

Actuarial Document Selector System and Access to the FCI-33 Rate Maps

Access to the ADBS

- The most appropriate way to access the FCI-33 Actuarial Maps is through the Actuarial Document Browser. The links for the Browser are below and are available directly off the RMA Web Site (<http://www.rma.usda.gov>)
- **Actuarial Document Browser**
 - <http://www.rma.usda.gov/tools/adb.html>
- then, select the following link from the Actuarial Document Browser page.
- **Form-based (user friendly) Actuarial Documents**
 - <http://www3.rma.usda.gov/apps/docbrowser/docbrowserA.cfm>

FCI-33 Maps

- the maps are also in a PDF list on the RMA Website (<http://www.rma.usda.gov>).
- there are also Shapefiles for ESRI based GIS systems
- to determine the crop type the FCI-33 map pertains to, you need to access the Map Rule Page through the Actuarial Documents Browser
- as you will see in the "walk-through" of the Actuarial Documents Browser in the attached PDF the correct map will be linked to automatically

Actuarial Document Browser Walk-through

Actuarial Document Selector System

Select STATES for access to the FCI-33 Rate Maps by state, county & crop.

User Friendly (Form-Based) Actuarial Document Selection

Locate By:

- [State](#)
- [Crop](#)
- [Insurance Plan](#)
- [County ADB Book](#)
- [Frame Mode](#)
- [Go back to RMA](#)

Risk Management Agency's Actuarial Document Selector System

- **States:** All States are provided for selection, followed by the Counties. All Crops/Insurance Plans are then provided for the State/County selected. You can then select and view specific Document Types.
- **Crops:** All crops are provided for selection first. You then select an available State, followed by available County. Once the county selection is made you can then pick an Insurance Plan, which provides the last option of selecting an available Document Type.
- **Insurance Plans:** All Insurance Plans are provided for selection first. You then select an available Crop, followed by State and County selections. The Document Type is the last selection to be made.
- **County ADB Books:** All available Crop Years are provided for selection first. You then select a State from the listing, and then finally pick the specific County. Upon selection the system will generate a complete Actuarial Document Book (ADB) consisting of all Document Types for all Crops/Insurance Plans for the entire County.

For All selection modes: Once the final selection is made and displayed, you have the additional option of generating an Adobe PDF format version of the report data. The PDF version is pre-formatted for better display and suitable for printing.

Selection of STATE, COUNTY & CROP

Select STATE & COUNTY from the pull-down list.

Once you select state & county select CROP: "pulldown list." This will get you the **Crops** available for a county. Note: Not all crops will have maps. The availability of maps will be listed under "DOC TYPE:" (described on next page)

Map Rules Page AND Link to Appropriate Map

The link for the map for the selected county, crop & practice is here.

The map legend/key is described here on the "Map Rules Page." The map Rules Page identifies all the crops, types, and practices in the county for which the map applies. There will be a separate "Map Rules Page" for each map.

04/08/2005 COUNTY ACTUARIAL TABLE PAGE 1

FCI-33 RULES PAGE AND MAP
2006 AND SUCCEEDING CROP YEARS

CROP NAME (CROP CODE)	TYPE PRAC	CROP NAME (CROP CODE)	TYPE PRAC
SUGARCANE (0038)	997 002		

Page(s) Numbered 2-3 Page Date 04/06/2000

The classification applicable to any insured acreage is defined on the FCI-33. Use this classification to determine appropriate premium rates.

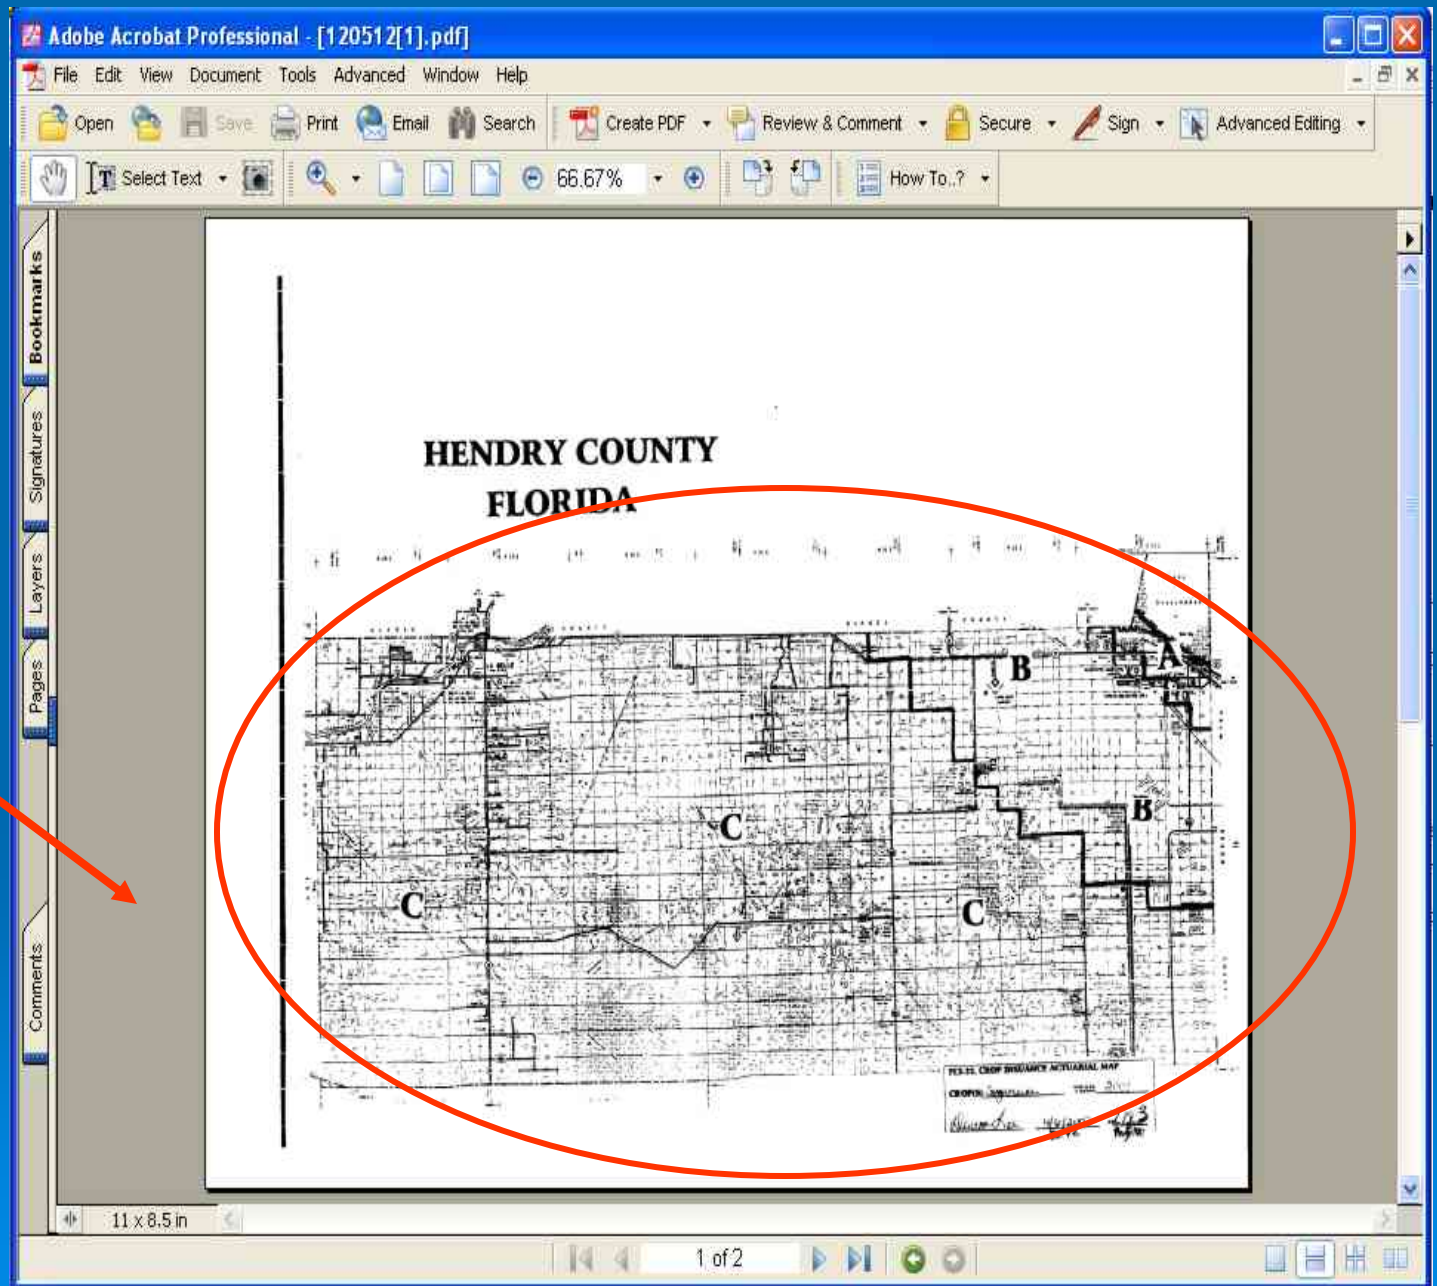

Acreage designated by diagonal lines (///) is unrated. Insurance coverage is optional. Requests for insurance coverage will be considered by the Regional Office provided the Request for Actuarial Change forms are received in the Regional Office by the deadlines. Refer to the Written Agreement Handbook for the applicable deadlines.

Classify acreage designated with a single character, i.e. "A", using triple characters, i.e. "AAA", for rating and reporting purposes.

In rate classification areas "B" and "C" where sugarcane is planted before October 1 of any year, insurance will attach on April 15 the following year provided the stand is adequate on that date to produce a crop.

Map Rules Page Generated for FCI-33 Map

When you click on the FCI-33 Actuarial Map link the map will spawn off into a new Adobe Acrobat PDF window. The appropriate map for that county, crop & practice will be displayed.

Map Rules Page Generated for FCI-33 Map

The map legend/key is described here on the "Map Rules Page." There will be a separate "Map Rules Page" for every map in the county. Each map may apply to multiple crops, types, and practices within the county.

General Standards Applicable to the FCI-33 Actuarial Maps

- As maps are redrawn, they will all be designated as FCI-33, Actuarial Maps. There may be separate maps (RMA layers) for T-Yields and High Risk areas, but there will no longer be a separate actuarial document titled “T-Yield Locator Document”.
- **Cross-Hatched designation will always mean Unrated Land (URA).** There are no areas designated with a cross hatch that have a rate assigned. Inversely, all areas designated as cross-hatched on the actuarial map must be unrated land.
- **Maps for T-Yield purposes only will have numeric designations. T-yield = NUMERIC designator**
- **Maps that are for High Risk areas only will have alpha designations. High Risk = ALPHA (A, B, C) designator**

General Standards Applicable to the FCI-33 Actuarial Maps

- a map (RMA layer) may be used for both High Risk areas and T-Yield areas, but only when the areas are identical. When a High Risk area and a T-Yield area are the same, alpha designators will be used. High Risk & T-yield = ALPHA designator
- maps that are for crops using Rating Areas (Rate Class crops with plan codes 40, 41, 43, 46, 50, 51, 55, 70, 84, and 86) will have numeric designations. If the map contains high risk areas, the high risk area portion of the map will be designated with alpha characters. Both Rating Area & High Risk = NUMERIC (Rating Area) & ALPHA (High Risk)
- when digitizing High Risk map areas, separate polygon(s) encompassing the remainder of the county that is not designated as High Risk must be digitized. (There will be an RMA line around the County Boundary)
- most of these issues will be explained on the Map Rules Page for the particular County/Crop.
