

Mozambique Compact Progress

- ★ **Program Set-Up:** MCA-Mozambique has finalized fourteen Implementing Entity Agreements with government ministries, which will be directly responsible for instituting road, water and sanitation, agriculture, and land tenure reform projects.
- ★ **Farmer Income Support Project:** Two contracts have been signed, including one to produce a detailed aerial survey of areas affected by Coconut Lethal Yellowing Disease and another to grow the first of two coconut crops that will replace diseased trees.
- ★ **Other Highlights:** To foster participation and consultation in compact implementation, MCC and MCA have held a series of

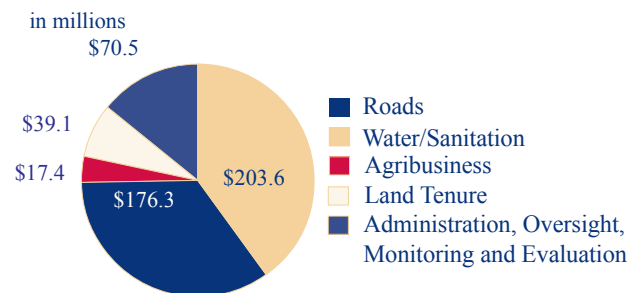

workshops and events with key stakeholders including donors, private sector, civil society and public institutions.

In August 2007, the Council of Ministers approved the Water Sector Policy including water resources management strategy, national water policy and water allocation licensing regulation. This is a key policy reform under the compact.

Compact At-A-Glance

Signed 7/13/2007
 Entry Into Force..... To be determined
 The five-year, \$507 million compact will improve rural and urban water and sanitation, roads, land administration, and agriculture. It will also address policy reforms and capacity building initiatives. Work will focus on the economically lagging northern provinces, home to half of the country's population.

Obligations by Project

\$3,069,539 total contract commitments
 \$179,571 disbursed to date

Country At-A-Glance

Population..... 19,792,300*
 GNI per Capita\$320*
