charges for multiple endoscopies that are considered part of a more inclusive procedure, HHSC or its designee reviews the individual charges and pays only the procedure with the more inclusive code.

Example: *Separate charges for an esophagoscopy, a gastroscopy, and a duodenoscopy are reviewed and paid as an EGD. A surgical endoscopy always includes the diagnostic endoscopy.*

36.4.13 Epidural/Subarachnoid Infusion for Chronic Spasticity

Epidural/subarachnoid infusion of baclofen (Lioresal) for chronic spasticity is a benefit of the Texas Medicaid Program. Prior authorization is required for procedure codes 2-62350, 2-62360, 2-62361, and 2-62362.

Refer to: "Baclofen (Lioresal), Trial Injection and Pump Implantation/Catheter Insertion/Revision/Replacement" on page 36-89 for guidelines.

36.4.14 Extracorporeal Membrane Oxygenation (ECMO)

Extracorporeal membrane oxygenation (ECMO) coverage is limited to infants younger than 1 year of age. ECMO is payable only in POS 3 (hospital) and the client should be monitored in the neonatal or pediatric intensive care unit.

The following procedure codes are payable for the billing of prolonged extracorporeal circulation for cardiopulmonary insufficiency: 2-36822, 2-33960, 2-33961, and 2-33999.

Note: *For Cardiac surgery procedure, use procedure code 2-33999.*

Procedure code 2-33960 or 2-33961 is limited to one per day, any provider.

If procedure code 2-36822 or 2-33999 is billed on the same day as ECMO by the same provider, the insertion or removal is denied and the ECMO (2-33960, 2-33961) is paid.

Subsequent hospital care visits including critical care and total respiratory care billed on the same day by any provider are denied.

ECMO is payable for the following diagnosis codes:

Diagnosis Code	Description
4150	Acute cor pulmonale
4151	Pulmonary embolism and infarction
74783	Persistent fetal circulation
7479	Unspecified anomaly of circulatory system
7566	Anomalies of diaphragm
75670	Anomaly of abdominal wall, unspecified
75671	Anomaly of abdominal, prune belly syndrome
75679	Other congenital anomalies of abdominal wall
769	Respiratory distress syndrome
77010	Meconium aspiration syndrome
77012	Meconium aspiration with respiratory symptoms
77018	Other fetal and newborn aspiration with respiratory symptoms
77087	Respiratory arrest of newborn
77088	Hypoxemia of newborn
77181	Septecemia (sepsis) of newborn
77183	Bacteremia of newborn
77189	Other infections specific to the perinatal period
77581	Other acidosis of newborn
77985	Cardiac arrest of newborn

36.4.15 Family Planning Services

Physicians, PAs, NPs, and CNSs are encouraged to provide family planning services to Medicaid clients, especially pregnant and postpartum clients. No separate enrollment is required.

Family planning services are preventive health, medical, counseling, and educational services that assist an individual in controlling fertility and achieving optimal reproductive and general health. When billing for these services, use modifier FP.

The federal contribution to Texas is enhanced with the use of modifier FP, which increases the total amount of funds available for reimbursement. For the same reason, it is important for providers to give their reference laboratory a family planning diagnosis code for all eligible family planning laboratory work. Family planning drugs and supplies may be provided through providers' offices and billed to the program or they may be provided by prescription through the Vendor Drug Program (VDP). These drugs and supplies are exempt from the three prescriptions per month rule.

CPT only copyright 2005 American Medical Association. All rights reserved.

For supplies unavailable through the Vendor Drug Program, clients may be able to obtain supplies through a family planning agency. Medicaid clients whose eligibility is *limited* may receive family planning services without referrals.

Reminder: *Physicians are encouraged to issue family planning prescriptions for at least six months if medically appropriate. Pharmacies under Vendor Drug must fill the prescription for six months at a time, when a physician orders a six-month supply, not one per month.*

Refer to: Section 19 “Family Planning Services” on page 20-1 for a description of reimbursable family planning services and billing procedure codes.

“Client Limited Program” on page 4-5.

36.4.16 Gamma Knife Radiosurgery (2-61793)

The following diagnosis codes are payable for 2-61793. This procedure is payable to physicians for professional services only in the inpatient and outpatient settings.

Diagnosis Code	Description
1700	Malignant neoplasm of bone and articular cartilage; bones of skull and face, except mandible
1701	Malignant neoplasm of bone and articular cartilage; mandible
1702	Malignant neoplasm of bone and articular cartilage; vertebral column, excluding sacrum and coccyx
1703	Malignant neoplasm of bone and articular cartilage; ribs, sternum, and clavicle
1704	Malignant neoplasm of bone and articular cartilage; scapula and long bones of upper limb
1705	Malignant neoplasm of bone and articular cartilage; short bones of upper limb
1706	Malignant neoplasm of bone and articular cartilage; pelvic bones, sacrum, and coccyx
1707	Malignant neoplasm of bone and articular cartilage; long bones of lower limb
1708	Malignant neoplasm of bone and articular cartilage; short bones of lower limb
1709	Malignant neoplasm of bone and articular cartilage; bone and articular cartilage, site unspecified
1710	Malignant neoplasm of connective and other soft tissue; head, face, and neck
1910	Malignant neoplasm of brain; cerebrum, except lobes and ventricles
1911	Malignant neoplasm of brain; frontal lobe
1912	Malignant neoplasm of brain; temporal lobe
1913	Malignant neoplasm of brain; parietal lobe
1914	Malignant neoplasm of brain; occipital lobe
1915	Malignant neoplasm of brain; ventricles
1916	Malignant neoplasm of brain; cerebellum NOS
1917	Malignant neoplasm of brain; brain stem
1918	Malignant neoplasm of brain; other parts of brain
1919	Malignant neoplasm of brain, unspecified site
1944	Malignant neoplasm of pineal gland
1983	Secondary malignant neoplasm of brain and spinal cord
2251	Benign neoplasm of cranial nerves
2252	Benign neoplasm of cerebral meninges
2254	Benign neoplasm of spinal meninges
2273	Benign neoplasm of pituitary gland and craniopharyngeal duct
2370	Neoplasm of uncertain behavior of pituitary gland and craniopharyngeal duct
2371	Neoplasm of uncertain behavior of pineal gland
2530	Acromegaly and gigantism
2531	Other and unspecified anterior pituitary hyperfunction
2550	Cushing’s syndrome
25511	Glucocorticoid-remediable aldosteronism
25512	Conn’s syndrome
25513	Bartter’s syndrome
3501	Trigeminal neuralgia
7476	Other congenital anomalies of peripheral vascular system
74781	Congenital anomalies of cerebrovascular system

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.17 Genetic Services

Refer to: "Genetic Services" on page 22-1.

36.4.18 Gynecological Services

36.4.18.1 Abortion Services

According to a revision of the Hyde Amendment, under P.L. 103-112, HHSC implemented the federal directive pertaining to Medicaid reimbursement for abortions. Federal funding is available to save the life of the mother and to terminate pregnancies resulting from rape or incest. Reimbursement is based on the physician's certification that the abortion was performed to save the mother's life, terminate pregnancy resulting from rape, or terminate pregnancy resulting from incest. Prior authorization for abortions is no longer required.

At this time, the certification statement and claim must be filed on paper; electronic billing is not available. One of these statements with the exact wording must be signed by the physician for abortions performed. Substitute wording is not accepted.

Important: *To bill a client eligible for Medicaid for a service that TMHP denies as not medically necessary, the billing provider must ensure that the client or client's guardian has signed an acknowledgment statement obtained by the physician who has contact with the client.*

Modifier G7, Pregnancy resulted from rape or incest or pregnancy certified by physician as life threatening, is the modifier that performing physicians, facilities, anesthesiologists, and CRNAs are required to submit with claims to be reimbursed for abortion procedures that are within the scope of rules and regulations of the Texas Medicaid Program.

Providers must enter the modifier G7 next to the procedure code that identifies abortion services.

Refer to: "Abortion Certification Statements Form" on page B-4 for a sample form.
"Family Planning Services" on page 20-1.

Drugs or devices to prevent implantation of the fertilized ovum and medical procedures necessary for the termination of an ectopic pregnancy are benefits of the Texas Medicaid Program.

36.4.18.2 Contraceptives

Implantable Contraceptive Capsules

Implantable contraceptive capsules, such as Norplant® , are no longer available. Removal of this device is payable with procedure code 2/F-11976.

Refer to: "Implantable Contraceptive Capsules" on page 25-109 for more information.

36.4.18.3 Intrauterine Devices (IUD)

Insertion of an IUD

Providers must use the following procedure codes when billing for the insertion of an IUD: 1-J7300, 1-J7302, and 2-58300.

- Procedure code 2-58300 is denied as part of another service when billed for the same date of service as 1-J7302, which includes the cost of the IUD and insertion of the IUD.
- An IUD insertion/procurement of the IUD may be reimbursed when billed on the same date of service as procedure code 2-58120. Procedure code 2-58120 is reimbursed at full allowance. Procedure code 2-58300 is denied as part of another service. Procedure codes 1-J7300 and 1-J7302 are reimbursed at full allowance.
- When a vaginal, cervical, or uterine surgery (e.g., cervical cauterization) is billed for the same date of service as the insertion of the IUD, the surgical procedure is paid at full allowance and the IUD insertion billed using procedure code 2-58300 is paid at half the allowed amount.
- Procedure code J7302 is a payable benefit for females 10 through 55 years of age when billed with the following diagnosis codes. J7302 is limited to once every five years.

Diagnosis Code	Description
V2502	General counseling on initiation of other contraceptive measures
V2503	Encounter for emergency contraceptive counseling and prescription
V2509	Other general counseling and advice on contraceptive management
V251	Insertion of intrauterine contraceptive device
V2540	Contraceptive surveillance, unspecified
V2542	Surveillance of intrauterine contraceptive device
V2549	Surveillance of other contraceptive method
V258	Other specified contraceptive management
V259	Unspecified contraceptive management
V615	Multiparity

36.4.18.4 Removal of an IUD

Procedure code 2-58301 billed for the same date of service in addition to any of the following procedures is denied as included in the other procedure: vaginal, cervical, or uterine surgery; dilation and curettage; or IUD insertion or replacement.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.18.5 Faxing Forms

All Medicaid providers may fax Sterilization Consent Forms to 1-512-514-4229 and Hysterectomy Acknowledgment Forms to 1-512-514-4218. Include the client's Medicaid number on the form. Additionally, all consent forms should be faxed with a cover sheet identifying the provider, and including the telephone number and address. If the fax is incomplete or the consent form is invalid, the form is returned by mail or fax for correction.

Completed consent forms faxed for adjustments or appeals are validated in the TMHP system. However, claims associated with the consent forms must be appealed through mail to Automated Inquiry System (AIS) Appeals at the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200645
Austin, TX 78720-0645

36.4.18.6 Hysterectomy Services

Assistant surgeons may be reimbursed when assisting a surgeon performing a surgical laparoscopy with vaginal hysterectomy, procedure code 8-58550, 8-58552, 8-58553, or 8-58554.

Note: *All Medicaid clients, receiving hysterectomy services including those in a STAR or STAR+PLUS Program health plan, must sign a Hysterectomy Acknowledgment Form. The acknowledgment must be submitted to the client's health plan.*

The Texas Medicaid Program reimburses hysterectomies when they are medically necessary. The Texas Medicaid Program does not reimburse hysterectomies performed for the sole purpose of sterilization. To obtain reimbursement, providers must submit a signed Hysterectomy Acknowledgment Form along with the claim. Each individual provider involved in the hysterectomy procedure is requested to submit a copy of a valid acknowledgment rather than relying on a fellow provider. The Medicaid client's eligibility file is updated on receipt of the signed Hysterectomy Acknowledgment Form. Subsequent claims received by TMHP, related to the hysterectomy, are referenced to the valid acknowledgment form.

Hysterectomy services are considered for reimbursement when the claim is filed with a signed Hysterectomy Acknowledgment Form or documentation supporting that the Hysterectomy Acknowledgment Form could not be obtained or was not necessary.

Refer to: "Physician Certification for Exceptions" on page 36-73.

36.4.18.7 Hysterectomy Acknowledgment Statement

Federal regulations specify that no claim for a hysterectomy may be paid without the submission of a statement to TMHP in which the client acknowledges that she was informed orally and in writing before the hysterectomy that she is permanently incapable of bearing children. She must be informed regardless of the medical necessity of the surgery, her age, or marital status. The Hysterectomy Acknowledgment Form is also required for a hysterectomy to be paid if performed during a retroactive eligibility period.

The client or her designated representative must sign and date the statement. The only time requirement for obtaining the acknowledgment is that it needs to be dated any time before surgery. A completed Sterilization Consent Form may be used in lieu of the Hysterectomy Acknowledgment form, but all items on the Form must be completed.

Refer to: "Hysterectomy Acknowledgment Form" on page B-52.

Physician Certification for Exceptions

A Hysterectomy Acknowledgment Form is not required when the performing physician certifies and places his or her signature on the claim form or attachment, that at least one of the following circumstances existed before surgery:

- The patient was already sterile before the hysterectomy, and the cause of the sterility is stated (for example, congenital disorder, sterilized previously, or postmenopausal). Providers must use a post menopause diagnosis or sterilization diagnosis on the claim form. If the provider submits a claim and does not attach the acknowledgment, the provider must maintain the signed statement in the client's records, and the physician's signature will not be required on the claim form. These records are subject to retrospective review.
- The patient requires a hysterectomy on an emergency basis because of a life-threatening situation. The physician must state the nature of the emergency and certify that they determined that prior acknowledgment was not possible. Because the acknowledgment may be signed the day of or an hour before surgery, an emergency situation requires the patient be unconscious or under sedation and unable to sign the acknowledgment.

36.4.18.8 Hysteroscopic Sterilization

The procedure code to bill for the fallopian tube occlusion sterilization is 2/F-58565, which is considered bilateral. Procedure code 2-58565 includes the occlusive sterilization system (e.g., Essure microinsert).

A hysterosalpingogram is recommended three months after a hysteroscopic sterilization procedure to ensure tubal occlusion. Procedure code 2-58340 will be considered for reimbursement in this circumstance when billed in conjunction with the diagnosis code V252, Sterilization.

36.4.18.9 Laminaria

Insertion of a laminaria or dilateria is a covered service (usually done before a dilation and curettage). If the procedure is performed on a day preceding the uterine surgery, it should be coded as 2-59200.

CPT only copyright 2005 American Medical Association. All rights reserved.

When procedure code 2-59200 is performed on the same day as another surgery (including deliveries), it is considered part of the procedure and no separate reimbursement is provided.

36.4.18.10 Pelvic Exam Under Anesthesia

Procedure 2-57410 is considered part of another gynecological surgery or other abdominal surgery performed the same day. If it is performed in conjunction with another procedure (other than gynecological or general abdominal surgery), it is rarely medically necessary.

36.4.18.11 Vabra Aspirator

2-58100 is a vacuum aspirator used to collect uterine tissue for study to detect endometrial carcinoma. This procedure is a benefit only when the patient exhibits clinical symptoms or signs of endometrial disease, such as irregular or heavy vaginal bleeding. Use of the Vabra aspirator on an asymptomatic patient is not a benefit.

36.4.18.12 Vaginoplasty/Clitoroplasty for Intersex State

The procedure codes reimbursed for vaginoplasty/clitoroplasty for intersex state are 2/8-56805 and 2/8-57335.

Reimbursement is limited to clients with genetically proven virilizing adrenogenital syndrome (diagnosis code 255.2).

36.4.19 Ilizarov Device/Procedure

Use procedure codes 2/F-20692, 2/F-20693, 2/F-20694, and 2/F-20999 when billing for the Ilizarov procedure. A global fee payment methodology of $3146.50 will be applied and includes a global period of 180 days. Procedure codes 2/F-20692, 2/F-20693, 2/F-20694, and 2/F-20999 include the preconstruction, surgical application, adjustments to the device for up to six months, and the removal of the device. Payment for broken/replacement parts to the device is currently under HHSC legal review.

Providers who bill for other external fixator devices, such as the Monticelli device, should continue to use procedure codes 2-20690 or 2-20692, where applicable, when billing for the surgical applications.

36.4.20 Hyperbaric Oxygen Therapy (HBO)

Hyperbaric oxygen therapy (HBO) is a type of therapy that is intended to increase the environmental oxygen pressure to promote the movement of oxygen from the environment into the body tissues by means of pressurization that is greater than atmospheric pressure. Such treatment is performed in specially constructed hyperbaric chambers, which may hold one or several patients.

Note: *Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, or other device, or applied topically is not considered hyperbaric treatment in itself.*

Procedure code 1-99183 is limited to one session per day, any provider.

Outpatient hospitals should use revenue code B-413, Respiratory services–HBO, for reimbursement of the technical component.

The FDA-approved indications for the hyperbaric oxygen chamber (therapy) in accordance with the guidelines established by the Undersea and Hyperbaric Medical Society are as follows:

- Air or gas embolism
- Carbon monoxide/smoke inhalation
- Compromised skin grafts and flaps
- Crush injuries/acute traumatic ischemias
- Decompression sickness
- Enhanced healing in selected problem wounds
- Exceptional blood loss (anemia)
- Gas gangrene (clostridial myonecrosis)
- Intracranial abscess
- Necrotizing soft tissue infections
- Radiation tissue damage (osteoradionecrosis)
- Refractory osteomyelitis
- Thermal burns

When requesting reimbursement of HBO for the treatment of *air or gas embolism* use the following diagnosis codes:

Diagnosis Code	Description
6396	Embolism following abortion or ectopic and molar pregnancies
67300	Obstetrical air embolism, unspecified as to episode of care
9580	Air embolism as an early complication of trauma
9991	Air embolism as a complication of medical care, not elsewhere classified

When requesting reimbursement of HBO for the treatment of *carbon monoxide/smoke inhalation,* use diagnosis code 986, Carbon monoxide poisoning and smoke inhalation.

When requesting reimbursement of HBO for the treatment of *compromised skin grafts and flaps,* use the following diagnosis codes:

Diagnosis Code	Description
99652	Mechanical complication of prosthetic graft of other tissue, not elsewhere classified
99660	Infection and inflammatory reaction due to unspecified device, implant, and graft
99661	Infection and inflammatory reaction due to cardiac device, implant, and graft

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
99662	Infection and inflammatory reaction due to other vascular device, implant, and graft
99663	Infection and inflammatory reaction due to nervous system device, implant, and graft
99664	Infection and inflammatory reaction due to indwelling urinary catheter
99665	Infection and inflammatory reaction due to other genitourinary device, implant, and graft
99666	Infection and inflammatory reaction due to internal joint prosthesis
99667	Infection and inflammatory reaction due to other internal orthopedic device, implant, and graft
99668	Infection and inflammatory reaction due to peritoneal dialysis catheter
99669	Infection and inflammatory reaction due to other internal prosthetic device, implant, and graft
99670	Other complications due to unspecified device, implant, and graft
99671	Other complications due to heart valve prosthesis
99672	Other complications due to other cardiac device, implant, and graft
99673	Other complications due to renal dialysis device, implant, and graft
99674	Other complications due to other vascular device, implant, and graft
99675	Other complications due to nervous system device, implant, and graft
99676	Other complications due to genitourinary device, implant, and graft
99677	Other complications due to internal joint prosthesis
99678	Other complications due to other internal orthopedic device, implant, and graft
99679	Other complications due to other internal prosthetic device, implant, and graft
V423	Skin replaced by transplant

When requesting reimbursement of HBO for the treatment of *crush injuries/acute traumatic ischemias,* use the following diagnosis codes:

Diagnosis Code	Description
8690	Internal injury to unspecified or ill-defined organs without mention of open wound into cavity
8691	Internal injury to unspecified or ill-defined organs with open wound into cavity
8871	Traumatic amputation of arm and hand; (complete), (partial); unilateral, below elbow, complicated
8873	Traumatic amputation of arm and hand; (complete), (partial); unilateral, at or above elbow, complicated
8875	Traumatic amputation of arm and hand; (complete), (partial); unilateral, not specified, complicated
8877	Traumatic amputation of arm and hand; (complete), (partial); bilateral (any level), complicated
8971	Traumatic amputation of leg(s), (complete), (partial), unilateral below knee, complicated
8973	Traumatic amputation of leg(s), (complete), (partial), unilateral at or above knee, complicated
8975	Traumatic amputation of leg(s), (complete), (partial), unilateral level not specified, complicated
8977	Traumatic amputation of leg(s), (complete), (partial), bilateral any level, complicated
9251	Crushing injury of face and scalp
9252	Crushing injury of neck
9260	Crushing injury of external genitalia
92611	Crushing injury of back
92612	Crushing injury of buttock
92619	Crushing injury of other specified sites of trunk
9268	Crushing injury of multiple sites of trunk
9269	Crushing injury of unspecified site of trunk
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9290	Crushing injury of multiple and unspecified sites
9299	Crushing injury of unspecified site
99690	Complications of unspecified reattached extremity
99691	Complications of reattached forearm
99692	Complications of reattached hand
99693	Complications of reattached finger(s)
99694	Complications of reattached upper extremity, other and unspecified
99695	Complication of reattached foot and toe(s)
99696	Complication of reattached lower extremity, other and unspecified
99699	Complication of other specified reattached body part

When requesting reimbursement of HBO for the treatment of *decompression sickness,* use the diagnosis code 9933, Caisson disease.

When requesting reimbursement of HBO for the treatment of *enhanced healing in selected problem wounds,* use the following diagnosis codes:

Diagnosis Code	Description
25070	Diabetes with peripheral circulatory disorders, type II or unspecified type, not stated as uncontrolled
25071	Diabetes with peripheral circulatory disorders, type I (juvenile type), not stated as uncontrolled
25072	Diabetes with peripheral circulatory disorders, type II or unspecified type, uncontrolled
25073	Diabetes with peripheral circulatory disorders, type I (juvenile type), uncontrolled
44023	Atherosclerosis of native arteries of the extremities with ulceration
44024	Atherosclerosis of native arteries of the extremities with gangrene
44381	Peripheral angiopathy in diseases classified elsewhere
44382	Erythromelalgia
44389	Other peripheral vascular disease
4439	Peripheral vascular disease, unspecified
4540	Varicose veins of lower extremities with ulcer
4542	Varicose veins of lower extremities with ulcer and inflammation
68600	Other local infection of skin and subcutaneous tissue, pyoderma, unspecified
68601	Other local infection of skin and subcutaneous tissue, pyoderma gangrenosum
68609	Other local infection of skin and subcutaneous tissue, other pyoderma
70700	Decubitus ulcer, unspecified site
70701	Decubitus ulcer, elbow
70702	Decubitus ulcer, upper back
70703	Decubitus ulcer, lower back
70704	Decubitus ulcer, hip
70705	Decubitus ulcer, buttock
70706	Decubitus ulcer, ankle
70707	Decubitus ulcer, heel
70709	Decubitis ulcer, other site
70710	Unspecified ulcer of lower limb
70711	Ulcer of thigh
70712	Ulcer of calf
70713	Ulcer of ankle
70714	Ulcer of heel and midfoot
70715	Ulcer other part of foot
70719	Ulcer of other part of lower limb
7078	Chronic ulcer of other specified sites
7079	Chronic ulcer of unspecified site
9895	Toxic effect of venom
99859	Other postoperative infection

CPT only copyright 2005 American Medical Association. All rights reserved.

When requesting reimbursement of HBO for the treatment of *exceptional blood loss (anemia),* use the following diagnosis codes:

Diagnosis Code	Description
2851	Acute post hemorrhagic anemia
78559	Other shock without mention of trauma
9584	Traumatic shock
9980	Postoperative shock, not elsewhere classified

When requesting reimbursement of HBO for the treatment of *gas gangrene (clostridial myonecrosis),* use the following diagnosis codes:

Diagnosis Code	Description
0383	Septicemia due to anaerobes
0400	Gas gangrene

When requesting reimbursement of HBO for the treatment of *necrotizing soft tissue infections,* use the following diagnosis codes:

Diagnosis Code	Description
72886	Necrotizing fasciitis
7854	Gangrene

When requesting reimbursement of HBO for the treatment of *radiation tissue damage (osteoradionecrisis),* use the following diagnosis codes:

Diagnosis Code	Description
52689	Disease of the jaw; other osteoradionecrosis of jaw(s)
73010	Chronic osteomyelitis, site unspecified
73011	Chronic osteomyelitis involving shoulder region
73012	Chronic osteomyelitis involving upper arm
73013	Chronic osteomyelitis involving forearm
73014	Chronic osteomyelitis involving hand
73015	Chronic osteomyelitis involving pelvic region and thigh
73016	Chronic osteomyelitis involving lower leg
73017	Chronic osteomyelitis involving ankle and foot
73018	Chronic osteomyelitis involving other specified sites
73019	Chronic osteomyelitis involving multiple sites
7854	Symptoms involving cardiovascular system: gangrene
9092	Late effects of other and unspecified external causes; late effect of radiation
990	Effects of radiation, unspecified

When requesting reimbursement of HBO for the treatment of *refractory osteomyelitis,* use the following diagnosis codes:

Diagnosis Code	Description
73000	Acute osteomyelitis, site unspecified
73001	Acute osteomyelitis involving shoulder region
73002	Acute osteomyelitis involving upper arm
73003	Acute osteomyelitis involving forearm
73004	Acute osteomyelitis involving hand
73005	Acute osteomyelitis involving pelvic region and thigh
73006	Acute osteomyelitis involving lower leg
73007	Acute osteomyelitis involving ankle and foot
73008	Acute osteomyelitis involving other specified sites
73009	Acute osteomyelitis involving multiple sites
73010	Chronic osteomyelitis, site unspecified
73011	Chronic osteomyelitis involving shoulder region
73012	Chronic osteomyelitis involving upper arm
73013	Chronic osteomyelitis involving forearm
73014	Chronic osteomyelitis involving hand
73015	Chronic osteomyelitis involving pelvic region and thigh
73016	Chronic osteomyelitis involving lower leg
73017	Chronic osteomyelitis involving ankle and foot
73018	Chronic osteomyelitis involving other specified sites
73019	Chronic osteomyelitis involving multiple sites
73020	Unspecified osteomyelitis, site unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

When requesting reimbursement of HBO for the treatment of *thermal burns,* use the following diagnosis codes:

Diagnosis Code	Description
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa
94100	Burn of unspecified degree of unspecified site of face and head
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck)
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part)
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part

Diagnosis Code	Description
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part
94200	Burn of unspecified degree of unspecified site of trunk
94201	Burn of unspecified degree of breast
94202	Burn of unspecified degree of chest wall, excluding breast and nipple
94203	Burn of unspecified degree of abdominal wall
94204	Burn of unspecified degree of back (any part)
94205	Burn of unspecified degree of genitalia
94209	Burn of unspecified degree of other and multiple sites of trunk
94210	Erythema due to burn (first degree) of unspecified site of trunk
94211	Erythema due to burn (first degree) of breast
94212	Erythema due to burn (first degree) of chest wall, excluding breast and nipple
94213	Erythema due to burn (first degree) of abdominal wall
94214	Erythema due to burn (first degree) of back (any part)
94215	Erythema due to burn (first degree) of genitalia
94219	Erythema due to burn (first degree) of other and multiple sites of trunk

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94220	Blisters with epidermal loss due to burn (second degree) of unspecified site of trunk
94221	Blisters with epidermal loss due to burn (second degree) of breast
94222	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94223	Blisters with epidermal loss due to burn (second degree) of abdominal wall
94224	Blisters with epidermal loss due to burn (second degree) of back (any part)
94225	Blisters with epidermal loss due to burn (second degree) of genitalia
94229	Blisters with epidermal loss due to burn (second degree) of other and multiple sites of trunk
94230	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of trunk
94231	Full-thickness skin loss due to burn (third degree NOS) of breast
94232	Full-thickness skin loss due to burn (third degree NOS) of chest wall, excluding breast and nipple
94233	Full-thickness skin loss due to burn (third degree NOS) of abdominal wall
94234	Full-thickness skin loss due to burn (third degree NOS) of back (any part)
94235	Full-thickness skin loss due to burn (third degree NOS) of genitalia
94239	Full-thickness skin loss due to burn (third degree NOS) of other and multiple sites of trunk
94240	Deep necrosis of underlying tissues due to burn (deep third degree) of trunk, unspecified site, without mention of loss of body part
94241	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, without mention of loss of breast
94242	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, without mention of loss of chest wall
94243	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall, without mention of loss of abdominal wall
94244	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), without mention of loss of back
94245	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, without mention of loss of genitalia
94249	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, without mention of loss of body part
94250	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of trunk, with loss of body part
94251	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, with loss of breast
94252	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, with loss of chest wall
94253	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall with loss of abdominal wall
94254	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), with loss of back
94255	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, with loss of genitalia
94259	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, with loss of a body part
94300	Burn of unspecified degree of unspecified site of upper limb
94301	Burn of unspecified degree of forearm
94302	Burn of unspecified degree of elbow
94303	Burn of unspecified degree of upper arm
94304	Burn of unspecified degree of axilla
94305	Burn of unspecified degree of shoulder
94306	Burn of unspecified degree of scapular region
94309	Burn of unspecified degree multiple sites of upper limb, except wrist and hand
94310	Erythema due to burn (first degree) of unspecified site of upper limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94311	Erythema due to burn (first degree) of forearm
94312	Erythema due to burn (first degree) of elbow
94313	Erythema due to burn (first degree) of upper arm
94314	Erythema due to burn (first degree) of axilla
94315	Erythema due to burn (first degree) of shoulder
94316	Erythema due to burn (first degree) of scapular region
94319	Erythema due to burn (first degree) of multiple sites of upper limb, except wrist and hand
94320	Blisters with epidermal loss due to burn (second degree) of unspecified site of upper limb
94321	Blisters with epidermal loss due to burn (second degree) of forearm
94322	Blisters with epidermal loss due to burn (second degree) of elbow
94323	Blisters with epidermal loss due to burn (second degree) of upper arm
94324	Blisters with epidermal loss due to burn (second degree) of axilla
94325	Blisters with epidermal loss due to burn (second degree) of shoulder
94326	Blisters with epidermal loss due to burn (second degree) of scapular region
94329	Blisters with epidermal loss due to burn (second degree) of multiple sites of upper limb, except wrist and hand
94330	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of upper limb
94331	Full-thickness skin loss due to burn (third degree NOS) of forearm
94332	Full-thickness skin loss due to burn (third degree NOS) of elbow
94333	Full-thickness skin loss due to burn (third degree NOS) of upper arm
94334	Full-thickness skin loss due to burn (third degree NOS) of axilla
94335	Full-thickness skin loss due to burn (third degree NOS) of shoulder
94336	Full-thickness skin loss due to burn (third degree NOS) of scapular region
94339	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of upper limb, except wrist and hand
94340	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, without mention of loss of a body part
94341	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, without mention of loss of forearm
94342	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, without mention of loss of elbow
94343	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, without mention of loss of upper arm
94344	Deep necrosis of underlying tissues due to burn of axilla, without mention of loss of axilla
94345	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, without mention of loss of shoulder
94346	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, without mention of loss of scapula
94349	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, without mention of loss of upper limb
94350	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, with loss of a body part
94351	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, with loss of forearm
94352	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, with loss of elbow
94353	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, with loss of upper arm
94354	Deep necrosis of underlying tissues due to burn (deep third degree) of axilla, with loss of axilla
94355	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, with loss of shoulder
94356	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, with loss of scapula

Diagnosis Code	Description
94359	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, with loss of upper limb
94400	Burn of unspecified degree of unspecified site of hand
94401	Burn of unspecified degree of single digit (finger (nail) other than thumb
94402	Burn of unspecified degree of thumb (nail)
94403	Burn of unspecified degree of two or more digits of hand, not including thumb
94404	Burn of unspecified degree of two or more digits of hand, including thumb
94405	Burn of unspecified degree of palm of hand
94406	Burn of unspecified degree of back of hand
94407	Burn of unspecified degree of wrist
94408	Burn of unspecified degree of multiple sites of wrist(s) and hand(s)
94410	Erythema due to burn (first degree) of unspecified site of hand
94411	Erythema due to burn (first degree) of single digit (finger (nail) other than thumb
94412	Erythema due to burn (first degree) of thumb (nail)
94413	Erythema due to burn (first degree) of two or more digits of hand, not including thumb
94414	Erythema due to burn (first degree) of two or more digits of hand including thumb
94415	Erythema due to burn (first degree) of palm of hand
94416	Erythema due to burn (first degree) of back of hand
94417	Erythema due to burn (first degree) of wrist
94418	Erythema due to burn (first degree) of multiple sites of wrist(s) and hand(s)
94420	Blisters with epidermal loss due to burn (second degree) of unspecified site of hand
94421	Blisters with epidermal loss due to burn (second degree) of single digit (finger (nail) other than thumb
94422	Blisters with epidermal loss due to burn of (second degree) of thumb (nail)
94423	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand, not including thumb
94424	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand including thumb
94425	Blisters with epidermal loss due to burn (second degree) of palm of hand
94426	Blisters with epidermal loss due to burn (second degree) of back of hand
94427	Blisters with epidermal loss due to burn (second degree) of wrist
94428	Blisters with epidermal loss due to burn (second degree) of multiple sites of wrist(s) and hand(s)
94430	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of hand
94431	Full-thickness skin loss due to burn (third degree NOS) of single digit (finger (nail) other than thumb
94432	Full-thickness skin loss due to burn (third degree NOS) of thumb (nail)
94433	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand, not including thumb
94434	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand including thumb
94435	Full-thickness skin loss due to burn (third degree NOS) of palm of hand
94436	Full-thickness skin loss due to burn (third degree NOS) of back of hand
94437	Full-thickness skin loss due to burn (third degree NOS) of wrist
94438	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of wrist(s) and hand(s)
94440	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, without mention of loss of hand
94441	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, without mention of loss of finger
94442	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), without mention of loss of thumb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94443	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, without mention of fingers
94444	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, without mention of loss of fingers
94445	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, without mention of loss of palm
94446	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, without mention of loss of back of hand
94447	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94448	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), without mention of loss of a body part
94450	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, with loss of hand
94451	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, with loss of finger
94452	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), with loss of thumb
94453	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, with loss of fingers
94454	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, with loss of fingers
94455	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, with loss of palm of hand
94456	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, with loss of back of hand
94457	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, with loss of wrist
94458	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), with loss of a body part

Diagnosis Code	Description
94500	Burn of unspecified degree of unspecified site of lower limb (leg)
94501	Burn of unspecified degree of toe(s) (nail)
94502	Burn of unspecified degree of foot
94503	Burn of unspecified degree of ankle
94504	Burn of unspecified degree of lower leg
94505	Burn of unspecified degree of knee
94506	Burn of unspecified degree of thigh (any part)
94509	Burn of unspecified degree of multiple sites of lower limb(s)
94510	Erythema due to burn (first degree) of unspecified site of lower limb (leg)
94511	Erythema due to burn (first degree) of toe(s) (nail)
94512	Erythema due to burn (first degree) of foot
94513	Erythema due to burn (first degree) of ankle
94514	Erythema due to burn (first degree) of lower leg
94515	Erythema due to burn (first degree) of knee
94516	Erythema due to burn (first degree) of thigh (any part)
94519	Erythema due to burn (first degree) of multiple sites of lower limb(s)
94520	Blisters, epidermal loss (second degree) of unspecified site of lower limb (leg)
94521	Blisters with epidermal loss due to burn (second degree) of toe(s) (nail)
94522	Blisters with epidermal loss due to burn (second degree) of foot
94523	Blisters with epidermal loss due to burn (second degree) of ankle
94524	Blisters with epidermal loss due to burn (second degree) of lower leg
94525	Blisters with epidermal loss due to burn (second degree) of knee
94526	Blisters with epidermal loss due to burn (second degree) of thigh (any part)
94529	Blisters with epidermal loss due to burn (second degree) of multiple sites of lower limb(s)
94530	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94531	Full-thickness skin loss due to burn (third degree NOS) of toe(s) (nail)
94532	Full-thickness skin loss due to burn (third degree NOS) of foot
94533	Full-thickness skin loss due to burn (third degree NOS) of ankle
94534	Full-thickness skin loss due to burn (third degree NOS) of lower leg
94535	Full-thickness skin loss due to burn (third degree NOS) of knee
94536	Full-thickness skin loss due to burn (third degree NOS) of thigh (any part)
94539	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of lower limb(s)
94540	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of lower limb (leg), without mention of loss of a body part
94541	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), without mention of loss of toe(s)
94542	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, without mention of loss of foot
94543	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, without mention of loss of ankle
94544	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, without mention of loss of lower leg
94545	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, without mention of loss of knee
94546	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), without mention of loss of thigh
94549	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), without mention of loss of a body part
94550	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site lower limb (leg), with loss of a body part
94551	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), with loss of toe(s)
94552	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, with loss of foot

Diagnosis Code	Description
94553	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, with loss of ankle
94554	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, with loss of lower leg
94555	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, with loss of knee
94556	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), with loss of thigh
94559	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), with loss of a body part
9460	Burns of multiple specified sites, unspecified degree
9461	Erythema due to burn (first degree) of multiple specified sites
9462	Blisters with epidermal loss due to burn (second degree) of multiple specified sites
9463	Full-thickness skin loss due to burn (third degree NOS) of multiple specified sites
9464	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, without mention of loss of a body part
9465	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, with loss of a body part
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9474	Burn of vagina and uterus
9478	Burn of other specified sites of internal organs
9479	Burn of internal organs, unspecified site
94800	Burn (any degree) involving less than 10 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94810	Burn (any degree) involving 10–19 percent of body surface with third degree burn of less than 10 percent or unspecified amount

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94811	Burn (any degree) involving 10–19 percent of body surface with third degree burn of 10–19 percent
94820	Burn (any degree) involving 20–29 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94821	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 10–19 percent
94822	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 20–29 percent
94830	Burn (any degree) involving 30–39 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94831	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 10–19 percent
94832	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 20–29 percent
94833	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 30–39 percent
94840	Burn (any degree) involving 40–49 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94841	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 10–19 percent
94842	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 20–29 percent
94843	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 30–39 percent
94844	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 40–49 percent
94850	Burn (any degree) involving 50–59 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94851	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 10–19 percent
94852	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 20–29 percent

Diagnosis Code	Description
94853	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 30–39 percent
94854	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 40–49 percent
94855	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 50–59 percent
94860	Burn (any degree) involving 60–69 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94861	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 10–19 percent
94862	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 20–29 percent
94863	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 30–39 percent
94864	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 40–49 percent
94865	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 50–59 percent
94866	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 60–69 percent
94870	Burn (any degree) involving 70–79 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94871	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 10–19 percent
94872	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 20–29 percent
94873	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 30–39 percent
94874	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 40–49 percent
94875	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 50–59 percent
94876	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 60–69 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94877	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 70–79 percent
94880	Burn (any degree) involving 80–89 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94881	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 10–19 percent
94882	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 20–29 percent
94883	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 30–39 percent
94884	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 40–49 percent
94885	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 50–59 percent
94886	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 60–69 percent
94887	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 70–79 percent
94888	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 80–89 percent
94890	Burn (any degree) involving 90 percent or more of body surface with third degree burn of less than 10 percent or unspecified amount
94891	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 10–19 percent
94892	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 20–29 percent
94893	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 30–39 percent
94894	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 40–49 percent
94895	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 50–59 percent
94896	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 60–69 percent
94897	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 70–79 percent
94898	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 80–89 percent
94899	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 90 percent or more of body surface
9490	Burn of unspecified site, unspecified degree
9491	Erythema due to burn (first degree), unspecified site
9492	Blisters with epidermal loss due to burn (second degree), unspecified site
9493	Full-thickness skin loss due to burn (third degree NOS), unspecified site
9494	Deep necrosis of underlying tissue due to burn (deep third degree), unspecified site without mention of loss of a body part
9495	Deep necrosis of underlying tissues due to burn (deep third degree, unspecified site with loss of a body part

An HBO that exceeds one session per day, any provider, is denied.

36.4.21 Injections

Injections are reimbursed as access-based fees under the physician fee schedule in accordance with 1 TAC §355.8085. Texas Medicaid fee decisions for blood clotting factors, pneumococcal and hepatitis B, injections, infusion drugs furnished through an item of implanted DME, and new injections are based on 89.5 percent of the average wholesale price (AWP). New injections are those that received approval for marketing by the FDA within the past 12 months.

For certain, specific injections studied by the Office of Inspector General (OIG)/General Accounting Office (GAO), Medicaid fee decisions are based on the recommended percentages of AWP resulting from those studies (Table 1 in §20 of Chapter 17 of the *Medicare Claims Processing Manual*, Pub. 100–04). For the remaining injections not listed above, Medicaid fee decisions are based on 85.0 percent of the AWP.

HHSC reserves the option to use other data sources to determine Medicaid fees for injections when AWP calculations are determined to be unreasonable or insufficient.

Payments for injections are excluded from the 2.5 percent Medicaid payment reduction.

CPT only copyright 2005 American Medical Association. All rights reserved.

Prescriptions are covered under the Texas Medicaid VDP. The reimbursement methodology for pharmacy services is located at 1 TAC §§355.8541 through 355.8551. The dispensing fee (1 TAC §355.8551) was reduced by 2.5 percent, effective October 16, 2003.

Injection administration billed by a provider is reimbursed separately from the medication. Injection administration should be billed using procedure code 1-90772.

Injection administration is not payable to outpatient hospitals. Procedure code 1-90772 is limited to one per day, unless the claim clearly indicates the medications could not be mixed. Procedure code 1-90772 is paid in addition to an E/M or consultation visit to ensure that each injection receives one administration fee regardless of the dosage.

Providers billing injections for clients younger than 21 years of age are to bill using the appropriate national code.

Use oral medication in preference to injectable medication in the office and outpatient hospital unless one of the following applies:

- No acceptable oral equivalent is available.
- Injectable medication is the standard treatment of choice.
- The oral route is contraindicated.
- The patient has a temperature over 102 degrees Fahrenheit (documented on the claim and in the medical record) and a high blood level of antibiotic is needed quickly.
- The patient has demonstrated noncompliance with orally prescribed medication that is documented on the claim and in the medical record.
- Previously attempted oral medication regimens have proved ineffective as supported by the medical record.
- It is an emergency situation.

Injections into joints, bursae, tendon sheaths, or trigger points are only payable for acute conditions or acute flare-ups of chronic conditions. For reimbursement, modifier AT must be used to indicate acute conditions. If a steroid medication is injected in one of the above areas, modifier AT or KX must also be used on the charge for the drug to indicate an acute condition. When performed for a chronic condition, these procedures are denied.

The acute condition does not apply to allergy injections or medically necessary injections into joints, bursae, tendon sheaths, or trigger points when used to treat acute conditions or the acute flare-up of a chronic condition.

Oral medications are not a benefit of the Texas Medicaid Program except when given in the hospital or physician's office, or when obtained by prescription through the VDP. Take-home and self-administered drugs are not a Medicaid benefit except when provided to Medicaid clients through the VDP and should not be submitted to TMHP for payment.

Physicians billing for injectable antibiotic and steroid medications *must* indicate the appropriate modifier with the appropriate injection code. The code identifying the dose administered must be used for correct reimbursement. Multiples of codes should be billed if a code is not available to document the dose administered (for example, procedure code 1-J0290—use a quantity of *2* for 1,000 mg).

The ET and KX modifiers are acceptable. Use modifier KX to indicate:

- Oral route contraindicated or an acceptable oral equivalent is not available.
- Injectable medication is the accepted treatment of choice. Oral medication regimen has proven ineffective or is not applicable.
- The patient has a temperature over 102 degrees and a high level of antibiotic is needed immediately.
- Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare-up of a chronic condition.

The Texas Vaccines for Children (TVFC) Program provides vaccines for Medicaid clients who are younger than 19 years of age, according to the Recommended Childhood Immunization Schedule (Advisory Committee on Immunization Practices [ACIP], American Academy of Pediatrics [AAP], and the American Academy of Family Physicians [AAFP]).

Refer to: "Vendor Drug Program" on page E-1 for more information.
"Immunizations" on page H-1.
"Immunizations" on page 43-23 for information on immunizations for infants and children.

36.4.21.1 Alatrofloxacin Mesylate (Trovan®)

Texas Medicaid follows the recommendation of the FDA about the use of intravenous alatrofloxacin mesylate, Trovan® . Trovan® is not reimbursed when provided in settings other than inpatient hospital. Trovan® should be reserved for use *only* in the treatment of patients who meet *all* the following treatment criteria:

- Have at least one of the following infections judged by the treating physician to be serious and life- or limb-threatening:
    - Nosocomial pneumonia
    - Community-acquired pneumonia
    - Complicated intra-abdominal infections (including post-surgical infections)
    - Gynecologic and pelvic infections
    - Complicated skin and skin-structure infections (including diabetic foot infections)
- Receive initial therapy in an inpatient health care facility
- The treating physician believes that, given the new safety information, the benefit of the product to the patient outweighs the risk

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.21.2 Amifostine

Texas Medicaid covers Amifostine for reduction of the cumulative renal toxicity associated with administration of cisplatin in patients with advanced ovarian cancer or *nonsmall* cell lung cancer with documentation of a creatinine clearance of 50 or less and where no other chemotherapeutic agent can be used. Amifostine for injection may be considered for reimbursement through Texas Medicaid for the following indications: bone marrow toxicity, cisplatin-and cyclophosphamide-induced (prophylaxis), advanced solid tumors, head and neck carcinoma, malignant lymphoma, nonsmall cell lung cancer, myelodysplastic syndromes, nephrotoxicity, advanced ovarian carcinoma, melanoma, advanced solid tumors of nongerm cell origin, neurotoxicity, reduction in the incidence of mucositus in patients receiving radiation therapy, or radiation combined with chemotherapy, and to reduce in the incidence of xerostomia associated with post-operative radiation treatment of head and neck cancer, where the radiation port includes a substantial portion of the parotid glands. It may also be used to reduce the incidence of moderate-to-severe xerostomia in patients undergoing postoperative radiation treatment for head and neck cancers where the radiation port includes a substantial portion of the parotid glands. Use HCPCS procedure code 1-J0207.

36.4.21.3 Anistreplase

Reimbursement of procedure code 1-J0350 is limited to hospital facilities, freestanding radiation treatment centers (POS 5), and the office setting (POS 1). Anistreplase provided in the inpatient setting (POS 3) is part of the DRG reimbursement, and no separate payment is made.

Procedure code 1-J0350 is payable for the following diagnosis codes only:

Diagnosis Code	Description
41000	Acute myocardial infarction of antero-lateral wall, episode of care unspecified
41001	Acute myocardial infarction of antero-lateral wall, initial episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41020	Acute myocardial infarction of infero-lateral wall, episode of care unspecified
41021	Acute myocardial infarction of infero-lateral wall, initial episode of care
41030	Acute myocardial infarction of infero-posterior wall, episode of care unspecified
41031	Acute myocardial infarction of infero-posterior wall, initial episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41071	Subendocardial infarction, initial episode of care
41080	Acute myocardial infarction of other specified sites, episode of care unspecified
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41070	Subendocardial infarction, episode of care unspecified
41081	Acute myocardial infarction of other specified sites, initial episode of care
99673	Other complications due to renal dialysis device, implant, and graft

Procedure code 1-J0350 is denied when submitted with other diagnosis codes.

36.4.21.4 Antihemophilic Factor

Reimbursement for the following antihemophilic factor procedure codes is limited to the diagnosis codes of coagulation defects, noted in the second table below.

Reimbursement is available when the antihemophilic product is administered by or under the personal supervision of a physician in POS 1, 2, 5, or 8.

HCPCS Codes		
1-J7188	1-J7189	1-J7190
1-J7191	1-J7192	1-J7193
1-J7194	1-J7195	1-J7197
1-J7198	1-J7199	

Diagnosis Code	Description
2860	Congenital factor VIII disorder
2861	Congenital factor IX disorder

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2862	Congenital factor XI deficiency
2863	Congenital deficiency of other clotting factors
2864	Von Willebrand's disease
2865	Hemorrhagic disorder due to circulating anticoagulants
2866	Defibrination syndrome
2867	Acquired coagulation factor deficiency
2869	Other and unspecified coagulation defects
V8302	Symptomatic hemophilia A carrier

Reimbursement for Factor IX procedure codes 1-J7193 and 1-J7195 is limited to diagnosis code 2861, Congenital Factor IX disorder.

Reimbursement for procedure code 1-J7189 is limited to the following diagnosis codes:

Diagnosis Code	Description
2860	Congenital factor VIII disorder
2861	Congenital factor IX disorder
2863	Congenital deficiency of other clotting factors
2869	Other and unspecified coagulation defects

36.4.21.5 Bacillus Calmette-Guérin (BCG) Vaccine

Use CPT code 1-90585 when billing for BCG vaccine for tuberculosis, live, for percutaneous use (immunization).

Procedure code 1-90585 is payable for diagnosis code V032, Need for prophylactic vaccination and inoculation against bacterial diseases, tuberculosis (BCG).

Procedure code 1-J9031 and 1-90586 are payable for the following diagnosis codes:

Diagnosis Code	Description
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
2337	Carcinoma in situ of bladder

Procedure code 2-51720 may be reimbursed separately when billed for the same date of service.

36.4.21.6 Baclofen (Lioresal), Trial Injection and Pump Implantation/Catheter Insertion/Revision/Replacement

When billing for intrathecal baclofen on a trial basis, use procedure code 1-J0476.

Prior authorization is required for reimbursement of the Baclofen (Lioresal) trial injection and pump, implantation, catheter insertion/revision/replacement.

Epidural/subarachnoid infusion for chronic spasticity is allowed when prior authorized.

Reimbursement for procedure codes 2-62350, 2-62360, 2-62361, and 2-62362 require prior authorization. Providers must request prior authorization.

Initial evaluation includes age of onset of signs and symptoms, and other visits which are directly related to this request (If requesting baclofen, specify muscle groups affected, degree of spasticity). The following information is required with the request:

- Hospitalizations and other diagnoses
- Trial of intrathecal medication that is to be used. (e.g. baclofen, morphine sulfate, Dilaudid® [hydromophone HCl] or fentanyl)
- Type of surgical implantation with description of the device
- Periodic follow-up plan of care with reloading of pump and monitor changes in infusion rate
- Pertinent lab, X-ray results
- Client's weight (in kilograms)
- Family or client's role, participation, or compliance
- Follow-up evaluation of noninvasive treatments attempted, including medications, dosage route, frequency
- Expectation of benefit from procedure related to follow-up assessment to evaluate treatment goals

Separate payment for the device is *not* covered for the physician or the hospital.

Providers are to send prior authorization requests to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Refer to: "Texas Medicaid Prior Authorization Request Form: Intrathecal Baclofen or Morphine Pump Section I" on page B-102.

CPT only copyright 2005 American Medical Association. All rights reserved.

Use the following procedure codes when billing for epidural/subarachnoid catheter and drug administration:

Procedure Codes		
1-01996	2-62350	2-62351
2-62355	2-62360	2-62361
2-62362	2-62365	

Procedure codes 2-62350, 2-62355, 2-62360, 2-62361, 2-62362, and 2-62365 billed on the same day as another surgical procedure performed by the same physician are paid according to multiple surgery guidelines.

Procedure codes 2-62350, 2-62355, 2-62360, 2-62361, 2-62362, and 2-62365 billed on the same day as an anesthesia procedure by the same physician, are denied as included in the total anesthesia time.

Procedure codes I-62367, I-62368, and 1-01996 are payable for the professional component. No payment is allowed for the technical component. Procedure codes I-62367 and I-62368 are payable in the office setting (POS 1).

36.4.21.7 Botulinum Toxin Type A

Procedure code 1-J0585 no longer requires prior authorization. It is payable for the following diagnosis codes:

Diagnosis Code	Description
3336	Genetic torsion dystonia
33381	Blepharospasm
33382	Orofacial dyskinesia
33383	Spasmodic torticollis
33384	Organic writers' cramp
33389	Other fragments of torsion dystonia
3341	Hereditary spastic paraplegia
340	Multiple sclerosis
3410	Neuromyelitis optica
3411	Schilder's disease
3418	Other demyelinating diseases of central nervous system
3419	Demyelinating disease of central nervous system, unspecified
34211	Spastic hemiplegia and hemiparesis affecting dominant side
34212	Spastic hemiplegia and hemiparesis affecting nondominant side
3430	Congenital diplegia
3431	Congenital hemiplegia
3432	Congenital quadriplegia
3433	Congenital monoplegia
3434	Infantile hemiplegia
3438	Other specified infantile cerebral palsy
3439	Infantile cerebral palsy, unspecified
34400	Quadriplegia, unspecified
34401	Quadriplegia, C1-C4, complete
34402	Quadriplegia, C1-C4, incomplete
34403	Quadriplegia, C5-C7, complete
34404	Quadriplegia, C5-C7, incomplete
34409	Other quadriplegia
3441	Paraplegia
3442	Diplegia of upper limbs
34430	Monoplegia of lower limb affecting unspecified side
34431	Monoplegia of lower limb affecting dominant side
34432	Monoplegia of lower limb affecting nondominant side
34440	Monoplegia of upper limb affecting unspecified side
34441	Monoplegia of upper limb affecting dominant side
34442	Monoplegia of upper limb affecting nondominant side
3445	Unspecified monoplegia
34460	Cauda equina syndrome without mention of neurogenic bladder
34461	Cauda equina syndrome with neurogenic bladder
34481	Locked-in state
34489	Other specified paralytic syndrome
3449	Paralysis, unspecified
3518	Other facial nerve disorders
37800	Esotropia, unspecified
37801	Monocular esotropia
37802	Monocular esotropia with A pattern
37803	Monocular esotropia with V pattern
37804	Monocular esotropia with other noncomitancies
37805	Alternating esotropia
37806	Alternating esotropia with A pattern
37807	Alternating esotropia with V pattern
37808	Alternating esotropia with other noncomitancies
37810	Exotropia, unspecified
37811	Monocular exotropia
37812	Monocular exotropia with A pattern
37813	Monocular exotropia with V pattern
37814	Monocular exotropia with other noncomitancies
37815	Alternating exotropia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37816	Alternating exotropia with A pattern
37817	Alternating exotropia with V pattern
37818	Alternating exotropia with other noncomitancies
37820	Intermittent heterotropia, unspecified
37821	Intermittent esotropia, monocular
37822	Intermittent esotropia, alternating
37823	Intermittent exotropia, monocular
37824	Intermittent exotropia, alternating
37830	Heterotropia, unspecified
37831	Hypertropia
37832	Hypotropia
37833	Cyclotropia
37834	Monofixation syndrome
37835	Accommodative component in esotropia
37840	Heterophoria, unspecified
37841	Esophoria
37842	Exophoria
37843	Vertical heterophoria
37844	Cyclophoria
37845	Alternating hyperphoria
37850	Paralytic strabismus; paralytic strabismus, unspecified
37851	Third or oculomotor nerve palsy, partial
37852	Third or oculomotor nerve palsy, total
37853	Fourth or trochlear nerve palsy
37854	Sixth or abducens nerve palsy
37855	External ophthalmoplegia
37856	Total ophthalmoplegia
37860	Mechanical strabismus, unspecified
37861	Brown's (tendon) sheath syndrome
37862	Mechanical strabismus from other musculofascial disorders
37863	Limited duction associated with other conditions
37871	Duane's syndrome
37872	Progressive external ophthalmoplegia
37873	Strabismus in other neuromuscular disorders
37881	Palsy of conjugate gaze
37882	Spasm of conjugate gaze
37883	Convergence insufficiency or palsy
37884	Convergence excess or spasm
37885	Anomalies of divergence
37886	Internuclear ophthalmoplegia
37887	Other dissociated deviation of eye movements
3789	Unspecified disorder of eye movements
47875	Laryngeal spasm
47879	Other diseases of larynx
5300	Achalasia and cardiospasm
7235	Torticollis, unspecified
72885	Spasm of muscle
72982	Cramp of limb

If a quantity greater than 300 units of botulinim toxin is billed on the same day, supporting medical documentation must be maintained in the client's records for dosage used and is subject to retrospective review.

EMGs and/or visits, that are billed in conjunction with the administration of botulinum toxin type A, do not require prior authorization and are subject to current reimbursement guidelines. Any supplies billed by the physician for the administration of botulinum toxin type A are not paid separately.

36.4.21.8 Cidofovir

Cidofovir is a covered benefit when used for the treatment of cytomegalovirus (CMV) retinitis in clients with acquired immune deficiency syndrome (AIDS). Use diagnosis code 36320, Chorioretinitis, unspecified with procedure code 1-J0740.

36.4.21.9 Cladribine (Leustatin)

Procedure code 1-J9065 is a benefit of the Texas Medicaid Program when billed with diagnosis codes listed on the following table for hairy cell leukemia.

Diagnosis Code	Description
20240	Leukemic reticuloendotheliosis, unspecified site
20241	Leukemic reticuloendotheliosis involving lymph nodes of head, face, and neck
20242	Leukemic reticuloendotheliosis involving intrathoracic lymph nodes
20243	Leukemic reticuloendotheliosis involving intra-abdominal lymph nodes
20244	Leukemic reticuloendotheliosis involving lymph nodes of axilla and upper arm
20245	Leukemic reticuloendotheliosis involving lymph nodes of inguinal region and lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20246	Leukemic reticuloendotheliosis involving intrapelvic lymph nodes
20247	Leukemic reticuloendotheliosis involving spleen
20248	Leukemic reticuloendotheliosis involving lymph nodes of multiple sites

Cladribine is denied for all other diagnosis codes.

36.4.21.10 DaunoXome®

Liposomal encapsulated daunorubicin (DaunoXome®) for the treatment of advanced AIDS-related Kaposi's Sarcoma is reimbursable under the Texas Medicaid Program. Providers must use procedure code 1-J9999 and provide the drug name and dosage.

36.4.21.11 Deferoxamine Mesylate (Desferal®)

Deferoxamine Mesylate (Desferal®) is a drug that chelates iron by forming a stable complex that prevents the iron from entering into more chemical reactions. Deferoxamine Mesylate (Desferal®) is indicated for the treatment of acute iron intoxication and of chronic iron overload because of transfusion dependent anemias.

Use procedure code 1-J0895 when billing for Deferoxamine Mesylate (Desferal®).

Payment of Deferoxamine Mesylate (Desferal®) is limited to the following diagnosis codes:

Diagnosis Code	Description
28241	Sickle-cell thalassemia without crisis
28242	Sickle-cell thalassemia with crisis
28249	Other thalassemia
28260	Sickle-cell disease, unspecified
28261	Hb-SS disease without crisis
28262	Hb-SS disease with crisis
28263	Sickle-cell/Hb-C disease without crisis
28264	Sickle-cell/Hb-C disease with crisis
28268	Other sickle-cell disease without crisis
28269	Other sickle-cell disease with crisis
28522	Anemia in neoplastic disease
28529	Anemia of other chronic disease
2858	Other specified anemias
5851	Chronic kidney disease, Stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified

Deferoxamine Mesylate (Desferal®) is denied for other than these listed diagnosis codes.

36.4.21.12 Denileukin Diftitox (Ontak®)

Procedure code 1-J9160 is reimbursed by the Texas Medicaid Program for clients with advanced or recurrent cutaneous T-cell lymphoma (payable, but not limited to diagnosis codes 20210 and 20220) with the CD25 component of IL-2 and failure of at least one type of traditional therapy. Documentation of diagnosis and treatment must be submitted with the claim. Denileukin diftitox is reimbursed only when given in the office or outpatient setting.

36.4.21.13 Docetaxel

Procedure code 1-J9170 is covered if billed using one of the following diagnosis codes:

Diagnosis Code	Description
1620	Malignant neoplasm of the trachea
1622	Malignant neoplasm of the main bronchus
1623	Malignant neoplasm of the upper lobe, bronchus, or lung
1624	Malignant neoplasm of the middle lobe, bronchus, or lung
1625	Malignant neoplasm of the lower lobe, bronchus, or lung
1628	Malignant neoplasm of other parts of bronchus, or lung
1629	Malignant neoplasm of bronchus and lung, unspecified
1740	Malignant neoplasm nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
1830	Malignant neoplasm of ovary
1970	Secondary malignant neoplasm of lung
1971	Secondary malignant neoplasm of mediastinum
1972	Secondary malignant neoplasm of pleura
1977	Malignant neoplasm of liver, secondary
1982	Secondary malignant neoplasm of skin
1983	Secondary malignant neoplasm of brain and spinal cord
1985	Secondary malignant neoplasm of bone and bone marrow
1986	Secondary malignant neoplasm of ovary
19881	Secondary malignant neoplasm of breast
19889	Secondary malignant neoplasm of other specified sites

36.4.21.14 Dolasetron Mesylate (Anzemet®)

When billing for dolasetron mesylate (Anzemet®), use procedure code 1-J1260. Procedure code 1-J1260 is reimbursed at $15.50.

36.4.21.15 Epoetin Alfa (Erythropoietin; EPO)

Erythropoietin alfa or epoetin alfa (EPO) is a glycoprotein that stimulates red blood cell formation and production of the precursor red blood cells of bone marrow. EPO is indicated for:

- Anemia associated with chronic renal failure, including clients on dialysis (end-stage renal disease [ESRD]) and clients not on dialysis. In chronic ESRD clients, the increased blood urea nitrogen (BUN) impairs the production of EPO, leading to a chronic anemia.
- Anemia related to therapy with zidovudine (AZT) in HIV-infected patients.
- Anemia because of the effects of concomitantly administered chemotherapy in patients with nonmyeloid malignancies.
- Anemia related to rheumatoid arthritis.

Procedure code 1-J0885 is payable for the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
20300	Multiple myeloma, without mention of remission
20301	Multiple myeloma, in remission
2733	Macroglobulinemia
2800	Iron deficiency anemia secondary to blood loss (chronic)
2801	Iron deficiency anemia secondary to inadequate dietary iron intake
2808	Other specified iron deficiency anemias
2809	Iron deficiency anemia, unspecified
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
5820	Chronic glomerulonephritis with lesion of proliferative glomerulonephritis
5821	Chronic glomerulonephritis with lesion of membranous glomerulonephritis
5822	Chronic glomerulonephritis with lesion of membranoproliferative glomerulonephritis
5824	Chronic glomerulonephritis with lesion of rapidly progressive glomerulonephritis
58281	Chronic glomerulonephritis in diseases classified elsewhere
58289	Other chronic glomerulonephritis with specified pathological lesion in kidney
5829	Chronic glomerulonephritis with unspecified pathological lesion in kidney
5851	Chronic kidney disease, Stage I

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified
7140	Rheumatoid arthritis
79001	Precipitous drop in hematocrit
99680	Complications of unspecified transplanted organ
99811	Hemorrhage complicating a procedure
V5811	Encounter for antineoplastic chemotherapy
V5812	Encounter for immunotherapy for neoplastic condition

The following diagnosis codes may be used to bill for treatment of anemia associated with ESRD patients receiving dialysis. These EPO procedure codes are for a quantity of 1 for every 1,000 units. The exact dose should be stated on the claim. For example, if a client has a hematocrit (HCT) of 34 percent with a diagnosis of ESRD and is given 5,000 units of EPO, bill a quantity of 5 with procedure code 1-J0886:

Diagnosis Code	Description
40301	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage V or end stage renal disease
40311	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage V or end stage renal disease
40391	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease
40402	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage V or end stage renal disease
40403	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage V or end stage renal disease
40412	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage V or end stage renal disease
40492	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage V or end stage renal disease
5851	Chronic kidney disease, Stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified
5889	Unspecified disorder resulting from impaired renal function
V420	Kidney replaced by transplant
V451	Postsurgical renal dialysis status
V4983	Awaiting Organ Transplant Status
V560	Aftercare involving extracorporeal dialysis
V5631	Encounter for adequacy testing for hemodialysis
V5632	Encounter for adequacy testing for peritoneal dialysis
V568	Aftercare involving other dialysis
V5844	Aftercare following organ transplant

EPO is limited to three injections per calendar week (Sunday through Saturday).

EPO is payable in the following places of service:

POS	Description
1	Office
2	Home
5	Outpatient hospital

Darbepoetin

Darbepoetin alfa is an erythropoiesis-stimulating protein closely related to EPO. Darbepoetin stimulates erythropoiesis by the same mechanism as endogenous EPO. EPO is produced in the kidney and released into the bloodstream in response to hypoxia. It interacts with progenitor stem cells to increase erythrocyte production. Darbepoetin codes 1-J0881 and/or 1-J0882 will be limited to 500 units per day (500mcg). Darbepoetin alfa should be administered once a week if the patient was receiving EPO two to three times weekly and once every two weeks if the patient was receiving EPO once per week.

CPT only copyright 2005 American Medical Association. All rights reserved.

Darbeoptin will be limited to the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
20300	Multiple myeloma, without mention of remission
20301	Multiple myeloma, in remission
23872	Low grade myelodysplastic syndrome lesions
23873	High grade myelodysplastic syndrome lesions
23874	Myelodysplastic syndrome with 5q deletion
23875	Myelodysplastic syndrome, unspecified
23876	Myelofibrosis with myeloid metaplasia
23879	Other lymphatic and hematopoietic tissues
2733	Macroglobulinemia
2800	Iron deficiency anemia secondary to blood loss (chronic)
2830	Autoimmune hemolytic anemias
28409	Other neutropenia
2848	Other specified aplastic anemias
2849	Aplastic anemia, unspecified
2851	Acute posthemorrhagic anemia
2859	Anemia, unspecified
7140	Rheumatoid arthritis
79001	Precipitous drop in hematocrit
99680	Complications of unspecified transplanted organ
99811	Hemorrhage complicating a procedure
V420	Kidney replaced by transplant
V451	Postsurgical renal dialysis status
V560	Aftercare involving extracorporeal dialysis
V5631	Encounter for adequacy testing for hemodialysis
V568	Aftercare involving other dialysis
V5811	Encounter for antineoplastic chemotherapy
V5812	Encounter for immunotherapy for neoplastic condition

36.4.21.16 Gamma Globulin/Immune Globulin

Gamma globulin procedure codes 1-J1460, 1-J1470, 1-J1480, 1-J1490, 1-J1500, 1-J1510, 1-J1520, 1-J1530, 1-J1540, 1-J1550, 1-J1560, 1-J1566, 1-J1567, 1-J7504, and 1-J7511 are covered benefits for the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
20410	Lymphoid leukemia, chronic, without mention of remission
27789	Other specified disorders of metabolism
27900	Hypogammaglobulinemia, unspecified
27901	Selective IgA immunodeficiency
27902	Selective IgM immunodeficiency
27903	Other selective immunoglobulin deficiencies
27904	Congenital hypogammaglobulinemia
27905	Immunodeficiency with increased IgM
27906	Common variable immunodeficiency
27909	Other deficiency of humoral immunity
27910	Immunodeficiency with predominant T-cell defect, unspecified
27911	DiGeorge's syndrome
27912	Wiskott-Aldrich syndrome
27913	Nezelof's syndrome
27919	Other deficiency of cell-mediated immunity
2792	Combined immunity deficiency
2793	Unspecified immunity deficiency
2794	Autoimmune disease, not elsewhere classified
28409	Other constitutional aplastic anemia
28730	Primary thrombocytopenia, unspecified
28731	Immune thrombocytopenic purpura
28732	Evans' syndrome
28733	Congenital and hereditary thrombocytopenic purpura
28739	Other primary thrombocytopenia
3348	Other spinocerebellar diseases
340	Multiple sclerosis
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, with intractable epilepsy
3530	Brachial plexus lesions
3570	Acute infective polyneuritis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
35781	Chronic inflammatory demyelinating polyneuritis
35782	Critical illness polyneuropathy
35800	Myasthenia gravis without (acute) exacerbation
35801	Myasthenia gravis with (acute) exacerbation
3929	Rheumatic chorea without mention of heart involvement
4461	Acute febrile mucocutaneous lymph node syndrome (MCLS)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
586	Renal failure, unspecified
6463	Habitual aborter, currently pregnant
7103	Dermatomyositis
7104	Polymyositis
7140	Rheumatoid arthritis
79579	Other and unspecified nonspecific immunological findings
9895	Toxic effect of venom
V0179	Contact or exposure to other viral diseases
V0189	Contact with or exposure to communicable diseases, other communicable diseases
V0260	Carrier or suspected carrier of viral hepatitis, unspecified
V08	Asymptomatic human immunodeficiency virus (HIV) infection status
V4281	Bone marrow replaced by transplant
V4282	Peripheral stem cells replaced by transplant
V4283	Pancreas replaced by transplant
V4284	Organ or tissue replaced by transplant, intestines
V4289	Other specified organ or tissue replaced by transplant

The globulins listed in the following table are payable for clients younger than 3 years of age with a diagnosis of idiopathic thrombocytopenia (ITP) and a concurrent diagnosis of HIV/AIDS.

Procedure Codes		
1-J1460	1-J1470	1-J1480
1-J1490	1-J1500	1-J1510
1-J1520	1-J1530	1-J1540
1-J1550	1-J1560	1-J1566
1-J1567		

All claims with a primary diagnosis of HIV/AIDS suspend to Medical Policy for manual review of a concurrent diagnosis of ITP. If the client does not meet the age criteria, requests are considered by the medical director, or designee, on a case by case basis.

Immune globulin or gamimune (procedure codes 1-J1566 and 1-J1567) is an immunoglobulin preparation. It also is a covered benefit for those diagnosis codes listed previously.

36.4.21.17 Gemcitabine HCl (Gemzar®)

Gemzar® is a first-line treatment for patients with locally advanced or metastatic adenocarcinoma of the pancreas. Use and medical necessity of this chemotherapeutic agent should be determined by the provider in accordance with appropriate indications or approved criteria.

Max fee for procedure code 1-J9201 is $100.54. When billing for 1-J9201, the quantity administered, per 200 mg, must appear on the claim. For example, if a dose of 1,000 mg is administered, a quantity of 5 should appear on the claim.

36.4.21.18 Granisetron Hydrochloride

When billing for injection, granisetron hydrochloride, 100 mcg, use procedure code 1-J1626 reimbursed at $17.47. The quantity used, per 100 mcg, must appear on the claim. For example, if a dose of 800 mcg is administered, a quantity of 8 should appear on the claim.

Procedure code 1-J1626 is payable only for the following diagnosis codes:

Diagnosis Code	Description
V580	Radiotherapy
V5811	Encounter for antineoplastic chemotherapy
V5812	Encounter for immunotherapy for neoplastic condition
V661	Convalescence following radiotherapy
V662	Convalescence following chemotherapy

Effective August 1, 2005, hepatitis A vaccine is routinely recommended for all Texas children 2 through 18 years of age.

36.4.21.19 Hepatitis B Vaccine

The Texas Medicaid Program covers the hepatitis B vaccine and the hepatitis B immune globulin (HBIG) for those clients who are not otherwise covered by TVFC Program.

CPT only copyright 2005 American Medical Association. All rights reserved.

Administration of the hepatitis B vaccine is indicated for immunization against infection caused by all known subtypes of the hepatitis B virus (HBV). The hepatitis B vaccine is medically necessary for patients who have been exposed to the HBV. This vaccine will not prevent hepatitis caused by other agents, such as hepatitis A, hepatitis C, or other viruses known to infect the liver.

The Texas Medicaid Program allows coverage of the hepatitis B vaccine for clients who are at high risk of contracting the disease.

Procedure codes 1-90740, 1-90746, and 1-90747 are payable for clients 19 years of age and older.

Procedure code 1-90772, Injection, sc/im is payable for the administration of the hepatitis B vaccines.

The immunization administration procedure codes 1-90471 and 1-90472 are not to be used for the administration of the hepatitis B vaccine.

Mentally retarded Medicaid-eligible individuals residing in a private (nonstate) institution for the mentally retarded (ICF-MR), are classified as at a continuing high risk for hepatitis B with an ongoing exposure potential. When provided and billed by the attending physician, Medicaid will allow coverage of hepatitis B vaccine for all inpatients of an ICF-MR (private) facility.

When the hepatitis B vaccine is provided to clients with end stage renal disease who are directly exposed, separate payment may be made as the vaccine and its administration are not included in dialysis services.

HBIG provides coverage for acute exposure to the HBV.

Procedure code 1-90371 is payable for 19 years of age and older.

Procedure code 1-90371 is covered for diagnosis code V0179, Contact or exposure to other viral diseases.

36.4.21.20 Vaccine Coverage under Texas Vaccines for Children (TVFC) Program

All children from birth through age 18 years are approved to be vaccinated against hepatitis B with vaccine supplied by the TVFC Program. It is not necessary for a client, 0 through 18 years of age, to be included in a hepatitis B high-risk group to be eligible for the state-supplied vaccine.

The ACIP recommends administration of the hepatitis B vaccine to newborns before discharge from the hospital. This is the accepted standard of care and will not be considered as a reason to upcode to a different DRG.

The administration of the hepatitis B vaccine to newborns is included in the DRG payment and will not be reimbursed separately.

TVFC provides hepatitis B vaccine free of charge to physicians, hospitals, birthing centers and THSteps providers for administration to Medicaid-eligible clients 0 through 18 years of age. For Medicaid clients who are 19 through 20 years of age, providers must purchase the vaccine. The Medicaid program will reimburse providers for the cost of the vaccine plus the administration fee.

Refer to: "Immunizations" on page H-1 for more information.
"Texas Health Steps (THSteps)" on page 43-1 for more information.

A distinction should be noted about proper billing. The billing codes in "Immunizations Billed Within THSteps Medical Checkups, Exception to Periodicity, and Follow-Up Visit" on page 43-10 and "Immunizations Billed Outside of THSteps Medical Checkups, Exception to Periodicity, or Follow-Up Visit" on page 43-10 are to be used when the client is covered by the THSteps Program or the vaccine the client receives is provided through the TVFC Program. In either case, the vaccine is provided at no cost, and providers are allowed only the $5 administration fee reimbursement.

36.4.21.21 Hormone Injections

The following hormone procedure codes are a benefit of the Texas Medicaid Program when billed with a valid and applicable diagnosis code that indicates the client's physical condition:

Procedure Codes		
1-J0725	1-J0900	1-J0970
1-J1000	1-J1051	1-J1055
1-J1056	1-J1060	1-J1070
1-J1080	1-J1380	1-J1390
1-J3120	1-J3130	1-J3140
1-J3150	1-J1435	1-J1410

Procedure code 1-J1055 is a benefit for females 10 through 55 years of age when billed for the following diagnosis codes:

Diagnosis Code	Description
V2501	General counseling on prescription of oral contraceptives
V2502	General counseling on initiation of other contraceptive measures
V2509	Other general counseling and advice on contraceptive management
V2540	Contraceptive surveillance, unspecified
V2541	Surveillance of contraceptive pill
V2549	Surveillance of other contraceptive method
V255	Insertion of implantable subdermal contraceptive
V258	Other specified contraceptive management
V259	Unspecified contraceptive management
V615	Multiparity

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure code 1-J1056 is a benefit for females 10 through 55 years of age when billed for the following diagnosis codes. 1-J1056 is limited to once every 28 days.

Diagnosis Code	Description
V2501	General counseling on prescription of oral contraceptives
V2502	General counseling on initiation of other contraceptive measures
V2509	Other general counseling and advice on contraceptive management
V615	Multiparity

Growth Hormone

Vendor Drug services require prior authorization for outpatient prescriptions for biosynthetic growth hormone injections. Children with growth failure because of lack of adequate endogenous growth hormone secretion may be approved for therapy based on physician documentation of medical necessity.

Consideration for approval by Vendor Drug is based on the following criteria:

- Physical stature less than the third percentile on the growth chart
- Growth velocity 4 cm or less per year (5–10 years of age)
- Bone age a minimum of two years behind chronological age with epiphyses indicating growth potential
- Evidence of deficient growth hormone production on two pharmacological provocative tests indicating growth hormone deficiency
- Regular thyroid and other pituitary function studies (may be corrected with replacement therapy)
- Somatomedin C level or IGF/BP3

Females with Turner's Syndrome may be approved for growth hormone therapy without evidence of deficient growth hormone production on provocative testing if the other criteria are met. Documentation of chromosomal abnormality must be submitted.

Nutropin therapy may be approved for the treatment of growth failure associated with chronic renal insufficiency up to the time of renal transplantation with physician documentation of diagnosis and growth failure. Approval may be granted for up to a 12-month period. If an extension of benefits is requested, the provider must submit a progress report indicating growth and maturation.

Providers are to send requests for prior approval of somatrem (Protropin®) and somatropin (Nutropin® , Humatrope® , Saizen® , Genotropin®) to the following address:

Vendor Drug
Drug Use Review Unit
1100 West 49th Street
Austin, TX 78756-3174
Fax: 1-512-338-6462

36.4.21.22 Ibutilide Fumarate

Procedure code 1-J1742 is a covered benefit of Medicaid. This procedure code is covered for the following diagnosis codes:

Diagnosis Code	Description
42731	Atrial fibrillation
42732	Atrial flutter

No other diagnosis codes are covered for this procedure code.

36.4.21.23 Idarubicin/Idamycin PFS Injection

Idarubicin hydrochloride is available in ready-to-use 5-mg, 10-mg, and 20-mg powder dosages. The new powder form is payable under the existing procedure code 1-J9211. When submitting a claim for this drug, specify the used quantity and/or dose.

36.4.21.24 Imitrex

Imitrex should be billed using procedure code 1-J3030. Reimbursement is limited to:

Diagnosis Code	Description
34600	Classic migraine without mention of intractable migraine
34601	Classic migraine with mention of intractable migraine, so stated
34610	Common migraine without mention of intractable migraine
34611	Common migraine with mention of intractable migraine, so stated
34620	Variants of migraine, without mention of intractable migraine
34621	Variants of migraine with intractable migraine, so stated
34680	Other forms of migraine without mention of intractable migraine
34681	Other forms of migraine with intractable migraine, so stated
34690	Migraine unspecified without mention of intractable migraine
34691	Migraine, unspecified with intractable migraine, so stated

Procedure code 1-J3030 is denied for all other diagnosis codes.

Only use procedure code 1-J3030 when the drug is administered in the physician's office or the outpatient hospital by a physician or under the physician's direct supervision. Take-home medication for self-administration is a benefit of the Texas Medicaid Program *only* when provided to clients with Medicaid coverage through the VDP.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.21.25 Immunosuppressive Drugs

Coverage is allowed for FDA-approved intravenous immunosuppressive drugs used for immunosuppression after an approved Texas Medicaid organ transplant procedure. Benefits are limited to the one-year period following the date of the beneficiary's discharge from the hospital after an approved Texas Medicaid organ transplant, conditional on the client's Medicaid eligibility.

Intravenous immunosuppressive drugs administered by physicians or under their personal supervision are reimbursable to physicians in a physicians office, in the home setting, SNF, and a nonskilled nursing facility. These IV drugs may be reimbursed to the outpatient facility where they were administered. Immunosuppressive drugs administered in the inpatient hospital setting are included in the DRG reimbursement.

Coverage of immunosuppressive drugs includes, but is not limited to:

Procedure Codes		
1-J0480	1-J7501	1-J7504
1-J7505	1-J7511	1-J7516
1-J7525		

Procedure code 1-J7511 is restricted to the following diagnosis codes:

Diagnosis Code	Description
V420	Kidney replaced by transplant
V5844	Aftercare following organ transplant

Oral self-administered immunosuppressive drugs may be payable through the VDP.

Procedure code 1-J7525 is restricted to the following diagnosis codes:

Diagnosis Code	Description
V420	Kidney replaced by transplant
V427	Liver replaced by transplant
V5844	Aftercare following organ transplant

Procedure code 1-J0480 is restricted to the following diagnosis codes:

Diagnosis Code	Description
V420	Kidney replaced by transplant
V5844	Aftercare following organ transplant

36.4.21.26 Infliximab (Remicade)

Infliximab is a benefit for clients with an inadequate response to methotrexate therapy. Procedure code 1-J1745 is reimbursed for the following diagnosis codes:

Diagnosis Code	Description
5550	Regional enteritis of small intestine
5551	Regional enteritis of large intestine
5552	Regional enteritis of small intestine with large intestine
5559	Regional enteritis of unspecified site
5651	Anal fistula
56981	Fistula of intestine, excluding rectum and anus
7140	Rheumatoid arthritis
7141	Felty's syndrome
7142	Other rheumatoid arthritis with visceral or systemic involvement
71430	Chronic or unspecified polyarticular juvenile rheumatoid arthritis

Documentation supporting the client's inadequate response to methotrexate-only therapy must be maintained in the client's file. The documentation is subject to retrospective review.

36.4.21.27 Influenza Vaccine

TVFC will provide influenza vaccine for all eligible clients under 19 years of age as identified in the ACIP guidelines relating to the prevention and control of influenza.

Influenza vaccine is a covered benefit of the Texas Medicaid for clients who are not covered by the THSteps program, TVFC, or when the vaccine is not available through the TVFC. Providers are expected to follow the ACIP guidelines relating to Prevention and Control of Influenza. The procedure codes for billing influenza vaccine are 1-90655, 1-90656, 1-90657, and 1-90658.

In addition, the related immunization administration codes 1-90465, 1-90466, 1-90471, or 1-90472 must be billed. The procedure codes for these vaccines are processed as informational only, but must be included on the claim in order to be considered for reimbursement for the vaccine administration. Influenza vaccines that are not obtained from the TVFC Program (due to a shortage of the vaccine from the TVFC Program) will be considered for reimbursement only when using modifier U1 with the applicable influenza vaccine CPT procedure code.

36.4.21.28 Interferon Injections

The following interferon procedure codes are payable when billed with a covered diagnosis:

Procedure Codes		
1-J1825	1-J9212	1-J9213
1-J9214	1-J9215	1-J9216
1-Q3025	1-Q3026	

CPT only copyright 2005 American Medical Association. All rights reserved.

The following diagnosis codes are payable for interferon injection:

Diagnosis Code	Description
07030	Viral hepatitis B without mention of hepatic coma, acute or unspecified, without mention of hepatitis delta
07031	Viral hepatitis B without mention of hepatic coma, acute or unspecified, with hepatitis delta
07051	Acute hepatitis C without mention of hepatic coma
07052	Hepatitis delta without mention of active hepatitis B disease or hepatic coma
07053	Hepatitis e without mention of hepatic coma
07054	Chronic hepatitis C without mention of hepatic coma
07059	Other specified viral hepatitis without mention of hepatic coma
07070	Unspecified viral hepatitis C without hepatic coma
07071	Unspecified viral hepatitis C with hepatic coma
07810	Viral warts, unspecified
1530	Malignant neoplasm of hepatic flexure
1531	Malignant neoplasm of transverse colon
1532	Malignant neoplasm of descending colon
1533	Malignant neoplasm of sigmoid colon
1534	Malignant neoplasm of cecum
1535	Malignant neoplasm of appendix vermiformis
1536	Malignant neoplasm of ascending colon
1537	Malignant neoplasm of splenic flexure
1538	Malignant neoplasm of other specified sites of large intestine
1539	Malignant neoplasm of colon, unspecified site
1720	Malignant melanoma of skin of lip
1721	Malignant melanoma of skin of eyelid, including canthus
1722	Malignant melanoma of skin of ear and external auditory canal
1723	Malignant melanoma of skin of other and unspecified parts of face
1724	Malignant melanoma of skin of scalp and neck
1725	Malignant melanoma of skin of trunk, except scrotum
1726	Malignant melanoma of skin of upper limb, including shoulder
1727	Malignant melanoma of skin of lower limb, including hip
1728	Malignant melanoma of other specified sites of skin
1729	Melanoma of skin, site unspecified
1730	Other malignant neoplasm of skin of lip
1731	Other malignant neoplasm of skin of eyelid, including canthus
1732	Other malignant neoplasm of skin of ear and external auditory canal
1733	Other malignant neoplasm of skin of other and unspecified parts of face
1734	Other malignant neoplasm of scalp and skin of neck
1735	Other malignant neoplasm of skin of trunk, except scrotum
1736	Other malignant neoplasm of skin of upper limb, including shoulder
1737	Other malignant neoplasm of skin of lower limb, including hip
1738	Other malignant neoplasm of other specified sites of skin
1739	Other malignant neoplasm of skin, site unspecified
1760	Kaposi's sarcoma, skin
1761	Kaposi's sarcoma, soft tissue
1762	Kaposi's sarcoma, palate
1763	Kaposi's sarcoma, gastrointestinal sites
1764	Kaposi's sarcoma, lung
1765	Kaposi's sarcoma, lymph nodes
1768	Kaposi's sarcoma, other specified sites
1769	Kaposi's sarcoma, unspecified site
1800	Malignant neoplasm of endocervix
1801	Malignant neoplasm of exocervix
1808	Malignant neoplasm of other specified sites of cervix
1809	Malignant neoplasm of cervix uteri, unspecified site
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
1890	Malignant neoplasm of kidney, except pelvis
1891	Malignant neoplasm of renal pelvis
1970	Secondary malignant neoplasm of lung
1975	Secondary malignant neoplasm of large intestine and rectum
1980	Secondary malignant neoplasm of kidney
1981	Secondary malignant neoplasm of other urinary organs
19882	Secondary malignant neoplasm of genital organs
20000	Reticulosarcoma, unspecified site
20001	Reticulosarcoma involving lymph nodes of head, face, and neck
20002	Reticulosarcoma involving intrathoracic lymph nodes
20003	Reticulosarcoma involving intra-abdominal lymph nodes
20004	Reticulosarcoma involving lymph nodes of axilla and upper limb
20005	Reticulosarcoma involving lymph nodes of inguinal region and lower limb
20006	Reticulosarcoma involving intrapelvic lymph nodes
20007	Reticulosarcoma involving spleen
20008	Reticulosarcoma involving lymph nodes of multiple sites
20020	Burkitt's tumor or lymphoma, unspecified site
20021	Burkitt's tumor or lymphoma involving lymph nodes of head, face, and neck
20022	Burkitt's tumor or lymphoma involving intrathoracic lymph nodes

Diagnosis Code	Description
20023	Burkitt's tumor or lymphoma involving intra-abdominal lymph nodes
20024	Burkitt's tumor or lymphoma involving lymph nodes of axilla and upper limb
20025	Burkitt's tumor or lymphoma involving lymph nodes of inguinal region and lower limb
20026	Burkitt's tumor or lymphoma involving intrapelvic lymph nodes
20027	Burkitt's tumor or lymphoma involving spleen
20028	Burkitt's tumor or lymphoma involving lymph nodes of multiple sites
20080	Other named variants of lymphosarcoma and reticulosarcoma, unspecified site
20081	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of head, face, and neck
20082	Other named variants of lymphosarcoma and reticulosarcoma involving intrathoracic lymph nodes
20083	Other named variants of lymphosarcoma and reticulosarcoma involving intra-abdominal lymph nodes
20084	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of axilla and upper limb
20085	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of inguinal region and lower limb
20086	Other named variants of lymphosarcoma and reticulosarcoma involving intrapelvic lymph nodes
20087	Other named variants of lymphosarcoma and reticulosarcoma involving spleen
20088	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of multiple sites
20200	Nodular lymphoma, unspecified site
20201	Nodular lymphoma involving lymph nodes of head, face, and neck
20202	Nodular lymphoma involving intrathoracic lymph nodes
20203	Nodular lymphoma involving intra-abdominal lymph nodes
20204	Nodular lymphoma involving lymph nodes of axilla and upper limb
20205	Nodular lymphoma involving lymph nodes of inguinal region and lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20206	Nodular lymphoma involving intrapelvic lymph nodes
20207	Nodular lymphoma involving spleen
20208	Nodular lymphoma involving lymph nodes of multiple sites
20210	Mycosis fungoides, unspecified site
20211	Mycosis fungoides involving lymph nodes of head, face, and neck
20212	Mycosis fungoides involving intratho-racic lymph nodes
20213	Mycosis fungoides involving intra-abdominal lymph nodes
20214	Mycosis fungoides involving lymph nodes of axilla and upper limb
20215	Mycosis fungoides involving lymph nodes of inguinal region and lower limb
20216	Mycosis fungoides involving intrapelvic lymph nodes
20217	Mycosis fungoides involving spleen
20218	Mycosis fungoides involving lymph nodes of multiple sites
20220	Sezary's disease, unspecified site
20221	Sezary's disease involving lymph nodes of head, face, and neck
20222	Sezary's disease involving intratho-racic lymph nodes
20223	Sezary's disease involving intra-abdominal lymph nodes
20224	Sezary's disease involving lymph nodes of axilla and upper limb
20225	Sezary's disease involving lymph nodes of inguinal region and lower limb
20226	Sezary's disease involving intrapelvic lymph nodes
20227	Sezary's disease involving spleen
20228	Sezary's disease involving lymph nodes of multiple sites
20240	Leukemic reticuloendotheliosis, unspecified site
20241	Leukemic reticuloendotheliosis involving lymph nodes of head, face, and neck
20242	Leukemic reticuloendotheliosis involving intrathoracic lymph nodes
20243	Leukemic reticuloendotheliosis involving intra-abdominal lymph nodes
20244	Leukemic reticuloendotheliosis involving lymph nodes of axilla and upper arm

Diagnosis Code	Description
20245	Leukemic reticuloendotheliosis involving lymph nodes of inguinal region and lower limb
20246	Leukemic reticuloendotheliosis involving intrapelvic lymph nodes
20247	Leukemic reticuloendotheliosis involving spleen
20248	Leukemic reticuloendotheliosis involving lymph nodes of multiple sites
20280	Other malignant lymphomas, unspec-ified site
20281	Other malignant lymphomas involving lymph nodes of head, face, and neck
20282	Other malignant lymphomas involving intrathoracic lymph nodes
20283	Other malignant lymphomas involving intra-abdominal lymph nodes
20284	Other malignant lymphomas involving lymph nodes of axilla and upper limb
20285	Other malignant lymphomas involving lymph nodes of inguinal region and lower limb
20286	Other malignant lymphomas involving intrapelvic lymph nodes
20287	Other malignant lymphomas involving spleen
20288	Other malignant lymphomas involving lymph nodes of multiple sites
20300	Multiple myeloma, without mention of remission
20301	Multiple myeloma, in remission
20310	Plasma cell leukemia, without mention of remission
20311	Plasma cell leukemia, in remission
20380	Other immunoproliferative neoplasms, without mention of remission
20381	Other immunoproliferative neoplasms, in remission
20510	Myeloid leukemia, chronic, without mention of remission
20511	Myeloid leukemia, chronic, in remission
2121	Benign neoplasm of larynx
2303	Carcinoma in situ of colon
2331	Carcinoma in situ of cervix uteri
2337	Carcinoma in situ of bladder
2339	Carcinoma in situ of other and unspecified urinary organs

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2367	Neoplasm of uncertain behavior of bladder
2384	Polycythemia vera
23879	Other lymphatic and hematopoietic tissues
2394	Neoplasm of unspecified nature of bladder
2395	Neoplasm of unspecified nature of other genitourinary organs
2592	Carcinoid syndrome
28730	Primary thrombocytopenia, unspecified
2890	Polycythemia, secondary
28952	Splenic sequestration
28981	Primary hypercoagulable state
28982	Secondary hypercoagulable state
28989	Other specified diseases of blood and blood-forming organs
2899	Unspecified diseases of blood and blood-forming organs
57140	Chronic hepatitis, unspecified
57141	Chronic persistent hepatitis
57149	Other chronic hepatitis
V1052	Personal history of malignant neoplasm of kidney

Interferon injections are also covered for the following diagnoses:

- Procedure codes 1-J1825, 1-Q3025, and 1-Q3026 are payable only for diagnosis 340.
- Procedure codes 1-J9213 and 1-J9214 are payable for the following diagnosis codes:

Diagnosis Code	Description
1910	Malignant neoplasm of cerebrum, except lobes and ventricles
1911	Malignant neoplasm of frontal lobe
1912	Malignant neoplasm of temporal lobe
1913	Malignant neoplasm of parietal lobe
1914	Malignant neoplasm of occipital lobe
1915	Malignant neoplasm of ventricles
1916	Malignant neoplasm of cerebellum NOS
1917	Malignant neoplasm of brain stem
1918	Malignant neoplasm of other parts of brain
1919	Malignant neoplasm of brain, unspecified site

- Procedure code 1-J9212 is payable only for diagnosis 07054.

Interferon injections for all other diagnosis codes are denied.

36.4.21.29 Intralesional Injection(s)

Payable diagnosis codes for intralesional injections include:

Diagnosis Code	Description
0780	Molluscum contagiosum
0850	Leishmaniasis visceral (kala-azar)
0851	Cutaneous leishmaniasis, urban
0852	Cutaneous leishmaniasis, Asian desert
0853	Cutaneous leishmaniasis, Ethiopian
0854	Cutaneous leishmaniasis, American
0855	Mucocutaneous leishmaniasis, (American)
0859	Leishmaniasis, unspecified
135	Sarcoidosis
69272	Acute dermatitis due to solar radiation
6953	Rosacea
6960	Psoriatic arthropathy
6961	Other psoriasis and similar disorders
6962	Parapsoriasis
6963	Pityriasis rosea
6964	Pityriasis rubra pilaris
6965	Other and unspecified pityriasis
6968	Other psoriasis and similar disorders
7014	Keloid scar
7015	Other abnormal granulation tissue
70583	Hidradenitis
7060	Acne varioliformis
7061	Other acne
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa
94100	Burn of unspecified degree of unspecified site of face and head

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck)
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin

Diagnosis Code	Description
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part)
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek

Diagnosis Code	Description
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part
94200	Burn of unspecified degree of unspecified site of trunk
94201	Burn of unspecified degree of breast
94202	Burn of unspecified degree of chest wall, excluding breast and nipple
94203	Burn of unspecified degree of abdominal wall
94204	Burn of unspecified degree of back (any part)
94205	Burn of unspecified degree of genitalia
94209	Burn of unspecified degree of other and multiple sites of trunk
94210	Erythema due to burn (first degree) of unspecified site of trunk
94211	Erythema due to burn (first degree) of breast
94212	Erythema due to burn (first degree) of chest wall, excluding breast and nipple
94213	Erythema due to burn (first degree) of abdominal wall
94214	Erythema due to burn (first degree) of back (any part)
94215	Erythema due to burn (first degree) of genitalia
94219	Erythema due to burn (first degree) of other and multiple sites of trunk
94220	Blisters with epidermal loss due to burn (second degree) of unspecified site of trunk
94221	Blisters with epidermal loss due to burn (second degree) of breast
94222	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94223	Blisters with epidermal loss due to burn (second degree) of abdominal wall
94224	Blisters with epidermal loss due to burn (second degree) of back (any part)
94225	Blisters with epidermal loss due to burn (second degree) of genitalia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94229	Blisters with epidermal loss due to burn (second degree) of other and multiple sites of trunk
94230	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of trunk
94231	Full-thickness skin loss due to burn (third degree NOS) of breast
94232	Full-thickness skin loss due to burn (third degree NOS) of chest wall, excluding breast and nipple
94233	Full-thickness skin loss due to burn (third degree NOS) of abdominal wall
94234	Full-thickness skin loss due to burn (third degree NOS) of back (any part)
94235	Full-thickness skin loss due to burn (third degree NOS) of genitalia
94239	Full-thickness skin loss due to burn (third degree NOS) of other and multiple sites of trunk
94240	Deep necrosis of underlying tissues due to burn (deep third degree) of trunk, unspecified site, without mention of loss of body part
94241	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, without mention of loss of breast
94242	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, without mention of loss of chest wall
94243	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall, without mention of loss of abdominal wall
94244	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), without mention of loss of back
94245	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, without mention of loss of genitalia
94249	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, without mention of loss of body part
94250	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of trunk, with loss of body part

Diagnosis Code	Description
94251	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, with loss of breast
94252	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, with loss of chest wall
94253	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall with loss of abdominal wall
94254	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), with loss of back
94255	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, with loss of genitalia
94259	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, with loss of a body part
94300	Burn of unspecified degree of unspecified site of upper limb
94301	Burn of unspecified degree of forearm
94302	Burn of unspecified degree of elbow
94303	Burn of unspecified degree of upper arm
94304	Burn of unspecified degree of axilla
94305	Burn of unspecified degree of shoulder
94306	Burn of unspecified degree of scapular region
94309	Burn of unspecified degree multiple sites of upper limb, except wrist and hand
94310	Erythema due to burn (first degree) of unspecified site of upper limb
94311	Erythema due to burn (first degree) of forearm
94312	Erythema due to burn (first degree) of elbow
94313	Erythema due to burn (first degree) of upper arm
94314	Erythema due to burn (first degree) of axilla
94315	Erythema due to burn (first degree) of shoulder
94316	Erythema due to burn (first degree) of scapular region

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94319	Erythema due to burn (first degree) of multiple sites of upper limb, except wrist and hand
94320	Blisters with epidermal loss due to burn (second degree) of unspecified site of upper limb
94321	Blisters with epidermal loss due to burn (second degree) of forearm
94322	Blisters with epidermal loss due to burn (second degree) of elbow
94323	Blisters with epidermal loss due to burn (second degree) of upper arm
94324	Blisters with epidermal loss due to burn (second degree) of axilla
94325	Blisters with epidermal loss due to burn (second degree) of shoulder
94326	Blisters with epidermal loss due to burn (second degree) of scapular region
94329	Blisters with epidermal loss due to burn (second degree) of multiple sites of upper limb, except wrist and hand
94330	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of upper limb
94331	Full-thickness skin loss due to burn (third degree NOS) of forearm
94332	Full-thickness skin loss due to burn (third degree NOS) of elbow
94333	Full-thickness skin loss due to burn (third degree NOS) of upper arm
94334	Full-thickness skin loss due to burn (third degree NOS) of axilla
94335	Full-thickness skin loss due to burn (third degree NOS) of shoulder
94336	Full-thickness skin loss due to burn (third degree NOS) of scapular region
94339	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of upper limb, except wrist and hand
94340	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, without mention of loss of a body part
94341	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, without mention of loss of forearm
94342	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, without mention of loss of elbow

Diagnosis Code	Description
94343	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, without mention of loss of upper arm
94344	Deep necrosis of underlying tissues due to burn of axilla, without mention of loss of axilla
94345	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, without mention of loss of shoulder
94346	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, without mention of loss of scapula
94349	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, without mention of loss of upper limb
94350	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, with loss of a body part
94351	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, with loss of forearm
94352	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, with loss of elbow
94353	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, with loss of upper arm
94354	Deep necrosis of underlying tissues due to burn (deep third degree) of axilla, with loss of axilla
94355	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, with loss of shoulder
94356	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, with loss of scapula
94359	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, with loss of upper limb
94400	Burn of unspecified degree of unspecified site of hand
94401	Burn of unspecified degree of single digit (finger (nail) other than thumb
94402	Burn of unspecified degree of thumb (nail)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94403	Burn of unspecified degree of two or more digits of hand, not including thumb
94404	Burn of unspecified degree of two or more digits of hand, including thumb
94405	Burn of unspecified degree of palm of hand
94406	Burn of unspecified degree of back of hand
94407	Burn of unspecified degree of wrist
94408	Burn of unspecified degree of multiple sites of wrist(s) and hand(s)
94410	Erythema due to burn (first degree) of unspecified site of hand
94411	Erythema due to burn (first degree) of single digit (finger (nail) other than thumb
94412	Erythema due to burn (first degree) of thumb (nail)
94413	Erythema due to burn (first degree) of two or more digits of hand, not including thumb
94414	Erythema due to burn (first degree) of two or more digits of hand including thumb
94415	Erythema due to burn (first degree) of palm of hand
94416	Erythema due to burn (first degree) of back of hand
94417	Erythema due to burn (first degree) of wrist
94418	Erythema due to burn (first degree) of multiple sites of wrist(s) and hand(s)
94420	Blisters with epidermal loss due to burn (second degree) of unspecified site of hand
94421	Blisters with epidermal loss due to burn (second degree) of single digit (finger (nail) other than thumb
94422	Blisters with epidermal loss due to burn of (second degree) of thumb (nail)
94423	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand, not including thumb
94424	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand including thumb
94425	Blisters with epidermal loss due to burn (second degree) of palm of hand
94426	Blisters with epidermal loss due to burn (second degree) of back of hand

Diagnosis Code	Description
94427	Blisters with epidermal loss due to burn (second degree) of wrist
94428	Blisters with epidermal loss due to burn (second degree) of multiple sites of wrist(s) and hand(s)
94430	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of hand
94431	Full-thickness skin loss due to burn (third degree NOS) of single digit (finger (nail) other than thumb
94432	Full-thickness skin loss due to burn (third degree NOS) of thumb (nail)
94433	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand, not including thumb
94434	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand including thumb
94435	Full-thickness skin loss due to burn (third degree NOS) of palm of hand
94436	Full-thickness skin loss due to burn (third degree NOS) of back of hand
94437	Full-thickness skin loss due to burn (third degree NOS) of wrist
94438	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of wrist(s) and hand(s)
94440	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, without mention of loss of hand
94441	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, without mention of loss of finger
94442	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), without mention of loss of thumb
94443	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, without mention of fingers
94444	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, without mention of loss of fingers
94445	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, without mention of loss of palm

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94446	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, without mention of loss of back of hand
94447	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94448	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), without mention of loss of a body part
94450	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, with loss of hand
94451	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, with loss of finger
94452	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), with loss of thumb
94453	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, with loss of fingers
94454	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, with loss of fingers
94455	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, with loss of palm of hand
94456	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, with loss of back of hand
94457	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, with loss of wrist
94458	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), with loss of a body part
94500	Burn of unspecified degree of unspecified site of lower limb (leg)
94501	Burn of unspecified degree of toe(s) (nail)
94502	Burn of unspecified degree of foot
94503	Burn of unspecified degree of ankle
94504	Burn of unspecified degree of lower leg
94505	Burn of unspecified degree of knee

Diagnosis Code	Description
94506	Burn of unspecified degree of thigh (any part)
94509	Burn of unspecified degree of multiple sites of lower limb(s)
94510	Erythema due to burn (first degree) of unspecified site of lower limb (leg)
94511	Erythema due to burn (first degree) of toe(s) (nail)
94512	Erythema due to burn (first degree) of foot
94513	Erythema due to burn (first degree) of ankle
94514	Erythema due to burn (first degree) of lower leg
94515	Erythema due to burn (first degree) of knee
94516	Erythema due to burn (first degree) of thigh (any part)
94519	Erythema due to burn (first degree) of multiple sites of lower limb(s)
94520	Blisters, epidermal loss (second degree) of unspecified site of lower limb (leg)
94521	Blisters with epidermal loss due to burn (second degree) of toe(s) (nail)
94522	Blisters with epidermal loss due to burn (second degree) of foot
94523	Blisters with epidermal loss due to burn (second degree) of ankle
94524	Blisters with epidermal loss due to burn (second degree) of lower leg
94525	Blisters with epidermal loss due to burn (second degree) of knee
94526	Blisters with epidermal loss due to burn (second degree) of thigh (any part)
94529	Blisters with epidermal loss due to burn (second degree) of multiple sites of lower limb(s)
94530	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of lower limb
94531	Full-thickness skin loss due to burn (third degree NOS) of toe(s) (nail)
94532	Full-thickness skin loss due to burn (third degree NOS) of foot
94533	Full-thickness skin loss due to burn (third degree NOS) of ankle
94534	Full-thickness skin loss due to burn (third degree NOS) of lower leg
94535	Full-thickness skin loss due to burn (third degree NOS) of knee

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94536	Full-thickness skin loss due to burn (third degree NOS) of thigh (any part)
94539	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of lower limb(s)
94540	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of lower limb (leg), without mention of loss of a body part
94541	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), without mention of loss of toe(s)
94542	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, without mention of loss of foot
94543	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, without mention of loss of ankle
94544	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, without mention of loss of lower leg
94545	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, without mention of loss of knee
94546	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), without mention of loss of thigh
94549	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), without mention of loss of a body part
94550	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site lower limb (leg), with loss of a body part
94551	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), with loss of toe(s)
94552	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, with loss of foot
94553	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, with loss of ankle
94554	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, with loss of lower leg
94555	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, with loss of knee

Diagnosis Code	Description
94556	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), with loss of thigh
94559	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), with loss of a body part
9460	Burns of multiple specified sites, unspecified degree
9461	Erythema due to burn (first degree) of multiple specified sites
9462	Blisters with epidermal loss due to burn (second degree) of multiple specified sites
9463	Full-thickness skin loss due to burn (third degree NOS) of multiple specified sites
9464	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, without mention of loss of a body part
9465	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, with loss of a body part
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9474	Burn of vagina and uterus
9478	Burn of other specified sites of internal organs
9479	Burn of internal organs, unspecified site
94800	Burn (any degree) involving less than 10 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94810	Burn (any degree) involving 10–19 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94811	Burn (any degree) involving 10–19 percent of body surface with third degree burn of 10–19 percent
94820	Burn (any degree) involving 20–29 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94821	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 10–19 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94822	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 20–29 percent
94830	Burn (any degree) involving 30–39 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94831	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 10–19 percent
94832	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 20–29 percent
94833	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 30–39 percent
94840	Burn (any degree) involving 40–49 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94841	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 10–19 percent
94842	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 20–29 percent
94843	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 30–39 percent
94844	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 40–49 percent
94850	Burn (any degree) involving 50–59 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94851	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 10–19 percent
94852	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 20–29 percent
94853	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 30–39 percent
94854	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 40–49 percent
94855	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 50–59 percent

Diagnosis Code	Description
94860	Burn (any degree) involving 60–69 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94861	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 10–19 percent
94862	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 20–29 percent
94863	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 30–39 percent
94864	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 40–49 percent
94865	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 50–59 percent
94866	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 60–69 percent
94870	Burn (any degree) involving 70–79 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94871	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 10–19 percent
94872	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 20–29 percent
94873	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 30–39 percent
94874	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 40–49 percent
94875	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 50–59 percent
94876	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 60–69 percent
94877	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 70–79 percent
94880	Burn (any degree) involving 80–89 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94881	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 10–19 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94882	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 20–29 percent
94883	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 30–39 percent
94884	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 40–49 percent
94885	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 50–59 percent
94886	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 60–69 percent
94887	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 70–79 percent
94888	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 80–89 percent
94890	Burn (any degree) involving 90 percent or more of body surface with third degree burn of less than 10 percent or unspecified amount
94891	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 10–19 percent
94892	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 20–29 percent
94893	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 30–39 percent
94894	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 40–49 percent
94895	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 50–59 percent
94896	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 60–69 percent
94897	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 70–79 percent
94898	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 80–89 percent
94899	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 90 percent or more of body surface
9490	Burn of unspecified site, unspecified degree
9491	Erythema due to burn (first degree), unspecified site
9492	Blisters with epidermal loss due to burn (second degree), unspecified site
9493	Full-thickness skin loss due to burn (third degree NOS), unspecified site
9494	Deep necrosis of underlying tissue due to burn (deep third degree), unspecified site without mention of loss of a body part
9495	Deep necrosis of underlying tissues due to burn (deep third degree, unspecified site with loss of a body part

Intralesional injection(s) must be billed using procedure code 2-11900 or 2-11901.

36.4.21.30 Irinotecan

When billing for irinotecan, use procedure code 1-J9206, reimbursed at $118.21. The quantity administered, per 20 mg, must be present on the claim. For example, if a dose of 200 mg is administered, a quantity of 10 should appear on the claim.

36.4.21.31 Iron

The procedure codes for iron injection are 1-J1751, 1-J1752, 1-J1756, and 1-J2916 when billing for claims.

36.4.21.32 Iron Dextran

Procedure codes 1-J1751 and 1-J1752 are covered for the following diagnosis codes for renal diseases or conditions:

Diagnosis Code	Description
5800	Acute glomerulonephritis with lesion of proliferative glomerulonephritis
5804	Acute glomerulonephritis with lesion of rapidly progressive glomerulonephritis
58081	Acute glomerulonephritis in diseases classified elsewhere

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
58089	Acute glomerulonephritis with other specified pathological lesion in kidney
5809	Acute glomerulonephritis with unspecified pathological lesion in kidney
5810	Nephrotic syndrome with lesion of proliferative glomerulonephritis
5811	Nephrotic syndrome with lesion of membranous glomerulonephritis
5812	Nephrotic syndrome with lesion of membranoproliferative glomerulonephritis
5813	Nephrotic syndrome with lesion of minimal change glomerulonephritis
58181	Nephrotic syndrome in diseases classified elsewhere
58189	Other nephrotic syndrome with specified pathological lesion in kidney
5819	Nephrotic syndrome with unspecified pathological lesion in kidney
5820	Chronic glomerulonephritis with lesion of proliferative glomerulonephritis
5821	Chronic glomerulonephritis with lesion of membranous glomerulonephritis
5822	Chronic glomerulonephritis with lesion of membranoproliferative glomerulonephritis
5824	Chronic glomerulonephritis with lesion of rapidly progressive glomerulonephritis
58281	Chronic glomerulonephritis in diseases classified elsewhere
58289	Other chronic glomerulonephritis with specified pathological lesion in kidney
5829	Chronic glomerulonephritis with unspecified pathological lesion in kidney
5830	Nephritis and nephropathy, not specified as acute or chronic, with lesion of proliferative glomerulonephritis
5831	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranous glomerulonephritis
5832	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranoproliferative glomerulonephritis
5834	Nephritis and nephropathy, not specified as acute or chronic, with lesion of rapidly progressive glomerulonephritis

Diagnosis Code	Description
5836	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal cortical necrosis
5837	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal medullary necrosis
58381	Nephritis and nephropathy, not specified as acute or chronic, in diseases classified elsewhere
58389	Other nephritis and nephropathy, not specified as acute or chronic, with specified pathological lesion in kidney
5839	Nephritis and nephropathy, not specified as acute or chronic, with unspecified pathological lesion in kidney
5845	Acute renal failure with lesion of tubular necrosis
5846	Acute renal failure with lesion of renal cortical necrosis
5847	Acute renal failure with lesion of renal medullary (papillary) necrosis
5848	Acute renal failure with other specified pathological lesion in kidney
5849	Acute renal failure, unspecified
5851	Chronic kidney disease, stage I
5852	Chronic kidney disease, stage II (mild)
5853	Chronic kidney disease, stage III (moderate)
5854	Chronic kidney disease, stage IV (severe)
5855	Chronic kidney disease, stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified
587	Renal sclerosis, unspecified
5880	Renal osteodystrophy
5881	Nephrogenic diabetes insipidus
58881	Secondary hyperparathyroidism (of renal origin)
58889	Other specified disorders resulting from impaired renal function
5889	Unspecified disorder resulting from impaired renal function
5890	Unilateral small kidney
5891	Bilateral small kidneys
5899	Small kidney, unspecified
59000	Chronic pyelonephritis without lesion of renal medullary necrosis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
59001	Chronic pyelonephritis with lesion of renal medullary necrosis
59010	Acute pyelonephritis without lesion of renal medullary necrosis
59011	Acute pyelonephritis with lesion of renal medullary necrosis
5902	Renal and perinephric abscess
5903	Pyeloureteritis cystica
59080	Pyelonephritis, unspecified
59081	Pyelitis or pyelonephritis in diseases classified elsewhere
5909	Infection of kidney, unspecified
591	Hydronephrosis
5920	Calculus of kidney
5921	Calculus of ureter
5929	Urinary calculus, unspecified
5930	Nephroptosis
5931	Hypertrophy of kidney
5932	Cyst of kidney, acquired
5933	Stricture or kinking of ureter
5934	Other ureteric obstruction
5935	Hydroureter
5936	Postural proteinuria
59370	Vesicoureteral reflux unspecified or without reflux nephropathy
59371	Vesicoureteral reflux with reflux nephropathy, unilateral
59372	Vesicoureteral reflux with reflux nephropathy, bilateral
59373	Other vesicoureteral reflux with reflux nephropathy NOS
59381	Vascular disorders of kidney
59382	Ureteral fistula
59389	Other specified disorders of kidney and ureter
5939	Unspecified disorder of kidney and ureter

Procedure codes 1-J1751 and 1-J1752 are covered for the following diagnosis codes for active hemorrhage:

Diagnosis Code	Description
4480	Hereditary hemorrhagic telangiectasia
4560	Esophageal varices with bleeding
4590	Hemorrhage, unspecified
5307	Gastroesophageal laceration-hemorrhage syndrome
53082	Esophageal hemorrhage
53100	Acute gastric ulcer with hemorrhage, without mention of obstruction
53101	Acute gastric ulcer with hemorrhage, with obstruction
53110	Acute gastric ulcer with perforation, without mention of obstruction
53111	Acute gastric ulcer with perforation, with obstruction
53120	Acute gastric ulcer with hemorrhage and perforation, without mention of obstruction
53121	Acute gastric ulcer with hemorrhage and perforation, with obstruction
53140	Chronic or unspecified gastric ulcer with hemorrhage, without mention of obstruction
53141	Chronic or unspecified gastric ulcer with hemorrhage, with obstruction
53150	Chronic or unspecified gastric ulcer with perforation, without mention of obstruction
53151	Chronic or unspecified gastric ulcer with perforation, with obstruction
53160	Chronic or unspecified gastric ulcer with hemorrhage and perforation, without mention of obstruction
53161	Chronic or unspecified gastric ulcer with hemorrhage and perforation, with obstruction
53200	Acute duodenal ulcer with hemorrhage, without mention of obstruction
53201	Acute duodenal ulcer with hemorrhage, with obstruction
53210	Acute duodenal ulcer with perforation, without mention of obstruction
53211	Acute duodenal ulcer with perforation, with obstruction
53220	Acute duodenal ulcer with hemorrhage and perforation, without mention of obstruction
53221	Acute duodenal ulcer with hemorrhage and perforation, with obstruction
53240	Chronic or unspecified duodenal ulcer with hemorrhage, without mention of obstruction
53241	Chronic or unspecified duodenal ulcer with hemorrhage, with obstruction
53250	Chronic or unspecified duodenal ulcer with perforation, without mention of obstruction
53251	Chronic or unspecified duodenal ulcer with perforation, with obstruction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
53260	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, without mention of obstruction
53261	Chronic or unspecified duodenal ulcer with hemorrhage and perforation, with obstruction
53300	Acute peptic ulcer of unspecified site with hemorrhage, without mention of obstruction
53301	Acute peptic ulcer of unspecified site with hemorrhage, with obstruction
53310	Acute peptic ulcer of unspecified site with perforation, without mention of obstruction
53311	Acute peptic ulcer of unspecified site with perforation, with obstruction
53320	Acute peptic ulcer of unspecified site with hemorrhage and perforation, without mention of obstruction
53321	Acute peptic ulcer of unspecified site with hemorrhage and perforation, with obstruction
53340	Chronic or unspecified peptic ulcer of unspecified site with hemorrhage, without mention of obstruction
53341	Chronic or unspecified peptic ulcer of unspecified site with hemorrhage, with obstruction
53350	Chronic or unspecified peptic ulcer of unspecified site with perforation, without mention of obstruction
53351	Chronic or unspecified peptic ulcer of unspecified site with perforation, with obstruction
53360	Chronic or unspecified peptic ulcer of unspecified site with hemorrhage and perforation, without mention of obstruction
53361	Chronic or unspecified peptic ulcer of unspecified site with hemorrhage and perforation, with obstruction
53400	Acute gastrojejunal ulcer with hemorrhage, without mention of obstruction
53401	Acute gastrojejunal ulcer, with hemorrhage, with obstruction
53410	Acute gastrojejunal ulcer with perforation, without mention of obstruction
53411	Acute gastrojejunal ulcer with perforation, with obstruction
53420	Acute gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction
53421	Acute gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53440	Chronic or unspecified gastrojejunal ulcer with hemorrhage, without mention of obstruction
53441	Chronic or unspecified gastrojejunal ulcer, with hemorrhage, with obstruction
53450	Chronic or unspecified gastrojejunal ulcer with perforation, without mention of obstruction
53451	Chronic or unspecified gastrojejunal ulcer with perforation, with obstruction
53460	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, without mention of obstruction
53461	Chronic or unspecified gastrojejunal ulcer with hemorrhage and perforation, with obstruction
53501	Acute gastritis with hemorrhage
53511	Atrophic gastritis with hemorrhage
53521	Gastric mucosal hypertrophy with hemorrhage
53531	Alcoholic gastritis with hemorrhage
53541	Other specified gastritis with hemorrhage
53551	Unspecified gastritis and gastroduodenitis with hemorrhage
53561	Duodenitis with hemorrhage
56202	Diverticulosis of small intestine with hemorrhage
56203	Diverticulitis of small intestine with hemorrhage
56212	Diverticulosis of colon with hemorrhage
56213	Diverticulitis of colon with hemorrhage
56985	Angiodysplasia of intestine with hemorrhage
5780	Hematemesis
5781	Blood in stool
5789	Hemorrhage of gastrointestinal tract, unspecified
7724	Gastrointestinal hemorrhage of fetus or newborn

36

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure codes 1-J1751 and 1-J1752 are covered for the following diagnosis codes for anemia:

Diagnosis Code	Description
2800	Iron deficiency anemias; secondary to blood loss (chronic)
2801	Iron deficiency anemias; secondary to inadequate dietary iron intake
2808	Other specified iron deficiency anemias
2809	Iron deficiency anemia, unspecified
64820	Anemia of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64821	Anemia of mother, with delivery
64822	Anemia of mother, with delivery, with mention of postpartum complication
64823	Antepartum anemia
64824	Postpartum anemia

36.4.21.33 Iron Injections

Sodium Ferric Gluconate Complex in Sucrose (Ferrlecit)

Procedure code 1-J2916 is covered for the treatment of iron deficiency anemia in patients undergoing chronic hemodialysis who are receiving supplemental erythropoietin (EPO) therapy. Sodium ferric gluconate complex is covered for the following diagnosis codes:

Diagnosis Code	Description
28521	Anemia in chronic kidney disease
5856	End stage renal disease

Iron Sucrose (Venofer)

Procedure code 1-J1756 is covered for the treatment of iron deficiency anemia in patients undergoing chronic hemodialysis who are receiving supplemental EPO therapy. The following diagnosis codes are payable:

Diagnosis Code	Description
28521	Anemia in chronic kidney disease
5851	Chronic kidney disease, Stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified

36.4.21.34 Joint Injections and Trigger Point Injections

Injections into joints should be coded using procedure codes 2-20600, 2-20605, 2-20610, and 2-20612.

Trigger point injections should be coded using procedure codes 2-20526, 2-20550, 2-20551, 2-20552, and 2-20553.

These procedures are valid only in the treatment of acute problems. Procedures for chronic diagnosis codes will be denied. The provider must use of the AT and KX modifiers to be reimbursed for the above procedures. Use modifier KX to indicate injection is medically necessary into joints, bursae, tendon sheaths, trigger points to treat an acute condition, or the acute flare up of a chronic condition.

36.4.21.35 Leuprolide Acetate (Lupron Depot®)

Leuprolide Acetate is a synthetic gonadotropin releasing hormone that has been found to be effective when administered at monthly intervals in treatment of endometriosis at a dosage of 3.75 mg and in the palliative treatment of prostatic cancer at the dosage of 7.5 mg, or 65 mg implant (annually). Procedure codes 1-J9217, 1-J1950, or 1-J9219 should be used when billing for Leuprolide Acetate.

Procedure code 1-J9217 is reimbursed when administered monthly for the following diagnosis codes:

Diagnosis Code	Description
185	Malignant neoplasm of prostate
19882	Secondary malignant neoplasm genital organs
2334	Carcinoma in situ of prostate
2591	Precocious sexual development and puberty, not elsewhere classified

Procedure code 1-J9217 is denied when billed more than once per month and for other than the diagnosis codes listed above.

Procedure code 1-J1950 is limited to once per month and the following diagnosis codes:

Diagnosis Code	Description
2180	Submucous leiomyoma of uterus
2181	Intramural leiomyoma of uterus
2182	Subserous leiomyoma of uterus
2189	Leiomyoma of uterus, unspecified
6170	Endometriosis of uterus
6171	Endometriosis of ovary
6172	Endometriosis of fallopian tube
6173	Endometriosis of pelvic peritoneum
6174	Endometriosis of rectovaginal septum and vagina
6175	Endometriosis of intestine
6176	Endometriosis in scar of skin

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
6178	Endometriosis of other specified sites
6179	Endometriosis, site unspecified

Procedure code 1-J9218 is a benefit of the Texas Medicaid Program when administered by a physician in the office setting (POS 1). It is payable for the following diagnosis codes:

Diagnosis Code	Description
185	Malignant neoplasm of prostate
19882	Secondary malignant neoplasm genital organs
2334	Carcinoma in situ of prostate

Procedure code 1-J9218 is denied for other than the diagnosis codes listed above.

Procedure code 1-J9219 is payable once per year in the office and outpatient settings (POS 1 and 5), and payable for the following diagnosis codes:

Diagnosis Code	Description
185	Malignant neoplasm of prostate
2334	Carcinoma in situ of prostate

Procedure code 1-J9219 is denied when billed more than once per year and for diagnosis codes other than those listed above.

36.4.21.36 Linezolid

Effective for dates of service on or after September 1, 2000, Linezolid, a new class of antibiotic, is a benefit of the Texas Medicaid Program. The FDA-recommended uses of linezolid include:

- The treatment of vancomycin-resistant enterococcus faecium infections
- Nosocomial pneumonia
- Complicated and uncomplicated skin and skin structure infections
- Community-acquired pneumonia

Oral forms of linezolid are covered through the VDP.

Note: *Linezolid intravenous injection is covered only in the inpatient setting as a part of the DRG payment.*

36.4.21.37 Melphalan Hydrochloride

Procedure code 1-J9245 is reimbursed by Texas Medicaid when billed for the following diagnosis codes:

Diagnosis Code	Description
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
1830	Malignant neoplasm of ovary
1860	Malignant neoplasm undescended testis
1869	Malignant neoplasm of other and unspecified testis
20300	Multiple myeloma without mention of remission
20301	Multiple myeloma in remission

Procedure code 1-J9245 is denied for all other diagnosis codes.

36.4.21.38 Nipent

Procedure code 1-J9268 is reimbursable by the Texas Medicaid Program for the treatment of adult patients with alpha interferon-refractory hairy cell leukemia. Alpha interferon-refractory disease is defined as a progressive disease after a minimum of three months of alpha interferon treatment or no response after six months of alpha interferon treatment. Payment of Nipent is limited to hairy cell leukemia for the following diagnosis codes:

Diagnosis Code	Description
20240	Leukemic reticuloendotheliosis, unspecified site
20241	Leukemic reticuloendotheliosis involving lymph nodes of head, face, and neck
20242	Leukemic reticuloendotheliosis involving intrathoracic lymph nodes
20243	Leukemic reticuloendotheliosis involving intra-abdominal lymph nodes
20244	Leukemic reticuloendotheliosis involving lymph nodes of axilla and upper arm
20245	Leukemic reticuloendotheliosis involving lymph nodes of inguinal region and lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20246	Leukemic reticuloendotheliosis involving intrapelvic lymph nodes
20247	Leukemic reticuloendotheliosis involving spleen
20248	Leukemic reticuloendotheliosis involving lymph nodes of multiple sites

Nipent injections for all other diagnosis codes are denied.

36.4.21.39 Omalizumab

Omalizumab is an injectable drug that is FDA approved for the treatment of clients 12 years of age and older with severe asthma. Omalizumab is a benefit to Medicaid-eligible clients when medically necessary and must be prior authorized. THSteps-eligible clients under age 12 years will be considered on an exception basis through CCP.

When requesting prior authorization, the exact dosage must be included with the request using procedure code J2357. Doses and dosing frequency are determined by body weight and by serum IgE level (IU/mL) measured before the start of the treatment. Each prior authorization of Omalizumab is based on provider documentation with the following medical necessity criteria:

- Diagnosis of asthma
- Age 12 years or older
- Documentation of positive skin test or Radioabsorbent assay test (RAST) to a perennial (not seasonal) aeroallergen within the past 36 months
- Total IgE level greater than 30 IU/ml but less than 700 IU/ml within the past 12 months
- Documentation of appropriate dose of inhaled steroid prescribed (roughly equivalent to greater than or equal to 660 microgram/day of Fluticasone [adult] or comparable dose of other inhaled steroid; based on the National Asthma Educational Prevention Program Expert Panel)
- Documentation of patient compliance with inhaled steroid regimen
- Clinical evidence of inadequate asthma control. This evidence may include:
  - dependence upon continuous systemic steroids, maximal inhaled steroid regimen with frequent systemic steroid pulses
  - or significantly declining pulmonary function test, or frequent hospitalizations for severe asthma exacerbations in the face of adequate maximal standard therapy and patient has to have been on daily therapy for persistent asthma for at least one year, with daily use of beta agonist.
- A pulmonary function test (performed within the last year) must demonstrate a Forced Expiratory Volume (FEV) 1.0 less than 80 percent of predicted in conjunction with FEV 1.0/FVC ratio<0.7 of pulmonary function test; and results demonstrating on the same test a 12 percent or greater post-Bronchodilator improvement of FEV 1.0.
- Pulmonary function tests must have been performed within the prior 12 months and be documented for all clients when requesting prior authorization for Omalizumab. Exceptions may be considered with documentation of medical reasons as to why the test cannot be performed, and with documentation of an absence of exclusion criteria (client is not currently smoking, client is not pregnant/intending pregnancy, client is not breast-feeding).

Prior authorization approvals for Omalizumab are for intervals of three months at a time. Clients must be fully compliant with their Omalizumab regiment in order to qualify for any additional authorizations. The provider must submit a statement documenting full compliance with the requests for each renewal. After nine continuous months of Omalizumab authorizations, the requesting provider must submit documentation of satisfactory clinical response to Omalizumab in order to qualify for any additional authorizations. Prior authorizations will be considered on an individual basis for lapses in treatment with provider documentation.

Providers may not bill separately for an office visit if the only reason for the visit was the Omalizumab injection.

36.4.21.40 Paclitaxel

Procedure code 1-J9265 is covered for the following diagnosis codes:

Diagnosis Code	Description
1588	Malignant neoplasm of specified parts of peritoneum
1620	Malignant neoplasm of trachea
1622	Malignant neoplasm main bronchus
1623	Malignant neoplasm upper lobe lung
1624	Malignant neoplasm middle lobe lung
1625	Malignant neoplasm lower lobe lung
1628	Malignant neoplasm of other parts of bronchus or lung
1629	Malignant neoplasm of bronchus and lung, unspecified
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
1760	Kaposi's sarcoma, skin
1761	Kaposi's sarcoma, soft tissue
1762	Kaposi's sarcoma, palate
1763	Kaposi's sarcoma, gastrointestinal sites
1764	Kaposi's sarcoma, lung
1765	Kaposi's sarcoma, lymph nodes
1768	Kaposi's sarcoma, other specified sites
1769	Kaposi's sarcoma, unspecified site
1830	Malignant neoplasm of ovary
1832	Malignant neoplasm of fallopian tube
1833	Malignant neoplasm of broad ligament of uterus
1834	Malignant neoplasm of parametrium
1835	Malignant neoplasm of round ligament of uterus
1838	Malignant neoplasm of other specified sites of uterine adnexa
1839	Malignant neoplasm of uterine adnexa, unspecified site
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
1950	Malignant neoplasm of head, face, and neck
1986	Secondary malignant neoplasm of ovary
19881	Secondary malignant neoplasm of breast

36.4.21.41 Pentagastrin

Pentagastrin billed in conjunction with gastric function studies is paid separately.

36.4.21.42 Pneumococcal Polysaccharide Vaccine

For individuals not covered by the THSteps or TVFC programs, the Texas Medicaid Program covers procedure code 1-90732 for high-risk clients 2 years of age and older, when medically necessary.

Pneumococcal polysaccharide vaccine is indicated for groups of individuals who have long-term health problems that lower the body's resistance to infection. The following indications for vaccination are in keeping with the recommendations of the Centers for Disease Control (CDC):

- All adults 65 years of age and older
- Persons over age 2 who have a long-term illness such as:
    - Alcoholism
    - Cirrhosis
    - Diabetes
    - Heart disease
    - Leaks of cerebrospinal fluid
    - Lung disease
    - Sickle cell disease
- Persons over two years of age who have an immunosuppressive disease or condition such as:
    - Damaged spleen, or no spleen (asplenic)
    - HIV infection or AIDS
    - Hodgkin's disease
    - Kidney failure
    - Lymphoma, leukemia
    - Multiple myeloma
    - Nephrotic syndrome
    - Organ or bone marrow transplant
- Persons two years of age who are taking medications or treatments that lower immunity such as:
    - Long-term steroids
    - Certain cancer drugs
    - Radiation therapy
- Alaskan Natives and certain Native American populations

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.21.43 Pneumococcal 7 Valent Conjugate Vaccine

Effective September 1, 2005, all TVFC-eligible children who are 2 months through 59 months of age may receive pneumococcal 7-valent conjugate vaccine from any provider participating in the TVFC Program.

These children will not need a referral to an FQHC or RHC. Pneumococcal 7 valent conjugate vaccine is covered under TVFC. If a child does not meet TVFC criteria, coverage may be considered through THSteps-CCP.

36.4.21.44 Porfimer (Photofrin)

Procedure code 1-J9600 is a covered benefit and limited to the following diagnosis codes:

Diagnosis Code	Description
1500	Malignant neoplasm of cervical esophagus
1501	Malignant neoplasm of thoracic esophagus
1502	Malignant neoplasm of abdominal esophagus
1503	Malignant neoplasm of upper third of esophagus
1504	Malignant neoplasm of middle third of esophagus
1505	Malignant neoplasm of lower third of esophagus
1508	Malignant neoplasm of other specified part of esophagus
1509	Malignant neoplasm of esophagus, unspecified site
1978	Secondary malignant neoplasm of other digestive organs and spleen

36.4.21.45 Respiratory Syncytial Virus (RSV) Prophylaxis

Texas Medicaid considers the American Academy of Pediatrics (AAP) criteria as the most useful single reference describing the evidence basis for RSV prophylaxis medical necessity. RSV immune globulin, intramuscular Synagis® (palivizumab) and intravenous RespiGam® (RSV-IGIV) are benefits of the Texas Medicaid CCP when medically necessary.

Texas Medicaid considers the beginning of the RSV season as October 1st, with the season typically continuing through the end of March or early April.

Beginning at six months of age, all high-risk infants (including those who qualify for RSV prophylaxis) and their contacts should be immunized against influenza, unless influenza immunization is medically contraindicated in the case of a specific individual.

Hospitalized infants determined to be at risk of severe RSV disease should receive their first dose of RSV prophylaxis 48–72 hours before being discharged during the RSV season.

Discharge planning should arrange outpatient follow-up for continued administration of Synagis® (palivizumab) if medically indicated. *Subsequent doses of Synagis® (palivizumab) should be given every 28 to 30 days and timed to provide prophylaxis that subsides at the end of RSV season*.

Reimbursement

Texas Medicaid may consider reimbursement for the intramuscular Synagis® (palivizumab) or intravenous version RespiGam® (RSV-IGIV) of RSV prophylaxis when billed appropriately with procedure code 90378. Providers obtaining Synagis® (palivizumab) through the VDP are not allowed to bill Texas Medicaid for the medication.

Refer to: "Obtaining Synagis® (palivizumab) Through the Vendor Drug Program" on page 36-123.

Synagis® (palivizumab) is provided in single-use vials and must be billed per milligram (mg) using procedure code 90378.

Example: *If 180 mg is administered to a child and 20 mg is wasted, 200 services/units must be billed, not 4 services/units.*

Example: *If 180 mg is administered to a child and 20 mg is wasted, 4 services/units must be billed, not 200 services/units.*

Providers are required to maintain accurate records of the total number of units given and the total number of units wasted for each client. If there is billing waste, the total number of units billed must include the number of units wasted.

Texas Medicaid will only reimburse providers for waste if a partial vial is actually wasted and not if the partial vial is used for another patient.

Reimbursement is provided no more than once every 28 days. RSV prophylaxis medications are covered in the office or outpatient settings.

Prior Authorization

All Synagis® (palivizumab) requires prior authorization through CCP.

All requests for Synagis® (palivizumab) must be submitted to CCP on a completed *Synagis® (Palivizumab) Prescription Prior Authorization Request Form*.

The physician's original, handwritten signature is required on the form and must be maintained in client record.

Palivizumab may be prior authorized for Medicaid beneficiaries less than 24 months of age who have hemodynamically significant heart disease when the documentation submitted demonstrates the following:

- The presence of moderate to severe pulmonary hypertension, or

CPT only copyright 2005 American Medical Association. All rights reserved.

- Active treatment for hemodynamically significant heart disease within the six months preceding the start of the RSV season (i.e., treatment dates between April 1 and September 30) consisting of digitalis, diuretics, or supplemental oxygen, and
- A diagnosis code consistent with hemodynamically significant congenital heart disease:
  - Congenital anatomical cardiac defects or
  - Cardiomyopathies of any etiology

The following table lists the most common cardiac diagnosis codes:

Diagnosis Code	Description
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation
4179	Unspecified disease of pulmonary circulation
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4257	Nutritional and metabolic cardiomyopathy
4259	Secondary cardiomyopathy, unspecified
4280	Congestive heart failure, unspecified
4281	Left heart failure
4289	Heart failure, unspecified
4599	Unspecified circulatory system disorder
7450	Common truncus
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
74519	Other transposition of great vessels
7452	Tetralogy of fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects
7457	Cor biloculare
7458	Other bulbus cordis anomalies and anomalies of cardiac septal closure
7459	Unspecified defect of septal closure
74600	Congenital pulmonary valve anomaly, unspecified
74601	Atresia of pulmonary valve, congenital
74602	Stenosis of pulmonary valve, congenital
74609	Other congenital anomalies of pulmonary valve
7461	Tricuspid atresia and stenosis, congenital
7462	Ebstein's anomaly
7463	Congenital stenosis of aortic valve
7464	Congenital insufficiency of aortic valve
7465	Congenital mitral stenosis
7466	Congenital mitral insufficiency
7467	Hypoplastic left heart syndrome
74681	Subaortic stenosis, congenital
74682	Cor triatriatum
74683	Infundibular pulmonic stenosis, congenital
74684	Congenital obstructive anomalies of heart, not elsewhere classified
74687	Malposition of heart and cardiac apex
7470	Patent ductus arteriosus
74710	Coarctation of aorta (preductal) (postductal)
74711	Interruption of aortic arch

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
74720	Congenital anomaly of aorta, unspecified
74721	Congenital anomalies of aortic arch
74722	Congenital atresia and stenosis of aorta
74729	Other congenital anomalies of aorta
7473	Congenital anomalies of pulmonary artery
74740	Congenital anomaly of great veins, unspecified
74749	Other anomalies of great veins

Palivizumab may be prior authorized for Medicaid beneficiaries less than 24 months of age who have underlying lung disease when the documentation submitted demonstrates the following:

- Active treatment for lung disease within the six months preceding the start of the RSV season (i.e., treatment dates between April 1 and September 30) consisting of:
    - Corticosteroids (systemic or inhaled), diuretics, or supplemental oxygen therapy or
    - Mechanical ventilation
- A diagnosis of significant lung disease:
    - Chronic respiratory failure (51883) or
    - Chronic respiratory disease arising in the perinatal period (7707) or
    - Cystic fibrosis (27700, 27701, 27702, 27703 and 27709) or
    - Congenital bronchiectasis (74861) or
    - Diaphragmatic defects (7506 and 7566) or
    - Congenital cystic lung disease (7484) or
    - Congenital agenesis, hypoplasia and dysplasia of lung (7485) or
    - Other respiratory diagnoses with supportive documentation of medical necessity

The following table identifies common chronic lung disease diagnosis codes:

Diagnosis Code	Description
27700	Cystic fibrosis without mention of meconium ileus
27701	Cystic fibrosis with meconium ileus
27702	Cystic fibrosis with pulmonary manifestations
27703	Cystic fibrosis with gastrointestinal manifestations
27709	Cystic fibrosis with other manifestations
51883	Chronic respiratory failure
7484	Congenital cystic lung
7485	Congenital agenesis, hypoplasia, and dysplasia of lung
74861	Congenital bronchiectasis
7506	Congenital hiatus hernia
7566	Congenital anomalies of diaphragm
7707	Chronic respiratory disease arising in the perinatal period

Note: *Chronic lung disease (CLD), also known as chronic respiratory disease arising in the perinatal period (diagnosis code 7707), was formerly called bronchopulmonary dysplasia. It can develop in pre-term neonates treated with oxygen and positive pressure ventilation. Many cases are seen in infants who previously had respiratory distress syndrome (RSD). CLD is characterized by disordered lung growth and a reduction in the number of structures available for gas exchange. CLD is not asthma, croup, recurrent upper respiratory infections, chronic bronchitis, chronic bronchiolitis, or a history of a previous RSV infection.*

Palivizumab may be prior authorized for Medicaid beneficiaries less than 12 months of age when documentation includes a diagnosis code indicating the client was born at 28 weeks estimated gestational age or earlier (76521, 76522, 76523, or 76524).

Palivizumab may be prior authorized for Medicaid beneficiaries less than six months of age when the documentation includes:

- A diagnosis code indicating the infant was born at 29–32 weeks estimated gestational age (76525, or 76526), or
- A diagnosis code indicating the infant was born between 32 and 35 weeks gestational age (76526, 76527,or 76528) and documentation of severe neuromuscular disease (including chronic respiratory failure, 51883), or
- Significant congenital anomalies of the airway expected to compromise respiratory reserve, or documentation of two of the following:
    - Direct exposure to tobacco smoke or documented environmental air pollutants, and/or

CPT only copyright 2005 American Medical Association. All rights reserved.

- Regular childcare attendance, and/or
- Direct exposure to siblings who attend childcare or school outside of the home

The following table lists diagnosis codes related to congenital airway anomalies:

Diagnosis Code	Description
7480	Choanal atresia
7482	Web of larynx
7503	Congenital tracheoesophageal fistula, esophageal atresia and stenosis

Providers may request prior authorization for RSV prophylaxis through CCP for clients with medical conditions not otherwise noted. All such requests must provide documentation to support the determination of medical necessity for this service.

Reimbursement

Palivizumab will not be reimbursed for dates of service outside the RSV season.

Exception: *Palivizumab will not be reimbursed for Medicaid beneficiaries who are greater than or equal to 24 months of age at the start of the RSV season in Texas.*

CCP may consider reimbursement for the intramuscular version of the RSV prophylaxis when billed with procedure code 1-90378. Palivizumab is provided in single use vials and must be billed per mg. Providers are required to maintain accurate records of the total number of units given and the total number of units purchased, administered, and wasted for each client. If there is a billing waste, the total number of units billed must include the number of units wasted. Medicaid will only reimburse providers for waste if a partial vial is actually wasted and not if the partial vial is used for another patient.

Example: *If 180 mg is administered to a child and 20 mg is wasted, 200 services/units must be billed, not four services/units.*

Providers seeking additional information on RSV may contact DSHS or refer to the DSHS website at www.dshs.state.tx.us.

Obtaining Synagis® (palivizumab) Through the Vendor Drug Program

Providers have two options for obtaining Synagis® (palivizumab) for Medicaid clients in fee-for-service and PCCM. Providers may purchase and bill for Synagis® (palivizumab), or they may obtain the drug through the VDP. Providers may not bill Texas Medicaid if the RSV prophylaxis was obtained through the VDP.

Note: *For Medicaid Managed Care clients, contact the clients' health maintenance organization (HMO).*

Option 1–Traditional Reimbursement for Synagis® (palivizumab)

- The treating provider identifies a Medicaid-enrolled client with indications for RSV prophylaxis with Synagis® (palivizumab).
- The provider purchases Synagis® (palivizumab) for administration to the client in office.
- The provider adheres to the Medicaid benefits policy, as outlined in "Respiratory Syncytial Virus (RSV) Prophylaxis" on page 36-120. Prior authorization is required in certain circumstances.
- The injection provider bills for the drug, an injection administration fee, and any medically necessary office-based E/M service provided at time of injection.
- The provider is reimbursed through the Medicaid claims payment system.

Option 2–Obtaining Synagis® (Palivizumab) Through the VDP

- The treating provider identifies a Medicaid-enrolled client with indications for RSV prophylaxis with Synagis® (palivizumab).
- The provider obtains Synagis® (palivizumab) through the Vendor Drug Program.
- The provider adheres to the Medicaid Benefits policy, as outlined in "Respiratory Syncytial Virus (RSV) Prophylaxis" on page 36-120 except that prior authorization is required for all patients as noted below.
- The provider or provider's agent sends a prescription for Synagis® (palivizumab) with supporting clinical information on the request form (see "Synagis® (Palivizumab) Prescription Form" on page B-99) to a Texas Medicaid-enrolled pharmacy that is a *member of the Synagis Distribution Network.* The administering provider does not purchase the drug.

  Refer to: HHSC's Vendor Drug Program Active Pharmacy Search page (www.hhsc.state.tx.us/hcf/vdp/dw/PharmacySearch.html) to search for participating pharmacies.

- The pharmacy contacts VDP's Prior Authorization Call Center. Prior authorization is required for all patients.
- If the information submitted does not demonstrate medical necessity the request is denied. Both the pharmacy and provider are notified of the denial.
- If the information submitted demonstrates medical necessity, the request is approved and both pharmacy and provider are notified.
- The selected pharmacy fills the prescription and overnight ships an individual dose of the medication, in the name of the Medicaid client, directly to the provider. An initiation packet also is mailed to the client's family, informing them of RSV, Synagis® (palivizumab) and its effects.
- The treating provider administers the Synagis® (palivizumab) injection to the Medicaid client in the office setting.
- The injection provider bills for an injection administration fee and any medically necessary office-based E/M service provided at time of injection. The provider does not bill Medicaid for the drug.

CPT only copyright 2005 American Medical Association. All rights reserved.

- The pharmacy contacts the provider each month after initial injection to obtain updated client information to ensure the proper amount for the next dose.

The following client demographic information is required:

- The child's date of birth
- The child's age in months, as of November 1, 2005
- The child's estimated gestational age (in weeks) at birth
- The child's body weight (in pounds or kilograms)
- The monthly dose required

36.4.21.46 Rho(D) Immune Globulin

Use the following procedure codes as applicable when billing for Rho(D) Immune Globulin: 1-J2790 and 1-J2792. Procedure code 1-J2790 is reimbursed at a maximum fee of $126.14.

36.4.21.47 Rituximab

Rituximab is payable for diagnosis 20280, Other malignant lymphomas, unspecified site. Diagnosis code 20280 must appear on the claim, but does not require a reference to procedure code 1-J9310.

Inpatient settings may be reimbursed under a DRG methodology. Outpatient facilities may be reimbursed at their reimbursement rate.

36.4.21.48 Filgrastim, Pegfilgrastim (G-CSF), and Sargramostim (GM-CSF)

Filgrastim and pegfilgrastim are granulocyte colony stimulating factors (G-CSF). Sargramostim is a granulocyte-macrophage colony stimulating factor (GM-CSF). GM-CSF and G-CSF stimulate neutrophil production after autologous bone marrow transplant and significantly reduce the duration and impact of neutropenia. Use procedure codes 1-J1440, 1-J1441, 1-J2505, or 1-J2820 with the number of units administered.

Payment for these procedures is limited to the following diagnosis codes:

Diagnosis Code	Description
1400	Malignant neoplasm of upper lip, vermilion border
1401	Malignant neoplasm of lower lip, vermilion border
1403	Malignant neoplasm of upper lip, inner aspect
1404	Malignant neoplasm of lower lip, inner aspect
1405	Malignant neoplasm of lip, unspecified, inner aspect
1406	Malignant neoplasm of commissure of lip
1408	Malignant neoplasm of other sites of lip
1409	Malignant neoplasm of lip, unspecified, vermilion border
1410	Malignant neoplasm of base of tongue
1411	Malignant neoplasm of dorsal surface of tongue
1413	Malignant neoplasm of ventral surface of tongue
1415	Malignant neoplasm of junctional zone of tongue
1416	Malignant neoplasm of lingual tonsil
1418	Malignant neoplasm of other sites of tongue
1419	Malignant neoplasm of tongue, unspecified
1420	Malignant neoplasm of parotid gland
1421	Malignant neoplasm of submandibular gland
1422	Malignant neoplasm of sublingual gland
1428	Malignant neoplasm of other major salivary glands
1429	Malignant neoplasm of salivary gland, unspecified
1430	Malignant neoplasm of upper gum
1431	Malignant neoplasm of lower gum
1438	Malignant neoplasm of other sites of gum
1439	Malignant neoplasm of gum, unspecified
1440	Malignant neoplasm of anterior portion of floor of mouth
1441	Malignant neoplasm of lateral portion of floor of mouth
1448	Malignant neoplasm of other sites of floor of mouth
1449	Malignant neoplasm of floor of mouth, part unspecified
1450	Malignant neoplasm of cheek mucosa
1451	Malignant neoplasm of vestibule of mouth
1452	Malignant neoplasm of hard palate
1453	Malignant neoplasm of soft palate
1454	Malignant neoplasm of uvula
1455	Malignant neoplasm of palate, unspecified
1456	Malignant neoplasm of retromolar area
1458	Malignant neoplasm of other specified parts of mouth

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1459	Malignant neoplasm of mouth, unspecified
1460	Malignant neoplasm of tonsil
1461	Malignant neoplasm of tonsillar fossa
1462	Malignant neoplasm of tonsillar pillars (anterior) (posterior)
1463	Malignant neoplasm of vallecula epiglottica
1464	Malignant neoplasm of anterior aspect of epiglottis
1465	Malignant neoplasm of junctional region of oropharynx
1466	Malignant neoplasm of lateral wall of oropharynx
1467	Malignant neoplasm of posterior wall of oropharynx
1468	Malignant neoplasm of other specified sites of oropharynx
1469	Malignant neoplasm of oropharynx, unspecified site
1470	Malignant neoplasm of superior wall of nasopharynx
1471	Malignant neoplasm of posterior wall of nasopharynx
1472	Malignant neoplasm of lateral wall of nasopharynx
1473	Malignant neoplasm of anterior wall of nasopharynx
1478	Malignant neoplasm of other specified sites of nasopharynx
1479	Malignant neoplasm of nasopharynx, unspecified site
1480	Malignant neoplasm of postcricoid region of hypopharynx
1481	Malignant neoplasm of pyriform sinus
1482	Malignant neoplasm of aryepiglottic fold, hypopharyngeal aspect
1483	Malignant neoplasm of posterior hypopharyngeal wall
1488	Malignant neoplasm of other specified sites of hypopharynx
1489	Malignant neoplasm of hypopharynx, unspecified site
1490	Malignant neoplasm of pharynx, unspecified
1491	Malignant neoplasm of waldeyer's ring
1498	Malignant neoplasm of other sites within the lip and oral cavity
1499	Malignant neoplasm of ill-defined sites within the lip and oral cavity

Diagnosis Code	Description
1500	Malignant neoplasm of cervical esophagus
1501	Malignant neoplasm of thoracic esophagus
1502	Malignant neoplasm of abdominal esophagus
1503	Malignant neoplasm of upper third of esophagus
1504	Malignant neoplasm of middle third of esophagus
1505	Malignant neoplasm of lower third of esophagus
1508	Malignant neoplasm of other specified part of esophagus
1509	Malignant neoplasm of esophagus, unspecified site
1510	Malignant neoplasm of cardia
1511	Malignant neoplasm of pylorus
1512	Malignant neoplasm of pyloric antrum
1513	Malignant neoplasm of fundus of stomach
1514	Malignant neoplasm of body of stomach
1515	Malignant neoplasm of lesser curvature of stomach, unspecified
1516	Malignant neoplasm of greater curvature of stomach, unspecified
1518	Malignant neoplasm of other specified sites of stomach
1519	Malignant neoplasm of stomach, unspecified site
1520	Malignant neoplasm of duodenum
1521	Malignant neoplasm of jejunum
1522	Malignant neoplasm of ileum
1523	Malignant neoplasm of meckel's diverticulum
1528	Malignant neoplasm of other specified sites of small intestine
1529	Malignant neoplasm of small intestine, unspecified site
1530	Malignant neoplasm of hepatic flexure
1531	Malignant neoplasm of transverse colon
1532	Malignant neoplasm of descending colon
1533	Malignant neoplasm of sigmoid colon
1534	Malignant neoplasm of cecum
1535	Malignant neoplasm of appendix vermiformis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1536	Malignant neoplasm of ascending colon
1537	Malignant neoplasm of splenic flexure
1538	Malignant neoplasm of other specified sites of large intestine
1539	Malignant neoplasm of colon, unspecified site
1540	Malignant neoplasm of rectosigmoid junction
1541	Malignant neoplasm of rectum
1542	Malignant neoplasm of anal canal
1543	Malignant neoplasm of anus, unspecified site
1548	Malignant neoplasm of other sites of rectum, rectosigmoid junction, and anus
1550	Malignant neoplasm of liver, primary
1551	Malignant neoplasm of intrahepatic bile ducts
1552	Malignant neoplasm of liver, not specified as primary or secondary
1560	Malignant neoplasm of gallbladder
1561	Malignant neoplasm of extrahepatic bile ducts
1562	Malignant neoplasm of ampulla of vater
1568	Malignant neoplasm of other specified sites of gallbladder and extrahepatic bile ducts
1569	Malignant neoplasm of biliary tract, part unspecified site
1570	Malignant neoplasm of head of pancreas
1571	Malignant neoplasm of body of pancreas
1572	Malignant neoplasm of tail of pancreas
1573	Malignant neoplasm of pancreatic duct
1574	Malignant neoplasm of islets of langerhans
1578	Malignant neoplasm of other specified sites of pancreas
1579	Malignant neoplasm of pancreas, part unspecified
1580	Malignant neoplasm of retroperitoneum
1588	Malignant neoplasm of specified parts of peritoneum
1589	Malignant neoplasm of peritoneum, unspecified
1590	Malignant neoplasm of intestinal tract, part unspecified
1591	Malignant neoplasm of spleen, not elsewhere classified
1598	Malignant neoplasm of other sites of digestive system and intra-abdominal organs
1599	Malignant neoplasm of ill-defined sites within the digestive organs and peritoneum
1600	Malignant neoplasm of nasal cavities
1601	Malignant neoplasm of auditory tube, middle ear, and mastoid air cells
1602	Malignant neoplasm of maxillary sinus
1603	Malignant neoplasm of ethmoidal sinus
1604	Malignant neoplasm of frontal sinus
1605	Malignant neoplasm of sphenoidal sinus
1608	Malignant neoplasm of other accessory sinuses
1609	Malignant neoplasm of accessory sinus, unspecified
1610	Malignant neoplasm of glottis
1611	Malignant neoplasm of supraglottis
1612	Malignant neoplasm of subglottis
1613	Malignant neoplasm of laryngeal cartilages
1618	Malignant neoplasm of other specified sites of larynx
1619	Malignant neoplasm of larynx, unspecified
1620	Malignant neoplasm of trachea
1622	Malignant neoplasm of main bronchus
1623	Malignant neoplasm of upper lobe, bronchus or lung
1624	Malignant neoplasm of middle lobe, bronchus or lung
1625	Malignant neoplasm of lower lobe, bronchus or lung
1628	Malignant neoplasm of other parts of bronchus or lung
1629	Malignant neoplasm of bronchus and lung, unspecified
1630	Malignant neoplasm of parietal pleura
1631	Malignant neoplasm of visceral pleura
1638	Malignant neoplasm of other specified sites of pleura
1639	Malignant neoplasm of pleura, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1640	Malignant neoplasm of thymus
1641	Malignant neoplasm of heart
1642	Malignant neoplasm of anterior mediastinum
1643	Malignant neoplasm of posterior mediastinum
1648	Malignant neoplasm of other parts of mediastinum
1649	Malignant neoplasm of mediastinum, part unspecified
1650	Malignant neoplasm of upper respiratory tract, part unspecified
1658	Malignant neoplasm of other sites within the respiratory system and intrathoracic organs
1659	Malignant neoplasm of ill-defined sites within the respiratory system
1700	Malignant neoplasm of bones of skull and face, except mandible
1701	Malignant neoplasm of mandible
1702	Malignant neoplasm of vertebral column, excluding sacrum and coccyx
1703	Malignant neoplasm of ribs, sternum, and clavicle
1704	Malignant neoplasm of scapula and long bones of upper limb
1705	Malignant neoplasm of short bones of upper limb
1706	Malignant neoplasm of pelvic bones, sacrum, and coccyx
1707	Malignant neoplasm of long bones of lower limb
1708	Malignant neoplasm of short bones of lower limb
1709	Malignant neoplasm of bone and articular cartilage, site unspecified
1710	Malignant neoplasm of connective and other soft tissue of head, face, and neck
1712	Malignant neoplasm of connective and other soft tissue of upper limb, including shoulder
1713	Malignant neoplasm of connective and other soft tissue of lower limb, including hip
1714	Malignant neoplasm of connective and other soft tissue of thorax
1715	Malignant neoplasm of connective and other soft tissue of abdomen
1716	Malignant neoplasm of connective and other soft tissue of pelvis
1717	Malignant neoplasm of connective and other soft tissue of trunk, unspecified
1718	Malignant neoplasm of other specified sites of connective and other soft tissue
1719	Malignant neoplasm of connective and other soft tissue, site unspecified
1720	Malignant melanoma of skin of lip
1721	Malignant melanoma of skin of eyelid, including canthus
1722	Malignant melanoma of skin of ear and external auditory canal
1723	Malignant melanoma of skin of other and unspecified parts of face
1724	Malignant melanoma of skin of scalp and neck
1725	Malignant melanoma of skin of trunk, except scrotum
1726	Malignant melanoma of skin of upper limb, including shoulder
1727	Malignant melanoma of skin of lower limb, including hip
1728	Malignant melanoma of other specified sites of skin
1729	Melanoma of skin, site unspecified
1730	Other malignant neoplasm of skin of lip
1731	Other malignant neoplasm of skin of eyelid, including canthus
1732	Other malignant neoplasm of skin of ear and external auditory canal
1733	Other malignant neoplasm of skin of other and unspecified parts of face
1734	Other malignant neoplasm of scalp and skin of neck
1735	Other malignant neoplasm of skin of trunk, except scrotum
1736	Other malignant neoplasm of skin of upper limb, including shoulder
1737	Other malignant neoplasm of skin of lower limb, including hip
1738	Other malignant neoplasm of other specified sites of skin
1739	Other malignant neoplasm of skin, site unspecified
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
1760	Kaposi's sarcoma, skin
1761	Kaposi's sarcoma, soft tissue
1762	Kaposi's sarcoma, palate
1763	Kaposi's sarcoma, gastrointestinal sites
1764	Kaposi's sarcoma, lung
1765	Kaposi's sarcoma, lymph nodes
1768	Kaposi's sarcoma, other specified sites
1769	Kaposi's sarcoma, unspecified site
179	Malignant neoplasm of uterus, part unspecified
1800	Malignant neoplasm of endocervix
1801	Malignant neoplasm of exocervix
1808	Malignant neoplasm of other specified sites of cervix
1809	Malignant neoplasm of cervix uteri, unspecified site
181	Malignant neoplasm of placenta
1820	Malignant neoplasm of corpus uteri, except isthmus
1821	Malignant neoplasm of isthmus
1828	Malignant neoplasm of other specified sites of body of uterus
1830	Malignant neoplasm of ovary
1832	Malignant neoplasm of fallopian tube
1833	Malignant neoplasm of broad ligament of uterus
1834	Malignant neoplasm of parametrium
1835	Malignant neoplasm of round ligament of uterus
1838	Malignant neoplasm of other specified sites of uterine adnexa
1839	Malignant neoplasm of uterine adnexa, unspecified site
1840	Malignant neoplasm of vagina
1841	Malignant neoplasm of labia majora
1842	Malignant neoplasm of labia minora
1843	Malignant neoplasm of clitoris
1844	Malignant neoplasm of vulva, unspecified site
1848	Malignant neoplasm of other specified sites of female genital organs
1849	Malignant neoplasm of female genital organ, site unspecified
185	Malignant neoplasm of prostate
1860	Malignant neoplasm of undescended testis
1869	Malignant neoplasm of other and unspecified testis
187	Malignant neoplasm of penis and other male genital organs
1871	Malignant neoplasm of prepuce
1872	Malignant neoplasm of glans penis
1873	Malignant neoplasm of body of penis
1874	Malignant neoplasm of penis, part unspecified
1875	Malignant neoplasm of epididymis
1876	Malignant neoplasm of spermatic cord
1877	Malignant neoplasm of scrotum
1878	Malignant neoplasm of other specified sites of male genital organs
1879	Malignant neoplasm of male genital organ, site unspecified
1880	Malignant neoplasm of trigone of urinary bladder
1881	Malignant neoplasm of dome of urinary bladder
1882	Malignant neoplasm of lateral wall of urinary bladder
1883	Malignant neoplasm of anterior wall of urinary bladder
1884	Malignant neoplasm of posterior wall of urinary bladder
1885	Malignant neoplasm of bladder neck
1886	Malignant neoplasm of ureteric orifice
1887	Malignant neoplasm of urachus

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1888	Malignant neoplasm of other specified sites of bladder
1889	Malignant neoplasm of bladder, part unspecified
1890	Malignant neoplasm of kidney, except pelvis
1891	Malignant neoplasm of renal pelvis
1892	Malignant neoplasm of ureter
1893	Malignant neoplasm of urethra
1894	Malignant neoplasm of paraurethral glands
1898	Malignant neoplasm of other specified sites of urinary organs
1899	Malignant neoplasm of urinary organ, site unspecified
1900	Malignant neoplasm of other and unspecified sites
1901	Malignant neoplasm of orbit
1902	Malignant neoplasm of lacrimal gland
1903	Malignant neoplasm of conjunctiva
1904	Malignant neoplasm of cornea
1905	Malignant neoplasm of retina
1906	Malignant neoplasm of choroid
1907	Malignant neoplasm of lacrimal duct
1908	Malignant neoplasm of other specified sites of eye
1909	Malignant neoplasm of eye, part unspecified
1910	Malignant neoplasm of cerebrum, except lobes and ventricles
1911	Malignant neoplasm of frontal lobe
1912	Malignant neoplasm of temporal lobe
1913	Malignant neoplasm of parietal lobe
1914	Malignant neoplasm of occipital lobe
1915	Malignant neoplasm of ventricles
1916	Malignant neoplasm of cerebellum NOS
1917	Malignant neoplasm of brain stem
1918	Malignant neoplasm of other parts of brain
1919	Malignant neoplasm of brain, unspecified site
1920	Malignant neoplasm of cranial nerves
1921	Malignant neoplasm of cerebral meninges
1922	Malignant neoplasm of spinal cord
1923	Malignant neoplasm of spinal meninges

Diagnosis Code	Description
1928	Malignant neoplasm of other specified sites of nervous system
1929	Malignant neoplasm of nervous system, part unspecified
193	Malignant neoplasm of thyroid gland
1940	Malignant neoplasm of adrenal gland
1941	Malignant neoplasm of parathyroid gland
1943	Malignant neoplasm of pituitary gland and craniopharyngeal duct
1944	Malignant neoplasm of pineal gland
1945	Malignant neoplasm of carotid body
1946	Malignant neoplasm of aortic body and other paraganglia
1948	Malignant neoplasm of other endocrine glands and related structures
1949	Malignant neoplasm of endocrine gland, site unspecified
1950	Malignant neoplasm of head, face, and neck
1951	Malignant neoplasm of thorax
1952	Malignant neoplasm of abdomen
1953	Malignant neoplasm of pelvis
1954	Malignant neoplasm of upper limb
1955	Malignant neoplasm of lower limb
1958	Malignant neoplasm of other specified sites
1960	Secondary and unspecified malignant neoplasm of lymph nodes of head, face, and neck
1961	Secondary and unspecified malignant neoplasm of intrathoracic lymph nodes
1962	Secondary and unspecified malignant neoplasm of intra-abdominal lymph nodes
1963	Secondary and unspecified malignant neoplasm of lymph nodes of axilla and upper limb
1965	Secondary and unspecified malignant neoplasm of lymph nodes of inguinal region and lower limb
1966	Secondary and unspecified malignant neoplasm of intrapelvic lymph nodes
1968	Secondary and unspecified malignant neoplasm of lymph nodes of multiple sites
1969	Secondary and unspecified malignant neoplasm of lymph nodes, site unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1970	Secondary malignant neoplasm of lung
1971	Secondary malignant neoplasm of mediastinum
1972	Secondary malignant neoplasm of pleura
1973	Secondary malignant neoplasm of other respiratory organs
1974	Secondary malignant neoplasm of small intestine including duodenum
1975	Secondary malignant neoplasm of large intestine and rectum
1976	Secondary malignant neoplasm of retroperitoneum and peritoneum
1977	Malignant neoplasm of liver, secondary
1978	Secondary malignant neoplasm of other digestive organs and spleen
1980	Secondary malignant neoplasm of kidney
1981	Secondary malignant neoplasm of other urinary organs
1982	Secondary malignant neoplasm of skin
1983	Secondary malignant neoplasm of brain and spinal cord
1984	Secondary malignant neoplasm of other parts of nervous system
1985	Secondary malignant neoplasm of bone and bone marrow
1986	Secondary malignant neoplasm of ovary
1987	Secondary malignant neoplasm of adrenal gland
1988	Secondary malignant neoplasm of other specified sites
19881	Secondary malignant neoplasm of breast
19882	Secondary malignant neoplasm of genital organs
19889	Secondary malignant neoplasm of other specified sites
1990	Disseminated malignant neoplasm
1991	Other malignant neoplasm of unspecified site
20000	Reticulosarcoma, unspecified site
20001	Reticulosarcoma involving lymph nodes of head, face, and neck
20002	Reticulosarcoma involving intrathoracic lymph nodes
20003	Reticulosarcoma involving intra-abdominal lymph nodes
20004	Reticulosarcoma involving lymph nodes of axilla and upper limb
20005	Reticulosarcoma involving lymph nodes of inguinal region and lower limb
20006	Reticulosarcoma involving intrapelvic lymph nodes
20007	Reticulosarcoma involving spleen
20008	Reticulosarcoma involving lymph nodes of multiple sites
20010	Lymphosarcoma, unspecified site
20011	Lymphosarcoma involving lymph nodes of head, face, and neck
20012	Lymphosarcoma involving intrathoracic lymph nodes
20013	Lymphosarcoma involving intra-abdominal lymph nodes
20014	Lymphosarcoma involving lymph nodes of axilla and upper limb
20015	Lymphosarcoma involving lymph nodes of inguinal region and lower limb
20016	Lymphosarcoma involving intrapelvic lymph nodes
20017	Lymphosarcoma involving spleen
20018	Lymphosarcoma involving lymph nodes of multiple sites
20020	Burkitt's tumor or lymphoma, unspecified site
20021	Burkitt's tumor or lymphoma involving lymph nodes of head, face, and neck
20022	Burkitt's tumor or lymphoma involving intrathoracic lymph nodes
20023	Burkitt's tumor or lymphoma involving intra-abdominal lymph nodes
20024	Burkitt's tumor or lymphoma involving lymph nodes of axilla and upper limb
20025	Burkitt's tumor or lymphoma involving lymph nodes of inguinal region and lower limb
20026	Burkitt's tumor or lymphoma involving intrapelvic lymph nodes
20027	Burkitt's tumor or lymphoma involving spleen
20028	Burkitt's tumor or lymphoma involving lymph nodes of multiple sites
20080	Other named variants of lymphosarcoma and reticulosarcoma, unspecified site

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20081	Other named variants of lymphosa-rcoma and reticulosarcoma involving lymph nodes of head, face, and neck
20082	Other named variants of lymphosa-rcoma and reticulosarcoma involving intrathoracic lymph nodes
20083	Other named variants of lymphosa-rcoma and reticulosarcoma involving intra-abdominal lymph nodes
20084	Other named variants of lymphosa-rcoma and reticulosarcoma involving lymph nodes of axilla and upper limb
20085	Other named variants of lymphosa-rcoma and reticulosarcoma involving lymph nodes of inguinal region and lower limb
20086	Other named variants of lymphosa-rcoma and reticulosarcoma involving intrapelvic lymph nodes
20087	Other named variants of lymphosa-rcoma and reticulosarcoma involving spleen
20088	Other named variants of lymphosa-rcoma and reticulosarcoma involving lymph nodes of multiple sites
20100	Hodgkin's paragranuloma, unspecified site
20101	Hodgkin's paragranuloma involving lymph nodes of head, face, and neck
20102	Hodgkin's paragranuloma involving intrathoracic lymph nodes
20103	Hodgkin's paragranuloma involving intra-abdominal lymph nodes
20104	Hodgkin's paragranuloma involving lymph nodes of axilla and upper limb
20105	Hodgkin's paragranuloma involving lymph nodes of inguinal region and lower limb
20106	Hodgkin's paragranuloma involving intrapelvic lymph nodes
20107	Hodgkin's paragranuloma involving spleen
20108	Hodgkin's paragranuloma involving lymph nodes of multiple sites
20110	Hodgkin's granuloma, unspecified site
20111	Hodgkin's granuloma involving lymph nodes of head, face, and neck
20112	Hodgkin's granuloma involving intrathoracic lymph nodes
20113	Hodgkin's granuloma involving intra-abdominal lymph nodes

Diagnosis Code	Description
20114	Hodgkin's granuloma involving lymph nodes of axilla and upper limb
20115	Hodgkin's granuloma involving lymph nodes of inguinal region and lower limb
20116	Hodgkin's granuloma involving intrapelvic lymph nodes
20117	Hodgkin's granuloma involving spleen
20118	Hodgkin's granuloma involving lymph nodes of multiple sites
20120	Hodgkin's sarcoma, unspecified site
20121	Hodgkin's sarcoma involving lymph nodes of head, face, and neck
20122	Hodgkin's sarcoma involving intrathoracic lymph nodes
20123	Hodgkin's sarcoma involving intra-abdominal lymph nodes
20124	Hodgkin's sarcoma involving lymph nodes of axilla and upper limb
20125	Hodgkin's sarcoma involving lymph nodes of inguinal region and lower limb
20126	Hodgkin's sarcoma involving intrapelvic lymph nodes
20127	Hodgkin's sarcoma involving spleen
20128	Hodgkin's sarcoma involving lymph nodes of multiple sites
20140	Hodgkin's disease, lymphocytic-histiocytic predominance, unspecified site
20141	Hodgkin's disease, lymphocytic-histiocytic predominance involving lymph nodes of head, face, and neck
20142	Hodgkin's disease, lymphocytic-histiocytic predominance involving intrathoracic lymph nodes
20143	Hodgkin's disease, lymphocytic-histiocytic predominance involving intra-abdominal lymph nodes
20144	Hodgkin's disease, lymphocytic-histiocytic predominance involving lymph nodes of axilla and upper limb
20145	Hodgkin's disease, lymphocytic-histiocytic predominance involving lymph nodes of inguinal region and lower limb
20146	Hodgkin's disease, lymphocytic-histiocytic predominance involving intrapelvic lymph nodes
20147	Hodgkin's disease, lymphocytic-histiocytic predominance involving spleen

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20148	Hodgkin's disease, lymphocytic-histiocytic predominance involving lymph nodes of multiple sites
20150	Hodgkin's disease, nodular sclerosis, unspecified site
20151	Hodgkin's disease, nodular sclerosis, involving lymph nodes of head, face, and neck
20152	Hodgkin's disease, nodular sclerosis, involving intrathoracic lymph nodes
20153	Hodgkin's disease, nodular sclerosis, involving intra-abdominal lymph nodes
20154	Hodgkin's disease, nodular sclerosis, involving lymph nodes of axilla and upper limb
20155	Hodgkin's disease, nodular sclerosis, involving lymph nodes of inguinal region and lower limb
20156	Hodgkin's disease, nodular sclerosis, involving intrapelvic lymph nodes
20157	Hodgkin's disease, nodular sclerosis, involving spleen
20158	Hodgkin's disease, nodular sclerosis, involving lymph nodes of multiple sites
20160	Hodgkin's disease, mixed cellularity, unspecified site
20161	Hodgkin's disease, mixed cellularity, involving lymph nodes of head, face, and neck
20162	Hodgkin's disease, mixed cellularity, involving intrathoracic lymph nodes
20163	Hodgkin's disease, mixed cellularity, involving intra-abdominal lymph nodes
20164	Hodgkin's disease, mixed cellularity, involving lymph nodes of axilla and upper limb
20165	Hodgkin's disease, mixed cellularity, involving lymph nodes of inguinal region and lower limb
20166	Hodgkin's disease, mixed cellularity, involving intrapelvic lymph nodes
20167	Hodgkin's disease, mixed cellularity, involving spleen
20168	Hodgkin's disease, mixed cellularity, involving lymph nodes of multiple sites
20170	Hodgkin's disease, lymphocytic depletion, unspecified site
20171	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of head, face, and neck
20172	Hodgkin's disease, lymphocytic depletion, involving intrathoracic lymph nodes
20173	Hodgkin's disease, lymphocytic depletion, involving intra-abdominal lymph nodes
20174	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of axilla and upper limb
20175	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of inguinal region and lower limb
20176	Hodgkin's disease, lymphocytic depletion, involving intrapelvic lymph nodes
20177	Hodgkin's disease, lymphocytic depletion, involving spleen
20178	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of multiple sites
20190	Hodgkin's disease, unspecified type, unspecified site
20191	Hodgkin's disease, unspecified type, involving lymph nodes of head, face, and neck
20192	Hodgkin's disease, unspecified type, involving intrathoracic lymph nodes
20193	Hodgkin's disease, unspecified type, involving intra-abdominal lymph nodes
20194	Hodgkin's disease, unspecified type, involving lymph nodes of axilla and upper limb
20195	Hodgkin's disease, unspecified type, involving lymph nodes of inguinal region and lower limb
20196	Hodgkin's disease, unspecified type, involving intrapelvic lymph nodes
20197	Hodgkin's disease, unspecified type, involving spleen
20198	Hodgkin's disease, unspecified type, involving lymph nodes of multiple sites
20200	Nodular lymphoma, unspecified site
20201	Nodular lymphoma involving lymph nodes of head, face, and neck
20202	Nodular lymphoma involving intrathoracic lymph nodes
20203	Nodular lymphoma involving intra-abdominal lymph nodes
20204	Nodular lymphoma involving lymph nodes of axilla and upper limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20205	Nodular lymphoma involving lymph nodes of inguinal region and lower limb
20206	Nodular lymphoma involving intrapelvic lymph nodes
20207	Nodular lymphoma involving spleen
20208	Nodular lymphoma involving lymph nodes of multiple sites
20210	Mycosis fungoides, unspecified site
20211	Mycosis fungoides involving lymph nodes of head, face, and neck
20212	Mycosis fungoides involving intrathoracic lymph nodes
20213	Mycosis fungoides involving intra-abdominal lymph nodes
20214	Mycosis fungoides involving lymph nodes of axilla and upper limb
20215	Mycosis fungoides involving lymph nodes of inguinal region and lower limb
20216	Mycosis fungoides involving intrapelvic lymph nodes
20217	Mycosis fungoides involving spleen
20218	Mycosis fungoides involving lymph nodes of multiple sites
20220	Sezary's disease, unspecified site
20221	Sezary's disease involving lymph nodes of head, face, and neck
20222	Sezary's disease involving intrathoracic lymph nodes
20223	Sezary's disease involving intra-abdominal lymph nodes
20224	Sezary's disease involving lymph nodes of axilla and upper limb
20225	Sezary's disease involving lymph nodes of inguinal region and lower limb
20226	Sezary's disease involving intrapelvic lymph nodes
20227	Sezary's disease involving spleen
20228	Sezary's disease involving lymph nodes of multiple sites
20230	Malignant histiocytosis, unspecified site
20231	Malignant histiocytosis involving lymph nodes of head, face, and neck
20232	Malignant histiocytosis involving intrathoracic lymph nodes
20233	Malignant histiocytosis involving intra-abdominal lymph nodes
20234	Malignant histiocytosis involving lymph nodes of axilla and upper limb
20235	Malignant histiocytosis involving lymph nodes of inguinal region and lower limb
20236	Malignant histiocytosis involving intrapelvic lymph nodes
20237	Malignant histiocytosis involving spleen
20238	Malignant histiocytosis involving lymph nodes of multiple sites
20240	Leukemic reticuloendotheliosis, unspecified site
20241	Leukemic reticuloendotheliosis involving lymph nodes of head, face, and neck
20242	Leukemic reticuloendotheliosis involving intrathoracic lymph nodes
20243	Leukemic reticuloendotheliosis involving intra-abdominal lymph nodes
20244	Leukemic reticuloendotheliosis involving lymph nodes of axilla and upper arm
20245	Leukemic reticuloendotheliosis involving lymph nodes of inguinal region and lower limb
20246	Leukemic reticuloendotheliosis involving intrapelvic lymph nodes
20247	Leukemic reticuloendotheliosis involving spleen
20248	Leukemic reticuloendotheliosis involving lymph nodes of multiple sites
20250	Letterer-siwe disease, unspecified site
20251	Letterer-siwe disease involving lymph nodes of head, face, and neck
20252	Letterer-siwe disease involving intrathoracic lymph nodes
20253	Letterer-siwe disease involving intra-abdominal lymph nodes
20254	Letterer-siwe disease involving lymph nodes of axilla and upper limb
20255	Letterer-siwe disease involving lymph nodes of inguinal region and lower limb
20256	Letterer-siwe disease involving intrapelvic lymph nodes
20257	Letterer-siwe disease involving spleen
20258	Letterer-siwe disease involving lymph nodes of multiple sites

Diagnosis Code	Description
2323	Carcinoma in situ of skin of other and unspecified parts of face
2324	Carcinoma in situ of scalp and skin of neck
2325	Carcinoma in situ of skin of trunk, except scrotum
2326	Carcinoma in situ of skin of upper limb, including shoulder
2327	Carcinoma in situ of skin of lower limb, including hip
2328	Carcinoma in situ of other specified sites of skin
2329	Carcinoma in situ of skin, site unspecified
2330	Carcinoma in situ of breast
2331	Carcinoma in situ of cervix uteri
2332	Carcinoma in situ of other and unspecified parts of uterus
2333	Carcinoma in situ of other and unspecified female genital organs
2334	Carcinoma in situ of prostate
2335	Carcinoma in situ of penis
2336	Carcinoma in situ of other and unspecified male genital organs
2337	Carcinoma in situ of bladder
2339	Carcinoma in situ of other and unspecified urinary organs
2340	Carcinoma in situ of eye
2348	Carcinoma in situ of other specified sites
2349	Carcinoma in situ, site unspecified
2848	Other specified aplastic anemias
28801	Congenital neutropenia
28802	Cyclic neutropenia
28803	Drug induced neutropenia
28804	Neutropenia due to infection
7767	Transient neonatal neutropenia
9631	Poisoning by antineoplastic and immunosuppressive drugs
99685	Complications of transplanted bone marrow
V4281	Bone marrow replaced by transplant
V4282	Peripheral stem cells replaced by transplant

36.4.21.49 Strontium-89 Chloride

Supply of therapeutic radiopharmaceutical, strontium-89 chloride, per mci, is a benefit of the Texas Medicaid Program. Strontium-89 should be billed using procedure code 9-A9600 and is limited to a total of ten mci intravenously injected every 90 days, any provider.

Reimbursement of strontium-89 is restricted to the following diagnosis codes:

Diagnosis Code	Description
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
185	Malignant neoplasm of prostate
1985	Secondary malignant neoplasm of bone and bone marrow

Reimbursement of strontium-89 is limited to hospital facilities, freestanding radiation treatment centers (POS 5), and the office setting (POS 1). Metastron (strontium-89) provided in the inpatient setting (POS 3) is part of the DRG reimbursement, and no separate payment is made.

36.4.21.50 Tetanus Injections, Acute Care

Tetanus toxoid adsorbed and tetanus immune globulin, human are benefits of the Texas Medicaid Program.

Tetanus toxoid adsorbed is an immunization used to prevent tetanus. It produces immunity to tetanus by promoting antibody production. The tetanus immune globulin provides a passive immunity for injuries that are over 24 hours old, extensively contaminated, and/or for the client who has had less than two tetanus toxoid injections in a lifetime. Therefore, both of these injections can be given on the same day for the same injury event.

Tetanus toxoid absorbed and tetanus immune globulin should be billed with the following procedure codes: 1-90703 and 1-J1670.

CPT only copyright 2005 American Medical Association. All rights reserved.

Tetanus toxoid and tetanus immune globulin injections are covered for injuries, such as puncture wounds, burns, or abrasions. These injections are diagnosis-restricted to the codes listed in the following table:

Diagnosis Code	Description
80000	Closed fracture of vault of skull without mention of intracranial injury, with state of consciousness unspecified
80001	Closed fracture of vault of skull without mention of intracranial injury, with no loss of consciousness
80002	Closed fracture of vault of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80003	Closed fracture of vault of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80004	Closed fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80005	Closed fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80006	Closed fracture of vault of skull without mention of intra cranial injury, with loss of consciousness of unspecified duration
80009	Closed fracture of vault of skull without mention of intracranial injury, with concussion, unspecified
80010	Closed fracture of vault of skull with cerebral laceration and contusion, with state of consciousness unspecified
80011	Closed fracture of vault of skull with cerebral laceration and contusion, with no loss of consciousness
80012	Closed fracture of vault of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80013	Closed fracture of vault of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80014	Closed fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80015	Closed fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80016	Closed fracture of vault of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80019	Closed fracture of vault of skull with cerebral laceration and contusion, with concussion, unspecified
80020	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with state of consciousness unspecified
80021	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with no loss of consciousness
80022	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with brief (less than one hour) loss of consciousness
80023	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with moderate (1-24 hours) loss of consciousness
80024	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80025	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80026	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with loss of consciousness of unspecified duration
80029	Closed fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with concussion, unspecified
80030	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80031	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80032	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80033	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80034	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80035	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80036	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80039	Closed fracture of vault of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80040	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80041	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80042	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80043	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80044	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80045	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80046	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80049	Closed fracture of vault of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
80050	Open fracture of vault of skull without mention of intracranial injury, with state of consciousness unspecified
80051	Open fracture of vault of skull without mention of intracranial injury, with no loss of consciousness
80052	Open fracture of vault of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80053	Open fracture of vault of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80054	Open fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80055	Open fracture of vault of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80056	Open fracture of vault of skull without mention of intracranial injury, with loss of consciousness of unspecified duration
80059	Open fracture of vault of skull without mention of intracranial injury, with concussion, unspecified
80060	Open fracture of vault of skull with cerebral laceration and contusion, with state of consciousness unspecified
80061	Open fracture of vault of skull with cerebral laceration and contusion, with no loss of consciousness
80062	Open fracture of vault of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80063	Open fracture of vault of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80064	Open fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80065	Open fracture of vault of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80066	Open fracture of vault of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80069	Open fracture of vault of skull with cerebral laceration and contusion, with concussion, unspecified
80070	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with state of consciousness unspecified
80071	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with no loss of consciousness
80072	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with brief (less than one hour) loss of consciousness
80073	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with moderate (1-24 hours) loss of consciousness
80074	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80075	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80076	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with loss of consciousness of unspecified duration
80079	Open fracture of vault of skull with subarachnoid, subdural, and extra-dural hemorrhage, with concussion, unspecified

Diagnosis Code	Description
80080	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80081	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80082	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80083	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80084	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80085	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80086	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80089	Open fracture of vault of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80090	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80091	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80092	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80093	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80094	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80095	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80096	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80099	Open fracture of vault of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
80100	Closed fracture of base of skull without mention of intra cranial injury, with state of consciousness unspecified
80101	Closed fracture of base of skull without mention of intra cranial injury, with no loss of consciousness
80102	Closed fracture of base of skull without mention of intra cranial injury, with brief (less than one hour) loss of consciousness
80103	Closed fracture of base of skull without mention of intra cranial injury, with moderate (1-24 hours) loss of consciousness
80104	Closed fracture of base of skull without mention of intra cranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80105	Closed fracture of base of skull without mention of intra cranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80106	Closed fracture of base of skull without mention of intra cranial injury, with loss of consciousness of unspecified duration
80109	Closed fracture of base of skull without mention of intra cranial injury, with concussion, unspecified
80110	Closed fracture of base of skull with cerebral laceration and contusion, with state of consciousness unspecified
80111	Closed fracture of base of skull with cerebral laceration and contusion, with no loss of consciousness
80112	Closed fracture of base of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80113	Closed fracture of base of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80114	Closed fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80115	Closed fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80116	Closed fracture of base of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80119	Closed fracture of base of skull with cerebral laceration and contusion, with concussion, unspecified
80120	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80121	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80122	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80123	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80124	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80125	Closed fracture of base of skull with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

Diagnosis Code	Description
80126	Closed fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with loss of consciousness of unspecified duration
80129	Closed fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with concussion, unspecified
80130	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80131	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80132	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80133	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80134	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80135	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80136	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80139	Closed fracture of base of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80140	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with state of consciousness unspecified
80141	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with no loss of consciousness
80142	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with brief (less than one hour) loss of consciousness
80143	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with moderate (1-24 hours) loss of consciousness
80144	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80145	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80146	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with loss of consciousness of unspecified duration
80149	Closed fracture of base of skull with intracranial injury of other and unspec-ified nature, with concussion, unspecified
80150	Open fracture of base of skull without mention of intracranial injury, with state of consciousness unspecified
80151	Open fracture of base of skull without mention of intracranial injury, with no loss of consciousness
80152	Open fracture of base of skull without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80153	Open fracture of base of skull without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80154	Open fracture of base of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80155	Open fracture of base of skull without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80156	Open fracture of base of skull without mention of intracranial injury, with loss of consciousness of unspecified duration
80159	Open fracture of base of skull without mention of intracranial injury, with concussion, unspecified

Diagnosis Code	Description
80160	Open fracture of base of skull with cerebral laceration and contusion, with state of consciousness unspecified
80161	Open fracture of base of skull with cerebral laceration and contusion, with no loss of consciousness
80162	Open fracture of base of skull with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80163	Open fracture of base of skull with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80164	Open fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80165	Open fracture of base of skull with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80166	Open fracture of base of skull with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80169	Open fracture of base of skull with cerebral laceration and contusion, with concussion, unspecified
80170	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with state of consciousness unspecified
80171	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with no loss of consciousness
80172	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with brief (less than one hour) loss of consciousness
80173	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with moderate (1-24 hours) loss of consciousness
80174	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

Diagnosis Code	Description
80175	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80176	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with loss of consciousness of unspecified duration
80179	Open fracture of base of skull with subarachnoid, subdural, and extra-dural hemorrhage, with concussion, unspecified
80180	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80181	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with no loss of consciousness
80182	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80183	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80184	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80185	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80186	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80189	Open fracture of base of skull with other and unspecified intracranial hemorrhage, with concussion, unspecified
80190	Open fracture of base of skull with intracranial injury of other and unspecified nature, with state of consciousness unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80191	Open fracture of base of skull with intracranial injury of other and unspecified nature, with no loss of consciousness
80192	Open fracture of base of skull with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80193	Open fracture of base of skull with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80194	Open fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80195	Open fracture of base of skull with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80196	Open fracture of base of skull with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80199	Open fracture of base of skull with intracranial injury of other and unspecified nature, with concussion, unspecified
8020	Closed fracture of nasal bones
8021	Open fracture of nasal bones
80220	Closed fracture of unspecified site of mandible
80221	Closed fracture of condylar process of mandible
80222	Closed fracture of subcondylar process of mandible
80223	Closed fracture of coronoid process of mandible
80224	Closed fracture of unspecified part of ramus of mandible
80225	Closed fracture of angle of jaw
80226	Closed fracture of symphysis of body of mandible
80227	Closed fracture of alveolar border of body of mandible
80228	Closed fracture of other and unspecified part of body of mandible
80229	Closed fracture of multiple sites of mandible

Diagnosis Code	Description
80230	Open fracture of unspecified site of mandible
80231	Open fracture of condylar process of mandible
80232	Open fracture of subcondylar process of mandible
80233	Open fracture of coronoid process of mandible
80234	Open fracture of unspecified part of ramus of mandible
80235	Open fracture of angle of jaw
80236	Open fracture of symphysis of body of mandible
80237	Open fracture of alveolar border of body of mandible
80238	Open fracture of body of mandible, other and unspecified
80239	Open fracture of multiple sites of mandible
8024	Closed fracture of malar and maxillary bones
8025	Open fracture of malar and maxillary bones
8026	Closed fracture of orbital floor (blow-out)
8027	Open fracture of orbital floor (blow-out)
8028	Closed fracture of other facial bones
8029	Open fracture of other facial bones
80300	Other closed skull fracture without mention of intracranial injury, with state of consciousness unspecified
80301	Other closed skull fracture without mention of intracranial injury, with no loss of consciousness
80302	Other closed skull fracture without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80303	Other closed skull fracture without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80304	Other closed skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80305	Other closed skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80306	Other closed skull fracture without mention of intracranial injury, with loss of consciousness of unspecified duration
80309	Other closed skull fracture without mention of intracranial injury, with concussion, unspecified
80310	Other closed skull fracture with cerebral laceration and contusion, with state of consciousness unspecified
80311	Other closed skull fracture with cerebral laceration and contusion, with no loss of consciousness
80312	Other closed skull fracture with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80313	Other closed skull fracture with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80314	Other closed skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80315	Other closed skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80316	Other closed skull fracture with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80319	Other closed skull fracture with cerebral laceration and contusion, with concussion, unspecified
80320	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with state of consciousness unspecified
80321	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with no loss of consciousness
80322	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with brief (less than one hour) loss of consciousness
80323	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with moderate (1-24 hours) loss of consciousness
80324	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80325	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80326	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with loss of consciousness of unspecified duration
80329	Other closed skull fracture with subarachnoid, subdural, and extra-dural hemorrhage, with concussion, unspecified
80330	Other closed skull fracture with other and unspecified intracranial hemorrhage, with state of unconsciousness unspecified
80331	Other closed skull fracture with other and unspecified intracranial hemorrhage, with no loss of consciousness
80332	Other closed skull fracture with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80333	Other closed skull fracture with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80334	Other closed skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80335	Other closed skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80336	Other closed skull fracture with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80339	Other closed skull fracture with other and unspecified intracranial hemorrhage, with concussion, unspecified
80340	Other closed skull fracture with intracranial injury of other and unspecified nature, with state of consciousness unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80341	Other closed skull fracture with intracranial injury of other and unspecified nature, with no loss of consciousness
80342	Other closed skull fracture with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80343	Other closed skull fracture with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80344	Other closed skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80345	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80346	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80349	Other site of closed skull fracture with intracranial injury of other and unspecified nature, with concussion, unspecified
80350	Other open skull fracture without mention of injury, with state of consciousness unspecified
80351	Other open skull fracture without mention of intracranial injury, with no loss of consciousness
80352	Other open skull fracture without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80353	Other open skull fracture without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80354	Other open skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80355	Other open skull fracture without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80356	Other open skull fracture without mention of intracranial injury, with loss of consciousness of unspecified duration
80359	Other open skull fracture without mention of intracranial injury, with concussion, unspecified
80360	Other open skull fracture with cerebral laceration and contusion, with state of consciousness unspecified
80361	Other open skull fracture with cerebral laceration and contusion, with no loss of consciousness
80362	Other open skull fracture with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80363	Other open skull fracture with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80364	Other open skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80365	Other open skull fracture with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80366	Other open skull fracture with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80369	Other open skull fracture with cerebral laceration and contusion, with concussion, unspecified
80370	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80371	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80372	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80373	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80374	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80375	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80376	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80379	Other open skull fracture with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80380	Other open skull fracture with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80381	Other open skull fracture with other and unspecified intracranial hemorrhage, with no loss of consciousness
80382	Other open skull fracture with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80383	Other open skull fracture with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80384	Other open skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80385	Other open skull fracture with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80386	Other open skull fracture with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80389	Other open skull fracture with other and unspecified intracranial hemorrhage, with concussion, unspecified
80390	Other open skull fracture with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80391	Other open skull fracture with intracranial injury of other and unspecified nature, with no loss of consciousness
80392	Other open skull fracture with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80393	Other open skull fracture with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80394	Other open skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80395	Other open skull fracture with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80396	Other open skull fracture with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80399	Other open skull fracture with intracranial injury of other and unspecified nature, with concussion, unspecified
80400	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with state of consciousness unspecified
80401	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with no loss of consciousness
80402	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80403	Closed fractures involving skull or face with other bones, without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80404	Closed fractures involving skull or face with other bones, without mention or intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80405	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80406	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with loss of consciousness of unspecified duration
80409	Closed fractures involving skull of face with other bones, without mention of intracranial injury, with concussion, unspecified
80410	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with state of consciousness unspecified
80411	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with no loss of consciousness
80412	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80413	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness
80414	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80415	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80416	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80419	Closed fractures involving skull or face with other bones, with cerebral laceration and contusion, with concussion, unspecified
80420	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80421	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness

Diagnosis Code	Description
80422	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80423	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80424	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80425	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80426	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration
80429	Closed fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80430	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80431	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with no loss of consciousness
80432	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80433	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrrhage, with moderate (1-24 hours) loss of consciousness
80434	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80435	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80436	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80439	Closed fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with concussion, unspecified
80440	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80441	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with no loss of consciousness
80442	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80443	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80444	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80445	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80446	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80449	Closed fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with concussion, unspecified

Diagnosis Code	Description
80450	Open fractures involving skull or face with other bones, without mention of intracranial injury, with state of consciousness unspecified
80451	Open fractures involving skull or face with other bones, without mention of intracranial injury, with no loss of consciousness
80452	Open fractures involving skull or face with other bones, without mention of intracranial injury, with brief (less than one hour) loss of consciousness
80453	Open fractures involving skull or face with other bones, without mention of intracranial injury, with moderate (1-24 hours) loss of consciousness
80454	Open fractures involving skull or face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80455	Open fractures involving skull or face with other bones, without mention of intracranial injury, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80456	Open fractures involving skull or face with other bones, without mention of intracranial injury, with loss of consciousness of unspecified duration
80459	Open fractures involving skull or face with other bones, without mention of intracranial injury, with concussion, unspecified
80460	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with state of consciousness unspecified
80461	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with no loss of consciousness
80462	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with brief (less than one hour) loss of consciousness
80463	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with moderate (1-24 hours) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80464	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80465	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80466	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with loss of consciousness of unspecified duration
80469	Open fractures involving skull or face with other bones, with cerebral laceration and contusion, with concussion, unspecified
80470	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with state of consciousness unspecified
80471	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with no loss of consciousness
80472	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with brief (less than one hour) loss of consciousness
80473	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with moderate (1-24 hours) loss of consciousness
80474	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80475	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
80476	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with loss of consciousness of unspecified duration

Diagnosis Code	Description
80479	Open fractures involving skull or face with other bones with subarachnoid, subdural, and extradural hemorrhage, with concussion, unspecified
80480	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with state of consciousness unspecified
80481	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with no loss of consciousness
80482	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with brief (less than one hour) loss of consciousness
80483	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with moderate (1-24 hours) loss of consciousness
80484	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80485	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with prolonged (more than 24 hours) loss consciousness, without return to pre-existing conscious level
80486	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with loss of consciousness of unspecified duration
80489	Open fractures involving skull or face with other bones, with other and unspecified intracranial hemorrhage, with concussion, unspecified
80490	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with state of consciousness unspecified
80491	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80492	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with brief (less than one hour) loss of consciousness
80493	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with moderate (1-24 hours) loss of consciousness
80494	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
80495	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with prolonged (more than 24 hours) loss of consciousness without return to pre-existing conscious level
80496	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with loss of consciousness of unspecified duration
80499	Open fractures involving skull or face with other bones, with intracranial injury of other and unspecified nature, with concussion, unspecified
80500	Closed fracture of cervical vertebra, unspecified level
80501	Closed fracture of first cervical vertebra
80502	Closed fracture of second cervical vertebra
80503	Closed fracture of third cervical vertebra
80504	Closed fracture of fourth cervical vertebra
80505	Closed fracture of fifth cervical vertebra
80506	Closed fracture of sixth cervical vertebra
80507	Closed fracture of seventh cervical vertebra
80508	Closed fracture of multiple cervical vertebrae
80510	Open fracture of cervical vertebra, unspecified level
80511	Open fracture of first cervical vertebra
80512	Open fracture of second cervical vertebra
80513	Open fracture of third cervical vertebra
80514	Open fracture of fourth cervical vertebra
80515	Open fracture of fifth cervical vertebra
80516	Open fracture of sixth cervical vertebra
80517	Open fracture of seventh cervical vertebra
80518	Open fracture of multiple cervical vertebrae
8052	Closed fracture of dorsal (thoracic) vertebra without mention of spinal cord injury
8053	Open fracture of dorsal (thoracic) vertebra without mention of spinal cord injury
8054	Closed fracture of lumbar vertebra without mention of spinal cord injury
8055	Open fracture of lumbar vertebra without mention of spinal cord injury
8056	Closed fracture of sacrum and coccyx without mention of spinal cord injury
8057	Open fracture of sacrum and coccyx without mention of spinal cord injury
8058	Closed fracture of unspecified part of vertebral column without mention of spinal cord injury
8059	Open fracture of unspecified part of vertebral column without mention of spinal cord injury
80600	Closed fracture of C1-C4 level with unspecified spinal cord injury
80601	Closed fracture of C1-C4 level with complete lesion of cord
80602	Closed fracture of C1-C4 level with anterior cord syndrome
80603	Closed fracture of C1-C4 level with central cord syndrome
80604	Closed fracture of C1-C4 level with other specified spinal cord injury
80605	Closed fracture of C5-C7 level with unspecified spinal cord injury
80606	Closed fracture of C5-C7 level with complete lesion of cord
80607	Closed fracture of C5-C7 level with anterior cord syndrome
80608	Closed fracture of C5-C7 level with central cord syndrome
80609	Closed fracture of C5-C7 level with other specified spinal cord injury
80610	Open fracture of C1-C4 level with unspecified spinal cord injury

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80611	Open fracture of C1-C4 level with complete lesion of cord
80612	Open fracture of C1-C4 level with anterior cord syndrome
80613	Open fracture of C1-C4 level with central cord syndrome
80614	Open fracture of C1-C4 level with other specified spinal cord injury
80615	Open fracture of C5-C7 level with unspecified spinal cord injury
80616	Open fracture of C5-C7 level with complete lesion of cord
80617	Open fracture of C5-C7 level with anterior cord syndrome
80618	Open fracture of C5-C7 level with central cord syndrome
80619	Open fracture of C5-C7 level with other specified spinal cord injury
80620	Closed fracture of T1-T6 level with unspecified spinal cord injury
80621	Closed fracture of T1-T6 level with complete lesion of cord
80622	Closed fracture of T1-T6 level with anterior cord syndrome
80623	Closed fracture of T1-T6 level with central cord syndrome
80624	Closed fracture of T1-T6 level with other specified spinal cord injury
80625	Closed fracture of T7-T12 level with unspecified spinal cord injury
80626	Closed fracture of T7-T12 level with complete lesion of cord
80627	Closed fracture of T7-T12 level with anterior cord syndrome
80628	Closed fracture of T7-T12 level with central cord syndrome
80629	Closed fracture of T7-T12 level with other specified spinal cord injury
80630	Open fracture of T1-T6 level with unspecified spinal cord injury
80631	Open fracture of T1-T6 level with complete lesion of cord
80632	Open fracture of T1-T6 level with anterior cord syndrome
80633	Open fracture of T1-T6 level with central cord syndrome
80634	Open fracture of T1-T6 level with other specified spinal cord injury
80635	Open fracture of T7-T12 level with unspecified spinal cord injury

Diagnosis Code	Description
80636	Open fracture of T7-T12 level with complete lesion of cord
80637	Open fracture of T7-T12 level with anterior cord syndrome
80638	Open fracture of T7-T12 level with central cord syndrome
80639	Open fracture of T7-T12 level with other specified spinal cord injury
8064	Closed fracture of lumbar spine with spinal cord injury
8065	Open fracture of lumbar spine with spinal cord injury
80660	Closed fracture of sacrum and coccyx with unspecified spinal cord injury
80661	Closed fracture of sacrum and coccyx with complete cauda equina lesion
80662	Closed fracture of sacrum and coccyx with other cauda equina injury
80669	Closed fracture of sacrum and coccyx with other spinal cord injury
80670	Open fracture of sacrum and coccyx with unspecified spinal cord injury
80671	Open fracture of sacrum and coccyx with complete cauda equina lesion
80672	Open fracture of sacrum and coccyx with other cauda equina injury
80679	Open fracture of sacrum and coccyx with other spinal cord injury
8068	Closed fracture of unspecified vertebra with spinal cord injury
8069	Open fracture of unspecified vertebra with spinal cord injury
80700	Closed fracture of rib(s), unspecified
80701	Closed fracture of one rib
80702	Closed fracture of two ribs
80703	Closed fracture of three ribs
80704	Closed fracture of four ribs
80705	Closed fracture of five ribs
80706	Closed fracture of six ribs
80707	Closed fracture of seven ribs
80708	Closed fracture of eight or more ribs
80709	Closed fracture of multiple ribs, unspecified
80710	Open fracture of rib(s), unspecified
80711	Open fracture of one rib
80712	Open fracture of two ribs
80713	Open fracture of three ribs
80714	Open fracture of four ribs
80715	Open fracture of five ribs

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80716	Open fracture of six ribs
80717	Open fracture of seven ribs
80718	Open fracture of eight or more ribs
80719	Open fracture of multiple ribs, unspecified
8072	Closed fracture of sternum
8073	Open fracture of sternum
8074	Flail chest
8075	Closed fracture of larynx and trachea
8076	Open fracture of larynx and trachea
8080	Closed fracture of acetabulum
8081	Open fracture of acetabulum
8082	Closed fracture of pubis
8083	Open fracture of pubis
80841	Closed fracture of ilium
80842	Closed fracture of ischium
80843	Multiple closed pelvic fractures with disruption of pelvic circle
80849	Closed fracture of other specified part of pelvis
80851	Open fracture of ilium
80852	Open fracture of ischium
80853	Multiple open pelvic fractures with disruption of pelvic circle
80859	Open fracture of other specified part of pelvis
8088	Unspecified closed fracture of pelvis
8089	Unspecified open fracture of pelvis
8090	Fracture of bones of trunk, closed
8091	Fracture of bones of trunk, open
81000	Closed fracture of clavicle, unspecified part
81001	Closed fracture of sternal end of clavicle
81002	Closed fracture of shaft of clavicle
81003	Closed fracture of acromial end of clavicle
81010	Open fracture of clavicle, unspecified part
81011	Open fracture of sternal end of clavicle
81012	Open fracture of shaft of clavicle
81013	Open fracture of acromial end of clavicle
81100	Closed fracture of scapula, unspecified part
81101	Closed fracture of acromial process of scapula

Diagnosis Code	Description
81102	Closed fracture of coracoid process of scapula
81103	Closed fracture of glenoid cavity and neck of scapula
81109	Closed fracture of other part of scapula
81110	Open fracture of scapula, unspecified part
81111	Open fracture of acromial process of scapula
81112	Open fracture of coracoid process
81113	Open fracture of glenoid cavity and neck of scapula
81119	Open fracture of other part of scapula
81200	Fracture of unspecified part of upper end of humerus, closed
81201	Fracture of surgical neck of humerus, closed
81202	Fracture of anatomical neck of humerus, closed
81203	Fracture of greater tuberosity of humerus, closed
81209	Other closed fractures of upper end of humerus
81210	Fracture of unspecified part of upper end of humerus, open
81211	Fracture of surgical neck of humerus, open
81212	Fracture of anatomical neck of humerus, open
81213	Fracture of greater tuberosity of humerus, open
81219	Other open fracture of upper end of humerus
81220	Fracture of unspecified part of humerus, closed
81221	Fracture of shaft of humerus, closed
81230	Fracture of unspecified part of humerus, open
81231	Fracture of shaft of humerus, open
81240	Fracture of unspecified part of lower end of humerus, closed
81241	Supracondylar fracture of humerus, closed
81242	Fracture of lateral condyle of humerus, closed
81243	Fracture of medial condyle of humerus, closed
81244	Fracture of unspecified condyle(s) of humerus, closed

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
81249	Other closed fractures of lower end of humerus
81250	Fracture of unspecified part of lower end of humerus, open
81251	Supracondylar fracture of humerus, open
81252	Fracture of lateral condyle of humerus, open
81253	Fracture of medial condyle of humerus, open
81254	Fracture of unspecified condyle(s) of humerus, open
81259	Other fracture of lower end of humerus, open
81300	Closed fracture of upper end of forearm, unspecified
81301	Fracture of olecranon process of ulna, closed
81302	Fracture of coronoid process of ulna, closed
81303	Monteggia's fracture, closed
81304	Other and unspecified closed fractures of proximal end of ulna (alone)
81305	Fracture of head of radius, closed
81306	Fracture of neck of radius, closed
81307	Other and unspecified closed fractures of proximal end of radius (alone)
81308	Fracture of radius with ulna, upper end (any part), closed
81310	Open fracture of upper end of forearm, unspecified
81311	Fracture of olecranon process of ulna, open
81312	Fracture of coronoid process of ulna, open
81313	Monteggia's fracture, open
81314	Other and unspecified open fractures of proximal end of ulna (alone)
81315	Fracture of head of radius, open
81316	Fracture of neck of radius, open
81317	Other and unspecified open fractures of proximal end of radius (alone)
81318	Fracture of radius with ulna, upper end (any part), open
81320	Fracture of shaft of radius or ulna, unspecified, closed
81321	Fracture of shaft of radius (alone), closed
81322	Fracture of shaft of ulna (alone), closed
81323	Fracture of shaft of radius with ulna, closed
81330	Fracture of shaft of radius or ulna, unspecified, open
81331	Fracture of shaft of radius (alone), open
81332	Fracture of shaft of ulna (alone), open
81333	Fracture of shaft of radius with ulna, open
81340	Closed fracture of lower end of forearm, unspecified
81341	Colles' fracture, closed
81342	Other closed fractures of distal end of radius (alone)
81343	Fracture of distal end of ulna (alone), closed
81344	Fracture of lower end of radius with ulna, closed
81345	Torus fracture of radius
81350	Open fracture of lower end of forearm, unspecified
81351	Colles' fracture, open
81352	Other open fractures of distal end of radius (alone)
81353	Fracture of distal end of ulna (alone), open
81354	Fracture of lower end of radius with ulna, open
81380	Closed fracture of unspecified part of forearm
81381	Fracture of unspecified part of radius (alone), closed
81382	Fracture of unspecified part of ulna (alone), closed
81383	Fracture of unspecified part of radius with ulna, closed
81390	Fracture of unspecified part of forearm, open
81391	Fracture of unspecified part of radius (alone), open
81392	Fracture of unspecified part of ulna (alone), open
81393	Fracture of unspecified part of radius with ulna, open
81400	Closed fracture of carpal bone, unspecified
81401	Closed fracture of navicular (scaphoid) bone of wrist
81402	Closed fracture of lunate (semilunar) bone of wrist

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
81403	Closed fracture of triquetral (cuneiform) bone of wrist
81404	Closed fracture of pisiform bone of wrist
81405	Closed fracture of trapezium bone (larger multangular) of wrist
81406	Closed fracture of trapezoid bone (smaller multangular) of wrist
81407	Closed fracture of capitate bone (os magnum) of wrist
81408	Closed fracture of hamate (unciform) bone of wrist
81409	Closed fracture of other bone of wrist
81410	Open fracture of carpal bone, unspecified
81411	Open fracture of navicular (scaphoid) bone of wrist
81412	Open fracture of lunate (semilunar) bone of wrist
81413	Open fracture of triquetral (cuneiform) bone of wrist
81414	Open fracture of pisiform bone of wrist
81415	Open fracture of trapezium bone (larger multangular) of wrist
81416	Open fracture of trapezoid bone (smaller multangular) of wrist
81417	Open fracture of capitate bone (os magnum) of wrist
81418	Open fracture of hamate (unciform) bone of wrist
81419	Open fracture of other bone of wrist
81500	Closed fracture of metacarpal bone(s), site unspecified
81501	Closed fracture of base of thumb (first) metacarpal
81502	Closed fracture of base of other metacarpal bone(s)
81503	Closed fracture of shaft of metacarpal bone(s)
81504	Closed fracture of neck of metacarpal bone(s)
81509	Closed fracture of multiple sites of metacarpus
81510	Open fracture of metacarpal bone(s), site unspecified
81511	Open fracture of base of thumb (first) metacarpal
81512	Open fracture of base of other metac-arpal bone(s)
81513	Open fracture of shaft of metacarpal bone(s)

Diagnosis Code	Description
81514	Open fracture of neck of metacarpal bone(s)
81519	Open fracture of multiple sites of metacarpus
81600	Closed fracture of phalanx or phalanges of hand, unspecified
81601	Closed fracture of middle or proximal phalanx or phalanges of hand
81602	Closed fracture of distal phalanx or phalanges of hand
81603	Closed fracture of multiple sites of phalanx or phalanges of hand
81610	Open fracture of phalanx or phalanges of hand, unspecified
81611	Open fracture of middle or proximal phalanx or phalanges of hand
81612	Open fracture of distal phalanx or phalanges of hand
81613	Open fracture of multiple sites of phalanx or phalanges of hand
8170	Multiple closed fractures of hand bones
8171	Multiple open fractures of hand bones
8180	Ill-defined closed fractures of upper limb
8181	Ill-defined open fractures of upper limb
8190	Multiple closed fractures involving both upper limbs, and upper limb with rib(s) and sternum
8191	Multiple open fractures involving both upper limbs, and upper limb with rib(s) and sternum
82000	Fracture of unspecified intracapsular section of neck of femur, closed
82001	Fracture of epiphysis (separation) (upper) of neck of femur, closed
82002	Fracture of midcervical section of femur, closed
82003	Fracture of base of neck of femur, closed
82009	Other transcervical fracture of femur, closed
82010	Fracture of unspecified intracapsular section of neck of femur, open
82011	Fracture of epiphysis (separation) (upper) of neck of femur, open
82012	Fracture of midcervical section of femur, open
82013	Fracture of base of neck of femur, open

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
82019	Other transcervical fracture of femur, open
82020	Other transcervical fracture of femur, open
82021	Fracture of intertrochanteric section of femur, closed
82022	Fracture of subtrochanteric section of femur, closed
82030	Fracture of unspecified trochanteric section of femur, open
82031	Fracture of intertrochanteric section of femur, open
82032	Fracture of subtrochanteric section of femur, open
8208	Fracture of unspecified part of neck of femur, closed
8209	Fracture of unspecified part of neck of femur, open
82100	Fracture of unspecified part of femur, closed
82101	Fracture of shaft of femur, closed
82110	Fracture of unspecified part of femur, open
82111	Fracture of shaft of femur, open
82120	Fracture of lower end of femur, unspecified part, closed
82121	Fracture of femoral condyle, closed
82122	Fracture of lower epiphysis of femur, closed
82123	Supracondylar fracture of femur, closed
82129	Other fracture of lower end of femur, closed
82130	Fracture of lower end of femur, unspecified part, open
82131	Fracture of femoral condyle, open
82132	Fracture of lower epiphysis of femur, open
82133	Supracondylar fracture of femur, open
82139	Other fracture of lower end of femur, open
8220	Closed fracture of patella
8221	Open fracture of patella
8230	Fracture of upper end of tibia and fibula, closed
82300	Closed fracture of upper end of tibia
82301	Closed fracture of upper end of fibula
82302	Closed fracture of upper end of fibula with tibia
82310	Open fracture of upper end of tibia
82311	Open fracture of upper end of fibula
82312	Open fracture of upper end of fibula with tibia
82320	Closed fracture of shaft of tibia
82321	Closed fracture of shaft of fibula
82322	Closed fracture of shaft of fibula with tibia
82330	Open fracture of shaft of tibia
82331	Open fracture of shaft of fibula
82332	Open fracture of shaft of fibula with tibia
82340	Torus fracture, tibia alone
82341	Torus fracture, fibula alone
82342	Torus fracture, fibula with tibia
82380	Closed fracture of unspecified part of tibia
82381	Closed fracture of unspecified part of fibula
82382	Closed fracture of unspecified part of fibula with tibia
82390	Open fracture of unspecified part of tibia
82391	Open fracture of unspecified part of fibula
82392	Open fracture of unspecified part of fibula with tibia
8240	Fracture of medial malleolus, closed
8241	Fracture of medial malleolus, open
8242	Fracture of lateral malleolus, closed
8243	Fracture of lateral malleolus, open
8244	Bimalleolar fracture, closed
8245	Bimalleolar fracture, open
8246	Trimalleolar fracture, closed
8247	Trimalleolar fracture, open
8248	Unspecified fracture of ankle, closed
8249	Unspecified fracture of ankle, open
8250	Fracture of calcaneus, closed
8251	Fracture of calcaneus, open
82520	Fracture of unspecified bone(s) of foot (except toes), closed
82521	Fracture of astragalus, closed
82522	Fracture of navicular (scaphoid) bone of foot, closed
82523	Fracture of cuboid bone, closed
82524	Fracture of cuneiform bone of foot, closed

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
82525	Fracture of metatarsal bone(s), closed
82529	Other fracture of tarsal and metatarsal bones, closed
82530	Fracture of unspecified bone(s) of foot (except toes), open
82531	Fracture of astragalus, open
82532	Fracture of navicular (scaphoid) bone of foot, open
82533	Fracture of cuboid bone, open
82534	Fracture of cuneiform bone of foot, open
82535	Fracture of metatarsal bone(s), open
82539	Other fractures of tarsal and metatarsal bones, open
8260	Closed fracture of one or more phalanges of foot
8261	Open fracture of one or more phalanges of foot
8270	Other, multiple and ill-defined fractures of lower limb, closed
8271	Other, multiple and ill-defined fractures of lower limb, open
8280	Multiple fractures involving both lower limbs, lower with upper limb, and lower limb(s) with rib(s) and sternum, closed
8281	Multiple fractures involving both lower limbs, lower with upper limb, and lower limb(s) with rib(s) and sternum, open
8290	Fracture of unspecified bone, closed
8291	Fracture of unspecified bone, open
8300	Closed dislocation of jaw
8301	Open dislocation of jaw
83100	Closed dislocation of shoulder, unspecified site
83101	Closed anterior dislocation of humerus
83102	Closed posterior dislocation of humerus
83103	Closed inferior dislocation of humerus
83104	Closed dislocation of acromioclavicular (joint)
83109	Closed dislocation of other site of shoulder
83110	Open dislocation of shoulder, unspecified
83111	Open anterior dislocation of humerus
83112	Open posterior dislocation of humerus
83113	Open inferior dislocation of humerus
83114	Open dislocation of acromioclavicular (joint)

Diagnosis Code	Description
83119	Open dislocation of other site of shoulder
83200	Closed dislocation of elbow, unspecified site
83201	Closed anterior dislocation of elbow
83202	Closed posterior dislocation of elbow
83203	Closed medial dislocation of elbow
83204	Closed lateral dislocation of elbow
83209	Closed dislocation of other site of elbow
83210	Open dislocation of elbow, unspecified site
83211	Open anterior dislocation of elbow
83212	Open posterior dislocation of elbow
83213	Open medial dislocation of elbow
83214	Open lateral dislocation of elbow
83219	Open dislocation of other site of elbow
83300	Closed dislocation of wrist, unspecified part
83301	Closed dislocation of radioulnar (joint), distal
83302	Closed dislocation of radiocarpal (joint)
83303	Closed dislocation of midcarpal (joint)
83304	Closed dislocation of carpometacarpal (joint)
83305	Closed dislocation of metacarpal (bone), proximal end
83309	Closed dislocation of other part of wrist
83310	Open dislocation of wrist, unspecified part
83311	Open dislocation of radioulnar (joint), distal
83312	Open dislocation of radiocarpal (joint)
83313	Open dislocation of midcarpal (joint)
83314	Open dislocation of carpometacarpal (joint)
83315	Open dislocation of metacarpal (bone), proximal end
83319	Open dislocation of other part of wrist
83400	Closed dislocation of finger, unspecified part
83401	Closed dislocation of metacarpophalangeal (joint)
83402	Closed dislocation of interphalangeal (joint), hand
83410	Open dislocation of finger, unspecified part

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
83411	Open dislocation of metacarpophalangeal (joint)
83412	Open dislocation interphalangeal (joint), hand
83500	Closed dislocation of hip, unspecified site
83501	Closed posterior dislocation of hip
83502	Closed obturator dislocation of hip
83503	Other closed anterior dislocation of hip
83510	Open dislocation of hip, unspecified site
83511	Open posterior dislocation of hip
83512	Open obturator dislocation of hip
83513	Other open anterior dislocation of hip
8360	Tear of medial cartilage or meniscus of knee, current
8361	Tear of lateral cartilage or meniscus of knee, current
8362	Other tear of cartilage or meniscus of knee, current
8363	Dislocation of patella, closed
8364	Dislocation of patella, open
83650	Closed dislocation of knee, unspecified part
83651	Anterior dislocation of tibia, proximal end, closed
83652	Posterior dislocation of tibia, proximal end, closed
83653	Medial dislocation of tibia, proximal end, closed
83654	Lateral dislocation of tibia, proximal end, closed
83659	Other dislocation of knee, closed
83660	Dislocation of knee, unspecified part, open
83661	Anterior dislocation of tibia, proximal end, open
83662	Posterior dislocation of tibia, proximal end, open
83663	Medial dislocation of tibia, proximal end, open
83664	Lateral dislocation of tibia, proximal end, open
83669	Other dislocation of knee, open
8370	Closed dislocation of ankle
8371	Open dislocation of ankle
83800	Closed dislocation of foot, unspecified part
83801	Closed dislocation of tarsal (bone), joint unspecified
83802	Closed dislocation of midtarsal (joint)
83803	Closed dislocation of tarsometatarsal (joint)
83804	Closed dislocation of metatarsal (bone), joint unspecified
83805	Closed dislocation of metatarsophalangeal (joint)
83806	Closed dislocation of interphalangeal (joint), foot
83809	Closed dislocation of other part of foot
83810	Open dislocation of foot, unspecified part
83811	Open dislocation of tarsal (bone), joint unspecified
83812	Open dislocation of midtarsal (joint)
83813	Open dislocation of tarsometatarsal (joint)
83814	Open dislocation of metatarsal (bone), joint unspecified
83815	Open dislocation of metatarsophalangeal (joint)
83816	Open dislocation of interphalangeal (joint), foot
83819	Open dislocation of other part of foot
83900	Closed dislocation, cervical vertebra, unspecified
83901	Closed dislocation, first cervical vertebra
83902	Closed dislocation, second cervical vertebra
83903	Closed dislocation, third cervical vertebra
83904	Closed dislocation, fourth cervical vertebra
83905	Closed dislocation, fifth cervical vertebra
83906	Closed dislocation, sixth cervical vertebra
83907	Closed dislocation, seventh cervical vertebra
83908	Closed dislocation, multiple cervical vertebrae
83910	Open dislocation, cervical vertebra, unspecified
83911	Open dislocation, first cervical vertebra
83912	Open dislocation, second cervical vertebra

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
83913	Open dislocation, third cervical vertebra
83914	Open dislocation, fourth cervical vertebra
83915	Open dislocation, fifth cervical vertebra
83916	Open dislocation, sixth cervical vertebra
83917	Open dislocation, seventh cervical vertebra
83918	Open dislocation, multiple cervical vertebrae
83920	Closed dislocation, lumbar vertebra
83921	Closed dislocation, thoracic vertebra
83930	Open dislocation, lumbar vertebra
83931	Open dislocation, thoracic vertebra
83940	Closed dislocation, vertebra, unspecified site
83941	Closed dislocation, coccyx
83942	Closed dislocation, sacrum
83949	Closed dislocation, other vertebra
83950	Open dislocation, vertebra, unspecified site
83951	Open dislocation, coccyx
83952	Open dislocation, sacrum
83959	Open dislocation, other vertebra
83961	Closed dislocation, sternum
93969	Closed dislocation, other location
83971	Open dislocation, sternum
83979	Open dislocation, other location
8398	Closed dislocation, multiple and ill-defined sites
8399	Open dislocation, multiple and ill-defined sites
8400	Acromioclavicular (joint) (ligament) sprain
8401	Coracoclavicular (ligament) sprain
8402	Coracohumeral (ligament) sprain
8403	Infraspinatus (muscle) (tendon) sprain
8404	Rotator cuff (capsule) sprain
8405	Subscapularis (muscle) sprain
8406	Supraspinatus (muscle) (tendon) sprain
8407	Superior glenoid labrum lesion
8408	Sprain of other specified sites of shoulder and upper arm
8409	Sprain of unspecified site of shoulder and upper arm

Diagnosis Code	Description
8410	Radial collateral ligament sprain
8411	Ulnar collateral ligament sprain
8412	Radiohumeral (joint) sprain
8413	Ulnohumeral (joint) sprain
8418	Sprain of other specified sites of elbow and forearm
8419	Sprain of unspecified site of elbow and forearm
84200	Sprain of unspecified site of wrist
84201	Sprain of carpal (joint) of wrist
84202	Sprain of radiocarpal (joint) (ligament) of wrist
84209	Other wrist sprain
84210	Sprain of unspecified site of hand
84211	Sprain of carpometacarpal (joint) of hand
84212	Sprain of metacarpophalangeal (joint) of hand
84213	Sprain of interphalangeal (joint) of hand
84219	Other hand sprain
8430	Iliofemoral (ligament) sprain
8431	Ischiocapsular (ligament) sprain
8438	Sprain of other specified sites of hip and thigh
8439	Sprain of unspecified site of hip and thigh
8440	Sprain of lateral collateral ligament of knee
8441	Sprain of medial collateral ligament of knee
8442	Sprain of cruciate ligament of knee
8443	Sprain of tibiofibular (joint) (ligament) superior, of knee
8448	Sprain of other specified sites of knee and leg
8449	Sprain of unspecified site of knee and leg
84500	Unspecified site of ankle sprain
84501	Deltoid (ligament), ankle sprain
84502	Calcaneofibular (ligament) ankle sprain
84503	Tibiofibular (ligament) sprain, distal
84509	Other ankle sprain
84510	Unspecified site of foot sprain
84511	Tarsometatarsal (joint) (ligament) sprain
84512	Metatarsaophalangeal (joint) sprain

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
84513	Interphalangeal (joint), toe sprain
84519	Other foot sprain
8460	Lumbosacral (joint) (ligament) sprain
8461	Sacroiliac (ligament) sprain
8462	Sacrospinatus (ligament) sprain
8463	Sacrotuberous (ligament) sprain
8468	Other specified sites of sacroiliac region sprain
8469	Unspecified site of sacroiliac region sprain
8470	Neck sprain
8471	Thoracic sprain
8472	Lumbar sprain
8473	Sprain of sacrum
8474	Sprain of coccyx
8479	Sprain of unspecified site of back
8480	Sprain of septal cartilage of nose
8481	Jaw sprain
8482	Thyroid region sprain
8483	Sprain of ribs
84840	Sternum sprain, unspecified part
84841	Sternoclavicular (joint) (ligament) sprain
84842	Chondrosternal (joint) sprain
84849	Other sprain of sternum
8485	Pelvic sprain
8488	Other specified sites of sprains and strains
8489	Unspecified site of sprain and strain
8500	Concussion with no loss of consciousness
8501	Concussion with brief loss of consciousness
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion, with loss of consciousness from 31 to 59 minutes
8502	Concussion with moderate loss of consciousness
8503	Concussion with prolonged loss of consciousness and return to pre-existing conscious level
8504	Concussion with prolonged loss of consciousness, without return to pre-existing conscious level
8505	Concussion with loss of consciousness of unspecified duration
8509	Concussion, unspecified

Diagnosis Code	Description
85100	Cortex (cerebral) contusion without mention of open intracranial wound, state of consciousness unspecified
85101	Cortex (cerebral) contusion without mention of open intracranial wound, with no loss of consciousness
85102	Cortex (cerebral) contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85103	Cortex (cerebral) contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85104	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85105	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85106	Cortex (cerebral) contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85109	Cortex (cerebral) contusion without mention of open intracranial wound, with concussion, unspecified
85110	Cortex (cerebral) contusion with open intracranial wound, without mention of specific state of consciousness
85111	Cortex (cerebral) contusion with open intracranial wound, with no loss of consciousness
85112	Cortex (cerebral) contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85113	Cortex (cerebral) contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85114	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85115	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85116	Cortex (cerebral) contusion with open intracranial wound, with loss of consciousness of unspecified duration
85119	Cortex (cerebral) contusion with open intracranial wound, with concussion, unspecified
85120	Cortex (cerebral) laceration without mention of open intracranial wound, with state of consciousness unspecified
85121	Cortex (cerebral) laceration without mention of open intracranial wound, with no loss of consciousness
85122	Cortex (cerebral) laceration without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85123	Cortex (cerebral) laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85124	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85129	Cortex (cerebral) laceration without mention of open intracranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, with state of consciousness unspecified
85131	Cortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified
85140	Cerebellar or brain stem contusion without mention of open intracranial wound, with state of consciousness unspecified
85141	Cerebellar or brain stem contusion without mention of open intracranial wound, with no loss of consciousness
85142	Cerebellar or brain stem contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusion without mention of open intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusion with open intracranial wound, with state of consciousness unspecified
85151	Cerebellar or brain stem contusion with open intracranial wound, with no loss of consciousness
85152	Cerebellar or brain stem contusion with open intracranial wound, with brief (less than one hour) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85153	Cerebellar or brain stem contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85155	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusion with open intracranial wound, with loss of consciousness of unspecified duration
85159	Cerebellar or brain stem contusion with open intracranial wound, with concussion, unspecified
85160	Cerebellar or brain stem laceration without mention of open intracranial wound, with state of consciousness unspecified
85161	Cerebellar or brain stem laceration without mention of open intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85169	Cerebellar or brain stem laceration without mention of open intracranial wound, with concussion, unspecified

Diagnosis Code	Description
85170	Cerebellar or brain stem laceration with open intracranial wound, with state of consciousness unspecified
85171	Cerebellar or brain stem laceration with open intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with open intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with state of consciousness unspecified
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85186	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with state of consciousness unspecified
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with loss of consciousness of unspecified duration
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85201	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85202	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85206	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85209	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85210	Subarachnoid hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85211	Subarachnoid hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85213	Subarachnoid hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85214	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85215	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85216	Subarachnoid hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85221	Subdural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85222	Subdural hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85223	Subdural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85226	Subdural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85229	Subdural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85231	Subdural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85232	Subdural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness

Diagnosis Code	Description
85233	Subdural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85236	Subdural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85239	Subdural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85241	Extradural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury, without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85243	Extradural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85244	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85246	Extradural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85249	Extradural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85250	Extradural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85251	Extradural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85152	Extradural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85253	Extradural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85255	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85256	Extradural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury, with open intracranial wound, with concussion, unspecified 853,Other and unspecified intracranial hemorrhage following injury
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury. without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with state of consciousness unspecified
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85409	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with concussion, unspecified
85410	Intracranial injury of other and unspecified nature, with open intracranial wound, with state of consciousness unspecified
85411	Intracranial injury of other and unspecified nature, with open intracranial wound, with no loss of consciousness
85412	Intracranial injury of other and unspecified nature, with open intracranial wound, with brief (less than one hour) loss of consciousness
85413	Intracranial injury of other and unspecified nature, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85414	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85415	Intracranial injury of other and unspecified nature, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85416	Intracranial injury of other and unspecified nature, with open intracranial wound, with loss of consciousness of unspecified duration
85419	Intracranial injury of other and unspecified nature, with open intracranial wound, with concussion, unspecified
8600	Traumatic pneumothorax without mention of open wound into thorax
8601	Traumatic pneumothorax with open wound into thorax
8602	Traumatic hemothorax without mention of open wound into thorax
8603	Traumatic hemothorax with open wound into thorax
8604	Traumatic pneumohemothorax without mention of open wound into thorax
8605	Traumatic pneumohemothorax with open wound into thorax
86100	Unspecified injury of heart without mention of open wound into thorax
86101	Contusion of heart without mention of open wound into thorax
86102	Laceration of heart without penetration of heart chambers or open wound into thorax
86103	Laceration of heart with penetration of heart chambers, without mention of open wound into thorax
86110	Unspecified injury of heart with open wound into thorax
86111	Contusion of heart with open wound into thorax
86112	Laceration of heart without penetration of heart chambers, with open wound into thorax
86113	Laceration of heart with penetration of heart chambers and open wound into thorax
86120	Unspecified injury of lung without open wound into thorax
86121	Contusion of lung without open wound into thorax

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
86122	Laceration of lung without open wound into thorax
86130	Unspecified injury of lung with open wound into thorax
86131	Contusion of lung with open wound into thorax
86132	Laceration of lung with open wound into thorax
8620	Injury to diaphragm without mention of open wound into cavity
8621	Injury to diaphragm with open wound into cavity
8622	Injury to other specified intrathoracic organs without mention of open wound into cavity
86221	Injury to bronchus without open wound into cavity
86222	Injury to esophagus without mention of open wound into cavity
86229	Injury to other specified intrathoracic organs without mention of open wound into cavity
86231	Injury to bronchus with open wound into cavity
86232	Injury to esophagus with open wound into cavity
86239	Injury to other specified intrathoracic organs with open wound into cavity
8628	Injury to multiple and unspecified intrathoracic organs without mention of open wound into cavity
8629	Injury to multiple and unspecified intrathoracic organs with open wound into cavity
8630	Injury to stomach without mention of open wound into cavity
8631	Injury to stomach with open wound into cavity
86320	Injury to small intestine, unspecified site, without open wound into cavity
86321	Injury to duodenum without open wound into cavity
86329	Other injury to small intestine without open wound into cavity
86330	Injury to small intestine, unspecified site, with open wound into cavity
86331	Injury to duodenum with open wound into cavity
86339	Other injury to small intestine with open wound into cavity

Diagnosis Code	Description
86340	Injury to colon, unspecified site, without mention of open wound into cavity
86341	Injury to ascending (right) colon without open wound into cavity
86342	Injury to transverse colon without open wound into cavity
86343	Injury to descending (left) colon without open wound into cavity
86344	Injury to sigmoid colon without open wound into cavity
86345	Injury to rectum without open wound into cavity
86346	Injury to multiple sites in colon and rectum without open wound into cavity
86349	Other injury to colon and rectum, without open wound into cavity
86350	Injury to colon, unspecified site, with open wound into cavity
86351	Injury to ascending (right) colon with open wound into cavity
86352	Injury to transverse colon with open wound into cavity
86353	Injury to descending (left) colon with open wound into cavity
86354	Injury to sigmoid colon with open wound into cavity
86355	Injury to rectum with open wound into cavity
86356	Injury to multiple sites in colon and rectum with open wound into cavity
86359	Other injury to colon and rectum with open wound into cavity
86380	Injury to gastrointestinal tract, unspecified site, without open wound into cavity
86381	Injury to pancreas head without mention of open wound into cavity
86382	Injury to pancreas body without mention of open wound into cavity
86383	Injury to pancreas tail without mention of open wound into cavity
86384	Injury to pancreas, multiple and unspecified sites, without open wound into cavity
86385	Injury to appendix without open wound into cavity
86389	Injury to other and unspecified gastrointestinal sites without open wound into cavity
86390	Injury to gastrointestinal tract, unspecified site, with open wound into cavity

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
86391	Injury to pancreas head with open wound into cavity
86392	Injury to pancreas body with open wound into cavity
86393	Injury to pancreas tail with open wound into cavity
86394	Injury to pancreas, multiple and unspecified sites, with open wound into cavity
86395	Injury to appendix with open wound into cavity
86399	Injury to other and unspecified gastrointestinal sites with open wound into cavity
86400	Unspecified injury to liver without mention of open wound into cavity
86401	Hematoma and contusion of liver without mention of open wound into cavity
86402	Laceration of liver, minor, without mention of open wound into cavity
86403	Laceration of liver, moderate, without mention of open wound into cavity
86404	Laceration of liver, major, without mention of open wound into cavity
86405	Laceration of liver, unspecified, without mention of open wound into cavity
86409	Other injury to liver without mention of open wound into cavity
86410	Unspecified injury to liver with open wound into cavity
86411	Hematoma and contusion of liver with open wound into cavity
86412	Laceration of liver, minor, with open wound into cavity
86413	Laceration of liver, moderate, with open wound into cavity
86414	Laceration of liver, major, with open wound into cavity
86415	Laceration of liver, unspecified, with open wound into cavity
86419	Other injury to liver with open wound into cavity
86500	Unspecified injury to spleen without mention of open wound into cavity
86501	Hematoma of spleen, without rupture of capsule, without mention of open wound into cavity

Diagnosis Code	Description
86502	Capsular tears to spleen, without major disruption of parenchyma, without mention of open wound into cavity
86503	Laceration of spleen extending into parenchyma without mention of open wound into cavity
86504	Massive parenchymal disruption of spleen without mention of open wound into cavity
86509	Other injury into spleen without mention of open wound into cavity
86510	Unspecified injury to spleen with open wound into cavity
86511	Hematoma of spleen, without rupture of capsule, with open wound into cavity
86512	Capsular tears to spleen, without major disruption of parenchyma, with open wound into cavity
86513	Laceration of spleen extending into parenchyma, with open wound into cavity
86514	Massive parenchyma disruption of spleen with open wound into cavity
86519	Other injury to spleen with open wound into cavity
86600	Unspecified injury to kidney without mention of open wound into cavity
86601	Hematoma of kidney, without rupture of capsule, without mention of open wound into cavity
86602	Laceration of kidney without mention of open wound into cavity
86603	Complete disruption of kidney parenchyma, without mention of open wound into cavity
86610	Unspecified injury to kidney with open wound into cavity
86611	Hematoma of kidney, without rupture of capsule, with open wound into cavity
86612	Laceration of kidney with open wound into cavity
86613	Complete disruption of kidney parenchyma, with open wound into cavity
8670	Injury to bladder and urethra without mention of open wound into cavity
8671	Injury to bladder and urethra with open wound into cavity
8672	Injury to ureter without mention of open wound into cavity

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8673	Injury to ureter with open wound into cavity
8674	Injury to uterus without mention of open wound into cavity
8675	Injury to uterus with open wound into cavity
8676	Injury to other specified pelvic organs without mention of open wound into cavity
8677	Injury to other specified pelvic organs with open wound into cavity
8678	Injury to unspecified pelvic organ without mention of open wound into cavity
8679	Injury to unspecified pelvic organ with open wound into cavity
86800	Injury to unspecified intra-abdominal organ without mention of open wound into cavity
86801	Injury to adrenal gland without mention of open wound into cavity
86802	Injury to bile duct and gallbladder without mention of open wound into cavity
86803	Injury to peritoneum without mention of open wound into cavity
86804	Injury to retroperitoneum without mention of open wound into cavity
86809	Injury to other and multiple intra-abdominal organs without mention of open wound into cavity
86810	Injury to unspecified intra-abdominal organ, with open wound into cavity
86811	Injury to adrenal gland, with open wound into cavity
86812	Injury to bile duct and gallbladder, with open wound into cavity
86813	Injury to peritoneum with open wound into cavity
86814	Injury to retroperitoneum with open wound into cavity
86819	Injury to other and multiple intra-abdominal organs, with open wound into cavity
8690	Internal injury to unspecified or ill-defined organs without mention of open wound into cavity
8691	Internal injury to unspecified or ill-defined organs with open wound into cavity
8700	Laceration of skin of eyelid and periocular area

Diagnosis Code	Description
8701	Laceration of eyelid, full-thickness, not involving lacrimal passages
8702	Laceration of eyelid involving lacrimal passages
8703	Penetrating wound of orbit, without mention of foreign body
8704	Penetrating wound of orbit with foreign body
8708	Other specified open wounds of ocular adnexa
8709	Unspecified open wound of ocular adnexa
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
8712	Rupture of eye with partial loss of intraocular tissue
8713	Avulsion of eye
8714	Unspecified laceration of eye
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body
8717	Unspecified ocular penetration
8719	Unspecified open wound of eyeball
87200	Open wound of external ear, unspecified site, uncomplicated
87201	Open wound of auricle, uncomplicated
87202	Open wound of auditory canal, uncomplicated
87210	Open wound of external ear, unspecified site, complicated
87211	Open wound of auricle, complicated
87212	Open wound of auditory canal, complicated
87261	Open wound of ear drum, uncomplicated
87262	Open wound of ossicles, uncomplicated
87263	Open wound of eustachian tube, uncomplicated
87264	Open wound of cochlea, uncomplicated
87269	Open wound of other and multiple sites, uncomplicated
87271	Open wound of ear drum, complicated
87272	Open wound of ossicles, complicated
87273	Open wound of eustachian tube, complicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
87274	Open wound of cochlea, complicated
87279	Open wound of other and multiple sites, complicated
8728	Open wound of ear, part unspecified, without mention of complication
8729	Open wound of ear, part unspecified, complicated
8730	Open wound of scalp, without mention of complication
8731	Open wound of scalp, complicated
87320	Open wound of nose, unspecified site, uncomplicated
87321	Open wound of nasal septum, uncomplicated
87322	Open wound of nasal cavity, uncomplicated
87323	Open wound of nasal sinus, uncomplicated
87329	Open wound of multiple sites, uncomplicated
87330	Open wound of nose, unspecified site, complicated
87331	Open wound of nasal septum, complicated
87332	Open wound of nasal cavity, complicated
87333	Open wound of nasal sinus, complicated
87339	Open wound of multiple sites, complicated
87340	Open wound of face, unspecified site, uncomplicated
87341	Open wound of cheek, uncomplicated
87342	Open wound of forehead, uncomplicated
87343	Open wound of lip, uncomplicated
87344	Open wound of jaw, uncomplicated
87349	Open wound of other and multiple sites, uncomplicated
87350	Open wound of face, unspecified site, complicated
87351	Open wound of cheek, complicated
87352	Open wound of forehead, complicated
87353	Open wound of lip, complicated
87354	Open wound of jaw, complicated
87359	Open wound of other and multiple sites, complicated
87360	Open wound of mouth, unspecified site, uncomplicated

Diagnosis Code	Description
87361	Open wound of buccal mucosa, uncomplicated
87362	Open wound of gum (alveolar process), uncomplicated
87363	Tooth (broken) (fractured) (due to trauma), without mention of complication
87364	Open wound of tongue and floor of mouth, uncomplicated
87365	Open wound of palate, uncomplicated
87369	Open wound of other and multiple sites, uncomplicated
87370	Open wound of mouth, unspecified site, complicated
87371	Open wound of buccal mucosa, complicated
87372	Open wound of gum (alveolar process), complicated
87373	Tooth (broken) (fractured) (due to trauma), complicated
87374	Open wound of tongue and floor of mouth, complicated
87375	Open wound of palate, complicated
87379	Open wound of other and multiple sites, complicated
8738	Other and unspecified open wound of head without mention of complication
8739	Other and unspecified open wound of head, complicated
87400	Open wound of larynx with trachea, uncomplicated
87401	Open wound of larynx, uncomplicated
87402	Open wound of trachea, uncomplicated
87410	Open wound of larynx with trachea, complicated
87411	Open wound of larynx, complicated
87412	Open wound of trachea, complicated
8742	Open wound of thyroid gland, without mention of complication
8743	Open wound of thyroid gland, complicated
8744	Open wound of pharynx, without mention of complication
8745	Open wound of pharynx, complicated
8748	Open wound of other and unspecified parts of neck, without mention of complication
8749	Open wound of other and unspecified parts of neck, complicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8750	Open wound of chest (wall), without mention of complication
8751	Open wound of chest (wall), complicated
8760	Open wound of back, without mention of complication
8761	Open wound of back, complicated
8770	Open wound of buttock, without mention of complication
8771	Open wound of buttock, complicated
8780	Open wound of penis, without mention of complication
8781	Open wound of penis, complicated
8782	Open wound of scrotum and testes, without mention of complication
8783	Open wound of scrotum and testes, complicated
8784	Open wound of vulva, without mention of complication
8785	Open wound of vulva, complicated
8786	Open wound of vagina, without mention of complication
8787	Open wound of vagina, complicated
8788	Open wound of other and unspecified parts of genital organs, without mention of complication
8789	Open wound of other and unspecified parts of genital organs, complicated
8790	Open wound of breast, without mention of complication
8791	Open wound of breast, complicated
8792	Open wound of abdominal wall, anterior, without mention of complication
8793	Open wound of abdominal wall, anterior, complicated
8794	Open wound of abdominal wall, lateral, without mention of complication
8795	Open wound of abdominal wall, lateral, complicated
8796	Open wound of other and unspecified parts of trunk, without mention of complication
8797	Open wound of other and unspecified parts of trunk, complicated
8798	Open wound(s) (multiple) of unspecified site(s), without mention of complication
8799	Open wound(s) (multiple) of unspecified site(s), complicated

Diagnosis Code	Description
88000	Open wound of shoulder region, without mention of complication
88001	Open wound of scapular region, without mention of complication
88002	Open wound of axillary region, without mention of complication
88003	Open wound of upper arm, without mention of complication
88009	Open wound of multiple sites of shoulder and upper arm, without mention of complication
88010	Open wound of shoulder region, complicated
88011	Open wound of scapular region, complicated
88012	Open wound of axillary region, complicated
88013	Open wound of upper arm, complicated
88019	Open wound of multiple sites of shoulder and upper arm, complicated
88020	Open wound of shoulder region, with tendon involvement
88021	Open wound of scapular region, with tendon involvement
88022	Open wound of axillary region, with tendon involvement
88023	Open wound of upper arm, with tendon involvement
88029	Open wound of multiple sites of shoulder and upper arm, with tendon involvement
88100	Open wound of forearm, without mention of complication
88101	Open wound of elbow, without mention of complication
88102	Open wound of wrist, without mention of complication
88110	Open wound of forearm, complicated
88111	Open wound of elbow, complicated
88112	Open wound of wrist, complicated
88120	Open wound of forearm, with tendon involvement
88121	Open wound of elbow, with tendon involvement
88122	Open wound of wrist, with tendon involvement
8820	Open wound of hand except fingers alone, without mention of complication
8821	Open wound of hand except fingers alone, complicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8822	Open wound of hand except fingers alone, with tendon involvement
8830	Open wound of fingers, without mention of complication
8831	Open wound of fingers, complicated
8832	Open wound of fingers, with tendon involvement
8840	Multiple and unspecified open wound of upper limb, without mention of complication
8841	Multiple and unspecified open wound of upper limb, complicated
8842	Multiple and unspecified open wound of upper limb, with tendon involvement
8850	Traumatic amputation of thumb (complete) (partial), without mention of complication
8851	Traumatic amputation of thumb (complete) (partial), complicated
8860	Traumatic amputation of other finger(s) (complete) (partial), without mention of complication
8861	Traumatic amputation of other finger(s) (complete) (partial), complicated
8870	Traumatic amputation of arm and hand (complete) (partial), unilateral, below elbow, without mention of complication
8871	Traumatic amputation of arm and hand (complete) (partial), unilateral, below elbow, complicated
8872	Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow, without mention of complication
8873	Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow, complicated
8874	Traumatic amputation of arm and hand (complete) (partial), unilateral, level not specified, without mention of complication
8875	Traumatic amputation of arm and hand (complete) (partial), unilateral, level not specified, complicated
8876	Traumatic amputation of arm and hand (complete) (partial), bilateral (any level), without mention of complication
8877	Traumatic amputation of arm and hand (complete) (partial), bilateral (any level), complicated

Diagnosis Code	Description
8900	Open wound of hip and thigh, without mention of complication
8901	Open wound of hip and thigh, complicated
8902	Open wound of hip and thigh, with tendon involvement
8910	Open wound of knee, leg (except thigh), and ankle, without mention of complication
8911	Open wound of knee, leg (except thigh), and ankle, complicated
8912	Open wound of knee, leg (except thigh), and ankle, with tendon involvement
8920	Open wound of foot except toe(s) alone, without mention of complication
8921	Open wound of foot except toe(s) alone, complicated
8922	Open wound of foot except toe(s) alone, with tendon involvement
8930	Open wound of toe(s), without mention of complication
8931	Open wound of toe(s), complicated
8932	Open wound of toe(s), with tendon involvement
8940	Multiple and unspecified open wound of lower limb, without mention of complication
8941	Multiple and unspecified open wound of lower limb, complicated
8942	Multiple and unspecified open wound of lower limb, with tendon involvement
8950	Traumatic amputation of toe(s) (complete) (partial), without mention of complication
8951	Traumatic amputation of toe(s) (complete) (partial), complicated
8960	Traumatic amputation of foot (complete) (partial), unilateral, without mention of complication
8961	Traumatic amputation of foot (complete) (partial), unilateral, complicated
8962	Traumatic amputation of foot (complete) (partial), bilateral, without mention of complication
8963	Traumatic amputation of foot (complete) (partial), bilateral, complicated
8970	Traumatic amputation of leg(s) (complete) (partial), unilateral, below knee, without mention of complication

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8971	Traumatic amputation of leg(s) (complete) (partial), unilateral, below knee, complicated
8972	Traumatic amputation of leg(s) (complete) (partial), unilateral, at or above knee, without mention of complication
8973	Traumatic amputation of leg(s) (complete) (partial), unilateral, at or above knee, complicated
8974	Traumatic amputation of leg(s) (complete) (partial), unilateral, level not specified, without mention of complication
8975	Traumatic amputation of leg(s) (complete) (partial), unilateral, level not specified, complicated
8976	Traumatic amputation of leg(s) (complete) (partial), bilateral (any level), without mention of complication
8977	Traumatic amputation of leg(s) (complete) (partial), bilateral (any level), complicated
90000	Injury to carotid artery, unspecified
90001	Injury to common carotid artery
90002	Injury to external carotid artery
90003	Injury to internal carotid artery
9001	Injury to internal jugular vein
9008	Injury to other specified blood vessels of head and neck
90081	Injury to external jugular vein
90082	Injury to multiple blood vessels of head and neck
90089	Injury to other specified blood vessels of head and neck
9009	Injury to unspecified blood vessel of head and neck
9010	Injury to thoracic aorta
9011	Injury to innominate and subclavian arteries
9012	Injury to superior vena cava
9013	Injury to innominate and subclavian veins
90140	Injury to pulmonary vessel(s), unspecified
90141	Injury to pulmonary artery
90142	Injury to pulmonary vein
90181	Injury to intercostal artery or vein
90182	Injury to internal mammary artery or vein

Diagnosis Code	Description
90183	Injury to multiple blood vessels of thorax
90189	Injury to other specified blood vessels of thorax
9020	Injury to abdominal aorta
90210	Injury to inferior vena cava, unspecified
90211	Injury to hepatic veins
90219	Injury to other specified branches of inferior vena cava
90220	Injury to celiac and mesenteric arteries, unspecified
90221	Injury to gastric artery
90222	Injury to hepatic artery
90223	Injury to splenic artery
90224	Injury to other specified branches of celiac axis
90225	Injury to superior mesenteric artery (trunk)
90226	Injury to primary branches of superior mesenteric artery
90227	Injury to inferior mesenteric artery
90229	Injury to other celiac and mesenteric arteries
90231	Injury to superior mesenteric vein and primary subdivisions
90232	Injury to inferior mesenteric vein
90233	Injury to portal vein
90234	Injury to splenic vein
90239	Injury to other portal and splenic veins
90240	Injury to renal vessel(s), unspecified
90241	Injury to renal artery
90242	Injury to renal vein
90249	Injury to other renal blood vessels
90250	Injury to iliac vessel(s), unspecified
90251	Injury to hypogastric artery
90252	Injury to hypogastric vein
90253	Injury to iliac artery
90254	Injury to iliac vein
90255	Injury to uterine artery
90256	Injury to uterine vein
90259	Injury to other iliac blood vessels
90281	Injury to ovarian artery
90282	Injury to ovarian vein
90287	Injury to multiple blood vessels of abdomen and pelvis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
90289	Injury to other specified blood vessels of abdomen and pelvis
9029	Injury to unspecified blood vessel of abdomen and pelvis
90300	Injury to axillary vessel(s), unspecified
90301	Injury to axillary artery
90302	Injury to axillary vein
9031	Injury to brachial blood vessels
9032	Injury to radial blood vessels
9033	Injury to ulnar blood vessels
9034	Injury to palmar artery
9035	Injury to digital blood vessels
9038	Injury to other specified blood vessels of upper extremity
9039	Injury to unspecified blood vessel of upper extremity
9040	Injury to common femoral artery
9041	Injury to superficial femoral artery
9042	Injury to femoral veins
9043	Injury to saphenous veins
90440	Injury to popliteal vessel(s), unspecified
90441	Injury to popliteal artery
90442	Injury to popliteal vein
90450	Injury to tibial vessel(s), unspecified
90451	Injury to anterior tibial artery
90452	Injury to anterior tibial vein
90453	Injury to posterior tibial artery
90454	Injury to posterior tibial vein
9046	Injury to deep plantar blood vessels
9047	Injury to other specified blood vessels of lower extremity
9048	Injury to unspecified blood vessel of lower extremity
9049	Injury to blood vessels of unspecified site
9050	Late effect of fracture of skull and face bones
9051	Late effect of fracture of spine and trunk without mention of spinal cord lesion
9052	Late effect of fracture of upper extremities
9053	Late effect of fracture of neck of femur
9054	Late effect of fracture of lower extremities
9055	Late effect of fracture of multiple and unspecified bones

Diagnosis Code	Description
9056	Late effect of dislocation
9057	Late effect of sprain and strain without mention of tendon injury
9058	Late effect of tendon injury
9059	Late effect of traumatic amputation
9060	Late effect of open wound of head, neck, and trunk
9061	Late effect of open wound of extremities without mention of tendon injury
9062	Late effect of superficial injury
9063	Late effect of contusion
9064	Late effect of crushing
9065	Late effect of burn of eye, face, head, and neck
9066	Late effect of burn of wrist and hand
9067	Late effect of burn of other extremities
9068	Late effect of burns of other specified sites
9069	Late effect of burn of unspecified site
9070	Late effect of intracranial injury without mention of skull fracture
9071	Late effect of injury to cranial nerve
9072	Late effect of spinal cord injury
9073	Late effect of injury to nerve root(s), spinal plexus(es), and other nerves of trunk
9074	Late effect of injury to peripheral nerve of shoulder girdle and upper limb
9075	Late effect of injury to peripheral nerve of pelvic girdle and lower limb
9079	Late effect of injury to other and unspecified nerve
9080	Late effect of internal injury to chest
9081	Late effect of internal injury to intra-abdominal organs
9082	Late effect of internal injury to other internal organs
9083	Late effect of injury to blood vessel of head, neck, and extremities
9084	Late effect of injury to blood vessel of thorax, abdomen, and pelvis
9085	Late effect of foreign body in orifice
9086	Late effect of certain complications of trauma
9089	Late effect of unspecified injury
9090	Late effect of poisoning due to drug, medicinal or biological substance
9091	Late effect of toxic effects of nonmedical substances

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9092	Late effect of radiation
9093	Late effect of complications of surgical and medical care
9094	Late effect of certain other external causes
9095	Late effect of adverse effect of drug, medicinal or biological substance
9099	Late effect of other and unspecified external causes
9100	Abrasion or friction burn of face, neck, and scalp except eye, without mention of infection
9101	Abrasion or friction burn of face, neck, and scalp except eye, infected
9102	Blister of face, neck, and scalp except eye, without mention of infection
9103	Blister of face, neck, and scalp except eye, infected
9104	Insect bite, nonvenomous of face, neck, and scalp except eye, without mention of infection
9105	Insect bite, nonvenomous of face, neck, and scalp except eye, infected
9106	Superficial foreign body (splinter) of face, neck, and scalp except eye, without major open wound and without mention of infection
9107	Superficial foreign body (splinter) of face, neck, and scalp except eye, without major open wound, infected
9108	Other and unspecified superficial injury of face, neck, and scalp, without mention of infection
9109	Other and unspecified superficial injury of face, neck, and scalp, infected
9110	Abrasion or friction burn of trunk, without mention of infection
9111	Abrasion or friction burn of trunk, infected
9112	Blister of trunk, without mention of infection
9113	Blister of trunk, infected
9114	Insect bite, nonvenomous of trunk, without mention of infection
9115	Insect bite, nonvenomous of trunk, infected
9116	Superficial foreign body (splinter) of trunk, without major open wound and without mention of infection
9117	Superficial foreign body (splinter) of trunk, without major open wound, infected
9118	Other and unspecified superficial injury of trunk, without mention of infection
9119	Other and unspecified superficial injury of trunk, infected
9120	Abrasion or friction burn of shoulder and upper arm, without mention of infection
9121	Abrasion or friction burn of shoulder and upper arm, infected
9122	Blister of shoulder and upper arm, without mention of infection
9123	Blister of shoulder and upper arm, infected
9124	Insect bite, nonvenomous of shoulder and upper arm, without mention of infection
9125	Insect bite, nonvenomous of shoulder and upper arm, infected
9126	Superficial foreign body (splinter) of shoulder and upper arm, without major open wound and without mention of infection
9127	Superficial foreign body (splinter) of shoulder and upper arm, without major open wound, infected
9128	Other and unspecified superficial injury of shoulder and upper arm, without mention of infection
9129	Other and unspecified superficial injury of shoulder and upper arm, infected
9130	Abrasion or friction burn of elbow, forearm, and wrist, without mention of infection
9131	Abrasion or friction burn of elbow, forearm, and wrist, infected
9132	Blister of elbow, forearm, and wrist, without mention of infection
9133	Blister of elbow, forearm, and wrist, infected
9134	Insect bite, nonvenomous of elbow, forearm, and wrist, without mention of infection
9135	Insect bite, nonvenomous, of elbow, forearm, and wrist, infected
9136	Superficial foreign body (splinter) of elbow, forearm, and wrist, without major open wound and without mention of infection

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9137	Superficial foreign body (splinter) of elbow, forearm, and wrist, without major open wound, infected
9138	Other and unspecified superficial injury of elbow, forearm, and wrist, without mention of infection
9139	Other and unspecified superficial injury of elbow, forearm, and wrist, infected
9140	Abrasion or friction burn of hand(s) except finger(s) alone, without mention of infection
9141	Abrasion or friction burn of hand(s) except finger(s) alone, infected
9142	Blister of hand(s) except finger(s) alone, without mention of infection
9143	Blister of hand(s) except finger(s) alone, infected
9144	Insect bite, nonvenomous, of hand(s) except finger(s) alone, without mention of infection
9145	Insect bite, nonvenomous, of hand(s) except finger(s) alone, infected
9146	Superficial foreign body (splinter) of hand(s) except finger(s) alone, without major open wound and without mention of infection
9147	Superficial foreign body (splinter) of hand(s) except finger(s) alone, without major open wound, infected
9148	Other and unspecified superficial injury of hand(s) except finger(s) alone, without mention of infection
9149	Other and unspecified superficial injury of hand(s) except finger(s) alone, infected
9150	Abrasion or friction burn of fingers, without mention of infection
9151	Abrasion or friction burn of fingers, infected
9152	Blister of fingers, without mention of infection
9153	Blister of fingers, infected
9154	Insect bite, nonvenomous, of fingers, without mention of infection
9155	Insect bite, nonvenomous of fingers, infected
9156	Superficial foreign body (splinter) of fingers, without major open wound and without mention of infection
9157	Superficial foreign body (splinter) of fingers, without major open wound, infected

Diagnosis Code	Description
9158	Other and unspecified superficial injury of fingers without mention of infection
9159	Other and unspecified superficial injury of fingers, infected
9160	Abrasion or friction burn of hip, thigh, leg, and ankle, without mention of infection
9161	Abrasion or friction burn of hip, thigh, leg, and ankle, infected
9162	Blister of hip, thigh, leg, and ankle, without mention of infection
9163	Blister of hip, thigh, leg, and ankle, infected
9164	Insect bite, nonvenomous, of hip, thigh, leg, and ankle, without mention of infection
9165	Insect bite, nonvenomous of hip, thigh, leg, and ankle, infected
9166	Superficial foreign body (splinter) of hip, thigh, leg, and ankle, without major open wound and without mention of infection
9167	Superficial foreign body (splinter) of hip, thigh, leg, and ankle, without major open wound, infected
9168	Other and unspecified superficial injury of hip, thigh, leg, and ankle, without mention of infection
9169	Other and unspecified superficial injury of hip, thigh, leg, and ankle, infected
9170	Abrasion or friction burn of foot and toe(s), without mention of infection
9171	Abrasion or friction burn of foot and toe(s), infected
9172	Blister of foot and toe(s), without mention of infection
9173	Blister of foot and toe(s), infected
9174	Insect bite, nonvenomous, of foot and toe(s), without mention of infection
9175	Insect bite, nonvenomous, of foot and toe(s), infected
9176	Superficial foreign body (splinter) of foot and toe(s), without major open wound and without mention of infection
9177	Superficial foreign body (splinter) of foot and toe(s), without major open wound, infected
9178	Other and unspecified superficial injury of foot and toes, without mention of infection

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9179	Other and unspecified superficial injury of foot and toes, infected
9180	Superficial injury of eyelids and periocular area
9181	Superficial injury of cornea
9182	Superficial injury of conjunctiva
9189	Other and unspecified superficial injuries of eye
9190	Abrasion or friction burn of other, multiple, and unspecified sites, without mention of infection
9191	Abrasion or friction burn of other, multiple, and unspecified sites, infected
9192	Blister of other, multiple, and unspecified sites, without mention of infection
9193	Blister of other, multiple, and unspecified sites, infected
9194	Insect bite, nonvenomous, of other, multiple, and unspecified sites, without mention of infection
9195	Insect bite, nonvenomous, of other, multiple, and unspecified sites, infected
9196	Superficial foreign body (splinter) of other, multiple, and unspecified sites, without major open wound and without mention of infection
9197	Superficial foreign body (splinter) of other, multiple, and unspecified sites, without major open wound, infected
9198	Other and unspecified superficial injury of other, multiple, and unspecified sites, without mention of infection
9199	Other and unspecified superficial injury of other, multiple, and unspecified sites, infected
920	Contusion of face, scalp, and neck except eye(s)
9210	Black eye, not otherwise specified
9211	Contusion of eyelids and periocular area
9212	Contusion of orbital tissues
9213	Contusion of eyeball
9219	Unspecified contusion of eye
9220	Contusion of breast
9221	Contusion of chest wall
9222	Contusion of abdominal wall
92231	Contusion of back
92232	Contusion of buttock
92233	Contusion of interscapular region
9224	Contusion of genital organs
9228	Contusion of multiple sites of trunk
9229	Contusion of unspecified part of trunk
92300	Contusion of shoulder region
92301	Contusion of scapular region
92302	Contusion of axillary region
92303	Contusion of upper arm
92309	Contusion of multiple sites of shoulder and upper arm
92310	Contusion of forearm
92311	Contusion of elbow
92320	Contusion of hand(s)
92321	Contusion of wrist
9233	Contusion of finger
9238	Contusion of multiple sites of upper limb
9239	Contusion of unspecified part of upper limb
92400	Contusion of thigh
92401	Contusion of hip
92410	Contusion of lower leg
92411	Contusion of knee
92420	Contusion of foot
92421	Contusion of ankle
9243	Contusion of toe
9244	Contusion of multiple sites of lower limb
9245	Contusion of unspecified part of lower limb
9248	Contusion of multiple sites, not elsewhere classified
9249	Contusion of unspecified site
9251	Crushing injury of face and scalp
9252	Crushing injury of neck
9260	Crushing injury of external genitalia
92611	Crushing injury of back
92612	Crushing injury of buttock
92619	Crushing injury of other specified sites of trunk
9268	Crushing injury of multiple sites of trunk
9269	Crushing injury of unspecified site of trunk
92700	Crushing injury of shoulder region
92701	Crushing injury of scapular region

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
92702	Crushing injury of axillary region
92703	Crushing injury of upper arm
92709	Crushing injury of multiple sites of upper arm
92710	Crushing injury of forearm
92711	Crushing injury of elbow
92720	Crushing injury of hand(s)
92721	Crushing injury of wrist
9273	Crushing injury of finger(s)
9278	Crushing injury of multiple sites of upper limb
9279	Crushing injury of unspecified site of upper limb
92800	Crushing injury of thigh
92801	Crushing injury of hip
92810	Crushing injury of lower leg
92811	Crushing injury of knee
92820	Crushing injury of foot
92821	Crushing injury of ankle
9283	Crushing injury of toe(s)
9288	Crushing injury of multiple sites of lower limb
9289	Crushing injury of unspecified site of lower limb
9290	Crushing injury of multiple sites, not elsewhere classified
9299	Crushing injury of unspecified site
9300	Corneal foreign body
9301	Foreign body in conjunctival sac
9302	Foreign body in lacrimal punctum
9308	Foreign body in other and combined sites on external eye
9309	Foreign body in unspecified site on external eye
931	Foreign body in ear
932	Foreign body in nose
9330	Foreign body in pharynx
9331	Foreign body in larynx
9340	Foreign body in trachea
9341	Foreign body in main bronchus
9348	Foreign body in other specified parts bronchus and lung
9349	Foreign body in respiratory tree, unspecified
9350	Foreign body in mouth
9351	Foreign body in esophagus
9352	Foreign body in stomach

Diagnosis Code	Description
936	Foreign body in intestine and colon
937	Foreign body in anus and rectum
938	Foreign body in digestive system, unspecified
9390	Foreign body in bladder and urethra
9391	Foreign body in uterus, any part
9382	Foreign body in vulva and vagina
9393	Foreign body in penis
9399	Foreign body in unspecified site in genitourinary tract
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa
94100	Burn of unspecified degree of unspecified site of face and head
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck)
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part)
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin

Diagnosis Code	Description
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part
94200	Burn of unspecified degree of unspecified site of trunk
94201	Burn of unspecified degree of breast
94202	Burn of unspecified degree of chest wall, excluding breast and nipple
94203	Burn of unspecified degree of abdominal wall
94204	Burn of unspecified degree of back (any part)
94205	Burn of unspecified degree of genitalia
94209	Burn of unspecified degree of other and multiple sites of trunk
94210	Erythema due to burn (first degree) of unspecified site of trunk
94211	Erythema due to burn (first degree) of breast
94212	Erythema due to burn (first degree) of chest wall, excluding breast and nipple

Diagnosis Code	Description
94213	Erythema due to burn (first degree) of abdominal wall
94214	Erythema due to burn (first degree) of back (any part)
94215	Erythema due to burn (first degree) of genitalia
94219	Erythema due to burn (first degree) of other and multiple sites of trunk
94220	Blisters with epidermal loss due to burn (second degree) of unspecified site of trunk
94221	Blisters with epidermal loss due to burn (second degree) of breast
94222	Blisters with epidermal loss due to burn (second degree) of chest wall, excluding breast and nipple
94223	Blisters with epidermal loss due to burn (second degree) of abdominal wall
94224	Blisters with epidermal loss due to burn (second degree) of back (any part)
94225	Blisters with epidermal loss due to burn (second degree) of genitalia
94229	Blisters with epidermal loss due to burn (second degree) of other and multiple sites of trunk
94230	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of trunk
94231	Full-thickness skin loss due to burn (third degree NOS) of breast
94232	Full-thickness skin loss due to burn (third degree NOS) of chest wall, excluding breast and nipple
94233	Full-thickness skin loss due to burn (third degree NOS) of abdominal wall
94234	Full-thickness skin loss due to burn (third degree NOS) of back (any part)
94235	Full-thickness skin loss due to burn (third degree NOS) of genitalia
94239	Full-thickness skin loss due to burn (third degree NOS) of other and multiple sites of trunk
94240	Deep necrosis of underlying tissues due to burn (deep third degree) of trunk, unspecified site, without mention of loss of body part
94241	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, without mention of loss of breast

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94242	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, without mention of loss of chest wall
94243	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall, without mention of loss of abdominal wall
94244	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), without mention of loss of back
94245	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, without mention of loss of genitalia
94249	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, without mention of loss of body part
94250	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of trunk, with loss of body part
94251	Deep necrosis of underlying tissues due to burn (deep third degree) of breast, with loss of breast
94252	Deep necrosis of underlying tissues due to burn (deep third degree) of chest wall, excluding breast and nipple, with loss of chest wall
94253	Deep necrosis of underlying tissues due to burn (deep third degree) of abdominal wall with loss of abdominal wall
94254	Deep necrosis of underlying tissues due to burn (deep third degree) of back (any part), with loss of back
94255	Deep necrosis of underlying tissues due to burn (deep third degree) of genitalia, with loss of genitalia
94259	Deep necrosis of underlying tissues due to burn (deep third degree) of other and multiple sites of trunk, with loss of a body part
94300	Burn of unspecified degree of unspecified site of upper limb
94301	Burn of unspecified degree of forearm
94302	Burn of unspecified degree of elbow
94303	Burn of unspecified degree of upper arm
94304	Burn of unspecified degree of axilla
94305	Burn of unspecified degree of shoulder
94306	Burn of unspecified degree of scapular region
94309	Burn of unspecified degree multiple sites of upper limb, except wrist and hand
94310	Erythema due to burn (first degree) of unspecified site of upper limb
94311	Erythema due to burn (first degree) of forearm
94312	Erythema due to burn (first degree) of elbow
94313	Erythema due to burn (first degree) of upper arm
94314	Erythema due to burn (first degree) of axilla
94315	Erythema due to burn (first degree) of shoulder
94316	Erythema due to burn (first degree) of scapular region
94319	Erythema due to burn (first degree) of multiple sites of upper limb, except wrist and hand
94320	Blisters with epidermal loss due to burn (second degree) of unspecified site of upper limb
94321	Blisters with epidermal loss due to burn (second degree) of forearm
94322	Blisters with epidermal loss due to burn (second degree) of elbow
94323	Blisters with epidermal loss due to burn (second degree) of upper arm
94324	Blisters with epidermal loss due to burn (second degree) of axilla
94325	Blisters with epidermal loss due to burn (second degree) of shoulder
94326	Blisters with epidermal loss due to burn (second degree) of scapular region
94329	Blisters with epidermal loss due to burn (second degree) of multiple sites of upper limb, except wrist and hand
94330	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of upper limb
94331	Full-thickness skin loss due to burn (third degree NOS) of forearm
94332	Full-thickness skin loss due to burn (third degree NOS) of elbow
94333	Full-thickness skin loss due to burn (third degree NOS) of upper arm
94334	Full-thickness skin loss due to burn (third degree NOS) of axilla

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94335	Full-thickness skin loss due to burn (third degree NOS) of shoulder
94336	Full-thickness skin loss due to burn (third degree NOS) of scapular region
94339	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of upper limb, except wrist and hand
94340	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, without mention of loss of a body part
94341	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, without mention of loss of forearm
94342	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, without mention of loss of elbow
94343	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, without mention of loss of upper arm
94344	Deep necrosis of underlying tissues due to burn of axilla, without mention of loss of axilla
94345	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, without mention of loss of shoulder
94346	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, without mention of loss of scapula
94349	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, without mention of loss of upper limb
94350	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of upper limb, with loss of a body part
94351	Deep necrosis of underlying tissues due to burn (deep third degree) of forearm, with loss of forearm
94352	Deep necrosis of underlying tissues due to burn (deep third degree) of elbow, with loss of elbow
94353	Deep necrosis of underlying tissues due to burn (deep third degree) of upper arm, with loss of upper arm
94354	Deep necrosis of underlying tissues due to burn (deep third degree) of axilla, with loss of axilla

Diagnosis Code	Description
94355	Deep necrosis of underlying tissues due to burn (deep third degree) of shoulder, with loss of shoulder
94356	Deep necrosis of underlying tissues due to burn (deep third degree) of scapular region, with loss of scapula
94359	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of upper limb, except wrist and hand, with loss of upper limb
94400	Burn of unspecified degree of unspecified site of hand
94401	Burn of unspecified degree of single digit (finger (nail) other than thumb
94402	Burn of unspecified degree of thumb (nail)
94403	Burn of unspecified degree of two or more digits of hand, not including thumb
94404	Burn of unspecified degree of two or more digits of hand, including thumb
94405	Burn of unspecified degree of palm of hand
94406	Burn of unspecified degree of back of hand
94407	Burn of unspecified degree of wrist
94408	Burn of unspecified degree of multiple sites of wrist(s) and hand(s)
94410	Erythema due to burn (first degree) of unspecified site of hand
94411	Erythema due to burn (first degree) of single digit (finger (nail) other than thumb
94412	Erythema due to burn (first degree) of thumb (nail)
94413	Erythema due to burn (first degree) of two or more digits of hand, not including thumb
94414	Erythema due to burn (first degree) of two or more digits of hand including thumb
94115	Erythema due to burn (first degree) of palm of hand
94416	Erythema due to burn (first degree) of back of hand
94417	Erythema due to burn (first degree) of wrist
94418	Erythema due to burn (first degree) of multiple sites of wrist(s) and hand(s)
94420	Blisters with epidermal loss due to burn (second degree) of unspecified site of hand

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94421	Blisters with epidermal loss due to burn (second degree) of single digit (finger (nail) other than thumb
94422	Blisters with epidermal loss due to burn of (second degree) of thumb (nail)
94423	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand, not including thumb
94424	Blisters with epidermal loss due to burn (second degree) of two or more digits of hand including thumb
94425	Blisters with epidermal loss due to burn (second degree) of palm of hand
94426	Blisters with epidermal loss due to burn (second degree) of back of hand
94427	Blisters with epidermal loss due to burn (second degree) of wrist
94428	Blisters with epidermal loss due to burn (second degree) of multiple sites of wrist(s) and hand(s)
94430	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of hand
94431	Full-thickness skin loss due to burn (third degree NOS) of single digit (finger (nail) other than thumb
94432	Full-thickness skin loss due to burn (third degree NOS) of thumb (nail)
94433	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand, not including thumb
94434	Full-thickness skin loss due to burn (third degree NOS) of two or more digits of hand including thumb
94435	Full-thickness skin loss due to burn (third degree NOS) of palm of hand
94436	Full-thickness skin loss due to burn (third degree NOS) of back of hand
94437	Full-thickness skin loss due to burn (third degree NOS) of wrist
94438	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of wrist(s) and hand(s)
94440	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, without mention of loss of hand
94441	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, without mention of loss of finger
94442	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), without mention of loss of thumb
94443	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, without mention of fingers
94444	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, without mention of loss of fingers
94445	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, without mention of loss of palm
94446	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, without mention of loss of back of hand
94447	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, without mention of loss of wrist
94448	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), without mention of loss of a body part
94450	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of hand, with loss of hand
94451	Deep necrosis of underlying tissues due to burn (deep third degree) of single digit (finger (nail) other than thumb, with loss of finger
94452	Deep necrosis of underlying tissues due to burn (deep third degree) of thumb (nail), with loss of thumb
94453	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand, not including thumb, with loss of fingers
94454	Deep necrosis of underlying tissues due to burn (deep third degree) of two or more digits of hand including thumb, with loss of fingers
94455	Deep necrosis of underlying tissues due to burn (deep third degree) of palm of hand, with loss of palm of hand
94456	Deep necrosis of underlying tissues due to burn (deep third degree) of back of hand, with loss of back of hand

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94457	Deep necrosis of underlying tissues due to burn (deep third degree) of wrist, with loss of wrist
94458	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of wrist(s) and hand(s), with loss of a body part
94500	Burn of unspecified degree of unspecified site of lower limb (leg)
94501	Burn of unspecified degree of toe(s) (nail)
94502	Burn of unspecified degree of foot
94503	Burn of unspecified degree of ankle
94504	Burn of unspecified degree of lower leg
94505	Burn of unspecified degree of knee
94506	Burn of unspecified degree of thigh (any part)
94509	Burn of unspecified degree of multiple sites of lower limb(s)
94510	Erythema due to burn (first degree) of unspecified site of lower limb (leg)
94511	Erythema due to burn (first degree) of toe(s) (nail)
94512	Erythema due to burn (first degree) of foot
94513	Erythema due to burn (first degree) of ankle
94514	Erythema due to burn (first degree) of lower leg
94515	Erythema due to burn (first degree) of knee
94516	Erythema due to burn (first degree) of thigh (any part)
94519	Erythema due to burn (first degree) of multiple sites of lower limb(s)
94520	Blisters, epidermal loss (second degree) of unspecified site of lower limb (leg)
94521	Blisters with epidermal loss due to burn (second degree) of toe(s) (nail)
94522	Blisters with epidermal loss due to burn (second degree) of foot
94523	Blisters with epidermal loss due to burn (second degree) of ankle
94524	Blisters with epidermal loss due to burn (second degree) of lower leg
94525	Blisters with epidermal loss due to burn (second degree) of knee
94526	Blisters with epidermal loss due to burn (second degree) of thigh (any part)

Diagnosis Code	Description
94529	Blisters with epidermal loss due to burn (second degree) of multiple sites of lower limb(s)
94530	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of lower limb
94531	Full-thickness skin loss due to burn (third degree NOS) of toe(s) (nail)
94532	Full-thickness skin loss due to burn (third degree NOS) of foot
94533	Full-thickness skin loss due to burn (third degree NOS) of ankle
94534	Full-thickness skin loss due to burn (third degree NOS) of lower leg
94535	Full-thickness skin loss due to burn (third degree NOS) of knee
94536	Full-thickness skin loss due to burn (third degree NOS) of thigh (any part)
94539	Full-thickness skin loss due to burn (third degree NOS) of multiple sites of lower limb(s)
94540	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of lower limb (leg), without mention of loss of a body part
94541	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), without mention of loss of toe(s)
94542	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, without mention of loss of foot
94543	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, without mention of loss of ankle
94544	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, without mention of loss of lower leg
94545	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, without mention of loss of knee
94546	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), without mention of loss of thigh
94549	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), without mention of loss of a body part
94550	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site lower limb (leg), with loss of a body part

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94551	Deep necrosis of underlying tissues due to burn (deep third degree) of toe(s) (nail), with loss of toe(s)
94552	Deep necrosis of underlying tissues due to burn (deep third degree) of foot, with loss of foot
94553	Deep necrosis of underlying tissues due to burn (deep third degree) of ankle, with loss of ankle
94554	Deep necrosis of underlying tissues due to burn (deep third degree) of lower leg, with loss of lower leg
94555	Deep necrosis of underlying tissues due to burn (deep third degree) of knee, with loss of knee
94556	Deep necrosis of underlying tissues due to burn (deep third degree) of thigh (any part), with loss of thigh
94559	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites of lower limb(s), with loss of a body part
9460	Burns of multiple specified sites, unspecified degree
9461	Erythema due to burn (first degree) of multiple specified sites
9462	Blisters with epidermal loss due to burn (second degree) of multiple specified sites
9463	Full-thickness skin loss due to burn (third degree NOS) of multiple specified sites
9464	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, without mention of loss of a body part
9465	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple specified sites, with loss of a body part
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9474	Burn of vagina and uterus
9478	Burn of other specified sites of internal organs
9479	Burn of internal organs, unspecified site
94800	Burn (any degree) involving less than 10 percent of body surface with third degree burn of less than 10 percent or unspecified amount

Diagnosis Code	Description
94810	Burn (any degree) involving 10–19 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94811	Burn (any degree) involving 10–19 percent of body surface with third degree burn of 10–19 percent
94820	Burn (any degree) involving 20–29 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94821	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 10–19 percent
94822	Burn (any degree) involving 20–29 percent of body surface with third degree burn of 20–29 percent
94830	Burn (any degree) involving 30–39 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94831	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 10–19 percent
94832	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 20–29 percent
94833	Burn (any degree) involving 30–39 percent of body surface with third degree burn of 30–39 percent
94840	Burn (any degree) involving 40–49 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94841	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 10–19 percent
94842	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 20–29 percent
94843	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 30–39 percent
94844	Burn (any degree) involving 40–49 percent of body surface with third degree burn of 40–49 percent
94850	Burn (any degree) involving 50–59 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94851	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 10–19 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94852	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 20–29 percent
94853	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 30–39 percent
94854	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 40–49 percent
94855	Burn (any degree) involving 50–59 percent of body surface with third degree burn of 50–59 percent
94860	Burn (any degree) involving 60–69 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94861	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 10–19 percent
94862	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 20–29 percent
94863	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 30–39 percent
94864	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 40–49 percent
94865	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 50–59 percent
94866	Burn (any degree) involving 60–69 percent of body surface with third degree burn of 60–69 percent
94870	Burn (any degree) involving 70–79 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94871	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 10–19 percent
94872	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 20–29 percent
94873	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 30–39 percent
94874	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 40–49 percent
94875	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 50–59 percent

Diagnosis Code	Description
94876	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 60–69 percent
94877	Burn (any degree) involving 70–79 percent of body surface with third degree burn of 70–79 percent
94880	Burn (any degree) involving 80–89 percent of body surface with third degree burn of less than 10 percent or unspecified amount
94881	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 10–19 percent
94882	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 20–29 percent
94883	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 30–39 percent
94884	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 40–49 percent
94885	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 50–59 percent
94886	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 60–69 percent
94887	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 70–79 percent
94888	Burn (any degree) involving 80–89 percent of body surface with third degree burn of 80–89 percent
94890	Burn (any degree) involving 90 percent or more of body surface with third degree burn of less than 10 percent or unspecified amount
94891	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 10–19 percent
94892	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 20–29 percent
94893	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 30–39 percent
94894	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 40–49 percent
94895	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 50–59 percent

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
94896	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 60–69 percent
94897	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 70–79 percent
94898	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 80–89 percent
94899	Burn (any degree) involving 90 percent or more of body surface with third degree burn of 90 percent or more of body surface
9490	Burn of unspecified site, unspecified degree
9491	Erythema due to burn (first degree), unspecified site
9492	Blisters with epidermal loss due to burn (second degree), unspecified site
9493	Full-thickness skin loss due to burn (third degree NOS), unspecified site
9494	Deep necrosis of underlying tissue due to burn (deep third degree), unspecified site without mention of loss of a body part
9495	Deep necrosis of underlying tissues due to burn (deep third degree, unspecified site with loss of a body part
9500	Optic nerve injury
9501	Injury to optic chiasm
9502	Injury to optic pathways
9503	Injury to visual cortex
9509	Injury to unspecified optic nerve and pathways
9510	Injury to oculomotor nerve
9511	Injury to trochlear nerve
9512	Injury to trigeminal nerve
9513	Injury to abducens nerve
9514	Injury to facial nerve
9515	Injury to acoustic nerve
9516	Injury to accessory nerve
9517	Injury to hypoglossal nerve
9518	Injury to other specified cranial nerves
9519	Injury to unspecified cranial nerve
95200	C1-C4 level spinal cord injury, unspecified
95201	C1-C4 level with complete lesion of spinal cord
95202	C1-C4 level with anterior cord syndrome
95203	C1-C4 level with central cord syndrome
95204	C1-C4 level with other specified spinal cord injury
95205	C5-C7 level spinal cord injury, unspecified
95206	C5-C7 level with complete lesion of spinal cord
95207	C5-C7 level with anterior cord syndrome
95208	C5-C7 level with central cord syndrome
95209	C5-C7 level with other specified spinal cord injury
95210	T1-T6 level spinal cord injury, unspecified
95211	T1-T6 level with complete lesion of spinal cord
95212	T1-T6 level with anterior cord syndrome
95213	T1-T6 level with central cord syndrome
95214	T1-T6 level with other specified spinal cord injury
95215	T7-T12 level spinal cord injury, unspecified
95216	T7-T12 level with complete lesion of spinal cord
95217	T7-T12 level with anterior cord syndrome
95218	T7-T12 level with central cord syndrome
95219	T7-t12 level with other specified spinal cord injury
9522	Lumbar spinal cord injury without spinal bone injury
9523	Sacral spinal cord injury without spinal bone injury
9524	Cauda equina spinal cord injury without spinal bone injury
9528	Multiple sites of spinal cord injury without spinal bone injury
9529	Unspecified site of spinal cord injury without spinal bone injury
9530	Injury to cervical nerve root
9531	Injury to dorsal nerve root
9532	Injury to lumbar nerve root
9533	Injury to sacral nerve root
9534	Injury to brachial plexus
9535	Injury to lumbosacral plexus

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
9538	Injury to multiple sites of nerve roots and spinal plexus
9539	Injury to unspecified site of nerve roots and spinal plexus
9540	Injury to cervical sympathetic nerve, excluding shoulder and pelvic girdles
9541	Injury to other sympathetic nerve, excluding shoulder and pelvic girdles
9548	Injury to other specified nerve(s) of trunk, excluding shoulder and pelvic girdles
9549	Injury to unspecified nerve of trunk, excluding shoulder and pelvic girdles
9550	Injury to axillary nerve
9551	Injury to median nerve
9552	Injury to ulnar nerve
9553	Injury to radial nerve
9554	Injury to musculocutaneous nerve
9555	Injury to cutaneous sensory nerve, upper limb
9556	Injury to digital nerve, upper limb
9557	Injury to other specified nerve(s) of shoulder girdle and upper limb
9558	Injury to multiple nerves of shoulder girdle and upper limb
9559	Injury to unspecified nerve of shoulder girdle and upper limb
9560	Injury to sciatic nerve
9561	Injury to femoral nerve
9562	Injury to posterior tibial nerve
9563	Injury to peroneal nerve
9564	Injury to cutaneous sensory nerve, lower limb
9565	Injury to other specified nerve(s) of pelvic girdle and lower limb
9568	Injury to multiple nerves of pelvic girdle and lower limb
9569	Injury to unspecified nerve of pelvic girdle and lower limb
9570	Injury to superficial nerves of head and neck
9571	Injury to other specified nerve(s)
9578	Injury to multiple nerves in several parts
9579	Injury to nerves, unspecified site
9580	Air embolism as an early complication of trauma
9581	Fat embolism as an early complication of trauma

Diagnosis Code	Description
9582	Secondary and recurrent hemorrhage as an early complication of trauma
9583	Post-traumatic wound infection not elsewhere classified
9584	Traumatic shock
9585	Traumatic anuria
9586	Volkmann's ischemic contracture
9587	Traumatic subcutaneous emphysema
9588	Other early complications of trauma
95901	Other and unspecified injury to head
95909	Other and unspecified injury to face and neck
95911	Other injury of chest wall
95912	Other injury of abdomen
95913	Fracture of corpus cavernosum penis
95914	Other injury of external genitals
95919	Other injury of other sites of trunk
9592	Other and unspecified injury to shoulder and upper arm
9593	Other and unspecified injury to elbow, forearm, and wrist
9594	Other and unspecified injury to hand, except finger
9595	Other and unspecified injury to finger
9596	Other and unspecified injury to hip and thigh
9597	Other and unspecified injury to knee, leg, ankle, and foot
9598	Other and unspecified injury to other specified sites, including multiple
9599	Other and unspecified injury to unspecified site

36.4.21.51 Thymoglobulin®

Thymoglobulin® anti-thymocyte globulin (procedure code 1-J7511) is a benefit of the Texas Medicaid Program. Thymoglobulin is approved by the FDA for treatment of inpatients with a diagnosis of renal transplant acute rejection.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.21.52 Thyrogen® (Thyrotropin Alpha for Injection)

Procedure code 1-J3240 reimburses at $465.40, and is a benefit of the Texas Medicaid Program. The injection is reimbursed when billed with one of the following diagnosis codes:

Diagnosis Code	Description
1613	Malignant neoplasm of laryngeal cartilages
193	Malignant neoplasm of thyroid gland
2310	Carcinoma in situ of larynx
2348	Carcinoma in situ of other specified sites
2356	Neoplasm of uncertain behavior of larynx
2374	Neoplasm of uncertain behavior, thyroid gland
2397	Neoplasm of unspecified nature of endocrine glands and other parts of nervous system
2409	Goiter, unspecified
24200	Toxic diffuse goiter without mention of thyrotoxic crisis or storm
24220	Toxic multinodular goiter without mention of thyrotoxic crisis or storm
V1087	Personal history of malignant neoplasm of thyroid

36.4.21.53 Topotecan

Use procedure code 1-J9350 to bill Topetecan. It is payable if used for the treatment of females with metastatic ovarian carcinoma after failure of first-line or subsequent chemotherapy for the following diagnosis codes only:

Diagnosis Code	Description
1623	Malignant neoplasm of upper lobe, bronchus or lung
1624	Malignant neoplasm of middle lobe, bronchus or lung
1625	Malignant neoplasm of lower lobe, bronchus or lung
1628	Malignant neoplasm of other parts of bronchus or lung
1629	Malignant neoplasm of bronchus and lung, unspecified
1830	Malignant neoplasm of ovary
1986	Secondary malignant neoplasm of ovary

36.4.21.54 Trastuzumab

Procedure code 1-J9355 is a benefit. Reimbursement for this drug is considered when it is used as a single agent for the treatment of clients with metastatic breast cancer whose tumors overexpress the HER2 protein and who have received one or more chemotherapy regimens for their metastatic disease.

Trastuzumab is also payable when used in combination with paclitaxel for the treatment of clients with metastatic breast cancer whose tumors overexpress the HER2 protein and who have not received chemotherapy for their metastatic disease. Use Herceptin only on patients whose tumors have HER2 protein overexpression.

When billing for procedure code 1-J9355, one of the following appropriate diagnosis codes must appear on the claim:

Diagnosis Code	Description
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast

Procedure code 1-J9355 is payable in the office, home, outpatient hospital, and nursing home. If a provider requests that a CCP client receive this drug in the home, prior authorization must be obtained through the TMHP CCP Department. Trastuzumab, intravenous, per 10 mg, is paid at a maximum of $52.38 per 10 mg to physicians, PAs, NPs, CNSs, and medical suppliers. Inpatient facilities are reimbursed under their DRG, and outpatient facilities are reimbursed at their reimbursement rate.

When billing for the test used to determine whether a client overexpresses the HER2 protein, use procedure code 5-83950. This test is payable in the office, inpatient/outpatient hospital, and independent laboratory. Procedure code 5-83950 is reimbursed at a maximum of $89.01. Diagnosis of overexpression of the HER2 protein must be made before the Texas Medicaid

CPT only copyright 2005 American Medical Association. All rights reserved.

Program will consider reimbursement for trastuzumab. This test is payable only once in a client's lifetime for the same provider. An additional test by the same provider requires more information to support the medical necessity.

36.4.21.55 Valrubicin Sterile Solution for Intravesical Instillation (Valstar)

Procedure code 1-J9357 is reimbursed for clients with the diagnosis of bladder cancer in situ who have been treated unsuccessfully with BCG therapy and have an unacceptable morbidity or mortality risk if immediate cystectomy should be performed. Documentation of diagnosis and treatment must be submitted with the claim. Valrubicin is reimbursed only when given in the office or outpatient setting.

36.4.21.56 Vitamin B_{12} (Cyanocobalamin)

Vitamin B_{12} or cyanocobalamin is a water-soluble B-Complex vitamin that helps maintain the myelin sheath that surrounds the nerves. It is needed for the production of red blood cells and the metabolism of fatty acids, carbohydrates, and proteins. Vitamin B_{12} or cyanocobalamin is essential for DNA synthesis, cell division, and growth in children.

Use procedure code 1-J3420 when requesting reimbursement of vitamin B_{12} (cyanocobalamin) injections.

Reimbursement of Vitamin B_{12} (cyanocobalamin) injections is limited to the following diagnosis codes:

Diagnosis Code	Description
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
25061	Diabetes with neurological manifestations, type I (juvenile type), not stated as uncontrolled
25062	Diabetes with neurological manifestations, type II or unspecified type, uncontrolled
25063	Diabetes with neurological manifestations, type I (juvenile type), uncontrolled
2810	Pernicious anemia
3572	Polyneuropathy in diabetes
5793	Other and unspecified postsurgical nonabsorption
5798	Other specified intestinal malabsorption
5799	Unspecified intestinal malabsorption
64820	Anemia of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
V152	Personal history of surgery to other major organs, presenting hazards to health

36.4.22 Laboratory Services

Medicaid benefits are provided for professional and technical services ordered by a physician and provided under the personal supervision of a physician in a setting other than a hospital (inpatient or outpatient). All laboratory services must be documented in the patient's medical record as medically necessary and referenced to an appropriate diagnosis. Medicaid does not reimburse baseline or screening laboratory studies.

If a physician performs more than 100 laboratory tests per year for other providers in their laboratory, the laboratory must be certified by Medicare, and the provider must enroll as an independent laboratory with TMHP. A physician laboratory is defined as one owned by the physician, located in the office area, and the laboratory where the physician performs or personally supervises laboratory tests daily. Personal supervision means the physician must be in the building of the office or facility when and where the service is provided.

Exception: *All laboratory work related to a THSteps medical checkup must be submitted to the DSHS Laboratory.*

Refer to: *Section 26.3.1, "Texas Health Steps (THSteps) Outpatient Laboratory Services" on page 26-3 and Section 43.3.1, "Laboratory Services" on page 43-27, for specific information on the required use of the DSHS Laboratory for THSteps laboratory tests.*

Only physicians may bill for laboratory tests that are actually provided in their office. Any test sent to an outside laboratory should not be billed on the physician's claim. The laboratory bills Medicaid directly for the tests it performs. A physician may bill a laboratory handling fee (1-99000) if the specimen is obtained by venipuncture or catheterization *and* sent to an outside lab. The identity of the laboratory must be listed on the claim form.

The laboratory handling fee covers the expense of obtaining and packaging the specimen to a reference laboratory. Providers may be reimbursed one laboratory handling fee a day per client, unless *multiple* specimens are obtained and sent to *different* laboratories. When billing for a laboratory handling fee, the physician must document that a specimen was sent to a reference laboratory in Block 20 of the CMS-1500 claim form and indicate the reference laboratory name and address or nine-digit provider identifier in the appropriate field of the electronic claim form or Block 32 of the CMS-1500 paper claim form. The physician is required to forward the client's name, address, Medicaid number, and diagnosis,

CPT only copyright 2005 American Medical Association. All rights reserved.

if appropriate, with the specimen to the reference laboratory so the laboratory may bill the Texas Medicaid Program for its services.

A physician may bill only one laboratory handling fee per client visit unless the specimen is divided and sent to different laboratories or different specimens are collected and sent to different labs. The claim must indicate the name and/or address of each laboratory to which a specimen is sent for more than one laboratory handling fee to be paid. This policy does not apply to THSteps medical checkup providers who must submit specimens to the DSHS Laboratory.

Interpretation of laboratory tests for patients is considered part of the physician's professional services (hospital, office, or emergency room visits) and should not be billed separately.

Laboratory tests generally considered part of a laboratory panel (chemistries, CBCs, urinalyses [UAs] and performed on the same day must be billed as a panel regardless of the method used to perform the tests [automated or manual]).

Hospital reimbursements (i.e., inpatient DRG reimbursement) include payment for all pathology and laboratory services, including those sent to referral laboratories. Hospital-based and referral laboratory providers must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. These services are not billable to Medicaid-covered clients. Physician interpretations, that are requested of a consulting pathologist and require professional reading and reporting of results, may be billed to Medicaid separately as a professional charge.

All providers of laboratory services must comply with CLIA rules and regulations. Providers not complying with CLIA cannot be reimbursed for laboratory services.

The *Deficit Reduction Act* (DEFRA) limited reimbursement of clinical laboratory services provided by a physician laboratory or an independent laboratory to a national fee schedule.

Refer to: "Laboratory Paneling" on page 26-5 for claims processing instructions.
"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.
"Reimbursement" on page 2-2.

36.4.22.1 Blood Counts

A CBC is a comprehensive service that includes components. A CBC is billed with one of the following procedure codes: 5-85025, 5-85027, and 5-85032.

The components of a CBC are listed in the following table. Any of these procedure codes billed for the same date of service as a CBC procedure code will deny as part of another service:

Procedure Codes		
5-85004	5-85007	5-85008
5-85009	5-85013	5-85014
5-85018	5-85041	5-85048
5-85049	5-85055	

Procedure code 5-85049 may be reimbursed separately in addition to procedure codes 5-85031, 5-85014, 5-85018, and 5-85032. If this procedure code is billed for the same date of service as procedure codes 5-85004, 5-85007, 5-85008, 5-85009, or 5-85025 and 5-85027, it will deny as part of another service.

The following reticulocyte procedure codes may be reimbursed in addition to a CBC: 5-85044, 5-85045, and 5-85046.

36.4.22.2 Clinical Lab Panel Implementation

The AMA has discontinued the following general multi-channel automated panel codes because the panel did not define exactly what tests were performed:

Procedure Codes		
5-80002	5-80003	5-80004
5-80005	5-80006	5-80007
5-80008	5-80009	5-80010
5-80011	5-80012	5-80016
5-80018	5-80019	5-G0058
5-G0059	5-G0060	

A new Medicare policy pertaining to laboratory paneling procedures was implemented by the Texas Medicaid Program. The new organ and disease panel codes 5-80048, 5-80051, and 5-80053 must be used instead of the general multichannel automated panel codes above.

The new organ or disease panels include the following codes:

5-80048 – Basic metabolic panel includes:		
5-82310	5-82374	5-82435
5-82565	5-82947	5-84132
5-84295	5-84520	

5-80051 – Electrolyte panel includes:		
5-82374	5-82435	5-84132
5-84295		

5-80053 – Comprehensive metabolic panel includes:		
5-82040	5-82247	5-82310
5-82374	5-82435	5-82565
5-82947	5-84075	5-84132
5-84155	5-84295	5-84450
5-84460	5-84520	

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.22.3 Clinical Pathology Consultations

Procedure codes 3-80500 and 3-80502 should be used for clinical pathology consultations.

Providers may be reimbursed for clinical pathology consultation when the claim indicates the following information:

- The request is initiated by the client's attending physician and includes the name and address or Medicaid provider identifier of the physician requesting the consultation.
- The request relates to a test result that lies outside the normal or expected range in view of the condition of the patient.
- The patient's diagnosis.
- The clinical test(s) requiring the consultation.
- A written narrative report describing the findings of the consultation, which will also be included in the client's medical record.

If the claim does not include *all* of this information, the clinical pathology consultation will be denied.

Clinical pathology consultations cannot be paid for surgical and anatomical pathology services or any other pathology services payable in an inpatient hospital (POS 3) and an outpatient hospital (POS 5) (e.g., bone marrows, gross and microscopic exam, etc.).

A pathology consultation must always involve *medical interpretive judgment* that ordinarily requires a physician. Routine conversations held between a pathologist and attending physicians about test orders or results are not consultations.

Generally, only one clinical pathology consultation should be allowed per day by the same provider. Additional consultations per day, with supporting documentation of medical necessity, will be considered for payment on an individual basis.

Certain procedures are not usually performed by a pathologist, such as the following procedure codes used for office, outpatient, or inpatient consultations:

Procedure Codes		
3-99241	3-99242	3-99243
3-99244	3-99245	3-99251
3-99252	3-99253	3-99254
3-99255		

Therefore, if these procedures should be billed by this specialty type, the procedure code will autodeny with the message, "This procedure not covered for this provider specialty." Payment will be considered on an individual appeal basis if a pathologist can document the medical necessity of performing these procedures.

The specialties designated for pathologists are listed in the following table:

Specialty	Description
21	Pathology (DO)
22	Pathology (MD)

36.4.22.4 Cytogenetics Testing for Leukemia and Lymphoma

Cytogenetics testing is a group of laboratory tests involving the study of chromosomes. This does not refer to genetic services.

Clinical evidence supports the significance of cytogenetics evaluation in the diagnosis, prognosis, and treatment of acute leukemias and lymphomas, especially in children. The detection of the well-defined recurring genetic abnormalities often enables a correct diagnosis with important prognostic information that affects the treatment protocol.

Reimbursement for cytogenetics testing is limited to the following diagnosis codes:

Diagnosis Code	Description
20280	Other malignant lymphomas, unspecified site
20281	Other malignant lymphomas involving lymph nodes of head, face, and neck
20282	Other malignant lymphomas involving intrathoracic lymph nodes
20283	Other malignant lymphomas involving intra-abdominal lymph nodes
20284	Other malignant lymphomas involving lymph nodes of axilla and upper limb
20285	Other malignant lymphomas involving lymph nodes of inguinal region and lower limb
20286	Other malignant lymphomas involving intrapelvic lymph nodes
20287	Other malignant lymphomas involving spleen
20288	Other malignant lymphomas involving lymph nodes of multiple sites
2029	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue
20290	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue, unspecified site
20291	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of head, face, and neck
20292	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intrathoracic lymph nodes
20293	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intra-abdominal lymph nodes
20294	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of axilla and upper limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20295	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of inguinal region and lower limb
20296	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intrapelvic lymph nodes
20297	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving spleen
20298	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of multiple sites
20400	Lymphoid leukemia, acute, without mention of remission
20401	Lymphoid leukemia, acute, in remission
20410	Lymphoid leukemia, chronic, without mention of remission
20411	Lymphoid leukemia, chronic, in remission
20420	Lymphoid leukemia, subacute, without mention of remission
20421	Lymphoid leukemia, subacute, in remission
20480	Other lymphoid leukemia, without mention of remission
20481	Other lymphoid leukemia, in remission
20490	Unspecified lymphoid leukemia, without mention of remission
20491	Unspecified lymphoid leukemia, in remission
20500	Myeloid leukemia, acute, without mention of remission
20501	Myeloid leukemia, acute, in remission
20510	Myeloid leukemia, chronic, without mention of remission
20511	Myeloid leukemia, chronic, in remission
20520	Myeloid leukemia, subacute, without mention of remission
20521	Myeloid leukemia, subacute, in remission
20530	Myeloid sarcoma, without mention of remission
20531	Myeloid sarcoma, in remission
20580	Other myeloid leukemia, without mention of remission
20581	Other myeloid leukemia, in remission

Diagnosis Code	Description
20590	Unspecified myeloid leukemia, without mention of remission
20591	Unspecified myeloid leukemia, in remission
20600	Monocytic leukemia, acute, without mention of remission
20601	Monocytic leukemia, acute, in remission
20610	Monocytic leukemia, chronic without mention of remission
20611	Monocytic leukemia, chronic, in remission
20620	Monocytic leukemia, subacute, without mention of remission
20621	Monocytic leukemia, subacute, in remission
20680	Other monocytic leukemia, without mention of remission
20681	Other monocytic leukemia, in remission
20690	Unspecified monocytic leukemia, without mention of remission
20691	Unspecified monocytic leukemia, in remission
20700	Acute erythremia and erythroleu-kemia, without mention of remission
20701	Acute erythremia and erythroleu-kemia, in remission
20710	Chronic erythremia, without mention of remission
20711	Chronic erythremia, in remission
20720	Megakaryocytic leukemia, without mention of remission
20721	Megakaryocytic leukemia, in remission
20780	Other specified leukemia, without mention of remission
20781	Other specified leukemia, in remission
20800	Leukemia of unspecified cell type, acute, without mention of remission
20801	Leukemia of unspecified cell type, acute, in remission
20810	Leukemia of unspecified cell type, chronic, without mention of remission
20811	Leukemia of unspecified cell type, chronic, in remission
20820	Leukemia of unspecified cell type, subacute, without mention of remission

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20821	Leukemia of unspecified cell type, subacute, in remission
20880	Other leukemia of unspecified cell type, without mention of remission
20881	Other leukemia of unspecified cell type, in remission
20890	Unspecified leukemia, without mention of remission
20891	Unspecified leukemia, in remission

Cytogenetics testing is payable with the following procedure codes:

Procedure Codes		
Tissue Cultures		
5-88230	5-88233	5-88235
5-88237	5-88239	
Cryopreservation and Thawing		
5-88240	5-88241	
Chromosome Analysis		
5-88245	5-88248	5-88249
5-88261	5-88262	5-88263
5-88264	5-88267	5-88269
5-88280	5-88283	5-88285
5-88289		
Molecular Cytogenetics		
5-88271	5-88272	5-88273
5-88274	5-88275	
Interpretation and Report		
5-88291		

The following information pertains to the procedure codes in the Cytogenetics Testing Procedure Code table above:

- Each provider may be paid one culture procedure (tissue culture section) and one chromosome analysis procedure (chromosome analysis section) for the same client on the same day. Each client will be limited to six culture procedures (tissue culture section) and six chromosome analysis procedures (chromosome analysis section) per 365 days. Each client will be limited to one cryopreservation and thawing procedure (cryopreservation and thawing section) and one molecular cytogenetics procedure (molecular cytogenetics section) per 365 days.
- The procedures listed in the tissue cultures, cryopreservation and thawing, and molecular cytogenetics sections may be reimbursed when billed together for the same date of service. Only one procedure per section will be reimbursed and the others will be denied as *part of*.
- Within the chromosome analysis section, only one procedure code can be reimbursed for each of the following subcategories. The other procedure codes will be denied as *part of.*
  - Breakage syndromes: 5-88245, 5-88248, 5-88249 (when billed together, only one of these procedure codes will be reimbursed).
  - Cell counts: 5-88261, 5-88262, 5-88263, and 5-88264 (when billed together, only one of these procedure codes will be reimbursed).
  - Additional studies: 5-88280, 5-88283, 5-88285, 5-88289 (when billed together, only one of these procedure codes will be reimbursed).

36.4.22.5 Maternal Serum Alpha-Fetoprotein

Maternal serum alpha-fetoprotein (MSAFP) may be reimbursed once per pregnancy per provider for all pregnant women eligible for Medicaid. For additional services, payment is allowed with documentation attached to the claim.

Refer to: "Genetic Services" on page 22-1 for genetic follow-up to a positive MSAFP.

36.4.23 Mastectomy and Breast Reconstruction

Mastectomy is a covered benefit of the Texas Medicaid Program. Reimbursement is provided for the following mastectomy procedure codes:

Procedure Codes		
2/8/F-19160	2/8/F-19162	2/8/F-19180
2/8/F-19182	2/8-19200	2/8-19220
2/8 -19240		

Mastectomy is a medically necessary procedure for a diagnosis of malignant breast cancer. Mastectomy is a benefit of the Texas Medicaid Program and is diagnosis-restricted. Reimbursement for a mastectomy is provided when billed with a diagnosis listed in the following table:

Diagnosis Code	Description
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1748	Malignant neoplasm of other specified sites of female breast
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
19881	Secondary malignant neoplasm of breast
2330	Carcinoma in situ of breast
V103	Personal history of malignant neoplasm of breast

Breast reconstruction following a medically necessary mastectomy is a covered benefit of the Texas Medicaid Program when the following criteria are met:

- The client is Medicaid-eligible at the time of the breast reconstruction.
- The physician has documented a plan addressing the recommended breast reconstruction in the client's chart.

Breast reconstruction following a medically necessary mastectomy is diagnosis-restricted to the codes listed in the previous table.

Procedure Codes		
2/8/F-19340	2/8/F-19342	2/F-19350
2/8/F-19357	2/8/F-19361	2/8/F-19364
2/8/F-19366	2/8/F-19367	2/8/F-19368
2/8/F-19369		

Reimbursement is provided for complications of breast reconstruction, if any, when the complications occur during the time the client is eligible for the breast reconstruction benefit.

Procedure codes 2/F-19370, 2/F-19371, and 2/F-19380 may be used when billing for surgical intervention of complications following reconstructive breast surgery.

Breast reconstruction may be completed as multiple, staged procedures, such as tissue expansion followed by implants, and nipple/areola reconstruction.

Breast reconstruction may be completed using either saline or silicone implants or tissue transfers such as TRAM, latissimus dorsi, or gluteal flaps.

Surgery on the unaffected breast to achieve symmetry is not a covered benefit.

An external breast prosthesis is not a covered benefit.

The professional billing for Medicaid clients who are members of PCCM will be processed using the same diagnosis restrictions that apply to mastectomy and breast reconstruction for Medicaid fee-for-service clients. However, the associated hospitalizations are subject to concurrent review, and therefore hospitals must notify PCCM of admissions within the time frames for all of their hospital notification requirements.

36.4.24 Obstetrics/Prenatal Care

Medicaid reimburses antepartum care, deliveries (to include Cesarean sections performed by physicians), and postpartum care as individual procedures. Providers may choose one of the following options for billing maternity services:

- Providers may itemize each service individually on *one* claim form and file at the time of delivery. The filing deadline is applied to the date of delivery.
- Providers may itemize each service individually and submit claims as the services are rendered. The filing deadline is applied to each individual date of service.

Providers who only provide antepartum care and choose to submit antepartum visit charges on one claim form have the filing deadline applied to the estimated date of confinement (EDC) that must be stated in Block 24D of the CMS-1500 claim form.

Important: *Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately and be received by TMHP within 95 days of the date of service.*

Use modifier TH with all antepartum procedure codes.

Initial prenatal visits are payable with the following procedure codes with modifier TH: 1-99201, 1-99202, 1-99203, 1-99204, and 1-99205. These procedure codes for initial prenatal visits are limited to one per pregnancy, same provider. If billed more frequently than every seven months, documentation must support that the visits are for two different pregnancies. High risk pregnancy visits should be billed based on level of care and complexity of the visit using the appropriate procedure code with the TH modifier.

Antepartum care visits are payable for the following procedure codes with modifier TH: 2-99211, 2-99212, 2-99213, 2-99214, 2-99215, 2-99341, 2-99342, 2-99343, 2-99344, and 2-99345.

The initial antepartum visit is limited to one per client, per pregnancy, per provider.

The following is a recommended guide for the frequency of antepartum visits for a low-risk pregnancy:

- One visit every four weeks for the first 28 weeks
- One visit every two to three weeks from 28 to 36 weeks
- One visit every week at greater than 36 weeks to delivery

In POS 1 (office), 5 (outpatient), and 7 (birthing center), physicians (obstetricians, family practice physicians, and maternal-fetal medicine specialists), CNMs, and maternity service clinics (MSCs) are limited to 20 antepartum care visits per pregnancy and two postpartum care visits after discharge from the hospital. Routine pregnancies are

CPT only copyright 2005 American Medical Association. All rights reserved.

anticipated to require around 11 visits per pregnancy, and high-risk pregnancies are anticipated to require around 20 visits per pregnancy.

More frequent visits may be necessary for high-risk pregnancies. High-risk obstetrical visits are not limited to 20 visits per pregnancy. Documentation supporting medical necessity must be maintained in the physician's files and is subject to retrospective review.

Providers are reimbursed more for high-risk antepartum care visits than for regular pregnancy antepartum care visits.

The high-risk diagnosis must be documented on the claim form. The nature of the high-risk care visit must be identified in the Diagnosis field (Block 21) of the CMS-1500 claim form or the appropriate electronic field.

Antepartum and postpartum care visits billed in and inpatient hospital (POS 3) are denied as part of another procedure when billed within the three days before delivery or the six weeks after delivery. The inpatient intrapartum and postpartum care are included in the fee for the delivery or Cesarean section and should not be billed separately.

Postpartum care provided after discharge must be billed using procedure code 2-59430 with modifier TH. A maximum of two postpartum visits are allowed.

If a client is admitted to the hospital during the course of her pregnancy, the diagnosis necessitating the admission should be the primary diagnosis listed on the claim. Use of the appropriate E/M, antepartum, or postpartum procedure codes is necessary for appropriate reimbursement.

If the physician in the office sees a client for a diagnosis unrelated to the pregnancy, the nonpregnancy diagnosis must be listed as the primary diagnosis on the claim and the services referenced appropriately. Use of the appropriate E/M, antepartum, or postpartum procedure code is necessary for appropriate reimbursement.

The following are the delivery and Cesarean section procedure codes physicians must use to bill the Texas Medicaid Program: 2-59409, 2-59410, 2-59515, 2-59614, and 8-59515.

Delivering physicians who perform regional anesthesia or nerve block do not receive additional reimbursement because these charges are included in the reimbursement for the delivery except as outlined under "Anesthesia for Labor and Delivery" on page 36-24. The Texas Medicaid Program reimburses the anesthesia services and the delivery at full allowance when provided by the delivering obstetrician. Procedure codes 2-62311 and 2-62319 are reimbursed according to the TMRM fee. For continuous epidural analgesia, the Texas Medicaid Program reimburses for the time when the physician is physically present and monitors the continuous epidural. Reimbursable time refers to the period between the catheter insertion and when the delivery commences. Claims for procedure codes 7-01967 and 7-01968 must indicate the time spent administering the epidural and actual time spent with the client. Insertion and injection of the epidural are not reimbursed separately when billed with the CPT anesthesia delivery codes (2-59410, 2-59515, 2-59614, 2/8-59622). Medicaid reimburses only one delivery or Cesarean section procedure code per client in a seven month period; reimbursement includes multiple births.

Procedure code 1-99140 is not reimbursed when diagnosis codes 650 (Normal delivery), or 66970 (Cesarean delivery, without mention of indication, unspecified as to episode of care) are documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition. An emergency is defined as a situation when delay in treatment of the client poses a significant health threat to a client's life, bodily organ, or body part.

Hospital admissions resulting from conditions or comorbidities complicating labor should be billed using the appropriate CPT E/M care codes. These codes are not subject to the three-day pre-care period but are not payable on the date of delivery or the following six-week post-care period.

Refer to: "Anesthesia" on page 36-24 for complete information about anesthesia for obstetrical procedures.

36.4.24.1 Ultrasound of the Pregnant Uterus

Ultrasound of the pregnant uterus is a covered benefit of the Texas Medicaid Program when medically indicated. Ultrasound of the pregnant uterus may be paid separately when billed by physicians.

Ultrasound may be indicated for suspected genetic defects, high-risk pregnancy, fetal growth retardation, or gestational age conformation. Medical documentation supporting the medical necessity and appropriateness of additional ultrasounds *must* be present in the client's chart and is subject to retrospective review.

The total component of the codes listed in the following table may be considered for reimbursement in the office and outpatient settings. The professional component may be considered for reimbursement in the office or outpatient setting, when billed by a different provider or by the same provider in a different POS with documentation that supports the need for both visits. The professional component is considered part of a hospital or consultation visit, when provided in the inpatient setting. The technical component may be considered for reimbursement in the office and outpatient settings.

The following procedures may be billed for ultrasound of the pregnant uterus:

Procedure Codes		
4/I/T-76801	4/I/T-76802	4/I/T/G-76805
4/I/T/G-76810	4/I/T/G-76811	4/I/T/G-76812
4/I/T/G-76815	4/I/T/G-76816	4/I/T-76817
4/I/T/G-76818	4/I/T/G-76819	4/I/T-76820
4/I/T-76821		

The modifier TS may be billed with procedure codes 76811 and 76812 to indicate follow-up ultrasounds.

CPT only copyright 2005 American Medical Association. All rights reserved.

When multiple ultrasound procedure codes are billed on the same day, the most inclusive code is paid and all other codes are denied. Fetal biophysical profile (4/I/T/G-76818 and 4/I/T/G-76819) may be reimbursed separately when billed with 4/I/T-76801, 4/I/T-76802, 4/I/T/G-76805, 4/I/T/G-76810, 4/I/T/G-76811, 4/I/T/G-76812, 4/I/T/G-76815, or 4/I/T/G-76816 on the same day. Procedure code 4/I/T/G-76819 will deny as part of procedure code 4/I/T/G-76818 when billed for the same date of service.

Procedure codes G-76805, G-76810, G-76811, G-76812, G-76815, G-76816, G-76818, or G-76819 may be reimbursed to providers of genetic services. A repeat ultrasound study performed as a result of abnormal genetic findings must be billed using procedure code G-76816 when medically appropriate.

Procedure codes 4/T-76805, 4/T-76810, 4/T-76811, 4/T-76812, 4/T-76815, 4/T-76816, and 4/T-76818 may be reimbursed to the following provider types: County Indigent Health Care Program (CIHCP) providers, NPs, CNSs, PAs, physicians, CNMs, outpatient hospitals, and hospital-based RHCs.

Procedure codes I-76805, I-76810, I-76811, I-76812, I-76815, I-76816, and I-76818 may be reimbursed to the following provider types: CIHCP providers, NPs, CNSs, PAs, physicians, and CNMs.

Physicians, such as fetal-maternal specialists, caring for high-risk clients are anticipated to perform an increased number of follow-up ultrasounds. Medical documentation supporting the medical necessity and appropriateness of additional ultrasounds must be present in the client's chart and is subject to retrospective review.

36.4.24.2 External Cephalic Version

External cephalic version is the external manipulation of a fetus to alter its position in the uterus to make it more favorable for delivery.

Procedure code 2-59412 is payable in the inpatient hospital (POS 3) or outpatient hospital (POS 5) setting when billed as an independent procedure performed by a physician at least one day before delivery. Procedure code 2-59412 billed on the same day as a delivery by the same provider is denied.

Emergency room and subsequent hospital care visit procedure codes billed the same day as external cephalic version by the same provider are denied.

36.4.24.3 Amniocentesis, Cordocentesis, Fetal Intrauterine Transfusion (FIUT) and Ultrasonic Guidance for Cordocentesis, FIUT

Procedure code 2-59000 is the procedure of inserting a needle into the uterus through the abdominal wall for the purpose of withdrawing amniotic fluid, which is used to assess fetal health and maturity.

Procedure code 2-59012 is the procedure of entering the pregnant uterus and amniotic sac, identifying the umbilical cord, and obtaining a blood sample from a vein in the umbilical cord.

Procedure code 2-36460 is the procedure of accessing a fetal blood vessel to transfuse the fetus in utero.

In addition to the physician performing the amniocentesis, cordocentesis, or FIUT, another physician may assist with echography control.

Procedure Codes		
2-36460	2/G-59000	2-59001
2-59012	4/I/T-76941	4/I/T-76946

Procedure code 2-59001 is diagnosis-restricted to the following codes:

Diagnosis Code	Description
65700	Polyhydramnios, unspecified as to episode of care
65701	Polyhydramnios, with delivery
65703	Polyhydramnios, antepartum complication

FIUT, cordocentesis, and ultrasonic guidance are payable benefits of the Texas Medicaid Program when billed with an appropriate diagnosis:

Diagnosis Code	Description
65610	Rhesus isoimmunization, unspecified as to episode of care in pregnancy
65611	Rhesus isoimmunization, affecting management of mother, delivered
65613	Rhesus isoimmunization, affecting management of mother, antepartum condition
65620	Isoimmunization from other and unspecified blood-group incompatibility, unspecified as to episode of care in pregnancy
65621	Isoimmunization from other and unspecified blood-group incompatibility, affecting management of mother, delivered
65623	Isoimmunization from other and unspecified blood-group incompatibility, affecting management of mother, antepartum

The Medical Director reviews cordocentesis requests for diagnosis codes other than those listed above, on a case by case basis.

Procedure code 4/I/T-76946, 4/I/T-76941, or 4/I/T-76941 is reimbursed separately when billed by a different physician. Ultrasonic guidance is denied as part of the amniocentesis, cordocentesis, or intrauterine fetal transfusion procedure when it is billed on the same day by the same provider as one of the other procedures.

Cordocentesis or umbilical blood sampling is included in the global fee for procedure code 2-36460.

FIUT is reimbursed as a global fee and, therefore, includes all other services provided by the same physician, including umbilical blood sampling or cordocentesis.

CPT only copyright 2005 American Medical Association. All rights reserved.

No other fetal surgery is a benefit of the Texas Medicaid Program.

36.4.24.4 Fetal Fibronectin

Procedure code 5-82731 is a benefit of the Texas Medicaid Program.

36.4.24.5 Certified Nurse-Midwife (CNM)

Deliveries performed in a home (POS 2) by a CNM without prior authorization are denied. A written prior authorization request must be submitted during the client's third trimester of pregnancy. Documentation must include a statement signed by a licensed physician who has examined the client during the third trimester and determined that at the time of examination the client is not at high risk and is suitable for a home delivery.

36.4.24.6 Nonstress Testing, Contraction Stress Testing

The following diagnosis codes are payable for *both* nonstress and contraction stress testing:

Diagnosis Code	Description
30393	Chronic alcoholism
30403	Opioid type dependence, in remission
30410	Sedative, hypnotic or anxiolytic dependence, unspecified
30411	Sedative, hypnotic or anxiolytic dependence, continuous
30412	Sedative, hypnotic or anxiolytic dependence, episodic
30413	Sedative, hypnotic or anxiolytic dependence, in remission
30420	Cocaine dependence, unspecified use
30421	Cocaine dependence, continuous use
30422	Cocaine dependence, episodic use
30423	Cocaine dependence, in remission
30430	Cannabis dependence, unspecified use
30431	Cannabis dependence, continuous use
30432	Cannabis dependence, episodic use
30433	Cannabis dependence, in remission
30440	Amphetamine and other psychostimulant dependence, unspecified use
30441	Amphetamine and other psychostimulant dependence, continuous use
30442	Amphetamine and other psychostimulant dependence, episodic use
30443	Amphetamine and other psychostimulant dependence, in remission
30450	Hallucinogen dependence, unspecified use
30451	Hallucinogen dependence, continuous use
30452	Hallucinogen dependence, episodic use
30453	Hallucinogen dependence, in remission
30460	Other specified drug dependence, unspecified use
30461	Other specified drug dependence, continuous use
30462	Other specified drug dependence, episodic use
30463	Other specified drug dependence, in remission
30470	Combinations of opioid type drug with any other drug dependence, unspecified use
30471	Combinations of opioid type drug with any other drug dependence, continuous use
30472	Combinations of opioid type drug with any other drug dependence, episodic use
30473	Combinations of opioid type drug with any other drug dependence, in remission
30480	Combinations of drug dependence excluding opioid type drug, unspecified use
30481	Combinations of drug dependence excluding opioid type drug, continuous use
30482	Combinations of drug dependence excluding opioid type drug, episodic use
30483	Combinations of drug dependence excluding opioid type drug, in remission
30490	Unspecified drug dependence, unspecified use
30491	Unspecified drug dependence, continuous use
30492	Unspecified drug dependence, episodic use
30493	Unspecified drug dependence, in remission
5851	Chronic kidney disease, Stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
64210	Hypertension secondary to renal disease, complicating pregnancy, childbirth, and the puerperium, unspecified as to episode of care
64211	Hypertension secondary to renal disease, with delivery
64212	Hypertension secondary to renal disease, with delivery, with mention of postpartum complication
64213	Hypertension secondary to renal disease, antepartum
64214	Hypertension secondary to renal disease, postpartum
64220	Other pre-existing hypertension complicating pregnancy, childbirth, and the puerperium, unspecified as to episode of care
64221	Other pre-existing hypertension, with delivery
64222	Other pre-existing hypertension, with delivery, with mention of postpartum complication
64223	Other pre-existing hypertension, antepartum
64224	Other pre-existing hypertension, postpartum
64230	Transient hypertension of pregnancy, unspecified as to episode of care
64231	Transient hypertension of pregnancy, with delivery
64232	Transient hypertension of pregnancy, with delivery, with mention of postpartum complication
64233	Antepartum transient hypertension
64240	Mild or unspecified pre-eclampsia, unspecified as to episode of care
64241	Mild or unspecified pre-eclampsia, with delivery
64242	Mild or unspecified pre-eclampsia, with delivery, with mention of postpartum complication
64243	Mild or unspecified pre-eclampsia, antepartum
64244	Mild or unspecified pre-eclampsia, postpartum
64250	Severe pre-eclampsia, unspecified as to episode of care
64251	Severe pre-eclampsia, with delivery

Diagnosis Code	Description
64252	Severe pre-eclampsia, with delivery, with mention of postpartum complication
64253	Severe pre-eclampsia, antepartum
64254	Severe pre-eclampsia, postpartum
64260	Eclampsia complicating pregnancy, childbirth or the puerperium, unspecified as to episode of care
64261	Eclampsia, with delivery
64262	Eclampsia, with delivery, with mention of postpartum complication
64263	Eclampsia, antepartum
64264	Eclampsia, postpartum
64270	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64271	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, with delivery
64272	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, with delivery, with mention of postpartum complication
64400	Threatened premature labor, unspecified as to episode of care
64403	Threatened premature labor, antepartum
64410	Other threatened labor, unspecified as to episode of care
64413	Other threatened labor, antepartum
64510	Post term pregnancy, unspecified episode of care
64513	Post term pregnancy, antepartum condition or complication
64520	Prolonged pregnancy, unspecified episode of care
64523	Prolonged pregnancy, antepartum condition or complication
64700	Syphilis of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64701	Syphilis of mother, complicating pregnancy, with delivery
64702	Syphilis of mother, complicating pregnancy, with delivery, with mention of postpartum complication
64703	Antepartum syphilis
64704	Postpartum syphilis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64710	Gonorrhea of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64711	Gonorrhea of mother, with delivery
64712	Gonorrhea of mother, with delivery, with mention of postpartum complication
64713	Antepartum gonorrhea
64714	Postpartum gonorrhea
64720	Other venereal diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64721	Other venereal diseases of mother, with delivery
64722	Other venereal diseases of mother, with delivery, with mention of postpartum complication
64723	Pre-eclampsia or eclampsia superimposed on pre-existing hypertension, antepartum
64723	Other antepartum venereal diseases
64724	Other postpartum venereal diseases
64730	Tuberculosis of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64731	Tuberculosis of mother, with delivery
64732	Tuberculosis of mother, with delivery, with mention of postpartum complication
64733	Antepartum tuberculosis
64734	Postpartum tuberculosis
64740	Malaria of mother, complicating pregnancy, childbirth or the puerperium, unspecified as to episode of care
64741	Malaria of mother, with delivery
64742	Malaria of mother, with delivery, with mention of postpartum complication
64743	Antepartum malaria
64744	Postpartum malaria
64750	Rubella of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64751	Rubella of mother, with delivery
64752	Rubella of mother, with delivery, with mention of postpartum complication
64753	Antepartum rubella

Diagnosis Code	Description
64754	Postpartum rubella
64760	Other viral diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64761	Other viral diseases of mother, with delivery
64762	Other viral diseases of mother, with delivery, with mention of postpartum complication
64763	Other antepartum viral diseases
64764	Other postpartum viral diseases
64780	Other specified infectious and parasitic diseases of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64781	Other specified infectious and parasitic diseases of mother, with delivery
64782	Other specified infectious and parasitic diseases of mother, with delivery, with mention of postpartum complication
64783	Other specified infectious and parasitic diseases of mother, antepartum
64800	Diabetes mellitus of mother, complicating pregnancy, childbirth, or the puerperium, unspecified as to episode of care
64801	Diabetes mellitus of mother, with delivery
64802	Diabetes mellitus of mother, with delivery, with mention of postpartum complication
64803	Antepartum diabetes mellitus
65130	Twin pregnancy with fetal loss and retention of one fetus, unspecified as to episode of care or not applicable
65131	Twin pregnancy with fetal loss and retention of one fetus, delivered, with or without mention of antepartum condition
65133	Twin pregnancy with fetal loss and retention of one fetus, antepartum condition or complication
65140	Triplet pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care or not applicable

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
65141	Triplet pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65143	Triplet pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65150	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care or not applicable
65151	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65153	Quadruplet pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65160	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), unspecified as to episode of care
65161	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), delivered, with or without mention of antepartum condition
65163	Other multiple pregnancy with fetal loss and retention of one or more fetus(es), antepartum condition or complication
65633	Fetal distress, affecting management of mother, antepartum
65650	Poor fetal growth, affecting management of mother, unspecified as to episode of care
65651	Poor fetal growth, affecting management of mother, delivered
65653	Poor fetal growth, affecting management of mother, antepartum condition or complication
65660	Excessive fetal growth, affecting management of mother, unspecified as to episode of care
65661	Excessive fetal growth, affecting management of mother, delivered
65663	Excessive fetal growth, affecting management of mother, antepartum
65840	Infection of amniotic cavity, unspecified as to episode of care
65841	Infection of amniotic cavity, delivered
65843	Infection of amniotic cavity, antepartum

Diagnosis Code	Description
V231	Supervision of high-risk pregnancy with history of tropho blastic disease
V232	Supervision of high-risk pregnancy with history of abortion
V233	Supervision of high-risk pregnancy with grand multiparity
V2341	Pregnancy with history of pre-term labor
V2349	Pregnancy with other poor obstetric history
V235	Supervision of high-risk pregnancy with other poor reproductive history
V237	Supervision of high-risk pregnancy with insufficient prenatal care
V2381	Supervision of high-risk pregnancy with elderly primigravida
V2382	Supervision of high-risk pregnancy with elderly multigravida
V2383	Supervision of high-risk pregnancy with young primigravida
V2384	Supervision of high-risk pregnancy with young multigravida
V2389	Supervision of other high-risk pregnancy
V239	Supervision of unspecified high-risk pregnancy

When billing for 2-59025 performed because of decreased fetal movement, use the following diagnosis codes:

Diagnosis Code	Description
64110	Hemorrhage from placenta previa, unspecified as to episode of care
64111	Hemorrhage from placenta previa, with delivery
64113	Hemorrhage from placenta previa, antepartum
64120	Premature separation of placenta, unspecified as to episode of care
64121	Premature separation of placenta, with delivery
64123	Premature separation of placenta, antepartum
64130	Antepartum hemorrhage associated with coagulation defects, unspecified as to episode of care
64131	Antepartum hemorrhage associated with coagulation defects, with delivery
64133	Antepartum hemorrhage associated with coagulation defects
64180	Other antepartum hemorrhage, unspecified as to episode of care

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
64181	Other antepartum hemorrhage, with delivery
64183	Other antepartum hemorrhage
64190	Unspecified antepartum hemorrhage, unspecified as to episode of care
64191	Unspecified antepartum hemorrhage, with delivery
64193	Unspecified antepartum hemorrhage
64520	Prolonged pregnancy, unspecified episode of care
64521	Prolonged pregnancy, delivered with or without mention of antepartum condition
64523	Prolonged pregnancy, antepartum condition or complication
65570	Decreased fetal movements, affecting management of mother, unspecified as to episode of care
65571	Decreased fetal movements, affecting management of mother, delivered
65573	Decreased fetal movements, affecting management of mother, antepartum condition or complication

Procedure code 2-59020 is also payable for the following diagnosis codes:

Diagnosis Code	Description
2824	Thalassemias
2825	Sickle-cell trait
28263	sickle-cell/hb-c disease without crisis
65613	Rhesus isoimmunization, affecting management of mother, antepartum condition
65623	Isoimmunization from other and unspecified blood-group incompatibility, affecting management of mother, antepartum
65803	Oligohydramnios, antepartum

Nonstress testing is only payable to a physician when this service is performed in the office (POS 1) and should be billed with procedure code 2-59025.

The contraction stress test is payable to a physician when performed in an inpatient hospital (POS 3) or outpatient hospital (POS 5) setting and should be billed with procedure code 2-59020 and the appropriate POS code.

Procedure code 2-59025 can be reimbursed on the same day/different provider, without appeal. Procedure code 2-59025, billed more than once per day, same provider, is denied. The provider must appeal with documentation that supports the performing of the test more than once on the same day/same provider.

Procedure code 2-59020 can be reimbursed on the same day/different provider, without appeal. Procedure code 2-59020, billed more than once per day, by the same provider, is denied. The provider must appeal with documentation supporting the performance of the test more than once on the same day by the same provider.

Procedure code 2-59025 is payable to physicians, NPs, CNSs, PAs, CNMs, and CIHCP providers in the office setting only. Procedure code 2-59020 is payable to physicians, NPs, CNSs, PAs, CNMs, and CIHCP providers in the inpatient and outpatient settings only.

Fetal monitoring and fetal stress testing are payable for outpatient hospital stays and to hospital-based RHCs only with revenue code B-729, Labor room delivery-other. The inpatient hospital stay is reimbursed under the hospital's DRG.

To prevent repeat unintended or unwanted pregnancies, physicians are urged to include family planning services or referrals in the maternity care of the client. Genetic diagnosis and counseling is also available through Medicaid for clients suspected of having a genetic disorder for informed reproductive decision making.

Refer to: "Family Planning Services" on page 20-1 for more information.

36.4.24.7 Screening of Pregnant Women for Syphilis, HIV, and Hepatitis B Required

Health and Safety Code Chapter 81, Section 81.090 requires pregnant women in Texas to be screened for HBV infection, HIV, and syphilis at their first prenatal examination and delivery. The requirement applies only to the physician or other person who attends a pregnant woman during gestation and at delivery of her infant. Hepatitis B screening of pregnant women has been recommended since 1991 by the American College of Obstetricians and Gynecologists (ACOG), American Academy of Pediatrics (AAP), and Advisory Committee on Immunization Practices (ACIP).

Hepatitis B prenatal testing identifies pregnant women who are hepatitis B surface antigen positive and alerts physicians and clinic staff to vaccinate infants with HBIG and the first dose of the hepatitis B vaccine. Immunotherapy for infants will prevent 97 percent of subsequent HBV infection in those infants born to mothers who are infected with hepatitis B virus. Ninety percent of infants who become infected through perinatal transmission will become chronic virus carriers. Infants infected perinatally are at increased risk for developing chronic liver disease (cirrhosis or chronic active or persistent hepatitis) or primary hepatocellular carcinoma later in life. Children of unidentified HBV-infected mothers are at high risk of becoming infected with HBV through person-to-person transmission during the first five years of their lives. It is estimated that as many as 25 percent of infants infected through perinatal transmission will die of chronic liver disease as adults. Hepatitis B virus disease can be prevented.

CPT only copyright 2005 American Medical Association. All rights reserved.

Immunotherapy for infants born to HBsAg-positive women includes administration of 0.5 mL HBIG and 0.5 mL hepatitis B vaccine, within 12 hours of delivery. Subsequent doses of hepatitis B vaccine should be administered to the infant at 1 and 6 months of age. When the infant is 12 months old, a post-vaccine serology test should be performed to determine the success or failure of the vaccine intervention. Physicians should request that the laboratory test the infant's blood for anti-HBs and HBsAg. A positive anti-HBs test result and a negative HBsAg test result show the infant is protected against HBV. A negative anti-HBs and a positive HBsAg show the infant is infected with HBV and should be referred for clinical follow-up. For infants whose blood test is negative for anti-HBs and HBsAg, administration of a second series of vaccine is indicated. A second post-vaccine serology test should be performed two months after completion of the second series.

The DSHS Perinatal Hepatitis B Prevention Program provides hepatitis B vaccine and post-vaccine serology tests for infants born to HBsAg-positive women. HBIG is provided to hospitals for infants, on a case-by-case basis. Prevaccination susceptibility testing and hepatitis B vaccine for susceptible sexual and nonsexual household contacts of HBsAg-positive pregnant women is provided through DSHS regional and local health department clinics.

For more information on the Perinatal Hepatitis B Prevention Program, including a program protocol, reporting forms, fax sheets for physicians, and hospital reporting forms for HBsAg-positive pregnant women, providers should call the Perinatal Hepatitis B Coordinator at 1-800-252-9152.

Pregnant women must be tested for HIV unless they object. If the patient objects to the HIV antibody test, the attending health care provider must make a note in the patient's record that:

- The HIV test was offered.
- The patient declined testing.
- A referral to an anonymous testing site was made.
- The patient was provided with appropriate literature.

36.4.25 Newborn Services

36.4.25.1 Apnea Monitors

Apnea monitors, to measure chest movement and heart rate, are a benefit of THSteps–CCP for infants. Apnea monitors used in the home will be paid for two months without prior authorization for infants with one of the following diagnosis codes:

Diagnosis Code	Description
53010	Esophagitis, unspecified
53011	Reflux esophagitis
53012	Acute esophagitis
53019	Other esophagitis
53081	Esophageal reflux
7707	Chronic respiratory disease arising in the perinatal period
77081	Primary apnea of newborn
77082	Other apnea of newborn
77083	Cyanotic attacks of newborn
77084	Respiratory failure of newborn
77089	Other respiratory problems after birth
78603	Apnea
V198	Family history of other condition

When billing for apnea monitors, use procedure code L-E0619.

All apnea monitors provided to THSteps–CCP clients must be capable of recording apneic episodes.

The POS for apnea monitors is in the client's home.

Prior authorization is required for rental of an apnea monitor, if one of the following conditions exist:

- The child is more than 4 months of age
- The initial two-month rental period has expired

Prior authorization must be obtained in writing and must include *all* of the following items:

- A completed THSteps-CCP Prior Authorization Request Form, signed and dated by the physician
- Documentation to support the medical necessity and appropriateness of the apnea monitor
- A physician interpretation, signed and dated by the physician, of the most recent two-month's apnea monitor downloads

Apnea monitors will not be authorized, if the documentation does not support medical necessity.

Procedure code I-93272 may be used by the physician to bill for the interpretation of the apnea monitor recordings.

Electrodes and lead wires for the apnea monitor are a benefit only if the apnea monitor is owned by the client. If the apnea monitor is rented, the electrodes and lead wires are considered part of the rental fee. The electrodes and lead wires may be considered for purchase with the procedure codes 9-A4556 and 9-A4557 only with documentation of medical necessity and a statement from the physician that the client owns the monitor.

Refer to: "Apnea Monitor" on page 43-44 for authorization of apnea monitors through THSteps-CCP.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.25.2 Circumcisions

The Texas Medicaid Program provides reimbursement for circumcisions billed with the following procedure codes:

Procedure Code	Maximum Fee
2-54150	$50.75
2-54152	$86.28
2-54160	$101.50
2-54161	$152.25

Circumcisions performed on clients older than 1 year of age must be documented with medical necessity.

36.4.25.3 Claims Filing Instructions, Eligibility Requirements

Claims submitted for services provided to a newborn child that is eligible for Medicaid should be filed using the newborn child's Medicaid client number. *Filing a claim for a newborn client under the mother's client number may cause a delay in claim payment.* For information on the newborn's eligibility status, call TMHP at 1-800-925-9126. Claims with charges for newborn care must be submitted separately from claims with charges for the mother eligible for Medicaid.

Exception: *Services for a newborn's unsuccessful resuscitation may be billed under the mother's Medicaid number using procedure code 1-99499.*

Note: *Newborns are enrolled in the same STAR Program health plan that the mother is enrolled in, if the mother is eligible for Medicaid and enrolled in the plan on the date of birth. Check with individual health plans on the billing of newborn claims.*

Also, the Medicaid claim filing deadline is based on claim receipt within 95 days of the date of service *or* 95 days of the date the client's eligibility information is added to TMHP's eligibility file (in the case of retroactive eligibility). Retroactive eligibility occurs when an individual has applied for Medicaid coverage but has not yet been assigned a Medicaid client number at the time of services. The *add date* is the date the client's eligibility was added to the eligibility file. Client eligibility information is available through AIS.

A newborn child is eligible for Medicaid for up to one year if all the following conditions are met:

- The mother is receiving Medicaid at the time of the child's birth.
- The child continues to live with the mother.
- The mother continues to be eligible for Medicaid or would be eligible for Medicaid, if she were pregnant. It is not acceptable for a provider to require a deposit for newborn care from a client. The child's eligibility ceases, if the mother relinquishes her parental rights or it is determined that the child is not a member of her household.

To provide information about each child born to a mother eligible for Medicaid, FQHCs, hospitals, birthing centers, and FQHCs with birthing centers should complete "Hospital Report (Newborn Child or Children) HHSC Form 7484" on page B-51 and submit it to DADS Data Control within five days of the child's birth. The use of *Baby Boy* or *Baby Girl* delays the assignment of a number. *Filing this form expedites the assignment of a Medicaid number for the newborn child.* Do not complete this form for stillbirths.

The facility should complete this form within five days of the child's birth and send it to DADS at the address referenced on the form. This five-day time frame is not mandatory; however, prompt submission expedites the process of determining the child's eligibility. Facilities should duplicate the form as needed; duplicates are *not* supplied by HHSC, DADS, or TMHP.

On receipt of a completed Form 7484, DADS Data Control verifies the newborn's eligibility and within ten workdays, sends notices to the mother, caseworker, hospital, birthing center, and attending physician, if identified. The notice includes the child's Medicaid client number and the effective date of coverage. After the child has been added to the HHSC eligibility file, HHSC issues a Medicaid Identification Form (Form H3087).

The attending physician's notification letter is sent to the address on file by license number at the Texas Medical Board. It is imperative that this address be kept current to ensure timely notification of attending physicians. Physicians should submit address changes to the following address:

Texas Medical Board
Customer Information, MC-240
PO Box 2018
Austin, TX 78767-2018

Refer to: "Automated Inquiry System (AIS)" on page xiii.

36.4.25.4 Inpatient Newborn Exams

An inpatient newborn examination performed by a physician, FNP/PNP, or a CNM in an inpatient hospital, birthing center, or freestanding birthing center is considered a THSteps medical checkup and must include all of the inpatient newborn checkup procedures shown on the "THSteps Medical Checkups Periodicity Schedule" on page 43-15. A THSteps newborn checkup exam includes:

- History
- Physical exam including length, weight, and head circumference
- Vision and hearing screening
- Health education with the parents
- The state-required newborn hereditary/metabolic laboratory testing
- Administration of the hepatitis B immunization.

Inpatient newborn exams/screens are to be billed on the CMS-1500 claim form using HCPCS code 1-99431 or 1-99432, when used for billing the initial newborn exam. If the provider chooses to do a brief examination (not including all of the above components), the provider may bill the CPT code 1-99431 or 1-99432 with modifier 52, which will not count as a THSteps checkup.

CPT only copyright 2005 American Medical Association. All rights reserved.

Physicians and FNP/PNPs are encouraged to enroll in the THSteps medical checkup Program to provide *outpatient* preventive THSteps medical checkups for Medicaid children younger than 21 years of age. As shown on the "THSteps Medical Checkups Periodicity Schedule" on page 43-15, children are eligible for a total of 21 medical checkups reimbursed at a maximum fee of $70 each. A $5 fee is paid for each immunization given.

Refer to: "Texas Health Steps (THSteps)" on page 43-1 for more information.

36.4.25.5 Newborn Hearing Screening

Health and Safety Code, Chapter 47, *Vernon's Texas Codes Annotated* requires facilities where births occur to offer all newborns a hearing screening as a part of their newborn hospital stay. Procedures for newborn hearing screening provided for infants born outside of a birthing facility, not admitted to a birthing facility for newborn assessment and monitoring after birth, and performed during the initial THSteps visit are considered part of the initial newborn medical checkup and are not reimbursed as separate procedures. Providers who are not enrolled in THSteps must refer the infant to an enrolled THSteps provider for an initial THSteps medical checkup, which includes newborn hearing testing. For more information on newborn hearing screening, providers may contact:

Bureau of Children's Health
1100 West 49th Street
Austin, TX 78756
1-512-458-7724
www.tdh.state.tx.us/audio/audiology.htm

***Note:** This procedure is a screening, not diagnostic, and will not be reimbursed separately from the usual newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants.*

All newborns who have abnormal screening results should be referred to a local Program for Amplification for Children of Texas (PACT) provider for follow-up care. PACT provides services and hearing aids for children ages birth through 20 years who have permanent hearing loss and are Medicaid-eligible.

Traditional Medicaid providers are reimbursed for the diagnosis and treatment of abnormal hearing screen follow-up when a local PACT provider is not available. Providers should use the following procedure codes when billing for follow-up of diagnosis of abnormal hearing screens: 5/I-92585, 5/I/T-92587, and 5/I/T-92588.

Procedure code 5-92586 is considered a diagnostic, not a screening, test.

For a complete list of PACT providers, contact:

HHSC
Bureau of Children's Health
Program for Amplification for Children of Texas (PACT)
1100 West 49th Street
Austin, TX 78756
1-512-458-7724

36.4.25.6 Neonatal Intensive Care

Neonatal intensive care is the comprehensive care of the critically ill neonate or infant in an NICU.

Neonatal intensive care procedure codes are comprehensive per diem (daily) care codes for physicians who personally deliver and supervise the delivery of health care by the neonatal intensive care team to the neonate or infant and may be billed only once per day per neonate or infant. These procedure codes may be used only during the period of time that the neonate or infant is considered to be critically ill. After the neonate or infant is no longer considered to be critically ill, use the E/M codes for subsequent hospital care (1-99231, 1-99232, 1-99233, and 1-99300).

Refer to: "Neonatal Intensive Care" on page 36-204 and "Hospital Visits" on page 36-13 for more details.

36.4.25.7 Newborn Resuscitation

Procedure code 1-99440 is not limited to once per lifetime. Procedure code 1-99440 billed in addition to critical care (1-99291 and 1-99292) is denied.

Use procedure code 1-99436 to attend a Cesarean section or high-risk newborn. When using this procedure code for stand-by for a high-risk newborn, documentation of the maternal high-risk condition in Block 21 of the CMS-1500 claim form is recommended.

Refer to: "Risk Assessment" on page 31-4 for information about maternal high-risk conditions.

36.4.25.8 Nonroutine Care

Care for sick newborns (e.g., unusual jaundice, prematurity, sepsis, respiratory distress) is considered nonroutine newborn care. For admission, visits, intensive care, and therapeutic procedures, the appropriate CPT codes must be used.

36.4.25.9 Pediatric Stand-by

Pediatric standby for a Cesarean section is coded as 1-99436 and must be billed on the infant's claim form.

When billing for attendance at Cesarean section or high-risk delivery, use CPT procedure code 1-99436. The attendance fee is considered a newborn charge and is not paid to the same provider billing for delivery or anesthesia services. Procedure code 1-99440 is appropriate when only resuscitation is performed. If 1-99440 and 1-99436 are billed on the same day by the same provider, procedure code 1-99436 is denied as part of another procedure on the same day.

36.4.25.10 Potential SSI/Medicaid Eligibility for Premature Infants

The Supplemental Security Income (SSI) program includes financial and Medicaid benefits for people who are disabled. When determining eligibility for SSI, the Social Security Administration (SSA) must establish that the

CPT only copyright 2005 American Medical Association. All rights reserved.

person meets financial and disability criteria. When determining financial eligibility for a newborn child, SSA does not consider the income and resources of the child's parents until the month following the month the child leaves the hospital and begins living with the parents. Determinations of disability are made by the state's Disability Determination Services (DDS) and may take several months.

Federal regulations state that infants with birth weights less than 1,200 grams are considered to meet the SSI disability criteria.

In May 1993, the SSA issued a new policy to local SSA offices to make presumptive SSI disability decisions and payments for these children, making it possible for a child to receive SSI and Medicaid benefits while waiting for a final disability determination to be made by DDS.

The child's parent or legal guardian must file an SSI application with the SSA. It is in the child's best interest that the application with the SSA be filed as soon as possible after birth. The SSA accepts a birth certificate with the child's birth weight or a hospital medical summary as evidence for the presumptive disability decision.

Providers should not change their current newborn referral procedures to HHSC for children born to mothers eligible for Medicaid as described in this section. However, providers are encouraged to refer parents and guardians of low birth weight newborns to the local SSA office for an SSI application.

36.4.25.11 Routine Care

Routine newborn care is defined as care given to a well baby immediately after birth and during the initial hospital stay. Use procedure codes 1-99431, 1-99432, 1-99433, and 1-99435 for billing routine newborn care.

Physicians must submit separate charges for each day of care. Procedure codes 1-99431, 1-99432, 1-99433, and 1-99435 are limited to one code per day, per provider. The claim must not reflect any diagnosis other than *well newborn* diagnosis listed in the table below:

Diagnosis Code	Description
V3000	Single liveborn, born in hospital, delivered without mention of cesarean section
V3001	Single liveborn, born in hospital, delivered by cesarean section
V301	Single liveborn, born before admission to hospital
V302	Single liveborn, born outside hospital and not hospitalized
V3100	Twin birth, mate liveborn, born in hospital, delivered without mention of cesarean section
V3101	Twin birth, mate liveborn, born in hospital, delivered by cesarean section
V311	Twin birth, mate liveborn, born before admission to hospital
V312	Twin birth, mate liveborn, born outside hospital and not hospitalized
V3200	Twin birth, mate stillborn, born in hospital, delivered without mention of cesarean section
V3201	Twin birth, mate stillborn, born in hospital, delivered by cesarean section
V321	Twin birth, mate stillborn, born before admission to hospital
V322	Twin birth, mate stillborn, born outside hospital and not hospitalized
V3300	Twin birth, unspecified whether mate liveborn or stillborn, born in hospital, delivered without mention of cesarean section
V3301	Twin birth, unspecified whether mate liveborn or stillborn, born in hospital, delivered by cesarean section
V331	Twin birth, unspecified whether mate liveborn or stillborn, born before admission to hospital
V332	Twin birth, unspecified whether mate liveborn or stillborn, born outside hospital and not hospitalized
V3400	Other multiple birth (three or more), mates all liveborn, born in hospital, delivered without mention of cesarean section
V3401	Other multiple birth (three or more), mates all liveborn, born in hospital, delivered by cesarean section
V341	Other multiple birth (three or more), mates all liveborn, born before admission to hospital
V342	Other multiple birth (three or more), mates all liveborn, born outside hospital and not hospitalized
V3500	Other multiple birth (three or more), mates all still born, born in hospital, delivered without mention of cesarean section
V3501	Other multiple birth (three or more), mates all still born, born in hospital, delivered by cesarean section
V351	Other multiple birth (three or more), mates all stillborn, born before admission to hospital
V352	Other multiple birth (three or more), mates all stillborn, born outside of hospital and not hospitalized

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
V3600	Other multiple birth (three or more), mates liveborn and stillborn, born in hospital, delivered without mention of cesarean section
V3601	Other multiple birth (three or more), mates liveborn and stillborn, born in hospital, delivered without mention of cesarean section
V361	Other multiple birth (three or more), mates liveborn and stillborn, born before admission to hospital
V362	Other multiple birth (three or more), mates liveborn and stillborn, born outside hospital and not hospitalized
V3700	Other multiple birth (three or more), unspecified whether mates liveborn or stillborn, born in hospital, delivered without mention of cesarean section
V3701	Other multiple birth (three or more), unspecified whether mates liveborn or stillborn, born in hospital, delivered by cesarean section
V371	Other multiple birth (three or more), unspecified whether mates liveborn or stillborn, born before admission to hospital
V372	Other multiple birth (three or more), unspecified whether mates liveborn or stillborn, born outside of hospital
V3900	Liveborn, unspecified whether single, twin or multiple, born in hospital, delivered without mention of cesarean section Unspecified anomaly of eye, congenital
V3901	Liveborn, unspecified whether single, twin or multiple, born in hospital, delivered by cesarean section
V391	Liveborn, unspecified whether single, twin or multiple, born before admission to hospital

Providers may elect to bill subsequent care or regular newborn care in a POS other than the inpatient setting for newborns discharged within 24 hours of birth. Procedure code 1-99432 may be billed in lieu of history and examination in hospital setting (1-99431). If procedure code 1-99433 has been paid by Medicaid to any provider, procedure code 1-99432 is denied. Procedure codes 1-99431 or 1-99432 are limited to once per lifetime. Use modifier 52 to indicate a brief newborn exam that does not include the components of a THSteps screen.

The continued hospitalization of a newborn to support the bonding process is covered when the mother is required to remain hospitalized for medical reasons.

36.4.26 Noncoronary Percutaneous Transluminal Angioplasty

Percutaneous transluminal angioplasty (PTA) is a procedure involving insertion of a balloon catheter into a narrowed or occluded vessel; by inflating the balloon, the artery is recanalized and dilated. Several recognized subdivisions of PTA have become standard as recognized surgical procedures in lieu of other more invasive surgical procedures.

A repeat PTA within 90 days may be reviewed retrospectively for documentation of medical necessity for the repeat.

Noncoronary PTA is a covered benefit of the Texas Medicaid Program. PTA services should be billed using the following procedure codes:

Procedure Codes		
2/F-35470	2/F-35471	2/F-35472
2/F-35473	2/F-35474	2/F-35475
2/F-35476	2/F-92997	2/F-92998

36.4.27 Nuclear Medicine

Medicaid covers the following procedure codes: 4/I/T-78890 and 4/I/T-78891.

Important: *When procedure code* 4/I/T-*78890 is billed with* 4/I/T-*78891, procedure code* 4/I/T-*78890 is denied as part of* 4/I/T-*78891. Only one procedure code is paid per day when multiples of the same code are billed on the same day.*

Refer to: "Inpatient Hospital Visits" on page 36-15 for specific details.

36.4.28 Ophthalmology

When an ophthalmologist sees a patient for a minor condition, such as conjunctivitis, that does not require a complete eye exam, providers are to use the appropriate office E/M code.

Providers are to use the following eye exam procedure codes with a diagnosis of ophthalmological disease or injury. If the client is seen by an ophthalmologist for a diagnosis of refractive error or to rule out a refractive error, the code 1-S0620 or 1-S0621 must be billed. Refractions are limited for clients younger than 21 years of age to once every state fiscal year (SFY) (September 1 through August 31).

For clients younger than 21 years of age, this limitation may be exceeded, if any of the following situations apply and the claim documentation supports the situation:

- A diopter change of 0.5 or more
- A school nurse, teacher, or parent requests the eye exam
- Medical necessity

CPT only copyright 2005 American Medical Association. All rights reserved.

Clients 21 years of age and older are allowed one eye exam for refractive error once every 24 months. For example, if the exam for refractive error occurs in May 2001, the client older than 21 years of age is eligible for another exam in June 2003.

If a client is eligible for Medicare and Medicaid, the eye exam for a diagnosis of eye disease, injury, or aphakia (1-92002, 1-92004, 1-92012, or 1-92014) must be billed to Medicare in accordance with Medicare filing procedures. The refractive portion of the exam must be billed to Medicaid within 95 days of the eye refraction with a medical diagnosis. Medicare does *not* cross over the refractive portion of the eye exam to the Texas Medicaid Program.

When billed correctly, providers receive three payments:

- Medicare's allowance for the eye exam
- A Medicare/Medicaid payment crossover for the allowed deductible and coinsurance on the eye exam
- A Medicaid-only payment for the refractive portion of the exam

Procedure code 1-92015 is used when billing for just the refraction on a client who is eligible for Medicaid and has Medicare. Use procedure code 1-92015 when the refraction is the only service performed when evaluating a patient with ocular disease.

A new patient eye examination in any POS is changed to an established patient eye exam if history shows that the same physician has furnished a medical service (TOS 1), surgical service (TOS 2), or consultation (TOS 3) within two years. Services coded as new patient eye exams in excess of this limitation are changed as follows:

If billed as:	Change to:
1-92002	1-92012
1-92004	1-92014

Unless specifically designated by CPT as a unilateral code, all ophthalmological services listed are considered bilateral and should not be billed as a quantity of two. However, procedure codes 1-92225, 1-92226, 1-92230, and 1-92235 are considered unilateral codes and are paid as a quantity of two, if both eyes are evaluated.

36.4.28.1 Complete Eye Exams

New Patient

Procedure Codes		
1-92002	1-92004	1-99201
1-99202	1-99203	1-99204
1-99205	1-S0620	

Established Patient

Procedure Codes		
1-92012	1-92014	1-92015
1-99211	1-99212	1-99213
1-99214	1-99215	1-S0621

Evaluation and Management Office Visit or Consultation Billed in Addition to the Eye Examination

When an E/M office visit or consultation is billed in addition to the eye examination, the most inclusive code is paid and the other denied.

Services Billed in Addition to an Evaluation and Management Service or Eye Examination

The following services are not reimbursed when billed with an office visit/eye examination on the same date of service. They are considered part of the office visit/eye examination. If no code exists for a procedure, code as the appropriate 1-99201 or 1-99211 service.:

Procedure Codes		
1-92020	1-92060	1-92100

Procedure code 1-99173 will deny as part of another procedure/service billed on the same day (e.g., THSteps-EPSDT visit or E/M service).

Special Ophthalmological Services Reimbursed When Billed the Same Day as General Ophthalmological Services

The following special ophthalmological services are reimbursed when billed in addition to a general ophthalmological service, for the same date of service:

Procedure Codes		
1-92018	1-92019	1-92081*
1-92082*	1-92083*	1-92120
1-92135	1-92140	1-S0820

* Procedure codes that are considered bilateral.

A new or established patient office visit or ophthalmological medical examination is denied, if any of the following ophthalmological/ophthalmoscopy services are performed on the same day:

Procedure Codes		
1-92136	1-92225	1-92226
1-92230	1-92235	1-92240
1-92250*	1-92260*	1-92265*
1-92270*	1-92275*	5/T/I-95930*
1-92285*	1-92286*	1-92287*

* Procedure codes that are considered bilateral.

Procedure code 1-92230 is not paid in addition to 1-92235.

CPT only copyright 2005 American Medical Association. All rights reserved.

Valid Diagnosis Codes for Evaluation and Management Services, Consultation Codes, or Medical Eye Examinations

Client E/M services, medical eye examinations, and consultations are payable when indicated and billed for the following diagnosis codes:

Diagnosis Code	Description
05320	Herpes zoster dermatitis of eyelid
05321	Herpes zoster keratoconjunctivitis
05322	Herpes zoster iridocyclitis
05329	Herpes zoster with other ophthalmic complications
05440	Herpes simplex with unspecified ophthalmic complication
05441	Herpes simplex dermatitis of eyelid
05442	Dendritic keratitis
05443	Herpes simplex disciform keratitis
05444	Herpes simplex iridocyclitis
05449	Herpes simplex with other ophthalmic complications
0760	Trachoma, initial stage
0761	Trachoma, active stage
0769	Trachoma, unspecified
0770	Inclusion conjunctivitis
0771	Epidemic keratoconjunctivitis
0772	Pharyngoconjunctival fever
0773	Other adenoviral conjunctivitis
0774	Epidemic hemorrhagic conjunctivitis
0778	Other viral conjunctivitis
07798	Unspecified diseases of conjunctiva due to chlamydiae
07799	Unspecified diseases of conjunctiva due to viruses
0903	Syphilitic interstitial keratitis
09150	Syphilitic uveitis, unspecified
09151	Syphilitic chorioretinitis (secondary)
09152	Syphilitic iridocyclitis (secondary)
09840	Gonococcal conjunctivitis (neonatorum)
09841	Gonococcal iridocyclitis
09842	Gonococcal endophthalmia
09843	Gonococcal keratitis
09849	Other gonococcal infection of eye
11502	Histoplasma capsulatum retinitis
11512	Histoplasma duboisii retinitis
11592	Histoplasmosis retinitis, unspecified
1301	Conjunctivitis due to toxoplasmosis
1302	Chorioretinitis due to toxoplasmosis

Diagnosis Code	Description
1900	Malignant neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
1901	Malignant neoplasm of orbit
1902	Malignant neoplasm of lacrimal gland
1903	Malignant neoplasm of conjunctiva
1904	Malignant neoplasm of cornea
1905	Malignant neoplasm of retina
1906	Malignant neoplasm of choroid
1907	Malignant neoplasm of lacrimal duct
1908	Malignant neoplasm of other specified sites of eye
1909	Malignant neoplasm of eye, part unspecified
2240	Benign neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
2241	Benign neoplasm of orbit
2242	Benign neoplasm of lacrimal gland
2243	Benign neoplasm of conjunctiva
2244	Benign neoplasm of cornea
2245	Benign neoplasm of retina
2246	Benign neoplasm of choroid
2247	Benign neoplasm of lacrimal duct
2248	Benign neoplasm of other specified parts of eye
2249	Benign neoplasm of eye, part unspecified
2340	Carcinoma in situ of eye
36000	Purulent endophthalmitis, unspecified
36001	Acute endophthalmitis
36002	Panophthalmitis
36003	Chronic endophthalmitis
36004	Vitreous abscess
36011	Sympathetic uveitis
36012	Panuveitis
36013	Parasitic endophthalmitis NOS
36014	Ophthalmia nodosa
36019	Other endophthalmitis
36020	Degenerative disorder of globe, unspecified
36021	Progressive high (degenerative) myopia
36023	Siderosis of globe
36024	Other metallosis of globe

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36029	Other degenerative disorders of globe
36030	Hypotony of eye, unspecified
36031	Primary hypotony of eye
36032	Ocular fistula causing hypotony
36033	Hypotony associated with other ocular disorders
36034	Flat anterior chamber of eye
36040	Degenerated globe or eye, unspecified
36041	Blind hypotensive eye
36042	Blind hypertensive eye
36043	Hemophthalmos, except current injury
36044	Leucocoria
36050	Foreign body, magnetic, intraocular, unspecified
36051	Foreign body, magnetic, in anterior chamber of eye
36052	Foreign body, magnetic, in iris or ciliary body
36053	Foreign body, magnetic, in lens
36054	Foreign body, magnetic, in vitreous
36055	Foreign body, magnetic, in posterior wall
36059	Intraocular foreign body, magnetic, in other or multiple site
36060	Foreign body, intraocular, unspecified
36061	Foreign body in anterior chamber
36062	Foreign body in iris or ciliary body
36063	Foreign body in lens
36064	Foreign body in vitreous
36065	Foreign body in posterior wall of eye
36069	Intraocular foreign body in other or multiple sites
36081	Luxation of globe
36089	Other disorders of globe
3609	Unspecified disorder of globe
36100	Retinal detachment with retinal defect, unspecified
36101	Recent retinal detachment, partial, with single defect
36102	Recent retinal detachment, partial, with multiple defects
36103	Recent retinal detachment, partial, with giant tear

Diagnosis Code	Description
36104	Recent retinal detachment, partial, with retinal dialysis
36105	Recent retinal detachment, total or subtotal
36106	Old retinal detachment, partial
36107	Old retinal detachment, total or subtotal
36110	Retinoschisis, unspecified
36111	Flat retinoschisis
36112	Bullous retinoschisis
36113	Primary retinal cysts
36114	Secondary retinal cysts
36119	Other retinoschisis and retinal cysts
3612	Serous retinal detachment
36130	Retinal defect, unspecified
36131	Round hole of retina without detachment
36132	Horseshoe tear of retina without detachment
36133	Multiple defects of retina without detachment
36181	Traction detachment of retina
36189	Other forms of retinal detachment
3619	Unspecified retinal detachment
36201	Background diabetic retinopathy
36202	Proliferative diabetic retinopathy
36203	Nonproliferative diabetic retinopathy NOS
36204	Mild nonproliferative diabetic retinopathy
36205	Moderate nonproliferative diabetic retinopathy
36206	Severe nonproliferative diabetic retinopathy
36207	Diabetic macular edema
36210	Background retinopathy, unspecified
36211	Hypertensive retinopathy
36212	Exudative retinopathy
36213	Changes in vascular appearance of retina
36214	Retinal microaneurysms NOS
36215	Retinal telangiectasia
36216	Retinal neovascularization NOS
36217	Other intraretinal microvascular abnormalities
36218	Retinal vasculitis
36221	Retrolental fibroplasia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36229	Other nondiabetic proliferative retinopathy
36230	Retinal vascular occlusion, unspecified
36231	Central retinal artery occlusion
36232	Retinal arterial branch occlusion
36233	Partial retinal arterial occlusion
36234	Transient retinal arterial occlusion
36235	Central retinal vein occlusion
36236	Venous tributary (branch) occlusion of retina
36237	Venous engorgement of retina
36240	Retinal layer separation, unspecified
36241	Central serous retinopathy
36242	Serous detachment of retinal pigment epithelium
36243	Hemorrhagic detachment of retinal pigment epithelium
36250	Macular degeneration (senile) of retina, unspecified
36251	Nonexudative senile macular degeneration of retina
36252	Exudative senile macular degeneration of retina
36253	Cystoid macular degeneration of retina
36254	Macular cyst, hole, or pseudohole of retina
36255	Toxic maculopathy of retina
36256	Macular puckering of retina
36257	Drusen (degenerative) of retina
36260	Peripheral retinal degeneration, unspecified
36261	Paving stone degeneration of retina
36262	Microcystoid degeneration of retina
36263	Lattice degeneration of retina
36264	Senile reticular degeneration of retina
36265	Secondary pigmentary degeneration of retina
36266	Secondary vitreoretinal degenerations
36270	Hereditary retinal dystrophy, unspecified
36271	Retinal dystrophy in systemic or cerebroretinal lipidoses
36272	Retinal dystrophy in other systemic disorders and syndromes
36273	Vitreoretinal dystrophies
36274	Pigmentary retinal dystrophy
36275	Other dystrophies primarily involving the sensory retina
36276	Dystrophies primarily involving the retinal pigment epithelium
36277	Retinal dystrophies primarily involving Bruch's membrane
36281	Retinal hemorrhage
36282	Retinal exudates and deposits
36283	Retinal edema
36284	Retinal ischemia
36285	Retinal nerve fiber bundle defects
36289	Other retinal disorders
3629	Unspecified retinal disorder
36300	Focal chorioretinitis, unspecified
36301	Focal choroiditis and chorioretinitis, juxtapapillary
36303	Focal choroiditis and chorioretinitis of other posterior pole
36304	Focal choroiditis and chorioretinitis, peripheral
36305	Focal retinitis and retinochoroiditis, juxtapapillary
36306	Focal retinitis and retinochoroiditis, macular or paramacular
36307	Focal retinitis and retinochoroiditis of other posterior pole
36308	Focal retinitis and retinochoroiditis, peripheral
36310	Disseminated chorioretinitis, unspecified
36311	Disseminated choroiditis and chorioretinitis, posterior pole
36312	Disseminated choroiditis and chorioretinitis, peripheral
36313	Disseminated choroiditis and chorioretinitis, generalized
36314	Disseminated retinitis and retinochoroiditis, metastatic
36315	Disseminated retinitis and retinochoroiditis, pigment epitheliopathy
36320	Chorioretinitis, unspecified
36321	Pars planitis
36322	Harada's disease
36330	Chorioretinal scar, unspecified
36331	Solar retinopathy
36332	Other macular scars of retina
36333	Other scars of posterior pole of retina

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36334	Peripheral scars of retina
36335	Disseminated scars of retina
36340	Choroidal degeneration, unspecified
36341	Senile atrophy of choroid
36342	Diffuse secondary atrophy of choroid
36343	Angioid streaks of choroid
36350	Hereditary choroidal dystrophy or atrophy, unspecified
36351	Circumpapillary dystrophy of choroid, partial
36352	Circumpapillary dystrophy of choroid, total
36353	Central dystrophy of choroid, partial
36354	Central choroidal atrophy, total
36355	Choroideremia
36356	Other diffuse or generalized dystrophy of choroid, partial
36357	Other diffuse or generalized dystrophy of choroid, total
36361	Choroidal hemorrhage, unspecified
36362	Expulsive choroidal hemorrhage
36363	Choroidal rupture
36370	Choroidal detachment, unspecified
36371	Serous choroidal detachment
36372	Hemorrhagic choroidal detachment
3638	Other disorders of choroid
3639	Unspecified disorder of choroid
36400	Acute and subacute iridocyclitis, unspecified
36401	Primary iridocyclitis
36402	Recurrent iridocyclitis
36403	Secondary iridocyclitis, infectious
36404	Secondary iridocyclitis, noninfectious
36405	Hypopyon
36410	Chronic iridocyclitis, unspecified
36411	Chronic iridocyclitis in diseases classified elsewhere
36421	Fuchs' heterochromic cyclitis
36422	Glaucomatocyclitic crises
36423	Lens-induced iridocyclitis
36424	Vogt-koyanagi syndrome
3643	Unspecified iridocycliti
36441	Hyphema of iris and ciliary body
36442	Rubeosis iridis
36451	Essential or progressive iris atrophy
36452	Iridoschisis

Diagnosis Code	Description
36453	Pigmentary iris degeneration
36454	Degeneration of pupillary margin
36455	Miotic cysts of pupillary margin
36456	Degenerative changes of chamber angle
36457	Degenerative changes of ciliary body
36459	Other iris atrophy
36460	Idiopathic cysts of iris and ciliary body
36461	Implantation cysts of iris and ciliary body
36462	Exudative cysts of iris or anterior chamber
36463	Primary cyst of pars plana
36464	Exudative cyst of pars plana
36470	Adhesions of iris, unspecified
36471	Posterior synechiae of iris
36472	Anterior synechiae of iris
36473	Goniosynechiae
36474	Adhesions and disruptions of pupillary membranes
36475	Pupillary abnormalities
36476	Iridodialysis
36477	Recession of chamber angle of eye
3648	Other disorders of iris and ciliary body
3649	Unspecified disorder of iris and ciliary body
36500	Preglaucoma, unspecified
36501	Open angle with borderline glaucoma findings
36502	Anatomical narrow angle borderline glaucoma
36503	Steroid responders borderline glaucoma
36504	Ocular hypertension
36510	Open-angle glaucoma, unspecified
36511	Primary open angle glaucoma
36512	Low tension open-angle glaucoma
36513	Pigmentary open-angle glaucoma
36514	Glaucoma of childhood
36515	Residual stage of open angle glaucoma
36520	Primary angle-closure glaucoma, unspecified
36521	Intermittent angle-closure glaucoma
36522	Acute angle-closure glaucoma

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36523	Chronic angle-closure glaucoma
36524	Residual stage of angle-closure glaucoma
36531	Corticosteroid-induced glaucoma, glaucomatous stage
36532	Corticosteroid-induced glaucoma, residual stage
36541	Glaucoma associated with chamber angle anomalies
36542	Glaucoma associated with anomalies of iris
36543	Glaucoma associated with other anterior segment anomalies
36544	Glaucoma associated with systemic syndromes
36551	Phacolytic glaucoma
36552	Pseudoexfoliation glaucoma
36559	Glaucoma associated with other lens disorders
36560	Glaucoma associated with unspecified ocular disorder
36561	Glaucoma associated with pupillary block
36562	Glaucoma associated with ocular inflammations
36563	Glaucoma associated with vascular disorders of eye
36564	Glaucoma associated with tumors or cysts
36565	Glaucoma associated with ocular trauma
36581	Hypersecretion glaucoma
36582	Glaucoma with increased episcleral venous pressure
36583	Aqueous misdirection
36589	Other specified glaucoma
3659	Unspecified glaucoma
36600	Nonsenile cataract, unspecified
36601	Anterior subcapsular polar nonsenile cataract
36602	Posterior subcapsular polar nonsenile cataract
36603	Cortical, lamellar, or zonular nonsenile cataract
36604	Nuclear nonsenile cataract
36609	Other and combined forms of nonsenile cataract
36610	Senile cataract, unspecified
36611	Pseudoexfoliation of lens capsule

Diagnosis Code	Description
36612	Incipient senile cataract
36613	Anterior subcapsular polar senile cataract
36614	Posterior subcapsular polar senile cataract
36615	Cortical senile cataract
36616	Senile nuclear sclerosis
36617	Total or mature cataract
36618	Hypermature cataract
36619	Other and combined forms of senile cataract
36620	Traumatic cataract, unspecified
36621	Localized traumatic opacities
36622	Total traumatic cataract
36623	Partially resolved traumatic cataract
36630	Cataracta complicata, unspecified
36631	Cataract secondary to glaucomatous flecks (subcapsular)
36632	Cataract in inflammatory ocular disorders
36633	Cataract with ocular neovascularization
36634	Cataract in degenerative ocular disorders
36641	Diabetic cataract
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
36650	After-cataract, unspecified
36651	Soemmering's ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision
3668	Other cataract
3669	Unspecified cataract
36752	Total or complete internal ophthalmoplegia
36753	Spasm of accommodation
36800	Amblyopia, unspecified
36801	Strabismic amblyopia
36802	Deprivation amblyopia
36803	Refractive amblyopia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36810	Subjective visual disturbance, unspecified
36811	Sudden visual loss
36812	Transient visual loss
36813	Visual discomfort
36814	Visual distortions of shape and size
36815	Other visual distortions and entoptic phenomena
36816	Psychophysical visual disturbances
3682	Diplopia
36830	Binocular vision disorder, unspecified
36831	Suppression of binocular vision
36832	Simultaneous visual perception without fusion
36833	Fusion with defective stereopsis
36834	Abnormal retinal correspondence
36840	Visual field defect, unspecified
36841	Scotoma involving central area
36842	Scotoma of blind spot area
36843	Sector or arcuate visual field defects
36844	Other localized visual field defect
36845	Generalized visual field contraction or constriction
36846	Homonymous bilateral field defects
36847	Heteronymous bilateral field defects
36851	Protan defect
36852	Deutan defect
36853	Tritan defect
36854	Achromatopsia
36855	Acquired color vision deficiencies
36859	Other color vision deficiencies
36860	Night blindness, unspecified
36861	Congenital night blindness
36862	Acquired night blindness
36863	Abnormal dark adaptation curve
36869	Other night blindness
3688	Other specified visual disturbances
3689	Unspecified visual disturbance
36900	Blindness of both eyes, impairment level not further specified
36901	Better eye: total vision impairment; lesser eye: total vision impairment
36902	Better eye: near-total vision impairment; lesser eye: not further specified

Diagnosis Code	Description
36903	Better eye: near-total vision impairment; lesser eye: total vision impairment
36904	Better eye: near-total vision impairment; lesser eye: near-total vision impairment
36905	Better eye: profound vision impairment; lesser eye: not further specified
36906	Better eye: profound vision impairment; lesser eye: total vision impairment
36907	Better eye: profound vision impairment; lesser eye: near-total vision impairment
36908	Better eye: profound vision impairment; lesser eye: profound vision impairment
36910	Blindness, one eye; low vision other eye
36911	Better eye: severe vision impairment; lesser eye: blind, not further specified
36912	Better eye: severe vision impairment; lesser eye: total vision impairment
36913	Better eye: severe vision impairment; lesser eye: near-total vision impairment
36914	Better eye: severe vision impairment; lesser eye: profound vision impairment
36915	Better eye: moderate vision impairment; lesser eye: blind, not further specified
36916	Better eye: moderate vision impairment; lesser eye: total vision impairment
36917	Better eye: moderate vision impairment; lesser eye: near-total vision impairment
36918	Better eye: moderate vision impairment; lesser eye: profound vision impairment
36920	Low vision, both eyes, not otherwise specified
36921	Better eye: severe vision impairment; lesser eye; impairment not further specified
36922	Better eye: severe vision impairment; lesser eye: severe vision impairment
36923	Better eye: moderate vision impairment; lesser eye: impairment not further specified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36924	Better eye: moderate vision impairment; lesser eye: severe vision impairment
36925	Better eye: moderate vision impairment; lesser eye: moderate vision impairment
3693	Unqualified visual loss, both eyes
3694	Legal blindness, as defined in U.S.A.
36960	Blindness, one eye, not otherwise specified
36961	One eye: total vision impairment; other eye: not specified
36962	One eye: total vision impairment; other eye: near-normal vision
36963	One eye: total vision impairment; other eye: normal vision
36964	One eye: near-total vision impairment; other eye: vision not specified
36965	One eye: near-total vision impairment; other eye: near-normal vision
36966	One eye: near-total vision impairment; other eye: normal vision
36967	One eye: profound vision impairment; other eye: vision not specified
36968	One eye: profound vision impairment; other eye: near-normal vision
36969	One eye: profound vision impairment; other eye: normal vision
36970	Low vision, one eye, not otherwise specified
36971	One eye: severe vision impairment; other eye: vision not specified
36972	One eye: severe vision impairment; other eye: near-normal vision
36973	One eye: severe vision impairment; other eye: normal vision
36974	One eye: moderate vision impairment; other eye: vision not specified
36975	One eye: moderate vision impairment; other eye: near-normal vision
36976	One eye: moderate vision impairment; other eye: normal vision
3698	Unqualified visual loss, one eye
3699	Unspecified visual loss
37000	Corneal ulcer, unspecified

Diagnosis Code	Description
37001	Marginal corneal ulcer
37002	Ring corneal ulcer
37003	Central corneal ulcer
37004	Hypopyon ulcer
37005	Mycotic corneal ulcer
37006	Perforated corneal ulcer
37007	Mooren’s ulcer
37020	Superficial keratitis, unspecified
37021	Punctate keratitis
37022	Macular keratitis
37023	Filamentary keratitis
37024	Photokeratitis
37031	Phlyctenular keratoconjunctivitis
37032	Limbar and corneal involvement in vernal conjunctivitis
37033	Keratoconjunctivitis sicca, not specified as Sjogren’s
37034	Exposure keratoconjunctivitis
37035	Neurotrophic keratoconjunctivitis
37040	Keratoconjunctivitis, unspecified
37044	Keratitis or keratoconjunctivitis in exanthema
37049	Other keratoconjunctivitis, unspecified
37050	Interstitial keratitis, unspecified
37052	Diffuse interstitial keratitis
37054	Sclerosing keratitis
37055	Corneal abscess
37059	Other interstitial and deep keratitis
37060	Corneal neovascularization, unspecified
37061	Localized vascularization of cornea
37062	Pannus (corneal)
37063	Deep vascularization of cornea
37064	Ghost vessels (corneal)
3708	Other forms of keratitis
3709	Unspecified keratitis
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37105	Phthisical cornea
37110	Corneal deposit, unspecified
37111	Anterior corneal pigmentations

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37112	Stromal corneal pigmentations
37113	Posterior corneal pigmentations
37114	Kayser-Fleischer ring
37115	Other corneal deposits associated with metabolic disorders
37116	Argentous corneal deposits
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37124	Corneal edema due to wearing of contact lenses
37130	Corneal membrane change, unspecified
37131	Folds and rupture of bowman's membrane
37132	Folds in Descemet's membrane
37133	Rupture in Descemet's membrane
37140	Corneal degeneration, unspecified
37141	Senile corneal changes
37142	Recurrent erosion of cornea
37143	Band-shaped keratopathy
37144	Other calcerous degenerations of cornea
37145	Keratomalacia NOS
37146	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Other corneal degenerations
37150	Hereditary corneal dystrophy, unspecified
37151	Juvenile epithelial corneal dystrophy
37152	Other anterior corneal dystrophies
37153	Granular corneal dystrophy
37154	Lattice corneal dystrophy
37155	Macular corneal dystrophy
37156	Other stromal corneal dystrophies
37157	Endothelial corneal dystrophy
37158	Other posterior corneal dystrophies
37160	Keratoconus, unspecified
37161	Keratoconus, stable condition
37162	Keratoconus, acute hydrops
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal staphyloma

Diagnosis Code	Description
37181	Corneal anesthesia and hypoesthesia
37182	Corneal disorder due to contact lens
37189	Other corneal disorders
3719	Unspecified corneal disorder
37200	Acute conjunctivitis, unspecified
37201	Serous conjunctivitis, except viral
37202	Acute follicular conjunctivitis
37203	Other mucopurulent conjunctivitis
37204	Pseudomembranous conjunctivitis
37205	Acute atopic conjunctivitis
37210	Chronic conjunctivitis, unspecified
37211	Simple chronic conjunctivitis
37212	Chronic follicular conjunctivitis
37213	Vernal conjunctivitis
37214	Other chronic allergic conjunctivitis
37215	Parasitic conjunctivitis
37220	Blepharoconjunctivitis, unspecified
37221	Angular blepharoconjunctivitis
37222	Contact blepharoconjunctivitis
37230	Conjunctivitis, unspecified
37231	Rosacea conjunctivitis
37233	Conjunctivitis in mucocutaneous disease
37239	Other conjunctivitis
37240	Pterygium, unspecified
37241	Peripheral pterygium, stationary
37242	Peripheral pterygium, progressive
37243	Central pterygium
37244	Double pterygium
37245	Recurrent pterygium
37250	Conjunctival degeneration, unspecified
37251	Pinguecula
37252	Pseudopterygium
37253	Conjunctival xerosis
37254	Conjunctival concretions
37255	Conjunctival pigmentations
37256	Conjunctival deposits
37261	Granuloma of conjunctiva
37262	Localized adhesions and strands of conjunctiva
37263	Symblepharon
37264	Scarring of conjunctiva
37271	Hyperemia of conjunctiva

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37272	Conjunctival hemorrhage
37273	Conjunctival edema
37274	Vascular abnormalities of conjunctiva
37275	Conjunctival cysts
37281	Conjunctivochalasis
37289	Other disorders of conjunctiva
3729	Unspecified disorder of conjunctiva
37300	Blepharitis, unspecified
37301	Ulcerative blepharitis
37302	Squamous blepharitis
37311	Hordeolum externum
37312	Hordeolum internum
37313	Abscess of eyelid
3732	Chalazion
37331	Eczematous dermatitis of eyelid
37332	Contact and allergic dermatitis of eyelid
37333	Xeroderma of eyelid
37334	Discoid lupus erythematosus of eyelid
3734	Infective dermatitis of eyelid of types resulting in deformity
3735	Other infective dermatitis of eyelid
3736	Parasitic infestation of eyelid
3738	Other inflammations of eyelids
3739	Unspecified inflammation of eyelid
37400	Entropion, unspecified
37401	Senile entropion
37402	Mechanical entropion
37403	Spastic entropion
37404	Cicatricial entropion
37405	Trichiasis of eyelid without entropion
37410	Ectropion, unspecified
37411	Senile ectropion
37412	Mechanical ectropion
37413	Spastic ectropion
37414	Cicatricial ectropion
37420	Lagophthalmos, unspecified
37421	Paralytic lagophthalmos
37422	Mechanical lagophthalmos
37423	Cicatricial lagophthalmos
37430	Ptosis of eyelid, unspecified
37431	Paralytic ptosis
37432	Myogenic ptosis

Diagnosis Code	Description
37433	Mechanical ptosis
37434	Blepharochalasis
37441	Lid retraction or lag
37443	Abnormal innervation syndrome of eyelid
37444	Sensory disorders of eyelid
37445	Other sensorimotor disorders of eyelid
37446	Blepharophimosis
37450	Degenerative disorder of eyelid, unspecified
37451	Xanthelasma of eyelid
37452	Hyperpigmentation of eyelid
37453	Hypopigmentation of eyelid
37454	Hypertrichosis of eyelid
37455	Hypotrichosis of eyelid
37456	Other degenerative disorders of skin affecting eyelid
37481	Hemorrhage of eyelid
37482	Edema of eyelid
37483	Elephantiasis of eyelid
37484	Cysts of eyelids
37485	Vascular anomalies of eyelid
37486	Retained foreign body of eyelid
37487	Dermatochalasis
37489	Other disorders of eyelid
3749	Unspecified disorder of eyelid
37500	Dacryoadenitis, unspecified
37501	Acute dacryoadenitis
37502	Chronic dacryoadenitis
37503	Chronic enlargement of lacrimal gland
37511	Dacryops
37512	Other lacrimal cysts and cystic degeneration
37513	Primary lacrimal atrophy
37514	Secondary lacrimal atrophy
37515	Tear film insufficiency, unspecified
37516	Dislocation of lacrimal gland
37520	Epiphora, unspecified as to cause
37521	Epiphora due to excess lacrimation
37522	Epiphora due to insufficient drainage
37530	Dacryocystitis, unspecified
37531	Acute canaliculitis, lacrimal
37532	Acute dacryocystitis
37533	Phlegmonous dacryocystitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37541	Chronic canaliculitis
37542	Chronic dacryocystitis
37543	Lacrimal mucocele
37551	Eversion of lacrimal punctum
37552	Stenosis of lacrimal punctum
37553	Stenosis of lacrimal canaliculi
37554	Stenosis of lacrimal sac
37555	Obstruction of nasolacrimal duct, neonatal
37556	Stenosis of nasolacrimal duct, acquired
37557	Dacryolith
37561	Lacrimal fistula
37569	Other changes of lacrimal passages
37581	Granuloma of lacrimal passages
37589	Other disorders of lacrimal system
3759	Unspecified disorder of lacrimal system
37600	Acute inflammation of orbit, unspecified
37601	Orbital cellulitis
37602	Orbital periostitis
37603	Orbital osteomyelitis
37604	Orbital tenonitis
37610	Chronic inflammation of orbit, unspecified
37611	Orbital granuloma
37612	Orbital myositis
37613	Parasitic infestation of orbit
37621	Thyrotoxic exophthalmos
37622	Exophthalmic ophthalmoplegia
37630	Exophthalmos, unspecified
37631	Constant exophthalmos
37632	Orbital hemorrhage
37633	Orbital edema or congestion
37634	Intermittent exophthalmos
37635	Pulsating exophthalmos
37636	Lateral displacement of globe
37640	Deformity of orbit, unspecified
37641	Hypertelorism of orbit
37642	Exostosis of orbit
37643	Local deformities of orbit due to bone disease
37644	Orbital deformities associated with craniofacial deformities
37645	Atrophy of orbit

Diagnosis Code	Description
37646	Enlargement of orbit
37647	Deformity of orbit due to trauma or surgery
37650	Enophthalmos, unspecified as to cause
37651	Enophthalmos due to atrophy of orbital tissue
37652	Enophthalmos due to trauma or surgery
3766	Retained (old) foreign body following penetrating wound of orbit
37681	Orbital cysts
37682	Myopathy of extraocular muscles
37689	Other orbital disorders
3769	Unspecified disorder of orbit
37700	Papilledema, unspecified
37701	Papilledema associated with increased intracranial pressure
37702	Papilledema associated with decreased ocular pressure
37703	Papilledema associated with retinal disorder
37704	Foster-kennedy syndrome
37710	Optic atrophy, unspecified
37711	Primary optic atrophy
37712	Postinflammatory optic atrophy
37713	Optic atrophy associated with retinal dystrophies
37714	Glaucomatous atrophy (cupping) of optic disc
37715	Partial optic atrophy
37716	Hereditary optic atrophy
37721	Drusen of optic disc
37722	Crater-like holes of optic disc
37723	Coloboma of optic disc
37724	Pseudopapilledema
37730	Optic neuritis, unspecified
37731	Optic papillitis
37732	Retrobulbar neuritis (acute)
37733	Nutritional optic neuropathy
37734	Toxic optic neuropathy
37739	Other optic neuritis
37741	Ischemic optic neuropathy
37742	Hemorrhage in optic nerve sheaths
37743	Optic nerve hypoplasia
37749	Other disorders of optic nerve

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37751	Disorders of optic chiasm associated with pituitary neoplasms and disorders
37752	Disorders of optic chiasm associated with other neoplasms
37753	Disorders of optic chiasm associated with vascular disorders
37754	Disorders of optic chiasm associated with inflammatory disorders
37761	Disorders of other visual pathways associated with neoplasms
37762	Disorders of other visual pathways associated with vascular disorders
37763	Disorders of other visual pathways associated with inflammatory disorders
37771	Disorders of visual cortex associated with neoplasms
37772	Disorders of visual cortex associated with vascular disorders
37773	Disorders of visual cortex associated with inflammatory disorders
37775	Cortical blindness
3779	Unspecified disorder of optic nerve and visual pathways
37800	Esotropia, unspecified
37801	Monocular esotropia
37802	Monocular esotropia with A pattern
37803	Monocular esotropia with V pattern
37804	Monocular esotropia with other noncomitancies
37805	Alternating esotropia
37806	Alternating esotropia with A pattern
37807	Alternating esotropia with V pattern
37808	Alternating esotropia with other noncomitancies
37810	Exotropia, unspecified
37811	Monocular exotropia
37812	Monocular exotropia with A pattern
37813	Monocular exotropia with V pattern
37814	Monocular exotropia with other noncomitancies
37815	Alternating exotropia
37816	Alternating exotropia with A pattern
37817	Alternating exotropia with V pattern
37818	Alternating exotropia with other noncomitancies
37820	Intermittent heterotropia, unspecified
37821	Intermittent esotropia, monocular
37822	Intermittent esotropia, alternating
37823	Intermittent exotropia, monocular
37824	Intermittent exotropia, alternating
37830	Heterotropia, unspecified
37831	Hypertropia
37832	Hypotropia
37833	Cyclotropia
37834	Monofixation syndrome
37835	Accommodative component in esotropia
37840	Heterophoria, unspecified
37841	Esophoria
37842	Exophoria
37843	Vertical heterophoria
37844	Cyclophoria
37845	Alternating hyperphoria
37850	Paralytic strabismus, unspecified
37851	Third or oculomotor nerve palsy, partial
37852	Third or oculomotor nerve palsy, total
37853	Fourth or trochlear nerve palsy
37854	Sixth or abducens nerve palsy
37855	External ophthalmoplegia
37856	Total ophthalmoplegia
37860	Mechanical strabismus, unspecified
37861	Brown’s (tendon) sheath syndrome
37862	Mechanical strabismus from other musculofascial disorders
37863	Limited duction associated with other conditions
37871	Duane’s syndrome
37872	Progressive external ophthalmoplegia
37873	Strabismus in other neuromuscular disorders
37881	Palsy of conjugate gaze
37882	Spasm of conjugate gaze
37883	Convergence insufficiency or palsy
37884	Convergence excess or spasm
37885	Anomalies of divergence
37886	Internuclear ophthalmoplegia
37887	Other dissociated deviation of eye movements
3789	Unspecified disorder of eye movements

Diagnosis Code	Description
37900	Scleritis, unspecified
37901	Episcleritis periodica fugax
37902	Nodular episcleritis
37903	Anterior scleritis
37904	Scleromalacia perforans
37905	Scleritis with corneal involvement
37906	Brawny scleritis
37907	Posterior scleritis
37909	Other scleritis
37911	Scleral ectasia
37912	Staphyloma posticum
37913	Equatorial staphyloma
37914	Anterior staphyloma, localized
37915	Ring staphyloma
37916	Other degenerative disorders of sclera
37919	Other scleral disorders
37921	Vitreous degeneration
37922	Crystalline deposits in vitreous
37923	Vitreous hemorrhage
37924	Other vitreous opacities
37925	Vitreous membranes and strands
37926	Vitreous prolapse
37929	Other disorders of vitreous
37931	Aphakia
37932	Subluxation of lens
37933	Anterior dislocation of lens
37934	Posterior dislocation of lens
37939	Other disorders of lens
37940	Abnormal pupillary function, unspecified
37941	Anisocoria
37942	Miosis (persistent), not due to miotics
37943	Mydriasis (persistent), not due to mydriatics
37945	Argyll robertson pupil, atypical
37946	Tonic pupillary reaction
37949	Other anomalies of pupillary function
37950	Nystagmus, unspecified
37951	Congenital nystagmus
37952	Latent nystagmus
37953	Visual deprivation nystagmus
37954	Nystagmus associated with disorders of the vestibular system

Diagnosis Code	Description
37955	Dissociated nystagmus
37956	Other forms of nystagmus
37957	Deficiencies of saccadic eye movements
37958	Deficiencies of smooth pursuit movements
37959	Other irregularities of eye movements
3798	Other specified disorders of eye and adnexa
37990	Disorder of eye, unspecified
37991	Pain in or around eye
37992	Swelling or mass of eye
37993	Redness or discharge of eye
37999	Other ill-defined disorders of eye
74300	Clinical anophthalmos, unspecified
74303	Cystic eyeball, congenital
74306	Cryptophthalmos
74310	Microphthalmos, unspecified
74311	Simple microphthalmos
74312	Microphthalmos associated with other anomalies of eye and adnexa
74320	Buphthalmos, unspecified
74321	Simple buphthalmos
74322	Buphthalmos associated with other ocular anomalies
74330	Congenital cataract, unspecified
74331	Congenital capsular and subcapsular cataract
74332	Congenital cortical and zonular cataract
74333	Congenital nuclear cataract
74334	Congenital total and subtotal cataract
74335	Congenital aphakia
74336	Congenital anomalies of lens shape
74337	Congenital ectopic lens
74339	Other congenital cataract and lens anomalies
74341	Congenital anomalies of corneal size and shape
74342	Congenital corneal opacities, interfering with vision
74343	Other congenital corneal opacities
74344	Specified congenital anomalies of anterior chamber, chamber angle
74345	Aniridia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
74346	Other specified congenital anomalies of iris and ciliary body
74347	Specified congenital anomalies of sclera
74348	Multiple and combined congenital anomalies of anterior segment
74349	Other congenital anomalies of anterior segment
74351	Vitreous anomalies, congenital
74352	Fundus coloboma
74353	Chorioretinal degeneration, congenital
74354	Congenital folds and cysts of posterior segment
74355	Congenital macular changes
74356	Other retinal changes, congenital
74357	Specified congenital anomalies of optic disc
74358	Vascular anomalies, congenital
74359	Other congenital anomalies of posterior segment
74361	Congenital ptosis of eyelid
74362	Congenital deformities of eyelids
74363	Other specified congenital anomalies of eyelid
74364	Specified congenital anomalies of lacrimal gland
74365	Specified congenital anomalies of lacrimal passages
74366	Specified congenital anomalies of orbit
74369	Other congenital anomalies of eyelids, lacrimal system, and orbit
7438	Other specified anomalies of eye, congenital
7439	Unspecified anomaly of eye, congenital
8700	Laceration of skin of eyelid and periocular area
8701	Laceration of eyelid, full-thickness, not involving lacrimal passages
8702	Laceration of eyelid involving lacrimal passages
8703	Penetrating wound of orbit, without mention of foreign body
8704	Penetrating wound of orbit with foreign body
8708	Other specified open wounds of ocular adnexa
8709	Unspecified open wound of ocular adnexa
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
8712	Rupture of eye with partial loss of intraocular tissue
8713	Avulsion of eye
8714	Unspecified laceration of eye
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body
8717	Unspecified ocular penetration
8719	Unspecified open wound of eyeball
9180	Superficial injury of eyelids and periocular area
9181	Superficial injury of cornea
9182	Superficial injury of conjunctiva
9189	Other and unspecified superficial injuries of eye
9210	Black eye, not otherwise specified
9211	Contusion of eyelids and periocular area
9212	Contusion of orbital tissues
9213	Contusion of eyeball
9219	Unspecified contusion of eye
9300	Corneal foreign body
9301	Foreign body in conjunctival sac
9302	Foreign body in lacrimal punctum
9308	Foreign body in other and combined sites on external eye
9309	Foreign body in unspecified site on external eye
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa

CPT only copyright 2005 American Medical Association. All rights reserved.

Important: *Eye examinations for aphakia and disease or injury to the eye are not subject to any of the limitations listed above and are payable even if the Medicaid ID form does not have a checkmark under the Eye Exam column.*

36.4.28.2 Blepharoplasty Procedures

Procedure codes 2-67901, 2-67902, 2-67903, 2-67904, 2-67906, 2-67908, and 2-67909 are payable for children up to 21 years of age without prior authorization when performed for one of the following diagnosis codes:

Diagnosis Code	Description
74361	Congenital ptosis
74362	Congenital deformities of eyelids
74390	Unspecified anomaly of eye

Procedure codes 2-67901, 2-67902, 2-67903, 2-67904, 2-67906, and 2-67908 do not require prior authorization for clients 21 years of age or older when billed for the following diagnosis codes:

Diagnosis Code	Description
37431	Paralytic ptosis
37432	Myogenic ptosis
37433	Mechanical ptosis
37434	Blepharochalasis

Blepharoplasty and eyelid repair for adults 21 years of age and older requires mandatory prior authorization. The following information from the physician is required at the time of the request for blepharoplasty or eyelid repair for procedure codes 2-15820, 2-15821, 2-15822, 2-15823, 2-67900, 2-67909, 2-67911, 2-67961, 2-67966, 2-67971, 2-67973, 2-67974, and 2-67975:

- A brief history and physical evaluation
- Photographs of the eyelid problem
- Visual field measurements
- ICD-9-CM diagnosis(es)

The following blepharoplasty procedures do *not* require prior authorization: 2-67916, 2-67917, 2-67923, and 2-67924.

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

36.4.28.3 Corneal Topography

Procedure code 1-S0820 is a covered benefit. An initial or established visit/consultation is payable on the same day as corneal topography. These visits remain subject to the global surgery fee guidelines. If the topography is performed within the global surgical pre- and post-care days of the following ophthalmic procedures, the topography is denied as part of the procedure.

Procedure Codes		
2-65275	2-65280	2-65285
2-65286	2-65400	2-65420
2-65426	2-65450	2-65600
2-65710	2-65730	2-65750
2-65755	2-65880	2-66600
2-66605	2-66625	2-66630
2-66635	2-66820	2-66821
2-66983	2-66984	2-66985
2-66986	2-66830	2-66840
2-66850	2-66852	2-66920
2-66930	2-66940	

Interpretations are payable in the office and outpatient and inpatient settings. The technical component is only reimbursed in the office setting. Depending on the POS billed, a maximum of two interpretations (one for each eye) and one technical component *or* one total component and one additional interpretation (if topography was performed on both eyes) may be reimbursed.

Procedure Code	Maximum Fee
1-S0820	$85.22
I-S0820	$40.35
T-S0820	$44.88

Prior authorization is required for procedure code 1-S0820 when used for the fitting of contact lenses for diagnosis codes 36720, 36722, and 74341. Prior authorization criteria must be met for both corneal topography and contact lenses. Procedure code 1-S0820 also must be prior authorized when using diagnosis code 74341 for any reason.

Providers are to send prior authorization requests to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Topography is payable *without prior authorization* for conditions identified by the following diagnosis codes:

Diagnosis Code	Description
37000	Corneal ulcer, unspecified
37001	Marginal corneal ulcer
37002	Ring corneal ulcer
37003	Central corneal ulcer
37004	Hypopyon ulcer
37005	Mycotic corneal ulcer
37006	Perforated corneal ulcer

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37007	Mooren's ulcer
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37140	Corneal degeneration, unspecified
37142	Recurrent erosion of cornea
37146	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Corneal degenerations; other
37160	Keratoconus, unspecified
37161	Keratoconus, stable condition
37162	Keratoconus, acute hydrops
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal Staphyloma
37240	Pterygium, unspecified
37241	Peripheral pterygium, stationary
37242	Peripheral pterygium, progressive
37243	Central pterygium
37244	Double pterygium
37245	Recurrent pterygium
37289	Other disorders of conjunctiva
37821	Intermittent esotropia, monocular
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
99651	Mechanical complication due to corneal graft
V425	Organ or tissue replaced by trans-plant; cornea
V4560	States following surgery of eye and adnexa
V4561	Cataract extraction status
V4569	Other states following surgery of eye and adnexa

36.4.28.4 Echography Ophthalmic, A & B Scan

Procedure codes 4/I/T-76511, 4/I/T-76512, 4/I/T-76516, and 4/I/T-76519 are reimbursed for the following diagnosis codes. Ophthalmic A-scan (4/I/T-76511, 4/I/T-76516, or 4/I/T-76519) is reimbursed on the same day as ophthalmic B-scan (4/I/T-76512) when each meets the following diagnosis criteria:

Diagnosis Code	Description
36100	Retinal detachment with retinal defect, unspecified
36600	Nonsenile cataract, unspecified
36601	Anterior subcapsular polar nonsenile cataract
36602	Posterior subcapsular polar nonsenile cataract
36603	Cortical, lamellar, or zonular nonsenile cataract
36604	Nuclear nonsenile cataract
36609	Other and combined forms of nonsenile cataract
36610	Senile cataract, unspecified
36611	Pseudoexfoliation of lens capsule
36612	Incipient senile cataract
36613	Anterior subcapsular polar senile cataract
36614	Posterior subcapsular polar senile cataract
36615	Cortical senile cataract
36616	Senile nuclear sclerosis
36617	Total or mature cataract
36618	Hypermature cataract
36619	Other and combined forms of senile cataract
36620	Traumatic cataract, unspecified
36621	Localized traumatic opacities
36622	Total traumatic cataract
36623	Partially resolved traumatic cataract
36630	Cataracta complicata, unspecified
36631	Cataract secondary to glaucomatous flecks (subcapsular)
36632	Cataract in inflammatory ocular disorders
36633	Cataract with ocular neovascularization

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36634	Cataract in degenerative ocular disorders
36641	Diabetic cataract
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
36650	After-cataract, unspecified
36651	Soemmering's ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision
3668	Other cataract
3669	Unspecified cataract
37015	Phthisical cornea
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37110	Corneal deposit, unspecified
37111	Anterior corneal pigmentations
37112	Stromal corneal pigmentations
37113	Posterior corneal pigmentations
37114	Kayser-Fleischer ring
37115	Other corneal deposits associated with metabolic disorders
37116	Argentous corneal deposits
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37124	Corneal edema due to wearing of contact lenses
37130	Corneal membrane change, unspecified
37131	Folds and rupture of bowman's membrane
37132	Folds in Descemet's membrane
37133	Rupture in Descemet's membrane
37140	Corneal degeneration, unspecified
37141	Senile corneal changes
37142	Recurrent erosion of cornea

Diagnosis Code	Description
37143	Band-shaped keratopathy
37144	Other calcerous degenerations of cornea
37145	Keratomalacia NOS
37146	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Other corneal degenerations
37150	Hereditary corneal dystrophy, unspecified
37151	Juvenile epithelial corneal dystrophy
37152	Other anterior corneal dystrophies
37153	Granular corneal dystrophy
37154	Lattice corneal dystrophy
37155	Macular corneal dystrophy
37156	Other stromal corneal dystrophies
37158	Other posterior corneal dystrophies
37160	Keratoconus, unspecified
37162	Keratoconus, acute hydrops
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal staphyloma
37181	Corneal anesthesia and hypoesthesia
37182	Corneal disorder due to contact lens
37189	Other corneal disorders
3719	Unspecified corneal disorder
37931	Aphakia
37932	Subluxation of lens
37933	Anterior dislocation of lens
37934	Posterior dislocation of lens
37939	Other disorders of lens
74330	Congenital cataract, unspecified
74331	Congenital capsular and subcapsular cataract
74332	Congenital cortical and zonular cataract
74333	Congenital nuclear cataract
74334	Congenital total and subtotal cataract
74335	Congenital aphakia
74336	Congenital anomalies of lens shape
74337	Congenital ectopic lens
74339	Other congenital cataract and lens anomalies

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.28.5 Echography Ophthalmic Biometry, A-Mode

Procedure codes 4-76511, 4-76512, 4-76516, and 4-76519 are payable for the following diagnosis codes:

Diagnosis Code	Description
36600	Nonsenile cataract, unspecified
36601	Anterior subcapsular polar nonsenile cataract
36602	Posterior subcapsular polar nonsenile cataract
36603	Cortical, lamellar, or zonular nonsenile cataract
36604	Nuclear nonsenile cataract
36609	Other and combined forms of nonsenile cataract
36610	Senile cataract, unspecified
36611	Pseudoexfoliation of lens capsule
36612	Incipient senile cataract
36613	Anterior subcapsular polar senile cataract
36614	Posterior subcapsular polar senile cataract
36615	Cortical senile cataract
36616	Senile nuclear sclerosis
36617	Total or mature cataract
36618	Hypermature cataract
36619	Other and combined forms of senile cataract
36620	Traumatic cataract, unspecified
36621	Localized traumatic opacities
36622	Total traumatic cataract
36623	Partially resolved traumatic cataract
36630	Cataracta complicata, unspecified
36631	Cataract secondary to glaucomatous flecks (subcapsular)
36632	Cataract in inflammatory ocular disorders
36633	Cataract with ocular neovascularization
36634	Cataract in degenerative ocular disorders
36641	Diabetic cataract
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
36650	After-cataract, unspecified
36651	Soemmering's ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision
3668	Other cataract
3669	Unspecified cataract
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37105	Phthisical cornea
37110	Corneal deposit, unspecified
37111	Anterior corneal pigmentations
37112	Stromal corneal pigmentations
37113	Posterior corneal pigmentations
37114	Kayser-Fleischer ring
37115	Other corneal deposits associated with metabolic disorders
37116	Argentous corneal deposits
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37124	Corneal edema due to wearing of contact lenses
37130	Corneal membrane change, unspecified
37131	Folds and rupture of bowman's membrane
37132	Folds in Descemet's membrane
37133	Rupture in Descemet's membrane
37140	Corneal degeneration, unspecified
37141	Senile corneal changes
37142	Recurrent erosion of cornea
37143	Band-shaped keratopathy
37144	Other calcerous degenerations of cornea
37145	Keratomalacia NOS
37446	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Other corneal degenerations
37150	Hereditary corneal dystrophy, unspecified
37151	Juvenile epithelial corneal dystrophy
37152	Other anterior corneal dystrophies

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37153	Granular corneal dystrophy
37154	Lattice corneal dystrophy
37155	Macular corneal dystrophy
37156	Other stromal corneal dystrophies
37158	Other posterior corneal dystrophies
37160	Keratoconus, unspecified
37162	Keratoconus, acute hydrops
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal staphyloma
37181	Corneal anesthesia and hypoesthesia
37182	Corneal disorder due to contact lens
37189	Other corneal disorders
3719	Unspecified corneal disorder
37931	Aphakia
37932	Subluxation of lens
37933	Anterior dislocation of lens
37934	Posterior dislocation of lens
37939	Other disorders of lens
74330	Congenital cataract, unspecified
74331	Congenital capsular and subcapsular cataract
74332	Congenital cortical and zonular cataract
74333	Congenital nuclear cataract
74334	Congenital total and subtotal cataract
74335	Congenital aphakia
74336	Congenital anomalies of lens shape
74337	Congenital ectopic lens
74339	Other congenital cataract and lens anomalies

36.4.28.6 Echography Scan, Ophthalmic

Procedure codes 4/I/T-76510, 4/I/T-76511, 4/I/T-76512, 4/I/T-76513, and 4/I/T-76999 are payable for the following diagnosis codes or conditions:

Diagnosis Code	Description
1900	Malignant neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
1901	Malignant neoplasm of orbit
1984	Secondary malignant neoplasm of other parts of nervous system
2240	Benign neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
2241	Benign neoplasm of orbit
2340	Carcinoma in situ of eye
2388	Neoplasm of uncertain behavior of other specified sites
2389	Neoplasm of uncertain behavior, site unspecified
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
35257	Drusen (degenerative) of retina
36100	Retinal detachment with retinal defect, unspecified
36101	Recent retinal detachment, partial, with single defect
36102	Recent retinal detachment, partial, with multiple defects
36103	Recent retinal detachment, partial, with giant tear
36104	Recent retinal detachment, partial, with retinal dialysis
36105	Recent retinal detachment, total or subtotal
36106	Old retinal detachment, partial
36107	Old retinal detachment, total or subtotal
36110	Retinoschisis, unspecified
36111	Flat retinoschisis
36112	Bullous retinoschisis
36113	Primary retinal cysts
36114	Secondary retinal cysts
36119	Other retinoschisis and retinal cysts
3612	Serous retinal detachment
36130	Retinal defect, unspecified
36131	Round hole of retina without detachment
36132	Horseshoe tear of retina without detachment
36133	Multiple defects of retina without detachment
36135	Central retinal vein occlusion

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36136	Venous tributary (branch) occlusion of retina
36181	Traction detachment of retina
36189	Other forms of retinal detachment
3619	Unspecified retinal detachment
36201	Background diabetic retinopathy
36202	Proliferative diabetic retinopathy
36203	Nonproliferative diabetic retinopathy NOS
36204	Mild nonproliferative diabetic retinopathy
36205	Moderate nonproliferative diabetic retinopathy
36206	Severe nonproliferative diabetic retinopathy
36207	Diabetic macular edema
36210	Background retinopathy, unspecified
36211	Hypertensive retinopathy
36212	Exudative retinopathy
36213	Changes in vascular appearance of retina
36214	Retinal microaneurysms NOS
36215	Retinal telangiectasia
36216	Retinal neovascularization NOS
36217	Other intraretinal microvascular abnormalities
36218	Retinal vasculitis
36221	Retrolental fibroplasia
36229	Other nondiabetic proliferative retinopathy
36230	Retinal vascular occlusion, unspecified
36231	Central retinal artery occlusion
36232	Retinal arterial branch occlusion
36233	Partial retinal arterial occlusion
36234	Transient retinal arterial occlusion
36237	Venous engorgement of retina
36240	Retinal layer separation, unspecified
36241	Central serous retinopathy
36242	Serous detachment of retinal pigment epithelium
36243	Hemorrhagic detachment of retinal pigment epithelium
36250	Macular degeneration (senile) of retina, unspecified
36251	Nonexudative senile macular degeneration of retina

Diagnosis Code	Description
36252	Exudative senile macular degeneration of retina
36253	Cystoid macular degeneration of retina
36254	Macular cyst, hole, or pseudohole of retina
36255	Toxic maculopathy of retina
36256	Macular puckering of retina
36260	Peripheral retinal degeneration, unspecified
36261	Paving stone degeneration of retina
36262	Microcystoid degeneration of retina
36263	Lattice degeneration of retina
36264	Senile reticular degeneration of retina
36265	Secondary pigmentary degeneration of retina
36266	Secondary vitreoretinal degenerations
36270	Hereditary retinal dystrophy, unspecified
36271	Retinal dystrophy in systemic or cerebroretinal lipidoses
36272	Retinal dystrophy in other systemic disorders and syndromes
36273	Vitreoretinal dystrophies
36274	Pigmentary retinal dystrophy
36275	Other dystrophies primarily involving the sensory retina
36276	Dystrophies primarily involving the retinal pigment epithelium
36277	Retinal dystrophies primarily involving Bruch's membrane
36281	Retinal hemorrhage
36282	Retinal exudates and deposits
36283	Retinal edema
36284	Retinal ischemia
36285	Retinal nerve fiber bundle defects
36289	Other retinal disorders
36340	Choroidal degeneration, unspecified
36341	Senile atrophy of choroid
36342	Diffuse secondary atrophy of choroid
36343	Angioid streaks of choroid
36361	Choroidal hemorrhage, unspecified
36362	Expulsive choroidal hemorrhage
36363	Choroidal rupture
36370	Choroidal detachment, unspecified
36371	Serous choroidal detachment

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36372	Hemorrhagic choroidal detachment
36441	Hyphema of iris and ciliary body
36641	Diabetic cataract
37921	Vitreous degeneration
37922	Crystalline deposits in vitreous
37923	Vitreous hemorrhage
37925	Vitreous membranes and strands
37926	Vitreous prolapse
37934	Other vitreous opacities
37992	Swelling or mass of eye

36.4.28.7 Eye Surgery by Laser

All procedures are limited to reimbursement once every 90 days for the same eye with the exception of infants 0 through 23 months of age. Procedures performed on infants age 0 through 23 months are not subject to any frequency restrictions.

36.4.28.8 The Anterior Segment of the Eye–The Lens

Reimbursement for YAG laser surgery (2-66821) is limited to the following diagnosis codes:

Diagnosis Code	Description
36650	After-cataract, unspecified
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision

The Anterior Segment of the Eye–The Cornea

Laser surgery to the cornea by Laser-In-Situ Keratomileusis (LASIK) or photorefractive keratectomy (PRK) for the purpose of correcting nearsightedness (myopia), farsightedness (hyperopia), or astigmatism is not a benefit of the Texas Medicaid Program

Reimbursement for laser surgery to the cornea, procedure codes 2-65450, 2-65855, and 2-65860 is restricted to the following diagnosis codes:

Diagnosis Code	Description
36500	Preglaucoma, unspecified
36501	Open angle with borderline glaucoma findings
36502	Anatomical narrow angle borderline glaucoma
36503	Steroid responders borderline glaucoma
36504	Ocular hypertension
36510	Open-angle glaucoma, unspecified
36511	Primary open angle glaucoma
36512	Low tension open-angle glaucoma
36513	Pigmentary open-angle glaucoma
36514	Glaucoma of childhood
36515	Residual stage of open angle glaucoma
36520	Primary angle-closure glaucoma, unspecified
36521	Intermittent angle-closure glaucoma
36522	Acute angle-closure glaucoma
36523	Chronic angle-closure glaucoma
36524	Residual stage of angle-closure glaucoma
36531	Corticosteroid-induced glaucoma, glaucomatous stage
36532	Corticosteroid-induced glaucoma, residual stage
36541	Glaucoma associated with chamber angle anomalies
36542	Glaucoma associated with anomalies of iris
36543	Glaucoma associated with other anterior segment anomalies
36544	Glaucoma associated with systemic syndromes
36551	Phacolytic glaucoma
36552	Pseudoexfoliation glaucoma
36559	Glaucoma associated with other lens disorders
36560	Glaucoma associated with unspecified ocular disorder
36561	Glaucoma associated with pupillary block
36562	Glaucoma associated with ocular inflammations
36563	Glaucoma associated with vascular disorders of eye
36564	Glaucoma associated with tumors or cysts
36565	Glaucoma associated with ocular trauma
36581	Hypersecretion glaucoma
36582	Glaucoma with increased episcleral venous pressure
36583	Aqueous misdirection
36589	Other specified glaucoma
3659	Unspecified glaucoma

CPT only copyright 2005 American Medical Association. All rights reserved.

The Anterior Segment of the Eye–The Iris, Ciliary Body

Laser surgery to the anterior segment of the eye–the iris, ciliary body will be reimbursed only when billed with one of the following procedure codes:

Procedure Codes		
2-66600	2-66605	2-66710
2-66761	2-66762	2-66770

Reimbursement for procedure codes 2-66600, 2-66605, 2-66710, 2-66711, 2-66761, 2-66762, and 2-66770 is restricted to the following diagnosis codes:

Diagnosis Code	Description
36400	Acute and subacute iridocyclitis, unspecified
36401	Primary iridocyclitis
36402	Recurrent iridocyclitis
36403	Secondary iridocyclitis, infectious
36404	Secondary iridocyclitis, noninfectious
36405	Hypopyon
36410	Chronic iridocyclitis, unspecified
36411	Chronic iridocyclitis in diseases classified elsewhere
3642	Certain types of iridocyclitis
36421	Fuchs' heterochromic cyclitis
36422	Glaucomatocyclitic crises
36423	Lens-induced iridocyclitis
36424	Vogt-koyanagi syndrome
3643	Unspecified iridocyclitis
36500	Preglaucoma, unspecified
36501	Open angle with borderline glaucoma findings
36502	Anatomical narrow angle borderline glaucoma
36503	Steroid responders borderline glaucoma
36504	Ocular hypertension
36510	Open-angle glaucoma, unspecified
36511	Primary open angle glaucoma
36512	Low tension open-angle glaucoma
36513	Pigmentary open-angle glaucoma
36514	Glaucoma of childhood
36515	Residual stage of open angle glaucoma
36520	Primary angle-closure glaucoma, unspecified
36521	Intermittent angle-closure glaucoma
36522	Acute angle-closure glaucoma
36523	Chronic angle-closure glaucoma
36524	Residual stage of angle-closure glaucoma
36531	Corticosteroid-induced glaucoma, glaucomatous stage
36532	Corticosteroid-induced glaucoma, residual stage
36541	Glaucoma associated with chamber angle anomalies
36542	Glaucoma associated with anomalies of iris
36543	Glaucoma associated with other anterior segment anomalies
36544	Glaucoma associated with systemic syndromes
36551	Phacolytic glaucoma
36552	Pseudoexfoliation glaucoma
36559	Glaucoma associated with other lens disorders
36560	Glaucoma associated with unspecified ocular disorder
36561	Glaucoma associated with pupillary block
36562	Glaucoma associated with ocular inflammations
36563	Glaucoma associated with vascular disorders of eye
36564	Glaucoma associated with tumors or cysts
36565	Glaucoma associated with ocular trauma
36581	Hypersecretion glaucoma
36582	Glaucoma with increased episcleral venous pressure
36583	Aqueous misdirection
36589	Other specified glaucoma
3659	Unspecified glaucoma

Claims for iridectomy (2-66600 or 2-66605) are not reimbursed when billed for the same date of service as a trabeculectomy (2-66170 or 2-66172). These claims are considered for review when filed on appeal with documentation of medical necessity. The iridectomy is considered part of a trabeculectomy. An iridectomy billed with any other eye surgery on the same day suspends to Medical Policy for review.

CPT only copyright 2005 American Medical Association. All rights reserved.

An iridectomy is also considered part of certain types of cataract extractions. An iridectomy (2-66600 or 2-66605) is not reimbursed when billed for the same date of service as the cataract surgeries listed in the following table. The iridectomy is considered part of the cataract surgery. These claims are considered for review when filed on appeal with documentation of medical necessity.

Procedure Codes		
2-65920	2-66840	2-66850
2-66852	2-66920	2-66930
2-66940	2-66983	2-66984
2-66985	2-66986	

Posterior Segment of the Eye–Retina or Choroid

Laser surgery to the retina or choroid will be reimbursed only when billed with one of the following procedure codes:

Procedure Codes		
2-67105	2-67107	2-67108
2-67110	2-67112	2-67145
2-67210	2-67220	2-67221
2-67225	2-67228	2/F-G0183
2/F-G0186		

Reimbursement for procedure codes, listed in the previous table, is restricted to the following diagnosis codes:

Diagnosis Code	Description
1905	Malignant neoplasm of retina
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
36100	Retinal detachment with retinal defect, unspecified
36101	Recent retinal detachment, partial, with single defect
36102	Recent retinal detachment, partial, with multiple defects
36103	Recent retinal detachment, partial, with giant tear
36104	Recent retinal detachment, partial, with retinal dialysis
36105	Recent retinal detachment, total or subtotal
3612	Serous retinal detachment
36131	Round hole of retina without detachment
36132	Horseshoe tear of retina without detachment
36133	Multiple defects of retina without detachment
36181	Traction detachment of retina
36189	Other forms of retinal detachment
3619	Unspecified retinal detachment
36201	Background diabetic retinopathy
36201	Background diabetic retinopathy
36202	Proliferative diabetic retinopathy
36203	Nonproliferative diabetic retinopathy NOS
36204	Mild nonproliferative diabetic retinopathy
36205	Moderate nonproliferative diabetic retinopathy
36206	Severe nonproliferative diabetic retinopathy
36207	Diabetic macular edema
36210	Background retinopathy, unspecified
36211	Hypertensive retinopathy
36212	Exudative retinopathy
36213	Changes in vascular appearance of retina
36214	Retinal microaneurysms NOS
36215	Retinal telangiectasia
36216	Retinal neovascularization NOS
36217	Other intraretinal microvascular abnormalities
36218	Retinal vasculitis
36221	Retrolental fibroplasia
36229	Other nondiabetic proliferative retinopathy
36230	Retinal vascular occlusion, unspecified
36231	Central retinal artery occlusion
36232	Retinal arterial branch occlusion
36233	Partial retinal arterial occlusion
36234	Transient retinal arterial occlusion
36234	Senile reticular degeneration of retina
36235	Central retinal vein occlusion
36236	Venous tributary (branch) occlusion of retina
36237	Venous engorgement of retina

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36240	Retinal layer separation, unspecified
36241	Central serous retinopathy
36242	Serous detachment of retinal pigment epithelium
36243	Hemorrhagic detachment of retinal pigment epithelium
36250	Macular degeneration (senile) of retina, unspecified
36251	Nonexudative senile macular degeneration of retina
36252	Exudative senile macular degeneration of retina
36253	Cystoid macular degeneration of retina
36254	Macular cyst, hole, or pseudohole of retina
36255	Toxic maculopathy of retina
36256	Macular puckering of retina
36257	Drusen (degenerative) of retina
36260	Peripheral retinal degeneration, unspecified
36261	Paving stone degeneration of retina
36262	Microcystoid degeneration of retina
36263	Lattice degeneration of retina
36265	Secondary pigmentary degeneration of retina
36266	Secondary vitreoretinal degenerations
36281	Retinal hemorrhage

When billed for the same date of service, same eye, same provider, only one of the following procedure codes is reimbursed: 2/F-67220, 2-67221, 2/F-G0183, 2/F-G0184, or 2/F-G0186.

The Posterior Segment of the Eye, Vitreous–Vitrectomy

Laser surgery to the vitreous will be reimbursed only when billed with one of the following procedure codes: 2-67031, 2-67039, and 2-67040.

Reimbursement for procedure codes 2-67031, 2-67039, and 2-67040 is restricted to the following diagnosis codes:

Diagnosis Code	Description
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
36000	Purulent endophthalmitis, unspecified
36001	Acute endophthalmitis
36002	Panophthalmitis
36003	Chronic endophthalmitis
36004	Vitreous abscess
36012	Panuveitis
36050	Foreign body, magnetic, intraocular, unspecified
36051	Foreign body, magnetic, in anterior chamber of eye
36052	Foreign body, magnetic, in iris or ciliary body
36053	Foreign body, magnetic, in lens
36054	Foreign body, magnetic, in vitreous
36055	Foreign body, magnetic, in posterior wall
36059	Intraocular foreign body, magnetic, in other or multiple sites
36060	Foreign body, intraocular, unspecified
36061	Foreign body in anterior chamber
36062	Foreign body in iris or ciliary body
36063	Foreign body in lens
36064	Foreign body in vitreous
36065	Foreign body in posterior wall of eye
36069	Foreign body, in other or multiple sites, nonmagnetic
36100	Retinal detachment with retinal defect, unspecified
36102	Recent retinal detachment, partial, with multiple defects
36103	Recent retinal detachment, partial, with giant tear
36104	Recent retinal detachment, partial, with retinal dialysis
36105	Recent retinal detachment, total or subtotal
36106	Old retinal detachment, partial
36107	Old retinal detachment, total or subtotal
36130	Retinal defect, unspecified
36132	Horseshoe tear of retina without detachment
36202	Proliferative diabetic retinopathy

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36203	Nonproliferative diabetic retinopathy NOS
36204	Mild nonproliferative diabetic retinopathy
36205	Moderate nonproliferative diabetic retinopathy
36206	Severe nonproliferative diabetic retinopathy
36207	Diabetic macular edema
36212	Exudative retinopathy
36252	Exudative senile macular degeneration of retina
36254	Macular cyst, hole, or pseudohole of retina
36256	Macular puckering of retina
36281	Retinal hemorrhage
36362	Expulsive choroidal hemorrhage
36370	Choroidal detachment, unspecified
36371	Serous choroidal detachment
36372	Hemorrhagic choroidal detachment
36520	Primary angle-closure glaucoma, unspecified
3711	Corneal pigmentations and deposits
3712	Corneal edema
3713	Changes of corneal membranes
3714	Corneal degenerations
3715	Hereditary corneal dystrophies
3716	Keratoconus
3717	Other corneal deformities
3718	Other corneal disorders
3719	Unspecified corneal disorder
37923	Vitreous hemorrhage
37924	Other vitreous opacities
37925	Vitreous membranes and strands
37926	Vitreous prolapse
37929	Other disorders of vitreous
37932	Subluxation of lens
37934	Posterior dislocation of lens
8710	Open wound of eyeball
99653	Mechanical complication of prosthetic ocular lens prosthesis
99882	Cataract fragments in eye following cataract surgery

- When billed for the same date of service, same eye, any provider procedure codes 2-67500 and 2-69990 are denied as part of 2-66821.
- Procedure code 2-66821 is denied as part of 2-66830, 2-67031, and 2-67228.
- Procedure codes 2-66820, 2-66984, 2-66985, and 2-67036 will pay according to multiple surgery guidelines when billed with procedure code 2-66821.
- When billed for the same date of service, same eye, different provider procedure codes 266821, 2-67005, 2-67010, and 2-69990 will deny as part of 2-67031.
- When billed for the same date of service, same eye, any provider procedure code 2-67031 will deny as part of any of the following procedure codes: 2-67036, 2-67120, 2-67121, 2-67208, 2-67218, 2-67108, 2-67110, 2-67227, and 2-67228.

All laser eye surgeries are payable only to the following provider types:

Provider Type	Description
03	CIHCP
19	Physician (DO)
20	Physician (MD)
21	Physician group (DO)
22	Physician group (MD)

36.4.28.9 Eye Surgery by Incision

The following restrictions apply to vitrectomy and cataract surgeries:

- Procedure codes 2-66500, 2-66505, 2-66600, 2-66605, 2-66625, 2-66630, and 66635 are denied as part of another procedure when billed with procedure codes 2-66170 or 2-66172 on the same eye for the same date of surgery.
- Effective January 1, 2005, when cataract extraction and vitrectomy are billed on the same date of service for clients 8 years of age and under, the vitrectomy will pay at full TMRM allowance and the cataract extraction will pay at 50 percent per multiple surgical procedure payment guidelines.
- Procedure code 2-66020 is denied as part of another procedure when billed with any related eye surgery procedure code.
- Procedure code 2-67036 is reimbursed when billed alone.
- Procedure code 2-67036 is denied as part of another procedure when billed with procedure codes 2-67038, 2-67039, 2-67040, and/or 2-67108.
- Procedure codes 2-67039 and 2-67040 are combined and reimbursed as procedure code 2-67108 when billed by the same provider for the same date of service.

CPT only copyright 2005 American Medical Association. All rights reserved.

- For clients 8 years of age or younger, the following procedure codes, performed on the same eye, will be considered for payment per multiple surgery guidelines:

Procedure Codes		
2-66840	2-66850	2-66852
2-66920	2-66930	2-66940
2-66983	2-66984	2-67005
2-67010	2-67015	2-67025
2-67027	2-67028	2-67030
2-67031	2-67036	2-67038
2-67039	2-67040	

- For clients older than 8 years of age, the following procedure codes will be paid when performed on the same eye:

Procedure Codes		
2-67005	2-67010	2-67015
2-67025	2-67027	2-67028
2-67030	2-67031	2-67036
2-67038	2-67039	2-67040

- For clients older than 8 years of age, the following procedure codes will be denied as part of the codes listed above, when performed on the same eye.

Procedure Codes		
2-66840	2-66850	2-66852
2-66920	2-66930	2-66940
2-66983	2-66984	

Vitrectomy procedure codes 2/F-67036, 2/F-67038, 2/F-67039, and 2/F-67040 are diagnosis-restricted to the following codes:

Diagnosis Code	Description
25050	Diabetes with ophthalmic manifestations, type II or unspecified type, not stated as uncontrolled
25051	Diabetes with ophthalmic manifestations, type I (juvenile type), not stated as uncontrolled
25052	Diabetes with ophthalmic manifestations, type II or unspecified type, uncontrolled
25053	Diabetes with ophthalmic manifestations, type I (juvenile type), uncontrolled
36000	Purulent endophthalmitis, unspecified
36001	Acute endophthalmitis
36002	Panophthalmitis
36003	Chronic endophthalmitis
36004	Vitreous abscess
36012	Panuveitis
36050	Foreign body, magnetic, intraocular, unspecified
36051	Foreign body, magnetic, in anterior chamber of eye
36052	Foreign body, magnetic, in iris or ciliary body
36053	Foreign body, magnetic, in lens
36054	Foreign body, magnetic, in vitreous
36055	Foreign body, magnetic, in posterior wall
36059	Intraocular foreign body, magnetic, in other or multiple sites
36060	Foreign body, intraocular, unspecified
36061	Foreign body in anterior chamber
36062	Foreign body in iris or ciliary body
36063	Foreign body in lens
36064	Foreign body in vitreous
36065	Foreign body in posterior wall of eye
36069	Intraocular foreign body in other or multiple sites
36100	Retinal detachment with retinal defect, unspecified
36102	Recent retinal detachment, partial, with multiple defects
36103	Recent retinal detachment, partial, with giant tear
36104	Recent retinal detachment, partial, with retinal dialysis
36105	Recent retinal detachment, total or subtotal
36106	Old retinal detachment, partial
36107	Old retinal detachment, total or subtotal
36130	Retinal defect, unspecified
36132	Horseshoe tear of retina without detachment
36202	Proliferative diabetic retinopathy
36212	Exudative retinopathy
36252	Exudative senile macular degeneration
36254	Macular cyst, hole or pseudohole
36256	Macular puckering
36281	Retinal hemorrhage
36362	Expulsive choroidal hemorrhage
36370	Proliferative diabetic retinopathy
36371	Serous choroidal detachment
36372	Hemorrhagic choroidal detachment

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36520	Primary angle-closure glaucoma, unspecified
37923	Disorders of vitreous
37924	Other vitreous opacities
37925	Vitreous membranes and strands
37926	Vitreous prolapse
37929	Other disorders of the vitreous
37932	Subluxation of lens
37934	Posterior dislocation of lens
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
8712	Rupture of eye with partial loss of intraocular tissue
8713	Avulsion of eye
8714	Unspecified laceration of eye
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body
8717	Unspecified ocular penetration
8719	Unspecified open wound of eyeball
99653	Mechanical complications of prosthetic device due to ocular lens prosthesis
99882	Cataract fragments in eye following cataract surgery

Cataract procedure codes 2/F-66983, 2/F-66984, 2/F-66985, and 2/F-66986 are diagnosis-restricted to the following codes:

Diagnosis Code	Description
36551	Phacolytic glaucoma
36600	Nonsenile cataract, unspecified
36601	Anterior subcapsular polar nonsenile cataract
36602	Posterior subcapsular polar nonsenile cataract
36603	Cortical, lamellar, or zonular nonsenile cataract
36604	Nuclear nonsenile cataract
36609	Other and combined forms of nonsenile cataract
36610	Senile cataract, unspecified
36611	Pseudoexfoliation of lens capsule
36612	Incipient senile cataract
36613	Anterior subcapsular polar senile cataract
36614	Posterior subcapsular polar senile cataract
36615	Cortical senile cataract
36616	Senile nuclear sclerosis
36617	Total or mature cataract
36618	Hypermature cataract
36619	Other and combined forms of senile cataract
36620	Traumatic cataract
36621	Localized traumatic opacities
36622	Total traumatic cataract
36623	Partially resolved traumatic cataract
36630	Cataracta complicata, unspecified
36631	Cataract secondary to glaucomatous flecks (subcapsular)
36632	Cataract in inflammatory ocular disorders
36633	Cataract with ocular neovascularization
36634	Cataract in degenerative ocular disorders
36641	Diabetic cataract
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
36650	After-cataract, unspecified
36651	Soemmering's ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision
3668	Other cataract
3669	Unspecified cataract

36.4.28.10 Fomivirsen Sodium Intravitreal Injectable, Vitravene®

Procedure code 1-J1452 is reimbursed when billed for the following diagnosis codes:

Diagnosis Code	Description
0785	Cytomegaloviral disease
36320	Chorioretinitis, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.28.11 Intraocular Lenses

An intraocular lens (IOL) (9-V2630, 9-V2631, and 9-V2632) is reimbursed only to physicians in the office setting (POS 1). Providers must submit a copy of the manufacturer's invoice for the IOL to TMHP with their claim. Reimbursement for the lens is limited to the actual acquisition cost for the lens (taking into account any discount) plus a handling fee not to exceed 5 percent of the acquisition cost.

Important: *Medicaid does not reimburse physicians who supply IOLs to* ASCs/HASCs*; payment for the IOL is included in the facility fee.*

Physicians are reimbursed for the IOL in the office setting (POS 1). Physicians are not reimbursed in the inpatient setting (POS 3) or ASCs/HASCs, and outpatient facilities (POS 5). ASCs/HASCs are paid by surgical code: 9-V2630, 9-V2631, and 9-V2632.

Reimbursement for an IOL is limited to the following provider types:

Provider Type	Description
03	CIHCP
19	Physician (DO)
20	Physician (MD)
21	Physician group (DO)
22	Physician group (MD)

Reimbursement for the surgical procedure necessary to implant an IOL remains unchanged.

36.4.28.12 Intravitreal Drug Delivery System

Procedure codes 2/F-67027 and 2/F-67121 pertain to the procurement, implantation, and removal of an intravitreal drug delivery system (e.g., a ganciclovir implant). They are set to autodeny when billed concurrently.

The following diagnosis codes are valid for procedure code 2/F-67027:

Diagnosis Code	Description
0785	Cytomegaloviral disease
36320	Chorioretinitis, unspecified

36.4.28.13 Iridectomy/Iridotomy/Trabeculectomy

If separate charges are billed for an iridectomy (2-66600, 2-66605, 2-66625, 2-66630, and 2-66635), or iridotomy (2-66500 and 2-66505), and a trabeculectomy (2-66170) on the same day, only the trabeculectomy is paid.

36.4.28.14 Ophthalmic Ultrasound Foreign Body Localization

Procedure code 4-76529 is payable for the following diagnosis codes:

Diagnosis Code	Description
36050	Foreign body, magnetic, intraocular, unspecified
36051	Foreign body, magnetic, in anterior chamber of eye
36052	Foreign body, magnetic, in iris or ciliary body
36063	Foreign body, magnetic, in lens
36054	Foreign body, magnetic, in vitreous
36055	Foreign body, magnetic, in posterior wall
36059	Intraocular foreign body, magnetic, in other or multiple sites
36060	Foreign body, intraocular, unspecified
36061	Foreign body in anterior chamber
36063	Foreign body in lens
36064	Foreign body in vitreous
36065	Foreign body in posterior wall of eye
36069	Intraocular foreign body in other or multiple sites
3766	Retained (old) foreign body following penetrating wound of orbit
8704	Penetrating wound of orbit with foreign body
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body
9300	Corneal foreign body
9301	Foreign body in conjunctival sac
9302	Foreign body in lacrimal punctum
9308	Foreign body in other and combined sites on external eye
9309	Foreign body in unspecified site on external eye

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.28.15 Ophthalmological Services Billed with a Diagnosis of Cataract

Claims submitted with the following procedure codes and the diagnosis of cataract(s) are denied because they are not routinely medically indicated:

Procedure Codes		
1-92020	1-92060	1-92081
1-92082	1-92083	1-92100
1-92120	1-92225	1-92226
1-92230	1-92235	1-92250
1-92260	1-92265	1-92270
1-92275	1-92285	1-92286
1-92287	5-95930	

36.4.29 Organ/Tissue Transplants

Organ/tissue transplants that include bone marrow, peripheral stem cell, heart, lung, liver, kidney, and combined heart/lung, are a benefit of the Texas Medicaid Program. Organ/tissue transplants are reimbursed only when performed in an institution that is fully qualified by the Texas Medicaid Program to perform transplant services.

If a Medicaid client receives a transplant in a facility not approved by the Texas Medicaid Program, the patient must be discharged from the facility to be considered to receive other medical and hospital benefits under the Texas Medicaid Program. Coverage for other services needed as a result of complications of the transplant may be considered when medically necessary, reasonable, and federally allowable.

Texas Medicaid will not pay for routine post-transplant services for transplant patients in facilities not approved by the Texas Medicaid Program.

Transplants are covered by the Medicare program; therefore, for clients eligible for both Medicare and Medicaid, Medicaid will pay the deductible or coinsurance portion only as applicable. Medicaid will not pay a transplant service denied by Medicare for a Medicare-eligible client.

If a transplant has been prior authorized as medically necessary by HHSC or its designee because of an emergent, life-threatening situation, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness may be covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay. Physician services that HHSC or its designee determines to be reasonable and medically necessary also are covered during the 30-day period. Day limitations do not apply for clients younger than 21 years of age.

Expenses for a single inpatient hospital admission for a prior authorized transplant are not included in the annual $200,000 inpatient expenditure cap. Dollar limitations do not apply for clients younger than 21 years of age.

Refer to: "Organ/Tissue Transplant Services" on page 25-10 for more information about the transplant facility approval criteria.

36.4.29.1 Stem Cell Transplants

1) Allogeneic and autologous stem cell transplantation is a covered benefit of the Texas Medicaid Program when prior authorized and performed in an approved stem cell transplantation facility. Stem cell transplantation is a process in which stem cells are obtained from either a client's or donor's bone marrow, peripheral blood, or umbilical cord blood for intravenous infusion. The transplant can be used to effect hematopoietic reconstitution following severely myelotoxic doses of chemotherapy and/or radiotherapy used to treat various malignancies, and also can be used to restore function in clients having an inherited or acquired deficiency or defect.
2) Benefits are not available for any experimental or investigational services, supplies, or procedures.
3) Coverage of stem cell transplantation is limited to the following procedure codes: 2-38240, 2-38241, 2-38242, and 2-38999. The unlisted procedure code 2-38999 should be used to indicate an umbilical cord blood transplant.
4) *Allogenic* stem cell transplantation is a covered benefit for the following diagnosis codes with associated restrictions referenced in paragraph six.

Diagnosis Code	Description
1916	Malignant neoplasm of cerebellum NOS
20000	Reticulosarcoma, unspecified site
20001	Reticulosarcoma involving lymph nodes of head, face, and neck
20002	Reticulosarcoma involving intrathoracic lymph nodes
20003	Reticulosarcoma involving intra-abdominal lymph nodes
20004	Reticulosarcoma involving lymph nodes of axilla and upper limb
20005	Reticulosarcoma involving lymph nodes of inguinal region and lower limb
20006	Reticulosarcoma involving intrapelvic lymph node
20007	Reticulosarcoma involving spleen
20008	Reticulosarcoma involving lymph nodes of multiple sites
20010	Lymphosarcoma, unspecified site
20011	Lymphosarcoma involving lymph nodes of head, face, and neck

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20012	Lymphosarcoma involving intrathoracic lymph nodes
20013	Lymphosarcoma involving intra-abdominal lymph nodes
20014	Lymphosarcoma involving lymph nodes of axilla and upper limb
20015	Lymphosarcoma involving lymph nodes of inguinal region and lower limb
20016	Lymphosarcoma involving intrapelvic lymph nodes
20017	Lymphosarcoma involving spleen
20018	Lymphosarcoma involving lymph nodes of multiple sites
20020	Burkitt's tumor or lymphoma, unspecified site
20021	Burkitt's tumor or lymphoma involving lymph nodes of head, face, and neck
20022	Burkitt's tumor or lymphoma involving intrathoracic lymph nodes
20023	Burkitt's tumor or lymphoma involving intra-abdominal lymph nodes
20024	Burkitt's tumor or lymphoma involving lymph nodes of axilla and upper limb
20025	Burkitt's tumor or lymphoma involving lymph nodes of inguinal region and lower limb
20026	Burkitt's tumor or lymphoma involving intrapelvic lymph nodes
20027	Burkitt's tumor or lymphoma involving spleen
20028	Burkitt's tumor or lymphoma involving lymph nodes of multiple sites
20080	Other named variants of lymphosarcoma and reticulosarcoma, unspecified site
20081	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of head, face, and neck
20082	Other named variants of lymphosarcoma and reticulosarcoma involving intrathoracic lymph nodes
20083	Other named variants of lymphosarcoma and reticulosarcoma involving intra-abdominal lymph nodes
20084	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of axilla and upper limb
20085	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of inguinal region and lower limb

Diagnosis Code	Description
20086	Other named variants of lymphosarcoma and reticulosarcoma involving intrapelvic lymph nodes
20087	Other named variants of lymphosarcoma and reticulosarcoma involving spleen
20088	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of multiple sites
20100	Hodgkin's disease
20102	Hodgkin's paragranuloma involving intrathoracic lymph nodes
20103	Hodgkin's paragranuloma involving intra-abdominal lymph nodes
20104	Hodgkin's paragranuloma involving lymph nodes of axilla and upper limb
20105	Hodgkin's paragranuloma involving lymph nodes of inguinal region and lower limb
20106	Hodgkin's paragranuloma involving intrapelvic lymph nodes
20107	Hodgkin's paragranuloma involving spleen
20108	Hodgkin's paragranuloma involving lymph nodes of multiple sites
20110	Hodgkin's granuloma, unspecified site
20111	Hodgkin's granuloma involving lymph nodes of head, face, and neck
20112	Hodgkin's granuloma involving intrathoracic lymph nodes
20113	Hodgkin's granuloma involving intra-abdominal lymph nodes
20114	Hodgkin's granuloma involving lymph nodes of axilla and upper limb
20115	Hodgkin's granuloma involving lymph nodes of inguinal region and lower limb
20116	Hodgkin's granuloma involving intrapelvic lymph nodes
20117	Hodgkin's granuloma involving spleen
20118	Hodgkin's granuloma involving lymph nodes of multiple sites
20120	Hodgkin's sarcoma, unspecified site
20121	Hodgkin's sarcoma involving lymph nodes of head, face, and neck
20122	Hodgkin's sarcoma involving intrathoracic lymph nodes
20123	Hodgkin's sarcoma involving intra-abdominal lymph nodes

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20124	Hodgkin's sarcoma involving lymph nodes of axilla and upper limb
20125	Hodgkin's sarcoma involving lymph nodes of inguinal region and lower limb
20126	Hodgkin's sarcoma involving intrapelvic lymph nodes
20127	Hodgkin's sarcoma involving spleen
20128	Hodgkin's sarcoma involving lymph nodes of multiple sites
20140	Hodgkin's disease, lymphocytic-histi-ocytic predominance, unspecified site
20141	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving lymph nodes of head, face, and neck
20142	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving intrathoracic lymph nodes
20143	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving intra-abdominal lymph nodes
20144	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving lymph nodes of axilla and upper limb
20145	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving lymph nodes of inguinal region and lower limb
20146	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving intrapelvic lymph nodes
20147	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving spleen
20148	Hodgkin's disease, lymphocytic-histi-ocytic predominance involving lymph nodes of multiple s
20150	Hodgkin's disease, nodular sclerosis, unspecified site
20151	Hodgkin's disease, nodular sclerosis, involving lymph nodes of head, face, and neck
20152	Hodgkin's disease, nodular sclerosis, involving intrathoracic lymph nodes
20153	Hodgkin's disease, nodular sclerosis, involving intra-abdominal lymph nodes
20154	Hodgkin's disease, nodular sclerosis, involving lymph nodes of axilla and upper limb
20155	Hodgkin's disease, nodular sclerosis, involving lymph nodes of inguinal region and lower limb

Diagnosis Code	Description
20156	Hodgkin's disease, nodular sclerosis, involving intrapelvic lymph nodes
20157	Hodgkin's disease, nodular sclerosis, involving spleen
20158	Hodgkin's disease, nodular sclerosis, involving lymph nodes of multiple sites
20160	Hodgkin's disease, mixed cellularity, unspecified site
20161	Hodgkin's disease, mixed cellularity, involving lymph nodes of head, face, and neck
20162	Hodgkin's disease, mixed cellularity, involving intrathoracic lymph nodes
20163	Hodgkin's disease, mixed cellularity, involving intra-abdominal lymph nodes
20164	Hodgkin's disease, mixed cellularity, involving lymph nodes of axilla and upper limb
20165	Hodgkin's disease, mixed cellularity, involving lymph nodes of inguinal region and lower limb
20166	Hodgkin's disease, mixed cellularity, involving intrapelvic lymph nodes
20167	Hodgkin's disease, mixed cellularity, involving spleen
20168	Hodgkin's disease, mixed cellularity, involving lymph nodes of multiple sites
20170	Hodgkin's disease, lymphocytic depletion, unspecified site
20171	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of head, face, and neck
20172	Hodgkin's disease, lymphocytic depletion, involving intrathoracic lymph nodes
20173	Hodgkin's disease, lymphocytic depletion, involving intra-abdominal lymph nodes
20174	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of axilla and upper limb
20175	Hodgkin's disease, lymphocytic depletion, involving lymph nodes of inguinal region and lower limb
20176	Hodgkin's disease, lymphocytic depletion, involving intrapelvic lymph nodes
20177	Hodgkin's disease, lymphocytic depletion, involving spleen

20013	Lymphosarcoma involving intra-abdominal lymph nodes
20014	Lymphosarcoma involving lymph nodes of axilla and upper limb
20015	Lymphosarcoma involving lymph nodes of inguinal region and lower limb

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20016	Lymphosarcoma involving intrapelvic lymph nodes
20017	Lymphosarcoma involving spleen
20018	Lymphosarcoma involving lymph nodes of multiple sites
20020	Burkitt's tumor or lymphoma, unspecified site
20021	Burkitt's tumor or lymphoma involving lymph nodes of head, face, and neck
20022	Burkitt's tumor or lymphoma involving intrathoracic lymph nodes
20023	Burkitt's tumor or lymphoma involving intra-abdominal lymph nodes
20024	Burkitt's tumor or lymphoma involving lymph nodes of axilla and upper limb
20025	Burkitt's tumor or lymphoma involving lymph nodes of inguinal region and lower limb
20026	Burkitt's tumor or lymphoma involving intrapelvic lymph nodes
20027	Burkitt's tumor or lymphoma involving spleen
20028	Burkitt's tumor or lymphoma involving lymph nodes of multiple sites
20080	Other named variants of lymphosarcoma and reticulosarcoma, unspecified site
20081	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of head, face, and neck
20082	Other named variants of lymphosarcoma and reticulosarcoma involving intrathoracic lymph nodes
20083	Other named variants of lymphosarcoma and reticulosarcoma involving intra-abdominal lymph nodes
20084	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of axilla and upper limb
20085	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of inguinal region and lower limb
20086	Other named variants of lymphosarcoma and reticulosarcoma involving intrapelvic lymph nodes
20087	Other named variants of lymphosarcoma and reticulosarcoma involving spleen
20088	Other named variants of lymphosarcoma and reticulosarcoma involving lymph nodes of multiple sites

Diagnosis Code	Description
20200	Nodular lymphoma, unspecified site
20201	Nodular lymphoma involving lymph nodes of head, face, and neck
20202	Nodular lymphoma involving intrathoracic lymph nodes
20203	Nodular lymphoma involving intra-abdominal lymph nodes
20204	Nodular lymphoma involving lymph nodes of axilla and upper limb
20205	Nodular lymphoma involving lymph nodes of inguinal region and lower limb
20206	Nodular lymphoma involving intrapelvic lymph nodes
20207	Nodular lymphoma involving spleen
20208	Nodular lymphoma involving lymph nodes of multiple sites
20290	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue, unspecified site
20291	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of head, face, and neck
20292	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intrathoracic lymph nodes
20293	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intra-abdominal lymph node
20294	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of axilla and upper limb
20295	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving lymph nodes of inguinal region and lower limb
20296	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving intrapelvic lymph nodes
20297	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving spleen
20298	Other and unspecified malignant neoplasms of lymphoid and histiocytic tissue involving spleen

- Stem cell transplant is allowed for Hodgkin's diagnosis in advanced disease state with failure of conventional therapy.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Other lymphomas refers to T-cell lymphomas, which are a type of non-Hodgkin's lymphoma. Coverage is allowed after recurrence of disease.
- Coverage of lymphoid leukemia is allowed for acute lymphoblastic or acute lymphocytic leukemias in remission.
- Wiskott-Aldrich syndrome is an x-linked disorder affecting lymphocyte and platelet function.
- Coverage of combined immunity deficiency is allowed only for severe combined immunodeficiency (SCID), which is a condition of absent or defective lymphoid stem cells.
- Thalassemias and sickle-cell anemia are transfusion-dependent red blood cell disorders that require greater than one transfusion per year.
- Coverage of aplastic anemia is allowed for severe aplastic anemia, and includes Fanconi's anemia, an autosomal recessive hereditary aplastic anemia.
- Coverage of other congenital anomalies of the spinal cord is allowed only for myelodysplasia.
- Coverage of secondary malignant neoplasm of other specified sites–genital organs, is allowed only for testicular cancer.
- Coverage of multiple myeloma is allowed only for chemotherapy-responsive cases.

7) Stem cell transplantation for breast cancer is not a benefit of the Texas Medicaid Program.
8) All stem cell transplants require mandatory prior authorization by HHSC or its designee and must be performed in an approved Texas Medicaid stem cell transplant facility. Prior authorization is effective from the date of the prior authorization approval letter until the end of the transplant facility's approval period. If the transplant has not been performed by the end of the authorization period, the facility and physician need to apply for an extension.
9) Documentation supplied with the prior authorization request should include:
   - 9.1) A complete history and physical
   - 9.2) A current statement of the medical problems present
   - 9.3) The status of the client, including the expected long-term prognosis for the client from the proposed procedure
10) Coverage is limited to an initial transplant and one subsequent retransplant due to rejection, for a total of two transplants per lifetime regardless of payor. The subsequent stem cell transplant must be prior authorized separately. A subsequent transplant is not included in the prior authorization for the initial transplant.
11) Peripheral or umbilical cord blood stem cell transplantation may be authorized in lieu of bone marrow transplantation (BMT), but should not be approved when performed simultaneously.
12) If a stem cell transplant has been prior authorized, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness may be covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.
13) Physician services for bone marrow harvesting (2-38230) or peripheral stem cell harvesting (2-38231) in conjunction with Allogeneic bone marrow transplants are not a separate payable benefit of the Texas Medicaid Program, and are considered part of the allogeneic stem cell transplant service (procedure code 2-38240).
14) Physician services for bone marrow harvesting (2/F-38230) or peripheral stem cell harvesting (2/F-38206) for Autologous stem cell transplants are a benefit of Medicaid and require mandatory prior authorization by HHSC or its designee.
15) Autologous harvesting of stem cells (single or multiple sessions) is reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient setting (POS 5). Harvesting of stem cells performed in the inpatient setting (POS 3) is included in the DRG and will not be reimbursed separately.
16) Physician services for the harvesting and/or storage of umbilical cord stem cells are not a benefit of the Texas Medicaid Program.
17) Donor expenses are included in the global fee for the transplant recipient and are not a separately payable benefit of the Texas Medicaid Program.
18) The reimbursement to DRG hospitals for a stem cell transplant includes the cost of the procurement of the stem cells and the associated services. Documentation must be maintained to identify where the stem cells were obtained.
19) Stem cell transplants for very rare conditions and diseases may be considered on a case by case basis. Documentation for prior authorization must be submitted to HHSC or its designee to determine whether the transplant is medically necessary and appropriate.

36.4.29.2 Heart Transplants

Under current Texas Medicaid Program policy, procedures are considered to be medically necessary and reasonable, based on safety and efficacy, demonstrated by scientific evidence and by controlled clinical studies.

Based on published research and clinical studies, heart transplants have been determined to be a benefit of the Texas Medicaid Program. A heart transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a heart transplant facility by the Texas Medicaid Program.

CPT only copyright 2005 American Medical Association. All rights reserved.

A heart transplant to a client for primary heart dysfunction must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage under this policy.

Prior authorization is required for a heart/lung transplant and must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant are considered individually.

Guidelines for Coverage of a Heart Transplant

Heart transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the heart transplant procedure on a long-term basis. To be reimbursed by the Texas Medicaid Program, the facility must document the following considerations:

- A critical medical need that fits in one of the categories below:
  - NYHA Class Stage III or IV cardiac disease
  - Congenital heart disease
  - Valvular heart disease
  - Viral cardiomyopathies
  - Familial and restrictive cardiomyopathies
- A heart transplant will result in a return to improved functional independence.
- An absence of comorbidities such as:
  - Severe pulmonary hypertension.
  - End-stage renal, hepatic or other organ dysfunction unrelated to primary disorder.
  - Active, uncontrolled HIV infection or AIDS-defining illness.
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure.
- Documented compliance with other medical treatments, regimen, and plan of care.
- Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen.
- Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen.

36.4.29.3 Intestinal Transplants

Intestinal transplantation currently is not a benefit of the Texas Medicaid Program.

36.4.29.4 Liver Transplants

Under current Texas Medicaid policy, procedures are considered to be medically necessary and reasonable, based on safety and efficacy, demonstrated by scientific evidence and by controlled clinical studies.

Based on published research and clinical studies, liver transplants have been determined to be a benefit of the Texas Medicaid Program for Medicaid-eligible clients. A liver transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a liver transplant facility by the Texas Medicaid Program.

Guidelines for Coverage

Authorization of liver transplantation requires documentation of life threatening complications of acute liver failure or chronic end-stage liver disease.

Liver transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the liver transplant procedure on a long-term basis. To be reimbursed by the Texas Medicaid Program, the facility must document the following considerations:

- A critical medical need with a likelihood of a successful clinical outcome
- Liver disease in one of the following categories:
  - Primary cholestatic liver disease
  - Other cirrhosis:
    - Alcoholic
    - Hepatitis C, non-A, non-B, and Hepatitis B
  - Fulminant hepatic failure
  - Metabolic diseases
  - Malignant neoplasms
  - Benign neoplasms
  - Biliary atresia
- An absence of comorbidities such as:
  - End-stage cardiac, pulmonary, or renal disease unrelated to primary disorder
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
- Documented compliance with other medical treatments, regimen, and plan of care
- Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen
- Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen

Payment for liver transplant professional services is made under procedure code 2/8-47135 or 2/8-47136. These procedures include six months of professional postoperative care. Separate charges for procedure code 2/8-47780 are denied as part of the liver transplant. Parenteral immunosuppressant therapy is approved for a period of 12 months following the date of discharge from the hospital, conditional upon the client's Medicaid eligibility.

Services unrelated to the liver transplant surgery are paid separately.

CPT only copyright 2005 American Medical Association. All rights reserved.

Two assistant surgeons are allowed for liver transplant surgery using procedure codes 8-47135 or 8-47136.

36.4.29.5 Lung Transplants

Under current Texas Medicaid Program policy, procedures are considered to be medically necessary and reasonable, based on safety and efficacy, demonstrated by scientific evidence and by controlled clinical studies.

Based on published research and clinical studies, lung transplants (single lung with bronchial anastomosis or double sequential lung with bilateral bronchial anastomosis) have been determined to be a benefit of the Texas Medicaid Program. A lung transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a lung transplant facility by the Texas Medicaid Program.

A lung transplant to a client must be documented as unresponsive to more conventional and/or standard therapies to be considered for coverage under this policy.

Prior authorization is required for a heart/lung transplant and must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant are considered on an individual basis.

Guidelines for Coverage of a Lung Transplant

Lung transplant candidates must be limited to those patients who, based on sound patient selection criteria, would most likely benefit from the lung (single or double) transplant procedure on a long-term basis. To be reimbursed by the Texas Medicaid Program, the facility must document the following considerations:

- A critical medical need with a likelihood of a successful clinical outcome
- Symptoms at rest directly related to chronic pulmonary disease and resultant severe functional limitation
- Lung transplantation may be authorized with documentation of end-stage pulmonary diseases in these categories:
    - Obstructive lung disease
    - Restrictive lung disease
    - Cystic Fibrosis
    - Pulmonary hypertension
- An absence of comorbidities such as:
    - End-stage renal, hepatic, or other organ dysfunction unrelated to primary disorder
    - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
- Documented compliance with other medical treatments, regimen, and plan of care
- Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen
- Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen

Organ Procurement

The appropriate DRG reimbursement coverage to the approved institution for a prior authorized transplant procedure includes procurement of the organ and services associated with the organ procurement as specified by HHSC or its designee. Documentation of organ procurement must be maintained in the hospital medical records. *Organ procurement costs are not payable to a physician.*

Important: *Physician services for the procurement of peripheral stem cells are not reimbursable.*

36.4.29.6 Prior Authorization

It is the requesting physician and facility's responsibility to receive prior authorization through TMHP Special Medical Prior Authorization.

HHSC or its designee must prior authorize all transplant services provided by facilities and professionals. Documentation supplied with the prior authorization request must address the criteria listed for each type of transplant above, and must be medically necessary, reasonable, and federally allowable.

If prior authorization is not obtained for a solid organ transplant, services directly related to the transplant within the three-day preoperative and six-week postoperative period are also denied regardless of who provides the services (e.g, laboratory services, status post visits, radiology services.) Claims for transplant clients are placed on active review when the transplant was not prior authorized so that the services related to the transplant can be monitored.

Coverage is limited to one transplant per organ system (or organ systems for combined transplants) per lifetime except for one subsequent retransplant because of organ rejection. A subsequent transplant is not included in the prior authorization for the initial transplant; therefore, it must be prior authorized separately.

A transplant request signed by a physician associated with one of the Texas Medicaid Program-approved transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution's transplant protocol. Additional documentation may be required, which is addressed in the previous specific organ/tissue information.

The Texas Medicaid Program does not pay for transplants or post-transplant services in a nonqualifying facility, nor are physician charges reimbursed for transplants in a nonqualifying facility.

Benefits are not available for any experimental or investigational services, supplies, or procedures.

CPT only copyright 2005 American Medical Association. All rights reserved.

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

36.4.30 Occupational Therapy

Occupational therapy is a payable benefit to physicians and outpatient and inpatient hospitals. Occupational therapy *must be billed with the modifier AT and must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary.* Occupational therapy is billed with CPT procedure codes. These procedure codes are subject to the guidelines outlined in the above paragraphs for physical therapy:

CPT Code	Frequency
1-97012	Once per day
1-97014	Once per day
1-97016	Once per day
1-97018	Once per day
1-97022	Once per day
1-97024	Once per day
1-97026	Once per day
1-97028	Once per day
1-97032	Two hours maximum
1-97033	Two hours maximum
1-97034	Two hours maximum
1-97035	Two hours maximum
1-97036	Two hours maximum
1-97039	Two hours maximum
1-97110	Two hours maximum
1-97112	Two hours maximum
1-97113	Two hours maximum
1-97116	Two hours maximum
1-97124	Two hours maximum
1-97139	Two hours maximum

Occupational Therapy Only Codes

CPT Code	Frequency
1-97003	Once every six months
1-97004	Once per month

Occupational therapy prescribed primarily as an adjunct to psychotherapy is not a benefit.

Refer to: "Physical Therapists/Independent Practitioners" on page 35-1 and "Home Health Services" on page 24-6 and "Claims Information" on page 43-10 for authorization and requirements, and coverage or noncoverage of the above 2000 CPT Physical Medicine and Rehabilitation codes.

36.4.30.1 Limitations

Occupational therapy must be billed with the modifier AT and must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary. Occupational therapy is to be billed with CPT procedure codes.

The AT modifier is described as representing treatment provided for an acute musculoskeletal or neuromuscular condition, or an acute exacerbation of a chronic musculoskeletal or neuromuscular condition, that persists fewer than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing.

Plateauing is defined as the point at which maximal improvement has been documented and more improvement ceases.

Procedure codes 1-97012, 1-97014, 1-97018, 1-97022, 1-97024, 1-97026, 1-97028, and 1-97150 are limited to one per day. The following procedure codes may be paid in multiple 15-minute quantities:

Procedure Codes		
1-97032	1-97033	1-97034
1-97035	1-97036	1-97039
1-97110	1-97112	1-97113
1-97116	1-97124	1-97139
1-97140	1-97530	1-97535
1-97537	1-97760	1-97761

Procedure code 1-97760 is only payable for clients younger than 21 years of age. Procedure code 1-97010 is not a benefit.

Procedure codes that may be billed in multiple quantities (e.g., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Procedure code 1-97762 and 1-97750 are comprehensive codes and include an office visit. If an office visit is billed the same day by the same provider, the office visit is denied as part of another procedure billed the same day. Procedure codes 1-97535, 1-97537, 1-97542, and 1-97762 are only payable for clients younger than 21 years of age.

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure code 1-97004 is payable once per month, any provider, same facility. These codes are not payable on the same day as the following codes:

Procedure Codes		
1-97012	1-97014	1-97018
1-97022	1-97024	1-97026
1-97028	1-97032	1-97033
1-97034	1-97035	1-97036
1-97039	1-97110	1-97112
1-97113	1-97116	1-97124
1-97139	1-97140	1-97150
1-97530	1-97750	1-97760
1-97761	1-97762	

36.4.31 Osteopathic Manipulative Treatment Services

Osteopathic manipulative treatment (OMT) performed by a provider licensed to perform OMT is a covered benefit of the Texas Medicaid Program for the acute phase of the acute musculoskeletal injury or the acute phase of an acute exacerbation of a chronic musculoskeletal injury with a neurological component. Reimbursement is contingent on correct documentation of the condition. The acute modifier AT must be submitted with the claim for payment to be made.

The following procedure codes are payable when billing for OMT to the head, cervical, thoracic, lumbar, sacral, pelvic, lower extremities, upper extremities, rib cage, abdominal, and visceral regions: 1-98925, 1-98926, 1-98927, 1-98928, and 1-98929.

When multiples of procedure codes 1-98925, 1-98926, 1-98927, 1-98928, and 1-98929 are billed on the same day by the same provider, the most inclusive code is paid and the others are denied. An initial or subsequent care visit or consultation may be paid in addition to OMT billed on the same day.

Procedure code 1-97140 will deny as part of another service if billed on the same date of service as procedure codes 98925, 98926, 98927, 98928, or 98929.

36.4.32 Pentamadine, Aerosol

Aerosol pentamidine treatments will be reimbursed using procedure code 1-94642.

Additionally, the provider may also be reimbursed for the medication using procedure code 1-J2545.

Payment for aerosol pentamidine treatments is limited to the following diagnosis codes:

Diagnosis Code	Description
042	Human immunodeficiency virus [HIV] disease
07951	Human T-cell lymphotrophic virus, type I [HTLV-I]
07952	Human T-cell lymphotrophic cirus, type II [HTLV-II]
07953	Human immunodeficiency virus, type 2 [HIV-2]
1363	Pneumocystosis
48284	Pneumonia due to Legionnaires' disease
5186	Allergic bronchopulmonary aspergillosis

Aerosol pentamidine treatments are limited to one treatment every 28 days.

36.4.33 Percutaneous Transluminal Coronary Interventions

Percutaneous transluminal coronary interventions are a therapeutic option for clients with arteriosclerotic heart disease. The procedure codes listed below are reimbursed by the Texas Medicaid Program:

Procedure Codes		
2/F-92973	2/F-92974	2/F-92980
2/F-92981	2/F-92982	2/F-92984
2/F-92995	2/F-92996	2/F-G0290
2/F-G0291		

When any of the following procedure codes are performed on the same vessel as intracoronary vessel stenting, any provider, only the stenting procedure will be reimbursed: 2/F-92973, 2/F-92982, 2/F-92984, 2/F-92995, and 2/F-92996.

Angioplasty, atherectomy, or thrombectomy performed on different coronary vessels will be reimbursed separately. When different coronary vessels are not indicated, only the stenting procedure will be paid.

Procedure code 2/F-92974 may be reimbursed as a separately payable service in addition to the primary stenting procedure, even when performed on the same vessel.

36.4.34 Physical Therapy Services

Physical medicine is the use of physical agents such as heat, massage, electricity, traction, or exercises in the treatment of disease. Payments for physical medicine are limited to acute disorders of the musculoskeletal system or exacerbations of chronic disorders necessitating physical medicine to restore function. The acute modifier AT must be billed for payment to be made.

Physical therapy must be provided according to the current (within 60 days) written orders of a physician and must be medically necessary. Physical therapy is to be billed with CPT procedure codes.

Examples of what may be considered *acute* are as follows:

- A new injury

CPT only copyright 2005 American Medical Association. All rights reserved.

- Therapy before or after surgery, acute exacerbations of conditions, such as rheumatoid arthritis
- Interventions such as a newly implanted intrathecal pump to decrease spasticity or botulinum toxin type A injections

Physical medicine, including functional evaluations, must be provided according to the current (within 60 days) written orders of a physician and based on medical necessity. It may be performed by auxiliary personnel under the direct supervision of the physician or the independently practicing physical therapist.

36.4.34.1 Limitations

Procedure codes 1-97012, 1-97014, 1-97018, 1-97022, 1-97024, 1-97026, 1-97028, and 1-97150 are limited to one per day. The following procedure codes may be paid in multiple 15-minute quantities:

Procedure Codes		
1-97032	1-97033	1-97034
1-97035	1-97036	1-97039
1-97110	1-97112	1-97113
1-97116	1-97124	1-97139
1-97140	1-97530	1-97535
1-97537	1-97760	1-97761

Procedure code 1-97760 is only payable for clients younger than 21 years of age. Procedure code 1-97010 is not a benefit.

Procedure codes that may be billed in multiple quantities (e.g., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Procedure codes 1-97762 and 1-97750 are comprehensive codes and include an office visit. If an office visit is billed the same day by the same provider, the office visit is denied as part of another procedure billed the same day. Procedure codes 1-97535, 1-97537, 1-97542, and 1-97762 are only payable for clients younger than 21 years of age.

Procedure code 1-97001 is payable once per six months, any provider, same facility. Procedure code 1-97002 is payable once per month, any provider, same facility. These codes are not payable on the same day as the following procedure codes:

Procedure Codes		
1-97012	1-97014	1-97018
1-97022	1-97024	1-97026
1-97028	1-97032	1-97033
1-97034	1-97035	1-97036
1-97039	1-97110	1-97112
1-97113	1-97116	1-97124
1-97139	1-97140	1-97150
1-97530	1-97750	1-97760
1-97761	1-97762	

Refer to: "Occupational Therapy" on page 36-247 for additional CPT codes.

36.4.34.2 Nursing Facility

Separate payment cannot be made to a physician or an independently practicing physical therapist who provides physical medicine to a resident of a nursing facility. These services must be made available to nursing facility residents as needed and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources as part of the daily care. Nursing facilities should refrain from admitting clients who need goal-directed therapy if the facility is unable to provide these services.

36.4.35 Podiatrist Services

Podiatry services that are provided in a skilled, intermediate, or extended care nursing facility are a benefit of the Texas Medicaid Program.

36.4.35.1 Clubfoot Casting

CPT code 2-29450 is payable to a physician in the management of clubfoot when no surgery has been performed. The physician may bill the appropriate E/M code with a casting code and be reimbursed for both. CPT code 2-29750 is payable to a physician in addition to the initial casting or strapping procedure.

Unilateral casting should be billed as cast code 2-29450. Procedure code 2-29750 is payable in addition to the initial casting or strapping procedure.

Use modifiers LT (left) and RT (right) with all procedures, as appropriate.

Casting for a diagnosis of clubfoot is covered if the client is 0–3 years of age and has one of the following conditions:

Diagnosis Code	Description
73671	Acquired equinovarus deformity
75450	Congenital talipes varus
75451	Congenital talipes equinovarus
75452	Congenital metatarsus primus varus
75453	Congenital metatarsus varus
75459	Other congenital varus deformities of feet
75460	Congenital talipes valgus
75461	Congenital pes planus
75462	Talipes calcaneovalgus
75469	Other congenital valgus deformities of feet
75470	Talipes, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
75471	Talipes cavus
75479	Other congenital deformities of feet

36.4.35.2 Echography/Ultrasound of Extremity

The following procedure codes are payable to podiatrists. Claim processing is subject to modifier 76 auditing: 4/I/T-76880 and 4/I/T-76999.

Reimbursement is based on TMRM. If the technical (TOS T) and/or interpretation (TOS I) components are billed by any provider for the same date of service as the total component (TOS 4), the total component of the corresponding procedure is denied.

For example, if T-76880 and 4-76880 are billed by any provider, on the same day, the total component code, 4-76880 is denied.

36.4.35.3 Flat Foot Treatment

Treatment of flat foot conditions and the procurement of supportive devices (including special shoes) is not covered.

Diagnosis code 72670, Enthesopathy of ankle and tarsus, is not considered a flat foot condition.

36.4.35.4 Nerve Conduction Studies Performed by Podiatrist

Doctors of podiatry may be reimbursed for nerve conduction studies for foot and ankle diagnosis codes. Bill nerve conduction studies using the following codes: 5-95900, 5-95903, 5-95904, 5-95934, and 5-95936.

Procedure codes 5(I)-95900, 5(I)-95903, and/or 5(I)-95904 are reimbursed at full for the first nerve study and half for each additional study irrespective of the number of studies.

Procedure code 5/I/T-95934 or 5/I/T-95936 are reimbursed at full fee when performed on the same date of service as procedure codes 5/I/T-95900, 5/I/T-95903 or 5/I/T-95904.

If 5/I/T-95934 and 5/I/T-95936 are billed in multiples, the first study is reimbursed at full fee and all additional studies at half fee.

Nerve conduction studies repeated within a three-month period on the same client by the same provider are denied except for the following diagnosis codes:

Diagnosis Code	Descriptions
25060	Diabetes with neurological manifestations, type II or unspecified type, not stated as uncontrolled
2650	Beriberi
2652	Pellagra
2692	Unspecified vitamin deficiency
2699	Unspecified nutritional deficiency
2771	Disorders of porphyrin metabolism
27730	Amyloidosis, unspecified
27739	Other amyloidosis
27781	Primary carnitine deficiency
27782	Carnitine deficiency due to inborn errors of metabolism
27783	Iatrogenic carnitine deficiency
27784	Other secondary carnitine deficiency
27789	Other specified disorders of metabolism
3525	Disorders of hypoglossal (12th) nerve
3541	Other lesion of median nerve
3552	Other lesion of femoral nerve
3553	Lesion of lateral popliteal nerve
3558	Mononeuritis of lower limb, unspecified
3560	Hereditary peripheral neuropathy
3564	Idiopathic progressive polyneuropathy
3569	Unspecified idiopathic peripheral neuropathy
3572	Polyneuropathy in diabetes
3575	Alcoholic polyneuropathy
3576	Polyneuropathy due to drugs
3577	Polyneuropathy due to other toxic agents
7220	Displacement of cervical intervertebral disc without myelopathy
7221	Displacement of thoracic or lumbar intervertebral disc without myelopathy
7222	Displacement of intervertebral disc, site unspecified, without myelopathy
7234	Brachial neuritis or radiculitis NOS
7292	Neuralgia, neuritis, and radiculitis, unspecified
7295	Pain in limb

Podiatrists must use modifiers LT (left), RT (right), or AT when appropriate. Specific toe modifiers should also be used when appropriate.

36.4.35.5 Nursing Facility

Podiatry services provided in a skilled, intermediate, or extended care nursing facility are a benefit of the Texas Medicaid Program.

36.4.35.6 Routine Foot Care

Routine foot care must be medically necessary and billed with the following procedure codes. No specific diagnosis restrictions exist. The following procedures are limited to

CPT only copyright 2005 American Medical Association. All rights reserved.

one service every six months per client, regardless of provider specialty: 2-11055, 2-11056, 2-11057, 2-11719, and 2-G0127.

Use modifiers TT, UN, UP, UQ, UR, and US for services rendered in a nursing facility when multiple patients are seen.

36.4.35.7 Vascular Studies Performed by Podiatrist

The following procedure codes are payable when billed by podiatrists:

Procedure Codes		
4/I/T-93922	4/I/T-93925	4/I/T-93926
4/I/T-93965	4/I/T-93970	4/I/T-93971

36.4.35.8 X-Ray Procedures by Podiatrist

A podiatrist may be reimbursed for the following X-ray and noninvasive diagnostic procedures:

Procedure Codes		
4I/T-73600	4/I/T-73610	4/I/T-73620
4/I/T-73630	4/I/T-73650	4/I/T-73660

36.4.36 Polysomnography

Polysomnography is distinguished from sleep studies by the inclusion of sleep staging that includes a one to four lead electroencephalogram (EEG), electro-oculogram (EOG), and a submental EMG.

Additional parameters of sleep include, but are not limited to:

- ECG
- Airflow
- Ventilation and respiratory effort
- Gas exchange by oximetry
- Extremity/motor activity movement
- Extended EEG monitoring
- Penile tumescence
- Gastroesophageal reflux
- Continuous blood pressure monitoring
- Snoring
- Body positions

For a sleep study to be reported as a polysomnography, sleep must be recorded and staged. Use the following procedure codes to bill for polysomnography studies: 5/I/T-95805, 5/I/T-95808, 5/I/T-95810, and 5/I/T-95811

Sleep studies (5/I/T-95806 and 5/I/T-95807) are not a benefit of the Texas Medicaid Program.

When multiple procedure codes are billed on the same day, the most inclusive code is paid and all other codes denied.

Polysomnography (5/I/T-95808, 5/I/T-95810, 5/I/T-95811) is allowed for the following diagnosis codes:

Diagnosis Code	Description
32700	Organic insomnia, unspecified
32710	Organic hypersomnia, unspecified
32711	Idiopathic hypersomnia with long sleep time
32712	Idiopathic hypersomnia without long sleep time
32713	Recurrent hypersomnia
32714	Hypersomnia due to medical condition
32715	Hypersomnia due to mental disorder
32719	Other organic hypersomnia
32720	Organic sleep apnea, unspecified
32721	Primary central sleep apnea
32722	High altitude periodic breathing
32723	Obstructive sleep apnea (adult) (pediatric)
32724	Idiopathic sleep related non-obstructive alveolar hypoventilation
32725	Congenital central alveolar hypoventilation syndrome
32726	Sleep related hypoventilation/hypoxemia in conditions classifiable elsewhere
32727	Central sleep apnea in conditions classified elsewhere
32729	Other organic sleep apnea
32730	Circadian rhythm sleep disorder, unspecified
32731	Circadian rhythm sleep disorder, delayed sleep phase type
32732	Circadian rhythm sleep disorder, advanced sleep phase type
32733	Circadian rhythm sleep disorder, irregular sleep-wake type
32734	Circadian rhythm sleep disorder, free-running type
32735	Circadian rhythm sleep disorder, jet lag type
32736	Circadian rhythm sleep disorder, shift work type
32737	Circadian rhythm sleep disorder in conditions classified elsewhere
32739	Other circadian rhythm sleep disorder
32740	Organic parasomnia, unspecified
32741	Confusional arousals
32742	REM sleep behavior disorder
32743	Recurrent isolated sleep paralysis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
32744	Parasomnia in conditions classified elsewhere
32749	Other organic parasomnia
32751	Periodic limb movement disorder
32759	Other organic sleep related movement disorders
3278	Other organic sleep disorders
34700	Narcolepsy, without cataplexy
34701	Narcolepsy, with cataplexy
34710	Narcolepsy in conditions classified elsewhere, without cataplexy
34711	Narcolepsy in conditions classified elsewhere, with cataplexy
78050	Unspecified sleep disturbance
78051	Insomnia with sleep apnea, unspecified
78052	Insomnia, unspecified
78053	Hypersomnia with sleep apnea, unspecified
78054	Hypersomnia, unspecified
78055	Disruption of 24 hour sleep wake cycle, unspecified
78056	Dysfunctions associated with sleep stages or arousal from sleep
78057	Unspecified sleep apnea
78059	Other sleep disturbances

Multiple sleep latency test (5/I/T-95805) is restricted to the following diagnosis codes:

Diagnosis Code	Description
34700	Narcolepsy, without cataplexy
34701	Narcolepsy, with cataplexy
34710	Narcolepsy in conditions classified elsewhere, without cataplexy
34711	Narcolepsy in conditions classified elsewhere, with cataplexy
78050	Sleep disturbance unspecified
78051	Insomnia with sleep apnea
78052	Other insomnia
75053	Hypersomnia with sleep apnea
78054	Other hypersomnia
78055	Disruptions of 24 hour sleep-wake cycle
78056	Dysfunctions associated with sleep stages or arousal from sleep
78057	Other and unspecified sleep apnea
78058	Sleep related movement disorder
78059	Sleep disturbances, NEC

36.4.37 Prostate Surgeries

A transurethral resection of the prostate (TURP) is the most common procedure performed to treat benign prostatic hyperplasia (BPH). A TURP may be billed with the following procedure codes:

Procedure Codes		
2/F-52601	2/F-52606	2/F-52612
2/F-52614	2/F-52620	2/F-52630
2/F-52640		

If a physician bills separate charges for any of the TURP procedure codes listed above, and any of the following procedure codes on the same date of service, the charges for the services listed below will be denied as part of the TURP procedure.

Procedure Codes		
2/F-52000	2/F-52204	2/F-52214
2/F-52275	2/F-52276	2/F-52281
2/F-52310	2/F-52315	2/F-52351
2/F-52354	2/F-53020	

36.4.38 Psychiatric Pharmacological Management Services

Procedure codes 1-M0064 and 1-90862 may be billed for pharmacological management services.

Procedure code 1-M0064 indicates the client is stable but pharmacologic regimen oversight is necessary.

A brief visit for the sole purpose of monitoring or changing drug prescriptions (1-M0064) refers to a lesser level of drug monitoring such as monitoring, simple dosage adjustment, or changing drug prescriptions where the client is evaluated during a face-to-face visit and treated in the office setting.

Procedure code 1-90862 is defined as the assessment and management of psychopharmacological agents with no more than minimal medical psychotherapy.

Pharmacological management (1-90862) is not intended to refer to a brief evaluation of the client's state, simple dosage adjustment, or long term medication. Pharmacological management refers to the in-depth management of psychopharmacological agents which are medications with serious side effects and represents a very skilled aspect of care for a client who is determined to be mentally or physically unstable. It is intended for use for clients who are being managed primarily by psychotropics, antidepressants, ECT, and/or other types of psychopharmacologic medications.

Pharmacological management must be provided during a face-to-face visit with the client and any psychotherapy must be less than 20 minutes.

The focus of a pharmacological management visit is the use of medication for relief of client's signs and symptoms of mental illness. When the client continues to experience signs and symptoms of mental illness neces-

CPT only copyright 2005 American Medical Association. All rights reserved.

sitating discussion beyond minimal psychotherapy in a given day, the focus of the service is broader and is considered psychotherapy rather than pharmacological management.

Procedure codes 1-90862 and 1-M0064 describe a physician service and cannot be delegated to a nonphysician or *incident to* a physician's service. APNs whose scope of license permit them to prescribe may use these codes if they perform the service. The service must only be billed if the physician or APN actually performs the service.

Texas Medicaid does not reimburse for 1-90862 or 1-M0064 for actual administration of medication or for observation of the patient taking an oral medication. Administration and supply of oral medication are noncovered services.

All documentation must support that the service was reasonable and medically necessary for the billed diagnosis.

Documentation of medical necessity for pharmacological management (1-90862) must address all of the following information in the client's medical record in legible format:

- Date
- Diagnosis
- Medication history
- Current symptoms and problems to include presenting mental status and/or physical symptoms that indicate the client requires a medication adjustment (current presenting mental status or physical symptoms that indicate the client is in an unstable state of mind or body)
- Problems, reactions, and side effects, if any, to medications and/or ECT
- Description of optional minimal psychotherapeutic intervention (less than 20 minutes), if any
- Any medication modifications
- The reasons for medication adjustments/changes or continuation
- Desired therapeutic drug levels, if applicable
- Current laboratory values, if applicable
- Anticipated physical and behavioral outcome(s)

Documentation of medical necessity for a brief office visit for the sole purpose of monitoring or changing drug prescriptions (1-M0064) must address all of the following information in the client's medical record:

- The client is evaluated and determined to be stable, but continues to have a psychiatric diagnosis that needs close monitoring of therapeutic drug levels or
- The client requires evaluation for prescription renewal, a new psychiatric medication, or a minor medication dosage adjustment and
- Provider has documented the medication history in the client's records with current signs and symptoms, new medication modifications with anticipated outcome.

Pharmacological management procedure codes 1-90862 and 1-M0064 will not be reimbursed for the same date of service. If the two procedure codes are billed for the same date of service by any provider, 1-M0064 will deny as part of 1-90862.

E/M services include pharmacological management. Procedure codes 1- 90862 and 1-M0064 should not be billed in addition to the E/M service. Pharmacological management (1-M0064 or 1-90862), will be denied as part of any E/M service billed for the same date of service by the same provider.

If the primary reason for the office visit is for psychotherapy, then the specific psychotherapy procedure code should be billed. Pharmacological management codes 1-M0064 or 1-90862, will be denied as part of any psychotherapy service that is billed for the same date of service, by the same provider.

Pharmacological management procedure codes (1-90862 and 1-M0064) will not count against the 30 encounter annual limitation for outpatient behavioral health services.

The treating provider must document the medical necessity of the chosen treatment and list the diagnosis code that most accurately describes the condition of the client that necessitated the need for the pharmacological management on the claim and in the client's medical record. The medical record (hospital or outpatient records, reports, or progress notes) should be clear and concise, documenting the reason(s) for the pharmacological management treatment and the outcome.

Pharmacological management procedure codes 1-90862 and 1-M0064 are not payable more than one service per day, per client, by any provider in any setting. Procedure code 1-M0064 is limited to the office setting.

If behavioral health pharmacological services are needed beyond the current diagnosis and frequency limitations, the claim may be appealed with additional documentation to demonstrate the medical necessity.

Limitations for procedure code 1-M0064 or 1-90862 may be appealed with documentation supporting medical necessity.

The following diagnosis codes are the *only* payable diagnosis codes for billing pharmacological management procedure codes 1-M0064 or 1-90862.

Diagnosis Code	Description
2900	Senile dementia, uncomplicated
29010	Presenile dementia, uncomplicated
29011	Presenile dementia with delirium
29012	Presenile dementia with delusional features
29013	Presenile dementia with depressive features
29020	Senile dementia with delusional features
29021	Senile dementia with depressive features

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2903	Senile dementia with delirium
29040	Vascular dementia, uncomplicated
29041	Vascular dementia with delirium
29042	Vascular dementia with delusions
29043	Vascular dementia with depressed mood
2908	Other specified senile psychotic conditions
2909	Unspecified senile psychotic condition
2910	Alcohol withdrawal delirium
2911	Alcohol induced persisting amnesic disorder
2912	Alcohol induced persisting dementia
2913	Alcohol induced psychotic disorder with hallucinations
2914	Idiosyncratic alcohol intoxication
2915	Alcohol induced psychotic disorder with delusions
29181	Alcohol withdrawal
29182	Alcohol induced sleep disorders
29189	Other
2919	Unspecified alcohol induced mental disorders
2920	Drug withdrawal
29211	Drug induced psychotic disorder with delusions
29212	Drug induced psychotic disorder with hallucinations
2922	Pathological drug intoxication
29281	Drug induced delirium
29282	Drug induced persisting dementia
29283	Drug induced persisting amnesic disorder
29284	Drug induced mood disorder
29285	Drug induced sleep disorders
29289	Other
2929	Unspecified drug induced mental disorder
2930	Delirium due to conditions classified elsewhere
2931	Subacute delirium
29381	Psychotic disorder with delusions in conditions classified elsewhere
29382	Psychotic disorder with hallucinations in conditions classified elsewhere
29384	Anxiety disorder in conditions classified elsewhere

Diagnosis Code	Description
29389	Other specified transient mental disorders due to conditions classified elsewhere, other
2939	Unspecified transient mental disorder in conditions classified elsewhere
2940	Amnesic disorder in conditions classified elsewhere
29410	Dementia in conditions classified elsewhere without behavioral disturbances
29411	Dementia in conditions classified elsewhere with behavioral disturbance
2948	Other persistent mental disorders due to conditions classified elsewhere
2949	Unspecified persistent mental disorders due to conditions classified elsewhere
29500	Schizophrenic disorders, simple type unspecified
29501	Schizophrenic disorders, simple type subchronic
29502	Schizophrenic disorders, simple type chronic
29503	Schizophrenic disorders, simple type subchronic with acute exacerbation
29504	Schizophrenic disorders, simple type chronic with acute exacerbation
29505	Schizophrenic disorders, simple type in remission
29510	Schizophrenic disorders, disorganized type unspecified
29511	Schizophrenic disorders, disorganized type subchronic
29512	Schizophrenic disorders, disorganized type chronic
29513	Schizophrenic disorders, disorganized type subchronic with acute exacerbation
29514	Schizophrenic disorders, disorganized type chronic with acute exacerbation
29515	Schizophrenic disorders, disorganized type in remission
29520	Schizophrenic disorders, catatonic type unspecified
29521	Schizophrenic disorders, catatonic type subchronic
29522	Schizophrenic disorders, catatonic type chronic

Diagnosis Code	Description
29523	Schizophrenic disorders catatonic type subchronic with acute exacerbation
29524	Schizophrenic disorders catatonic type chronic with acute exacerbation
29525	Schizophrenic disorders catatonic type in remission
29530	Schizophrenic disorders paranoid type unspecified
29531	Schizophrenic disorders paranoid type subchronic
29532	Schizophrenic disorders paranoid type chronic
29533	Schizophrenic disorders paranoid type subchronic with acute exacerbation
29534	Schizophrenic disorders paranoid type chronic with acute exacerbation
29535	Schizophrenic disorders paranoid type in remission
29540	Schizophrenic disorders schizo-phreniform unspecified
29541	Schizophrenic disorders schizo-phreniform subchronic
29542	Schizophrenic disorders schizo-phreniform chronic
29543	Schizophrenic disorders schizo-phreniform subchronic with acute exacerbation
29544	Schizophrenic disorders schizo-phreniform chronic with acute exacerbation
29545	Schizophrenic disorders schizo-phreniform in remission
29550	Schizophrenic disorders latent schizo-phrenia unspecified
29551	Schizophrenic disorders latent schizo-phrenia subchronic
29552	Schizophrenic disorders latent schizo-phrenia chronic
29553	Schizophrenic disorders latent schizo-phrenia subchronic with acute exacerbation
29554	Schizophrenic disorders latent schizo-phrenia chronic with acute exacerbation
29555	Schizophrenic disorders latent schizo-phrenia in remission
29560	Schizophrenic disorders residual unspecified
29561	Schizophrenic disorders residual subchronic

Diagnosis Code	Description
29562	Schizophrenic disorders residual chronic
29563	Schizophrenic disorders residual subchronic with acute exacerbation
29564	Schizophrenic disorders residual chronic with acute exacerbation
29565	Schizophrenic disorders residual in remission
29570	Schizophrenic disorders schizoaf-fective disorder unspecified
29571	Schizophrenic disorders schizoaf-fective disorder subchronic
29572	Schizophrenic disorders schizoaf-fective disorder chronic
29573	Schizophrenic disorders schizoaf-fective disorder subchronic with acute exacerbation
29574	Schizophrenic disorders schizoaf-fective disorder chronic with acute exacerbation
29575	Schizophrenic disorders schizoaf-fective disorder in remission
29580	Schizophrenic disorders, other specified types of schizophrenia unspecified
29581	Schizophrenic disorders, other specified types of schizophrenia subchronic
29582	Schizophrenic disorders, other specified types of schizophrenia chronic
29583	Schizophrenic disorders, other specified types of schizophrenia subchronic with acute exacerbation
29584	Schizophrenic disorders, other specified types of schizophrenia chronic with acute exacerbation
29585	Schizophrenic disorders, other specified types of schizophrenia in remission
29590	Schizophrenic disorders, unspecified schizophrenia unspecified
29591	Schizophrenic disorders, unspecified schizophrenia subchronic
29592	Schizophrenic disorders, unspecified schizophrenia chronic
29593	Schizophrenic disorders, unspecified schizophrenia subchronic with acute exacerbation
29594	Schizophrenic disorders, unspecified schizophrenia chronic with acute exacerbation

Diagnosis Code	Description
29595	Schizophrenic disorders, unspecified schizophrenia other specified types of schizophrenia in remission
29600	Bipolar I disorder single manic episode unspecified
29601	Bipolar I disorder single manic episode mild
29602	Bipolar I disorder single manic episode moderate
29603	Bipolar I disorder single manic episode severe without mention of psychotic behavior
29604	Bipolar I disorder single manic episode severe specified as with psychotic behavior
29605	Bipolar I disorder single manic episode in partial or unspecified remission
29606	Bipolar I disorder single manic episode in full remission
29610	Manic disorder recurrent episode unspecified
29611	Manic disorder recurrent episode mild
29612	Manic disorder recurrent episode moderate
29613	Manic disorder recurrent episode severe without mention of psychotic behavior
29614	Manic disorder recurrent episode severe specified as with psychotic behavior
29615	Manic disorder recurrent episode severe in partial or unspecified remission
29616	Manic disorder recurrent episode in full remission
29620	Major depressive disorder single episode unspecified
29621	Major depressive disorder single episode mild
29622	Major depressive disorder single episode moderate
29623	Major depressive disorder single episode severe without mention of psychotic behavior
29624	Major depressive disorder, single episode, specified as with psychotic behavior
29625	Major depressive disorder, single episode, in partial or unspecified remission

Diagnosis Code	Description
29626	Major depressive disorder, single episode, in full remission
29630	Major depressive disorder, recurrent episode, unspecified
29631	Major depressive disorder, recurrent episode, mild
29632	Major depressive disorder, recurrent episode, moderate
29633	Major depressive disorder, recurrent episode, severe without mention of psychotic behavior
29634	Major depressive disorder, recurrent episode, specified as with psychotic behavior
29635	Major depressive disorder, recurrent episode, in partial or unspecified remission
29636	Major depressive disorder, recurrent episode, in full remission
29640	Bipolar I disorder, most recent episode (or current) manic, unspecified
29641	Bipolar I disorder, most recent episode (or current) manic, mild
29642	Bipolar I disorder, most recent episode (or current) manic, moderate
29643	Bipolar I disorder, most recent episode (or current) manic, severe, without mention of psychotic behavior
29644	Bipolar I disorder, most recent episode (or current) manic, specified as with psychotic behavior
29645	Bipolar I disorder, most recent episode (or current) manic, in partial or unspecified remission
29646	Bipolar I disorder, most recent episode (or current) manic, in full remission
29650	Bipolar I disorder, most recent episode (or current) depressed, unspecified
29651	Bipolar I disorder, most recent episode (or current) depressed, mild
29652	Bipolar I disorder, most recent episode (or current) depressed, moderate
29653	Bipolar I disorder, most recent episode (or current) depressed, severe, without mention of psychotic behavior
29654	Bipolar I disorder, most recent episode (or current) depressed, specified as with psychotic behavior

30252	Trans-sexualism, with homosexual history
30253	Trans-sexualism, with heterosexual history
3026	Gender identity disorder in children
30270	Psychosexual dysfunction, unspecified
30271	Hypoactive sexual desire disorder
30272	Psychosexual dysfunction with inhibited sexual excitement
30273	Female orgasmic disorder
30274	Male orgasmic disorder
30275	Premature ejaculation
30276	Dyspareunia, psychogenic
30279	With other specified psychosexual dysfunctions
30281	Fetishism
30282	Voyeurism
30283	Sexual masochism
30284	Sexual sadism
30285	Gender identity disorder in adolescents or adults
30289	Other specified psychosexual disorders

Diagnosis Code	Description
3029	Unspecified psychosexual disorder
30300	Acute alcoholic intoxication in alcoholism, unspecified drinking behavior
30301	Acute alcoholic intoxication in alcoholism, continuous drinking behavior
30302	Acute alcoholic intoxication in alcoholism, episodic drinking behavior
30303	Acute alcoholic intoxication in alcoholism, in remission
30390	Other and unspecified alcohol dependence, unspecified
30391	Other and unspecified alcohol dependence, continuous
30392	Other and unspecified alcohol dependence, episodic
30393	Other and unspecified alcohol dependence, in remission
30400	Opioid type dependence unspecified
30401	Opioid type dependence continuous
30402	Opioid type dependence episodic
30403	Opioid type dependence in remission
30410	Sedative hypnotic or anxiolytic dependence unspecified
30411	Sedative hypnotic or anxiolytic dependence continuous
30412	Sedative hypnotic or anxiolytic dependence episodic
30413	Sedative hypnotic or anxiolytic dependence in remission
30420	Cocaine dependence unspecified
30421	Cocaine dependence continuous
30422	Cocaine dependence episodic
30423	Cocaine dependence in remission
30430	Cannabis dependence unspecified
30431	Cannabis dependence continuous
30432	Cannabis dependence episodic
30433	Cannabis dependence in remission
30440	Amphetamine and other psychostimulant dependence unspecified
30441	Amphetamine and other psychostimulant dependence continuous
30442	Amphetamine and other psychostimulant dependence episodic
30443	Amphetamine and other psychostimulant dependence in remission

Diagnosis Code	Description
30450	Hallucinogen dependence unspecified
30451	Hallucinogen dependence continuous
30452	Hallucinogen dependence episodic
30453	Hallucinogen dependence in remission
30460	Other specified drug dependence unspecified
30461	Other specified drug dependence continuous
30462	Other specified drug dependence episodic
30463	Other specified drug dependence in remission
30470	Combination of opioid type drug with any other unspecified
30471	Combination of opioid type drug with any other continuous
30472	Combination of opioid type drug with any other episodic
30473	Combination of opioid type drug with any other in remission
30480	Combination of drug dependence excluding opioid type drug with any other unspecified
30481	Combination of drug dependence excluding opioid type drug with any other continuous
30482	Combination of drug dependence excluding opioid type drug with any other episodic
30483	Combination of drug dependence excluding opioid type drug with any other in remission
30490	Unspecified drug dependence unspecified
30491	Unspecified drug dependence continuous
30492	Unspecified drug dependence episodic
30493	Unspecified drug dependence in remission
30500	Alcohol abuse unspecified
30501	Alcohol abuse continuous
30502	Alcohol abuse episodic
30503	Alcohol abuse in remission
30520	Cannabis abuse unspecified
30521	Cannabis abuse continuous
30522	Cannabis abuse episodic
30523	Cannabis abuse in remission

Diagnosis Code	Description
30530	Hallucinogen abuse unspecified
30531	Hallucinogen abuse, continuous
30532	Hallucinogen abuse, episodic
30533	Hallucinogen abuse, in remission
30540	Sedative, hypnotic or anxiolytic abuse, unspecified
30541	Sedative, hypnotic or anxiolytic abuse, continuous
30542	Sedative, hypnotic or anxiolytic abuse, episodic
30543	Sedative, hypnotic or anxiolytic abuse, in remission
30550	Opioid abuse, unspecified
30551	Opioid abuse, continuous
30552	Opioid abuse, episodic
30553	Opioid abuse, in remission
30560	Cocaine abuse, unspecified
30561	Cocaine abuse, continuous
30562	Cocaine abuse, episodic
30563	Cocaine abuse, in remission
30570	Amphetamine abuse or related acting sympathomimetic abuse, unspecified
30571	Amphetamine abuse or related acting sympathomimetic abuse, continuous
30572	Amphetamine abuse or related acting sympathomimetic abuse, episodic
30573	Amphetamine abuse or related acting sympathomimetic abuse, in remission
30580	Antidepressant type abuse, unspecified
30581	Antidepressant type abuse, continuous
30582	Antidepressant type abuse, episodic
30583	Antidepressant type abuse, in remission
30590	Other, mixed, or unspecified drug abuse, unspecified
30591	Other, mixed, or unspecified drug abuse, continuous
30592	Other, mixed, or unspecified drug abuse, episodic
30593	Other, mixed, or unspecified drug abuse, in remission
3060	Musculoskeletal malfunction arising from mental factors
3061	Respiratory malfunction arising from mental factors

Diagnosis Code	Description
311	Depressive disorder not elsewhere classified
31200	Undersocialized conduct disorder, aggressive type, unspecified
31201	Undersocialized conduct disorder, aggressive type, mild
31202	Undersocialized conduct disorder, aggressive type, moderate
31203	Undersocialized conduct disorder, aggressive type, severe
31210	Undersocialized conduct disorder, unaggressive type, unspecified
31211	Undersocialized conduct disorder, aggressive type, mild
31212	Undersocialized conduct disorder, aggressive type, moderate
31213	Undersocialized conduct disorder, aggressive type, severe
31220	Socialized conduct disorder, unspecified
31221	Socialized conduct disorder, mild
31222	Socialized conduct disorder, moderate
31223	Socialized conduct disorder, severe
31230	Impulse control disorder, unspecified
31231	Pathological gambling
31232	Kleptomania
31234	Intermittent explosive disorder
31235	Isolated explosive disorder
31239	Other disorders of impulse control
3124	Mixed disturbance of conduct and emotions
31281	Conduct disorder, childhood onset type
31282	Conduct disorder, adolescent onset type
31289	Other conduct disorder
3129	Unspecified disturbance of conduct
3130	Overanxious disorder
3131	Misery and unhappiness disorder
31321	Shyness disorder of childhood
31322	Introverted disorder of childhood
31323	Selective mutism
3133	Relationship problems
31381	Oppositional defiant disorder
31382	Identity disorder
31383	Academic underachievement disorder
31389	Other emotional disturbances of childhood or adolescence
3139	Unspecified emotional disturbance of childhood or adolescence
31400	Attention deficit disorder, without mention of hyperactivity
31401	Attention deficit disorder, with hyperactivity
3141	Hyperkinesis with developmental delay
3142	Hyperkinetic conduct disorder
3148	Other specified manifestations of hyperkinetic syndrome
3149	Unspecified hyperkinetic syndrome
31500	Developmental reading disorder, unspecified
31501	Alexia
31502	Developmental dyslexia
31509	Other specific developmental reading disorder
3151	Mathematics disorder
3152	Other specific developmental learning difficulties
3153	Developmental speech or language disorder
31531	Expressive language disorder
31532	Mixed receptive-expressive language disorder
31539	Other developmental speech disorder
3154	Developmental coordination disorder
3155	Mixed development disorder
3158	Other specified delays in development
3159	Unspecified delay in development
316	Psychic factors associated with diseases classified elsewhere

36.4.39 Psychiatric Services

Each individual practitioner is limited to performing a combined total of 12 hours of behavioral health services per day (group therapy services will be handled on a retrospective basis). Each individual who is delegated to perform these services by an MD or DO is limited to performing a combined total of 12 hours of behavioral health services per day.

Retrospective review may be done of not only billed hours but total hours worked per day, since providers performing group therapy may possibly bill in excess of 12 hours in a given day. Documentation requirements for all services billed are listed for each individual specialty in this manual.

CPT only copyright 2005 American Medical Association. All rights reserved.

Outpatient behavioral health services are limited to 30 encounters/visits per client, per calendar year (January 1 through December 31) regardless of provider, unless prior authorized. *This limitation includes encounters/visits by all practitioners.* School Health and Related Services (SHARS) behavioral rehabilitation services, MHMR services, laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter/visit limitation. An encounter/visit is defined as each hour of therapy, psychological, and/or neuropsychological testing rendered per hour, per provider. Each Medicaid client is limited to 30 encounters/visits per calendar year.

If a provider determines that additional services are medically necessary within the calendar year, prior authorization must be obtained before providing the 25th service.

Note: *Psychiatrists and psychologists in the Dallas service area must be enrolled as a network provider in the NorthSTAR Behavioral Health Organizations (BHO) network to provide services to NorthSTAR clients.*

Important: *NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. Physicians that provide behavioral health services to clients in NorthSTAR must be a network provider of the NorthSTAR BHO to provide services to NorthSTAR clients.*

It is anticipated that this limitation, which allows for 6 months of weekly therapy or 12 months of biweekly therapy, is adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters/visits. In these situations, prior authorization is required.

A provider who sees a client regularly and anticipates that the client will require encounters/visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit. This request for prior authorization helps ensure the client does not miss any necessary encounters/visits with the mental health provider by having prior authorization in place before providing the 25th service. It will also assist the provider with timely and accurate claims payment.

It is recognized that sometimes a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the client's 25th encounter/visit. This information must be submitted in addition to the usual medical necessity information required with every request.

Prior authorization will not be granted to providers who have been seeing a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. *It is recommended that a request for extension of outpatient behavioral health be submitted no sooner than 30 days prior to the date of service being requested, so that the most current information is provided.*

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30 encounter limitation are limited to 10 encounters/visits per request and must be submitted on the Request for Extended Outpatient Psychotherapy/Counseling Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and provider identifier
- Clinical update, including current specific symptoms and response to past treatment, and treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated and planned frequency of encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters/visits that the services will be provided
- All areas of request must be completed with the information required by the form if additional room is needed providers may state "see attached" but the attachment must contain the specific information required in that section of the form

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these additional encounters/visits.* Prior authorization for an extension of outpatient behavioral health services is granted when the treatment is mandated by the courts for court-ordered services. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

For more information, call the TMHP Contact Center at 1-800-925-9126.

Treatment for chronic diagnosis codes such as mental retardation are not covered by Medicaid.

Psychological testing (5-96101) and neuropsychological testing (5-96118) are covered services for the following diagnosis codes only:

Diagnosis Code	Description
0360	Meningococcal meningitis
0361	Meningococcal Encephalitis
03681	Meningococcal optic neutris
04503	Acute paralytic poliomyelitis specified as bulbar (unspecified - type 3)

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
04510	Acute poliomyelitis with other paralysis (unspecified - type 3)
04523	Acute nonparalytic poliomyelitis (unspecified - type 3)
04593	Acute poliomyelitis, unspecified (unspecified - type 3)
0460	Kuru
0461	Jacob-Creutzfeldt disease
0462	Subacute sclerosing pan encephalitis
0463	Progressive multifocal leukoencephalopathy
0468	Other specified slow virus infection of central nervous system Progressive multifocal leukoecephalopathy
0469	Unspecified slow virus infection of central nervous system
0470	Coxsackie virus meningitis
0471	ECHO virus miniguides
0478	Other specified viral meningitis
0479	Unspecified viral meningitis
048	Other enterovirus disease of central nervous system
0490	Lymphocytic choriomeningitis
0491	Meningitis due to adenovirus
0498	Other specified non-arthropod-borne viral diseases of central nervous system
0499	Unspecified non-arthropod-borne viral diseases of central nervous system
2900	Senile dementia, uncomplicated
29010	Presenile dementia, uncomplicated
29011	Presenile dementia with delirium
29012	Presenile dementia with delusional features
29013	Presenile dementia with depressive features
29020	Senile dementia with delusional features
29021	Senile dementia with depressive features
2903	Senile dementia with delirium
29040	Vascular dementia, uncomplicated
29041	Vascular dementia with delirium
29042	Vascular dementia with delusions
29043	Vascular dementia with depressed mood
2908	Other specified senile psychotic conditions

Diagnosis Code	Description
2909	Unspecified senile psychotic condition
2911	Alcohol amnestic syndrome
2912	Other alcoholic dementia
2915	Alcoholic jealousy
29189	Other alcohol withdrawal
2919	Unspecified alcoholic psychosis
2920	Drug withdrawal syndrome
2922	Pathological drug intoxication
29281	Other specified drug-induced mental disorders
2929	Unspecified drug-induced mental disorder
2930	Delirium due to conditions classified elsewhere
2931	Subacute delirium
29381	Psychotic disorder with delusions in conditions classified elsewhere
29382	Psychotic disorder with hallucinations in conditions classified elsewhere
29384	Anxiety disorder in conditions classified elsewhere
29389	Other specified transient mental disorders due to conditions classified elsewhere, other
2939	Unspecified transient mental disorder in conditions classified elsewhere
2940	Amnesic disorder in conditions classified elsewhere
29410	Dementia in conditions classified elsewhere without behavioral disturbances
29411	Dementia in conditions classified elsewhere with behavioral disturbance
2948	Other persistent mental disorders due to conditions classified elsewhere
2949	Unspecified persistent mental disorders due to conditions classified elsewhere
29500	Schizophrenic disorders, simple type unspecified
29501	Schizophrenic disorders, simple type subchronic
29502	Schizophrenic disorders, simple type chronic
29503	Schizophrenic disorders, simple type subchronic with acute exacerbation
29504	Schizophrenic disorders, simple type chronic with acute exacerbation

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29505	Schizophrenic disorders, simple type in remission
29510	Schizophrenic disorders, disorganized type unspecified
29511	Schizophrenic disorders, disorganized type subchronic
29512	Schizophrenic disorders, disorganized type chronic
29513	Schizophrenic disorders, disorganized type subchronic with acute exacerbation
29514	Schizophrenic disorders, disorganized type chronic with acute exacerbation
29515	Schizophrenic disorders, disorganized type in remission
29520	Schizophrenic disorders, catatonic type unspecified
29521	Schizophrenic disorders, catatonic type subchronic
29522	Schizophrenic disorders, catatonic type chronic
29523	Schizophrenic disorders, catatonic type subchronic with acute exacerbation
29524	Schizophrenic disorders, catatonic type chronic with acute exacerbation
29525	Schizophrenic disorders, catatonic type in remission
29530	Schizophrenic disorders, paranoid type unspecified
29531	Schizophrenic disorders, paranoid type subchronic
29532	Schizophrenic disorders, paranoid type chronic
29533	Schizophrenic disorders, paranoid type subchronic with acute exacerbation
29534	Schizophrenic disorders, paranoid type chronic with acute exacerbation
29535	Schizophrenic disorders, paranoid type in remission
29540	Schizophrenic disorders, schizophreniform unspecified
29541	Schizophrenic disorders, schizophreniform subchronic
29542	Schizophrenic disorders, schizophreniform chronic
29543	Schizophrenic disorders, schizophreniform subchronic with acute exacerbation
29544	Schizophrenic disorders, schizophreniform chronic with acute exacerbation
29545	Schizophrenic disorders, schizophreniform in remission
29550	Schizophrenic disorders, latent schizophrenia unspecified
29551	Schizophrenic disorders, latent schizophrenia subchronic
29552	Schizophrenic disorders, latent schizophrenia chronic
29553	Schizophrenic disorders, latent schizophrenia subchronic with acute exacerbation
29554	Schizophrenic disorders, latent schizophrenia chronic with acute exacerbation
29555	Schizophrenic disorders, latent schizophrenia in remission
29560	Schizophrenic disorders, residual unspecified
29561	Schizophrenic disorders, residual subchronic
29562	Schizophrenic disorders, residual chronic
29563	Schizophrenic disorders, residual subchronic with acute exacerbation
29564	Schizophrenic disorders, residual chronic with acute exacerbation
29565	Schizophrenic disorders, residual in remission
29570	Schizophrenic disorders, schizoaffective disorder unspecified
29571	Schizophrenic disorders, schizoaffective disorder subchronic
29572	Schizophrenic disorders, schizoaffective disorder chronic
29573	Schizophrenic disorders, schizoaffective disorder subchronic with acute exacerbation
29574	Schizophrenic disorders, schizoaffective disorder chronic with acute exacerbation
29575	Schizophrenic disorders, schizoaffective disorder in remission
29580	Schizophrenic disorders, other specified types of schizophrenia unspecified
29581	Schizophrenic disorders, other specified types of schizophrenia subchronic

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29582	Schizophrenic disorders, other specified types of schizophrenia chronic
29583	Schizophrenic disorders, other specified types of schizophrenia subchronic with acute exacerbation
29584	Schizophrenic disorders, other specified types of schizophrenia chronic with acute exacerbation
29585	Schizophrenic disorders, other specified types of schizophrenia in remission
29590	Schizophrenic disorders, unspecified schizophrenia unspecified
29591	Schizophrenic disorders, unspecified schizophrenia subchronic
29592	Schizophrenic disorders, unspecified schizophrenia chronic
29593	Schizophrenic disorders, unspecified schizophrenia subchronic with acute exacerbation
29594	Schizophrenic disorders, unspecified schizophrenia chronic with acute exacerbation
29595	Schizophrenic disorders, unspecified schizophrenia other specified types of schizophrenia in remission
29600	Bipolar I disorder, single manic episode unspecified
29601	Bipolar I disorder, single manic episode mild
29602	Bipolar I disorder, single manic episode moderate
29603	Bipolar I disorder, single manic episode severe without mention of psychotic behavior
29604	Bipolar I disorder, single manic episode severe, specified as with psychotic behavior
29605	Bipolar I disorder, single manic episode, in partial or unspecified remission
29606	Bipolar I disorder, single manic episode, in full remission
29610	Manic disorder, recurrent episode, unspecified
29611	Manic disorder, recurrent episode, mild
29612	Manic disorder, recurrent episode, moderate
29613	Manic disorder, recurrent episode, severe without mention of psychotic behavior

Diagnosis Code	Description
29614	Manic disorder, recurrent episode severe, specified as with psychotic behavior
29615	Manic disorder, recurrent episode severe, in partial or unspecified remission
29616	Manic disorder, recurrent episode, in full remission
29620	Major depressive disorder, single episode, unspecified
29621	Major depressive disorder, single episode, mild
29622	Major depressive disorder, single episode, moderate
29623	Major depressive disorder, single episode, severe without mention of psychotic behavior
29624	Major depressive disorder, single episode, specified as with psychotic behavior
29625	Major depressive disorder, single episode, in partial or unspecified remission
29626	Major depressive disorder, single episode, in full remission
29630	Major depressive disorder, recurrent episode, unspecified
29631	Major depressive disorder, recurrent episode, mild
29632	Major depressive disorder, recurrent episode, moderate
29633	Major depressive disorder, recurrent episode, severe without mention of psychotic behavior
29634	Major depressive disorder, recurrent episode, specified as with psychotic behavior
29635	Major depressive disorder, recurrent episode, in partial or unspecified remission
29636	Major depressive disorder, recurrent episode, in full remission
29640	Bipolar I disorder, most recent episode (or current) manic, unspecified
29641	Bipolar I disorder, most recent episode (or current) manic, mild
29642	Bipolar I disorder, most recent episode (or current) manic, moderate
29643	Bipolar I disorder, most recent episode (or current) manic, severe, without mention of psychotic behavior

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29644	Bipolar I disorder, most recent episode (or current) manic, specified as with psychotic behavior
29645	Bipolar I disorder, most recent episode (or current) manic, in partial or unspecified remission
29646	Bipolar I disorder, most recent episode (or current) manic, in full remission
29650	Bipolar I disorder, most recent episode (or current) depressed, unspecified
29651	Bipolar I disorder, most recent episode (or current) depressed, mild
29652	Bipolar I disorder, most recent episode (or current) depressed, moderate
29653	Bipolar I disorder, most recent episode (or current) depressed, severe, without mention of psychotic behavior
29654	Bipolar I disorder, most recent episode (or current) depressed, specified as with psychotic behavior
29655	Bipolar I disorder, most recent episode (or current) depressed, in partial or unspecified remission
29656	Bipolar I disorder, most recent episode (or current) depressed, in full remission
29660	Bipolar I disorder, most recent episode (or current) mixed, unspecified
29661	Bipolar I disorder, most recent episode (or current) mixed, mild
29662	Bipolar I disorder, most recent episode (or current) mixed, moderate
29663	Bipolar I disorder, most recent episode (or current) mixed, severe, without mention of psychotic behavior
29664	Bipolar I disorder, most recent episode (or current) mixed, specified as with psychotic behavior
29665	Bipolar I disorder, most recent episode (or current) mixed, in partial or unspecified
29666	Bipolar I disorder, most recent episode (or current) mixed, in full remission
2967	Bipolar I disorder, most recent episode (or current) unspecified
29680	Bipolar disorder, unspecified
29681	Atypical manic disorder

Diagnosis Code	Description
29682	Atypical depressive disorder
29689	Other bipolar disorder
29690	Unspecified episodic mood disorder
29699	Other specified episodic mood disorder
2970	Paranoid state, simple
2971	Delusional disorder
2972	Paraphrenia
2973	Shared psychotic disorder
2978	Other specified paranoid states
2979	Unspecified paranoid state
2980	Depressive type psychosis
2981	Excitative type psychosis
2982	Reactive Confusion
2983	Acute paranoid reaction
2984	Psychogenic paranoid psychosis
2988	Other and unspecified reactive psychosis
2989	Unspecified psychosis
29900	Autistic disorder, current or active state
29901	Autistic disorder, residual state
29910	Childhood disintegrative disorder, current or active state
29911	Childhood disintegrative disorder, residual state
29980	Other specified pervasive developmental disorders, current or active state
29981	Other specified pervasive developmental disorders, residual state
29990	Unspecified pervasive developmental disorder, current or active state
29991	Unspecified pervasive developmental disorder, residual state
30000	Anxiety state, unspecified
30001	Panic disorder without agoraphobia
30002	Generalized anxiety disorder
30009	Other anxiety disorder
30010	Hysteria, unspecified
30011	Conversion disorder
30012	Dissociative amnesia
30013	Dissociative fugue
30014	Dissociative identity disorder
30015	Dissociative disorder or reaction, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30016	Factitious disorder with predominantly psychological signs and symptoms
30019	Other and unspecified factitious illness
30020	Phobic, unspecified
30021	Agoraphobia with panic disorder
30022	Agoraphobia without mention of panic attacks
30023	Social phobia
30029	Other isolated or specific phobias
3003	Obsessive-compulsive disorders
3004	Neurotic depression
3006	Depersonalization syndrome
3007	Hypochondriasis
30081	Somatization disorder
30082	Undifferentiated somatoform disorder
30089	Other somatoform disorders
3009	Unspecified neurotic disorder
3010	Paranoid personality disorder
30110	Affective personality disorder
30120	Schizoid personality disorder
3013	Explosive personality disorder
3014	Compulsive personality disorder
30150	Histrionic personality disorder, unspecified
30151	Chronic factitious illness with physical symptoms
30159	Other histrionic personality disorder
3016	Dependent personality disorder
3017	Antisocial personality disorder
30181	Narcissistic personality disorder
30182	Avoidant personality disorder
30183	Borderline personality disorder
30184	Passive-aggressive personality
30189	Other personality disorders
3019	Unspecified personality disorder
3020	Ego-dystonic sexual orientation
3021	Zoophilia
3022	Pedophilia
3023	Transvestic fetishism
3024	Exhibitionism
30250	Trans-sexualism, with unspecified sexual history
30251	Trans-sexualism, with asexual history
30252	Trans-sexualism, with homosexual history
30253	Trans-sexualism, with heterosexual history
3026	Gender identity disorder in children
30270	Psychosexual dysfunction, unspecified
30271	Hypoactive sexual desire disorder
30272	With inhibited sexual excitement
30273	Female orgasmic disorder
30274	Male orgasmic disorder
30275	Premature ejaculation
30276	Dyspareunia, psychogenic
30279	With other specified psychosexual dysfunctions
30281	Fetishism
30282	Voyeurism
30283	Sexual masochism
30284	Sexual sadism
30285	Gender identity disorder in adolescents or adults
30289	Other specified psychosexual disorders
3029	Unspecified psychosexual disorder
30390	Other and unspecified alcohol dependence
30400	Drug dependence
30500	Alcohol abuse, unspecified
30501	Alcohol abuse, continuous
30502	Alcohol abuse, episodic
30503	Alcohol abuse, in remission
30520	Cannabis abuse, unspecified
30521	Cannabis abuse, continuous
30522	Cannabis abuse, episodic
30523	Cannabis abuse, in remission
30530	Hallucinogen abuse, unspecified
30531	Hallucinogen abuse, continuous
30532	Hallucinogen abuse, episodic
30533	Hallucinogen abuse, in remission
30540	Sedative, hypnotic or anxiolytic abuse, unspecified
30541	Sedative, hypnotic or anxiolytic abuse, continuous
30542	Sedative, hypnotic or anxiolytic abuse, episodic
30543	Sedative, hypnotic or anxiolytic abuse, in remission

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30550	Opioid abuse, unspecified
30551	Opioid abuse, continuous
30552	Opioid abuse, episodic
30553	Opioid abuse, in remission
30560	Cocaine abuse, unspecified
30561	Cocaine abuse, continuous
30562	Cocaine abuse, episodic
30563	Cocaine abuse, in remission
30570	Amphetamine abuse or related acting sympathomimetic abuse, unspecified
30571	Amphetamine abuse or related acting sympathomimetic abuse, continuous
30572	Amphetamine abuse or related acting sympathomimetic abuse, episodic
30573	Amphetamine abuse or related acting sympathomimetic abuse, in remission
30580	Antidepressant type abuse, unspecified
30581	Antidepressant type abuse, continuous
30582	Antidepressant type abuse, episodic
30583	Antidepressant type abuse, in remission
30591	Other, mixed, or unspecified drug abuse, continuous
30592	Other, mixed, or unspecified drug abuse, episodic
30593	Other, mixed, or unspecified drug abuse, in remission
3080	Predominant disturbance of emotions
3081	Predominant disturbance of consciousness
3082	Predominant psychomotor disturbance
3083	Other acute reactions to stress
3084	Mixed disorders as a reaction to stress
3089	Unspecified acute reaction to stress
3090	Adjustment disorder with depressed mood
3091	Prolonged depressive reaction
30921	Separation anxiety disorder
30922	Emancipation disorder of adolescents and early adult life
30923	Specific academic or work inhibition
30924	Adjustment disorder with anxiety
30928	Adjustment disorder with mixed anxiety
30929	Other
3093	Adjustment disorder with disturbance of conduct
3094	Adjustment disorder with mixed disturbance of emotions and conduct
30981	Posttrauma stress disorder
30982	Adjustment reaction with physical symptoms
30983	Adjustment reaction with withdrawal
30989	Other
3099	Unspecified adjustment reaction
3100	Frontal lobe syndrome
3101	Organic personality syndrome
3102	Postconcussion syndrome
3108	Other specified nonpsychotic mental disorders following organic brain damage
311	Depressive disorder, not elsewhere classified
31200	Undersocialized conduct disorder, aggressive type, unspecified
31201	Undersocialized conduct disorder, aggressive type, mild
31202	Undersocialized conduct disorder, aggressive type, moderate
31203	Undersocialized conduct disorder, aggressive type, severe
31210	Undersocialized conduct disorder, unaggressive type, unspecified
31211	Undersocialized conduct disorder, aggressive type, mild
31212	Undersocialized conduct disorder, aggressive type, moderate
31213	Undersocialized conduct disorder, aggressive type, severe
31220	Socialized conduct disorder, unspecified
31221	Socialized conduct disorder, mild
31222	Socialized conduct disorder, moderate
31223	Socialized conduct disorder, severe
31230	Impulse control disorder, unspecified
31231	Pathological gambling
31232	Kleptomania
31233	Pyromania
31234	Intermittent explosive disorder
31235	Isolated explosive disorder
31239	Other disorders of impulse control

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3124	Mixed disturbance of conduct and emotions
31281	Conduct disorder, childhood onset type
31282	Conduct disorder, adolescent onset type
31289	Other conduct disorder
3129	Unspecified disturbance of conduct
3130	Overanxious disorder
3131	Misery and unhappiness disorder
31321	Shyness disorder of childhood
31322	Introverted disorder of childhood
31323	Selective mutism
3133	Relationship problems
31381	Oppositional defiant disorder
31382	Identity disorder
31383	Academic underachievement disorder
31389	Other emotional disturbances of childhood or adolescence
3139	Unspecified emotional disturbance of childhood or adolescence
31400	Attention deficit disorder, without mention of hyperactivity
31401	Attention deficit disorder, with hyperactivity
3141	Hyperkinesis with developmental delay
3142	Hyperkinetic conduct disorder
3148	Other specified manifestations of hyperkinetic syndrome
3149	Unspecified hyperkinetic syndrome
31531	Expressive language disorder
31532	Mixed receptive-expressive language disorder
3154	Coordination disorder
3155	Mixed development disorder
3158	Other specified delays in development
3159	Unspecified delay in development
317	Mild mental retardation
3180	Moderate mental retardation
3181	Severe mental retardation
3182	Profound mental retardation
319	Unspecified mental retardation
3200	Hemophilus meningitis
3201	Pneumococcal meningitis
3202	Streptococcal meningitis

Diagnosis Code	Description
3203	Staphylococcal meningitis
3207	Meningitis in other bacterial diseases classified elsewhere
32081	Anaerobic meningitis
32082	Meningitis due to gram-negative bacteria, not elsewhere classified
32089	Meningitis due to other specified bacteria
3209	Meningitis due to unspecified bacterium
3210	Cryptococcal meningitis
3211	Meningitis in other fungal diseases
3212	Meningitis due to viruses not elsewhere classified
3213	Meningitis due to trypanosomiasis
3214	Meningitis in sarcoidosis
3218	Meningitis due to other nonbacterial organisms classified elsewhere
3220	Nonpyogenic meningitis
3221	Eosomophilic meningitis
3222	Chronic meningitis
3229	Meningitis, unspecified
32301	Encephalitis and encephalomyelitis in viral diseases classified elsewhere
32302	Myelitis in viral diseases classified elsewhere
3231	Encephalitis, myelitis, and encephalomyelitis in rickettsial diseases classified elsewhere
3232	Encephalitis, myelitis, and encephalomyelitis in protozoal diseases classified elsewhere
32302	Myelitis in viral diseases classified elsewhere
32341	Other encephalitis and encephalomyelitis due to infection classified elsewhere
32342	Other myelitis due to infection classified elsewhere
32351	Encephalitis and encephalomyelitis following immunization procedures
32352	Myelitis following immunization procedures
32361	Infectious acute disseminated encephalomyelitis (ADEM)
32362	Other postinfectious encephalitis and encephalomyelitis
32363	Postinfectious myelitis
32371	Toxic encephalitis and encephalomyelitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
32372	Toxic myelitis
32381	Other causes of encephalitis and encephalomyelitis
32382	Other causes of myelitis
3239	Unspecified causes of encephalitis, myelitis, and encephalomyelitis
3240	Intracranial abscess
3241	Intraspinal abscess
3249	Of unspecified site
3300	Leukodystrophy
3301	Cerebral lipidoses
3302	Cerebral degeneration in generalized lipidoses
3203	Cerebral degeneration of childhood in other diseases classified elsewhere
3308	Other specified cerebral degenerations in childhood
3309	Unspecified cerebral degeneration in childhood
3310	Alzheimer's disease
33111	Pick's disease
33119	Other frontotemporal dementia
3312	Senile degeneration of brain
3313	Communicating hydrocephalus
3314	Obstructive hydrocephalus
3317	Cerebral degeneration in diseases classified elsewhere
33181	Reye's syndrome
33182	Dementia with Lewy bodies
3319	Cerebral degeneration, unspecified
33392	Neuroleptic malignant syndrome
340	Multiple sclerosis
34500	Generalized nonconvulsive epilepsy, without mention of intractable epilepsy
34501	Generalized nonconvulsive epilepsy, with intractable epilepsy
34510	Generalized convulsive epilepsy, without mention of intractable epilepsy
34511	Generalized convulsive epilepsy, with intractable epilepsy
3452	Petite mal status, epileptic
3453	Grand mal status, epileptic
34540	Partial epilepsy, with impairment of consciousness, without mention of intractable epilepsy

Diagnosis Code	Description
34541	Partial epilepsy, with impairment of consciousness, with intractable epilepsy
34550	Partial epilepsy, without mention of impairment of consciousness, without mention of intractable epilepsy
34551	Partial epilepsy, without mention of impairment of consciousness, with intractable epilepsy
34560	Infantile spasms, without mention of intractable epilepsy
34561	Infantile spasms, with intractable epilepsy
34570	Epilepsia partialis continua, without mention of intractable epilepsy
34571	Epilepsia partialis continua, with intractable epilepsy
34580	Other forms of epilepsy, without mention of intractable epilepsy
34581	Other forms of epilepsy, with intractable epilepsy
34590	Epilepsy, unspecified, without mention of intractable epilepsy
34591	Epilepsy, unspecified, with intractable epilepsy
3480	Cerebral cysts
3481	Anoxic brain damage
34830	Encephalopathy, unspecified
34831	Metabolic encephalopathy
34839	Other encephalopathy
430	Subarachnoid hemorrhage
431	Intracerebral hemorrhage
4320	Nontraumatic extradural hemorrhage
4321	Subdural hemorrhage
4329	Unspecified intracranial hemorrhage
43300	Basilar artery, without mention of cerebral infarction
43301	Basilar artery, with cerebral infarction
43310	Carotid artery, without mention of cerebral infarction
43311	Carotid artery, with cerebral infarction
43320	Vertebral artery, without mention of cerebral infarction
43321	Vertebral artery, with cerebral infarction
43330	Multiple and bilateral, without mention of cerebral infarction
43331	Multiple and bilateral, with cerebral infarction

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
43380	Other specified precerebral artery, without mention of cerebral infarction
43381	Other specified precerebral artery, with cerebral infarction
43390	Unspecified precerebral artery, without mention of cerebral infarction
43391	Unspecified precerebral artery, with cerebral infarction
43400	Cerebral thrombosis, without mention of cerebral infarction
43401	Cerebral thrombosis, with cerebral infarction
43410	Cerebral embolism, without mention of cerebral infarction
43411	Cerebral embolism, with cerebral infarction
43490	Cerebral artery occlusion, unspecified, without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified, with cerebral infarction
4350	Basilar artery syndrome
4351	Vertebral artery syndrome
4352	Subclavian steal syndrome
4353	Vertebrobasilar artery syndrome
4358	Other specified transient ischemia
4359	Unspecified transient cerebral ischemia
436	Acute, but ill-defined, cerebrovascular disease
4370	Cerebral atherosclerosis
4371	Other generalized ischemic cerebrovascular disease
4372	Hypertensive encephalopathy
4373	Cerebral aneurysm, nonruptured
4374	Cerebral arteritis
4375	Moyamoya disease
4376	Nonpyogenic thrombosis of intracranial venous sinus
4377	Transient global amnesia
4378	Other and ill-defined cerebrovascular disease, other
4379	Other and ill-defined cerebrovascular disease, unspecified

Diagnosis Code	Description
85124	Cortex (cerebral) laceration without mention of open cranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open cranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open cranial wound, with loss of consciousness of unappeased duration
85129	Cortex (cerebral) laceration without mention of open cranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, unspecified state of consciousness
85131	Cortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified
85140	Cerebellar or brain stem contusions without mention of intracranial wound, unspecified state of consciousness
85141	Cerebellar or brain stem contusions without mention of intracranial wound, with no loss of consciousness
85142	Cerebellar or brain stem contusions without mention of intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusions without mention of intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusions without mention of intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusions without mention of intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusions without mention of intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusions without mention of intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusions with intracranial wound, unspecified state of consciousness
85151	Cerebellar or brain stem contusions with intracranial wound, with no loss of consciousness
85152	Cerebellar or brain stem contusions with intracranial wound, with brief (less than one hour) loss of consciousness
85153	Cerebellar or brain stem contusions with intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusions with intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85155	Cerebellar or brain stem contusions with intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusions with intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85159	Cerebellar or brain stem contusions with intracranial wound, with concussion, unspecified
85160	Cerebellar or brain stem laceration without mention of intracranial wound, unspecified state of consciousness
85161	Cerebellar or brain stem laceration without mention of intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of intracranial wound, with brief (less than one hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of intracranial wound, with loss of consciousness of unspecified duration
85169	Cerebellar or brain stem laceration without mention of intracranial wound, with concussion, unspecified
85170	Cerebellar or brain stem laceration with intracranial wound, unspecified state of consciousness
85171	Cerebellar or brain stem laceration with intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with intracranial wound, without mention of open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, unspecified state of consciousness
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85186	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, unspecified state of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged {more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, c
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury without mention of open intracranial wound, unspecified state of consciousness
85201	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with no loss of consciousness
85202	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury without mention of open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85206	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85209	Subarachnoid hemorrhage following injury without mention of open intracranial wound, with concussion, unspecified
85210	Subarachnoid hemorrhage following injury with open intracranial wound, unspecified state of consciousness
85211	Subarachnoid hemorrhage following injury with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury with open intracranial wound, with brief (less than one hour) loss of consciousness
85213	Subarachnoid hemorrhage following injury with open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85214	Subarachnoid hemorrhage following injury with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85215	Subarachnoid hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration
85216	Subarachnoid hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury without mention of open intracranial wound, unspecified state of consciousness
85221	Subdural hemorrhage following injury without mention of open intracranial wound, with no loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85222	Subdural hemorrhage following injury without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85232	Subdural hemorrhage following injury without mention of open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85226	Subdural hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85229	Subdural hemorrhage following injury without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury with open intracranial wound, unspecified state of consciousness
85231	Subdural hemorrhage following injury with open intracranial wound, with no loss of consciousness
85232	Subdural hemorrhage following injury with open intracranial wound, with brief (less than one hour) loss of consciousness
85233	Subdural hemorrhage following injury with open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration
85236	Subdural hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration

Diagnosis Code	Description
85239	Subdural hemorrhage following injury with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury without mention of open intracranial wound, unspecified state of consciousness
85241	Extradural hemorrhage following injury without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85243	Extradural hemorrhage following injury without mention of open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85244	Extradural hemorrhage following injury without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85246	Extradural hemorrhage following injury without mention of open intracranial wound, with loss of consciousness of unspecified duration
85249	Extradural hemorrhage following injury without mention of open intracranial wound, with concussion, unspecified
85250	Extradural hemorrhage following injury with open intracranial wound, unspecified state of consciousness
85251	Extradural hemorrhage following injury with open intracranial wound, with no loss of consciousness
85252	Extradural hemorrhage following injury with open intracranial wound, with brief (less than one hour) loss of consciousness
85253	Extradural hemorrhage following injury with open intracranial wound, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

Diagnosis Code	Description
85255	Extradural hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration
85256	Extradural hemorrhage following injury with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury with open intracranial wound, with concussion, unspecified
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, unspecified state of consciousness
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, unspecified state of consciousness

Diagnosis Code	Description
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, c
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, unspecified state of consciousness
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unappeased duration
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unappeased duration
85409	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, Intracranial injury of other and unspecified nature, without mention of open intracranial wound
986	Toxic effect of carbon monoxide
9941	Drowning and nonfatal submersion
9947	Asphyxiation and strangulation
V110	Schizophrenia
V111	Affective Disorders
V112	Neurosis
V113	alcoholism
V170	Psychiatric condition
V401	Problems with communication (including speech)
V402	Other mental problems
V6282	Bereavement, uncomplicated
V6283	Counseling for perpetrator of physical/sexual abuse
V6284	Suicidal ideation
V695	Behavioral insomnia of childhood
V7101	Adult antisocial behavior
V7102	Childhood or adolescent antisocial behavior
V790	Depression
V791	Special screening for Alcoholism
V792	Mental retardation
V793	Developmental handicaps in early childhood
V798	Other specified mental disorders and developmental handicaps

If separate charges for an office visit and psychological testing or psychotherapy are billed on the same day, the office visit is denied as part of another procedure on the same day unless the diagnosis referenced to the office visit indicates a physical condition *unrelated* to the psychiatric diagnosis. In this instance the office visit is paid separately.

Report psychotherapy of less than 20 minutes duration using the appropriate E/M code.

Procedure codes 1-90801 and 1-90802 are limited to once per day per client, any provider, regardless of the number of professionals involved in the interview, and once per year per provider (same provider) in any setting.

An interactive interview (90802) may be covered to the extent it is medically necessary. Examples of medical necessity include, but are not limited to, clients whose ability to communicate is impaired by an expressive or receptive language impairment from various causes, such as conductive or sensorineural hearing loss, deaf mutism, or aphasia.

A diagnostic interview (90801, 90802) may be incorporated into an evaluation and management service provided the required elements of the evaluation and management service are fulfilled. A diagnostic interview (90801 or 90802) will be denied as part of any evaluation and management service when billed for the same date of service by the same provider.

Procedure code 1-90802 billed on the same day as 1-90801 by the same provider is denied as part of another procedure billed on the same day.

If procedure code 1-90801 or 1-90802 is billed, the following psychiatric therapeutic procedure codes performed the same day by the same provider are denied as part of the initial psychiatric exam.

Procedure Codes		
1-90804	1-90805	1-90806
1-90807	1-90808	1-90809
1-90810	1-90811	1-90812
1-90813	1-90814	1-90815
1-90816	1-90817	1-90818
1-90819	1-90821	1-90822
1-90823	1-90824	1-90826
1-90827	1-90828	1-90829
1-90845	1-90847	1-90853
1-90865	1-90857	

If procedure code 1-90801 or 1-90802 is billed on the same day as 1-99221, 1-99222, and 1-99223 by the same provider, the initial hospital visit is denied as part of another procedure on the same day.

Documentation for diagnostic interview examinations (1-90801, 1-90802) must include:

- Reason for referral/presenting problem
- Prior History, including prior treatment
- Other pertinent medical, social, and family history
- Clinical observations and mental status examinations
- Complete Diagnostic and Statistical Manual of Mental Disorders - IV (DSM-IV) diagnosis
- Recommendations, including expected long term and short term benefits

CPT only copyright 2005 American Medical Association. All rights reserved.

- For the interactive diagnostic interview (90802), the medical record must indicate the adaptations utilized in the session and the rationale for employing these interactive techniques

Outpatient psychotherapy (1-90847, 1-90853, 1-90857, 1-90804) billed on the same date of service as narcosynthesis (1-90865) will be denied.

If the following psychotherapy or psychoanalysis codes are billed on the same day as a subsequent hospital visit (1-99231, 1-99232, 1-99233, and 1-99238) by the same provider, the subsequent hospital visit is denied as part of another procedure billed on the same day.

Procedure Codes		
1-90816	1-90817	1-90818
1-90819	1-90821	1-90822
1-90823	1-90824	1-90826
1-90827	1-90828	1-90829
1-90845	1-90847	1-90853

A hospital visit subsequent care (1-99231, 1-99232, 1-99233, and 1-99238) is not separately payable on the same day as shock therapy. Hospital subsequent care for diagnoses unrelated to the EST will be considered on appeal.

Psychotherapy (with and without evaluation and management) is coded by the following:

Procedure Codes		
1-90804	1-90805	1-90806
1-90807	1-90808	1-90809
1-90810	1-90811	1-90812
1-90813	1-90814	1-90815
1-90816	1-90817	1-90818
1-90819	1-90821	1-90822
1-90823	1-90824	1-90826
1-90827	1-90828	1-90829
1-90847	1-90853	1-90857

Psychoanalysis should be coded 1-90845.

If the following psychotherapy procedure codes are billed on the same day as psychoanalysis (1-90845), psychotherapy is denied.

Procedure Codes		
1-90804	1-90805	1-90806
1-90807	1-90808	1-90809
1-90810	1-90811	1-90812
1-90813	1-90814	1-90815
1-90816	1-90817	1-90818
1-90819	1-90821	1-90822
1-90823	1-90824	1-90826
1-90827	1-90828	1-90829
1-90853	1-90857	

The following psychiatric services are *not* covered by the Texas Medicaid Program:

- Services provided by a licensed chemical dependency counselor (LCDC), psychiatric nurse (RN or licensed vocational nurse [LVN]), mental health worker, or psychological associate.
- Thermogenic therapy, recreational therapy, psychiatric day care, and biofeedback, music, or dance therapy
- Hypnosis
- *Adult activity* and *individual activity*. These services are payable only if guidelines of group therapy are met and termed “group therapy“

Medicare deductibles or coinsurance for inpatient stays in psychiatric hospitals are not payable for clients 22 to 64 years of age. This limitation does not apply to psychiatric services rendered in a general acute care hospital.

The following procedure codes are *not* reimbursed by the Texas Medicaid Program: 1-90846 and 1-90849.

When billing or providing family therapy/counseling services, note the following requirements for Medicaid reimbursement:

- The client must be present when family therapy/counseling services are provided.
- Family therapy/counseling is reimbursable only for one family member per session.

According to the definition of family provided by DADS Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in supervision and care of Temporary Assistance to Needy Families (formerly Aid to Families with Dependent Children [AFDC]) children. The following specific relatives are included in family counseling services:

- Father or mother
- Grandfather or grandmother
- Brother or sister
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

When individual, group, or family psychotherapy is billed by any provider on the same day, each type of session is paid. When multiples of each type of session are billed, the most inclusive code from each type of session is paid and the others are denied.

Refer to: “Request for Extended Outpatient Psychotherapy/Counseling Form” on page B-81.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.39.1 Documentation Required

Each client for whom services are billed must have the following documentation included in their record:

- All entries, clearly documented and legible to individuals other than the author, date (month/day/year), and signed by the performing provider.
- Notations of the beginning and ending session times.
- All pertinent information on the patient's condition to substantiate the need for services, including, but not limited to:
    - The name of test(s) (e.g., WAIS-R, Rorschach, MMPI).
    - Background observations during the session.
    - Narrative descriptions of the test findings.
    - The diagnosis (symptoms, impressions).
    - The treatment plan and recommendations.
    - The explanation to substantiate the necessity of retesting, if testing is repeated.

In addition to these documentation requirements, the following must be a part of each client's record for which services are billed:

- Narrative description of the counseling session
- Narrative description of the assessment, treatment plan, and recommendations

36.4.39.2 Psychological and Neuropsychological Testing

Psychological testing (5-96101) and neuropsychological testing (5-96118) are limited to a total of four hours per day and eight hours per calendar year per client for any provider. Providers must maintain documentation supporting the medical necessity for each test in the client's record.

If the client requires more than four hours of psychological or neuropsychological testing per day or more than eight hours per calendar year, prior authorization is required. Additional documentation must be submitted that supports the medical necessity for the additional hours requested. This includes a record of all of the tests previously performed and a complete history that reflects the need for each test requested.

Each hour of examination, therapy, psychological and /or neuropsychological testing will count toward the 12 hours per day limitation as well as one visit/encounter towards the 30 visit/encounter limit.

Procedure codes 5-96101 and 5-96118 include the testing, interpretation, and report, and will not be reimbursed separately. Providers must bill the preponderance of each quarter hour of testing and indicate that number of units on the claim form. Document the number of hours in Block 24G of the CMS-1500 claim form.

Procedure code 5-96118 will be denied when billed on the same day as procedure code 5-96101 by any provider.

Procedure code 5-96101 or 5-96118 is payable on the same day as procedure code 1-90801 or 1-90802.

Advanced practice nurses are not eligible providers and will not be reimbursed for psychological and neuropsychological testing. Behavioral health testing may be performed during an assessment by an APN, and should be billed as part of another service.

Procedure codes 5-96101 and 5-96118 performed by a physician or psychologist are covered services only for the following diagnosis codes:

Diagnosis Code	Description
0360	Meningococcal meningitis
0361	Meningococcal encephalitis
0362	Meningococcemia
0363	Waterhouse-Friderichsen syndrome, meningococcal
03640	Meningococcal carditis, unspecified
03641	Meningococcal pericarditis
03642	Meningococcal endocarditis
03643	Meningococcal myocarditis
03681	Meningococcal optic neuritis
03682	Meningococcal arthropathy
03689	Other specified meningococcal infections
0369	Meningococcal infection, unspecified
04500	Acute paralytic poliomyelitis specified as bulbar, unspecified type of poliovirus
04501	Acute paralytic poliomyelitis specified as bulbar, poliovirus type I
04502	Acute paralytic poliomyelitis specified as bulbar, poliovirus type II
04503	Acute paralytic poliomyelitis specified as bulbar, poliovirus type III
04510	Acute poliomyelitis with other paralysis, unspecified type of poliovirus
04511	Acute poliomyelitis with other paralysis, poliovirus type I
04512	Acute poliomyelitis with other paralysis, poliovirus type II
04513	Acute poliomyelitis with other paralysis, poliovirus type III
04520	Acute nonparalytic poliomyelitis, unspecified type poliovirus
04521	Acute nonparalytic poliomyelitis, poliovirus type I
04522	Acute nonparalytic poliomyelitis, poliovirus type II
04523	Acute nonparalytic poliomyelitis, poliovirus type III

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
04590	Unspecified acute poliomyelitis, unspecified type poliovirus
04591	Unspecified acute poliomyelitis, poliovirus type I
04592	Unspecified acute poliomyelitis, poliovirus type II
04593	Unspecified acute poliomyelitis, poliovirus type III
0460	Kuru
0461	Jakob-Creutzfeldt disease
0462	Subacute sclerosing panencephalitis
0463	Progressive multifocal leukoencephalopathy
0468	Other specified slow virus infection of central nervous system
0469	Unspecified slow virus infection of central nervous system
0470	Meningitis due to coxsackie virus
0471	Meningitis due to echo virus
0478	Other specified viral meningitis
0479	Unspecified viral meningitis
048	Other enterovirus diseases of central nervous system
0490	Non-arthopod borne lymphocytic choriomeningitis
0491	Non-arthopod borne meningitis due to adenovirus
0498	Other specified non-arthropod-borne viral diseases of central nervous system
0499	Unspecified non-arthropod-borne viral diseases of central nervous system
2900	Senile dementia, uncomplicated
29010	Presenile dementia, uncomplicated
29011	Presenile dementia with delirium
29012	Presenile dementia with delusional features
29013	Presenile dementia with depressive features
29020	Senile dementia with delusional features
29021	Senile dementia with depressive features
2903	Senile dementia with delirium
29040	Vascular dementia, uncomplicated
29041	Vascular dementia, with delirium
29042	Vascular dementia, with delusions

Diagnosis Code	Description
29043	Vascular dementia, with depressed mood
2908	Other specified senile psychotic conditions
2909	Unspecified senile psychotic condition
2910	Alcohol withdrawal delirium
2911	Alcohol-induced persisting amnestic disorder
2912	Alcohol-induced persisting dementia
2913	Alcohol-induced psychotic disorder with hallucinations
2914	Idiosyncratic alcohol intoxication
2915	Alcohol-induced psychotic disorder with delusions
29189	Other alcohol-induced mental disorders
2919	Unspecified alcohol-induced mental disorders
2920	Drug withdrawal
29211	Drug-induced psychotic disorder with delusions
29212	Drug-induced psychotic disorder with hallucinations
2922	Pathological drug intoxication
29281	Drug-induced delirium
29282	Drug-induced persisting dementia
29283	Drug-induced persisting amnestic disorder
29284	Drug-induced mood disorder
29285	Drug induced sleep disorders
29289	Other specified drug-induced mental disorders
2929	Unspecified drug-induced mental disorder
2930	Delirium due to conditions classified elsewhere
2931	Subacute delirium
29381	Psychotic disorder with delusions in conditions classified elsewhere
29382	Psychotic disorder with hallucinations in conditions classified elsewhere
23983	Mood disorder in conditions classified elsewhere
28384	Anxiety disorder in conditions classified elsewhere
29389	Other specified transient mental disorders due to conditions classified elsewhere, other

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2939	Unspecified transient mental disorder in conditions classified elsewhere
5940	Amnestic disorder in conditions classified elsewhere
29410	Dementia in conditions classified elsewhere without behavioral disturbance
29411	Dementia in conditions classified elsewhere with behavioral disturbance
2948	Other persistent mental disorders due to conditions classified elsewhere
2949	Unspecified persistent mental disorders due to conditions classified elsewhere
29500	Simple type schizophrenia, unspecified state
29501	Simple type schizophrenia, subchronic state
29502	Simple type schizophrenia, chronic state
29503	Simple type schizophrenia, subchronic state with acute exacerbation
29504	Simple type schizophrenia, chronic state with acute exacerbation
29505	Simple type schizophrenia, in remission
29510	Disorganized type schizophrenia, unspecified state
29511	Disorganized type schizophrenia, subchronic state
29512	Disorganized type schizophrenia, chronic state
29513	Disorganized type schizophrenia, subchronic state with acute exacerbation
29514	Disorganized type schizophrenia, chronic state with acute exacerbation
29515	Disorganized type schizophrenia, in remission
29520	Catatonic type schizophrenia, unspecified state
29521	Catatonic type schizophrenia, subchronic state
29522	Catatonic type schizophrenia, chronic state
29523	Catatonic type schizophrenia, subchronic state with acute exacerbation
29524	Catatonic type schizophrenia, chronic state with acute exacerbation
29525	Catatonic type schizophrenia, in remission
29530	Paranoid type schizophrenia, unspecified state
29531	Paranoid type schizophrenia, subchronic state
29532	Paranoid type schizophrenia, chronic state
29533	Paranoid type schizophrenia, subchronic state with acute exacerbation
29534	Paranoid type schizophrenia, chronic state with acute exacerbation
29535	Paranoid type schizophrenia, in remission
29540	Schizophreniform disorder, unspecified
29541	Schizophreniform disorder, subchronic
29542	Schizophreniform disorder, chronic
29543	Schizophreniform disorder, subchronic with acute exacerbation
29544	Schizophreniform disorder, chronic with acute exacerbation
29545	Schizophreniform disorder, in remission
29550	Latent schizophrenia, unspecified state
29551	Latent schizophrenia, subchronic state
29552	Latent schizophrenia, chronic state
29553	Latent schizophrenia, subchronic state with acute exacerbation
29554	Latent schizophrenia, chronic state with acute exacerbation
29555	Latent schizophrenia, in remission
29560	Schizophrenic disorders, residual type, unspecified
29561	Schizophrenic disorders, residual type, subchronic
29562	Schizophrenic disorders, residual type, chronic
29563	Schizophrenic disorders, residual type, subchronic with acute exacerbation
29564	Schizophrenic disorders, residual type, chronic with acute exacerbation
29570	Schizoaffective disorder, unspecified
29571	Schizoaffective disorder, subchronic

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29572	Schizoaffective disorder, chronic
29573	Schizoaffective disorder, subchronic with acute exacerbation
29574	Schizoaffective disorder, chronic with acute exacerbation
29575	Schizoaffective disorder, in remission
29580	Other specified types of schizophrenia, unspecified state
29581	Other specified types of schizophrenia, subchronic state
29582	Other specified types of schizophrenia, chronic state
29583	Other specified types of schizophrenia, subchronic state with acute exacerbation
29584	Other specified types of schizophrenia, chronic state with acute exacerbation
29585	Other specified types of schizophrenia, in remission
29590	Unspecified type schizophrenia, unspecified state
29591	Unspecified type schizophrenia, subchronic state
29592	Unspecified type schizophrenia, chronic state
29593	Unspecified type schizophrenia, subchronic state with acute exacerbation
29594	Unspecified type schizophrenia, chronic state with acute exacerbation
29595	Unspecified type schizophrenia, in remission
29600	Bipolar I disorder, single manic episode, unspecified
29601	Bipolar I disorder, single manic episode, mild
29602	Bipolar I disorder, single manic episode, moderate
29603	Bipolar I disorder, single manic episode, severe, without mention of psychotic behavior
29604	Bipolar I disorder, single manic episode, severe, specified as with psychotic behavior
29605	Bipolar I disorder, single manic episode, in partial or unspecified remission
29606	Bipolar I disorder, single manic episode, in full remission

Diagnosis Code	Description
29610	Manic affective disorder, recurrent episode, unspecified degree
29611	Manic affective disorder, recurrent episode, mild degree
29612	Manic affective disorder, recurrent episode, moderate degree
29613	Manic affective disorder, recurrent episode, severe degree, without mention of psychotic behavior
29614	Manic affective disorder, recurrent episode, severe degree, specified as with psychotic behavior
29615	Manic affective disorder, recurrent episode, in partial or unspecified remission
29616	Manic affective disorder, recurrent episode, in full remission
29620	Major depressive affective disorder, single episode, unspecified degree
29621	Major depressive affective disorder, single episode, mild degree
29622	Major depressive affective disorder, single episode, moderate degree
29623	Major depressive affective disorder, single episode, severe degree, without mention of psychotic behavior
29624	Major depressive affective disorder, single episode, severe degree, specified as with psychotic behavior
29625	Major depressive affective disorder, single episode, in partial or unspecified remission
29626	Major depressive affective disorder, single episode, in full remission
29630	Major depressive affective disorder, recurrent episode, unspecified degree
29631	Major depressive affective disorder, recurrent episode, mild degree
29632	Major depressive affective disorder, recurrent episode, moderate degree
29633	Major depressive affective disorder, recurrent episode, severe degree, without mention of psychotic behavior
29634	Major depressive affective disorder, recurrent episode, severe degree, specified as with psychotic behavior
29635	Major depressive affective disorder, recurrent episode, in partial or unspecified remission

Diagnosis Code	Description
29636	Major depressive affective disorder, recurrent episode, in full remission
29640	Bipolar I disorder, most recent episode (or current) manic, unspecified
29641	Bipolar I disorder, most recent episode (or current) manic, mild
29642	Bipolar I disorder, most recent episode (or current) manic, moderate
29643	Bipolar I disorder, most recent episode (or current) manic, severe, without mention of psychotic behavior
29644	Bipolar I disorder, most recent episode (or current) manic, severe, specified as with psychotic behavior
29645	Bipolar I disorder, most recent episode (or current) manic, in partial or unspecified remission
29646	Bipolar I disorder, most recent episode (or current) manic, in full remission
29650	Bipolar I disorder, most recent episode (or current) depressed, unspecified
29651	Bipolar I disorder, most recent episode (or current) depressed, mild
29652	Bipolar I disorder, most recent episode (or current) depressed, moderate
29653	Bipolar I disorder, most recent episode (or current) depressed, severe, without mention of psychotic behavior
29654	Bipolar I disorder, most recent episode (or current) depressed, severe, specified as with psychotic behavior
29655	Bipolar I disorder, most recent episode (or current) depressed, in partial or unspecified remission
29656	Bipolar I disorder, most recent episode (or current) depressed, in full remission
29660	Bipolar I disorder, most recent episode (or current) mixed, unspecified
29661	Bipolar I disorder, most recent episode (or current) mixed, mild
29662	Bipolar I disorder, most recent episode (or current) mixed, moderate

Diagnosis Code	Description
29663	Bipolar I disorder, most recent episode (or current) mixed, severe, without mention of psychotic behavior
29664	Bipolar I disorder, most recent episode (or current) mixed, severe, specified as with psychotic behavior
29665	Bipolar I disorder, most recent episode (or current) mixed, in partial or unspecified remission
29666	Bipolar I disorder, most recent episode (or current) mixed, in full remission
2967	Bipolar I disorder, most recent episode (or current) unspecified
29680	Bipolar disorder, unspecified
29681	Atypical manic disorder
29682	Atypical depressive disorder
29689	Other and unspecified bipolar disorders, other
29690	Unspecified episodic mood disorder
29699	Other specified episodic mood disorder
2970	Paranoid state, simple
2971	Delusional disorder
2972	Paraphrenia
2973	Shared psychotic disorder
2978	Other specified paranoid states
2979	Unspecified paranoid state
2980	Depressive type psychosis
2981	Excitative type psychosis
2982	Reactive confusion
2983	Acute paranoid reaction
2984	Psychogenic paranoid psychosis
2988	Other and unspecified reactive psychosis
2989	Unspecified psychosis
29900	Autistic disorder, current or active state
29901	Autistic disorder, residual state
29910	Childhood disintegrative disorder, current or active stat
29911	Childhood disintegrative disorder, residual state
29980	Other specified pervasive develop-mental disorders, current or active state
29981	Other specified pervasive develop-mental disorders, residual state

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29990	Unspecified pervasive developmental disorder, current or active state
29991	Unspecified pervasive developmental disorder, residual state
30000	Anxiety state, unspecified
30001	Panic disorder without agoraphobia
30002	Generalized anxiety disorder
30009	Other anxiety states
30010	Hysteria, unspecified
30011	Conversion disorder
30012	Dissociative amnesia
30013	Dissociative fugue
30014	Dissociative identity disorder
30015	Dissociative disorder or reaction, unspecified
30016	Factitious disorder with predominantly psychological signs and symptoms
30019	Other and unspecified factitious illness
30020	Phobia, unspecified
30021	Agoraphobia with panic disorder
30022	Agoraphobia without mention of panic attacks
30023	Social phobia
30029	Other isolated or specific phobias
3003	Obsessive-compulsive disorders
3004	Dysthymic disorder
3005	Neurasthenia
3006	Depersonalization disorder
3007	Hypochondriasis
30081	Somatization disorder
30082	Undifferentiated somatoform disorder
30089	Other somatoform disorders
3009	Unspecified nonpsychotic mental disorder
3010	Paranoid personality disorder
30100	Affective personality disorder, unspecified
30111	Chronic hypomanic personality disorder
30112	Chronic depressive personality disorder
30113	Cyclothymic disorder
30120	Schizoid personality disorder, unspecified

Diagnosis Code	Description
30121	Introverted personality
30122	Schizotypal personality disorder
3013	Explosive personality disorder
3014	Obsessive-compulsive personality disorder
30150	Histrionic personality disorder, unspecified
30151	Chronic factitious illness with physical symptoms
30159	Other histrionic personality disorder
3016	Dependent personality disorder
3017	Antisocial personality disorder
30181	Narcissistic personality disorder
30182	Avoidant personality disorder
30183	Borderline personality disorder
30184	Passive-aggressive personality
30189	Other personality disorders
3019	Unspecified personality disorder
3020	Ego-dystonic sexual orientation
3021	Zoophilia
3022	Pedophilia
3023	Transvestic fetishism
3024	Exhibitionism
30250	Trans-sexualism with unspecified sexual history
30251	Trans-sexualism with asexual history
30252	Trans-sexualism with homosexual history
30253	Trans-sexualism with heterosexual history
3026	Gender identity disorder in children
30270	Psychosexual dysfunction, unspecified
30271	Hypoactive sexual desire disorder
30272	Psychosexual dysfunction with inhibited sexual excitement
30273	Female orgasmic disorder
30274	Male orgasmic disorder
30275	Premature ejaculation
30276	Dyspareunia, psychogenic
30279	Psychosexual dysfunction with other specified psychosexual dysfunctions
30281	Fetishism
30282	Voyeurism
30283	Sexual masochism
30284	Sexual sadism

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30285	Gender identity disorder in adolescents or adults
30289	Other specified psychosexual disorders
3029	Alcohol dependence syndrome
30390	Other and unspecified alcohol dependence, unspecified drinking behavior
30391	Other and unspecified alcohol dependence, continuous drinking behavior
30392	Other and unspecified alcohol dependence, episodic drinking behavior
30393	Other and unspecified alcohol dependence, in remission
30400	Opioid type dependence, unspecified use
30401	Opioid type dependence, continuous use
30402	Opioid type dependence, episodic use
30403	Opioid type dependence, in remission
30410	Sedative, hypnotic or anxiolytic dependence, unspecified
30411	Sedative, hypnotic or anxiolytic dependence, continuous
30412	Sedative, hypnotic or anxiolytic dependence, episodic
30413	Sedative, hypnotic or anxiolytic dependence, in remission
30420	Cocaine dependence, unspecified use
30421	Cocaine dependence, continuous use
30422	Cocaine dependence, episodic use
30423	Cocaine dependence, in remission
30430	Cannabis dependence, unspecified use
30431	Cannabis dependence, continuous use
30432	Cannabis dependence, episodic use
30433	Cannabis dependence, in remission
30440	Amphetamine and other psychostimulant dependence, unspecified use
30441	Amphetamine and other psychostimulant dependence, continuous use
30442	Amphetamine and other psychostimulant dependence, episodic use
30443	Amphetamine and other psychostimulant dependence, in remission

Diagnosis Code	Description
30450	Hallucinogen dependence, unspecified use
30451	Hallucinogen dependence, continuous use
30452	Hallucinogen dependence, episodic use
30453	Hallucinogen dependence, in remission
30460	Other specified drug dependence, unspecified use
30461	Other specified drug dependence, continuous use
30462	Other specified drug dependence, episodic use
30463	Other specified drug dependence, in remission
30470	Combinations of opioid type drug with any other drug dependence, unspecified use
30471	Combinations of opioid type drug with any other drug dependence, continuous use
30472	Combinations of opioid type drug with any other drug dependence, episodic use
30473	Combinations of opioid type drug with any other drug dependence, in remission
30480	Combinations of drug dependence excluding opioid type drug, unspecified use
30481	Combinations of drug dependence excluding opioid type drug, continuous use
30482	Combinations of drug dependence excluding opioid type drug, episodic use
30483	Combinations of drug dependence excluding opioid type drug, in remission
30490	Unspecified drug dependence, unspecified use
20491	Unspecified drug dependence, continuous use
30492	Unspecified drug dependence, episodic use
30493	Unspecified drug dependence, in remission
30500	Nondependent alcohol abuse, unspecified drinking behavior
30501	Nondependent alcohol abuse, continuous drinking behavior

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30502	Nondependent alcohol abuse, episodic drinking behavior
30503	Nondependent alcohol abuse, in remission
30520	Nondependent cannabis abuse, unspecified use
30521	Nondependent cannabis abuse, continuous use
30522	Nondependent cannabis abuse, episodic use
30523	Nondependent cannabis abuse, in remission
30530	Nondependent hallucinogen abuse, unspecified use
30531	Nondependent hallucinogen abuse, continuous use
30532	Nondependent hallucinogen abuse, episodic use
30533	Nondependent hallucinogen abuse, in remission
30540	Sedative, hypnotic or anxiolytic abuse, unspecified
30541	Sedative, hypnotic or anxiolytic abuse, continuous
30542	Sedative, hypnotic or anxiolytic abuse, episodic
30543	Sedative, hypnotic or anxiolytic abuse, in remission
30550	Nondependent opioid abuse, unspecified use
30551	Nondependent opioid abuse, continuous use
30552	Nondependent opioid abuse, episodic use
30553	Nondependent opioid abuse, in remission
30560	Nondependent cocaine abuse, unspecified use
30561	Nondependent cocaine abuse, continuous use
30562	Nondependent cocaine abuse, episodic use
30563	Nondependent cocaine abuse, in remission
30570	Nondependent amphetamine or related acting sympathomimetic abuse, unspecified use
30571	Nondependent amphetamine or related acting sympathomimetic abuse, continuous use

Diagnosis Code	Description
30572	Nondependent amphetamine or related acting sympathomimetic abuse, episodic use
30573	Nondependent amphetamine or related acting sympathomimetic abuse, in remission
30580	Nondependent antidepressant type abuse, unspecified use
30581	Nondependent antidepressant type abuse, continuous use
30582	Nondependent antidepressant type abuse, episodic use
30583	Nondependent antidepressant type abuse, in remission
30590	Other, mixed, or unspecified drug abuse, unspecified use
30591	Nondependent other, mixed, or unspecified drug abuse, continuous use
30592	Nondependent other, mixed, or unspecified drug abuse, episodic use
30593	Nondependent other, mixed, or unspecified drug abuse, in remission
3080	Predominant disturbance of emotions
3081	Predominant disturbance of consciousness
3082	Predominant psychomotor disturbance
3083	Other acute reactions to stress
3084	Mixed disorders as reaction to stress
3089	Unspecified acute reaction to stress
3090	Adjustment disorder with depressed mood
3091	Adjustment reaction with prolonged depressive reaction
30921	Separation anxiety disorder
30922	Emancipation disorder of adolescence and early adult life
30923	Specific academic or work inhibition
30924	Adjustment disorder with anxiety
30928	Adjustment disorder with mixed anxiety and depressed mood
30929	Other adjustment reactions with predominant
3093	Adjustment disorder with disturbance of conduct
3094	Adjustment disorder with mixed disturbance of emotions and conduct
30981	Post-traumatic stress disorder

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30982	Adjustment reaction with physical symptoms
30983	Adjustment reaction with withdrawal
30989	Other specified adjustment reactions
3099	Unspecified adjustment reaction
3100	Frontal lobe syndrome
3101	Personality change due to conditions classified elsewhere
3102	Postconcussion syndrome
3108	Other specified nonpsychotic mental disorders following organic brain damage
311	Depressive disorder, not elsewhere classified
31200	Undersocialized conduct disorder, aggressive type, unspecified degree
31201	Undersocialized conduct disorder, aggressive type, mild degree
31202	Undersocialized conduct disorder, aggressive type, moderate degree
31203	Undersocialized conduct disorder, aggressive type, severe degree
31210	Undersocialized conduct disorder, unaggressive type, unspecified degree
31211	Undersocialized conduct disorder, unaggressive type, mild degree
31212	Undersocialized conduct disorder, unaggressive type, moderate degree
31213	Undersocialized conduct disorder, unaggressive type, severe degree
31220	Socialized conduct disorder, unspecified degree
31221	Socialized conduct disorder, mild degree
31222	Socialized conduct disorder, moderate degree
31223	Socialized conduct disorder, severe degree
31230	Impulse control disorder, unspecified
31231	Pathological gambling
31232	Kleptomania
31233	Pyromania
31234	Intermittent explosive disorder
31235	Isolated explosive disorder
31239	Other disorders of impulse control
3124	Mixed disturbance of conduct and emotions
31281	Conduct disorder, childhood onset type
31282	Conduct disorder, adolescent onset type
31289	Other specified conduct disorder, not elsewhere classified
3129	Unspecified disturbance of conduct
3130	Overanxious disorder specific to childhood and adolescence
3131	Misery and unhappiness disorder specific to childhood and adolescence
31321	Shyness disorder of childhood
31322	Introverted disorder of childhood
31323	Selective mutism
3133	Relationship problems specific to childhood and adolescence
31381	Oppositional defiant disorder
31382	Identity disorder of childhood or adolescence
31383	Academic underachievement disorder of childhood or adolescence
31389	Other emotional disturbances of childhood or adolescence
3139	Unspecified emotional disturbance of childhood or adolescence
31400	Attention deficit disorder of childhood without mention of hyperactivity
31401	Attention deficit disorder of childhood with hyperactivity
3141	Hyperkinesis of childhood with developmental delay
3142	Hyperkinetic conduct disorder of childhood
3148	Other specified manifestations of hyperkinetic syndrome of childhood
3149	Unspecified hyperkinetic syndrome of childhood
31500	Developmental reading disorder, unspecified
31501	Alexia
31502	Developmental dyslexia
31509	Other specific developmental reading disorder
3151	Mathematics disorder
3152	Other specific developmental learning difficulties
31531	Expressive language disorder

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
31532	Mixed receptive-expressive language disorder
31539	Other developmental speech disorder
3154	Developmental coordination disorder
3155	Mixed development disorder
3158	Other specified delays in development
3159	Unspecified delay in development
317	Mild mental retardation
3180	Moderate mental retardation
3181	Severe mental retardation
3182	Profound mental retardation
319	Unspecified mental retardation
3200	Hemophilus meningitis
3201	Pneumococcal meningitis
3202	Streptococcal meningitis
3203	Staphylococcal meningitis
3207	Meningitis in other bacterial diseases classified elsewhere
32081	Anaerobic meningitis
32082	Meningitis due to gram-negative bacteria, not elsewhere classified
32089	Meningitis due to other specified bacteria
3209	Meningitis due to unspecified bacterium
3210	Cryptococcal meningitis
3211	Meningitis in other fungal diseases
3212	Meningitis due to viruses not elsewhere classified
3213	Meningitis due to trypanosomiasis
3214	Meningitis in sarcoidosis
3218	Meningitis due to other nonbacterial organisms classified elsewhere
3220	Nonpyogenic meningitis
3221	Eosinophilic meningitis
3222	Chronic meningitis
3229	Meningitis, unspecified
32301	Encephalitis and encephalomyelitis in viral diseases classified elsewhere
32302	Myelitis in viral diseases classified elsewhere
3231	Encephalitis, myelitis, and encephalomyelitis in rickettsial diseases classified elsewhere
3232	Encephalitis, myelitis, and encephalomyelitis in protozoal diseases classified elsewhere
32341	Other encephalitis and encephalomyelitis due to infection classified elsewhere
32342	Other myelitis due to infection classified elsewhere
32351	Encephalitis and encephalomyelitis following immunization procedures
32352	Myelitis following immunization procedures
32361	Infectious acute disseminated encephalomyelitis (ADEM)
32362	Other postinfectious encephalitis and encephalomyelitis
32363	Postinfectious myelitis
32371	Toxic encephalitis and encephalomyelitis
32372	Toxic myelitis
32381	Other causes of encephalitis and encephalomyelitis
32382	Other causes of myelitis
3239	Unspecified causes of encephalitis, myelitis, and encephalomyelitis
3240	Intracranial abscess
3241	Intraspinal abscess
3249	Intracranial and intraspinal abscess of unspecified site
3300	Leukodystrophy
3301	Cerebral lipidoses
3302	Cerebral degeneration in generalized lipidoses
3303	Cerebral degeneration of childhood in other diseases classified elsewhere
3308	Other specified cerebral degenerations in childhood
3309	Unspecified cerebral degeneration in childhood
3310	Alzheimer’s disease
33111	Pick’s Disease
33119	Other frontotemporal dementia
3312	Senile degeneration of brain
3313	Communicating hydrocephalus
3314	Obstructive hydrocephalus
3317	Cerebral degeneration in diseases classified elsewhere
33181	Reye’s syndrome

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
33182	Dementia with lewy bodies
33189	Other cerebral degeneration
3319	Cerebral degeneration, unspecified
33392	Neuroleptic malignant syndrome
340	Multiple sclerosis
34500	Generalized nonconvulsive epilepsy, without mention of intractable epilepsy
34501	Generalized nonconvulsive epilepsy, with intractable epilepsy
34510	Generalized convulsive epilepsy, without mention of intractable epilepsy
34511	Generalized convulsive epilepsy, with intractable epilepsy
3452	Petit mal status, epileptic
3453	Grand mal status, epileptic
34540	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures with intractable epilepsy
34550	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, without mention of intractable epilepsy
34551	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, with intractable epilepsy
34560	Infantile spasms, without mention of intractable epilepsy
34561	Infantile spasms, with intractable epilepsy
34570	Epilepsia partialis continua, without mention of intractable epilepsy
34571	Epilepsia partialis continua, with intractable epilepsy
34580	Other forms of epilepsy and recurrent seizures, without mention of intractable epilepsy
34581	Other forms of epilepsy and recurrent seizures, with intractable epilepsy
34590	Epilepsy, unspecified, without mention of intractable epilepsy
3480	Cerebral cysts
3481	Anoxic brain damage
430	Subarachnoid hemorrhage
431	Intracerebral hemorrhage
4320	Nontraumatic extradural hemorrhage
4321	Subdural hemorrhage
4329	Unspecified intracranial hemorrhage
43300	Occlusion and stenosis of basilar artery without mention of cerebral infarction
43301	Occlusion and stenosis of basilar artery with cerebral infarction
43310	Occlusion and stenosis of carotid artery without mention of cerebral infarction
43311	Occlusion and stenosis of carotid artery with cerebral infarction
43320	Occlusion and stenosis of vertebral artery without mention of cerebral infarction
43321	Occlusion and stenosis of vertebral artery with cerebral infarction
43330	Occlusion and stenosis of multiple and bilateral precerebral arteries without mention of cerebral infarction
43331	Occlusion and stenosis of multiple and bilateral precerebral arteries with cerebral infarction
43380	Occlusion and stenosis of other specified precerebral artery without mention of cerebral infarction
43381	Occlusion and stenosis of other specified precerebral artery with cerebral infarction
43390	Occlusion and stenosis of unspecified precerebral artery without mention of cerebral infarction
43391	Occlusion and stenosis of unspecified precerebral artery with cerebral infarction
43400	Cerebral thrombosis without mention of cerebral infarction
43401	Cerebral thrombosis with cerebral infarction
43410	Cerebral embolism without mention of cerebral infarction
43411	Cerebral embolism with cerebral infarction
43490	Cerebral artery occlusion, unspecified without mention of cerebral infarction
43491	Cerebral artery occlusion, unspecified with cerebral infarction
4350	Basilar artery syndrome
4351	Vertebral artery syndrome
4352	Subclavian steal syndrome

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4353	Vertebrobasilar artery syndrome
4358	Other specified transient cerebral ischemias
4359	Unspecified transient cerebral ischemia
436	Acute, but ill-defined, cerebrovascular disease
4370	Cerebral atherosclerosis
4371	Other generalized ischemic cerebrovascular disease
4372	Hypertensive encephalopathy
4373	Cerebral aneurysm, nonruptured
4374	Cerebral arteritis
4375	Moyamoya disease
4376	Nonpyogenic thrombosis of intracranial venous sinus
4377	Transient global amnesia
4378	Other ill-defined cerebrovascular disease
4379	Unspecified cerebrovascular disease
4380	Cognitive deficits
43810	Speech and language deficit, unspecified
43811	Aphasia
43812	Dysphasia
43819	Other speech and language deficits
42820	Hemiplegia affecting unspecified side
43821	Hemiplegia affecting dominant side
43822	Hemiplegia affecting nondominant side
43830	Monoplegia of upper limb affecting unspecified side
43831	Monoplegia of upper limb affecting dominant side
43832	Monoplegia of upper limb affecting nondominant side
43840	Monoplegia of lower limb affecting unspecified side
43841	Monoplegia of lower limb affecting dominant side
43842	Monoplegia of lower limb affecting nondominant side
43850	Other paralytic syndrome affecting unspecified side
43851	Other paralytic syndrome affecting dominant side
43852	Other paralytic syndrome affecting nondominant side

Diagnosis Code	Description
43853	Other paralytic syndrome, bilateral
4386	Alterations of sensations
4387	Disturbances of vision
43881	Apraxia
43882	Dysphagia
43884	Ataxia
43885	Vertigo
46889	Other late effects of cerebrovascular disease
4389	Unspecified late effects of cerebrovascular disease
7685	Severe birth asphyxia
7686	Mild or moderate birth asphyxia
77210	Intraventricular hemorrhage unspecified grade
77211	Intraventricular hemorrhage grade I
77212	Intraventricular hemorrhage grade II
7790	Convulsions in newborn
78031	Febrile convulsions (simple), unspecified
78039	Other convulsions
79901	Asphyxia
79902	Hypoxemia
8500	Concussion with no loss of consciousness
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion, with loss of consciousness from 31 to 59 minutes
8502	Concussion with moderate loss of consciousness
8503	Concussion with prolonged loss of consciousness and return to pre-existing conscious level
8504	Concussion with prolonged loss of consciousness, without return to pre-existing conscious level
8505	Concussion with loss of consciousness of unspecified duration
8509	Concussion, unspecified
8510	Cortex (cerebral) contusion without mention of open intracranial wound
85100	Cortex (cerebral) contusion without mention of open intracranial wound, state of consciousness unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85101	Cortex (cerebral) contusion without mention of open intracranial wound, with no loss of consciousness
85102	Cortex (cerebral) contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85103	Cortex (cerebral) contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85104	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-exisiting conscious level
85105	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85106	Cortex (cerebral) contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85109	Cortex (cerebral) contusion without mention of open intracranial wound, with concussion, unspecified
85110	Cortex (cerebral) contusion with open intracranial wound, without mention of specific state of consciousness
85111	Cortex (cerebral) contusion with open intracranial wound, with no loss of consciousness
85112	Cortex (cerebral) contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85113	Cortex (cerebral) contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85114	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85115	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85116	Cortex (cerebral) contusion with open intracranial wound, with loss of consciousness of unspecified duration

Diagnosis Code	Description
85119	Cortex (cerebral) contusion with open intracranial wound, with concussion, unspecified
85120	Cortex (cerebral) laceration without mention of open intracranial wound, with state of consciousness unspecified
85121	Cortex (cerebral) laceration without mention of open intracranial wound, with no loss of consciousness
85122	Cortex (cerebral) laceration without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85123	Cortex (cerebral) laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85124	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85129	Cortex (cerebral) laceration without mention of open intracranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, with state of consciousness unspecified
85131	ortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified
85140	Cerebellar or brain stem contusion without mention of open intracranial wound, with state of consciousness unspecified
84141	Cerebellar or brain stem contusion without mention of open intracranial wound, with no loss of consciousness
84142	Cerebellar or brain stem contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusion without mention of open intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusion with open intracranial wound, with state of consciousness unspecified
85151	Cerebellar or brain stem contusion with open intracranial wound, with no loss of consciousness

Diagnosis Code	Description
85152	Cerebellar or brain stem contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85153	Cerebellar or brain stem contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85155	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusion with open intracranial wound, with loss of consciousness of unspecified duration
85159	Cerebellar or brain stem contusion with open intracranial wound, with concussion, unspecified
85160	Cerebellar or brain stem laceration without mention of open intracranial wound, with state of consciousness unspecified
85161	Cerebellar or brain stem laceration without mention of open intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85169	Cerebellar or brain stem laceration without mention of open intracranial wound, with concussion, unspecified
85170	Cerebellar or brain stem laceration with open intracranial wound, with state of consciousness unspecified
85171	Cerebellar or brain stem laceration with open intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with open intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with state of consciousness unspecified
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85086	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with state of consciousness unspecified
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85201	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85202	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85206	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85209	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85210	Subarachnoid hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85211	Subarachnoid hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness

Diagnosis Code	Description
85213	Subarachnoid hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85214	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85215	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85216	Subarachnoid hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85221	Subdural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85222	Subdural hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85223	Subdural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85226	Subdural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85229	Subdural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85231	Subdural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85232	Subdural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85233	Subdural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85236	Subdural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85239	Subdural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85241	Extradural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury, without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85243	Extradural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
85244	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85246	Extradural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85249	Extradural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85250	Extradural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85251	Extradural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85252	Extradural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85283	Extradural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85255	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85256	Extradural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury. without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
55310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
82313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness

Diagnosis Code	Description
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with state of consciousness unspecified
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unspecified duration

V798	Screening for other specified mental disorders and developmental handicaps
V799	Screening for unspecified mental disorder and developmental handicap

36.4.40 Radiation Therapy

Radiation treatment management is reported in units of five fractions or treatment sessions, regardless of the actual time period in which the services are furnished. The services need not be furnished on consecutive days. Multiple fractions representing two or more treatment sessions furnished on the same day may be counted separately as long as a distinct break has occurred in therapy sessions, and the fractions are of the character usually furnished on different days. Procedure code 6-77427 is also reported if three or four fractions are beyond a multiple of five at the end of a course of treatment. One or two fractions beyond a multiple of five at the end of a course of treatment are not reported separately. The professional services furnished during treatment management typically consists of review of port films, review of dosimetry, dose delivery, and treatment parameters; review of patient treatment setup; and examination of the patient for medical E/M (e.g., assessment of the patient's response to treatment, coordination of care and treatment, and review of imaging and/or lab test results).

If a provider submits claims for dates of service that exceed five fractions in a seven-day period of time, the claim will suspend for manual review. If the provider has documented the dates/times the fractions were administered, supporting more than five fractions were provided in this seven-day period, the claim may be reimbursed. If the times are not supplied, the claim is denied for documentation of dates/times.

The professional component (TOS I) and the technical component (TOS T) are not reimbursed when billed with the total component (TOS 6). The total component includes the professional and technical components.

The following codes are payable as professional components only (TOS I) for services performed in POS 3 or 5 and as (TOS 6) for services performed in POS 1.

Radiation therapy (6-77427) may be reimbursed for the following provider types:

Provider Type	Description
19	Physician (DO)
20	Physician (MD)
21	Physician Group (DOS Only)
22	Physician Group (MDS Only and Multispeciality)
43	Radiation Treatment Centers
60	Hospital—Long Term, Limited, or Specialized Care
61	Hospital—Private Full Care
62	Hospital—Private, O/P Service/Emergency Care Only
79	Rural Health Clinic—Hospital Based

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.40.1 Clinical Treatment Planning

The professional component (TOS I) is payable for services rendered in the freestanding radiation therapy facility (POS 5), outpatient hospital (POS 5), inpatient hospital (POS 3). Physicians billing for client services rendered in a facility recognized by Medicaid as a radiation treatment center (POS 1) or their offices (POS 1) are reimbursed for total components (TOS 6).

Procedure Codes		
57155	58346	6/I-77261
6/I-77262	6/I-77263	6/I-77280
6/I-77285	6/I-77290	6/I-77295
6/I-77299	6/I/T-77301	

36.4.40.2 Clinical Treatment Management

Physicians billing for client services rendered in a facility recognized by Medicaid as a radiation treatment center (POS 1) or their offices (POS 1) are reimbursed for the total component (TOS 6).

The following procedure codes are payable as the total component (TOS 6) for services performed in POS 1: 6-77427, 6-77431, and 6-77499.

36.4.40.3 Medical Radiation Physics, Dosimetry, Treatment Devices, Special Services, and Proton Beam Treatment Delivery

Procedure Codes		
6/I-77300	6/I-77305	6/I-77310
6/I-77315	6/I-77326	6/I-77327
6/I-77328	6/I-77332	6/I-77333
6/I-77334	6/I-77399	6-77520
6-77522	6-77523	6-77525

36.4.40.4 Clinical Brachytherapy

Procedure Codes		
57155	58346	6/I-77750
6/I-77761	6/I-77762	6/I-77763
6/I-77776	6/I-77777	6/I-77778
6/I-77781	6/I-77782	6/I-77783
6/I-77784	6/I-77789	6/I-77799

Only the technical component (TOS T) is payable to physicians for the following services when rendered in a facility recognized by Medicaid as a radiation treatment center (POS 1) or in the physician’s office (POS 1).

36.4.40.5 Radiation Treatment Delivery/Port Films

Procedure Codes		
T-77401	T-77402	T-77403
T-77404	T-77406	T-77407
T-77408	T-77409	T-77411
T-77412	T-77413	T-77414
T-77416	T-77417	

36.4.40.6 Freestanding Radiation Therapy Facilities/Outpatient Facilities

Freestanding radiation therapy facilities (specialty 98) and outpatient hospitals are reimbursed only for the technical component (TOS T) for services rendered in POS 5 for the following services:

Procedure Codes		
Clinical Treatment Planning		
T-77280	T-77285	T-77290
T-77295	T-77299	
Medical Radiation Physics, Dosimetry, Treatment Devices and Special Services		
T-77300	T-77305	T-77310
T-77315	T-77326	T-77327
T-77328	T-77332	T-77333
T-77334	T-77399	
Radiation Treatment Delivery/Port Films		
T-77401	T-77402	T-77403
T-77404	T-77406	T-77407
T-77408	T-77409	T-77411
T-77412	T-77413	T-77414
T-77416	T-77417	T-77418
Clinical Brachytherapy		
T-77781	T-77782	T-77783
T-77784	T-77789	T-77799

The following services are not benefits of the Texas Medicaid Program:

Procedure Codes		
77321	77331	77336
77370	77470	77600
77605	77610	77615
77620	77790	

The following services are allowed once per day, unless documentation submitted with an appeal supports the need for the service to be provided more than once: therapeutic radiation treatment planning, therapeutic radiology simulation-aided field setting, teletherapy, brachytherapy isodose calculation, treatment devices, proton beam delivery/treatment, intracavity radioelement application,

CPT only copyright 2005 American Medical Association. All rights reserved.

interstitial radioelement application, remote afterloading high intensity brachytherapy, radiation treatment delivery, localization, and radioisotope therapy.

The following clinical brachytherapy procedure codes include admission to the hospital and daily care. Initial and subsequent hospital care is denied on the same day that clinical brachytherapy services are billed.

Procedure Codes		
6/I-77750	6/I-77761	6/I-77762
6/I-77763	6/I-77776	6/I-77777
6/I-77778	6/I-77781	6/I-77782
6/I-77783	6/I-77784	6/I-77789
6/I-77799		

A consultation on the same day as clinical treatment planning and clinical brachytherapy is included in the therapeutic radiology procedure.

Laboratory and diagnostic radiologic services provided in an office (POS 1) are reimbursed to physicians as a total component. Freestanding radiation therapy facilities (specialty 98) will also be reimbursed for the total component for these services in POS 5. Injectable medications given during the course of therapy in any setting are reimbursed separately.

Routine follow-up care by the same physician on the day of any therapeutic radiology service is denied. Medical services within program limitations may be paid on appeal when documentation supports the medical necessity of the visit because of services unrelated to the radiation treatment or radiation treatment complication. Procedure code 19298 is a benefit of the Texas Medicaid Program, effective for dates of service on or after January 1, 2005.

No separate payment is made for any of the following procedure codes provided on the same day as radiation therapy by the same provider:

Procedure Codes		
2-16000	2-16025	2/F-16030
2-36425	B-413	2-51701
2-51702	2-51703	1-99183
1-99211	1-99212	1-99213
1-99214	1-99215	3-99241
3-99242	3-99243	3-99244
3-99245	1-99281	1-99282
1-99283	1-99284	1-99285

No separate payment is made for established office (99211, 99212, 99213, 99214, and 99215) or outpatient visits (99281, 99282, 99283, 99284, and 99285) within 90 days after radiation treatment by the same provider.

Procedure code T-77295 (three-dimensional) is payable to freestanding therapy facilities (specialty 98) and outpatient hospitals (POS 5). Reimbursement for freestanding radiation treatment centers is at 28.32 RVUs. Outpatient hospitals are reimbursed at their reimbursement rate. This code is payable on Medicare crossover claims. T-77295 is payable once per day.

The following codes are denied when billed on the same day as T-77295: T-77305, T-77310, and T-77315.

Texas Medicaid Program benefits include payment for the technical portion of radiation therapy services provided in an inpatient setting. Covered services include clinical treatment planning and management, and clinical brachytherapy. Hospitals use revenue code 333, Radiation therapy, on the HCFA-1450 (UB-92) claim form when submitting charges for these services.

36.4.41 Radiology Services

In compliance with HHS regulations, physicians (MDs and DOs), group practices, and clinics may not bill for radiology services provided outside their offices. These services must be billed directly by the facility/provider that performs the service.

This restriction does not affect radiology services performed by physicians or under their personal supervision in their offices. The radiology equipment must be owned by physicians and be located in their office to allow for billing of TOS 4 (complete procedure) or TOS T with modifier TC to the Texas Medicaid Program. If physicians are members of a clinic that owns and operates radiology facilities, they may bill for these services. However, if physicians practice independently and share space in a medical complex where radiology facilities are located, they may not bill for these services even if they own or share ownership of the facility, unless they personally supervise and are responsible for the operation of the facilities on a daily basis.

Providers billing for three or more of the same laboratory or radiology procedures on the same day must indicate the time the procedure was performed to indicate that it is not a duplicate service. The use of modifiers 76 and 77 does not remove the requirement of indicating the times services were rendered. The original claim will be denied but can be appealed with the documentation of procedure times.

When billing for services in an inpatient or outpatient hospital setting, the radiologist may only bill the professional interpretation or procedures (modifier 26). This also applies when providing services to a client who is in an inpatient status even if the client is brought to the radiologist's office for the service. The hospital is responsible for all facility services (the technical component) even if the service is supplied by another facility/provider.

A separate charge for an X-ray interpretation billed by the attending or consulting physician is not allowed concurrently with that of the radiologist. Interpretations are considered part of the attending or consulting physician's overall work-up and treatment of the patient.

 CPT only copyright 2005 American Medical Association. All rights reserved.

Providers other than radiologists are sometimes under agreement with facilities to provide interpretations in specific instances. Those specialties may be paid if a radiologist does not bill for the professional component of X-ray procedures.

If duplicate billings are found between radiologists and the other specialties, the radiologist may be paid, and the other provider is denied.

Abdominal flat plates (AFP) or kidneys, ureters, bladder (KUB) codes 4-74000, 4-74010, and 4-74020 are frequently done as preliminary X-rays before other, more complicated X-ray procedures. If a physician bills separately for an AFP or KUB and more complicated procedures, the charges are combined and the more complex procedure may be paid. If, however, the claim specifically states the AFP or KUB was done first and the results required additional X-rays, each procedure may be paid separately.

Oral preparations for X-rays (for example, Oragrafin, X-prep, and Neloid) are included in the charge for the X-ray procedure when billed by a physician. Separate charges for the oral preparation are denied as part of another procedure on the same day.

Separate charges for injectable radiopharmaceuticals used in the performance of specialized X-ray procedures may be paid. If a procedure code is not indicated, an unlisted code must have a drug name, route of administration, and dosage written on the claim.

36.4.41.1 Cardiac Blood Pool Imaging

Cardiac blood pool imaging (4/I/T-78472, 4/I/T-78473, 4/I/T-78481, 4/I/T-78483, 4/I/T-78494, and 4/I/T-78496) is a covered benefit for the following diagnosis codes:

Diagnosis Code	Description
3526	Multiple cranial nerve palsies
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve, unspecified
41000	Acute myocardial infarction of anterolateral wall, episode of care unspecified
41001	Acute myocardial infarction of anterolateral wall, initial episode of care
41002	Acute myocardial infarction of anterolateral wall, subsequent episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care
41020	Acute myocardial infarction of inferolateral wall, episode of care unspecified
41021	Acute myocardial infarction of inferolateral wall, initial episode of care
41022	Acute myocardial infarction of inferolateral wall, subsequent episode of care
41030	Acute myocardial infarction of inferoposterior wall, episode of care unspecified
41031	Acute myocardial infarction of inferoposterior wall, initial episode of care
41032	Acute myocardial infarction of inferoposterior wall, initial episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
41060	True posterior wall infarction, episode of care unspecified
41062	True posterior wall infarction, subsequent episode of care
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of care
41072	Subendocardial infarction, subsequent episode of care
41080	Acute myocardial infarction of other specified
41081	Acute myocardial infarction of other specified sites, initial episode of care
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care
4110	Postmyocardial infarction syndrome
4111	Intermediate coronary syndrome
41181	Other acute and subacute forms of ischemic heart disease, acute ischemic heart disease without myocardial infarction
41189	Other acute and subacute forms of ischemic heart disease, other
412	Old myocardial infarction
4130	Angina decubitus
4131	Prinzmetal angina
4139	Other and unspecified angina pectoris
41400	Coronary atherosclerosis of unspecified type of vessel, native or graft
41401	Coronary atherosclerosis of native coronary artery
41402	Coronary atherosclerosis of autologous vein bypass graft
41403	Coronary atherosclerosis of nonautologous biological bypass graft
41404	Coronary atherosclerosis of artery bypass graft
41405	Coronary atherosclerosis of unspecified bypass graft
41406	Coronary atherosclerosis of native coronary artery of transplanted heart
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of transplanted heart
41410	Aneurysm of heart (wall)
41411	Aneurysm of coronary vessels
41412	Dissection of coronary artery
41419	Other aneurysm of heart
4148	Other specified forms of chronic ischemic heart disease
4149	Chronic ischemic heart disease, unspecified
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation
4179	Unspecified disease of pulmonary circulation
4200	Acute pericarditis in diseases classified elsewhere
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of Africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) II atrioventricular block
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block

Diagnosis Code	Description
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
72731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42810	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
7809	Other general symptoms
7813	Lack of coordination
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
7991	Respiratory arrest
V4321	Organ or tissue replaced by other means, heart assist device
V4581	Postsurgical aortocoronary bypass status

36.4.41.2 Chest X-Rays

All providers including radiologists billing for chest X-rays must supply a diagnosis code.

Screening, baseline, or rule-out studies do not qualify for reimbursement; however, the following diagnosis codes are payable:

Diagnosis Code	Description
01100	Tuberculosis of lung, infiltrative, confirmation unspecified
01101	Tuberculosis of lung, infiltrative, bacteriological or histological examination not done
01102	Tuberculosis of lung, infiltrative, bacteriological or histological examination results unknown (at present)
01103	Tuberculosis of lung, infiltrative, tubercle bacilli found (in sputum) by microscopy
01104	Tuberculosis of lung, infiltrative, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01105	Tuberculosis of lung, infiltrative, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01106	Tuberculosis of lung, infiltrative, tubercle bacilli not found bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01110	Tuberculosis of lung, nodular, unspecified examination
01111	Tuberculosis of lung, nodular, bacteriological or histological examination not done
01112	Tuberculosis of lung, nodular, bacteriological or histological examination results unknown (at present)
01113	Tuberculosis of lung, nodular, tubercle bacilli found (in sputum) by microscopy
01114	Tuberculosis of lung, nodular, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01115	Tuberculosis of lung, nodular, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01116	Tuberculosis of lung, nodular, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01120	Tuberculosis of lung with cavitation, unspecified examination
01121	Tuberculosis of lung with cavitation, bacteriological or histological examination not done
01122	Tuberculosis of lung with cavitation, bacteriological or histological examination results unknown (at present)
01123	Tuberculosis of lung with cavitation, tubercle bacilli found (in sputum) by microscopy
01124	Tuberculosis of lung with cavitation, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01125	Tuberculosis of lung with cavitation, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01126	Tuberculosis of lung with cavitation, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01130	Tuberculosis of bronchus, unspecified examination
01131	Tuberculosis of bronchus, bacteriological or histological examination not done
01132	Tuberculosis of bronchus, bacteriological or histological examination results unknown (at present)
01133	Tuberculosis of bronchus, tubercle bacilli found (in sputum) by microscopy
01134	Tuberculosis of bronchus, tubercle bacilli not found (in sputum) by microscopy, but found in bacterial culture
01135	Tuberculosis of bronchus, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01136	Tuberculosis of bronchus, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01140	Tuberculous fibrosis of lung, unspecified examination
01141	Tuberculous fibrosis of lung, bacteriological or histological examination not done
01142	Tuberculous fibrosis of lung, bacteriological or histological examination unknown (at present)
01143	Tuberculous fibrosis of lung, tubercle bacilli found (in sputum) by microscopy
01144	Tuberculous fibrosis of lung, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01145	Tuberculous fibrosis of lung, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01146	Tuberculous fibrosis of lung, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01150	Tuberculous bronchiectasis, unspecified examination
01151	Tuberculous bronchiectasis, bacteriological or histological examination not done
01152	Tuberculous bronchiectasis, bacteriological or histological examination results unknown (at present)
01153	Tuberculous bronchiectasis, tubercle bacilli found (in sputum) by microscopy
01154	Tuberculous bronchiectasis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01155	Tuberculous bronchiectasis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01156	Tuberculous bronchiectasis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01160	Tuberculous pneumonia (any form), unspecified examination
01161	Tuberculous pneumonia (any form), bacteriological or histological examination not done
01162	Tuberculous pneumonia (any form), bacteriological or histological examination results unknown (at present)
01163	Tuberculous pneumonia (any form), tubercle bacilli found (in sputum) by microscopy
01164	Tuberculous pneumonia (any form), tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01165	Tuberculous pneumonia (any form), tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01166	Tuberculous pneumonia (any form), tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01170	Tuberculous pneumothorax, unspecified examination

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01171	Tuberculous pneumothorax, bacteriological or histological examination not done
01172	Tuberculous pneumothorax, bacteriological or histological examination results unknown (at present)
01173	Tuberculous pneumothorax, tubercle bacilli found (in sputum) by microscopy
01174	Tuberculous pneumothorax, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01175	Tuberculous pneumothorax, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01176	Tuberculous pneumothorax, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01180	Other specified pulmonary tuberculosis, unspecified confirmation
01181	Other specified pulmonary tuberculosis, bacteriological or histological examination not done
01182	Other specified pulmonary tuberculosis, bacteriological or histological examination results unknown (at present)
01183	Other specified pulmonary tuberculosis, tubercle bacilli found (in sputum) by microscopy
01184	Other specified pulmonary tuberculosis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01185	Other specified pulmonary tuberculosis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01186	Other specified pulmonary tuberculosis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01190	Unspecified pulmonary tuberculosis, confirmation unspecified
01191	Unspecified pulmonary tuberculosis, bacteriological or histological examination not done

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01192	Unspecified pulmonary tuberculosis, bacteriological or histological examination results unknown (at present)
01193	Unspecified pulmonary tuberculosis, tubercle bacilli found (in sputum) by microscopy
01194	Unspecified pulmonary tuberculosis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01195	Unspecified pulmonary tuberculosis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01196	Unspecified pulmonary tuberculosis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01200	Tuberculous pleurisy, confirmation unspecified
01201	Tuberculous pleurisy, bacteriological or histological examination not done
01202	Tuberculous pleurisy, bacteriological or histological examination results unknown (at present)
01203	Tuberculous pleurisy, tubercle bacilli found (in sputum) by microscopy
01204	Tuberculous pleurisy, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01205	Tuberculous pleurisy, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01206	Tuberculous pleurisy, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals
01210	Tuberculosis of intrathoracic lymph nodes, confirmation unspecified
01211	Tuberculosis of intrathoracic lymph nodes, bacteriological or histological examination not done
01212	Tuberculosis of intrathoracic lymph nodes, bacteriological or histological examination results unknown (at present)
01213	Tuberculosis of intrathoracic lymph nodes, tubercle bacilli found (in sputum) by microscopy

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01214	Tuberculosis of intrathoracic lymph nodes, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01215	Tuberculosis of intrathoracic lymph nodes, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01216	Tuberculosis of intrathoracic lymph nodes, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01220	Isolated tracheal or bronchial tuberculosis, unspecified examination
01800	Acute miliary tuberculosis, unspecified examination
01801	Acute miliary tuberculosis, bacteriological or histological examination not done
01802	Acute miliary tuberculosis, bacteriological or histological examination results unknown (at present)
01803	Acute miliary tuberculosis, tubercle bacilli found (in sputum) by microscopy
01804	Acute miliary tuberculosis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01805	Acute miliary tuberculosis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01806	Acute miliary tuberculosis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01880	Other specified miliary tuberculosis, unspecified examination
01881	Other specified miliary tuberculosis, bacteriological or histological examination not done
01882	Other specified miliary tuberculosis, bacteriological or histological examination results unknown (at present)
01883	Other specified miliary tuberculosis, tubercle bacilli found (in sputum) by microscopy

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
01884	Other specified miliary tuberculosis, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
01885	Other specified miliary tuberculosis, tubercle bacilli not found by bacteriological examination, but tuberculosis confirmed histologically
01886	Other specified miliary tuberculosis, tubercle bacilli not found by bacteriological or histological examination, but tuberculosis confirmed by other methods (inoculation of animals)
01890	Unspecified miliary tuberculosis, unspecified examination
0310	Pulmonary diseases due to other mycobacteria
0330	Whooping cough due to bordetella pertussis (b. pertussis
0331	Whooping cough due to bordetella parapertussis (b. parapertussis)
0338	Whooping cough due to other specified organism
0339	Whooping cough, unspecified organism
042	Human immunodeficiency virus (HIV) disease
0551	Postmeasles pneumonia
07950	Retrovirus, unspecified
07951	Human t-cell lymphotrophic virus, type I (HTLV-I)
07952	Human t-cell lymphotrophic virus, type II (HTLV-II)
07953	Human immunodeficiency virus, type 2 (HIV-2)
07959	Other specified retrovirus
11144	Tuberculous fibrosis of lung, tubercle bacilli not found (in sputum) by microscopy, but found by bacterial culture
1124	Candidiasis of lung
135	Sarcoidosis
1363	Pneumocystosis
1620	Malignant neoplasm of trachea
1622	Malignant neoplasm of main bronchus
1623	Malignant neoplasm of upper lobe, bronchus or lung
1624	Malignant neoplasm of middle lobe, bronchus or lung

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1625	Malignant neoplasm of lower lobe, bronchus or lung
1628	Malignant neoplasm of other parts of bronchus or lung
1629	Malignant neoplasm of bronchus and lung, unspecified
1630	Malignant neoplasm of parietal pleura
1631	Malignant neoplasm of visceral pleura
1638	Malignant neoplasm of other specified sites of pleura
1639	Malignant neoplasm of pleura, unspecified
1640	Malignant neoplasm of thymus
1641	Malignant neoplasm of heart
1642	Malignant neoplasm of anterior mediastinum
1643	Malignant neoplasm of posterior mediastinum
1648	Malignant neoplasm of other parts of mediastinum
1649	Malignant neoplasm of mediastinum, part unspecified
1650	Malignant neoplasm of upper respiratory tract, part unspecified
1658	Malignant neoplasm of other sites within the respiratory system and intrathoracic organs
1659	Malignant neoplasm of ill-defined sites within the respiratory system
1714	Malignant neoplasm of connective and other soft tissue of thorax
1740	Malignant neoplasm of nipple and areola of female breast
1741	Malignant neoplasm of central portion of female breast
1742	Malignant neoplasm of upper-inner quadrant of female breast
1743	Malignant neoplasm of lower-inner quadrant of female breast
1744	Malignant neoplasm of upper-outer quadrant of female breast
1745	Malignant neoplasm of lower-outer quadrant of female breast
1746	Malignant neoplasm of axillary tail of female breast
1748	Malignant neoplasm of other specified sites of female breast

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
1749	Malignant neoplasm of breast (female), unspecified site
1750	Malignant neoplasm of nipple and areola of male breast
1759	Malignant neoplasm of other and unspecified sites of male breast
1951	Malignant neoplasm of thorax
1961	Secondary and unspecified malignant neoplasm of intrathoracic lymph nodes
1970	Secondary malignant neoplasm of lung
1971	Secondary malignant neoplasm of mediastinum
1972	Secondary malignant neoplasm of pleura
1973	Secondary malignant neoplasm of other respiratory organs
2310	Carcinoma in situ of larynx
2311	Carcinoma in situ of trachea
2312	Carcinoma in situ of bronchus and lung
2318	Carcinoma in situ of other specified parts of respiratory system
2319	Carcinoma in situ of respiratory system, part unspecified
2330	Carcinoma in situ of breast
2391	Neoplasm of unspecified nature of respiratory system
2393	Neoplasm of unspecified nature of breast
28262	HB-SS Disease with crisis
2959	Other and unspecified rheumatic aortic diseases
3061	Respiratory malfunction arising from mental factors
34400	Quadriplegia, unspecified
3530	Brachial plexus lesions
3910	Acute rheumatic pericarditis
3911	Acute rheumatic endocarditis
3912	Acute rheumatic myocarditis
3918	Other acute rheumatic heart disease
3919	Acute rheumatic heart disease, unspecified
3920	Rheumatic chorea with heart involvement
393	Chronic rheumatic pericarditis

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified
3980	Rheumatic myocarditis
39890	Rheumatic heart disease, unspecified
39891	Rheumatic heart failure (congestive)
39899	Other rheumatic heart diseases
4010	Malignant essential hypertension
4011	Benign essential hypertension
4019	Unspecified essential hypertension
40200	Malignant hypertensive heart disease without congestive heart failure
40201	Malignant hypertensive heart disease with congestive heart failure
40210	Benign hypertensive heart disease without congestive heart failure
40211	Benign hypertensive heart disease with congestive heart failure
40290	Unspecified hypertensive heart disease without congestive heart failure

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
40291	Unspecified hypertensive heart disease with congestive heart failure
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40301	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage V or end stage renal disease
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40311	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage V or end stage renal disease
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40391	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease
40400	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40401	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40402	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage V or end stage renal disease
40403	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage V or end stage renal disease
40410	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
40411	Hypertensive heart and chronic kidney disease, benign, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40412	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage V or end stage renal disease
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40490	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40491	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40492	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
41000	Acute myocardial infarction of anterolateral wall, episode of care unspecified
41001	Acute myocardial infarction of anterolateral wall, initial episode of care
41002	Acute myocardial infarction of anterolateral wall, subsequent episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
41020	Acute myocardial infarction of infero-lateral wall, episode of care unspecified
41021	Acute myocardial infarction of infero-lateral wall, initial episode of care
41022	Acute myocardial infarction of infero-lateral wall, subsequent episode of care
41030	Acute myocardial infarction of infero-posterior wall, episode of care unspecified
41031	Acute myocardial infarction of infero-posterior wall, initial episode of care
41032	Acute myocardial infarction of infero-posterior wall, subsequent episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41062	True posterior wall infarction, subsequent episode of care
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of car
41072	Subendocardial infarction, subsequent episode of care
41080	Acute myocardial infarction of other specified sites, episode of care unspecified
41081	Acute myocardial infarction of other specified sites, initial episode of care

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care
4110	Postmyocardial infarction syndrome
4111	Intermediate coronary syndrome
41181	Other acute and subacute forms of ischemic heart disease, acute ischemic heart disease without myocardial infarction
41189	Other acute and subacute forms of ischemic heart disease, other
412	Old myocardial infarction
4130	Angina decubitus
4131	Prinzmetal angina
4139	Other and unspecified angina pectoris
41400	Coronary atherosclerosis of unspecified type of vessel, native or graft
41401	Coronary atherosclerosis of native coronary artery
41402	Coronary atherosclerosis of autologous vein bypass graft
41403	Coronary atherosclerosis of nonautologous biological bypass graft
41404	Coronary atherosclerosis of artery bypass graft
41405	Coronary atherosclerosis of unspecified bypass graft
41406	Coronary atherosclerosis of native coronary artery of transplanted heart
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of transplanted heart
41410	Aneurysm of heart (wall)
41411	Aneurysm of coronary vessels
41412	Dissection of coronary artery
41419	Other aneurysm of heart
4148	Other specified forms of chronic ischemic heart disease

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
4149	Chronic ischemic heart disease, unspecified
4150	Acute cor pulmonale
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation
4179	Unspecified disease of pulmonary circulation
4200	Acute pericarditis in diseases classified elsewher
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorders

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of Africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) II atrioventricular bloc
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42820	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
43900	Estrinsic asthma, unspecified
44100	Dissection of aorta, unspecified site
44101	Dissection of aorta, thoracic
44102	Dissection of aorta, abdominal
44103	Dissection of aorta, thoracoabdominal
4411	Thoracic aneurysm, ruptured
4412	Thoracic aneurysm without mention of rupture
4416	Thoracoabdominal aneurysm, ruptured
4417	Thoracoabdominal aneurysm, without mention of rupture
4644	Croup
4660	Acute bronchitis
46611	Acute bronchiolitis
46619	Acute bronciolitis due to other infectious organisms
4800	Pneumonia due to adenovirus
4801	Pneumonia due to respiratory syncytial virus
4802	Pneumonia due to parainfluenza virus
4803	Pneumonia due to SARS-associated coronavirus
4808	Pneumonia due to other virus not elsewhere classified
4809	Viral pneumonia, unspecified
481	Pneumococcal pneumonia (streptococcus pneumoniae pneumonia)
4820	Pneumonia due to klebsiella pneumoniae
4821	Pneumonia due to pseudomonas
4822	Pneumonia due to hemophilus influenzae (H. influenzae)
48230	Pneumonia due to streptococcus, unspecified
48231	Pneumonia due to streptococcus, group A

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
48232	Pneumonia due to streptococcus, group B
48239	Pneumonia due to other streptococcus
48240	Pneumonia due to staphylococcus, unspecified
48241	Pneumonia due to staphylococcus aureus
48249	Other staphylococcus pneumonia
48281	Pneumonia due to anaerobe
48282	Pneumonia due to escherichia coli (e.coli)
48283	Pneumonia due to other gram-negative bacteria
48284	Pneumonia due to Legionnaires' Disease
48289	Pneumonia due to other specified bacteria
4829	Bacterial pneumonia, unspecified
4830	Pneumonia due to mycoplasma pneumoniae
4831	Pneumonia due to chlamydia
4838	Pneumonia due to other specified organism
4841	Pneumonia in cytomegalic inclusion disease
4843	Pneumonia in whooping cough
4845	Pneumonia in anthrax
4846	Pneumonia in aspergillosis
4847	Pneumonia in other systemic mycoses
4848	Pneumonia in other infectious diseases classified elsewhere
485	Bronchopneumonia, organism unspecified
486	Pneumonia, organism unspecified
4870	Influenza with pneumonia
4871	Influenza with other respiratory manifestations
4878	Influenza with other manifestations
490	Bronchitis, not specified as acute or chronic
4910	Simple chronic bronchitis
4911	Mucopurulent chronic bronchitis
49120	Obstructive chronic bronchitis, without exacerbation

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
49121	Obstructive chronic bronchitis, with (acute) exacerbation
49122	Obstructive chronic bronchitis with acute bronchitis
4918	Other chronic bronchitis
4919	Unspecified chronic bronchitis
4920	Emphysematous bleb
4928	Other emphysema
49300	Extrinsic asthma, unspecified
49301	Extrinsic asthma with status asthmaticus
49302	Extrinsic asthma with (acute) exacerbation
49310	Intrinsic asthma, unspecified
49311	Intrinsic asthma with status asthmaticus
49312	Intrinsic asthma, with (acute) exacerbation
49320	Chronic obstructive asthma, unspecified
49321	Chronic obstructive asthma with status asthmaticus
49322	Chronic obstructive asthma, with (acute) exacerbation)
49381	Exercise induced bronchospasm
49382	Cough varient asthma
49390	Asthma, unspecified type, unspecified
49391	Asthma, unspecified type, with status asthmaticus
49392	Asthma, unspecified type, with (acute) exacerbation
4940	Bronchiectasis without acute exacerbation
4941	Bronchiectasis with acute exacerbation
4950	Farmers' lung
4951	Bagassosis
4952	Bird-fanciers' lung
4953	Suberosis
4954	Malt workers' lung
4955	Mushroom workers' lung
4956	Maple bark-strippers' lung
4957	'Ventilation' pneumonitis
4958	Other specified allergic alveolitis and pneumonitis

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
4959	Unspecified allergic alveolitis and pneumonitis
496	Chronic airway obstruction, not elsewhere classified
500	Coal workers' pneumoconiosis
501	Asbestosis
502	Pneumoconiosis due to other silica or silicates
503	Pneumoconiosis due to other inorganic dust
504	Pneumonopathy due to inhalation of other dust
505	Pneumoconiosis, unspecified
5060	Bronchitis and pneumonitis due to fumes and vapors
5061	Acute pulmonary edema due to fumes and vapors
5062	Upper respiratory inflammation due to fumes and vapors
5063	Other acute and subacute respiratory conditions due to fumes and vapors
5064	Chronic respiratory conditions due to fumes and vapors
5069	Unspecified respiratory conditions due to fumes and vapors
5070	Pneumonitis due to inhalation of food or vomitus
5071	Pneumonitis due to inhalation of oils and essences
5078	Pneumonitis due to other solids and liquids
5080	Acute pulmonary manifestations due to radiation
5081	Chronic and other pulmonary manifestations due to radiation
5088	Respiratory conditions due to other specified external agents
5089	Respiratory conditions due to unspecified external agent
5100	Empyema with fistula
5109	Empyema without mention of fistula
5110	Pleurisy without mention of effusion or current tuberculosis
5111	Pleurisy with effusion, with mention of a bacterial cause other than tuberculosis
5118	Other specified forms of pleural effusion, except tuberculous

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5119	Unspecified pleural effusion
5120	Spontaneous tension pneumothorax
5121	Iatrogenic pneumothorax
5128	Other spontaneous pneumothorax
5130	Abscess of lung
5131	Abscess of mediastinum
514	Pulmonary congestion and hypostasis
515	Postinflammatory pulmonary fibrosis
5160	Pulmonary alveolar proteinosis
5161	Idiopathic pulmonary hemosiderosis
5162	Pulmonary alveolar microlithiasis
5163	Idiopathic fibrosing alveolitis
5168	Other specified alveolar and parietoalveolar pneumonopathies
5169	Unspecified alveolar and parietoalveolar pneumonopathy
5171	Rheumatic pneumonia
5172	Lung involvement in systemic sclerosis
5173	Acute chest syndrome
5178	Lung involvement in other diseases classified elsewhere
5180	Pulmonary collapse
5181	Interstitial emphysema
5182	Compensatory emphysema
5183	Pulmonary eosinophilia
5184	Acute edema of lung, unspecified
5185	Pulmonary insufficiency following trauma and surgery
5186	Allergic bronchopulmonary aspergilliosis
51881	Acute respiratory failure
51882	Other pulmonary insufficiency, not elsewhere classified
51883	Chronic respiratory failure
51884	Acute and chronic respiratory failure
51889	Other diseases of lung, not elsewhere classified
51900	Tracheostomy complication, unspecified
51901	Infection of tracheostomy
51902	Mechanical complication of tracheostomy
51909	Other tracheostomy complications
51911	Acute bronchospasm

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
51919	Other diseases of trachea and bronchus
5192	Mediastinitis
5193	Other diseases of mediastinum, not elsewhere classified
5194	Disorders of diaphragm
5198	Other diseases of respiratory system, not elsewhere classified
5199	Unspecified disease of respiratory system
5300	Achalasia and cardiospasm
53010	Esophagitis, unspecified
53011	Reflux esophagitis
53012	Acute esophagitis
53019	Other esophagitis
53020	Ulcer of esophagus without bleeding
53021	Ulcer of esophagus with bleeding
5303	Stricture and stenosis of esophagus
5304	Perforation of esophagus
5305	Dyskinesia of esophagus
5306	Diverticulum of esophagus, acquired
5307	Gastroesophageal laceration-hemorrhage syndrome
53081	Esophageal reflux
53082	Esophageal hemorrhage
53083	Esophageal leukoplakia
53084	Tracheoesophageal fistula
53085	Barrett's esophagus
53086	Infection of esophagostomy
53087	Mechanical complication of esophagostomy
53089	Other diseases of esophagus
5309	Unspecified disorder of esophagus
5533	Diaphragmatic hernia without mention of obstruction or gangrene
57400	Calculus of gallbladder with acute cholecystitis, without mention of obstruction
57401	Calculus of gallbladder with acute cholecystitis, with obstruction
57410	Calculus of gallbladder with other cholecystitis, without mention of obstruction
57411	Calculus of gallbladder with other cholecystitis, with obstruction

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
57420	Calculus of gallbladder without mention of cholecystitis, without mention of obstruction
57421	Calculus of gallbladder without mention of cholecystitis, with obstruction
57430	Calculus of bile duct with acute cholecystitis without mention of obstruction
57431	Calculus of bile duct with acute cholecystitis, with obstruction
57440	Calculus of bile duct with other cholecystitis, without mention of obstruction
57441	Calculus of bile duct with other cholecystitis, with obstruction
57450	alculus of bile duct without mention of cholecystitis, without mention of obstruction
5770	Acute pancreatitis
5820	Chronic glomerulonephritis with lesion of proliferative glomerulonephritis
5821	Chronic glomerulonephritis with lesion of membranous glomerulonephritis
5822	Chronic glomerulonephritis with lesion of membranoproliferative glomerulonephritis
5824	Chronic glomerulonephritis with lesion of rapidly progressive glomerulonephritis
58281	Chronic glomerulonephritis in diseases classified elsewhere
58289	Other chronic glomerulonephritis with specified pathological lesion in kidney
5829	Chronic glomerulonephritis with unspecified pathological lesion in kidney
586	Renal failure, unspecified
66800	Pulmonary complications of anesthesia or other sedation in labor and delivery, unspecified as to episode of care
66801	Pulmonary complications of anesthesia or other sedation in labor and delivery, delivered

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
66802	Pulmonary complications of anesthesia or other sedation in labor and delivery, delivered, with mention of postpartum complication
66803	Pulmonary complications of anesthesia or other sedation in labor and delivery, antepartum
66804	Pulmonary complications of anesthesia or other sedation in labor and delivery, postpartum
66810	Cardiac complications of anesthesia or other sedation in labor and delivery, unspecified as to episode of care
66811	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered
66812	Cardiac complications of anesthesia or other sedation in labor and delivery, delivered, with mention of postpartum complication
66813	Cardiac complications of anesthesia or other sedation in labor and delivery, antepartum
66814	Cardiac complications of anesthesia or other sedation in labor and delivery, postpartum
7450	Common truncus
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
74519	Other transposition of great vessels
7452	Tetralogy of fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects
7457	Cor biloculare
7458	Other bulbus cordis anomalies and anomalies of cardiac septal closure
7459	Unspecified defect of septal closure
74600	Congenital pulmonary valve anomaly, unspecified

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
74601	Atresia of pulmonary valve, congenital
74602	Stenosis of pulmonary valve, congenital
74609	Other congenital anomalies of pulmonary valve
7461	Tricuspid atresia and stenosis, congenital
7462	Ebstein's anomaly
7463	Congenital stenosis of aortic valve
7464	Congenital insufficiency of aortic valve
7465	Congenital mitral stenosis
7466	Congenital mitral insufficiency
7467	Hypoplastic left heart syndrome
74681	Subaortic stenosis, congenital
74682	Cor triatriatum
74683	Infundibular pulmonic stenosis, congenital
74684	Congenital obstructive anomalies of heart, not elsewhere classified
74685	Coronary artery anomaly, congenital
74686	Congenital heart bloc
74687	Malposition of heart and cardiac apex
74689	Other specified congenital anomalies of heart
7469	Unspecified congenital anomaly of heart
7470	Patent ductus arteriosus
74710	Coarctation of aorta (preductal) (postductal)
74711	Interruption of aortic arch
74720	Congenital anomaly of aorta, unspecified
74721	Congenital anomalies of aortic arch
74722	Congenital atresia and stenosis of aorta
74729	Other congenital anomalies of aorta
7473	Congenital anomalies of pulmonary artery
74740	Congenital anomaly of great veins, unspecified
74741	Total anomalous pulmonary venous connection
74742	Partial anomalous pulmonary venous connection

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
74749	Other anomalies of great veins
7483	Other congenital anomalies of larynx, trachea, and bronchus
7484	Congenital cystic lung
7485	Congenital agenesis, hypoplasia, and dysplasia of lung
74860	Congenital anomaly of lung, unspecified
74861	Congenital bronchiectasis
74869	Other congenital anomalies of lung
7488	Other specified congenital anomalies of respiratory system
7489	Unspecified congenital anomaly of respiratory system
7503	Congenital tracheoesophageal fistula, esophageal atresia and stenosis
7504	Other specified congenital anomalies of esophagus
7562	Cervical rib
7563	Other congenital anomalies of ribs and sternum
7566	Congenital anomalies of diaphragm
7682	Fetal distress before onset of labor, in liveborn infant
7683	Fetal distress first noted during labor, in liveborn infant
7684	Fetal distress, unspecified as to time of onset, in liveborn infant
7685	Severe birth asphyxia
7686	Mild or moderate birth asphyxia
7689	Unspecified severity of birth asphyxia in liveborn infant
769	Respiratory distress syndrome in newborn
7700	Congenital pneumonia
77010	Fetal and newborn aspiration, unspecified
77011	Meconium aspiration without respiratory symptoms
77012	Meconium aspiration with respiratory symptoms
77013	Aspiration of clear amniotic fluid without respiratory symptoms
77014	Aspiration of clear amniotic fluid with respiratory symptoms
77015	Aspiration of blood without respiratory symptoms

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
77016	Aspiration of blood with respiratory symptoms
77017	Other fetal and newborn aspiration without respiratory symptoms
77018	Other fetal and newborn aspiration with respiratory symptoms
7702	Interstitial emphysema and related conditions of newborn
7703	Pulmonary hemorrhage of fetus or newborn
7704	Primary atelectasis of newborn
7705	Other and unspecified atelectasis of newborn
7706	Transitory tachypnea of newborn
7707	Chronic respiratory disease arising in the perinatal period
77081	Primary apnea of newborn
77082	Other apnea of newborn
77083	Cyanotic attacks of newborn
77084	Respiratory failure of newborn
77085	Aspiration of postnatal stomach contents without respiratory symptoms
77086	Aspiration of postnatal stomach contents with respiratory symptoms
77089	Other respiratory problems after birth
7709	Unspecified respiratory condition of fetus and newborn
78001	Coma
78002	Transient alteration of awareness
78009	Alteration of consciousness, other
7802	Syncope and collapse
78031*	Febrile convulsions (simple), unspecified
78039*	Other convulsions
78057	Unspecified sleep apnea
7806	Fever
78071	Chronic fatigue syndrome
78079	Other malaise and fatigue
7808	Generalized hyperhidrosis
7825	Cyanosis
7852	Undiagnosed cardiac murmurs
78600	Respiratory abnormality, unspecified
78601	Hyperventilation
78602	Orthopnea

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
78603	Apnea
78604	Cheyne-Stokes respiration
78605	Shortness of breath
78606	Tachypnea
78607	Wheezing
78609	Other
7861	Stridor
7862	Cough
7863	Hemoptysis
7864	Abnormal sputum
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
7866	Swelling, mass, or lump in chest
7867	Abnormal chest sounds
7868	Hiccough
7869	Other symptoms involving respiratory system and chest
78900*	Abdominal pain, unspecified site
7931	Nonspecific abnormal findings on radiological and other examination of lung field
7932	Nonspecific abnormal findings on radiological and other examination of other intrathoracic organs
7942	Nonspecific abnormal results of function study of pulmonary system
79430	Unspecified abnormal function study of cardiovascular system
79431	Nonspecific abnormal electrocardiogram (ECG) (EKG)
79439	Other nonspecific abnormal function study of cardiovascular system
7955	Shock without mention of trauma
79901	Asphyxia
79902	Hypoxemia
7991	Respiratory arrest
80700	Closed fracture of rib(s), unspecified
80701	Closed fracture of one rib
80702	Closed fracture of two ribs
80703	Closed fracture of three ribs
80704	Closed fracture of four ribs
80705	Closed fracture of five ribs
80706	Closed fracture of six ribs

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80707	Closed fracture of seven ribs
80708	Closed fracture of eight or more ribs
80709	Closed fracture of multiple ribs, unspecified
80710	Open fracture of rib(s), unspecified
80711	Open fracture of one rib
80712	Open fracture of two ribs
80713	Open fracture of three ribs
80714	Open fracture of four rib
80715	Open fracture of five ribs
80716	Open fracture of six ribs
80717	Open fracture of seven ribs
80718	Open fracture of eight or more ribs
80719	Open fracture of multiple ribs, unspecified
8072	Closed fracture of sternum
8073	Open fracture of sternum
8074	Flail chest
8075	Closed fracture of larynx and trachea
8076	Open fracture of larynx and trachea
81000	Closed fracture of clavicle, unspecified part
81001	Closed fracture of sternal end of clavicle
81002	Closed fracture of shaft of clavicle
81003	Closed fracture of acromial end of clavicle
81010	Open fracture of clavicle, unspecified part
81011	Open fracture of sternal end of clavicle
81012	Open fracture of shaft of clavicle
81013	Open fracture of acromial end of clavicle
8185	Pulmonary insufficiency following trauma and surgery
83130	Unspecified injury of lung with open wound into thorax
8600	Traumatic pneumothorax without mention of open wound into thorax
8601	Traumatic pneumothorax with open wound into thorax
8602	Traumatic hemothorax without mention of open wound into thorax
8603	Traumatic hemothorax with open wound into thorax

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
8604	Traumatic pneumohemothorax without mention of open wound into thorax
8605	Traumatic pneumohemothorax with open wound into thorax
86100	Unspecified injury of heart without mention of open wound into thorax
86101	Contusion of heart without mention of open wound into thorax
86102	Laceration of heart without penetration of heart chambers or open wound into thorax
86103	Laceration of heart with penetration of heart chambers, without mention of open wound into thorax
86110	Unspecified injury of heart with open wound into thorax
86111	Contusion of heart with open wound into thorax
86112	Laceration of heart without penetration of heart chambers, with open wound into thorax
86113	Laceration of heart with penetration of heart chambers and open wound into thorax
86120	Unspecified injury of lung without open wound into thorax
86121	Contusion of lung without open wound into thorax
86122	Laceration of lung without open wound into thorax
86130	Unspecified injury of lung with open wound into thorax
86131	Contusion of lung with open wound into thorax
86132	Laceration of lung with open wound into thorax
8620	Injury to diaphragm without mention of open wound into cavity
8621	Injury to diaphragm with open wound into cavity
86221	Injury to bronchus without open wound into cavity
86222	Injury to esophagus without mention of open wound into cavity
86229	Injury to other specified intrathoracic organs without mention of open wound into cavity
86231	Injury to bronchus with open wound into cavity

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
86232	Injury to esophagus with open wound into cavity
86239	Injury to other specified intrathoracic organs with open wound into cavity
8628	Injury to multiple and unspecified intrathoracic organs without mention of open wound into cavity
8629	Injury to multiple and unspecified intrathoracic organs with open wound into cavity
8750	Open wound of chest (wall), without mention of complication
8751	Open wound of chest (wall), complicated
9192	Mediastinitis
9221	Contusion of chest wall
9228	Contusion of multiple sites of trunk
9248*	Contusion of multiple sites, not elsewhere classified
9340	Foreign body in trachea
9341	Foreign body in main bronchus
9348	Foreign body in other specified parts bronchus and lung
9349	Foreign body in respiratory tree, unspecified
9351	Foreign body in esophagus
9352	Foreign body in stomach
938	Foreign body in digestive system, unspecified
94100	Burn of unspecified degree of unspecified site of face and head
94101	Burn of unspecified degree of ear (any part)
94102	Burn of unspecified degree of eye (with other parts of face, head, and neck)
94103	Burn of unspecified degree of lip(s)
94104	Burn of unspecified degree of chin
94105	Burn of unspecified degree of nose (septum)
94106	Burn of unspecified degree of scalp (any part)
94107	Burn of unspecified degree of forehead and cheek
94108	Burn of unspecified degree of neck
94109	Burn of unspecified degree of multiple sites (except with eye) of face, head, and neck

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
94110	Erythema due to burn (first degree) of unspecified site of face and head
94111	Erythema due to burn (first degree) of ear (any part)
94112	Erythema due to burn (first degree) of eye (with other parts face, head, and neck)
94113	Erythema due to burn (first degree) of lip(s)
94114	Erythema due to burn (first degree) of chin
94115	Erythema due to burn (first degree) of nose (septum)
94116	Erythema due to burn (first degree) of scalp (any part)
94117	Erythema due to burn (first degree) of forehead and cheek
94118	Erythema due to burn (first degree) of neck
94119	Erythema due to burn (first degree) of multiple sites (except with eye) of face, head, and neck
94120	Blisters, with epidermal loss due to burn (second degree) of face and head, unspecified site
94121	Blisters, with epidermal loss due to burn (second degree) of ear (any part)
94122	Blisters, with epidermal loss due to burn (second degree) of eye (with other parts of face, head, and neck
94123	Blisters, with epidermal loss due to burn (second degree) of lip(s)
94124	Blisters, with epidermal loss due to burn (second degree) of chin
94125	Blisters, with epidermal loss due to burn (second degree) of nose (septum)
94126	Blisters, with epidermal loss due to burn (second degree) of scalp (any part)
94127	Blisters, with epidermal loss due to burn (second degree) of forehead and cheek
94128	Blisters, with epidermal loss due to burn (second degree) of neck
94129	Blisters, with epidermal loss due to burn (second degree) of multiple sites (except with eye) of face, head, and neck

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
94130	Full-thickness skin loss due to burn (third degree NOS) of unspecified site of face and head
94131	Full-thickness skin loss due to burn (third degree NOS) of ear (any part
94132	Full-thickness skin loss due to burn (third degree NOS) of eye (with other parts of face, head, and neck)
94133	Full-thickness skin loss due to burn (third degree NOS) of lip(s)
94134	Full-thickness skin loss due to burn (third degree NOS) of chin
94135	Full-thickness skin loss due to burn (third degree NOS) of nose (septum)
94136	Full-thickness skin loss due to burn (third degree NOS) of scalp (any part)
94137	Full-thickness skin loss due to burn (third degree NOS) of forehead and cheek
94138	Full-thickness skin loss due to burn (third degree NOS) of neck
94139	Full-thickness skin loss due to burn (third degree NOS) of multiple sites (except with eye) of face, head, and neck
94140	Deep necrosis of underlying tissues due to burn (deep third degree) of unspecified site of face and head, without mention of loss of body part
94141	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), without mention of loss of ear
94142	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), without mention of loss of body part
94143	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), without mention of loss of lip(s)
94144	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, without mention of loss of chin
94145	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), without mention of loss of nose

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
94146	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), without mention of loss of scalp
94147	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, without mention of loss of forehead and cheek
94148	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, without mention of loss of neck
94149	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except with eye) of face, head, and neck, without mention of loss of a body part
94150	Deep necrosis of underlying tissues due to burn (deep third degree) of face and head, unspecified site, with loss of body part
94151	Deep necrosis of underlying tissues due to burn (deep third degree) of ear (any part), with loss of ear
94152	Deep necrosis of underlying tissues due to burn (deep third degree) of eye (with other parts of face, head, and neck), with loss of a body part
94153	Deep necrosis of underlying tissues due to burn (deep third degree) of lip(s), with loss of lip(s)
94154	Deep necrosis of underlying tissues due to burn (deep third degree) of chin, with loss of chin
94155	Deep necrosis of underlying tissues due to burn (deep third degree) of nose (septum), with loss of nose
94156	Deep necrosis of underlying tissues due to burn (deep third degree) of scalp (any part), with loss of scalp
94157	Deep necrosis of underlying tissues due to burn (deep third degree) of forehead and cheek, with loss of forehead and cheek
94158	Deep necrosis of underlying tissues due to burn (deep third degree) of neck, with loss of neck
94159	Deep necrosis of underlying tissues due to burn (deep third degree) of multiple sites (except eye) of face, head, and neck, with loss of a body part

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
9470	Burn of mouth and pharynx
9471	Burn of larynx, trachea, and lung
9472	Burn of esophagus
9473	Burn of gastrointestinal tract
9591	Other and unspecified injury to trunk
9598*	Other and unspecified injury to other specified
9651	Poisoning by salicylates
9711	Poisoning by parasympatholytics (anticholinergics and antimuscar-inics) and spasmolytics
9941	Drowning and nonfatal submersion
99550	Unspecified child abuse
99551	Child emotional/psychological abuse
99552	Child neglect (nutritional)
99553	Child sexual abuse
99554	Child physical abuse
99555	Shaken baby syndrome
99559	Other child abuse and neglect
99560	Anaphylactic shock due to unspec-ified food
99561	Anaphylactic shock due to peanuts
99562	Anaphylactic shock due to crustaceans
99563	Anaphylactic shock due to fruits and vegetables
99564	Anaphylactic shock due to tree nuts and seeds
99565	Anaphylactic shock due to fish
99566	Anaphylactic shock due to food additives
99567	Anaphylactic shock due to milk products
99568	Anaphylactic shock due to eggs
99569	Anaphylactic shock due to other specified food
9957	Other adverse food reactions, not elsewhere classified
99580	Unspecified adult maltreatment
99581	Adult physical abuse
99673	Other complications due to renal dialysis device, implant, and graft
9971	Cardiac complications, not elsewhere classified
9973	Respiratory complications, not elsewhere classified

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

Diagnosis Code	Description
9991	Air embolism as a complication of medical care, not elsewhere classified
V011	Contact with or exposure to tuberculosis
V103	Personal history of malignant neoplasm of breast
V420	Kidney replaced by transplant
V421	Heart replaced by transplant
V422	Heart valve replaced by transplant
V433	Heart valve replaced by other means
V451	Postsurgical renal dialysis status
V4581	Postsurgical aortocoronary bypass status
V460	Dependence on aspirator
V560	Aftercare involving extracorporeal dialysis
V568	Aftercare involving other dialysis
V711	Observation for suspected malignant neoplasm
V712	Observation for suspected tuberculosis
V760	Special screening for malignant neoplasms of the respiratory organ
V7610	Breast screening, unspecified

***Claims for clients 12 years of age and older may be appealed with documentation of medical necessity.**

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.41.3 Diagnosis Requirements

Physicians enrolled and practicing as radiologists are not routinely required to send a diagnosis with their request for payment except when providing the following services:

- Arteriograms
- Venography
- Chest X-rays
- Cardiac blood pool imaging
- Echography

Radiologists are required to identify the referring provider by full name and address or nine-digit provider identifier in Block 17 of the CMS-1500 claim form. Radiology procedures submitted by all other physician specialties must reference a diagnosis with every procedure billed. As with all procedures billed to the Texas Medicaid Program, baseline screening and/or comparison studies are not a benefit.

36.4.41.4 Contrast Materials/Radiopharmaceuticals

Reimbursement for radiological procedures, such as magnetic resonance imaging (MRI) or computed tomography (CT), with descriptions that specify "with contrast," include payment for high osmolar, low osmolar contrast material (LOCM) and paramagnetic contrast materials. These contrast materials will not be reimbursed separately.

Radiopharmaceuticals used for therapeutic treatment may be considered for separate reimbursement.

The following procedure codes may be billed for therapeutic radiopharmaceuticals:

Procedure Codes		
6/I/T-79403	9-A9517	9-A9532
9-A9543	9-A9545	9-A9699

36.4.41.5 Magnetic Resonance Angiography (MRA)

MRA is a technique that allows noninvasive visualization and study of blood vessels through either two- or three-dimensional image reconstruction. Although MRA in the study of the blood vessels of the heart, lungs, abdomen, pelvis, spine, and extremities is continuing to develop, it is most advanced in the evaluation of cerebrovascular disease especially in the assessment of arterial occlusive disease in patients at risk of stroke.

Refer to: Section 39, "Radiological and Physiological Laboratory and Portable X-Ray Supplier" on page 39-1, for authorization requirements.

MRA of the Head and Neck

Effective for dates of service on or after November 1, 2005, MRAs of the head, neck, and lower extremities will no longer have diagnosis restrictions for the Texas Medicaid Program.

MRAs of the chest, abdomen, and pelvis (procedure codes 4/I/T-70544, 4/I/T-70545, 4/I/T-70546, 4/I/T-70547, 4/I/T-70548, and 4/I/T-70549) may be reimbursed as a benefit of the Texas Medicaid Program.

MRA of Other Areas

The following MRA studies (with contrast materials) are a benefit of the Texas Medicaid Program:

MRA Studies	
4/I/T-71555	4/I/T-72159
4/I/T-72198	4/I/T-73225
4/I/T- 73725	4/I/T-74185

Refer to: The CPT and ICD-9-CM manuals for code descriptions.

36.4.41.6 Magnetic Resonance Imaging (MRI)

MRIs are reimbursed by the Texas Medicaid Program when medically necessary.

MRI procedures that specify *with contrast* include payment for para-magnetic contrast; therefore, LOCM is not reimbursed separately.

When an MRI and a CAT scan of the *same body area* are performed on the same day, the CAT scan is paid and the MRI is denied as part of an overlapping diagnostic procedure. Additional MRIs and/or CAT scans of *entirely different body areas* performed on the same day are paid with documentation of medical necessity.

A freestanding MRI facility may bill using the modifier TC for the technical portion only. The radiologist or neurologist who reads the MRI may bill using the modifier 26 for interpretation only whether the client is in the inpatient or outpatient setting.

Refer to: Section 39, "Radiological and Physiological Laboratory and Portable X-Ray Supplier" on page 39-1, for authorization requirements.

36.4.41.7 Technetium TC 99M-Tetrofosmin

Procedure code 9-A9502 is a benefit, without age restriction. It is payable in the office, inpatient, and outpatient settings.

Payable providers include:

- Physicians
- Radiation treatment centers
- Inpatient/outpatient hospitals

Inpatient settings are reimbursed under their DRG. Outpatient hospitals are reimbursed at their reimbursement rate. Physician offices and radiation treatment centers are reimbursed at a maximum fee of $112.46.

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.42 Reduction Mammoplasties

Procedure code 2/8/F-19318 is the removal of breast tissue and is a benefit of the Texas Medicaid Program when prior authorized. At least one of the following criteria must be met:

- Evidence of a restrictive pulmonary defect
- Evidence of severe neck and/or back pain with incapacitation from the pain
- Evidence of ulnar pain/paresthesia from thoracic nerve root compression

In addition to the above criteria, documentation must indicate:

- A minimum of 500 grams of tissue is expected to be removed from each breast
- The client, if 40 years of age or older, has had a mammogram within the past year that was negative for cancer

The following services are *not* a benefit of the Texas Medicaid Program:

- Reduction mammaplasty for cosmetic purposes (such as the equalization of breast size)
- Reduction mammaplasty for gynecomastia (enlargement of breast tissue in the male)
- Augmentation mammaplasty to increase breast size

For prior authorization of reduction mammaplasty, the following documentation must be submitted:

- Referring letter from the client's primary care physician
- Completed Medicaid Certificate of Medical Necessity for Reduction Mammaplasty form, signed and dated by the physician (see "Medicaid Certificate of Medical Necessity for Reduction Mammaplasty" on page B-58.)
- Relevant documentation of the client's medical condition, including summaries of:
    - Pulmonary function studies
    - Failed treatments for neck/back/ulnar pain
    - Results of a weight reduction program with the amount of weight lost
- Preoperative photographs (front and lateral views)
- The estimated amount of tissue to be removed from each breast

The physician is required to maintain the following documentation in the client's clinical records:

- A complete history and physical
- Pulmonary function studies results
- Past treatments, therapies, and outcomes for pain control and weight reduction

For reimbursement purposes on a bilateral procedure, the full allowed amount will be paid to the surgeon and assistant surgeon for the first breast reduction and one half the allowed amount will be paid for the second reduction. Facilities are paid for one surgical procedure.

Procedure code 2/8/F-19318 is to be used to bill for reduction mammaplasty.

When submitting for prior authorization, requests *must* be sent to TMHP Special Medical Prior Authorization. Sending requests directly to the TMHP Medical Director delays the processing of the request. Providers are to mail prior authorization requests for reduction mammaplasty for traditional Medicaid and PCCM clients to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax 1-512-514-4213

36.4.43 Renal Disease

36.4.43.1 Cytogam

Procedure code 1-J0850 is reimbursable by the Texas Medicaid Program. Cytogam is indicated for the attenuation of primary cytomegalovirus disease in seronegative kidney transplant recipients who receive a kidney from a seropositive donor. Payment of cytogam is limited to diagnosis code V420, Status post kidney transplant. Cytogam is payable in POS 1 (office) and POS 5 (outpatient facility) only.

Refer to: "Organ/Tissue Transplant Services" on page 25-10 for information on kidney transplants.

36.4.43.2 Dialysis Patients

Physician reimbursement for supervision of patients on dialysis is based on a monthly capitation payment (MCP) calculated by Medicare. The MCP is a comprehensive payment that covers all physician services associated with the continuing medical management of a maintenance dialysis patient for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all places of service except inpatient hospital. The original onset date must be the same date entered on the 2728 form sent to the Social Security office.

Physician Supervision of Dialysis Patients

Use procedure codes 1-90918, 1-90919, 1-90920, 1-90921, 1-90922, 1-90923, 1-90924, or 1-90925 when billing for physician supervision for outpatient dialysis regardless of POS. The procedure codes should be billed as follows:

- When a full month of supervision has been provided, use procedure codes 1-90918, 1-90919, 1-90920, or 1-90921. The date of service must reflect the first day of the month that supervision was provided and the quantity is 1.
- When supervision is for less than a full month (for example, the patient is hospitalized or is out of the area), use procedure codes 1-90922, 1-90923, 1-90924, or 1-90925. This code represents a per day

CPT only copyright 2005 American Medical Association. All rights reserved.

charge used to bill the supervision when a full month is not provided. The dates of service must indicate each day that supervision was provided and the quantity must be the same as the number of days listed for the month.

- Physician services during a dialysis session including supervisory services to the patient in connection with complicated and uncomplicated session (such as routine predialysis examination and physician attendance during a dialysis treatment where the patient has a serious ailment such as pulmonary edema).
- Office visits for the routine evaluation of patient progress, or for treatment of renal disease complications including evaluation of diagnostic tests and procedures.
- All physician services rendered by the attending physician in the course of office visits where the primary purpose is either the routine monitoring or the follow-up of complications of dialysis; follow up of complications includes services involved in prescribing therapy for illnesses unrelated to renal disease if the treatment occurs without increasing the number of physician-patient contacts beyond those occurring at dialysis, regular monitoring sessions, or visits for treatment of renal complications.

The following services may be provided in conjunction with dialysis but are considered nonroutine and may be billed separately:

- Declotting of shunts.
- *Physician services to inpatients.* The physician should bill procedure codes 1-90922, 1-90923, 1-90924, or 1-90925 for each date of outpatient supervision and bill the appropriate hospital E/M code for individual services provided on the hospitalized days.
- *Dialysis at an outpatient facility other than the usual dialysis setting for a patient of a physician who bills the MCP.* The physician must bill procedure codes 1-90922, 1-90923, 1-90924, or 1-90925 for each date supervision is provided. The physician may not bill for days that the patient dialyzed elsewhere.
- *Physician services beyond those that are related to the treatment of the patient's renal condition that cause the number of physician-patient contacts to increase.* Physicians may bill on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Procedure Code	TMRM Payable (RVUs X Conversion Factor)
1-90918	$329.77
1-90919	$257.76
1-90920	$223.12
1-90921	$146.74
1-90922	$4.91
1-90923	$9.82
1-90924	$8.73
1-90925	$6.27

Use the following procedure codes for inpatient dialysis services when the physician is present during dialysis treatment. The nephrologist must be physically present and involved during the course of the dialysis. These codes are not payable for a cursory visit by the nephrologist; hospital visit codes must be used for a cursory visit.

The following procedure codes are for complete care of the patient; hospital visits cannot be billed on the same day as these codes. However, if the physician only sees the patient when they are not dialyzing, the physician should bill the appropriate hospital visit code. The inpatient dialysis code should not be submitted for payment.

Hospital Evaluation and Management Codes

Procedure Codes		
1-90935	1-90937	1-90945
1-90947		

36.4.43.3 Epoetin Alfa (Erythropoietin; EPO)

EPO is a glycoprotein that stimulates red blood cell formation and production of the precursor red blood cells of bone marrow. EPO is indicated for anemia associated with chronic renal failure, including patients on dialysis (ESRD) and patients not on dialysis. In chronic ESRD patients, the increased BUN impairs the production of erythropoietin, leading to a chronic anemia.

EPO procedure codes used to bill for treatment of anemia associated with ESRD patients receiving dialysis are for a quantity of 1 for every 1,000 units. The exact dose should be stated on the claim.

Example: *If a client has an HCT of 34 percent with a diagnosis of ESRD and is given 5,000 units of EPO, bill a quantity of 5 with procedure code 1-J0886.*

EPO is limited to three injections per calendar week (Sunday through Saturday).

EPO is payable in the following places of service:

POS	Description
1	Office
2	Home
5	Outpatient hospital

36.4.43.4 Laboratory Services for Dialysis Patients

The Texas Medicaid Program provides reimbursement for laboratory services performed for dialysis patients.

Charges for *routine laboratory services* performed according to the established frequencies listed under "Laboratory and Radiology Services" on page 37-4 are included in the facility's dialysis charge billed to Medicaid

CPT only copyright 2005 American Medical Association. All rights reserved.

regardless of where the tests were performed. Routine laboratory services performed by an outside laboratory are billed to the facility.

Nonroutine laboratory services for people dialyzing in a facility and all laboratory work for people on continuous ambulatory peritoneal dialysis (CAPD) may be billed separately from the dialysis charge.

36.4.43.5 Self-Dialysis Patients

Physician reimbursement for supervision of patients on self-dialysis is made after completion of the patient's training. If the training is not completed, payment is proportionate to the amount of time spent in training. Payment for training may be made in addition to payment under the MCP for physician supervision of an in-facility maintenance dialysis patient. Use procedure codes 1-90989 and 1-90993 for dialysis training regardless of the type of training performed. These procedure codes must be billed as specified:

- When complete dialysis training is provided, procedure code 1-90989 is billed. Providers are to use modifier AT when using this procedure code.The date of service indicates the date training was completed, and the quantity is 1. The reimbursement is $507.50.
- When dialysis training is not completed, bill procedure code 1-90993. The date of service must list each day that a session of training was provided and the quantity must indicate the number of training sessions provided. The reimbursement is $380.63.

The amount of reimbursement of subsequent training is determined by prorating the physician's payment for initial training sessions. The amount of payment for each additional training session does not exceed $20.

Physician Supervision

All physician services required to create the capacity for self-dialysis must include:

- Direction of and participation in training of dialysis patients
- Review of family and home status and environment, and counseling and training of family members
- Review of training progress

Initial Training

The following services are included in the physician charge for supervision of a client on self-dialysis:

- Physician services rendered during a dialysis session including those backup dialyses that occur in outpatient facility settings
- Office visits for the routine evaluation of patient progress, including the interpretation of diagnostic tests and procedures
- Physician services rendered by the attending physician in the course of an office visit, the primary purpose of which is routine monitoring or the follow-up of complications of dialysis, including services involved in prescribing therapy for illnesses unrelated to renal disease, which may be appropriately treated without increasing the number of contacts beyond those occurring at regular monitoring sessions or visits for treatment of renal complications
- General support services (for example, arranging for supplies)

Subsequent Training

No additional payment is made after the initial self-dialysis training course unless subsequent training is required for one of the following reasons:

- A change from the client's treatment machine to one the client had not been trained to use in the initial training course
- A change in setting
- A change in dialysis partner

The physician must document the reason for additional training sessions on the CMS-1500 paper claim form.

Dialysis equipment and supplies used by the client who dialyzes in the home are not benefits of the Texas Medicaid Program, including the lease or purchase of dialysis machines and disposable supply kits.

36.4.44 Respiratory Care for the Inpatient

Use the following procedure codes and guidelines for reimbursement of ventilation assist and management: 1-94656 and 1-94657.

Use the ventilation assist and management subsequent code (1-94657) when respiratory support must be established for a patient in the postoperative period in the hospital (POS 3). Subsequent days of ventilation assistance are payable when documentation indicates a respiratory problem.

Procedure codes 1-94656 and 1-94657 apply only to hospital care for critically ill patients. They do not apply to routine recovery room ventilation services. Separate support service charges billed on the same day as ventilatory support are denied (for example, initiation or maintenance of intravenous therapy or infusions, parenteral nutrition or hyperalimentation; arterial or venous punctures; interpretations of arterial blood gases; pulmonary function tests and management of the hemodynamic functions of the patient; intensive care visits; subsequent hospital visits; or any other hospital visit).

Use ventilation assist and management and initiation of pressure or volume preset ventilators for assisted or controlled breathing–first day (1-94656) when respiratory support must be established for a patient. It is a *one-time charge* per hospitalization that may be paid under the following circumstances:

- The first day of ventilation assist and management when the claim documents that a respiratory problem exists (for example, respiratory distress, asphyxia). After the first day, use subsequent days (1-94657).
- When no anesthetic and/or major surgery is billed on the same day by the same provider. If major surgery is apparent, change initial ventilatory support (1-94656) to the subsequent day ventilatory support (1-94657).

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.45 Speech-Language Therapy

Speech and language evaluations are used to assess the therapeutic needs of patients having speech and/or language difficulties as a result of disease or trauma. The assessments are usually performed before the initiation of speech therapy. Bill using procedure code 1-92506.

Procedure code 1-92506 is payable only once per six months, any payable speech therapy provider, same facility. Procedure code 1-92506 with modifier U4 as defined by each state (Reassessment), may be used for re-evaluation of speech, language, voice, communication, auditory processing, and/or aural rehabilitation status, is payable once per month, any payable speech therapy provider, same facility. Procedure codes 1-92507 and 1-92508 are not payable on the same day as a speech evaluation or re-evaluation.

Speech-language pathology therapy is reimbursed only for acute or subacute pathological or traumatic conditions of the head or neck that would affect speech production. For clients younger than 21 years of age, therapy not covered by the Texas Medicaid Program is available through THSteps-CCP with documentation of the medical necessity/appropriateness.

To be covered under the Texas Medicaid Program, speech-language therapy must be prescribed by a physician, provided as an inpatient or outpatient hospital service, and billed by the hospital, or prescribed by a physician performed by or under the physician's personal supervision, and billed by the physician.

The therapy may be performed by either a speech-language pathologist or audiologist if they are on staff at the hospital or under the personal supervision of a physician. Speech evaluations and speech-language therapy billed directly by an independently practicing speech-language pathologist or audiologist are payable under THSteps-CCP to children younger than 21 years of age and eligible for Medicaid.

Use procedure code 1-92507 or 1-92508 for each half-hour session. If the claim does not state the amount of time spent on the session, a quantity of 1 is paid. Speech-language pathology sessions are limited to one hour per day.

Evaluation and treatment of swallowing and oral function for feeding is a benefit of the Texas Medicaid Program:

- For clients 0 to 21 years of age, the services are reimbursed through THSteps-CCP.
- For clients 21 years of age and older, the services are reimbursed through the traditional Medicaid program and must be limited to acute conditions or exacerbations of chronic conditions. The modifier AT must be used to indicate the necessity of an acute condition, and it must appear on the claim.
- For clients 21 years of age and older, the services must be either:
  - Prescribed by a physician, provided as an outpatient hospital service, and billed by the hospital.
  - Prescribed by a physician, performed by the physician or under the physician's personal supervision, and billed by the physician.
- The service is considered included in the DRG when provided in an inpatient and rehabilitation facility.

Procedure Codes	
1-92526	1-92610

Refer to: "Speech-Language Pathologists (THSteps-CCP Only)" on page 43-78.

36.4.45.1 Speech Therapy and Aural Rehabilitation Post Cochlear Implant

Cochlear implants are reimbursable for clients 18 months of age and older. Reimbursement for speech therapy and aural rehabilitation is made separately from the surgical fee for cochlear implants.

For clients 18 months to 21 years of age, speech therapy and aural rehabilitation are reimbursed through THSteps-CCP.

For clients 21 years of age and older, speech therapy and aural rehabilitation are reimbursed through the traditional Medicaid program when billed by the hospital or the physician. The traditional Medicaid program reimburses a maximum of 12 visits within a six-month period. Payment for speech therapy (1-92507) is included as part of the cochlear implant procedure (2-69930).

The speech therapy and aural rehabilitation should be prescribed by a physician, provided as an outpatient hospital service and billed by the hospital, or prescribed by a physician, performed by or under their personal supervision, and billed by the physician.

The service is considered included in the DRG when provided in an inpatient facility and rehabilitation setting.

Speech evaluations and speech therapy billed directly by an independently practicing speech pathologist or audiologist autodeny and are considered on appeal only by the TMHP Medical Director.

36.4.46 Surgeons and Surgery

36.4.46.1 Primary Surgery

A primary surgeon is reimbursed for services provided in the inpatient hospital, outpatient hospital setting, and ASC/HASC Center.

If the same physician bills a surgical fee for one procedure (TOS 2) and an assistant surgeon's fee for the second procedure (TOS 8) on the same day, full allowed reimbursement is paid for the TOS 2 procedure and half the allowed reimbursement is paid for the TOS 8 procedure.

Regarding cosurgery, if a procedure code is not payable to an assistant surgeon (TOS 8), it is only payable to a primary surgeon (TOS 2).

CPT only copyright 2005 American Medical Association. All rights reserved.

36.4.46.2 Anesthesia Administered by Surgeon

If the physician bills for a surgical procedure and anesthesia for the same procedure, the surgery is paid and the anesthesia is denied as part of the surgical procedure. An exception to this policy is an epidural during labor and delivery.

Refer to: "Anesthesia" on page 36-24 for more information.

36.4.46.3 Assistant Surgeon

Assistant surgeons are reimbursed 16 percent of the TMRM fee for the surgical procedures performed.

Medicaid follows the TEFRA regulations for assistant surgeons in teaching hospitals. TEFRA states that an assistant surgeon will not be paid in a hospital classified by Medicare as a teaching facility with an approved graduate training program in the performing physician's specialty. One of the following situations must be present and documented on the claim:

- No qualified resident was available (modifier 82 may be used to document this exception).
- There were exceptional medical circumstances such as an emergency or life-threatening situation requiring immediate attention (modifiers 80 and KX).
- The primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of a patient (modifiers 80 and KX).
- The surgical procedure was complex and required a team of physicians (modifiers 80 and KX).

Use of these modifiers is not required but expedites claims processing. Therefore, it is *recommended* that these modifiers be used in conjunction with the procedure code rather than a narrative statement when these specific circumstances exist.

All claims for assistant surgeon services must include in Block 32 of the CMS-1500 claim form the name and address *or* nine-digit provider identifier of the hospital in which the surgery was performed. If the physician seeks an exception to this TEFRA regulation based on unavailability of a qualified resident, the following certification statement must appear on or attached to the claim form:

> "I understand that section 1842(b)(6)(D) of the *Social Security Act* generally prohibits reasonable charge payment for the services of assistants at surgery in teaching hospitals when qualified residents are available to furnish such services. I certify that the services for which payment is claimed were medically necessary, and that no qualified residents were available to perform the services. I further understand that these services are subject to postpayment review by TMHP."

A surgeon billing for a surgery and an assistant surgery fee on the same day (for the same client) may be reimbursed if two separate procedures are performed. Full payment is allowed for the surgery and the assisted surgical procedure is paid at half the allowed amount (16 percent of the TMRM fee for the surgical procedure performed).

Surgical procedures that do not ordinarily require the services of an assistant are denied when billed with a TOS 8 (assistant surgery). Procedures identified by Medicare as noncovered assisted surgical procedures are denied. One assistant surgeon is reimbursed for surgical procedures when appropriate. Two assistant surgeons are allowed for liver transplant surgery only.

Assistant surgeons must have the client's Medicaid number and when required the prior authorization number for claims payment. TMHP recommends that the surgeon provides this information to the assistant surgeon as soon as possible.

Physicians billing for assistant surgery on electronic and paper claims must include a facility provider identifier. When billing for assistant services, providers should bill with TOS 8, not TOS 2. The use of the TOS 2 with modifier 80 is paid incorrectly and is subject to recoupment.

PAs functioning as an assistant during surgery should be billed on the same claim as the surgery. Supervising physicians as defined by the Texas Medical Board bill Medicaid for services performed by the PA they supervise. Use modifier AS for assistant at surgery services rendered by the PA. The claim must include the PA's name and license number. Only procedures currently allowed for assistant surgeons are payable.

36.4.46.4 Bilateral Procedures

When a bilateral procedure is performed and an appropriate bilateral code is not available, a unilateral code must be used. The unilateral code must be billed twice with a quantity of 1 for each code. For all procedures, use modifiers LT (left) and RT (right) as appropriate. For example, bilateral application of short leg cast is billed as follows:

Procedure Code	Modifier
2/F-29405	LT
2/F-29405	RT

36.4.46.5 Biopsy

A biopsy refers to the surgical excision of tissue for pathological examination.

If a surgeon bills separate charges for a surgical procedure and a biopsy on the same organ or structure on the same day, the charges are reviewed and reimbursed only for the service with the higher of the allowed amounts.

36.4.46.6 Capsulotomy

A capsulotomy is the incision of the fibrous tissues surrounding a joint. This procedure is considered part of the joint surgery.

CPT only copyright 2005 American Medical Association. All rights reserved.

If a surgeon bills separate charges for a capsulotomy and another joint surgery on the same day, the charges are reviewed and reimbursed only for the service with the higher of the allowed amounts.

If a capsulotomy is billed alone, use the appropriate capsulotomy procedure code.

36.4.46.7 Cosurgery

Cosurgery (two surgeons) is reimbursed when the skills of two surgeons (usually with different skills) are required in the management of a specific surgical procedure. Cosurgery is for a surgery where the two surgeons' separate contributions to the successful outcome of the procedure are considered to be of equal importance. Prior authorization is no longer required, nor will it be issued for cosurgery.

Note: *No additional reimbursement will be made for an assistant surgeon.*

When billing for services provided during a cosurgery, each surgeon (usually of different specialties) must bill using the same CPT code(s), along with CPT modifier 62, To be used when two surgeons work together as primary surgeons performing distinct parts of a single reportable procedure. Each surgeon is reimbursed 58 percent of the highest paying procedure and 29 percent of each secondary procedure. No cosurgery payment is made for claims submitted without CPT modifier 62. In instances where the surgeons do not use CPT modifier 62, the first claim received at TMHP for the service is considered that of the primary surgeon, and the subsequent claim is denied as a previously paid service.

36.4.46.8 Global Fees

The Texas Medicaid Program reimburses surgeons, assistant surgeons, and anesthesiologists based on a global fee concept. The global fee concept means that the fee paid for the surgical procedure includes *varying* preoperative and postoperative care based on the complexity of the procedure.

No distinction is made between emergency and nonemergency procedures because the required package of services is the same.

Surgical procedures are reimbursed as a comprehensive global fee for the performance of the procedure. The method of accomplishing the surgical procedure is the election of the surgeon, who may elect to incorporate new technology in the procedure because it offers advantages. However, the global fee remains the fee for the procedure, with additional payment not afforded because of surgeon preference as to the technology selected for completion of the procedure. Separate charges for the use of special equipment or other modifications during surgery are denied.

Important: *Consultations or visits denied within the pre-care of a surgery may be considered an appeal with documentation establishing the medical necessity for exceeding the global surgical fee limitations.*

The reimbursement for minor surgeries (for example, elbow arthroscopy, conjunctiva biopsy) include all routine care related to the surgery three days preoperatively and seven days postoperatively.

Major surgeries (for example, gastrostomy, hysterectomy, and cataract extraction) include all routine care pertaining to the surgery three days preoperatively including admissions and consultations and all routine postoperative care for six weeks in any POS.

Extensive surgical procedures (for example, total hip replacement) include all routine care related to the surgical procedure three days preoperatively and for a period of 180 days postoperatively regardless of the POS of the pre and postoperative procedures.

Simple diagnostic (for example, paracentesis) and minor surgical procedures (for example, repair of a superficial wound up to 2.5 cm) do not include any preoperative or postoperative care restrictions. If the procedure is performed in an inpatient hospital setting, a visit is not paid on the same day. If the procedure is performed in the office or home, visits are reimbursed in addition to the surgical procedure.

Postoperative complications necessitating readmission to the hospital during the postoperative package of service (that exceeds 72 hours of observation for a complication of the surgical procedure) may be reimbursed outside the package of service on appeal to the TMHP Medical Director. Documentation of the medical appropriateness of the protracted medical stay is required with submission of the appeal.

All supplies (trays, dressings, casting and splinting supplies, and local anesthetics) are considered part of the surgical procedure and should not be billed separately to Medicaid or the client.

Refer to: "Paper Appeals" on page 6-3 for information about submitting appeals.

36.4.46.9 Global Surgery Concurrent Care

Medicaid reimbursement for surgical procedures is based on the concept of a global fee for a package of services related to the surgical procedure. This package of services includes all preoperative and postoperative care. In situations where a single physician/surgeon does not provide the package of services, the following steps must be followed to ensure the accurate processing and reimbursement of services:

1) The preoperative care provided by the surgeon/anesthesiologist should not be billed separately because it is included in the reimbursement for the surgical procedure.
2) Surgeons who do not provide the postoperative care for a patient *must* bill the surgery code with modifier 54. This modifier allows reimbursement of the surgeon at 80 percent of the performing provider's allowed amount.
3) The physician who provides the postoperative care *without* having performed the surgery may bill the appropriate visit code but must use CPT modifier 55.

CPT only copyright 2005 American Medical Association. All rights reserved.

CPT modifier 55 indicates that the physician did not perform the surgery and is only providing the preoperative or postoperative care.

4) Routine postoperative anesthesiology care by the anesthesiologist is included in the package of services by the anesthesiologist.

36.4.46.10 Multiple Surgeries

Medicaid payment for multiple surgeries is based on the following guidelines:

- When two surgical procedures are performed on the same day, the primary procedure (such as the higher paying procedure) is paid at the full TMRM allowance. Secondary procedures performed on the same day are paid at half of the TMRM allowance when medically justified.
- Surgical procedures performed at different operative sessions on the same day are paid at the full TMRM allowance for each primary procedure at each session.
  - Vaginal deliveries followed by tubal ligations are considered different operative sessions and are paid at full allowance for each primary procedure at a different session (i.e., both vaginal delivery and tubal ligation are paid at full allowance).
  - Procedure code 2/8-58611 performed in conjunction with a Cesarean section is reimbursed at full allowance in cases where the allowance already represents half of the primary procedure.
  - When a surgical procedure and a biopsy on the same organ or structure is done on the same day, the charges will be reviewed and reimbursement will be made only for the service with the higher of the allowed amounts.

36.4.46.11 Office Procedures

CMS has identified certain surgical procedures that are more appropriately performed in the office setting rather than as outpatient hospital, ASC/HASC procedures. The following list of surgical procedure codes should be billed in POS 1 (physician's office). The medical necessity and/or special circumstances that dictate that these surgical procedures be performed in a POS other than the office must be documented on the claim. These surgical procedures are evaluated on a retrospective basis that may cause recoupment and/or adjustment of the original claim payment.

Excision benign lesions	Excision malignant lesions	Manipulation (urethral)
2-11400	2-11600	2-53600
2-11401	2-11601	2-53601
2-11402	2-11602	2-53620
2-11403	2-11603	2-53621
2-11404	2-11604	2-53660
2-11420	2-11620	2-53661

2-11443	2-11642	
2-11444	2-11643	
	2-11644	
Simple repairs	**Endoscopy**	**Biopsy (tongue)**
2-28010	2-31505	2-41100
2-28011		
Lesions (penile)	**Lesions (eyelid)**	
2-54060	2-67801	

36.4.46.12 Orthopedic Hardware

Reimbursement for the orthopedic hardware (e.g., buried wire, pin, screw, metal band, nail, rod, or plate) is part of the surgeon's global fee or the facility's payment group. The hardware is not reimbursed separately to either the surgeon or the facility.

The removal of orthopedic hardware is not payable to the same provider who inserted it, if removed within the global operative care period of the original insertion.

Services for removal of orthopedic hardware may be reimbursed separately after the global post-operative care period.

36.4.46.13 Second Opinions

Texas Medicaid Program benefits include payment to physicians when eligible clients request second opinions about specific problems. The claim should be coded with the appropriate office or hospital visit codes, and the notation "Client Initiated Second Opinion" should be identified in Block 24C of the CMS-1500 claim form.

Refer to: "Consultations" on page 36-11.

36.4.46.14 Team Surgery

Team surgery is no longer reimbursed by the Texas Medicaid Program. Surgeons and assistant surgeons participating in a team surgery procedure should bill for the procedure(s) personally performed and are reimbursed based on the multiple surgery guidelines.

In instances where one surgeon performs the approach procedure, another surgeon performs the definitive procedure, and another surgeon performs the recon-

CPT only copyright 2005 American Medical Association. All rights reserved.

struction/repair procedure, each surgeon reports only the code for the specific procedure performed. Each procedure is reimbursed at full allowance.

Refer to: "Assistant Surgeon" on page 36-328.
"Multiple Surgeries" on page 36-330 for more information.

36.4.47 Suture of Wounds

Wounds are defined as a break or laceration of soft parts of body structures (i.e., skin) caused by violence or trauma to tissues. Wounds occur to all parts of the body and can be caused by accidents or under aseptic conditions, such as a surgical incision. The repair of wounds is defined as simple, intermediate, or complex. Simple repair involves the dermis and subcutaneous tissue and requires a one-layer closure. Intermediate repair requires some layered closure of deeper layers of subcutaneous tissue and superficial fascia. Complex repair involves more layered closure, debridement, extensive undermining, stints, or retention sutures. Wound closures may use sutures, staples, and/or wound adhesives.

Wound closures should be billed using the following procedure codes:

Procedure Codes		
Repair Simple		
2-12001	2-12002	2-12004
2/F-12005	2/F-12006	2/F-12007
2-12011	2-12013	2-12014
2-12015	2/F-12016	2/F-12017
2/8/F-12018	2/F-12020	2/F-12021
Repair Intermediate		
2/F-12031	2/F-12032	2/F-12034
2/F-12035	2/F-12036	2/8/F-12037
2/F-12041	2/F-12042	2/F-12044
2/F-12045	2/F-12046	2/F-12047
2-12051	2-12052	2-12053
2/F-12054	2/F-12055	2/F-12056
2/8/F-12057		
Repair Complex		
2/F-13100	2/F-13101	2/8/F-13102
2/F-13120	2/F-13121	2/8/F-13122
2/F-13131	2/F-13132	2/8/F-13133
2/F-13150	2/F-13151	2/F-13152
2/8/F-13153	2/F-13160	

Multiple wounds on the same day will be paid the full-allowed amount for the major (largest) wound and one-half the allowed amount for each additional laceration.

No separate payment will be made for incision closures billed in addition to a surgical procedure when the closure is part of that surgical procedure.

No separate payment will be made for supplies in the office.

For the hospital-based emergency department, see the policy on Supplies/Trays/Drugs.

36.4.48 Therapeutic Apheresis

Therapeutic apheresis does not require mandatory prior authorization. Payment for procedure code 2/F-36511, 2/F-36512, 2/F-36513, or 2/F-36514 is limited to the following diagnosis codes:

Diagnosis Code	Description
20300	Multiple myeloma, without mention of remission
20310	Plasma cell leukemia, without mention of remission
20311	Plasma cell leukemia, in remission
2038	Other immunoproliferative neoplasms
20380	Other immunoproliferative neoplasms, without mention of remission
20381	Other immunoproliferative neoplasms, in remission
20400	Lymphoid leukemia, acute, without mention of remission
20401	Lymphoid leukemia, acute, in remission
20410	Lymphoid leukemia, chronic, without mention of remission
20411	Lymphoid leukemia, chronic, in remission
20420	Lymphoid leukemia, subacute, without mention of remission
20421	Lymphoid leukemia, subacute, in remission
20480	Other lymphoid leukemia, without mention of remission
20481	Other lymphoid leukemia, in remission
20490	Unspecified lymphoid leukemia, without mention of remission
20491	Unspecified lymphoid leukemia, in remission
20500	Myeloid leukemia, acute, without mention of remission
20501	Myeloid leukemia, acute, in remission
20510	Myeloid leukemia, chronic, without mention of remission
20511	Myeloid leukemia, chronic, in remission
20520	Myeloid leukemia, subacute, without mention of remission

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
20521	Myeloid leukemia, subacute, in remission
20530	Myeloid sarcoma, without mention of remission
20531	Myeloid sarcoma, in remission
20580	Other myeloid leukemia, without mention of remission
20581	Other myeloid leukemia, in remission
20590	Unspecified myeloid leukemia, without mention of remission
20591	Unspecified myeloid leukemia, in remission
20600	Monocytic leukemia, acute, without mention of remission
20601	Monocytic leukemia, acute, in remission
20610	Monocytic leukemia, chronic without mention of remission
20611	Monocytic leukemia, chronic, in remission
20620	Monocytic leukemia, subacute, without mention of remission
20621	Monocytic leukemia, subacute, in remission
20680	Other monocytic leukemia, without mention of remission
20681	Other monocytic leukemia, in remission
20690	Unspecified monocytic leukemia, without mention of remission
20691	Unspecified monocytic leukemia, in remission
20700	Acute erythremia and erythroleukemia, without mention of remission
20701	Acute erythremia and erythroleukemia, in remission
20710	Chronic erythremia, without mention of remission
20711	Chronic erythremia, in remission
20720	Megakaryocytic leukemia, without mention of remission
20721	Megakaryocytic leukemia, in remission
20780	Other specified leukemia, without mention of remission
20781	Other specified leukemia, in remission
20800	Leukemia of unspecified cell type, acute, without mention of remission
20801	Leukemia of unspecified cell type, acute, in remission

Diagnosis Code	Description
20810	Leukemia of unspecified cell type, chronic, without mention of remission
20811	Leukemia of unspecified cell type, chronic, in remission
20820	Leukemia of unspecified cell type, subacute, without mention of remission
20821	Leukemia of unspecified cell type, subacute, in remission
20880	Other leukemia of unspecified cell type, without mention of remission
20881	Other leukemia of unspecified cell type, in remission
20890	Unspecified leukemia, without mention of remission
20891	Unspecified leukemia, in remission
2384	Polycythemia vera
23871	Essential thrombocythemia
2720	Pure hypercholesterolemia
2730	Polyclonal hypergammaglobulinemia
2731	Monoclonal paraproteinemia
2733	Macroglobulinemia
28262	HB-SS Disease with crisis
2828	Other specified hereditary hemolytic anemias
2830	Autoimmune hemolytic anemias
28310	Non-autoimmune hemolytic anemia, unspecified
28311	Hemolytic-uremic syndrome
28319	Other non-autoimmune hemolytic anemias
2848	Other specified aplastic anemias
2863	Congenital deficiency of other clotting factors
2866	Defibrination syndrome
28730	Primary thrombocytopenia, unspecified
28731	Immune thrombocytopenic purpura
28732	Evans' syndrome
28733	Congenital and hereditary thrombocytopenic purpura
28739	Other primary thrombocytopenia
2884	Hemophagocytic syndromes
28869	Other elevated white blood cell count
2890	Polycythemia, secondary
28951	Chronic congestive splenomegaly
28952	Splenic sequestration
2896	Familial polycythemia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
2897	Methemoglobinemia
2898	Other specified diseases of blood and blood-forming organs
28981	Primary hypercoagulable state
28989	Other specified diseases of blood and blood-forming organs
2899	Unspecified diseases of blood and blood-forming organs
3570	Acute infective polyneuritis
3571	Polyneuropathy in collagen vascular disease
3572	Polyneuropathy in diabetes
3573	Polyneuropathy in malignant disease
3574	Polyneuropathy in other diseases classified elsewhere
3575	Alcoholic polyneuropathy
3576	Polyneuropathy due to drugs
3577	Polyneuropathy due to other toxic agents
3578	Other inflammatory and toxic neuropathies
3580	Myasthenia gravis
35800	Myasthenia gravis without (acute) exacerbation
35801	Myasthenia gravis with (acute) exacerbation
390	Rheumatic fever without mention of heart involvement
3918	Other acute rheumatic heart disease
44620	Hypersensitivity angiitis, unspecified
44621	Goodpasture's syndrome
44629	Other specified hypersensitivity angiitis
4466	Thrombotic microangiopathy
4476	Thrombotic microangiopathy
4478	Other specified disorders of arteries and arterioles
570	Acute and subacute necrosis of liver
5718	Other chronic nonalcoholic liver disease
5724	Hepatorenal syndrome
5731	Hepatitis in viral diseases classified elsewhere
5732	Hepatitis in other infectious diseases classified elsewhere
5733	Hepatitis, unspecified
57431	Calculus of bile duct with acute cholecystitis, with obstruction

Diagnosis Code	Description
57441	Calculus of bile duct with other cholecystitis, with obstruction
5800	Acute glomerulonephritis with lesion of proliferative glomerulonephritis
5804	Acute glomerulonephritis with lesion of rapidly progressive glomerulonephritis
5810	Nephrotic syndrome with lesion of proliferative glomerulonephritis
5811	Nephrotic syndrome with lesion of membranous glomerulonephritis
5812	Nephrotic syndrome with lesion of membranoproliferative glomerulonephritis
5813	Nephrotic syndrome with lesion of minimal change glomerulonephritis
58181	Nephrotic syndrome in diseases classified elsewhere
58189	Other nephrotic syndrome with specified pathological lesion in kidney
5819	Nephrotic syndrome with unspecified pathological lesion in kidney
5820	Chronic glomerulonephritis with lesion of proliferative glomerulonephritis
5821	Chronic glomerulonephritis with lesion of membranous glomerulonephritis
5822	Chronic glomerulonephritis with lesion of membranoproliferative glomerulonephritis
5824	Chronic glomerulonephritis with lesion of rapidly progressive glomerulonephritis
5830	Nephritis and nephropathy, not specified as acute or chronic, with lesion of proliferative glomerulonephritis
5831	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranous glomerulonephritis
5832	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranoproliferative glomerulonephritis
5834	Nephritis and nephropathy, not specified as acute or chronic, with lesion of rapidly progressive glomerulonephritis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5836	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal cortical necrosis
5837	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal medullary necrosis
58381	Nephritis and nephropathy, not specified as acute or chronic, in diseases classified elsewhere
58389	Other nephritis and nephropathy, not specified as acute or chronic, with specified pathological lesion in kidney
5839	Nephritis and nephropathy, not specified as acute or chronic, with unspecified pathological lesion in kidney
6944	Pemphigus
6951	Erythema multiforme
7100	Systemic lupus erythematosus
701	Other hypertrophic and atrophic conditions of skin
7101	Systemic sclerosis
7103	Dermatomyositis
7104	Polymyositis
71430	Chronic or unspecified polyarticular juvenile rheumatoid arthritis
71431	Acute polyarticular juvenile rheumatoid arthritis
71432	Pauciarticular juvenile rheumatoid arthritis
71433	Monoarticular juvenile rheumatoid arthritis
7140	Rheumatoid arthritis
7141	Felty's syndrome
7142	Other rheumatoid arthritis with visceral or systemic involvement

Procedure codes 2/F-36515 and 2/F-36516 may be considered for reimbursement when billed for the low density lipoprotein (LDL) apheresis (such as Liposorber® LA 15) or the protein A immunoadsorption (such as Prosorba®) columns.

- The protein A immunoadsorption column is indicated for use in either of the following cases:
  - Clients who have a platelet count of less than 100,000 mm3.
  - Adult clients with signs and symptoms of moderate to severe rheumatoid arthritis with long-standing disease who have failed, or are intolerant to, disease-modifying anti-rheumatic drugs (DMARDs).
- Therapeutic apheresis using the protein A immunoadsorption column may be reimbursed for the following diagnosis codes:

Diagnosis Code	Description
2720	Pure hypercholesterolemia
28730	Primary thrombocytopenia, unspecified
28731	Immune thrombocytopenic purpura
28732	Evans' syndrome
28733	Congenital and hereditary thrombocytopenic purpura
28739	Other primary thrombocytopenia
7140	Rheumatoid arthritis
7141	Felty's syndrome
7142	Other rheumatoid arthritis with visceral or systemic involvement

- The LDL apheresis column is indicated for use in clients with severe familial hypercholesterolemia whose cholesterol levels remain elevated despite a strict diet and ineffective or untolerated maximum drug therapy. Coverage is considered for the following high-risk population, for whom diet has been ineffective and maximum drug therapy has either been ineffective or not tolerated:
  - Functional hypercholesterolemia homozygotes with LDL-C > 500 mg/dL.
  - Functional hypercholesterolemia heterozygotes with LDL-C $\geq$ 300 mg/dL.
  - Functional hypercholesterolemia heterozygotes with LDL-C $\geq$ 200 mg/dL and documented coronary heart disease.
- Baseline LDL-C levels are to be obtained after the client has had, at a minimum, a six-month trial on an American Heart Association (AHA) Step II diet or equivalent and maximum tolerated combination drug therapy designed to reduce LDL-C. Baseline lipid levels are to be obtained during a two- to four- week period and should be within 10 percent of each other, indicating a stable condition.
- Therapeutic apheresis using the LDL apheresis column may be reimbursed for diagnosis code 2720, Familial hypercholesterolemia.

This procedure represents one 30-minute time interval of personal physician involvement in the apheresis. Apheresis is limited to three 30-minute time intervals per procedure. The actual time must be reflected on the claim, or a unit of 1, 2, or 3 must be indicated. If the time (or unit) is not indicated, payment is based on one 30-minute time interval.

Apheresis is denied for all other diagnosis codes. Other diagnosis codes can be reviewed by the TMHP Medical Director or designee on appeal with documentation of medical necessity.

CPT only copyright 2005 American Medical Association. All rights reserved.

Laboratory work before and during the apheresis procedure is covered when apheresis is performed in the outpatient setting (POS 5). Laboratory work billed in conjunction with apheresis performed in the inpatient setting (POS 3) is included in the DRG reimbursement and is not paid separately.

36.4.49 Therapeutic Phlebotomy

Therapeutic phlebotomy is a treatment whereby a prescribed amount of blood is withdrawn for medical reasons. Conditions that cause an elevation of the red blood cell volume or disorders that cause the body to accumulate too much iron may be treated by therapeutic phlebotomy.

Therapeutic phlebotomy is a benefit of the Texas Medicaid Program and may be billed using procedure code 1-99195. This procedure code should be used only for the therapeutic form of phlebotomy and not for diagnostic reasons.

Reimbursement of therapeutic phlebotomy is limited to the following diagnosis codes:

Diagnosis Code	Description
2384	Polycythemia vera
2750	Disorders of iron metabolism
2890	Polycythemia, secondary
2896	Familial polycythemia

Therapeutic phlebotomy will autodeny for all other diagnosis codes.

36.4.50 Ultrasonic Guidance for Intrauterine Fetal Transfusion, Cordocentesis

Payment for procedure codes 2-36460, 2-59012, or 4/I/T-76941 is limited to the diagnosis codes 65610, 65613, 65620,and 65623.

Ultrasonic guidance for intrauterine fetal transfusion or cordocentesis should be billed using procedure code 4/I/T-76941. This service is reimbursable only when provided by a different physician from the one actually performing the fetal transfusion or cordocentesis. Procedure code 4/I/T-76941 is denied as part of 2-59012 or 2-36460 when both procedures are billed on the same day by the same provider.

36.5 Doctor of Dentistry Practicing as a Limited Physician

Claims Information for Doctor of Dentistry Practicing as a Limited Physician outlines guidelines for the Doctor of Dentistry Practicing as a Limited Physician. The THSteps dental program is *not* addressed in these guidelines.

36.5.1 Medicaid Managed Care Enrollment

Services provided by a Doctor of Dentistry Practicing as a Limited Physician must be billed to the member's health plan if the client is in the STAR or STAR+PLUS programs. Providers must enroll with each STAR and STAR+PLUS health plan to be reimbursed for services provided to STAR and STAR+PLUS program members.

Note: *To be reimbursed for services provided to STAR and STAR+PLUS Program members, genetic providers must enroll with each STAR and STAR+PLUS health plan in which their patients are enrolled*.

36.5.1.1 Mandatory Prior Authorization Due to Life-Threatening Medical Condition

Reimbursement for general dental services by any provider, irrespective of the medical or dental qualifications of the provider, is not a Medicaid benefit for Medicaid clients 21 years of age and older (who do not reside in an ICF-MR facility).

The TMHP Medical Director or designee may allow an exception for a dental condition causally related to a life-threatening medical condition. *Mandatory prior authorization is required* and the dental diagnoses *must* be secondary to a life-threatening medical condition.

Examples of dental procedures that may be authorized for a *general dentist* who is enrolled as a *limited physician* are:

- Extractions
- Alveolectomies (in limited situations)
- Incision and drainage
- Curettement

Examples of dental procedures that may be authorized for an *oral and maxillofacial surgeon* who is enrolled as a *limited physician* are:

- Extractions
- Alveolectomies (in limited situations)
- Incision and drainage
- Curettement maxillofacial surgeries to correct defects caused by accident or trauma
- Surgical corrections of craniofacial dysostosis

Note: *Therapeutic procedures such as restorations, dentures, and bridges are not a benefit of the program and will not be authorized.*

36.5.2 Guidelines for Requesting Mandatory Prior Authorization

The *limited physician* dentist must request the mandatory prior authorization, and the request must include:

- A treatment plan that clearly outlines the dental condition as related to the life-threatening medical condition
- Narrative describing the current medical problem, client status, and medical need for requested services
- The client name and Medicaid number

CPT only copyright 2005 American Medical Association. All rights reserved.

- The *limited physician* dentist's provider identifier
- The name and address of the facility
- CPT procedure codes
- The history and physical
- The *limited physician* dentist's signature

Note: *The "limited physician" dentist who will perform the procedure(s) must submit the request for prior authorization.*

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 512-514-4213

36.5.3 Reimbursement for Doctor of Dentistry Practicing as a Limited Physician

Services performed by a DMD or DDS practicing as a limited physician are reimbursed according to the TMRM in accordance with 1 TAC §355.8085. The TMRM is based on the resource-based relative value scale (RBRVS). TMRM is a flat fee structure applicable on a statewide basis, with *no* geographical or specialty differences. All the following information is required to bill *limited physician* services:

- CMS-1500 claim form
- Approved CPT procedure codes (refer to "CPT Procedure Codes" on page 36-341)
- Approved diagnosis codes (refer to "Diagnosis Codes" on page 36-336)
- *Limited physician* provider identifier
- Authorization number when prior authorization is required

For services provided to THSteps clients younger than 21 years of age, Doctor of Dentistry providers should first use American Dental Association (ADA) procedure codes, the ADA claim form, and the provider identifier. CPT codes may be used when an appropriate ADA procedure code is not available.

Refer to: "Reimbursement" on page 2-2

36.5.3.1 Benefits and Limitations

Services by a DDS or DMD are covered by the Texas Medicaid Program in accordance with the OBRA Act of 1987 (public law 100-203), if the services are furnished within the dentist's scope of practice as defined by Texas state law and would be covered under Texas Medicaid when provided by a licensed physician (MD or DO).

36.5.3.2 Diagnosis Codes

The following table describes diagnosis codes (ICD-9-CM) that may be billed by a Doctor of Dentistry practicing as a Limited Physician:

Diagnosis Code	Description
0542	Herpetic gingivostomatitis
1120	Candidiasis of mouth
1400	Malignant neoplasm of upper lip vermilion border
1401	Malignant neoplasm of lower lip vermilion border
1403	Malignant neoplasm of upper lip, inner aspect
1404	Malignant neoplasm of lower lip, inner aspect
1405	Malignant neoplasm of lip, unspecified, inner aspect
1406	Malignant neoplasm of lip
1408	Malignant neoplasm of other sites of lip
1409	Malignant neoplasm of lip, unspecified, vermilion border
1410	Malignant neoplasm of base of tongue
1411	Malignant neoplasm of dorsal surface of tongue
1412	Malignant neoplasm of tip and lateral border of tongue
1413	Malignant neoplasm ventral of surface of tongue
1414	Malignant neoplasm of anterior two-thirds of tongue, part unspecified
1415	Malignant neoplasm of junctional zone of tongue
1416	Malignant neoplasm of lingual tonsil
1418	Malignant neoplasm of other sites of tongue
1419	Malignant neoplasm of tongue, unspecified
1420	Malignant neoplasm of parotid gland
1421	Malignant neoplasm of submandibular gland
1428	Malignant neoplasm of other major salivary glands
1429	Malignant neoplasm of salivary gland, unspecified
1430	Malignant neoplasm of upper gum
1431	Malignant neoplasm of lower gum
1438	Malignant neoplasm of other sites of gum

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
1439	Malignant neoplasm of gum, unspecified
1440	Malignant neoplasm of anterior portion of floor of mouth
1441	Malignant neoplasm of lateral portion of floor of mouth
1448	Malignant neoplasm of other sites of floor of mouth
1449	Malignant neoplasm of floor of mouth, part unspecified
1450	Malignant neoplasm of cheek mucosa
1451	Malignant neoplasm of vestibule of mouth
1452	Malignant neoplasm of hard palate
1453	Malignant neoplasm of soft palate
1454	Malignant neoplasm of uvula
1455	Malignant neoplasm of palate, unspecified
1456	Malignant neoplasm of retromolar area
1458	Malignant neoplasm of other specified parts of mouth
1459	Malignant neoplasm of mouth, unspecified
1460	Malignant neoplasm of tonsil
1461	Malignant neoplasm of tonsillar fossa
1462	Malignant neoplasm of tonsillar pillars (anterior) (posterior)
1463	Malignant neoplasm of vallecula epiglottica
1464	Malignant neoplasm of anterior aspect of epiglottis
1465	Malignant neoplasm of junctional region of oropharynx
1466	Malignant neoplasm of lateral wall of oropharynx
1467	Malignant neoplasm of posterior wall of oropharynx
1468	Malignant neoplasm of other specified sites of oropharynx
1469	Malignant neoplasm of oropharynx, unspecified site
1490	Malignant neoplasm of pharynx, unspecified
1498	Malignant neoplasm of other sites within the lip and oral cavity
1602	Malignant neoplasm of maxillary sinus
1700	Malignant neoplasm of bones of skull and face, except mandible
1701	Malignant neoplasm of mandible

Diagnosis Code	Description
1730	Other malignant neoplasm of skin of lip
1733	Other malignant neoplasm of skin of other and unspecified parts of face
1950	Malignant neoplasm of head, face, and neck
2100	Benign neoplasm of lip
2101	Benign neoplasm of tongue
2102	Benign neoplasm of major salivary glands
2103	Benign neoplasm of floor of mouth
2104	Benign neoplasm of other and unspecified parts of mouth
2105	Benign neoplasm of tonsil
2106	Benign neoplasm of other parts of oropharynx
2107	Benign neoplasm of nasopharynx
2120	Benign neoplasm of nasal cavities, middle ear, and accessory sinuses
2130	Benign neoplasm of bones of skull and face
2131	Benign neoplasm of lower jaw bone
2160	Benign neoplasm of skin of lip
2163	Benign neoplasm of skin of other and unspecified parts of face
22801	Hemangioma of skin and subcutaneous tissue
2300	Carcinoma in situ of lip, oral cavity, and pharynx
2320	Carcinoma in situ of skin of lip
2323	Carcinoma in situ of skin of other and unspecified parts of face
2350	Neoplasm of uncertain behavior of major salivary glands
2351	Neoplasm of uncertain behavior of lip, oral cavity, and pharynx
3501	Trigeminal neuralgia
3510	Bell's palsy
470	Deviated nasal septum
4730	Chronic maxillary sinusitis
4780	Hypertrophy of nasal turbinates
5225	Periapical abscess without sinus
5227	Periapical abscess with sinus
52400	Major anomalies of jaw size, unspecified anomaly
52401	Major anomalies of jaw size, maxillary hyperplasia
52402	Major anomalies of jaw size, mandibular hyperplasia

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
52403	Major anomalies of jaw size, maxillary hypoplasia
52404	Major anomalies of jaw size, mandibular hypoplasia
52405	Major anomalies of jaw size, macrogenia
52406	Major anomalies of jaw size, microgenia
52409	Major anomalies of jaw size, other specified anomaly
52410	Anomalies of relationship of jaw to cranial base, unspecified anomaly
52411	Anomalies of relationship of jaw to cranial base, maxillary asymmetry
52412	Anomalies of relationship of jaw to cranial base, other jaw asymmetry
52419	Anomalies of relationship of jaw to cranial base, other specified anomaly
52420	Unspecified anomaly of dental arch relationship
52421	Malocclusion, Angle's class I
52422	Malocclusion, Angle's Class II
52423	Malocclusion, Angle's Class III
52424	Open anterior occlusal relationship
52425	Open posteriior occlusal relationship
52426	Excessive horizontal overlap
52427	Reverse articulation
52428	Anomalies of interarch disease
52429	Other anomolies of dental arch relationship
5242	Dental arch anomaly
5245	Dentofacial functional abnormalities
52450	Dentofacial functional abnormality, unspecified
52451	Abnormal jaw closure
52452	Limited mandibular range of motion
52453	Deviation in opening and closing of the mandible
52454	Insufficient anterior guidance
52455	Centric occlusion maximum intercus-pation descrepancy
52456	Non-working side interference
52457	Lack of posterior occlusal support
52459	Other dentofacial functional abnormalities
52460	Temporomandibular joint disorder, unspecified

Diagnosis Code	Description
52461	Temporomandibular joint disorders, adhesions and ankylosis (bony or fibrous)
52462	Temporomandibular joint disorders, arthralgia of temporomandibular joint
52463	Temporomandibular joint disorders, articular disc disorder (reducing or non-reducing)
52469	Temporomandibular joint disorders, other specified temporomandibular joint disorders
52470	Dental alveolar anomalies, unspec-ified alveolar anomaly
52471	Dental alveolar anomalies, alveolar maxillary hyperplasia
52472	Dental alveolar anomalies, alveolar mandibular hyperplasia
52473	Dental alveolar anomalies, alveolar maxillary hypoplasia
52474	Dental alveolar anomalies, alveolar mandibular hypoplasia
52479	Dental alveolar anomalies, other specified alveolar anomaly
52481	Anterior soft tissue impingement
52482	Posterior soft tissue impingement
52489	Other specified dentofacial anomalies
5249	Unspecified dentofacial anomalies
5260	Devel odontogenic cysts
5261	Fissural cysts of jaw
5262	Other cysts of jaws
5263	Central giant cell (reparative) granuloma
5264	Inflammatory conditions of jaw
5265	Alveolitis of jaw
52681	Exostosis of jaw
52689	Other specified diseases of the jaws
5269	Unspecified disease of the jaws
5272	Sialoadenitis
5273	Salivary gland abscess
5274	Salivary gland fistula
5275	Sialolithiasis
5276	Salivary gland mucocele
5277	Disturbance of salivary secretion
5278	Other specified diseases of salivary glands
5279	Unspecified disease of the salivary glands
5281	Cancrum oris

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5282	Oral aphthae
5283	Cellulitis and abscess of oral soft tissues
5284	Oral soft tissue cyst
5285	Diseases of lips
5286	Leukoplakia of oral mucosa, including tongue
5287	Other disturbances of oral epithelium, including tongue
52871	Minimal keratinized residual ridge mucosa
52872	Excessive keratinized residual ridge mucosa
52879	Other disturbances of oral epithlium, including tongue
5290	Glossitis
5291	Geographic tongue
5292	Median rhomboid glossitis
5293	Hypertrophy of tongue papillae
5294	Atrophy of tongue papillae
5295	Plicated tongue
5298	Other specified conditions of the tongue
6820	Cellulitis and abscess, face
6828	Cellulitis and abscess of other specified sites
6829	Cellulitis and abscess of unspecified sites
70900	Dyschromia, unspecified
71509	Osteoarthrosis, generalized, involving multiple sites
71518	Osteoarthrosis, localized, primary, involving other specified sites
71528	Osteoarthrosis, localized, secondary, involving other specified sites
71618	Traumatic arthropathy involving other specified sites
71690	Unspecified arthropathy, site unspecified
73810	Other acquired deformity of head, unspecified deformity
73811	Other acquired deformity of head, zygomatic hyperplasia
73812	Other acquired deformity of head, zygomatic hyperplasia
73819	Other acquired deformity of head, other specified deformity
74441	Branchial cleft sinus or fistula
74442	Branchial cleft cyst

Diagnosis Code	Description
74900	Cleft palate, unspecified
74901	Cleft palate, unilateral, complete
74902	Cleft palate, unilateral, incomplete
74903	Cleft palate, bilateral, complete
74904	Cleft palate, bilateral, incomplete
74910	Cleft lip, unspecified
74911	Cleft lip, unilateral, complete
74912	Cleft lip, unilateral, incomplete
74913	Cleft lip, bilateral, complete
74914	Cleft lip, bilateral, incomplete
74920	Cleft palate with cleft lip
74921	Cleft palate with cleft lip, unilateral, complete
74922	Cleft palate with cleft lip, unilateral, incomplete
74923	Cleft palate with cleft lip, bilateral, complete
74924	Cleft palate with cleft lip, bilateral, incomplete
74925	Other combinations of cleft palate with cleft lip
7500	Tongue tie
7810	Abnormal involuntary movements
78199	Other symptoms involving nervous and musculoskeletal systems
8020	Closed fracture of nasal bones
8021	Open fracture of nasal bones
80220	Closed fracture of unspecified site of mandible
80221	Closed fracture of condylar process of mandible
80222	Closed fracture of subcondylar process of mandible
80223	Closed fracture of coronoid process of mandible
80224	Closed fracture of unspecified part of ramus of mandible
80225	Closed fracture of angle of jaw
80226	Closed fracture of symphysis of body of mandible
80227	Closed fracture of alveolar border of body of mandible
80228	Closed fracture of other and unspecified part of body of mandible
80229	Closed fracture of multiple sites of mandible
80230	Open fracture of unspecified site of mandible

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
80231	Open fracture of condylar process of mandible
80232	Open fracture of subcondylar process of mandible
80233	Open fracture of coronoid process of mandible
80234	Open fracture of unspecified part of ramus of mandible
80235	Open fracture of angle of jaw
80236	Open fracture of symphysis of body of mandible
80237	Open fracture of alveolar border of body of mandible
80238	Open fracture of body of mandible, other and unspecified
80239	Open fracture of multiple sites of mandible
8024	Closed fracture of malar and maxillary bones
8025	Open fracture of malar and maxillary bones
8026	Closed fracture of orbital floor (blow-out)
8027	Open fracture of orbital floor (blow-out)
8028	Closed fracture of other facial bones
8029	Open fracture of other facial bones
80300	Other closed skull fracture without mention of intracranial injury, with state of consciousness unspecified
80310	Other closed skull fracture with cerebral laceration and contusion, with state of consciousness unspecified
8300	Closed dislocation of jaw
8301	Open dislocation of jaw
8481	Sprain of jaw
87320	Open wound of nose, unspecified site, uncomplicated
87321	Open wound of nasal septum, uncomplicated
87322	Open wound of nasal cavity, uncomplicated
87323	Open wound of nasal sinus, uncomplicated
87329	Open wound of multiple sites, uncomplicated
87330	Open wound of nose, unspecified site, complicated
87331	Open wound of nasal septum, complicated

Diagnosis Code	Description
87332	Open wound of nasal cavity, complicated
87333	Open wound of nasal sinus, complicated
87339	Open wound of multiple sites, complicated
87340	Open wound of face, unspecified site, uncomplicated
87341	Open wound of cheek, uncomplicated
87342	Open wound of forehead, uncomplicated
87343	Open wound of lip, uncomplicated
87344	Open wound of jaw, uncomplicated
87349	Open wound of other and multiple sites, uncomplicated
87350	Open wound of face, unspecified site, complicated
87351	Open wound of cheek, complicated
87352	Open wound of forehead, complicated
87353	Open wound lip, complicated
87354	Open wound jaw, complicated
87359	Open wound of other and multiple sites, complicated
87360	Open wound of mouth, unspecified site, uncomplicated
87361	Open wound of buccal mucosa, uncomplicated
87362	Open wound of gum (alveolar process), uncomplicated
87363	Tooth (broken) (fractured) (due to trauma), without mention of complication
87364	Open wound of tongue and floor of mouth, uncomplicated
87365	Open wound of palate, uncomplicated
87369	Open wound of other and multiple sites, uncomplicated
87370	Open wound of mouth, unspecified site, complicated
87371	Open wound of buccal mucosa, complicated
87372	Open wound of gum (alveolar process), complicated
87373	Tooth (broken) (fractured) (due to trauma), complicated
87374	Open wound of tongue and floor of mouth, complicated
87375	pen wound of palate, complicated
87379	Open wound of other and multiple sites, complicated

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
8738	Other and unspecified open wound of head without mention of complication
8739	Other and unspecified open wound of head, complicated
9062	Late effect of superficial injury
920	Contusion of scalp, face, and neck except eye(s)
9350	Foreign body in mouth
95909	Other and unspecified injury to face and neck

36.5.3.3 Evaluation and Management Procedure Codes

The following procedure codes listed in the "Evaluation and Management" section of the Physicians' CPT must be used with the appropriate ICD-9-CM codes listed in "Diagnosis Codes" on page 36-336.

Procedure Codes		
1-99201	1-99202	1-99203
1-99204	1-99205	1-99211
1-99212	1-99213	1-99214
1-99215	1-99217	1-99218
1-99219	1-99220	1-99221
1-99222	1-99223	1-99231
1-99232	1-99233	1-99234
1-99235	1-99236	1-99238
1-99239	1-99281	1-99282
1-99283	1-99284	1-99285
1-99291	1-99292	1-99293
1-99294	1-99295	1-99296
1-99297	1-99298	1-99299
1-99300	1-99304	1-99305
1-99306	1-99307	1-99308
1-99309	1-99310	1-99315
1-99316	1-99318	1-99324
1-99325	1-99326	1-99327
1-99328	1-99334	1-99335
1-99336	1-99337	1-99341
1-99342	1-99343	1-99344
1-99345	1-99347	1-99348
1-99349	1-99350	1-99354
1-99355	1-99356	1-99357
1-99401	1-99402	1-99429
1-99431	1-99432	1-99433
1-99435	1-99436	1-99440
1-99499		

36.5.3.4 CPT Procedure Codes

The following CPT procedure codes are a benefit when:

- Accompanied by the appropriate diagnosis code.
- The dentist is qualified and licensed to perform the procedures.

Important: *Descriptions of these codes can be found in the current edition of CPT.*

CPT Procedure Codes		
2-10060	2-10061	2-10120
2-10121	2-10140	2-10160

2-40840	2-40842	2-40843
2-40844	2-40845	

Refer to: "Guidelines for Requesting Mandatory Prior Authorization" on page 36-335 for more instructions about submitting your request for prior authorization.

36.5.3.6 Radiographs by a Doctor of Dentistry Practicing as a Limited Physician

When a Doctor of Dentistry Practicing as a Limited Physician uses appropriate radiograph equipment to produce required radiographs, the following procedure codes are eligible for reimbursement when accompanied by an appropriate diagnosis:

Procedure Codes		
4-70100	4-70110	4-70120
4-70130	4-70140	4-70150
4-70160	4-70170	4-70190
4-70200	4-70250	4-70260
4-70300	4-70310	4-70320
4-70328	4-70330	4-70332
4-70336	4-70350	4-70355
4-70370	4-70371	4-70380
4-70390	4-73100	

36.5.3.7 Dental Anesthesia by a Doctor of Dentistry Practicing as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician who is licensed by the Texas State Board of Dental Examiners (TSBDE) practicing in Texas, who has obtained an Anesthesia Permit from the TSBDE in accordance with Title 22 TAC §§108.30 through 108.35, may be reimbursed for anesthesia services on clients having dental/oral and maxillofacial surgical procedures in the dental office or hospital in accordance with all applicable rules for physician administration and supervision of anesthesia services.

Dentists providing sedation/anesthesia services must have the appropriate permit from TSBDE for the level of sedation/anesthesia provided.

The following anesthesia services are payable to dentists as physician services when accompanied by a payable diagnosis:

Procedure Codes		
7-00100	7-00102	7-00160
7-00162	7-00164	7-00170
7-00190	7-00192	1-99100
1-99116	1-99135	1-99140

36.5.4 Claims Information for Doctor of Dentistry Practicing as a Limited Physician

Claims for services by a Doctor of Dentistry Practicing as a Limited Physician must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form using the appropriate provider identifier. All THSteps and ICF-MR services by a dentist must be submitted on an ADA claim form or ADA electronic claim format. Providers must purchase ADA or CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

36.6 Procedure Codes Requiring Prior Authorization

Prior authorization is mandatory for these services (this list is noninclusive and subject to change):

- Abdominal lipectomies and panniculectomies
- Baclofen and/or morphine pump implantation/revision/replacement

Blepharochalasis/blepharoplasty/blepharoptosis repair (not required for procedure codes 2-67901, 2-67902, 2-67903, 2-67904, 2-67906, 2-67908, and 2-67909 for clients younger than 21 years of age with a diagnosis of 74361, 74362, or 7439). Procedure codes 2-67901, 2-67902, 2-67903, 2-67904, 2-67906, and 2-67908 do not require prior authorization for clients older than 21 years of age with diagnosis codes 37431, 37432, 37433, and 37434.

- Breast reduction
- Communication devices (CCP only)
- Contact lenses (except postsurgical prosthetic contact lenses or emergency corneal bandage lenses or for the diagnosis of aphakia)
- Corneal topography performed by an optometrist
- Corneal topography performed by an ophthalmologist
- Customized DME (CCP only)
- Freestanding psychiatric facility (CCP only)
- Freestanding rehabilitation facility (CCP only)
- Heart transplants
- Home delivery by a CNM
- In-home respiratory services provided by a certified respiratory care practitioner
- Kidney transplants
- Liver transplants
- Lung transplants
- Maxillofacial/craniofacial surgery (excludes procedure code 2-61550 for cosurgery)
- Most home health services
- Oral surgery—jaw deformities
- Orthodontic services
- Outpatient/in-home total parenteral nutrition (TPN)/hyperalimentation

CPT only copyright 2005 American Medical Association. All rights reserved.

- Outpatient mental health services in excess of 30-encounters per client per calendar year to enrolled practitioners
- Private duty nursing (CCP only)
- Stem cell transplants
- Temporomandibular joint surgery
- Treatment of life-threatening oral infections
- Vagal nerve stimulator
- Vestibuloplasty

The following procedures do *not* require prior authorization:

- Cleft palate repair
- Cochlear implantation
- Contact lens(es) or replacement contact lens(es) for diagnosis of aphakia
- Implant of a dorsal column spinal cord stimulator inserted to treat chronic intractable pain
- Surgical removal of lesions, when medically necessary; use modifier KX, specific required documentation on file when excision/destruction is because of at least one of the following signs or symptoms: inflamed, growing, infected, bleeding, irritated, itching, limiting motion/function, or diagnosis 7020, actinic keratosis
- Home Health Services/DME supplies for in-home use require prior authorization through Home Health Services

Physician Assistant (PA)

37.1 Enrollment 37-2
37.1.1 Enrollment in Texas Health Steps 37-2
37.1.2 Medicaid Managed Care Enrollment 37-2
37.2 Reimbursement 37-2
37.3 Benefits and Limitations 37-2
37.4 Claims Information 37-2
37.4.1 Claim Filing Resources 37-3

CPT only copyright 2005 American Medical Association. All rights reserved.

37.1 Enrollment

To enroll in the Texas Medicaid Program, a physician assistant (PA) must be licensed and recognized as a PA by the Texas State Board of Physician Assistant Examiners. The Texas Medicaid Program accepts a signed letter of certification from the Texas State Board of Physician Assistant Examiners as acceptable documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

All providers of laboratory services must comply with Clinical Laboratory Improvement Amendments (CLIA) rules and regulations. Providers not complying with CLIA are not reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

"CLIA Requirements" on page 26-2.

37.1.1 Enrollment in Texas Health Steps

PAs can enroll as Texas Health Steps (THSteps) providers. PAs should have expertise or additional education in the areas of comprehensive pediatric assessment.

Refer to: "Provider Enrollment" on page 43-5 for more information on enrollment procedures.

37.1.2 Medicaid Managed Care Enrollment

PAs may be eligible to enroll with Medicaid Managed Care as primary care providers. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1 for more information.

37.2 Reimbursement

According to Title 1 *Texas Administrative Code* (TAC) §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (Doctor of Medicine [MD] or Doctor of Osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The current fee schedule is available on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Procedures billed by PAs are reviewed retrospectively for appropriateness. Independently enrolled PAs with a valid Medicare provider number are eligible to receive payment of deductible and coinsurance amounts as appropriate on Medicare crossover claims.

Refer to: "Provider Enrollment" on page 1-2 for more information.

"TMHP Electronic Data Interchange (EDI)" on page 3-1 for information on how to obtain electronic fee schedules from the TMHP website.

37.3 Benefits and Limitations

Services performed by PAs are covered if the services meet the following criteria:

- Are within the scope of practice for PAs, as defined by Texas state law
- Are consistent with rules and regulations promulgated by the Texas Medical Board or other appropriate state licensing authority
- Are covered by the Texas Medicaid Program when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

PAs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill the Texas Medicaid Program for their services if the billing results in duplicate payment for the same services.

Additional information about benefit limitation for services can be found in the Physician, Texas Health Steps medical (includes newborn exams), and Family Planning sections of this manual.

Note: *Payment to physicians for supplies is not a benefit of the Texas Medicaid Program. Costs of supplies are included in the reimbursement for office visits.*

Important: *Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and received within 95 days from the date of service.*

Refer to: "Family Planning Services" on page 20-1

"Physician" on page 36-1.

"THSteps Medical Checkup Facilities" on page 43-11.

37.4 Claims Information

Providers must submit PA services in an approved electronic format or on a CMS-1500 paper claim form. All services must be filed with modifier U7 on the claim detail(s) to indicate that the client was treated by a PA.

Refer to: "Claims Filing Instructions" on page 5-23 for paper claims completion instructions.

CPT only copyright 2005 American Medical Association. All rights reserved.

37.4.1 Claim Filing Resources

Refer to the following sections or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24
Use of the Family Planning 2017 Claim Form	20-5
Communication Guide	A-1
Family Planning Claim Form	D-13

Psychologist

38.1 Enrollment 38-2
38.1.1 Medicaid Managed Care Enrollment 38-2
38.2 Reimbursement 38-2
38.3 Benefits and Limitations 38-2
38.3.1 Psychological and Neuropsychological Testing 38-3
38.3.2 Outpatient Behavioral Health Services 38-20
38.3.3 Therapy 38-20
38.4 Documentation Requirements 38-21
38.5 Claims Information 38-21
38.5.1 Claim Filing Resources 38-21

CPT only copyright 2005 American Medical Association. All rights reserved.

38.1 Enrollment

To enroll in the Texas Medicaid Program, whether as an individual or as part of a group, a psychologist must be licensed by the Texas State Board of Examiners of Psychologists. Psychologists must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based psychologist is enrolling as part of a Medicare-enrolled group, then the psychologist must also be enrolled in Medicare.

Psychologists cannot be enrolled if they have a license that is due to expire within 30 days. A current license must be submitted. The Texas Medicaid Program accepts temporary licenses for psychologists.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

38.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Psychologists who practice in the Dallas service area must be enrolled as a network provider in the NorthSTAR Behavioral Health Organization's (BHOs) network to provide services to NorthSTAR enrollees.

NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. Providers must not bill TMHP for services rendered to NorthSTAR clients.

Refer to: "Managed Care" on page 7-1 for more information.

38.2 Reimbursement

The Medicaid rates for psychologists are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8081 and §355.8085. The applicable Medicaid rates are listed in the current physician fee schedule, which is available on the TMHP website at www.tmhp.com. To request a copy, call the TMHP Contact Center at 1-800-925-9126.

A federally qualified health center (FQHC) is reimbursed for psychological services according to its specific Prospective Payment System (PPS) rate per visit calculated in accordance with 1 TAC §355.8261.

A freestanding psychiatric hospital/facility is reimbursed for psychological services in accordance with 1 TAC §355.8063.

Refer to: "Federally Qualified Health Center (FQHC)" on page 21-1 for more information.

"Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)" on page 43-71 for more information.

"Reimbursement Methodology" on page 2-2 for more information.

38.3 Benefits and Limitations

Psychologists licensed by the Texas State Board of Examiners of Psychologists and enrolled as Medicaid providers are authorized to perform counseling and testing for mental illness/debility. Treatment does *not* include the practice of medicine.

The services of a psychological associate (masters level psychologists), licensed chemical dependency counselor (LCDC), social worker, psychiatric nurse, or mental health worker are not covered by the Texas Medicaid Program and cannot be billed under a psychologist's provider identifier. Services provided by a licensed clinical social worker (LCSW), licensed professional counselor (LPC), or licensed marriage and family therapist (LMFT) are reimbursable directly to the LCSW, LPC, or LMFT.

Psychologists must not bill for services performed by people under their supervision. For mental health services, only the licensed psychologist and Medicaid enrolled provider actually performing the service may bill Medicaid.

Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services. Each individual delegated to perform behavioral health services by a Doctor of Medicine (MD) or Doctor of Osteopathy (DO) is also limited to a combined total of 12 hours.

Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day. Retrospective review may occur for both the total hours of services performed per day and for the total hours of services billed per day. If inappropriate payments are identified, the money will be recouped. Documentation requirements for all services billed are listed for each individual specialty in this manual.

Outpatient mental health services are limited to 30 encounters/visits per client, per calendar year (January 1 through December 31), regardless of provider, unless prior authorization is obtained. *This limitation includes encounters/visits by all providers.* An encounter/visit is defined as each hour of therapy or psychological and/or neuropsychological testing rendered per hour, per provider. Laboratory, radiology, and medication monitoring services do not count toward the 30-encounter/visit limitation. If a provider determines that additional services are medically necessary within the calendar year, prior authorization must be obtained before providing the 25th service.

It is anticipated that this limitation, which allows for six months of weekly therapy or 12 months of biweekly therapy, will be adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters/visits. In these situations, prior authorization is required. *A provider who sees a client regularly and anticipates that the client will require encounters/visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit.*

CPT only copyright 2005 American Medical Association. All rights reserved.

It is recognized that a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was unable to submit the prior authorization request by the client's 25th encounter/visit.

All authorization requests for extension of outpatient psychotherapy sessions beyond the annual 30-encounter/visit limitation are limited to 10 encounters/visits per request and must be submitted on the Extended Outpatient/Counseling Request Form. Requests must include the following:

- Client name and Medicaid number
- Provider name and TPI
- Clinical update, including current specific symptoms and response to past treatment, and treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number and type of services requested and the dates (based on the frequency of encounters/visits) that the services will be provided
- All areas of the request must be completed with the information required on the form. If additional room is needed providers may state "see attached." The attachment must contain the specific information required in that section of the form

Prior authorization is not granted to providers who have seen a client for an extended period of time or from the start of the calendar year and who have not requested prior authorization before the 25th encounter/visit. It is recommended that a request for extension of outpatient behavioral health be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters/visits authorized is dependent on the client's symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. *The request for additional encounters/visits must include new documentation addressing the client's current condition, treatment plan, and the therapist's rationale supporting the medical necessity for these additional encounters/visits.* Prior authorization for an extension of outpatient behavioral health services is granted when the treatments are mandated by the courts as court-ordered services. A copy of the court order for outpatient treatment signed by the judge must accompany prior authorization requests.

Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Medicaid does not cover treatment for chronic diagnoses such as mental retardation and organic brain syndrome.

Psychiatric daycare is not a covered service.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement methodologies.

"Managed Care" on page 7-1.

"Request for Extended Outpatient Psychotherapy/Counseling Form" on page B-81.

"Licensed Clinical Social Worker (LCSW)" on page 28-1.

"Licensed Professional Counselor (LPC)" on page 30-1.

"Licensed Marriage and Family Therapist (LMFT)" on page 29-1 for more information.

38.3.1 Psychological and Neuropsychological Testing

Procedure codes 5-96101 and 5-96118 are covered services for the following diagnoses only:

Diagnosis Code	Description
0360	Meningococcal meningitis
0361	Meningococcal encephalitis
03681	Meningococcal optic neuritis
04503	Acute paralytic poliomyelitis specified as bulbar, polio virus type III
04510	Acute poliomyelitis with other paralysis, unspecified type of polio virus
04523	Acute nonparalytic poliomyelitis, polio virus type III
04593	Unspecified acute poliomyelitis, polio virus type III
0460	Kuru
0461	Jakob-Creutzfeldt disease
0462	Subacute sclerosing panencephalitis
0463	Progressive multifocal leukoencephalopathy
0468	Other specified slow virus infection of central nervous system
0469	Unspecified slow virus infection of central nervous system
0470	Meningitis due to coxsackie virus
0471	Meningitis due to echo virus
0478	Other specified viral meningitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
0479	Unspecified viral meningitis
048	Other enterovirus diseases of central nervous system
0490	Non-arthopod borne lymphocytic choriomeningitis
0491	Non-arthopod borne meningitis due to adenovirus
0498	Other specified non-arthropod-borne viral diseases of central nervous system
0499	Unspecified non-arthropod-borne viral diseases of central nervous system
2900	Senile dementia, uncomplicated
29010	Presenile dementia, uncomplicated
29012	Presenile dementia with delusional features
29013	Presenile dementia with depressive features
29020	Senile dementia with delusional features
29021	Senile dementia with depressive features
2903	Senile dementia with delirium
29040	Vascular dementia, uncomplicated
29041	Vascular dementia, with delirium
29043	Vascular dementia, with depressed mood
2908	Other specified senile psychotic conditions
2909	Unspecified senile psychotic condition
2910	Alcohol withdrawal delirium
2911	Alcohol-induced persisting amnestic disorder
2912	Alcohol-induced persisting dementia
2915	Alcohol-induced psychotic disorder with delusions
29189	Other alcohol-induced mental disorders
2919	Unspecified alcohol-induced mental disorders
2920	Drug withdrawal
2921	Drug-induced psychotic disorders
2922	Pathological drug intoxication
29281	Drug-induced delirium
2929	Unspecified drug-induced mental disorder

Diagnosis Code	Description
2930	Delirium due to conditions classified elsewhere
2931	Subacute delirium
29381	Psychotic disorder with delusions in conditions classified elsewhere
29382	Psychotic disorder with hallucinations in conditions classified elsewhere
29384	Anxiety disorder in conditions classified elsewhere
29389	Other specified transient mental disorders due to conditions classified elsewhere, other
2939	Unspecified transient mental disorder in conditions classified elsewhere
2940	Amnestic disorder in conditions classified elsewhere
29410	Dementia in conditions classified elsewhere without behavioral disturbance
29411	Dementia in conditions classified elsewhere with behavioral disturbance
2948	Other persistent mental disorders due to conditions classified elsewhere
2949	Other persistent mental disorders due to conditions classified elsewhere
29500	Simple type schizophrenia, unspecified state
29501	Simple type schizophrenia, subchronic state
29502	Simple type schizophrenia, chronic state
29503	Simple type schizophrenia, subchronic state with acute exacerbation
29504	Simple type schizophrenia, chronic state with acute exacerbation
29505	Simple type schizophrenia, in remission
29510	Disorganized type schizophrenia, unspecified state
29511	Disorganized type schizophrenia, subchronic state
29512	Disorganized type schizophrenia, chronic state
29513	Disorganized type schizophrenia, subchronic state with acute exacerbation

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29514	Disorganized type schizophrenia, chronic state with acute exacerbation
29515	Disorganized type schizophrenia, in remission
29520	Catatonic type schizophrenia, unspecified state
29521	Catatonic type schizophrenia, subchronic state
29522	Catatonic type schizophrenia, chronic state
29523	Catatonic type schizophrenia, subchronic state with acute exacerbation
29524	Catatonic type schizophrenia, chronic state with acute exacerbation
29525	Catatonic type schizophrenia, in remission
29530	Paranoid type schizophrenia, unspecified state
29531	Paranoid type schizophrenia, subchronic state
29532	Paranoid type schizophrenia, chronic state
29533	Paranoid type schizophrenia, subchronic state with acute exacerbation
29534	Paranoid type schizophrenia, chronic state with acute exacerbation
29535	Paranoid type schizophrenia, in remission
29540	Schizophreniform disorder, unspecified
29541	Schizophreniform disorder, subchronic
29542	Schizophreniform disorder, chronic
29543	Schizophreniform disorder, subchronic with acute exacerbation
29544	Schizophreniform disorder, chronic with acute exacerbation
29545	Schizophreniform disorder, in remission
29550	Latent schizophrenia, unspecified state
29551	Latent schizophrenia, subchronic state
29552	Latent schizophrenia, chronic state
29553	Latent schizophrenia, subchronic state with acute exacerbation
29554	Latent schizophrenia, chronic state with acute exacerbation
29555	Latent schizophrenia, in remission
29560	Schizophrenic disorders, residual type, unspecified
29561	Schizophrenic disorders, residual type, subchronic
29562	Schizophrenic disorders, residual type, chronic
29563	Schizophrenic disorders, residual type, subchronic with acute exacerbation
29564	Schizophrenic disorders, residual type, chronic with acute exacerbation
29565	Schizophrenic disorders, residual type, in remission
29570	Schizoaffective disorder, unspecified
29571	Schizoaffective disorder, subchronic
29572	Schizoaffective disorder, chronic
29573	Schizoaffective disorder, subchronic with acute exacerbation
29574	Schizoaffective disorder, chronic with acute exacerbation
29575	Schizoaffective disorder, in remission
29580	Other specified types of schizophrenia, unspecified state
29581	Other specified types of schizophrenia, subchronic state
29582	Other specified types of schizophrenia, chronic state
29583	Other specified types of schizophrenia, subchronic state with acute exacerbation
29584	Other specified types of schizophrenia, chronic state with acute exacerbation
29585	Other specified types of schizophrenia, in remission
29590	Unspecified type schizophrenia, unspecified state
29591	Unspecified type schizophrenia, subchronic state
29592	Unspecified type schizophrenia, chronic state
29593	Unspecified type schizophrenia, subchronic state with acute exacerbation
29594	Unspecified type schizophrenia, chronic state with acute exacerbation

Diagnosis Code	Description
29595	Unspecified type schizophrenia, in remission
29600	Bipolar I disorder, single manic episode, unspecified
29601	Bipolar I disorder, single manic episode, mild
29602	Bipolar I disorder, single manic episode, moderate
29603	Bipolar I disorder, single manic episode, severe, without mention of psychotic behavior
29604	Bipolar I disorder, single manic episode, severe, specified as with psychotic behavior
29605	Bipolar I disorder, single manic episode, in partial or unspecified remission
29606	Bipolar I disorder, single manic episode, in full remission
29610	Manic affective disorder, recurrent episode, unspecified degree
29611	Manic affective disorder, recurrent episode, mild degree
29612	Manic affective disorder, recurrent episode, moderate degree
29613	Manic affective disorder, recurrent episode, severe degree, without mention of psychotic behavior
29614	Manic affective disorder, recurrent episode, severe degree, specified as with psychotic behavior
29615	Manic affective disorder, recurrent episode, in partial or unspecified remission
29616	Manic affective disorder, recurrent episode, in full remission
29620	Major depressive affective disorder, single episode, unspecified degree
29621	Major depressive affective disorder, single episode, mild degree
29622	Major depressive affective disorder, single episode, moderate degree
29623	Major depressive affective disorder, single episode, severe degree, without mention of psychotic behavior
29624	Major depressive affective disorder, single episode, severe degree, specified as with psychotic behavior
29625	Major depressive affective disorder, single episode, in partial or unspecified remission

Diagnosis Code	Description
29626	Major depressive affective disorder, single episode, in full remission
29630	Major depressive affective disorder, recurrent episode, unspecified degree
29631	Major depressive affective disorder, recurrent episode, mild degree
29632	Major depressive affective disorder, recurrent episode, moderate degree
29633	Major depressive affective disorder, recurrent episode, severe degree, without mention of psychotic behavior
29634	Major depressive affective disorder, recurrent episode, severe degree, specified as with psychotic behavior
29635	Major depressive affective disorder, recurrent episode, in partial or unspecified remission
29636	Major depressive affective disorder, recurrent episode, in full remission
29640	Bipolar I disorder, most recent episode (or current) manic, unspecified
29641	Bipolar I disorder, most recent episode (or current) manic, mild
29642	Bipolar I disorder, most recent episode (or current) manic, moderate
29643	Bipolar I disorder, most recent episode (or current) manic, severe, without mention of psychotic behavior
29644	Bipolar I disorder, most recent episode (or current) manic, severe, specified as with psychotic behavior
29645	Bipolar I disorder, most recent episode (or current) manic, in partial or unspecified remission
29646	Bipolar I disorder, most recent episode (or current) manic, in full remission
29650	Bipolar I disorder, most recent episode (or current) depressed, unspecified
29651	Bipolar I disorder, most recent episode (or current) depressed, mild
29652	Bipolar I disorder, most recent episode (or current) depressed, moderate

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
29653	Bipolar I disorder, most recent episode (or current) depressed, severe, without mention of psychotic behavior
29654	Bipolar I disorder, most recent episode (or current) depressed, severe, specified as with psychotic behavior
29655	Bipolar I disorder, most recent episode (or current) depressed, in partial or unspecified remission
29656	Bipolar I disorder, most recent episode (or current) depressed, in full remission
29660	Bipolar I disorder, most recent episode (or current) mixed, unspecified
29661	Bipolar I disorder, most recent episode (or current) mixed, mild
29662	Bipolar I disorder, most recent episode (or current) mixed, moderate
29663	Bipolar I disorder, most recent episode (or current) mixed, severe, without mention of psychotic behavior
29664	Bipolar I disorder, most recent episode (or current) mixed, severe, specified as with psychotic behavior
29665	Bipolar I disorder, most recent episode (or current) mixed, in partial or unspecified remission
29666	Bipolar I disorder, most recent episode (or current) mixed, in full remission
2967	Bipolar I disorder, most recent episode (or current) unspecified
29680	Bipolar disorder, unspecified
29681	Atypical manic disorder
29682	Atypical depressive disorder
29689	Other and unspecified bipolar disorders, other
29690	Unspecified episodic mood disorder
29699	Other specified episodic mood disorder
2970	Paranoid state, simple
2971	Delusional disorder
2972	Paraphrenia
2973	Shared psychotic disorder
2978	Other specified paranoid states
2979	Unspecified paranoid state
2980	Depressive type psychosis

Diagnosis Code	Description
2981	Excitative type psychosis
2982	Reactive confusion
2983	Acute paranoid reaction
2984	Psychogenic paranoid psychosis
2988	Other and unspecified reactive psychosis
2989	Unspecified psychosis
29900	Autistic disorder, current or active state
29910	Childhood disintegrative disorder, current or active state
29980	Other specified pervasive developmental disorders, current or active state
29990	Unspecified pervasive developmental disorder, current or active state
30000	Anxiety state, unspecified
30001	Panic disorder without agoraphobia
30002	Generalized anxiety disorder
30009	Other anxiety states
30010	Hysteria, unspecified
30011	Conversion disorder
30012	Dissociative amnesia
30013	Dissociative fugue
30014	Dissociative identity disorder
30015	Dissociative disorder or reaction, unspecified
30016	Factitious disorder with predominantly psychological signs and symptoms
30019	Other and unspecified factitious illness
30020	Phobia, unspecified
30021	Agoraphobia with panic disorder
30022	Agoraphobia without mention of panic attacks
30023	Social phobia
30029	Other isolated or specific phobias
3003	Obsessive-compulsive disorders
3004	Dysthymic disorder
3006	Depersonalization disorder
3007	Hypochondriasis
30081	Somatization disorder
30082	Undifferentiated somatoform disorder
30089	Other somatoform disorders

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3009	Unspecified nonpsychotic mental disorder
3010	Paranoid personality disorder
30110	Affective personality disorder, unspecified
30111	Chronic hypomanic personality disorder
30112	Chronic depressive personality disorder
30113	Cyclothymic disorder
30120	Schizoid personality disorder, unspecified
30121	Introverted personality
30122	Schizotypal personality disorder
3013	Explosive personality disorder
3014	Obsessive-compulsive personality disorder
30150	Histrionic personality disorder, unspecified
30151	Chronic factitious illness with physical symptoms
30159	Other histrionic personality disorder
3016	Dependent personality disorder
3017	Antisocial personality disorder
30181	Narcissistic personality disorder
30182	Avoidant personality disorder
30183	Borderline personality disorder
30184	Passive-aggressive personality
30189	Other personality disorders
3019	Unspecified personality disorder
3020	Ego-dystonic sexual orientation
3021	Zoophilia
3022	Pedophilia
3023	Transvestic fetishism
3024	Exhibitionism
30250	Trans-sexualism with unspecified sexual history
30251	Trans-sexualism with asexual history
30252	Trans-sexualism with homosexual history
30253	Trans-sexualism with heterosexual history
3026	Gender identity disorder in children
30270	Psychosexual dysfunction, unspecified
30271	Hypoactive sexual desire disorder
30272	Psychosexual dysfunction with inhibited sexual excitement
30273	Female orgasmic disorder
30274	Male orgasmic disorder
30275	Premature ejaculation
30276	Dyspareunia, psychogenic
30279	Psychosexual dysfunction with other specified psychosexual dysfunctions
30281	Fetishism
30282	Voyeurism
30283	Sexual masochism
30284	Sexual sadism
30285	Gender identity disorder in adoles-cents or adults
30289	Other specified psychosexual disorders
3029	Unspecified psychosexual disorder
30390	Other and unspecified alcohol dependence, unspecified drinking behavior
30400	Opioid type dependence, unspecified use
30500	Nondependent alcohol abuse, unspecified drinking behavior
30501	Nondependent alcohol abuse, continuous drinking behavior
30502	Nondependent alcohol abuse, episodic drinking behavior
30503	Nondependent alcohol abuse, in remission
30520	Nondependent cannabis abuse, unspecified use
30521	Nondependent cannabis abuse, continuous use
30522	Nondependent cannabis abuse, episodic use
30523	Nondependent cannabis abuse, in remission
30530	Nondependent hallucinogen abuse, unspecified use
30531	Nondependent hallucinogen abuse, continuous use
30532	Nondependent hallucinogen abuse, episodic use
30533	Nondependent hallucinogen abuse, in remission
30540	Sedative, hypnotic or anxiolytic abuse, unspecified
30541	Sedative, hypnotic or anxiolytic abuse, continuous
30542	Sedative, hypnotic or anxiolytic abuse, episodic

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
30543	Sedative, hypnotic or anxiolytic abuse, in remission
30550	Nondependent opioid abuse, unspecified use
30551	Nondependent opioid abuse, continuous use
30552	Nondependent opioid abuse, episodic use
30553	Nondependent opioid abuse, in remission
30560	Nondependent cocaine abuse, unspecified use
30561	Nondependent cocaine abuse, continuous use
30562	Nondependent cocaine abuse, episodic use
30563	Nondependent cocaine abuse, in remission
30570	Nondependent amphetamine or related acting sympathomimetic abuse, unspecified use
30571	Nondependent amphetamine or related acting sympathomimetic abuse, continuous use
30572	Nondependent amphetamine or related acting sympathomimetic abuse, episodic use
30573	Nondependent amphetamine or related acting sympathomimetic abuse, in remission
30580	Nondependent antidepressant type abuse, unspecified use
30581	Nondependent antidepressant type abuse, continuous use
30582	Nondependent antidepressant type abuse, episodic use
30583	Nondependent antidepressant type abuse, in remission
30591	Nondependent other, mixed, or unspecified drug abuse, continuous use
30592	Nondependent other, mixed, or unspecified drug abuse, episodic use
30593	Nondependent other, mixed, or unspecified drug abuse, in remission
3080	Predominant disturbance of emotions
3081	Predominant disturbance of consciousness
3082	Predominant psychomotor disturbance

Diagnosis Code	Description
3083	Other acute reactions to stress
3084	Mixed disorders as reaction to stress
3089	Unspecified acute reaction to stress
3090	Adjustment disorder with depressed mood
3091	Adjustment reaction with prolonged depressive reaction
30921	Separation anxiety disorder
30922	Emancipation disorder of adolescence and early adult life
30923	Specific academic or work inhibition
30924	Adjustment disorder with anxiety
30928	Adjustment disorder with mixed anxiety and depressed mood
30929	Other adjustment reactions with predominant disturbance of other emotions
3093	Adjustment disorder with disturbance of conduct
3094	Adjustment disorder with mixed disturbance of emotions and conduct
30981	Posttraumatic stress disorder
30982	Adjustment reaction with physical symptoms
30983	Adjustment reaction with withdrawal
3099	Unspecified adjustment reaction
3100	Frontal lobe syndrome
3101	Personality change due to conditions classified elsewhere
3102	Postconcussion syndrome
3108	Other specified nonpsychotic mental disorders following organic brain damage
311	Depressive disorder, not elsewhere classified
31200	Undersocialized conduct disorder, aggressive type, unspecified degree
31201	Undersocialized conduct disorder, aggressive type, mild degree
31202	Undersocialized conduct disorder, aggressive type, moderate degree
31203	Undersocialized conduct disorder, aggressive type, severe degree
31210	Undersocialized conduct disorder, unaggressive type, unspecified degree
31211	Undersocialized conduct disorder, unaggressive type, mild degree

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
31212	Undersocialized conduct disorder, unaggressive type, moderate degree
31213	Undersocialized conduct disorder, unaggressive type, severe degree
31220	Socialized conduct disorder, unspecified degree
31221	Socialized conduct disorder, mild degree
31222	Socialized conduct disorder, moderate degree
31223	Socialized conduct disorder, severe degree
31230	Impulse control disorder, unspecified
31231	Pathological gambling
31232	Kleptomania
31233	Pyromania
31234	Intermittent explosive disorder
31235	Isolated explosive disorder
31239	Other disorders of impulse control
3124	Mixed disturbance of conduct and emotions
31281	Conduct disorder, childhood onset type
31282	Conduct disorder, adolescent onset type
31289	Other specified conduct disorder, not elsewhere classified
3130	Overanxious disorder specific to childhood and adolescence
3131	Misery and unhappiness disorder specific to childhood and adolescence
31321	Shyness disorder of childhood
31322	Introverted disorder of childhood
31323	Selective mutism
3133	Relationship problems specific to childhood and adolescence
31381	Oppositional defiant disorder
31382	Identity disorder of childhood or adolescence
31383	Academic underachievement disorder of childhood or adolescence
31389	Other emotional disturbances of childhood or adolescence
3139	Unspecified emotional disturbance of childhood or adolescence
31400	Attention deficit disorder of childhood without mention of hyperactivity

Diagnosis Code	Description
31401	Attention deficit disorder of childhood with hyperactivity
3141	Hyperkinesis of childhood with developmental delay
3142	Hyperkinetic conduct disorder of childhood
3148	Other specified manifestations of hyperkinetic syndrome of childhood
3149	Unspecified hyperkinetic syndrome of childhood
31531	Expressive language disorder
31532	Mixed receptive-expressive language disorder
3154	Developmental coordination disorder
3155	Mixed development disorder
3158	Other specified delays in development
3159	Unspecified delay in development
317	Mild mental retardation
3180	Moderate mental retardation
3181	Severe mental retardation
3182	Profound mental retardation
319	Unspecified mental retardation
320	Bacterial meningitis
3200	Hemophilus meningitis
3201	Pneumococcal meningitis
3202	Streptococcal meningitis
3203	Staphylococcal meningitis
3207	Meningitis in other bacterial diseases classified elsewhere
32081	Anaerobic meningitis
32082	Meningitis due to gram-negative bacteria, not elsewhere classified
32089	Meningitis due to other specified bacteria
3209	Meningitis due to unspecified bacterium
3210	Cryptococcal meningitis
3211	Meningitis in other fungal diseases
3212	Meningitis due to viruses not elsewhere classified
3213	Meningitis due to trypanosomiasis
3214	Meningitis in sarcoidosis
3218	Meningitis due to other nonbacterial organisms classified elsewhere
3220	Nonpyogenic meningitis
3221	Eosinophilic meningitis
3222	Chronic meningitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3229	Meningitis, unspecified
32301	Encephalitis and encephalomyelitis in viral diseases classified elsewhere
32302	Myelitis in viral diseases classified elsewhere
3231	Encephalitis, myelitis, and encephalomyelitis in rickettsial diseases classified elsewhere
3232	Encephalitis, myelitis, and encephalomyelitis in protozoal diseases classified elsewhere
32341	Other encephalitis and encephalomyelitis due to infection classified elsewhere
32342	Other myelitis due to infection classified elsewhere
32351	Encephalitis and encephalomyelitis following immunization procedures
32352	Myelitis following immunization procedures
32361	Infectious acute disseminated encephalomyelitis (ADEM)
32362	Other postinfectious encephalitis and encephalomyelitis
32363	Postinfectious myelitis
32371	Toxic encephalitis and encephalomyelitis
32372	Toxic myelitis
32381	Other causes of encephalitis and encephalomyelitis
32382	Other causes of myelitis
3239	Unspecified causes of encephalitis, myelitis, and encephalomyelitis
3240	Intracranial abscess
3241	Intraspinal abscess
3249	Intracranial and intraspinal abscess of unspecified site
3300	Leukodystrophy
3301	Cerebral lipidoses
3302	Cerebral degeneration in generalized lipidoses
3303	Cerebral degeneration of childhood in other diseases classified elsewhere
3308	Other specified cerebral degenerations in childhood
3309	Unspecified cerebral degeneration in childhood
33111	Pick’s Disease

Diagnosis Code	Description
33119	Other frontotemporal dementia
3312	Senile degeneration of brain
3313	Communicating hydrocephalus
3314	Obstructive hydrocephalus
3317	Cerebral degeneration in diseases classified elsewhere
33181	Reye’s syndrome
33182	Dementia with lewy bodies
3319	Cerebral degeneration, unspecified
33392	Neuroleptic malignant syndrome
340	Multiple sclerosis
34501	Generalized nonconvulsive epilepsy, with intractable epilepsy
34510	Generalized convulsive epilepsy, without mention of intractable epilepsy
34511	Generalized convulsive epilepsy, with intractable epilepsy
3452	Petit mal status, epileptic
3453	Grand mal status, epileptic
34540	Partial epilepsy, without mention of intractable epilepsy
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, with intractable epilepsy
34550	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, without mention of intractable epilepsy
34551	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, with intractable epilepsy
34560	Infantile spasms, without mention of intractable epilepsy
34561	Infantile spasms, with intractable epilepsy
34570	Epilepsia partialis continua, without mention of intractable epilepsy
34571	Epilepsia partialis continua, with intractable epilepsy
34580	Other forms of epilepsy and recurrent seizures, without mention of intractable epilepsy
34581	Other forms of epilepsy and recurrent seizures, with intractable epilepsy
34590	Epilepsy, unspecified, without mention of intractable epilepsy

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
34591	Epilepsy, unspecified, with intractable epilepsy
3480	Cerebral cysts
3481	Anoxic brain damage
34830	Encephalopathy, unspecified
34831	Metabolic encephalopathy
34839	Other encephalopathy
430	Subarachnoid hemorrhage
431	Intracerebral hemorrhage
43300	Occlusion and stenosis of basilar artery without mention of cerebral infarction
43301	Occlusion and stenosis of basilar artery with cerebral infarction
43311	Occlusion and stenosis of carotid artery with cerebral infarction
43321	Occlusion and stenosis of vertebral artery with cerebral infarction
43331	Occlusion and stenosis of multiple and bilateral precerebral arteries with cerebral infarction
43381	Occlusion and stenosis of other specified precerebral artery with cerebral infarction
43391	Occlusion and stenosis of unspecified precerebral artery with cerebral infarction
43401	Cerebral thrombosis with cerebral infarction
43411	Cerebral embolism with cerebral infarction
43491	Cerebral artery occlusion, unspecified with cerebral infarction
4350	Basilar artery syndrome
4351	Vertebral artery syndrome
4352	Subclavian steal syndrome
4353	Vertebrobasilar artery syndrome
4358	Other specified transient cerebral ischemias
4359	Unspecified transient cerebral ischemia
436	Acute, but ill-defined, cerebrovascular disease
4370	Cerebral atherosclerosis
4371	Other generalized ischemic cerebrovascular disease
4372	Hypertensive encephalopathy
4373	Cerebral aneurysm, nonruptured
4374	Cerebral arteritis

Diagnosis Code	Description
4375	Moyamoya disease
4376	Nonpyogenic thrombosis of intracranial venous sinus
4377	Transient global amnesia
4378	Other ill-defined cerebrovascular disease
4379	Unspecified cerebrovascular disease
4380	Cognitive deficits
43811	Aphasia
43812	Dysphasia
43819	Other speech and language deficits
43820	Hemiplegia affecting unspecified side
43821	Hemiplegia affecting dominant side
43822	Hemiplegia affecting nondominant side
43830	Monoplegia of upper limb affecting unspecified side
43831	Monoplegia of upper limb affecting dominant side
43832	Monoplegia of upper limb affecting nondominant side
43840	Monoplegia of lower limb affecting unspecified side
43841	Monoplegia of lower limb affecting dominant side
43842	Monoplegia of lower limb affecting nondominant side
43850	Other paralytic syndrome affecting unspecified side
43851	Other paralytic syndrome affecting dominant side
43852	Other paralytic syndrome affecting nondominant side
43853	Other paralytic syndrome, bilateral
43881	Apraxia
43882	Dysphagia
43883	Facial weakness
43884	Ataxia
43885	Vertigo
43889	Other late effects of cerebrovascular disease
4389	Unspecified late effects of cerebrovascular disease
7685	Severe birth asphyxia
7686	Mild or moderate birth asphyxia
77210	Intraventricular hemorrhage unspecified grade

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
77211	Intraventricular hemorrhage grade I
77212	Intraventricular hemorrhage grade II
77213	Intraventricular hemorrhage grade III
77214	Intraventricular hemorrhage grade IV
7722	Subarachnoid hemorrhage of newborn
7790	Convulsions in newborn
78031	Febrile convulsions (simple), unspecified
78039	Other convulsions
7990	Asphyxia and hypoxemia
8500	Concussion with no loss of consciousness
85011	Concussion, with loss of consciousness of 30 minutes or less
85012	Concussion, with loss of consciousness from 31 to 59 minutes
8502	Concussion with moderate loss of consciousness
8503	Concussion with prolonged loss of consciousness and return to pre-existing conscious level
8504	Concussion with prolonged loss of consciousness, without return to pre-existing conscious level
8505	Concussion with loss of consciousness of unspecified duration
8509	Concussion, unspecified
85100	Cortex (cerebral) contusion without mention of open intracranial wound, state of consciousness unspecified
85101	Cortex (cerebral) contusion without mention of open intracranial wound, with no loss of consciousness
85102	Cortex (cerebral) contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85103	Cortex (cerebral) contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85104	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85105	Cortex (cerebral) contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85106	Cortex (cerebral) contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85109	Cortex (cerebral) contusion without mention of open intracranial wound, with concussion, unspecified
85110	Cortex (cerebral) contusion with open intracranial wound, without mention of specific state of consciousness
85111	Cortex (cerebral) contusion with open intracranial wound, with no loss of consciousness
85112	Cortex (cerebral) contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85113	Cortex (cerebral) contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85114	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85115	Cortex (cerebral) contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85116	Cortex (cerebral) contusion with open intracranial wound, with loss of consciousness of unspecified duration
85120	Cortex (cerebral) laceration without mention of open intracranial wound, with state of consciousness unspecified
85121	Cortex (cerebral) laceration without mention of open intracranial wound, with no loss of consciousness
85122	Cortex (cerebral) laceration without mention of open intracranial wound, with brief (less than one hour) loss of consciousness

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85123	Cortex (cerebral) laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85124	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85125	Cortex (cerebral) laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85126	Cortex (cerebral) laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85129	Cortex (cerebral) laceration without mention of open intracranial wound, with concussion, unspecified
85130	Cortex (cerebral) laceration with open intracranial wound, with state of consciousness unspecified
85131	Cortex (cerebral) laceration with open intracranial wound, with no loss of consciousness
85132	Cortex (cerebral) laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85133	Cortex (cerebral) laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85134	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85135	Cortex (cerebral) laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85136	Cortex (cerebral) laceration with open intracranial wound, with loss of consciousness of unspecified duration
85139	Cortex (cerebral) laceration with open intracranial wound, with concussion, unspecified

Diagnosis Code	Description
85140	Cerebellar or brain stem contusion without mention of open intracranial wound, with state of consciousness unspecified
85141	Cerebellar or brain stem contusion without mention of open intracranial wound, with no loss of consciousness
85142	Cerebellar or brain stem contusion without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85143	Cerebellar or brain stem contusion without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85144	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss consciousness and return to pre-existing conscious level
85145	Cerebellar or brain stem contusion without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85146	Cerebellar or brain stem contusion without mention of open intracranial wound, with loss of consciousness of unspecified duration
85149	Cerebellar or brain stem contusion without mention of open intracranial wound, with concussion, unspecified
85150	Cerebellar or brain stem contusion with open intracranial wound, with state of consciousness unspecified
85151	Cerebellar or brain stem contusion with open intracranial wound, with no loss of consciousness
85152	Cerebellar or brain stem contusion with open intracranial wound, with brief (less than one hour) loss of consciousness
85153	Cerebellar or brain stem contusion with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85154	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85155	Cerebellar or brain stem contusion with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85156	Cerebellar or brain stem contusion with open intracranial wound, with loss of consciousness of unspecified duration
85159	Cerebellar or brain stem contusion with open intracranial wound, with concussion, unspecified
85160	Cerebellar or brain stem laceration without mention of open intracranial wound, with state of consciousness unspecified
85161	Cerebellar or brain stem laceration without mention of open intracranial wound, with no loss of consciousness
85162	Cerebellar or brain stem laceration without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85163	Cerebellar or brain stem laceration without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85164	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85165	Cerebellar or brain stem laceration without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85166	Cerebellar or brain stem laceration without mention of open intracranial wound, with loss of consciousness of unspecified duration
85169	Cerebellar or brain stem laceration without mention of open intracranial wound, with concussion, unspecified
85170	Cerebellar or brain stem laceration with open intracranial wound, with state of consciousness unspecified
85171	Cerebellar or brain stem laceration with open intracranial wound, with no loss of consciousness
85172	Cerebellar or brain stem laceration with open intracranial wound, with brief (less than one hour) loss of consciousness
85173	Cerebellar or brain stem laceration with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85174	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85175	Cerebellar or brain stem laceration with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85176	Cerebellar or brain stem laceration with open intracranial wound, with loss of consciousness of unspecified duration
85179	Cerebellar or brain stem laceration with open intracranial wound, with concussion, unspecified
85180	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with state of consciousness unspecified
85181	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with no loss of consciousness
85182	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85183	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85184	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85185	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85186	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85189	Other and unspecified cerebral laceration and contusion, without mention of open intracranial wound, with concussion, unspecified
85190	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with state of consciousness unspecified
85191	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with no loss of consciousness
85192	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with brief (less than one hour) loss of consciousness
85193	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85194	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85195	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85196	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with loss of consciousness of unspecified duration
85199	Other and unspecified cerebral laceration and contusion, with open intracranial wound, with concussion, unspecified
85200	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85201	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness

Diagnosis Code	Description
85202	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85203	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85204	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85205	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85206	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85209	Subarachnoid hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85210	Subarachnoid hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85211	Subarachnoid hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85212	Subarachnoid hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85213	Subarachnoid hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85214	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85215	Subarachnoid hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85216	Subarachnoid hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85219	Subarachnoid hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85220	Subdural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85221	Subdural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85222	Subdural hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85223	Subdural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85224	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85225	Subdural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85226	Subdural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85229	Subdural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85230	Subdural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85231	Subdural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85232	Subdural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85233	Subdural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85234	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85235	Subdural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85236	Subdural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85239	Subdural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85240	Extradural hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85241	Extradural hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85242	Extradural hemorrhage following injury, without mention of open intracranial wound, with brief (less than 1 hour) loss of consciousness
85243	Extradural hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85244	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85245	Extradural hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85246	Extradural hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85249	Extradural hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85250	Extradural hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85251	Extradural hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85252	Extradural hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85253	Extradural hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85254	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85255	Extradural hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85256	Extradural hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration
85259	Extradural hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85300	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with state of consciousness unspecified
85301	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with no loss of consciousness
85302	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85303	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85304	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre- existing conscious level
85305	Other and unspecified intracranial hemorrhage following injury. without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85306	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85309	Other and unspecified intracranial hemorrhage following injury, without mention of open intracranial wound, with concussion, unspecified
85310	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with state of consciousness unspecified
85311	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with no loss of consciousness
85312	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with brief (less than one hour) loss of consciousness
85313	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with moderate (1-24 hours) loss of consciousness
85314	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85315	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85316	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with loss of consciousness of unspecified duration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
85319	Other and unspecified intracranial hemorrhage following injury, with open intracranial wound, with concussion, unspecified
85400	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with state of consciousness unspecified
85401	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with no loss of consciousness
85402	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with brief (less than one hour) loss of consciousness
85403	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with moderate (1-24 hours) loss of consciousness
85404	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness and return to pre-existing conscious level
85405	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with prolonged (more than 24 hours) loss of consciousness, without return to pre-existing conscious level
85406	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with loss of consciousness of unspecified duration
85409	Intracranial injury of other and unspecified nature, without mention of open intracranial wound, with concussion, unspecified
986	Toxic effect of carbon monoxide
9941	Drowning and nonfatal submersion
9947	Asphyxiation and strangulation
V110	Personal history of schizophrenia
V111	Personal history of affective disorders
V112	Personal history of neurosis
V113	Personal history of alcoholism
V170	Family history of psychiatric condition
V401	Mental and behavioral problems with communication (including speech)
V402	Other mental problems
V695	Behavioral insomnia of childhood
V7101	Observation of adult antisocial behavior
V7102	Observation of childhood or adolescent antisocial behavior
V790	Screening for depression
V791	Screening for alcoholism
V792	Screening for mental retardation
V793	Screening for developmental handicaps in early childhood
V798	Screening for other specified mental disorders and developmental handicaps

All claims for psychiatric procedure codes 1-90845, 1-90847, 1-90853, and 1-90857 referenced to the following diagnoses must include documentation that supports medical necessity.

Procedure code 1-90801 billed with the following diagnoses does not require documentation:

Diagnosis Code	Description
2940	Amnestic syndrome
29410	Dementia in condition classified elsewhere without behavioral disturbance
29411	Dementia in condition classified elsewhere with behavioral disturbance
2948	Organic brain syndrome NEC
2949	Organic brain syndrome NOS

Psychological testing (procedure code 5-96101) and neuropsychological testing (procedure code 5-96118) are limited to a total of four hours per day and eight hours per calendar year per client for any provider. Providers must maintain documentation in the client's chart that supports the medical necessity for each test.

If the client requires more than four hours of psychological or neuropsychological testing per day or more than eight hours per calendar year, prior authorization is required. Additional documentation must be submitted that supports the medical necessity for the additional hours requested. This includes a record of all of the tests that were previously performed and a complete history that reflects the need for each requested test.

Each hour of examination, therapy, psychological, and/or neuropsychological testing will count toward the 12 hours per day limitation and as one visit/encounter towards the 30 visit/encounter limit.

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure codes 5-96101 and 5-96118 include the testing, interpretation, and report and will not be reimbursed separately. Providers must bill the preponderance of each quarter hour of testing and indicate that number of units on the claim form. Document the number of hours in Block 24G of the CMS-1500 claim form.

Procedure code 5-96118 will be denied when billed on the same day as procedure code 5-96101 by any provider.

Procedure code 5-96101 or 5-96118 is payable on the same day as procedure code 1-90801 or 1-90802.

The following is a list of psychiatric-related procedure codes:

Procedure Codes				
1-90801	1-90802	1-90804	1-90805	1-90806
1-90807	1-90808	1-90809	1-90810	1-90811
1-90812	1-90813	1-90814	1-90815	1-90816
1-90816	1-90817	1-90818	1-90819	1-90821
1-90822	1-90823	1-90824	1-90826	1-90827
1-90828	1-90829	1-90845	1-90847	1-90853

1-96101				

38.3.2 Outpatient Behavioral Health Services

An interactive interview (procedure code 1-90802) may be covered to the extent it is medically necessary. Examples of medical necessity include, but are not limited to:

- Clients whose ability to communicate is impaired by an expressive or receptive language impairment from various causes, such as conductive or sensorineural hearing loss, deaf mutism, or aphasia.
- A diagnostic interview may be incorporated into an evaluation and management (E/M) service provided the required elements of the E/M service are fulfilled.
- A diagnostic interview examination (procedure codes 1-90801, 1-90802) will be denied as part of any E/M service when billed for the same date of service by the same provider.

Documentation for diagnostic interview examinations must include:

- Reason for referral/presenting problem
- Prior history, including prior treatment
- Other pertinent medical, social, and family history
- Clinical observations and mental status examinations
- Complete *Diagnostic and Statistical Manual of Mental Disorders - Fourth Edition* (DSM-IV) diagnosis
- Recommendations, including expected long term and short term benefits
- For the interactive diagnostic interview (procedure code 1-90802), the medical record must indicate the adaptations utilized in the session and the rationale for employing these interactive techniques

38.3.3 Therapy

When multiple counseling codes are billed by the same provider on the same day, only the most inclusive code will be paid.

If procedure code 1-90802 and 1-90801 are billed on the same day by the same provider, 1-90802 will be denied as part of another procedure billed on the same day. Procedure codes 1-90801 and 1-90802 are limited to once per day per client by any provider, regardless of the number of professionals involved in the interview, and once per year per provider (same provider) in any setting.

If procedure code 1-90801 or 1-90802 is billed, the following procedure codes will be denied as part of the initial psychiatric exam if billed on the same day by the same provider:

Procedure Codes				
1-90804	1-90806	1 90808	1-90810	1-90812
1-90814	1-90816	1 90818	1-90821	1-90823
1-90826	1-90828	1-90845	1-90847	1 90853
1-90857				

Procedure codes 1-90846 and 1-90849 are *not* reimbursed by the Texas Medicaid Program. Outpatient psychotherapy (procedure codes 1-90804, 1-90847, 1-90853, and 1-90857) billed on the same date of service as narcosynthesis (procedure code 1-90865) or psychoanalysis (procedure code 1-90845) will be denied.

When billing or providing procedure code 1-90847, note the following requirements for Medicaid reimbursement:

- The client must be present when family therapy/ counseling services are provided.
- Family therapy/counseling is only reimbursable for one family member per session.

Counseling billed by a licensed psychologist must be billed using the following procedure codes:

Procedure Codes				
1-90801	1-90802	1-90804	1 90806	1 90808
1-90810	1-90812	1-90814	1-90847	1-90853
1-90857				

Psychoanalysis must be billed using procedure code 1-90845.

Counseling will be denied if any of the procedure codes in the table below are billed on the same day as procedure code 1-90845.

Procedure Codes				
1 90804	1-90806	1-90808	1-90810	1-90812
1 90814	1-90816	1-90818	1-90821	1-90823
1 90826	1-90828	1-90847	1-90853	1-90857

When individual, group, or family counseling is billed by any provider on the same day, each type of session will be paid. When multiples of each type of session are billed, the most inclusive will be paid and the others will be denied.

CPT only copyright 2005 American Medical Association. All rights reserved.

When billing for contracted therapy services provided to Medicaid clients who are younger than 21 years of age and reside in a residential treatment facility, use place of service (POS) 9 (other location).

According to the definition of "family" provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in supervision and care of Temporary Assistance for Needy Families. The following specific relatives are included in family counseling services:

- Father or mother
- Grandfather or grandmother
- Brother or sister
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

The following psychiatric services are not covered by the Texas Medicaid Program (except where specifically indicated in other sections):

- Services provided by an LCDC, psychiatric nurse, mental health worker, or psychologist assistant
- Thermogenic therapy, recreational therapy, psychiatric daycare, and biofeedback, music or dance therapy
- Hypnosis
- Adult activity and individual activity (these types of services would be payable only if guidelines of group therapy are met and are termed group therapy)

Procedure codes 1-90846 and 1-90849 are not covered benefits for Texas Medicaid for any provider.

38.4 Documentation Requirements

Services not supported by required documentation in the client's record and medical necessity will be subject to recoupment.

Each client for whom services are billed must have the following documentation (which meets the standards indicated) included in their record:

- All entries are clearly documented and legible to individuals other than the author, date (month/day/year), and signed by the performing provider.
- Notations of the beginning and ending session times for counseling and/or each test administered.
- All pertinent information regarding the client's condition to substantiate the need for services, including but not limited to the following:
  - Name of test(s) (e.g., Wechsler Adult Intelligence Scale–Revised [WAIS-R], Rorschach, Minnesota Multiphasic Personality Inventory [MMPI])
  - Background and history of client and reason for testing
  - Behavioral observations during the session
  - Narrative description of the counseling session or test findings
  - Diagnosis (symptoms, impressions)
  - Treatment plan and recommendations
  - Explanation to substantiate the necessity of retesting, if applicable

38.5 Claims Information

Services provided by an independently practicing licensed psychologist must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice; TMHP does not supply them.

Providers must bill Medicare before Medicaid. Medicaid's responsibility for the coinsurance and/or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client's Medicare card for Part B coverage before billing the Texas Medicaid Program. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare. The Texas Medicaid Program is responsible for the coinsurance and deductible of Medicare-allowed services on a crossover basis only.

Refer to: "Part B" on page 2-8.

"Medicare Part B Crossovers" on page 4-12.

38.5.1 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
Psychiatric Hospital Inpatient Admission Form	B-74
Request for Extended Outpatient Psychotherapy/Counseling Form	B-81
Psychologist Claim Example	D-28
Acronym Dictionary	F-1

39.1 Enrollment

To enroll in the Texas Medicaid Program, radiological and physiological laboratories and portable X-ray suppliers must be enrolled in Medicare. Both radiological and physiological laboratories must be directed by a physician.

All mammography providers, including those providing stereotactic biopsies, must be certified by the Bureau of Radiation Control (BRC). Providers must submit a certificate containing their BRC certification number, dates of issue and expiration, type of service, and Medicaid and Children with Special Health Care Needs (CSHCN) Services Program provider identifiers. For more information, contact TMHP Provider Enrollment:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
Fax: 1-512-514-4214

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

39.1.1 Medicaid Managed Care Enrollment

Radiological, physiological laboratory, and portable X-ray suppliers may be eligible to enroll in the Medicaid Managed Care programs as primary care providers. Certain providers may be required to enroll with a Medicaid Managed Care health plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plan for enrollment information.

Refer to: "Managed Care" on page 7-1

39.2 Reimbursement

The Medicaid rates for radiological and physiological laboratory and portable X-ray supplier providers are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8081 and §355.8085. The applicable Medicaid rates are listed in the current physician fee schedule, which is available on the TMHP website. These services are *not* payable when the client is in an inpatient setting, as they are included in the diagnosis related group (DRG) payment.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

39.3 Benefits and Limitations

Medicaid pays only up to the amount allowed for the total component for the same procedure, same client, same date of service, and any provider. Providers who perform the technical service and interpretation must bill for the total component. Providers who perform only the technical service must bill for the technical component; those who perform only the interpretation must bill for the interpretation component. Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, and any provider are denied. Claims are paid based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical and/or interpretation component for the same procedure, same date of service, same client, and any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components.

The following procedure codes are payable to radiological laboratories, physiological laboratories, and portable X-ray suppliers.

Descriptions of the following procedure codes can be found in the *Physician's Common Procedural Terminology* (CPT) Manual:

5/I/T-95958		

39.3.1 Magnetic Resonance Angiography (MRA)

MRA is a technique which allows the noninvasive visualization and study of blood vessels through either two-dimensional (2-D) or three-dimensional (3-D) image reconstruction. The advantages of this noninvasive radiologic test include its safety, large field of view, and the ability to demonstrate complicated 3-D relationships without the need for nephrotoxic contrast media.

MRA of the head and neck may be considered for reimbursement when indicated and utilized for the visualization and ruling out of cerebrovascular disease, subarachnoid and intracerebral hemorrhage, and occlusion and stenosis of intracranial vessels. Procedure codes 4/I/T-70544, 4/I/T-70545, 4/I/T-70546, 4/I/T-70547, 4/I/T-70548, and 4/I/T-70549 will be denied for all other diagnoses.

The following procedure codes are a benefit of the Texas Medicaid Program:

Procedure Codes		
4/I/T-70544	4/I/T-70545	4/I/T-70546
4/I/T-70547	4/I/T-70548	4/I/T-70549
4/I/T-71555	4/I/T-72159	4/I/T-72198
4/I/T-73225	4/I/T-74185	

MRA of the chest (procedure code 4/I/T-71555) may be indicated and considered for reimbursement for the evaluation of coronary artery disease or anomalous arterio-pulmonary systems. It may be utilized to identify thoracic aneurysms or pulmonary emboli in cases where contrast material is contraindicated. MRAs are also indicated to evaluate the coronary vessels in coronary artery disease, vasculitis, or vessel patency postoperatively.

MRA of the abdomen (procedure code 4/I/T-74185) may be considered for reimbursement when indicated to assess the main renal arteries, for the evaluation of renal artery stenosis, abdominal aortic aneurysm or dissection, and/or associated veno-occlusive disease.

MRA of the pelvis (procedure code 4/I/T-72198) may be considered for reimbursement for evaluation of pelvic arteries for stenosis and the detection, grading, and differentiation of renovascular disease.

MRA of the lower extremities (procedure code (procedure code 4/I/T-73725) may be considered for reimbursement when indicated for the evaluation of peripheral vascular disease related to the lower extremities, such as hemangioma, atherosclerosis, arterial embolism and thrombosis, and arterial anomalies.

39.3.2 Magnetic Resonance Imaging (MRI)

MRI is a noninvasive nuclear procedure for imaging tissues of high fat and water content, which are poorly seen with other radiologic techniques. MRI is a covered benefit of the Medicaid Program when medically indicated.

When a computerized axial tomography (CAT) scan and an MRI of the *same* body area are performed on the same day, the CAT scan will be paid and the MRI will be denied as part of an overlapping diagnostic procedure. Additional MRIs or CAT scans of entirely different body areas performed on the same day will be paid with documentation of medical necessity.

MRI procedures that specify "with contrast" include payment for paramagnetic contrast, therefore, low osmolar contrast material is not reimbursed separately.

MRI of the breast (procedure codes 4/I/T-76093 and 4/I/T-76094) will be reimbursed by the Texas Medicaid program, when billed for the following diagnosis codes:

Diagnosis Code	Description
99654	Mechanical complication of breast prosthesis
99669	Infection and inflammatory reaction due to other internal prosthetic device, implant, and graft
99679	Other complications due to other internal prosthetic device, implant, and graft

Procedure codes 4/I/T-76093 and 4/I/T-76094 will be denied for all other diagnoses.

A freestanding MRI facility may bill type of service (TOS) T for the technical portion only. The radiologist or neurologist who then reads the MRI may bill using TOS I for

CPT only copyright 2005 American Medical Association. All rights reserved.

interpretation only. Additionally, when the client is in the inpatient or outpatient setting, the radiologist or neurologist may bill using TOS I for interpretation.

Refer to: "Hospital (Medical/Surgical Acute Care Facility)" on page 25-1.
"Physician" on page 36-1 for more information on MRI and contrast material.

39.3.3 Positron-Emission Tomography (PET) Scans

A PET scan is a noninvasive nuclear medicine procedure that images the chemical activity of body organs and tissues. The PET scan uses electronic detection of short-lived positron-emitting radiopharmaceuticals to measure metabolic, biochemical, and functional activity in tissue. A scanner then measures radioactivity as it is dispersed throughout the body, creating three-dimensional pictures of tissue function.

The following procedure codes are a benefit of the Texas Medicaid Program. Prior authorization is required with documentation of medical necessity.

Procedure Codes		
4/I/T-78608	4/I/T-78609	4/I/T-78811
4/I/T-78812	4/I/T-78813	4/I/T-78814
4/I/T-78815	4/I/T-78816	

39.3.3.1 Brain Imaging

Brain imaging PET scans are a benefit when either of the following is true:

- "When used as part of a pre-surgical evaluation to localize a focus of refractory seizure activity with documentation of a history of seizures that are not controlled through medications"
- "When differentiating recurrent brain tumors from scar tissue with documentation of a history of a primary brain tumor and a plan of treatment"

39.3.3.2 Tumor Imaging

Tumor-imaging PET scans are a benefit and are limited to staging and restaging of recurrent tumors in which the PET scan may assist in determining the optimal clinical management of the client.

Procedure codes 78459, 78491, and 78492 are *not* a benefit of the Texas Medicaid Program.

When requesting prior authorization for tumor-imaging PET scans, the provider must submit supporting documentation which indicates that standard imaging was not conclusive and that the provider's rationale for this procedure supports medical necessity.

39.3.4 Computerized Axial Tomography (CAT) Scan

The Texas Medicaid Program pays for CAT scans for specific diagnoses.

When a CAT scan and an MRI of the *same* body area are performed on the same day, the CAT scan will be paid and the MRI will be denied as part of an overlapping diagnostic procedure. Additional MRIs and/or CAT scans of entirely different body areas performed on the same day will be paid with documentation of medical necessity.

Freestanding facilities may bill for CAT scans using TOS T for technical component only. The radiologist or neurologist who then reads the scan bills TOS I for interpretation only.

39.3.5 Prior Authorization for Radiology Services

Traditional Medicaid and PCCM require prior authorization or retrospective authorization for:

- MRI
- MRA
- Computed Tomography Imaging (CT)
- Computed Tomography Angiography (CTA)

Authorization is not required for emergency department or inpatient hospital MRI, MRA, CT, or CTA.

Prior authorization is required for all outpatient nonemergent CT, CTA, MRI, and MRA studies (e.g., those that are preplanned or scheduled) before services are rendered. Retrospective authorization is required for outpatient emergent studies when the physician determines that a medical emergency that imminently threatens life or limb exists, and the medical emergency requires advanced diagnostic imaging (CT, CTA, MRI, or MRA). Additional studies may be conducted at the time of the test if they are medically indicated by the radiologist. Providers must submit a retrospective authorization request no later than seven calendar days after the study has been completed. A copy should be maintained in the client's medical record. If radiology services are ordered by a referring physician who is not a Medicaid-enrolled provider in places of service, such as teaching facilities, federally qualified health care centers, and rural health clinics, the Radiology Prior Authorization Request Form must be signed by the referring physician and must include the group or supervising physician's provider identifier.

The addition of post 3-D reconstruction (procedure codes 4/I/T-76376 and 4/I/T-76377) CT and MR studies must be prior authorized. No additional payment will be made without prior authorization.

Providers and facilities are required to use the lowest possible radiation dose that is consistent with acceptable image quality for CT examinations of children. It is recommended that providers and facilities utilize national standards for CT imaging, such as those in the *Practice Guidelines for Performing and Interpreting Diagnostic CT examinations*, which was created by the American College of Radiology.

CPT only copyright 2005 American Medical Association. All rights reserved.

Nationally-accepted guidelines and radiology protocols that are based on medical literature are utilized in the authorization processes for both emergent and nonemergent studies.

The medical literature includes the works of the: American College of Radiology (specifically, the Appropriateness Criteria), American Academy of Neurology, American Academy of Orthopedic Surgeons, American College of Cardiology, American Heart Association, and National Comprehensive Cancer Care Network.

Prior authorization of nonemergent and emergent retrospective authorization of CT, CTA, MRI, and MRA studies are considered on an individual basis using standard evidence-based guidelines to evaluate the request. Documentation must support medical necessity for the study.

Providers may request prior or retrospective authorization by calling the TMHP Radiology Services Prior Authorization Line at 1-800-572-2116, by fax to 1-888-693-3210, or by mail to:

Texas Medicaid & Healthcare Partnership
730 Cool Springs Blvd, Suite 800
Franklin, TN 37067

Please be prepared to provide the following patient information for all requests:

- Diagnosis
- Treatment history
- Treatment plan
- Medications
- Previous imaging results

Providers may be requested to provide additional documentation. Requests that are faxed or mailed must be accompanied by a Radiology Prior Authorization Form. The Radiology Prior Authorization Form must be completed, signed, and dated by the ordering physician before submitting the request for authorization of CT, CTA, MRI, or MRA studies, regardless of the method of request for authorization. The physician's signature must be current, unaltered, original, and handwritten. A computerized or stamped signature will not be accepted. The physician who ordered the test(s) must keep the completed form with original signature in the client's medical record. In addition, medical record documentation must support the medical necessity of the study. Authorization requirements for both nonemergent and emergent studies must be met in order to be considered for reimbursement. In the absence of authorization, both the technical and professional interpretation components will be denied.

Claims for emergency CT, CTA, MRI, and MRA studies provided in the emergency department must be submitted with modifier U6 and must have the appropriate corresponding emergency services revenue code.

If two CTs, CTAs, MRAs, or MRIs are performed in the emergency room or in an out patient setting on the same day without an authorization on file, the second procedure will be denied. Providers may submit additional medical necessity documentation for payment reconsideration.

The following procedure codes require authorization:

39.3.6 Cardiac Blood Pool Imaging

Cardiac blood pool imaging (procedure codes 4/I/T-78472, 4/I/T-78473, 4/I/T-78481, 4/I/T-78483, 4/I/T-78494, and 4/I/T-78496) is a covered benefit for the following diagnosis codes:

Diagnosis Code	Description
3526	Multiple cranial nerve palsies
3940	Mitral stenosis
3941	Rheumatic mitral insufficiency
3942	Mitral stenosis with insufficiency
3949	Other and unspecified mitral valve diseases
3950	Rheumatic aortic stenosis
3951	Rheumatic aortic insufficiency
3952	Rheumatic aortic stenosis with insufficiency
3959	Other and unspecified rheumatic aortic diseases
3960	Mitral valve stenosis and aortic valve stenosis
3961	Mitral valve stenosis and aortic valve insufficiency
3962	Mitral valve insufficiency and aortic valve stenosis
3963	Mitral valve insufficiency and aortic valve insufficiency
3968	Multiple involvement of mitral and aortic valves
3969	Mitral and aortic valve diseases, unspecified
3970	Diseases of tricuspid valve
3971	Rheumatic diseases of pulmonary valve
3979	Rheumatic diseases of endocardium, valve unspecified
41000	Acute myocardial infarction of anterolateral wall, episode of care unspecified
41001	Acute myocardial infarction of anterolateral wall, initial episode of care
41002	Acute myocardial infarction of anterolateral wall, subsequent episode of care
41010	Acute myocardial infarction of other anterior wall, episode of care unspecified
41011	Acute myocardial infarction of other anterior wall, initial episode of care
41012	Acute myocardial infarction of other anterior wall, subsequent episode of care
41020	Acute myocardial infarction of inferolateral wall, episode of care unspecified
41021	Acute myocardial infarction of inferolateral wall, initial episode of care
41022	Acute myocardial infarction of inferolateral wall, subsequent episode of care
41030	Acute myocardial infarction of inferoposterior wall, episode of care unspecified
41031	Acute myocardial infarction of inferoposterior wall, initial episode of care
41032	Acute myocardial infarction of inferoposterior wall, subsequent episode of care
41040	Acute myocardial infarction of other inferior wall, episode of care unspecified
41041	Acute myocardial infarction of other inferior wall, initial episode of care
41042	Acute myocardial infarction of other inferior wall, subsequent episode of care
41050	Acute myocardial infarction of other lateral wall, episode of care unspecified
41051	Acute myocardial infarction of other lateral wall, initial episode of care
41052	Acute myocardial infarction of other lateral wall, subsequent episode of care
41060	True posterior wall infarction, episode of care unspecified
41061	True posterior wall infarction, initial episode of care
41062	True posterior wall infarction, subsequent episode of care
41070	Subendocardial infarction, episode of care unspecified
41071	Subendocardial infarction, initial episode of care
41072	Subendocardial infarction, subsequent episode of care
41080	Acute myocardial infarction of other specified sites, episode of care unspecified
41081	Acute myocardial infarction of other specified sites, initial episode of care

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
41082	Acute myocardial infarction of other specified sites, subsequent episode of care
41090	Acute myocardial infarction of unspecified site, episode of care unspecified
41091	Acute myocardial infarction of unspecified site, initial episode of care
41092	Acute myocardial infarction of unspecified site, subsequent episode of care
4110	Postmyocardial infarction syndrome
4111	Intermediate coronary syndrome
41181	Other acute and subacute forms of ischemic heart disease, acute ischemic heart disease without myocardial infarction
41189	Other acute and subacute forms of ischemic heart disease, other
412	Old myocardial infarction
4130	Angina decubitus
4131	Prinzmetal angina
4139	Other and unspecified angina pectoris
41400	Coronary atherosclerosis of unspecified type of vessel, native or graft
41401	Coronary atherosclerosis of native coronary artery
41402	Coronary atherosclerosis of autol-ogous vein bypass graft
41403	Coronary atherosclerosis of nonau-tologous biological bypass graft
41404	Coronary atherosclerosis of artery bypass graft
41405	Coronary atherosclerosis of unspecified bypass graft
41406	Coronary atherosclerosis of native coronary artery of transplanted hearts
41407	Coronary atherosclerosis, of bypass graft (artery) (vein) of trans-planted heart
41410	Aneurysm of heart (wall)
41411	Aneurysm of coronary vessels
41412	Dissection of coronary artery
41419	Other aneurysm of heart
4148	Other specified forms of chronic ischemic heart disease

Diagnosis Code	Description
4149	Chronic ischemic heart disease, unspecified
4150	Acute cor pulmonale
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases
4169	Chronic pulmonary heart disease, unspecified
4170	Arteriovenous fistula of pulmonary vessels
4171	Aneurysm of pulmonary artery
4178	Other specified diseases of pulmonary circulation
4179	Unspecified disease of pulmonary circulation
4200	Acute pericarditis in diseases classified elsewhere
42090	Acute pericarditis, unspecified
42091	Acute idiopathic pericarditis
42099	Other acute pericarditis
4210	Acute and subacute bacterial endocarditis
4211	Acute and subacute infective endocarditis in diseases classified elsewhere
4219	Acute endocarditis, unspecified
4220	Acute myocarditis in diseases classified elsewhere
42290	Acute myocarditis, unspecified
42291	Idiopathic myocarditis
42292	Septic myocarditis
42293	Toxic myocarditis
42299	Other acute myocarditis
4230	Hemopericardium
4231	Adhesive pericarditis
4232	Constrictive pericarditis
4238	Other specified diseases of pericardium
4239	Unspecified disease of pericardium
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4243	Pulmonary valve disorders
42490	Endocarditis, valve unspecified, unspecified cause
42491	Endocarditis in diseases classified elsewhere
42499	Other endocarditis, valve unspecified
4250	Endomyocardial fibrosis
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4255	Alcoholic cardiomyopathy
4257	Nutritional and metabolic cardiomyopathy
4258	Cardiomyopathy in other diseases classified elsewhere
4259	Secondary cardiomyopathy, unspecified
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) ii atrioventricular block
42613	Other second degree atrioven-tricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42652	Right bundle branch block and left anterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-ganong-levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42741	Ventricular fibrillation
42742	Ventricular flutter
4275	Cardiac arrest
42760	Premature beats, unspecified
42761	Supraventricular premature beats
42769	Other premature beats
42781	Sinoatrial node dysfunction
42789	Other specified cardiac dysrhythmias
4279	Cardiac dysrhythmia, unspecified
4280	Congestive heart failure
4281	Left heart failure
42820	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
4290	Myocarditis, unspecified
4291	Myocardial degeneration
4292	Cardiovascular disease, unspecified
4293	Cardiomegaly
4294	Functional disturbances following cardiac surgery
4295	Rupture of chordae tendineae
4296	Rupture of papillary muscle
42971	Certain sequelae of myocardial infarction, not elsewhere classified, acquired cardiac septal defect

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
42979	Certain sequelae of myocardial infarction, not elsewhere classified, other
42981	Other disorders of papillary muscle
42982	Hyperkinetic heart disease
42989	Other ill-defined heart diseases
4299	Heart disease, unspecified
7813	Lack of coordination
78650	Unspecified chest pain
78651	Precordial pain
78652	Painful respiration
78659	Other chest pain
7991	Respiratory arrest
V4321	Organ or tissue replaced by other means, heart assist device
V4581	Postsurgical aortocoronary bypass status

39.3.7 Myocardial Perfusion Imaging

Myocardial perfusion imaging, which uses radionuclides, is a noninvasive stress test that measures coronary blood flow (perfusion), especially to the left ventricle.

Myocardial perfusion imaging is a covered benefit of the Texas Medicaid Program when it is medically indicated.

Myocardial perfusion imaging studies will be limited to one study per day, including, but not limited to, the following procedure codes: 4/I/T-78460, 4/I/T-78461, 4/I/T-78464, and 4/I/T-78465.

When multiple procedure codes are billed, the most inclusive code will be paid and all other codes will be denied.

Myocardial perfusion imaging may be performed at rest and/or during stress using physical exercise or pharmacologicals. The following procedure codes may be used to bill for cardiovascular stress testing: 5-93015, T-93017, and I-93018.

39.3.8 Ambulatory Electroencephalogram

Epilepsy is a clinical diagnosis which, in the overwhelming majority of cases, can be characterized with a standard electroencephalogram, a detailed history, a detailed physical examination that includes a comprehensive neurological examination, and an accurate description of the patient's epileptic phenomenon (because a positive interictal pattern of the EEG does not confirm the diagnosis beyond doubt).

There are some studies that show an advantage for intensive ambulatory electroencephalographic (A/EEG) monitoring in some cases where it has not been possible to confirm or support a diagnosis of epilepsy or to confirm or support the differential diagnosis of epilepsy from pseudoconvulsive episodes associated with transient cerebral ischemia from variable causes other than epilepsy.

A/EEG testing is a benefit of the Texas Medicaid Program. A 24-hour A/EEG may be covered for clients in whom:

- A seizure diathesis is suspected but is not defined by history, physical examinations, or resting EEG.
- Syncope or transient ischemic attacks have not been explained by conventional studies.

The monitoring unit is 24 hours. Benefits are limited to two units for each physician for the same patient per six months when it is medically necessary.

A/EEG should be billed using procedure codes 5/I/T-95950, 5/I/T-95951, 5/I/T-95953, or 5/I/T-95956.

Procedure codes 5/I/T-95950, 5/I/T-95951, 5/I/T-95953, and 5/I/T-95956 are related codes. If multiple procedure codes are billed on the same day, the most inclusive code will be paid, and all other codes will be denied.

Procedure codes 4/I/T-95950, 4/I/T-95951, 4/I/T-95953, and 4/I/T-95956 are automatically payable when billed with the following International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) codes or their equivalent narrative description listed below.

Request for payment of codes 4/I/T-95950, 4/I/T-95951, 4/I/T-95953, and 4/I/T-95956 in any place of service without the enumerated ICD-9-CM codes or their equivalent narrative description will be denied as an inappropriate service for the diagnosis. Upon appeal to the associate medical director, codes 4/I/T-95950, 4/I/T-95951, 4/I/T-95953, and 4/I/T-95956 may be paid with other related procedure codes when the submitted documentation establishes the medical necessity of the service.

Diagnosis Code	Description
2390	Delirium due to conditions classified elsewhere
2948	Other persistent mental disorders due to conditions classified elsewhere
3332	Myoclonus
34500	Generalized nonconvulsive epilepsy, without mention of intractable epilepsy
34501	Generalized nonconvulsive epilepsy, with intractable epilepsy
34510	Generalized convulsive epilepsy, without mention of intractable epilepsy
34511	Generalized convulsive epilepsy, with intractable epilepsy
3452	Petit mal status, epileptic
3453	Grand mal status, epileptic

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
34540	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, without mention of intractable epilepsy
34541	Localization-related (focal) (partial) epilepsy and epileptic syndromes with complex partial seizures, with intractable epilepsy
34550	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, without mention of intractable epilepsy
34551	Localization-related (focal) (partial) epilepsy and epileptic syndromes with simple partial seizures, with intractable epilepsy
34560	Infantile spasms, without mention of intractable epilepsy
34561	Infantile spasms, with intractable epilepsy
34570	Epilepsia partialis continua, without mention of intractable epilepsy
34571	Epilepsia partialis continua, with intractable epilepsy
34580	Other forms of epilepsy and recurrent seizures, without mention of intractable epilepsy
34581	Other forms of epilepsy and recurrent seizures, with intractable epilepsy
34590	Epilepsy, unspecified, without mention of intractable epilepsy
34591	Epilepsy, unspecified, with intractable epilepsy

39.3.9 Diagnosis Requirements for Other Services

A diagnosis is not required with a provider's request for payment except when providing the following services: ambulatory electroencephalograms (A/EEGs), arteriograms, cardiac blood pool imaging, chest X-rays, CAT scans, echography, electrocardiograms (EKGs), magnetic resonance angiographies (MRAs), MRIs, mammographies, noninvasive diagnostic studies, polysomnographies, and venographies.

Claims for all services provided to clients eligible for "Emergency Care Only" *must* have a diagnosis to be considered for reimbursement. As with all procedures billed to the Texas Medicaid Program, most baseline screening or comparison studies are not a benefit.

Refer to: "Physician" on page 36-1 for more information about these services.

39.3.10 Radiation Therapy

Radiation treatment management will be considered for reimbursement as defined in the paragraphs of the CPT Manual under the heading of "Radiation Treatment Management." Radiation treatment management is reported in units of five fractions or treatment sessions, regardless of the actual time period in which the services are furnished. The services need not be furnished on consecutive days. Multiple fractions representing two or more treatment sessions furnished on the same day may be counted separately as long as there has been a distinct break in therapy sessions, and the fractions are of the character usually furnished on different days. Procedure code 6-77427 is also reported if there are three or four fractions beyond a multiple of five at the end of a course of treatment; one or two fractions beyond a multiple of five at the end of a course of treatment are not reported separately. The professional services furnished during treatment management typically consists of:

- Review of port films
- Review of dosimetry, dose delivery, and treatment parameters
- Review of patient treatment set-up
- Examination of patient for medical evaluation and management (e.g., assessment of the patient's response to treatment, coordination of care and treatment, review of imaging and/or lab test results)

39.3.11 Stereotactic Radiosurgery

Stereotactic radiosurgery is a system used to verify tumor location with precise mapping using live radiographic images throughout the procedure. The linear accelerator attached to a robotic arm delivers multiple, highly focused radiation beams. This high dose radiation can treat multiple sites at one treatment session. A multidisciplinary team consisting of a neurosurgeon, a radiation oncologist, and a radiation physicist accomplishes treatment with the patient as the central focus. Stereotactic radiosurgery is a benefit of the Texas Medicaid Program.

Procedure codes 6/I/T-G0338, T-G0339, and T-G0340 may be considered for reimbursement.

Physicians, radiation treatment centers, and outpatient facilities may bill the technical component only for procedure codes T-G0339 and T-G0340 in either the office (POS 1) or outpatient setting (POS 5) for stereotactic radiosurgery therapeutic delivery sessions.

The professional component (TOS I) and the technical component (TOS T) are not reimbursed when billed with the total component (TOS 6). The total component includes the professional and the technical components.

The professional component (TOS I) is payable for services that are rendered in an inpatient hospital (POS 3), a radiation treatment center (POS 5), or an outpatient hospital (POS 5). Physicians who bill for client services that are rendered in a facility recognized by

CPT only copyright 2005 American Medical Association. All rights reserved.

Medicaid as a radiation treatment center (POS 1) or in their offices (POS 1) will be reimbursed for the total component (TOS 6).

Prior authorization requirements for stereotactic radiosurgery may include, but are not limited to, diagnoses that indicate one of the following medical conditions:

- Benign and malignant tumors of the central nervous system
- Vascular malformations
- Soft tissue tumors in the chest, abdomen, and pelvis
- Other diagnoses may be considered after a review of the documentation of medical necessity and a review of current literature that supports the requested use (e.g., trigeminal neuralgia)

The following documentation must be submitted to request prior authorization for stereotactic radiosurgery services:

- A brief history and physical evaluation
- Description of tumor types, sizes, and locations
- Supporting documentation of medical necessity
- ICD-9-CM diagnosis codes
- The physician's provider identifier
- The name and address of the facility where services will be performed

39.3.11.1 Radiation Treatment Planning

The following procedure codes are a benefit of the Texas Medicaid Program:

Procedure Codes		
6/I-77261	6/I-77262	6/I-77263
6/I-77280	6/I-77285	6/I-77290
6/I-77295	6/I-77299	6/I/T-77301

Procedure codes 6-77421, 6-77427, and 6-77499 are payable as the total component (TOS 6) for services performed in POS 1 (office or a facility recognized by Medicaid as a radiation treatment center), POS 3 (inpatient hospital), and POS 5 (outpatient hospital or a radiation treatment center).

39.3.11.2 Medical Radiation Physics, Dosimetry, Treatment Devices, Special Services, and Proton Beam Treatment Delivery

The following procedure codes are a benefit of the Texas Medicaid Program:

Procedure Codes		
6/I-77300	6/I-77305	6/I-77310
6/I-77315	6/I-77326	6/I-77327
6/I-77328	6/I-77332	6/I-77333
6/I-77334	6/I-77399	6-77520
6-77522	6-77523	6-77525

39.3.11.3 Clinical Brachytherapy

Brachytherapy (short distance or close treatment) is used to describe the use of radioactive isotopes in the treatment of cancer and benign diseases. Brachytherapy involves placement of radioactive sources, such as “seeds” or wires either in tumors (interstitial implants) or near tumors (intracavitary therapy and mold therapy).

The following procedure codes are a benefit of the Texas Medicaid Program:

Procedure Codes		
2/F-57155	2/F-58346	6/I-77750
6/I-77761	6/I-77762	6/I-77763
6/I-77776	6/I-77777	6/I-77778
6/I-77781	6/I-77782	6/I-77783
6/I-77784	6/I-77789	6/I-77799

39.3.12 Technical Services (Radiation Treatment Delivery/Port Films)

Only the technical component (TOS T) is payable to physicians for the following services when they are rendered in a facility recognized by Medicaid as a radiation treatment center (POS 1) or in the physician's office (POS 1).

Procedure Codes		
T-77401	T-77402	T-77403
T-77404	T-77406	T-77407
T-77408	T-77409	T-77411
T-77412	T-77413	T-77414
T-77416	T-77417	T-77418
T-77421	T-77422	T-77423

39.3.13 Radiation Treatment Centers/ Outpatient Facilities

Radiation treatment centers and outpatient hospitals will be reimbursed only for the technical component (TOS T) for services rendered in POS 5 for the following services:

Procedure Codes		
Radiation Treatment Planning		
T-77280	T-77285	T-77290
T-77295	T-77299	
Medical Radiation Physics, Dosimetry, Treatment Devices and Special Services		
T-77300	T-77305	T-77310
T-77315	T-77326	T-77327
T-77328	T-77332	T-77333
T-77334	T-77399	
Radiation Treatment Delivery/Port Films		
T-77401	T-77402	T-77403
T-77404	T-77406	T-77407

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Codes		
T-77408	T-77409	T-77411
T-77412	T-77413	T-77414
T-77416	T-77417	T-77421
T-77422	T-77423	
Clinical Brachytherapy		
2/F-57155	2/F-58346	T-77781
T-77782	T-77783	T-77784
T-77789	T-77799	

The following clinical brachytherapy services procedure codes include admission to the hospital and daily care. Initial and subsequent hospital care will be denied on the same day that clinical brachytherapy services are billed.

Procedure Codes		
6/I-77750	6/I-77761	6/I-77762
6/I-77763	6/I-77776	6/I-77777
6/I/T-77781	6/I/T-77782	6/I/T-77783
6/I/T-77784	6/I/T-77789	6/I/T-77799

The following services will be allowed once per day, unless an appeal is submitted with documentation that supports the need for the service to be provided more than once:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavity radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization
- Radioisotope therapy

A consultation on the same day as clinical treatment planning and clinical brachytherapy is included in the therapeutic radiology procedure.

Laboratory and diagnostic radiologic services provided in an office (POS 1) will be reimbursed to physicians as a total component. Radiation treatment centers will also be reimbursed for the total component for these services in POS 5. Injectable medications given during the course of therapy in any setting will be reimbursed separately.

Normal follow-up care by the same physician on the day of any therapeutic radiology service will be denied. Medical services within program limitations may be paid on appeal when documentation supports the medical necessity of the visit due to services unrelated to the radiation treatment or radiation treatment complication.

Procedure code 2/8-19298 is a benefit of the Texas Medicaid Program.

No separate payment will be made for any of the following procedure codes provided on the same day as radiation therapy by the same provider:

Procedure Codes		
2-16000	2-16020	2-16025
2/F-16030	2-36425	1-99050
1-99211	1-99212	1-99213
1-99214	1-99215	1-99241
1-99242	1-99243	1-99244
1-99245	1-99183	1-99281
1-99282	1-99283	1-99284
1-99285		

No separate payment will be made for established office or outpatient visits within 90 days after radiation treatment by the same provider.

Procedure Codes		
1-99211	1-99212	1-99213
1-99214	1-99215	1-99281
1-99282	1-99283	1-99284
1-99285		

High energy neutron beam radiation therapy (procedure codes 6/I/T-77422 and 6/I/T-77423) are only payable for the following diagnosis codes:

Diagnosis Code	Description
1420	Malignant neoplasm of parotid gland
1421	Malignant neoplasm of submandibular gland
1422	Malignant neoplasm of sublingual gland
1428	Malignant neoplasm of other major salivary glands
1429	Malignant neoplasm of salivary gland, unspecified

39.4 Claims Information

Submit radiological and physiological laboratory services and portable X-ray supplier services to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them. Providers must identify the referring/ordering provider by full name and address or nine-digit TPI in Block 17 and 17a of the CMS-1500 claim form.

Important: *Electronic billers must submit the referring/ordering TPI within the electronic claim format. Consult your software vendor for location of the field for your software.*

CPT only copyright 2005 American Medical Association. All rights reserved.

40.1 Enrollment

To enroll in the Texas Medicaid Program, a renal dialysis facility must be Medicare-certified in the state where it is located. Facilities must also adhere to the appropriate rules, licensing, and regulations of the state where they operate.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA) of 1988. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: “Provider Enrollment” on page 1-2 for more information.
“Clinical Laboratory Improvement Amendments (CLIA)” on page 26-2.

40.1.1 Medicaid Managed Care Enrollment

Renal dialysis facilities may be eligible to enroll in the Medicaid Managed Care health plans as primary care providers. To be reimbursed for services provided to Medicaid Managed Care clients, renal dialysis facilities must enroll with each Medicaid Managed Care health plan in which their patients are enrolled.

Refer to: “Managed Care” on page 7-1

40.2 Reimbursement

The Medicaid rates for renal dialysis facilities are composite rates based on calculations specified by the Centers for Medicare & Medicaid Services (CMS). The applicable Medicaid rates are listed in the current physician fee schedule, which is available on the TMHP website at www.tmhp.com.

Refer to: “Reimbursement” on page 2-2 for more information about reimbursement.

40.3 Benefits and Limitations

Renal dialysis services are available for Medicaid clients with one of the following diagnoses:

- *Acute renal disease.* A renal disease with a relatively short course, usually correctable.
- *Chronic renal disease (CRD) (end stage renal disease [ESRD]).* A stage of renal disease that requires continuing dialysis or kidney transplantation to maintain life or health.

40.3.1 Renal Dialysis

Medicaid coverage of renal dialysis patients who may have Medicare coverage begins with the original onset date of dialysis treatments and may continue for a period of three months. During this period, TMHP pursues Medicare eligibility through HHSC. If HHSC discovers that the client is Medicare-eligible, Medicaid coverage begins with the original onset date and continues until Medicare coverage begins. If HHSC determines that the client is not eligible for Medicare, Medicaid coverage of eligible clients begins with the original onset date and continues as long as the dialysis treatments are medically necessary, and the client is eligible for Medicaid.

In the case of a client who participates in self-dialysis training before the beginning of the third month, the Medicare waiting period is waived. The waiver is for Medicaid clients who can reasonably be expected to complete the training program and, upon completion, enter a self-dialysis setting.

40.3.2 Kidney Transplants

Medicare coverage of a client who requires a kidney transplant can begin as early as the month in which a patient is hospitalized for transplantation, provided the surgery takes place in that month or in the following two months. Medicare coverage of a client who receives a successful kidney transplant ends with the thirty-sixth month after the transplant. *At that time, Medicaid resumes full coverage of the client's claims for services covered under the Texas Medicaid Program, if the client remains eligible for Texas Medicaid.*

If HHSC verifies that a Medicaid client is not eligible for Medicare coverage of a transplant, the Texas Medicaid Program pays for the transplantation services. Medicaid does not pay for donor expenses. Facility expenses for kidney procurement, tissue matching, or the cost of maintaining a kidney before transplantation are included in the diagnosis related group (DRG) reimbursement.

Medicare benefits for qualified clients include all covered Part A and B items and services. Coverage is not limited to items and services associated with renal disease. *Medicaid coverage of Medicare clients extends to the Medicare deductible and coinsurance.* Medicaid may pay the Medicare deductible and coinsurance for clients who are eligible.

Refer to: “Organ/Tissue Transplants” on page 36-235 and “Organ/Tissue Transplant Services” on page 25-10 for information on organ transplant and facility services.

40.3.3 Facility Services

The facility bills an amount that represents the charge for the facility's service to the dialysis patient. The facility's charge must not include the charge for the physician's routine supervision.

CPT only copyright 2005 American Medical Association. All rights reserved.

40.3.3.1 Facility Revenue Codes

Service	Revenue Code	Description
Maintenance	B-821	Hemodialysis (outpatient/home)–composite
	B-831	Peritoneal Dialysis (outpatient/home)–composite
	B-841	Continuous ambulatory peritoneal dialysis (CAPD) (outpatient/home)–composite
	B-851	continuous cycling peritoneal dialysis (CCPD) (outpatient/home)–composite
Training	B-829	Hemodialysis (outpatient/home)–other
	B-839	Peritoneal Dialysis (outpatient/home)–other
	B-849	CAPD (outpatient/home)–other
	B-859	CCPD (outpatient/home)–other
Support	B-845	CAPD (outpatient/home)–support services
	B-855	CCPD (outpatient/home)–support services

40.3.3.2 Maintenance Hemodialysis

The facility payment applies when a CRD patient receives hemodialysis in an approved renal dialysis facility. Payment is based on the facility's per-treatment composite rate, as calculated by Medicare. Services included in the facility's charge are routine laboratory tests, personnel services, equipment, supplies, and other services associated with the treatment.

For hospitals to be reimbursed for maintenance hemodialysis, they must be enrolled as an approved dialysis facility with the appropriate provider identifier.

40.3.3.3 Maintenance Intermittent Peritoneal Dialysis (IPD)

Maintenance IPD is usually performed in sessions of 10 to 12 hours duration, 3 times per week. However, it is sometimes performed in fewer sessions of longer duration. If more than three sessions occur in one week, the provider must supply documentation of medical necessity with the claim.

40.3.3.4 CAPD and CCPD Support

Support services furnished to maintenance home CAPD/CCPD clients are payable to dialysis facilities. Home dialysis support services must be furnished by the facility in either the home or the facility. Use revenue codes B-845 or B-855 (CAPD and CCPD) when billing such services.

CAPD/CCPD support services include, but are not limited to, the following:

- Changing the connecting tube ("administration set")
- Watching the patient perform CAPD/CCPD, and ensuring that it is done correctly. The observation includes reviewing any aspects of the technique they may have forgotten or informing the patient of modifications in apparatus or technique
- Documenting whether the patient has or had peritonitis that requires physician intervention or patient hospitalization
- Inspecting the catheter site

Routine laboratory services are not included in the support services and are reimbursed separately.

Equipment and supplies are not payable separately.

A client with Medicaid coverage may receive CAPD/CCPD support services furnished by the facility once per month. Charges for support services in excess of once per month must include documentation of medical necessity.

40.3.3.5 Hemodialysis, IPD, CCPD, and CAPD Training

Most self-dialysis training is given in an outpatient setting. While CAPD training itself usually does not justify inpatient status, CAPD training is covered when provided to an inpatient. It is reimbursed at the same rate as the facility's outpatient CAPD training rate. Payment for B-829, B-839, or B-859 consists of the facility's composite rate plus $20 per training session.

A client who is eligible for Medicaid may receive up to 18 days of training. Additional days of CAPD training (B-849) may be paid only when medical necessity is documented. Payment consists of the facility's composite rate plus $12 per training session.

CAPD training services and supplies provided by the dialysis facility include personnel services, parenteral items routinely used in dialysis, training manuals and materials, and routine CAPD laboratory tests.

No frequency limitation is applied to routine laboratory tests during the training period because these tests commonly are given during each day of training. Nonroutine laboratory tests performed during the training period require documentation of medical necessity.

It may be necessary to supplement the patient's dialysis during CAPD training with IPD or hemodialysis because the patient has not mastered the CAPD technique.

Three supplemental dialysis sessions are covered routinely. If more than three sessions are billed during the training, the claims must document the medical necessity.

CPT only copyright 2005 American Medical Association. All rights reserved.

40.3.4 Laboratory and Radiology Services

40.3.4.1 In-Facility Dialysis–Routine Laboratory

Laboratory services may be performed in the CRD facility or by an outside laboratory. Charges for routine laboratory tests performed according to the established frequencies in the following tables are included in the facility's dialysis charge billed to Medicaid regardless of where tests were performed. Routine laboratory services performed by an outside laboratory are billed to the facility.

Per Dialysis

Procedure Codes	
5-85014	5-85345
5-85347	

Per Week

Procedure Codes	
5-82565	5-84520
5-85610	

Per Month

Procedure Codes	
5-82040	5-82310
5-82374	5-82435
5-83615	5-84075
5-84100	5-84132
5-84155	5-84450

The routine tests listed in the tables above are frequently performed as an automated battery of tests such as the SMAC-12. These tests are considered routine and are included in the charge for dialysis, unless there is an additional diagnosis to document medical necessity for performing the tests in excess of the recommended frequencies.

If it is medically necessary to perform a routine laboratory test beyond the established frequency, payment may be made if the test is indicated on the claim form along with documentation of medical necessity.

Refer to: "Laboratory Paneling" on page 26-5 for more information about laboratory paneling procedures.

40.3.4.2 In-Facility Dialysis—Nonroutine Laboratory

The following are considered necessary, nonroutine tests. They must be billed separately from the dialysis charge when performed in the CRD facility or by an outside laboratory that bills the facility for laboratory services. All nonroutine laboratory and radiology tests beyond the recommended frequencies require medical justification.

Procedure code 1-99001 for nonroutine laboratory services may be billed to the Texas Medicaid Program *only* if the specimen is obtained by venipuncture or catheterization and sent to an outside lab. The claim form must document that the handling fee is for nonroutine laboratory services.

Once a Month

Procedure Code
5-87340

Every Three Months

Procedure Code
T-93005

Every Six Months

Procedure Codes	
4-71010	4-71020
5-95900	

Annually

Procedure Code	
4-78300	4-78305
4-78306	

40.3.4.3 Continuous Ambulatory Peritoneal Dialysis

The following laboratory tests are routine for home maintenance CAPD patients when performed according to the indicated frequency. When the patient is dialyzing in the home and is not undergoing IPD or hemodialysis in the facility, payment may be made. The provider must indicate the patient's diagnosis and the type of dialysis on the claim form.

Important: *Tests in excess of this frequency or tests not listed in the tables, require documentation of medical necessity for payment to be made.*

Every Month

Laboratory Tests for Routine Home Maintenance CAPD Patients	
BUN	Total protein
Creatinine	Albumin
Sodium	Alkaline phosphatase
Potassium	LDH
Carbon dioxide	SGOT
Calcium	Hct
Magnesium	Hgb
Phosphate	Dialysate protein

Every Three Months

Laboratory Tests for Routine Home Maintenance CAPD Patients
WBC
RBC
Platelet count

CPT only copyright 2005 American Medical Association. All rights reserved.

Every Six Months

Laboratory Tests for Routine Home Maintenance CAPD Patients	
Residual renal function	Bone mineral density
24-hour urine volume	MNCV
Chest X-ray	Electrocardiogram (EKG)

40.3.4.4 Erythropoietin Alfa (EPO)

Medicaid reimbursement is allowed for EPO injections administered to chronic renal disease patients, chronic end-stage renal disease predialysis patients who have an anemia with a Hematocrit of 36 percent or less, and for patients with HIV infection who are being treated with Retrovir (AZT). Payment is limited to the end-stage renal dialysis facility and the physician in the office. Only three injections are allowed per seven days.

When billing for EPO with a diagnosis of HIV, providers may use diagnosis code 042, Human Immunodeficiency Virus (HIV) disease. The following diagnoses are payable for EPO:

Diagnosis Code	Description
042	Human immunodeficiency virus (HIV) disease
20300	Multiple myeloma, without mention of remission
20301	Multiple myeloma, in remission
23872	Low grade myelodysplastic syndrome lesions
23873	High grade myelodysplastic syndrome lesions
23874	Myelodysplastic syndrome with 5q deletion
23875	Myelodysplastic syndrome, unspecified
23876	Myelofibrosis with myeloid metaplasia
23879	Other lymphatic and hematopoietic tissues
2733	Macroglobulinemia
2800	Iron deficiency anemia secondary to blood loss (chronic)
2801	Iron deficiency anemia secondary to inadequate dietary iron intake
2808	Other specified iron deficiency anemias
2809	Iron deficiency anemia, unspecified
2810	Pernicious anemia
2811	Other vitamin B12 deficiency anemia
2812	Folate-deficiency anemia
2813	Other specified megaloblastic anemias not elsewhere classified
2814	Protein-deficiency anemia
2818	Anemia associated with other specified nutritional deficiency
2819	Unspecified deficiency anemia
2820	Hereditary spherocytosis
2821	Hereditary elliptocytosis
2822	Anemias due to disorders of glutathione metabolism
2823	Other hemolytic anemias due to enzyme deficiency
28241	Sickle-cell thalassemia without crisis
28242	Sickle-cell thalassemia with crisis
28249	Other thalassemia
2825	Sickle-cell trait
2826	Sickle-cell disease
28260	Sickle-cell disease, unspecified
28261	HB-SS disease without crisis
28262	HB-SS disease with crisis
28263	Sickle-cell/HB-C disease without crisis
28264	Sickle-cell/HB-C disease with crisis
28268	Other sickle-cell disease without crisis
28269	Other sickle-cell disease with crisis
2827	Other hemoglobinopathies
2828	Other specified hereditary hemolytic anemias
2829	Hereditary hemolytic anemia, unspecified
2830	Autoimmune hemolytic anemias
28310	Non-autoimmune hemolytic anemia, unspecified
28311	Hemolytic-uremic syndrome
28319	Other non-autoimmune hemolytic anemias
2832	Hemoglobinuria due to hemolysis from external causes
2839	Acquired hemolytic anemia, unspecified
28409	Other constitutional aplastic anemia
2848	Other specified aplastic anemias
2849	Aplastic anemia, unspecified
2850	Sideroblastic anemia
2851	Acute posthemorrhagic anemia
28521	Anemia in chronic kidney disease
28522	Anemia in neoplastic disease
28529	Anemia of other chronic disease
2858	Other specified anemias
2859	Anemia, unspecified

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
5820	Chronic glomerulonephritis, with lesion of proliferative glomerulonephritis
5821	Chronic glomerulonephritis, with lesion of membranous glomerulonephritis
5822	Chronic glomerulonephritis, with lesion of membranoproliferative glomerulonephritis
5824	Chronic glomerulonephritis, with lesion of rapidly progressive glomerulonephritis
58281	Chronic glomerulonephritis in diseases classified elsewhere
58289	Other chronic glomerulonephritis with specified pathological lesion in kidney
5829	Chronic glomerulonephritis with unspecified pathological lesion in kidney
5851	Chronic kidney disease, stage I
5852	Chronic kidney disease, Stage II (mild)
5853	Chronic kidney disease, Stage III (moderate)
5854	Chronic kidney disease, Stage IV (severe)
5855	Chronic kidney disease, Stage V
5856	End stage renal disease
5859	Chronic kidney disease, unspecified
586	Renal failure, unspecified
7140	Rheumatoid arthritis
79001	Precipitous drop in hematocrit
99680	Complications of transplanted organ, unspecified
99811	Hemorrhage complicating a procedure
V5811	Encounter for antineoplastic chemotherapy
V5812	Encounter for immunotherapy for neoplastic condition

The procedure codes used when billing for EPO remain unchanged.

When billing for EPO, procedure code 1-J0885 is considered for reimbursement with a covered diagnosis.

EPO coverage is limited to three injections per calendar week (Sunday through Saturday).

Example: *If a client with end-stage renal disease has a hematocrit of 34 percent and is given 5,000 units of EPO, bill a quantity of 5, using code J0886. The client may receive three payable injections per calendar week (Sunday through Saturday).*

Important: *EPO given for a Hematocrit of 37 percent or above is not a benefit of the Texas Medicaid Program.*

40.3.4.5 Blood Transfusions

Payment of whole blood for transfusions billed by dialysis facilities is a covered service when medically indicated for a client eligible for Medicaid. The administration of blood transfusion is not payable to dialysis facilities and must be billed by the medical professional.

Use the following procedure codes when billing for blood:

Procedure Code	Maximum Fee
0-P9010	$45.00
0-P9011	$89.37
9-P9021	$66.19

Important: *Blood administration is considered a professional service and is not payable to dialysis facilities.*

40.4 Claims Information

Submit all renal dialysis facility services to TMHP in an approved electronic claims format or on a HCFA-1450 (UB-92) claim form. Providers must purchase HCFA-1450 (UB-92) claim forms from the vendor of their choice. TMHP does not supply them.

Reminder: *The original onset date must be included on the claim form to prevent claim denial. The original onset date must be the same date entered on Form CMS-2728 sent to the Social Security office.*

CPT only copyright 2005 American Medical Association. All rights reserved.

41.1 Enrollment

To enroll in the Texas Medicaid Program and qualify for participation as a Title XIX rural health clinic (RHC), RHCs must be enrolled in Medicare.

A nine-digit provider identifier is issued to the rural health clinic after a certification letter from Medicare is received, stating that the clinic qualifies for Medicaid participation.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: "Provider Enrollment" on page 1-2 for more information.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2.

41.1.1 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid managed care clients. Contact the individual Medicaid Managed Care health plan for enrollment information.

Refer to: "Managed Care" on page 7-1

41.2 Record Retention

Freestanding RHCs must retain their records for a minimum of six years. Hospital-based RHCs must retain their records for a minimum of ten years.

41.3 Reimbursement

Freestanding and hospital-based RHCs are reimbursed provider-specific per visit rates calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8101.

41.4 Benefits and Limitations

41.4.1 Telemedicine Services

Remote site providers are limited to physicians (Doctors of Medicine [MDs] and Doctors of Osteopathy [DOs]), physician assistants (PAs), nurse practitioners (NPs), clinical nurse specialists (CNSs), certified nurse-midwives (CNMs), federally qualified health centers (FQHCs), and RHCs.

RHC telemedicine providers must submit their claims using the appropriate encounter code and modifiers. Modifier U7, AM, or SA is to be used in the first modifier field on the claim form together with the modifier GT in the second modifier field on the claim form.

Refer to: "Physician" on page 36-1 for more information.

41.4.2 Freestanding and Hospital-Based RHC Services

An RHC must be located in an area designated by the federal government as a health care shortage area.

The following services are benefits of RHCs under the Texas Medicaid Program:

- Physician services
- Services and supplies furnished as incidental to physician services
- Services provided by an NP, a CNS, a CNM, a clinical social worker, or physician assistant services
- Services and supplies furnished as incidental to the nurse practitioner or physician assistant's services
- Visiting nurse services on a part time or intermittent basis to homebound clients in areas determined to have a shortage of home health agencies. A homebound client is someone who is permanently or temporarily confined to his place of residence, not including a hospital or a skilled nursing facility, because of a medical condition

  Important: *When an RHC bills for visiting nurse services, the written plan of treatment to be used for the visiting nurse must be developed by the RHC supervising physician. It must be approved and ordered by the client's treating physician if different from the supervising physician. The plan of treatment must be reviewed and approved at least every 60 days by the supervising physician of the clinic.*

A *visit* is a face-to-face encounter between an RHC client and a physician, PA, NP, CNS, CNM, visiting nurse, or clinical nurse practitioner. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an *other* health visit.

An *other* health visit includes, but is not limited to, a face-to-face encounter between an RHC client and a clinical social worker.

For freestanding RHCs, all laboratory services provided in the RHC's laboratory are included in the encounter. This includes the basic laboratory tests as well as any other laboratory tests provided in the RHC laboratory. Consequently, there is no separate billing for laboratory services. However, if the RHC laboratory becomes a certified Medicare laboratory with its own supplier number, and enrolls in Medicaid as an independent laboratory, all laboratory tests (except the basic laboratory tests) performed for RHC and non-RHC clients can be billed to Medicaid. The claim should be filed under their independent laboratory Medicaid provider identifier and using the appropriate Healthcare Common Procedure Coding System (HCPCS) codes.

CPT only copyright 2005 American Medical Association. All rights reserved.

41.4.2.1 Freestanding Rural Health Clinic Services

The services listed below cannot be reimbursed to freestanding RHCs using the RHC nine-digit provider identifier. Use of the RHC provider identifier for billing these services causes claims to deny. Services in any of these four categories must be billed using the appropriate practitioner's group/individual, Texas Health Steps (THSteps), or family planning agency Medicaid nine-digit provider identifier:

- THSteps medical checkups
- THSteps dental services
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations, unless they are billed outside of a THSteps medical checkup

These services (except for THSteps dental) must be billed with an AJ, AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the Prospective Payment System (PPS) reimbursement methodology. When billing on the CMS-1500 claim form, use the appropriate national place of service code (72) for an RHC setting.

Important: *Payment to physicians for supplies is not a benefit of the Texas Medicaid Program. Costs of supplies are included in the reimbursement for office visits.*

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be billed using the individual or group physician Medicaid nine-digit provider identifier.

Exception: *If later in the same day the client suffers an additional illness or injury requiring diagnosis or treatment, the clinic may bill for a second visit.*

Freestanding RHCs bill an all-inclusive encounter for services provided.

All services provided that are incidental to the encounter must be included in the total charge for the encounter. They are not billable as a separate encounter.

Exception: *When billing for immunizations outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be used. This is the only circumstance in which a freestanding RHC can bill for a procedure other than 1-T1015.*

All services provided during a freestanding RHC encounter must be billed using procedure code 1-T1015. The total billed amount should be the combined charges for all services provided during that encounter.

One of the following modifiers must be reported with procedure code 1-T1015 to designate the health care professional providing the services: AJ, AM, or SA with place of service (POS) 2, TH, or U7.

Reminder: *The primary* initial contact *is defined as "the health care professional who spends the greatest amount of time with the client during that encounter."*

If more than one health care professional is seen during the encounter, the modifier (if appropriate) must indicate the primary contact. For example, if an NP, CNS, or PA performs an antepartum exam, modifiers SA or U7, and TH, must be entered. A maximum of two modifiers may be reported with each encounter.

If the encounter is for antepartum or postpartum care, use modifier TH.

41.4.2.2 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code 1-T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate.

One of the following modifiers must be billed for general medical services: AJ, AM, or SA with POS 2, or U7.

The services listed below cannot be reimbursed to hospital-based RHCs using the RHC nine-digit provider identifier. Use of the RHC nine-digit provider identifier for billing these services causes claims to deny. Services in any of these four categories must be billed using the appropriate practitioner's group/individual, THSteps, or family planning agency provider identifier:

- THSteps medical checkups
- THSteps dental
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs

These services must be billed with an AM, U7, or SA modifier if performed in an RHC setting. Claims are paid under the PPS reimbursement methodology. When billing on the CMS-1500 claim form, use the appropriate national place of service code (72) for an RHC setting.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be billed using the individual or group physician provider identifier.

Hospital-based RHCs should bill pneumococcal and influenza vaccines as non-RHC services, under their hospital provider identifier.

41.5 Cost Settlement

41.5.1 Freestanding RHCs and Hospital-Based RHCs

Effective for dates of service on or after January 1, 2001, a cost settlement for RHCs does not exist.

CPT only copyright 2005 American Medical Association. All rights reserved.

41.5.2 Cost Report Submission

All RHCs are required to submit a copy of their Medicare audited cost report within 15 days of receipt from Medicare for fiscal years ending on or after January 1, 2001, to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

41.6 Claims Information

Submit freestanding and hospital-based RHC services to TMHP on a HCFA-1450 (UB-92) claim form or the approved equivalent electronic format.

42.1 Overview

Medicaid services provided by school districts in Texas to Medicaid-eligible students are known as School Health and Related Services (SHARS). The oversight of SHARS is a cooperative effort between the Texas Education Agency (TEA) and HHSC. SHARS allow local school districts, including public charter schools, to obtain Medicaid reimbursement for certain health-related services documented in a student's Individualized Education Program (IEP). SHARS are provided to students who meet all of the following requirements:

- Are under 21 years of age and Medicaid-eligible
- Meet eligibility requirements for special education described in the *Individuals with Disabilities Education Act* (IDEA)
- Have IEPs that prescribe the needed services

Covered SHARS include:

- Audiology services
- Counseling
- Nursing services
- Physician services
- Occupational therapy (OT)
- Physical therapy (PT)
- Psychological services, including assessments (1-96101)
- Speech therapy services
- Personal care services
- Transportation in a school setting

These services must be provided by qualified personnel who are under contract with or employed by the school district. Furthermore, the school district must be enrolled as a SHARS Medicaid provider in order to bill Medicaid for these services.

42.2 School Enrollment

To enroll in the Texas Medicaid Program as a SHARS provider, school districts, including public charter schools, must employ or contract with individuals or entities that meet certification and licensing requirements in accordance with the Texas Medicaid State Plan for SHARS to provide program services. Since public school districts are government entities, they should select "public entity" on the enrollment application.

SHARS providers are required to notify parents/guardians of their rights to a "freedom of choice of providers" (42 *Code of Federal Regulations* [CFR] §431.51) under the Texas Medicaid Program. Most SHARS providers currently provide this notification during the initial Admission, Review, and Dismissal (ARD) process. If a parent requests that someone other than the employees or currently contracted staff of the SHARS provider (school district) provide a required service listed in the student's IEP, the SHARS provider must make a good faith effort to comply with the parent's request. The SHARS provider can negotiate with the requested provider to provide the services under contract. The requested provider must meet, comply with, and provide all of the employment criteria and documentation that the SHARS provider normally requires of its employees and currently contracted staff. The SHARS provider can negotiate the contracted fee with the requested provider and is not required to pay the same fee that the requested provider might receive from Medicaid for similar services. If the SHARS provider and the requested provider do not agree on a contract, the parties can determine whether a nonschool SHARS relationship in accordance with 42 CFR §431.51 is possible. If the parties do not agree to a nonschool SHARS relationship, the SHARS provider is responsible for providing the required services and must notify the parent that no contracted or nonschool SHARS relationship could be established with the requested provider.

Refer to: "Reimbursement" on page 2–2.

42.2.1 Nonschool SHARS Provider Enrollment

A nonschool SHARS provider must have either a current provider identifier as a Texas Medicaid provider of the IEP service or meet all of the eligibility requirements to obtain a provider identifier as a Texas Medicaid provider of the IEP service. For example, a nonschool SHARS provider of speech therapy must meet all provider criteria to provide Medicaid fee-for-service speech therapy and cannot hold only a state education certificate as a speech therapist.

To be enrolled in the Texas Medicaid Program as a nonschool SHARS provider, the enrollment packet must contain an affiliation letter that:

- Is written on school district letterhead.
- Is signed by the school district superintendent or designee.
- Contains assurances that the school district will reimburse the state share to HHSC for any Texas Medicaid payments made to the nonschool SHARS provider for the listed student and service.
- Lists the Medicaid number and Social Security number of the student to be served and notes the type of IEP SHARS service to be provided.
- Acknowledges that the nonschool SHARS provider has agreed in writing to:
  - Provide the listed SHARS service shown in the student's IEP.
  - Provide the listed SHARS service in the least restrictive environment as set forth in the IEP.
  - Maintain and submit all records and reports required by the school district to ensure compliance with the IEP and compliance with IEP and documentation/billing requirements.
- States the effective period for this nonschool SHARS provider arrangement.

CPT only copyright 2005 American Medical Association. All rights reserved.

A separate affiliation letter is required for each Texas Medicaid client to be served by the nonschool SHARS provider. A nonschool SHARS provider is required to have a separate two-digit suffix for each school district with which it is affiliated. For example, if a nonschool SHARS provider has written agreements with Anywhere Independent School District (ISD) for two students and with Somewhere ISD for one student, then the nonschool SHARS provider would submit its claims for the two students from Anywhere ISD under provider identifier 1234567-01 and its claims for the one student from Somewhere ISD under provider identifier 1234567-02. The nonschool SHARS provider would submit two affiliation letters from Anywhere ISD to TMHP Provider Enrollment (one for each student served) and one affiliation letter from Somewhere ISD.

Since nonschool SHARS providers are private, nonpublic entities, they should select "private entity" on the enrollment application.

Nonschool SHARS services include audiology services, counseling services, nursing services, OT, PT, speech therapy services, and psychological services delivered in an individual setting. Nonschool SHARS services do not include evaluation/assessment, physician services, personal care services, or transportation.

42.2.2 Private School Enrollment

A private school may not participate in the SHARS program as a SHARS provider or as a nonschool SHARS provider.

42.2.3 Medicaid Managed Care Enrollment

SHARS providers do not enroll with the Medicaid Managed Care health plans. SHARS providers deliver services to all eligible Medicaid SHARS clients, including clients of the Medicaid Managed Care health plans. SHARS services are not covered by the Medicaid Managed Care health plans. SHARS services that are rendered to clients of Medicaid Managed Care are covered and reimbursed by TMHP. Students who are under 21 years of age and on a Medicaid 1915(c) waiver program are covered and reimbursed by TMHP.

SHARS providers should use program code 200 to bill for Primary Care Case Management (PCCM). SHARS providers should use program code 100 to bill for fee-for-service.

42.3 Reimbursement and Certification of Funds

42.3.1 Reimbursement

Effective for dates of service on or after September 1, 2006, SHARS providers are reimbursed on an interim basis for covered services at either the lesser of the provider's billed charges or the provider's district-specific interim rate. SHARS providers receive Medicaid payments equal to the federal share and fund the state matching share through certification of public expenditures. The federal share is the applicable federal Medicaid assistance percentage (FMAP) in accordance with guidelines from the Centers for Medicare & Medicaid Services (CMS).

CMS requires the implementation of annual cost reporting, cost reconciliation, and cost settlement processes for all such Medicaid services delivered by school districts. Recent changes from CMS require that school districts, as public entities, not be paid in excess of their Medicaid-allowable costs and that any overpayments be recouped through the cost reconciliation and cost settlement processes. In an effort to minimize any potential recoupments, HHSC has assigned district-specific interim rates that are as close as possible to each district's estimated Medicaid-allowable costs for providing each service. School districts can access their district-specific interim rates on the HHSC website at www.hhsc.state.tx.us/medicaid/programs/rad/AcuteCare/Shars/Shars.html.

Payments for services delivered by a nonschool SHARS provider are limited to either the lower of the nonschool SHARS provider's billed charges or the district-specific interim rate for the school district in which the student is enrolled and for the specific covered service provided. The school district with whom the nonschool SHARS provider is affiliated is required to pay HHSC the state portion of Medicaid payments made to the nonschool SHARS provider. Invoices for the state portion of Medicaid payments to nonschool SHARS providers are sent to the affiliated SHARS school districts on a quarterly basis.

Refer to: "Reimbursement" on page 2–2 for more information about reimbursement and "Federal Financial Participation (FFP) Rate" on page 2–8.

42.3.1.1 Certification of Funds

SHARS providers are required to certify on a quarterly basis the amount reimbursed during the previous federal fiscal quarter. TMHP Provider Enrollment mails the quarterly Certification of Funds letter to SHARS providers at the end of each quarter of the federal fiscal year (October 1 through September 30). The purpose of the letter is to verify that the school district incurred allowable costs/expenditures on the dates of service that were funded from state/local funds in an amount equal to or greater than the combined total of its interim rates times the paid units of service. While the payments were received the previous federal fiscal quarter, the actual dates of service could have been many months prior. Therefore, the certification of public expenditures is for the date of service and not the date of payment.

The Certification of Funds letter includes a report which shows that quarter's combined total payments for Medicaid fee-for-service claims and Medicaid primary care case management (PCCM) claims. For help balancing the

CPT only copyright 2005 American Medical Association. All rights reserved.

amounts in the letter, providers can contact their Provider Relations representative or the TMHP Contact Center at 1-800-925-9126.

Refer to: "TMHP Provider Relations" on page -xiii for more information about provider relations representatives.

The Certification of Funds letter *must* be:

Signed by the business officer or other financial representative who is responsible for signing other documents that are subject to audit.

- Notarized.
- Returned to TMHP within 25 calendar days of the date printed on the letter.

Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider's payments until the signed Certification of Funds letter is received by TMHP. Providers must contact the TMHP Contact Center at 1-800-925-9126, if they do not receive their Certification of Funds letter.

On an annual basis, SHARS providers are required to certify through their cost reports their total, actual, incurred allowable costs/expenditures, including the federal share and the nonfederal share.

42.3.1.2 Cost Reporting

Each SHARS provider is required to complete an annual cost report for all SHARS that were delivered during the previous state fiscal year (September 1 through August 31). The cost report is due on or before March 1 of the year following the reporting period. The first SHARS cost report will cover September 1, 2006, through August 31, 2007, and is due on or before March 1, 2008.

The primary purpose of the cost report is to document the provider's costs for delivering SHARS, including direct costs and indirect costs, and to reconcile the provider's interim payments for SHARS with its actual, total, Medicaid-allowable costs. The annual SHARS cost report includes a certification of funds statement which must be completed to certify the provider's actual, incurred costs/expenditures. All annual SHARS cost reports that are filed are subject to desk review by HHSC or its designee.

42.3.1.3 Cost Reconciliation and Cost Settlement

The cost reconciliation process must be completed within 24 months of the end of the reporting period covered by the annual SHARS cost report. The total Medicaid-allowable costs are compared to the provider's interim payments for SHARS delivered during the reporting period, which results in a cost reconciliation. The SHARS cost report is due on or before March 1, 2008, with the cost reconciliation and settlement processes completed no later than August 31, 2009.

If a provider's interim payments exceed the actual, certified, Medicaid-allowable costs of the provider for SHARS to Medicaid clients, HHSC will recoup the federal share of the overpayment by one of the following methods:

- Offset all future claims payments to the provider until the amount of the federal share of the overpayment is recovered
- Recoup an agreed upon percentage from future claims payments to the provider to ensure recovery of the overpayments within one year
- Recoup an agreed upon dollar amount from future claims payments to ensure recovery of the overpayment within one year

If the actual, certified, Medicaid-allowable costs of a provider for SHARS exceed the provider's interim payments, HHSC will pay the federal share of the difference to the provider in accordance with the final, actual certification agreement and submit claims to CMS for reimbursement of that payment in the federal fiscal quarter following payment to the provider.

HHSC shall issue a notice of settlement that denotes the amount due to or from the provider.

42.4 Record Retention

Student-specific records that are required for SHARS become part of the student's educational records and must be maintained for seven years rather than the five years required by Medicaid. All records that are pertinent to SHARS billings must be maintained until all audit questions, appeal hearings, investigations, or court cases are resolved. Records should be stored in a readily accessible location and format and must be available for state and/or federal audit.

The following is a checklist of the minimum documents to collect and maintain:

- IEP
- Current provider qualifications (licenses or TEA or State Board for Educator Certification [SBEC] certificates)
- Attendance records
- Prescriptions/referrals
- Medical necessity documentation (e.g., diagnoses and history of chronic conditions or disability)
- Session notes or service logs, including provider signatures
- Supervision logs
- Special transportation logs
- Claims submittal and payment histories
- If applicable, nonschool SHARS provider's affiliation letter and signed agreement with the district

42.5 Eligibility Verification

The following are means to verify Medicaid eligibility of students:

- Verify electronically through TMHP electronic data interchange (EDI) with TDHconnect software.
    - School districts may inquire about the eligibility

CPT only copyright 2005 American Medical Association. All rights reserved.

of a student by submitting the student's Medicaid number or two of the following: name, date of birth, or Social Security number.

- A search can be narrowed further by entering the county code or sex of the student. Verifications may be submitted in batches without limitations on the number of students.

- Contact the Automated Inquiry System (AIS) at 1-800-925-9126.
- Contact the TMHP Contact Center at 1-800-925-9126.

42.6 Benefits and Limitations

All of the SHARS procedures listed in the following sections require a valid International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code. SHARS include audiology services, counseling, physician services, nursing services, occupational therapy, physical therapy, psychological services, speech therapy services, personal care services, and transportation.

Reminder: *SHARS are the services determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and under 21 years of age receive the benefits accorded to them by federal and state law in order to participate in the educational program.*

42.6.1 Audiology

Audiology evaluation services include:

- Identification of children with hearing loss
- Determination of the range, nature, and degree of hearing loss, including the referral for medical or other professional attention for the habilitation of hearing
- Determination of the child's need for group and individual amplification

Audiology therapy services include the provision of habilitation activities, such as language habilitation, auditory training, audiological maintenance, speech reading (lip reading), and speech conversation.

Audiology services must be provided by a professional who holds a valid state license as an audiologist or by an audiology assistant who is licensed by the state when the assistant is acting under the supervision or direction of a qualified audiologist. State licensure requirements are equal to American Speech-Language Hearing Association (ASHA) certification requirements.

Audiology evaluation is billable on an individual (1-92506) basis only. Audiology therapy is billable on an individual (1-92507) and group (1-92508) basis. Only the time spent with the student present is billable; time spent without the student present is not billable. Session notes for evaluations are not required; however, documentation must include the billable start time, billable stop time, and total billable minutes with a notation of the activity performed (e.g., audiology evaluation). Session notes are required for therapy. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

42.6.1.1 Audiology Billing Table

POS*	Procedure Code	Individual or Group	Therapist or Assistant
1,2, or 9	1-92506	Individual	Licensed therapist
1,2, or 9	1-92507 with modifier GN-U8	Individual	Licensed therapist
1,2, or 9	1-92507 with modifier GN-U1	Individual	Licensed/ certified assistant
1,2, or 9	1-92508 with modifier GN-U8	Group	Licensed therapist
1,2, or 9	1-92508 with modifier GN-U1	Group	Licensed/ certified assistant
*Place of Service: 1=office/school; 2=home; 9=other locations			

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time for audiology evaluation is four hours, which may be billed over several days. The recommended maximum billable time for direct audiology therapy (group and/or individual) is two hours per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.2 Counseling Services

Counseling services are provided to help a child with a disability benefit from special education and must be listed in the IEP. Counseling services include, but are not limited to:

- Assisting the child and/or parents in understanding the nature of the child's disability
- Assisting the child and/or parents in understanding the special needs of the child
- Assisting the child and/or parents in understanding the child's development
- Health and behavior interventions to identify the psychological, behavioral, emotional, cognitive, and social factors that are important to the prevention, treatment, or management of physical health problems
- Assessing the need for specific counseling services

Counseling services must be provided by a professional who has one of the following certifications or licensures: a Licensed Professional Counselor (LPC), a Licensed

42

CPT only copyright 2005 American Medical Association. All rights reserved.

Clinical Social Worker (LCSW, formerly LMSW-ACP), a Licensed Marriage and Family Therapist (LMFT), or a Licensed Psychologist.

Counseling services are billable on an individual (1-96152) or group (1-96153) basis. Session notes are required and documentation must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency counseling services as long as the student's IEP includes a behavior improvement plan that documents the need for emergency services.

42.6.2.1 Counseling Services Billing Table

POS*	Procedure Code	Individual or Group
1, 2, or 9	1-96152 with modifier GN	Individual
1, 2, or 9	1-96153 with modifier GN	Group
*Place of Service: 1 = Office/School; 2 = Home; 9 = Other Locations		

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time is two hours per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.3 Physician Services

Diagnostic and evaluation services are reimbursable under SHARS physician services. Physician services must be provided by a licensed physician (Doctor of Medicine [MD] or Doctor of Osteopathy [DO]). A physician prescription is required before PT or OT services can be reimbursed under SHARS. Speech therapy services require either a physician prescription or a referral from a licensed speech language pathologist (SLP) before the speech therapy services can be reimbursed under the SHARS program. The school district must maintain the prescription/referral. The prescription/referral must relate directly to specific services listed in the IEP. If a change is made to a service on the IEP that requires a prescription/referral, the prescription/referral must be revised accordingly.

The expiration date for the physician prescription is the earlier of either the physician's designated expiration date on the prescription or three years, in accordance with the IDEA three-year re-evaluation requirement.

SHARS physician services are billable only when they are provided on an individual basis. The determination as to whether or not the provider needs to see the student while reviewing the student's records is left up to the professional judgment of the provider. Therefore, billable time includes:

- The diagnosis/evaluation time spent with the student present
- The time spent without the student present reviewing the student's records for the purpose of writing a prescription/referral for specific SHARS services
- The diagnosis/evaluation time spent with the student present, and/or the time spent without the student present reviewing the student's records for the evaluation of the sufficiency of an ongoing SHARS service to see whether any changes are needed in the current prescription/referral for that service

Session notes are not required for procedure code 1-99499; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the medical activity that was performed.

42.6.3.1 Physician Services Billing Table

POS*	Procedure Code
1, 2, or 9	1-99499
*Place of Service: 1 = Office/School; 2 = Home; 9 = Other Locations	

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time is one hour per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.4 Nursing Services

Nursing services are skilled nursing tasks, as defined by the Board of Nurse Examiners (BNE), that are included in the student's IEP. Nursing services may be direct nursing care or medication administration. Examples of reimbursable nursing services include, but are not limited to:

- Inhalation therapy
- Ventilator monitoring
- Nonroutine medication administration
- Tracheostomy care
- Gastrostomy care
- Ileostomy care
- Catheterization
- Tube feeding
- Suctioning
- Client training
- Assessment of a student's nursing and personal care services needs

Direct nursing care services are billed in 15-minute increments and medication administration is reimbursed on a per-visit increment. The registered nurse (RN) or advanced

CPT only copyright 2005 American Medical Association. All rights reserved.

practice nurse (APN) determines whether these services must be billed as direct nursing care or medication administration.

Nursing services must be provided by an RN, an APN (including nurse practitioners [NPs] and clinical nurse specialists [CNSs]), licensed vocational nurse/licensed practical nurse (LVN/LPN), or a school health aide or other trained, unlicensed assistive person delegated by an RN or APN.

Nursing services are billable on an individual or group basis. Only the time spent with the student present is billable. Time spent without the student present is not billable. Session notes are not required for nursing services; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of nursing service that was performed.

POS*	Procedure Code	Individual or Group	Unit of Service
1,2, or 9	1-T1002 with modifier TD	Individual	15 minutes
1,2, or 9	1-T1002 with modifier TD-UD	Group	15 minutes
1,2, or 9	1-T1502 with modifier TD		Medication administration, per visit
1,2, or 9	1-T1002 with modifier U7	Delegation, individual	15 minutes
1,2, or 9	1-T1002 with modifier U7-UD	Delegation, group	15 minutes
1,2, or 9	1-T1502 with modifier U7		Delegation, medication, administration per visit
*Place of Service: 1=office/school; 2=home; 9=other locations			

While the procedure code descriptions specifically state “up to 15 minutes,” the Medicaid-allowable fee is determined based on 15-minute increments. Therefore, providers must use a 15-minute unit of service for billing.

All of the nursing services minutes that are delivered to a student during a calendar day must be added together before they are converted to units of service. Do not convert minutes of nursing services separately for each nursing task that was performed.

Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day. If the total number of minutes of nursing services is less than eight minutes for a calendar day, then no unit of service can be billed for that day, and that day’s minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.

Refer to: “Billing Units Based on 15 minutes” on page 42–12

Important: *The recommended maximum billable time for direct nursing services is four hours per day. The recommended maximum billable units for procedure codes 1-T1002 with modifier TD or 1-T1502 with modifier U7 are a cumulative of four per visit medication administrations per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.5 Occupational Therapy

In order for a student to receive OT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribed the OT must be provided.

Occupational evaluation services include determining what services, assistive technology, and environmental modifications a student requires for participation in the special education program.

OT includes:

- Improving, developing, maintaining, or restoring functions impaired or lost through illness, injury, or deprivation.
- Improving the ability to perform tasks for independent functioning when functions are impaired or lost.
- Preventing, through early intervention, initial or further impairment or loss of function.

OT must be provided by a professional who is licensed by the Texas Board of Occupational Therapy Examiners or a certified occupational therapist assistant (COTA) acting under the supervision or direction of a qualified occupational therapist.

OT evaluation is billable on an individual (1-97003) basis only. OT is billable on an individual (1-97530) or group (1-97150) basis. The occupational therapist or COTA can only bill for time spent with the student present, including time spent assisting the student with learning to use adaptive equipment and assistive technology. Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time), report writing, and time spent manipulating or modifying the adaptive equipment, is not billable. Session notes are not required for procedure code 1-97003; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., OT evaluation). Session notes are required for procedure codes 1-97530 and 1-97150. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

CPT only copyright 2005 American Medical Association. All rights reserved.

42.6.5.1 Occupational Therapy Billing Table

POS*	Procedure Code	Individual or Group	Therapist or Licensed/Certified Assistant
1,2, or 9	1-97003	Individual	Licensed therapist
1,2, or 9	1-97530 with modifier GO	Individual	Licensed therapist
1,2, or 9	1-97530 with modifier GO-U1	Individual	Licensed/certified assistant
1,2, or 9	1-97150 with modifier GO	Group	Licensed therapist
1,2, or 9	1-97150 with modifier GO-U1	Group	Licensed/certified assistant
*Place of Service: 1=office/school; 2=home; 9=other locations			

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time for OT evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (group and/or individual) is a cumulative of two hours per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.6 Physical Therapy

In order for a student to receive PT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribes the PT must be provided.

PT evaluation includes evaluating the student's ability to move throughout the school and to participate in classroom activities and the identification of movement dysfunction and related functional problems.

PT is provided for the purpose of preventing or alleviating movement dysfunction and related functional problems.

PT must be provided by a professional who is licensed by the Texas Board of Physical Therapy Examiners or a licensed physical therapist assistant (LPTA) acting under the supervision or direction of a qualified physical therapist.

PT evaluation is billable on an individual (1-97001) basis only. PT is billable on an individual (1-97110) or group (1-97150) basis. The physical therapist can only bill time spent with the student present, including time spent helping the student to use adaptive equipment and assistive technology. Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time) and report writing, is not billable. Session notes are not required for procedure code 1-97001; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., PT evaluation). Session notes are required for procedure codes 1-97110 and 1-97150. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

42.6.6.1 Physical Therapy Billing Table

POS*	Procedure Code	Individual or Group	Therapist or Licensed/ Certified Assistant
1,2, or 9	1-97001	Individual	Licensed therapist
1,2, or 9	1-97110 with modifier GP	Individual	Licensed therapist
1,2, or 9	1-97110 with modifier GP-U1	Individual	Licensed/certified assistant
1,2, or 9	1-97150 with modifier GP	Group	Licensed therapist
1,2, or 9	1-97150 with modifier GP-U1	Group	Licensed/certified assistant
*Place of Service: 1=office/school; 2=home; 9=other locations			

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time for PT evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (group and/or individual) is a cumulative of two hours per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.7 Speech Therapy

42.6.7.1 Referral

The name and complete address or the provider identifier or license number of the referring licensed physician or licensed SLP is required before speech therapy services can be billed under SHARS. A licensed SLP's evaluation and recommendation for the frequency, location, and duration of speech therapy serves as the speech referral.

CPT only copyright 2005 American Medical Association. All rights reserved.

42.6.7.2 Description of Services

Speech evaluation services include the identification of children with speech and/or language disorders and the diagnosis and appraisal of specific speech and language disorders. Speech therapy services include the provision of speech and language services for the habilitation or prevention of communicative disorders.

Speech evaluation is billable on an individual (1-92506) basis only. Speech therapy is billable on an individual (1-92507) or group (1-92508) basis. Providers can only bill time spent with the student present, including assisting the student with learning to use adaptive equipment and assistive technology. Time spent without the student present, such as report writing and training teachers or aides to work with the student (unless the student is present during training), is not billable. Session notes are not required for procedure code 1-92506; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., speech evaluation). Session notes are required for procedure codes 1-92507 and 1-92508. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

42.6.7.3 Provider and Supervision Requirements

Speech therapy services are eligible for reimbursement when they are provided by an ASHA-certified SLP who holds a Texas license or an ASHA-equivalent SLP (has a master's degree in the field of speech language pathology and a Texas license). Speech therapy services are also eligible for reimbursement when provided by an SLP with a state education agency certification, a licensed SLP intern, and a grandfathered SLP who is acting under the supervision or direction of an SLP.

The supervision must meet the following provisions:

- The supervising SLP must provide supervision that is sufficient to ensure the appropriate completion of the responsibilities that were assigned.
- The direct involvement of the supervising SLP in overseeing the services that were provided must be documented.
- The SLP who provides the direction must ensure that the personnel who carry out the directives meet the minimum qualifications set forth in the rules of the State Board of Examiners for Speech-Language Pathology and Audiology which relate to Licensed Interns or Assistants in Speech-Language Pathology.

CMS interprets "under the direction of a speech-language pathologist," as a speech-language pathologist who:

- Is directly involved with the individual under his direction.
- Accepts professional responsibility for the actions of the personnel he agrees to direct.
- Sees each student at least once.
- Has input about the type of care provided.
- Reviews the student's speech records after the therapy begins.
- Assumes professional responsibility for the services provided.

42.6.7.4 Speech Therapy Billing Table

POS*	Procedure Code	Individual or Group	Therapist or Licensed/Certified Assistant
1,2, or 9	1-92506 with modifier GN	Individual	Licensed therapist
1,2, or 9	1-92507 with modifier GN-U8	Individual	Licensed therapist
1,2, or 9	1-92507 with modifier GN-U1	Individual	Licensed/certified assistant acting under the supervision or direction of a SLP
1,2, or 9	1-92508 with modifier GP-U8	Group	Licensed therapist
1,2, or 9	1-92508 with modifier GP-U1	Group	Licensed/certified assistant acting under the supervision or direction of a SLP
*Place of Service: 1=office/school; 2=home; 9=other locations			

Providers must use a 15-minute unit of service for billing.

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable time for evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (group and/or individual) is a cumulative of two hours per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.8 Evaluation/Assessment and Psychological Services

42.6.8.1 Evaluation/Assessment

Evaluations/assessments include activities related to the evaluation of the functioning of a student for the purpose of determining eligibility, the needs for specific SHARS services, and the development or revision of IEP goals and objectives. An evaluation/assessment is billable if it leads to the creation of an IEP for a student with disabilities who is eligible for Medicaid and who is under 21 years of age, whether or not the IEP includes SHARS.

CPT only copyright 2005 American Medical Association. All rights reserved.

Evaluations/assessments (1-96101) must be provided by a professional who is a licensed specialist in school psychology (LSSP), a licensed psychologist, or a licensed psychiatrist in accordance with Title 19 Texas Administrative Code (TAC) §89.1040(b)(1) and 34 CFR §300.136(a)(1).

Evaluation/assessment billable time includes:

- Psychological, educational, or intellectual testing time spent with the student present.
- Necessary observation of the student associated with testing.
- A parent/teacher consultation with the student present that is required during the assessment because a student is unable to communicate or perform certain activities.
- Time spent without the student present for the interpretation of testing results.

Time spent gathering information without the student present or observing a student is not billable evaluation/assessment time.

Occupational therapists, physical therapists, audiologists, and SLPs who perform an evaluation should bill for their time under their individual procedure codes (1-97003, 1-97001, and 1-92506, with modifier U9, or 1-92506, with modifier GN).

Assessments for visual impairment that are performed by a licensed physician can only be billed under the medical services procedure code 1-99499. State-mandated vision and hearing screenings are not billable under SHARS.

Session notes are not required; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note which assessment activity was performed (e.g., testing, interpretation, or report writing).

Evaluation/Assessment Billing Table

POS*	Procedure Code	Individual/ Group	Unit of Service
1,2, or 9	1-96101	Individual	1 hour
*Place of Service: 1=office/school; 2=home; 9=other locations			

Providers may bill in partial hours, expressed as 1/10th of an hour (six-minute segments). For example, express 30 minutes as a billed quantity of 0.5.

Refer to: “Billing Units Based on an Hour” on page 42–12

Important: *The recommended maximum billable time is eight hours over several days. Time spent for the interpretation of testing results without the student present is billable time. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.8.2 Psychological Services

Psychological services are counseling services provided to help a child with a disability benefit from special education and must be listed in the IEP.

Psychological services must be provided by a licensed psychiatrist, a licensed psychologist, or an LSSP. Nothing in this rule prohibits public schools from contracting with licensed psychologists and licensed psychological associates who are not LSSPs to provide psychological services, other than school psychology, in their areas of competency. School districts may contract for specific types of psychological services, such as clinical psychology, counseling psychology, neuropsychology, and family therapy, that are not readily available from the LSSP who is employed by the school district. Such contracting must be on a short-term or part-time basis and cannot involve the broad range of school psychological services listed in 22 TAC §465.38(1)(B).

All psychological services are billable on an individual (1-96152) or group (1-96153) basis. Session notes are required. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency psychological services as long as the student’s IEP includes a behavior improvement plan that documents the need for the emergency services.

Psychological Services Billing Table

POS*	Procedure Code	Individual/Group
1,2, or 9	1-96152 with modifier AH	Individual
1,2, or 9	1-96153 with modifier AH	Group
*Place of Service: 1=office/school; 2=home; 9=other locations		

Providers must use a 15-minute unit of service for billing.

Refer to: “Billing Units Based on 15 minutes” on page 42–12

Important: *The recommended maximum billable time for direct psychological therapy (group and/or individual) is a cumulative of two hours per day for nonemergency situations. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.*

42.6.9 Personal Care Services

Personal care services are provided to help a child with a disability or chronic condition benefit from special education. Personal care services include a range of human assistance provided to persons with disabilities or chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. An individual may be physically capable of performing activities of daily living (ADLs) and instrumental ADLs (IADLs) but may have limitations in performing these activities because of a functional, cognitive, or behavioral impairment. For personal care services to be billable, they must be listed in the student’s IEP. Personal care services are billable on an individual (1-T1019 with modifier U5 or U6) or group (1-T1019 with modifier U5-UD or U6-UD) basis. Session notes are not required for procedure codes 1-T1019 with modifier U5 or

CPT only copyright 2005 American Medical Association. All rights reserved.

1-T1019 with modifier U5-UD; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of personal care service that was performed. Procedure codes 1-T1019 with modifier U6 and 1-T1019 with modifier U6-UD are billed using a one-way trip unit of service.

42.6.9.1 Personal Care Services Billing Table

POS*	Procedure Code	Individual or Group	Unit of Service
1,2, or 9	T1019 with modifier U5	Individual, school	15 minutes
1,2, or 9	T1019 with modifier U5-UD	Group, school	15 minutes
1,2, or 9	T1019 with modifier U6	Individual, bus	Per one-way trip
1,2, or 9	T1019 with modifier U6-UD	Group, bus	Per one-way trip
*Place of Service: 1=office/school; 2=home; 9=other locations			

Refer to: "Billing Units Based on 15 minutes" on page 42–12

Important: *The recommended maximum billable units for 1-T1019 with modifier U6 or 1-T1019 with modifier U6-UD is a cumulative of four one-way trips per day. Providers must maintain documentation of the reasons for the additional time, if more than the recommended one-way trips are billed.*

42.6.10 Transportation Services in a School Setting

Transportation services in a school setting are reimbursed when they are provided on a specially-adapted vehicle and if the following criteria are met:

- Provided to and/or from a Medicaid-covered service on the day for which the claim is made.
- A child requires transportation in a specially-adapted vehicle to serve the needs of the disabled.
- A child resides in an area that does not have school bus transportation, such as those in close proximity to a school.
- The Medicaid-covered SHARS is included in the student's IEP.
- The special transportation service is included in the student's IEP.

A specially-adapted vehicle is one that has been physically modified (e.g., addition of a wheelchair lift, addition of seatbelts or harnesses, addition of child protective seating, or addition of air conditioning). In addition, a bus monitor does not meet the criteria for special adaptation. Children with special education needs who ride the regular school bus to school with other nondisabled children are not required to have the transportation services in a school setting listed in their IEP. Also, the cost of the regular school bus ride cannot be billed to SHARS.

Therefore, the fact that a child may receive a service through SHARS does not necessarily mean that the transportation services in a school setting would be reimbursed for them.

Reimbursement for covered transportation services is on a student one-way trip basis. The following one-way trips may be billed if the student receives a billable SHARS service (including personal care services on the bus) and is transported on the school's specially adapted vehicle from:

- The student's residence to school.
- The school to the student's residence.
- The student's residence to a provider's office that is contracted with the district.
- A provider's office that is contracted with the district to the student's residence.
- The school to a provider's office that is contracted with the district.
- A provider's office that is contracted with the district to the student's school.
- The school to another campus to receive a billable SHARS service.
- The campus where the student received a billable SHARS service back to the student's school.

Covered transportation services from a child's residence to school and return are not reimbursable if, on the day the child is transported, the child does not receive a Medicaid-covered SHARS service (other than transportation). Documentation of each one-way trip provided must be maintained by the school district (e.g., trip log). This service must not be billed by default simply because the student is transported on a specially-adapted bus.

42.6.10.1 Transportation Services in a School Setting Billing Table

POS*	Procedure Code	Unit of Service
1,2, or 9	1-T1003	Per one-way trip
*Place of Service: 1=office/school; 2=home; 9=other locations		

42.7 Claims Information

42.7.1 Other Insurance

Medicaid guidelines state that other insurance carriers must be billed before billing Medicaid. If the SHARS student has other insurance, the SHARS provider can call the other insurance company to inquire whether the service is covered under the student's insurance plan. If the service is not covered under the student's insurance plan, the SHARS provider can obtain from the other insurance company an oral denial without ever billing the other insurance carrier.

CPT only copyright 2005 American Medical Association. All rights reserved.

To appeal a Medicaid claim that was denied for other insurance using an oral denial from the other insurance company, the SHARS provider should submit the following information:

- The date of the telephone call with the other insurance company
- The name and telephone number of the insurance carrier
- The name of the insurance representative
- Policy and group holder information
- The specific reason for denial

Include the client's type of coverage to enhance the accuracy of future claims processing.

If the SHARS provider learns that the other insurance policy does cover the service, the SHARS provider must obtain parental permission to bill the other insurance carrier. If parental permission is not received or the SHARS provider does not wish to pursue payment through the other insurance carrier, the SHARS provider cannot bill Medicaid by submitting claims for the services to TMHP.

42.7.2 Claims Information

Claims for SHARS must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

42.7.3 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
School Health and Related Services (SHARS) Claim Example	D-33
Acronym Dictionary	F-1

42.7.4 Billing Units Based on 15 minutes

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

Reminder: *Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information will be reimbursed as a unit of 1.*

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or less minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Examples:

- 0 min–7 mins = 0 units
- 8 mins–22 mins = 1 unit
- 23 mins–37 mins = 2 units
- 38 mins–52 mins = 3 units
- 53 mins–67 mins = 4 units
- 68 mins–82 mins = 5 units

42.7.5 Billing Units Based on an Hour

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is an hour (1 unit = 60 minutes = one hour), partial units should be billed in tenths of an hour and rounded up or down to the nearest six-minute increment.

Reminder: *Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information will be reimbursed as a unit of 1.*

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student and divide by 60 to convert to billable units of service. If the total billable minutes are not divisible by 60, the minutes are converted to partial units of service as follows:

- 0 mins–3 mins = 0 units
- 4 mins–9 mins = 0.1 unit
- 10 mins–15 mins = 0.2 unit
- 16 mins–21 mins = 0.3 unit
- 22 mins–27 mins = 0.4 unit
- 28 mins–33 mins = 0.5 unit
- 34 mins–40 mins = 0.6 unit
- 42 mins–48 mins = 0.7 unit
- 49 mins–54 mins = 0.8 unit
- 55 mins–57 mins = 0.9 unit

Other examples:

- 58 mins–63 mins = 1 unit
- 64 mins–70 mins = 1.1 units
- 71 mins–77 mins = 1.2 units
- 78 mins–84 mins = 1.4 units
- 85 mins–91 mins = 1.5 units

43.1 THSteps Medical and Dental Administrative Information

This section describes the administrative requirements for the Texas Health Steps (THSteps) Program, including provider requirements, client eligibility requirements, and billing and claims processing information. "Clinical Information" on page 43-14 contains information for medical and dental services provided under THSteps. Providers needing additional information, may call 1-877-847-8377 or refer to the "THSteps Quick Reference Guide" on page M-1 for a more specific list of resources and telephone numbers. Providers may also contact the DSHS THSteps Provider Relations staff in the DSHS regional office by calling the appropriate regional office as listed in "DSHS Health Service Region Contacts" on page A-8.

43.1.1 Overview

The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) service is Medicaid's comprehensive preventive child health service for individuals younger than 21 years of age. In Texas EPSDT is known as the THSteps program. EPSDT was defined by federal law as part of the *Omnibus Budget Reconciliation Act* (OBRA) of 1989 legislation and includes periodic screening, vision, hearing, and dental preventive and treatment services. In addition, Section 1905(r)(5) of the *Social Security Act* requires that any medically necessary health care service listed in the Act be provided to THSteps (EPSDT) clients even if the service is not available under the State's Medicaid plan to the rest of the Medicaid population. These additional services are available through the Comprehensive Care Program (CCP). THSteps-CCP services are the diagnosis and treatment components of THSteps.

43.1.2 Statutory Requirements

Several specific legislative requirements affect the THSteps program and the providers participating in the program. These include, but are not limited to, the following:

- Newborn Blood Screening, *Health and Safety Code*, Chapter 33.
- Parental Accompaniment, as outlined in Appendix K, THSteps Statutory Requirements, "Parental Accompaniment" on page K-2.
- Requirements for Reporting Abuse or Neglect, as outlined in "Compliance with Texas Family Code" on page 1-4.
- Simplified Enrollment, *Texas Human Resources Code*, §32.025.
- Early Childhood Intervention (ECI), 34 *Code of Federal Regulations* (CFR) Part 303; Chapter 73, *Texas Human Resources Code,* and Title 40 *Texas Administrative Code* (TAC), Chapter 108.
- Newborn Hearing Screening, *Health and Safety Code*, Chapter 47.
- Teen Confidentiality Issues. There are many state statutes that may affect consent to medical care for a minor, depending on the facts of the situation. Among the relevant statutes are Chapters 32, 33, 153, and 266 of the *Texas Family Code*. Providers may want to consult an attorney, their licensing board, or professional organization if guidance is needed or questions arise on matters of medical consent.

Refer to: "Texas Health Steps Statutory State Requirements" on page K-1 for more information.

43.1.3 Medical Transportation Program

On request by the client, the Texas Department of Transportation Medical Transportation Program (MTP) can assist the client with scheduling transportation for THSteps medical and dental checkups.

Refer to: "Medical Transportation" on page I-1 for more information.

43.1.4 Provider Enrollment

Providers cannot be enrolled if their professional license is due to expire within 30 days of application. Facility providers must submit a current copy of the supervising practitioner's license.

To enroll in the THSteps program, providers must be enrolled in the Texas Medicaid Program, in addition to one of the following:

- Physicians (doctor of medicine [MD] and doctor of osteopathy [DO]) currently licensed in the state where the service is provided.
- Health care providers or facilities (public or private) capable of performing the required medical checkup procedures under a physician's direction, such as regional and local health departments, family planning clinics, migrant health clinics, community-based hospitals and clinics, maternity clinics (MSCs), rural health clinics (RHCs), federally qualified health centers (FQHCs), home health agencies (HHAs), school districts, and family or pediatric nurse practitioners. In the case of a clinic, a physician is not required to be present in the clinic at all times during the hours of operation; however, a physician must assume responsibility for the clinic's operation.
- Family and pediatric nurse practitioners enrolled independently.
- Certified nurse-midwives (CNM) enrolled as providers of THSteps medical checkups for newborns younger than 2 months of age and adolescent females.
- Women's health care nurse practitioners enrolled as providers of THSteps medical checkups for adolescent females.
- Adult nurse practitioners (ANP) enrolled as providers of THSteps checkups for adolescents.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Effective July 1, 2006, physician assistants (PAs) may enroll independently as THSteps medical providers. It is recommended that PAs have expertise or additional education in the areas of comprehensive pediatric assessment.

Residents may provide medical checkups in a teaching facility under the personal guidance of the attending staff as long as the facility's medical staff by-laws and requirements of the Graduate Medical Education (GME) Program are met, and the attending physician has determined the intern or resident to be competent in performing these functions. THSteps does not require the supervising physician to examine the patient as long as these conditions are met.

A registered nurse (RN) may not enroll independently, but may perform THSteps medical checkups only under the supervision of a physician. The physician ensures that the RN or PA has appropriate training and adequate skills for performing the procedures for which they are responsible.

Refer to: "Provider Enrollment" on page 1-2 for information about enrollment procedures.

43.1.4.1 Additional Education Requirements for Registered Nurses (RNs)

All RNs performing THSteps medical checkups must receive special training in comprehensive pediatric assessment. To be qualified to conduct a THSteps physical examination, RNs must have completed courses in pediatric assessment after graduation from nursing school, which includes the following components: physical, developmental/mental health, nutrition assessment, and anticipatory guidance. This education may be obtained through credit hours at an accredited college or university or through courses approved for continuing education units.

If the pediatric course(s) do not include a formal preceptorship (observation by course faculty or their designee of the individual's skills over a period of time), the RN should receive personal supervision by a physician (or family or pediatric nurse practitioner) until the physician (or family or pediatric nurse practitioner) determines the RN to be competent to perform these functions.

Documentation of the required special training should be included in the employee's personnel file.

It is recommended that PAs have expertise or additional education in the areas of comprehensive pediatric assessment. Courses offered by the Texas Nurses Association (TNA) are available for PAs and provide continuing education units for PAs and RNs.

The courses are:

- *Comprehensive Pediatric Assessment.* The curriculum includes an overview of THSteps family medical history, pediatric physical assessment, nutrition, developmental and mental health assessments, case management, and anticipatory guidance. A clinical preceptorship with a physician or advanced practice nurse (APN) is part of this training.
- *Adolescence* (web-based). This course gives health care providers (including PAs, nurse practitioners (NPs), clinical nurse specialists (CNSs), RNs, social workers, nutritionists, and dietitians) information that can assist them in relating to and providing care for adolescents.
- T*exas Health Steps Adolescent Checkup (web-based). This course* provides the RN with recommended guidelines and necessary forms for conducting a THSteps adolescent checkup.

For more information, nurses can contact TNA at www.texasnurses.org/thsteps/thsteps.htm or by telephone at 1-512-452-0645, or call THSteps at 1-512-458-7745.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.1.4.2 Medicaid Managed Care Enrollment

The Medicaid Managed Care Program consists of two types of health care delivery systems, Primary Care Case Management (PCCM) and health maintenance organization (HMO). THSteps medical providers do not have to enroll with PCCM to be reimbursed for medical checkup services provided to PCCM clients. Bills are submitted directly to TMHP, and PCCM clients are free to choose the physician who will perform their THSteps medical checkups.

Under HMOs this same freedom of choice exists; however, providers bill the HMO rather than TMHP.

While preventive services are available in managed care, those provided to clients from birth to 21 years of age must be completed as THSteps medical checkups, meet program requirements, and be submitted with appropriate THSteps procedure codes and THSteps provider identifiers.

Note: *Diagnosis and treatment of problems must be provided either by the client's primary care provider or by a provider referred by the client's primary care provider. If a THSteps medical checkup is performed by a provider who is not the client's primary care provider, the results of the medical checkup should be forwarded to the client's primary care provider so that the client's medical record can be updated, in keeping with the medical home concept*

If an enrolled medical checkup provider wants to discontinue participation, the provider must send written notification to the managed care health plan, as well as to TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment.

"Managed Care" on page 7-1.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.1.5 Eligibility for a Medical Checkup

Through outreach THSteps staff (the Department of State Health Services [DSHS], the Texas Health and Human Services Commission [HHSC], or contractors) encourage clients to use THSteps preventive medical checkup services when they first become eligible for Medicaid and each time thereafter when they are periodically due or overdue for their next medical checkup.

Providers are encouraged to perform checkups on any client they identify as eligible for medical checkups. They also are encouraged to notify clients when they are due for the next checkup according to the THSteps periodicity schedule.

The client is periodically eligible for medical checkup services based on the THSteps Periodicity Schedule. A THSteps statement under the client's name on the regular client Medicaid Identification (Form H3087) and the State of Texas Access Reform (STAR) Identification (Form H3087 STAR) indicates the THSteps services for which the client is currently eligible. A check mark on the Medicaid Identification (Form H3087) and the STAR Identification (Form H3087 STAR) indicates eligibility for the particular service, such as eye exam, eye glasses, hearing aid, intermediate care facility for the mentally retarded (ICF-MR) dental, prescriptions, and medical services. A blank space denotes that the client is not eligible for the particular service based on available data.

Checkups provided when a THSteps statement does not indicate a medical checkup is due must be billed as an exception to the periodicity schedule.

Refer to: "Exceptions to Periodicity" on page 43-9 for further details about billing for a checkup performed as an exception to periodicity.

Although the Medicaid Eligibility Verification (Form H1027) identifies eligible clients when the client Medicaid Identification (Form H3087) is lost or has not yet been issued, Form H1027 does not indicate periodic eligibility for medical checkup services. Providers can call the TMHP Contact Center at 1-800-925-9126 or check the TMHP website at www.tmhp.com, to verify a client's periodic eligibility for medical checkup services.

43.1.5.1 Newborn Eligibility

A newborn child may be eligible for Medicaid for up to one year if the child's mother is:

- Receiving Medicaid at the time of the child's birth
- Eligible for Medicaid or would be eligible if pregnant
- Living with the child

If the newborn has Medicaid coverage, it is *not* acceptable for a provider to require a deposit for newborn care from the guardian. The child's eligibility ends if the child's mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother's household. The hospital or birthing center must report the birth to HHSC Eligibility Services at the time of the birth.

If the hospital or birthing center notifies HHSC Eligibility Services that a newborn child was born to a Medicaid-eligible mother, then the hospital caseworker, mother, and attending physician (if identified) should receive a Medicaid Eligibility Verification (Form H1027) from HHSC a few weeks after the child's birth. The H1027 form includes the child's Medicaid number and effective date of coverage. After the child has been added to the HHSC eligibility file, a client Medicaid Identification (Form H3087) is issued.

Note: *Claims submitted for services provided to a newborn eligible for Medicaid must be filed using the newborn child's Medicaid number. Claims filed with the mother's Medicaid number cause a delay in reimbursement.*

The Medicaid number on the Medicaid Eligibility Verification (Form H1027) may be used to identify newborns eligible for Medicaid.

Refer to: "Medicaid Identification Form H3087" on page 4-18.

43

43.1.6 Reimbursement

Physicians are reimbursed for THSteps medical checkups and administration of immunizations in accordance with 1 TAC §355.8085. High volume payments to physicians are detailed in "Additional Payments to High-Volume Providers" on page 2-6 of this manual. THSteps medical checkups provided in an FQHC are reimbursed in accordance with 1 TAC §355.8261.

THSteps medical checkups may be billed electronically or on a CMS-1500 claim form. Providers may request information about electronic billing or the claim form by contacting the TMHP THSteps Contact Center at 1-800-757-5691.

Only services provided are considered for reimbursement. In accordance with federal policy, the Texas Medicaid Program and Medicaid clients cannot be charged when a client does not keep an appointment.

The $70 THSteps medical checkup fee includes payment for tuberculosis (TB) skin tests and collecting the blood specimens for all required laboratory services included on the checkup periodicity schedules. Vaccines, TB skin tests and supplies, laboratory supplies, and laboratory testing are made available free of charge to medical checkup providers through DSHS.

THSteps visits will not be reimbursed if performed through telemedicine.

A $5 reimbursement is made for each immunization administered during the medical checkup visit. Combined antigen vaccines (e.g., DTaP or MMR) are reimbursed as one dose. Vaccines that are available through the DSHS Texas Vaccine for Children (TVFC) Program (from birth through 18 years of age) will not be reimbursed. No reimbursement is made for performing the TB skin test, but all clients should be brought back to the provider's office for a THSteps follow-up visit to read the skin test.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.1.6.1 Medical Checkup

A complete THSteps medical checkup is reimbursed at a maximum fee of $70 for children covered under the traditional fee-for-service Medicaid Program. Except for PCCM, reimbursement for THSteps medical checkups for children enrolled in the Medicaid Managed Care Program must be contractually negotiated between the provider and the child's or adolescent's managed care organization (MCO). PCCM providers are reimbursed at the traditional fee-for-service rate of $70. Providers in areas of the state covered by Medicaid Managed Care should refer to "Managed Care" on page 7-1 for more information about reimbursement and referrals.

All components of the THSteps medical checkup are included in the reimbursement for the visit. A provider's billing for services is acknowledging the completion of a comprehensive medical checkup in accordance with THSteps policy. The visit is a comprehensive medical checkup and must include all age-appropriate assessments, screenings, immunizations, and laboratory tests as indicated on the periodicity schedule. Specifically, a component with an available Current Procedural Terminology (CPT) code is not reimbursed separately on the same day as a medical checkup.

Information concerning the components required at specific ages can be found on pages 43-16 and 43-17 for birth through 20 years of age.

Services performed in an FQHC or RHC setting are paid an all-inclusive rate per visit. For services performed in an RHC, providers must use the appropriate national place of service code (POS) 72 for an RHC setting. An FQHC provider must bill all THSteps visits with modifier EP in addition to the modifiers used to identify who performed the medical checkup.

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24 for billing instructions.

Reminder: *A complete checkup is an assessment provided in accordance with mandated procedures and the narrative standards outlined for each procedure. Incomplete medical checkups are not reimbursed.*

Providers may bill up to nine visits, regardless of the date of the last medical checkup, in the first two years of life. All of the checkups listed on the periodicity schedule have been developed based on recommendations of the American Academy of Pediatrics (AAP). In Texas, the THSteps program has modified the AAP periodicity schedule based on the scheduling of a test in federal EPSDT regulations or other programs or to meet the population's needs.

When the THSteps provider who performs the checkup determines that a referral for diagnosis and treatment is necessary for a condition found during the checkup, the referral should be made to a provider who is qualified to perform diagnostic or treatment services.

If the provider performing the medical checkup can provide treatment for the identified condition, a separate claim for an established patient office visit may be submitted on the same day as the checkup with an appropriate established patient CPT code for the diagnosis and treatment of the identified problem.

Exception: *Medicaid Managed Care clients must be referred to their designated primary care provider for further treatment or referral.*

Refer to: "Referrals for Medicaid-Covered Services" on page 43-13 for information about treatment or acute care visits on the same day as a medical checkup or other referral information.

For the acute care claim, providers must bill the CPT codes for evaluation and management of *established* patients with an appropriate diagnosis documented. Often minor illnesses or conditions (e.g., follow-up of a mild upper respiratory infection) during the THSteps medical checkup do not warrant additional billing.

43.1.6.2 Newborn Examination

Inpatient newborn examinations billed with procedure codes 1-99431 and 1-99432 are counted as THSteps medical checkups and must include all the necessary components.

The required components of the initial THSteps newborn checkup must meet THSteps requirements and must include the following documentation:

- History and physical examination
- Length, height, weight, and head circumference
- Sensory screening (vision and hearing appropriate to age)
- Hepatitis B immunization
- Mandated initial newborn screen at 24–48 hours of age
- Health education with the parents or a responsible adult who is familiar with the child's medical history. Health education by the nursing staff, individually or in a class, is acceptable

Note: *In Texas the newborn hearing screening is included in the in-hospital newborn exam.*

Providers must include and document the required components when billing procedure codes 1-99431 or 1-99432 to the Texas Medicaid Program.

If the provider chooses to do a brief examination (not including all the above components), the provider may bill procedure code 1-99431 or 1-99432 with modifier 52, which does not count as a THSteps checkup.

Providers billing these newborn codes are not required to be THSteps providers, but they must be enrolled as Medicaid providers. TMHP encourages THSteps enrollment for all providers that offer a medical home for clients and provide them with well-child care and immunizations. Physicians and hospital staff are encouraged to inform parents eligible for Medicaid that the next THSteps checkup on the periodicity schedule should be scheduled at 1 to 2 weeks of age and that regular checkups should be scheduled during the first year.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.1.6.3 Medical Checkup, First 6 Days of Life

To encourage early checkups for high-risk but healthy newborns, providers may bill a THSteps medical checkup in the first six days of life as an exception to periodicity. A physical examination is important if the child has been discharged early from the hospital or if the infant was born outside of a hospital. A home visit may be especially helpful for first-time mothers. The first regular checkup should still be scheduled at 1 to 2 weeks of age, is also reimbursable, and should include the second newborn screen.

The exception-to-periodicity checkup performed in the first six days of life may be performed in a clinic, provider's office, or the family's home. If the checkup is performed in the home, the provider must be designated by the discharging physician or the medical home physician before discharge and must provide a timely report of findings and recommendations to the infant's medical home.

Refer to: "Medical Home Concept" on page 43-11.

A THSteps medical checkup in the first six days of life, billed as an exception to periodicity, must include the following:

- Neonatal and family history
- Review of systems
- Height, weight, and head circumference
- Physical and nutritional assessment
- Vision and hearing screening
- Age-appropriate immunization
- Assessment of the mental health status of the infant and mother
- Anticipatory guidance

The metabolic screening should only be obtained if not obtained before discharge from the hospital. The repeat metabolic screening should be completed at the one- or two-week visit. If a potential or confirmed medical problem requires monitoring, it is recommended that the infant be seen in a clinic or medical provider's office, and Medicaid should be billed using codes for a sick child.

43.1.6.4 Exceptions to Periodicity

Payment is made for medical checkups that are exceptions to the periodicity schedule to allow for services under the following categories:

- Medically necessary (such as developmental delay or suspected abuse)
- Environmental high-risk (such as sibling of a child with elevated blood lead)
- Required to meet state or federal exam requirements for Head Start, daycare, foster care, or pre-adoption
- Required for dental services provided under general anesthesia
- Medically necessary checkup in the first six days of life

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24 for billing instructions.

THSteps medical exception to periodicity services must be billed with the same procedure codes, provider type, modifier, and condition indicators as a medical checkup. Additionally, providers must use modifiers SC, 23, and 32 to indicate the exception.

Note: *Modifier 23 refers to children receiving a medical checkup prior to general anesthesia related to dental procedures.*

Note: *The visit is not required to be billed as an exception when the child is eligible for Medicaid or the child is new to Medicaid and the checkup will be the initial medical checkup. If an exception is not required, the claim should be submitted without the use of the modifiers.*

43.1.6.5 Follow-up Medical Checkup Visit

A follow-up checkup visit is reimbursed at a maximum fee of $6 except for services performed in an RHC or FQHC setting. Follow-up checkups may be needed when required to complete necessary procedures related to the THSteps checkup (e.g., to read a TB skin test, transportation and outreach work required by the provider to read a TB skin test, administering immunizations in cases where the child's immunizations were not up-to-date or medically contraindicated on the initial visit, and repeating laboratory work). An additional $5 administrative fee is paid for each immunization (injection), except for services performed in an RHC or FQHC setting. Combined antigen vaccines (e.g., DTaP or MMR) are reimbursed as one dose. A return visit to follow up on treatment initiated during the screen or to make a referral is not to be filed as a follow-up visit.

Follow-up visits may not be billed on the same day as a THSteps visit.

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24.

A THSteps medical checkup follow-up visit must be billed with a THSteps provider identifier to be considered a THSteps visit. FQHCs must bill the same procedure with modifier EP.

When billing for a THSteps medical checkup follow-up visit, providers must use national procedure code S-99211. Usually, the necessary components are minimal and may not require the presence of a physician. Typically, five minutes are spent performing or supervising these services.

43.1.7 Verification of Medical Checkups

The first source of verification that a THSteps medical checkup has occurred is a paid claim or encounter. THSteps encourages providers to file a claim either electronically or on a CMS-1500 claim form as soon as possible after the date of service, as the paid claim updates client information, including the Medicaid Identification.

CPT only copyright 2005 American Medical Association. All rights reserved.

The second source of acceptable verification is a physician's written statement that the checkup occurred. If the provider chooses to give the client written verification, it must include the child's name, Medicaid ID number, date of the medical checkup, and a notation that a complete THSteps medical checkup was performed.

If neither the first nor the second source of verification is available, a THSteps staff member may contact the provider's office for verification.

43.1.8 Claims Information

43.1.8.1 Procedure Coding for THSteps Medical Checkups

THSteps medical checkups must be billed with the appropriate procedure codes (S-99381, S-99382, S-99383, S-99384, S-99385, S-99391, S-99392, S-99393, S-99394, and S-99395). Procedure codes S-99385 and S-99395 are restricted to clients 18 through 20 years of age for a THSteps medical checkup.

Condition indicators must be used to describe the results of the checkup. A condition indicator must be entered on the claim with the periodic medical checkup visit procedure code. Additional indicators are required based on whether a referral was made or not.

If a referral was made, providers must use the Y referral indicator. If no referral is made, providers must use the N referral indicator.

Procedure Codes for THSteps Medical Checkups

The ST condition indicator should only be used when a referral is made to another provider or the client must be rescheduled for another appointment with the same provider. It does not include treatment initiated at the time of the checkup.

Providers must use type of service (TOS) S when billing for the following THSteps medical checkup services:

TOS	Procedure Codes	Referral Indicator	Condition Indicator
S	S-99381, S-99382, S-99383, S-99384, and S-99385 (New client preventive visit) *or* S-99391, S-99392, S-99393, S-99394, and S-99395 (Established client preventive visit)	N (No referral given)	NU (Not used)
S	S-99381, S-99382, S-99383, S-99384, and S-99385 (New client preventive visit) *or* S-99391, S-99392, S-99393, S-99394, and S-99395 (Established client preventive visit)	Y (Yes THSteps/ EPSDT referral was given to the client)	S2 (Under treatment) *or* ST (New services requested)

Modifiers AM, SA, TD, and U7 must be used to indicate the practitioner who performed the unclothed physical examination on the medical screen.

Services performed in an FQHC or RHC setting are paid an all-inclusive rate per visit. If services are performed in an RHC, providers must use the appropriate national place of service code (72) for an RHC setting. *An FQHC provider must bill all THSteps visits with modifier EP in addition to one of the above modifiers used to identify who performed the medical checkup.*

Submit claims for THSteps medical services to TMHP in an approved electronic format or on a CMS-1500 claim form.

43.1.8.2 Immunizations Billed Within THSteps Medical Checkups, Exception to Periodicity, and Follow-Up Visit

Diagnosis code V202 is *required* to be used with the combination of the procedure code and the appropriate vaccine administration code from the table located in Section 43.1.8.3. Providers must use their THSteps provider identifier and TOS S.

43.1.8.3 Immunizations Billed Outside of THSteps Medical Checkups, Exception to Periodicity, or Follow-Up Visit

Diagnosis code V069 is required to be used with the procedure codes 1-90465, 1-90466, 1-90467, 1-90468, 1-90471, 1-90472, 1-90473, and 1-90474 in combination with the appropriate vaccine administration code in the following table. Providers must use their regular Medicaid provider identifier and TOS 1.

For all immunizations, if only one immunization is administered during a checkup or visit, providers should bill administration procedure code 1/S-90471 or 1/S-90473 with a quantity of 1 in addition to the appropriate national code that describes the immunization administered. If two or more immunizations are administered, providers should bill administration procedure codes 1/S-90465, 1/S-90467, 1/S-90471, or 1/S-90473 with a quantity of 1, procedure codes 1/S-90466, 1/S-90468, 1/S-90472, or 1/S-90474 with a quantity of 1 or more (depending on the number of vaccines administered), and the appropriate national procedure codes that describe each immunization administered. The procedure codes that identify each vaccine are considered informational but are required on the claim.

Vaccine Procedure Codes		
1/S-90632	1/S-90633	1/S-90645
1/S-90646	1/S-90647	1/S-90648
1/S-90655	1/S-90656	1/S-90657
1/S-90658	1/S-90669	1/S-90700
1/S-90701	1/S-90702	1/S-90707
1/S-90710	1/S-90712	1/S-90713
1-90715	1/S-90716	1/S-90718
1/S-90720	1/S-90723	1-90734

CPT only copyright 2005 American Medical Association. All rights reserved.

Vaccine Procedure Codes		
1-90740	1-90743	1/S-90744
1/S-90746	1-90747	1/S-90748
1/S-90749		

Exception: *Medical contraindications and exclusions from immunizations for reasons of conscience (including a religious belief and parental/client refusal) are the only acceptable reasons for not administering immunizations.*

Refer to: "Immunizations Overview" on page H-2 for exclusions from immunizations.

43.1.8.4 Billing

Providers should bill the usual and customary fee. Providers are reimbursed the lesser of the billed amount or the maximum allowable fee. THSteps providers do not have to bill private insurance; they can bill TMHP directly. A medical checkup has a maximum fee of $70, immunization administration (per injection) has a maximum fee of $5, and a medical checkup follow-up visit has a maximum fee of $6.

Important: *All procedures, including the informational-only procedures, must have a billed amount associated with each procedure listed on the claim.*

The procedure code on the claim form indicates whether referral for diagnosis and treatment is needed for eligible clients; consequently, all information *must* be accurate.

The following are instructions for completing the CMS-1500 form when billing a THSteps medical checkup:

- The diagnosis code in Block 21.1 of the CMS-1500 is always V202. Electronic billers also use V202.
- Type of service on the CMS-1500 (Block 24C) is always S.
- POS on the CMS-1500 (Block 24B) is 1, Alpha O, or 11 for electronic billers. For services provided in an RHC setting, providers must use national POS 72.
- Patient records must reflect that each of the required screening procedures was completed in accordance with the medical checkup periodicity schedules based on the child's age.

Providers must record the following on the CMS-1500 claim form to receive reimbursement for a medical checkup:

- Appropriate THSteps medical checkup procedure code (all ages)
- TB skin test procedure code, if administered (1 through 20 years of age)
- Immunization administration and vaccine procedure code(s) if administered (all ages)
- Condition indicators
- Provider type modifiers
- EP modifier, if appropriate

Submit claims to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

43.1.8.5 Claim Filing Resources

Refer to the following sections and/or forms for claims filing information:

Resource	Page Number
CMS-1500 Claim Filing Instructions	5-24
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
Diagnosis and Treatment (Referral from THSteps Checkup) Claim Form Example	D-11
THSteps Complete Medical Checkup (CMS-1500) Claim Form Examples	D-34
Acronym Dictionary	F-1

43.1.9 THSteps Medical Checkup Facilities

All THSteps medical checkup policies apply to examinations completed in a physician's office, a health department, clinic setting, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a physician or clinic name. Mobile units can be a van or any area away from the primary office and are considered extensions of that office and are not separate entities.

The physical setting must be appropriate so that all elements of the checkup can be completed. For specific information, review the periodicity schedules and narrative explaining the schedules.

43.1.9.1 Medical Home Concept

HHSC and DSHS encourages providers participating in the Texas Medicaid Program to practice the "medical home concept" for clients with Medicaid. To realize the maximum benefit of health care, each family and individual needs to be a participating member of a readily identifiable, community-based medical home.

The medical home provides primary medical care and preventive health services and is the individual's and family's initial contact point when accessing health care. It is a partnership among the individual and family, health care providers within the medical home, and extended network of consultative and specialty providers with whom the medical home has an ongoing and collaborative relationship.

The providers in the medical home are knowledgeable about the individual's and family's specialty care and health-related social and educational needs and are connected with necessary resources in the community that will assist the family in meeting those needs.

CPT only copyright 2005 American Medical Association. All rights reserved.

When referring for consultation, specialty/hospital services, and health and health-related services, the medical home maintains the primary relationship with the individual and family, keeps abreast of the current status of the individual and family through a planned feedback mechanism, and accepts them back into the medical home for continuing primary medical care and preventive health services.

43.1.9.2 Continuity of Care and the Medical Home

The individual providing the medical checkup must ask the parents whether the child has a private physician or a medical home where the child usually receives medical care.

If the child's medical home provides THSteps checkups, it is in the child's and family's best interest for providers to encourage that relationship. If the family has a medical home but prefers to have their checkup done by another provider, that provider should send a copy of the THSteps medical checkup records examinations to the primary care provider.

If the medical checkup provider is unable to offer a medical home to the child, that provider must enter into written agreements with providers who are willing to offer medical homes.

43.1.9.3 Mobile Units and the Medical Home

If a provider has mobile units functioning in different communities, the agreements with providers who are willing to offer the medical home must be signed in each community so that children are referred to local providers for medical homes.

Providers with mobile units must advise families that they have freedom of choice concerning who completes the medical checkups.

43.1.10 THSteps Dental Services

Access to THSteps dental services is mandated by Medicaid and provides reimbursement for the early detection and treatment of dental health problems for Medicaid-eligible clients younger than 21 years of age. THSteps dental service standards were designed to meet federal regulations and to incorporate the recommendations of representatives of dental professional groups in the state.

OBRA of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which federal financial participation (FFP) is available, regardless of the limitations of the Texas Medicaid Program. This expansion is referred to as the CCP.

Refer to: "THSteps-CCP Overview" on page 43-33 for more information.

43.1.11 How the THSteps Dental Program Works

THSteps-designated staff (HHSC, DSHS, or contractor), through outreach and information, encourages the parents or caregivers of eligible children to use THSteps dental checkups and prophylactic care when children first become eligible for Medicaid and each time children are periodically due for their next dental checkup.

Upon request THSteps-designated staff (HHSC, DSHS, or its contractor) assists the parents or caregivers of eligible children with scheduling of appointments and transportation. Medicaid clients have freedom of choice of providers and are given names of enrolled providers. Call the DSHS THSteps Hotline at 1-877-847-8377 for a list of THSteps dental providers in a specific area.

When a child is eligible for a THSteps dental checkup, a message is present on the Medicaid Identification (Form H3087 or H3087 STAR) under the child's name. If the child or caregiver believes the child is due for a dental checkup and a message is not present, the provider may contact TMHP through the TMHP website at www.tmhp.com or the Automated Inquiry System (AIS) at 1-800-925-9126 to verify that the child is due for a dental checkup.

Children may receive an initial THSteps dental checkup at 12 months of age and a periodic dental checkup every 6 months thereafter, through 20 years of age. Children younger than 12 months of age are not eligible for *routine* dental examinations; however, they may be referred when a medical checkup identifies the medical necessity for dental services. All THSteps clients younger than 21 years of age can be seen by the dentist at any time for emergency dental services for trauma, early childhood caries, or any other appropriate dental or therapeutic procedure.

Clients up to 21 years of age may self-refer for dental services.

Note: *Clients enrolled in Medicaid Managed Care are required to choose a provider in their health plan's network. The health plan does not reimburse for services rendered by nonparticipating providers. Please contact the specific health plan for enrollment information.*

43.1.12 Vision Services

Appropriate vision screening is a mandatory part of each medical checkup visit.

Additionally, vision exams and services include eye examinations with refraction and eyeglasses. Eyeglasses are available once every 24 months. Eye examinations are available once per state fiscal year (SFY) (September 1 through August 31). This limit does not apply if the examination is for aphakia, disease, injury of the eye, or if medically necessary (for eyeglasses, defined as a 0.5 diopter change in one eye). Replacement of lost or destroyed eyewear is a benefit for THSteps-eligible clients.

CPT only copyright 2005 American Medical Association. All rights reserved.

Refer to: "Vision Screening" on page 43-21 for information about vision screening for children and adolescents.

"Vision Care (Optometrists, Opticians)" on page 45-1 for more information.

43.1.13 Hearing Services

Appropriate hearing screening is a mandatory part of each medical checkup.

Additionally, hearing exams and services, including hearing aids, are available when medically necessary. Payment for services to eligible clients received through approved Program for Amplification for Children of Texas (PACT) providers is made through PACT at DSHS.

Refer to: "Inpatient Hearing Screening" on page 43-21 for information about hearing screening for children and adolescents.

43.1.14 Referrals for Medicaid-Covered Services

When a provider performing a checkup determines that a referral for diagnosis or treatment is necessary for a condition found during the medical checkup, that information must be discussed with the parents. A referral should be made to a provider who is qualified to perform the necessary diagnosis or treatment services. Medicaid Managed Care clients must be referred to their designated primary care provider for further treatment or referral.

A provider needing assistance to find a specialist that accepts patients with Medicaid coverage can call the DSHS THSteps Hotline at 1-877-847-8377.

Effort should be made to maintain continuity of care including follow-up to determine that the appointment was kept and that the provider receiving the referral has provided diagnosis and recommendations for further care to the referring provider.

If the provider performing the medical checkup can provide treatment for the condition identified, a separate claim (CMS-1500 or HCFA-1450 [UB-92]) may be submitted for the same date of service as the checkup with an appropriate established patient office visit for the diagnosis and treatment of the identified problem.

For the acute care claim, an appropriate level CPT code for evaluation and management (E/M) of *established* patients should be selected with the diagnosis supporting this additional billing documented. Not all minor illnesses or conditions, such as follow-up of a mild upper respiratory infection, identified during the THSteps medical checkup warrant additional billing. The billing of an additional office visit is only appropriate if the additional evaluation and treatment is required and performed for the identified condition(s). This additional service, since it is billed as an acute care claim to Medicaid, is independent of the THSteps medical checkup and is viewed as a stand-alone service. Consequently, the medical record must contain documentation that supports the medical necessity and the level of service of the E/M code submitted for reimbursement.

In addition to referrals for conditions discovered during a checkup or for specialized care, the following referrals may be used:

- *Routine Dental Referrals.* Routine dental referrals are required for all children at 1 year of age and every six months thereafter through 20 years of age (see "THSteps Dental Services" on page 43-12). Children younger than 12 months of age are not eligible for *routine* dental examinations; however, they may be referred when a medical checkup identifies the medical necessity for dental services. Children younger than 12 months of age also can be seen for emergency dental services by the dentist at any time for trauma, baby bottle tooth decay, or other oral health problems, such as early childhood caries. *Clients up to 21 years of age may also self-refer for dental care.*
- *Emergency Dental Referrals.* If a medical checkup provider identifies an emergency need for dental services, such as bleeding, infection, or excessive pain, the client may be referred directly to a participating dental provider. Emergency dental services are covered at any time for all THSteps clients eligible for Medicaid up to 21 years of age.

Note: *In cases of both emergency and nonemergency dental services, clients have freedom of choice in selecting a dental provider who is participating in the THSteps Dental Program.*

- *Family Planning and Genetic Services Referrals.* For people eligible for Medicaid needing genetic services or family planning services, a referral should be made. Information about Medicaid-covered genetic services is available in "Genetic Services" on page 22-1 and information about family planning services is available in "Family Planning Services" on page 20-1. If the THSteps medical provider also provides family planning, the provider may inform the client of the availability of these services.
- *THSteps-CCP Services Referrals.* CCP benefits are medically necessary services for which FFP is available and may not currently be covered by Texas Medicaid (e.g., orthotics, private duty nursing, and others), as well as expanded coverage of current services that have limitations.

Refer to: "Hearing Referrals" on page 43-22 for referrals following a hearing screening.

"Medicaid Managed Care" on page 7-4 for more information on referrals for providers in areas of the state covered by Medicaid Managed Care.

"THSteps-CCP Overview" on page 43-33 for more information.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.1.15 Texas Vaccines for Children Program

For Medicaid children younger than 19 years of age, the TVFC program provides free vaccines that are routinely recommended according to the *Recommended Childhood Immunization Schedule* (Advisory Committee on Immunization Practices [ACIP], AAP, and the American Academy of Family Physicians [AAFP]). To obtain free vaccines for children birth through 18 years of age, THSteps providers must enroll in TVFC at DSHS. There is no reimbursement to providers for vaccines available from TVFC.

Refer to: Appendix H, "Immunizations" on page H-1 and "TVFC Provider Enrollment (3 Pages)" on page C-97 for more information about enrolling as a TVFC provider.

43.1.16 Benefits and Limitations

Medical checkup services are covered for clients younger than 21 years of age when delivered in accordance with the THSteps Medical Checkups Periodicity Schedule, which specifies the screening procedures recommended at each stage of the client's life and identifies the time period based on the client's age when medical checkup services are reimbursable.

Important: *Providers should treat each THSteps visit as the only opportunity for a client's comprehensive assessment.*

In acknowledgment of the practical situations that occur in the office or clinic settings, the periodicity schedule published in this manual has stressed the philosophy that the components of the THSteps medical checkup should be completed according to the individual child's appropriate needs. If a component cannot be completed because of a medical contraindication of a child's condition, then a follow-up visit is necessary.

Client eligibility for a medical checkup is determined by the client's age on the first day of the month. If a client has a birthday on any day except the first day during the month, the new eligibility period begins on the first of the following month. If a client turns 21 years of age during a month, the client continues to be eligible for THSteps services through the end of that month.

If components of the THSteps checkup have been provided one month preceding the child's birthday month and the medical checkup occurs in the following month, providers should clearly refer to that previous documentation, including the date(s) of service in the current clinical notation, and add appropriate new documentation for the checkup currently being billed.

All components of the THSteps medical checkup are included in the reimbursement of the visit. The visit is a comprehensive medical checkup and must include all assessments, screenings, immunizations, and laboratory tests as indicated on the periodicity schedule. Specifically, when there is an available CPT code for a component, it is not reimbursed separately on the same day as a medical checkup.

Sports examinations are not a covered Medicaid service. If the child or adolescent is due for a THSteps medical checkup and a comprehensive medical checkup is completed, a THSteps medical checkup may be reimbursed.

Providers should call TMHP THSteps Medical Inquiries at 1-800-757-5691 with questions about the THSteps medical checkups. The line is available from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

Clients that are eligible for Medicaid and have questions about the THSteps program should call the DSHS THSteps Hotline at 1-877-847-8377. Clients with questions about their Medicaid eligibility for the THSteps program should be directed to their caseworker at the local HHSC office or site.

43.1.17 Information and Assistance

43.1.17.1 Assistance with Program Concerns

Providers that have questions, concerns, or problems with program rules, policy, or procedure should contact DSHS regional program staff. THSteps staff contact numbers can be found in Appendix A, Section A.7 "DSHS Health Service Region Contacts" on page A-8, or on the THSteps website, www.dshs.state.tx.us/thsteps/default.shtm, or by calling THSteps at 1-512-458-7745.

THSteps regional staff make routine contact with providers to educate and assist providers with THSteps program policies and procedures.

43.1.17.2 Assistance with Claims Concerns

Providers with questions, concerns, or problems about claims should contact the TMHP Contact Center at 1-800-925-9126. For regional contact information, providers can refer to the TMHP website at www.tmhp.com/Providers/default.aspx then click on the *Regional Support* link.

43.2 Clinical Information

This section contains specific information about medical and dental services. For more specific administrative information, see "THSteps Medical and Dental Administrative Information" on page 43-5.

43.2.1 Documentation of Completed Checkups

To assure completion of comprehensive medical checkups and the quality of care provided, providers must document all components of the THSteps medical checkups as they are completed. Clinical charts are subject to quality review activities including random chart review and focused studies of well-child care.

In acknowledgment of the practical situations that occur in the office or clinic settings, the AAP has stressed the philosophy that the components of all medical checkups

CPT only copyright 2005 American Medical Association. All rights reserved.

should be performed that are appropriate to the needs of the individual child. Consequently, completion of all recommended components of a THSteps medical checkup may require follow-up checkups.

The Centers for Medicare & Medicaid Services (CMS) has clarified, in its Medicaid Guide To State Entities, the following expectations for the content of comprehensive preventive health visits:

- Comprehensive health history, including developmental and nutritional assessment.
- Comprehensive unclothed physical examination, including graphic recording of head circumference.
- Appropriate immunizations as indicated in the Recommended Childhood and Adolescent Immunization Schedule - United States.
- Age-appropriate laboratory tests for anemia, lead poisoning, and newborn screening.
- Health education, including anticipatory guidance, is required.
- Age-appropriate vision and hearing screening.
- Direct referral to dental checkups beginning at 12 months of age.

43.2.2 THSteps Medical Checkups Periodicity Schedule

The client is periodically eligible for medical checkup services based on the THSteps medical checkups periodicity schedule. All the checkups listed on the periodicity schedule have been developed based on recommendations of the AAP. The AAP continues to emphasize the importance of separate counseling and anticipatory guidance for the child and the accompanying parent/guardian during the adolescent years. In Texas the THSteps program has modified the AAP periodicity schedule based on the scheduling of a test in federal EPSDT regulations, state statutes or other programs, or to meet the population's needs.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.2.2.1 THSteps Medical Checkups Periodicity Schedule for Infants, Children, and Adolescents (Birth Through 20 Years of Age)

The columns across the top of the schedule indicate the age a client is periodically eligible for a medical checkup. The first column on the left of the chart identifies each procedure that must be performed at each appropriate age. (See Key at bottom of page and Footnotes on the following page.)

Key

● Required, unless medically contraindicated or because of parent's reasons of conscience including a religious belief.

✔ Required as above, unless already provided on a previous checkup at the required age and documented on the health record with the date of service.

✚ If answers on high risk assessment questionnaires or other screening show a risk factor, further screening is required. Refer to Footnotes for more information about marked items.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.2.2.2 THSteps Medical Checkups Periodicity Schedule for Infants and Children (Birth Through 20 Years of Age) (continued)

Footnotes

1. If a child comes under care for the first time at any point on the schedule or if any procedures are not accomplished at the appropriate age, the client must be brought up-to-date with required procedures as soon as possible.
2. Screening for adolescent lifestyle risk factors is to include eating disorders, sexual activity, alcohol (and other drug use), tobacco use, school performance, depression, and risk of suicide.
3. An age-appropriate complete unclothed physical exam is required at each checkup. Older children are to be appropriately draped. For adolescents who are sexually active, a pelvic exam should be part of the examination.
4. Developmental screening:
   a. Medical checkups completed by physicians, physician assistants, and advanced practice nurses (pediatric nurse practitioners and family nurse practitioners) conducting THSteps checkups for children birth up to and including the six-year medical check-up must include:
      - A standardized developmental screen (the provider's choice of observational or parent questionnaire) for a child between 9 through 12 months of age, 18 through 24 months of age, and every other year thereafter.
      - Standardized screening should also be conducted if a parent expresses concern about the child's developmental progress.
      - Developmental screening at all other visits to include a review of milestones (gross and fine motor skills; communication skills, speech-language development; self help/care skills; social, emotional, and cognitive development) and mental health.

   b. Registered nurses conducting THSteps medical checkups for children birth up to and including the six-year medical check-up are required to conduct:
      - A standardized observational screen for children in the following age groups: 9 through 12 months of age; 18 through 24 months of age; and if the child does not have a record of a standardized observational developmental screen, again between 24 months up to and including the six-year medical check-up.
      - A standardized parent questionnaire at all other periodic visits birth up to and including the six-year medical check-up or when a parent expresses concern about the child's developmental progress.
5. Sensory screening:
   a. Vision:
      - Birth through 2 years of age—Screening includes history of high-risk conditions, observation, and physical examination.
      - Ages 3 through 10, 12, 15, and 18 years of age—Screening includes administration of an age-appropriate vision chart. Documentation of test results from a school vision screening program may be used if conducted within 12 months of the checkup.

   b. Hearing:
      - Birth through 3 years of age—Screening includes history, observation, and screening by use of the Parent Hearing Questionnaire.
      - Ages 4 through 10, 12, 15, and 18 years of age—A puretone audiometer should be used to screen hearing at checkups. Subjective screening may be completed at all other checkups. Documentation of results from a school audiometric screening program may be used if conducted within 12 months of the checkup.
6. In areas of low prevalence, administer the Tuberculosis (TB) Questionnaire annually beginning at 1 year of age. In areas of high prevalence, administer the TB skin test at 1 year of age, once between 4 through 6 years of age, and once between 11 through 17 years of age. Administer the TB Questionnaire annually beginning at 2 years of age and thereafter at other checkups. All clients should return for the provider to read the skin test. The TB Questionnaire is available in the *Texas Medicaid Provider Procedures Manual* (TMPPM).
7. All blood specimens are to be submitted to the DSHS Laboratory for analysis.
8. Newborn screening (hereditary/metabolic testing [hypothyroidism, PKU, galactosemia, sickle Hgb, and CAH]) is required by Texas law before hospital discharge and again between 1 and 2 weeks of age. Date and results of the second newborn screening are to be documented.
9. Hemoglobin (Hgb) and hematocrit (Hct) testing conducted at a Women, Infants, and Children (WIC) clinic or in a provider's office is acceptable within one month if date and value are documented.
10. Mandatory blood lead screening at 12 and 24 months of age. The Lead Exposure Questionnaire (available in the TMPPM) is acceptable at other visits.
11. If Hgb type has been performed previously and results are documented in the client's chart, it does not need to be repeated. Hgb type also is part of the newborn screening.
12. Hyperlipidemia screening should be completed for those at risk of increased levels of cholesterol (THSteps does not provide a formal questionnaire).
13. Children should be screened for risk of Type II diabetes. Fasting glucose screening should be obtained for those at risk of Type II diabetes.
14. For sexually active or high-risk adolescents, screening is to include evaluation for genital warts, cultures for gonorrhea and chlamydia, and blood test for syphilis.
15. While all adolescents should be screened for the risk of human immunodeficiency virus (HIV) infection, actual testing is voluntary.
16. The first Pap smear should be obtained at 21 years of age, 3 years from the onset of sexual activity, or at another age based on provider discretion.
17. Clients are not to be referred to the local health department for immunizations. Vaccines must be obtained from the Texas Vaccines for Children Program at DSHS and administered at the time of the checkup, unless medically contraindicated or because of parent's reasons of conscience including a religious belief.
18. Dental referrals are required for all patients beginning at 1 year of age. Patients are eligible for preventive dental checkups every six months thereafter, as well as emergency dental treatment at any time.
19. Counseling/anticipatory guidance is a required integral part of each checkup and must be face-to-face with the child's parent/caretaker and face-to-face with adolescents.

Note: Additional information is available in the TMPPM. To quickly reference the subjects listed above, refer to the manual's Index or use the Search tool available in the electronic edition.

43.2.3 Medical Checkups for Infants, Children, and Adolescents (Birth Through 20 Years of Age)

The following information lists descriptions and standards for each pediatric assessment and test that must be performed during a THSteps medical checkup in accordance with the periodicity schedule. The checkup includes face-to-face contact with the child's or adolescent's parent or guardian.

Refer to: "THSteps Medical Checkups Periodicity Schedule for Infants, Children, and Adolescents (Birth Through 20 Years of Age)" on page 43-16.

43.2.3.1 History

The child's or adolescent's initial history must include the following:

- Family medical history
- Neonatal history
- Physical and mental health history
- Developmental history
- Immunization history
- History of feeding or nutrition problems
- A complete review of body systems

Subsequent histories may be specific for the child's or adolescent's age and health history.

The history must be obtained from an adult caregiver familiar with the child and the child's health history. Preferably, the adolescent and the parent should be interviewed separately.

Refer to: "Additional Adolescent Screening" on page 43-26 for more history/screening information for adolescents.

43.2.3.2 Physical

A complete physical examination is required at each visit, with infants totally unclothed and older children undressed and suitably draped. The physical examination must include assessment of the following systems:

- Skin
- Head, eyes, ears, nose, and throat (HEENT)
- Dental
- Heart
- Chest/lungs (includes breast exam for females past menarche)
- Abdomen (including hernia)
- Skeletal
- Neurological (includes evaluation of cerebral, cranial nerve, and cerebellar functions; motor and sensory systems; and reflexes)
- Genitalia (includes observation for appropriate sexual development and testicular exam for adolescent males)

The unclothed physical examination must be completed by one of the following:

- A physician
- An NP
- A CNS
- An RN or licensed PA as stated in "Additional Education Requirements for Registered Nurses (RNs)" on page 43-6

Note: *An RN may only perform under a physician's supervision. The physician ensures that the RN or PA has appropriate training and adequate skills to perform the procedures for which they are responsible.*

43.2.3.3 Measurements

The physical examination must include the following measurements:

- Length, for children approximately birth through 2 years of age
- Height, for children approximately 3 through 20 years of age
- Weight, for children birth through 20 years of age
- Body Mass Index (BMI) for children 2 through 20 years of age
- Head circumference, fronto-occipital circumference, for children younger than 2 years of age
- Blood pressure (for children 3 years of age and older, using the appropriate cuff size)

The requirements for measurements other than blood pressure are to be compared to the National Center for Health Statistics growth charts to identify significant deviations from norms. These charts are available by calling THSteps at 1-512-458-7745.

Refer to: The Women, Infants, and Children (WIC) website as a resource for information about measuring heights and weights at www.dshs.state.tx.us/wichd/secure%2Dpol/nutrassess.pdf.

The requirements for measurements of blood pressure should be compared to Appendix I in *Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents* (2nd edition, revised), located at www.brightfutures.org or *Guidelines for Health Supervision III* from the AAP Publication Department, located at www.aap.org.

Refer to: "Documentation of Completed Checkups" on page 43-14.

43.2.3.4 Nutritional Assessment

The nutritional assessment is to be accomplished during the basic examination using the following methods:

- Ask questions about dietary practices to identify unusual eating habits (such as pica or extended use of bottle feedings) or diets that are deficient or excessive in one or more food groups.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Determine quality and quantity of individual diets (e.g., dietary intake, food acceptance, meal patterns, methods of food preparation and preservation, and utilization of food assistance programs like WIC and Texas Food Stamps).
- Conduct a complete physical examination, including an oral dental examination, paying special attention to general features, such as pallor, apathy, and irritability.
- Obtain accurate height and weight measurements and calculation of BMI as important indices of nutritional status.
- Perform laboratory screenings for anemia (hemoglobin and hematocrit), as indicated.

Copies of the Nutritional Assessment Forms are listed in Appendix C of this manual.

Refer to: Appendix C, "24-Hour Dietary Recall, Assessment for Infants (Birth–11 Months) (2 Pages)" on page C-18.

"24-Hour Dietary Recall and Assessment for Children (1–4 Years) (2 Pages)" on page C-20.

"24-Hour Dietary Recall and Assessment for Children (5–9 Years) (2 Pages)" on page C-22.

"24-Hour Dietary Recall and Assessment for Children (10–20 Years) (2 Pages)" on page C-24.

Risk Factors/Screening for Eating Disorders and Obesity

The risk factors/screening for eating disorders and obesity assessment is to be accomplished in the basic examination, using the following methods:

- Adolescents should be asked about body image and dieting patterns.
- Adolescents should be assessed for organic disease, anorexia nervosa, or bulimia if any of the following are found:
    - Weight loss greater than ten percent of previous weight
    - Recurrent dieting when not overweight
    - Use of self-induced emesis, laxatives, starvation, or diuretics to lose weight
    - Distorted body image
    - BMI below the fifth percentile
- Adolescents should have an in-depth dietary and health assessment to determine psychosocial morbidity and risk for future cardiovascular disease if they have a BMI equal to or greater than the 95th percentile for age and gender.
- Adolescents with a BMI between the 85th and 94th percentile are at risk for becoming overweight. A dietary and health assessment to determine psychosocial morbidity and risk for future cardiovascular disease should be performed on these youth if the following are true:
    - Their BMI has increased by two or more units during the previous 12 months.
    - There is a family history of premature heart disease, obesity, hypertension, or diabetes mellitus.
    - They express concern about their weight.
    - They have elevated serum cholesterol levels or blood pressure.

If this assessment is negative, these adolescents should be provided general dietary and exercise counseling and should continue to be monitored annually.

43.2.3.5 Developmental Assessment

Requirements for Developmental Screening by Physicians, Physician Assistants, Nurse Practitioners, and Clinical Nurse Specialists

Medical checkups completed by physicians, PAs, and NPs or CNSs (pediatric or family specialities) for children birth through 6 years of age must include:

- A standardized developmental screen (the provider's choice of observational or parent questionnaire) for a child between 9 through 12 months of age, 18 through 24 months of age, and every other year thereafter, or when a parent expresses concern about the child's developmental progress.
- A developmental screen at all other visits, including a review of milestones (gross and fine motor skills, communication skills and speech-language development, self help and care skills, social, emotional, and cognitive development) and mental health.

Requirements for Registered Nurses

RNs conducting THSteps medical checkups for a child birth through 6 years of age are required to conduct a standardized observational screen for a child 9 through 12 months of age and 18 through 24 months of age. If the child does not have a record of a standardized observational screen, the child should receive one between 24 months through 6 years of age. A standardized parent questionnaire is required at all other periodic visits through the 6th year of age or when a parent expresses concern about the child's developmental progress.

The combined use of a questionnaire and an observational screen reflects the child's developmental status more accurately than a single observational screen. If parents are unable to read or understand the questionnaire, the provider should use the parent questionnaire in an interview format. If the child fails the parent questionnaire, the provider should follow the instructions of the standardized screening tool concerning either observation testing or referral.

Children 7 years of age and older should be screened by observation, history of school progress, and neurological assessment.

Choice and Use of Tools

A standardized screening tool is one that has been extensively evaluated through screening thousands of children and comparing the screen outcome of each individual child with the outcome of an in-depth developmental evaluation on that child.

CPT only copyright 2005 American Medical Association. All rights reserved.

If the screening tool specifies that training is required to use the tool, the screener must complete this training.

Referrals for Developmental Assessment

Referral for an in-depth developmental evaluation is determined by the criteria of the specific tool. The screener should understand and follow them. Referral for in-depth evaluation of development should be provided when parents express concern about their child's development, regardless of scoring on a standardized development screening tool.

Referrals for in-depth evaluation of development must be made to an early childhood intervention (ECI) program (birth through 3 years of age) for suspected developmental delay, as required by state law. The provider also may refer to a pediatrician with skill in developmental assessment or the school district (3 years of age and older).

Refer to: "Texas Health Steps Statutory State Requirements" on page K-1 for more information.

43.2.3.6 Mental Health

Guidelines for Mental Health Screening

The mental health screen is part of every comprehensive medical checkup. The age-specific interview tools and parent questionnaires are provided as an option for performing this screen. They are intended for use as part of a comprehensive pediatric assessment. If these interview tools are used outside the context of a comprehensive examination, the interviewer must remember to collect information usually gathered in a pediatric history: household members, prenatal/newborn history, child's health history, and family illnesses.

The purpose of the mental health screen is to identify problems in any of six domains: feelings, behavior, social interactions, thinking, physical problems, and other problems that may include substance abuse. The provider choosing alternative screening tools or techniques should be certain to screen in these domains. Screening may reveal several minor problems or one or more significant problems that warrant referral for, or provision of, evaluation and, if indicated, treatment. In determining whether behaviors are serious enough to warrant referral, the screener must weigh the extent and intensity of the problems and explore the child's resiliency and positive behaviors. If the child has been or is under treatment for any mental health conditions, record that treatment in the child's medical record.

Referral options may include parenting education programs, ECI programs (birth to 3 years of age), mental health evaluation and counseling, substance abuse programs, acute psychiatric hospitalization, or child protective services. The screener's responsibility is to identify and establish a referral relationship with these resources in the community.

Screeners with special training and credentials allowing evaluation and treatment of childhood behavior problems, mental illness, or substance abuse may choose to provide these services rather than referring. Other screeners should refer to mental health specialists.

Confidentiality

The screener introduces the screen by explaining that the information provided will be held in strictest confidence unless the screener recognizes a situation that places the child or others in danger.

Children older than 4 years of age should not be present when the screener questions the parent about possible abuse or neglect.

Beginning when the child is about 10 years of age, questions about peer and family social interaction and substance abuse are explored with the child and parent separately. All parts of the screen are administered to the adolescent and their parent/caregiver separately.

If observations of the child, the parent, or parent-child interaction lead the screener to suspect possible abuse or neglect, the screener must make a report to Child Protective Services. The report is required even though the screener may refer a family for evaluation or treatment of abuse/neglect.

Behavior of Particular Concern

Behavior generally expressive of mental health problems include those listed below. If the screener finds any of the following significant behaviors, further screening is unnecessary because referral is indicated:

- Setting fires
- Suicidal behavior or ideation
- Self-destructive activities
- Torturing animals
- Hurting other people
- Destroying property
- Loss of touch with reality
- Inappropriate sexual behavior
- Substance abuse
- Parental concern about their ability to maintain the child in the home

Important: *At the conclusion of a screening that is judged by the provider to be within regular limits, the screener should refer the child for a comprehensive mental health evaluation if the parent of an older child remains concerned that the child has mental health or behavior problems.*

Interview Tools/Referral Forms

The interview tools found on pages C-28 through C-35 contain age-specific questions to guide the provider. Items of concern should be circled. Extensive notes may have to be made on a separate sheet. A copy of this form may be used as a referral form.

The parent questionnaire is similar to the interview tool. It is advisable in the first visit to explain and administer the interview face-to-face. At subsequent visits, the age-appro-

CPT only copyright 2005 American Medical Association. All rights reserved.

priate form may be given to a literate parent or adolescent with the instruction, “Circle any of these items that you feel are a problem for your child/you and that you would like to discuss with your provider.”

43.2.3.7 Sensory Screening

Vision Screening

Newborns

During the initial test at birth, the provider should do the following:

- Check for red reflex.
- Note history for high-risk conditions, such as congenital infections (rubella, herpes, and others) or a family history of vision or eye problems.

Birth Through 2 Years of Age

The provider should do the following:

- Collect observations and a history from a caregiver.
- Check for red reflex.
- Determine whether pupils equally react to light.
- Screen for heterophoria with the corneal light reflex and cover test for children older than 6 months of age.
- Note history for high-risk conditions, such as congenital infections (rubella, herpes, and others) or a family history of vision or eye problems.

At 3 Through 4 Years of Age

The provider should do the following:

- Administer Tumbling E or HOTV test or equivalent at both the 3- and 4-year visit.
- Screen through the 20/20 line.
- Determine whether the child reads more than half of the 20/40 line or four out of six HOTV symbols; refer if unable to read the majority of 20/40 line (one more than half of the symbols) or four out of six HOTV symbols.
- Screen for heterophoria with the corneal light reflex and cover test or Random Dot E.
- Refer children with a two-line difference between the two eyes.
- Document and complete the test as described for birth to 2 years of age if a 3-year-old is unable to cooperate.

For Children 5 Years of Age and Older

The provider should do the following:

- Evaluate with a letter chart or Tumbling E chart at ages 5 through 10, 12, 15, and 18 years of age.
- Refer if unable to read the majority of 20/30 line (one more than half of the symbols) or four out of six HOTV symbols.
- Administer a cover test or Random Dot E.

Note: *Documentation of the results of a school vision screening program may be used in place of testing in the office if within 12 months of the checkup.*

Vision Screening Supplies

Vision screening supplies can be ordered from the following vendors:

Vendors
School Health 865 Muirfield Drive Hanover Park, IL 60103 1-800-323-1305
Good-Lite Company PO Box 387 Streamwood, IL 60107-0387 1-630-529-9720 1-800-362-3860
Prevent Blindness Texas 3211 West Dallas Houston, TX 77019 1-713-526-2559
Wilson Ophthalmic PO Box 496 Mustang, OK 73064 1-800-222-2020
Universal Ophthalmic Instruments, Inc. 8902 FM 2920 Spring, TX 77379 1-281-320-7550

Refer to: "Vision Care (Optometrists, Opticians)" on page 45-1 for more information.

Inpatient Hearing Screening

Newborn Hearing Screening

Health Safety Code, Chapter 47, *Vernon’s Texas Codes Annotated* mandates that a hearing screening occur at the birthing facility before hospital discharge. The hospital is responsible for the purchase of equipment, training of personnel, screening of the newborns, certification of the program in accordance with DSHS standards, and notification to the provider, parents, and DSHS of screening results. There is no additional Medicaid reimbursement for the hearing screening, as the procedure is part of the newborn diagnosis related group (DRG). Hospitals should use the *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) procedure code 09547 to report this newborn hearing screen on the HCFA-1450 (UB-92).

This facility-based screening also meets the physician’s required component for hearing screening in the inpatient newborn THSteps checkup. The physician must assure that the hearing screening is completed before discharging the newborn unless the birthing facility is exempt under the law from performing hearing screenings, in which case, the physician must assure there is an appropriate referral for a hearing screening to a birthing facility participating in the Newborn Hearing Screening Program.

The physician should discuss the screening results with the parents, especially if the hearing screening results are abnormal, and should order an appropriate referral for further diagnostic testing. If the results are abnormal, parent/legal guardian consent must be obtained to send information to DSHS for tracking and follow-up purposes.

CPT only copyright 2005 American Medical Association. All rights reserved.

A physician with any concerns about this process should contact the hospital administrator or the DSHS Audiology Services Program at 1-800-252-8023.

Initial Test at Birth

The provider should do the following:

- Verify that the parents received the results of the hearing screen at the birthing facility.
- Check for obvious physical abnormalities.
- Supply a Hearing Checklist for Parents and instruct in its use. This checklist should be discussed at the first in-office THSteps medical checkup.
- Provide a referral for further diagnostic audiological testing for an infant with abnormal screening results or who is at high risk for hearing impairment.

Outpatient Hearing Screening and Diagnostic Testing for Children

As part of the THSteps medical checkups, physicians are required to complete the hearing screening component. Separate procedure codes should not be billed when hearing screenings are part of medical checkups or daycare/school requirements. Medicaid does not reimburse separately.

For children that are seen in the office setting, the THSteps program requires a puretone audiometric test at visits where objective screening is required. In other childcare settings (e.g., daycare, preschool, Head Start, and elementary, middle, and high school), the DSHS Vision and Hearing Screening Program requires that a puretone audiometer be used for hearing screening.

Birth Through 3 Years of Age

The provider should do the following:

- Observe and record history from a responsible adult familiar with the child, using the Hearing Checklist for Parents located on page C-26, English and Spanish.
- Refer high-risk children for further audiological diagnostic testing.

At 4 Years of Age and Older

The provider should do the following:

- Assess children with a puretone audiometric hearing screen (1000, 2000, 4000 Hz) at 4 through 10 years of age.
- Perform a subjective hearing evaluation, which includes client history and observation of the child for the ability to answer questions and follow directions, at all other medical checkups where an audiometric screen is not required.
- Refer the child if any one of the three frequencies are recorded as greater than 25 dB in either ear.

At 11 Years of Age and Older

- The child or adolescent must be assessed with a puretone audiometric hearing screen (1000, 2000, and 4000 Hz) at 12, 15, and 18 years of age.
- The child or adolescent should have a subjective hearing evaluation at 11, 13, 14, 16, 17, 19, and 20 years of age that includes patient history and observation for the ability to answer questions and follow directions.
- Adolescents who do not respond to a 25 dB tone at any frequency should be referred for a diagnostic hearing evaluation.

Note: *Documentation of the results of a school screening audiometric testing program may be used in place of testing in the office if within 12 months of the checkup.*

The CPT audiometric screening procedure codes 5/I-92551 and 5/I-92552 may not be billed on the same day by the same provider with THSteps medical check-up procedure codes S-99381, S-99382, S-99383, S-99384, S-99385, S-99391, S-99392, S-99393, S-99394, or S-99395.

It is recommended that pneumatic otoscopy be the primary method to visualize and assess the mobility of the tympanic membrane when distinguishing between otitis media with effusion and acute otitis media.

Tympanometry (impedance testing) may be considered for reimbursement as an objective diagnostic test of middle ear disease. Tympanometry (procedure code 5-92567) should never be used as the sole clinical means to establish the presence or absence of acute or chronic middle ear effusion or infection. Direct otoscopic examination by a suitably qualified provider, with or without pneumatic otoscopy, is the key element of the standard method used to establish a diagnosis of middle ear disease. Tympanometry must be limited to selected individual cases where its use demonstrably adds to the provider's ability to establish a diagnosis and provide appropriate treatment.

Tympanometry is limited to four services per year by the same provider and is based on medical necessity. Medical necessity must be documented in the client's medical record. Tympanometry does not meet the requirements for a sensory screening component of the THSteps medical checkup. Acoustic reflex testing does not meet the requirement for hearing screening and is diagnosis restricted.

Hearing Referrals

For all age groups, providers must refer children and adolescents identified during the THSteps medical checkup as needing a diagnostic hearing evaluation or other hearing services, including hearing aids, to a PACT provider. PACT provides services and hearing aids for children birth through 20 years of age that have permanent hearing loss and are Medicaid-eligible.

Hearing exams and services, including hearing aids (*prior authorization needed*), are available when medically necessary. Payment for services to eligible clients received through approved PACT providers is made through PACT at DSHS. An appropriate hearing screening is a mandatory part of each medical checkup.

CPT only copyright 2005 American Medical Association. All rights reserved.

Separate procedure codes may be billed for children who require diagnostic hearing testing. The diagnostic audiometric testing codes 5/I-92567, 5/I-92585, 5-92586, 5/I/T-92587, and 5/I/T-92588 may be billed, as appropriate.

43.2.3.8 Tuberculosis Screening

The periodicity schedule for tuberculin tests is in accordance with federal Centers for Disease Control and Prevention (CDC) guidelines. THSteps requires a form of TB screening annually, as noted on the periodicity schedule, that is to be performed in the provider's office or clinic. This screening must be either the TB Questionnaire or a TB Mantoux skin test as described below. The TB Questionnaire was developed by the DSHS Infectious Disease Control Unit TB Program to determine if the child or adolescent is at high risk for contracting tuberculosis and needs Mantoux skin testing. Providers may photocopy the questionnaires from Appendix C of this manual or download the form at www.dshs.state.tx.us/idcu/disease/tb/forms/#clinic. Select EF12-11494 (English) or EF12-11494A (Spanish).

If any question on the questionnaire is answered with a "yes" or "I don't know," a TB Mantoux skin test is to be performed at the visit, unless medically contraindicated (e.g., has a history of a previous positive purified protein derivative [PPD] test). If all questions are answered with a "no," the child or adolescent does not need to have skin testing unless the provider believes it is needed for other medical reasons. Any newly-identified positive reactions should be evaluated by a screening provider or referred for evaluation. Report any suspected cases or diagnosed cases of TB to the child's local or regional health department.

Providers should contact their local or regional health department to determine whether their service area is a low- or high-prevalence area for TB. A listing of counties with a high prevalence for TB is available at www.dshs.state.tx.us/idcu/disease/tb/statistics/hiprev/default.asp.

In areas determined to be low-prevalence for TB, the TB Questionnaire should be administered annually beginning at 1 year of age. A TB skin test should be performed if the TB Questionnaire indicates a risk factor or if the provider determines that a TB skin test is appropriate.

In areas of high TB prevalence, the provider shall administer the TB skin test at 1 year of age and once between 4 through 6 years of age then again between 11 through 17 years of age. In those age ranges where a skin test is recommended, the provider should administer the skin test at one of these ages and the questionnaire at the other annual checkups. However, the questionnaire should be administered if the client refuses the skin test or the child is uncooperative.

The TB skin test also should be administered at any time a risk factor is indicated or the provider determines a skin test is appropriate. TB skin tests should be performed on children or adolescents who have been in contact with a case of active TB, have lived in a homeless shelter, have been incarcerated or live with someone who has been incarcerated, have lived or visit regularly in an area endemic for TB, currently work in a health care setting, recently immigrated from a country with a high prevalence of TB, or have associated with someone with human immunodeficiency virus (HIVs) infection.

Important: *"Live virus vaccines can interfere with response to a tuberculin test (TB). TB testing, if otherwise indicated, can be performed either on the same day that the live virus vaccines are administered or no sooner than 4 to 6 weeks later." Morbidity and Mortality Weekly Report (MMWR), Vol. 43 #RR 1, p. 15.*

Note: *Tracking the completed TB Questionnaire is no longer necessary. The provider must document the screening, any risk factors identified, and any appropriate follow-up in the client's medical record.*

The materials (PPD-Mantoux antigen and syringe) are available free of charge to the provider at the provider's local or regional health departments. Tine® testing materials are not supplied by DSHS and should not be used. The cost of administering the test is included in the medical checkup fee. A follow-up medical checkup visit is required to read all TB skin tests. The provider may bill the follow-up medical checkup fee of $6 for visit procedure code S-99211 with a THSteps provider identifier. Providers must indicate on the claim procedure code 5-86580 when a skin test is performed. It is not necessary to track the completion of the TB Questionnaire on the claim.

If further evaluation is required to diagnose either latent TB infection or active TB disease, the provider may bill the appropriate office visit code. Diagnosis and treatment are provided as a medical office visit.

THSteps providers may obtain PPD-Mantoux antigen and syringes from their local or regional DSHS office. They will be requested to sign a DSHS Infectious Disease Control Unit PPD Agreement.

Refer to: "Guidelines: Tuberculosis Skin Testing (2 Pages)" on page C-89 for guidance on the evaluation of a positive skin test.

"TB Questionnaire" on page C-92.

"Cuestionario Para la Detección de Tuberculosis" on page C-93.

"PPD Agreement for Texas Health Steps Providers" on page C-95.

43.2.3.9 Immunizations

All providers must assess the immunization status of the client at every encounter and administer any medically indicated immunizations according to the ACIP schedule, unless medically contraindicated or because of parent's reason of conscience, including a religious belief. The reason the indicated vaccination/toxoid was not administered must be documented in the client's medical record. (CFR and TAC). The checkup provider is responsible for the administration of immunizations and must not refer children to local health departments or other entities.

CPT only copyright 2005 American Medical Association. All rights reserved.

Reminder: *A $5 administration fee per dose is paid for immunizations given during a THSteps medical checkup or as part of a follow-up visit. THSteps providers should bill for each vaccine separately. If administering a combined vaccine such as diphtheria, tetanus, and pertussis vaccines (DTaP), do not bill separately for each antigen. Combined antigens are reimbursed as one immunization.*

The TVFC Program provides free vaccines to children enrolled in Medicaid who are younger than 19 years of age. TVFC provides vaccines that are recommended according to the Recommended Childhood Immunization Schedule (ACIP, AAP, and the AAFP).

Refer to: "Immunizations" on page H-1 and "TVFC Provider Enrollment (3 Pages)" on page C-97 for more information on enrolling as a TVFC provider.
"Recommended Childhood and Adolescent Immunization Schedule, 2006" on page H-3.

Vaccine Information Statement (VIS)

A VIS is required by federal mandate to inform parents and vaccine recipients of the risks and benefits of the vaccine they are about to receive. Not only is it important to explain the risks and benefits before a vaccine is administered, but it is also important that providers use the most current forms available. For more information about immunizations, vaccine preventable diseases, or literature and forms, call the DSHS Immunization Branch at 1-800-252-9152.

43.2.3.10 Dental Assessment

Dental Assessment Guidelines for THSteps Medical Providers

The following information provides guidelines for THSteps medical providers in performing the initial dental screening as required within a comprehensive THSteps medical checkup.

The applicable periodicity schedule for THSteps dental assessment follows the standards as adopted by the American Academy of Pediatric Dentistry. The oral screening by the medical provider, as required within the comprehensive THSteps medical checkup, must occur at *all* THSteps medical checkups. The medical checkup provider must initiate the referral for a comprehensive THSteps dental checkup by a THSteps participating dentist, starting at 1 year of age and every six months thereafter (unless unusual circumstances dictate more frequent referrals).

Early Childhood Caries (ECC)

To reduce the risk of early childhood caries (ECC) the parent/guardian should always be counseled in proper feeding practices, including the following:

- Never put a child to bed with a bottle containing any liquid other than water.
- Recommendations for decreasing the frequency and duration of bottle feeding.
- Bottle contents (water is recommended in the bottle other than at regular feeding times). Feedings should be followed by gentle cleansing of the oral structures with a clean, damp cloth or soft brush.
- Establish a goal to have the child to begin drinking from a cup at 6 months of age.

Early signs of ECC often present as chalky white spots, particularly on the lingual surfaces of maxillary incisors. These signs, or any indication of more advanced caries, should prompt an immediate referral to appropriate dental care providers for evaluation.

Primary Teeth

The 20 primary teeth are also called deciduous teeth or baby teeth. Besides functioning in mastication, they also serve roles in speech development, jaw development, and eventually, in the position of the permanent dentition. Premature loss of the primary teeth can lead to permanent space loss within the dental arch and significant problems with alignment and function of the permanent teeth. If a primary tooth is lost prematurely, it is important that the client be evaluated within the next few weeks by a dentist, and that a determination is made for space supervision. Delayed exfoliation of the primary teeth may also have a harmful effect on the permanent dentition and calls for a dental evaluation.

Permanent Teeth

The first permanent tooth is the 6-year molar, which is the sixth tooth from the mid-line between the central incisors. There are four of them, that erupt when a child is between 5 and 6 years of age. The first permanent molar is often mistaken for a primary tooth because no tooth is lost. These teeth are termed the keystones of the dental arches because they help guide the subsequent teeth into proper alignment.

Caries (Cavities)

Children with developing primary or mixed (primary-permanent) dentition should be evaluated for caries (cavities).

Oral Soft Tissues

Oral soft tissues should be examined for any abnormalities. Consultation with a dental provider, where a differential diagnosis may apply, is highly recommended.

Sealants

Many studies have shown that dental sealants can protect teeth from decay when properly applied.

Patient Dental Education

This education should include the following:

- The need for thorough daily oral hygiene practices
- Education in potential gingival manifestations for clients with diabetes and clients under long-term medications therapy
- Utilization of the THSteps eligibility for dental services

CPT only copyright 2005 American Medical Association. All rights reserved.

Smokeless Tobacco

The use of smokeless tobacco is expanding in many population groups and is strongly correlated with an increase in the prevalence of oral cancer. Early intervention and education can play a significant role in reducing risks. The following steps should be taken:

- Assess patterns of use.
- Offer assistance in cessation, if appropriate.
- Evaluate oral hard and soft tissues particularly the mucobuccal folds, cheeks, and sublingual areas.
- Refer all suspected lesions to appropriate providers for evaluation and follow-up.

Referral Assistance

Assistance in coordinating the referral can be obtained from the TMHP THSteps Dental Hotline at 1-800-568-2460 or the DSHS Regional THSteps Coordinator for the respective region (lists are provided in the “DSHS Health Service Region Contacts” on page A-8).

Dental Disease Prevention

Perhaps the two most important interventions are:

- Early and periodic dental examinations.
- Parent education that stresses to parents the important role they can play in preventing dental disease in their children.

Regularly-positioned teeth with normal occlusion add symmetry and harmony to the facial appearance and are an important aspect of the expression of emotion and personality.

THSteps Dental Services

Access to THSteps dental services are mandated by Medicaid and provide reimbursement for the early detection and treatment of dental health problems for Medicaid-eligible clients younger than 21 years of age. THSteps dental service standards were designed to meet federal regulations and incorporate the recommendations of representatives of dental professional groups in the state.

Follow-up Dental Care and Referrals

If a THSteps medical provider identifies the medical necessity for dental services, the provider must assist the client in planning follow-up care or in making a referral to a THSteps dental provider. OBRA of 1989 mandated the expansion of the federal EPSDT Program to include any service that is medically necessary and for which FFP is available, regardless of the limitations of the Texas Medicaid Program, and is referred to as the CCP.

Refer to: "THSteps Medical and Dental Administrative Information" on page 43-5 for more information.

43.2.3.11 Medical Checkup Laboratory Component

All components of the THSteps medical checkup are included in the reimbursement for the visit, including all laboratory tests as indicated on the periodicity schedule. All required laboratory work is to be performed by the DSHS laboratory. DSHS makes these services available free of charge to all enrolled THSteps medical checkup providers for THSteps-eligible children. THSteps services provided in a private laboratory are not reimbursed. See "Checkup Laboratory Procedures" on page 43-27 for more information.

43.2.3.12 Health Education/Anticipatory Guidance

Health education is a federally mandated component of the THSteps medical checkup and includes anticipatory guidance. *Face-to-face* health education and counseling with parents or guardians and children *are required* to assist parents in understanding what to expect in terms of the child’s development and to provide information about the benefits of healthy lifestyles and practices, and accident and disease prevention. Written material also may be given but will not replace face-to-face counseling.

Developmentally and age-appropriate health education, anticipatory guidance, and counseling include the following:

- Developmental expectations
- Dental health
- Sleep
- Feeding and nutrition
- Elimination
- Lead poisoning risks
- Healthy lifestyle/practices
- Accident and disease prevention

Adolescent Development

Providers must give adolescents the following health guidance:

- Promote a better understanding of their physical growth and their psychosocial and psychosexual development.
- Promote the importance of becoming involved in decisions about their health care.

Safety Practices

Providers must give adolescents health guidance on the following injury-prevention techniques:

- Avoid the use of alcohol or other substances while using motor or recreational vehicles or where impaired judgment may lead to injury.
- Use safety devices, including seat belts, motorcycle and bicycle helmets, and appropriate athletic protective devices.
- Resolve interpersonal conflicts without violence.
- Avoid the use of weapons and promote weapon safety.
- Obtain appropriate physical conditioning before exercise.

Diet and Fitness

Providers must give adolescents health guidance on the following diet and fitness guidelines:

- Benefits of a healthy diet
- Ways to achieve a healthy diet
- Safe weight management

CPT only copyright 2005 American Medical Association. All rights reserved.

- Benefits of exercise
- Safe exercise on a regular basis
- Benefits of adequate rest

Healthy Lifestyles

Providers must give adolescents health guidance about healthy lifestyle guidelines including:

- Avoiding tobacco, alcohol, high noise exposure, other abusable substances, and anabolic steroids.
- Abstaining from vaginal, oral, and anal intercourse as the most effective way to prevent pregnancy and sexually transmitted diseases (STDs), including HIV infection.
- How the HIV infection is transmitted, the dangers of the disease, and the fact that latex condoms are effective in reducing the risk of some STDs, including HIV infection.
- Reinforcing of responsible sexual behavior for adolescents who are not currently sexually active and for those who are using birth control and condoms appropriately.
- Protecting themselves and their partners from pregnancy, sexual exploitation, and STDs, including HIV infection.

Refer to: *Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents* (2nd edition revised), at www.brightfutures.org.

Guidelines for Health Supervision III from the AAP Publication Department, PO Box 927, 141 Northwest Point Blvd., Elkgrove Village IL 60009-0927.

43.2.3.13 Additional Adolescent Screening

Alcohol and Drug Use

Providers must ask about the use of alcohol and other substances (marijuana, cocaine, paint/glue sniffing and others), and over-the-counter or prescription drugs (for nonmedical purposes), including anabolic steroids.

Adolescents that report any use of alcohol or other drugs or inappropriate use of medicines during the past year should be assessed further about family history, circumstances surrounding use, amount and frequency of use, attitudes and motivation about use, use of other drugs, and the adequacy of physical, psychosocial, and school functioning.

Adolescents whose substance use endangers their health should receive counseling and mental health treatment, as appropriate.

Adolescents that use anabolic steroids should be counseled to stop using steroids and informed about the danger of sharing needles.

The routine urine toxicology screening of adolescents is *not* recommended.

Adolescents that use alcohol or other drugs should also be asked about their sexual behavior and use of tobacco products.

Depression/Suicide Risk

Providers must ask about behavior or emotions that indicate recurrent or severe depression or suicide risk.

Providers must perform screening for depression or suicide risk on adolescents that exhibit cumulative risk as determined by declining school grades, chronic melancholy, family dysfunction, homelessness, anxiety about sexual orientation, physical or sexual abuse, alcohol or other drug use, previous suicide attempt, and suicidal inclination or plans.

If suicide risk is suspected, adolescents should be evaluated immediately and referred to a psychiatrist or other mental health professional, or they should be hospitalized for immediate evaluation.

Nonsuicidal adolescents with symptoms of severe or recurrent depression should be evaluated and referred to a psychiatrist or other mental health professional for treatment.

Learning Problems

Providers must ask about learning or school problems and noise exposure (music, motorcycles, cars, etc.).

Providers must assess adolescents for a history of truancy, repeated absences, or poor or declining performance that could interfere with school success. Conditions to assess include learning disabilities, attention deficit hyperactivity disorder, medical problems, abuse, family dysfunction, mental disorder, and alcoholic or other drug abuse.

This assessment and the subsequent management plan should be coordinated with school personnel and the adolescent's parents or caregivers.

Tobacco Use

Providers must ask about use of cigarettes and smokeless tobacco. Adolescents who use tobacco products should be assessed further to determine their patterns of use. A cessation plan should be provided for adolescents who use tobacco products. A dental referral should be made for all adolescents with a history of tobacco use.

Physical, Sexual, or Emotional Abuse

Providers must ask about history of emotional, physical, and sexual abuse.

If abuse is suspected, adolescents should be assessed to determine the circumstances surrounding the abuse and the presence of physical, emotional, and psychosocial consequences, including involvement in health risk behaviors.

Health providers should be aware of local laws about the reporting of abuse to appropriate state officials, in addition to ethical and legal issues about how to protect the confidentiality of the adolescent client.

Adolescents who report emotional or psychosocial sequelae should be referred to a psychiatrist or other mental health professional for evaluation and treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

Reporting Suspected Sexual Abuse

Reporting Abuse or Neglect, Rider 33 of Article II of the *General Appropriations Act*, House Bill 1, 78th Legislative Regular Session, 2003, requires DSHS to ensure all Medicaid providers comply with the provisions of state law as set forth in Chapter 261 of the *Texas Family Code* relating to investigations of child abuse and neglect reports, including suspected sexual abuse and HHSC reporting requirements.

Refer to: "Child Abuse Reporting Guidelines (2 Pages)" on page B-12 for more information. Providers must use the "Child Abuse Reporting Guidelines, Checklist for HHSC Monitoring" on page B-14 to document referral of suspected abuse.

Sexual Behavior/Sexually Transmitted Diseases (STDs)

Providers must ask about involvement in sexual behaviors during a general screening.

- Adolescents that are sexually active should be asked about their use and motivation to use condoms or barrier methods and contraceptive methods, their sexual orientation, the number of sexual partners they have had, whether they have exchanged sex for money or drugs, and their history of prior pregnancy or STDs.
- Adolescents at risk for pregnancy, STDs (including HIV), or sexual exploitation should be counseled on how to reduce this risk.
- Adolescents that are sexually active should also be asked about their use of tobacco products, alcohol, and other drugs.

STD Screening Procedures for Sexually Active Adolescents

Sexually transmitted disease risk status includes the following:

- Having used injectable drugs
- Having had STD infections
- Having had vaginal, anal, or oral sex
- Having exchanged sex for drugs or money
- Having had a sexual partner who is at risk for HIV infection (e.g., injectable drug use or past or present STD infection)

Note: *HIV testing should be performed only after informed consent is obtained from the adolescent. If the client refuses the HIV test, the provider may not perform the test and must explain the option of anonymous testing and refer the client to a testing facility that offers anonymous testing. A notation must be made in the medical record that notification of the HIV test and the right to refuse was given. Providers may call the HIV/STD InfoLine for referrals to HIV/AIDS testing sites; prevention, case management, and treatment providers; STD clinics; and other related service organizations at 1-800-299-2437. This toll-free HIV/AIDS and STD information and referral service is available for English- and Spanish-speaking callers and for those who are hearing-impaired. The Texas HIV/STD Community Resource Directory is available at www.tdh.state.tx.us/hivstd/commsvcs/default.htm.*

HIV prevention counseling should be made available, which should include health guidance about responsible sexual behaviors, including abstinence.

HIV prevention counseling should include the following:

- Counseling that abstinence from vaginal, oral, and anal intercourse is the most effective way to prevent pregnancy, STDs, and HIV infection
- Counseling on how HIV infection is transmitted, the dangers of the disease, and the fact that using latex condoms reduces the risk of transmission of HIV and some STDs
- Reinforcement of responsible sexual behavior for adolescents who are not sexually active currently and for those who use birth control and condoms appropriately
- Counseling on the need to protect themselves and their partners from pregnancy, STDs, HIV infection, and sexual exploitation

43.3 Checkup Laboratory Procedures

These services and supplies are limited to THSteps medical checkup laboratory services provided in the course of a medical checkup to THSteps clients. Unauthorized use of services and supplies is a violation of federal regulations. The reimbursement for the complete medical checkup includes specimen collection supplies, mailing and shipping supplies, and receiving test results from the DSHS laboratory.

43.3.1 Laboratory Services

Laboratory services are available from the DSHS laboratory and may *not* be billed separately with an office visit or consultation on the same day as a THSteps medical checkup.

A THSteps laboratory test included in the periodicity schedule for a specific visit (or needed if not obtained at a previous visit) is a required component of the visit. These laboratory specimens *must* be submitted to the DSHS laboratory. Providers can refer to the table at the end of this section for a list of the tests available from the DSHS laboratory that are included in the periodicity schedule. It is permissible to complete hematocrit and hemoglobin testing on site; however, there is no reimbursement for these tests and results must be clearly documented in the medical record. Results from these two tests are also acceptable from a WIC clinic or other provider, if actual results are available and have been obtained within one month of the visit date.

Because all THSteps laboratory tests must be processed at the DSHS laboratory, they cannot be billed as separate claims on the same date of service as a medical checkup. These claims include those for tests that were processed at a provider's office or a commercial laboratory.

CPT only copyright 2005 American Medical Association. All rights reserved.

The THSteps program requires that all laboratory tests noted on the periodicity schedule are to be obtained as part of the medical checkup, so all providers are reminded to use the date of the medical checkup as the date of laboratory service.

Separate claims for tests indicated by the periodicity schedule are *denied*. Claims for THSteps checkups and for laboratory services are subject to retrospective review to assure compliance with the policy.

If the medical checkup findings result in an evaluation and management visit for an acute problem, the provider should complete the test necessary to make a diagnosis. Tests obtained as part of the evaluation and management visit may be processed at the provider's laboratory of choice and may be billed *unless* the test is a required component of the THSteps visit on the same day of a THSteps medical checkup.

***Note:** Providers should make a request on the laboratory form if an extreme health problem exists and telephone results are needed quickly. With the exception of weekends and holidays, routine specimens are analyzed and reported within three days after receipt by the DSHS laboratory. Critical abnormal tests results (e.g., hemoglobin equal to or below 7g/dL or blood lead level greater than or equal to 40 ug/dL) are identified in the laboratory within 36 hours after receipt of specimens and are reported to the submitter by telephone within one hour of confirmation.*

THSteps laboratory specimens submitted to DSHS must include the client's name and Medicaid number as they appear on the Medicaid Identification (Form H3087) on a DSHS laboratory Request Form (Newborn Screening NBS-3, G-1B, G-2A, G-2B). Providers must write "pending" in the Medicaid number space, which is located in the payor source section of the laboratory requisition form, if a number is not currently available but is pending (i.e., a newborn or a newly-certified client verified by a Medicaid Eligibility Verification (Form H1027) as eligible for Medicaid).

Laboratory specimens received at DSHS that do not have a Medicaid number or the word *pending* written in the nine-character space for the Medicaid number will be analyzed, and the provider will be billed.

The $70 reimbursement for the complete medical checkup includes specimen collection, shipping, testing, and receiving test results from the DSHS laboratory.

The following services may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup either by a provider or laboratory. Claims for procedure codes listed below submitted by a provider or a commercial laboratory for the same date of service as a THSteps medical checkup are denied and are subject to retrospective review:

Laboratory Test Procedure Codes		
5-83020	5-83655	5-84203
5-85014	5-85018	5-86592
5-86689	5-86701	5-87490
5-87590	5-88142	5-88147
5-88150	5-88164	

Cytopathology procedure codes 5-88142, 5-88147, and 5-88164 are not reimbursed if billed on the same day by the same provider with THSteps medical checkup procedure codes S-99384, S-99385, S-99394, or S-99395.

43.3.2 Laboratory Supplies

Upon request DSHS provides the items listed below associated with blood specimen collection. All newly-enrolled THSteps medical providers automatically receive a startup package of forms, supplies, and containers, including air bills for the shipping of serum specimens. Requests for specimen requisition forms are routed to the laboratory reporting staff and mailed separately to the providers. Before startup packages are sent to providers, the DSHS laboratory verifies enrollment of THSteps medical providers. The startup package includes:

- 2 mL vacuum tube (with anticoagulant) for venipuncture
- Safety needle holders
- 250 - 500 uL finger stick blood collector (with anticoagulant)
- 6 mL vacuum tube (without anticoagulant) for venipuncture (required for Rapid Plasma Reagin [RPR])
- 22 gauge x 1 inch vacuum needle
- Safety lancets
- Laboratory Forms G-1A, G-1B, and G-2A
- *Get the Lead Out* handbook
- Mailing container with postage paid label (single- or multiple-tube)

A written request for a Newborn Screening Specimen Collection Form, NBS-3, and NBS supplies is required. To obtain an order form for written requests, providers should call 1-512-458-7661 or 1-888-963-7111, Ext. 7661.

All reorder requests for forms and supplies should be made using DSHS Form G-399, which should be submitted to the following address:

DSHS Laboratory Services
1100 West 49th Street
Austin, TX 78756-3199
1-512-458-7661 or 1-888-963-7111, Ext. 7661

Supply requests can be faxed to the DSHS laboratory at 1-512-458-7672. Providers should not order more than a three-month supply as most supplies have expiration dates and must be rotated frequently for efficient usage. To reduce waste in ordering, DSHS monitors supply requests according to the number of specimens submitted by the provider. Keep unused tubes with anticoagulant in the original airtight self-closing plastic bag to prevent moisture and dust from reaching the anticoagulant.

CPT only copyright 2005 American Medical Association. All rights reserved.

Send Comments

Providers with complaints or comments about THSteps specimen collection supplies should contact the DSHS laboratory. Supplies are evaluated continually, and comments from supply users are solicited. Documented comments may support or change an item in a state contract. Send a brief letter or fax to the following address:

DSHS Laboratory Services
Quality Control Unit
1100 West 49th Street
Austin, TX 78756-3199
Fax: 1-512-458-7672

43.3.3 Required Tests

The following laboratory screening procedures are a required component of the THSteps medical checkup and are to be performed in accordance with the age and frequency specified on the THSteps medical checkup periodicity schedule.

43.3.3.1 Glucose

Children should be screened for risk of type 2 diabetes. Fasting glucose screening should be obtained for those at risk of type 2 diabetes.

43.3.3.2 Hemoglobin or Hematocrit

Hemoglobin or hematocrit levels are required to indicate anemia resulting from poor diet or diseases. The required minimum frequency for hemoglobin or hematocrit testing is at 6 months, 12 months, 24 months, 6 years, 12 years, and 16 years of age. At 12 and 24 months of age, hemoglobin should be quantitated in conjunction with the lead screen. The laboratory request form must be marked for both hemoglobin and lead. Hemoglobin and hematocrit laboratory procedures performed at a WIC clinic or in a provider's office are acceptable if performed within one month and the date and value are documented.

The provider should note that the DSHS laboratory uses the sulfolyser (SLS-Hb) method to measure hemoglobin.

43.3.3.3 Hemoglobin Type

If the hemoglobin type has been done as a part of newborn screening and results are documented on the chart, the test does not need to be repeated. It also may be performed at the provider's discretion, as appropriate for age and population groups. For instance, certain children need this procedure to screen for sickle cell disease or trait, if not done previously.

The DSHS laboratory uses isoelectric focusing electrophoresis for hemoglobin type screening.

The laboratory reports the types of hemoglobin detected. Providers should compare reported test results to the expected ranges, which are noted on the patient report, to determine whether further testing, such as confirmation, is needed. If a hemoglobin variant is reported as "Other," a specimen can be submitted to a reference laboratory for further testing and confirmation.

43.3.3.4 Hyperlipidemia

Hyperlipidemia is based on risk assessment. THSteps does not provide a formal risk assessment tool. Providers may refer to the AAP policy statement on cholesterol screening for more information.

The cholesterol screen consists of a blood cholesterol level. Clients do not need to fast before the screen. Specimens for lipid profiles should be from clients that have fasted at least 12 hours and are at-risk. A lipid profile includes the measurement of total blood cholesterol, triglycerides, and high-density lipoproteins (HDL), as well as a calculated value for low-density lipoproteins (LDL).

43.3.3.5 Lead Screening

In accordance with current federal regulations, THSteps requires that children be screened for lead poisoning through either blood tests and/or questionnaires at 6, 12, 15, 18, and 24 months of age and annually until 6 years of age.

Important: *The "Abbreviated Parent Questionnaire: Risk Assessment for Lead Exposure" on page C-61 may be used for children with a previously recorded normal blood lead level.*

Lead screening involves actual blood lead analysis or completion of a parent questionnaire (with appropriate action taken depending on the answers) per current federal regulations. *Blood lead analyses are mandatory at 12 and 24 months of age for THSteps clients.* At other THSteps medical checkups (6 months, 18 months, 3, 4, 5, and 6 years of age), the parent questionnaire must be administered. If (at any age) the parent answers "yes" or "I don't know" to any of the questions, a blood lead analysis is to be performed. Providers may download the Abbreviated Parent Questionnaire and the Detailed Parent Questionnaire (available in both English and Spanish), as well as guidelines for their use, at www.dshs.state.tx.us/lead/questionnaires.shtm.

If the provider chooses not to use the parent questionnaire, the provider must continue to have blood lead testing performed at 6, 12, 15, 18, and 24 months of age and annually until the 6 years of age.

Providers may obtain more information about the medical and environmental management of lead-poisoned children from the DSHS Childhood Lead Poisoning Prevention Program by calling 1-800-588-1248.

Specimen Collection and Handling

Submit a K2EDTA (purple top) specimen with the specified volume marked on the Vacutainer® to the DSHS laboratory for hemoglobin type, hemoglobin and lead testing. A separate tube (red top tube) must be submitted for syphilis (RPR) and/or hyperlipidemia testing, and a gray top tube (sodium fluoride/potassium oxalate) must

CPT only copyright 2005 American Medical Association. All rights reserved.

be submitted for glucose testing regardless of any additional THSteps laboratory screening procedures being performed at the same time.

Due to changes in specimen collection, handling, and submission criteria recommended by Clinical Laboratory Improvement Amendments (CLIA) (Regulatory Agency), contact the DSHS laboratory for the most current specimen requirements at 1-888-963-7111, Ext. 7430.

Refer to: “Lead Screening” on page J-1 for more information on lead screening procedures and follow-up.

43.3.3.6 Newborn Screening

The second mandated newborn screen at 1 to 2 weeks of age is a required component of the THSteps medical checkup but is not required as an informational detail of the claim. Providers should document the date and the results of the second newborn screening in the client’s medical record. Clients should not be referred to the local health department or other providers for this service.

Health and Safety Code, Chapter 33, *Vernon’s Texas Codes Annotated*, requires testing for 27 disorders on all newborns. This testing is the responsibility of any provider attending the newborn. All newborns must be tested a second time at 1 to 2 weeks of age. If there is any doubt that a child younger than 12 months of age was properly tested, the provider should submit the blood sample on the appropriate DSHS Form NBS-3 to the DSHS Newborn Screening Laboratory.

The provider should note the following:

- Results are mailed to the provider’s address indicated on Form NBS-3.
- Laboratory recommendations for necessary follow-up procedures are included with the report.
- The DSHS NBS Case Management staff contacts the provider in cases of significant abnormality.

43.3.3.7 Urinalysis

Urinalysis (i.e., dipstick) is performed at the discretion of the provider. Providers must purchase their own supplies. The cost for performing this service is included in the fee for the medical checkup.

Refer to: "Checkup Laboratory Procedures" on page 43-27 for more information on laboratory collection techniques.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.3.4 Follow-Up Care Guidelines Summary Table

Laboratory Results							Interpretation	Refer for Follow-up Care	Genetics Counseling
RPR Card			Hb	Hb Type		Lead			
NR	R	Titer	g/dL	A:A	Other	ug/dL			
X							Serological signs of syphilis not present.	No	
	X						Possible indication of syphilis. Further testing necessary.	Yes	
	X	1:1 etc.					Indication of degree of reactivity of laboratory result. 1:1, 1:2, 1:4, etc. Confirmed by Treponema I Pallidum-Particle Agglutination (TP-PA) or Fluorescent Treponemal Antibody Absorbed (FTA-ABS).	Yes	
						<10	Normal.	No	
						10–14	Retest periodically.	Yes	
						15–19	Retest periodically.	Yes	
						20–69	Treatment needed.	Yes	
						≥70	Emergency care needed.	Yes	
				X			Normal adult hemoglobin present.	No	
					A, F		Probable normal on patients younger than 12 months of age. Should be retested after first birthday.	No	
					A, S		Probable sickle trait condition (carrier of sickle cell). Check patient history.	No	X
					F, A, S		Usually occurs in infants. Probably will result in sickle trait when F declines to normal adult levels.	No	X
					A, C		Probable C-trait condition.	No	X
				Probable A, D or A, G			Either D-trait or G-trait condition, but could be other hemoglobin having similar properties on electrophoresis.	No	X
				A, Other			Probable unknown trait condition. Contact DSHS THSteps Case Management for availability of complete structural analysis through reference laboratory.	No	X
				S, S			Indicative of sickle cell disease. Total hemoglobin usually low (7 - 8 g/dL).	Yes	X
				S, F			Probable sickle cell disease. Should be checked for hereditary persistence of fetal hemoglobin (HPFH). If F < 20%, possible S-beta thalassemia.	Yes	X
				S, C			Probable hemoglobin S-C disease.	Yes	X
				C, C			Probable homozygous C disease.	Yes	X
				S, A			Probable S-beta thalassemia.	Yes	X
			<11.0				Probably anemic. Evaluate according to severity.	Yes	

CPT only copyright 2005 American Medical Association. All rights reserved.

43.3.5 Additional Required Laboratory Tests Related to Medical Checkups for Adolescents

The DSHS Clinical Chemistry Laboratory must perform laboratory screening tests for THSteps clients for cholesterol, HIV, gonorrhea/chlamydia, and syphilis. The DSHS Women's Health Laboratories, Cytopathology Department performs Pap smear screening for THSteps clients.

Laboratory specimen collection testing materials and necessary forms and supplies are available at no additional cost to all enrolled THSteps medical providers. The following information describes laboratory test procedures, interpretation of laboratory test results, guidelines, and criteria for follow-up, as well as helpful information on specimen collection and handling.

43.3.5.1 Communicable Disease Reporting

Diagnoses of STDs, including HIV, are reportable conditions under 25 TAC, Chapter 97. Providers must report confirmed diagnoses of STDs as required by 25 TAC §97.132.

43.3.5.2 Cervical Cancer Screening

The first Pap smear should be obtained at 21 years of age, 3 years from the onset of sexual activity, or at any other age based on provider discretion. A Pap smear test is a microscopic examination of cells exfoliated or scraped from a mucosal surface. This test is most widely used in detecting malignant, premalignant, and infectious disease of the uterine cervix.

Laboratory Procedure

Specimens for the pap smear must be sent to the DSHS Women's Health Laboratory in San Antonio. Pap smears arrive by mail or courier service and are processed in the Cytopathology Laboratory. The slides are stained with the Pap stain technique and coverslipped. Staff cytotechnologists examine all Pap smears for cellular disease and render a diagnosis on those determined to be negative or abnormal.

A quality control cytotechnologist rescreens at least 10 percent of the cases considered negative by the staff cytotechnologists. All abnormal cases are referred to a pathologist for final interpretation and follow-up recommendation. A computer-generated result report is mailed or faxed to the submitting THSteps medical checkup provider. A statistical report is mailed monthly to providers documenting their totals by diagnosis and adequacy.

Request Form

Follow these steps to submit a request form:

1) Submit a test request form (Form M-47).
2) Make sure the slide and request form (or liquid-based Pap vial) are labeled with the client's last name. Wrap the completed M-47 form around the cardboard mailer for conventional Pap smears and fasten with a rubber band. For liquid-based Pap smears, place the vial in a zip-lock biohazard transport bag, and place the M-47 in the corresponding pocket.
3) The completed M-47 form must include the following information:
   - Name as it appears on the Medicaid Identification (Form H3087)
   - Address
   - Date of birth
   - Social Security number (SSN)
   - Date of service
   - Examiner
   - ICD-9-CM diagnostic code for the visit or a descriptive narrative
   - Test(s) ordered
   - Specimen site (cervix, endocervix, and vaginal)
   - Submitting clinic code or name and address of clinic
4) The completed test request form must include the Medicaid number or "Medicaid pending" must be written on the form for billing purposes.

Mailing Specimens and Ordering Supplies

THSteps providers can call for information, mail specimens to, or order supplies for obtaining Pap smears for THSteps adolescent screening from the following laboratory:

Women's Health Laboratories
2303 SE Military Drive, Suite 1
San Antonio, TX 78223
Customer Service: 1-888-440-5002 or 1-210-531-4596
Fax: 1-210-531-4506

To order supplies, providers should do the following:

- Providers must use order Form AG-30, 1643, or letterhead stationery.
- Fax the supply order form or include in the specimen packaging.
- Request supplies by telephone or email.
- Include their THSteps provider identifier.

The following supplies are available for order:

Conventional Pap Smears	Surepath Liquid-Based Pap Smears
Frosted slides	Cervex brush
Cytocervial brush	Cytorich preservative vial
Cyto fixative	M-47 form
Cardboard slide mailers	Zip-lock biohazard transport bag
M-47 forms	
Cervical scrapers	Cardboard boxes
Cardboard boxes	Labels
Labels	AG-30 supply order form
AG-30 supply order form	

CPT only copyright 2005 American Medical Association. All rights reserved.

Providers that are already on the automated system through the DSHS Pharmacy Division are encouraged to continue using this system. Larger numbers of supplies are sent through the DSHS Pharmacy. Providers with consistent monthly workload volumes can request to be set up with a *standard monthly order* that is shipped at the same time each month.

43.3.5.3 STD Testing

Syphilis Testing

Syphilis testing should be performed on adolescents that are at high risk for infection. These high-risk adolescents include sexually active individuals living in an area with a high prevalence of STD, endemic for syphilis, or individuals at risk (e.g., past family history or prior history of other STDs or for adolescents who have had vaginal, anal, or oral sex, or have had a sexual partner who is at risk for infection). RPR card test is no longer a required test but should be obtained based on risk assessment.

Laboratory Procedure

Specimens for syphilis screening must be sent to the DSHS laboratory. A RPR card test is the screening procedure. Due to changes in specimen collection, handling, and submission criteria, recommended by CLIA (Regulatory Agency), contact the DSHS laboratory for the most current specimen requirements at 1-888-963-7111, Ext. 7430. The provider should note the following:

- The RPR card test is a macroscopic nontreponemal testing procedure similar in sensitivity and reliability to the Venereal Disease Research Laboratory (VDRL).
- False-positive reactions occur with variable frequency as a result of reagin produced in diseases other than syphilis or provoked by immunization antigens.
- Specimens found reactive by RPR card test are confirmed for syphilis by TP-PA or FTA-ABS tests.
- The RPR Card Test cannot be performed if hemolysis of the specimen has occurred, the specimen volume is less than 0.5 mL, or the specimen is grossly contaminated with bacteria, lipemic, or otherwise extremely turbid.

Gonorrhea and Chlamydia Infection Testing

Gonorrhea and chlamydia infections are the most common reportable sexually transmitted diseases in the United States today. For this reason, sexually active adolescents are tested for both these diseases simultaneously. Untreated infections may result in severe complications, including sterility and pelvic inflammatory disease.

HIV Testing

It is critical to maintain confidentiality when caring for clients, as well as their specimens. Providers must not leave specimens identified for HIV testing in open view of unauthorized medical personnel. Discussions with clients about their risk factors should be confidential. *Testing should be performed only after informed consent is obtained from the adolescent. Providers must not mail the client consent to the laboratory; the consent must be retained with the client's records.*

HIV testing may be performed for adolescents without requirement of parental consent. Adolescents at risk for HIV infection should be offered confidential HIV screening. If the client refuses the HIV test, the provider may not perform the test and must explain the option of anonymous testing and refer the client to a testing facility that offers anonymous testing. A notation must be made in the medical record that notification of the HIV test and the right to refuse was given. Providers may call the HIV/STD InfoLine for referrals to HIV/acquired immune deficiency syndrome (AIDS) testing sites; prevention, case management, and treatment providers; STD clinics; and other related service organizations. The HIV/STD InfoLine is 1-800-299-2437. This toll-free HIV/AIDS and STD information and referral service is available for English- and Spanish-speaking callers and for those who are hearing-impaired.

Laboratory Procedure

Specimens for HIV screening must be sent to the DSHS laboratory. The presence of HIV-1 antibodies in client serum is a long-term marker of infection. Specimens are tested on an enzyme immunoassay (EIA) that identifies antibodies that are specific for the HIV-1 virus. Specimens that are initially reactive on the EIA screen are retested in duplicate on the EIA. If either of the duplicate retests are reactive, the EIA is considered repeatedly reactive and a confirmatory test, the Western blot, is performed.

The Western blot involves the separation of the virus proteins by size on a special strip of filter paper. This strip is soaked in a dilution of client serum. If antibodies specific for the different proteins are present, they will bind to that portion of the strip. The antibodies are then detected with enzyme-labeled antibodies that cause a darkening on the strip where client antibodies have bound. Western blot bands are named by a letter indicating the type of molecule (p=protein, gp=glycoprotein), and a number that indicates their relative size in kilodaltons (e.g., p17=a protein 17 kilodaltons in size).

43.4 THSteps-Comprehensive Care Program (CCP)

43.4.1 THSteps-CCP Overview

THSteps-CCP is an expansion of the EPSDT service as mandated by the OBRA of 1989, which requires all states to provide treatment for correction of physical or mental problems to THSteps-eligible clients for any medically necessary services and for which FFP is available even if the services are not covered under the state's Medicaid plan. This expansion of services is provided only for those clients who are younger than 21 years of age and eligible to receive THSteps services.

CPT only copyright 2005 American Medical Association. All rights reserved.

In May 1991, the CMS issued a clarification of this legislation that expanded THSteps-CCP services to include treatment for problems identified by any health care professional, regardless of whether a formal EPSDT checkup has been performed.

The following THSteps-CCP provider sections describe the specific requirements of each area of responsibility:

- "Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)" on page 43-37
- "Durable Medical Equipment Supplier (THSteps-CCP Only)" on page 43-39
- "Early Childhood Intervention (ECI) (THSteps-CCP Only)" on page 43-53
- "Licensed Dietitians (THSteps-CCP Only)" on page 43-54
- "Occupational Therapists (THSteps-CCP Only)" on page 43-55
- "Orthotic and Prosthetic Suppliers (THSteps-CCP Only)" on page 43-58
- "Pharmacies (THSteps-CCP Only)" on page 43-60
- "Private Duty Nursing (PDN) THSteps-CCP Only" on page 43-64
- "Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)" on page 43-71
- "Speech-Language Pathologists (THSteps-CCP Only)" on page 43-78

Refer to: "THSteps Medical and Dental Administrative Information" on page 43-5 for more information.

43.4.1.1 Enrollment

THSteps-CCP providers must meet Medicaid/HHSC participation standards to enroll in the program. All CCP providers must be enrolled in Medicaid to be reimbursed for services. Send provider enrollment inquiries and application requests to TMHP Provider Enrollment at the TMHP address in "Written Communication with TMHP" on page xi. Write “Provider Enrollment” on the first line of the address.

43.4.1.2 Medicaid Managed Care Enrollment

Certain providers may be required to enroll with a Medicaid Managed Care health plan to be reimbursed for services provided to Medicaid Managed Care clients. Contact the individual health plans for enrollment information. Refer to "Managed Care" on page 7-1 for more information on Medicaid Managed Care programs.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.1.3 Communication with THSteps-CCP

Providers can use the following telephone or fax numbers for prior authorization or information on CCP services:

Telephone and Fax Numbers for Prior Authorization or Information on CCP Services	
In-Home Care (Home Health Services)/CCP	1-800-846-7470
CCP Fax	1-512-514-4212
Comprehensive Care Inpatient Psychiatric (CCIP)	1-800-213-8877
CCIP Fax	1-512-514-4211

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Send requests for prior authorization and appeals of prior authorization requests to the following address:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program
PO Box 200735
Austin, TX 78720-0735

Address first-time claims and appeals of incomplete claims for CCP only to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

Direct all other correspondence to a department (e.g., Provider Enrollment). Send all other claims, appeals, and resubmissions to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200285
Austin, TX 78720-0285

Clients should direct written communication to HHSC at the following address:

HHSC
Customer Service
1100 West 49th Street
Austin, TX 78756-3168

Medicaid clients and families may contact HHSC at 1-800-252-8263.

Documentation requirements for specific services and supplies are found in the provider-specific sections of this chapter.

43.4.1.4 Client Eligibility

The client must be younger than 21 years of age and eligible for THSteps at the time of the service request and service delivery. If the client’s Medicaid Identification (Form H3087) states “Emergency Care,” “PE,” or “QMB,” the client is not eligible for THSteps-CCP benefits.

Clients are ineligible for THSteps-CCP services beginning the day of their 21st birthday.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.1.5 Benefits

Payment is considered for any health care service that is medically necessary and for which FFP is available. CCP benefits are allowable services not currently covered under the Texas Medicaid Program (e.g., speech-language pathology [SLP] services for nonacute conditions, private duty nursing [PDN], prosthetics, orthotics, apnea monitors and some durable medical equipment [DME], some specific medical nutritional products, medical nutrition services, inpatient rehabilitation, travel strollers, and special needs car seats). CCP benefits also include expanded coverage of current Texas Medicaid Program services where services are subject to limitations (e.g., diagnosis restrictions for total parenteral nutrition [TPN]). Requests for services that require a prior authorization (prior authorization is a condition for reimbursement, not a guarantee of payment) must be submitted to the TMHP Medical Director. For information about dental, TPN, respiratory therapy, and vision care benefits, refer to provider-specific sections of this manual.

Medicaid Benefits for Children

The following are Medicaid benefits for children living with a family (including foster care):

- Medical services (physician, hospital, hearing aids [PACT], and eyeglasses)
- THSteps medical checkups (including immunizations) and dental exams and services
- Medications through the Texas Medicaid Vendor Drug Program (VDP) (unlimited prescriptions, some over-the-counter with prescription)
- THSteps-CCP (prosthetics, orthotics, and speech-language pathology services for nonacute conditions)
- Texas Medicaid Home Health Services that may be considered medically necessary (e.g., nursing visits, supplies, DME, and PT and OT for acute conditions provided in the home)

Medicaid benefits for children living in residential treatment centers include the following:

- Medical services (physician, hospital, hearing aids [PACT], and eyeglasses)
- THSteps medical checkups (including immunizations) and dental exams and services
- Medications through VDP (unlimited prescriptions, some over-the-counter with prescription)
- THSteps-CCP, excluding outpatient mental health services

Medicaid benefits for children living in nursing facilities include the following:

- Medical services (physician, hospital, hearing aids [PACT], and eyeglasses)
- THSteps medical checkups (including immunizations) and dental exams and services
- Medications through VDP (unlimited prescriptions)
- THSteps-CCP is limited to the following:
    - Adaptive strollers
    - Augmentative communication devices
    - Orthotics
    - Prosthetics
    - Texas Medicaid Home Health Services custom DME

Medicaid benefits for children in ICF-MR facilities (*not* state schools) include the following:

- Medical services (physician, hospital, hearing aids [PACT], and eyeglasses)
- THSteps medical checkups (including immunizations) and dental exams and services
- Medications through VDP (unlimited prescriptions)
- THSteps-CCP (limited to orthotics and prosthetics)
- DME (covered in the daily rate)

Pneumococcal 7-Valent Conjugate Vaccine

Pneumococcal 7-valent conjugate vaccine is covered under TVFC. If a child does not meet TVFC criteria, coverage may be considered through THSteps-CCP.

The pneumococcal 7-valent conjugate vaccine is reimbursed only when all of the following criteria are met:

- The child must be eligible for THSteps-CCP.
- The child must be 2 through 59 months of age.
- The physician must provide documentation of medical necessity supporting the administration of the vaccine to the specific child above and beyond the TVFC criteria.
- The provider has obtained prior authorization through THSteps-CCP. Prior authorization is a condition for reimbursement, not a guarantee of payment.

Providers must use procedure code 1-90669 when billing for the pneumococcal 7-valent conjugate vaccine approved through CCP and procedure codes 1-90471 or 1-90472 when billing for the administration.

Medicaid Procedure Codes

The following table identifies CCP-related Medicaid procedure codes. This list is not all-inclusive but represents the most commonly billed CCP procedures that are not listed in specific sections. These codes are not payable for all provider types. Other codes are listed in specific CCP sections of this manual, and additional codes can be found in "Texas Medicaid (Title XIX) Home Health Services" on page 24-1. Prices are subject to change.

If a provider uses additional codes not listed, the reimbursement may be obtained by requesting a fee schedule from TMHP.

Procedure Code	Maximum Fee
9-E1340	MP
J-E1639	$214.68
L-E1639	$21.47
J-E1800	MP
J-E1805	MP
MP = Manually priced	

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Maximum Fee
J-E1810	MP
J-E1815	MP
9-L1500	$1,292.11
9-L1500 *with* modifier TF	$1,483.13
9-L1500 *with* modifier TG	$1,867.50
9-L1940	$316.47
9-L2270	$31.98
9-L3150	$65.77
9-L6628	$366.57
MP = Manually priced	

Limitations

Payment cannot be made for any service, supply, or equipment for which FFP is not available. The following are some examples:

- Vehicle modification, mechanical, and/or structural (such as wheelchair lifts)
- Structural changes to homes, domiciles, or other living arrangements
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, filters, space heaters, fans, water purification systems, vacuum cleaners, and treatments for dust mites, rodents, and insects
- Ancillary power sources and other types of standby equipment (except for technology-dependent clients such as those who are ventilator-dependent for more than six hours per day)
- Educational programs, supplies, or equipment (such as a personal computer or software)
- Equine or hippotherapy
- Exercise equipment, home spas or gyms, toys, or therapeutic balls
- Tennis shoes
- Attendant care (any in-home care need that does not require a licensed nurse, such as grooming, bathing, lifting, turning, and house-cleaning or -keeping). Clients requiring this type of care should contact their local DSHS office for information about community-based programs for primary home care, day activities, or other related services
- Respite care (relief to caregivers)
- Aids for daily living (toothbrushes, spoons, and foot stools)
- Take-home drugs from hospitals. Eligible hospitals may enroll in and bill VDP. Pharmacies that want to enroll should call 1-512-338-6978
- Therapy involving any breed of animal

43.4.1.6 Prior Authorization and Documentation Requirements

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. A prior authorization number (PAN) is a TMHP-assigned number establishing that a service or supply has been determined to be medically necessary and for which FFP is available. It is *each provider's responsibility* to check the client's Medicaid Identification (Form H3087) at the time *each service is provided* to verify eligibility. Any service provided while the client is not eligible cannot be reimbursed by TMHP, and the responsibility for payment of services is determined by private arrangements made between the provider and client.

Prior authorization of THSteps-CCP services may be requested in writing by completing the appropriate request form, attaching any necessary supportive documentation, and mailing or faxing it to the TMHP-CCP department. All requested information on the form must be completed, or the request are returned to the provider. Incomplete forms are *not* accepted. If prior authorization is granted, the potential provider of service (such as the DME supplier, pharmacy, RN, or physical therapist) receives a letter that includes the PAN, the procedures authorized, and the length of the authorization. Providers are notified in writing whether additional information is needed to process the request for services.

Written requests for prior authorization are *mandatory* for the following services:

- Apnea monitors for clients older than 4 months of age or after an initial two months of rental
- Customized DME not authorized under Medicaid Home Health Services (such as power wheelchairs)
- Diapers, wipes, and underpads for children younger than 4 years of age
- DME not authorized under Medicaid Home Health Services
- Formula for a client younger than 21 years of age if the client does not have a gastrostomy tube (G-tube) or has a metabolic disorder
- Freestanding psychiatric services
- Freestanding rehabilitation services
- Gastrostomy buttons (G-buttons) not authorized under Medicaid Home Health Services
- High-power lenses
- Pediatric pneumograms, except for the first two pediatric pneumograms for infants younger than 12 months of age (refer to criteria in "Physician" on page 36-1)
- PDN
- Physical therapy (PT), occupational therapy (OT), SLP services
- TPN

CPT only copyright 2005 American Medical Association. All rights reserved.

Submit a THSteps-CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department *before* providing services.

Important: *Documentation to support medical necessity of the service, equipment, or supply (such as prescription, letter, and therapy notes) must be current and signed by a physician (MD or DO) before services are performed. Providers must keep the information on file.*

Refer to: CCP provider-specific sections for prior authorization requirements of specific services.

Diagnosis Coding

All providers should obtain the client's medical diagnosis from the physician. This information must be reflected on each claim submitted to TMHP using ICD-9-CM coding.

Exception: *Pharmacy DME providers enrolled in Medicaid with a "VP" provider identifier are not required to provide diagnoses; however, electronic claims must have a diagnosis code of V7285 for the claim to be accepted.*

Purchase Versus Equipment Rental

When providing equipment not authorized under Medicaid Home Health Services for THSteps-CCP clients with long-term or chronic conditions, it is more cost-effective, in many cases, to purchase the equipment rather than rent it. The client's condition and length of time the equipment will be used should be carefully assessed before authorization for rental or purchase is requested.

THSteps-CCP does not pay for the purchase of certain types of equipment (e.g., apnea monitors); consequently, long-term rental may be considered. Most other equipment is rented for only four months initially. During this time, the provider should assess whether the equipment should be purchased *before* the rental lapses. Rentals must be prior authorized.

After prior authorization is obtained for purchase, the new equipment must be provided and rental discontinued. THSteps-CCP does not purchase used equipment.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Providers of customized or nonbasic medical equipment also must be enrolled as Medicare DME providers.

Drug Approval, Medical Device

Manufacturers may request drug or medical device products be added to THSteps-CCP by sending the information in writing to the following address:

HHSC
1100 West 49th Street
Austin, TX 78756-3179

HHSC reviews the information. Requests for consideration should *not* be sent to TMHP.

Refer to: "THSteps-CCP ECI Request for Initial/Renewal Outpatient Therapy" on page B-108.

43.4.1.7 Physician Signature

The signature of the physician (MD or DO) on a prescription or THSteps-CCP Authorization Request Form must be current to the service date(s) of the request, i.e., the signature must always be before the service start date and no older than three months before the current date(s) of service requested. Physician signatures dated after the service start date on initial requests cannot be accepted as documentation supporting medical necessity. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. If services begin as a result of a verbal order before the physician's signature date, submit proof of the verbal order with the request.

Stamped signatures are not accepted on THSteps-CCP Authorization Request Forms or prescriptions for THSteps CCP prior authorized services, supplies, or equipment. Verbal orders must be cosigned by a physician (MD or DO) within two weeks or per provider policy if less. Signatures of NPs, CNSs, PAs, or doctors of philosophy (PhDs) are *not* accepted.

Physician prescriptions must be specific to the type of service requested. For example, if the provider is requesting PT, the prescription must request physical therapy, not just therapy.

43.4.2 Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)

43.4.2.1 Enrollment

Comprehensive outpatient rehabilitation facilities (CORFs) and outpatient PT/speech pathology (OPT/SP) providers must be certified by Medicare, have a valid provider agreement with HHSC, and have documentation that the TMHP enrollment process has been completed.

For questions about enrollment or billing, call the TMHP Contact Center at 1-800-925-9126.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

43.4.2.2 Reimbursement

CORFs and ORFs for THSteps-CCP physical, occupational, and speech therapy is based on a prospective payment system (PPS) fee schedule in accordance with 1 TAC §355.8085.

Previously, the reimbursement methodology was based on reasonable costs with interim payment percentages applied to billed charges.

After the PPS fees were implemented effective January 1, 2006, and a CORF/ORF had its final cost settlement based on the provider's fiscal year covering dates of service through December 31, 2005, TMHP will discontinue the cost settlement process for CORFs/ORFs for all services regardless of the type (old and/or any newly

CPT only copyright 2005 American Medical Association. All rights reserved.

added). CORFs/ORFs will no longer be subject to cost settlement once the provider's cost report covering dates of service through December 31, 2005, has been settled.

To update PPS fees for CORFs/ORFs for future periods, CORFs/ORFs may be required to submit cost reports or cost surveys.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.2.3 Benefits and Limitations

CORFs/ORFs may only bill for outpatient rehabilitation services to Medicaid-THSteps clients.

PT, OT, and/or speech therapy (ST) may be billed in POS 1, 2, or 5 and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client's daycare facility, or the client's school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only THSteps-CCP therapy that can be delivered in the client's school during regular school hours are those delivered by school districts as School Health and Related Services (SHARS) as POS 9.

The client must be eligible for CCP for consideration of reimbursement and under a physician's treatment.

Children receiving therapy services reimbursed by CCP must have conditions that require ongoing medical supervision. To establish medical necessity, a physician prescription and revised therapy treatment plan are needed at least every six months. (Therapy services for acute conditions are reimbursed by the Texas Medicaid Program.)

PT, OT, and ST services require prior authorization. Providers must indicate the modifiers GP (PT) or GO (OT) to identify the type of therapy being requested and must file claims with these modifiers to identify the type of therapy performed. Claims received without the appropriate modifier(s) are denied with the message, "This procedure requires a modifier. Please appeal claim with the appropriate modifier."

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The initial therapy request must include the following:

- A TP-1
- A copy of the current evaluation
- Documentation indicating the treatment goals
- Anticipated measurable progress toward goals
- Client gross or fine motor delays, or expressive or receptive delays, in years or months versus chronological age

Refer to: "Request for Initial Outpatient Therapy (Form TP-1)" on page B-78.

A Request for Extension of Outpatient Therapy (Form TP-2) must include a current physician signature, a summary statement of measurable progress made during the treatment period, and documentation indicating new treatment goals and anticipated measurable progress for the next treatment period.

Refer to: "Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)" on page B-79.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new evaluation is required. Prior authorization is mandatory and is not a guarantee of payment. Providers must adhere to filing guidelines for payment consideration.

PT, OT, and ST assessments should be billed using appropriate procedure codes. These codes should be billed with a quantity of 1 for each type of therapy performed (PT, OT, and SLP), regardless of time spent with the client.

OT, PT, and ST should be billed in increments of 15 minutes (i.e., a quantity of 1 equals 15 minutes, a quantity of 2 equals 30 minutes, etc.). Evaluations and re-evaluations are based on a per-evaluation/re-evaluation encounter with a quantity of 1. An evaluation and therapy of the same discipline/type are not reimbursable when performed on the same day (e.g., PT evaluation with PT services are not payable on the same day). OT, PT, and ST evaluations are still limited in payment to once per six months for any provider at the same facility. OT, PT, and ST re-evaluations are also limited in payment to once per month for any provider at the same facility. An evaluation or re-evaluation on a more frequent basis would be outside the current benefit limitations and would only be considered for payment with prior authorization or written documentation of medical necessity. CORFs and ORFs are still subject to a maximum of 8 units (2 hours) each of PT, OT, or ST services per date of service per modifier and per client.

The procedures below may be payable to CORFs/ORFs based on a PPS fee schedule.

Procedure Code	Type	Modifier	Reimbursement Amount and Billing Increment
1-92506	ST		$280.00 per evaluation
1-92507	ST		$45.00 per 15 min.
1-92508	ST		$22.50 per 15 min.
1-92610	ST		$280.00 per evaluation
1-92526	ST		$45.00 per 15 min.
1-97001	PT		$200.00 per evaluation
1-97002	PT		$200.00 per re-evaluation
1-97003	OT		$200.00 per evaluation
1-97004	OT		$200.00 per re-evaluation
1-97012	PT, OT	GO, GP	$45.00 per 15 min.
1-97014	PT, OT	GO, GP	$45.00 per 15 min.
1-97016	PT, OT	GO, GP	$45.00 per 15 min.
1-97018	PT, OT	GO, GP	$45.00 per 15 min.
1-97022	PT, OT	GO, GP	$45.00 per 15 min.
1-97024	PT, OT	GO, GP	$45.00 per 15 min.
1-97026	PT, OT	GO, GP	$45.00 per 15 min.

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Type	Modifier	Reimbursement Amount and Billing Increment
1-97028	PT, OT	GO, GP	$45.00 per 15 min.
1-97032	PT, OT	GO, GP	$45.00 per 15 min.
1-97033	PT, OT	GO, GP	$45.00 per 15 min.
1-97034	PT, OT	GO, GP	$45.00 per 15 min.
1-97035	PT, OT	GO, GP	$45.00 per 15 min.
1-97036	PT, OT	GO, GP	$45.00 per 15 min.
1-97039	PT		$45.00 per 15 min.
1-97110	PT, OT	GO, GP	$45.00 per 15 min.
1-97112	PT, OT	GO, GP	$45.00 per 15 min.
1-97113	PT, OT	GO, GP	$45.00 per 15 min.
1-97116	PT, OT	GO, GP	$45.00 per 15 min.
1-97124	PT, OT	GO, GP	$45.00 per 15 min.
1-97139	PT, OT	GO, GP	$45.00 per 15 min.
1-97140	PT, OT	GO, GP	$45.00 per 15 min.
1-97150	PT, OT	GO, GP	$22.50 per 15 min.
1-97530	PT, OT	GO, GP	$45.00 per 15 min.
1-97535	PT, OT	GO, GP	$45.00 per 15 min.
1-97537	PT, OT	GO, GP	$45.00 per 15 min.
1-97542	PT, OT	GO, GP	$45.00 per 15 min.
1-97750	PT, OT	GO, GP	$45.00 per 15 min.
1-97799	PT, OT	GO, GP	$45.00 per 15 min.

43.4.2.4 Claims Information

CORFs must file their claims on the HCFA-1450 (UB-92) claim form. Providers may purchase these claim forms from the vendor of their choice. TMHP does not supply the forms. Submit electronic claims with a PAN. Failure to provide a PAN on an electronic claim results in claim denial.

Refer to: "Prior Authorization and Documentation Requirements" on page 43-36 for more information about PANs.

The procedure codes CORFs use are HCFA-1450 (UB-92) revenue or CPT codes. The acceptable POS is outpatient facility (POS 5).

The PAN must be identified in Block 63 of the HCFA-1450 (UB-92) claim form or the appropriate field of the electronic software. PT, OT, and SLP *evaluations* should be billed with procedure code B-424, B-434, or B-444. This code should be billed with a quantity of 1 for each type of therapy performed (PT, OT, and SLP), regardless of time spent with the client. The codes used for billing therapy are the CPT codes. The codes are in the 1-9000 series. The *Texas Medicaid Bulletin* provides updates to the CPT codes. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 claim form or its equivalent.

Refer to: "Occupational Therapists (THSteps-CCP Only)" on page 43-55.

"Physical Therapists (THSteps-CCP Only)" on page 43-62.

"Speech-Language Pathologists (THSteps-CCP Only)" on page 43-78.

“Comprehensive Outpatient Rehabilitation Facility (CORF) (THSteps-CCP Only)” on page D-10 for a claim form example.

"HCFA-1450 (UB-92) Claim Filing Instructions" on page 5-32 for paper claims completion instructions.

43.4.3 Durable Medical Equipment Supplier (THSteps-CCP Only)

Medicaid beneficiaries younger than 21 years of age are entitled to all medically necessary DME. DME is medically necessary when it is required to correct or ameliorate disabilities or physical or mental illnesses or conditions. Any numerical limit on the amount of a particular item of DME can be exceeded for Medicaid beneficiaries younger than 21 years of age if medically necessary. Likewise, time periods for replacement of DME do not apply to Medicaid beneficiaries younger than 21 years of age if the replacement is medically necessary. When prior authorization is required, the information submitted with the request must be sufficient to document the reasons why the requested DME item or quantity is medically necessary.

43.4.3.1 Enrollment

To be eligible to participate in THSteps-CCP, providers of DME must be enrolled in VDP (for payment of prescription drugs) or be enrolled in Medicare. Providers of customized or nonbasic medical equipment must also be enrolled as a Medicare DME provider. Orthotic and prosthetic providers are also enrolled as Medicare DME providers.

Home health agencies that provide DME should refer to "Texas Medicaid (Title XIX) Home Health Services" on page 24-1 to enroll as a DME–Home Health Services (DMEH) provider.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.3.2 Reimbursement

DME and expendable supplies are reimbursed according to a fee schedule, with fees calculated in accordance with 1 TAC §355.8441 (4)-(5). The current DME fee schedule is available on the TMHP website at www.tmhp.com. A provider reimbursed according to a fee schedule is reimbursed the lower of the provider’s billed charges or the published Medicaid fee.

TMHP manually prices purchases of DME and expendable supplies, other than nutritional products, that have no established fee, based on the manufacturer’s suggested retail price (MSRP) less 18 percent, with documentation

CPT only copyright 2005 American Medical Association. All rights reserved.

of the MSRP submitted by the provider. Nutritional products that require manual pricing are priced at 89.5 percent of the average wholesale price (AWP). TMHP manually prices monthly rental of DME and expendable supplies other than nutritional products that have no established fee based on the MSRP less 18 percent divided by 13 months.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.3.3 Benefits and Limitations

THSteps-CCP benefits are for Medicaid THSteps-eligible clients younger than 21 years of age. CCP eligibility ends on the day of the client's 21st birthday. If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.

The majority of DME and expendable supplies are covered through the Medicaid Home Health Services Program.

If a service cannot be provided through Medicaid Home Health Services, these services may be covered through CCP if they are determined to be medically necessary for the child and have FFP available for them.

Providers must use the following TOS codes when providing CCP services:

TOS	Description
J	Purchase (new)
L	Rental (monthly)
1	Medical services (including some injectable drugs)
9	Medical supplies
9	Purchase of orthotic or prosthetic devices

To establish medical necessity of the equipment for the child, the provider must have on file in the client's records current documentation that is signed by a physician (e.g., signed and dated prescription) showing the following:

- A diagnosis relative to each item requested
- The specific type of supply needed
- The length of time needed

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Prior Authorization and Documentation Requirements

Prior authorization is required. Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

Providers requesting written authorization should complete the THSteps-CCP Prior Authorization Request Form and attach documentation to support the request. The documentation must include a current prescription signed and dated by a physician (MD or DO) and then be mailed or faxed to TMHP. For specific policy information not contained in this manual related to the purchase of DME, such as augmentative communication devices (ACDs), call the TMHP In-Home Care Contact Center (formerly CCP Customer Service) at 1-800-846-7470.

43.4.3.4 Physician Signature

The physician's signature, required on a prescription and the THSteps-CCP Prior Authorization Request Form, must be current to the service date of the request.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

Physician prescriptions must be specific to the TOS requested. For example, if the provider is requesting a customized wheelchair, the prescription must request a customized wheelchair, not just a wheelchair.

Documentation of Services for Supplies

Providers must retain delivery slips or invoices, documenting the date of delivery for all supplies provided to a client, which they must disclose to HHSC or its designee on request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

Documentation of delivery must include *one* of the following:

- Delivery slip or invoice signed and dated by the client/caregiver
- A dated carrier tracking document attached to the delivery slip or invoice

The DOS is the date supplies are delivered and/or shipped to the client as evidenced by the dated tracking document.

DME Certification and Receipt Form

Providers must complete and retain the "DME Certification and Receipt Form" on page B-35 for all Medicaid clients before submitting a claim for payment. The DME provider must retain this form and not submit it with the claim.

Specific THSteps-CCP Policies

Most DME and supplies are available under Texas Medicaid Home Health Services. If the service is not available under Home Health Services, CCP may cover the requested service, if the client is THSteps-CCP-eligible and the service is medically necessary, requested by a physician, and for which FFP is available.

Refer to: "DME Certification and Receipt Form" on page B-35.

"Texas Medicaid (Title XIX) Home Health Services" on page 24-1 for specific policies.

43.4.3.5 Mobility Aids

Mobility aids and related supplies, including, but not limited to, strollers, special needs car seats, travel safety restraints, and thoracic-hip-knee-ankle orthoses (THKAO)/

CPT only copyright 2005 American Medical Association. All rights reserved.

parapodiums are a benefit to assist clients to move about in their environment. Mobility aids equipment includes, but is not limited to, the items detailed below.

Mobility aids and related supplies may be considered for reimbursement through the THSteps-CCP for clients younger than 21 years of age that are THSteps-CCP eligible when the following criteria are met:

- The equipment requested must be medically necessary.
- FFP must be available.
- The client's mobility status would be compromised without the requested equipment.
- The requested equipment or supplies must be safe for use in the home.

Mobility aids may be considered through THSteps-CCP if the requested equipment is not available through Title XIX Home Health Services or the client does not meet criteria through Title XIX Home Health.

Mobility aid lifts for vehicles, and vehicle modifications are not reimbursed through Texas Medicaid according to Federal Regulations.

Note: *Permanent ramps, vehicle ramps and home modifications are not a benefit of Texas Medicaid.*

Authorization

Prior authorization is required for all mobility aids and related services except travel safety restraints for children with a medical condition requiring them to be transported in either a prone or supine position.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

A completed THSteps–CCP Prior Authorization Request Form prescribing the durable medical equipment and/or medical supplies must be signed and dated by the prescribing physician familiar with the client before requesting prior authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures are not accepted. The completed THSteps-CCP Prior Authorization Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician's medical record for the client.

To avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of the medical necessity for the equipment/services requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the mobility aid. A determination is made by the THSteps-CCP nurses as to whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Mobility aid equipment that has been purchased is anticipated to last a minimum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer repairable. The durable medical equipment may then be considered for prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

When prior authorization of a mobility aid replacement is requested before five years have passed, the following information must be submitted with the request:

- A statement from the prescribing physician or licensed occupational or physical therapist
- Documentation supporting why the equipment no longer meets the client's needs

HHSC or its designee determines whether the equipment is rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment.

Reimbursement

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client's record.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

Items and/or services addressed in this policy are either reimbursed at a maximum fee determined by the HHSC or are manually priced. If an item is manually priced, MSRP must be submitted for consideration of rental or purchase with the appropriate procedure codes. Manually priced items are reimbursed at the MSRP minus a discount as determined by HHSC.

Mobility aid equipment that has been purchased is anticipated to last a minimum of 5 years and may be considered for replacement when 5 years have passed and/or the equipment is no longer repairable. The DME may then be considered for prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent recurrence must be submitted.

In situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver, a referral to the DSHS THSteps Case Management unit will be made by the Home Health Services unit for clients less than 21 years of age. The provider is notified that the State is monitoring this client's services to evaluate the safety of the environment for both the client and equipment.

CPT only copyright 2005 American Medical Association. All rights reserved.

Strollers (a multi-positional client transfer system with integrated seat, operated by care giver)

A stroller for medical needs may be considered under any of the following conditions:

- The client does not own another seating system, including, but not limited to, a wheelchair.
- The client's condition does not require another type of seating system, including, but not limited to, a wheelchair.

If the client does not meet criteria for a stroller, a wheelchair may be considered through Title XIX Home Health Services.

A medical stroller does not have the capacity to accommodate the client's growth. Strollers for medical use may be considered for prior authorization when the following criteria are met:

- The client weighs 30 pounds or more.
- The client does not already own another seating system, including but not limited to, a standard or custom wheelchair.
- The stroller must have a firm back and seat, or insert.
- The client is expected to be ambulatory within one year of request date or is not expected to need a travel chair or wheelchair within two years of request date.

The following supporting documentation must be submitted:

- A completed Wheelchair/Stroller Seating Assessment Form that includes documentation supporting medical necessity. This documentation should address why the client is unable to ambulate a minimum of 10 feet due to his/her condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy), or if able to ambulate further, why a stroller is required to meet the client's needs.
- If the client is over two years of age, documentation must support that the client's condition, stature, weight, and positioning needs to allow adequate support from a stroller.

Note: *A stroller may be considered on a case-by-case basis with documentation of medical necessity for a client who does not meet the criteria listed above.*

A seating assessment must be completed by a physician or licensed occupational or physical therapist who is not employed by the equipment supplier before requesting prior authorization. If the seating assessment is completed by a physician, reimbursement is considered part of the physician's office visit and is not prior authorized. Providers must use procedure codes 1-97001 and 1-97003 when billing for a seating evaluation.

The seating assessment must:

- Explain how the family will be trained in the use of the equipment.
- Anticipate changes in the client's needs and include anticipated modifications or accessory needs, as well as the anticipated width of the medical stroller to allow client growth with use of lateral/thigh supports.
- Include significant medical information pertinent to the client's mobility and how the requested equipment will accommodate these needs, including intellectual, postural, physical, sensory (visual and auditory), and physical status.
- Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, any recent changes in the client's physical and/or functional status, and any expected or potential surgeries that will improve or further limit mobility.
- Include information on the client's current mobility/seating equipment, how long the client has been in the current equipment, and why it no longer meets the client's needs.
- Include the client's height, weight, and a description of where the equipment is to be used. Seating measurements are required.
- Include the accessibility of client's residence.
- Include manufacturer's information, including the description of the specific base, any attached seating system components, and any attached accessories.

To request prior authorization for procedure code J-E1035, the criteria must be met for the level of stroller requested:

- *Level One: Basic Stroller.* The client meets the criteria for a stroller. Providers must use procedure code J-E1035.
- *Level Two: Stroller with Tray for Oxygen and/or Ventilator.* The client meets the criteria for a level-one stroller and is oxygen- or ventilator-dependent. Providers must use procedure code J-E1035 with modifier TF.
- *Level Three: Stroller with Positioning Inserts.* The client meets the criteria for a level-one or level-two stroller and requires additional positioning support. Providers must use procedure code J-E1035 with modifier TG.

Stroller Ramps—Portable and Threshold

A portable ramp is defined as a ramp that is a unit able to be carried as needed to access a home and weighing no more than 90 pounds and/or measuring no more than ten feet in length. A threshold ramp is defined as a ramp that provides access over elevated thresholds.

Portable ramps exceeding the above criteria may be considered on a case-by-case basis with documentation of medical necessity and a statement that the requested equipment is safe for use.

Providers must use procedure code J-E1399 for stroller ramps–portable and threshold.

One portable and one threshold ramp for stroller access may be considered for prior authorization when documentation supports medical necessity to include the following documentation:

- The date of purchase and serial number of the client's medical stroller or documentation of a medical stroller request being reviewed for purchase.
- Diagnosis with duration of expected need.

CPT only copyright 2005 American Medical Association. All rights reserved.

- Ramps may be considered for rental for short-term disabilities.
- Ramps may be considered for purchase for long-term disabilities.
- A diagram of the house showing the access point(s) with the ground-to-floor elevation and any obstacles.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. Prior authorization is a condition for reimbursement, not a guarantee of payment.

Mobility aid lifts for vehicles, and vehicle modifications are not reimbursed through the Texas Medicaid Program according to federal regulations.

Note: *Permanent ramps, vehicle ramps, and home modifications are not a benefit of the Texas Medicaid Program.*

43.4.3.6 Thoracic-Hip-Knee-Ankle Orthoses (THKAO) (Vertical or Dynamic Standers, Standing Frames/ Braces, and Parapodiums)

Thoracic-hip-knee-ankle orthoses (THKAO) (vertical or dynamic standers, standing frames/braces, and parapodiums), including all accessories, require prior authorization. A THKAO may be considered if the client requires assistance to stand and remain standing. A THKAO is not considered for prior authorization if the client already owns a stander (other than a vertical stander or standing frame/brace) or gait trainer.

Prior authorization may be considered for the THKAOs with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory
- Anticipated benefits of the equipment
- Frequency and amount of time of a standing program
- Anticipated length of time the client will require this equipment
- Clients height/weight/age
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Vertical or Dynamic Stander

A vertical stander is used to initiate standing for children who cannot maintain a good standing posture or may never be able to stand independently. A vertical stander is used to develop weight bearing through the legs in order to decrease demineralization and to promote better body awareness. Documentation for a dynamic stander must address medical necessity for the stander to be mobile.

Standing Frame/Brace

A standing frame/brace is used to help very young children, 12 months of age or older who have good head control in the upright position, and who have a neuromuscular disease/condition resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free.

Providers must use procedure code 9-L1510 for a vertical stander or standing frame/brace. Providers must use procedure code J-E0642 for a dynamic stander.

Parapodium

A parapodium is used to help children with neuromuscular diseases/conditions resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free. It helps develop a sense of balance and aids in learning functional movements such as standing with the hands free. A parapodium acts as an exoskeleton, providing side struts and chest, hip, knee, and foot bracing.

A parapodium may be considered for reimbursement for one of the following levels:

- *Level One: Small Parapodium.* The client has a maximum axillary height of 35 inches and a maximum weight of 55 pounds (normal age range is 1 through 10 years of age). Providers must use procedure code 9-L1500 or 9-L1520.
- *Level Two: Medium parapodium.* The client has a maximum axillary height of 41 inches and a maximum weight of 77 pounds (normal age range is 5 through 12 years of age). Providers must use procedure code 9-L1500-TF or 9-L1520-TF.
- *Level Three: Large parapodium.* The client has a maximum axillary height of 45 inches and a maximum weight of 115 pounds (normal age range is 10 through 16 years of age). Providers must use procedure code 9-L1500-TG or 9-L1520-TG. Labor for parapodium assembly may be prior authorized.

Feeder Seats, Floor Sitters, Corner Chairs, and Travel Chairs

Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary and are not a benefit of THSteps-CCP. If a child requires seating support and meets the criteria for a seating system, a stroller may be considered for reimbursement with prior authorization through THSteps-CCP, or a wheelchair may be considered through Texas Medicaid Title XIX Home Health Services.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Scooters

Scooters may be considered for reimbursement through Texas Medicaid Title XIX Home Health Services.

Equipment Accessories

Consideration for prior authorization may be given under THSteps-CCP for equipment accessories, such as ventilator and oxygen trays and positioning inserts, when supporting documentation takes into account all the client's needs, capabilities, and physical/mental status.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Equipment Modifications

Modifications are replacement of components due to changes in the clients condition, not replacement due to the component no longer functioning as designed.

All modifications within the first six months after delivery are considered part of the purchase price.

Consideration for prior authorization may be given under THSteps-CCP for modifications to custom equipment if a change occurs in the client's needs, capabilities, or physical/mental status that cannot be anticipated. Documentation must include:

- All projected changes in the client's needs.
- The age of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

Equipment Adjustments

Adjustments do not require supplies.

Adjustments within the first six months after delivery are not prior authorized. Adjustments within the first six months after delivery are considered part of the purchase price.

Up to one hour of labor for adjustments may be considered for reimbursement with prior authorization through THSteps-CCP as needed after the first six months. Providers must use procedure code 9-E1340 for adjustments.

Equipment Repairs

Repairs require replacement of components that are no longer functional. Repairs to client-owned equipment may be considered for reimbursement with prior authorization through THSteps-CCP.

Technician fees are considered part of the cost of the repair. Providers must use procedure code 9-E1340.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Rentals may be considered for reimbursement during the repair period of the client's owned equipment.

Routine maintenance of rental equipment is the provider's responsibility.

Mobility Aids – CCP HCPCS Procedure Codes and Limitations

Procedure Code	Maximum Limitation	Allowed Amount
1-97001	As needed	$140.00
1-97003	As needed	$140.00
J-E0700*	One per five years	$26.00
J-E1035*	One per five years	$1,161.94
J-E1035-TF*	One per five years	$2,296.00
J-E1035-TG*	One per five years	Manually priced
J-E1037	Not a benefit	Not a benefit
L-E1037	Not a benefit	Not a benefit
9-E1340*	As needed	Manually priced
J-E1399*	One per five years	Manually priced
9-L1500*	One per five years	$1,292.11
9-L1500-TF*	One per five years	$1,483.13
9-L1500-TG*	One per five years	$1,867.50
9-L1510*	One per five years	$743.76
9-L1520*	One per five years	$266.57
9-L1520-TF*	One per five years	$510.04
9-L1520-TG*	One per five years	Manually priced

*** Procedure codes that require prior authorization**

Providers must use modifiers TF and TG for equipment repairs.

43.4.3.7 Apnea Monitor

Apnea monitors to monitor chest movement and measure heart rate are a benefit of THSteps-CCP for infants.

Apnea monitors used in the home are paid for two months without prior authorization for infants with one of the following diagnoses:

Diagnosis Code	Description
53010	Esophagitis, unspecified
53011	Reflux esophagitis
53012	Acute esophagitis
53019	Other esophagitis
53020	Ulcer of esophagus without bleeding
53021	Ulcer of esophagus with bleeding
53081	Esophageal reflux
53085	Barrett's esophagus
7707	Chronic respiratory disease arising in the perinatal period
77081	Primary apnea of newborn
77082	Other apnea of newborn
77083	Cyanotic attacks of newborn
77084	Respiratory failure of newborn
77089	Other respiratory problems after birth

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
78603	Apnea
V198	Family history of other condition, e.g., sudden infant death syndrome

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Procedure code L-E0619 is used when billing for apnea monitors.

All apnea monitors provided to THSteps-CCP clients must be capable of recording apneic episodes.

The place of service for apnea monitors is in the client's home.

Prior authorization is required for rental of an apnea monitor if the child is more than 4 months of age *or* the initial two-month rental period has expired.

Prior authorization must be obtained in writing and must include:

- A completed CCP Prior Authorization Request Form, signed and dated by the physician
- Documentation to support medical necessity and appropriateness of the apnea monitor
- A physician interpretation, signed and dated by the physician, of the most recent two-month's apnea monitor downloads

Apnea monitors are not authorized if the documentation does not support medical necessity.

Procedure code I-93272 may be used by the physician to bill for the interpretation of the apnea monitor recordings.

Electrodes and lead wires for the apnea monitor are a benefit only if the apnea monitor is owned by the client. If the apnea monitor is rented, the electrodes and lead wires are considered part of the rental fee. The electrodes and lead wires may be considered for purchase with procedure codes 9-A4556 and 9-A4557 and only with documentation of medical necessity and a statement from the physician that the client owns the monitor. The apnea monitor/pulse oximeter combination device is not a benefit of the Texas Medicaid Program.

43.4.3.8 Croup Tent/Pulse Oximeter

Croup Tent

The croup tent consists of a plastic tent and humidification system placed over a crib or bed to provide a high humidity environment.

A croup tent requires prior authorization.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Reimbursement for the croup tent is per month, regardless of whether the therapy is for only one day or one week.

Rental of the croup tent includes purchase of the croup tent canopy, rental of a compressor, set-up charge, and supplies.

Separate payment is not made for individual components.

Procedure code L-E1399 must be used for rental of the croup tent.

Pulse Oximeter

A pulse oximeter is used to monitor the client's body oxygen saturation level for those clients at risk for hypoxia.

A pulse oximeter is a benefit of the Texas Medicaid Program through CCP. A higher level pulse oximeter may be reimbursed based on documentation of medical necessity.

A pulse oximeter requires prior authorization.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

A pulse oximeter may be reimbursed for rental only once a month and is limited to a maximum of six months, at which time purchase may be considered for those clients requiring long-term monitoring.

The provider is responsible for retaining a current prescription.

A pulse oximeter rental, including the probes, may be authorized for clients who:

- Are younger than 21 years of age and are ventilator and/or oxygen dependent, *or*
- Are weaning from oxygen and/or a ventilator and have other documented medically necessary conditions requiring a pulse oximeter in the home

A pulse oximeter may be considered for reimbursement for clients younger than 21 years of age with one of the following levels:

- *Level One.* Basic level monitoring and/or spot checks. Applicable if the client meets at least one the of the following criteria:
  - Client is oxygen- and/or ventilator-dependent at least part of the day (Less than eight hours per day).
  - Client is clinically stable and able to wean from oxygen and/or ventilator.
  - Client has another medically necessary condition requiring monitoring of oxygen saturation.
  - There is a caregiver identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.
- *Level Two.* Providers must use modifier TF when the oximeter device is for intermediate level of care and continuous monitoring. Applicable if the client meets all the following criteria:
  - Client is oxygen- and/or ventilator-dependent a significant portion of the day (e.g., 8 to 16 hours per day).
  - Client needs continuous monitoring of oxygen saturation during sleep and/or to maintain optimal levels.

CPT only copyright 2005 American Medical Association. All rights reserved.

- There is a caregiver identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.
- *Level Three.* Providers must use modifier TG if the oximeter device is for a serious condition and there is critical need for continuous monitoring. Applicable if the client meets all the following criteria:
  - Client has frequent need for changes in oxygen and ventilator settings.
  - Client is oxygen- and/or ventilator-dependent (e.g., 16 to 24 hours per day).
  - Client is in the weaning process from oxygen and/or ventilator and experiencing respiratory complications.
  - Client requires equipment that is motion-sensitive, has more complex readouts, or monitoring capabilities.
  - There is a caregiver identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.

A pulse oximeter rental is limited to once per month for a maximum of six months. For those clients not requiring long-term monitoring, a rental extension may be considered for up to six months for level two and three oximeters (TF and TG devices). Purchase may be considered for those clients requiring long term monitoring. Before purchase, the provider must supply a new oximeter to the client.

For all requests providers must:

- Submit the completed Pulse Oximeter Form in addition to the required THSteps-CCP Prior Authorization Request Form. (see "Pulse Oximeter Form" on page B-76 and the "THSteps-CCP Prior Authorization Request Form" on page B-106.)
- Clearly indicate medical necessity using the TF and TG modifiers on the Pulse Oximeter Form.
- Continue to use the current code for lease (J/L-E0445 with modifier RR) and purchase (J/L-E0445 with modifier NU).

When requesting prior authorization, providers must use the following procedure codes with the appropriate modifier:

Procedure Code	Limitation
J/L-E0445 *with* modifier RR	One per month
J/L-E0445 *with* modifier NU	One every three years
J/L-E0445 *with* modifiers RR *and* TF	One per month
J/L-E0445 *with* modifiers NU *and* TF	One every three years
J/L-E0445 *with* modifiers RR *and* TG	One per month
J/L-E0445 *with* modifiers NU *and* TG	One every five years

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Replacement sensor probes (reusable or disposable) for client-owned oximeters require prior authorization through CCP.

Sensor probes are limited to four per month using procedure code 9-A4606. Clients under 21 years of age may obtain additional probes with documentation of medical necessity.

Respiratory Care Equipment – CCP Procedure Codes and Limitations

Procedure Code	Maximum Limitation
9-A4556	15 per month/client-owned monitor
9-A4557	Two pair per year/client-owned monitor
L-E0445	One per month
J-E0445	One per five years
L-E0619	One per month
L-E1399	One per month

43.4.3.9 Electronic Blood Pressure Monitoring Device

An electronic blood pressure monitoring device is not a benefit of Texas Medicaid Home Health Services. It is a benefit of THSteps-CCP only in the home setting when:

- The client is younger than 12 months of age (coverage for clients 12 months of age or older may be considered upon review by HHSC or its designee with supporting documentation of medical necessity).
- The client is THSteps-CCP-eligible.
- The equipment is prescribed by a physician.
- Documentation is provided supporting medical necessity of the requested equipment.

Prior authorization is required for an electronic blood pressure monitoring device. A THSteps-CCP Prior Authorization Request Form, signed and dated by the physician, must be submitted with the documentation supporting medical necessity for the device. Supporting documentation of medical necessity must include the diagnosis.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

CPT only copyright 2005 American Medical Association. All rights reserved.

An electronic blood pressure monitoring device is restricted to the following diagnosis codes. Other diagnoses can be considered upon review by HHSC or its designee.

Diagnosis Code	Description
4010	Malignant essential hypertension
4011	Benign essential hypertension
4019	Unspecified essential hypertension
40200	Malignant hypertensive heart disease without congestive heart failure
40201	Malignant hypertensive heart disease with congestive heart failure
40210	Benign hypertensive heart disease without congestive heart failure
40211	Benign hypertensive heart disease with congestive heart failure
40290	Unspecified hypertensive heart disease without congestive heart failure
40300	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage I through stage IV, or unspecified
40301	Hypertensive chronic kidney disease, malignant, with chronic kidney disease stage V or end stage renal disease
40310	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage I through stage IV, or unspecified
40311	Hypertensive chronic kidney disease, benign, with chronic kidney disease stage V or end stage renal disease
40390	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
40391	Hypertensive kidney disease, unspecified, with chronic kidney disease
40400	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40401	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40402	Hypertensive heart and chronic kidney disease, malignant, without heart failure and with chronic kidney disease stage V or end stage renal disease
40403	Hypertensive heart and chronic kidney disease, malignant, with heart failure and with chronic kidney disease stage V or end stage renal disease
40410	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40411	Hypertensive heart and chronic kidney disease, benign, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40412	Hypertensive heart and chronic kidney disease, benign, without heart failure and with chronic kidney disease stage V or end stage renal disease
40413	Hypertensive heart and chronic kidney disease, benign, with heart failure and chronic kidney disease stage V or end stage renal disease
40490	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40491	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and with chronic kidney disease stage I through stage IV, or unspecified
40492	Hypertensive heart and chronic kidney disease, unspecified, without heart failure and with chronic kidney disease stage V or end stage renal disease
40493	Hypertensive heart and chronic kidney disease, unspecified, with heart failure and chronic kidney disease stage V or end stage renal disease
40501	Malignant renovascular hypertension
40509	Other malignant secondary hypertension
40511	Benign renovascular hypertension
40519	Other benign secondary hypertension
4150	Acute cor pulmonale
41511	Iatrogenic pulmonary embolism and infarction
41519	Other pulmonary embolism and infarction
4160	Primary pulmonary hypertension
4161	Kyphoscoliotic heart disease
4168	Other chronic pulmonary heart diseases

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
4169	Chronic pulmonary heart disease, unspecified
4240	Mitral valve disorders
4241	Aortic valve disorders
4242	Tricuspid valve disorders, specified as nonrheumatic
4243	Pulmonary valve disorders
4251	Hypertrophic obstructive cardiomyopathy
4252	Obscure cardiomyopathy of Africa
4253	Endocardial fibroelastosis
4254	Other primary cardiomyopathies
4260	Atrioventricular block, complete
42610	Atrioventricular block, unspecified
42611	First degree atrioventricular block
42612	Mobitz (type) II atrioventricular block
42613	Other second degree atrioventricular block
4262	Left bundle branch hemiblock
4263	Other left bundle branch block
4264	Right bundle branch block
42650	Bundle branch block, unspecified
42651	Right bundle branch block and left posterior fascicular block
42653	Other bilateral bundle branch block
42654	Trifascicular block
4266	Other heart block
4267	Anomalous atrioventricular excitation
42681	Lown-Ganong-Levine syndrome
42682	Long QT syndrome
42689	Other specified conduction disorders
4269	Conduction disorder, unspecified
4270	Paroxysmal supraventricular tachycardia
4271	Paroxysmal ventricular tachycardia
4272	Paroxysmal tachycardia, unspecified
42731	Atrial fibrillation
42732	Atrial flutter
42781	Sinoatrial node dysfunction
4280	Congestive heart failure
4281	Left heart failure
42820	Unspecified systolic heart failure
42821	Acute systolic heart failure
42822	Chronic systolic heart failure
42823	Acute on chronic systolic heart failure
42830	Unspecified diastolic heart failure

Diagnosis Code	Description
42831	Acute diastolic heart failure
42832	Chronic diastolic heart failure
42833	Acute on chronic diastolic heart failure
42840	Unspecified combined systolic and diastolic heart failure
42841	Acute combined systolic and diastolic heart failure
42842	Chronic combined systolic and diastolic heart failure
42843	Acute on chronic combined systolic and diastolic heart failure
4289	Heart failure, unspecified
5830	Nephritis and nephropathy, not specified as acute or chronic, with lesion of proliferative glomerulonephritis
5831	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranous glomerulonephritis
5832	Nephritis and nephropathy, not specified as acute or chronic, with lesion of membranoproliferative glomerulonephritis
5834	Nephritis and nephropathy, not specified as acute or chronic, with lesion of rapidly progressive glomerulonephritis
5836	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal cortical necrosis
5837	Nephritis and nephropathy, not specified as acute or chronic, with lesion of renal medullary necrosis
58381	Nephritis and nephropathy, not specified as acute or chronic, in diseases classified elsewhere
58389	Other nephritis and nephropathy, not specified as acute or chronic, with specified pathological lesion in kidney
5839	Nephritis and nephropathy, not specified as acute or chronic, with unspecified pathological lesion in kidney
5845	Acute renal failure with lesion of tubular necrosis
5846	Acute renal failure with lesion of renal cortical necrosis
5847	Acute renal failure with lesion of renal medullary (papillary) necrosis
5848	Acute renal failure with other specified pathological lesion in kidney

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
5849	Acute renal failure, unspecified
5880	Renal osteodystrophy
58889	Other specified disorders resulting from impaired renal function
591	Hydronephrosis
59371	Vesicoureteral reflux with reflux nephropathy, unilateral
59372	Vesicoureteral reflux with reflux nephropathy, bilateral
59373	Other vesicoureteral reflux with reflux nephropathy nos
7450	Common truncus
74510	Complete transposition of great vessels
74511	Double outlet right ventricle
74512	Corrected transposition of great vessels
74519	Other transposition of great vessels
7452	Tetralogy of Fallot
7453	Common ventricle
7454	Ventricular septal defect
7455	Ostium secundum type atrial septal defect
74560	Endocardial cushion defect, unspecified type
74561	Ostium primum defect
74569	Other endocardial cushion defects
7457	Cor biloculare

Procedure code L-E1399 is used to bill for the monthly rental of an electronic blood pressure monitoring device.

43.4.3.10 Incontinence Supplies for Children Younger Than 4 Years of Age

Incontinence supplies, such as diapers/briefs/liners, wipes, and underpads, may be considered for reimbursement through THSteps-CCP for those children younger than 4 years of age with a medical condition resulting in an increased urine and/or stool output beyond the typical output for this age group, such as celiac disease, short bowel syndrome, Crohn's disease, thymic hypoplasia, AIDS, congenital adrenal hyperplasia, diabetes insipidus, Hirschsprung's disease, or radiation enteritis.

Lack of bladder and/or bowel control is considered normal development up to 4 years of age.

Prior authorization is required for incontinence supplies through THSteps-CCP. A completed THSteps-CCP Prior Authorization Request Form prescribing the supplies must be signed and dated by the prescribing physician familiar with the client before requesting prior authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed THSteps-CCP Prior Authorization Request Form must be maintained by the DME provider and the prescribing physician in the client's medical record.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation, of the medical necessity of the supplies requested.

To request prior authorization for incontinence supplies, the following documentation must be provided for the item(s) requested:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client's overall health status
- Diagnosis/condition causing increased urination/stooling
- Client height, weight, and waist size
- Number of times per day the physician has ordered the supply be used
- Quantity of disposable supplies requested per month

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

A determination is made by the State or its designee as to the number of incontinence supplies prior authorized based on the child's medical needs.

A combination of diapers, briefs, and liners may be considered for authorization for clients younger than 4 years of age and are limited to 300 per month.

Note: *Procedure codes identified with (*) in the table below indicate those considered in the combination of 300 per month. Requests for services exceeding the amounts listed must be submitted with documentation of medical necessity.*

Providers must use the following procedure codes when billing for incontinence supplies for children younger than 4 years of age:

Procedure Code	Maximum Limitation
9-A4335	2 per month
9-A4554	150 per month
9-A6250	2 per month*
9-T4521	300 per month*
9-T4522	300 per month*
9-T4523	300 per month*
9-T4524	300 per month*
9-T4525	300 per month*
9-T4526	300 per month*
9-T4527	300 per month*

CPT only copyright 2005 American Medical Association. All rights reserved.

Procedure Code	Maximum Limitation
9-T4528	300 per month*
9-T4529	300 per month*
9-T4530	300 per month*
9-T4531	300 per month*
9-T4532	300 per month*
9-T4533	300 per month*
9-T4534	300 per month*
9-T4535	300 per month*

43.4.3.11 Pediatric Hospital Cribs/Enclosed Beds/ Reflux Wedges and Slings

Pediatric hospital cribs, enclosed beds, reflux wedges, and slings may be considered under the THSteps-CCP Program with prior authorization.

The safety enclosure frame/canopy/bubble top (E0316) may be a benefit when the protective crib top/bubble top is for safety use. It is not considered when it is to be used as a restraint or for the convenience of family or caregivers.

Enclosed bed systems which are not approved by the Federal Drug Administration are not a covered benefit.

Non-pediatric hospital cribs/enclosed beds can be considered through Title XIX Home Health Services.

Reflux slings or wedges may be considered for clients who are younger than 12 months of age. Reflux slings or wedges may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician as medically necessary and appropriate.

The child's diagnosis, medical needs, developmental level, and functional skills. A diagnosis alone without documentation of medical necessity and functional skills is insufficient information to approve a pediatric hospital crib or enclosed bed.

Prior Authorization

Prior authorization is required for the durable medical equipment (DME) addressed in this policy and provided through THSteps-CCP. In order to facilitate a determination of medical necessity and avoid unnecessary denials, providers must include all necessary information at the time a request is made.

A completed THSteps-CCP Prior Authorization Form prescribing the durable medical equipment and/or medical supplies must be signed and dated by the prescribing physician familiar with the client prior to requesting authorization. The completed THSteps-CCP Prior Authorization Form must include the procedure codes for the services requested. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures are not accepted. The completed THSteps-CCP Prior Authorization Form must be maintained by the requesting provider and the prescribing physician The original signature copy must be kept in the physician's medical record for the client. To complete the prior authorization process the provider must fax or mail the completed THSteps-CCP Prior Authorization Form to the CCP prior authorization unit.

Documentation supporting medical necessity must include:

- The diagnosis, medical needs, treatments, developmental level, and functional skills of the child. A diagnosis alone is insufficient information to consider prior authorization of the requested equipment;
- The age, length, and weight of the child;
- A description of any other devices that have been used, the length of time used, and why they were ineffective;
- How the requested equipment will correct or ameliorate the client's condition beyond that of a standard child's crib, regular bed, or standard hospital bed; and
- The name of the manufacturer and the MSRP.

A determination will be made by the State or its designee whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment.

Reimbursement

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client's medical record.

The following procedure codes may be considered for pediatric hospital cribs, enclosed beds, and/or a reflux wedge or sling: J/L-E0300, J/L-E0316, 9-E1340, and J/L-E1399

Procedure code J/L-E1399 may be used for pediatric hospital cribs which are not enclosed, reflux wedges, or reflux slings.

Items and/or services addressed in this policy are either reimbursed at a maximum fee determined by the HHSC or through manual pricing. If an item is manually priced, the MSRP must be submitted for consideration of rental or purchase with the appropriate procedure codes. Purchases, repairs, and modifications are reimbursed at MSRP minus a discount as determined by HHSC.

In situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver a referral to the DSHS THSteps Case Management unit will be made by the THSteps -CCP prior authorization unit for clients under 21 years of age. Providers will be notified that the State will be monitoring this client's services to evaluate the safety of the environment for both the client and equipment.

Replacement

Pediatric hospital cribs, enclosed beds, and safety enclosure frame/canopies that have been purchased are anticipated to last a minimum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer functional and no

CPT only copyright 2005 American Medical Association. All rights reserved.

longer repairable. The DME may then be considered for prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

Repairs

Repairs to client-owned equipment may be considered with documentation of medical necessity.

Technician fees are considered part of the labor cost on the repair.

Providers are responsible for maintaining documentation in the client's medical record specifying repairs.

Rentals may be considered during the period of repair.

Routine maintenance of rental equipment is the provider's responsibility.

43.4.3.12 Medical Nutritional Products

Medical nutritional products for clients younger than 21 years of age are available only through THSteps-CCP.

Medical nutritional products may be approved for clients who are THSteps-CCP-eligible, are younger than 21 years of age, and have specialized nutritional requirements. Medical nutritional products must be prescribed by a physician and be medically necessary. FFP for the medical nutritional product must also be available.

Documentation that supports medical necessity must include one of the following:

- Identification of a metabolic disorder requiring a medically necessary nutritional product
- Indication that part or all nutritional intake is through a tube (e.g., nasogastric or gastrostomy/jejunostomy)
- Identification/explanation of the medical condition resulting in the requirement for a medical nutritional product

Prior authorization is not required for the following:

- Nutritional products developed for use in metabolic disorders for those clients with a documented metabolic disorder. (Claims must include the diagnosis indicating the metabolic disorder, and the nutritional product must be for use in metabolic disorders, or the claim is denied.)
- Nutritional products used for clients receiving part or all of their nutritional intake through a tube. Claims submitted for nutritional products not covered by CCP are denied. Claims submitted must indicate the client has a feeding tube, or the claim is denied.

Mandatory prior authorization is required for any request that does *not* meet the above criteria. To request prior authorization, submit the THSteps-CCP Prior Authorization Request Form and documentation to support medical necessity. Documentation may include the following:

- Height and weight
- Growth history
- Why the client cannot be maintained on an age-appropriate diet
- Other formulas tried and why they did not meet client's needs

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Authorization may be given for up to 12 months.

THSteps-CCP will *not* cover the following:

- Nutritional products for clients that could be sustained on an age-appropriate diet.
- Products traditionally used for infant feeding.
- Pudding products (except for clients with documented oropharyngeal motor dysfunction who receive greater than 50 percent of their daily caloric intake from this product).
- Nutritional products for the primary diagnosis of failure to thrive, failure to gain weight, or lack of growth. Documentation should describe the medical condition that led to the conditions listed previously.
- Nutritional products for infants younger than 12 months of age unless medical necessity is documented and other criteria are met. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Generic medical nutritional products that have been approved by the United States Department of Agriculture (USDA) for use in the Special Supplemental Nutrition Program for WIC may be approved for use by THSteps-CCP clients. Reimbursement is determined using the *Drug Topics Red Book*, less 10.5 percent. Reimbursement for products not listed in the Red Book is based on the same methodology using the AWP supplied by the manufacturer of the product. The provider is responsible for obtaining and submitting necessary product information with the request for products.

Enteral Nutritional Products

All enteral nutritional products paid under the Texas Medicaid Program are paid based on units of 100 calories (as documented by the manufacturer) with the appropriate "B" code (as documented by the Statistical Analysis Durable Medical Equipment Regional Carrier [SADMERC] Product Classification List for Enteral Nutrition in effect at the time) and with the appropriate modifier based on the product's AWP less 10.5 percent (as documented by the Red Book).

It is the provider's responsibility to know the correct "B" code, the correct units of 100 calories, and the modifier for requesting prior authorization and payment. Supporting documentation for these components must be maintained in the provider's records and be made available upon request by HHSC or TMHP. Payment is based on the lower of billed charges or the Medicaid allowed fee, with the Medicaid allowed fee based on the appropriate "B" code, modifier, and units of 100 calories.

CPT only copyright 2005 American Medical Association. All rights reserved.

It is the provider's responsibility to know when products are discontinued by the manufacturer, when container sizes change, and when names change. Submit requests for prior authorization and payment accordingly.

A written request must be submitted when using procedure code 9-B9998 to request generic medical nutritional products that require prior authorization.

Note: *The Palmetto GBA SADMERC Product Classification List is located on the website www.palmettogba.com.*

The following modifiers should be used if indicated as necessary on the Palmetto GBA SADMERC Product Classification list for that medical nutritional product.

Modifier	Fee per Unit
U1	$0.30
U2	$0.50
U3	$0.70
U4	$0.85
U5	$1.05
U6	$1.70
U7	$2.00
U8	$2.50
U9	$3.00
UA	$4.00
UB	$5.00
UC	$6.00
UD	Manually priced

43.4.3.13 Donor Human Milk

Donor human milk is a benefit of THSteps-CCP for eligible THSteps clients 0 through 11 months of age meeting *all* of the following criteria:

- The requesting physician has documented medical necessity.
- The parent or guardian has signed and dated an informed consent form indicating that the risks and benefits of using banked donor human milk have been discussed with them.
- The donor human milk bank adheres to quality guidelines consistent with the Human Milk Bank Association of North America or such other standards as may be adopted by HHSC.

A Donor Human Milk Request Form must be completed every 180 days, and copies must be maintained in the client's records of both the ordering physician and the providing milk bank. The physician ordering the donor human milk must complete all fields in Part A of the original form, including the documentation of medical necessity. This information *must* be substantiated by written documentation in the clinical record. The physician must specify the quantity and time frame in the Quantity Requested field (e.g., cubic centimeters per day or ounces per month).

A copy of the Donor Human Milk Request Form must also be maintained in the client's records at the providing milk bank. The donor milk bank providing the donor human milk must complete all fields in Part B of the original form.

The milk bank must specify the quantity and time frame in the Quantity Provided field.

Refer to: "Donor Human Milk Request Form" on page B-36.

The physician's substantiating documentation of medical necessity and the signed and dated written informed consent form must be maintained in the child's clinical records. The clinical records are subject to retrospective review by HHSC or its designee.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The documentation must address all of the following criteria:

- Why the particular infant cannot survive and gain weight on any other formula (e.g., elemental, special, or routine formulas or food) or any enteral nutritional product other than donor human milk.
- Why donor human milk must be used.
- That a clinical feeding trial of an appropriate nutritional product has occurred every 180 days. If the infant is too fragile for a feeding trial, documentation *must* support the illness that makes the infant too fragile to test.
- That the informed consent details for the parent or guardian the risks and benefits of using banked donor human milk.

The physician *must* address the benefits and risks of using donor human milk, such as HIV, freshness, effects of pasteurization, nutrients, and growth factors to the parent. The physician also must address donor screening, pasteurization, milk storage, and transport of the donor milk. The physician may obtain this information from the donor milk bank.

Donor human milk is reimbursed only to a Texas Medicaid-enrolled donor milk bank and only for children in the home setting. Donor human milk may be reimbursed for a maximum of six months per request.

Providers must use procedure code 9-B9998 to bill for donor human milk, per ounce. Donor human milk is reimbursed at $2.50 per ounce. Reimbursement for donor human milk provided in the inpatient setting is included in the DRG.

43.4.3.14 Special Needs Car Seats and Travel Restraints

Special Needs Car Seats

A special needs car seat may be considered for reimbursement with prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt. Consideration should

CPT only copyright 2005 American Medical Association. All rights reserved.

be given to the manufacturer's weight and height limitations and must reflect allowances for at least 12 months of growth.

A special needs car seat must have a top tether installed. The top tether is essential for proper use of the car seat. The installer is reimbursed for the installation by the manufacturer.

The provider must maintain a statement that has been signed and dated by the client's parent or legal guardian in the client's medical record that states the following:

- A top tether has been installed in the vehicle in which the client will be transported, by a manufacturer-trained vendor.
- Training in the correct use of the car seat has been provided by a manufacturer-trained vendor.
- The client's parent or legal guardian has received instruction and has demonstrated the correct use of the car seat to a manufacturer-trained vendor.

Providers must use procedure code J-E1399 for a special needs car seat.

Car seat accessories available from the manufacturer may be considered for reimbursement with prior authorization when medically necessary for correct positioning.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

To request prior authorization for a special needs car seat or accessories, the following criteria must be met:

- The client's weight must be at least 40 pounds, *or t*he client's height must be at least 40 inches.
- Supporting documentation must include the following and must be submitted for prior authorization:
    - Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client's overall health status
    - A description of the client's postural condition specifically including head and trunk control (or lack of control) and why a booster chair or seatbelt will not meet the client's needs (the car seat must be able to support the head if head control is poor)
    - The expected long-term need for the special needs car seat
    - A copy of the manufacturer's certification for the installer's training to insert the specified car seat, such as Columbia Medical Manufacturing Corporation for Columbia products

A request for a client who does not meet the criteria may be considered on a case-by-case basis on review by the State or its designee.

A stroller base for a special needs car seat is not a benefit of Texas Medicaid.

Travel Safety Restraints

A travel safety restraint and ankle or wrist belts may be considered for reimbursement through THSteps-CCP without prior authorization for children with a medical condition requiring them to be transported in either a prone or supine position. The DME provider and the prescribing physician familiar with the client must maintain documentation in the client's medical record supporting the medical necessity of the travel safety restraint.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. Authorization is a condition for reimbursement, not a guarantee of payment.

Providers must use procedure code J-E0700 for travel safety restraints, ankle, and wrist belts.

43.4.4 Early Childhood Intervention (ECI) (THSteps-CCP Only)

43.4.4.1 Enrollment

To be a qualified provider, the provider must contact the Texas ECI Program at 1-512-424-6759. After meeting the criteria of the Texas ECI Program, providers should request a Medicaid application from TMHP Provider Enrollment. ECI providers are eligible to enroll as Texas Medicaid THSteps-CCP providers rendering service to children younger than 3 years of age with a disability and/or developmental delay as defined by ECI criteria.

To participate in the Texas Medicaid Program, an ECI provider must comply with all applicable federal, state, and local laws and regulations about the services provided.

Reimbursement is available for PT, OT, speech-language therapy, nutrition, audiology, and psychological services for children enrolled in ECI through THSteps-CCP. Regular CCP guidelines apply, including the requirement for evaluations.

Refer to: "THSteps-Comprehensive Care Program (CCP)" on page 43-33 for more information.

"Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.4.2 Reimbursement

Services are reimbursed according to the maximum allowable fee established by HHSC.

Refer to: "Reimbursement" on page 43-7 for more information about reimbursement.

43.4.4.3 ECI-CCP Services

ECI THSteps-CCP services end on the client's third birthday.

Because the ECI program requires local ECI providers to follow quality assurance procedures and develop individualized family service plans for each child, CCP does not

CPT only copyright 2005 American Medical Association. All rights reserved.

require copies of therapy evaluations or periodic progress notes to be submitted with therapy claims. ECI providers must complete the entire "THSteps-CCP ECI Request for Initial/Renewal Outpatient Therapy" on page B-108. The form must include a physician signature current for all dates of service and the appropriate therapist signature for the requested service (e.g., a request for OT must be signed by an occupational therapist and not a physical therapist).

Prior authorization through CCP is necessary to expedite claims processing.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Physician Signature

The physician's signature, required on a prescription and the THSteps-CCP ECI Request for Initial Renewal Outpatient Therapy form, must be current to the service date of the request.

Speech therapy services provided to children enrolled in ECI are eligible for reimbursement through THSteps-CCP when provided by or under the direction (supervision) of a Texas-licensed speech-language pathologist with a master's degree or certified by the American Speech-Language Hearing Association (ASHA). Speech-language pathologists, with a Certificate of Clinical Competence in Speech-Language Pathology from ASHA or licensed by the Texas State Board of Examiners for Speech-Language Pathology and Audiology with a master's degree (ASHA equivalent qualified SLP), may provide supervision of ECI speech-language therapy services provided by individuals practicing with a Texas SLP intern license or individuals licensed as SLP assistants.

The supervision must meet the following provisions:

- The supervising speech-language pathologist provides sufficient supervision as set forth by the State Board of Examiners for Speech-Language Pathology and Audiology to ensure appropriate completion of the responsibilities assigned.
- Documentation exists of direct involvement of the supervising speech-language pathologist in overseeing the services provided.
- The speech-language pathologist providing the direction must ensure that the personnel carrying out the directives meet the minimum qualifications set forth in the rules of the State Board of Examiners for Speech-Language Pathology and Audiology relating to Licensed Assistant in Speech-Language Pathology.

SLP is a regulated profession in Texas. Speech therapy providers with ASHA certification must also be licensed by the State Board of Examiners for Speech-Language Pathology and Audiology.

ECI providers must complete the THSteps-CCP ECI Request for Initial/Renewal Outpatient Therapy Form for authorization for reimbursement of speech-language services. The form must include a physician signature current for all dates of service and a signature of an ASHA-certified or equivalent qualified speech-language pathologist enrolled in the Texas Medicaid Program.

Claims for services provided by licensed SLP interns or individuals licensed as SLP assistants must reflect the ASHA-certified or -equivalent supervising speech-language pathologist's provider identifier.

Refer to: "THSteps-CCP ECI Request for Initial/Renewal Outpatient Therapy" on page B-108.

"Physician Signature" on page 43-37 for complete information about this requirement.

43.4.4.4 Claims Information

Providers must submit services by an ECI provider to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 claim form or its equivalent.

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24 for claims completion instructions.

"Early Childhood Intervention (THSteps-CCP Only)" on page D-12.

"Case Management for Early Childhood Intervention (ECI)" on page 13-1 for more information.

43.4.5 Licensed Dietitians (THSteps-CCP Only)

43.4.5.1 Enrollment

Independently practicing licensed dietitians may enroll in Texas Medicaid to provide services to THSteps-CCP clients. Providers of nutrition assessments and counseling must be currently licensed by the Texas State Board of Examiners of Dietitians in accordance with the *Licensed Dietitians Act*, Chapter 701, Texas Occupations Code.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.5.2 Reimbursement

Services provided by licensed dietitians are reimbursed based on the fees listed in Section 4.5.3 "Benefits and Limitations" below. Providers are reimbursed the lower of their billed charges or the published Medicaid fee calculated in accordance with 1 TAC §355.8085. Only providers enrolled as licensed dietitians are eligible for reimbursement for dietitian services.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.5.3 Benefits and Limitations

THSteps-CCP is for Medicaid THSteps-eligible children younger than 21 years of age. CCP eligibility ends on the client's 21st birthday. If the client's Medicaid ID states

CPT only copyright 2005 American Medical Association. All rights reserved.

"Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits. THSteps-CCP may cover nutrition assessment and/or counseling to prevent, treat, or minimize the effects of illness, injury, or other impairments.

Nutrition services may be a benefit when:

- The client is THSteps-CCP eligible.
- Prescribed by a physician.
- Medically necessary.
- Completed by a Medicaid-enrolled dietitian licensed by the Texas State Board of Examiners of Dietitians.
- Completed in the home or office.

Prior authorization is *not* required for two nutrition assessments per year or for four nutrition counseling visits per year. Providers are responsible for maintaining documentation to support medical necessity in the client's clinical record. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Prior authorization *is* required for more than two assessments or more than four nutrition counseling visits per year. Submit these requests with written documentation to support medical necessity. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

To request prior authorization or submit claims, providers must use the procedure code 1-S9470 with a maximum fee of $30.45 and procedure code 1-97802 or 1-97803 with a maximum fee of $10.15 per 15 minutes.

If 1-S9470 and either 1-97802 or 1-97803 are billed for the same date of service, 1-97802 or 1-97803 is paid and 1-S9470 is denied.

Physician Signature

The physician's signature, required on a prescription and the THSteps-CCP Prior Authorization Request Form, must be current to the service date of the request.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

43.4.5.4 Claims Information

Providers must submit services provided by licensed dietitians in an approved electronic claims format or on a CMS-1500 claim form from the vendor of their choice. TMHP does not supply the forms. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 Claim Form or its equivalent.

Refer to: "Licensed Dietitians (THSteps-CCP Only)" on page D-20 for a claim form example.

"CMS-1500 Claim Filing Instructions" on page 5-24 for claims completion instructions.

43.4.6 Occupational Therapists (THSteps-CCP Only)

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary PDN services and/or home health skilled nursing services. Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the *Texas Nursing Practice Act* and its implementing regulations.
- The requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.
- There is no third-party resource financially responsible for the services.

Requests for nursing services must be submitted on the required Medicaid forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the beneficiary's current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.

Medically necessary nursing services are authorized either as PDN services or as home health skilled nursing services, depending on whether the beneficiary's nursing needs can be met on a per-visit basis.

43.4.6.1 Enrollment

HHSC allows Medicaid enrollment of independently practicing, currently licensed occupational therapists in THSteps-CCP. Some OT services are also available under Home Health Services.

The Texas Medicaid Program enrolls and reimburses occupational therapists only for CCP services and Medicare crossovers. The information in this section is applicable to CCP services only. This section does not apply to CORFs. CORF information is provided in "Comprehensive Outpatient Rehabilitation Facilities (CORFs)/ Outpatient Rehabilitation Facilities (ORFs)" on page 43-37.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

"Occupational Therapy (OT) Services" on page 24-12.

43.4.6.2 Reimbursement

OT services provided by home health agencies are reimbursed according to a statewide visit rate calculated in accordance with 1 TAC §355.8021(a). The current statewide visit rate for OT services is $118.62 per visit. Procedural modifiers are required for home health agencies billing for OT visits. Providers must use procedural modifier GO for OT.

CPT only copyright 2005 American Medical Association. All rights reserved.

OT services provided by outpatient hospitals are reimbursed based on a reasonable cost methodology in accordance with 1 TAC §355.8061, with an interim rate based on the provider's most recent Medicaid cost report settlement.

OT services provided by CORFs/ORFs are reimbursed based on a reasonable cost methodology in accordance with 1 TAC §355.8441, with an interim rate based on the provider's most recent Medicaid cost report settlement.

OT services provided by providers other than home health agencies and outpatient hospitals are reimbursed according to rates calculated in accordance to 1 TAC §355.8085. The current physician fee schedule is available on the TMHP website at www.tmhp.com.

The following CPT codes should be used for billing OT services under THSteps-CCP. Not all codes are payable to all provider types.

Procedure Codes			
1-97003	1-97004	1-97012	1-97014
1-97016	1-97018	1-97022	1-97024
1-97026	1-97028	1-97032	1-97033
1-97034	1-97035	1-97036	1-97039
1-97110	1-97112	1-97113	1-97116
1-97124	1-97139	1-97140	1-97150
1-97530	1-97535	1-97537	1-97542
1-97750	1-97760	1-97761	1-97762
1-97799			

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.6.3 Benefits and Limitations

THSteps-CCP is available for Medicaid THSteps-eligible children younger than 21 years of age. CCP eligibility ends on the day of the client's 21st birthday. If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.

OT may be billed as POS 1 or 2 and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client's daycare facility, or the client's school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only THSteps-CCP therapy that can be delivered in the client's school during regular school hours are those delivered by school districts as SHARS as POS 9.

OT services are benefits under CCP when provided to clients who have disabilities or an ongoing health condition such as a musculoskeletal or neuromusculoskeletal condition, or other conditions requiring medically necessary OT. OT services are a benefit of Texas Medicaid Home Health Services when provided in the home for acute conditions. If the client is ineligible for these services through Texas Medicaid Home Health Services, these services may be provided under THSteps-CCP.

Procedure codes 1-97012, 1-97014, 1-97016, 1-97018, 1-97022, 1-97024, 1-97026, 1-97028, and 1-97150 are limited to one service per day. The procedure codes in the following table may be paid in multiple 15-minute quantities.

Procedure Codes			
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97140	1-97530	1-97535	1-97537
1-97760	1-97761		

Procedure code 1-97760 is only payable for clients younger than 21 years of age. Procedure code 1-97010 is not a benefit.

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to a total of two hours per day of individual, group, or a combination of individual and group therapy.

Procedure codes 1-97750 and 1-97762 are comprehensive codes and include an office visit. If an office visit is billed the same day by the same provider, the office visit is denied as part of another procedure billed the same day. Procedure code 1-97762 is only payable for clients younger than 21 years of age.

Procedure code 1-97003 is payable once per six months for any provider at the same facility. Procedure code 1-97004 is payable once per month for any provider at the same facility. These codes are not payable on the same day as the procedure codes in the following table:

Procedure Codes			
1-97012	1-97014	1-97016	1-97018
1-97022	1-97024	1-97026	1-97028
1-97032	1-97033	1-97034	1-97035
1-97036	1-97039	1-97110	1-97112
1-97113	1-97116	1-97124	1-97139
1-97140	1-97150	1-97530	1-97750
1-97760	1-97761	1-97762	

Important: *OT prescribed primarily as an adjunct to psychotherapy is not a benefit.*

Providers must use the procedure codes 1-97003 with a maximum fee of $140.00, 1-97004 with a maximum fee of $140.00, or 1-97535 with a maximum fee of $35.00 for services provided by an independently practicing occupational therapist for developmental treatment. Procedure code 1-97003 may be billed without prior authorization. Procedure code 1-97535 may be billed only once per month per provider.

For procedure code 1-97003, a quantity of 1 is allowed for payment per six months per provider without prior authorization or written documentation of medical necessity. An evaluation is not paid on the same day as a treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

A request for OT services may be prior authorized for no longer than six months duration. A new request must be submitted if therapy is required for a longer duration.

Typical sessions do not exceed one hour in length. Documentation supporting the need for longer sessions is required. No limits exist on the number of sessions that may be provided per week. The number of sessions per week must be supported by documentation showing that such sessions are medically necessary.

Refer to: "Occupational and Physical Therapy Services" on page 25-109 for acute conditions.

Prior Authorization, Documentation Requirements

Providers must use “Request for Initial Outpatient Therapy (Form TP-1)” on page B-78 for initial requests and “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” on page B-79 for extension requests. Home health agencies must include the GO modifier on the TP1 or TP2 form when requesting OT.

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. Prior authorization for OT services is required except for evaluation and re-evaluation. Submit appropriate documentation with the request for prior authorization or with each claim for consideration of reimbursement.

Children receiving therapy services reimbursed by CCP must have chronic conditions that require ongoing medical supervision. To establish medical necessity, a physician prescription and revised therapy treatment plan are needed at least every six months.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The initial therapy request must include a TP-1 form and an initial therapy treatment plan. The initial therapy treatment plan must include the following:

- A physician prescription
- A copy of the current evaluation
- The documented age of the client at the time of the evaluation
- Documentation indicating the treatment goals, anticipated measurable progress toward goals, the prognosis, and the client’s fine motor skills in years/ months. Goals may include improving function, maintaining function, or slowing the deterioration of function

To request an extension of service, the following documentation must be submitted:

- A TP-2 form, including a *current* physician signature
- All documentation required in initial authorizations (except the TP-1 form)
- Documentation of all progress made from the beginning of the previous treatment period to the current service request date, including progress towards previous goals
- Information that supports the client’s capability of continued measurable progress
- A proposed treatment plan for the requested extension dates with specific goals related to client’s individual needs. Therapy goals may include improving function, maintaining function, or slowing of deterioration of function

Therapy may be extended *beyond two years*, but the following required documentation must be forwarded for authorization to be considered:

- A TP-2 form
- All documentation required in initial authorizations (except the TP-1 form)
- A comprehensive team evaluation summarizing all prior treatment as well as all progress that was made during that time
- A report from case managing physician indicating all progress that the client made toward all goals during all previous therapy sessions

If a provider discontinues therapy with a client and a new provider *begins* therapy during an existing authorization period, submission of a new treatment plan is required as well as documentation of the last therapy visit with the previous provider. A letter from the guardian stating the date therapy ended with the previous provider is sufficient.

Physician Signature

The physician’s signature, required on a prescription and the appropriate authorization request form, must be current to the service date(s) of the request.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

ECI Program Provisions

Because the state ECI Program requires local ECI providers to follow quality assurance procedures and develop individualized family service plans for each child, CCP does not require copies of therapy evaluations or periodic progress notes to be submitted with therapy claims. ECI providers should complete the ECI Request for Initial/Renewal Outpatient Therapy form, which must include a physician signature current for all dates of service. Prior authorization through CCP is encouraged to expedite claims processing, or the form may be submitted with the claim.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

43.4.6.4 Claims Information

Providers must submit claims for services provided by an independently practicing occupational therapist in an approved electronic claims format or on a CMS-1500 claim form from the vendor of their choice. TMHP does not supply the forms.

Important: *Attach the invoice to the claim for any specialized equipment.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Therapy is only reimbursed when provided in POS 1 (office) or 2 (home). Procedure code 1-97003 may only be billed with a quantity of 1. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 Claim Form or its electronic equivalent.

Refer to: "Occupational Therapists (THSteps-CCP Only)" on page D-24.

"CMS-1500 Claim Filing Instructions" on page 5-24 for claims completion instructions. Attach the invoice to the claim for any specialized equipment.

43.4.7 Orthotic and Prosthetic Suppliers (THSteps-CCP Only)

Medicaid beneficiaries younger than 21 years of age are entitled to all medically necessary DME. DME is medically necessary when it is required to correct or ameliorate disabilities or physical or mental illnesses or conditions. Any numerical limit on the amount of a particular item of DME can be exceeded for Medicaid beneficiaries younger than 21 years of age if medically necessary. Likewise, time periods for replacement of DME do not apply to Medicaid beneficiaries younger than 21 years of age if the replacement is medically necessary. When prior authorization is required, the information submitted with the request must be sufficient to document the reasons why the requested DME item of quantity is medically necessary.

43.4.7.1 Enrollment

To be eligible to participate in THSteps-CCP, providers of orthotics and prosthetics services must be enrolled in Medicare.

The Texas Medicaid Program enrolls and reimburses orthotic and prosthetic suppliers only for CCP services and Medicare crossovers. The information in this section is applicable to CCP services only.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.7.2 Reimbursement

Orthotic and prosthetic services are reimbursed in the same manner as DME and expendable supplies, i.e., in accordance with 1 TAC §355.8441. Outpatient hospitals are reimbursed for THSteps DME and expendable supplies in accordance with 1 TAC §355.8061.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.7.3 Benefits and Limitations

Orthotics and prosthetics are a covered benefit of CCP for clients requiring orthotics or prosthetics that are medically necessary and prescribed by a physician (MD or DO). Orthotic devices, provided to ICF-MR clients and clients who reside in a nursing facility, are a benefit of THSteps-CCP. Payment is made directly to the vendor. The equipment belongs to the client or family. Non-orthotic devices, such as a knee immobilizer, are not a benefit to nursing facility residents and ICF-MR clients.

Orthoses must be dispensed, fabricated, and modified by an approved orthotist or orthotist/prosthetist. Prostheses must be dispensed, fabricated, and modified by an approved prosthetist or orthotist/prosthetist.

Prior Authorization, Documentation Requirements

All requests for prior authorization or claim reimbursement must:

- Be for orthotic or prosthetic devices prescribed by a physician (MD or DO) or a podiatrist. A podiatrist prescription is valid for conditions of the ankle and foot. The prescription is placed on file for a time period not to exceed 12 months. At the end of the prescription period, an authorization is required for any repairs, replacement parts, devices, or supplies.
- Contain a prescription dated before the date of service. The date of service must be within three months of the prescription date. The service is considered "provided" on the date the supplier has placed an order for the equipment and has incurred liability for the equipment.
- Include accurate diagnostic information pertaining to the orthotic/prosthetic device requested.
- Explain the medical necessity of the orthotic or prosthetic requested. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.
- Be for orthotic devices provided by a currently licensed orthotist or prosthetist enrolled with Medicare and THSteps-CCP. *Exception*: upper extremity splints made with low temperature materials and inhibitive casting may be provided by occupational or physical therapists.
- Be for prosthetic devices provided by a currently licensed prosthetist or orthotist/prosthetist.

Requests for prior authorization must be filed using a THSteps-CCP Prior Authorization Request Form completed by the treating physician.

Telephone authorization is allowed for most orthotic devices. When authorization has not been requested, the documentation supporting medical necessity must be maintained in the client's medical record.

Requests for authorization and reimbursement of single items exceeding $1,500.00 allowable dollar amount must be supported by written documentation demonstrating medical necessity. All other items may be authorized during a telephone request.

The DOS for a custom-made or fitted orthosis is the date the supplier places an order for the equipment and incurs liability for the equipment. For a recipient who has lost eligibility, custom-made orthotic devices may be reimbursed when the DOS occurred during a month the client was eligible for Medicaid.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.7.4 Cranial Molding Devices

Cranial orthotic devices are molding helmets or bands that are used for the purpose of shaping the skull or to protect the skull and has proven to be most effective in children between the ages of 3 and 18 months of age.

Cranial orthosis (cranial molding devices) when used as a treatment of plagiocephaly without synostosis is considered cosmetic, not medically necessary, and not a benefit of the Texas Medicaid Program.

Cranial orthosis for nonsynostotic plagiocephaly may be considered for authorization with documentation supporting associated functional impairment and use of the cranial orthosis will modify or prevent the development of functional impairment including orofacial musculo-skeletal or neurocognitive disorders.

Cranial orthotic devices may be authorized for clients between the ages of 3 and 18 months of age.

Cranial orthotic devices must be prior authorized for reimbursement through THSteps-CCP with documentation supporting medical necessity/appropriateness. Written documentation must include:

- Client's diagnosis and age
- The recommendations of the craniofacial team (the team must include a pediatric neurosurgeon or cranio-facial surgeon) or pediatric neurosurgeon
- The determining factors used in recommendation of treatment
- Any alternative treatment courses that have been tried
- Plan of treatment and/or follow up schedule

Cranial orthotic devices may be reimbursed using procedure codes 9-L0100, 9-L0110, and 9-S1040.

Craniostenosis Helmets

Procedure codes 9-L0100 and 9-L0110 require prior authorization and may be considered for reimbursement for neoplasm of the brain, subarachnoid hemorrhage, epilepsy, or cerebral palsy.

All requests for diagnoses other than those listed above or for clients younger than 4 months of age or older than 18 months of age require submission of documentation of medical necessity. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

43.4.7.5 Corrective Shoe, Wedge, and Lift

THSteps-CCP may authorize and reimburse prescription shoes (corrective/orthopedic), wedges, and lifts. The authorization request and reimbursement must meet the following requirements:

Corrective Shoes

For consideration of coverage, corrective shoes must be prescribed by a licensed physician (MD or DO) or a podia-trist *and* meet one of the following requirements:

- Permanently attached to a brace
- Custom modified by an orthotist or orthotist/prosthetist at the direction of the prescribing physician
- Necessary to hold a surgical correction, postoperative casting, or serial/clubfoot casting. The corrective shoe may be authorized up to one year post procedure

Note: *Corrective shoes that are not attached to a brace require authorization.*

Requests for corrective shoes that do not meet the criteria listed above may be submitted with the appropriate documentation to medical review for consideration.

A corrective shoe does *not* include tennis shoes (even if prescribed by a physician and worn with a removable brace).

A corrective shoe does *not* include a shoe insert when it is not part of a modified shoe or when the shoe in which it is inserted is not attached to a brace (other than procedure code 9-L3000).

Only one pair of corrective shoes can be authorized every three months. Two pairs of shoes may be purchased at the same time; however, in such situations additional requests for shoes are not considered for another six months.

Requests for corrective shoes that do not meet the criteria listed above may be submitted with the appropriate documentation to medical review for consideration.

Authorization requests for corrective shoes *must* be submitted in writing.

Wedge and Lift

This must be for unequal leg length greater than one-half inch. Reimbursement may include the cost of the prescription shoe.

Dynamic Splint

Dynamic splints, such as Dynasplint® , may be authorized by the Medical Director when submitted with the following documentation supporting medical necessity:

- Client's condition
- Client's current course of therapy
- Rationale for the use of the dynamic splint
- Likelihood that the family and client will comply with the prescribed use of the dynamic splint

Removable Shoe Insert, UCB (University of California at Berkeley) Type

Shoe inserts are not a benefit when they are not part of a modified shoe or when the shoe in which they are inserted is not attached to a brace, with the exception of the UCB removable shoe insert.

A UCB removable shoe insert may be prior authorized and reimbursed when the service meets the following:

- Client is at least 5 years of age
- Client has a valgus deformity and significant congenital pes planus (75461) with pain, *or*
- Client has a structural problem which results in signif-icant pes planus, such as Down's syndrome, *or*
- Client has acute plantar fasciitis

Procedure code 9-L3000 may be payable when billing for a removable foot insert.

CPT only copyright 2005 American Medical Association. All rights reserved.

Reciprocating Gait Orthoses (RGO)

RGO may be covered for children with spina bifida or similar functional disabilities. Prior authorization is required. The prior authorization request must include a statement from the prescribing physician indicating the medical necessity, PT plan, and information that the family is expected to comply with the treatment plan.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Repairs, Modifications, and Fittings of Orthosis/ Prostheses

Repairs due to regular wear and modifications due to growth or change in medical status are a benefit when proven more cost-effective than replacing the device. Additional information from the provider may be requested to determine cost-effectiveness.

Authorization is required for repairs, modifications, and fittings. Documentation supporting medical necessity must be provided when requesting authorization.

Reimbursement of fittings is considered included in the regular reimbursement fee except in situations such as parapodiums, where time spent at fitting may be extensive. Fitting for parapodiums must be authorized.

For repairs, modifications, and fittings to an orthosis, providers must bill using procedure codes 9-E1340, 9-L4205, and 9-L4210.

Replacement of Orthoses/Prostheses

Replacement of an orthotic/prosthetic device is considered when loss or irreparable damage has occurred. A copy of the police or fire report is required when appropriate, along with the measures to be taken to prevent recurrence of similar loss. Supporting medical documentation is required for the replacement of an orthotic or prosthetic device if less than six months from the actual date the client received the device. If less than one year since initial purchase, request for replacement is referred to the medical director for review.

Training in Using the Orthotic or Prosthetic Device

Training in the use of an orthotic or prosthetic device for a client who has not worn one previously, has not worn one for a prolonged period, or is receiving a different type may be reimbursed when the training is provided by a physical or occupational therapist.

If prior authorization is not requested, submit documentation to support medical necessity with each claim and include a prescription signed by a physician (MD or DO).

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Prior authorization is a condition for reimbursement, not a guarantee of payment.

Physician Signature

The physician's signature is required on a prescription and the THSteps-CCP Prior Authorization Request Form must be current to the service date of the request.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

43.4.7.6 Claims Information

Submit services provided by orthotic and prosthetic suppliers in an approved electronic format or on a CMS-1500 claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: "CMS-1500 Instruction Table" on page 5-27 for claims completion instructions and information on electronic billing.

Important: *Attach the invoice to the claim for any specialized equipment.*

Include the name of the referring physician in Block 17 of CMS-1500 claim form or its electronic equivalent. Orthotics or prosthetics may be billed in POS 1 (office), 2 (home), or 5 (outpatient). Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 claim form or its electronic equivalent.

Refer to: "Orthotic and Prosthetic Suppliers (THSteps-CCP Only)" on page D-25 for a claim form example.

43.4.8 Pharmacies (THSteps-CCP Only)

43.4.8.1 Enrollment

Pharmacy providers are eligible to participate in THSteps-CCP. To be enrolled in CCP, the pharmacy must also be enrolled in VDP.

Pharmacy providers currently enrolled with VDP are also enrolled in THSteps-CCP with TMHP. This enrollment allows pharmacy providers to bill for those medications and supplies payable by Medicaid for clients younger than 21 years of age but *not* covered by VDP (e.g., some over-the-counter drugs, diapers, and disposable or expendable medical supplies). Pharmacy providers must continue to bill HHSC for drugs covered under VDP.

Direct questions about VDP to 1-800-435-4165.

Pharmacies that wish to supply disposable or expendable medical supplies or DME must be enrolled as DMEH providers and should obtain these items through the Home Health Services Unit.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

"Texas Medicaid (Title XIX) Home Health Services" on page 24-1 for details about coverage through Home Health Services.

43.4.8.2 Reimbursement

Providers of DME and expendable supplies are reimbursed for THSteps services in accordance with 1 TAC §355.8441. Outpatient hospitals are reimbursed for THSteps DME and expendable supplies in accordance with 1 TAC §355.8061.

CPT only copyright 2005 American Medical Association. All rights reserved.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.8.3 Eligibility

Providers must issue one month's supply of the required items at a time because client eligibility is determined monthly.

43.4.8.4 Benefits and Limitations

Expendable medical supplies and basic medical equipment are available under Texas Medicaid Home Health Services. Some services may be provided under THSteps-CCP. Clients must be younger than 21 years of age and eligible for THSteps-CCP; the services must be medically necessary and have FFP available for them. CCP eligibility ends on the day of the client's 21st birthday. If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.

Physician Signature

The physician's signature, required on a prescription and the appropriate request form, must be current to the service date of the request.

Physician prescriptions must be specific to the type of service requested.

Example: *If requesting incontinent supplies, the prescription must request incontinent supplies, not just supplies.*

Examples of expendable supplies include incontinent supplies and medical nutritional products for clients younger than 21 years of age.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

Incontinence Supplies for Children Younger Than 4 Years of Age

Incontinence supplies for children younger than 4 years of age are only available through THSteps-CCP.

Written prior authorization is required for diapers and all other related incontinence supplies (such as diaper wipes and underpads) for children younger than 4 years of age. Providers must use the appropriate national procedure codes when billing for incontinent supplies for children younger than 4 years of age.

Supplies that any guardian or caretaker would usually provide during the routine care of the child are *not* covered under CCP. Examples are:

- Nutritional products traditionally used for infant feeding
- Incontinence supplies, such as diapers (Diapers are considered usual for children younger than 4 years of age. An exception may be made by written request for prior authorization based on specific medical criteria.)
- Lotions, soaps, powder, or aids for daily living

Claims may be reduced because the *customary* limits have been exceeded. Providers may submit a prior authorization request for amounts over the *customary* limits if there is documentation that supports the medical necessity of such a request. If prior authorization is not given, the provider may appeal the claim.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Medications, Vitamins, and Minerals

VDP reimburses for a large number of prescription and over-the-counter medications. See "Vendor Drug Program" on page E-1 for more information about VDP. Some prescription medications that are not payable through VDP may be paid to enrolled pharmacy providers through CCP if the medications are determined to be medically necessary.

Not all medications covered by CCP require prior authorization. For those medications that require prior authorization, submit complete documentation with each prior authorization request, including:

- A prescription by the physician, including the name of the medication, dosage, frequency, duration, and route of administration
- Documentation and diagnosis that supports the medical necessity of the requested medications

Providers must use the appropriate national procedure code when billing for medications and vitamins through CCP.

43.4.8.5 Claims Information

Pharmacy providers are not required to provide a diagnosis on the claim form.

Providers must submit claims for billing for supplies and equipment supplied to the client by the pharmacy on a CMS-1500 claim form (obtained from a vendor of their choice or billed electronically).

Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 claim form or its equivalent.

Pharmacies using their VDP provider identifier should obtain prior authorization for prescription medications not paid through VDP. If a claim is submitted without a diagnosis, then a provider must attach documentation establishing medical necessity and a signed prescription from a physician (MD or DO). Electronic claims must have diagnosis code V7285 for the claim to be accepted.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Triplicate Prescription Form

The State Pharmacy Board requires the use of the triplicate prescription form for Schedule II controlled substances. The pharmacy filling the prescription sends a

CPT only copyright 2005 American Medical Association. All rights reserved.

copy of the form to the Texas Department of Public Safety. Completion of the form is not substantially different from writing a prescription.

Incidental Services

Medicaid payments to providers for covered services include incidental services such as completion of required forms. Because completion of the triplicate prescription form as required by the State Pharmacy Board is a requirement of doing business, it is not acceptable to charge Medicaid clients a fee for completing the form. Providers that charge Medicaid clients this fee are violating provisions of Medicaid regulations and are subject to administrative sanctions or actions.

Refer to: “Pharmacy (THSteps-CCP Only)” on page D-25 for a claim form example.

"CMS-1500 Instruction Table" on page 5-27 for claims completion instructions. Attach the invoice for any specialized equipment to the claim.

43.4.9 Physical Therapists (THSteps-CCP Only)

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary PDN services and/or home health skilled nursing services. Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the *Texas Nursing Practice Act* and its implementing regulations.
- The requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.
- There is no third-party resource financially responsible for the services.

Requests for nursing services must be submitted on the required Medicaid forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the beneficiary's current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.

Medically necessary nursing services are authorized either as PDN services or as home health skilled nursing services, depending on whether the beneficiary's nursing needs can be met on a per-visit basis.

43.4.9.1 Enrollment

HHSC allows enrollment of independently-practicing licensed physical therapists under THSteps-CCP.

The information in this section applies to CCP services only. This section does not apply to CORFs. CORF information may be found in "Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)" on page 43-37.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

"Physical Therapists/Independent Practitioners" on page 35-1 for acute services.

43.4.9.2 Reimbursement

PT services provided by home health agencies are reimbursed according to a statewide visit rate calculated in accordance with 1 TAC §355.8021(a). The current statewide visit rate for PT services is $116.36 per visit. Procedural modifiers are required for home health agencies billing for PT visits. Providers must use procedural modifier GP for PT.

PT services provided by outpatient hospitals are reimbursed based on a reasonable cost methodology in accordance with 1 TAC §355.8061, with an interim rate based on the provider’s most recent Medicaid cost report settlement.

PT services provided by CORFs/ORFs are reimbursed based on a reasonable cost methodology in accordance with 1 TAC §355.8441, with an interim rate based on the provider’s most recent Medicaid cost report settlement.

PT services provided by providers other than home health agencies and outpatient hospitals are reimbursed according to rates published in a fee schedule. The current physician fee schedule is available on the TMHP website at www.tmhp.com.

The following CPT codes should be used for billing PT services under THSteps-CCP. Not all codes are payable to all provider types.

CPT Procedure Codes			
1-97001	1-97002	1-97012	1-97014
1-97016	1-97018	1-97022	1-97024
1-97026	1-97028	1-97032	1-97033
1-97034	1-97035	1-97036	1-97039
1-97110	1-97112	1-97113	1-97116
1-97139	1-97150	1-97530	1-97535
1-97537	1-97542	1-97750	1-97760
1-97761	1-97762	1-97799	

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.9.3 Benefits and Limitations

CCP is for Medicaid/THSteps-eligible clients younger than 21 years of age. CCP eligibility ends on the day of the client’s 21st birthday. If the client’s Medicaid ID states “Emergency Care,” “PE,” or “QMB,” the client is not

CPT only copyright 2005 American Medical Association. All rights reserved.

eligible for THSteps or CCP benefits. If the client is ineligible for Texas Medicaid Home Health Services, these services may be provided under THSteps-CCP.

PT may be billed as POS 1 or 2 and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client's daycare facility, or the client's school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only THSteps-CCP therapy that can be delivered in the client's school during regular school hours are those delivered by school districts as SHARS as POS 9.

A request for PT services may be prior authorized for no longer than six months duration. A new request must be submitted if therapy is required for a longer duration.

Typical sessions do not exceed one hour in length. Documentation supporting the need for longer sessions is required. No limitations exist to the number of sessions that may be provided per week; however, documentation supporting the medical necessity for the requested services is required.

Providers must use the procedure codes 1-97001 with a maximum fee of $140.00, 1-97002 with a maximum fee of $140.00, and 1-97535 with a maximum fee of $35.00 for services provided by an independently practicing physical therapist for developmental therapies. Procedure code 1-97001 may be billed without prior authorization. Only a quantity of 1 is allowed for payment per six months per provider without prior authorization or written documentation of medical necessity. An evaluation should not be billed on the same day as a treatment. Procedure code 1-97002 may only be billed once per month per provider.

Prior Authorization, Documentation Requirements

Providers must use the “Request for Initial Outpatient Therapy (Form TP-1)” on page B-78 for an initial request and the “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” on page B-79 for an extension request. Home health agencies must include the GP modifier on the TP1 or TP2 form when requesting PT.

Prior authorization is a condition for reimbursement; it is *not* a guarantee of payment.

Prior authorization for PT services is required except for evaluation and re-evaluation. Submit appropriate documentation with the request for prior authorization or with each claim for consideration of reimbursement.

Children receiving therapy services reimbursed by CCP have chronic conditions that require ongoing medical supervision. To establish medical necessity, a physician prescription and revised therapy treatment plan are needed at least every six months.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The initial therapy treatment plan must include a TP-1 and the following:

- A physician prescription.
- A copy of the current evaluation.
- The documented age of the client at the time of the evaluation.
- Documentation indicating the treatment goals, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years/months. Goals may include improving function, maintaining function, or slowing the deterioration of function.
- Description of specific therapy being prescribed.

To request an *extension of services*, the following documentation must be submitted:

- A TP-2 form, including a *current* physician signature.
- All documentation required in initial authorizations (except the TP-1 form).
- Documentation of all progress made from the beginning of the previous treatment period to the current service request date, including progress towards previous goals.
- Information that supports the client’s capability of continued measurable progress.
- A proposed treatment plan for the requested extension dates with specific goals related to the client’s individual needs. Therapy goals may include improving function, maintaining function, or slowing the deterioration of function.

Therapy may be extended beyond two years, but the following required documentation must be forwarded for review for authorization to be considered:

- All documentation required in initial authorizations (except the TP-1 form).
- A comprehensive team evaluation summarizing all prior treatment as well as all progress that was made during that time.
- A report from the case-managing physician indicating all progress that the client made toward all goals during all previous therapy sessions.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new treatment plan is required, as well as documentation of the last therapy visit with the previous provider. A letter stating when therapy ended with the previous provider is sufficient.

Physician Signature

The physician’s signature, required on a prescription and the “THSteps-CCP Prior Authorization Request Form” on page B-106, must be current to the service date of the request.

Physician prescriptions must be specific to the TOS requested.

Example: *If requesting PT, the prescription must request physical therapy, not just therapy.*

CPT only copyright 2005 American Medical Association. All rights reserved.

ECI Program Provisions

Because the state ECI program requires local ECI providers to follow quality assurance procedures and develop individualized family service plans for each child, CCP does not require copies of therapy evaluations or periodic progress notes to be submitted with therapy claims. ECI providers should complete the "THSteps-CCP ECI Request for Initial/Renewal Outpatient Therapy" on page B-108, which must include a physician signature current for all dates of service. Physician prescriptions requirements as stated on the form must be followed by ECI providers. (Refer to CCP-PT, OT, and SLP sections.) Prior authorization through the CCP is encouraged to expedite claims processing or the form may be submitted with the claim.

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

All providers should obtain the client's medical diagnosis supporting the need for therapy from the physician. Reflect this information on each claim submitted to TMHP using ICD-9-CM coding.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

"Request for Initial Outpatient Therapy (Form TP-1)" on page B-78.

43.4.9.4 Claims Information

Providers must submit claims for services provided by independently practicing licensed physical therapists in an approved electronic claims format or on a CMS-1500 claim form from the vendor of their choice. TMHP does not supply the forms.

Refer to: "CMS-1500 Instruction Table" on page 5-27 for claims completion instructions.

Important: *Attach the invoice to the claim for any specialized equipment.*

Therapy is only payable when provided in POS 1 (office) or 2 (home). Procedure codes 1-97001, 1-97110, 1-97150, and 1-97535 may only be billed with a quantity of 1. Claims for services that have been authorized must reflect the PAN in Block 23 of the CMS-1500 Claim Form or its electronic equivalent.

Refer to: "Physical Therapists (THSteps-CCP Only)" on page D-26.

43.4.10 Private Duty Nursing (PDN) THSteps-CCP Only

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary PDN services and/or home health skilled nursing services. Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the *Texas Nursing Practice Act* and its implementing regulations.
- The requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition. Nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition when the services improve, maintain, or slow the deterioration of the beneficiary's heath status.
- There is no third-party resource financially responsible for the services.

Requests for nursing services must be submitted on the required Medicaid forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the beneficiary's current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.

Medically necessary nursing services are authorized either as PDN services or as home health skilled nursing services, depending on whether the beneficiary's nursing needs can be met on a per-visit basis.

"Parent/guardian" means the person or persons lawfully charged with the duty of taking care of the beneficiary, and includes biological parents, adoptive parents, foster parents, guardians, and individuals court-appointed as managing conservators. A parent/guardian provides daily, uncompensated care for the beneficiary and participates in the development of the beneficiary's plan of care (POC). A parent/guardian or any person living with the beneficiary is not eligible for Medicaid reimbursement for providing PDN services to the beneficiary.

43.4.10.1 Enrollment

Licensed and certified home health services agencies may enroll to provide PDN under THSteps-CCP.

RNs and licensed vocational nurses (LVN) may also enroll independently to provide PDN under THSteps-CCP.

Home health agencies *must do all of the following*:

- Comply with provider participation requirements for home health agencies that participate in the Texas Medicaid Program
- Comply with mandatory reporting of suspected abuse and neglect of children or adults
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent/guardian
- Comply with all requirements in this manual and the *Texas Medicaid Bulletin*

Independently-enrolled RNs and LVNs must be enrolled as providers in THSteps-CCP and comply with all of the following:

- The terms of the Texas Medicaid Provider Agreement

CPT only copyright 2005 American Medical Association. All rights reserved.

- All state and federal regulations and rules relating to the Texas Medicaid Program
- The requirements of this manual, including all updates and revisions published in the *Texas Medicaid Bulletin*, all handbooks, standards, and guidelines published by HHSC.

Independently-enrolled RNs and LVNs must also:

- Provide at least 30-days written notice to clients of their intent voluntarily to terminate services except in situations of potential threat to the nurse's personal safety.
- Comply with mandatory reporting of suspected abuse and neglect of children.
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent/guardian.

Independently enrolled RNs must:

- Hold a current license from the Board of Nurse Examiners for the State of Texas to practice as an RN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the *Texas Nursing Practice Act.*
- Comply with accepted professional standards and principles of nursing practice.

Independently enrolled LVNs must:

- Hold a current license from the Board of Nurse Examiners of the State of Texas to practice as an LVN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the *Texas Nursing Practice Act.*
- Comply with accepted standards and principles of vocational nursing practice.
- Be supervised by an RN monthly. The supervision must occur when the LVN is present and be documented in the client's medical record.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.10.2 Reimbursement

PDN services are reimbursed according to a maximum allowable fee schedule in accordance with 1 TAC §355.8441. Home health agencies must submit claims on the HCFA-1450 (UB-92) claim form. Independently-enrolled nurses must submit claims on the CMS-1500 claim form.

PDN services must be billed in 15-minute increments. To be reimbursed for PDN services, providers must use the following procedure codes:

Procedure Code	Maximum Fee
1-T1000 *with* modifier TD	$6.25 per 15 minutes
1-T1000 *with* modifier TE	$5.00 per 15 minutes
C-T1002 *or* C-T1003	$8.25 per 15 minutes

Note: *Independently enrolled LVNs should use the TE modifier, and independently enrolled RNs should use the TD modifier.*

Important: *Currently, electronic HCFA-1450 (UB-92) does not accommodate billing for partial PDN hours. Paper claims must be used to bill partial PDN hours.*

Because of the nature of the service being provided, some billing situations are unique to PDN. These billing requirements are as follows:

- All hours worked on one day should be billed together, on one detail, even if they involve two shifts. For example, if Nurse A works 7 a.m. to 11 a.m. and then returns and works 7 p.m. to 11 p.m., services should be billed for eight hours (32 15-minute units) on one detail for that date of service.
- An individually-enrolled nurse will not be reimbursed for more than 16 hours of PDN services in one day.
- A single nurse may be reimbursed for services to more than one client in a single setting when the following conditions are met:
  - Hours for PDN services for each client have been authorized through CCP.
  - Only the actual "hands-on" time spent with each client is billed for that client.
  - The hours billed for each client does not exceed the total hours approved for that client and does not exceed the actual number of hours for which services were provided.

Example: *If the authorized PDN hours for Client A is four hours and Client B is six hours and the actual time spent with both clients is eight hours, the provider must bill for the actual "one-on-one" time spent with each client, not to exceed the client's authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the nurse actually spent ten hours onsite providing authorized PDN services split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the nurse worked only eight hours.*

Refer to: "Reimbursement" on page 43-7 for more information about reimbursement.

CPT only copyright 2005 American Medical Association. All rights reserved.

Benefits and Limitations

PDN is skilled nursing reimbursed hourly for clients who meet the THSteps-CCP medical necessity criteria and who require individualized, continuous skilled care beyond the level of skilled nursing visits authorized under the Texas Medicaid Home Health Services.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The purpose of PDN is to provide direct, skilled nursing care and caregiver training and education intended to optimize client health status and outcomes, and to promote family-centered, community-based care.

PDN is one of an array of services intended to support the care of the client living at home; and the parent/guardian remains responsible for a portion of a client's daily care. PDN shall neither replace parents or guardians as primary caregivers nor provide all the care that a client requires to live at home.

PDN cannot be authorized for the primary purpose of providing respite care, childcare, activities of daily living for the client, housekeeping services, or comprehensive case management beyond the service coordination required by the *Texas Nursing Practice Act*.

43.4.10.3 Criteria

Client Eligibility Criteria

To be eligible for PDN services, a client must meet *all* the following criteria:

- Be younger than 21 years of age and eligible for Medicaid and THSteps

Note: *THSteps-CCP is available for Medicaid THSteps-eligible children younger than 21 years of age. CCP eligibility ends on the day of the client's 21st birthday. If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.*

- Meet medical necessity criteria for PDN
- Have a primary physician who:
  - Provides a prescription for PDN.
  - Establishes a plan of care (POC).
  - Provides a statement that PDN services are medically necessary.
  - Provides continuing medical care and supervision of the client including, but not limited to, examination or treatment within 30 days (*initial requests of PDN services*) or examination or treatment that complies with the THSteps periodicity schedule or is within 6 months of the PDN extension start-of-care date, whichever is more frequent (*for extensions of PDN services*). This requirement may be waived based on review of the client's specific circumstances.
  - Provides specific written, dated orders for the client.
- Require care beyond the level of services provided under Texas Medicaid Home Health Services.
- Have an identified parent/guardian residing in the client's residence and an identified alternate caregiver who is or can be trained to provide part of the client's care; or if no alternate caregiver is identified, have a plan to enable the client to receive care in an alternate setting or situation if the parent/guardian is unable to fulfill their role.

Retroactive Client Eligibility

Retroactive eligibility occurs when an individual has applied for Medicaid coverage but has not yet been assigned a Medicaid client number at the time of service delivery.

To be reimbursed for any current services after the client's eligibility is on TMHP's eligibility file, a provider must obtain authorization from TMHP-CCP within three business days of the date eligibility is added to the TMHP system. This date is called the "add date." The request must be received by TMHP-CCP no later than 5 p.m., Central Time, on the third day to be considered received within three business days.

The provider is responsible for verifying eligibility. The provider is strongly recommended to access AIS or TMHP EDI frequently while providing services to the client. If services were discontinued before the client was added to TMHP's eligibility file, the agency must still obtain authorization within three business days and submit all claims within 95 days from the add date.

Medical Necessity Criteria

PDN is considered medically necessary if a person requires continuous, skillful observation and judgment to maintain or improve health status, *and* the individual:

- Is dependent on technology to sustain life, and/or
- Requires ongoing and frequent skilled interventions to maintain or improve health status, and delayed skilled intervention is expected to result in any of the following conditions:
  - Deterioration of a chronic condition
  - Loss of function
  - Imminent risk to health status
  - Risk of death

The determination of medical necessity for PDN services is based on submitted documentation that describes the complexity and intensity of the client's care, stability and predictability of the client's condition, and frequency of the client's need for skilled nursing interventions.

Place of Service (POS)

PDN authorizations are based on the need for skilled care in the client's home; however, these services may follow the child and may be provided in any of the following settings:

- The home of the primary or alternate caregiver
- The home of the nurse provider
- The client's school

CPT only copyright 2005 American Medical Association. All rights reserved.

- A daycare facility

The POS must be able to support the client's health and safety needs. It must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and backup utilities, communication, fire, and safety systems must be available at all times.

Amount and Duration of PDN Services

The amount and duration of PDN services are determined based on review of submitted documentation for the following:

- Frequency of skilled nursing interventions
- Complexity and intensity of the client's care
- Stability and predictability of the client's condition
- Identified problems, goals, and progress toward goals

The amount and duration of PDN should decrease when:

- One or more of the client's problems documented in the POC are resolved.
- One or more identified client goals are met.
- A reduction in the frequency of skilled nursing interventions occurs.
- A decrease in the complexity and intensity of the client's care occurs.
- Alternate resources for comparable care become available.

For some clients who continue to meet the criteria for medical necessity, PDN services may decrease to and remain at a plateau. PDN may continue to be authorized after the parent/guardian is trained and capable of meeting the client's need.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The amount of PDN services may increase when the client's condition warrants more nursing intervention due to the identification of new problems or goals, an increase in frequency of skilled nursing interventions, or an increase in the complexity and intensity of the client's care.

A full 24-hours-per-day PDN is authorized for limited periods of time with defined end dates only when one of the following conditions exist:

- When medically necessary based on the client's needs
- When related to the medical needs of the parent/guardian, only when an alternate caregiver is not available
- In the absence of both the primary and alternate caregiver, when another person is designated who can legally make decisions on the client's behalf, and who will reside in the client's home during the time that 24-hours-a-day PDN will be provided

43.4.10.4 Authorization

Authorization Requirements

When a provider receives a referral for PDN services, the provider must assess the client before seeking authorization. The assessment must be completed by an RN. An assessment includes, but is not limited to, the following:

- Nursing assessment
- Assessment of medical necessity for PDN (a request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply)
- Client safety
- Medical necessity of care in the POS
- Training and ability of the parent/guardian
- All criteria for the authorization of PDN services

Note: *TMHP will not review or authorize PDN services based on partial or incomplete documentation.*

The following criteria *must* be met before seeking authorization for PDN services. The provider and the parent/guardian establish that the client has:

- A designated parent/guardian who will provide a portion of the client's daily care
- An identified alternate caregiver, or a plan to be used if the parent/guardian is unable to care for the client
- A primary care physician who provides ongoing health care and medical supervision
- Verification that the client has been seen by the primary physician within 30 days of the start of care date for initial requests or according to THSteps guidelines or within six months (extension requests)
- A place where PDN services will be delivered that supports the client's health and safety
- Appropriate emergency plans in place
- Necessary backup utilities, communication, fire, and safety systems available

Following the assessment/evaluation of the client for PDN services, the provider must seek prior authorization from TMHP. Prior authorization is required for payment of PDN services. Nursing services are prior authorized when the requested services correct or ameliorate the client's disability or physical or mental illness or condition. PDN services are prior authorized when the client requires more individual and continuous care than is available on a per-visit basis through home-health skilled nursing visits. Prior authorization is a condition for reimbursement, not a guarantee of payment.

Only those services that TMHP determines to meet the medical criteria for PDN are reimbursed. Before a TMHP reviewer determines that the requested nursing services do not meet the criteria, the TMHP medical director contacts the treating physician to determine whether additional information or clarification can be provided that would allow for the prior authorization of the requested PDN services. If the TMHP medical director is not successful in contacting the treating physician or cannot

CPT only copyright 2005 American Medical Association. All rights reserved.

obtain additional information or clarification, the TMHP medical director makes a decision based on the available information.

Start of Care (SOC)

The SOC is the date that care is to begin, as agreed on by the family, the client's physician, and the provider, and as listed on the POC and the THSteps-CCP Prior Authorization Request Form. Providers are responsible for determining whether they can accept the client for services.

Once the provider accepts a client for service and accepts responsibility for providing PDN services, the provider is required to deliver those services beginning with the SOC date. Providers are responsible for a safe transition of services when the authorization decision is a denial or a reduction of services. Providers are required to notify the physician and the client's family on receipt of an authorization, a denial, or a change in PDN services.

Providers must submit complete documentation no later than three business days from an SOC date to obtain initial coverage for the SOC date.

Note: *The Texas Medicaid Home Health Services does not authorize a SOC date earlier than three business days before contact with TMHP.*

For PDN extensions, TMHP-CCP must receive complete documentation 3 business days prior to the start of care date. It is recommended that extension requests be submitted up to 30 days before the current authorization ends.

During the authorization process for initial and extension requests, providers are required to deliver the requested services from the SOC date.

Authorization of Initial Requests

Completed initial requests must be received and dated by TMHP-CCP within three business days of the SOC. The request must be received by TMHP-CCP no later than 5 p.m., Central Time, on the third day to be considered received within three business days. If a request is received more than three business days after the SOC, or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

Example: *A provider begins PDN services on Monday, June 1. The completed request is received by TMHP-CCP on Friday, June 5. The authorization will start on Tuesday, June 2 (three business days before June 5). If the complete request had been received on Thursday, June 4, the authorization would have started on June 1, as requested.*

Authorization for Revision of Current Services

Completed requests for revision of PDN hours during the current authorization period must be received by TMHP-CCP within three business days of the revised SOC. The request must be received by TMHP-CCP no later than 5 p.m., Central Time, on the third day to be considered received within three business days. If a request is received more than three business days after the revised SOC or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

Revisions to a current certification must fall within the certification period. If the revision extends beyond the current certification period, new authorization documentation must be submitted to TMHP.

Example: *A provider begins PDN services on Monday, June 1. The client becomes ill on Friday, June 5, and requires increased skilled nursing intervention of a short duration. The completed revision request is received by TMHP-CCP on Thursday, June 11. The authorization will start on Monday, June 8 (three business days before June 11). If the complete request had been received on Wednesday, June 10, the revision authorization would have started on June 5, as requested.*

Authorization of Extension Requests

Completed extension requests must be received and dated by TMHP-CCP at least 7 calendar days before, but no more than 30 days before, the current authorization expiration date. The request must be received by TMHP-CCP no later than 5 p.m., Central Time, on the seventh day, to be considered received within 7 calendar days. If a request is received less than 7 calendar days before the current authorization expiration date, or after 5 p.m., Central Time, on the seventh day, authorization is given for dates of service beginning no sooner than 7 calendar days after the receipt of the completed request by TMHP-CCP.

Example: *A provider has a current authorization that expires on June 10. The completed request is received by TMHP-CCP on June 2, eight calendar days before the current authorization period ends. The authorization for extension will begin on June 11, as requested. If the completed request had been received on June 15, the authorization could not begin until June 12, instead of June 11, as requested.*

Initial and revision requests for PDN generally are considered for up to 60 days of services. Extensions may be considered for longer periods based on submitted documentation and the stability of the client's condition.

Extended Authorizations Available

TMHP-CCP accepts requests for extended authorizations for PDN. Extensions may be authorized for four or six months. The following criteria are required for extended authorization:

- The client must have received PDN services for at least a year.
- The client's condition has been medically stable for at least six months.
- PDN requests *and* authorizations for the previous six months have been at the same level.
- No significant changes in the client's condition are anticipated.
- The client's parent/guardian, physician, and provider agree that an extended authorization is appropriate.

CPT only copyright 2005 American Medical Association. All rights reserved.

The authorization process involves the following:

- All required documentation for PDN services (including the Physician POC, the Nursing Care Addendum, and the THSteps-CCP Prior Authorization Request Form) is submitted.
- Dates of service on the THSteps-CCP Prior Authorization Request Form covers four or six months as appropriate.
- Attach the new THSteps-CCP Prior Authorization Form, Private Duty Nursing 4 or 6 Month Authorization Form (refer to "THSteps-CCP Prior Authorization Private Duty Nursing 4 or 6 Month Authorization" on page B-107). This form must be complete and include all required information and signatures.
- The nursing care provider is responsible for ensuring that a new Physician POC is obtained every 60 days and maintained in the client's record. Providers should *not* submit interim POCs to TMHP unless requesting a revision.
- The nursing care provider should notify TMHP at any time during the authorization period if the client's condition and need for skilled nursing care significantly changes.
- The nursing care provider may request a revision from TMHP at any time during the authorization period if the client's condition requires it.
- All authorization timelines apply to extended authorizations also.

Termination of Authorization

Authorization may be terminated when the:

- Client is no longer eligible for THSteps-CCP.
- Client no longer meets the criteria for PDN.
- Place of service can no longer accommodate the client's health and safety.
- Client or caregiver refuses to comply with the primary physician's POC.

Client/Provider Notification

When PDN services are approved as requested, the provider receives written notification. The provider is responsible for notifying the client/family and the physician of the authorized services.

TMHP notifies the client and provider in writing when the following instances occur:

- PDN services are denied.
- PDN hours authorized are less than the hours requested on the POC.
- PDN hours are modified (e.g., hours are requested by the week but are authorized by the day).
- TMHP-CCP receives incomplete information from the provider.
- Dates of service authorized are different from those requested.

The provider is responsible for notification and coordination with the physician and family.

Authorization Appeals

Providers may appeal denials/modifications of requested PDN services with documentation to support the medical necessity of the requested PDN services. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. Appeals must be submitted to TMHP-CCP with complete documentation and any additional information within two weeks of the date on the decision letter. If changes are made to the authorization based on this documentation, TMHP-CCP goes back no more than three business days for initial or revision requests and no more than seven calendar days for extension requests when additional documentation is submitted. Clients/families are notified of any denial or modification of requested services and are given information about how to appeal TMHP's decision.

43.4.10.5 Documentation

Documentation Details

Documentation forms have been designed to improve communication between providers and TMHP. The forms are available in English.

All documentation must be submitted together, and requests are not reviewed until all documentation is received. If complete documentation is received at TMHP-CCP by 3 p.m., Central Time, a response is returned to the provider within one business day. Complete documentation for initial, revision, and extension requests for PDN authorizations include all the following:

- The new "THSteps-CCP Prior Authorization Request Form" on page B-106
- The physician's POC
- The "Nursing Addendum to Plan of Care (THSteps-CCP) (3 Pages)" on page B-59

THSteps-CCP Prior Authorization Request Form

The Prior Authorization Request Form must be completed, signed, and dated by the physician. The physician must mark the Private Duty Nursing box documenting the stability of the client for PDN services. All requested dates of service must be included.

Plan of Care (POC)

The POC must be recommended, signed, and dated by the client's primary care provider. A POC must meet the standards outlined in the 42 CFR 484.18 related to the written POC. The primary physician must review and revise the POC, in consultation with the provider and the parent/guardian, for each authorization, or more frequently as the physician deems necessary or the client's situation changes.

Pursuant to 42 CFR 484.18, the POC must include the following elements:

- All pertinent diagnoses
- Client's mental status
- Types of services requested including amount, duration, and frequency

CPT only copyright 2005 American Medical Association. All rights reserved.

- Medical equipment needed
- Prognosis
- Rehabilitation potential
- Functional limitations
- Activities permitted
- Nutritional requirements
- Medications
- Treatments, including amount and frequency
- Safety measures needed
- Instructions for a timely discharge from service, if appropriate
- Date the client was last seen by the physician
- Other medical orders
- Start and end-of-care dates

Note: *Coverage periods do not coincide necessarily with calendar weeks or months but, instead, cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period. A week covers from the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday. The number of nursing hours authorized for a week must be contained in that prior authorization week.*

Nursing Addendum to POC–CCP Private Duty Nursing Form

The Nursing Addendum addresses PDN eligibility criteria, nursing care plan summary, health history summary, 24-hour schedule, and the rationale for the hours of PDN services requested.

The following is a description of the nursing care plan summary:

- The nursing care summary is not a complete nursing care plan.
- Information must be client-focused and detailed.
- The *Problem List* must reflect the reasons that skilled nursing services are needed. The problem list is not the nursing care plan. Providers should identify two to four current priority problems from their nursing care plan. The problem does not need to be stated as a nursing diagnosis. The problems listed should focus on the primary reasons that a licensed nurse is required to care for the client. Other attached documents are not accepted in lieu of this section.
- The *Goals* should relate directly to the problems listed and be client-specific, and measurable. Goals may be short- or long-term; however, for many clients who receive PDN services, the goals generally are long-term.
- The *Outcomes* are the effects of the provider's nursing interventions and must be measurable. Generally, these are more short-term than goals. For initial requests, list expected outcomes. Extension requests should note the results of nursing interventions.
- The *Progress* should be viewed as a "yardstick" or continuum on which progress toward goals is marked. Initial requests should state expected progress for the authorization period. Extension requests should list the progress noted during the previous authorization period. It is recognized that all progress may not be positive.
- The addendum must summarize the client's health problems that relate to the medical necessity for PDN services.
- The addendum must clearly communicate a picture of the client's overall condition and skilled care needs.
- The summary of recent health history is imperative in determining whether the client's condition is stable or if new skilled care needs have been identified. This section gives the PDN provider an opportunity to describe the client's recent health problems, including acute episodes of illness, hospitalizations, injuries, etc. The summary should create a complete picture of the client's condition and skilled care needs. The summary may cover the previous 90 days, even though the authorization period is 60 days; however, the objective of the summary is to capture the client's recent health problems and current health priorities. This section should not be merely a list of events.

  This section is the place to indicate the frequency of nursing interventions if they are different from the physician's order on the POC, such as, the order may be for a procedure to be PRN (when necessary), but it is actually being performed every two hours.
- The addendum must include the rationale for increasing, decreasing, or maintaining the level of PDN services and must relate to the client's health problems and goals.
- The addendum must include the provider's plan to decrease hours or discharge from service (if appropriate).

The Client's 24-hour Daily Schedule

All direct care services must be identified. It is understood that the schedule may change, as the client's needs change. TMHP does not have to be notified of changes in the schedule except as they occur when a PDN extension is requested.

Requirement That an Alternate Caregiver be Identified

This requirement is necessary for the client's safety and well-being. If a single parent/caregiver who is the sole person with legal responsibility for the client becomes unable to care for the child, no one would be legally capable of making decisions about the child's care. A nurse provider is not an alternate caregiver with legal authority for a child.

In situations where no alternate caregiver can be identified, the client's parent/caregiver should establish an emergency plan with the nurse provider that indicates the parent/caregivers wishes if they become ill or disabled. Checking the box on the Nursing Care

CPT only copyright 2005 American Medical Association. All rights reserved.

Addendum indicates that this plan has been discussed between the family and the provider and that a written plan is in place.

The parent/guardian's signature must be on the form acknowledging that:

- Information about THSteps-CCP PDN services has been discussed and received.
- PDN services may change or end based on a client's need for skilled care.
- PDN services are not authorized for the primary purpose of providing respite, childcare, activities of daily living, or housekeeping.
- All requirements have been met before seeking authorization for PDN services.
- The parent/guardian has participated in the development of the POC and the nursing care plan for the child.
- Emergency plans have been made and are part of the client's care plan.
- The parent/guardian agrees to follow the physician's POC.
- The parent/guardian has learned or agrees to learn the skills necessary to provide care to their child.

Retrospective Review/Documentation of Services Provided

Documentation elements that will be routinely assessed for compliance in retrospective review of client records include, but are not limited to, the required documentation noted above, as well as the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client's name and Medicaid identification number.
- Client assessment time is documented at the beginning of each shift.
- All nurses' arrival/departure times are documented with signature and time in the narrative section of the nurses' notes.
- Entries are dated and timed every one to two hours.
- The name of the medication, dose, route, time given, client response, and other pertinent information must be provided when medication is administered.
- The name of treatment, time given, route or method used, client response, and other pertinent information must be provided when treatments are administered.
- The amount, type, times given, route or method used, client response, and other pertinent information must be provided when feedings are administered.
- The POC and documentation of services should correlate with and reflect medical necessity for the services provided on any given day. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.
- Client's arrival or departure from the home setting must be documented with the time of arrival, departure, mode of transportation, and who accompanied the client.
- Documentation of teaching the client or the client's parent/guardian should include the length of time, the subject of the teaching, the understanding of the subject matter by the person receiving the teaching, and other pertinent information.
- Supervisory visits must include specifics of the visit.
- If a client is receiving skilled nursing services through another program/service in addition to THSteps-CCP, such as the Medically Dependent Children's Program, each provider's shift notes must designate specifically which type of service they are providing during that shift.

43.4.11 Psychiatric Hospital/Facility (Freestanding) (THSteps-CCP Only)

43.4.11.1 Enrollment

To be eligible to participate in THSteps-CCP, a psychiatric hospital/facility must be accredited by the Joint Commission on Accreditation of Health Care Organizations, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Facilities certified by Medicare must also meet the Joint Commission on Accreditation of Health Care Organizations accreditation requirements.

Freestanding psychiatric hospitals enrolled in Medicare may also receive payment for Medicare deductible and coinsurance amounts with the exception of clients 21 through 64 years of age. The information in this section is applicable to CCP services only.

All providers of laboratory services must comply with CLIA rules and regulations. Providers not complying with CLIA are not reimbursed for laboratory services.

Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS, Department of Health and Human Services, a change in ownership of a hospital does not terminate Medicare eligibility. Medicaid participation may be continued subject to the following requirements:

- Recertification as a Title XVIII (Medicare) hospital is obtained if applicable.
- A new Title XIX (Medicaid) agreement between the hospital and HHSC under new ownership is obtained.

Providers can obtain the Medicaid hospital participation agreement by contacting TMHP Provider Enrollment.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

"Clinical Laboratory Improvement Amendments (CLIA)" on page 26-2 for information about CLIA requirements.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.11.2 Reimbursement

Inpatient

Reimbursement for acute care inpatient psychiatric care provided by mental health facilities is made according to the *Tax Equity and Fiscal Responsibility Act* of 1982 (TEFRA) interim reimbursement principles (reasonable cost basis). A new provider is reimbursed initially at an 80-percent interim rate. At the time of a tentative or final cost settlement, the interim rate is adjusted to reflect the hospital's cost-to-charge ratio.

For more information on cost reports for their facility, providers should call Medicaid Audit at 1-512-506-6117.

Refer to: "Reimbursement" on page 43-7 for more information.

43.4.11.3 LoneSTAR Select 015 – Managed Care

LoneSTAR Select affects how hospitals are reimbursed for inpatient services provided to Medicaid clients not enrolled in one of the programs operated by HHSC.

Acute care hospitals providing inpatient services to Medicaid clients enrolled in a Medicaid Managed Care organization such as an HMO, a prepaid health plan, or PCCM model operated by HHSC, are reimbursed according to the agreement each hospital has with each Medicaid Managed Care health plan.

Inpatient services provided to Medicaid clients before their enrollment in a Medicaid Managed Care health plan are reimbursed according to one of the following:

- Agreement each contracted hospital has with LoneSTAR Select
- Standard reimbursement methodologies usually in effect for the hospital, for noncontracted and exempt hospitals

Inpatient services provided to Medicaid clients after the effective date of their enrollment in one of the Medicaid Managed Care health plans are reimbursed according to the agreement each hospital has with the Medicaid Managed Care health plan.

If a Medicaid client disenrolls from one of the Medicaid Managed Care health plans, the inpatient services provided after the disenrollment date are again reimbursed according to the agreement that the hospital has in effect with LoneSTAR Select or according to standard reimbursement methodologies in effect for noncontracted and exempt hospitals.

Outpatient Services

Day treatment or outpatient services are not a benefit for freestanding psychiatric hospitals under traditional Medicaid.

Provider Cost Reporting, Review

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient costs in the cost reports submitted annually. One copy of the applicable CMS cost report form is to be prepared by the provider.

If a change of ownership or provider termination occurs, the cost report is due within 45 days after the date of the termination or change in ownership. Any request for an extension should be made on or before the cost report due date and sent to Medicaid Audit at the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Providers must file annual cost reports as follows:

- Provider submits one copy of the cost report to Medicaid Audit within five months of the end of the hospital's fiscal year (FY) along with any amount due to the Texas Medicaid Program.
- Medicaid Audit performs a desk review of the cost report and makes a tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to the Texas Medicaid Program or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time based on the cost report.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary:
  - Audited or settled without audit Medicare Cost Report
  - Medicare Notice of Amount of Program Reimbursement
  - Medicare Audit Adjustment Report, if applicable
- Field audits are conducted when necessary.

Call Medicaid Audit at 1-512-514-3686 for more information.

Medicaid hospitals may request copies of their claim summaries for their cost reporting FY. The summaries for tentative settlements include three additional months of claim payments for the FY. The summaries for final settlements include ten additional months of claim payments for the FY. This is the same data used by Medicaid Audit to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data is only generated once a month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs should be submitted within 30 days after the fiscal year-end. Final settlement log requests should be submitted within nine months after the fiscal year-end.

These Medicaid logs can be requested in paper copies by mailing a "Medicaid Audit Request for Claims Summary" on page B-54 to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Allow 45 days for receipt of these logs.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.11.4 Benefits and Limitations

Inpatient Services

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid psychiatric hospital or by an approved out-of-state hospital under the direction of a psychiatrist for the care and treatment of inpatient clients. The client must be Medicaid THSteps-eligible and under 21 years of age at the time of the service request and service delivery. The following conditions must apply:

- The client has a psychiatric condition that requires inpatient treatment.
- The inpatient treatment is directed by a psychiatrist.
- The inpatient treatment is provided in a nationally accredited freestanding psychiatric facility or state psychiatric hospital.
- The provider is enrolled in the Texas Medicaid Program.

If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.

Client services must be provided in the most appropriate setting and in a timely manner to meet the mental health needs of the client.

Supporting documentation (certification of need) must be documented in the individual client's record. This documentation must be maintained by each facility for a minimum of five years and be readily available for review whenever requested by HHSC or its designee.

When a client requires admission, or once the client becomes Medicaid-eligible while in the facility, a certification of need must be completed in the client's record within 14 days.

Prior authorization is required for inpatient psychiatric care.

A completed Psychiatric Inpatient Admission Form or Psychiatric Inpatient (Extended) Request Form prescribing the inpatient psychiatric services must be signed and dated by the admitting physician familiar with the client prior to requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures are not accepted. The completed Psychiatric Inpatient Admission Form or Psychiatric Inpatient Admission (Extended) Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the hospital's medical record for the client.

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
- Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the acute episode of the client.
- How the services can reasonably be expected to improve the condition or prevent further regression of the client's condition in a proximate time period.

For initial inpatient admissions, the completed Psychiatric Inpatient Admission Form must be faxed no later than the date of the client's admission unless the admission is after 5 p.m. or on a holiday or a weekend. When the admission occurs after 5 p.m. or on a holiday or a weekend, the Comprehensive Care Inpatient Psychiatric (CCIP) unit must receive the faxed request on the next business day following admission. If the admission occurs after 2 p.m., the provider should contact the CCIP unit by telephone and fax the Psychiatric Inpatient Admission Form to the CCIP unit on the following business day. To complete the prior authorization process, the provider must fax the completed Psychiatric Inpatient Admission Form to the CCIP prior authorization unit. To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of medical necessity for the services requested.

Initial admissions may be prior authorized for a maximum of five days based on Medicaid eligibility and documentation of medical necessity. All psychiatric admission requests for clients under 12 years of age are reviewed by a psychiatrist. Psychiatric admission requests for clients ages 12 through 20 are reviewed by a mental health professional. Any requests for psychiatric admissions that do not meet criteria for admission are referred to a psychiatrist for final determination.

Providers must submit a Psychiatric Inpatient (Extended) Request Form to the CCIP unit requesting prior authorization for a continuation of stay. Requests for a continuation of stay must be received on or before the last day authorized or denied. The provider is notified of the decision in writing via fax by the CCIP unit. If the date of the CCIP unit determination letter is on or after the last day authorized or denied, the request for continuation of stay is due by 5:00 p.m. of the next business day.

The Psychiatric Inpatient (Extended) Request Form must reflect the need for continued stay in relation to the original need for admission. Any change in the client's diagnosis must be noted on the request. Additional documentation or information supporting the need for continued stay may be attached to the form. Up to seven days may be authorized for an extension request.

Court-ordered services are not subject to the five-day admission limitation or the seven-day continued stay limitation. Court-ordered services include:

- Mental health commitments
- Condition of probation (COP)

Medicaid Clinical Criteria for Inpatient Psychiatric Care For Children and Adolescent

The client must have a valid Axis II, DSM-IV-TR diagnosis as the principle admitting diagnosis, and outpatient therapy or partial hospitalization must have been attempted and failed, or a psychiatrist must have documented reasons why an inpatient level of care is required. The client's Axis II diagnosis must also be included on the request for inpatient psychiatric treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

The client must meet at least one of the following criteria:

- The client is presently a danger to self, demonstrated by at least one of the following:
  - Recent suicide attempt or active suicidal threats with a deadly plan and an absence of appropriate supervision or structure to prevent suicide
  - Recent self-mutilative behavior or active threats of same with likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent self-mutilation (i.e., intentionally cutting/burning self)
  - Active hallucinations or delusions directing or likely to lead to serious self-harm or debilitating psychomotor agitation or retardation resulting in a significant inability to care for self
  - Significant inability to comply with prescribed medical health regimens due to concurrent Axis I psychiatric illness and such failure to comply is potentially hazardous to the life of the client. A medical diagnosis of Axis III which must be treatable in a psychiatric setting
- The client is a danger to others. This behavior should be attributable to the client's specific Axis I, DSM-IV-TR diagnosis and can be adequately treated only in a hospital setting. This danger is demonstrated by one of the following:
  - Recent life-threatening action or active homicidal threats of same with a deadly plan and availability of means to accomplish the plan with the likelihood of acting on the threat
  - Recent serious assaultive or sadistic behavior or active threats of same with the likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent assaultive behavior
  - Active hallucinations or delusions directing or likely to lead to serious harm of others
- The client exhibits acute onset of psychosis or severe thought disorganization, or there is significant clinical deterioration in the condition of someone with a chronic psychosis rendering the client unmanageable and unable to cooperate in treatment, and the client is in need of assessment and treatment in a safe and therapeutic setting.
- The client has a severe eating or substance abuse disorder, which requires 24-hours-a-day medical observation, supervision, and intervention.
- The proposed treatment/therapy requires 24-hours-a-day medical observation, supervision, and intervention.
- The client exhibits severe disorientation to person, place, or time.
- The client’s evaluation and treatment cannot be carried out safely or effectively in other settings due to severely disruptive behaviors, and other behaviors which may include physical, psychological, or sexual abuse.
- The client requires medication therapy or complex diagnostic evaluation where the client's level of functioning precludes cooperation with the treatment regimen.
- The client is involved in the legal system, manifests psychiatric symptoms, and is ordered by court to undergo a comprehensive assessment in a hospital setting to clarify the diagnosis and treatment needs.

The proposed treatment/therapy plan must include all of the following:

- Active supervision by a psychiatrist with the appropriate credentials as determined by the Texas Medical Board and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment/therapy plans should be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
- Implementation of individualized treatment plan.
- Provision of services that can reasonably be expected to improve the client's condition or prevent further regression so a lesser level of care can be implemented.
- Proper treatment of the client's psychiatric condition requires services on an inpatient basis under the direction of a psychiatrist and is being provided in the least restrictive environment available. Ambulatory care resources available in the community do not meet the client's needs.

Continued Stays

Continued stays are considered when the client meets at least one of the criteria from above and a treatment/therapy regimen must include all of the following:

- Active supervision by a psychiatrist is provided.
- The treatment/therapy requires an inpatient level of care.
- Initial discharge plans have been formulated and actions have been taken toward implementation including documented contact with a local mental health provider.

Continued stays are considered for children and adolescents whose discharge plan does not include returning to their natural home if the party responsible for placement has provided the provider with three documented placement options for which the child meets admission criteria, but cannot accept the child. Up to five days may be authorized per request to allow alternative placement to be located. Up to three extensions may be authorized.

Authorization is a condition for reimbursement; it is not a guarantee of payment.

A toll-free telephone and fax line are available to complete the authorization process. Contact the TMHP CCIP Unit at 1-800-213-8877, or fax to 1-512-514-4211.

CPT only copyright 2005 American Medical Association. All rights reserved.

In Medicaid Managed Care projects, eligible children must receive all medically necessary services. Authorization procedures and approved providers may differ for managed care clients. Contact the client's specific health care plan for details.

Reimbursement

All prior authorization requests not submitted or received by the TMHP THSteps-CCIP unit in accordance with established policies are denied through the submission date, and claim payment is not made for the dates of service denied.

All denials may be appealed. The TMHP THSteps-CCIP unit must receive these appeals within 15 days of the TMHP THSteps-CCIP unit denial notice. Appeals of a denial for an initial admission and/or a continued stay, must be accompanied by the documentation supporting medical necessity that the provider believes warrants reconsideration. Appeals of a denial for late submission of information, must be accompanied by documentation which the provider believes supports the compliance with HHSC claims submission guidelines. Appeals are reviewed first by an experienced psychiatric Licensed Clinical Social Worker (LCSW) or an RN to determine whether the required criteria is documented and then forwarded to a psychiatrist for final determination. The provider is notified of all denial determinations in writing via fax by the TMHP THSteps-CCIP unit.

Utilization Review

All decisions on requests and/or appeals for admission or continuation of stay are responded to in writing and faxed to the provider by TMHP.

Utilization review activities of all Medicaid services provided by hospitals reimbursed under either the DRG prospective payment system or TEFRA are required by Title XIX of the *Social Security Act*, Sections 1902 and 1903. The review activities are performed through a series of monitoring systems developed to ensure that services are appropriate to need and in the optimum quality and quantity. Clients and providers are subject to utilization review monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and the quality of care reflected by the choice of services provided, type of provider involved, and settings in which care was delivered. This monitoring ensures cost-effective administration of the Texas Medicaid Program.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Utilization review may also occur by an examination of particular claims or services not within the regular screening review when a specific utilization review is requested by HHSC or the Texas Attorney General's Office.

Retrospective Utilization Review

All admissions are subject to retrospective utilization review. The complete medical record is used to evaluate the medical necessity of admission, each day of continued inpatient care, and the quality of care provided.

Reminder: *Admissions and continued stays must be certified in accordance with 42-CFR.441.150 through 441.182. Certification of need must be established and maintained as documentation for each Medicaid client. Each facility must maintain this documentation and make it readily available for review whenever requested by HHSC or its designee.*

For admissions of Medicaid-eligible clients or admission of clients who gain Medicaid eligibility while in the facility, the certification of need must be completed by the interdisciplinary team responsible for the POC within 14 days of admission.

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
- Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the acute episode of the client.
- How the services can reasonably be expected to improve the condition or prevent further regression of the client's condition in a proximate time period.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

43.4.11.5 Claims Information

Submit inpatient psychiatric hospital services to TMHP in an approved electronic claims format or on a HCFA-1450 (UB92) claim form. The PAN must be identified in Block 63 of the HCFA-1450 (UB-92) or the appropriate field of the electronic form. Prior authorization is a condition for reimbursement; it is *not* a guarantee of payment.

Important: *Attach the invoice to the claim for any specialized equipment.*

Providers must purchase the HCFA-1450 (UB-92) claim forms from the vendor of their choice. TMHP does not supply the forms.

Use of revenue code 124 is restricted to freestanding psychiatric and rehabilitation hospitals. Acute care hospital claims billing charges using revenue code 124 are manually changed to reflect the same charges using revenue code 120. TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims.

Refer to: "Psychiatric Hospital/Facility (THSteps-CCP Only)" on page D-27 for a claim form example.

"HCFA-1450 (UB-92) Instruction Table" on page 5-34 for claims completion instructions.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.12 Rehabilitation Hospital (Freestanding) (THSteps-CCP Only)

Note: *Rehabilitation provided at an acute care facility is covered through traditional Medicaid.*

43.4.12.1 Enrollment

To be eligible to participate in THSteps-CCP, a freestanding rehabilitation hospital must be certified by Medicare, have a valid Provider Agreement with HHSC, and have completed the TMHP enrollment process. The Texas Medicaid Program enrolls and reimburses freestanding rehabilitation hospitals for CCP services and Medicare deductible/coinsurance. The information in this section is applicable to CCP services only.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

43.4.12.2 Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS and Department of Health and Human Services, a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

- Recertification as a Title XVIII (Medicare) hospital is obtained.
- A new Title XIX (Medicaid) agreement between the hospital and HHSC under new ownership is obtained.

Providers can obtain the Medicaid hospital participation agreement by contacting TMHP Provider Enrollment.

43.4.12.3 Reimbursement

Inpatient

Reimbursement for care provided in the freestanding rehabilitation hospital is made under the Texas DRG Payment System.

A new provider is given a reimbursement interim rate of 50 percent until a cost audit has been performed. Payment is calculated by multiplying the standard dollar amount (SDA) for the hospital's payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Important: *Outpatient services are not reimbursed.*

The DRG payment may be enhanced by an adjusted day or cost outlier payment, if applicable. For example, the limit per spell of illness under Texas Medicaid guidelines is waived for clients younger than 21 years of age. An outlier payment may be made to compensate for unusual resource utilization or lengthy stay.

The following criteria must be met to qualify for a day outlier payment. Inpatient days must exceed the DRG day threshold for the specific DRG. Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 70 percent of the per diem amount of a full DRG payment. The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

To establish a cost outlier, TMHP determines the outlier threshold by using the greater of the full DRG payment amount multiplied by 1.5 or an amount determined by selecting the lesser of the universe mean of the current base year data multiplied by 11.14 or the hospital's SDA multiplied by 11.14.

The calculation that yields the greater amount is used in calculating the actual cost outlier payment. The outlier threshold is subtracted from the amount of reimbursement for the admission established under the TEFRA principles and the remainder multiplied by 70 percent to determine the actual amount of the cost outlier payment.

If an admission qualifies for both a day and a cost outlier, the outlier resulting in the highest payment to the hospital is paid.

The Remittance and Status (R&S) report reflects the outlier reimbursement payment and defines the type of outlier paid, day or cost.

Providers should call the TMHP provider relations representative for their area with questions about the outlier payment.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

Client Transfers

When more than one hospital provides care for the same case, the hospital furnishing the most significant amount of care receives consideration for a full DRG payment.

The other hospital(s) is paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. The DRG modifier PT on the R&S report indicates per diem pricing related to a client transfer.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. The facility must bill only one claim.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine whether the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

Provider Cost Reporting, Review

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient costs in the cost reports submitted annually. One copy of the applicable CMS cost report form is to be prepared by the provider.

If a change of ownership or provider termination occurs, the cost report is due within 45 days after the date of the termination or change in ownership. Any request for extension of time to file should be made on or before the cost report due date and sent to Medicaid Audit at the address indicated below.

CPT only copyright 2005 American Medical Association. All rights reserved.

Providers must file annual cost reports as follows:

- Provider submits one copy of the cost report to Medicaid Audit within three months of the end of the hospital's FY, along with any amount due to the Texas Medicaid Program.
- The Medicaid Audit Department performs a desk review of the cost report and makes tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to the Texas Medicaid Program or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time, based on the cost report.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary: audited or settled without audit Medicare Cost Report, Medicare Notice of Amount of Program Reimbursement, and Medicare Audit Adjustment Report, if applicable.
- Field audits are conducted when necessary.

Providers can call Medicaid Audit at 1-512-514-3686 for more information.

Medicaid hospitals may request copies of their claim summaries for their cost reporting FY. The summaries for tentative settlements include two additional months of claim payments for the FY. The summaries for final settlements include ten additional months of claim payments for the FY. Medicaid Audit uses the same data to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data is only generated once a month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs should be submitted within 30 days after the fiscal year-end. Final settlement log requests should be submitted within one month after the fiscal year-end.

These Medicaid logs may be requested in paper copies by mailing a Medicaid Audit Request for Claims Summary to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Providers should allow 45 days for receipt of these logs.

43.4.12.4 Benefits and Limitations

Inpatient Rehabilitation Hospital Services

Inpatient rehabilitation hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Conditions requiring rehabilitation may be acute, an exacerbation of a chronic condition, or chronic. A condition is considered to be acute or an exacerbation only during the six months from the onset date of the acute condition or the exacerbation of the chronic condition. Requests for services beyond this time period may be considered on a case-by-case basis.

Prior authorization is mandatory. After receiving the documentation establishing the medical necessity and plan of medical care by the treating physician, prior authorization is considered by CCP for both the initial service and an extension of service. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Requests for prior authorization of subsequent services are not to exceed 60 days. Requests for prior authorization of subsequent services must be received before the end-date of the preceding prior authorization.

The request for inpatient rehabilitation and the treatment plan must be signed and dated by the physician. All signatures must be original and handwritten. Computerized or stamped signatures are not accepted.

Send CCP prior authorization requests and any other CCP correspondence to the following address:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program (CCP)
PO Box 200735
Austin, TX 78720-0735

All prior authorization documentation must be made a permanent part of the medical record.

Electronic billers also must submit the PAN on the claim. Electronic billers should consult their software vendor for the location of this field in their software.

Client

Prior authorization is considered for clients that meet the following criteria:

- Are younger than 21 years of age
- Are THSteps-eligible at the time of service
- Have an acute problem and/or acute deterioration of a chronic problem that would benefit from comprehensive treatment
- Are expected to improve within a 60-day period and be restored to a more functional lifestyle for an acute condition or the previous level of function for an exacerbation of a chronic condition

Note: *Prior authorization is a condition for reimbursement, not a guarantee of payment.*

Comprehensive Treatment

The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.

Comprehensive treatment must be under the leadership of a physician.

Comprehensive treatment must be an active interdisciplinary team, defined as at least two types of therapies.

CPT only copyright 2005 American Medical Association. All rights reserved.

Comprehensive treatment must consist of at least two appropriate physical modalities designed to resolve or improve the client's condition (PT, OT, and speech language), and must be provided for a minimum of three hours per day for five days per week.

Goal

The goal is to return the client to a functional or more functional lifestyle in a reasonable period of time.

Length of Treatment

Initial authorization may be for up to two months. Additional increments may be given per recertification.

Termination of Treatment Authorization

The minimum requirements for termination of treatment authorization are as follows:

- Active progressive treatment plan is not aggressively pursued under the direction of a physician.
- Progress cannot be documented in a reasonable amount of time by the interdisciplinary team.
- A plateau is reached and additional progress cannot be documented or expected. Plateauing is defined as the point at which maximal improvement has been documented and continued improvement ceases.

Attending Physician Documentation

The minimum requirements provided by the medical request are as follows:

- The date of onset of the illness or injury requiring the rehabilitation admission
- A brief synopsis of previous medical treatment, including outcomes of the treatment relative to the debilitating condition
- The treatment plan to be followed in the inpatient rehabilitation hospital
- The expected outcome to be achieved by the active treatment plan, and the time interval at which such an outcome should be obtained
- Why outpatient PT, speech language, and/or OT does not meet client needs
- That alternative treatment sites have been evaluated, and why they are inappropriate for the client needs
- Whether the client has a reasonable expectation for meaningful improvement from the treatment plan that will restore the client to maximum expected function and/or achieve independent living capabilities in a reasonable period of time

For an extension of prior authorization, discussion of why the initial two months of inpatient rehabilitation has not met the client's needs and why the client cannot be treated in an outpatient setting is required.

43.4.12.5 Claims Information

Submit inpatient rehabilitation hospital services to TMHP in an approved electronic claims format or on a HCFA-1450 (UB-92) claim form. Providers must purchase the HCFA-1450 (UB-92) claim forms from the vendor of their choice. TMHP does not supply the forms. Use of revenue code 124 is restricted to freestanding psychiatric and rehabilitation hospitals. Acute care hospital claims billing charges using revenue code 124 are manually changed to reflect the same charges using revenue code 120. TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims. Claims for services that have been authorized must reflect the PAN in Block 23 of the CMS-1500 claim form or its electronic equivalent.

Refer to: "Rehabilitation Hospital (THSteps-CCP Only)" on page D-29 for a claim form example.

"HCFA-1450 (UB-92) Claim Filing Instructions" on page 5-32 for claims completion instructions.

43.4.13 Speech-Language Pathologists (THSteps-CCP Only)

Medicaid beneficiaries under 21 years of age are entitled to all medically necessary PDN services and/or home health skilled nursing services. Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the *Texas Nursing Practice Act* and its implementing regulations.
- The requested services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.
- There is no third-party resource financially responsible for the services.

Requests for nursing services must be submitted on the required Medicaid forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the beneficiary's current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the beneficiary's disability or physical or mental illness or condition.

Medically necessary nursing services are authorized either as PDN services or as home health skilled nursing services, depending on whether the beneficiary's nursing needs can be met on a per-visit basis.

43.4.13.1 Enrollment

HHSC allows enrollment of independently-practicing licensed speech-language pathologists under THSteps-CCP. The Texas Medicaid Program enrolls and reimburses speech-language pathologists for CCP services only. This section does not apply to CORFs.

Refer to: "Provider Enrollment" on page 43-5 for more information about enrollment procedures.

CPT only copyright 2005 American Medical Association. All rights reserved.

43.4.13.2 Reimbursement

Speech-language services provided by home health agencies are reimbursed according to a statewide visit rate calculated in accordance with 1 TAC §355.8021(a). The current statewide visit rate for SLP services is $119.61 per visit.

Speech-language services provided by outpatient hospitals are reimbursed based on PPS fee schedule in accordance with 1 TAC §355.8085.

Speech-language services provided by CORFs are reimbursed based on a reasonable cost methodology, in accordance with 1 TAC §355.8441 (15), with an interim rate based on the provider's most recent Medicaid cost report settlement.

Speech-language services provided by providers other than home health agencies and outpatient hospitals are reimbursed according to rates published in a fee schedule calculated in accordance with 1 TAC §355.8441. The current physician fee schedule is available on the TMHP website at www.tmhp.com.

The following procedure codes should be used for billing speech-language services under THSteps-CCP, but not all codes are payable to all provider types: 1-92507, 1-92506, and 1-92508.

Refer to: "Texas Medicaid Reimbursement" on page 2-1 for more information about reimbursement.

43.4.13.3 Benefits and Limitations

CCP is for Medicaid/THSteps-eligible clients younger than 21 years of age. CCP eligibility ends on the client's 21st birthday. If the client's Medicaid ID states "Emergency Care," "PE," or "QMB," the client is not eligible for THSteps or CCP benefits.

Speech therapy may be billed as POS 1 or 2 and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client's daycare facility, or the client's school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only THSteps-CCP therapy that can be delivered in the client's school during regular school hours are those delivered by school districts as SHARS as POS 9.

A request for speech therapy services may be prior authorized for no longer than six months duration. A new request must be submitted if therapy is required for a longer duration.

Typical sessions do not exceed one hour in length. Documentation supporting the need for longer sessions is required. No limitations exist to the number of sessions that may be provided per week; however, documentation supporting the medical necessity for the requested services is required.

Speech-language services are benefits under CCP when provided to clients experiencing speech-language difficulty because of a disability, ongoing health condition, or communication disorder such as a disease or trauma, developmental delay, oral motor problem, or congenital anomaly or other conditions requiring medically necessary speech-language services.

Providers must use the following procedure codes for services provided by an independently-practicing speech-language pathologist for developmental therapies:

Procedure Code	Maximum Fee
1-92506	$210.00
1-92506 *with* modifier U4	$210.00
1-92507	$70.00
1-92508	$35.00
1-97535	$35.00

Procedure code 1-92506 may be billed without prior authorization. Only one is allowed for payment per six months per provider without prior authorization or written documentation of medical necessity. An evaluation should not be billed on the same day as treatment.

Procedure code 1-92506 with modifier U4 may only be billed once per month per provider.

Refer to: "Speech-Language Therapy" on page 36-327.

43.4.13.4 Prior Authorization, Documentation Requirements

Providers must use the "Request for Initial Outpatient Therapy (Form TP-1)" on page B-78 for initial requests and the "Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)" on page B-79 for extension requests.

Prior authorization is a condition for reimbursement; it is *not* a guarantee of payment.

Prior authorization is required for speech-language therapy services except for evaluation and re-evaluation. Submit documentation with the request for prior authorization or with each claim for consideration of reimbursement.

Children receiving therapy services reimbursed by CCP must have chronic conditions that require ongoing medical supervision. To establish medical necessity, a physician prescription and revised therapy treatment plan are required at least every six months. A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

The initial therapy treatment plan must include a TP-1 and an initial therapy treatment plan. The initial therapy treatment plan must include the following:

- A physician prescription
- A copy of the current evaluation
- The documented age of the client at the time of the evaluation

CPT only copyright 2005 American Medical Association. All rights reserved.

- Documentation indicating the treatment goals, anticipated measurable progress toward goals, the prognosis, and the client's gross motor skills in years/months. Goals may include improving, maintaining, or slowing the deterioration of function

To request an extension of services, the following documentation must be submitted:

- A TP-2 form, including a current physician signature
- All documentation required in initial authorizations (except the TP-1 form)
- Documentation of all progress made from the beginning of the previous treatment period to the current service request date, including progress towards previous goals
- Information that supports the client's capability of continued measurable progress
- A proposed treatment plan for the requested extension dates with specific goals related to the client's individual needs. Therapy goals may include improving, maintaining, or slowing the deterioration of function

Therapy may be extended beyond two years, but the following required documentation must be forwarded for review for authorization to be considered:

- A TP-2 form
- All documentation required in initial authorizations (except the TP-1 form)
- A comprehensive team evaluation summarizing all prior treatment as well as progress that was made during that time
- A report from the case-managing physician indicating all progress that the client made toward all goals during all previous therapy sessions

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new treatment plan is required, along with documentation of the last therapy visit with the previous provider. A letter from the guardian stating the date therapy ended with the previous provider is sufficient.

Physician Signature

The physician's signature, required on a prescription and the appropriate authorization request form, must be current to the service date of the request.

Refer to: "Physician Signature" on page 43-37 for complete information about this requirement.

43.4.13.5 Claims Information

Providers must submit claims for services provided by speech-language pathologists in an approved electronic claims format or on a CMS-1500 claim form from the vendor of their choice. TMHP does not supply the forms.

Therapy is only payable when provided in POS 1 (office) or 2 (home). Procedure codes 1-92506, 1-92507, 1-92508, and 1-97535 may only be billed with a quantity of 1. Claims for services that have been authorized must reflect the PAN in Block 23 for the CMS-1500 claim form or its electronic equivalent.

Refer to: "Speech-Language Pathologists (THSteps-CCP Only)" on page D-33 for an example.

"CMS-1500 Claim Filing Instructions" on page 5-24 for claims completion instructions.

43.4.13.6 THSteps-CCP Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24

44.1 Enrollment

To enroll in the Texas Medicaid Program, a tuberculosis (TB) clinic must be:

- A public entity operating under a HHSC tax identification number (TIN) (TB regional clinic); *or*
- A public entity operating under a non-HHSC TIN (city/county/local clinic); *or*
- A nonhospital-based entity for private providers.

Providers of TB-related clinic services must apply to the Department of State Health Services (DSHS) Infectious Disease Control Unit Tuberculosis Program (IDCU/TB). The following enrollment process must be followed:

- Providers must complete a provider application from IDCU/TB. Providers must have the facilities and resources available to provide all services required under the Texas Medicaid Program. Upon written notice of approval by IDCU/TB, Medicaid enrollment applications from the TMHP Provider Enrollment are sent to HHSC-approved providers of TB-related clinic services.
- Providers must complete a provider agreement from TMHP for enrollment into the Texas Medicaid Program. TMHP is responsible for issuing a group or individual nine-digit provider identifier. Providers that list additional (satellite) clinics in the IDCU/TB provider application will receive nine-digit performing provider identifiers for each off-site clinic. TB off-site clinics operating under the jurisdiction of the applying provider must use the assigned group provider identifier and their nine-digit performing provider identifier. Enrollment as a Medicaid provider is not complete until the TMHP enrollment packet has been finalized and a nine-digit provider identifier number is issued to the provider.

Important: *The effective date for participation is the date an approved provider application with* IDCU/TB *is established.*

To receive a provider application form or provider supplement, send a request to the following address:

Infectious Disease Control Unit
Tuberculosis Program
Mail Code 1939
1100 West 49th Street
Austin, TX 78756-3199

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures related to the TMHP Medicaid enrollment applications.

44.1.1 Managed Care Program Enrollment

TB clinics do not need to enroll with the Medicaid Managed Care health plans. All services provided by TB clinics are submitted to TMHP for all Medicaid clients, including Medicaid Managed Care clients.

44.2 Provider Responsibilities

If approved to bill as a TB clinic under the Texas Medicaid Program, the provider must adhere to the following requirements:

- Be a facility that is not an administrative, organizational, or financial part of a hospital, but is organized and operated to provide medical care to outpatients.
- Comply with all applicable federal, state, and local laws and regulations.
- Employ or have a contract or formal arrangement with a licensed physician (doctor of medicine [MD] or doctor of osteopathy [DO]) who is responsible for providing medical direction and supervision over all services provided to the clinic's clients. To meet this requirement, a physician must see the client at least once, prescribe the type of care provided and, if the services are not limited by the prescription, periodically review the need for continued care.
- Adhere to the guidelines issued by HHSC, under the authority of the *Texas Health and Safety Code*, and ensure that services are consistent with the recommendations of the American Thoracic Society and the Centers for Disease Control and Prevention (CDC). For more information, visit the website at www.cdc.gov/nchstp/tb/pubs/mmwrhtml/maj_guide.htm.
- Ensure that services provided to each client are commensurate with the client's medical needs based on the client's assessment/evaluation, diagnostic studies, plan of care, and physician direction. These services must be documented in the client's medical records.
- Be enrolled and approved for participation in the Texas Medicaid Program.
- Sign a written provider agreement with HHSC or its designee. By signing the agreement, the provider of TB-related clinic services agrees to comply with the terms of the agreement and all requirements of the Texas Medicaid Program including regulations, rules, handbooks, standards, and guidelines published by HHSC or its designee.
- Bill for services covered by the Texas Medicaid Program in the manner and format prescribed by HHSC or its designee.
- Be organized and operated to provide TB-related services, which include, but are not limited to, the covered services as indicated in "Benefits and Limitations" on page 44-3.
- Not provide services within a skilled nursing facility (SNF), intermediate care facility (ICF), or ICF for the mentally retarded (ICF-MR).

Refer to: "Provider Enrollment" on page 1-2 for more information.

CPT only copyright 2005 American Medical Association. All rights reserved.

44.3 Reimbursement

The Medicaid rates for TB clinics are calculated in accordance with Title 1 *Texas Administrative Code* (TAC) §355.8341.

Chest X-rays are payable in addition to the encounter rate for TB clinic services because of the large variations in client needs and frequency of X-rays. The Medicaid rate for X-rays are calculated in accordance with 1 TAC §§355.8341 and 355.8085 and are listed in the current physician fee schedule, which is available at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Private providers of TB-related clinic services will receive the maximum allowable fee. Public providers of TB-related clinic services will only receive the federal matching rate of the maximum allowable fee in effect at the time of service. The federal matching rate is adjusted on October 1 of each year, or as otherwise directed by the Centers for Medicare & Medicaid Services (CMS).

Public providers of TB-related clinic services receive only the federal share of Medicaid payments. The nonfederal share of the Medicaid payments to public provider TB clinics are funded through certification of public expenditures (CPE). DSHS will certify for those public provider TB clinics that have a contract with IDCU/TB.

Refer to: “Reimbursement” on page 2-2 for more information.

44.4 Certification of Funds

As public providers of TB-related clinic services receiving only the federal share of Medicaid payments, public provider TB clinics fund the state/local (e.g., nonfederal) share through CPE.

The Certification of Funds letter is mailed by TMHP Provider Enrollment to DSHS at the end of each quarter of the federal fiscal year (FFY), which is October 1 through September 30. The letter requires certification of 100 percent of the Medicaid-allowable costs for the dates of services covered by payments received within the previous federal fiscal quarter (including the federal share, the total state/local share, and the total computable expenditure).

To assist in certifying the funds documented in the letter, the Certification of Funds Claims Information Report will be available for review upon receipt of the letter. The report will contain Texas Medicaid fee-for-service (FFS) (Program 100) and Texas Medicaid Primary Care Case Management (PCCM) (Program 200) claims on the same page sorted by paid date.

Refer to: “TMHP Provider Relations” on page -xiii for more information about provider relations representatives.

The Certification of Funds letter must be:

- Signed by a DSHS business officer or other financial representative who is responsible for signing other documents that are subject to audit.
- Notarized.
- Returned to TMHP within 25 calendar days of the date printed on the letter.

Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider’s payments until the signed Certification of Funds letter is received by TMHP. If the Certification of Funds letter was not received, contact TMHP Contact Center at 1-800-925-9126.

44.5 Benefits and Limitations

The level of service provided varies depending on whether the services are delivered by a nonphysician or physician and if medications are prescribed.

44.5.1 TB-Related Clinic Services and Procedure Codes

Providers may be required to demonstrate the ability to provide the full scope of services and documentation of service delivery methodology. The following services are covered for reimbursement:

44.5.1.1 Chest X-Rays Procedure Codes

Procedure Code	Maximum Fee
4-71010	$21.55
4-71020	$27.55
4-71021	$33.00
4-71022	$34.64
4-71035	$22.91

44.5.1.2 Classification System for TB

The current clinical classification system for TB is based on the pathogenesis of the disease. TB disease should be ruled in or out, within the standard 90 day period. Therefore, a client should not be a class 5 for more than 90 days (three months). Health care providers should comply with state and local laws and regulations requiring the reporting of TB. All persons with class 3 or class 5 TB should be reported within one business day to the regional or local health department.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following table lists the TB classifications:

TB Class	Description
Class 0—No TB exposure: not infected	No history of exposure; negative reaction to tuberculin skin test.
Class 1—TB exposure: no evidence of infection	History of exposure; negative reaction to tuberculin skin test.
Class 2—Latent TB infection (LTBI): no disease	Positive reaction to tuberculin skin test. Negative bacteriologic studies (if done). No clinical, bacteriological, or radiographic evidence of active TB.
Class 3—TB clinically active	M. tuberculosis cultured (if done). Clinical, bacteriological, or radiographic evidence of current disease.
Class 4—TB not clinically active	History of episode(s) of TB. *or* Abnormal but stable radiographic findings. Positive reaction to the tuberculin skin test. Negative bacteriologic studies (if done). *and* No clinical or radiographic evidence of current disease.
Class 5—TB suspected	Diagnosis is pending.

44.5.1.3 Initial Examination and Procedure Codes

An initial examination should be performed by providers when any class of client is evaluated for the first time. A client can receive another initial examination six months (180 rolling days) from the previous one if there has been an interruption in therapy (such as reinitiation of treatment for clients lost to follow-up). Services may include, but are not limited to:

- Record initiation
- Clinical assessment/diagnostic procedures
- Counseling and education/preventive services
- Physician consultation and evaluation
- Prescribed medications/instruction

The following table describes the procedure codes and modifiers to be billed for initial examinations:

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Initial Exam Level 01: Nonphysician services only	1 or 2	D-99204 *with* modifier TF	$26.53
	3 or 5	D-99204 *with* modifier TG	$43.27
Initial Exam Level 06: Nonphysician and Physician services	1 or 2	D-99204 *with* modifiers TF *and* AM	$52.90
	3 or 5	D-99204 *with* modifiers TG *and* AM	$73.51

CPT only copyright 2005 American Medical Association. All rights reserved.

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Initial Exam Level 08: Nonphysician and Physician services Prescribed Medications (Preventive Treatment)	1 or 2	D-99205 *with* modifier TF	$54.10
	3 or 5	D-99205 *with* modifier TG	$253.99

Physician examination procedure codes may be used only when any class of client was initially evaluated without the consultation and evaluation of a physician. This examination cannot be billed if the provider billed for Level 06, 07, or 08 for the initial examination. Services may include, but are not limited to, the following:

- Record maintenance
- Nonphysician assistance with evaluation
- Physician consultation and evaluation
- Prescribed medications/instruction

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Physician Exam Level 06: Nonphysician and Physician services	1 or 2	D-99201 *with* modifier TF	$37.48
	3 or 5	D-99201 *with* modifier TG	$38.51
Physician Exam Level 07: Nonphysician and Physician services Prescribed Medications (Initial Treatment)	3 or 5	D-99202 *with* modifier TG	$218.99
Physician Exam Level 08: Nonphysician and Physician services Prescribed Medications (Preventive Treatment)	1 or 2	D-99202 *with* modifier TF	$38.68

44.5.1.4 Follow-Up Examination

Use the follow-up examination only when any class of client is being evaluated during the course of treatment. This examination cannot be billed on the same day as any other examination (except directly observed therapy [DOT] or directly observed preventive therapy [DOPT]). Services may include, but are not limited to, record maintenance, clinical assessment and diagnostic procedures, nonphysician assistance with evaluation, and physician consultation and evaluation.

The following procedure codes and modifiers may be billed for follow-up examinations:

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Follow-Up Exam Level 01: Nonphysician services only	1 or 2	D-99214 *with* modifier TF	$22.12
	3 or 5	D-99214 *with* modifier TG	$27.12

CPT only copyright 2005 American Medical Association. All rights reserved.

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Follow-Up Exam Level 06: Nonphysician and Physician services	1 or 2	D-99214 *with* modifiers TF *and* AM	$46.37
	3 or 5	D-99214 *with* modifiers TG *and* AM	$51.59

44.5.1.5 Monthly Examination

Use the monthly examination only when any class of client is being evaluated for a routine monthly diagnostic examination. This examination may be reimbursed every 25 rolling days. This examination always includes a 30-day supply of medications regardless of level. Services may include, but are not limited to, record maintenance, clinical assessment and diagnostic procedures, nonphysician assistance with evaluation, physician consultation and evaluation, and prescribed medications/instructions.

The following procedure codes and modifiers may be billed for monthly examinations:

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Monthly Exam Level 02: Nonphysician services Prescribed Medications (Initial Treatment)	3 or 5	D-99212 *with* modifier TG	$202.38
Monthly Exam Level 03: Nonphysician services Prescribed Medications (Preventive Treatment)	1 or 2	D-99212 *with* modifier TF	$13.54
Monthly Exam Level 04: Nonphysician services Prescribed Medications (Maintenance Treatment)	3 or 5	D-99213 *with* modifier TG	$45.30
Monthly Exam Level 05: Nonphysician services Prescribed Medications (Advanced Treatment)	3 or 5	D-99215 *with* modifier TG	$809.94
Monthly Exam Level 07: Nonphysician and Physician services Prescribed Medications (Initial Treatment)	3 or 5	D-99212 *with* modifier TG *and* AM	$212.27
Monthly Exam Level 08: Nonphysician and Physician services Prescribed Medications (Preventive Treatment)	1 or 2	D-99212 *with* modifiers TF *and* AM	$47.57

CPT only copyright 2005 American Medical Association. All rights reserved.

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
Monthly Exam Level 09: Nonphysician and Physician services Prescribed Medications (Maintenance Treatment)	3 or 5	D-99213 *with* modifiers TG *and* AM	$55.19
Monthly Exam Level 10: Nonphysician and Physician services Prescribed Medications (Advanced Treatment)	3 or 5	D-99215 *with* modifiers TG *and* AM	$819.83

44.5.1.6 DOT/DOPT Examination

Use the DOT/DOPT examination only when any class of client is DOT or DOPT in the clinic and other settings. This examination is the only type of examination that can be billed more than once per day. Services may include, but are not limited to, the following:

- Monitoring and maintenance—Record documentation of each and every DOT/DOPT dose observed and swallowed
- Monitoring the reporting of the completion of drug therapy
- Toxicity assessment for each DOT/DOPT dose observed

The following procedure codes and modifiers may be billed for DOT/DOPT examinations:

44

Service	Client Class	Procedure Code/ Modifier	Maximum Fee
DOT/DOPT Exam Level 01: Nonphysician services only	1 or 2	D-99211 *with* modifier TF	$9.69
	3 or 5	D-99211 *with* modifier TG	$15.77

44.5.1.7 Medication Levels

The medication levels vary according to length of regimen and number of medications per regimen. The following medication levels apply to specific examination types:

Level	Description
Initial	4-drug treatment for first two months (Level 02 and 07 only)
Preventive	2-drug treatment for preventive therapy (Level 03 and 08 only)
Maintenance	2-drug treatment for the remaining 4 months (Level 04 and 09 only)
Advanced	Multiple drug treatment for drug resistance clients (Level 05 and 10 only)

CPT only copyright 2005 American Medical Association. All rights reserved.

44.5.1.8 Diagnosis Codes

Diagnoses are used in conjunction with the corresponding TB400B classifications.

The following table lists the available diagnosis codes:

Client Classification	Modifier Code	ICD-9-CM Code
1 or 2	TF	7955 or V011
3 or 5	TG	01010, 01011, 01012, 01013, 01014, 01015, 01016, 01080, 01081, 01082, 01083, 01084, 01085, 01086, 01090, 01091, 01092, 01093, 01094, 01095, 01096, 01100, 01101, 01102, 01103, 01104, 01105, 01106, 01110, 01111, 01112, 01113, 01114, 01115, 01116, 01120, 01121, 01122, 01123, 01124, 01125, 01126, 01130, 01131, 01132, 01133, 01134, 01135, 01136, 01140, 01141, 01142, 01143, 01144, 01145, 01146, 01150, 01151, 01152, 01153, 01154, 01155, 01156, 01160, 01161, 01162, 01163, 01164, 01165, 01166, 01170, 01171, 01172, 01173, 01174, 01175, 01176, 01180, 01181, 01182, 01183, 01184, 01185, 01186, 01190, 01191, 01192, 01193, 01194, 01195, 01196, 01200, 01201, 01202, 01203, 01204, 01205, 01206, 01210, 01211, 01212, 01213, 01214, 01215, 01216, 01220, 01221, 01222, 01223, 01224, 01225, 01226, 01230, 01231, 01232, 01233, 01234, 01235, 01236, 01280, 01281, 01282, 01283, 01284, 01285, 01286, 01300, 01301, 01302, 01303, 01304, 01305, 01306, 01310, 01311, 01312, 01313, 01314, 01315, 01316, 01320, 01321, 01322, 01323, 01324, 01325, 01326, 01330, 01331, 01332, 01333, 01334, 01335, 01336, 01340, 01341, 01342, 01343, 01344, 01345, 01346, 01350, 01351, 01352, 01353, 01354, 01355, 01356, 01360, 01361, 01362, 01363, 01364, 01365, 01366, 01380, 01381, 01382, 01383, 01384, 01385, 01386, 01390, 01391, 01392, 01393, 01394, 01395, 01396, 01400, 01401, 01402, 01403, 01404, 01405, 01406, 01480, 01481, 01482, 01483, 01484, 01485, 01486, 01500, 01501, 01502, 01503, 01504, 01505, 01506, 01510, 01511, 01512, 01513, 01514, 01515, 01516, 01520, 01521, 01522, 01523, 01524, 01525, 01526, 01550, 01551, 01552, 01553, 01554, 01555, 01556, 01560, 01561, 01562, 01563, 01564, 01565, 01566, 01570, 01571, 01572, 01573, 01574, 01575, 01576, 01580, 01581, 01582, 01583, 01584, 01585, 01586, 01590, 01591, 01592, 01593, 01594, 01595, 01596, 01600, 01601, 01602, 01603, 01604, 01605, 01606, 01610, 01611, 01612, 01613, 01614, 01615, 01616, 01620, 01621, 01622, 01623, 01624, 01625, 01626, 01630, 01631, 01632, 01633, 01634, 01635, 01636, 01640, 01641, 01642, 01643, 01644, 01645, 01646, 01650, 01651, 01652, 01653, 01654, 01655, 01656, 01660, 01661, 01662, 01663, 01664, 01665, 01666, 01670, 01671, 01672, 01673, 01674, 01675, 01676, 01690, 01691, 01692, 01693, 01694, 01695, 01696, 01700, 01701, 01702, 01703, 01704, 01705, 01706, 01710, 01711, 01712, 01713, 01714, 01715, 01716, 01720, 01721, 01722, 01723, 01724, 01725, 01726, 01730, 01731, 01732, 01733, 01734, 01735, 01736, 01740, 01741, 01742, 01743, 01744, 01745, 01746, 01750, 01751, 01752, 01753, 01754, 01755, 01756, 01760, 01761, 01762, 01763, 01764, 01765, 01766, 01770, 01771, 01772, 01773, 01774, 01775, 01776, 01780, 01781, 01782, 01783, 01784, 01785, 01786, 01790, 01791, 01792, 01793, 01794, 01795, 01796, 01800, 01801, 01802, 01803, 01804, 01805, 01806, 01880, 01881, 01882, 01883, 01884, 01885, 01886, 01890, or V712

44.5.1.9 Place of Service (POS)

The POS identifies where services are performed. Providers of TB-related clinic services should only use POS 1 (office).

CPT only copyright 2005 American Medical Association. All rights reserved.

44.6 Claims Information

All TB-related clinic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply them.

Refer to: "Coding" on page 5-12 for more information on coding for claims submission.

44.6.1 Claim Filing Resources

Refer to the following sections and/or forms when filing claims:

Resource	Page Number
Automated Inquiry System (AIS)	xiii
TMHP Electronic Data Interchange (EDI)	3-1
CMS-1500 Claim Filing Instructions	5-24
TMHP Electronic Claims Submission	5-10
Communication Guide	A-1
Tuberculosis (TB) Screening and Education Tool	C-91
Tuberculosis (TB) Claim Form Example	D-36

45.1 Enrollment

To enroll in the Texas Medicaid Program, doctors of optometry must be licensed by the licensing board of their profession to practice in the state where the service is performed, at the time the service is performed, and be enrolled as Medicare providers.

An optometrist cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

Ophthalmologists must refer to "Ophthalmology" on page 36-206.

Refer to: "Provider Enrollment" on page 1-2 for more information about enrollment procedures.

45.1.1 Medicaid Managed Care Enrollment

Vision aid providers must enroll with Medicaid Managed Care to be reimbursed for services provided to Medicaid Managed Care clients.

45.2 Reimbursement

Professional services by a doctor of optometry for contact lenses and prosthetic eyewear are reimbursed in accordance with Title 1 *Texas Administrative Code* (TAC), 355.8085 and listed in the current physician fee schedule, which is available on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Federally qualified health centers (FQHCs) are paid an all-inclusive rate per visit for payable services. Specific procedure codes that meet the definition of a payable visit are marked with a "†."

Suppliers of nonprosthetic lenses and frames are reimbursed the lesser of their billed amount or of the established maximum allowable fee.

Optometrist services provided in a skilled nursing facility (SNF) or intermediate care facility for the mentally retarded (ICF-MR) may be reimbursed by Medicaid if the client's attending physician has ordered the service and the order is included in the client's medical records at the facility.

Refer to: "Reimbursement" on page 2-2 for more information about reimbursement.

Vision Claim Form Example on page D-36

"Nonprosthetic Eyeglasses and Contacts" on page 45-20

45.3 Provider Responsibilities

Suppliers of eyewear must comply with all Medicaid provider responsibilities and adhere to the following guidelines:

- Do not delay the ordering of eyewear or the dispensing of eyeglasses to the client while payment is pending from TMHP.
- Deliver the eyewear in a reasonable amount of time (usually two or three weeks from the date the order is placed by the client).
- Obtain the required eligibility information from the client's Medicaid Identification Form (Form H3087).
- Refer to the Eyeglasses column of the Medicaid Identification Form (Form H3087) to determine whether eyeglasses have been dispensed at Medicaid's expense within the last 24 months. Providers are advised to ask clients if they have recently received vision care services that may not appear on the Medicaid Identification Form (Form H3087) because of the monthly lag in updating form information.
- Update the Eyeglasses column of the Medicaid Identification Form (Form H3087) to indicate that eyewear was dispensed. Initial, date, and mark the form to indicate that the service was performed.

Important: *Temporary cataract lenses or glasses are payable during the four-month convalescent period even if the Medicaid Identification Form (Form H3087) does not have a check mark (✓) under the Eyeglasses column. However, the Medicaid Identification Form (Form H3087) must not have a check mark under the Eyeglasses column if nonprosthetic eyeglasses are to be obtained for use in conjunction with cataract contact lenses.*

- Have the client sign and date the Vision Care Eyeglass Patient Certification Form and retain it in the providers' records if the client selects eyewear that is not covered or eyewear is lost or destroyed.
- Have the client, parents, or guardian sign and date the Vision Care Eyeglass Patient Certification Form and retain in their records.
- Do not charge a Medicaid client more than a non-Medicaid patient for noncovered services (e.g., tints, oversized lenses, or frames).
- Keep invoices on file for a minimum of five years.
- Submit claims using the date eyeglasses were ordered as the date of service (DOS) (the start of the 95-day filing period), not the date the eyewear was dispensed.

45.4 Benefits and Limitations

45.4.1 Eye Examinations

Medicaid reimburses doctors of optometry for eye examinations with refractions for diagnoses of refractive error, aphakia, and disease or injury of the eye.

45.4.1.1 Refractive Errors

Procedure codes 1-S0620 and 1-S0621 are payable to optometrists when the diagnosis is refractive error.

Procedure code 1-S0620 or 1-S0621 is to be used by optometrists when billing for a Medicaid-only client and consists of preliminary diagnosis; analysis and complete diagnosis; and prescription and treatment.

CPT only copyright 2005 American Medical Association. All rights reserved.

Claims for eye examination services require a diagnosis. If eyeglasses are not prescribed, diagnosis code V720, Eye examination, may be used. V720 must not be used on claims for eyewear. If the diagnosis is not known by the supplier of the eyewear, diagnosis code 3689, Unspecified visual disturbance, is acceptable. Claims for eye examinations that lack a diagnosis are listed as an incomplete claim on the Remittance and Status (R&S) report and must be resubmitted for payment consideration. Electronic claims that lack a diagnosis will be rejected. A letter with the reason for rejection and instructions for resubmission will be mailed the following business day.

Procedure codes 1-S0620† and 1-S0621 are limited to the following diagnosis codes:

Diagnosis Code	Description
3670	Hypermetropia
3671	Myopia
36720	Astigmatism, unspecified
36721	Regular astigmatism
36722	Irregular astigmatism
36731	Anisometropia
36732	Aniseikonia
3674	Presbyopia
36751	Paresis of accommodation
36752	Total or complete internal ophthalmoplegia
36753	Spasm of accommodation
36781	Transient refractive change
36789	Other disorders of refraction and accommodation
3679	Unspecified disorder of refraction and accommodation
37182	Corneal disorder due to contact lens
V720	Examination of eyes and vision
† = Services payable to an FQHC based on an all-inclusive rate per visit.	

45.4.2 Eye Examinations for the Purpose of Prescribing Eyewear

Refer to the Eye Exam column of the client's current Medicaid Identification Form (Form H3087) to determine if the client is eligible for an eye examination. Any client younger than 21 years of age is eligible for new eyewear whenever there is a diopter change of 0.5 or more (old and new prescription must appear on the claim).

Clients aged birth to 20 years of age are eligible for one examination with refraction for the purpose of obtaining eyewear during each state fiscal year (SFY) (September 1 to August 31, vision care annual periodicity schedule).

The eye exam limitation can be exceeded for clients younger than 21 years of age, but only in the following situations:

- A school nurse, teacher, or parent requests the eye examination (identify this information in Block 9 of the CMS-1500 claim form) if medically necessary.
- Medically necessary (identify this information in Block 19 of the CMS-1500 claim form).

Clients 21 years of age and older are eligible for one examination with refraction for the purpose of obtaining eyewear every 24 months.

A new patient eye examination will be limited to one every 24 months, per client, per provider. A new patient eye examination in any place of service (POS) will be changed to an established patient eye exam, if the history shows that the same provider has furnished a medical service (type of service [TOS] 1), a surgical service (TOS 2), or a consult (TOS 3) within two years. Services billed as new patient eye exams, procedure codes 1-92002 or 1-92004, in excess of this limitation will be changed to 1-92012 and 1-92014 and reimbursed as an established patient exam.

Important: *Eye examinations for aphakia and disease or injury to the eye are not subject to any of the limitations listed above and are payable even if the Medicaid Identification Form (Form H3087) does not have a check mark (✓) under the Eye Exam column.*

45

Vision care services performed in SNF or ICF-MR must be ordered by the attending physician. Providers must document the physician's name and address or nine-digit provider identifier in Block 17 of the CMS-1500 claim form. Claims submitted without this information are listed on the R&S as incomplete and must be corrected and resubmitted for consideration of payment. Electronic claims of this nature will be rejected. Attending physician information for electronic claims must be noted in the appropriate field of an approved electronic claims format.

If an office evaluation and management service or consultation is billed in addition to the eye exam, the evaluation and management service or consultation will be denied as part of the eye exam.

The following services are considered part of the office visit/eye examination reimbursement when performed on the same day:

Procedure Codes		
1-92015†	1-92020†	1-92060†
1-92100†		
† = Services payable to an FQHC based on an all-inclusive rate per visit.		

CPT only copyright 2005 American Medical Association. All rights reserved.

The following services may be billed in addition to an office visit/eye examination:

Procedure Codes		
1-92018	1-92019	1-92081*†
1-92082*†	1-92083*†	1-92120†
1-92135	1-92140†	

*** Procedure codes that are considered bilateral.**
† = Services payable to an FQHC based on an all-inclusive rate per visit.

Orthoptic and/or pleoptics training is considered part of the office visit, and is not separately payable.

Office visits/eye examinations will be denied if billed with any of the following ophthalmology services on the same day:

Procedure Codes		
1-92225†	1-92226†	1-92230*†
1-92235*†	1-92240†	1-92250*†
1-92260*†	1-92265*†	1-92270*†
1-92275*†	1-92285*†	1-92286*†
1-92287*†	5/I/T-95930†	

*** Procedure codes that are considered bilateral.**
† = Services payable to an FQHC based on an all-inclusive rate per visit.

In accordance with the *Omnibus Budget Reconciliation Act (OBRA) of 1986,* Section 9336, a doctor of optometry is considered a physician, with respect to the provision of any item or service the optometrist is authorized to perform by state law or regulation. Services by an optometrist are not limited to procedure codes 1-S0620 and 1-S0621.

The following procedure codes are payable to optometrists when accompanied by an appropriate diagnosis:

Procedure Codes			
1-65205	1-65210	1-65220	1-65222
1-65286	1-65430	1-67820	1-67938
1-68530	1-68761	1-68801	1-68810
1-68840	1-92002	1-92004	1-92012
1-92014	1-92015	1-92020	1-92060
1-92065	1-92081	1-92082	1-92083
1-92100	1-92120	1-92135	1-92140
1-92225	1-92226	1-92230	1-92235
1-92240	1-92250	1-92260	1-92265
1-92270	1-92275	1-92285	1-92286
1-92287	1-92326	1-95060†	1-95933†

1-99056	1-99058	1-S0620	1-S0621
1-S0820			

† = Services payable to an FQHC based on an all-inclusive rate per visit.

Client evaluation and management services and consultation codes are payable, when indicated, for the following diagnoses:

Diagnosis Code	Description
05320	Herpes zoster dermatitis of eyelid
05321	Herpes zoster keratoconjunctivitis
05322	Herpes zoster iridocyclitis
05329	Herpes zoster with other ophthalmic complications
05440	Herpes simplex with unspecified ophthalmic complication
05441	Herpes simplex dermatitis of eyelid
05442	Dendritic keratitis
05443	Herpes simplex disciform keratitis
05444	Herpes simplex iridocyclitis
05449	Herpes simplex with other ophthalmic complications
0760	Trachoma, initial stage
0761	Trachoma, active stage
0769	Trachoma, unspecified
077	Other diseases of conjunctiva due to viruses and chlamydiae
0770	Inclusion conjunctivitis
0771	Epidemic keratoconjunctivitis
0772	Pharyngoconjunctival fever
0773	Other adenoviral conjunctivitis
0774	Epidemic hemorrhagic conjunctivitis
0778	Other viral conjunctivitis
0779	Unspecified diseases of conjunctiva due to viruses and chlamydiae
07798	Unspecified diseases of conjunctiva due to chlamydiae
07799	Unspecified diseases of conjunctiva due to viruses
0903	Syphilitic interstitial keratitis
09150	Syphilitic uveitis, unspecified
09151	Syphilitic chorioretinitis (secondary)
09152	Syphilitic iridocyclitis (secondary)
09840	Gonococcal conjunctivitis (neonatorum)
09841	Gonococcal iridocyclitis
09842	Gonococcal endophthalmia
09843	Gonococcal keratitis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
09849	Other gonococcal infection of eye
11502	Histoplasma capsulatum retinitis
11512	Histoplasma duboisii retinitis
11592	Histoplasmosis retinitis, unspecified
1301	Conjunctivitis due to toxoplasmosis
1302	Chorioretinitis due to toxoplasmosis
1900	Malignant neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
1901	Malignant neoplasm of orbit
1902	Malignant neoplasm of lacrimal gland
1903	Malignant neoplasm of conjunctiva
1904	Malignant neoplasm of cornea
1905	Malignant neoplasm of retina
1906	Malignant neoplasm of choroid
1907	Malignant neoplasm of lacrimal duct
1908	Malignant neoplasm of other specified sites of eye
2240	Benign neoplasm of eyeball, except conjunctiva, cornea, retina, and choroid
2241	Benign neoplasm of orbit
2242	Benign neoplasm of lacrimal gland
2243	Benign neoplasm of conjunctiva
2244	Benign neoplasm of cornea
2245	Benign neoplasm of retina
2246	Benign neoplasm of choroid
2247	Benign neoplasm of lacrimal duct
2248	Benign neoplasm of other specified parts of eye
2249	Benign neoplasm of eye, part unspecified
2340	Carcinoma in situ of eye
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
3665	After-cataract
36650	After-cataract, unspecified
36651	Soemmering’s ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision

Diagnosis Code	Description
3668	Other cataract
3669	Unspecified cataract
36752	Total or complete internal ophthalmoplegia
36753	Spasm of accommodation
36789	Other disorders of refraction and accommodation
36800	Amblyopia, unspecified
36801	Strabismic amblyopia
36802	Deprivation amblyopia
36803	Refractive amblyopia
3681	Subjective visual disturbances
36810	Subjective visual disturbance, unspecified
36811	Sudden visual loss
36812	Transient visual loss
36813	Visual discomfort
36814	Visual distortions of shape and size
36815	Other visual distortions and entoptic phenomena
36816	Psychophysical visual disturbances
3682	Diplopia
3683	Other disorders of binocular vision
36830	Binocular vision disorder, unspecified
36831	Suppression of binocular vision
36832	Simultaneous visual perception without fusion
36833	Fusion with defective stereopsis
36834	Abnormal retinal correspondence
3684	Visual field defects
36840	Visual field defect, unspecified
36841	Scotoma involving central area
36842	Scotoma of blind spot area
36843	Sector or arcuate visual field defects
36844	Other localized visual field defect
36845	Generalized visual field contraction or constriction
36846	Homonymous bilateral field defects
36847	Heteronymous bilateral field defects
3685	Color vision deficiencies
36851	Protan defect
36852	Deutan defect
36853	Tritan defect
36854	Achromatopsia
36855	Acquired color vision deficiencies

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36859	Other color vision deficiencies
3686	Night blindness
36860	Night blindness, unspecified
36861	Congenital night blindness
36862	Acquired night blindness
36863	Abnormal dark adaptation curve
36869	Other night blindness
3688	Other specified visual disturbances
3689	Unspecified visual disturbance
369	Blindness and low vision
3690	Profound vision impairment, both eyes
36900	Blindness of both eyes, impairment level not further specified
36901	Better eye: total vision impairment; lesser eye: total vision impairment
36902	Better eye: near-total vision impairment; lesser eye: not further specified
36903	Better eye: near-total vision impairment; lesser eye: total vision impairment
36904	Better eye: near-total vision impairment; lesser eye: near-total vision impairment
36905	Better eye: profound vision impairment; lesser eye: not further specified
36906	Better eye: profound vision impairment; lesser eye: total vision impairment
36907	Better eye: profound vision impairment; lesser eye: near-total vision impairment
36908	Better eye: profound vision impairment; lesser eye: profound vision impairment
3691	Moderate or severe vision impairment, better eye; profound vision impairment of lesser eye
36910	Blindness, one eye; low vision other eye
36911	Better eye: severe vision impairment; lesser eye: blind, not further specified
36912	Better eye: severe vision impairment; lesser eye: total vision impairment
36913	Better eye: severe vision impairment; lesser eye: near-total vision impairment

Diagnosis Code	Description
36914	Better eye: severe vision impairment; lesser eye: profound vision impairment
36915	Better eye: moderate vision impairment; lesser eye: blind, not further specified
36916	Better eye: moderate vision impairment; lesser eye: total vision impairment
36917	Better eye: moderate vision impairment; lesser eye: near-total vision impairment
36918	Better eye: moderate vision impairment; lesser eye: profound vision impairment
3692	Moderate or severe vision impairment, both eyes
36920	Low vision, both eyes, not otherwise specified
36921	Better eye: severe vision impairment; lesser eye; impairment not further specified
36922	Better eye: severe vision impairment; lesser eye: severe vision impairment
36923	Better eye: moderate vision impairment; lesser eye: impairment not further specified
36924	Better eye: moderate vision impairment; lesser eye: severe vision impairment
36925	Better eye: moderate vision impairment; lesser eye: moderate vision impairment
3693	Unqualified visual loss, both eyes
3694	Legal blindness, as defined in USA
3696	Profound vision impairment, one eye
36960	Blindness, one eye, not otherwise specified
36961	One eye: total vision impairment; other eye: not specified
36962	One eye: total vision impairment; other eye: near-normal vision
36963	One eye: total vision impairment; other eye: normal vision
36964	One eye: near-total vision impairment; other eye: vision not specified
36965	One eye: near-total vision impairment; other eye: near-normal vision

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
36966	One eye: near-total vision impairment; other eye: normal vision
36967	One eye: profound vision impairment; other eye: vision not specified
36968	One eye: profound vision impairment; other eye: near-normal vision
36969	One eye: profound vision impairment; other eye: normal vision
3697	Moderate or severe vision impairment, one eye
36970	Low vision, one eye, not otherwise specified
36971	One eye: severe vision impairment; other eye: vision not specified
36972	One eye: severe vision impairment; other eye: near-normal vision
36973	One eye: severe vision impairment; other eye: normal vision
36974	One eye: moderate vision impairment; other eye: vision not specified
36975	One eye: moderate vision impairment; other eye: near-normal vision
36976	One eye: moderate vision impairment; other eye: normal vision
3698	Unqualified visual loss, one eye
3699	Unspecified visual loss
370	Keratitis
3700	Corneal ulcer
37000	Corneal ulcer, unspecified
37001	Marginal corneal ulcer
37002	Ring corneal ulcer
37003	Central corneal ulcer
37004	Hypopyon ulcer
37005	Mycotic corneal ulcer
37006	Perforated corneal ulcer
37007	Mooren’s ulcer
3702	Superficial keratitis without conjunctivitis
37020	Superficial keratitis, unspecified
37021	Punctate keratitis
37022	Macular keratitis
37023	Filamentary keratitis
37024	Photokeratitis
3703	Certain types of keratoconjunctivitis
37031	Phlyctenular keratoconjunctivitis

Diagnosis Code	Description
37032	Limbar and corneal involvement in vernal conjunctivitis
37033	Keratoconjunctivitis sicca, not specified as Sjogren’s
37034	Exposure keratoconjunctivitis
37035	Neurotrophic keratoconjunctivitis
3704	Other and unspecified keratoconjunctivitis
37040	Keratoconjunctivitis, unspecified
37044	Keratitis or keratoconjunctivitis in exanthema
37049	Other keratoconjunctivitis, unspecified
3705	Interstitial and deep keratitis
37050	Interstitial keratitis, unspecified
37052	Diffuse interstitial keratitis
37054	Sclerosing keratitis
37055	Corneal abscess
37059	Other interstitial and deep keratitis
3706	Corneal neovascularization
37060	Corneal neovascularization, unspecified
37061	Localized vascularization of cornea
37062	Pannus (corneal)
37063	Deep vascularization of cornea
37064	Ghost vessels (corneal)
3708	Other forms of keratitis
3709	Unspecified keratitis
371	Corneal opacity and other disorders of cornea
3710	Corneal scars and opacities
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37105	Phthisical cornea
3711	Corneal pigmentations and deposits
37110	Corneal deposit, unspecified
37111	Anterior corneal pigmentations
37112	Stromal corneal pigmentations
37113	Posterior corneal pigmentations
37114	Kayser-Fleischer ring
37115	Other corneal deposits associated with metabolic disorders
37116	Argentous corneal deposits

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3712	Corneal edema
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37124	Corneal edema due to wearing of contact lenses
3713	Changes of corneal membranes
37130	Corneal membrane change, unspecified
37131	Folds and rupture of Bowman's membrane
37132	Folds in Descemet's membrane
37133	Rupture in Descemet's membrane
3714	Corneal degenerations
37140	Corneal degeneration, unspecified
37141	Senile corneal changes
37142	Recurrent erosion of cornea
37143	Band-shaped keratopathy
37144	Other calcerous degenerations of cornea
37145	Keratomalacia NOS
37146	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Other corneal degenerations
3715	Hereditary corneal dystrophies
37150	Hereditary corneal dystrophy, unspecified
37151	Juvenile epithelial corneal dystrophy
37152	Other anterior corneal dystrophies
37153	Granular corneal dystrophy
37154	Lattice corneal dystrophy
37155	Macular corneal dystrophy
37156	Other stromal corneal dystrophies
37157	Endothelial corneal dystrophy
37158	Other posterior corneal dystrophies
3716	Keratoconus
37160	Keratoconus, unspecified
37161	Keratoconus, stable condition
37162	Keratoconus, acute hydrops
3717	Other corneal deformities
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal staphyloma

Diagnosis Code	Description
3718	Other corneal disorders
37181	Corneal anesthesia and hypoesthesia
37182	Corneal disorder due to contact lens
37189	Other corneal disorders
3719	Unspecified corneal disorder
372	Disorders of conjunctiva
3720	Acute conjunctivitis
37200	Acute conjunctivitis, unspecified
37201	Serous conjunctivitis, except viral
37202	Acute follicular conjunctivitis
37203	Other mucopurulent conjunctivitis
37204	Pseudomembranous conjunctivitis
37205	Acute atopic conjunctivitis
3721	Chronic conjunctivitis
37210	Chronic conjunctivitis, unspecified
37211	Simple chronic conjunctivitis
37212	Chronic follicular conjunctivitis
37213	Vernal conjunctivitis
37214	Other chronic allergic conjunctivitis
37215	Parasitic conjunctivitis
3722	Blepharoconjunctivitis
37220	Blepharoconjunctivitis, unspecified
37221	Angular blepharoconjunctivitis
37222	Contact blepharoconjunctivitis
3723	Other and unspecified conjunctivitis
37230	Conjunctivitis, unspecified
37231	Rosacea conjunctivitis
37233	Conjunctivitis in mucocutaneous disease
37239	Other conjunctivitis
3724	Pterygium
37240	Pterygium, unspecified
37241	Peripheral pterygium, stationary
37242	Peripheral pterygium, progressive
37243	Central pterygium
37244	Double pterygium
37245	Recurrent pterygium
3725	Conjunctival degenerations and deposits
37250	Conjunctival degeneration, unspecified
37251	Pinguecula
37252	Pseudopterygium
37253	Conjunctival xerosis

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37254	Conjunctival concretions
37255	Conjunctival pigmentations
37256	Conjunctival deposits
3726	Conjunctival scars
37261	Granuloma of conjunctiva
37262	Localized adhesions and strands of conjunctiva
37263	Symblepharon
37264	Scarring of conjunctiva
3727	Conjunctival vascular disorders and cysts
37271	Hyperemia of conjunctiva
37272	Conjunctival hemorrhage
37273	Conjunctival edema
37274	Vascular abnormalities of conjunctiva
37275	Conjunctival cysts
3728	Other disorders of conjunctiva
37281	Conjunctivochalasis
37289	Other disorders of conjunctiva
3729	Unspecified disorder of conjunctiva
373	Inflammation of eyelids
3730	Blepharitis
37300	Blepharitis, unspecified
37301	Ulcerative blepharitis
37302	Squamous blepharitis
3731	Hordeolum and other deep inflammation of eyelid
37311	Hordeolum externum
37312	Hordeolum internum
37313	Abscess of eyelid
3732	Chalazion
3733	Noninfectious dermatoses of eyelid
37331	Eczematous dermatitis of eyelid
37332	Contact and allergic dermatitis of eyelid
37333	Xeroderma of eyelid
37334	Discoid lupus erythematosus of eyelid
3734	Infective dermatitis of eyelid of types resulting in deformity
3735	Other infective dermatitis of eyelid
3736	Parasitic infestation of eyelid
3738	Other inflammations of eyelids
3739	Unspecified inflammation of eyelid
374	Other disorders of eyelids

Diagnosis Code	Description
3740	Entropion and trichiasis of eyelid
37400	Entropion, unspecified
37401	Senile entropion
37402	Mechanical entropion
37403	Spastic entropion
37404	Cicatricial entropion
37405	Trichiasis of eyelid without entropion
3741	Ectropion
37410	Ectropion, unspecified
37411	Senile ectropion
37412	Mechanical ectropion
37413	Spastic ectropion
37414	Cicatricial ectropion
3742	Lagophthalmos
37420	Lagophthalmos, unspecified
37421	Paralytic lagophthalmos
37422	Mechanical lagophthalmos
37423	Cicatricial lagophthalmos
3743	Ptosis of eyelid
37430	Ptosis of eyelid, unspecified
37431	Paralytic ptosis
37432	Myogenic ptosis
37433	Mechanical ptosis
37434	Blepharochalasis
3744	Other disorders affecting eyelid function
37441	Lid retraction or lag
37443	Abnormal innervation syndrome of eyelid
37444	Sensory disorders of eyelid
37445	Other sensorimotor disorders of eyelid
37446	Blepharophimosis
3745	Degenerative disorders of eyelid and periocular area
37450	Degenerative disorder of eyelid, unspecified
37451	Xanthelasma of eyelid
37452	Hyperpigmentation of eyelid
37453	Hypopigmentation of eyelid
37454	Hypertrichosis of eyelid
37455	Hypotrichosis of eyelid
37456	Other degenerative disorders of skin affecting eyelid
3748	Other disorders of eyelid
37481	Hemorrhage of eyelid

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37482	Edema of eyelid
37483	Elephantiasis of eyelid
37484	Cysts of eyelids
37485	Vascular anomalies of eyelid
37486	Retained foreign body of eyelid
37487	Dermatochalasis
37489	Other disorders of eyelid
3749	Unspecified disorder of eyelid
375	Disorders of lacrimal system
3750	Dacryoadenitis
37500	Dacryoadenitis, unspecified
37501	Acute dacryoadenitis
37502	Chronic dacryoadenitis
37503	Chronic enlargement of lacrimal gland
3751	Other disorders of lacrimal gland
37511	Dacryops
37512	Other lacrimal cysts and cystic degeneration
37513	Primary lacrimal atrophy
37514	Secondary lacrimal atrophy
37515	Tear film insufficiency, unspecified
37516	Dislocation of lacrimal gland
3752	Epiphora
37520	Epiphora, unspecified as to cause
37521	Epiphora due to excess lacrimation
37522	Epiphora due to insufficient drainage
3753	Acute and unspecified inflammation of lacrimal passages
37530	Dacryocystitis, unspecified
37531	Acute canaliculitis, lacrimal
37532	Acute dacryocystitis
37533	Phlegmonous dacryocystitis
3754	Chronic inflammation of lacrimal passages
37541	Chronic canaliculitis
37542	Chronic dacryocystitis
37543	Lacrimal mucocele
3755	Stenosis and insufficiency of lacrimal passages
37551	Eversion of lacrimal punctum
37552	Stenosis of lacrimal punctum
37553	Stenosis of lacrimal canaliculi
37554	Stenosis of lacrimal sac
37555	Obstruction of nasolacrimal duct, neonatal

Diagnosis Code	Description
37556	Stenosis of nasolacrimal duct, acquired
37557	Dacryolith
3756	Other changes of lacrimal passages
37561	Lacrimal fistula
37569	Other changes of lacrimal passages
3758	Other disorders of lacrimal system
37581	Granuloma of lacrimal passages
37589	Other disorders of lacrimal system
3759	Unspecified disorder of lacrimal system
376	Disorders of the orbit
3760	Acute inflammation of orbit
37600	Acute inflammation of orbit, unspecified
37601	Orbital cellulitis
37602	Orbital periostitis
37603	Orbital osteomyelitis
37604	Orbital tenonitis
3761	Chronic inflammatory disorders of orbit
37610	Chronic inflammation of orbit, unspecified
37611	Orbital granuloma
37612	Orbital myositis
37613	Parasitic infestation of orbit
3762	Endocrine exophthalmos
37621	Thyrotoxic exophthalmos
37622	Exophthalmic ophthalmoplegia
3763	Other exophthalmic conditions
37630	Exophthalmos, unspecified
37631	Constant exophthalmos
37632	Orbital hemorrhage
37633	Orbital edema or congestion
37634	Intermittent exophthalmos
37635	Pulsating exophthalmos
37636	Lateral displacement of globe
3764	Deformity of orbit
37640	Deformity of orbit, unspecified
37641	Hypertelorism of orbit
37642	Exostosis of orbit
37643	Local deformities of orbit due to bone disease
37644	Orbital deformities associated with craniofacial deformities
37645	Atrophy of orbit

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37646	Enlargement of orbit
37647	Deformity of orbit due to trauma or surgery
3765	Enophthalmos
37650	Enophthalmos, unspecified as to cause
37651	Enophthalmos due to atrophy of orbital tissue
37652	Enophthalmos due to trauma or surgery
3766	Retained (old) foreign body following penetrating wound of orbit
3768	Other orbital disorders
37681	Orbital cysts
37682	Myopathy of extraocular muscles
37689	Other orbital disorders
3769	Unspecified disorder of orbit
377	Disorders of optic nerve and visual pathways
3770	Papilledema
37700	Papilledema, unspecified
37701	Papilledema associated with increased intracranial pressure
37702	Papilledema associated with decreased ocular pressure
37703	Papilledema associated with retinal disorder
37704	Foster-kennedy syndrome
3771	Optic atrophy
37710	Optic atrophy, unspecified
37711	Primary optic atrophy
37712	Postinflammatory optic atrophy
37713	Optic atrophy associated with retinal dystrophies
37714	Glaucomatous atrophy (cupping) of optic disc
37715	Partial optic atrophy
37716	Hereditary optic atrophy
3772	Other disorders of optic disc
37721	Drusen of optic disc
37722	Crater-like holes of optic disc
37723	Coloboma of optic disc
37724	Pseudopapilledema
3773	Optic neuritis
37730	Optic neuritis, unspecified
37731	Optic papillitis
37732	Retrobulbar neuritis (acute)

Diagnosis Code	Description
37733	Nutritional optic neuropathy
37734	Toxic optic neuropathy
37739	Other optic neuritis
3774	Other disorders of optic nerve
37741	Ischemic optic neuropathy
37742	Hemorrhage in optic nerve sheaths
37749	Other disorders of optic nerve
3775	Disorders of optic chiasm
37751	Disorders of optic chiasm associated with pituitary neoplasms and disorders
37752	Disorders of optic chiasm associated with other neoplasms
37753	Disorders of optic chiasm associated with vascular disorders
37754	Disorders of optic chiasm associated with inflammatory disorders
3776	Disorders of other visual pathways
37761	Disorders of other visual pathways associated with neoplasms
37762	Disorders of other visual pathways associated with vascular disorders
37763	Disorders of other visual pathways associated with inflammatory disorders
3777	Disorders of visual cortex
37771	Disorders of visual cortex associated with neoplasms
37772	Disorders of visual cortex associated with vascular disorders
37773	Disorders of visual cortex associated with inflammatory disorders
37775	Cortical blindness
3779	Unspecified disorder of optic nerve and visual pathways
378	Strabismus and other disorders of binocular eye movements
3780	Esotropia
37800	Esotropia, unspecified
37801	Monocular esotropia
37802	Monocular esotropia with a pattern
37803	Monocular esotropia with v pattern
37804	Monocular esotropia with other noncomitancies
37805	Alternating esotropia
37806	Alternating esotropia with a pattern
37807	Alternating esotropia with v pattern

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37808	Alternating esotropia with other noncomitancies
3781	Exotropia
37810	Exotropia, unspecified
37811	Monocular exotropia
37812	Monocular exotropia with a pattern
37813	Monocular exotropia with v pattern
37814	Monocular exotropia with other noncomitancies
37815	Alternating exotropia
37816	Alternating exotropia with a pattern
37817	Alternating exotropia with v pattern
37818	Alternating exotropia with other noncomitancies
3782	Intermittent heterotropia
37820	Intermittent heterotropia, unspecified
37821	Intermittent esotropia, monocular
37822	Intermittent esotropia, alternating
37823	Intermittent exotropia, monocular
37824	Intermittent exotropia, alternating
3783	Other and unspecified heterotropia
37830	Heterotropia, unspecified
37831	Hypertropia
37832	Hypotropia
37833	Cyclotropia
37834	Monofixation syndrome
37835	Accommodative component in esotropia
3784	Heterophoria
37840	Heterophoria, unspecified
37841	Esophoria
37842	Exophoria
37843	Vertical heterophoria
37844	Cyclophoria
37845	Alternating hyperphoria
3785	Paralytic strabismus
37850	Paralytic strabismus, unspecified
37851	Third or oculomotor nerve palsy, partial
37852	Third or oculomotor nerve palsy, total
37853	Fourth or trochlear nerve palsy
37854	Sixth or abducens nerve palsy
37855	External ophthalmoplegia
37856	Total ophthalmoplegia
3786	Mechanical strabismus

Diagnosis Code	Description
37860	Mechanical strabismus, unspecified
37861	Brown’s (tendon) sheath syndrome
37862	Mechanical strabismus from other musculofascial disorders
37863	Limited duction associated with other conditions
3787	Other specified strabismus
37871	Duane’s syndrome
37872	Progressive external ophthalmoplegia
37873	Strabismus in other neuromuscular disorders
3788	Other disorders of binocular eye movements
37881	Palsy of conjugate gaze
37882	Spasm of conjugate gaze
37883	Convergence insufficiency or palsy
37884	Convergence excess or spasm
37885	Anomalies of divergence
37886	Internuclear ophthalmoplegia
37887	Other dissociated deviation of eye movements
3789	Unspecified disorder of eye movements
379	Other disorders of eye
3790	Scleritis and episcleritis
37900	Scleritis, unspecified
37901	Episcleritis periodica fugax
37902	Nodular episcleritis
37903	Anterior scleritis
37904	Scleromalacia perforans
37905	Scleritis with corneal involvement
37906	Brawny scleritis
37907	Posterior scleritis
37909	Other scleritis
3791	Other disorders of sclera
37911	Scleral ectasia
37912	Staphyloma posticum
37913	Equatorial staphyloma
37914	Anterior staphyloma, localized
37915	Ring staphyloma
37916	Other degenerative disorders of sclera
37919	Other scleral disorders
3792	Disorders of vitreous body
37921	Vitreous degeneration

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
37922	Crystalline deposits in vitreous
37923	Vitreous hemorrhage
37924	Other vitreous opacities
37925	Vitreous membranes and strands
37926	Vitreous prolapse
37929	Other disorders of vitreous
3793	Aphakia and other disorders of lens
37931	Aphakia
37932	Subluxation of lens
37933	Anterior dislocation of lens
37934	Posterior dislocation of lens
37939	Other disorders of lens
3794	Anomalies of pupillary function
37940	Abnormal pupillary function, unspecified
37941	Anisocoria
37942	Miosis (persistent), not due to miotics
37943	Mydriasis (persistent), not due to mydriatics
37945	Argyll robertson pupil, atypical
37946	Tonic pupillary reaction
37949	Other anomalies of pupillary function
3795	Nystagmus and other irregular eye movements
37950	Nystagmus, unspecified
37951	Congenital nystagmus
37952	Latent nystagmus
37953	Visual deprivation nystagmus
37954	Nystagmus associated with disorders of the vestibular system
37955	Dissociated nystagmus
37956	Other forms of nystagmus
37957	Deficiencies of saccadic eye movements
37958	Deficiencies of smooth pursuit movements
37959	Other irregularities of eye movements
3798	Other specified disorders of eye and adnexa
3799	Unspecified disorder of eye and adnexa
37990	Disorder of eye, unspecified
37991	Pain in or around eye
37992	Swelling or mass of eye
37993	Redness or discharge of eye
37999	Other ill-defined disorders of eye
74300	Clinical anophthalmos, unspecified
74303	Cystic eyeball, congenital
74306	Cryptophthalmos
7431	Microphthalmos
74310	Microphthalmos, unspecified
74311	Simple microphthalmos
74312	Microphthalmos associated with other anomalies of eye and adnexa
7432	Buphthalmos
74320	Buphthalmos, unspecified
74321	Simple buphthalmos
74322	Buphthalmos associated with other ocular anomalies
7433	Congenital cataract and lens anomalies
74330	Congenital cataract, unspecified
74331	Congenital capsular and subcapsular cataract
74332	Congenital cortical and zonular cataract
74333	Congenital nuclear cataract
74334	Congenital total and subtotal cataract
74335	Congenital aphakia
74336	Congenital anomalies of lens shape
74337	Congenital ectopic lens
74339	Other congenital cataract and lens anomalies
7434	Coloboma and other anomalies of anterior segment
74341	Congenital anomalies of corneal size and shape
74342	Congenital corneal opacities, interfering with vision
74343	Other congenital corneal opacities
74344	Specified congenital anomalies of anterior chamber, chamber angle, and related structures
74345	Aniridia
74346	Other specified congenital anomalies of iris and ciliary body
74347	Specified congenital anomalies of sclera
74348	Multiple and combined congenital anomalies of anterior segment
74349	Other congenital anomalies of anterior segment

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
7435	Congenital anomalies of posterior segment
74351	Vitreous anomalies, congenital
74352	Fundus coloboma
74353	Chorioretinal degeneration, congenital
74354	Congenital folds and cysts of posterior segment
74355	Congenital macular changes
74356	Other retinal changes, congenital
74357	Specified congenital anomalies of optic disc
74358	Vascular anomalies, congenital
74359	Other congenital anomalies of posterior segment
7436	Congenital anomalies of eyelids, lacrimal system, and orbit
74361	Congenital ptosis of eyelid
74362	Congenital deformities of eyelids
74363	Other specified congenital anomalies of eyelid
74364	Specified congenital anomalies of lacrimal gland
74365	Specified congenital anomalies of lacrimal passages
74366	Specified congenital anomalies of orbit
74369	Other congenital anomalies of eyelids, lacrimal system, and orbit
7438	Other specified anomalies of eye, congenital
7439	Unspecified anomaly of eye, congenital
8700	Laceration of skin of eyelid and periocular area
8701	Laceration of eyelid, full-thickness, not involving lacrimal passages
8702	Laceration of eyelid involving lacrimal passages
8703	Penetrating wound of orbit, without mention of foreign body
8704	Penetrating wound of orbit with foreign body
8708	Other specified open wounds of ocular adnexa
8709	Unspecified open wound of ocular adnexa
871	Open wound of eyeball
8710	Ocular laceration without prolapse of intraocular tissue
8711	Ocular laceration with prolapse or exposure of intraocular tissue
8712	Rupture of eye with partial loss of intraocular tissue
8713	Avulsion of eye
8714	Unspecified laceration of eye
8715	Penetration of eyeball with magnetic foreign body
8716	Penetration of eyeball with (nonmagnetic) foreign body
8717	Unspecified ocular penetration
8719	Unspecified open wound of eyeball
9180	Superficial injury of eyelids and periocular area
9181	Superficial injury of cornea
9182	Superficial injury of conjunctiva
9189	Other and unspecified superficial injuries of eye
9210	Black eye, not otherwise specified
9211	Contusion of eyelids and periocular area
9212	Contusion of orbital tissues
9213	Contusion of eyeball
9219	Unspecified contusion of eye
92300	Contusion of shoulder region
92301	Contusion of scapular region
92302	Contusion of axillary region
92303	Contusion of upper arm
92309	Contusion of multiple sites of shoulder and upper arm
9400	Chemical burn of eyelids and periocular area
9401	Other burns of eyelids and periocular area
9402	Alkaline chemical burn of cornea and conjunctival sac
9403	Acid chemical burn of cornea and conjunctival sac
9404	Other burn of cornea and conjunctival sac
9405	Burn with resulting rupture and destruction of eyeball
9409	Unspecified burn of eye and adnexa

Procedure code 1-S0620 or 1-S0621 is payable with a diagnosis of refractive error only. Procedure code 92015 is not payable with a diagnosis of refractive error.

CPT only copyright 2005 American Medical Association. All rights reserved.

The following sonography procedures are payable to an optometrist when accompanied by an appropriate diagnosis:

Procedure Codes		
4/I/T-76511	4/I/T-76512	4/I/T-76513
4/I/T-76516	4/I/T-76519	4/I/T-76529

If an office evaluation and management service is billed in addition to the eye examination, the evaluation and management service will be denied as part of the eye exam.

If a consultation is billed in addition to the eye exam, it will be denied as part of the eye exam.

Procedure code 1-99173 will deny as part of another procedure/service billed on the same day (e.g., Texas Health Steps [THSteps] visit or evaluation and management service).

45.4.2.1 Disease or Injury to the Eye

The following codes are payable to optometrists for the diagnosis of aphakia, disease of the eye, or injury of the eye:

Procedure Codes	
1-92002†	1-92004†
1-92012†	1-92014†
† = Services payable to an FQHC based on an all-inclusive rate per visit.	

Important: *Providers may not withhold from a client a prescription for eyeglasses pending Medicaid payment for the eye examination. Prescriptions for eyeglasses must be given to the client on request.*

45.4.2.2 Echography

Procedure codes 4-76511, 4-76512, 4-76513, and 4-76999 are payable for the following diagnoses or conditions:

Diagnosis Code	Description
1900–1901, 1984, 2240–2241, 2340, 2388, 2398, 37992	Intraocular or retrobulbar tumors
25050–25053, 36201–36202, or 36641	Diabetic retinopathy
36100–3612, 36181–3619	Retinal detachment
36130–36133, 36210–36289	Retinal defect without detachment
36340–36343	Choroidal degenerations
36361–36363, 36370–36372	Choroidal hemorrhage or rupture; detachment
36441	Hyphema
37921–37926	Disorders of the vitreous

Procedure codes 4-76511, 4-76512, 4-76516, 4-76519 are payable for the following diagnoses:

Diagnosis Code	Description
3660	Infantile, juvenile, and presenile cataract
36600	Nonsenile cataract, unspecified
36601	Anterior subcapsular polar nonsenile cataract
36602	Posterior subcapsular polar nonsenile cataract
36603	Cortical, lamellar, or zonular nonsenile cataract
36604	Nuclear nonsenile cataract
36609	Other and combined forms of nonsenile cataract
3661	Senile cataract
36610	Senile cataract, unspecified
36611	Pseudoexfoliation of lens capsule
36612	Incipient senile cataract
36613	Anterior subcapsular polar senile cataract
36614	Posterior subcapsular polar senile cataract
36615	Cortical senile cataract
36616	Senile nuclear sclerosis
36617	Total or mature cataract
36618	Hypermature cataract
36619	Other and combined forms of senile cataract
3662	Traumatic cataract
36620	Traumatic cataract, unspecified
36621	Localized traumatic opacities
36622	Total traumatic cataract
36623	Partially resolved traumatic cataract
3663	Cataract secondary to ocular disorders
36630	Cataracta complicata, unspecified
36631	Cataract secondary to glaucomatous flecks (subcapsular)
36632	Cataract in inflammatory ocular disorders
36633	Cataract with ocular neovascularization
36634	Cataract in degenerative ocular disorders

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
3664	Cataract associated with other disorders
36641	Diabetic cataract
36642	Tetanic cataract
36643	Myotonic cataract
36644	Cataract associated with other syndromes
36645	Toxic cataract
36646	Cataract associated with radiation and other physical influences
3665	After-cataract
36650	After-cataract, unspecified
36651	Soemmering's ring
36652	Other after-cataract, not obscuring vision
36653	After-cataract, obscuring vision
3668	Other cataract
3669	Unspecified cataract
37100	Corneal opacity, unspecified
37101	Minor opacity of cornea
37102	Peripheral opacity of cornea
37103	Central opacity of cornea
37104	Adherent leucoma
37105	Phthisical cornea
3711	Corneal pigmentations and deposits
37110	Corneal deposit, unspecified
37111	Anterior corneal pigmentations
37112	Stromal corneal pigmentations
37113	Posterior corneal pigmentations
37114	Kayser-Fleischer ring
37115	Other corneal deposits associated with metabolic disorders
37116	Argentous corneal deposits
3712	Corneal edema
37120	Corneal edema, unspecified
37121	Idiopathic corneal edema
37122	Secondary corneal edema
37123	Bullous keratopathy
37124	Corneal edema due to wearing of contact lenses
3713	Changes of corneal membranes
37130	Corneal membrane change, unspecified
37131	Folds and rupture of Bowman's membrane
37132	Folds in Descemet's membrane

Diagnosis Code	Description
37133	Rupture in Descemet's membrane
3714	Corneal degenerations
37140	Corneal degeneration, unspecified
37141	Senile corneal changes
37142	Recurrent erosion of cornea
37143	Band-shaped keratopathy
37144	Other calcerous degenerations of cornea
37145	Keratomalacia nos
37146	Nodular degeneration of cornea
37148	Peripheral degenerations of cornea
37149	Other corneal degenerations
3715	Hereditary corneal dystrophies
37150	Hereditary corneal dystrophy, unspecified
37151	Juvenile epithelial corneal dystrophy
37152	Other anterior corneal dystrophies
37153	Granular corneal dystrophy
37154	Lattice corneal dystrophy
37155	Macular corneal dystrophy
37156	Other stromal corneal dystrophies
37157	Endothelial corneal dystrophy
37158	Other posterior corneal dystrophies
3716	Keratoconus
37160	Keratoconus, unspecified
37161	Keratoconus, stable condition
37162	Keratoconus, acute hydrops
3717	Other corneal deformities
37170	Corneal deformity, unspecified
37171	Corneal ectasia
37172	Descemetocele
37173	Corneal staphyloma
3718	Other corneal disorders
37181	Corneal anesthesia and hypoesthesia
37182	Corneal disorder due to contact lens
37189	Other corneal disorders
3719	Unspecified corneal disorder
37931	Aphakia
37932	Subluxation of lens
37933	Anterior dislocation of lens
37934	Posterior dislocation of lens
37939	Other disorders of lens
74330	Congenital cataract, unspecified
74331	Congenital capsular and subcapsular cataract

CPT only copyright 2005 American Medical Association. All rights reserved.

Diagnosis Code	Description
74332	Congenital cortical and zonular cataract
74333	Congenital nuclear cataract
74334	Congenital total and subtotal cataract
74335	Congenital aphakia
74336	Congenital anomalies of lens shape
74337	Congenital ectopic lens
74339	Other congenital cataract and lens anomalies

Procedure code 4-76529 is payable for the following diagnoses: 36050 through 36069, 3766, 8704, 8715, 8716, and 9300 through 9309, Diagnosis of foreign bodies of the eye or orbit.

Procedure code 4-76511, 4-76516, or 4-76519 will not be reimbursed if procedure code 4-76512 is billed on the same day, by any provider.

45.4.2.3 Corneal Topography

Procedure code 1-S0820 is a covered benefit.

An initial or established visit/consultation is payable on the same day as the topography. These visits remain subject to the global surgery fee guidelines.

If topography is performed within the global surgical pre- and post-care days of the following ophthalmic procedures, the topography is denied as *part of*.

Procedure Codes			
2/F-65270	2/F-65272	2/F-65273	2/F-65275
2/F-65280	2/F-65285	2/F-65286	2/F-65400
2/F-65420	2/F-65426	2/F-65430	2/F-65435
2/F-65436	2-65450	2-65600	2/F-65710
2/F-65730	2/F-65750	2/F-65755	2/F-65880
2/F-66600	2/F-66605	2/F-66625	2/F-66630
2/F-66635	2/F-66820	2/F-66821	2/F-66830
2/F-66840	2/F-66850	2/F-66852	2/F-66920
2/F-66930	2/F-66940	2/F-66983	2/F-66984
2/F-66985	2/F-66986		

Interpretations are payable in the office and outpatient and inpatient settings. The technical component is only reimbursed in the office setting, not the inpatient or outpatient settings. Depending on the POS billed, a maximum of two interpretations (one for each eye) and one technical component *or* one total component and one additional interpretation (if topography was performed on both eyes) may be reimbursed per client, per day.

Procedure Codes	
1-S0820†	I-S0820
T-S0820	
† = Services payable to an FQHC based on an all-inclusive rate per visit.	

Procedure code 1-S0820 is payable when used for the fitting of contact lenses for diagnoses 36720, 36722, 37281, 37289, and 74341. Prior authorization criteria must be met for contact lenses.

Services are payable to an FQHC based on an all-inclusive rate per visit.

Refer to: “Contact Lenses” on page 45-19 for contact lens information.

Diagnosis Code	Description
36720	Astigmatism, unspecified
36722	Irregular astigmatism
37281	Conjunctivachalasis
37289	Conjunctiva disorder NEC
74341	Anomalies of corneal size and shape

45.4.2.4 Therapeutic Optometrists

The following procedure codes are payable to therapeutic optometrists:

Procedure Codes		
2-65205	2-65210	2-65220
2-65222	2-65286	2-65430
2-67820	2-67938	2-68530
2-68761	2-68801	2-68810
2-68840		

45.4.3 Medicare/Medicaid

Eye examinations for the purpose of prescribing, fitting, or changing eyeglasses/contact lenses because of refractive errors are not a benefit of Medicare. These services must be filed directly to Medicaid when performed for a Medicare/Medicaid client. Medicare coverage is limited to eye examinations for treatment of eye disease or injury and for a diagnosis of aphakia. When performing an eye examination with refraction for a Medicare/Medicaid client diagnosed with aphakia or disease or injury to the eye, the following procedures must be followed:

- Procedure code 1-92015 must be used to bill Medicaid for the refractive portion of the examination and is payable with a diagnosis of aphakia or ocular disease only.
- The medical portion of the eye examination (1-92002, 1-92004, 1-92012, 1-92014) is covered by Medicare and must be billed to Medicare first. Medicare forwards this portion of the examination automatically to TMHP for payment of coinsurance and/or deductible.

Important: *Providers performing eye exams for refractive errors on STAR+PLUS Medicaid Eligibility Verification (MQMB)s* must *bill TMHP, not the STAR+PLUS health plan.*

Do not send the refraction (1-92015) to Medicare first.

CPT only copyright 2005 American Medical Association. All rights reserved.

Medicaid will not waive the 95-day filing deadline if the claim is billed to Medicare in error, nor will Medicare transfer the refraction to Medicaid for payment.

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an intraocular lens (IOL) (Medicare considers the IOL the prosthetic device). Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the *Y* codes in the "Nonprosthetic Eyeglasses and Contacts" tables beginning on page 45-20.

45.4.4 Nonprosthetic Eyewear

Eligible clients may receive nonprosthetic frames and/or lenses once every 24 months. This benefit period begins with the month the glasses are first dispensed. Refer to the Eyeglasses column of the client's Medicaid Identification Form (Form H3087) for determination of eligibility for this service. When there is a change in visual acuity (equal to or greater than 0.5 diopter in one eye), clients are eligible for new nonprosthetic eyeglasses, regardless of when they received their last pair of nonprosthetic eyeglasses or if their Medicaid Identification Form (Form H3087) does not have a check mark (✓) in the Eyeglasses column.

Medicaid provides for serviceable eyeglasses, contact lenses that are medically necessary and prior authorized, necessary major repairs to eyeglasses for clients younger than 21 years of age, and replacement of lost/destroyed eyeglasses and contact lenses for clients younger than 21 years of age.

Exception: *Diagnosis of aphakia does not require prior authorization.*

Important: *For clients younger than 21 years of age, there are no limitations on replacements for lost or destroyed eyewear. Eyewear will be reimbursed even if the client's Medicaid Identification Form (Form H3087) does not have a check mark (✓) in the services already rendered.*

Clients in Medicaid Managed Care health plans may be eligible for additional eyeglass benefits under their plan. Check with the client's health plan for details.

Eyewear must be medically necessary and:

- Prescribed by a Doctor of Medicine (MD), Doctor of Optometry (OD), or Doctor of osteopathy (DO)
- Prescribed to significantly improve vision or correct a medical condition
- Must meet the following eyeglass program specifications for frames and lenses:

Frames

- Frames composed of all zynolite components. The frame is the entire piece of eyewear without the lenses.
- Frames composed of a combination of zynolite and metal components are reimbursed to the maximum allowable amount for a zynolite frame. The client may be billed the difference between the reimbursed amount and the billed amount, as the metal portion is not a benefit of the program.
- All metal frames are *not* a benefit of Medicaid. Clients may be billed for frames that are beyond Medicaid benefits, as specified in "Noncovered Services/ Supplies" on page 45-19.
- American-made unless foreign-made frames are comparable in quality and are less expensive.
- Serviceable and able to meet statutory quality standards.
- Composed of new materials.

Eyeglass Lenses

- Clear glass or plastic.
- Heat or chemically-treated dress eyewear able to meet standards of the American Standard Prescription Requirements for first quality glass and plastic lenses.
- Composed of new materials.
- A minimum kryptoc or 22 mm flat top lens or equivalent if bifocal.
- A minimum flat top 7/25 lens or equivalent if trifocal.

45.4.4.1 Dispensing Requirements

Providers must be able to dispense standard size frames at no cost to the eligible client. Providers must also show each eligible client a minimum of three styles of zylonite frames for male or female, child or adult, in a choice of three colors. The provider may also show combination frames of zylonite and metal. Medicaid can reimburse the zylonite maximum allowable amount for a combination frame. If the cost of frames exceeds the Medicaid maximum allowable fee, the client may be billed the difference of the billed amount. If there is no Medicaid coverage for the eyewear, the client is responsible for the entire amount.

Clients must acknowledge their choice of eyewear beyond program limitations by signing the "Vision Care Eyeglass Patient (Medicaid Client) Certification Form" on page B-116.

45.4.4.2 Replacements

Clients younger than 21 years of age may obtain replacements of nonprosthetic eyewear because of loss or destruction. Clients 21 years of age and older are not eligible for replacements because of loss or destruction of nonprosthetic eyewear. There is no limitation on the number of replacements a client younger than 21 years of age may receive. If eyewear is lost or destroyed, the provider must have the client sign the "Vision Care Eyeglass Patient (Medicaid Client) Certification Form" on page B-116. Replacement codes must be used to ensure accurate processing.

CPT only copyright 2005 American Medical Association. All rights reserved.

45.4.4.3 Repairs

Clients younger than 21 years of age may obtain repairs of nonprosthetic eyewear when the actual cost of materials exceeds $2. An invoice for the repair materials is not required to be submitted with the claim. Providers are required to maintain this information in the client's medical file and make it available for review by TMHP, HHSC, or the Attorney General's office when requested. The cost of repair supplies cannot exceed the amount that would have been payable, if the damaged eyewear had been a new purchase. All repair materials billed to the Texas Medicaid Program must be new and at least equivalent to the original item.

Repairs costing $2 or less are considered minor repairs. The eyeglass supplier is required to perform minor repairs on request (without charge) on eyewear that they have dispensed. Therefore, the Texas Medicaid Program or the client may not be billed for any minor repairs.

No benefits are allowed for repair of eyeglasses that do not meet the minimum program specifications or for clients who are eligible for Medicaid and are 21 years of age and older.

45.4.4.4 Contact Lenses

The Texas Medicaid Program allows reimbursement for contact lenses when no other option is available to correct a visual defect. Prior authorization is mandatory and must be received before dispensing the lens(es), unless the diagnosis is aphakia. Additionally, the client must be eligible for Medicaid at the time the lens(es) are dispensed. Providers must include the following information in each prior authorization request for contact lens(es):

- The client's name and Medicaid number, as they appear on the Medicaid card
- The diagnosis causing the refractive error (for example, keratoconus)
- The current prescription (also include the previous prescription, if the request is because of a significant change in vision)
- The indication of the eye to be treated (right, left, or bilateral)
- The specific procedure code for contact lens(es) requested
- A brief statement addressing the medical need for contact lens(es) (specify why eyeglasses are inappropriate or contraindicated for this client)
- The provider identifer
- The signature of the physician or optometrist requesting prior authorization

Requests lacking this information will be denied. Mail or fax the request to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Soft bandage plano lenses may be dispensed and billed to Medicaid in an emergency situation without prior authorization. The claim must document the medical emergency.

Replacement contact lenses are a benefit for lost or destroyed contact lenses for clients younger than 21 years of age when prior authorized by TMHP. Clients eligible for Medicaid may receive new nonprosthetic contact lenses when there is a significant change in visual acuity (equal to or greater than 0.5 diopter in one eye) and when prior authorized by TMHP.

When billing for bilateral lenses, providers are to use the appropriate code for unilateral lens and specify a quantity of 2 in Block 24E of the claim form.

Refer to: "Nonprosthetic Eyeglasses and Contacts" on page 45-20.

The Vision Claim Form Example on page D-36

"Prosthetic Eyeglasses and Contacts" on page 45-23.

45.4.4.5 Noncovered Services/Supplies

Medicaid does not cover the following services/supplies:

- All metal frames (for example, frames with all metal structural components; plastic nose pieces or sheathing over ear pieces do *not* constitute a combination frame)
- Repairs and replacements of lost or destroyed eyewear for clients 21 years of age and older
- Artificial eyes
- Plano sunglasses
- Eyeglasses that do not significantly improve visual acuity or impede progression of visual problems
- Eyewear prescribed or dispensed to clients at a hospital or nursing facility without documented orders of the attending physician in the client's medical records
- Eyeglasses for residents of institutions where the reimbursement formula and vendor payment include this service
- Optional eyeglass features requested by the client that do not increase visual acuity (e.g., lens tint, industrial hardening, decorative accessories, or lettering)
- Prisms that are ground into the lenses

Clients may be billed for noncovered frames and other items beyond Medicaid benefits.

CPT only copyright 2005 American Medical Association. All rights reserved.

Providers must have the client sign and date the Vision Care Eyeglass Patient Certification Form and retain it in the provider's records.

The client payment amount is *not* considered other insurance and must not be entered as a credit amount in the electronic field.

Example: *The client wants oversized frames and tinted lenses for a total of $140 ($100 for frames, $30 for lenses, $10 for tinting). Medicaid pays $33.15 for the eyeglasses ($14.45 for the frames and $9.35 per lens, or $18.70 for both lenses). With the Medicaid payment of $33.15, the client may be billed for the balance, which includes the difference between the Medicaid payment for the frames and lenses, plus the $10 charge for the tinted lenses.*

The provider may withhold the noncovered eyewear, contacts, or eyeglasses until the client pays for those items. If the client fails to pay for the noncovered items or has not returned for finished eyewear within a reasonable length of time (two to three months), the provider may return any reusable items to stock. Any payment made by TMHP for frames must be refunded to Medicaid. If a client requests eyewear that is beyond program benefits (for example, combination zylonite and metal frames or high-powered lenses), Medicaid allows reimbursement up to the maximum fee. The provider may charge the client the difference between the Medicaid payment and the customary charge for the eyewear requested, when the client has been shown the complete selection of Medicaid-covered eyewear and when the following conditions are met:

- The client rejects the Medicaid-covered eyewear and wants eyewear that complies with Texas Medicaid Program specifications, but is not included in the selection of Medicaid-covered eyewear.
- The client indicates a willingness to pay the difference between the Medicaid payment and the actual charge. The provider must have the client sign the Vision Care Eyeglass Patient Certification Form and retain it in the provider's records.

Important: *Providers who advertise "two-for-one" eyeglass special promotions without restrictions may not refuse the offer to clients with Medicaid coverage.*

For the purpose of Texas Medicaid, high-powered lenses are defined as those with a sphere greater than 7.00d or a cylinder greater than 4.00d. High-powered lenses are a benefit for clients younger than 21 years of age through THSteps-Comprehensive Care Program (CCP).

Procedure Codes for High-Powered Lenses

Procedure Codes		
V2102	V2105	V2106
V2109	V2110	V2111
V2112	V2113	V2114
V2202	V2205	V2206
V2209	V2210	V2211
V2212	V2213	V2214
V2302	V2305	V2306
V2309	V2310	V2311
V2312	V2313	V2314

The invoice is no longer required to be submitted with the claim but must be maintained in the provider's files. To facilitate claim processing, prior authorization is highly recommended. When submitting for prior authorization, providers are to include a copy of the prescription and manufacturer's suggested retail price. If prior authorization is not obtained, providers are to use the invoice cost as the billed amount and list the prescription on the claim form, indicating the power is greater than plus or minus 7 diopters or the cylinder is greater than plus or minus 4 diopters.

A client who experiences difficulty with daily living activities or employment related to vision may be referred to the Texas Department of Assistive and Rehabilitative Services (DARS). DARS can evaluate the client and may provide resources for assistance, as appropriate.

Modifier RP must be used when billing for replacement lenses. When billing for an adult with diagnosis code 37931, modifier VP must also be billed.

Refer to: The list of offices for the "Department of Assistive and Rehabilitative Services (DARS), Blind Services" on page A-18.

The claim form example, "Vision" on page D-36.
Nonprosthetic Eyeglasses and Contacts

45.4.5 Nonprosthetic Eyeglasses and Contacts

45.4.5.1 Frames

Procedure Code	Maximum Fee	Special Instructions
V2020	$14.45	Single vision eyeglasses (not high powered), procedure code V2020, should be billed with the lens codes on this table.
V2025	$14.45	Single vision eyeglasses (not high powered), with deluxe frames, procedure code V2025, should be billed with the lens codes on the following tables. V2025 must be used for nonprosthetic eyewear that is beyond program benefits.

CPT only copyright 2005 American Medical Association. All rights reserved.

45.4.5.2 Lenses

Providers must use the following codes when dispensing new lenses only (e.g., a client has 0.5 or greater diopter change requiring new lenses only). Providers are to bill a quantity of 2 for a pair of lenses.

Procedure Code	Maximum Fee
V2100	$9.35
V2101	$9.35
V2103	$9.35
V2104	$9.35
V2107	$9.35
V2108	$9.35
V2200	$12.75
V2201	$12.75
V2203	$12.75

9-V2599	VP (aphakic patient)	Does not require prior authorization with a diagnosis of aphakia. Use modifier VP.

45.4.5.5 Contact Lens Services Not Covered

Procedure codes 9-V2503 and 1-92310 are not covered.

45.4.5.6 Major Eyeglass Repairs

Providers billing for major eyeglass repairs should use procedure code V2799. This procedure will be manually priced.

45.4.6 Prosthetic Eyewear

Postsurgical prosthetic lenses are those lenses that replace the function of the eye's organic lens. Replacement may be necessary because of a congenital defect or trauma. However, the most frequent cause is surgical cataract extraction. The lenses can be contact lenses, eyeglasses, or both. The date of cataract surgery is not required on claims for permanent postsurgical prosthetic eyewear. The date of surgery is required to determine the convalescence period for temporary prosthetic eyewear. Contact lenses required as a postsurgical prosthetic may be supplied *without* prior authorization. Claims for temporary lenses are not payable, if dispensed after the four-month convalescence period. Claims for temporary eyewear that do not include the date of surgery are listed on the R&S as a claim in process and must be resubmitted for consideration of payment. Electronic claims of this type will be rejected. A letter with the rejection reason and instructions for resubmission will be mailed to the provider the following business day. Surgery dates on electronic claims must be identified in the appropriate fields of an approved electronic claims format.

The name of the surgeon who performed the cataract surgery is not required on claims for postsurgical prosthetic eyewear.

Medicaid provides as many temporary prosthetic lenses (contacts or eyeglasses) as necessary during the postsurgical convalescence period (up to four months after surgery) and one pair of permanent prosthetic contact lenses, eyeglasses, or both, in a lifetime (exceptions include replacements and new prosthetic eyewear when there is a significant change in visual acuity).

Important: *Contact lenses required as a postsurgical prosthetic may be supplied without prior authorization. Procedure codes for temporary postsurgical prosthetic lenses must be used only during the four-month convalescence period. After the convalescence period, procedure codes for permanent prosthetic eyewear must be used.*

45.4.6.1 Medicare Coverage

Postsurgical prosthetic cataract lenses are also a benefit of Medicare. If the client is eligible for Medicare coverage, the provider must bill Medicare first. Medicaid pays any deductible and/or coinsurance due. The provider must not require the client to pay the deductible and/or coinsurance.

45.4.6.2 Replacements

Regardless of age, coverage is provided for the replacement of lost or destroyed prosthetic eyewear. Providers must use procedure code 9-92326 when billing

CPT only copyright 2005 American Medical Association. All rights reserved.

for contact lenses replacement. For replacement of cataract eyewear frames or lenses, providers must use the permanent cataract eyewear codes.

The client must sign and date the Vision Care Eyeglass Patient Certification Form, and the provider must retain it in the provider's records.

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an intraocular lens (IOL). Medicare considers the IOL the prosthetic device. Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the *Y* codes from the "Nonprosthetic Eyeglasses and Contacts" tables beginning on page 45-20.

45.4.6.3 Significant Diopter Change

Clients are eligible for new prosthetic eyewear when there is a significant change in visual acuity (equal to or greater than 0.5 diopter in one eye). The new prescription must be indicated in Block 24D, line 5, and the old prescription directly below it in Block 24D, line 6 of the CMS-1500 claim form. Prescription information for electronic claims must be in the electronic claims format. Providers must consult their vendor for the location of this field in the providers' electronic format. The procedure codes listed for new eyewear must be used. Reimbursement is $61.37 per lens. Prior authorization is not required.

45.4.7 Prosthetic Eyeglasses and Contacts

Services for prosthetic eyewear must be billed with a diagnosis of aphakia (37391 or 74335) to be considered for reimbursement. Contact lenses require prior authorization unless billed with a diagnosis of aphakia.

Diagnosis Code	Description
37931	Aphakia
74335	Congenital aphakia

45.4.7.1 Contact Lenses

Providers must use the following codes when billing for cataract contact lenses:

Procedure Code	Maximum Fee	Special Instructions
1-92070	$167.81	NA
9-92326	$46.64	NA
9-V2500	$50.67	Does not require prior authorization with a diagnosis of aphakia.
9-V2501	$88.58	Does not require prior authorization with a diagnosis of aphakia.
9-V2502	$120.00	Does not require prior authorization with a diagnosis of aphakia.
9-V2510	$61.50	Does not require prior authorization with a diagnosis of aphakia.
9-V2511	$108.17	Does not require prior authorization with a diagnosis of aphakia.
9-V2512	$152.25	Does not require prior authorization with a diagnosis of aphakia.
9-V2513	$61.50	Does not require prior authorization with a diagnosis of aphakia.
9-V2520	$41.92	Does not require prior authorization with a diagnosis of aphakia.
9-V2521	$77.17	Does not require prior authorization with a diagnosis of aphakia.
9-V2522	$51.92	NA
9-V2523	$145.98	NA

45.4.7.2 Eyeglasses

Providers must use the following procedure codes when billing for cataract eyeglass frames and lenses (whether the lenses are glass or plastic):

Procedure Codes				
V2020	V2025	V2100	V2101	V2102
V2103	V2104	V2105	V2106	V2107
V2108	V2109	V2110	V2111	V2112
V2113	V2114	V2200	V2201	V2202
V2203	V2204	V2205	V2206	V2207
V2208	V2209	V2210	V2211	V2212
V2213	V2214	V2300	V2301	V2302
V2303	V2304	V2305	V2306	V2307
V2308	V2309	V2310	V2311	V2312
V2313	V2314	V2410	V2430	V2700
V2755				

When prescribing bilateral lenses, providers are to use the appropriate code for a unilateral lens and specify a quantity of 2 in Block 24E of the claim form.

B.1 Abortion Certification Statements Form

The signature of the physician must be original script (not stamped or typed). A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes are not acceptable at this time.

"I, (physician's name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client's full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would place her in danger of death unless an abortion is performed."

Signature ____

"I, (physician's name), certify that on the basis of my professional judgment, an abortion procedure for (client's full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities."

Signature ____

"I, (physician's name), certify that on the basis of my professional judgment, an abortion procedure for (client's full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities."

B.4 Authorization to Release Confidential Information (2 Pages)

PATIENT'S NAME ____

I authorize ________________________ and/or ________________________, and/or
(Name of HMO) (Name of BHO)

the following person/agency/group:

____

Provider/Agency/Group Address City State ZIP

To disclose information and records regarding my treatment, medical and/or behavioral health condition to the following professional person/agency, physician and/or facility;

____

Provider/Agency/Group Address City State ZIP

Information to be released or exchanged include (check all that apply):

________ History and physical

________ Discharge and Summary

________ Behavioral Health Treatment Records

________ Laboratory Reports

________ Physical Health Treatment Records

________ Medication Records

________ Information on HIV or communicable disease treatment

________ Other (specify) ____

The authorized purpose(s) for this release are:

________ Diagnosis and Treatment

________ Coordination of Care

________ Insurance Payment Purposes

________ Other (specify) ____

CPT only copyright 2005 American Medical Association. All rights reserved.

I understand that my health and behavioral health records are protected from disclosure under Federal and/or state law. I may revoke this authorization. This authorization is valid until I revoke it or sixty (60) days after I have completed treatment, whichever is sooner. Once I revoke this authorization, no information can be released except as authorized or allowed by law. File copy is considered equivalent to the original.

This authorization was explained to me as I signed it of my own free will on:

The ______________day of ________________, 20____.

_____________________________________ ____

Signature of Client Signature of Witness

____

Signature of Parent, Guardian, or Authorized Representative, if required

NOTICE OF CLIENT'S REFUSAL TO RELEASE INFORMATION:

I have reviewed the above release of information form and refuse to authorize release of health and behavioral health information to mental health and/or alcohol and/or drug abuse treatment providers and/or physical health providers.

Executed this _______________day of _______________________, 20____.

_____________________________________ ____

Signature of Client Signature of Witness

____

Signature of Parent, Guardian, or Authorized Representative, if required

The person signing this authorization is entitled to a copy.

TO PERSON RECEIVING THE CONFIDENTIAL INFORMATION: **PROHIBITION OF REDISCLOSURE**

Federal and state law protects the confidentiality of the information disclosed to you related to the individual's alcohol and drug abuse treatment. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains, or as otherwise permitted by such regulations. Disclosure is limited to the purpose and persons included on the authorization form. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient. State laws may also protect the confidentiality of the client's records.

TO THE INDIVIDUAL FILLING THIS OUT:
You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions). If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method of asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact NorthSTAR. You can write to NorthSTAR at 1199 S. Beltline Rd., Coppell, Texas 75019. You can also call the NorthSTAR Helpline at 1-972-906-2500.

Firma del cliente **Firma del testigo**

____

Firma del padre, tutor o representante autorizado, si es necesario

La persona que firma esta autorización tiene derecho a una copia.

PARA LA PERSONA QUE RECIBE LA INFORMACIÓN CONFIDENCIAL: PROHIBICIÓN SOBRE LA DIVULGACIÓN

Las leyes federales y estatales protegen la confidencialidad de la información que usted recibió sobre el tratamiento del abuso de alcohol y drogas de la persona. Las normas federales (42 CFR Parte 2) le prohiben a usted dar esta información a otra persona a menos que se haya permitido expresamente en un consentimiento escrito de la persona de quien se trata, o de otra manera permitida por dichas normas. La divulgación se limita al propósito y a la persona anotados en el formulario de autorización. Las reglas federales limitan el uso de la información a investigar o enjuiciar penalmente a algún paciente que tiene problemas de abuso de alcohol o drogas. Es posible que las leyes estatales también protejan la confidencialidad de los expedientes del paciente.

PARA LA PERSONA QUE LLENA ESTE FORMULARIO:

Tiene el derecho de hacernos preguntas sobre este formulario. También tiene el derecho de revisar la información que nos da en el formulario. (Hay algunas excepciones). Si la información está incorrecta, puede pedir que la corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Puede encontrarlo en el Título 1 del Código Administrativo de Texas, Secciones 351.17 a 351.23. Para hablar con alguien acerca de esta forma, o para pedir correcciones, haga el favor de comunicarse con NorthSTAR. Puede comunicarse con NorthSTAR escribiendo a 1199 S. Beltline Rd., Coppell, Texas 75019 ó llamando a la Línea de Ayuda de NorthSTAR al 1-972-906-2500.

B.6 Birthing Center Report (Newborn Child or Children) Form 7484

MAIL FORM TO:

Texas Health and Human Services Commission
Data Integrity 952-X
PO BOX 149030
Austin, TX 78714-9030

Date Rec'd in Data Integrity

PURPOSE: This form is to be used by BIRTHING CENTERS ONLY to report the birth of a child of a mother currently eligible under the Medicaid program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future medicaid claims payments. If the child's FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

ACTION: To avoid delay in your receiving notice of the Medicaid client number of the newborn child, please complete this document and submit it to HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child's Medicaid claim.

To avoid delay in processing the child's Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

Mother's Name (Last, First, MI)		Admission Date (mm/dd/yy)	Mother's Medicaid client No.
Mother's Mailing Address–Street		Mother's D.O.B. (mm/dd/yy)	Mother's Medical Record No.

B.7 Child Abuse Reporting Guidelines (2 Pages)

HHSC Child Abuse Screening, Documenting, and Reporting Policy for Medicaid Providers

Each contractor/provider shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of report of child abuse and neglect and the provisions of this HHSC policy. HHSC shall distribute funds only to a contractor/provider who has demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and this HHSC policy. Contractor/provider staff shall respond to disclosures or suspicions of abuse/neglect of minors [by reporting] to appropriate agencies as required by law.

PROCEDURES

I Each contractor/provider shall adopt this policy as its own.

II Each contractor/provider shall report suspected sexual abuse of a child as described in this policy and as required by law.

III. Each contractor/provider shall develop an internal policy and procedures that describe how it will determine, document, and report instances of abuse, sexual or nonsexual, in accordance with the Texas Family Code, Chapter 261.

REPORTING GENERALLY

I Professionals as defined in the law are required to report not later than the 48th hour after the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

II Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child's physical or mental health or welfare has been adversely affected by abuse.

III A report shall be made regardless of whether the contractor/provider staff suspect that a report may have previously been made.

IV Reports of abuse or indecency with a child shall be made to:

- A Texas Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline at 1-800-252-5400, operated 24 hours a day, seven days a week);
- B Any local or state law enforcement agency;
- C The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred; or
- D The agency designated by the court to be responsible for the protection of children.

V The law requires that the following be reported:

- A Name and address of the minor, if known;
- B Name and address of the minor's parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known; and
- C Any other pertinent information concerning the alleged or suspected abuse, if known.

VI Reports can be made anonymously.

VII A contractor/provider may not reveal whether or not the child has been tested or diagnosed with HIV or AIDS.

VIII If the identity of the minor is unknown (e.g., the minor is at the provider's office to anonymously receive testing for HIV or an STD), no report is required.

CPT only copyright 2005 American Medical Association. All rights reserved.

REPORTING SUSPECTED SEXUAL ABUSE

I Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of abuse who is an unmarried minor under 14 years of age and is pregnant or has a confirmed sexually transmitted disease acquired in a manner other than through perinatal transmission.

II The Texas Family Code, Chapter 261, requires other reporting of other instances of sexual abuse. Other types of reportable abuse may include, but are not limited to, the actions described in:

- A Penal Code, §21.11(a) relating to indecency with a child;
- B Penal Code, §21.01(2) defining “sexual contact”;
- C Penal Code, §43.01(1) or (3)-(5) defining various sexual activities; or
- D Penal Code, §22.011(a)(2) relating to sexual assault of a child;
- E Penal Code, §22.021(a)(2) relating to aggravated sexual assault of a child.

III Each contractor/provider may utilize the attached Checklist for HHSC Monitoring for all clients under 14 years of age. The checklist, if used, shall be retained by each contractor/provider and made available during any monitoring conducted by HHSC.

TRAINING

I Each contractor/provider shall develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff shall receive this training as part of their initial training/orientation. Training shall be documented.

II As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

B

CPT only copyright 2005 American Medical Association. All rights reserved.

B.8 Child Abuse Reporting Guidelines, Checklist for HHSC Monitoring

Date: ____

Client's name: ____

Client's age (use this checklist only if the client is under 14): ____

Staff person conducting screening: ____

Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of child abuse who is a minor under 14 years of age who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has confirmed diagnosis of a sexually transmitted disease acquired in a manner other than through perinatal transmission.

Using the criteria above, did you determine that a report of child abuse is required? ______ Yes ______ No

If "yes," please report and complete the information below.

Report was made: ______ Yes ______ No

Staff person who submitted the report (optional): ____

Date reported: ____

Name of agency to which report was made: ____

DFPS call ID# or law enforcement assigned # (optional): ____

Name of person who received report (optional): ____

Phone number of contact (when applicable): ____

Use of the checklist for HHSC monitoring of reporting of abuse of children younger than 14 years of age who are pregnant or have STDs does not relieve contractors or subcontractors of the requirements in Chapter 261, Texas Family Code, to report any other instance of suspected child abuse.

CPT only copyright 2005 American Medical Association. All rights reserved.

B.9 Claim Status Inquiry (CSI) Authorization Form

This form is for ACUTE CARE providers only.

If you are a Long Term Care provider, contact TMHP's EDI Help Desk at 888-863-3638 to request the correct form.

The following information MUST be completed before you can be granted Claim Status Inquiry (CSI) access.

1. Enter your Production User ID: ______________________________

2. Enter your Production User ID Password: ______________________________

*The TMHP **Production User ID** (Submitter ID) is the electronic mailbox ID used for downloading your Claim Status Inquiry reports. For assistance with identifying and using your Production User ID and password, contact your software vendor or clearinghouse.*

THIS FORM HAS BEEN UPDATED.

3. Select Action:
A. ☐ Add Claim Status Inquiry Privileges
R. ☐ Revoke Claim Status Inquiry Privileges

4. Enter organization information:

List the billing Texas Provider Identifier (TPI) number(s) you choose to access using the Production User ID given above. Submit additional copies of this form if you need to add more TPI numbers.

Click on the button above to access the new form.

Provider Name *Must be the name associated with the TPI Base number listed at right.*	**7–Digit BILLING TPI Base Number** *The first 7 digits of the 9 digit TPI number.**

***Note:** *Performing TPI numbers do not have Claim Status Inquiry access. Enter only **BILLING** TPI numbers.*

5. Enter Requestor Information:

Name: ______________________________

Title: ______________________________

Signature: ______________________________

Telephone Number: ______________________________ ext.

Fax Number: ______________________________ ext.

6. Return this form to:

FOR THE CLIENT: About your Medicaid ID Form

This is your MEDICAID IDENTIFICATION form. When you get any health care services, you must have this form with you if you want Medicaid to pay for your serivces.

WHAT IF YOU GET A BILL? If you get a bill from a doctor, hospital, or other health care provider, ask the provider why they are billing you. If you still get a bill, call 1-800-335-8957 for help.

WHAT IF THE SERVICES REQUESTED FOR YOU ARE DENIED? You will receive a letter telling you the request was denied and that you have the right to ask for a fair hearing. You may ask for a hearing in writing or by calling. The address and telephone number will be listed on the letter that you get.

CAUTION: If you accept Medicaid benefits (services or supplies), the state of Texas has the right to receive payment for those services or supplies from other insurance companies and other liable sources, up to the amount needed to cover what Medicaid spent.

FOR QUESTIONS REGARDING MEDICAID ELIGIBILITY, ID FORMS, AND ADDRESS CHANGES: Please contact the Texas Health and Human Services Commission (HHSC) office in your area. The telephone numbers and addresses are listed in your local telephone book.

For Questions About Other Medicaid Programs, You May Call the Following Toll-Free Numbers:

1-800-252-8263 **BENEFITS/POLICY—To find out what Medicaid pays for, or to find a provider.**

1-800-335-8957 **MEDICAID BILLING PROBLEMS—Any medical bills you may receive.**

1-877-847-8377 **TEXAS HEALTH STEPS—Care for clients up to age 21 including medical and dental checkups.**

1-877-633-8747 **MEDICAL TRANSPORTATION—For help with rides when you have no other way to get to and from the doctor, dentist, or drug store at no cost to you.**

1-866-566-8989 **STARLINK—Problems with the Managed Care STAR Program.**

1-800-335-8957 **MEDICALLY NEEDY PROGRAM (MNP)—About your spend down case.**

1-800-458-9858 **LONG TERM CARE (LTC)—Nursing Home Care.**

1-877-511-8858 **THIRD PARTY RESOURCES (TPR)—If you have other insurance.**

1-800-436-6184 **FRAUD – Medicaid, Food Stamps, and TANF.**

1-800-440-0493 **HEALTH INSURANCE PREMIUM PAYMENT SYSTEM (HIPP)—For help with private health insurance premiums.**

1-800-772-1213 **SOCIAL SECURITY ADMINISTRATION (SSA)—To report an address change if you are an SSI client.**

PARA EL CLIENTE: información sobre la forma de identificación de Medicaid

Ésta es su forma de IDENTIFICACIÓN DE MEDICAID. Cuando obtenga cualquier servicio de atención médica, tiene que presentar esta forma si quiere Medicaid pague los servicios que reciba.

¿QUÉ PASA SI RECIBE UNA CUENTA? Si recibe una cuenta de un doctor, un hospital u otro proveedor de atención médica, pregúntele al proveedor por qué le está cobrando. Si de todos modos recibe una cuenta, llame al 1-800-335-8957 para pedir ayuda.

¿QUÉ PASA SI LOS SERVICIOS SOLICITADOS PARA USTED SE NIEGAN? Usted recibirá una carta en la que se le informa que la solicitud fue negada y que tiene el derecho de pedir una audiencia imparcial. Puede pedir una audiencia por escrito o por teléfono. La dirección y el número de teléfono aparecerán el la carta que reciba.

AVERTENCIA. Si usted acepta los beneficios (servicios o artículos), de Medicaid, el estado de Texas tiene el derecho de recibir el pago de esos servicios o artículos de parte de otras compañías de seguro y otras fuentes responsables, hasta la suma necesaria para cubrir la cantidad que gastó Medicaid.

SI TIENE PREGUNTAS SOBRE LA ELEGIBILDAD PARA MEDICAID, LA FORMA DE IDENTIFICACIÓN O CAMBIOS DE DIRECCIÓN: Por favor, comuníquese con la ofician de la Comisión de Salud y Servicios Humanos de Texas (HHSC) de su región. El número de teléfono y la dirección se encuentran en el directorio telefónico de su comunidad.

Si tiene preguntas sobre otros programas de Medicaid, puede llamar gratis a los siguientes números de teléfono:

1-800-252-8263 BENEFICIOS Y NORMAS: para saber qué paga Medicaid o para encontrar a un proveedor.

1-800-335-8957 PROBLEMAS DE CUENTAS DE MEDICAID: para tratar cualquier cuenta médica que reciba.

1-877-847-8377 PASOS SANOS DE TEXAS: para saber sobre los servicios para clientes menores de 21 años, incluso los chequeos médicos y dentales.

1-877-633-8747 PROGRAMA DE TRANSPORTACIÓN MÉDICA: para conseguir ayuda de transporte gratis cuando no tiene ninguna otra manera de ir y venir al doctor, dentista o farmacia.

1-866-566-8989 STARLINK: para tratar problemas relactionados con el Program STAR de atención médica administrada.

1-800-335-8957 PROGRAMA DE SERVICIOS POR NECESIDAD MÉDICA (MNP): para hablar de su caso de cuota prescrita.

1-800-458-9858 ATENCIÓN A LARGO PLAZO (LTC): para hablar de los servicios de una casa para convalecientes.

1-877-511-8858 RECURSOS DE UN TERCERO (TPR): si tiene otro seguro.

1-800-436-6184 FRAUDE: para tratar casos de Medicaid, estampillas para comida, y TANF.

1-800-440-0493 SISTEMA DEL PAGO DE LA PRIMA DEL SEGURO MÉDICO (HIPP): para conseguir ayuda con las primas del seguro médico comercial.

1-800-772-1213 ADMINISTRACIÓN DE SEGURO SOCIAL (SSA): para informar de un cambio de dirección si es cliente de SSI.

ANYONE LISTED BELOW CAN GET MEDICAID SERVICES

You now receive your Medicaid medical care through Primary Care Case Management (PCCM). Your primary care provider (PCP) is listed below. If you want to pick a different PCP, call toll-free 1-888-302-6688.

Your PCP is your first stop for getting medical care. When you are sick or injured, your PCP will help you. Your PCP can also assist with THSteps checkups for children and teenagers, prenatal and well woman care. For more information, read your handbook, Primary Care Provider and Hospital List, or call PCCM toll-free at 1-888-302-6688.

READ BACK OF THIS FORM!

TODA PERSONA NOMBRADA A CONTINUACIÓN PUEDE RECIBIR SERVICIOS DE MEDICAID

Usted ahora recibe la atención médica de Medicaid por medio de Primary Care Case Management (PCCM). El nombre de su Proveedor de Cuidado Primario (PCP) aparece a continuación. Si quiere escoger a otro PCP, llame gratis al 1-888-302-6688.

Su PCP es el primer lugar al que debe ir para recibir atención médica. Cuando esté enfermo o lesionado, su PCP le ayudará. También le puede ayudar con los chequeos de Pasos Sanos de Texas para niños y jóvenes, con la atención prenatal y los chequeos preventivos para la mujer. Para más información, lea el manual titulado Lista de Proveedores de Cuidado Primario y Hospitales, o llame gratis a PCCM al 1-888-302-6688.

B.13 Donor Human Milk Request Form

Donor Human Milk Request Form
(Must be Reordered Every 180 Days)

Client Name: | Client Medicaid Number:

Date of birth: | Client's weight:

Parts A and B must be completed and copies retained in both the physician's and the milk bank's records. These forms and clinical records are subject to retrospective review.

THIS FORM HAS BEEN UPDATED.

Part A

The physician must keep up-to-date documentation of medical necessity *and* the signed written consent form in the child's clinical record to be considered for Medicaid reimbursement.

Click on the button above to access the new form.

The medical necessity for breast milk* is:

Child's diagnosis:

Date of last feeding trial:

Reason donor milk is the only appropriate source of human milk for this client:

(* This information *must* be substantiated by written documentation in the clinical record of why the particular infant cannot survive and gain weight on any appropriate formula, such as an elemental formula or enteral nutritional product, other than donor human breast milk, and that a clinical feeding trial has occurred every 180 days.)

The parent/guardian has signed and dated an informed consent that the risks and benefits of using banked donor human milk have been discussed with them.

Dates of service requested: From: | To: | Quantity Requested:

Physician's Signature ____________ Date ____________

Physician Name ____________ Physician License Number ____________

Physician's Fax Number ____________ Physician's TPI ____________

Part B

The particular donor human milk bank adheres to quality guidelines consistent with the Human Milk Banking Association of North America, or other standards established by HHSC. Yes ❑No ❑

Dates of service provided: From: | To: | Quantity Provided:

Milk Bank Name ____________ Milk Bank TPI ____________

Milk Bank Representative Signature ____________ Date ____________

Milk Bank Representative's Name ____________ Milk Bank Fax Number ____________

CPT only copyright 2005 American Medical Association. All rights reserved.

B.14 Electronic Funds Transfer (EFT) Information

Electronic Funds Transfer (EFT) is a payment method to deposit funds for claims approved for payment directly into a provider's bank account. These funds can be credited to either checking or savings accounts, provided the bank selected accepts Automated Clearinghouse (ACH) transactions. EFT also avoids the risks associated with mailing and handling paper checks, ***ensuring funds are directly deposited into a specified account.***

The following items are specific to EFT:

Pre–notification to your bank takes place on the cycle following the application processing.

Future deposits are received electronically after pre–notification.

The Remittance and Status (R&S) report furnishes the details of individual credits made to the provider's account during the weekly cycle.

Specific deposits and associated R&S reports are cross–referenced by both Texas Provider Identifier (TPI) and R&S number.

EFT funds are released by TMHP to depository financial institutions each Friday.

The availability of R&S reports is unaffected by EFT and they continue to arrive in the same manner and time frame as currently received.

TMHP must provide the following notification according to ACH guidelines:

Most receiving depository financial institutions receive credit entries on the day before the effective date, and these funds are routinely made available to their depositors as of the opening of business on the effective date. Please contact your financial institution regarding posting time if funds are not available on the release date.

However, due to geographic factors, some receiving depository financial institutions do not receive their credit entries until the morning of the effective day and the internal records of these financial institutions will not be updated. As a result, tellers, bookkeepers, or automated teller machines (ATMs) may not be aware of the deposit and the customer's withdrawal request may be refused. When this occurs, the customer or company should discuss the situation with the ACH coordinator of their institution who, in turn should work out the best way to serve their customer's needs.

In all cases, credits received should be posted to the customer's account on the effective date and thus be made available to cover checks or debits that are presented for payment on the effective date.

To enroll in the EFT program, complete the attached Electronic Funds Transfer Authorization Agreement. ***You must return a voided check or deposit slip with the agreement to the TMHP address indicated on the form.***

Call the TMHP Contact Center at 1–800–925–9126 for assistance.

B.17 Federally Qualified Health Center Report (Newborn Child or Children) Form 7484

Texas Health and Human Services Commission
Data Integrity 952-X
PO Box 149030
Austin, TX 78714-9030

Date Rec'd in Data Integrity

PURPOSE: This form is to be used by FEDERALLY QUALIFIED HEALTH CENTERS ONLY to report the birth of a child of a mother currently eligible under the Medicaid program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future medicaid claims payments. If the child's FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

ACTION: To avoid delay in your receiving notice of the Medicaid client number of the newborn child, please complete this document and submit it to the HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child's Medicaid claim.

To avoid delay in processing the child's Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

B.20 HHSC Physician Attestation Statement Requirements

The following information must be included on the attestation statement for a hospital's request for an oral appeal to be considered:

- Provider name and Texas Provider Identifier (TPI)
- Client's name, date of birth, sex, and Medicaid number
- Date of admission and discharge
- Discharge status
- Principal diagnosis[1], secondary diagnoses[2], and the principal procedures (with proper sequencing and diagnostic and procedure codes)[3]
- Statement: "I certify that the narrative descriptions of the principal and secondary diagnoses and the major procedures performed are accurate and complete to the best of my knowledge."
- Attending physician's dated signature (immediately below the statement). In lieu of the attending physician, the statement may be signed by another physician involved in the patient's care.

Note: *The attending physician's signature, along with the other information required above, may be provided by electronic means through a hospital data system provided that HHSC is given sufficient evidence that this system meets appropriate legal requirements.*

---

1. The *principal diagnosis* is the diagnosis (condition) established after study to be chiefly responsible for occasioning the admission of the patient to the hospital for care.
2. The secondary diagnoses are conditions that affect the patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, increased nursing care, or monitoring, or, in the case of a newborn, clinically significant implications for future health care needs as deemed by a physician.
3. Normal newborn conditions or routine procedures are not considered.

B.21 Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions (2 Pages)

General Instructions

This form must be completed and signed as outlined in the instructions below before DME/medical supplies providers contact TMHP Home Health Services for prior authorization.

Either the DME supplier/Medicaid provider or the prescribing physician may initiate the form. This completed form must be retained in the records of both the DME supplier/medical provider and the prescribing physician, and is subject to retrospective review. This form becomes a prescription when the physician has signed section B. **This form cannot be accepted beyond 90 days from the date of the prescribing physician's signature.**

THIS FORM HAS BEEN UPDATED.

Click on the button above to access the new form.

The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer's suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

All fields must be filled out completely. The prescribing physician's TPI is **only** required if the Physician is a Texas Medicaid provider.

Section A: Requested Durable Medical Equipment and Supplies

The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer's suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

Requested Durable Medical Equipment and Supplies

Section B: Diagnosis and Medical Information

Section B is a prescription for DME/supplies and must be filled out by the prescribing physician. The prescribing physician must indicate the ICD-9 code with a brief description, corresponding to the item number requested from Section A and complete justification for determination of medical necessity for the requested item(s). If applicable, include height/weight, wound stage/dimensions and functional/mobility. **The date last seen must be within the past 12 months.** The prescribing physician must indicate the duration of need for the prescribed supplies/DME. The estimated duration of need should specify the amount of time the supplies/DME will be needed, such as six weeks, three months, lifetime, etc. The prescribing physician's TPI (if a Medicaid provider) and license number must be indicated. **Signatures from Nurse Practioner's, Physician Assistants, and Chiropractors will not be accepted. Signature stamps and date stamps are not acceptable.**

Diagnosis and Medical Need Information

ICD-9	Requested Section A No.[2]	Complete justification for determination of medical necessity for requested item(s). Refer to Section A: Requested Durable Medical Equipment and Supplies[1,2]
438	1,2	Unable to get in and out of the tub or shower
27801	2	Need swing-away arms and legs for transfer secondary to hemiparesis and need oversize chair for clients weighing 400 lbs.
3		
4		
5		

1. Refer to Footnote 1 of the *Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.*
2. Refer to Footnote 2 of the *Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.*

Examples of Supplies

ICD-9	Requested Section A No.[2]	Complete justification for determination of medical necessity for requested item(s). Refer to Section A: Requested Durable Medical Equipment and Supplies[1,2]
25001	3,4,5	Test TID

1. Refer to Footnote 1 of the *Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.*
2. Refer to Footnote 2 of the *Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.*

Physicians must indicate their professional license number. If the prescribing physician is out of state, the physician must provide the license number and state of professional licensure. Texas Medicaid P0 TPIs, ZO group TPIs, and UPIN numbers are not acceptable as licensure.

The *Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form* must be used when prescribing more than 5 items. The *Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form* must accompany the H*ome Health Services (Title XIX) DME/Medical Supplies Physician Order Form*. **Addendums received without this form will not be accepted.**

Reminder: Home health services are not a benefit for clients residing in a nursing facility, hospital, or intermediate care facility.

Note for DME: The DME company must also complete the DME Certification & Receipt Form. All equipment is to be assembled, installed, and used pursuant to the manufacturer's instructions and warning.

B.24 Home Health Services Plan of Care (POC) Instructions

THIS FORM HAS BEEN UPDATED.

Click on the button above to access the new form.

Client Name:	Last, First, MI
Medicaid No:	Nine-digit number from client's current Medicaid identification card.
DOB:	Date of Birth-month, day and year.
Date Last Seen By Doctor:	Client must be seen by a physician within 30 days of the initial start of care and at least once every 6 months thereafter unless a diagnosis has been established by the physician and the client is currently undergoing physician care and treatment.
Provider Name:	Name of home health agency.
TPI	Nine-character Texas Provider Identifier of agency whose suffix is for DMEH services.
Agency Phone No:	Area code and telephone number of agency.
Physician's Name/ Phone No/License No:	Name, area code/telephone number, and license # of client's physician who is ordering home health services.
Status:	Indicate with a check mark if POC is for a new client, extension (services need to be extended for an [illegible]
Original SOC date:	First date of service in this 365 day benefit period.
Revised Request Effective Date:	Date revised services, supplies or DME became effective.
Services Client Receives From Other Agencies:	List other community or state agency services client receives in the home. Examples: primary home care (PHC), community based alternative (CBA), etc.
Diagnosis:	Diagnosis related to ordered home health services. For reimbursement, diagnoses must match those listed on the claim and be appropriate for the services ordered. (Include ICD-9 code if PT ordered)
Functional Limitations/ Permitted Activities:	Include on revised request only if pertinent
Prescribed Meds:	List medications, dosages, routes, and frequencies (Include on revised request if applicable)
Diet Ordered:	Examples: Regular, 1200 cal. ADA, pureed, NG tube feedings, etc. (Include on revised request if applicable)
Mental Status:	Examples: Alert and oriented, confused, slow to learn etc. (Include on revised request if applicable)
Prognosis:	Examples: Good, fair, poor, etc. (Include on revised request if applicable)
Rehab Potential:	Potential for progress – Examples: Good, fair, poor etc. (Include on revised request if applicable)
Safety Precautions:	Examples: O2 safety, seizure precautions, etc. (Include on revised request if applicable)
Medical Necessity, Clinical Condition, Treatment Plan:	Describe medical reason for all services ordered, nursing observations pertinent to the plan of care, and the proposed plan of treatment. For PT, list specific modalities and treatments to be used.
SNV/HHA/PT/OT Visits Requested:	State the number of visits requested for each type of service authorized.
Supplies:	List all supplies authorized.
DME:	List each piece of DME authorized, check whether DME is owned or if DME is to be repaired, purchased or rented and for what length of time the equipment will be needed.
RN:	The signature/date form was completed by the RN who completed this form.
From/To Dates:	Dates (up to 60 days) of authorization period for ordered home health services.
Conflict of Interest Statement	Relevant to the physician signing this form; physician should check box if exception applies.
Physician Signature/ Printed Name/Date Signed/License Number:	Signature/date form signed by physician ordering home health services, physician printed name, and license number.

CPT only copyright 2005 American Medical Association. All rights reserved.

B.27 Hospital Report (Newborn Child or Children) HHSC Form 7484

Texas Health and Human Services Commission
Data Integrity 952-X
PO BOX 149030
Austin TX 78714-9030

Date Rec'd in Integrity Control

PURPOSE: This form is to be used by HOSPITALS ONLY to report the birth of a child of a mother currently eligible under the Texas Medicaid Program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future Medicaid claims payments. If the child's FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

ACTION: To avoid delay in your receiving notice of the Medicaid Recipient number of the newborn child, please complete this document and submit it to HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child's Medicaid claim.

To avoid delay in processing the child's Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

Mother's Name (Last, First, MI)		Admission Date (mm/dd/yy)	Mother's Medicaid Recipient No.
Mother's Mailing Address – Street		Mother's D.O.B. (mm/dd/yy)	Mother's Medical Record No.

B.31 Medicaid Certificate of Medical Necessity for Chest Physiotherapy Devices (High-Frequency Chest Wall Compression System [HFCWCS]; Intrapulmonary Percussive Ventilation Device [IPV]; Cough-Stimulating Device [Cofflator]) - Initial Request

Section A: To be completed by the physician or physician staff

Client name ______________________	Physician name ______________________
Client Medicaid number ______________________	Physician provider number ______________________
Client primary diagnosis ______________________	Physician medical license number ______________________ State __________
Client respiratory diagnosis ______________________	Physician telephone number ______________________
	Physician fax number ______________________

THIS FORM HAS BEEN UPDATED.
Click on the button above to access the new form.

Section B: To be completed by the physician

Device requested: HFCWCS (ThAIRapy) IPV Cofflator (circle)

- ❑ Client had respiratory illness or complications in the past 6 months (provide additional information in narrative section, i.e., nebs for respiratory secretions, I.V. antibiotics, hospitalizations). Yes _____ No _____
- ❑ Client or family unable to do chest physiotherapy (provide medical reasons in narrative section). Yes _____ No _____
- ❑ Client has tried other modes of chest physiotherapy, including the use of electrical percussor therapy or flutter valve for a minimum of four months prior to the request and that the therapy has been ineffective (provide information on other therapies and why they are ineffective in narrative section). Yes _____ No _____
- ❑ Device use has not resulted in, nor exacerbated any gastrointestinal, manifestations, aspiration, pulmonary manifestation, nor seizure activity. Yes _____ No _____
- ❑ Client had pulmonary function studies in last 6 months, if applicable (provide results in narrative section). Yes _____ No _____
- ❑ Client has frequently missed work, school or extracurricular activities in the last 6 months due to respiratory illnesses and ineffective chest physiotherapy (provide medical reasons in narrative section). Yes _____ No _____

Clients can have only one chest physiotherapy device at a time. The HFCWCS is available for purchase after the initial rental period with additional documentation. Use of these devices may affect the number of private duty nursing hours for chest physiotherapy the client is receiving through the Comprehensive Care Program (CCP). Refer to the complete policy in the Texas Medicaid (Title XIX) Home Health Services section of the *Texas Medicaid Provider Procedures Manual*.

Section C: The physician prescribing a chest physiotherapy device must complete the narrative information regarding the medical necessity as requested above, or attach a letter with this information.

Narrative note for medical necessity (write legibly):

B.35 Nursing Addendum to Plan of Care (THSteps-CCP) (3 Pages)

Client's Name: Medicaid #: Date:

In accordance with the PDN adopted rules (Chapter 33 Early and Periodic Screening, Diagnosis and Treatment, Subchapter K. Private Duty Nursing) published in the Texas Register, December 25, 1998 (23TexReg 13077), the following criteria must be met for the authorization of PDN Services. Caregivers and alternate caregivers must also be identified for authorization to proceed.

- ❑ The client has an identified primary caregiver who provides some of the client's daily care:

  (Caregiver) Name Relationship Phone #

- ❑ The client has a designated alternate caregiver or a plan if the primary caregiver is unable to provide care:

  (Alternate) Name Relationship Phone #

- ❑ The client has a primary physician who provides ongoing health care and medical supervision.
- ❑ The place(s) where PDN services will be delivered support the health and safety of the client.
- ❑ If applicable, there are necessary backup utilities, communication, fire and safety systems available and functional.

THIS FORM HAS BEEN UPDATED.

Click on the button above to access the new form.

DOCUMENTATION REQUIREMENTS: (1) All components of the addendum must be complete and submitted with the (2) physician's plan of care (POC) and (3) THSteps-CCP Prior authorization request to the Texas Medicaid & Healthcare Partnership (TMHP) before PDN services can be authorized. All documents must be complete and received by TMHP before review or authorization. *[Additional information may be attached.]*

1) **Nursing care plan summary:** PDN services are based on a nursing assessment and nursing care plan established by the nurse provider in collaboration with the physician, client, and family. The nursing care plan provides a systematic way to document care given, client responses to interventions, and progress toward the goals of care.

Problem List	Goals of Care	Specific Measurable Outcomes	Progress toward Goals

Additional Comments:

Client's Name:________________________ Medicaid #:______________ Date: ____________

B

CPT only copyright 2005 American Medical Association. All rights reserved.

2) Summary of recent health history for initial authorization OR 90 day summary for extension of PDN services:

Include recent hospitalizations, emergency room visits, surgery (may submit a discharge summary), illnesses, changes in condition, changes in medication or treatment, family/caregiver update, other pertinent observations.

3) Rationale for PDN hours to either increase, decrease, or stay the same. Also address plans to decrease PDN hours:

Client's Name:_______________________________Medicaid #:___________________Date: ________________

CPT only copyright 2005 American Medical Association. All rights reserved.

4) Schedule of services, including PDN and family/caregiver coverage and coverage from other resources:

(Codes: N=PDN hours, P=family/caregiver hours, S=School/Daycare, O=other in-home resource(s), specify name below)

List other in-home resources:____

5) Acknowledgement (must be signed by the primary caregiver and the nurse provider):

By signing this form, the primary caregiver and the nurse provider acknowledge:

- Discussion and receipt of information about the THSteps-CCP Private Duty Nursing service,
- PDN services may increase, decrease, stay the same, or be terminated based on a client's need for skilled care,
- PDN is not authorized for respite, child care, activities of daily living, or housekeeping,
- All required criteria from the first page of this addendum are met, and completed documentation is submitted to TMHP,
- Participation in the development of the Nursing Care Plan for this client, and
- Emergency plans are part of the client's care plan and include telephone numbers for the client's physician, ambulance, hospital, and equipment supplier and information on how to handle emergency situations.

The primary caregiver agrees to follow through with the Plan of Care as prescribed by the client's physician.
The primary caregiver agrees to learn all the skills necessary to provide care for the child in the absence of a private duty nurse.

The number of PDN hours requested is ______hrs/day OR _____hrs/week for the dates of service from ________________ to __________________.

B.37 Primary Care Case Management (PCCM) Behavioral Health Consent Form

DIRECTIONS: This is an authorization for the release of information to your primary care provider.

PLEASE FILL OUT THE INFORMATION BELOW:

I, ____

Name   Address

______________________________________ ( ) ______________________________

City, State   Phone

authorize: ____

Provider Name

to disclose to: ____

Provider Name   Address

______________________________________ ( ) ______________________________

City, State   Phone

from (date) ______________________ to (date) ______________________ the following information:

Please indicate what, if any, information you would like to release.

- ☐ Total Medical Records to be released to primary care provider
- ☐ Medication Information **Only** to be released to primary care provider
- ☐ Medical Records to health plan

I understand that my records are protected under Federal (42 CFR Part 2) and/or State Confidentiality Regulations. This authorization may be withdrawn at any time in writing except to the extent that the program or person which is to make this disclosure has acted in reliance on it. Upon revocation of authorization, further release of information shall cease immediately. File copy is considered equivalent to the original. This release of information expires in thirty (30) days or sixty (60) days following completion or termination of treatment, whichever is later.

I further acknowledge that the information to be released was fully explained to me and this consent is given of my own free will.

EXECUTED THIS ____________ DAY OF ____________

______________________________   ______________________________

(Witness)   (Patient)

____

(Parent, Guardian, or Authorized Representative, if required)

The person signing this authorization is entitled to a copy.

TO THE INDIVIDUAL FILLING THIS OUT:

You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions). If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method for asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact the Texas Medicaid & Healthcare Partnership (TMHP). You can write to the Texas Medicaid & Healthcare Partnership (TMHP), Attention: State Action Request Support Manager, MC-C04, P.O. Box 204270, Austin, TX 78720-4270. You can also call the Texas Medicaid & Healthcare Partnership PCCM Client Helpline at 1-888-302-6688.

TO THE RECIPIENT OF CONFIDENTIAL INFORMATION, PROHIBITION ON DISCLOSURE:

If the information disclosed to you is related to substance abuse treatment, these records' confidentiality is protected by Federal Law. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of it without the specific written consent of the person to whom it pertains, or as otherwise permitted by such regulations. A general authorization for the release of medical or other information is not sufficient to release substance abuse records. The Federal Rules restrict any use of the information to criminally investigate or prosecute any substance abuse patient. State laws may also protect the confidentiality of patient's records.

autorizo a: ______________________________________
Nombre del proveedor

para que le dé a: ________________________________
Nombre del proveedor Dirección

______________________ ( )____________________
Ciudad, Estado Teléfono

la siguiente información de (fecha) ____________ a (fecha) ______________________________ :

Por favor, indique qué información quiere divulgar, si es que quiere divulgar alguna.

- ☐ Todos los expedientes médicos se pueden divulgar al Proveedor de Cuidado Primario
- ☐ **Sólo** la información sobre medicamentos se puede divulgar al Proveedor de Cuidado Primario
- ☐ Los expedientes médicos se pueden divulgar al plan de salud

Entiendo que mis expedientes están protegidos bajo Normas de Confidencialidad Estatales y Federales (42 CFR Parte 2). Esta autorización puede revocarse por escrito en cualquier momento, excepto en el caso en que el programa o la persona que hará la divulgación haya dependido de ella para tomar una acción. Al revocar la autorización, la divulgación adicional de información se detendrá inmediatamente. Las copias de archivo se consideran equivalentes al original. Esta autorización para divulgar información se vence en treinta (30) o sesenta (60) días después de que se termine o se suspenda el tratamiento, el que se llegue después.

También reconozco que se me explicó detalladamente la información que se divulgará y que doy este consentimiento por mi propia voluntad.

FIRMADO ESTE DÍA ______ DE __________________

______________________________ ______________________________
(Testigo) (Paciente)

____
(Padre, Tutor o Representante Autorizado, si se exige)

La persona que firma esta autorización tiene derecho a una copia.

PARA LA PERSONA QUE LLENA ESTE FORMULARIO:
Tiene el derecho de hacernos preguntas sobre este formulario. También tiene el derecho de revisar la información que nos da en el formulario. (Hay algunas excepciones). Si la información está incorrecta, puede pedir que la corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Puede encontrarlo en el Título 1 del Código Administrativo de Texas, Secciones 351.17 a 351.23. Para hablar con alguien acerca de esta forma, o para pedir correcciones, haga el favor de comunicarse con Texas Medicaid & Healthcare Partnership (TMHP). Puede comunicarse con el personal de Texas Medicaid & Healthcare Partnership (TMHP), Attention: State Action Request Support Manager, MC-C04, P.O. Box 204270, Austin, TX 78720-4270. También puede llamar a la Línea de Ayuda al Cliente de PCCM, 1-888-302-6688.

PARA LA PERSONA QUE RECIBE LA INFORMACIÓN CONFIDENCIAL: PROHIBICIÓN SOBRE LA DIVULGACIÓN
Si la información que usted ha recibido tiene que ver con el tratamiento para el abuso de sustancias, la ley federal protege la confidencialidad de estos expedientes. Las normas federales (42 CFR Parte 2) le prohiben a usted hacer cualquier otra divulgación de estos expedientes sin el consentimiento escrito específico de la persona de quien se tratan, o de otra manera permitida por dichas normas. Una autorización general para la divulgación de información médica o de otro tipo no es suficiente para divulgar expedientes relacionados con el abuso de sustancias. Las reglas federales limitan el uso de la información a investigar o enjuiciar penalmente a algún paciente de abuso de sustancias. Es posible que las leyes estatales también protejan la confidencialidad de los expedientes del paciente.

B.44 Physician's Medical Necessity Certification for Nonemergency Ambulance Transports (Texas Medicaid Program)

Request Date: _________/_________/ _________	Transport Date: _________/_________/ _________
Patient's Name:	Medicaid Number:
Transported From:	Transported To:
Physician's Printed Name:	Physician License #:

In order for ambulance services to be covered, they must be medically necessary and reasonable. Medical necessity is established when the patient's condition is clinically considered severely disabled and as such that transportation by any other means (including services provided through the Medicaid Medical Transportation Program or through that which is included in the rate for Long Term Care - Nursing Facilities) is contraindicated. A round-trip transport from the client's home to a scheduled medical appointment (e.g., an outpatient or freestanding dialysis or radiation facility) is covered when the client meets the definition of severely disabled.

THIS FORM HAS BEEN UPDATED.

The [illegible]HSC Medicaid Program has defined "severely disabled" as that client's physical condition [illegible] mobility and requires the client to be bed-confined at all times, unable to sit unassisted at all times, or requires continuous life-support systems (including oxygen or IV infusion).

Please complete the questions below in order for the authorization to be evaluated under Medicaid coverage criteria.

Click on the button above to access the new form.

1.) Is the patient severely disabled as defined by the above definition? ❑Yes ❑No
2.) If no, this client does not qualify for nonemergency ambulance transport.
3.) If yes, please check the appropriate medical condition listed below.

This patient:

- ❑ Requires continuous oxygen and monitoring by trained staff
- ❑ Requires airway monitoring or suction
- ❑ Requires restraints or sedation **(MUST BE EXPLAINED IN OTHER)**
- ❑ Comatose and requires trained monitoring
- ❑ Is actively seizure-prone and requires trained monitoring
- ❑ Had to remain immobile because of a fracture/possibility of a fracture that had not been set
- ❑ Patient is ventilator-dependent
- ❑ Contractures **(MUST BE EXPLAINED IN OTHER)**
- ❑ Has advanced decubitus ulcers and requires wound precautions **(MUST BE EXPLAINED IN OTHER)**
- ❑ Requires isolation precautions (VRE, MRSA, etc.) **(MUST BE EXPLAINED IN OTHER)**
- ❑ Patient requires continuous IV therapy
- ❑ Requires cardiac monitoring
- ❑ Is exhibiting signs of a decreased level of consciousness **(MUST BE EXPLAINED IN OTHER)**
- ❑ Total hip replacement requires hip precautions and cannot sit safely **(MUST BE EXPLAINED IN OTHER)**
- ❑ **Other** (explain)

I CERTIFY THAT THE INFORMATION CONTAINED HEREIN IS, TO THE BEST OF MY KNOWLEDGE, COMPLETE AND ACCURATE AND SUPPORTED IN THE MEDICAL RECORD OF THE PATIENT. THE INFORMATION BEING UTILIZED ON THIS FORM IS BEING GATHERED TO ASSIST IN SEEKING REIMBURSEMENT FOR A NONEMERGENCY AMBULANCE TRANSPORT FROM THE MEDICAID PROGRAM. I UNDERSTAND THAT ANY INTENTIONAL MISREPRESENTATION OR FALSIFICATION OF ESSENTIAL INFORMATION, WHICH LEADS TO INAPPROPRIATE PAYMENTS, ARE SUBJECT TO INVESTIGATIONS UNDER APPLICABLE FEDERAL AND STATE LAWS. * **THIS AUTHORIZATION WILL BE VALID FOR 180 DAYS FROM THE DATE OF ISSUANCE AND WILL CERTIFY THAT THE PATIENT REMAINS SEVERELY DISABLED FOR THAT PERIOD OF TIME.**

B.46 Provider Information Change Form Instructions

Signatures:

- The provider's signature is required on the Provider Information Change Form for any and all changes requested for individual provider numbers.
- A signature by the authorized representative of a group or facility is acceptable for requested changes to group or facility provider numbers.

Address:

- Performing providers (physicians performing services within a group) may *not* change accounting information.
- For Traditional Medicaid, changes to the accounting or mailing address require a copy of the W-9 form.
- For Traditional Medicaid, a change in ZIP code requires copy of the Medicare letter.

THIS FORM HAS BEEN UPDATED.

Tax Identification Number (TIN):

- TIN changes for individual practitioner provider numbers can only be made by the individual to whom the number is assigned.
- Performing providers *cannot* change the TIN.

Click on the button above to access the new form.

General:

- Forms will be returned unprocessed if the nine-digit provider number is not indicated on the Provider Information Change Form.
- The W-9 form is required for *all* name and TIN changes.
- Mail or fax the completed form to:

  Texas Medicaid & Healthcare Partnership (TMHP)
  Provider Enrollment
  PO Box 200795
  Austin, TX 78720-0795

  Fax: 1-512-514-4214

B.55 Sample Letter - XUB Computer Billing Service Inc.

XUB Computer Billing Service, Inc.
4040 Main Street
Anytown, USA 11111

Dear Sir:

This letter authorizes the XUB Computer Billing Service, Inc. to use my signature and to attest on my behalf to the requirements authorized in the following paragraphs, when submitting Medicaid claims on my behalf.

This is also to certify that information appearing on billings submitted by me for the Texas Medical Assistance Program is and will be true, accurate, and complete. I understand that payment of any Texas Medical Assistance Program claim will be from federal and state funds and that any falsification or concealment of a material fact may be prosecuted under federal and state laws. These certifications are made in accordance with requirements found at 42 Code Federal Regulations 455.18 and 455.19.

I also certify that the items billed to the Texas Medical Assistance Program are and will be for services that have been and will be personally provided by me or under my personal direction, and in cases of physician services, the services, supplies, or other items billed have been and will be medically necessary for the diagnosis or treatment of the condition of the patients, and are provided without regard to race, color, sex, national origin, age, or handicap.

Additionally, I agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the Texas Medical Assistance Program. I also agree to furnish them at no cost and provide access to information regarding any payments claimed for providing such services as the State Agency, Attorney General's Office, and Department of Health and Human Services (HHS) Office may request for five years from date of service (6 years for freestanding rural health clinic; 10 years for hospital-based rural health clinic), or until any dispute is settled, whichever occurs first.

I agree to accept the amounts paid by the Medicaid Program as full payment for the services rendered for which a Medicaid benefit is provided under the Texas Medical Assistance Program.

This letter, to be retained in your files, bears my true and original signature:

B.56 Specimen Submission Form G-1C, Maternal Serum Prenatal Triple Screen, Instructions

Note: *Form G-1C, Maternal Serum Prenatal Triple Screen, is provided for the provider's convenience. Previously it was part of the G-1B form. It is not a THSteps form.*

For information on Triple Screens, call: 1-800-687-4363 or 1-888-963-7111 x7138 or Fax: (512) 458-7139.
For mailing and specimen packaging information, visit DSHS Laboratory Services Section's web page at http://www.dshs.state.tx.us/lab/.

The specimen submission form ***must*** accompany each specimen.
The patient's name listed on the specimen ***must*** match the patient's name listed on the form.
If the Date of Collection field is not completed, the specimen will be rejected.

Section 1. SUBMITTER INFORMATION

All submitter information is required.

Submitter/TPI number, Submitter name and Address: Indicate the submitter's name, address, city, state, and zip code. Please print clearly, use a pre-printed label, or use a photocopy of a master form provided by the Laboratory Services Section.

The submitter number is a unique number that the Texas Department of State Health Services (DSHS) Laboratory Services Section assigns to each of our submitters. To obtain a TPI number, contact Texas Medicaid and Healthcare Partnership (TMHP) at 1-800-925-9126.

To request a DSHS Laboratory Services Section submitter number, a master form, or to change submitter information, please call (888) 963-7111 x7578 or (512) 458-7578, or fax (512) 458-7533.

Contact Information: Indicate the telephone number and name of the person to contact at the submitting facility in case the laboratory needs additional information about the specimen. The fax number should indicate the number of the fax machine where the report should be sent.

Clinic Code: Please provide, if applicable. This is a code that the submitter furnishes to help them identify which satellite office submits a specimen and to help the submitter identify where the lab report belongs, if the submitter has a primary mailing address with satellite offices.

Section 2. PATIENT INFORMATION

Complete all patient information including last name, first name, middle initial, date of birth, medical records number, race/ethnicity, address, ICD diagnosis code, city, state, zip code, and country of origin.

NOTE: The patient's name listed on the specimen ***must*** match the patient's name listed on the form.

Information that is required to bill Medicare, Medicaid, or private insurance has been marked with double asterisks (**). You may use a pre-printed patient label.

ICD diagnosis code: Indicate the diagnosis code that would help in processing, identification, and billing of this specimen.

Section 3. TRIPLE SCREEN REQUEST & PATIENT INFORMATION

In order to interpret this test, **all** patient information in this section of this form must be provided. Without the date of collection, accurate gestational age, maternal weight, maternal date of birth, maternal race, and information about maternal diabetic status, a complete assessment cannot be made. *The time and date the specimen is removed from freezer **must** be provided to determine specimen acceptability.*

Section 4. PHYSICIAN INFORMATION

Physician's name and UPIN: Give the name of the physician and their unique physician ID number (UPIN), if applicable. This information is required to bill Medicare.

Section 5. PAYOR SOURCE

THE SUBMITTER WILL BE BILLED, if the required billing information is not provided.

Indicate the party that will receive the bill.

Medicaid or Medicare:

- Mark the appropriate box, write in the Medicaid or Medicare number, and
- Supply a copy of the Medicaid or Medicare card.

Private Insurance:

- Mark the appropriate box,
- Supply a copy of the front and back of the insurance card, &
- Complete all fields on the form that have an asterisk (*).

DSHS Program:

- Do NOT check a DSHS program as a Payor Source if the patient has Medicaid or Medicare.
- If you are contracting and/or enrolled with a DSHS program to provide services that require laboratory testing, please indicate which program. For program descriptions, see the Laboratory Services Section's Manual of Reference Services located on the web site at http://www.dshs.state.tx.us/lab/.
- If there is no other Payor Source for the patient and the patient meets the program's eligibility criteria, check the appropriate DSHS program.

HMO / Managed care / Insurance company: Print the name, address, city, state, and zip code of the insurance company to be billed.

Responsible party: Print the name of the responsible party, the insurance ID number, insurance company's phone number, group name, and group number.

Signature and Date: Have the responsible party sign and date to authorize the release of their information, if DSHS is to bill their insurance or HMO.

For specific test instructions and information about tube types, see the Laboratory Services Section Manual of Reference Services on our web site at http://www.dshs.state.tx.us/lab/.

B.58 Specimen Submission Form G-1C, Maternal Serum Prenatal Triple Screen, Spanish Instructions (2 Pages)

Página 1 de 2

Instrucciones para el formulario de remisión de muestras G-1C
Examen sistemático triple prenatal del suero materno

Para información sobre los exámenes sistemáticos triples, llame al: 1-800-687-4363 ó 1-888-963-7111 x7138
ó mande un fax al: (512) 458-7139.
Para información sobre el envío y el empaquetamiento de las muestras, visite nuestra página del Internet
de la Sección de Servicios de Laboratorio del *DSHS*: http://www.dshs.state.tx.us/lab/ (en inglés).

El formulario de remisión de muestras ***tiene que*** acompañar a cada muestra.
El nombre del paciente que aparece en la muestra ***tiene que*** concordar con el nombre del paciente que aparece en el formulario.
Si el campo "Fecha de recogida" no está llenado, se rechazará la muestra.

Sección 1. INFORMACIÓN SOBRE EL REMITENTE

Se requiere toda la información sobre el remitente.

Número de remitente / Número TPI, Nombre y dirección del remitente: Indique el nombre, dirección, ciudad, estado, y código postal del remitente. Escriba claramente en letra de molde, utilice una etiqueta impresa de antemano, o utilice una fotocopia de un formulario original proporcionado por la Sección de Servicios de Laboratorio.

El número de remitente es un número único que la Sección de Servicios de Laboratorio del *Texas Department of State Health Services* [Departamento Estatal de Servicios de Salud de Texas, DSHS, por sus siglas en inglés] asigna a cada uno de nuestros remitentes. Para obtener un número TPI, comuníquese con *Texas Medicaid and Healthcare Partnership*, (*TMHP*, por sus siglas en inglés) al 1-800-925-9126.

Para pedir un número de remitente de la Sección de Servicios de Laboratorio del *DSHS,* un formulario original, o para cambiar la información del remitente, llame al (888) 963-7111 x7578 ó (512) 458-7578, ó mande un fax al (512) 458-7533.

Información localizadora: Indique el número de teléfono y el nombre de la persona apropiada en el centro remitente con quien el laboratorio puede comunicarse si es que se necesita más información sobre la muestra. El número de fax debe indicar el número de fax adónde se debe enviar el informe.

Código de la clínica: Favor de proporcionarlo, si se aplica. Éste es un código que el remitente proporciona si tiene una dirección postal principal y oficinas satélites. El código le ayuda al remitente a identificar cuál de los satélites remite la muestra y dónde es que pertenece el informe del laboratorio.

Sección 2. INFORMACIÓN SOBRE EL PACIENTE

Llene toda la información sobre el paciente inclusive el apellido, primer nombre, inicial del segundo nombre, fecha de nacimiento, número del expediente médico, raza / etnicidad, dirección, código diagnóstico ICD, ciudad, estado, código postal, y país de origen.

NOTE: El nombre del paciente que aparece en la muestra ***tiene que*** concordar con el nombre que aparece en el formulario.

La información que es requerida para pasarle la factura a Medicare, Medicaid, o al seguro privado ha sido marcada con dos asteriscos (**). Usted puede utilizar una etiqueta de paciente impresa de antemano.

El código diagnóstico ICD: Indique el código diagnóstico que ayudaría en el procesamiento, la identificación, y la facturación de esta muestra.

Sección 3. EXAMEN SISTEMÁTICO TRIPLE E INFORMACIÓN SOBRE EL PACIENTE

Para interpretar este examen, **toda** la información en esta sección de este formulario deberá ser proporcionada. Sin la fecha de recogida, la edad gestacional precisa, el peso materno, la fecha de nacimiento de la madre, la raza de la madre, e información sobre el estado diabético de la madre, no se puede llevar a cabo una evaluación completa. *Tiene que proporcionarse la hora y la fecha cuando se saca la muestra del congelador para determinar la aceptabilidad de la muestra.*

Sección 4. INFORMACIÓN SOBRE EL MÉDICO

Nombre del médico y UPIN: Proporcione el nombre del médico y su número único de identificación para médicos (UPIN, por sus siglas en inglés), si se aplica. Se requiere esta información para pasarle la factura a Medicare.

Sección 5. FUENTE DE PAGADOR SE LE PASARÁ LA FACTURA AL REMITENTE si no se proporciona la información requerida para la facturación**.**

Indique quién recibirá la factura.

Medicaid o Medicare:
- Marque la casilla apropiada, escriba el número de Medicaid o Medicare, y
- Provea una copia de la tarjeta de Medicaid o Medicare.

Seguro privado:
- Marque la casilla apropiada,
- Provea una copia de los dos lados de la tarjeta de seguro, y
- Llene todos los campos del formulario que tienen un asterisco (*).

Programa del DSHS:
- NO marque un programa del DSHS como la fuente de pagador si el paciente tiene Medicaid o Medicare.
- Si usted está contratando y / o está inscrito(a) en un programa del *DSHS* para proporcionar servicios que requieren análisis de laboratorio, indique qué programa es. Para descripciones de los programas, vea el Manual de

B

CPT only copyright 2005 American Medical Association. All rights reserved.

servicios de referencia [*Manual of Reference Services*, en inglés] de la Sección de Servicios de Laboratorio en el siguiente sitio del Internet: http://www.dshs.state.tx.us/lab/.

- Si no hay ninguna otra fuente de pagador para el paciente y el paciente reúne los criterios de elegibilidad para el programa, marque el programa apropiado del *DSHS*.

HMO / Cuidado manejado / Compañía de seguros: Escriba en letra de molde el nombre, la dirección, la ciudad, el estado, y el código postal de la compañía de seguros a la cual se pasará la factura.

Firmante responsable: Escriba en letra de molde el nombre del firmante responsable, el número de identificación del seguro, el número de teléfono de la compañía de seguros, el nombre del grupo, y el número del grupo.

Firma y Fecha: Pida que la persona responsable firme y ponga la fecha para autorizar la revelación de su información, si es que el *DSHS* le mandará la factura a su seguro o HMO.

Para indicaciones específicas para las pruebas e información sobre los tipos de tubos, vea el Manual de servicios de referencia de la Sección de Servicios de Laboratorio en nuestra página del Internet: http://www.dshs.state.tx.us/lab/.

B.60 Statement for INITIAL Wound Therapy System In-Home Use (2 Pages)

Patient Name: ______________________________ Birthdate: ______________________________

Medicaid Number: ______________________________ Diagnosis: ______________________________

Physician Name: ______________________________ Physician Telephone Number: ______________________________

Physician Provider Number: ____________________ Home Health Agency Name: ______________________________

Physician License Number: ____________________ Provider Number: ______________________________

INDICATORS FOR INITIAL WOUND THERAPY

Must be completed by the physician familiar with the client and subscribing the wound care system. Answer "Yes" or "No" for each question and mark any answers which apply.

THIS FORM HAS BEEN UPDATED.

Click on the button above to access the new form.

1. The patient has had one or more of the following: **YES** **NO**
   - _____ Stage III or Stage IV pressure ulcer
   - _____ diabetic ulcer
   - _____ pre-o[illegible] graft
   - _____ [illegible]
   - _____ [illegible]cen[illegible] gra[illegible]
   - _____ [illegible]
2. The patient's history reflects one or more of the following: **YES** **NO**
   - _____ previous failed wound care interventions, how long ago __________, how was it resolved ____________________
   - _____ severe coexisting chronic illness
   - _____ frequent reoccurr[illegible]nce of advanced press[illegible]re ulcers related to severely limited mobility
   - _____ [illegible]

   Admission date: _______________ Admitting diagnosis: _______________ Discharge date: _______________
3. The patient uses a pressure-reducing surface: **YES** **NO**
   - _____ non-powered mattress overlay
   - _____ powered mattress replacements
   - _____ non-powered mattress replacement
   - _____ powered bed system
   - _____ powered mattress overlay
   - _____ air fluidized bed

   NOTE: If "NO", why not? ____
4. The patient has an albumin greater than 3 mg/dl. **YES** **NO**

   Date of last albumin (within the past 30 days) : ____________________ **Result:** ____________________

   NOTE: If the patient has an albumin level less than 3 mg/dl, please list the albumin level and describe the type of nutritional treatment which the patient is receiving: ____
5. The patient has diabetes mellitus **YES** **NO**

   Hemoglobin A1c level: _______________ **Date Hemoglobin A1c drawn (within the past 30 days):** _______________
6. The patient's wound is free of necrotic tissue. **YES** **NO**

   NOTE: If the wound has recently been debrided, identify the type and date of debridement:
   - ______ surgical Date: __________
   - _____ physical Date: __________
   - ______ chemical Date: __________
   - _____ autolytic Date: __________
7. The patient's wound is free of infection. **YES** **NO**

   NOTE: If the wound is infected, identify the wound treatment, include dosage, frequency, route and duration of any medications (including, but not limited to, antibiotics) :____

   ____
8. The patient's overall health status will allow wound healing. **YES** **NO**

   NOTE: Describe all medical conditions which might affect wound healing, address incontinence if pertinent, and what is being done to decrease contamination of the wound:____

   ____
9. Name of family member/friend/caregiver who agrees to be available to assist patient: ______________________________

Physician Signature: ______________________________ **Date:** ______________________________

CPT only copyright 2005 American Medical Association. All rights reserved.

Patient Name: ____________________________ **Medicaid Number:** ____________________________

Physician Name: __________________________ **Physician Phone Number:** ______________________

CONTRAINDICATORS TO INITIAL WOUND THERAPY

Must be completed by the physician familiar with the client and subscribing the wound care system or the registered nurse (RN). Check any that apply.

Does the patient have any of the following conditions: **YES** **NO**

_____ fistulas to the body
_____ wound ischemia
_____ gangrene
_____ skin cancer in the margins
_____ osteomyelitis (unless being treated – describe below)
_____ presence of necrotic tissue, including bone
_____ less than six months to live

INITIAL WOUND PROFILE

Must be completed by the physician familiar with the client and subscribing the wound care system or the RN. **NOTE:** Use additional paper if more than two wounds are currently being treated.

Wound #1:

Type of wound: _____ pressure ulcer
_____ pre-operative myocutaneous flap or graft
_____ recent (within 14 days) myocutaneous flap or graft
_____ diabetic ulcer
_____ chronic open wound
_____ venous stasis ulcer

Location: _________________________________ Stage: _______________ Age of wound: ______________

Date of surgery (if flap or graft): ___________________ Type of debridement and date: ______________________________

Wound color: _______________ L x W x D: _______________ Odor: _______________ Drainage: _________________________

Tunneling (depth and position): _______________________ Undermining (depth and position): ______________________________

List all previous wound interventions: (use additional space if necessary): ____

____

____

Wound #2:

Type of wound: _____ pressure ulcer
_____ pre-operative myocutaneous flap or graft
_____ recent (within 14 days) myocutaneous flap or graft
_____ diabetic ulcer
_____ chronic open wound
_____ venous stasis ulcer

Location: _________________________________ Stage: _______________ Age of wound: _________________

Date of surgery (if flap or graft): ___________________ Type of debridement and date: ___________________________

Wound color: _______________ L x W x D: _______________ Odor: _______________ Drainage: _____________________

Tunneling (depth and position): _______________________ Undermining (depth and position): ___________________________

List all previous wound interventions: (use additional space if necessary): ____

B.62 Sterilization Consent Form Instructions (2 Pages)

Per Title 42 *Code of Federal Regulations* (CFR) 50, Subpart B, all sterilizations require a valid consent form regardless of the funding source. Ensure all required fields are completed for timely processing.

Fax or mail the Sterilization Consent Form five business days before submitting the associated claim(s) to expedite the processing of the Sterilization Consent Form and associated claim(s).

Fax fully completed Sterilization Consent Forms to Texas Medicaid & Healthcare Partnership (TMHP) at 1-512-514-4229. Claims and appeals are not accepted by fax. Only send family planning sterilization correspondence to this fax number.

Note: Hysterectomy Acknowledgment forms are not sterilization consents and should be faxed to 1-512-514-4218.

THIS FORM HAS BEEN UPDATED.

Clients must be at least 21 *years of age* when the consent form is signed. If the client was not 21 years of age when the consent form was signed, the consent will be denied. Changing signature dates is considered fraudulent and will be reported to the Office of the Inspector General (OIG).

There must be at least 30 days between the date the client signs the consent form and the date of surgery with the following exceptions:

Click on the button above to access the new form.

Exceptions: (1) Premature delivery - There must be at least 30 days between the date of consent and the client's expected date of delivery. (2) Emergency Abdominal Surgery -There must be at least 72 hours between the date of consent and the date of surgery. Operative reports detailing the need for emergency surgery are required.

Listed below are field descriptions for the Sterilization Consent Form. Completion of *all* sections is required to validate the consent form, with only two exceptions:

Exceptions: Race and Ethnicity Designation is requested but not required. The Interpreter's Statement is not required as long as the consent form is written in the client's language, or the person obtaining the consent speaks the client's language. If this section is partially completed, the consent will be denied for incomplete information.

This Sterilization Consent Form may be copied for provider use. Providers are encouraged to frequently recopy the original form to ensure legible copies and to expedite consent validation.

Required Fields

All of the fields must be legible in order for the consent form to be valid. Any illegible field will result in a denial of the submitted consent form. Resubmission of legible information must be indicated on the consent form itself. Resubmission with information indicated on a cover page or letter will not be accepted.

Consent to Sterilization

- Name of Doctor or Clinic
- Name of the Sterilization Operation
- Client's Date of Birth (month, day, year)
- Client's Name (first and last names are required)
- Name of Doctor or Clinic
- Name of the Sterilization Operation
- Client's Signature
- Date of Client Signature - *Client must be at least 21 years of age on this date. This date cannot be altered or added at a later date.*

CPT only copyright 2005 American Medical Association. All rights reserved.

Interpreter's Statement (If applicable)

- Name of Language Used by Interpreter
- Interpreter's Signature
- Date of Interpreter's Signature (month, day, year)

Statement of Person Obtaining Consent

- Client's Name (first and last names are required)
- Name of the Sterilization Operation
- Signature of Person Obtaining Consent -The statement of person obtaining consent must be completed by the person who explains the surgery and its implications and alternate methods of birth control. The signature of person obtaining consent must be completed at the time the consent is obtained. The signature must be an *original signature*, not a rubber stamp.
- Date of the Person Obtaining Consent's Signature (month, day, year) - Must be the same date as the client's signature date.
- Facility Name - Clinic/office where the client received the sterilization information
- Facility Address - Clinic/office where the client received the sterilization information

Physician's Statement

- Client's Name (first and last names are required)
- Date of Sterilization Procedure (month, day, year) - Must be at least 30 days and no more than 180 days from the date of the client's consent except in cases of premature delivery or emergency abdominal surgery.
- Name of the Sterilization Operation
- Expected Date of Delivery (EDD) - Required when there are less than 30 days between the date of the client consent and date of surgery. Client's signature date must be at least 30 days prior to EDD
- Circumstances of Emergency Surgery - Operative report(s) detailing the need for emergency abdominal surgery are required
- Physician's Signature - Stamped or computer-generated signatures are not acceptable
- Date of Physician's Signature (month, day, year) - This date must be *on or after* the date of surgery

Paperwork Reduction Act Statement

This is a required statement and must be included on every Sterilization Consent Form submitted.

Additional Required Fields

- Medicaid or Family Planning Number - Clients submitted as Titles V, X, and XX may not have a Family Planning number. Please simply indicate the appropriate Title below
- Date Client Signed the Consent (month, day, year)
- Provider Identifier - Including the nine-digit provider identification number will expedite the processing of the consent form
- Provider/Clinic Phone Number
- Provider/Clinic Fax Number (If available)
- Family Planning Title for Client - Indicate by circling V, X, XIX (Medicaid), or XX

CPT only copyright 2005 American Medical Association. All rights reserved.

B.63 Sterilization Consent Form (English, 2 Pages)

Sterilization Consent Form

Fax consent to 512-514-4229

Client Medicaid or Family Planning # __ __ __ __ __ __ __ __ __

Notice: YOUR DECISION AT ANY TIME NOT TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITHHOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from ______________________ (doctor or clinic). When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as A.F.D.C. or Medicaid that I am now getting or for which I may become eligible. **I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.** I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I [illegible] known as ______________________. The disc[illegible] bene[illegible] my questions [illegible]

THIS FORM HAS BEEN UPDATED.

I understand that the operation will not be done until at least 30 days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ____ (month), ____(day), ____ (year).

I, ______________________, hereby consent of my own free will to be sterilized by ______________________ [illegible] date of my signature below.

Click on the button above to access the new form.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed.

I have received a copy of this form.

Client's Signature____

Date of Signature: ___/___/_____ (month/day/year)

NOTICE: You are requested to supply the following information, but it is not required:

Race and Ethnicity Designation

Ethnicity:
☐ Hispanic or Latino
☐ Not Hispanic or Latino

Race (mark one or more):
☐ American Indian or Alaska Native
☐ Asian
☐ Black or African American
☐ Native Hawaiian or Other Pacific Islander
☐ White

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the individual to be sterilized:
I have translated the information and advice presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______________ language and explained its contents to him/her. To the best of my knowledge and belief he/she understood this explanation.

Interpreter Signature:_____________________ Date:___/___/_______ (month/day/year)

STATEMENT OF PERSON OBTAINING CONSENT

Before ____________________________________ (client's full name), signed the consent form, I explained to him/her the nature of the sterilization operation known as a ______________________________________, the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it. I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds. To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

STERILIZATION CONSENT FORM - PAGE 2

PHYSICIAN'S STATEMENT

Shortly before I performed a sterilization operation upon ________________________________ (name of individual to be sterilized), on____/____/____ at (date of sterilization: (month/day/year), I explained to him/her the nature of the sterilization operation _____________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it. I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or benefits provided by Federal funds. To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appeared to understand the nature and consequences of the procedure. (**Instructions for use of alternative final paragraphs:** Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the individual's signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph which is not used.) (1) At least 30 days have passed between the date of the individual's signature on this consent form and the date the sterilization was performed. (2) This sterilization was performed less than 30 days but more than 72 hours after the date of the individual's signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

Premature delivery - Individual's expected date of delivery:
___/___/___ (month, day, year)

Emergency abdominal surgery:
(describe circumstances):______________________________

____

Physician's Signature:_________________________Date:____/____/____ (month/day/year)

PAPERWORK REDUCTION ACT STATEMENT

A federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays the currently valid OMB control number. Public reporting burden for this collection of information will vary; however, we estimate an average of one hour per response, including for reviewing instructions, gathering and maintaining the necessary data, and disclosing the information. Send any comment regarding the burden estimate or any other aspect of this collection of information to the OS Reports Clearance Officer, ASBTF/Budget Room 503 HHH Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

Respondents should be informed that the collection of information requested on this form is authorized by 42 CAR part 50, subpart B, relating to the sterilization of persons in federally assisted public health programs. The purpose of requesting this information is to ensure that individuals requesting sterilization receive information regarding the risks, benefits and consequences, and to assure the voluntary and informed consent of all persons undergoing sterilization procedures in federally assisted public health programs. Although not required, respondents are requested to supply information on their race and ethnicity. Failure to provide the other information requested on this consent form, and to sign this consent form, may result in an inability to receive sterilization procedures funded through federally assisted public health programs.

All information as to personal facts and circumstances obtained through this form will be held confidential, and not disclosed without the individual's consent, pursuant to any applicable confidentiality regulations.

B.64 Sterilization Consent Form (Spanish, 2 Pages)

Sterilization Consent Form (Spanish) Fax consent to 512-514-4229

Medicaid or Family Planning # __ __ __ __ __ __ __ __ __

Nota: La decisión de no esterilizarse que usted puede tomar en cualquier momento, no causará el retiro o la retención de ningún beneficio que le sea proporcionado por programas o proyectos que reciben fondos federales.

CONSENTIMIENTO PARA ESTERILIZACIÓN

Yo he solicitado y he recibido información de _____________________________ (médico o clínica) sobre la esterilización. Cuando inicialmente solicité esta información, me dijeron que la decisión de ser esterilizada/o es completamente mía. Me dijeron que yo podía decidir no ser esterilizada/o. Si decido no esterilizarme, mi decisión no afectará mi derecho a recibir tratamiento o cuidados médicos en el futuro. No perderé

ninguna asistencia o beneficios de programas patrocinados con fondos federales, tales como A.F. D. C. o Medicaid, que recibo actualmente o para los cuales seré elegible. ENTIENDO QUE LA ESTERILIZACIÓN SE CONSIDERA UNA OPERACIÓN PERMANENTE E IRREVERSIBLE. YO HE DECIDIDO QUE NO QUIERO QUEDAR EMBARAZADA, NO QUIERO TENER HIJOS O NO QUIERO PROCREAR HIJOS. Me informaron que me pueden proporcionar otros métodos de anticoncepción disponibles que son temporales y que permitirán que pueda tener o procrear hijos en el futuro. He rechazado estas opciones y he decidido ser esterilizada/o. Entiendo que seré esterilizada/o por medio de una [illegible] decisión en cualquier momento de no ser esterilizada/o no resultará en la retención de beneficios o servicios médicos proporcionados a través de programas que reciben fondos federales.

Tengo por lo menos 21 años y nací el _______(mes) de ________ (día) de _________ (año).

Yo, [illegible] _________________ (médico o clínica) por el método llamado _________________. Mi consentimiento vence 180 días a partir de la fecha en la que firme este documento. También doy mi consentimiento para que se presente esta Forma y otros expediente médicos sobre la operación a: Representantes del Departamento de Salud y Servicios Sociales, o Empleados de programas o proyectos financiados por ese Departamento, pero sólo para que puedan determinar si se han cumplido las leyes federales.

He recibido una copia de esta forma.

Firma: ____

Fecha: ____/____/______ (mes, día , año)

Nota: Se ruega proporcione la siguiente información, aunque no es obligatorio hacerlo:

Definición de raza y origen étnico

Origen étnico:	Raza (marque según aplique):
☐ Hispano o latino	☐ Indígena americano o indígena de Alaska
☐ No hispano o latino	☐ Asiático
	☐ Negro o afroamericano
	☐ Natural de Hawaii u otras islas del Pacífico
	☐ Blanco

DECLARACIÓN DEL INTÉRPRETE

Si se han proporcionado los servicios de un intérprete para asistir a la persona que será esterilizada: He traducido la información y los consejos que verbalmente se le han presentado a la persona que será esterilizada/o por el individuo que ha obtenido este consentimiento. También le he leído a él/ella la Forma de Consentimiento en idioma _____________ y le he explicado el contenido de esta forma. A mi mejor saber y entender, ella/él ha entendido esta explicación.

Firma:_____________________ Fecha:___/___/_______ (mes, día, año)

DECLARACIÓN DE LA PERSONA QUE OBTIENE CONSENTIMIENTO

Antes de que _____________________ (nombre de persona) firmara la Forma de Consentimiento para la Esterilización, le he explicado a ella/él los detalles de la operación ___________________ para la esterilización, el hecho de que el resultado de este procedimiento es final e irreversible, y las molestias, los riesgos y los beneficios asociados con este procedimiento. He aconsejado a la persona que será esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. Le he explicado que la esterilización es diferente porque es permanente. Le he explicado a la persona que será esterilizada que puede retirar su consentimiento en cualquier momento y que ella/él no perderá ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene por lo menos 21 años de edad y parece ser mentalmente competente. Ella/él ha solicitado con conocimiento de causa y por libre voluntad ser esterilizada/o y parece entender la naturaleza del procedimiento y sus consecuencias.

STERILIZATION CONSENT FORM (SPANISH) – PAGE 2

DECLARACIÓN DEL MÉDICO

Previamente a realizar la operación para la esterilización a _______________________________ (nombre de persona esterilizada/o), en ____/____/______ (fecha de esterilización: mes, día, año), le expliqué a él/ella los detalles de esta operación para la esterilización________________________ (especifique tipo de operación), del hecho de que es un procedimiento con un resultado final e irreversible, y las molestias, los riesgos y los beneficios asociados con esta operación.
Le aconsejé a la persona que sería esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. Le expliqué que la esterilización es diferente porque es permanente. Le informé a la persona que sería esterilizada que podía retirar su consentimiento en cualquier momento y que ella/él no perdería ningún servicio de salud o ningún beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene a lo menos 21 años de edad y parece ser mentalmente competente. Ella/él ha solicitado con conocimiento de causa y libre voluntad ser esterilizada/o y parece entender el procedimiento y las consecuencias de este procedimiento.
(Instrucciones para uso alternativo de párrafos finales: Utilice el párrafo 1 que se presenta a continuación, excepto para casos de parto prematuro y cirugía abdominal de emergencia cuando se ha realizado la esterilización a menos de 30 días después de la fecha en la que la persona firmó la Forma de Consentimiento para la Esterilización. Para esos casos, utilice el párrafo 2 que se presenta más adelante. Tache con una X el párrafo que no se aplique). (1) Han transcurrido por lo menos 30 días entre la fecha en la que la persona firmó esta Forma de Consentimiento y la fecha en la que se realizó la esterilización. (2) La operación para la esterilización se realizó a menos de 30 días, pero a más de 72 horas, después de la fecha en la que la persona firmó la Forma de Consentimiento debido a las siguientes circunstancias (marque la casilla apropiada y escriba la información requerida):

☐ Parto prematuro
Fecha prevista de parto: ____/____/____ (mes, día, año)

☐ Cirugía abdominal de urgencia
Describa las circunstancias: ______________________________

Firma del médico ___________________________________ Fecha :____/____/____ (mes, día, año)

DECLARACIÓN SOBRE LEY DE REDUCCIÓN DE TRÁMITES

Una agencia federal no debe llevar a cabo o patrocinar la recolección de información, y el público no está obligado a responder a la misma o a facilitar la información, a no ser que dicha solicitud de información presente un número de control válido de la OMB. La carga horaria para el público que completa esta forma variará; sin embargo, se ha estimado un promedio de una hora por cada respuesta, cálculo que incluye el tiempo para revisar las instrucciones, buscar y presentar los datos exigidos y completar la forma. Para enviar sus comentarios sobre la carga horaria estimada o cualquier otro aspecto de la información requerida, escriba a OS Reports Clearance Officer, ASBTF/Budget Room 503 HHH Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

Se debe informar al público que responde a esta forma que la recolección de información solicitada en la misma se autoriza en virtud de 42 CAR parte 50, subparte B, que tiene que ver con la esterilización de personas en programas de salud pública que son financiados por el gobierno federal. El propósito de la recolección de esta información es asegurar que las personas que solicitan la esterilización sean informadas sobre los riesgos, los beneficios y las consecuencias de esta operación, y para asegurar el consentimiento voluntario e informado de todas las personas que se someten al procedimiento de esterilización en programas de salud pública que reciben asistencia federal. Se pide a las personas que llenan la forma que incluyan datos sobre su raza y grupo étnico, aunque esta información no es requerida. Toda la demás información solicitada en esta forma de consentimiento es requerida. Si la persona que llena la forma no proporciona la información requerida o si no firma esta forma de consentimiento, podría resultar en que no recibiera el procedimiento de esterilización financiado por un programa de salud pública patrocinado con fondos federales.

Toda la información de datos y circunstancias personales obtenidas por medio de esta Forma son confidenciales y no se divulgarán sin el consentimiento de la persona, en conformidad con todos los reglamentos aplicables de confidencialidad.

B.71 TDHconnect Order Form

TDHconnect is the versatile, reliable, and free Windows-based claims submission software provided by TMHP. Technical support, upgrades, and training for TDHconnect are also available free from TMHP. Providers can use the software to submit claims, eligibility requests, claim status inquiries, adjustments, appeals, and to retrieve Electronic Remittance and Status (ER&S) reports. TDHconnect training can be obtained through the Provider Relations workshops. Information about these workshops and other classes related to Medicaid billing can be found at www.tmhp.com\Providers under TMHP Provider Services Representatives and TMHP Provider Workshops. Technical support for TDHconnect is available weekdays from 7a.m. to 7p.m. through the Electronic Data Interchange (EDI) Helpdesk at 1-888-863-3638. Technical support, software updates, and training are provided free of charge.

Mailing Information

Provider or Organization Name **Provider Number**

Contact Name **Contact Number**

Address

City **State** **Zip Code**

The TDHconnect software and Quick Start Guide should arrive within 15 business days of TMHP's receipt of the order form. *Overnight and 2nd Day services are available through UPS at the expense of the person(s) ordering TDHconnect. Orders received without a valid UPS account number or for any other package service will be sent through standard U.S. Mail. A signature is required for all UPS orders.*

B.73 THSteps-CCP Prior Authorization Private Duty Nursing 4 or 6 Month Authorization

Name____ Medicaid #__________________

The following criteria must be met before seeking a 4 or 6 month authorization of PDN services. Remember that authorization is a condition for reimbursement; it is not a guarantee. Each nurse provider should verify the continued Medicaid coverage for each client for each month of service.

_____Client has received PDN services for at least one year.

_____Client has had no new significant diagnosis, treatment, illness/injury or hospitalization in at least 6 months that would be expected to affect the need for PDN services.

_____There has been no change in the PDN requests in the previous 6 months.

_____Client's physician and primary caregiver (parent) do not anticipate any significant changes in the client's condition for the requested authorization period.

_____The nurse provider will ensure that a new Physician Plan of Care is obtained every 60 days and will be maintained with the client's record.

THIS FORM HAS BEEN UPDATED.

_____The nurse provider will advise TMHP-CCP of any *significant* changes in the client's condition, treatments or physician orders which occur during the authorization period if the number of PDN hours needs to change.

_____The client's primary caregiver, personal physician and nurse provider understand that the authorization may be changed during the authorization period if the client's condition or skilled needs change significantly.

Click on the button above to access the new form.

All required acknowledgments must be signed and dated:

I have read and understand the above information.

____ ____

(signature of **parent/primary caregiver**) Date

****

Brief statement of why a 4 or 6 month extension is appropriate for this client:

____

I have discussed the above information with the client's parent/primary caregiver.

____ ____

(signature of the **nurse provider**) Date

****

To be completed by the **client's physician**:

The above services are medically necessary, the client's condition is stable and this request supports the client's health and safety needs.

B

B.76 THSteps Dental Criteria for Dental Therapy Under General Anesthesia (2 Pages)

Total points needed to justify treatment under general anesthesia=22.

Age of patient at time of examination	Points
Less than 4 years of age	8
4 and 5 years of age	6
6 and 7 years of age	4
8 years of age and older	2

Treatment Requirements (Carious and/or Abscessed Teeth)	Points
1-2 teeth or one sextant	3
3-4 teeth or 2-3 sextants	6
5-8 teeth or 4 sextants	9
9 or more teeth or 5-6 sextants	12

Behavior of Patient**	Points
Definitely negative–unable to complete exam, patient unable to cooperate due to lack of physical or emotional maturity, and/or disability	10
Somewhat negative–defiant; reluctant to accept treatment; disobeys instruction; reaches to grab or deflect operator's hand, refusal to take radiographs	4
Other behaviors such as moderate levels of fear, nervousness, and cautious acceptance of treatment should be considered as normal reponses and are not indications for treatment under general anesthesia	0
** Requires that narrative fully describing circumstances be present in the patient's chart	

Additional Factors**	Points
Presence of oral/perioral pathology (other than caries), anomaly, or trauma requiring surgical intervention**	15
Failed conscious sedation**	15
Medically compromising, handicapping condition**	15
** Requires that narrative fully describing circumstances be present in the patient's chart	

I understand and agree with the dentist's assessment of my child's behavior.

PARENT/GUARDIAN SIGNATURE: ____DATE: ________________

Patients in need of general anesthesia who do not meet the 22-point threshold, by report, will require prior authorization.

To proceed with the dental care and general anesthesia, this form, the appropriate narrative, and all supporting documentation, as detailed in Attachment 1, must be included in the patient chart. The patient chart must be available for review by representatives of TMHP and/or HHSC.

PERFORMING DENTIST'S SIGNATURE: ____

Medicaid Dental Policy Regarding Criteria for Dental Therapy Under General Anesthesia–Attachment 1

Purpose: To justify I.V. Sedation or General Anesthesia for Dental Therapy, the following documentation is required in the Child's Dental Record.

Elements: Note those required* and those as appropriate**:

1) * Patient's Demographics including Date of Birth
2) * Relevant Dental and Medical Health History
   ** including Medical Evaluation Justifying Relevant Medical Condition(s)
3) * Dental Radiographs, Intraoral/Perioral Photography, and/or Diagram of Dental Pathology
4) * Proposed Dental Plan of Care
5) * Signed Consent by Parent/Guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of general anesthesia for dental care has been explained.
6) ** Description of Relevant Behavior and Reference Scale
7) ** Other Relevant Narrative Justifying Need for General Anesthesia
8) * Completed Criteria for Dental Therapy Under General Anesthesia form
9) * The dentist's attestation statement and signature may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the chart as a stand-alone form:

"I attest that the patient's condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the patient's record and is available in my office."

B.77 THSteps Referral Form Instructions

The referral form assists in relaying correct and pertinent information to the person or agency receiving the referral. It may be mailed or hand-carried by the client. When the form is returned, it should be placed in the client's record.

Receiving/Referring Agencies
The name and address of both agencies should be completed to allow communication if additional information is necessary and to return a completed referral. If the referral is to a physician and the client is not able to name the physician who will be seen, this space may be completed MD/DO.

Identifying Information
This section concerning patient information should be as complete as possible. This section will assist the receiving agency to locate the client.

Reason for Referral
This section should contain information which is relevant to the referral. It may contain an assessment with request for further evaluation, or a request for intervention by a physician, hospital, or other agency involved with the client. Other information pertinent to the referral, such as family history or involvement with other agencies, may also be included.

Release of Information
This section must be signed.

Findings/Services Rendered
This final section provided the receiving agency the vehicle with which to transmit information back to originator of referral. Form may be mailed or carried by the client.

CPT only copyright 2005 American Medical Association. All rights reserved.

C.1 Claim Forms

Providers must order CMS-1500, HCFA-1450 (UB-92), and ADA Dental Claims Forms from the vendor of their choice. Copies cannot be used. Claims filing instructions and examples of the claim forms are located in "Claims Filing" on page 5-1.

Refer to: "CMS-1500 Claim Filing Instructions" on page 5-24

"CMS-1500 Blank Claim Form" on page 5-26

"HCFA-1450 (UB-92) Claim Filing Instructions" on page 5-32

"HCFA-1450 (UB-92) Blank Claim Form" on page 5-33

"2002 ADA Dental Claim Filing Instructions" on page 5-43

"2002 ADA Dental Claim Form" on page 5-44

C.2 Child Health Clinical Records

The use of forms ECH 1–7, ECH 13–15, and WIC-42 is optional. These forms were developed to assist providers in documenting all components of the medical checkup and can be downloaded from the THSteps website at http://secure.thstepsproducts.com/forms/ths_forms.htm. Lead poisoning screening questionnaires can be downloaded from the Childhood Lead Poisoning Prevention Program website at www.dshs.state.tx.us/lead/providers.shtm. Tuberculosis screening questionnaires can be downloaded from the Tuberculosis Elimination Division website, www.dshs.state.tx.us/idcu/disease/tb/forms/default.asp#clinic. These forms are also available within this chapter.

Forms CH-9W through CH-12W are only available by calling THSteps at 1-512-458-7745.

Stock Number	Form
CH-9W	Growth Chart - Infant Girl
CH-10W	Growth Chart - Infant Boy
CH-11W	Growth Chart - Child Girl
CH-12W	Growth Chart - Child Boy
ECH-1	Child Health History
ECH-2	Preventive Health Visit - Birth to 1 Month
ECH-3	Preventive Health Visit - 2–6 Months
ECH-4	Preventive Health Visit - 7–12 Months
ECH-5	Preventive Health Visit - 13 Months to 2 Years
ECH-6	Preventive Health Visit - 3–5 Years
ECH-7	Preventive Health Visit - 6–10 Years
ECH-13	24-Hour Dietary Recall and Assessment for Children - 1 Through 4 Years
ECH-14	24-Hour Dietary Recall and Assessment for Children - 5 Through 9 Years
ECH-15	24-Hour Dietary Recall and Assessment for Teens - 10 Through 20 Years (Nonpregnant Teens)
WIC-42	24-Hour Dietary Recall and Assessment for Infants - Birth Through 11 Months
	Texas Health Steps Primary Parent Questionnaire Risk Assessment for Lead Exposure
	Texas Health Steps Abbreviated Parent Questionnaire Risk Assessment for Lead Exposure
	TB Questionnaire

The Adolescent Health Program developed a series of health forms to assist health care providers in providing quality and comprehensive services for teens: Characteristic Behaviors of Adolescence, Adolescent Development Table, and Tips for Interviewing Adolescents. These forms are available on the Adolescent Health Program website at www.dshs.state.tx.us/adolescent/resources.shtm, or call 1-512-458-7745 for copies.

C.10 24-Hour Dietary Recall, Assessment for Infants (Birth–11 Months) (2 Pages)

Diet History for Infants Birth through 11 Months

Dietary Recall and Assessment

(Provide all answers except in shaded areas)

Name: ______________________

DOB: ____________ Age: __________

Assessment Questions for Infants	Risk Conditions Defined	Code
All Infants: Is your infant following therapeutic diet/special feeding instructions? Yes ______ No ___ Describe: ______ Does your infant have any developmental feeding problems? .... Yes _____ No ____ Describe: ______	**Developmental, Sensory or Motor Disabilities Interfering with the Ability To Eat** Disabilities that restrict the ability to intake, chew, or swallow food or require tube-feeding to meet nutritional needs	362
Breastfed Infant (Total or Partial): How many feedings in past 24 hours ______ Length ______	**Infrequent Breastfeeding as Sole Source of Nutrients:** Totally breastfed (no formula/solids) ■ younger than 2 months – less than 8 feedings in 24 hours ■ 2 months or older – less than 6 feedings in 24 hours	418
Problems with breastfeeding? ______ How many wet diapers per day? ______	**Breastfeeding Complications/Potential Complications:** ■ jaundice, weak/ineffective suck, latching difficulties ■ less than 6 wet diapers per day	603
Formula-Fed Infant: Brand/type of formula or milk: ______ ____ Powder _____ Concentrated _____ Ready-to-Use	**Feeding Cow's Milk**	413
Is formula iron fortified? .... Yes _____ No ____ If NO, is your infant taking iron drops? .... Yes _____ No ____	**Inappropriate Infant Feeding:** ■ feeding goat's milk, sheep's milk, imitation milks, or substitute milks ■ formula feeding only ■ 0-6 months – feeding low iron formula without iron supplementation	411
How is formula diluted and mixed? ______	**Improper Dilution of Formula**	415
Is anything added to the formula besides water? .... Yes _____ No ____	**Adding honey**	411
	Adding corn syrup, sugar...	416
Bottle-Fed Infant, Breastmilk and/or Formula: Number of bottles made at one time ______ Amount of breastmilk/formula in each bottle ______ Amount of breastmilk/formula consumed at each feeding ______ Number of bottles consumed in 24 hours ______ Total amount of breastmilk/formula consumed in 24 hours ______ How long does one can of formula last? ______	**Inappropriate Infant Feeding** Inadequate Amount, Nonbreastfed Only: ■ 0-3 months – less than 20 oz. in 24 hours ■ 4-5 months – less than 26 oz. in 24 hours ■ 6-11 months – less than 24 oz. in 24 hours Excessive amount, Nonbreastfed Only: ■ 0-4 months – more than 40 oz. in 24 hours ■ 5-9 months – more than 36 oz. in 24 hours ■ 10-11 months – more than 32 oz. in 24 hours	411
Is water boiled before it is mixed with formula? .... Yes _____ No ____ What is done with leftover breastmilk/formula in the bottle? ______ How are bottles/equipment cleaned? ______ How are bottles of breastmilk/formula stored? ______	**Lack of Sanitation in Preparation, Handling, and Storage** ■ Younger than 3 months and water not boiled ■ unsafe water ■ no stove, refrigerator, or freezer ■ feeding formula or breastmilk that has been handled and/or stored improperly	417
Do you... ■ put the baby to bed with a bottle? .... Yes ____ No ___ ■ prop the bottle? .... Yes ____ No ___ ■ let the baby crawl or walk around with the bottle or use the bottle to pacify the baby? .... Yes ____ No ___ ■ use the bottle to feed liquids other than breastmilk, formula, or water? .... Yes ____ No ___	**Inappropriate Use of Nursing Bottles** ■ yes to any	419
All Infants: Have any foods/beverages other than formula/breastmilk been introduced? ______	**Early Introduction of Solid Foods** ■ solids introduced before 4 months	412
If yes, during what month? ______ Do you give juice to your infant? .... Yes _____ No ____ If yes, how much? ______	**Inappropriate Infant Feeding** ■ no solids introduced by 7 months ■ more than 10 oz./day full-strength juice	411
Continue to the next section on the other side.	**No Dependable Source of Iron After 6 Months** no iron-fortified formula, cereal, meats or oral iron	414

24-Hour Dietary Recall and Assessment for Children 1 Through 4 Years

Name____________________
DOB__________ **Age**______
SSN/Record No.______________
Required for Child Health

Medical Risks

*Is child underweight or overweight, or does child have poor growth? ☐ Yes ☐ No
If yes, list:
*Does child have anemia? ☐ Yes ☐ No
*Does child have lead poisoning? ☐ Yes ☐ No
*Does child have chronic vomiting, diarrhea, or constipation? ☐ Yes ☐ No
If yes, list:

Resources

Working stove and refrigerator? ☐ Yes ☐ No
☐ WIC ☐ Food Stamps
☐ Meals in child care ☐ Head Start
☐ Summer food program ☐ Food pantry or soup kitchen
Do you need help in obtaining food? ☐ Yes ☐ No

Feeding Skills

Is child weaned from bottle by 18 months? ☐ Yes ☐ No
Is child able to feed self after 2 years? ☐ Yes ☐ No ☐ N/A
*Does child have any feeding problems? ☐ Yes ☐ No
Check all that apply:
☐ sucking ☐ chewing ☐ choking
☐ swallowing ☐ gagging ☐ other (specify):

Dietary Practices

*Is child on a therapeutic or special diet? ☐ Yes ☐ No
If yes, describe: Prescribed by:
*Any major food allergies? ☐ Yes ☐ No
If yes, list: Symptoms:
*Any food groups refused or omitted? ☐ Yes ☐ No
If yes, list:
Does child eat dirt, clay, paint chips, or other non-foods? ☐ Yes ☐ No
Does child under 3 eat hot dogs, grapes, nuts, popcorn, or hard candies? ☐ Yes ☐ No ☐ N/A
Does child or family eat or avoid any special foods for religious or health reasons? ☐ Yes ☐ No
If yes, describe:

Health Habits

Hours of TV per day:
How many minutes per day is child physically active?
What type of activity?
How many meals given daily?
Are meals eaten with family? ☐ Yes ☐ No
Are snacks given? ☐ Yes ☐ No
If yes, list:
How many snacks per day, including beverages such as fruit juice, fruit drinks, or sodas?
How often do you brush and floss child's teeth?
Encouraged to clean plate? ☐ Yes ☐ No
Vitamin/mineral pills? ☐ Yes ☐ No
If yes, list brand or type:

*If yes to any of these questions, complete a 24-hour dietary recall.

C.16 Mental Health Interview Tool/Referral Form (Ages 0–2 Years)

Mental Health Interview Tool/Referral Form

Ages 0 to 2

Child's Name: ____________________

Birth Date: ____________________

Date: ____________________

*For this age group you will obtain information from the parent/caregiver and from your own observations of the child. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.*

Feelings: Does your child display feelings that concern you or seem out of the ordinary?

Infants
- ❏ Anxious
- ❏ Cries excessively
- ❏ Cries too little

1 to 2 Years
- ❏ Irritable
- ❏ Angry
- ❏ Sad
- ❏ Fearful
- ❏ Sullen
- ❏ Anxious
- ❏ Cries excessively
- ❏ Cries too little

Behavior: Does your child display behavior that concerns you or seems out of the ordinary for his/her age?

Infants
- ❏ Overactive
- ❏ Listlessness

1 to 2 Years
- ❏ Overactive
- ❏ Listlessness
- ❏ Harms others
- ❏ Frequent temper tantrums

Social Interaction: Do you have concerns about how your child gets along with you? Other family members or adults? Siblings?

Infants
- ❏ No eye contact or smile
- ❏ Stiffens and arches
- ❏ Not responsive

1 to 2 Years
- ❏ * No eye contact or smile
- ❏ Clings excessively
- ❏ Not responsive
- ❏ Language delay

Thinking: Do you think your child's development is normal for age?

Infants (> 8 months)
- ❏ No communication skills (pointing to request an object) or efforts to make words

1 to 2 Year
- ❏ Mistrustful
- ❏ Problems concentrating or paying attention

Physical Problems: Do you have any concerns about your child's physical health? If physical problems exist, have they been medically evaluated?

Infants to 2 Years
- ❏ Low weight or weight loss
- ❏ Frequent vomiting
- ❏ Eating problem (poor appetite, eats nonfoods)
- ❏ Sleeping problem (frequent night waking)
- ❏ Lethargic

Other: Are there any situations which are causing your family particular stress at this time?
Has this child or his/her parents been subject to neglect, physical, sexual, or emotional abuse?
If yes, what form, when, treatment initiated, etc.?
Did the mother of this child use drugs or drink alcohol during the pregnancy?

C.17 Mental Health Interview Tool/Referral Form (Ages 0–2 Years) (Spanish)

Instrumento para la Evaluación de la Salud Mental y Formulario para Tratamiento con un Especialista

Nombre del Niño:________________________
Fecha de Nacimiento: ____________________
Fecha: ________________________________

De Recién Nacido a 2 Años de Edad

*Para los niños que pertenecen a este grupo usted obtendrá información de los padres/personas encargadas y de sus propias observaciones del bebé. Marque las características que le preocupen. *La presencia de alguno de estos síntomas o comportamientos puede indicar que el niño está en una crisis, y se debe haces un esfuerzo para asegurar que se le evalúe pronto.*

Sentimientos: ¿Muestra su niño sentimientos que le preocupan o que parezcan extraños?

Recién Nacidos
- ❑ Ansioso
- ❑ Llora demasiado
- ❑ Llora muy poco

De 1 a 2 Años
- ❑ Se irrita
- ❑ Se enoja
- ❑ Está triste
- ❑ Tiene miedo
- ❑ Malhumorado
- ❑ Ansioso
- ❑ Llora demasiado
- ❑ Llora muy poco

Comportamientos: ¿Muestra su niño un compartamiento que le preocupa o que parezca extraño para su edad?

Recién Nacidos
- ❑ Es demasiado activo
- ❑ Es indiferente

De 1 a 2 Años
- ❑ Es demasiado activo
- ❑ Es indiferente
- ❑ Lastima a los demás
- ❑ Hace berrinches temperamentales frecuentemente

Interacciones Sociales: ¿Se preocupa sobre cómo se lleva su niño con usted? ¿Con otros miembros de la familia o adultos? ¿Con sus hermanos?

Recién Nacidos
- ❑ No ve a los ojos ni sonríe
- ❑ Se pone tieso y se dobla arqueando la espalada
- ❑ No muestra mucho interés

De 1 a 2 Años
- ❑ *No ve a los ojos ni sonríe
- ❑ Se pega a usted excesivamente
- ❑ No muestra mucho interés
- ❑ Está atrasado en el lenguaje

Pensamientos: ¿Cree usted que el desarrollo de su niño es normal para su edad?

Recién Nacidos (>8 meses)
- ❑ No tiene habilidad para comunicarse (apunta para pedir un objeto) ni se esfuerza para decir palabras

De 1 a 2 Años
- ❑ No tiene confianza
- ❑ Tiene problemas para concentrarse o para poner atención

Problemas Físicos: ¿Se preocupa sobre la salud física de su niño? Si existen problemas físicos, ¿han sido evaluados médicamente?

Recién Nacidos a 2 Años
- ❑ Peso bajo o pérdida de peso
- ❑ Se vomita frecuentemente
- ❑ Tiene problemas para comer (poco apetito, come alimentos que no son saludables)
- ❑ Tiene problemas para dormir (se despierta frecuentemente por las noches)
- ❑ Es letárgico

Otra: ¿Hay alguna situación que le esté causando a su familia cierta tensión ahora?
¿Ha sido este niño o sus padres sujetos a la negligencia, o al abuso físico, sexual o emocional?
Si contesta sí, ¿de qué manera?, ¿cuándo?, ¿se ha comenzado algún tratamiento?, etc.
¿Usó la mamá de este niño drogas o tomó bebidas alcohólicas durante su embarazo?

C.18 Mental Health Interview Tool/Referral Form (Ages 3-9 Years)

Mental Health Interview Tool/Referral Form

Ages 3 to 9

Child's Name: ___________________________
Birth Date: ______________________________
Date: ____________________________________

*For this age group you will obtain information from the parent/caregiver and from your own observations of the child's behavior. If possible, interview the parent alone when asking questions about sexual or physical abuse. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.*

Feelings:

Does your child display feelings that concern you or seem out of the ordinary for age?

- ❑ Restless
- ❑ Sad or cries easily
- ❑ Excessively guilty
- ❑ Lack of remorse
- ❑ Irritable, angers or temper tantrums easily
- ❑ Sullen
- ❑ Fearful or anxious

Behavior:

Does your child frequently display behavior that seems out of the ordinary for age?

- ❑ Problems in school
- ❑ * Harms other children or animals
- ❑ Lacks interest in things s/he used to enjoy
- ❑ Engages in sexual play with others, toys, animals
- ❑ * Destroys possessions or other property
- ❑ Steals
- ❑ Refuses to talk
- ❑ * Sets fires
- ❑ Overactive
- ❑ * Self-destructive
- ❑ * Has been in trouble with the police (older child)

Social Interaction:

Do you have concerns about how child gets along with you, other family members, playmates, other adults?

- ❑ Withdraws including no eye contact
- ❑ Clings excessively
- ❑ Difficulty making and keeping friends
- ❑ Defiant, a discipline problem
- ❑ Severe or frequent tantrums
- ❑ Aggressive
- ❑ Argues excessively
- ❑ Refuses to go to school
- ❑ Prefers to be alone

Thinking:

Have you noticed any of the following to be a problem for your child?

- ❑ * Frequently confused
- ❑ Daydreams excessively
- ❑ Distracted, doesn't pay attention
- ❑ * Bizarre thoughts
- ❑ Mistrustful
- ❑ * Sees or hears things that are not there (excluding imaginary friends in younger children)
- ❑ Blames others for his/her misdeeds or thoughts
- ❑ * Talks about death
- ❑ * Frequent memory loss
- ❑ Schoolwork is slipping (grades going down)

Physical Problems:

Do you have any concerns about the following physical signs? Has this been evaluated?

- ❑ Daytime wetting
- ❑ Soils pants
- ❑ Refusal to eat
- ❑ Headaches
- ❑ Excessive weight loss or gain
- ❑ Sleep problems, nightmares, sleep-walking, early waking
- ❑ Vomits frequently
- ❑ Frequent stomachaches
- ❑ Lacks energy

Other:

Is this child accident-prone?
Are there any situations that are causing your family particular stress?
Has this child or his/her parents been subject to neglect, physical, sexual or emotional abuse? If yes, what type, when, treatment, etc.
* Is this child at risk for out-of-home placement because of behavior problems?

C.19 Mental Health Interview Tool/Referral Form (Ages 3–9 Years) (Spanish)

Instrumento para la Entrevista de la Salud Mental y
Formulario para Tratamiento con un Especialista
De 3 a 9 Años de Edad

Nombre del Niño:_______________________
Fecha de Nacimiento: ___________________
Fecha: _________________________________

*Para los niños que pertenecen a este grupo usted obtendrá informatción de los padres/tudor y de sus propias observaciones del comportamiento del niño. Si es posible, entreviste a los padres solos cuando haga preguntas sobre el abuso sexual o físico. Marque las características que le preocupen. *La presencia de alguno de estos síntomas o comportamientos pueden indicar que el niño está pasando por una crisis, y se debe hacer un esfuerzo para asegurar que se le evalúe pronto.*

Sentimientos:

¿Muestra su niño sentimientos que le preocupan o que parezcan extraños para su edad?

- ❑ Es inquieto
- ❑ Está triste o llora fácilmente
- ❑ Muestra mucha culpabilidad
- ❑ No tiene remordimiento
- ❑ Se irrita, enoja, o hace berrinches temperamentales fácilmente
- ❑ Es malhumorado
- ❑ Tiene miedo o está ansioso

Comportamiento:

¿Muestra su niño frecuentemente un comportamiento que le parezca extraño para su edad?

- ❑ Problemas en la escuela
- ❑ *Lastima a otros niños o a animales
- ❑ No tien interés en cosas que antes disfrutaba
- ❑ Participa en juegos sexuales con juguetes, animales, o con los demás
- ❑ *Destruye cosas personales o ajenas
- ❑ Roba
- ❑ Se niega a hablar
- ❑ Enciende fuegos
- ❑ Es demasiado activo
- ❑ *Tiene un comportamiento de autodestrucción
- ❑ *Ha tenido problemas con la policía (con otro niño)

Interacción Sociales:

¿Se preocupa sobre cómo se lleva su niño con usted? ¿Con otros miembros de la familia? ¿Con otros adultos? o ¿Con sus amigos de juego?

- ❑ Se retira sin dirgir la mirada a los ojos
- ❑ Se pega a usted excesivamente
- ❑ Se le dificulta hacer y mantener amistades
- ❑ Es desafiante, un problema de disciplina
- ❑ Hace berrinches temperamentales fuertes o frecuentemente
- ❑ Es agresivo
- ❑ Discute demasiado
- ❑ Se niega a ir a la escuela
- ❑ Prefiere estar solo

Pensamientos:

¿Ha notado si alguno de los siguientes es un problem para su niño?

- ❑ *Se confunde frecuentemente
- ❑ Sueña despierto demasiado
- ❑ Se distrae, no pone atención
- ❑ *Tiene pensamientos raros
- ❑ Es desconfiado
- ❑ *Mira u oye cosas que no están allí (excepto los amigos) imaginarios en niños más pequeños
- ❑ Culpa a otros por algo que hizo mal o por sus pensamientos
- ❑ *Habla sobre la muerte
- ❑ *Pierde la memoria frecuentemente
- ❑ Se está atrasando en el trabajo de la escuela (sus grados están bajando)

C

Problemas Físicos:

¿Le preocupa alguna de las siguientes señales físicas? ¿Han sido estas evaluadas?

- ❑ Se orina durante el día
- ❑ Se ensucia
- ❑ Se niega a comer
- ❑ Tiene dolores de cabeza
- ❑ Pérdida o aumento de peso excesivo
- ❑ Tiene problemas para dormir, pesadillas, sonambulismo, se despierta temprano
- ❑ Se vomita frecuentemente
- ❑ Tiene dolores de estómago frecuentemente
- ❑ No tiene energía

Otros:

¿Tiende este niño a tener accidentes? ¿Hay alguna situación que le esté causando a su familia tensión en particular? ¿Ha sido este niño o sus padres sujetos a la negligencia, o al abuso físico, sexual o emocional? Si, sí. ¿En que forma? ¿Cuando? ¿Tipo de tratamiento?, etc. *¿Corre el riesgo su niño de ser llevado a otro lugar fuera de casa por problemas de comportamiento?

C.21 Mental Health Interview Tool/Referral Form (Ages 10–12 Years) (Spanish)

Instrumento para la Entrevista de la Salud Mental y
Formulario para Tratamiento con un Especialista
De 10 a 12 Años de Edad

Nombre del Niño:_______________________
Fecha de Nacimiento: ___________________
Fecha: ______________________________

*Ambos, el niño y los padres podrán proveer información, y es importante incorporar al niño en la entrevista. En cada sección, se le hace una pregunta ejemplar a los padres. Obtenga, lo mejor que pueda, la percepción del niño sobre la respuesta de sus padres con una pregunta como “¿Estás de acuerdo con lo que dice tu mamá?” Sería conveniente dedicar tiempo para hablar solamente con el tutor del niño. Se debe entrevistar al niño solo cuando se hagan preguntas sobre el abuso sexual o físico y sobre el abuso de sustancias como las drogas y las bebidas alcohólicas. Marque las características que le preocupan. *La presencia de alguno de estos síntomas o comportamientos pueden indicar que el niño está pasando por una crisis, y se debe hacer un esfuerzo para asegurar que se le evalúe pronto.*

Sentimientos:

¿Tiene su niño (tienes) sentimientos que le (te) preocupupan o que parezcan extraños para su (tu) edad?

- ❑ Es inquieto
- ❑ Está triste o llora fácilmente
- ❑ Se siente culpable
- ❑ Se irrita o enoja fácilmente
- ❑ Es malhumorado
- ❑ Tien miedo o está ansioso
- ❑ Se aburre

Comportamiento:

¿Se (Te) comporta(s) de una manera que parecen extrañas para su (tu) edad?

- ❑ Problemas en la escuela
- ❑ Amenaza o lastima a otros niños o a animales
- ❑ No tiene interés en cosas que antes disfrutaba
- ❑ Participa en juegos sexuales con juguetes, animales, o con los demás
- ❑ *Destruye cosas personales o ajenas
- ❑ Roba
- ❑ Se niega a hablar
- ❑ *Enciende fuegos
- ❑ Es demasiado activo
- ❑ *Ha tenido problemas con la policía
- ❑ *Tiene un comportamiento de autodestrucción

Interacción Sociales:

¿Se preocupa(s) sobre cómo se (te) lleva(s) su niño con los

miembros de la familia? ¿Con otros adultos? ¿O niños?

- ❑ Prefiere estar solo
- ❑ Se le dificulta hacer o tener amistades
- ❑ Es desafiante, un problema de disciplina
- ❑ Es agresivo
- ❑ Discute demasiado
- ❑ Se niega a ir a la escuela

Pensamientos:

¿Ha(s) notado si alguno de los siguientes es un problem para su niño (ti)?

- ❑ *Se confunde frecuentemente
- ❑ Sueña despierto demasiado
- ❑ Se distrae, no pone atención
- ❑ Es desconfiado
- ❑ *Mira u oye cosas que no están allí
- ❑ Culpa a otros por algo que hizo mal o por sus pensamientos
- ❑ *Habla sobre la muerte o el suicidio
- ❑ *Pierde la memoria frecuentemente
- ❑ *Tiene pensamientos raros
- ❑ Se está atrasando en el trabajo de la escuela (sus grados están bajando)

Problemas Físicos:

¿Le (te) preocupa alguna de las siguientes señales físicas? ¿Han sido estas evaluadas?

- ❑ No tiene energía
- ❑ Usa laxantes
- ❑ Se vomita frecuentemente
- ❑ Se niega a comer, come a escondidas
- ❑ Tiene dolores de estómago frecuentemente
- ❑ Tiene dolores de cabeza
- ❑ Tiene problemas para dormir, pesadillas, sonambulismo, se despierta temprano, se despierta seguido por la noche

Otros:

¿Es este niño (Eres) propenso a tener accidentes? ¿Hay alguna situación que le esté causando a su (tu) familia tensión en particular? ¿Ha sido este niño (Has sido tu) o sus padres sujetos a la negligencia, o al abuso físico, sexual o emocional? Si, sí, ¿Que tipo?, ¿Cuándo?, ¿Tipo de tratamiento?

- ❑ *¿Corre el riesgo su niño de ser llevado a otro lugar fuera de casa por problemas de comportamiento?
- ❑ ¿Ha sido este niño tratado por problemas de salud mental o por el abuso de sustancias como drogas y bebidas alcohólicas?

Preguntas Sobre el Abuso de Sustancias: ________ ____________

(Tal vez quiera usar pruebas de detección como TACE, CAGE, MAST para obtener información sobre el abuso de sustancias como drogas y bebidas alcóholicas.)

- ❑ Ha sido identificado como un problema

C.22 Mental Health Interview Tool/Referral Form (Ages 13–20 Years)

Mental Health Interview Tool/Referral Form

Ages 13 to 20

Child's Name: ___________________________

Birth Date: ______________________________

Date: ___________________________________

*You may begin with a joint interview or begin with separate interviews with the parent/caregiver and adolescent. It is preferable to interview the adolescent first. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.*

Feelings:

Do you (does your teen) have feelings that concern you or seem out of the ordinary for (their) age?

- ❏ Restless
- ❏ Sad or cries easily
- ❏ Guilty
- ❏ Irritable or angers easily
- ❏ Sullen
- ❏ Fearful or anxious
- ❏ Bored

Behavior:

Do you (does your child) behave in ways that seems out of the ordinary for your (their) age?

- ❏ Problems at school or work
- ❏ * Threatens or harms other children or animals
- ❏ Lacks interest in things s/he used to enjoy
- ❏ Engages in sexual play with others, toys, animals
- ❏ * Destroys possessions or other property
- ❏ Steals
- ❏ Refuses to talk
- ❏ * Sets fires
- ❏ Overactive
- ❏ * Has been in trouble with the police
- ❏ * Self-destructive

Social Interaction:

Do you have concerns about how (you) your child gets along with family members, other adults, or peers?

- ❏ Prefers to be alone
- ❏ Difficulty making and keeping friends
- ❏ Defiant, a discipline problem
- ❏ Aggressive
- ❏ Argues excessively
- ❏ Refuses to go to school

Thinking:

Have you noticed any of the following to be a problem for you (your child)?

- ❏ * Frequently confused
- ❏ Daydreams excessively
- ❏ Distracted, doesn't pay attention
- ❏ Mistrustful
- ❏ * Sees or hears things that are not there
- ❏ Blames others for his/her misdeeds or thoughts
- ❏ * Talks about death or suicide
- ❏ * Frequent memory loss
- ❏ * Bizarre thoughts
- ❏ Schoolwork is slipping (grades going down)

Physical Problems:

Do you have any concerns about the following physical signs? Has this been evaluated?

- ❏ Lacks energy
- ❏ Uses laxatives
- ❏ Vomits frequently
- ❏ Food refusal, secretive eating
- ❏ Frequent stomachaches
- ❏ Headaches
- ❏ Excessive weight loss or gain
- ❏ Sleep problems, nightmares, sleep-walking, early waking, frequent night waking

Other:

Are you (is this child) accident-prone?
Are there any situations that are causing your family particular stress?
Have you (has this child) or your (his/her) parents been subject to neglect, physical, sexual or emotional abuse? If yes, what type, when, treatment, etc.

- ❏ * Are you (is this child) at risk for out-of-home placement because of behavior problems?
- ❏ Have you (has this child) been treated for mental health problems or substance abuse?

Substance Abuse Questions:

(May want to use screens such as the TACE, CAGE, MAST to obtain information concerning substance abuse.)

- ❏ Has been identified as a problem

- ❑ Juega juegos sexuales con otros niños, juguetes, o animales
- ❑ Destruye cosas personales u ajenas
- ❑ Roba
- ❑ Se niega a hablar
- ❑ Provoca incendios
- ❑ Es demasiado activo
- ❑ Se lastima
- ❑ Ha tenido problemas con la policía

INTERACCIONES SOCIALES

¿Se preocupa sobre cómo se lleva su niño con usted? ❑ Sí ❑ No
¿Con otros miembros de la familia o adultos? ❑ Sí ❑ No
¿Con sus compañeros de juego? ❑ Sí ❑ No

- ❑ Se aleja y no ve a nadie a los ojos
- ❑ La mayoría del tiempo no se le despega
- ❑ Se le dificulta hacer y mantener amistades
- ❑ Es desafiante, tiene un problema de disciplina
- ❑ Hace berrinches tempermentales fuertes o frecuentemente
- ❑ Siempre molesta a otros o frecuentemente se pelea (pegando, etc.)
- ❑ Discute mucho
- ❑ No quiere asistir a la escuela
- ❑ Prefiere estar solo

PENSAMIENTOS

¿Son algunas de estas características un problema para su niño? ❑ Sí ❑ No

- ❑ Se confunde frecuentemente (no entiende lo que está pasando)
- ❑ Sueña mucho despierto
- ❑ Se distrae, no pone atención
- ❑ Tiene pensamientos muy extraños
- ❑ Se está atrasando en el trabajo de la escuela (sus grados están bajando)
- ❑ No le tiene confianza a los demás
- ❑ Mira u oye cosas que no están allí
- ❑ Culpa a otros por algo que hizo mal o por sus pensamientos
- ❑ Habla mucho sobre la muerte
- ❑ Frecuentemente no se acuerda de cosas

C.28 Mental Health Parent Questionnaire (Ages 10–12 Years) (2 Pages)

Mental Health Parent Questionnaire

Ages 10 to 12 Years

Child's Name: ______________________________

Birth Date: ______________________________

Today's Date: ______________________________

To the Parent: *If you will assist us by filling out this form, we can help you find your child's strengths and any problem areas, too. Your answers will help us to know if we need to talk with you and find out more about your child. Please check all items below that are true for your child. Some of the behaviors noted may be normal but if you are concerned please let us know.*

Feelings	Does your child (do you) show feelings that concern you or seem strange for their (your) age? ❑ Yes ❑ No	
	❑ Is restless ❑ Is sad or cries easily ❑ Is guilty ❑ Is irritable or angers easily	❑ Is sullen ❑ Is fearful ❑ Is bored

Behavior	Does your child (do you) often do things that seem strange for their (your) age? ❑ Yes ❑ No	
	❑ Has problems in school ❑ Threatens or harms other children or animals ❑ Lacks interest in things s/he used to enjoy ❑ Is involved in sexual activity ❑ Destroys possessions or other property ❑ Steals	❑ Refuses to talk ❑ Sets fires ❑ Is overactive ❑ Hurts himself or herself ❑ Has been in trouble with the police

Social Interaction	Do you have any concerns about how your child (you) get(s) along with family members? ❑ Yes ❑ No With other adults? ❑ Yes ❑ No With other children? ❑ Yes ❑ No	
	❑ Prefers to be alone ❑ Has a hard time making and keeping friends ❑ Is defiant, a disciplinary problem	❑ Picks on others a lot or often gets into fights (hitting, etc.) ❑ Argues too much ❑ Will not go to school

Thinking	Are any of these a problem for your child (you)? ❑ Yes ❑ No	
	❑ Is frequently confused (does not understand what is going on) ❑ Daydreams a lot ❑ Is distracted, doesn't pay attention ❑ Has very strange thoughts ❑ Schoolwork is slipping (grades going down)	❑ Does not trust others ❑ Sees or hears things that are not there ❑ Blames others for his/her misdeeds or thoughts ❑ Talks about death or suicide a lot ❑ Often cannot remember things

C.29 Mental Health Parent Questionnaire (Ages 10–12 Years) (2 Pages) (Spanish)

Cuestionario de la Salud Mental para los Padres De 10 a 12 Años de Edad

Nombre del Niño: ________________________________

Fecha de Nacimiento: ____________________________

Fecha: ____

Para los Padres: *Si nos ayuda llenando este formulario, le podremos ayudar a encontrar las áreas fuertes y también cualquier área problématica que tenga su hijo. Sus respuestas nos ayudarán a saber si necesitamos hablar con usted y saber más sobre su niño. Favor de marcar todas las características abajo que son ciertas para su niño. Algunos de los comportamientos en las listas tal vez sean normales, pero si usted está preocupado, favor de informarnos*.

SENTIMIENTOS

¿Tiene su niño sentimientos que le preocupan o tal vez parezcan extraños para su edad? ❑ Sí ❑ No

❑ Es inquieto	❑ Es malhumorado
❑ Es triste o llora fácilmente	❑ Siente miedo
❑ Se siente culpable	❑ Se aburre
❑ Es de mal carácter o se enoja fácilmente	

COMPORTAMIENTO

¿Hace su niño cosas que le parezcan extrañas para su edad? ❑ Sí ❑ No

❑ Tiene problemas en la escuela	❑ Se niega a hablar
❑ Amenaza o lastima a otros niños o a los animales	❑ Provoca incendios
❑ No le interesan las cosas que antes le gustaban	❑ Es demasiado activo
❑ Participa en actividades sexuales	❑ Se lastima
❑ Destruye cosas personales o ajenas	❑ Ha tenido problemas con la policía
❑ Roba	

INTERACCIONES SOCIALES

¿Se preocupa sobre cómo se lleva su niño con usted? ❑ Sí ❑ No
¿Con otros adultos? ❑ Sí ❑ No
¿Con otros niños? ❑ Sí ❑ No

❑ Prefiere estar solo	❑ Siempre molesta a otros o frecuentemente se pelea (pegando, etc.)
❑ Se le dificulta hacer y mantener amistades	❑ Discute mucho
❑ Es desafiante, tiene un problema de disciplina	❑ No quiere asistir a la escuela

C.32 Recommended Childhood Immunization Schedule, 2006 (2 Pages)

DEPARTMENT OF HEALTH AND HUMAN SERVICES • CENTERS FOR DISEASE CONTROL AND PREVENTION

Recommended Childhood and Adolescent Immunization Schedule UNITED STATES • 2006

Vaccine ▼ / Age ▶	Birth	1 month	2 months	4 months	6 months	12 months	15 months	18 months	24 months	4–6 years	11–12 years	13–14 years	15 years	16–18 years
Hepatitis B[1]	HepB	HepB		*HepB[1]*		HepB					HepB Series			
Diphtheria, Tetanus, Pertussis[2]			DTaP	DTaP	DTaP			DTaP		DTaP	Tdap		Tdap	
Haemophilus influenzae type b[3]			Hib	Hib	*Hib[3]*	Hib								
Inactivated Poliovirus			IPV	IPV		IPV				IPV				
Measles, Mumps, Rubella[4]						MMR				MMR		MMR		
Varicella[5]							Varicella				Varicella			
Meningococcal[6]							Vaccines within broken line are for selected populations		MPSV4		MCV4		MCV4 / MCV4	
Pneumococcal[7]			PCV	PCV	PCV	PCV			PCV		PPV			
Influenza[8]						Influenza (Yearly)					Influenza (Yearly)			
Hepatitis A[9]										HepA Series				

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of December 1, 2005, for children through age 18 years. Any dose not administered at the recommended age should be administered at any subsequent visit when indicated and feasible. ▇ Indicates age groups that warrant special effort to administer those vaccines not previously administered. Additional vaccines may be licensed and recommended during the year. Licensed combination vaccines may be used whenever any components of the combination are indicated and other components of the vaccine are not contraindicated and if approved by the Food and Drug Administration for that dose of the series. Providers should consult the respective ACIP statement for detailed recommendations. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS). Guidance about how to obtain and complete a VAERS form is available at **www.vaers.hhs.gov** or by telephone, **800-822-7967**.

▇ Range of recommended ages ▇ Catch-up immunization ▇ 11–12 year old assessment

1. **Hepatitis B vaccine (HepB).** ***AT BIRTH:*** **All newborns** should receive monovalent HepB soon after birth and before hospital discharge. **Infants born to mothers who are HBsAg-positive** should receive HepB and 0.5 mL of hepatitis B immune globulin (HBIG) within 12 hours of birth. **Infants born to mothers whose HBsAg status is unknown** should receive HepB within 12 hours of birth. The mother should have blood drawn as soon as possible to determine her HBsAg status; if HBsAg-positive, the infant should receive HBIG as soon as possible (no later than age 1 week). **For infants born to HBsAg-negative mothers,** the birth dose can be delayed in rare circumstances but only if a physician's order to withhold the vaccine and a copy of the mother's original HBsAg-negative laboratory report are documented in the infant's medical record. ***FOLLOWING THE BIRTHDOSE:*** The HepB series should be completed with either monovalent HepB or a combination vaccine containing HepB. The second dose should be administered at age 1–2 months. The final dose should be administered at age ≥24 weeks. It is permissible to administer 4 doses of HepB (e.g., when combination vaccines are given after the birth dose); however, if monovalent HepB is used, a dose at age 4 months is not needed. **Infants born to HBsAg-positive mothers** should be tested for HBsAg and antibody to HBsAg after completion of the HepB series, at age 9–18 months (generally at the next well-child visit after completion of the vaccine series).

2. **Diphtheria and tetanus toxoids and acellular pertussis vaccine (DTaP).** The fourth dose of DTaP may be administered as early as age 12 months, provided 6 months have elapsed since the third dose and the child is unlikely to return at age 15–18 months. The final dose in the series should be given at age ≥4 years.

   Tetanus and diphtheria toxoids and acellular pertussis vaccine (Tdap – adolescent preparation) is recommended at age 11–12 years for those who have completed the recommended childhood DTP/DTaP vaccination series and have not received a Td booster dose. Adolescents 13–18 years who missed the 11–12-year Td/Tdap booster dose should also receive a single dose of Tdap if they have completed the recommended childhood DTP/DTaP vaccination series. Subsequent **tetanus and diphtheria toxoids (Td)** are recommended every 10 years.

3. ***Haemophilus influenzae*** **type b conjugate vaccine (Hib).** Three Hib conjugate vaccines are licensed for infant use. If PRP-OMP (PedvaxHIB® or ComVax® [Merck]) is administered at ages 2 and 4 months, a dose at age 6 months is not required. DTaP/Hib combination products should not be used for primary immunization in infants at ages 2, 4 or 6 months but can be used as boosters after any Hib vaccine. The final dose in the series should be administered at age ≥12 months.

4. **Measles, mumps, and rubella vaccine (MMR).** The second dose of MMR is recommended routinely at age 4–6 years but may be administered during any visit, provided at least 4 weeks have elapsed since the first dose and both doses are administered beginning at or after age 12 months. Those who have not previously received the second dose should complete the schedule by age 11–12 years.

5. **Varicella vaccine.** Varicella vaccine is recommended at any visit at or after age 12 months for susceptible children (i.e., those who lack a reliable history of chickenpox). Susceptible persons aged ≥13 years should receive 2 doses administered at least 4 weeks apart.

6. **Meningococcal vaccine (MCV4).** Meningococcal conjugate vaccine (MCV4) should be given to all children at the 11–12 year old visit as well as to unvaccinated adolescents at high school entry (15 years of age). Other adolescents who wish to decrease their risk for meningococcal disease may also be vaccinated. All college freshmen living in dormitories should also be vaccinated, preferably with MCV4, although **meningococcal polysaccharide vaccine (MPSV4)** is an acceptable alternative. Vaccination against invasive meningococcal disease is recommended for children and adolescents aged ≥2 years with terminal complement deficiencies or anatomic or functional asplenia and certain other high risk groups (see *MMWR* 2005;54 [RR-7]:1-21); use MPSV4 for children aged 2–10 years and MCV4 for older children, although MPSV4 is an acceptable alternative.

7. **Pneumococcal vaccine.** The heptavalent **pneumococcal conjugate vaccine (PCV)** is recommended for all children aged 2–23 months and for certain children aged 24–59 months. The final dose in the series should be given at age ≥12 months. **Pneumococcal polysaccharide vaccine (PPV)** is recommended in addition to PCV for certain high-risk groups. See *MMWR* 2000; 49(RR-9):1-35.

8. **Influenza vaccine.** Influenza vaccine is recommended annually for children aged ≥6 months with certain risk factors (including, but not limited to, asthma, cardiac disease, sickle cell disease, human immunodeficiency virus [HIV], diabetes, and conditions that can compromise respiratory function or handling of respiratory secretions or that can increase the risk for aspiration), healthcare workers, and other persons (including household members) in close contact with persons in groups at high risk (see *MMWR* 2005;54[RR-8]:1-55). In addition, healthy children aged 6–23 months and close contacts of healthy children aged 0–5 months are recommended to receive influenza vaccine because children in this age group are at substantially increased risk for influenza-related hospitalizations. For healthy persons aged 5–49 years, the intranasally administered, live, attenuated influenza vaccine (LAIV) is an acceptable alternative to the intramuscular trivalent inactivated influenza vaccine (TIV). See *MMWR* 2005;54(RR-8):1-55. Children receiving TIV should be administered a dosage appropriate for their age (0.25 mL if aged 6–35 months or 0.5 mL if aged ≥3 years). Children aged ≤8 years who are receiving influenza vaccine for the first time should receive 2 doses (separated by at least 4 weeks for TIV and at least 6 weeks for LAIV).

9. **Hepatitis A vaccine (HepA).** HepA is recommended for all children at 1 year of age (i.e., 12–23 months). The 2 doses in the series should be administered at least 6 months apart. States, counties, and communities with existing HepA vaccination programs for children 2–18 years of age are encouraged to maintain these programs. In these areas, new efforts focused on routine vaccination of 1-year-old children should enhance, not replace, ongoing programs directed at a broader population of children. HepA is also recommended for certain high risk groups (see *MMWR* 1999; 48[RR-12]1-37).

The Childhood and Adolescent Immunization Schedule is approved by:
Advisory Committee on Immunization Practices www.cdc.gov/nip/acip • American Academy of Pediatrics www.aap.org • American Academy of Family Physicians www.aafp.org

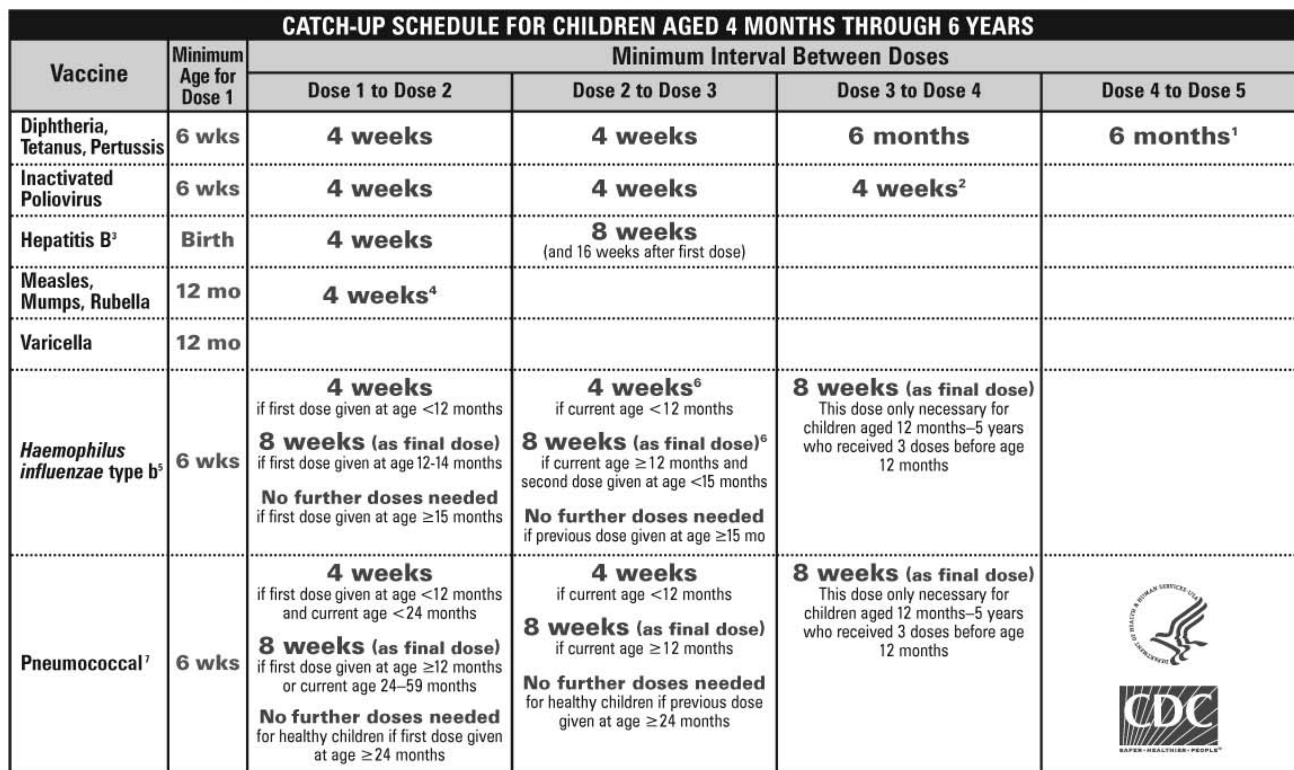
Recommended Immunization Schedule for Children and Adolescents Who Start Late or Who Are More Than 1 Month Behind

UNITED STATES • 2006

The tables below give catch-up schedules and minimum intervals between doses for children who have delayed immunizations. There is no need to restart a vaccine series regardless of the time that has elapsed between doses. Use the chart appropriate for the child's age.



CATCH-UP SCHEDULE FOR CHILDREN AGED 4 MONTHS THROUGH 6 YEARS

Vaccine	Minimum Age for Dose 1	Minimum Interval Between Doses			
		Dose 1 to Dose 2	Dose 2 to Dose 3	Dose 3 to Dose 4	Dose 4 to Dose 5
Diphtheria, Tetanus, Pertussis	6 wks	4 weeks	4 weeks	6 months	6 months[1]
Inactivated Poliovirus	6 wks	4 weeks	4 weeks	4 weeks[2]	
Hepatitis B[3]	Birth	4 weeks	8 weeks (and 16 weeks after first dose)		
Measles, Mumps, Rubella	12 mo	4 weeks[4]			
Varicella	12 mo				
Haemophilus influenzae type b[5]	6 wks	**4 weeks** if first dose given at age <12 months **8 weeks (as final dose)** if first dose given at age 12-14 months **No further doses needed** if first dose given at age ≥15 months	**4 weeks[6]** if current age <12 months **8 weeks (as final dose)[6]** if current age ≥12 months and second dose given at age <15 months **No further doses needed** if previous dose given at age ≥15 mo	**8 weeks (as final dose)** This dose only necessary for children aged 12 months–5 years who received 3 doses before age 12 months	
Pneumococcal[7]	6 wks	**4 weeks** if first dose given at age <12 months and current age <24 months **8 weeks (as final dose)** if first dose given at age ≥12 months or current age 24–59 months **No further doses needed** for healthy children if first dose given at age ≥24 months	**4 weeks** if current age <12 months **8 weeks (as final dose)** if current age ≥12 months **No further doses needed** for healthy children if previous dose given at age ≥24 months	**8 weeks (as final dose)** This dose only necessary for children aged 12 months–5 years who received 3 doses before age 12 months	CDC SAFER·HEALTHIER·PEOPLE

CATCH-UP SCHEDULE FOR CHILDREN AGED 7 YEARS THROUGH 18 YEARS

Vaccine	Minimum Interval Between Doses		
	Dose 1 to Dose 2	Dose 2 to Dose 3	Dose 3 to Booster Dose
Tetanus, Diphtheria[8]	4 weeks	6 months	**6 months** if first dose given at age <12 months and current age <11 years; otherwise **5 years**
Inactivated Poliovirus[9]	4 weeks	4 weeks	IPV[2,9]
Hepatitis B	4 weeks	8 weeks (and 16 weeks after first dose)	
Measles, Mumps, Rubella	4 weeks		
Varicella[10]	4 weeks		

1. **DTaP.** The fifth dose is not necessary if the fourth dose was administered after the fourth birthday.
2. **IPV.** For children who received an all-IPV or all-oral poliovirus (OPV) series, a fourth dose is not necessary if third dose was administered at age ≥4 years. If both OPV and IPV were administered as part of a series, a total of 4 doses should be given, regardless of the child's current age.
3. **HepB.** Administer the 3-dose series to all children and adolescents <19 years of age if they were not previously vaccinated.
4. **MMR.** The second dose of MMR is recommended routinely at age 4–6 years but may be administered earlier if desired.
5. **Hib.** Vaccine is not generally recommended for children aged ≥5 years.
6. **Hib.** If current age <12 months and the first 2 doses were PRP-OMP (PedvaxHIB® or ComVax® [Merck]), the third (and final) dose should be administered at age 12–15 months and at least 8 weeks after the second dose.
7. **PCV.** Vaccine is not generally recommended for children aged ≥5 years.
8. **Td.** Adolescent tetanus, diphtheria, and pertussis vaccine (Tdap) may be substituted for any dose in a primary catch-up series or as a booster if age appropriate for Tdap. A five-year interval from the last Td dose is encouraged when Tdap is used as a booster dose. See ACIP recommendations for further information.
9. **IPV.** Vaccine is not generally recommended for persons aged ≥18 years.
10. **Varicella.** Administer the 2-dose series to all susceptible adolescents aged ≥13 years.

Report adverse reactions to vaccines through the federal Vaccine Adverse Event Reporting System. For information on reporting reactions following immunization, please visit www.vaers.hhs.gov or call the 24-hour national toll-free information line 800-822-7967. Report suspected cases of vaccine-preventable diseases to your state or local health department.

For additional information about vaccines, including precautions and contraindications for immunization and vaccine shortages, please visit the National Immunization Program Website at www.cdc.gov/nip or contact 800-CDC-INFO (800-232-4636) (In English, En Español — 24/7)

C.33 Screening Schedule for Elevated Blood Lead Levels

Age of child	May use detailed parent questionnaire	May use abbreviated parent questionnaire	Blood lead test required	Conditions
6 months	yes			
12 months			yes	
18 months	yes			
24 months			yes	
3, 4, 5, and 6 years	yes, if any answer on abbreviated parent questionnaire is “yes”	yes		If a child has no record of a blood lead level test, administer one this visit.

Note: *A “yes” or “I don’t know” answer to any question on any parent questionnaire indicates that a blood lead test should be administered.*

CPT only copyright 2005 American Medical Association. All rights reserved.

C.34 Guidelines for Using the Detailed Parent Questionnaire: Risk Assessment for Lead Exposure

Guidelines for Using the
DETAILED PARENT QUESTIONNAIRE
Risk Assessment for Lead Exposure

IMPORTANT: When you have completed this questionnaire, please fax or mail a copy to the Texas Childhood Lead Poisoning Prevention Program.

Target population — You must administer a blood lead test to all children at ages 12 months and 24 months. You also must administer a blood lead test to a child between 36 and 72 months (3-6 years) of age if the child has no record of a blood lead test.

- ➢ Use this Detailed Parent Questionnaire at child's 6 month and 18 month doctor visits.
- ➢ At child's 3, 4, 5, and 6 year doctor visits, in lieu of a blood lead test you may use this Detailed Parent Questionnaire in the following situations:

  Child was tested at 12 and 24 months, and
  - has never had an elevated blood lead level test result, but
  - has had a "Yes" answer to any question on the Abbreviated Parent Questionnaire

Local community — You may know of situations in the child's community that could contribute to risk for lead exposure. Add questions about those situations to the interview document and ask them in any subsequent interview of the child's parent/guardian.

Additional topics for discussion and education can be found on the Physician Checklist for Parent Education Topics (form Pb-104).

"No" answers — If the answer to every question is an unqualified "No," the child may be considered at "low risk" for lead exposure.

"Yes" answer(s) — If the answer to any question is "Yes," the child is at "high risk" for lead exposure. Administer a blood lead test regardless of any previous blood lead test results. Continue testing the child according to the recommended periodicity schedule.

"I don't know" answers — If the answer to any question is "I don't know," clarifiy the the question or the topic. If the parent remains unsure after discussion, consider the response a "Yes" answer, and administer a blood lead test.

Spanish-speaking patients — This questionnaire is available in both English and Spanish.

Obtaining questionnaires — You may photocopy this questionnaire or download from the Texas Childhood Lead Poisoning Prevention Program site at http://www.dshs.state.tx.us/lead.

C.35 Detailed Parent Questionnaire: Risk Assessment for Lead Exposure (2 Pages)

Patient's Name: ______________________________

Date Questionnaire Administered: ______________________________

DETAILED PARENT QUESTIONNAIRE

RISK ASSESSMENT FOR LEAD EXPOSURE

1. Do you live in or often visit a house that was probably built before 1978?

   YES ☐ NO ☐ I DON'T KNOW ☐

2. Does your child live in or often visit a house that is being painted, remodeled, or having the paint scraped or sanded?

   YES ☐ NO ☐ I DON'T KNOW ☐

3. Does your child eat or chew on non-food things like paint chips or dirt?

   YES ☐ NO ☐ I DON'T KNOW ☐

4. Have any other members of the family or your child's playmates had high blood leads as far as you know?

   YES ☐ NO ☐ I DON'T KNOW ☐

5. Does your family live near or does your child play near any of these (circle the ones that apply):

   Smelter
   Hazardous waste site
   Lead industry
   Place where batteries are manufactured or repaired
   House construction site
   Heavily traveled major highway
   Place where cars are abandoned or repaired?

6. Do you give your child, or have you ever given your child, any of these products from another country:

   MEDICINES like greta or azarcon for empacho, alarcon, alkohl, bali goli, coral, ghasard, liga, pay-loo-ah, or rueda?

   YES ☐ NO ☐ I DON'T KNOW ☐

   NUTRITIONAL PILLS OTHER THAN VITAMINS?

   YES ☐ NO ☐ I DON'T KNOW ☐

Page 1 07/05

CPT only copyright 2005 American Medical Association. All rights reserved.

7. Does anyone living in your house work at a place where any of these things happen or have a hobby that involves these things (circle the ones that apply):

Radiator repair	Brass/copper foundry
Lead industry	Valve and pipe fittings
Welding	Bridge, tunnel and elevated highway construction
Battery manufacture or repair	Industrial machinery and equipment
House construction or repair	Re-loading bullets or making fishing weights
Smelting	Refinishing furniture
Chemical preparation	Burning lead-painted wood
Making pottery	Automotive repair shop
Going to a firing range	
Stained glass with lead solder	

8. Does anybody that your child spends a lot of time with (outside of your home) do any of these things or work at a place where these things are done?

   YES ☐ NO ☐ I DON'T KNOW ☐

9. Is imported or glazed pottery, or a Mexican bean pot, used to cook or store your food?

   YES ☐ NO ☐ I DON'T KNOW ☐

10. Does your child eat foods canned or packaged (such as candy) outside the U.S.?

   YES ☐ NO ☐ I DON'T KNOW ☐

CUESTIONARIO DETALLADO PARA LOS PADRES

1. ¿Vive usted en o visita frecuentemente alguna casa que probablemente haya sido construida antes de 1978?

   SÍ ☐ NO ☐ NO LO SÉ ☐

2. ¿Vive su hijo(a) en o visita frecuentemente una casa que está siendo pintada, remodelada, o en la que están pelando o lijando la pintura?

   SÍ ☐ NO ☐ NO LO SÉ ☐

3. ¿Su hijo(a) come o mastica cosas que no son comida, como pedazos de pintura o tierra?

   SÍ ☐ NO ☐ NO LO SÉ ☐

4. ¿Hasta donde que usted sepa, existe algún otro miembro de la familia o compañeritos de juego que hayan tenido altos niveles de plomo en la sangre?

   SÍ ☐ NO ☐ NO LO SÉ ☐

5. ¿Su familia vive cerca o su hijo(a) juega cerca de alguno de los siguientes lugares? (encierre en un círculo la respuesta)

   Fundición

   Sitio de desperdicios peligrosos

   Industria de plomo

   Lugar donde se fabrican o reparan baterías

   Sitio de construcción de una casa

   Autopista con mucho tráfico

   Lugar donde los autos son reparados o abandonados

6. ¿Le da o le ha dado usted alguna vez a su hijo(a) alguno de los siguientes productos provenientes de otro país?

   MEDICINAS tales como greta, o azarcón para el empacho, alarcón, alkohl, bali goli, coral, ghasard, liga, pay-loo-ah, o rueda?

   SÍ ☐ NO ☐ NO LO SÉ ☐

   PÍLDORAS NUTRICIONALES QUE NO SEAN VITAMINAS

   SÍ ☐ NO ☐ NO LO SÉ ☐

TEXAS Department of State Health Services

7. ¿Hay alguna persona viviendo en su casa que trabaje en un lugar donde se realice alguna de las cosas que describimos a continuación o que tengan un pasatiempo que involucre alguna de los siguientes? (encierre en un círculo la respuesta):
   Reparación de radiadores
   Industria del plomo
   Soldadura
   Fabricación o reparación de baterías
   Construcción o reparación de casas
   Fundición (de metales)
   Preparación de químicos
   Fabricación de cerámica
   Ir a un campo de tiro
   Fabricación de vitrales con soldadura de plomo
   Fundición de latón /cobre
   Partes sueltas para tubos de cañerías y válvulas
   Construcción de una autopista elevada, puente, túnel
   Equipo y maquinaria industrial
   Recargo de balas de armas de fuego o fabricación de pesas para pescar
   Terminado de muebles
   Quema de madera pintada con plomo
   Taller mecánico para autos

8. ¿Alguna persona con quien su hijo pasa largo tiempo, hace alguna de estas cosas o trabaja en lugares (fuera de la casa) donde se realizen las actividades antes mencionadas?
   SÍ ☐ NO ☐ NO LO SÉ ☐

9. ¿Usa usted productos de cerámica importada o con recubrimiento de barniz, o una olla para frijoles de México, para cocinar o para guardar su comida?
   SÍ ☐ NO ☐ NO LO SÉ ☐

10. ¿Come su hijo(a) productos enlatados o empacados (tales como dulces) fuera de los Estados Unidos?
   SÍ ☐ NO ☐ NO LO SÉ ☐

C.37 Guidelines for Using the Abbreviated Parent Questionnaire: Risk Assessment for Lead Exposure

Guidelines for Using the ABBREVIATED PARENT QUESTIONNAIRE

Risk Assessment for Lead Exposure

IMPORTANT: When you have completed this questionnaire, please fax or mail a copy to the Texas Childhood Lead Poisoning Prevention Program

Target population — You must administer a blood lead test to all children at ages 12 months and 24 months. You also must administer a blood lead test to a child between 36 and 72 months (3-6 years) of age if the child has no record of a blood lead test.

- At child's 3, 4, 5, and 6 year doctor visits, in lieu of a blood lead test you may use this Abbreviated Parent Questionnaire in the following situations:

  Child was tested at 12 and 24 months, and
  - has never had an elevated blood lead level test result, and
  - has never had a "Yes" answer to any question on this questionnaire

Local community — You may know of situations in the child's community that could contribute to risk for lead exposure. Add questions about those situations to the interview document and ask them in any subsequent interview of the child's parent/guardian.

Additional topics for discussion and education can be found on the Physician Checklist for Parent Education Topics (form Pb-104).

"No" answers — If the answer to every question is an unqualified "No," the child may be considered at "low risk" for lead exposure

"Yes" answer(s) — If the answer to any question is "Yes," the child is at "high risk" for lead exposure. Ask parent the questions on the Detailed Parent Questionnaire or administer a blood lead test.

"I don't know" answers — If the answer to any question is "I don't know," clarify the question or the topic. If the parent remains unsure after discussion, consider the response a "Yes" answer and use the Detailed Parent Questionnaire or administer a blood lead test.

Spanish-speaking patients — This questionnaire is available in both English and Spanish.

Obtaining questionnaires — You may photocopy this questionnaire or download from the Texas Childhood Lead Poisoning Prevention Program site at http://www.dshs.state.tx.us/lead.

Laboratory Protocols

CBC w/Auto Diff Reflex:
- Abnormal CBC: Manual Diff reported
- A CBC is abnormal when it meets the approved criteria. (Criteria available upon request.)

Urinalysis Reflex:
- Abnormal UA: microscopic and /or confirmatory testing performed when abnormal results are observed for protein, nitrite, leukocyte esterase and/or blood.

Urine Culture Reflex:
Abnormal UA with positive nitrite, leukocyte esterase, >5 WBC's or >2+ bacteria: Culture performed.

TSH Reflex:
- Abnormal TSH (<0.1 or >10.0 mIU/ml): Free T4 performed.

RPR:
- Positive Syphilis IgG AB, AB Index and RPR quantitative (titer).

Rheumatoid Factor Reflex:
- Positive RA Factor: titer performed.

HIV Reflex:
- Positive HIV: Western Blot performed.

Hepatitis B Surface Ag (HBsAg) Reflex:
- HbsAg borderline or positive samples will be confirmed by neutralization.

Hepatitis B Surface Ab (HbsAB):
- Positive: Semi-quantitative value reported for immune status.

Antibody Screen Reflex:
- Positive AB Screen: antibody identification will be performed.

Direct Coombs (DAT) Reflex:
- Positive DAT: IgG, C3 testing.

Cryptococci Reflex:
- Positive: Titer performed.

ANA Screen Reflex:
- Positive: anti-DNA testing performed (reference lab).

Note: *Medicare does not pay for routine screening tests (except PAP smears and some occult blood tests, please see current Medicare guidelines for approved screening intervals). Medicare will only pay for tests that are medically necessary for the diagnosis or treatment of the patient. The ordering physician must obtain a signed Advance Beneficiary Notice, (ABN), prior to submitting specimen to the laboratory if it is believed that Medicare is likely to deny payment. Components of panels may be ordered individually and billed separately to ensure physicians have adequate choice when making decisions regarding which tests are medically necessary for an individual patient. Physicians shall provide ICD-9 codes for all tests or panels in the space provided. The Office of the Inspector General takes the position that a physician who orders medically unnecessary tests may be subject to civil penalties.*

Microbiology CPT codes for additional procedures (such as susceptibility testing, sero-typing, etc) will be billed in addition to primary culture codes when appropriate.

The M47 test requisition form is only a partial list of tests available. If a test you require is not listed on the requisition form please call 1-888-440-5002 for information.

C.41 Specimen Submission Form G-1B, Biochemistry, Instructions (2 Pages)

March 2006 Page 1 of 2

Biochemistry and Genetics

G-1B Specimen Submission Form's Instructions

For mailing and specimen packaging information, visit DSHS Laboratory Services Section's web page at http://www.dshs.state.tx.us/lab/.

The specimen submission form ***must*** accompany each specimen.
The patient's name listed on the specimen ***must*** match the patient's name listed on the form.
If the Date of Collection field is not completed, the specimen will be rejected.

Place Bar Code Label Here: Place the specimen bar code label that will be used to identify and track the specimen in the DSHS laboratory information management system. If you are performing remote entry, place specimen bar code label here.

Section 1. SUBMITTER INFORMATION

All submitter information is required.

Submitter/TPI number, Submitter name and Address: The submitter number is a unique number that the Texas Department of State Health Services (DSHS) Laboratory Services Section assigns to each of our submitters. For Texas Health Steps (THSteps) specimens, use the pre-assigned Texas Provider Identifier (TPI) number. To obtain a TPI number and THSteps enrollment, contact Texas Medicaid and Healthcare Partnership (TMHP) at 1-800-925-9126.

To request a DSHS Laboratory Services Section submitter number, a master form, or to change submitter information, please call (888) 963-7111 x7578 or (512) 458-7578, or fax (512) 458-7533.

NPI Number: Beginning May 23, 2007, all health care providers must use the National Provider Identifier (NPI) number and the TPI number or other submitter number will no longer be used. The NPI number is the new national standard identifier for health care providers adopted by the Centers for Medicare & Medicaid Services (CMS) in accordance with the Health Insurance Portability and Accountability Act (HIPAA) of 1996. To obtain an NPI number, contact the National Plan and Provider Enumeration System (NPPES) toll free at (800) 465-3203 or via their web site at https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indicate the submitter's name, address, city, state, and zip code. Please print clearly, use a pre-printed label, or use a photocopy of a master form provided by the Laboratory Services Section.

Contact Information: Indicate the telephone number, name, and fax number of the person to contact at the submitting facility in case the laboratory needs additional information about the specimen.

Clinic Code: Please provide, if applicable. This is a code that the submitter furnishes to help them identify which satellite office submits a specimen and to help the submitter identify where the lab report belongs, if the submitter has a primary mailing address with satellite offices.

Section 2. PATIENT INFORMATION

Complete all patient information including last name, first name, middle initial, address, city, state, zip code, telephone number, country of origin, race, ethnicity, date of birth (DOB), age, sex, social security number (SSN), pregnant, date of collection, time of collection, collected by, medical record number, ICD diagnosis code, and previous DSHS lab specimen number.

NOTE: The patient's name listed on the specimen ***must*** match the patient's name listed on the form.

Information that is required to bill Medicare, Medicaid, or private insurance has been marked with double asterisks (**). These fields must be completed.

Date of birth (DOB) and Age: Please list both the date of birth and age of the patient. If date of birth is not available, give the age of the patient and tell us whether the age is in days, months, or years.

Pregnant: If patient is a female, please indicate if she is pregnant by marking either Yes, No, or Unknown. Pregnancy can affect some test results.

Date of collection/Time of collection: Indicate the date and time the specimen was collected from the patient and who collected the specimen. Do not give the date the specimen was sent to DSHS. If the Date of Collection field is not completed, the specimen will be rejected.

Medical record number: Provide the identification number for matching purposes.

ICD diagnosis code: Indicate the diagnosis code that would help in processing, identifying, and billing of this specimen.

Previous DSHS specimen lab number: If this patient has had a previous specimen submitted to the DSHS Laboratory, please provide the DSHS lab specimen number.

Section 3. SPECIMEN TYPE

Specimen type: Please indicate the type of specimen that you are submitting.

Section 4. CLINICAL CHEMISTRY

Test Requested: Check or specify the specific test(s) to be performed by the Laboratory Services Section.

CPT only copyright 2005 American Medical Association. All rights reserved.

Reflex testing (antibody (Ab) identification (ID), antigen (Ag) type, and titer) will be performed on positive antibody screens.

Hyperlipidemia and Glucose: _The time and date the specimen is removed from FREEZER **must** be provided to determine specimen acceptability. Please circle FREEZER._

RhoGAM (HDN) Screening: _The time and date the specimen is removed from the REFRIGERATOR **must** be provided if the specimen will not be received within 24 hours. Please circle REFRIGERATOR. **Do not freeze specimens for HDN testing**._

Section 5. PHYSICIAN INFORMATION

Physician's name, UPIN, and NPI Number: Give the name of the physician and their unique physician ID number (UPIN) and NPI number, if applicable. Beginning May 23, 2007, the NPI number will replace the UPIN. This information is required to bill Medicare and insurance.

Section 6. PAYOR SOURCE

THE SUBMITTER WILL BE BILLED, if the required billing information is not provided**.**

Indicate the party that will receive the bill.

Medicaid or Medicare:
- Mark the appropriate box, write in the Medicaid or Medicare number, and
- Supply a copy of the Medicaid or Medicare card.

Private Insurance:
- Mark the appropriate box,
- Supply a copy of the front and back of the insurance card, and
- Complete all fields on the form that have an asterisk (*).

DSHS Program:
- If you are contracting and/or enrolled with a DSHS program to provide services that require laboratory testing, please indicate which program. For program descriptions, see the Laboratory Services Section's Manual of Reference Services located on the web site at http://www.dshs.state.tx.us/lab/.
- Do NOT check a DSHS program as a Payor Source if the patient has Medicaid or Medicare, except for THSteps.
- If there is no other Payor Source for the patient and the patient meets the program's eligibility criteria, check the appropriate DSHS program.
- For THSteps, check *both THSteps **and** Medicaid* as the Payor Source. Supply a copy of the Medicaid card.
- For Title V, check either Family Planning or MCH.
- For BID, EIP, and ELC programs, check the "Other" box and list the program's name in the space provided.

HMO / Managed care / Insurance company: Print the name, address, city, state, and zip code of the insurance company to be billed.

Responsible party: Print the name of the responsible party, the insurance ID number, insurance company's phone number, group name, and group number.

Signature and Date: Have the responsible party sign and date to authorize the release of their information, if DSHS is to bill their insurance or HMO.

Section 7. NEWBORN REFERENCE TESTING

Test Requested: Check or specify the specific test to be performed by the Laboratory Services Section.

Section 8. DNA STUDIES

Select the requested test. The genes analyzed are phenylalanine hydroxylase for phenylketonuria testing and β-Globin for hemoglobin testing.

For phenylketonuria tests, select either Full Mutation Analysis or Carrier Mutation Analysis.

- Select Full Mutation Analysis to identify any possible mutations.
- Select Carrier Mutation Analysis to test specifically for the mutations already identified in a family member. If submitting a specimen for carrier mutation analysis, please provide the following information on the back of the form: *full name of family member(s) who have been tested, their test results, their date of birth, and relationship to the patient*. In addition, *draw a pedigree* showing the relationship and clinical diagnosis of each family member participating in the study.

For all hemoglobin DNA studies, select the Hemoglobin DNA Study box and write the name of the requested test(s) on the line. Available tests include:

- Beta Globin 6 mutation panel (Hb S, Hb C, Hb E, Hb D, beta-thalassemias -29 & -88)
- Beta Globin 5 mutation panel (Hb S, Hb C, Hb E, beta-thalassemias -29 & -88)
- Hemoglobin S&C mutation test
- Hemoglobin E mutation test
- Hemoglobin D mutation test
- Beta thalassemia -29 and -88 mutation test
- Beta Globin sequencing (from -105 of cap site to IVS-1-60)
- Beta Globin sequencing (from -105 of cap site to IVS-1-60) added to other test

---

For specific test instructions and information about tube types, see the Laboratory Services Section Manual of Reference Services on our web site at http://www.dshs.state.tx.us/lab/.

Submitter/TPI Number ** | Submitter Name **
NPI Number ** | Address **
City ** | State ** | Zip Code **
Phone ** | Contact
Fax | Clinic Code

Section 2. PATIENT INFORMATION -- (REQUIRED)**

NOTE: **Patient name** on specimen is **REQUIRED & MUST** match name on this form & Medicare/Medicaid card.

Last Name ** | First Name ** | MI
Address ** | Telephone Number
City ** | State ** | Zip Code ** | Country of Origin

Race: ☐ White ☐ Black or African American ☐ American Indian / Native Alaskan ☐ Asian ☐ Native Hawaiian / Pacific Islander ☐ Other

Ethnicity: ☐ Hispanic ☐ Non-Hispanic ☐ Unknown

DOB (mm/dd/yyyy) ** | Age | Sex | SSN ** | Pregnant? ☐ Yes ☐ No ☐ Unknown

Date of Collection ** (REQUIRED) | Time of Collection | Collected By

Medical Record Number | ICD Diagnosis Code ** | Previous DSHS Specimen Lab Number

Section 3. SPECIMEN TYPE

☐ Blood: Capillary ☐ Blood: Venous ☐ Serum
☐ Blood: Filter Paper ☐ Plasma ☐ Other:

Section 4. CLINICAL CHEMISTRY

NOTES: ▲= For cholesterol, lipid profile, & glucose testing document **time & date** specimens were **removed from FREEZER / REFRIGERATOR** in the lower right-hand box.

♠ = Tests covered by THSteps or Title V Well-Child Health Programs.

Please see the form's instructions for details on how to complete this form. Details of test and specimen requirements can be found in the Laboratory Services Section's Manual of Reference Services. Visit our web site at http://www.dshs.state.tx.us/lab/.

Hyperlipidemia ▲ ♠
☐ **Fasting** (1)
☐ **Non-fasting** (2) (Total cholesterol, HDL)

☐ **Total Hemoglobin ♠**
☐ **Hemoglobin electrophoresis ♠**
☐ **Lead testing ♠**

☐ **HDN Screening (Rhogam) ▲**
(Includes ABO, Rh, & Antibody screen testing)
Do NOT Freeze.

Has patient received Rh_o(D) Immunoglobulin within the past 6 mo.?
☐ Yes ☐ No

If yes, date: ______
Weeks gestation: ______

Reflex testing (AB type & titer) will be performed on positive antibody screens.

Diabetes ▲ ♠
☐ **Random** (1)
☐ **Fasting** (2)
☐ **2 Hr. Post prandial** (3)

Glucose tolerance ▲ ♠
☐ **Fasting** (4) ☐ **2 Hr.** (7)

C.43 Specimen Submission Form G-1B, Biochemistry, Spanish Instructions (3 Pages)

Marzo de 2006 Página 1 de 3

Bioquímica y genética

Instrucciones del formulario de remisión de muestras G-1B

Para obtener información sobre envíos por correo y el embalaje de las muestras, visite la página web de la Sección de Servicios de Laboratorio del DSHS en http://www.dshs.state.tx.us/lab/.

Debe acompañar cada muestra con un formulario de remisión de muestras.
El nombre del paciente de la muestra ***debe*** ser el mismo que el nombre del paciente del formulario.
Si no rellena el campo Fecha de obtención, se rechazará la muestra.

Coloque la etiqueta de código de barra aquí: coloque la etiqueta de código de barra de la muestra a ser usada para identificar y ubicar la muestra en el sistema de administración de datos del laboratorio del DSHS. Si está ingresando remotamente, coloque la etiqueta de código de barra de la muestra aquí.

Sección 1. DATOS DEL REMITENTE

Se requieren todos los datos del remitente.

Número de remitente y de TP y nombre y dirección del remitente: el número de remitente es un número único que la Sección de Servicios de Laboratorio del Departamento Estatal de Servicios de Salud de Texas (Texas Department of State Health Services [DSHS]) asigna a cada uno de nuestros remitentes. Para muestras de Pasos Sanos de Texas (Texas Health Steps [THSteps]), utilice el número Identificador de proveedor de Texas (Texas Provider Identifier [TPI]) preasignado. Para obtener un número de TPI e inscribirse en Pasos Sanos de Texas, llame a la Asociación de Medicaid y Salud de Texas (Texas and Healthcare Partnership [TMHP]) al 1-800-925-9126.

Para solicitar un número de remitente a la Sección de Servicios de Laboratorio del DSHS, el formulario original o para cambiar los datos del remitente, sírvase llamar al (888) 963-7111, extensión 7578, o al (512) 458-7578 o mandar un fax al (512) 458-7533.

Núm. de NPI: a partir del 23 de mayo de 2007, todos los proveedores de salud deberán usar el número Identificador de proveedor nacional (National Provider Identifier [NPI]) y ya no se usará el número de TPI u otro número de remitente. El número NPI es el nuevo identificador nacional oficial para proveedores de salud adoptado por los Centros de Servicios de Medicaid y Medicare (Centers for Medicare & Medicaid Services [CMS]) de conformidad con la Ley de Transferibilidad y Responsabilidad de Seguros Médicos (Health Insurance Portability and Accountability Act [HIPAA]) de 1996. Para obtener un número de NPI, llame al Sistema Nacional de Enumeración de Planes y Proveedores (National Plan and Provider Enumeration System [NPPES]) gratis al (800) 465-3203 o visite su sitio web en https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indique el nombre, dirección, ciudad, estado y código postal del remitente. Escriba claramente en letra de molde, utilice una etiqueta preimpresa o utilice una fotocopia del formulario original provisto por la Sección de Servicios de Laboratorio.

Datos de contacto: indique el número telefónico, nombre y número de fax de la persona a contactar en el centro remitente en caso de que el laboratorio necesite información adicional sobre la muestra.

Código de la clínica: sírvase proporcionarlo, de ser aplicable. Se trata de un código que el remitente provee para ayudar a identificar cuál oficina satélite remite una muestra y para ayudar al remitente a identificar adónde pertenece el informe de laboratorio, si el remitente tuviese una dirección de correo postal primaria con oficinas satélite.

Sección 2. DATOS DEL PACIENTE

Rellene todos los datos del paciente incluido el apellido, el nombre, la inicial del segundo nombre, la dirección, ciudad, estado, código postal, número telefónico, país de origen, raza, etnia, fecha de nacimiento, edad, sexo, número de Seguro Social, si es mujer si está embarazada, fecha de obtención, hora de obtención, quién la obtuvo, número de expediente médico, código diagnóstico de ICD y número previo del laboratorio de muestras del DSHS.

NOTA: el nombre del paciente de la muestra ***debe*** ser el mismo que el nombre del paciente del formulario.

La información requerida para facturar a Medicare, Medicaid o un seguro privado ha sido señalada con doble asterisco (**). Se deben rellenar esos campos.

Fecha de nacimiento y edad: indique tanto la fecha de nacimiento como la edad del paciente. Si la fecha de nacimiento no está disponible, proporcione la edad del paciente y díganos si la edad es en días, meses o años.

Si es mujer y está embarazada: si el paciente es mujer, sírvase indicar si está embarazada marcando ya sea "Sí", "No" o "Se desconoce". El embarazo puede afectar algunos resultados de pruebas.

Fecha de obtención/hora de obtención: indique la fecha y hora en que se obtuvo la muestra del paciente y quién obtuvo la muestra. No proporcione la fecha en que se envió la muestra al DSHS. Si no se rellena el campo Fecha de obtención, se rechazará la muestra.

Núm. de expediente médico: proporcione el número de identificación para propósitos de cotejo.

CPT only copyright 2005 American Medical Association. All rights reserved.

Marzo de 2006 Página 2 de 3

Código diagnóstico de ICD: indique el código diagnóstico que ayudaría a procesar, identificar y facturar la muestra.

Número previo del laboratorio de muestras del DSHS: si se ha remitido una muestra del paciente anteriormente al laboratorio del DSHS, sírvase proporcionar el número de muestra del laboratorio del DSHS.

Sección 3. TIPO DE MUESTRA

Tipo de muestra: sírvase indicar el tipo de muestra que remite.

Sección 4. QUÍMICA CLÍNICA

Prueba solicitada: marque o especifique la o las pruebas específicas a realizar la Sección de Servicios de Laboratorio.

Se realizarán pruebas secundarias (identificación (ID) de anticuerpos (Ab), tipo de antígenos (Ag) y titulación) a las pruebas de anticuerpos positivas.

Hiperlipemia y glucosa: *se **debe** proporcionar la fecha y hora de remoción de la muestra del CONGELADOR para determinar la aceptabilidad de la muestra. Sírvase encerrar en un círculo la palabra CONGELADOR.*

Prueba de enfermedad hemolítica perinatal (EHP) (RhoGAM): *se **debe** proporcionar la fecha y hora de remoción de la muestra del REFRIGERADOR si no se recibirá la muestra en 24 horas. Sírvase encerrar en un círculo la palabra REFRIGERADOR. **No congele las muestras para la prueba de HDN**.*

Sección 5. DATOS DEL MÉDICO

Nombre y número de UPIN y NPI del médico: dé el nombre del médico y el número de identificación único del médico (Unique Physician ID Number [UPIN]) y el número NPI, de ser aplicable. A partir del 23 de mayo de 2007, el número NPI reemplazará al UPIN. Se requiere esta información para facturar a Medicare y al seguro.

Sección 6. PAGADOR

SE FACTURARÁ AL REMITENTE, si no se proporciona la información de facturación requerida**.**

Indique la parte que recibirá la factura.

Medicaid o Medicare:

- Marque la casilla correspondiente, escriba el número de Medicaid o Medicare y
- Provea una copia de la tarjeta de Medicaid o Medicare.

Seguro privado:

- Marque la casilla correspondiente,
- Provea una copia del frente y reverso de la tarjeta de seguro y
- Rellene todos los campos del formulario que tengan asterisco (*).

Programa del DSHS:

- Si está contratado o inscrito en un programa del DSHS para proporcionar servicios que requieran pruebas de laboratorio, sírvase indicar qué programa es. Encontrará las descripciones de los programas en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio en el sitio web http://www.dshs.state.tx.us/lab/.
- NO marque un programa del DSHS como Pagador si el paciente cuenta con Medicaid o Medicare, a menos que sea Pasos Sanos de Texas.
- Si no existe otro Pagador del paciente y el paciente reúne los criterios de participación en el programa, marque el programa del DSHS correspondiente.
- Si es Pasos Sanos de Texas, marque tanto *Pasos Sanos de Texas **como** Medicaid* como pagadores. Proporcione una copia de la tarjeta de Medicaid.
- Si es el título V, marque ya sea Planificación familiar o MCH.
- Si son programas de BID, EIP y ELC, marque la casilla "Otro" e indique el nombre del programa en el espacio provisto.

HMO/Atención dirigida/aseguradora: ponga en letra de molde el nombre, dirección, ciudad, estado y código postal de la aseguradora a la que se facturará.

Parte responsable: ponga en letra de molde el nombre de la parte responsable, el número de identificación del seguro, el número telefónico de la aseguradora, el nombre del grupo y el número del grupo.

Firma y fecha: haga que la parte responsable firme y feche para autorizar la divulgación de los datos de la misma, si DSHS ha de facturar al seguro o HMO de ésta.

Sección 7. PRUEBAS DE REFERENCIA DE RECIÉN NACIDOS

Prueba solicitada: marque o especifique la prueba específica que ha de realizar la Sección de Servicios de Laboratorio.

Sección 8. ESTUDIOS DE ADN

Seleccione la prueba solicitada. Se analizan los genes de fenilalanina hidroxilasa en la prueba de fenilcetonuria y β-globina en pruebas de hemoglobina.

Para las pruebas de fenilcetonuria, seleccione ya sea el Análisis de mutación completa o Análisis de mutación de portador.

- Seleccione Análisis de mutación completa para identificar toda mutación posible.
- Seleccione Análisis de mutación de portador para la prueba específica de mutaciones ya identificadas en un familiar. Si remite una muestra para análisis de mutación de portador, sírvase proporcionar la siguiente información al reverso del formulario: *el nombre completo del o los familiares a quienes se ha hecho la prueba, los resultados*

CPT only copyright 2005 American Medical Association. All rights reserved.

de sus pruebas, su fecha de nacimiento y parentesco con el paciente. Además, *dibuje un árbol genealógico* que denote el parentesco y diagnóstico clínico de cada familiar que participe en el estudio.

Para todos los estudios de ADN de hemoglobina, seleccione la casilla Estudio de ADN de hemoglobina y escriba en la línea el nombre de la o las pruebas solicitadas. Los análisis disponibles incluyen:

- Panel de mutación de betaglobina 6 (Hb S, Hb C, Hb E, Hb D, betatalasemia 29 y 88)
- Panel de mutación de betaglobina 5 (Hb S, Hb C, Hb E, betatalasemia 29 y 88)
- Prueba de mutación de hemoglobina S y C
- Prueba de mutación de hemoglobina E
- Prueba de mutación de hemoglobina D
- Prueba de mutación de betatalasemia 29 y 88
- Secuenciación de betaglobina (del punto inicial 105 a IVS-1 posición 60)
- Secuenciación de betaglobina (del punto inicial 105 a IVS-1 posición 60) agregada a otra prueba

---

Puede encontrar instrucciones de pruebas e información específica sobre los tipos de probetas de ensayo en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio en nuestro sitio web en http://www.dshs.state.tx.us/lab/.

C.45 Specimen Submission Form G-2A, Serology and Virology, Instructions (2 Pages)

March 2006 Page 1 of 2

G-2A Specimen Submission Form's Instructions

For mailing and specimen packaging information, visit DSHS Laboratory Services Section's web page at http://www.dshs.state.tx.us/lab/.

The specimen submission form ***must*** accompany each specimen.
The patient's name listed on the specimen ***must*** match the patient's name listed on the form.
If the Date of Collection field is not completed, the specimen will be rejected.

Place Bar Code Label Here: Place the specimen bar code label that will be used to identify and track the specimen in the DSHS laboratory information management system. If you are performing remote entry, place specimen bar code label here.

Section 1. SUBMITTER INFORMATION

All submitter information is required.

Submitter/TPI number, Submitter name and Address: The submitter number is a unique number that the Texas Department of State Health Services (DSHS) Laboratory Services Section assigns to each of our submitters. For Texas Health Steps (THSteps) specimens, use the pre-assigned Texas Provider Identifier (TPI) number. To obtain a TPI number and THSteps enrollment, contact Texas Medicaid and Healthcare Partnership (TMHP) at 1-800-925-9126.

To request a DSHS Laboratory Services Section submitter number, a master form, or to change submitter information, please call (888) 963-7111 x7578 or (512) 458-7578, or fax (512) 458-7533.

NPI Number: Beginning May 23, 2007, all health care providers must use the National Provider Identifier (NPI) number and the TPI number or other submitter number will no longer be used. The NPI number is the new national standard identifier for health care providers adopted by the Centers for Medicare & Medicaid Services (CMS) in accordance with the Health Insurance Portability and Accountability Act (HIPAA) of 1996. To obtain an NPI number, contact the National Plan and Provider Enumeration System (NPPES) toll free at (800) 465-3203 or via their web site at https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indicate the submitter's name, address, city, state, and zip code. Please print clearly, use a pre-printed label, or use a photocopy of a master form provided by the Laboratory Services Section.

Contact Information: Indicate the telephone number, name, and fax number of the person to contact at the submitting facility in case the laboratory needs additional information about the specimen/isolate.

Clinic Code: Please provide, if applicable. This is a code that the submitter furnishes to help them identify which satellite office submits a specimen and to help the submitter identify where the lab report belongs, if the submitter has a primary mailing address with satellite offices.

Section 2. PATIENT INFORMATION

Complete all patient information including date of collection, time of collection, previous DSHS specimen lab number, last name, first name, middle initial, address, city, state, zip code, telephone number, date of birth (DOB), age, sex, social security number (SSN), pregnant, race, ethnicity, medical record number, ICD diagnosis code, country of origin, date of onset, diagnosis/symptoms, risk, and mark either inpatient/outpatient, outbreak association, and/or surveillance.

NOTE: The patient's name listed on the specimen ***must*** match the patient's name listed on the form.

Information that is required to bill Medicare, Medicaid, or private insurance has been marked with double asterisks (**). You may use a pre-printed patient label. *For anonymous HIV testing, indicate only the state, zip code, date of birth, and patient ID number.*

Patient Name: If patient is covered by Medicaid, Medicare, or Private Insurance, the name on the specimen form must match the name on the insurance card.

Date of birth (DOB) and Age: Please list both the date of birth and age of the patient. If date of birth is not available, give the age of the patient and tell us whether the age is in days, months, or years.

Pregnant: If patient is a female, please indicate is she is pregnant by marking either Yes, No, or Unknown. Pregnancy can affect some test results.

Date of Collection/Time of Collection: Indicate the date and time the specimen was collected from the patient or other source and who collected the specimen. Do not give the date the specimen was sent to DSHS. If the Date of Collection field is not completed, the specimen will be rejected.

Medical Record # / Alien # / CUI: Provide the identification number for matching purposes. For HIV screening, this number may be the eight-digit CDC number assigned to the patient. The CDC form sticker may be placed anywhere on the lower part of the form, as long as it does not obscure any tests ordered. CUI is the Clinic Unique Identifier number.

Previous DSHS Specimen Lab Number: If this patient has had a previous specimen submitted to the DSHS Laboratory, provide the DSHS specimen lab number.

ICD Diagnosis Code, Country of Origin, Date of Onset, Diagnosis/Symptoms, and Risk (if applicable): Indicate the diagnosis code or findings that would help in processing, identifying, and billing of this specimen/isolate. If the patient's country of origin is not the U.S., then please provide the patient's country of origin.

Inpatient or Outpatient (if applicable): Indicate if the patient is currently admitted to a hospital (required for TB patients).

Outbreak/Surveillance (if applicable): Tell us whether the specimen/isolate is part of an outbreak or cluster, or if the specimen is for routine surveillance. If the specimen is being submitted because of an outbreak, write in the associated name of the outbreak next to the outbreak box. If this form is being submitted for flu surveillance, the following patient information is required: Date of Onset, Date of Collection, Diagnosis/Symptoms, and Risk. Dates must be entered into the **Date of Onset** and **Date of Collection** boxes. In the **Diagnosis/Symptoms** box, list all the symptoms from the following list that apply: 1) malaise, 2) sore throat, 3) nasal congestion, 4) fever, 5) chills, 6) cough, 7) headache, 8) myalgia. In the **Risk** box, indicate whether the patient received the flu vaccine this season and the date given.

CPT only copyright 2005 American Medical Association. All rights reserved.

Section 3. SPECIMEN SOURCE OR TYPE

Specimen Source or Type: Indicate the kind of material you are submitting or the source of the specimen or isolate. Tests requiring Acute/Convalescent sera and dates are indicated with a '§' in the testing area of the form.

Section 4. PHYSICIAN INFORMATION

Physician's Name, UPIN, and NPI Number: Give the name of the physician and their unique physician ID number (UPIN) and NPI number, if applicable. Beginning May 23, 2007, the NPI number will replace the UPIN. This information is required to bill Medicare and insurance.

Section 5. PAYOR SOURCE

Indicate the party that will receive the bill.

THE SUBMITTER WILL BE BILLED, if the required billing information is not provided or multiple payor boxes are checked**.**

Checking Medicaid or Medicare:

- Mark the appropriate box.
- Write in the Medicaid or Medicare number.
- If the patient name on the form does not match the name on the card, the submitter will be billed.

Checking Private Insurance:

- Mark the appropriate box.
- Complete all fields on the form that have an asterisk (*).
- If the private insurance information is not provided on the specimen form, the submitter will be billed.

Checking a DSHS Program:

- If you are contracting and/or enrolled with a DSHS program to provide services that require laboratory testing, please indicate which program. For program descriptions, see the Laboratory Services Section's Manual of Reference Services located on the web site at http://www.dshs.state.tx.us/lab/.
- Do NOT check a DSHS program as a Payor Source if the patient has Medicaid or Medicare, except for THSteps.
- For THSteps, check THSteps as the Payor Source. Write the patient's Medicaid number in the appropriate field.
- For Title V, must check either Family Planning or MCH (Maternal & Child Health).
- If there is no other Payor Source for the patient and the patient meets the program's eligibility criteria, check the appropriate DSHS program.
- For anonymous HIV/STD testing, check the HIV/STD Program as Payor Source. The sections for HMO/Managed care/Insurance company name, Responsible Party, Signature, and Date information are not required.
- For BIDS (Border & Infectious Disease Surveillance), EIP (Emerging Infections Program), and ELC (Epidemiology & Laboratory Capacity) programs, check the "Other" box and list the program's name in the space provided.

HMO / Managed Care / Insurance Company: Print the name, address, city, state, and zip code of the insurance company to be billed. If all insurance information is not provided on the specimen form, the submitter will be billed.

Responsible Party: Print the name of the responsible party, the insurance ID number, insurance company's phone number, group name, and group number.

Signature and Date: Have the responsible party sign and date to authorize the release of their information, if DSHS is to bill their insurance or HMO.

TEST

Test Requested: Check or specify the specific test(s) to be performed by the DSHS Laboratory Services Section. Each test block requires a separate form AND a separate specimen. Examples of separate blocks are "Reference Serology/Immunology" or "Virology" or "HIV/HCV Screening". For specific test instructions, see the Laboratory Services Section Manual of Reference Services.

6. REFERENCE SEROLOGY/IMMUNOLOGY

If acute viral hepatitis is suspected based on the clinical symptoms and elevated serum amino transferase (ALT/AST), order Hepatitis Acute Panel which consists of 4 tests including Hepatitis B surface Ag (HBsAg), Hepatitis B core IgM (anti-HBc IgM), Hepatitis A IgM (anti-HAV), and Hepatitis C IgG (anti-HCV).

Fungal panel includes:

Histoplasma capsulatum (Mycelial phase)
Histoplasma capsulatum (Yeast phase)
Coccidioides immitis
Blastomyces dermatitidis

Aspergillosis testing includes:

Aspergillus flavus
Aspergillus fumigatus
Aspergillus niger
Aspergillus terreus

7. HIV/HCV SCREENING

Justification: Justification is required under 'Western blot only' for performing the requested test. Otherwise it will reflex to additional testing which will add to the final bill.

8. SYPHLIS SEROLOGY

Justification: Justification is required under 'RPR syphilis confirmation' for performing the requested test. Otherwise it will reflex to additional testing which will add to the final bill.

11. MOLECULAR STUDIES

PCR for: / PFGE for: Write the name of the organism requested for testing.

Other: Write any other special test request.

For special test requests, contact Molecular Biology at (888) 963-7111 x7735 or (512) 458-7735 prior to submitting specimens.

C.47 Specimen Submission Form G-2A, Serology and Virology, Spanish Instructions (3 Pages)

Marzo de 2006 Página 1 de 3

Instrucciones del formulario de remisión de muestras G-2A

Para obtener información sobre envíos por correo y el embalaje de las muestras, visite la página web de la Sección de Servicios de Laboratorio del DSHS en http://www.dshs.state.tx.us/lab/.

Debe acompañar cada muestra con un formulario de remisión de muestras.
El nombre del paciente de la muestra ***debe*** ser el mismo que el nombre del paciente del formulario.
Si no rellena el campo Fecha de obtención, se rechazará la muestra.

Coloque la etiqueta de código de barra aquí: coloque la etiqueta de código de barra de la muestra a ser usada para identificar y ubicar la muestra en el sistema de administración de datos del laboratorio del DSHS. Si está ingresando remotamente, coloque la etiqueta de código de barra de la muestra aquí.

Sección 1. DATOS DEL REMITENTE

Se requieren todos los datos del remitente.

Número de remitente y de TPI, nombre y dirección del remitente: el número de remitente es un número único que la Sección de Servicios de Laboratorio del Departamento Estatal de Servicios de Salud de Texas (Texas Department of State Health Services [DSHS]) asigna a cada uno de nuestros remitentes. Para muestras de Pasos Sanos de Texas (Texas Health Steps [THSteps]), utilice el número Identificador de proveedor de Texas (Texas Provider Identifier [TPI]) preasignado. Para obtener un número de TPI e inscribirse en Pasos Sanos de Texas, llame a la Asociación de Medicaid y Salud de Texas (Texas and Healthcare Partnership [TMHP]) al 1-800-925-9126.

Para solicitar un número de remitente a la Sección de Servicios de Laboratorio del DSHS, el formulario original o para cambiar los datos del remitente, sírvase llamar al (888) 963-7111, extensión 7578, o al (512) 458-7578 o mandar un fax al (512) 458-7533.

Núm. de NPI: A partir del 23 de mayo de 2007, todos los proveedores de salud deben usar el número Identificador de proveedor nacional (National Provider Identifier [NPI]) y ya no se usará el número de TPI u otro número de remitente. El número NPI es el nuevo identificador nacional oficial para proveedores de salud adoptado por los Centros de Servicios de Medicaid y Medicare (Centers for Medicare & Medicaid Services [CMS]) de conformidad con la Ley de Transferibilidad y Responsabilidad de Seguros Médicos (Health Insurance Portability and Accountability Act [HIPAA]) de 1996. Para obtener un número de NPI, llame al Sistema Nacional de Enumeración de Planes y Proveedores (National Plan and Provider Enumeration System [NPPES]) gratis al (800) 465-3203 o visite su sitio web en https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indique el nombre, dirección, ciudad, estado y código postal del remitente. Escriba claramente en letra de molde, utilice una etiqueta preimpresa o utilice una fotocopia del formulario original proporcionado por la Sección de Servicios de Laboratorio.

Datos de contacto: indique el número de teléfono, nombre y número de fax de la persona a contactar en el centro remitente en caso de que el laboratorio necesite información adicional sobre la muestra o el aislamiento.

Código de la clínica: sírvase proporcionarlo, de ser aplicable. Se trata de un código que el remitente provee para ayudar a identificar cuál oficina satélite remite una muestra y para ayudar al remitente a identificar adónde pertenece el informe de laboratorio, si el remitente tuviese una dirección de correo postal primaria con oficinas satélite.

Sección 2. DATOS DEL PACIENTE

Rellene todos los datos del paciente incluida la fecha de obtención, la hora de obtención, el número previo del laboratorio de muestras del DSHS, el apellido, el nombre, la inicial del segundo nombre, la dirección, ciudad, estado, código postal, número telefónico, fecha de nacimiento, edad, sexo, número de Seguro Social, si es mujer si está embarazada, la raza, etnia, número de expediente médico, código diagnóstico de ICD, país de origen, fecha de aparición, diagnóstico/síntomas y riesgo y marque ya sea paciente interno/externo, asociación de brote o vigilancia.

NOTA: el nombre del paciente de la muestra *debe* ser el mismo que el nombre del paciente del formulario.

La información requerida para facturar a Medicare, Medicaid o un seguro privado ha sido señalada con doble asterisco (**). Puede utilizar una etiqueta de paciente preimpresa. *Para pruebas de VIH anónimas, indique solamente el estado, código postal, fecha de nacimiento y el número de identificación del paciente.*

Nombre del paciente: si al paciente lo cubre Medicaid, Medicare o un seguro privado, el nombre del formulario de muestras debe ser el mismo que el nombre en la tarjeta de seguro.

Fecha de nacimiento y edad: indique tanto la fecha de nacimiento como la edad del paciente. Si la fecha de nacimiento no está disponible, proporcione la edad del paciente y díganos si la edad es en días, meses o años.

Si es mujer y está embarazada: si el paciente es mujer, indique si está embarazada marcando ya sea Sí, No o Se desconoce. El embarazo puede afectar algunos resultados de pruebas.

Fecha de obtención/hora de obtención: indique la fecha y hora en que se obtuvo la muestra del paciente y quién obtuvo la muestra. No proporcione la fecha en que se remitió la muestra al DSHS. Si no se rellena el campo Fecha de obtención, se rechazará la muestra.

Núm. de expediente médico/núm. de extranjero/CUI: proporcione el número de identificación para propósitos de cotejo. Para pruebas de VIH, ese número puede ser el número de CDC de 8 dígitos asignado al paciente. Se puede colocar la etiqueta del formulario de CDC en cualquier lugar de la parte inferior del formulario, en tanto no oculte ninguna prueba solicitada. CUI (Clinic Unique Identifier) es el número único identificador de clínicas.

Número previo del laboratorio de muestras del DSHS: si se ha remitido una muestra del paciente anteriormente al laboratorio del DSHS, sírvase proporcionar el número del laboratorio de muestras del DSHS.

Código diagnóstico de ICD, país de origen, fecha de aparición, diagnóstico/síntomas y riesgo (de ser aplicable): indique el código diagnóstico o resultados que ayudarían a procesar, identificar y facturar la muestra o el aislamiento. Si el país de origen del paciente

CPT only copyright 2005 American Medical Association. All rights reserved.

no es los Estados Unidos, sírvase proporcionar el país de origen del paciente.

Paciente interno o externo (de ser aplicable): indique si el paciente está hospitalizado actualmente (requerido para pacientes tuberculosos).

Brote/vigilancia (de ser aplicable): díganos si la muestra o aislamiento es parte de un brote o grupo y si la muestra es de vigilancia rutinaria. Si se remite la muestra debido a un brote, escriba el nombre asociado del brote al lado de la casilla de brote. Si se está remitiendo el formulario para vigilancia de gripe, se requiere la siguiente información del paciente: fecha de aparición, fecha de obtención, diagnóstico/síntomas y riesgo. Se deben ingresar fechas en las casillas **Fecha de aparición** y **Fecha de obtención**. En la casilla **Diagnóstico/síntomas**, liste todos los síntomas correspondientes de la siguiente lista: 1) malestar general, 2) dolor de garganta, 3) congestión nasal, 4) fiebre, 5) escalofríos, 6) tos, 7) dolor de cabeza, 8) mialgia. En la casilla **Riesgo**, indique si el paciente recibió la vacuna contra la gripe esta temporada y la fecha en que la recibió.

Sección 3. FUENTE O TIPO DE MUESTRA

Fuente o tipo de muestra: indique el tipo de material que remite o la fuente de la muestra o el aislamiento. Las pruebas que requieran suero agudo/convaleciente y fechas están señaladas con '§' en el área de pruebas del formulario.

Sección 4. DATOS DEL MÉDICO

Nombre y número de UPIN y NPI del médico: dé el nombre del médico y el número identificador único del médico (unique physician ID number [UPIN]) y el número NPI, de ser aplicable. A partir del 23 de mayo de 2007, el número NPI reemplazará al UPIN. Se requiere esa información para facturar a Medicare y al seguro.

Sección 5. PAGADOR

Indique la parte que recibirá la factura.

SE FACTURARÁ AL REMITENTE, si no se proporciona la información de facturación requerida o si se marcan múltiples casillas de pagador**.**

Marcación de Medicaid o Medicare:

- Marque la casilla correspondiente.
- Escriba el número de Medicaid o Medicare.
- Si el nombre del paciente del formulario no es el mismo que el nombre de la tarjeta, se facturará al remitente.

Marcación de seguro privado:

- Marque la casilla correspondiente.
- Rellene todos los campos del formulario que tengan asterisco (*).
- Si no proporciona los datos del seguro privado en el formulario de la muestra, se facturará al remitente.

Marcación de programa del DSHS:

- Si está contratado o inscrito en un programa del DSHS para proporcionar servicios que requieran pruebas de laboratorio, sírvase indicar qué programa es. Encontrará las descripciones de los programas en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio en el sitio web http://www.dshs.state.tx.us/lab/.
- NO marque un programa del DSHS como Pagador si el paciente cuenta con Medicaid o Medicare, a menos que sea Pasos Sanos de Texas.
- Si es Pasos Sanos de Texas, marque Pasos Sanos de Texas como pagador. Escriba el número de Medicaid en el campo correspondiente.
- Para Título V, debe marcar ya sea Planificación familiar o MCH (Salud Materna e Infantil, Maternal & Child Health).
- Si no existe otro Pagador del paciente y el paciente reúne los criterios de participación del programa, marque el programa del DSHS correspondiente.
- Para pruebas anónimas de VIH/enfermedades venéreas, marque Programa de VIH/enfermedades venéreas como el pagador. No se requieren las secciones Nombre de la HMO/Atención dirigida/aseguradora, Parte responsable, Firma y Fecha.
- Para los programas BIDS (Vigilancia de Enfermedades Infecciosas y Fronterizas, Border & Infectious Disease Surveillance), EIP (Programa de Infecciones Emergentes, Emerging Infections Program) y ELC (Capacidad Epidemiológica y de Laboratorio, Epidemiology & Laboratory Capacity), marque la casilla "Otro" y liste el nombre del programa en el espacio provisto.

HMO/Atención dirigida/aseguradora: ponga en letra de molde el nombre, dirección, ciudad, estado y código postal de la aseguradora a la que se facturará. Si no proporciona todos los datos del seguro en el formulario de la muestra, se facturará al remitente.

Parte responsable: ponga en letra de molde el nombre de la parte responsable, el número de identificación del seguro, el número telefónico de la aseguradora, el nombre del grupo y el número del grupo.

Firma y fecha: haga que la parte responsable firme y feche para autorizar la divulgación de los datos de la misma, si DSHS ha de facturar al seguro o HMO de ésta.

PRUEBA

Prueba solicitada: marque o especifique la o las pruebas específicas que ha de realizar la Sección de Servicios de Laboratorio del DSHS. Cada sección de pruebas requiere un formulario Y una muestra por separado. "Serología/inmunología referencial" o "Virología" o "Prueba de VIH/VHC" serían ejemplos de secciones separadas. Puede consultar instrucciones de pruebas específicas en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio.

6. SEROLOGÍA/INMUNOLOGÍA REFERENCIAL

Si se sospecha que se padece hepatitis viral aguda por los síntomas clínicos y la aminotransferencia de suero elevada (ALT/AST), solicite el Panel de hepatitis aguda que consiste de 4 pruebas incluida la Ag superficial de hepatitis B (HBsAg), IgM básico de hepatitis B (antiHBc IgM), Hepatitis A IgM (antiHAV) y Hepatitis C IgG (antiHCV).

El panel micótico incluye:

Histoplasma capsulatum (fase micelial)
Histoplasma capsulatum (fase levaduriforme)
Coccidioides immitis
Blastomyces dermatitidis

Las pruebas para aspergilosis incluyen:

Aspergillus flavus
Aspergillus fumigatus
Aspergillus niger
Aspergillus terreus

7. PRUEBA DE VIH/VHC

C

CPT only copyright 2005 American Medical Association. All rights reserved.

Justificación: se requiere justificación bajo 'Inmunotransferencia solamente' para realizar la prueba solicitada. De otra forma se harán pruebas adicionales, lo que aumentará la factura final.

8. SEROLOGÍA SIFILÍTICA

Justificación: se requiere justificación bajo 'Confirmación de sífilis RPR' para realizar la prueba solicitada. De otra forma se harán pruebas adicionales, lo que aumentará la factura final.

11. ESTUDIOS MOLECULARES

PCR para:/PFGE para: escriba el nombre del organismo solicitado para prueba.

Otro: escriba cualquier otra solicitud de prueba especial.

Para solicitudes de pruebas especiales, llame a Biología Molecular al (888) 963-7111, extensión 7735, o (512) 458-7735 antes de remitir las muestras.

CPT only copyright 2005 American Medical Association. All rights reserved.

C.49 Specimen Submission Form G-2B, Bacteriology and Parasitology, Instructions (2 Pages)

March 2006 Page 1 of 2

G-2B Specimen Submission Form's Instructions

For mailing and specimen packaging information, visit DSHS Laboratory Services Section's web page at http://www.dshs.state.tx.us/lab/.

The specimen submission form ***must*** accompany each specimen.
The patient's name listed on the specimen ***must*** match the patient's name listed on the form.
If the Date of Collection field is not completed, the specimen will be rejected.

Place Bar Code Label Here: Place the specimen bar code label that will be used to identify and track the specimen in the DSHS laboratory information management system. If you are performing remote entry, place specimen bar code label here.

Section 1. SUBMITTER INFORMATION

All submitter information is required.

Submitter/TPI number, Submitter name and Address: The submitter number is a unique number that the Texas Department of State Health Services (DSHS) Laboratory Services Section assigns to each of our submitters. For Texas Health Steps (THSteps) specimens, use the pre-assigned Texas Provider Identifier (TPI) number. To obtain a TPI number and THSteps enrollment, contact Texas Medicaid and Healthcare Partnership (TMHP) at 1-800-925-9126.

To request a DSHS Laboratory Services Section submitter number, a master form, or to change submitter information, please call (888) 963-7111 x7578 or (512) 458-7578, or fax (512) 458-7533.

NPI Number: Beginning May 23, 2007, all health care providers must use the National Provider Identifier (NPI) number and the TPI number or other submitter number will no longer be used. The NPI number is the new national standard identifier for health care providers adopted by the Centers for Medicare & Medicaid Services (CMS) in accordance with the Health Insurance Portability and Accountability Act (HIPAA) of 1996. To obtain an NPI number, contact the National Plan and Provider Enumeration System (NPPES) toll free at (800) 465-3203 or via their web site at https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indicate the submitter's name, address, city, state, and zip code. Please print clearly, use a pre-printed label, or use a photocopy of a master form provided by the Laboratory Services Section.

Contact Information: Indicate the telephone number, name, and fax number of the person to contact at the submitting facility in case the laboratory needs additional information about the specimen/isolate.

Clinic Code: Please provide, if applicable. This is a code that the submitter furnishes to help them identify which satellite office submits a specimen and to help the submitter identify where the lab report belongs, if the submitter has a primary mailing address with satellite offices.

Section 2. PATIENT INFORMATION

Complete all patient information including date of collection, time of collection, previous DSHS specimen lab number, last name, first name, middle initial, address, city, state, zip code, telephone number, date of birth (DOB), age, sex, social security number (SSN), pregnant, race, ethnicity, medical record number, ICD diagnosis code, country of origin, date of onset, diagnosis/symptoms, risk, and mark either inpatient/outpatient, outbreak association, and/or surveillance.

NOTE: The patient's name listed on the specimen ***must*** match the patient's name listed on the form.

Information that is required to bill Medicare, Medicaid, or private insurance has been marked with double asterisks (**). You may use a pre-printed patient label.

Patient Name: If patient is covered by Medicaid, Medicare, or Private Insurance, the name on the specimen form must match the name on the insurance card.

Date of birth (DOB) and Age: Please list both the date of birth and age of the patient. If date of birth is not available, give the age of the patient and tell us whether the age is in days, months, or years.

Pregnant: If patient is a female, please indicate is she is pregnant by marking either Yes, No, or Unknown. Pregnancy can affect some test results.

Date of collection/Time of collection: Indicate the date and time the specimen was collected from the patient or other source and who collected the specimen. Do not give the date the specimen was sent to DSHS. If the Date of Collection field is not completed, the specimen will be rejected.

Medical Record # / Alien # / CUI: Provide the identification number for matching purposes. CUI is the Clinic Unique Identifier number.

Previous DSHS Specimen Lab Number: If this patient has had a previous specimen submitted to the DSHS Laboratory, provide the DSHS specimen lab number.

ICD Diagnosis Code, Country of Origin, Date of Onset, Diagnosis/Symptoms, and Risk (if applicable): Indicate the diagnosis code or findings that would help in processing, identifying, and billing of this specimen/isolate. If the patient's country of origin is not the U.S., then please provide the patient's country of origin.

Inpatient or Outpatient (if applicable): Indicate if the patient is currently admitted to a hospital (required for TB patients).

Outbreak/Surveillance (if applicable): Tell us whether the specimen/isolate is part of an outbreak or cluster, or if the specimen is for routine surveillance. If the specimen is being submitted because of an outbreak, write in the associated name of the outbreak next to the outbreak box.

Section 3. SPECIMEN SOURCE OR TYPE

Specimen Source or Type: Indicate the kind of material you are submitting or the source of the specimen or isolate. For mycobacteriology specimens, complete this section or the specimen will be rejected.

For tuberculosis treatment, a specimen source or type MUST be provided for specimens used for the diagnosis or monitoring of TB.

CPT only copyright 2005 American Medical Association. All rights reserved.

March 2006 Page 2 of 2

DO NOT leave this section blank. For specimens other than those listed, check the "Other" box and write in the site and source selected from the TB Elimination Division's list of Anatomic Sites and Corresponding Specimen Sources, which can be obtained from your local or regional health department.

Section 4. PHYSICIAN INFORMATION

Physician's name, UPIN, and NPI Number: Give the name of the physician and their unique physician ID number (UPIN) and NPI number, if applicable. Beginning May 23, 2007, the NPI number will replace the UPIN. This information is required to bill Medicare and insurance.

Section 5. PAYOR SOURCE

Indicate the party that will receive the bill.

THE SUBMITTER WILL BE BILLED, if the required billing information is not provided or multiple payor boxes are checked**.**

Checking Medicaid or Medicare:
- Mark the appropriate box.
- Write in the Medicaid or Medicare number.
- If the patient name on the form does not match the name on the card, the submitter will be billed.

Checking Private Insurance:
- Mark the appropriate box.
- Complete all fields on the form that have an asterisk (*).
- If the private insurance information is not provided on the specimen form, the submitter will be billed.

Checking a DSHS Program:
- If you are contracting and/or enrolled with a DSHS program to provide services that require laboratory testing, please indicate which program. For program descriptions, see the Laboratory Services Section's Manual of Reference Services located on the web site at http://www.dshs.state.tx.us/lab/.
- Do NOT check a DSHS program as a Payor Source if the patient has Medicaid or Medicare, except for THSteps.
- For THSteps, check THSteps as the Payor Source. Write the patient's Medicaid number in the appropriate field.
- For Title V, must check either Family Planning or MCH (Maternal & Child Health).
- If there is no other Payor Source for the patient and the patient meets the program's eligibility criteria, check the appropriate DSHS program.
- For BIDS (Border & Infectious Disease Surveillance), EIP (Emerging Infections Program), and ELC (Epidemiology & Laboratory Capacity) programs, check the "Other" box and list the program's name in the space provided.

HMO / Managed care / Insurance company: Print the name, address, city, state, and zip code of the insurance company to be billed. If all insurance information is not provided on the specimen form, the submitter will be billed.

Responsible party: Print the name of the responsible party, the insurance ID number, insurance company's phone number, group name, and group number.

Signature and Date: Have the responsible party sign and date to authorize the release of their information, if DSHS is to bill their insurance or HMO.

TEST

Test Requested: Check or specify the specific test(s) to be performed by the DSHS Laboratory Services Section. Each test block requires a separate form AND a separate specimen. Examples of separate blocks are "Bacteriology" or "Mycobacteriology/Mycology" or "Parasitology". For specific test instructions, see the Laboratory Services Section Manual of Reference Services.

6. BACTERIOLOGY

DNA Gen Probe for Gonorrhea (GC)/Chlamydia: Please follow the instructions listed below when submitting *Neisseria gonorrhoeae* and *Chlamydia trachomatis* specimens.

Under the "Bacteriology" section of the form:

1. Under "Clinical specimens:"
   a. Check the box marked "Gonorrhea/Chlamydia (genetic probe)", if submitting a sample in a GEN-PROBE specimen collection kit.
   b. Check the box marked "Gonorrhea culture", if the specimen is a clinical sample submitted on a transport media such as Remel Transgrow, Remel GC transport media, GemBec Plates, etc.
2. Under "Pure cultures:"
   a. If *Neisseria gonorrhoeae* is isolated and a pure culture is being submitted, please check the box "Aerobe ID only" under "Pure Cultures". Please either hand write in GC or *Neisseria gonorrhoeae* next to the "Aerobe ID: Organism suspected" or attach a copy of any lab work performed at your facility.

Toxin/Other: If requesting Clostridium toxin, please be aware that this test is performed on *Clostridium species, not C. perfringens*.

7. MOLECULAR STUDIES

PCR for: / PFGE for: Write the name of the organism requested for testing.

Other: Write any other special test request.

For special test requests, contact Molecular Biology at (888) 963-7111 x7735 or (512) 458-7735 prior to submitting specimens.

11. PARASITOLOGY

Other: If requesting ID on suspected *Naegleria fowleri*, *Acanthamoeba species*, *Pneumocystis carinii, Leishmania species, Toxoplasma gondii, Trypanosoma species,* or cultures for amebiasis, mark "Other" and write the name the organism suspected. Before submitting the specimen, please notify the Laboratory by calling: (888) 963-7111 x7560 or (512) 458-7560.

CPT only copyright 2005 American Medical Association. All rights reserved.

C.51 Specimen Submission Form G-2B, Bacteriology and Parasitology, Spanish Instructions (3 Pages)

Marzo de 2006 Página 1 de 3

Instrucciones del formulario de remisión de muestras G-2B

Para obtener información sobre envíos por correo y el embalaje de las muestras, visite la página web de la Sección de Servicios de Laboratorio del DSHS en http://www.dshs.state.tx.us/lab/.

Debe acompañar cada muestra con un formulario de remisión de muestras.
El nombre del paciente de la muestra ***debe*** ser el mismo que el nombre del paciente del formulario.
Si no rellena el campo Fecha de obtención, se rechazará la muestra.

Coloque la etiqueta de código de barra aquí: coloque la etiqueta de código de barra de la muestra a ser usada para identificar y ubicar la muestra en el sistema de administración de datos del laboratorio del DSHS. Si está ingresando remotamente, coloque la etiqueta de código de barra de la muestra aquí.

Sección 1. DATOS DEL REMITENTE

Se requieren todos los datos del remitente.

Número de remitente y de TPI, nombre y dirección del remitente: el número de remitente es un número único que la Sección de Servicios de Laboratorio del Departamento Estatal de Servicios de Salud de Texas (Texas Department of State Health Services [DSHS]) asigna a cada uno de nuestros remitentes. Para muestras de Pasos Sanos de Texas (Texas Health Steps [THSteps]), utilice el número Identificador de proveedor de Texas (Texas Provider Identifier [TPI]) preasignado. Para obtener un número de TPI e inscribirse en Pasos Sanos de Texas, llame a la Asociación de Medicaid y Salud de Texas (Texas and Healthcare Partnership [TMHP]) al 1-800-925-9126.

Para solicitar un número de remitente a la Sección de Servicios de Laboratorio del DSHS, el formulario original o para cambiar los datos del remitente, sírvase llamar al (888) 963-7111, extensión 7578, o al (512) 458-7578 o mandar un fax al (512) 458-7533.

Núm. de NPI: a partir del 23 de mayo de 2007, todos los proveedores de salud deben usar el número Identificador de proveedor nacional (National Provider Identifier [NPI]) y ya no se usará el número de TPI u otro número de remitente. El número NPI es el nuevo identificador nacional oficial para proveedores de salud adoptado por los Centros de Servicios de Medicaid y Medicare (Centers for Medicare & Medicaid Services [CMS]) de conformidad con la Ley de Transferibilidad y Responsabilidad de Seguros Médicos (Health Insurance Portability and Accountability Act [HIPAA]) de 1996. Para obtener un número de NPI, llame al Sistema Nacional de Enumeración de Planes y Proveedores (National Plan and Provider Enumeration System [NPPES]) gratis al (800) 465-3203 o visite su sitio web en https://nppes.cms.hhs.gov/NPPES/Welcome.do.

Indique el nombre, dirección, ciudad, estado y código postal del remitente. Escriba claramente en letra de molde, utilice una etiqueta preimpresa o utilice una fotocopia del formulario original proporcionado por la Sección de Servicios de Laboratorio.

Datos de contacto: indique el número de teléfono, nombre y número de fax de la persona a contactar en el centro remitente en caso de que el laboratorio necesite información adicional sobre la muestra o el aislamiento.

Código de la clínica: sírvase proporcionarlo, de ser aplicable. Se trata de un código que el remitente provee para ayudar a identificar cuál oficina satélite remite una muestra y para ayudar al remitente a identificar adónde pertenece el informe de laboratorio, si el remitente tuviese una dirección de correo postal primaria con oficinas satélite.

Sección 2. DATOS DEL PACIENTE

Rellene todos los datos del paciente incluida la fecha de obtención, la hora de obtención, el número previo del laboratorio de muestras del DSHS, el apellido, el nombre, la inicial del segundo nombre, la dirección, ciudad, estado, código postal, número telefónico, fecha de nacimiento, edad, sexo, número de Seguro Social, si es mujer si está embarazada, la raza, etnia, número de expediente médico, código diagnóstico de ICD, país de origen, fecha de aparición, diagnóstico/síntomas y riesgo y marque ya sea paciente interno/externo, asociación de brote o vigilancia.

NOTA: el nombre del paciente de la muestra ***debe*** ser el mismo que el nombre del paciente del formulario.

La información requerida para facturar a Medicare, Medicaid o un seguro privado ha sido señalada con doble asterisco (**). Puede utilizar una etiqueta de paciente preimpresa.

Nombre del paciente: si al paciente lo cubre Medicaid, Medicare o un seguro privado, el nombre del formulario de muestras <u>debe</u> ser el mismo que el nombre de la tarjeta de seguro.

Fecha de nacimiento y edad: indique tanto la fecha de nacimiento como la edad del paciente. Si la fecha de nacimiento no está disponible, proporcione la edad del paciente y díganos si la edad es en días, meses o años.

Si es mujer y está embarazada: si el paciente es mujer, indique si está embarazada marcando ya sea Sí, No o Se desconoce. El embarazo puede afectar algunos resultados de pruebas.

Fecha de obtención/hora de obtención: indique la fecha y hora en que se obtuvo la muestra del paciente y quién obtuvo la muestra. No proporcione la fecha en que se remitió la muestra al DSHS. <u>Si no se rellena el campo Fecha de obtención, se rechazará la muestra</u>.

Núm. de expediente médico/núm. de extranjero/CUI: proporcione el número de identificación para propósitos de cotejo. CUI (Clinic Unique Identifier) es el número único identificador de clínicas.

Número previo del laboratorio de muestras del DSHS: si se ha remitido una muestra del paciente anteriormente al laboratorio del DSHS, sírvase proporcionar el número del laboratorio de muestras del DSHS.

Código diagnóstico de ICD, país de origen, fecha de aparición, diagnóstico/síntomas y riesgo (de ser aplicable): indique el código diagnóstico o resultados que ayudarían a procesar, identificar y facturar la muestra o el aislamiento. Si el país de origen del paciente no es los Estados Unidos, sírvase proporcionar el país de origen del paciente.

CPT only copyright 2005 American Medical Association. All rights reserved.

Paciente interno o externo (de ser aplicable): indique si el paciente está hospitalizado actualmente (requerido para pacientes tuberculosos).

Brote/vigilancia (de ser aplicable): díganos si la muestra o aislamiento es parte de un brote o grupo y si la muestra es de vigilancia rutinaria. Si se remite la muestra debido a un brote, escriba el nombre asociado del brote al lado de la casilla de brote.

Sección 3. FUENTE O TIPO DE MUESTRA

Fuente o tipo de muestra: indique el tipo de material que remite o la fuente de la muestra o el aislamiento. Para muestras de micobacteriología, rellene esta sección o se rechazará la muestra.

Para tratamiento tuberculoso, se DEBE proporcionar la fuente o tipo de muestra de las muestras usadas en el diagnóstico o control de tuberculosis. NO deje en blanco esta sección. Para muestras distintas a las de la lista, marque la casilla “Otra” y escriba el sitio y fuente seleccionados de la lista de Sitios anatómicos y fuentes de muestras correspondientes de la División de Eliminación de Tuberculosis, que puede obtenerse del departamento de salud local o regional.

Sección 4. DATOS DEL MÉDICO

Nombre y número de UPIN y NPI del médico: dé el nombre del médico y el número identificador único del médico (unique physician ID number [UPIN]) y el número NPI, de ser aplicable. A partir del 23 de mayo de 2007, el número NPI reemplazará al UPIN. Se requiere esa información para facturar a Medicare y al seguro.

Sección 5. PAGADOR

Indique la parte que recibirá la factura.

SE FACTURARÁ AL REMITENTE, si no se proporciona la información de facturación requerida o si se marcan múltiples casillas de pagador**.**

Marcación de Medicaid o Medicare:

- Marque la casilla correspondiente.
- Escriba el número de Medicaid o Medicare.
- Si el nombre del paciente del formulario no es el mismo que el nombre de la tarjeta, se facturará al remitente.

Marcación de seguro privado:

- Marque la casilla correspondiente.
- Rellene todos los campos del formulario que tengan asterisco (*).
- Si no proporciona los datos del seguro privado en el formulario de la muestra, se facturará al remitente.

Marcación de programa del DSHS:

- Si está contratado o inscrito en un programa del DSHS para proporcionar servicios que requieran pruebas de laboratorio, sírvase indicar qué programa es. Encontrará las descripciones de los programas en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio en el sitio web http://www.dshs.state.tx.us/lab/.
- NO marque un programa del DSHS como Pagador si el paciente cuenta con Medicaid o Medicare, a menos que sea Pasos Sanos de Texas.
- Si es Pasos Sanos de Texas, marque Pasos Sanos de Texas como pagador. Escriba el número de Medicaid en el campo correspondiente.
- Para Título V, debe marcar ya sea Planificación familiar o MCH (Salud Materna e Infantil, Maternal & Child Health).
- Si no existe otro Pagador del paciente y el paciente reúne los criterios de participación del programa , marque el programa del DSHS correspondiente.
- Para los programas BIDS (Vigilancia de Enfermedades Infecciosas y Fronterizas, Border & Infectious Disease Surveillance), EIP (Programa de Infecciones Emergentes, Emerging Infections Program) y ELC (Capacidad Epidemiológica y de Laboratorio, Epidemiology & Laboratory Capacity), marque la casilla “Otro” y liste el nombre del programa en el espacio provisto.

HMO/Atención dirigida/aseguradora: ponga en letra de molde el nombre, dirección, ciudad, estado y código postal de la aseguradora a la que se facturará. Si no proporciona todos los datos del seguro en el formulario de la muestra, se facturará al remitente.

Parte responsable: ponga en letra de molde el nombre de la parte responsable, el número de identificación del seguro, el número telefónico de la aseguradora, el nombre del grupo y el número del grupo.

Firma y fecha: haga que la parte responsable firme y feche para autorizar la divulgación de los datos de la misma, si DSHS ha de facturar al seguro o HMO de ésta.

PRUEBA

Prueba solicitada: marque o especifique la o las pruebas específicas que ha de realizar la Sección de Servicios de Laboratorio del DSHS. Cada sección de pruebas requiere un formulario Y una muestra por separado. "Bacteriología” o “Micobacteriología/micología” o “Parasitología” serían ejemplos de secciones separadas. Puede consultar instrucciones de pruebas específicas en el Manual de servicios de referencia de la Sección de Servicios de Laboratorio.

6. BACTERIOLOGÍA

Sonda general de ADN de gonorrea (GC)/clamidia: sírvase seguir las siguientes instrucciones al remitir muestras de *Neisseria gonorrhoeae* y *Chlamydia trachomatis*.

Bajo la sección “Bacteriología” del formulario:

1. Bajo “Muestras clínicas”:
   a. Marque la casilla “Gonorrea/clamidia (sonda genética)”, si remite una muestra en un equipo de obtención de muestras GEN-PROBE.
   b. Marque la casilla “Cultivo de gonorrea”, si la muestra es una muestra clínica remitida en un medio de transporte como Remel Transgrow, medio de transporte Remel GC, bandejas GemBec, etc.
2. Bajo “Cultivos puros”:
   a. Si se aísla *Neisseria gonorrhoeae* y se remite un cultivo puro, sírvase marcar la casilla “Identificación aeróbica solamente” bajo “Cultivos puros”. Sírvase ya sea escribir GC o *Neisseria gonorrhoeae* junto a “Identificación aeróbica: sospecha de organismo” o adjunte una copia del trabajo de laboratorio realizado en su centro.

Toxina/otra: si pide la prueba de toxina de Clostridium, sírvase tomar en cuenta que la prueba se realiza en *las especies de Clostridium y no en C. perfringens*.

C.53 Guidelines: Tuberculosis Skin Testing (2 Pages)

DEPARTMENT OF STATE HEALTH SERVICES
GUIDELINES: TUBERCULOSIS SKIN TESTING
(PPD/MANTOUX)

Purpose:

The tuberculosis intradermal skin test is used to detect tuberculosis infection.

- To detect infection, either past or present, with *Mycobacterium tuberculosis*.
- To serve as a diagnostic procedure in selected patients.

Equipment:

- PPD (purified protein derivative) tuberculin antigen
- Tuberculin syringe
- 1/4” to 1/2”, 27-gauge needle
- Alcohol sponge or swab

Procedures:

Nursing Action:	Rationale/Amplification:
1. Determine if patient has ever had BCG vaccine, a previously positive skin test, recent viral disease or immunization with a live virus vaccine within the last 30 days, immunosuppression by disease, drugs, or steroids.	1. A history of BCG vaccine should be documented but does not cancel the need for tuberculin skin testing.
2. Draw up 0.1 ml of PPD-tuberculin into tuberculin syringe. Each 0.1 ml should contain 5 TU (tuberculin units of PPD-tuberculin).	2. Use immediately to avoid adsorption onto the plastic/glass syringe.
3. Cleanse the skin of the volar (palm side) surface of the **left** arm with alcohol. Allow to dry.	3. An intradermal test may be applied at any site but the use of the left arm is practiced universally to facilitate identifying the location of the injection site by the health care worker who reads the test. If the test is applied at another site, document the exact site of injection.
4. Stretch the skin taut.	4. Facilitates the introduction of the needle.
5. Hold the tuberculin syringe close to the skin, bevel up, so that the hub of the needle touches it as the needle is introduced.	5. Holding the syringe in this way will reduce the needle angle at the skin surface, promoting the correct entry for a proper intradermal injection.
6. Inject the tuberculin into the superficial layer of the skin to form a wheal 6mm to 10 mm in diameter.	6. If no wheal appears (because the injection was made too deep), or the wheal is smaller than 6 mm (because the needle was not under the skin and part of the antigen leaked on the outer surface of the skin), reapply test at another site at least five centimeters (two inches) from the original site.

To Read the Test:	Further Clarification to Reading the Test:
1. Read the test within 48–72 hours.	1. Tuberculin skin tests are tests of delayed hypersensitivity.
2. Have a good light available. Flex the forearm slightly at the elbow.	
3. Inspect for the presence of induration. Inspect from a side view against the light. Inspect by direct light.	3. Induration refers to hardening or thickening of the tissues.
4. Palpate: lightly rub the finger across the injection site from the area of normal skin to the area of induration. Outline the diameter of induration.	
5. Measure the maximum transverse diameter of induration (not erythema) in millimeters with a flexible ruler.	5. Erythema (redness) without induration is generally considered to be of no significance.

CPT only copyright 2005 American Medical Association. All rights reserved.

DEPARTMENT OF STATE HEALTH SERVICES
GUIDELINES: TUBERCULOSIS SKIN TESTING
(PPD/MANTOUX)

Procedures

Interpretation

1. Negative reaction: An induration of 0–< 5 mm

2. Positive Reaction:
   a. An induration of 5 mm or more is considered to be positive for:
      1) HIV-positive persons
      2) Recent contacts of TB case
      3) Individuals with fibrotic changes on chest radiograph consistent with old TB
      4) Patients with organ transplants and other immunosuppressed patients (receiving the equivalent of > 15 mg/d Prednisone for > 1 month)
   b. An induration of 10 mm or more is considered to be positive for:
      1) Recent arrivals (< 5 yr) from high-prevalence countries
      2) Injection drug users
      3) Residents and employees* of high-risk congregate settings: prisons and jails, nursing homes and other healthcare facilities, residential facilites for AIDS patients, and homeless shelters
      4) Mycobacteriology laboratory personnel
      5) Persons with clinical conditions that make them high-risk: silicosis, diabetes mellitus, chronic renal failure, some hematologic disorders (e.g., leukemias and lymphomas), other specific malignancies (e.g., carcinoma of the head or neck and lung), weight loss of > 10 % of ideal body weight, gastrectomy, jejunoileal bypass
      6) Children < 4 yrs of age or infants, children, and adolescents exposed to adults in high-risk categories
   c. An induration of 15 mm or more is considered to be positive in individuals with no risk factors for tuberculosis

1. This shows either a lack of tuberculin sensitivity or a low grade sensitivity that most likely is not caused by M. tuberculosis. A negative test does not rule out the presence of tuberculosis. Because of the possibility of a false-negative result, the tuberculin skin test should never be used to exclude the possibility of active disease among persons for whom the diagnosis is being considered.

2a. A positive reaction indicates that a patient has had contact with the bacillus that causes tuberculosis. It does not necessarily mean that active disease is present in the lung; however, further evaluation is required.
Individuals who are in close contact with persons with active tuberculosis and who have reactions ≥ 5 mm should be considered positive and be evalutated for treatment of either latent tuberculosis infection or active tuberculosis disease.

2b. Individuals with skin test results of ≥ 10 mm should be evaluated for treatment of either latent tuberculosis infection or active tuberculosis disease.
Note: For persons with negative tuberculin skin test reactions who undergo repeat skin testing (e.g., healthcare workers), an increase in reaction size of 10 mm or more within a period of 2 yrs should be considered a skin test conversion indicative of recent infection with *M. tuberculosis*. In some individuals who have been infected with nontuberculous mycobacteria or have undergone BCG vaccination, the skin test may show some degree of induration. For these individuals, a conversion to "positive" is defined as an increase in induration by 10 mm on subsequent tests.

2b3. * For persons who are otherwise at low risk and are tested at entry into employment, a reaction of > 15 mm induration is considered positive.

Documentation

1. Record name of antigen, manufacturer, lot number, date of testing, and date of reading.
2. Record site of application of test if applied at site other than the left volar surface.
3. Record the size of induration.

C.54 Tuberculosis (TB) Screening and Education Tool

This screening tool for tuberculosis (TB) exposure risk is to be used annually to determine the need for tuberculin skin testing. In areas of high TB prevalence, the screening tool need not be done at visits for which tuberculin skin testing is required: 1 year of age, once between 4 through 6 years of age, and once between 11 through 17 years of age.

The questions in this screening tool are intended as a minimum screen. Follow-up questions may be necessary to clarify hesitant or ambiguous responses. Questions specific to TB exposure risks in the child's community may need to be added.

- If all the answers are unqualified negatives, the child is considered at low risk for exposure to TB and will not need tuberculin skin testing.
- If the answer to any question is "Yes" or "I don't know," the child should be tuberculin skin tested.
- In the case of the child for whom an answer in the past of "Yes" or "I don't know" prompted a skin test, which was negative, the skin test *may* not have to be repeated annually.
- The decision to administer a skin test must be made by the medical provider based upon an assessment of the possibility of exposure. A negative tuberculin skin test never excludes tuberculosis infection or active disease.
- Bacillus of Calmette and Guérin (BCG) vaccinated children should also have the screening tool administered annually. Previous BCG vaccination is not a contraindication to tuberculin skin testing. Positive tuberculin skin tests in BCG vaccinated children are interpreted using the same guidelines used for non-BCG vaccinated children.
- Children who have had a positive TB skin test in the past (whether treated or not), should be re-evaluated at least annually by a physician for signs and symptoms of TB.

Care of children who are newly discovered to be tuberculin skin test positive includes:

- An evaluation for signs and symptoms of TB.
- A chest X-ray to rule out active disease.
- Oral medications to prevent progression to active disease or multi-drug therapy if active disease is present.
- Referral for consultation by a pediatric TB specialist is recommended if active disease is present.
- A report to the local health authority for investigation to find the source of the infection.

Feel free to photocopy the screening and education tool from this publication.

C.55 TB Questionnaire

Name of Child____Date of Birth ________________

Organization administering questionnaire_______________________________________ Date_______________________

Tuberculosis (TB) is a disease caused by TB germs and is usually transmitted by an adult person with active TB lung disease. It is spread to another person by coughing or sneezing TB germs into the air. These germs may be breathed in by the child.

Adults who have active TB disease usually have many of the following symptoms: cough for more that two weeks duration, loss of appetite, weight loss of ten or more pounds over a short period of time, fever, chills and night sweats.

A person can have TB germs in his or her body but not have active TB disease (this is called latent TB infection or LTBI).

Tuberculosis is preventable and treatable. TB skin testing (often called the PPD or Mantoux test) is used to see if your child has been infected with TB germs. No vaccine is recommended for use in the United States to prevent tuberculosis. The skin test is not a vaccination against TB.

We need your help to find out if your child has been exposed to tuberculosis.

Place a mark in the appropriate box:	Yes	No	Don't Know
TB can cause fever of long duration, unexplained weight loss, a bad cough (lasting over two weeks), or coughing up blood. As far as you know: has your child been around anyone with any of these symptoms or problems? or has your child had any of these symptoms or problems? or has your child been around anyone sick with TB?			
Was your child born in Mexico or any other country in Latin America, the Caribbean, Africa, Eastern Europe or Asia?			
Has your child traveled in the past year to Mexico or any other country in Latin America, the Caribbean, Africa, Eastern Europe or Asia for longer than 3 weeks? If so, specify which country/countries?______________________________________			
To your knowledge, has your child spent time (longer than 3 weeks) with anyone who is/has been an intravenous (IV) drug user, HIV-infected, in jail or prison or recently came to the United States from another country?			

Has your child been tested for TB? Yes___ (if yes, specify date ____/____) No___
Has your child ever had a positive TB skin test? Yes___ (if yes, specify date ____/____) No___

C.56 Cuestionario Para la Detección de Tuberculosis

Nombre del niño o niña ____

Organización ________________________________ Fecha ______________

La Tuberculosis (TB) es una enfermedad causada por gérmenes de TB y en la mayoriá de los casos es trasmitida por una persona adulta con tuberculosis pulmonar activa. Se transmite a otra persona por la tos y por el estornudo al expelir gérmenes de TB al aire que pueden ser respirados por los niños.

Los adultos que tienen la enfermedad activa casi siempre tienen varios de los siguientes síntomas: tos con duración de más de dos semanas, pérdida de apetito, pérdida de peso de diez libras o más en un período corto de tiempo, fiebre, escalofríos y sudores nocturnos.

Una persona puede tener gérmenes de TB en su cuerpo pero no tener la enfermedad activa. Esto se llama infección latente de TB (o LTBI por su sigla en inglés).

La TB es prevenible y curable. La prueba tuberculínica, también llamada PPD o prueba de Mantoux, se utiliza para saber si su niño o niña ha sido infectado/a con el germen de TB. No se recomienda ninguna vacuna para prevenir la tuberculosis. La prueba tuberculínica no es una vacuna contra la tuberculosis.

Necesitamos de su ayuda para saber si su niño/niña ha sido expuesto/a a la tuberculosis.

	Sí	No	No se sabe
La tuberculosis puede causar fiebre de larga duración, pérdida de peso inexplicable, tos severa (con más de dos semanas de duración), o tos con sangre. ¿Es de su conocimiento si: su niño o niña ha estado cerca de algún adulto con esos síntomas o problemas? su niño o niña ha tenido algunos de estos síntomas o problemas? su niño o niña ha estado cerca de alguna persona enferma de tuberculosis?			
¿Su niño o niña nació en México en o cualquier otro país de América Latina, el Caribe, Africa, Europa Oriental o Asia?			
¿Su niño o niña viajó a México o a cualquier otro país de América Latina, el Caribe, Africa, Europa Oriental o Asia durante el último año por más de 3 semanas? Si su respuesta es positiva, favor de especificar a qué país o países.			
¿Es de su conocimiento, si su niño o niña pasó un tiempo (más de 3 semanas) con alguna persona que es o ha sido usuario de droga intravenosa (IV), infectado por VIH, en la prisión, o haya llegado recientemente a los Estados Unidos?			

¿A su niño o niña se le ha realizado la prueba tuberculínica recientemente? Sí___ (si sí, especifique la fecha ____/____) No___
¿Su niño o niña alguna vez tuvo reacción positiva a la tuberculina? Sí___ (si sí, especifique la fecha ____/____) No___

Solamente para uso de la escuela o del proveedor de servicios médicos
****
¿Se administró PPD? Sí___ No___
Si sí,

Contact Phone: ______________________________ Contact Fax: ____________________

In order to receive State-supplied PPD at no cost to me, I, on behalf of myself and any and all practitioners associated with this medical office, group practice, health department, community/migrant/rural health clinic, or other organization of which I am the physician in charge or equivalent, agree to the following:

1. I agree to provide/arrange training for all personnel in administering, reading, and recording the TB skin test results. I agree to instruct all patients that the TB skin test is a two (2)-part test and they must return in 48 to 72 hours for their test to be read by trained personnel so the test result can be documented. I agree to have all results documented in millimeters and a negative test will be recorded as 0 mm not negative. I agree to supply written documentation of the training to administer TB skin testing, reading and recording upon request of the health department issuing the PPD.
2. I agree to do the screening for TB risk factors on each patient and **ONLY** place the TB skin test on those patients that have a **TB risk factor or have some other medical necessity that is documented in their chart or are entering foster care**.
3. I agree to submit TB-400 forms or refer clients to the health department for medical evaluation or additional follow-up when they have latent TB infection (positive skin test result and a negative chest x-ray).
4. In accordance with the Texas Administrative Code, Title 25, Part 1, Chapter 97, Subchapter A, I shall report to the local health authority any known or suspected case of TB within one working day and any new diagnosis of latent TB infection within one week.
5. I agree to submit the Monthly Tuberculin Skin Testing Form (EF12-12168). This form will be sent at the first of each month showing our TB testing numbers for the previous month. I agree to monitor my stock levels so that emergency orders will be kept to a minimum.
6. As a private clinic or health care facility, I agree to use this PPD only for TB screening of children as part of a Texas Health Steps medical check-up and to identify and document TB risk factors before placing the PPD.
7. Either the State or I may terminate this agreement at any time. My failure or the failure of any others outlined above to comply with these requirements will be grounds for the State to terminate this agreement.

C.59 TVFC Patient Eligibility Screening Record

CLINIC USE ONLY:
TVFC Eligible:
☐ Yes ☐ No

TEXAS VACCINES FOR CHILDREN PROGRAM (TVFC)
PATIENT ELIGIBILITY SCREENING RECORD

Purpose: To determine eligibility and the source of funds for the Texas Department of State Health Services to be reimbursed for vaccines. A record must be kept in the office of the health care provider that reflects the status of all children 18 years of age or younger who receive immunizations through the Texas Vaccines for Children Program. The record may be completed by the parent, guardian, or individual of record. This same record may be used for all subsequent visits as long as the child's eligibility status has not changed. While verification of responses is not required, it is necessary to retain this or a similar record for each child receiving vaccines.

Date of Screening: ______________________________

Child's Name:

____
Last Name First Name MI

Child's Date of Birth: ________/________/________

Parent/Guardian/Individual of Record:

____
Last Name First Name MI

Provider's/Clinic's Name:

____

The above named child qualifies for vaccines through the Texas Vaccines for Children Program because he/she (check the first category that applies, check only one)*:

- ☐ (a) is enrolled in Medicaid, or
- ☐ (b) does not have health insurance, or
- ☐ (c) is an American Indian, or
- ☐ (d) is an Alaskan Native, or
- ☐ (e) is underinsured (has health insurance that **Does Not** pay for vaccines, has a co-pay or deductible the family cannot meet, or has insurance that provides limited wellness or prevention coverage) *, or
- ☐ (f) is a patient who is served by any type of public health clinic and does not meet any of the above criteria, or
- ☐ (g) is a patient who receives benefits from the Children's Health Insurance Plan (CHIP)
- ☐ **None of the above, not eligible for TVFC vaccine**

In order to participate in the Texas Vaccines for Children Program and/or to receive federally- and state-supplied vaccines provided to me at no cost, I, on behalf of myself and any and all practitioners associated with this medical office, group practice, health department, community/migrant/ rural health clinic, or other organization, agree to the following:

1) Before administering vaccines obtained through the Texas Vaccines for Children Program (TVFC), this office/facility will determine VFC eligibility. The Patient Eligibility Screening Form will be provided to the parent or guardian to declare each child's eligibility.

2) This office/facility will maintain records of the parent/guardian/authorized representative's responses on the Patient Eligibility Screening Form for at least three years. If requested, this office/facility will make such records available to the Texas Department of State Health Services (DSHS), the local health department/authority, or the U.S. Department of Health and Human Services.

3) This office/facility will comply with the appropriate vaccination schedule, dosage, and contraindications, as established by the Advisory Committee on Immunization Practices, unless (a) in making a medical judgment in accordance with accepted medical practice, this office/facility deems such compliance to be medically inappropriate, or (b) the particular requirement is not in compliance with Texas Law, including laws relating to religious and medical exemptions.

4) This office/facility will provide Vaccine Information Statements (VIS) to the responsible adult, parent, or guardian and maintain records in accordance with the National Childhood Vaccine Injury Act. Signatures are required for informed consent. (The Texas Addendum portion of the VIS may be used to document informed consent.)

5) This office/facility will not charge for vaccines supplied by DSHS and administered to a child who is eligible for the TVFC.

6) This office/facility may charge a vaccine administration fee. This office/facility will not impose a charge for the administration of the vaccine in any amount higher than the maximum fee established by DSHS. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services.

7) This office/facility will not deny administration of a TVFC vaccine to a child because of the inability of the child's parent or guardian/individual of record to pay an administrative fee.

8) This office/facility will comply with the State's requirements for ordering vaccine and other requirements as described by DSHS.

9) This office/facility or the State may terminate this agreement at any time for personal reasons or failure to comply with these requirements.

10) This office/facility will allow DSHS (or its contractors) to conduct on-site visits as required by VFC regulations.

C.61 TVFC Questions and Answers (3 Pages)

Texas Vaccines For Children Program

Questions and Answers

Texas Vaccines For Children Program

Question 1: *What is the Texas Vaccines For Children Program (TVFC)?*

Answer: *This is our version of the Federal Vaccines For Children (VFC) Program. The TVFC was initiated by the passage of the Omnibus Budget Reconciliation Act of 1993. This legislation guaranteed vaccines would be available at no cost to providers, in order to immunize children who meet the eligibility requirements.*

Why Enroll?

Question 2: *Why should a health care provider enroll in the TVFC Program?*

Answer:

- *You can get free vaccine for your eligible patients.*
- *You will not need to refer patients to public clinics for vaccines.*
- *You can provide immunizations to your patients as part of a comprehensive care package, this will enhance the opportunity for patients to find a medical home.*

Patients Served

Question 3: *Once enrolled, are providers required to immunize children who are not their patients?*

Answer: *No. You control whom you see in your practice.*

Children Who Qualify

Question 4: *Which children qualify for free vaccines?*

Answer: *All children are eligible for free vaccine, except:*

- *Children with insurance that pays for immunization services, and*
- *Children whose parents or guardians are able to pay for copayments or deductibles for immunization services.*

Texas Vaccines For Children Program

Questions and Answers

CHIP Enrollment

Question 5: Are children who are enrolled in CHIP eligible?

Answer: Yes, through special arrangement CHIP children are also eligible.

Medicaid Enrollment

Question 6: To participate in TVFC, must providers enroll as a state Medicaid provider?

Answer: No. However, if you are enrolled in the state Medicaid Program, you must enroll in the TVFC Program in order to receive free vaccine.

Question 7: Will the Texas Medicaid Program reimburse private practitioners for vaccines administered to Medicaid patients?

Answer: No. Medicaid reimburses for the administration fee. The Medicaid vaccine administration fee is $5.00 per vaccine dose administered.

Vaccine Related Fees

Question 8: Why are there fee caps on what providers can charge to administer the vaccine?

Answer: Federal Legislation requires fee caps for administration on a statewide basis that balance the provider's financial need and the patient's ability to pay.

Question 8: Will TVFC pay an administration fee for non-Medicaid, TVFC eligible children?

Answer: No. For non-Medicaid, TVFC eligible children, providers can charge a maximum of $14.85 per vaccine; administration fee may not exceed this amount. (Combination vaccines such as DTaP are considered one vaccine.)

Texas Vaccines For Children Program

Questions and Answers

Question 10: *Will providers be required to increase the amount of vaccine information materials they provide to parents because of the TVFC Program?*

Answer: *No. Materials required of all providers through the National Childhood Vaccine Injury Act are sufficient.*

Eligibility Status

Question 11: *Must providers ask the patient's eligibility status each time the patient comes for a vaccine visit?*

Answer: *No. Providers need only update eligibility status whenever there is reason to believe a child's eligibility status has changed.*

Question 12: *How are providers expected to verify responses for vaccine eligibility?*

Answer: *Providers are not expected to do anything more than ask the patient what the child's eligibility status is and then record the response. The parent can complete the Patient Eligibility Screening Form.*

Question 13: *Why must providers complete a Provider Profile describing patients by eligibility category?*

Answer: *This information allows the Texas Department of State Health Services to determine how the cost of vaccine will be divided among state and federal funds. Each year, you may find your profile information has changed. The Provider Profile must be updated annually, in accordance with Federal requirements.*

Claim Form Examples

Note: *This section contains claim form examples* only. *These examples are not accurate depictions of claim form data required for claims adjudication. Refer to Section 4 "Claims Filing" for information about completing claim forms for submission to TMHP.*

Claims prepared by computer billing services or office-based computers may have "Signature on File" printed in the signature block. Printing of the provider's name instead of "Signature on File" is not acceptable.

Refer to: "Provider Signature on Claims" on page 5-23 for more details.

E.1 Vendor Drug Program

The Texas Medicaid Vendor Drug Program (VDP) makes payment for prescriptions of covered outpatient drugs only to those pharmacy providers contracted with the VDP. In-state pharmacies licensed as Class A or C by the Texas State Board of Pharmacy are eligible for enrollment in the VDP. Out-of-state pharmacies and pharmacies holding any other class of pharmacy license are considered for inclusion in the program on a case-by-case basis, relative to the benefits made available to a client eligible for Medicaid. Contracts are not granted to applicants unless additional benefits to the recipient are established.

The only drugs eligible for VDP reimbursement are listed in the current *Texas Listing of National Drug Codes*. Additionally, the Texas Drug Code Index (TDCI) can be found on the HHSC website at www.hhsc.state.tx.us. The VDP does not reimburse claims for nutritional products (enteral or parenteral), medical supplies, or equipment.

For more information on the VDP, contact:

Vendor Drug Area	Telephone Number
Covered outpatient drugs and billing: The 800 number is for pharmacy use only and can be used to reach anyone in the VDP.	1-800-435-4165
Pharmacy contracts	1-512-491-1163
Policy	1-512-491-1340
Administration	1-512-491-1124
Drug formulary (Texas listing of national drug codes)	1-512-491-1157

Clients who are not locked-in to a specific pharmacy may obtain their drugs or supplies from any contracted Medicaid provider of pharmaceutical services.

Refer to: “Client Limited Program” on page 4-5 for more information about lock-in limitations.

Family planning services are excluded from lock-in limitation. Though TMHP reimburses family planning agencies and physicians for family planning drugs and supplies, the following family planning drugs and supplies are also available through the VDP Program:

- Diaphragms
- Oral contraceptives
- Jellies, creams, foams, suppositories, vaginal contraceptive film, and contraceptive sponge
- Condoms
- Medication for treatment of vaginal/cervical/genital infections (subject to the three prescription limit)

The VDP is limited to three prescriptions per month, per client, except for:

- Clients enrolled in waiver programs such as managed care, Class, Community-Based Alternatives (CBA)
- Texas Health Steps (THSteps)-eligible (clients younger than 21 years of age), unlimited but must be medically necessary and appropriate
- Residents in skilled nursing facilities, unlimited
- Clients enrolled in the State of Texas Access Reform (STAR) Program, and residing in a STAR Program service area, unlimited

  Refer to: “Service Areas” on page 7-14
- Prescriptions for family planning drugs and supplies are not subject to the three prescription limit

E.1.1 Lotions Available Through the Vendor Drug Program

The VDP offers Coats Aloe Vera products to Medicaid and Texas Health Steps (THSteps)-Comprehensive Care Program (CCP) clients with a physician’s prescription. Coats Aloe Vera products are available in cream, lotion, gel, liniment, and liquid form and they contain no alcohol or fragrances. The product information states that cetyl alcohol is a component. Cetyl alcohol, however, does not have alcohol as a base, does not act like alcohol, but is used as a thickener. The liniment form contains methylsalicylate (wintergreen). The following Coats Aloe Vera creme, lotion, gel, liniment, and liquid products are available from the VDP with a physician’s prescription:

TX Drug Code	Name and Strength	
58826070108	Coats Aloe Vera	Liquid, 100% (soaking)
58826070128	Coats Aloe Vera	Liquid, 100% (soaking)
58826070202	Coats Aloe Vera	85% Lotion
58826070208	Coats Aloe Vera	85% Lotion
58826070233	Coats Aloe Vera	85% Lotion
58826070304	Coats Aloe Vera	75% Creme
58826070316	Coats Aloe Vera	75% Creme
58826070408	Coats Aloe Vera	Liniment 85%, 11% methylsalicylate
58826070508	Coats Aloe Vera	90% Jelly
58826070533	Coats Aloe Vera	90% Jelly

If a physician does not wish to use these products, the physician is allowed to make a request to THSteps-CCP for another product, with specific documentation of the medical necessity for another product. THSteps-CCP does not provide nonlegend, cosmetic-type skin lotions and cremes.

CPT only copyright 2005 American Medical Association. All rights reserved.

E.2 Services Available for Children and Adolescents

Medically necessary drugs and supplies that are not covered by the VDP Program may be available to children and adolescents (birth through 20 years of age) through the THSteps-CCP.

Contact the THSteps-CCP Customer Service at 1-800-846-7470.

The Prior Authorization Fax number is 1-512-514-4212.

For more information about pharmacy enrollment in THSteps-CCP, see "Pharmacies (THSteps-CCP Only)" on page 43-60.

E.3 Synagis® Available Through the Vendor Drug Program

Synagis® is available to physicians for administering to Medicaid clients through the VDP. This option enables physicians to have Synagis® shipped directly to their office from a network pharmacy. Physicians will not need to purchase the drug. Physicians that obtain Synagis® through the VDP may not bill Medicaid for the drug.

E.3.1 Participating Synagis® Distribution Pharmacies

Curascript

G.1 Model Workplace Guidelines for Businesses, State Agencies, and State Contractors

G.1.1 Purpose

The purpose of this policy is to protect the employment rights and privileges of individuals infected with the human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) through compliance with federal, state, and local laws. This policy will provide Texas employers, especially state agencies, with a uniform approach to developing policies and education programs that address HIV/AIDS in the workplace. The Texas Department of State Health Services (DSHS) encourages all employers to establish workplace policies concerning persons with HIV/AIDS. Employers can adapt this model to fit the particular needs of their organization, work force, and clients. However, the content and intent must remain consistent with this document and the *Texas Health and Safety Code*.

G.1.2 Authority

Governance for this policy is found in *Vernon's Texas Codes Annotated*, Health & Safety Code (HSC) §85.010, "Educational Course for Employees and Clients of Health Care Facilities"; §85.111, "Education of State Employees"; §85.112, "Workplace Guidelines"; and §85.113, "Workplace Guidelines for State Contractors."

The model workplace guidelines developed by the DSHS, HIV/ sexually transmitted disease (STD) Comprehensive Services Branch, as required by HSC §85.012, "Model Workplace Guidelines," and adopted as HIV/STD Policy No. 090.021, are considered the minimum standards for the development of guidelines for state agencies. This policy also serves as the minimum standard for contractors of certain designated state agencies and organizations funded by those state agencies (HSC §85.113). "State Agencies Listed Under HSC §85.113" on page G-4 These guidelines are also the standard for health care facilities licensed by DSHS and the Department of Aging and Disability Services (DADS) as stated in HSC §85.010, "Educational Course for Employees and Clients of Health Care Facilities."

G.1.3 Who Must Use Workplace Guidelines

G.1.3.1 State Agencies

State law requires that each state agency adopt and carry out workplace guidelines. The agency's workplace guidelines should incorporate, at a minimum, the DSHS model workplace guidelines in this policy.

G.1.3.2 State Contractors

A program involving direct client contact, which contracts with or is funded by any of the state agencies listed on page G-4, will adopt and carry out workplace guidelines as stated in HSC §85.113.

G.1.4 Why Have Guidelines

Employers should develop and carry out policies and education programs concerning potentially limiting medical conditions before a crisis arises. Such policies and education programs help reduce employees' fears and misconceptions about HIV/AIDS and help to:

- Provide current and accurate scientific evidence that people with HIV infection do not pose a risk of transmitting the virus to coworkers through ordinary workplace contact.
- Provide workers with current information about HIV risk reduction for employees and their families.
- Avoid conflict between the infected employee and the employer regarding discrimination or other employment issues.
- Prevent work disruption and rejection of the infected employee by coworkers.
- Inform employees that they have rights regarding work continuation, confidentiality of medical and insurance records, and general health and safety.
- Provide specific and ongoing education and equipment to employees in health care settings who are at risk of exposure to HIV, and to assure that appropriate infection-control procedures are used.
- Reduce the financial impact, legal implications, and other possible effects of HIV/AIDS in the workplace.

G.1.5 Development of Workplace Policy Content

Individuals infected with HIV have the same rights and opportunities as other individuals. While some employers prefer a policy specific to HIV/AIDS and its unique issues, others prefer a general policy concerning illnesses and disabilities. A general policy should address HIV/AIDS in the same way as other major illnesses. We encourage use of the following statements in agency policy:

- Use of a person's HIV status to decide employment status, service delivery, or to deny services to HIV infected individuals is not acceptable. Employees who believe that they have been discriminated against because of HIV or AIDS should contact the personnel office to discuss the matter, or initiate action through the agency's grievance procedure. Other legal options may also be available.
- This policy is consistent with current information from public health authorities, such as the Centers for Disease Control and Prevention (CDC) of the United States Public Health Service, and with state and federal laws and regulations.

CPT only copyright 2005 American Medical Association. All rights reserved.

While the approach and resolution of each employee's situation may vary, similar issues may arise. A workplace policy should address the following issues about HIV/AIDS and other life-threatening illnesses or disabilities:

- *Discrimination.* The *Americans with Disabilities Act* (ADA) of 1990 prohibits discrimination against people with disabilities, which include HIV and AIDS, in employment, public accommodations, public transportation, and other situations.

  A specific policy statement that no one will be denied employment or employment opportunities because of a disability, satisfies the employer and employee's need to address discrimination. Such a statement might be, "This agency complies with the ADA protections of all people with disabilities against discrimination in job application procedures, hiring, promotions, discharge, compensation, job training, and other terms or conditions of employment." Managers may want to define ways in which they will deal with discriminatory actions.

- *Desire and Ability to Work.* A workplace policy should address the infected employee's desire and need to work and the infected employee's value to the workplace. Such a statement reassures employees that the employer supports them.

  The health status of someone with HIV may vary from healthy to critically ill. In the work setting, the ultimate concern is whether or not the employee can satisfy job expectations. A policy statement may say, for example, "Procedures may be adapted to provide reasonable accommodation so that people with disabilities may remain employed and productive for as long as possible. All employees, however, are expected to perform the essential functions of their job with or without reasonable accommodation."

- *Performance Standards.* The ADA provides protections for disabled persons "qualified" to perform their jobs. And although an employer may be expected to provide reasonable accommodation to a disabled employee or applicant; employers may terminate employees and refuse to hire individuals who cannot perform the essential functions of the job, with or without the reasonable accommodation.

  One suggested statement is, "While the ADA does protect disabled employees from employment discrimination, all employees, those with and without disabilities, have the same performance and conduct standards regarding hiring, promotion, transfer, and dismissal."

- *Reasonable Accommodation.* The ADA requires employers to provide reasonable accommodations for employees with disabilities. Employers do not have an obligation to provide any accommodation that imposes an undue hardship on the employer. Specific questions about the issue of reasonable accommodation and undue hardship should be directed to staff responsible for coordinating the requirements of the ADA.

  Such a policy statement might read, "The following options may be considered for people with HIV/AIDS: possible assignment or reassignment of job duties, working at home, leaves of absence, and flexible work schedules."

- *Confidentiality and Privacy.* Organizations that receive funds from a state agency for residential or direct client services or programs shall develop and use confidentiality guidelines to protect their clients' HIV/AIDS related medical information (HSC §85.115, "Confidentiality Guidelines"). Organizations that fail to adopt and use confidentiality guidelines are ineligible to receive state funds.

  Employees are not required to reveal their HIV status to employers. All medical information that an HIV infected employee provides to medical or management personnel is confidential and private. Employers may not reveal this information without the employee's knowledge and written consent, except as provided by law (HSC §81.103, "Confidentiality; Criminal Penalty").

  A suggested policy statement might be, "This agency will protect the confidentiality of employee medical records and information. Written consent of the employee must be obtained to share any confidential information with other staff. Those with access to confidential information must maintain strict confidentiality and privacy, separating this information from employees' personnel records. Individuals who fail to protect these employee rights commit a serious offense, which may be cause for litigation resulting in both civil and criminal penalties, and may result in dismissal."

- *Coworker Concerns.* Employers need to be aware of the concerns that coworkers may have about an HIV infected coworker. A policy statement that acknowledges employee concerns and offers HIV/AIDS education helps to increase awareness and decrease fear. Equally important is a policy statement that clarifies the limits of an employer's response to coworker concerns, e.g., "Employees do not have the right to refuse to work with someone who has any disability."

- *Employee Education.* Any health care facility *licensed by* the DSHS or the DADS must require its employees to complete an educational course about HIV infection (HSC §85.010). A suggested policy statement may be: "All employees will receive education about methods of transmission and prevention of HIV infection and related conditions." In response to HSC, §85.004, "Educational Programs," DSHS developed model education program guidelines. These are available from DSHS, HIV/STD Comprehensive Services Branch, 1100 W. 49th St., Austin, TX. 78756-3199, (512) 490-2505. Employers may also find the CDC's educational kit, *Business Responds to AIDS*, useful in developing educational courses. HIV/AIDS education should address employee concerns about HIV communicability to themselves, their families, and coworkers.

CPT only copyright 2005 American Medical Association. All rights reserved.

Experience shows that educated coworkers usually respond to persons with HIV/AIDS with support, rather than with fear and ostracism due to misconceptions.

Education programs must stress that agency employees who provide direct client services may face occupational exposure to a client's blood, semen, vaginal secretions, or other body fluids that are considered to be high-risk for transmission of blood born pathogens, including HIV/AIDS. All individuals receiving direct services are clients and include individuals who are physically or mentally impaired and individuals confined to correctional or residential facilities. All state agencies should have, as part of their employee education program, comprehensive policies and protocols based on universal precautions, body substance isolation, and barrier methods. These precautions prevent the spread of infection in clinical settings. The employer's careful planning will reflect a commitment to the health and well-being of the work force and the community being served.

- *Assistance.* Some employers have designated benefits programs available to employees and family members with HIV infection. Such programs may:
  - Make referrals for testing, counseling, medical, and psychosocial services.
  - Provide HIV/AIDS workplace training for managerial staff.
  - Serve as a liaison between management and the employer's clinical and occupational health programs.
  - Provide counseling for employees who irrationally fear coworkers or clients.

Employers who have no employee assistance program may consider working with other organizations that provide assistance. Some of these groups include local health departments, AIDS services organizations, American Red Cross chapters, community support groups, clinical treatment and counseling services, and the religious community.

A suggested policy statement might be: "An employee who wants assistance concerning a disability or a life-threatening illness should contact the Personnel Office. This agency offers the following resources to help employees and managers deal with these issues: education and information concerning HIV/AIDS; confidential referral to supportive services for employees and dependents affected by life-threatening illnesses; and benefits consultation to help employees effectively manage health, leave, and other benefits."

G.1.6 Where to Go for Help

Refer employees to the Texas HIV/STD InfoLine at 1-800-299-AIDS or other appropriate resource. This is a toll-free HIV/AIDS and STD information and referral service sponsored by DSHS. It provides referrals to HIV/AIDS testing sites; prevention, case management and treatment providers; STD clinics; and other related service organizations. Information and referral is available for English and Spanish speaking callers, and for those who are hearing-impaired.

G.1.7 State Agencies Listed Under HSC §85.113

HSC §85.113, "Workplace Guidelines for State Contractors" states "An entity that contracts with or is funded by…to operate a program involving direct client contact shall adopt and implement workplace guidelines similar to the guidelines adopted by the agency that funds or contracts with the entity." H.B. 2292, 78th Leg., abolished 10 of the 12 existing health and human services agencies and transferred their powers and duties to three new state agencies and to HHSC; therefore rendering the state agency list found in HSC §85.113 obsolete. The list below reflects the state agency consolidation brought about by H.B. 2292 and identifies the state agencies to who HSC §85.113 applies.

- Department of Aging and Disability Services (DADS)
- Department of Assistive and Rehabilitative Services (DARS)
- Department of State Health Services (DSHS)
- Health and Human Services Commission (HHSC)
- Texas Department of Criminal Justice
- Texas Juvenile Probation Commission
- Texas Youth Commission

H.1 Immunizations Overview

All providers must assess the immunization status of the client at every encounter and administer any medically indicated immunizations. (*Code of Federal Regulations* [CFR] and *Texas Administrative Code* [TAC]).

Children must be immunized according to the current Recommended Childhood Immunization Schedule for the United States. The checkup provider is responsible for the administration of immunizations and may not refer children to local health departments. The Department of State Health Services (DSHS) requires that medically necessary immunizations or immunizations routinely recommended by the Advisory Committee on Immunization Practices (ACIP) be administered during the Texas Health Steps (THSteps) medical checkup, unless they are medically contraindicated or excluded from immunization for reasons of conscience, including a religious belief.

A $5 administration fee per dose is paid for immunizations given during a THSteps medical checkup, a follow-up visit, or as part of an acute care visit. THSteps providers should bill for each vaccine separately. If administering a combined vaccine, such as DTaP (diphtheria, tetanus, and pertussis vaccine), providers should not bill separately for each antigen.

Providers, in both public and private sectors, are required by federal mandate to provide a Vaccine Information Statement (VIS) to the responsible adult accompanying a child for an immunization. These statements are specific to each vaccine and inform the responsible adult about the risks and benefits. It is important that providers use the most current VIS.

Providers interested in obtaining copies of current VISs and other immunization forms or literature may call the DSHS Immunization Branch at 1-512-458-7284 or 1-800-252-9152. VISs may also be downloaded from the DSHS Immunization Branch's website at www.immunizetexas.com.

H.1.1 Exemption from Immunization for School and Child-care Facilities

Parents may choose not to vaccinate their children. Immunization requirements for school and childcare entry offer an exemption from these requirements for reasons of conscience or religious beliefs. An exemption is also available for children who are medically contraindicated from receiving a vaccine. For more information on exemptions call 1-512-458-7284, or visit www.immunizetexas.com.

Refer to: "Texas Health Steps (THSteps)" on page 43-1

H.2 Recommended Childhood Immunization Schedule

The Recommended Childhood and Adolescent Immunization Schedule for the United States indicates the recommended age for routine administration of currently licensed childhood vaccines. This schedule is approved by ACIP, the American Academy of Pediatrics (AAP), and the American Academy of Family Physicians (AAFP). The Recommended Childhood and Adolescent Immunization Schedule for the United States is updated annually. The most current version of the schedule is available at www.cdc.gov/nip/recs/child-schedule.htm.

Some combination vaccines are available and may be used whenever any component of the combination is indicated and its other components are not contraindicated. Providers should consult the manufacturers package insert for detailed recommendations.

Vaccines should be administered at the recommended ages. Any dose not given at the recommended age should be given as a *catch-up* immunization on any subsequent visit when indicated and feasible.

CPT only copyright 2005 American Medical Association. All rights reserved.

H.2.1 Recommended Childhood and Adolescent Immunization Schedule, 2006

DEPARTMENT OF HEALTH AND HUMAN SERVICES • CENTERS FOR DISEASE CONTROL AND PREVENTION

Recommended Childhood and Adolescent Immunization Schedule UNITED STATES • 2006

Influenza[8]						Influenza (Yearly)					Influenza (Yearly)			
Hepatitis A[9]										HepA Series				

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of December 1, 2005, for children through age 18 years. Any dose not administered at the recommended age should be administered at any subsequent visit when indicated and feasible. ▬ Indicates age groups that warrant special effort to administer those vaccines not previously administered. Additional vaccines may be licensed and recommended during the year. Licensed combination vaccines may be used whenever any components of the combination are indicated and other components of the vaccine are not contraindicated and if approved by the Food and Drug Administration for that dose of the series. Providers should consult the respective ACIP statement for detailed recommendations. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS). Guidance about how to obtain and complete a VAERS form is available at **www.vaers.hhs.gov** or by telephone, **800-822-7967**.

Range of recommended ages | Catch-up immunization | 11–12 year old assessment

1. **Hepatitis B vaccine (HepB).** ***AT BIRTH:*** **All newborns** should receive monovalent HepB soon after birth and before hospital discharge. **Infants born to mothers who are HBsAg-positive** should receive HepB and 0.5 mL of hepatitis B immune globulin (HBIG) within 12 hours of birth. **Infants born to mothers whose HBsAg status is unknown** should receive HepB within 12 hours of birth. The mother should have blood drawn as soon as possible to determine her HBsAg status; if HBsAg-positive, the infant should receive HBIG as soon as possible (no later than age 1 week). **For infants born to HBsAg-negative mothers,** the birth dose can be delayed in rare circumstances but only if a physician's order to withhold the vaccine and a copy of the mother's original HBsAg-negative laboratory report are documented in the infant's medical record. ***FOLLOWING THE BIRTHDOSE:*** The HepB series should be completed with either monovalent HepB or a combination vaccine containing HepB. The second dose should be administered at age 1–2 months. The final dose should be administered at age ≥24 weeks. It is permissible to administer 4 doses of HepB (e.g., when combination vaccines are given after the birth dose); however, if monovalent HepB is used, a dose at age 4 months is not needed. **Infants born to HBsAg-positive mothers** should be tested for HBsAg and antibody to HBsAg after completion of the HepB series, at age 9–18 months (generally at the next well-child visit after completion of the vaccine series).
2. **Diphtheria and tetanus toxoids and acellular pertussis vaccine (DTaP).** The fourth dose of DTaP may be administered as early as age 12 months, provided 6 months have elapsed since the third dose and the child is unlikely to return at age 15–18 months. The final dose in the series should be given at age ≥4 years.
   Tetanus and diphtheria toxoids and acellular pertussis vaccine (Tdap – adolescent preparation) is recommended at age 11–12 years for those who have completed the recommended childhood DTP/DTaP vaccination series and have not received a Td booster dose. Adolescents 13–18 years who missed the 11–12-year Td/Tdap booster dose should also receive a single dose of Tdap if they have completed the recommended childhood DTP/DTaP vaccination series. Subsequent **tetanus and diphtheria toxoids (Td)** are recommended every 10 years.
3. ***Haemophilus influenzae*** **type b conjugate vaccine (Hib).** Three Hib conjugate vaccines are licensed for infant use. If PRP-OMP (PedvaxHIB® or ComVax® [Merck]) is administered at ages 2 and 4 months, a dose at age 6 months is not required. DTaP/Hib combination products should not be used for primary immunization in infants at ages 2, 4 or 6 months but can be used as boosters after any Hib vaccine. The final dose in the series should be administered at age ≥12 months.
4. **Measles, mumps, and rubella vaccine (MMR).** The second dose of MMR is recommended routinely at age 4–6 years but may be administered during any visit, provided at least 4 weeks have elapsed since the first dose and both doses are administered beginning at or after age 12 months. Those who have not previously received the second dose should complete the schedule by age 11–12 years.
5. **Varicella vaccine.** Varicella vaccine is recommended at any visit at or after age 12 months for susceptible children (i.e., those who lack a reliable history of chickenpox). Susceptible persons aged ≥13 years should receive 2 doses administered at least 4 weeks apart.
6. **Meningococcal vaccine (MCV4).** Meningococcal conjugate vaccine (MCV4) should be given to all children at the 11–12 year old visit as well as to unvaccinated adolescents at high school entry (15 years of age). Other adolescents who wish to decrease their risk for meningococcal disease may also be vaccinated. All college freshmen living in dormitories should also be vaccinated, preferably with MCV4, although **meningococcal polysaccharide vaccine (MPSV4)** is an acceptable alternative. Vaccination against invasive meningococcal disease is recommended for children and adolescents aged ≥2 years with terminal complement deficiencies or anatomic or functional asplenia and certain other high risk groups (see *MMWR* 2005;54 [RR-7]:1-21); use MPSV4 for children aged 2–10 years and MCV4 for older children, although MPSV4 is an acceptable alternative.
7. **Pneumococcal vaccine.** The heptavalent **pneumococcal conjugate vaccine (PCV)** is recommended for all children aged 2–23 months and for certain children aged 24–59 months. The final dose in the series should be given at age ≥12 months. **Pneumococcal polysaccharide vaccine (PPV)** is recommended in addition to PCV for certain high-risk groups. See *MMWR* 2000; 49(RR-9):1-35.
8. **Influenza vaccine.** Influenza vaccine is recommended annually for children aged ≥6 months with certain risk factors (including, but not limited to, asthma, cardiac disease, sickle cell disease, human immunodeficiency virus [HIV], diabetes, and conditions that can compromise respiratory function or handling of respiratory secretions or that can increase the risk for aspiration), healthcare workers, and other persons (including household members) in close contact with persons in groups at high risk (see *MMWR* 2005;54[RR-8]:1-55). In addition, healthy children aged 6–23 months and close contacts of healthy children aged 0–5 months are recommended to receive influenza vaccine because children in this age group are at substantially increased risk for influenza-related hospitalizations. For healthy persons aged 5–49 years, the intranasally administered, live, attenuated influenza vaccine (LAIV) is an acceptable alternative to the intramuscular trivalent inactivated influenza vaccine (TIV). See *MMWR* 2005;54(RR-8):1-55. Children receiving TIV should be administered a dosage appropriate for their age (0.25 mL if aged 6–35 months or 0.5 mL if aged ≥3 years). Children aged ≤8 years who are receiving influenza vaccine for the first time should receive 2 doses (separated by at least 4 weeks for TIV and at least 6 weeks for LAIV).
9. **Hepatitis A vaccine (HepA).** HepA is recommended for all children at 1 year of age (i.e., 12–23 months). The 2 doses in the series should be administered at least 6 months apart. States, counties, and communities with existing HepA vaccination programs for children 2–18 years of age are encouraged to maintain these programs. In these areas, new efforts focused on routine vaccination of 1-year-old children should enhance, not replace, ongoing programs directed at a broader population of children. HepA is also recommended for certain high risk groups (see *MMWR* 1999; 48[RR-12]1-37).

The Childhood and Adolescent Immunization Schedule is approved by:

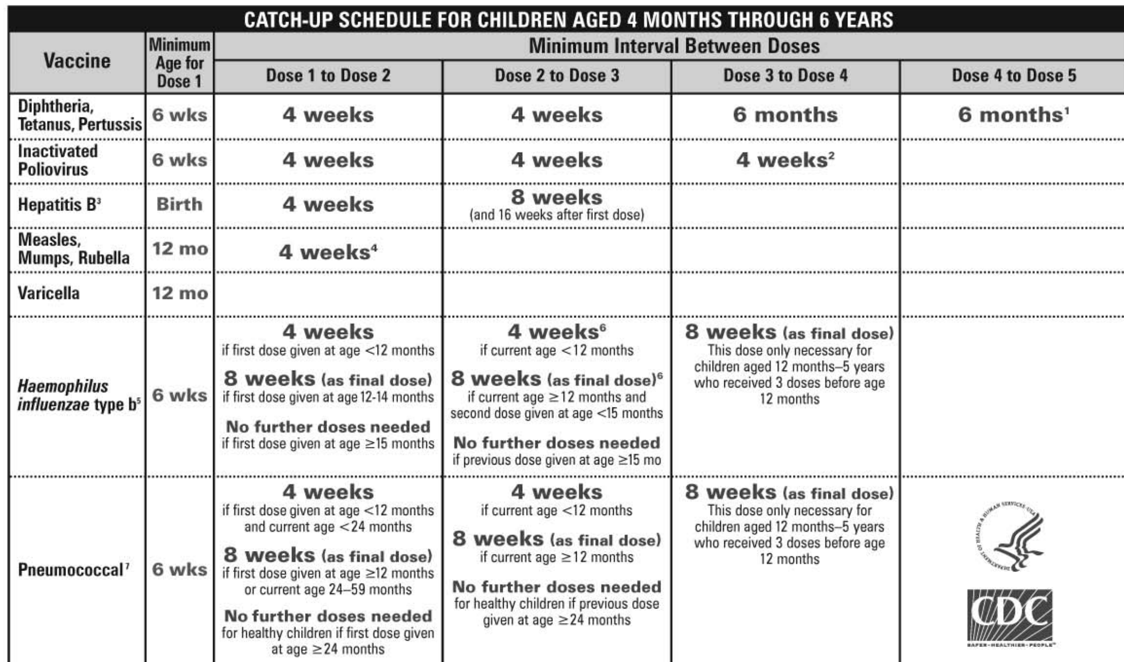
Recommended Immunization Schedule for Children and Adolescents Who Start Late or Who Are More Than 1 Month Behind

UNITED STATES • 2006

The tables below give catch-up schedules and minimum intervals between doses for children who have delayed immunizations. There is no need to restart a vaccine series regardless of the time that has elapsed between doses. Use the chart appropriate for the child's age.



CATCH-UP SCHEDULE FOR CHILDREN AGED 4 MONTHS THROUGH 6 YEARS

Vaccine	Minimum Age for Dose 1	Minimum Interval Between Doses			
		Dose 1 to Dose 2	Dose 2 to Dose 3	Dose 3 to Dose 4	Dose 4 to Dose 5
Diphtheria, Tetanus, Pertussis	6 wks	4 weeks	4 weeks	6 months	6 months[1]
Inactivated Poliovirus	6 wks	4 weeks	4 weeks	4 weeks[2]	
Hepatitis B[3]	Birth	4 weeks	8 weeks (and 16 weeks after first dose)		
Measles, Mumps, Rubella	12 mo	4 weeks[4]			
Varicella	12 mo				
Haemophilus influenzae type b[5]	6 wks	**4 weeks** if first dose given at age <12 months **8 weeks (as final dose)** if first dose given at age 12-14 months **No further doses needed** if first dose given at age ≥15 months	**4 weeks**[6] if current age <12 months **8 weeks (as final dose)**[6] if current age ≥12 months and second dose given at age <15 months **No further doses needed** if previous dose given at age ≥15 mo	**8 weeks (as final dose)** This dose only necessary for children aged 12 months–5 years who received 3 doses before age 12 months	
Pneumococcal[7]	6 wks	**4 weeks** if first dose given at age <12 months and current age <24 months **8 weeks (as final dose)** if first dose given at age ≥12 months or current age 24–59 months **No further doses needed** for healthy children if first dose given at age ≥24 months	**4 weeks** if current age <12 months **8 weeks (as final dose)** if current age ≥12 months **No further doses needed** for healthy children if previous dose given at age ≥24 months	**8 weeks (as final dose)** This dose only necessary for children aged 12 months–5 years who received 3 doses before age 12 months	CDC

CATCH-UP SCHEDULE FOR CHILDREN AGED 7 YEARS THROUGH 18 YEARS

Vaccine	Minimum Interval Between Doses		
	Dose 1 to Dose 2	Dose 2 to Dose 3	Dose 3 to Booster Dose
Tetanus, Diphtheria[8]	4 weeks	6 months	**6 months** if first dose given at age <12 months and current age <11 years; otherwise **5 years**
Inactivated Poliovirus[9]	4 weeks	4 weeks	IPV[2,9]
Hepatitis B	4 weeks	8 weeks (and 16 weeks after first dose)	
Measles, Mumps, Rubella	4 weeks		
Varicella[10]	4 weeks		

1. **DTaP.** The fifth dose is not necessary if the fourth dose was administered after the fourth birthday.
2. **IPV.** For children who received an all-IPV or all-oral poliovirus (OPV) series, a fourth dose is not necessary if third dose was administered at age ≥4 years. If both OPV and IPV were administered as part of a series, a total of 4 doses should be given, regardless of the child's current age.
3. **HepB.** Administer the 3-dose series to all children and adolescents <19 years of age if they were not previously vaccinated.
4. **MMR.** The second dose of MMR is recommended routinely at age 4–6 years but may be administered earlier if desired.
5. **Hib.** Vaccine is not generally recommended for children aged ≥5 years.
6. **Hib.** If current age <12 months and the first 2 doses were PRP-OMP (PedvaxHIB® or ComVax® [Merck]), the third (and final) dose should be administered at age 12–15 months and at least 8 weeks after the second dose.
7. **PCV.** Vaccine is not generally recommended for children aged ≥5 years.
8. **Td.** Adolescent tetanus, diphtheria, and pertussis vaccine (Tdap) may be substituted for any dose in a primary catch-up series or as a booster if age appropriate for Tdap. A five-year interval from the last Td dose is encouraged when Tdap is used as a booster dose. See ACIP recommendations for further information.
9. **IPV.** Vaccine is not generally recommended for persons aged ≥18 years.
10. **Varicella.** Administer the 2-dose series to all susceptible adolescents aged ≥13 years.

Report adverse reactions to vaccines through the federal Vaccine Adverse Event Reporting System. For information on reporting reactions following immunization, please visit www.vaers.hhs.gov or call the 24-hour national toll-free information line 800-822-7967. Report suspected cases of vaccine-preventable diseases to your state or local health department.

For additional information about vaccines, including precautions and contraindications for immunization and vaccine shortages, please visit the National Immunization Program Website at www.cdc.gov/nip or contact 800-CDC-INFO (800-232-4636) (In English, En Español — 24/7)

CPT only copyright 2005 American Medical Association. All rights reserved.

H.3 General Recommendations

For information about vaccine administration, dosing, and contraindications, immunization providers should consult vaccine package inserts and the February 8, 2002, issue of the *Morbidity and Mortality Weekly Report* (MMWR), *General Recommendations on Immunization, Recommendations of the Advisory Committee on Immunization Practices* (ACIP). For copies of the *General Recommendations on Immunization* or the MMWR, contact the Immunization Branch at 1-512-458-7284.

H.3.1 How to Obtain Free Vaccines

Texas Vaccines for Children (TVFC) provides routinely recommended ACIP vaccines for immunization of THSteps and other Medicaid-eligible patients free of charge to providers who are enrolled in TVFC. The local health department/district or DSHS regional office provides information on how to order, account for, and inventory vaccines. Monthly reports are required in order to receive state-purchased vaccines. Physicians who request and accept state-supplied vaccines must complete and sign the provider enrollment and profile forms annually.

Additional information can be found at www.immunizetexas.com.

H.3.2 Provider Administration Reimbursement Fee

THSteps and other qualified providers may be reimbursed $5 for each dose of vaccine administered during a THSteps medical checkup or a follow-up visit. Combined antigen vaccines (DTaP-Hib, MMR) are reimbursed as one dose.

H.3.3 Requirements for TVFC Providers

By enrolling, public and private providers agree to:

1) Determine TVFC eligibility before administering vaccines obtained through TVFC. The Patient Eligibility Screening Form will be provided to the parent or guardian to declare each child's eligibility.
2) Maintain records of the parent, guardian, or authorized representative's responses on the Patient Eligibility Screening Form for at least three years. If requested, the provider will make such records available to DSHS, the local health department authority, or the U.S. Department of Health and Human Services (DHHS).
3) Comply with the appropriate vaccination schedule, dosage, and contraindications, as established by ACIP, unless (a) in making a medical judgment in accordance with accepted medical practice, the provider deems such compliance to be medically inappropriate, or (b) the particular requirement is not in compliance with Texas law, including laws relating to religious and medical exemptions.
4) Provide VISs to the responsible adult, parent, or guardian and maintain records in accordance with the *National Childhood Vaccine Injury Act*. Signatures are not required for the VISs but are recommended.
5) Not charge for vaccines supplied by DSHS and administered to a child who is eligible for TVFC.
6) Charge a vaccine administration fee to the Medicaid program, but not impose a charge for the administration of the vaccine in any amount higher than the maximum administration fee established by DSHS (providers may charge a vaccine administration fee to Medicaid, but not a fee for the vaccine). Medicaid patients cannot be charged any out-of-pocket expense for the vaccine, administration of the vaccine, or an office visit associated with Medicaid services.
7) Not deny administration of a TVFC vaccine to a child because of the inability of the child's parent or guardian/individual of record to pay an administrative fee.
8) Comply with the state's requirements for ordering vaccines and other requirements as described by DSHS.
9) Allow DSHS (or its contractors) to conduct onsite visits as required by TVFC regulations.

The provider or the state may terminate the agreement at any time for personal reasons or failure to comply with the requirements listed above.

H.3.4 How to Report Immunization Records to ImmTrac, the Texas Immunization Registry

Texas law requires all medical providers and payors to report *all immunizations* administered to children under 18 of years of age to ImmTrac, the Texas immunization registry operated by DSHS (*Texas Health and Safety Code,* §§161.007-161.009). Providers must report all immunization information within 30 days of administration of the vaccine, and payors must report within 30 days of receipt of data elements from a provider. Prior to reporting immunizations to ImmTrac, providers must first register for registry participation and access.

ImmTrac is a centralized repository of immunization histories for children younger than 18 years of age and is a free service and benefit available to all Texans. Registry information is confidential and, by law, may be released only to:

- The child's parent, legal guardian, or managing conservator
- The child's physician, school, or licensed childcare facility in which the child is enrolled
- Public health districts or local health departments
- The insurance company, health maintenance organization, or other organization that pays for the provision of the child's health care benefits

CPT only copyright 2005 American Medical Association. All rights reserved.

- A health care provider authorized to administer a vaccine
- A state agency that has legal custody of the child

ImmTrac offers three methods to report immunizations to DSHS: Direct Internet Entry, Electronic Data Transfer (Import), and Paper Reporting Form.

H.3.4.1 Direct Internet Entry

This method allows providers to access and review clients' immunization histories prior to administering vaccines. Providers then update their client's immunization record directly into the ImmTrac web application after administering vaccines to the patient.

H.3.4.2 Electronic Data Transfer (Import)

This method allows providers to report immunizations from an electronic medical record (EMR) software application via extract file for import into ImmTrac. Providers may still have access to the ImmTrac web application to access and review their clients' immunization histories.

H.3.4.3 Paper Reporting Form

This method of reporting is available to providers without Internet or computer access. Providers report immunizations to the registry via the ImmTrac Paper Reporting Form. In this case, providers are not able to access and view their clients' immunization histories in ImmTrac.

Before including a child's immunization information in ImmTrac, DSHS must verify that written consent for registry participation has been granted by the child's parent, legal guardian, or managing conservator. Most parents grant consent for ImmTrac participation during the birth certificate application process. Written parental consent for ImmTrac participation applies to all past, present, and future immunizations. Texas law also permits a parent, managing conservator, or guardian to withdraw consent for ImmTrac participation at any time.

Before January 1, 2005, medical providers were responsible for obtaining, maintaining, and reporting parental consent for ImmTrac registry participation to TMHP by including the U6 modifier next to each immunization listed on claim forms. *The U6 modifier is no longer required* because Texas law currently requires providers and payors to report *all* immunizations to ImmTrac, and ImmTrac, rather than the provider, verifies parental consent for participation in the registry. There is no need for providers to include the U6 modifier on the claim forms.

Medical providers may report directly to ImmTrac by entering immunizations online for patients currently participating in the registry. The online (Direct Internet Entry) and Electronic Data Transfer (Import) reporting options allow providers to access, review, and update a patient's immunization history at any time. Before reporting immunizations to ImmTrac via any of these options, providers must complete an ImmTrac Registration Packet (for providers and schools) and receive login credentials from ImmTrac Customer Support. A copy of this packet may be obtained from www.ImmTrac.com or requested from ImmTrac Customer Support by calling 1-800-348-9158.

Medical Transportation

I.1 Medical Transportation I-2
I.1.1 MTP Eligibility I-2
I.1.2 MTP Requirements. I-2
I.1.3 Contacting MTP I-2
I.1.4 MTP Program Limitations I-2

CPT only copyright 2005 American Medical Association. All rights reserved.

I.1 Medical Transportation

The Medical Transportation Program (MTP) is funded with federal and state funds to provide nonemergency transportation to medical or dental appointments for eligible clients and their attendants. When eligible clients and their attendants have no other means of transportation, the Texas Department of Transportation (TxDOT) arranges the most cost-effective mode of transportation to and from a medically necessary health care facility that can meet the client's medical needs, including dental services for clients younger than 21 years of age.

I.1.1 MTP Eligibility

People who are currently eligible for Medicaid, Medicaid Managed Care, and Children with Special Health Care Needs (CSHCN) Services Program benefits and their attendants are eligible to receive services. The client's attending physician must certify the need for an attendant unless the client is a CSHCN client or a minor, or a language or other barrier to communication or mobility exists that requires the assistance of an attendant. For Medicaid and CSHCN clients younger than 21 years of age, MTP provides advance funds for travel. Additionally, when health care services require an eligible client to remain overnight, MTP provides for meals and lodging for the eligible child and attendant. CSHCN clients older than 21 years of age diagnosed with cystic fibrosis may also qualify for these services.

I.1.2 MTP Requirements

To receive MTP services, eligible clients and their attendants must have no other means of transportation. In some cases, the client's attending provider is asked to complete Form 3113, Health Care Provider Statement of Need. Form 3113 is required to determine if a particular health care service is a Medicaid-covered benefit for which federal financial participation (FFP) is available, the service is medically necessary, and the health care provider is *reasonably close*.

I.1.3 Contacting MTP

Clients or their advocates may call the statewide MTP toll-free number (1-877-633-8747) to request transportation services. For transportation services within the county, or a county adjacent to the resident county, clients or their advocates should call the MTP office at least two business days before the scheduled appointment. For clients who need to travel beyond an adjacent county, clients or their advocates should call the MTP office at least five business days before the scheduled appointment. The following client information must be provided to the intake operator at the time of the call:

- Medicaid number, CSHCN number, or Social Security number (SSN)
- Name, address, and telephone number, if available
- Name, address, and telephone number of the health care provider
- Purpose of the trip
- Affirmation that no other means of transportation are available
- Special needs, wheelchair lift, or attendant need

I.1.4 MTP Program Limitations

Clients and their attendants are *not* eligible to receive medical transportation services under the following circumstances (this list is not all-inclusive):

- Emergency transportation or nonemergency ambulance services
- Transportation for children who are younger than 18 years of age and not accompanied by a parent or legal guardian, unless one of the following conditions exists:
  - The client is 15 through 17 years of age and presents the parent's or legal guardian's signed, written consent for the transportation services to the regional MTP office or the transportation contractor
  - The treatment to which the minor is being transported is such that the law extends confidentiality to the minor for this treatment
- Transportation to or from a day activity health services facility, personal care home, state institution, nursing facility (unless the client requires dialysis treatment), or facility participating in another Title XIX Program for which the reimbursement rate structure includes transportation funds
- Transportation when the client or another person or entity providing care for the client receives direct payment of worker's compensation benefits, U.S. Department of Veterans Affairs benefits, or other third-party resources for transportation to health care services on the client's behalf
- Transportation when the client is an inpatient in a health care facility
- Transportation of deceased clients
- Transportation passenger assistance beyond that which is necessary to ensure that clients enter and leave vehicles safely unless the contractor's contract states that door-to-door service is provided

Refer to: Title 1, Part 15, Chapter 380 of the *Texas Administrative Code* (TAC) for more information.

J

Lead Screening

J.1 Blood Lead Screening Procedures and Follow-up Testing J-2
J.2 Physician Reference on Follow-up Testing and Case Management J-3
J.3 Lead Poisoning Prevention Educational Materials and Forms J-4

CPT only copyright 2005 American Medical Association. All rights reserved.

J.1 Blood Lead Screening Procedures and Follow-up Testing

Blood analysis for lead testing measures micrograms of lead per deciliter of whole blood. A lead concentration of 10 μg/dL or higher meets the Centers for Disease Control and Prevention (CDC)-defined “level of concern” and requires follow-up.

Providers are responsible for confirming capillary blood lead results of 10 μg/dL or above.

A confirmed lead test result is:

- An initial venous test
- A venous test used to confirm a capillary result
- A second capillary test performed within 12 weeks

Note: *The (capillary) blood lead test is subject to a false-elevated result from skin lead contamination during collection. A soap and water wash of the patient’s hands/feet and the collector’s hands (or the wearing of gloves) must be performed to minimize the chance of contamination. Alcohol cleansing alone is not sufficient.*

If the initial blood lead test is 10 μg/dL or above, recalling a client for an office visit to take a venous blood sample may be billed as a Texas Health Steps (THSteps) follow-up visit. The specimen may be submitted, using the appropriate Department of State Health Services (DSHS) laboratory form to the DSHS Clinical Chemistry Laboratory the same way as for all other THSteps laboratory blood specimens. An initial blood lead test collected as part of a THSteps medical checkup must be submitted to the DSHS laboratory; subsequent screens for the same client may be sent to a private laboratory.

Refer to: “Follow-Up Care Guidelines Summary Table” on page 43-31.

Form Pb-109 “Physician Reference on Follow-up Testing and Case Management” on page J-3 for interpretation of laboratory test results and guidelines for follow-up for clients with elevated blood lead levels.

Providers may obtain more information about the medical and environmental management of lead-poisoned children from the DSHS Childhood Lead Poisoning Prevention Program (CLPPP) by visiting the website at www.dshs.state.tx.us/lead/ or by calling 1-800-588-1248.

CPT only copyright 2005 American Medical Association. All rights reserved.

J.2 Physician Reference on Follow-up Testing and Case Management

Form Pb-109 – Physician Reference on Follow-up Testing and Case Management

(keep for your records)

If you need a referral to an expert on medical treatment of child lead poisoning, call the Texas CLPPP Follow-Up Coordinator at 1-800-588-1248.

Table 1:
Recommended Schedule for Obtaining a Confirmatory Venous Specimen

Screening test results (μg/dL):	Perform a venous confirmation test within:
10-19	3 months
20-44	1 week - 1 month*
45-59	48 hours
60-69	24 hours
70 and up	Immediately as an emergency lab test

**The higher the Blood Lead Level (BLL) on the screening test, the more urgent the need for confirmatory testing.*

Table 2:
Schedule for Follow-Up Blood Lead Testing

Venous blood lead level (μg/dL)	Early follow-up (first 2-4 tests after identification)	Late follow-up (after BLL begins to decline)
10-14	3 months	6-9 months
15-19	1-3 months	3-6 months
20-24	1-3 months	1-3 months
25-44	2 weeks-1 month	1 month
45 and up	As soon as possible	Chelation w/subsequent follow-up*

Table 3:
Time Frame for Environmental Investigation and Other Case Management Activities

Venous Blood Lead Level (μg/dL)	Activity	Timeframe for Beginning Activity
10-14	Provide caregiver lead education. Provide follow-up testing. Refer the child for social services if necessary.	Within 30 days
15-19	Above actions, plus: If BLLs persist (i.e., 2 venous BLLs in this range at least 3 months apart) or increase, proceed according to actions for BLLs 20-44.	Within 2 weeks
20-44	Above actions, plus: Provide coordination of care (case management). Provide clinical evaluation and care. Provide environmental investigation and control current lead hazards.	Within 1 week
45-70	Above actions, plus hospitalize child for chelation therapy.*	Within 48 hours
70 or higher	Above actions, plus hospitalize child for chelation therapy immediately.*	Within 24 hours

*** Primary care providers should consult with an expert in the management of lead chemotherapy prior to using chelating agents. Contact your local Poison Control Center or contact Texas CLPPP at 1-800-588-1248 for a referral.**

Chelation therapy should never be administered before a venous confirmation is obtained.

Tables adapted from *Managing Elevated Blood Lead Levels Among Young Children:* CDC; March 2002.

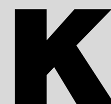
Appendix



Texas Health Steps Statutory State Requirements

K.1 Legislative Requirements K-2
K.2 Communicable Disease Reporting K-2
K.3 Early Childhood Intervention (ECI) Referrals K-2
K.4 Parental Accompaniment K-2
K.5 Newborn Blood Screening K-2
K.6 Abuse and Neglect K-3
K.6.1 Requirements for Reporting Abuse or Neglect K-3
K.6.1.1 Procedures for Reporting Abuse or Neglect K-3
K.6.1.2 Staff Training on Reporting Abuse and Neglect K-3

CPT only copyright 2005 American Medical Association. All rights reserved.

K.1 Legislative Requirements

Several specific legislative requirements affect Texas Health Steps (THSteps) and the provider's participation in the Medicaid program. The legislation includes, but is not limited to, those included in this appendix.

K.2 Communicable Disease Reporting

Diagnosis of sexually transmitted diseases (STDs), including human immunodeficiency virus (HIV), are reportable conditions under Title 25 *Texas Administrative Code* (TAC), Chapter 97, Subchapter F. Providers must report confirmed diagnosis of STDs as required by 25 TAC §§97.132–134.

K.3 Early Childhood Intervention (ECI) Referrals

ECI is a coordinated system of services available in every Texas county for children from birth to 3 years of age with disabilities or delays. ECI is federally and state funded through the Title 20 *Individuals with Disabilities Education Act (IDEA),* Chapter 33, and *Texas Human Resources Code* (HRC), Chapter 73. ECI supports families to help their children reach their potential through developmental services.

Texas families who have children younger than 3 years of age with a disability or suspected delays in development must be referred to ECI. A medical diagnosis or a confirmed developmental delay is not needed for referral. A referral can be based on professional judgment or a family's concern.

All primary referral sources must refer a child younger than 3 years of age who may be in need of, and/or qualify for, comprehensive early intervention services. Referrals must be within two work days of identification and must be made to a contracted provider for evaluation and assessment of the child. Primary referral sources include the following:

- Hospitals, including prenatal and postnatal care facilities
- Physicians
- Parents
- Day care programs
- Local educational agencies
- Public health facilities
- Other social service agencies
- Other health care providers

Refer to: 34 *Code of Federal Regulations* (CFR), §303.321
40 TAC §108.61.

For more information and referral to services, visit the Department of Assistive and Rehabilitative Services (DARS) website at www.dars.state.tx.us/ecis, or call the toll-free DARS Inquiries Line at 1-800-628-5115 or the ECI state office at 1-512-424-6745.

K.4 Parental Accompaniment

HRC §§32.024(s)–(s-1) requires the Texas Department of State Health Services (DSHS) to require, as a condition for provider reimbursement, that a child younger than 15 years of age be accompanied by the child's parent, guardian, or other authorized adult during medical and dental checkups or screenings and dental treatment. DSHS has implemented this requirement through rules found in 25 TAC §33.134 (THSteps medical) and 25 TAC §33.318 (THSteps dental) as well as the definitions found in 25 TAC §33.15 for medical and 25 TAC §33.301 for dental.

The DSHS rules require that the parent, guardian, or authorized adult come with the child to the checkup or screening, and that the parent, guardian, or authorized adult must continue to wait for the child while the checkup, treatment, or service takes place.

Providers will not be required to submit documentation to TMHP to verify compliance with this policy in order for TMHP to process claims. *By submitting the claim for reimbursement, the provider acknowledges compliance with all Medicaid requirements. Additional assurances are not necessary.*

Exception: *School health clinics, Head Start programs, and childcare facilities are exempt from this policy if the clinic, program, or facility encourages parental involvement in the health care of the child and obtains written consent for the services. The consent from the child's parent or guardian must have been received within the one-year period before the date the services are provided and must not have been revoked.*

Refer to: *HRC* §§32.024(s)–(s-1)
25 TAC §33.15, §33.134, §33.301, and §33.318.

K.5 Newborn Blood Screening

The *Health and Safety Code,* Chapter 33, Subchapter B, requires testing for phenylketonuria (PKU), galactosemia, hypothyroidism, sickle hemoglobin, and congenital adrenal hyperplasia on all newborns. This testing is the responsibility of any provider attending the birth of a baby. All infants *must* be tested a second time at 1 to 2 weeks of age. If there is any doubt that a child younger than 12 months of age was properly tested, the provider should submit the blood sample on the appropriate DSHS Form NBS-3 to the DSHS Newborn Screening Laboratory.

CPT only copyright 2005 American Medical Association. All rights reserved.

K.6 Abuse and Neglect

K.6.1 Requirements for Reporting Abuse or Neglect

Providers are required to comply with requirements for reporting abuse or neglect as outlined in “Provider Responsibilities” on page 1-4.

Additionally, the *General Appropriations Act*, Article II, Rider 33 under DSHS, and Rider 13 under HHSC, of Senate Bill 1, 79th Legislative Regular Session, 2005, require that DSHS and HHSC distribute or provide appropriated funds only to recipients who show good faith efforts to comply with all child abuse and reporting requirements set forth in the *Texas Family Code*, Chapter 261, relating to investigations of reports of child abuse and neglect.

K.6.1.1 Procedures for Reporting Abuse or Neglect

Professionals, as defined in the law, *Texas Family Code*, §261.101 (b), are required to report abuse or neglect no later than the 48th hour after the hour the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report when the nonprofessional has cause to believe that the child’s physical or mental health or welfare has been adversely affected by abuse.

A report must be made regardless of whether the provider staff suspects that a report may have previously been made. Reports of abuse or indecency with a child should be made to one of the following:

- Texas Department of Family and Protective Services (DFPS), if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline, 1-800-252-5400, operated 24 hours a day, 7 days a week)
- Any local or state law enforcement agency or the state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred
- The agency designated by the court to be responsible for the protection of children

The law requires that the report include the following:

- Name and address of the minor, if known
- Name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known
- Any other pertinent information concerning the alleged or suspected abuse, if known

Reports can be made anonymously.

You can also report nonemergency abuse online at www.txabusehotline.org

A provider may not reveal whether the child has been tested or diagnosed with HIV or AIDS. If the minor’s identity is unknown (e.g., the minor is at the provider’s office to receive testing for HIV or an STD anonymously), no report is required.

K.6.1.2 Staff Training on Reporting Abuse and Neglect

All providers shall develop training for all staff on the policies and procedures in regard to reporting child abuse, including sexual abuse and neglect. New staff shall receive this training as part of their initial training or orientation. Training shall be documented. As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

L.2 Texas Early Hearing Detection and Intervention (TEHDI) Process

The following is a list of processes for early hearing detection and intervention:

- *Birth Screen*: will be either screening Auditory Brainstem Response (ABR), or Transient or Distortion Product Otoacoustic Emissions (OAE):
    - A newborn's hearing is screened at the birth facility. If a newborn does not pass the screen, hearing is re-screened before discharge.
    - The birth facility reports results to the Department of State Health Services (DSHS) using the web-based eScreener Plus (eSP™) system.
    - The newborn's family and physician/medical home receive a written report of the hearing screen outcome.
    - If a newborn passes the screen, the physician monitors hearing as part of well child visits.
    - If a newborn does not pass the second screen, a referral is made to a local resource for outpatient re-screen. See the following steps.
- *Outpatient Rescreen*: will be either screening by ABR or OAE:
    - The physician/medical home receives the written report of results from the birth facility.
    - The screener/physician reports results to the DSHS contractor, OZ Systems, using the web-based eSP system, by calling 1-866-427-5768, or faxing 1-214-631-4231.
    - If the newborn passes the outpatient re-screen, the physician monitors hearing as part of well child visits.
    - If a newborn does not pass (refers) the outpatient re-screen, a referral is made to an audiologist for evaluation using the Texas Pediatric Protocol for Evaluation. Visit www.dshs.state.tx.us/audio/assumpt.shtm for more information.
    - For children whose families need financial assistance for testing, make an application to the DSHS Program for Amplification for Children of Texas (PACT). Consult the provider list at www.dshs.state.tx.us/audio/pactpro.shtm. Click on the area of the state and then on the city, or call 1-800-252-8023.
- *Evaluation using Texas Pediatric Protocol for Audiology:* will be diagnostic ABR and, if not previously done, OAE to verify cochlear involvement:
    - Audiologists use equipment norms for newborns, preferably ones that they have collected on their equipment.
    - Protocols include air and bone conduction results using tone burst ABR, as well as click ABR, so the amplification may be appropriately fit.
    - The physician/medical home receives results and makes the referral to Early Childhood Intervention (ECI) using the web-based eSP system or by calling 1-800-250-2246.
    - The physician/medical home monitors the child. See the *American Academy of Pediatrics Position Statement* at www.aap.org/policy/re9846.html.
    - The audiologist reports results to the DSHS contractor as noted above and makes the referral to ECI.
    - Includes the fitting of hearing aids by an audiologist when appropriate.
    - Continue audiological assessment and/or monitoring as needed (usually monitor each three months for the first year of hearing aid use).
- *Referral to an ECI program:* will be performed by an audiologist or physician within two working days of identification of hearing loss as required by law:
    - Service coordination provided by ECI.
    - ECI will refer to the Local Education Agency (LEA) for Auditory Impairment (AI) services as outlined in the *Memorandum of Understanding between TEA and DARS ECI.*
    - An evaluation and Individual Family Service Plan (IFSP) will occur within 45 days of referral to ECI.
    - ECI and LEA services are available up to age three when determined by an IFSP.
    - ECI and LEA will coordinate transition services upon the child's third birthday.
- *The physician/medical home continues to monitor periodically:* see the Joint Committee on Infant Hearing (JCIH) 2000 for suggested monitoring protocols at www.aap.org/policy/jcihyr2000.pdf.
- Deaf education and/or other special education services available from 3 to 21 years of age when determined by an individualized education program.
- Regional specialists from Deaf and Hard of Hearing Services at the Department of Assistive and Rehabilitative Services (DARS) will provide technical assistance to birth facilities, audiologists, and ear, nose and throat (ENT) physicians to ensure reporting of screening and evaluation results. Call 1-512-407-3250 for assistance.

CPT only copyright 2005 American Medical Association. All rights reserved.

L.3 JCIH Year 2000 Position Statement

The JCIH 2000 recommends the following indicators for use with neonates or infants (age 29 days through 2 years). These indicators place an infant at risk for progressive or delayed-onset sensorineural hearing loss and/or conductive hearing loss. Any infant with these risk indicators for progressive or delayed-onset hearing loss who has passed the birth screen should, nonetheless, receive audiologic monitoring every 6 months until 3 years of age.

These indicators are:

- Parental or caregiver concern about hearing, speech, language, and developmental delay
- Family history of permanent childhood hearing loss*
- Stigmata or other findings associated with a syndrome known to include a sensorineural or conductive hearing loss or Eustachian tube dysfunction
- Postnatal infections associated with sensorineural hearing loss including bacterial meningitis*
- In-utero infections such as cytomegalovirus, herpes, rubella, syphilis, and toxoplasmosis
- Neonatal indicators specifically hyperbilirubinemia at a serum level requiring exchange transfusion, persistent pulmonary hypertension of the newborn associated with mechanical ventilation, and conditions requiring the use of extracorporeal membrane oxygenation (ECMO)*
- Syndromes associated with progressive hearing loss, such as neurofibromatosis, osteopetrosis, and Usher's syndrome
- Neurodegenerative disorders, such as Hunter syndrome, or sensory motor neuropathies, such as Friedreich's ataxia and Charcot-Marie-Tooth syndrome
- Head trauma
- Recurrent or persistent otitis media with effusion for at least three months*

Because some important indicators, such as family history of hearing loss, may not be determined during the course of universal newborn hearing screening programs, the presence of all late-onset risk indicators should be determined in the medical home during early well-baby visits. Those infants with significant late-onset risk factors should be carefully monitored for normal communication developmental milestones during routine medical care.

THSteps Follow-up Visit

Use procedure code 99211 for a THSteps follow-up visit.

Immunizations Administered

Each immunization must have a corresponding vaccine code.

- If only one immunization is administered during a checkup, providers should bill procedure code 90471/90473 or 90465/90467 with a quantity of 1.
- If two or more immunizations are administered, providers should bill procedure code 90471/90473 or 90466/90468 with a quantity of 1, procedure code 90472/90474 with a quantity of 1 or more (depending on the number of vaccines administered), and the appropriate national procedure codes that describe each immunization administered.

Procedure Codes	Vaccine
90632* or 90633 with (90471/90472 or 90465/90466)	Hep A
90645, 90646, 90647, or 90648 with (90471/90472 or 90465/90466)	Hib
90655*, 90656*, 90657*, or 90658* with (90471/90472 or 90465/90466)	Flu
90669 with (90471/90472 or 90465/90466)	PCV7
90680 with (90471/90472 or 90465/90466)	Rotavirus
90700 with (90471/90472 or 90465/90466)	DTaP
90702 with (90471/90472 or 90465/90466)	DT
90707 with (90471/90472 or 90465/90466)	MMR
90710 with (90471/90472 or 90465/90466)	MMRV
90713 with (90471/90472 or 90465/90466)	IPV
90714 or 90718 with (90471/90472 or 90465/90466)	Td
90715 with (90471/90472 or 90465/90466)	Tdap
90716 with (90471/90472 or 90465/90466)	Varicella
90723 with (90471/90472 or 90465/90466)	DTap-Hep B-IPV
90732 * with (90471/90472 or 90465/90466)	Pneumococcal
90734 with (90471/90472 or 90465/90466)	Meningococcal
90744 or 90746 with (90471/90472 or 90465/90466)	Hep B
90748 with (90471/90472 or 90465/90466)	Hib-Hep B

* Vaccine maybe indicated for high-risk individuals only

Modifiers

Performing Provider
Use to indicate the practitioner who is performing the unclothed physical examination component of the medical checkup.

AM	SA	TD	U7

Exception to Periodicity
Use with THSteps medical checkups procedure codes to indicate the reason for an exception to periodicity.

23	32	SC	

Immunization Tracking
Use to indicate parental consent to participate in ImmTrac Immunization Registry

FQHC
Federally qualified health center (FQHC) providers must use modifier EP for THSteps medical checkup.

Condition Indicator Codes

Use one of the indicators below if a referral was made.

Condition Indicator	Condition Indicator Codes	Description
N	NU	Not used (no referral)
Y	ST	New services requested
Y	S2	Under treatment

TB Skin Test

Be sure to include a charge of at least $.01 for procedure code 86580, even though this code is not reimbursed separately.

CPT only copyright 2005 American Medical Association. All rights reserved.

N.1 American Academy of Pediatric Dentistry Periodicity Guidelines

Guideline on Periodicity of Examination, Preventive Dental Services, Anticipatory Guidance, and Oral Treatment for Children

Originating Committee
Clinical Affairs Committee

Review Council
Council on Clinical Affairs

Adopted
1991

Revised
1992, 1996, 2000, 2003

Purpose

The American Academy of Pediatric Dentistry (AAPD) intends this guideline to help practitioners make clinical decisions concerning preventive oral health care for infants, children, and adolescents. Because each child is unique, these recommendations are designed for the care of children who have no contributory medical conditions and are developing normally. These recommendations will need to be modified for children with special health care needs or if disease or trauma manifests variations from the normal.

Methods

This guideline is a compilation of pediatric oral health literature and national reports and recommendations, in addition to related policies and guidelines published in the AAPD Reference Manual.[1-24] The related policies and guidelines provide references for individual recommendations. Some recommendations are evidence-based, while others represent best clinical practice and expert opinion.

Background

The AAPD emphasizes the importance of professional oral health intervention very early in childhood. Caries-risk assessment[11] is an essential element of contemporary clinical care for infants, children, and adolescents. Continuity of care is based on the assessed needs of the individual patient. Although evidenced-based research supporting the benefits of an infant dental intervention is limited, there is sufficient evidence that certain groups of children are at greater risk for development of early childhood caries (ECC) and would benefit from infant oral health care. ECC can be a costly, devastating disease with a lasting detrimental impact on the dentition and systemic health issues.[7] The characteristics of ECC and the availability of preventive methods support anticipatory guidance as an important strategy in addressing this significant pediatric health problem. Major benefits of early intervention, in addition to assessment of risk status, include analysis of fluoride exposure and feeding practices, as well as oral hygiene counseling. The early dental visit should be seen as the foundation upon which a lifetime of preventive education and oral health care can be built. Clinicians must consider each infant's, child's, and adolescent's individual needs and risk indicators to determine the appropriate interval and frequency of dental visits.

Recommendations

Birth to 12 months

1. Complete the clinical oral examination with appropriate diagnostic tests to assess oral growth and development, pathology, and/or injuries; provide diagnosis.
2. Provide oral hygiene counseling for parents, guardians, and caregivers, including the implications of the oral health of the caregiver.
3. Remove supragingival and subgingival stains or deposits as indicated.
4. Assess the child's systemic and topical fluoride status (including type of infant formula used, if any, and exposure to fluoridated toothpaste) and provide counseling regarding fluoride. Prescribe systemic fluoride supplements, if indicated, following assessment of total fluoride intake from drinking water, diet, and oral hygiene products.
5. Assess appropriateness of feeding practices, including bottle and breast-feeding, and provide counseling as indicated.
6. Provide dietary counseling related to oral health.
7. Provide age-appropriate injury prevention counseling for orofacial trauma.
8. Provide counseling for nonnutritive oral habits (eg, digit, pacifiers).
9. Provide required treatment and/or appropriate referral for any oral diseases or injuries.
10. Provide anticipatory guidance for parent/guardian/caregiver.
11. Consult with the child's physician as needed.
12. Based on evaluation and history, assess the patient's risk for oral disease.
13. Determine the interval for periodic re-evaluation.

Copyright © American Association of Pediatric Dentistry. Reprinted by permission.

CPT only copyright 2005 American Medical Association. All rights reserved.

12 to 24 months

1. Repeat birth to 12-month procedures every 6 months or as indicated by individual patient's risk status/susceptibility to disease.
2. Assess appropriateness of feeding practices, including bottle, breast-feeding, and no-spill training cups, and provide counseling as indicated.
3. Review patient's fluoride status–including any childcare arrangements, which may impact systemic fluoride intake–and provide parental counseling.
4. Provide topical fluoride treatments every 6 months or as indicated by the individual patient's needs.

2 to 6 years

1. Repeat 12- to 24-month procedures every 6 months or as indicated by individual patient's risk status/susceptibility to disease. Provide age-appropriate oral hygiene instructions.
2. Complete a radiographic assessment of pathology and/or abnormal growth and development, as indicated by individual patient's needs.
3. Scale and clean the teeth every 6 months or as indicated by individual patient's needs.
4. Provide pit and fissure sealants for primary and permanent teeth as indicated by individual patient's needs.
5. Provide counseling and services (athletic mouthguards) as needed for orofacial trauma prevention.
6. Provide assessment/treatment or referral of developing malocclusion as indicated by individual patient's needs.
7. Provide required treatment and/or appropriate referral for any oral diseases, habits, or injuries as indicated.
8. Assess speech and language development and provide appropriate referral as indicated.

6 to 12 years

1. Repeat 2- to 6-year procedures every 6 months or as indicated by individual patient's risk status /susceptibility to disease.
2. Provide substance abuse counseling (eg, smoking, smokeless tobacco).
3. Provide counseling on intraoral and perioral piercing.

12 years and older

1. Repeat 6- to 12-year procedures every 6 months or as indicated by individual patient's risk status/susceptibility to disease.
2. At an age determined by patient, parent/guardian, and pediatric dentist, refer the patient to a general dentist for continuing oral care.

Recommendations for Pediatric Oral Health Care

Since each child is unique, these recommendations are designed for the care of children who have no contributing medical conditions and are developing normally. These recommendations will need to be modified for children with special health care needs or if disease or trauma manifests variations from normal.

The American Academy of Pediatric Dentistry (AAPD) emphasizes the importance of *very* early professional intervention and the continuity of care based on the individualized needs of the child.

Referral for regular and periodic dental care					•

1. First examination at the eruption of the first tooth and no later than 12 months.
2. By clinical examination.
3. As per AAPD "Policy on the use of a caries-risk assessment tool (CAT) for infants, children, and adolescents."
4. Especially for children at high risk for caries and periodontal disease.
5. As per American Academy of Pediatrics/American Dental Association guidelines and the water source.
6. Up to at least 16 years.
7. Appropriate discussion and counseling should be an integral part of each visit for care.
8. Initially, responsibility of parent; as child develops, jointly with parents; then, when indicated, only child.
9. At every appointment discuss the role of refined carbohydrates, frequency of snacking.
10. Initially play objects, pacifiers, car seats; then when learning to walk, sports and routine playing.
11. At first discuss the need for additional sucking: digits vs pacifiers; then the need to wean from the habit before malocclusion or skeletal dysplasia occurs. For school-aged children and adolescent patients, counsel regarding any existing habits such as fingernail biting, clenching, or bruxism.
12. As per AAPD "Clinical guideline on prescribing dental radiographs."
13. For caries-susceptible primary molars, permanent molars, premolars, and anterior teeth with deep pits and/or fissures; placed as soon as possible after eruption.

N.2 American Dental Association Guidelines for Prescribing Dental Radiographs

GUIDELINES FOR PRESCRIBING DENTAL RADIOGRAPHS

The recommendations in this chart are subject to clinical judgment and may not apply to every patient. They are to be used by dentists only after reviewing the patient's health history and completing a clinical examination. Because every precaution should be taken to minimize radiation exposure, protective thyroid collars and aprons should be used whenever possible. This practice is strongly recommended for children, women of childbearing age and pregnant women.

TYPE OF ENCOUNTER	PATIENT AGE AND DENTAL DEVELOPMENTAL STAGE				
	Child with Primary Dentition (prior to eruption of first permanent tooth)	**Child with Transitional Dentition** (after eruption of first permanent tooth)	**Adolescent with Permanent Dentition** (prior to eruption of third molars)	**Adult, Dentate or Partially Edentulous**	**Adult, Edentulous**
New patient* being evaluated for dental diseases and dental development	Individualized radiographic exam consisting of selected periapical/occlusal views and/or posterior bitewings if proximal surfaces cannot be visualized or probed. Patients without evidence of disease and with open proximal contacts may not require a radiographic exam at this time.	Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images.	Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images. A full mouth intraoral radiographic exam is preferred when the patient has clinical evidence of generalized dental disease or a history of extensive dental treatment.		Individualized radiographic exam, based on clinical signs and symptoms.
Recall patient* with clinical caries or at increased risk for caries**	Posterior bitewing exam at 6-12 month intervals if proximal surfaces cannot be examined visually or with a probe			Posterior bitewing exam at 6-18 month intervals	Not applicable
Recall patient* with no clinical caries and not at increased risk for caries**	Posterior bitewing exam at 12-24 month intervals if proximal surfaces cannot be examined visually or with a probe		Posterior bitewing exam at 18-36 month intervals	Posterior bitewing exam at 24-36 month intervals	Not applicable

GUIDELINES FOR PRESCRIBING DENTAL RADIOGRAPHS, cont'd.

TYPE OF ENCOUNTER	PATIENT AGE AND DENTAL DEVELOPMENTAL STAGE				
	Child with Primary Dentition (prior to eruption of first permanent tooth)	**Child with Transitional Dentition** (after eruption of first permanent tooth)	**Adolescent with Permanent Dentition** (prior to eruption of third molars)	**Adult Dentate and Partially Edentulous**	**Adult Edentulous**
Recall patient* with periodontal disease	Clinical judgment as to the need for and type of radiographic images for the evaluation of periodontal disease. Imaging may consist of, but is not limited to, selected bitewing and/or periapical images of areas where periodontal disease (other than nonspecific gingivitis) can be identified clinically.				Not applicable
Patient for monitoring of growth and development	Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development		Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development. Panoramic or periapical exam to assess developing third molars	Usually not indicated	
Patient with other circumstances including, but not limited to, proposed or existing implants, pathology, restorative/endodontic needs, treated periodontal disease and caries remineralization	Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring in these circumstances.				

***Clinical situations for which radiographs may be indicated include but are not limited to:**

A. Positive Historical Findings

1. Previous periodontal or endodontic treatment
2. History of pain or trauma
3. Familial history of dental anomalies
4. Postoperative evaluation of healing

Document created: November 2004

CPT only copyright 2005 American Medical Association. All rights reserved.

CPT only copyright 2005 American Medical Association. All rights reserved.

5. Remineralization monitoring
6. Presence of implants or evaluation for implant placement

B. Positive Clinical Signs/Symptoms

1. Clinical evidence of periodontal disease
2. Large or deep restorations
3. Deep carious lesions
4. Malposed or clinically impacted teeth
5. Swelling
6. Evidence of dental/facial trauma
7. Mobility of teeth
8. Sinus tract ("fistula")
9. Clinically suspected sinus pathology
10. Growth abnormalities
11. Oral involvement in known or suspected systemic disease
12. Positive neurologic findings in the head and neck
13. Evidence of foreign objects
14. Pain and/or dysfunction of the temporomandibular joint
15. Facial asymmetry
16. Abutment teeth for fixed or removable partial prosthesis
17. Unexplained bleeding
18. Unexplained sensitivity of teeth
19. Unusual eruption, spacing or migration of teeth
20. Unusual tooth morphology, calcification or color
21. Unexplained absence of teeth
22. Clinical erosion

****Factors increasing risk for caries may include but are not limited to:**

1. High level of caries experience or demineralization
2. History of recurrent caries
3. High titers of cariogenic bacteria
4. Existing restoration(s) of poor quality
5. Poor oral hygiene
6. Inadequate fluoride exposure
7. Prolonged nursing (bottle or breast)
8. Frequent high sucrose content in diet
9. Poor family dental health
10. Developmental or acquired enamel defects

Document created: November 2004

11. Developmental or acquired disability
12. Xerostomia
13. Genetic abnormality of teeth
14. Many multisurface restorations
15. Chemo/radiation therapy
16. Eating disorders
17. Drug/alcohol abuse
18. Irregular dental care
