Population data for 1990-2030 are from TAMU TX State Data Center (05/02)

* Diabetes prevalence rates from 2001 BRFSS survey:

White	6.0%
Black	9.7%
Hispanic	8.1%
Other	3.1%

Limitations of the estimates: Due to the limitation of the survey size, no rates by race/gender/age are available, therefore, age and gender effects are not taken into account in the estimation.

How were the estimates derived?

Each year, Texas Behavioral Risk Factor Surveillance System conducts a survey to determine the health and disease risk factors of Texans. This survey is a household survey administered to adults aged 18 or older and does not include institutionalized individuals. The diabetes prevalence estimates presented here were developed by analysing the 2001 survey data in the selected counties. The prevalence represents the number who answered "yes" to the question, "Have you ever been told by a doctor that they have diabetes?"
