The main purpose of this proposed permit revision is to incorporate modifications of the landfill gas collection system description into the MFR Permit for Site # A4618. The District is also proposing to identify additional individual wells that will be subject to this site's alternative wellhead oxygen standard. In addition, the District is proposing to change the Responsible Official and Plant Contact to Kevin Chiapello, per the applicant's request, and the District is proposing to correct the Revision History Section by adding a missing approval date.

This proposed revision will not result in any emission increases. This revision is minor pursuant to BAAQMD Regulation 2-6-215 and will be effective immediately. The permit will be formally re-issued after EPA review. This revision is not subject to public comment and therefore, requires no public notice.
