Research Reports: (Print editions of all research reports have been submitted to TDSHS and placed on both the HNETS (UH) and TDSHS websites)

Texas Smoke-Free Ordinance Database (2004-2005). This website, developed for Texas Department of State Health Services, allows users to generate an unlimited number of reports describing all known Texas municipal ordinances designed to restrict exposure to secondhand smoke. Summary reports at the state, regional and county levels can be selected, as well as profiles of individual municipalities and the text of existing ordinances. <http://txshsord.coe.uh.edu>.

Positioning for Success. A decision support system adapted to help schools and administrators at the state, regional, and local levels to position schools for successful implementation of tobacco prevention and control programs. Campus-level teachers and staff may complete a questionnaire and receive real-time feedback of strengths and barriers influencing their future success with a new program, as well as guidelines for planning. Administrators may generate customized summary reports at the state, regional and Educational Service Center levels. <http://success.coe.uh.edu/>.
