June 8, 2005

Ms. Deborah Jordan
Director, Air Management Division
United States Environmental Protection Agency
75 Hawthorne Street
San Francisco, CA 94105

Dear Ms. Jordan:

The requirement for public and EPA review for the renewal of the Major Facility Review for the following facility has been completed.

Plant	Plant Name	Application	Permit Engineer	City	County
A0083	U.S. Pipe & Foundry Company	3908	Dennis Jang	Union City	Alameda

The public comment procedures for this permit have been completed as follows: The public notice for this permit was published in The Inner City Express on January 12, 2005. The notice stated that the end of the public comment period was February 15, 2005. We received two comment letters from members of the public via e-mail. Copies of the comment letters as well as the District's response to those comments, are attached for your information.

The final renewal permit differs from the proposed draft renewal permit in that it requires that US Pipe and Foundry test its cupola for mercury, arsenic, cadmium, nickel, manganese, and chromium emissions to satisfy the requirements of AB2588.

Enclosed is a copy of the final renewal permit. If you have any questions regarding this permit, please call Steve A. Hill, Air Quality Engineering Manager, at (415) 749-4673.

Sincerely yours,

_____
Jack P. Broadbent
Executive Officer / APCO
