### CITATION

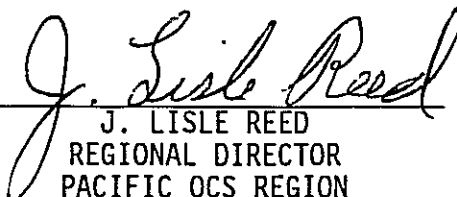

#### SAFETY AWARD FOR EXCELLENCE CAMARILLO DISTRICT PACIFIC OCS REGION

EXXON COMPANY, U.S.A.  
PLATFORM HARMONY  
SANTA YNEZ UNIT

The Camarillo District Safety Award for Excellence (SAFE) is presented to Exxon for the period January 1 through December 31, 1994, for safe operating practices and professional adherence to the operating regulations and other requirements pertaining to health, safety, and environment during the production and drilling operations on Platform Harmony in the Santa Ynez Unit.

Exxon personnel at Platform Harmony have been found to be well-trained and perform their tasks in a professional and safe manner with a high degree of cooperation with Minerals Management Service (MMS) personnel. Inspections by the MMS at this facility during this period covered all applicable safety devices and activities. Results of these inspections revealed that a strong emphasis is placed on preventative maintenance, worker safety training, environmental protection, and good housekeeping practices. Platform Harmony management and field personnel are astutely aware of the MMS regulations that apply to these operations and have fully cooperated with MMS regional and district staffs; they have consistently shown willingness to meet or exceed all requirements pertaining to safety, health, and environmental protection.

The purpose of the SAFE program is to recognize and encourage operational safety, environmental protection and adherence to the operating regulations. The Secretary of the Interior and the Director of the Minerals Management Service join me in congratulating Exxon and their employees at Platform Harmony for achieving the goals of the SAFE program.
