The District proposed three minor permit revisions for this facility. These revisions concerned a throughput increase for the S-99 Gasoline Dispensing Facility, landfill gas collection system modifications for the S-2 Altamont Landfill, and revisions to throughput and concentration limits for the S-140 and S-141 Aerated Biological Reactors. These minor revisions resulted in a total of 0.27 tons/year of POC emission increases and 0.06 tons/year of NPOC emission increases. BACT was not required for any of the sources. Offsets were provided for the POC emission increases.
