

Tanzania Compact Progress

- ★ **Program Set-Up:** MCA-Tanzania is now fully staffed and currently completing preparatory work necessary for successful implementation of compact activities.
- ★ **Transport Sector Project:** Representatives from the US Army Corps of Engineers, Tanzania National Roads Agency, MCA-Tanzania, and MCC recently traveled to the field to inspect the Tunduma-Sumbawanga and Mtwara Corridor road segments to be rehabilitated as part of the compact. The mission produced a detailed technical and environmental assessment that will be instrumental in finalizing the road design documents.

In May, MCA-Tanzania held a kick-off meeting for a strategic environmental assessment of Mafia Island that must be completed prior to starting the island’s airport rehabilitation project.

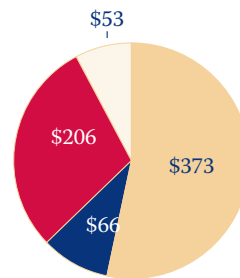

- ★ **Other Highlights:** In June, President Kikwete signed the new Electricity Act, which replaces the previous 67 year old legislation. The passage of this act, which represents a more market-oriented approach to the energy sector, is a condition precedent for funding the Energy Sector Project under the compact and will ultimately help ensure the sustainability of MCC and other energy investments in Tanzania.

Compact At-A-Glance

Signed2/17/2008
 Entry Into Force.....To be determined
 The five-year, \$698 million compact will stimulate economic growth, increase household incomes and raise the quality of life in program areas through targeted infrastructure investments in transportation, energy and water.

Obligations by Project

in millions

- Energy
- Water
- Transportation
- Program Administration

Country At-A-Glance

Population.....39,477,000*
 GNI per Capita\$400*
