Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for the Kirby Canyon Landfill. (Facility # A1812) pursuant to Application # 14076.

The District proposed a minor permit revision for this facility on October 12, 2006. The primary purpose of the revision is to add the recently permitted diesel powered portable air compressor (S-8) to the Title V permit. In addition, a facility-wide NOx limit of 40.9 tons per year was added to cap permitted NOx emissions at the existing level. This allows the facility to operate S-8 with no net increase of NOx emissions; benefiting from the underutilized capacity of other combustion sources at the facility.

No comments were received from the EPA, ARB, or the facility.

Enclosed is a copy of the final revised permit. If you have any questions regarding this project, please call Dennis T. Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,

---

Jack P. Broadbent  
Executive Officer/Air Pollution Control Officer
