EXECUTIVE OFFICER/APCO

Based on comments the District has received from the facility subsequent to the proposed minor permit revision, the District has made the following additional minor permit revisions:

- Permit Condition #6188, part 2 was expanded as requested by the facility to make a distinction between installed collection system equipment and that, which has been proposed and approved under an Authority to Construct, but not installed. In addition, the condition now identifies the specific well modification activities that are subject to the Authority to Construct requirement and those that are not.
- In conjunction with the changes to Permit Condition #6188, part 2, the number of wells included with the gas collection system for the Landfill S-9 was corrected in Table II A to include only those wells that are currently installed.

The EPA did not comment on the proposed minor revision.

Copies of the Final Major Facility Review Permit and the comments from the facility, are enclosed for your information. If you have any questions on this matter, please call **Steve Hill, Air Quality Engineering Manager, at (415) 749-4673.**

Sincerely,

Jack Broadbent
Executive Officer/Air Pollution Control Officer
