Office of the Secretary

Office of Communications

http://www.usda.gov/OC_Index.xml

Office of Communications is integral to the historical and current mission of the U.S. Department of Agriculture. This office coordinates and assists with the flow of public information from USDA program agencies, reviewing all publications and audiovisuals, evaluating new information technology, maintaining availability of current information from the Office of the Secretary, ensuring operation of adequate and appropriate channels for dissemination of information to the public, and optimizing public access to USDA information through the news media. OC administers USDA's home page on the Internet World Wide Web. OC also provides departmental coordination of responses under the Freedom of Information Act.

Farm and Foreign Agricultural Services

Farm Service Agency

<http://www.fsa.usda.gov>

Farm Service Agency administers farm commodity and conservation programs for farmers and ranchers and makes farm ownership and operating loans. FSA programs are primarily directed at agricultural producers or, in the case of loans, at those with farm experience. Through the Commodity Credit Corporation, the agency provides financing for the purchase, storage, and shipment of commodities in federal stocks. FSA also provides emergency conservation and assistance programs to farmers.

Foreign Agricultural Service

<http://www.fas.usda.gov>

Foreign Agricultural Service represents U.S. farmers and the food and agricultural sector abroad through a network of overseas offices. FAS collects, analyzes, and disseminates information about global supply and demand, trade trends, and market opportunities. FAS seeks improved market access for U.S. products, administers export financing and market development programs, provides export services, carries out food aid and market-related technical assistance programs, and provides linkages to world resources and international organizations.

Risk Management Agency

<http://www.rma.usda.gov>

Risk Management Agency improves the economic stability of agriculture by providing producers a sound system of crop insurance. Federal crop insurance covers losses due to natural causes such as drought, excessive moisture, hail, wind, frost, insects, and disease. Currently over 100 major crops are insurable. Crop insurance is available from crop insurance agents. Insurance protection must be purchased prior to sales closing dates that vary by crop and region.

Center for Nutrition Policy and Promotion

<http://www.cnpp.usda.gov>, www.mypyramid.gov

The Center and Nutrition Policy and Promotion (CNPP) provides direction and coordination for USDA's nutrition research and policy activities. The Center, in partnership with the U.S. Department of Health and Human Services (HHS), and other USDA agencies, publishes the Dietary Guidelines for Americans. The Dietary Guidelines are the basis for the nation's nutrition policy, and the foundation for all Federal nutrition education and promotion efforts. CNPP also developed and promotes the MyPyramid food guidance system, which motivates behavior changes consistent with the Guidelines. In addition the Center publishes the Thrifty Food Plan, the Nutrient Content of the U.S. Food Supply and the annual report on Expenditures on Children by Families. Go to My Pyramid at <http://www.mypyramid.gov>

Grain Inspection, Packers, and Stockyards Administration

<http://www.gipsa.usda.gov>

The Grain Inspection, Packers and Stockyards Administration facilitates the marketing of livestock, poultry, meat, cereals, oilseeds, and related agricultural products and promotes fair and competitive trading practices for the overall benefit of consumers and American agriculture. One of GIPSA's programs, the Packers and Stockyards Program (P&SP), promotes fair and competitive marketing environments for the livestock, meat, and poultry industries for the benefit of American Agriculture. P&SP uses three actionable strategies; education, regulation, and investigation to promote fair and competitive markets through enforcement and administration of the Packers and Stockyards Act of 1921. The Agency's Federal Grain Inspection Service (FGIS) facilitates the marketing of U.S. grain and related agricultural products through the establishment of standards for quality assessments, regulation of handling practices, and management of a network of Federal, State, and private laboratories that provide impartial, user fee funded official inspection and weighing services under the authority of the U.S. Grain Standards Act and the Agricultural Marketing Act of 1946. These activities promote fair and transparent markets, increase crop value by aligning crop quality with specific consumer demands, reducing trade disputes resulting from conflicting descriptions of crop quality and value, and minimizing the cost of transactions between buyer and seller, both in the domestic and global market.

Natural Resources Conservation Service

<http://www.nrcs.usda.gov>

With the mission of "Helping People Help the Land" the Natural Resources Conservation Service (NRCS) provides products and services that enable people to be good stewards of the Nation's soil, water, and related natural resources on non-Federal lands. With our help, people are better able to conserve, maintain, or improve their natural resources. As a result of our technical and financial assistance, land managers and communities take a comprehensive approach to the use and protection of natural resources in rural suburban, urban, and developing areas.

Research, Education, and Economics

Agricultural Research Service

<http://www.ars.usda.gov>

Agricultural Research Service is the principal in-house research arm of the U.S. Department of Agriculture. ARS has a mission to conduct research to develop and transfer solutions to agricultural problems of high national priority and provide information access and dissemination to ensure high-quality, safe food and other agricultural products; assess the nutritional needs of Americans; sustain a competitive agricultural economy; enhance the natural resource base and the environment; and provide economic opportunities for rural citizens, communities, and society as a whole. ARS plans and coordinates its research in multiple National Programs that fall into four main areas: Nutrition, Food Safety and Quality; Crop Production and Protection; Animal Production and Protection; and Natural Resources and Sustainable Agricultural Systems.

National Agricultural Library

<http://www.nal.usda.gov>

USDA's National Agricultural Library is the world's largest and most accessible agricultural research library and the principal source in the United States for information about food, agriculture, and natural resources. The library's expert staff, its leadership role in information services and technology applications, its accessibility via the World Wide Web, its collection of more than 3.5 million items, and its close working relationship with Land-Grant and other agricultural libraries worldwide combine to make it the world's foremost agricultural library.

Cooperative State Research, Education, and Extension Service

<http://www.csrees.usda.gov>

The Cooperative State Research, Education, and Extension Service (CSREES), is charged with managing Federal resources to advance knowledge of agriculture, the environment, and human health. CSREES works through partnerships--with Federal, university-based, and citizen partners. It combines national program leadership and sound administration of Federal assistance in supporting research to achieve safer, cleaner water, food, and air; responsible stewardship of natural resources; and a healthy, stable, and affordable food supply.

CSREES accomplishes these goals by supporting the base programs of State Agricultural Experiment Stations and the Cooperative Extension system nationwide at Land-Grant universities. The wide-ranging CSREES partnerships include over 130 colleges of agriculture; 59 agricultural experiment stations; 57 cooperative extension services; 63 schools of forestry; Tuskegee University and the other 17 historically Black colleges and universities; 27 colleges of veterinary medicine; 42 schools and colleges of family and consumer sciences; 33 Native American land-grant institutions; 17 Alaskan Native-Serving and Hawaiian Native-Serving Institutions, over 160 Hispanic-Serving Institutions, and numerous institutions and organizations that qualify for support under various competitive grant authorities.

Economic Research Service

<http://www.ers.usda.gov>

The Economic Research Service (ERS) is USDA's main source of economic information and research on issues related to agriculture, food, natural resources, and rural America. ERS helps decisionmakers probe the issues of the day with peer-reviewed social science research. The agency brings the perspective of economic analysis to critical issues facing farmers, agribusiness, consumers and policymakers. The ERS program encompasses research, market and policy analysis, and development of economic and statistical indicators. ERS provides decisionmakers with the information they need to conduct business, formulate policy, or learn about the farm, rural, and food sectors. ERS maintains a dynamic website that provides timely and comprehensive economic analysis and research. The agency publishes a magazine, Amber Waves, five times annually, covering the full range of ERS work and available in print and on the ERS website.

National Agricultural Statistics Service

<http://www.nass.usda.gov>

The National Agricultural Statistics Service (NASS) collects and disseminates a vast array of data on every facet of U.S. Agriculture, including production, economics, demographics, and the environment. The agency conducts hundreds of surveys each year and, through the Agricultural Statistics Board, issues nearly 500 national reports annually. NASS also conducts the Census of Agriculture every 5 years, providing the only source of uniform, comprehensive agricultural data for every county in the nation.

Office of the Chief Economist

<http://www.usda.gov/oce>

Office of the Chief Economist (OCE) advises the Secretary of Agriculture on policies and programs affecting U.S. agriculture and rural areas, and informs the Secretary on related economic developments. The Office also is a focal point for farm labor issues within USDA. Units under the OCE coordinate the Department's work in economic forecasting, meteorology, remote sensing, risk assessment and cost benefit analysis, global climate change, sustainable development, energy policy, and new uses for farm products.
