Air Traffic

**ORDER
JO
7400.8P**

Date:
February 16, 2008

SUBJ: Special Use Airspace

1. Purpose of This Order. This Order, published yearly, provides a listing of all regulatory and non-regulatory Special Use Airspace areas, as well as issued but not yet implemented amendments to those areas established by the Federal Aviation Administration.

2. Audience. Airspace and Aeronautical Operations, Air Traffic Controllers, and interested aviation parties.

3. Where Can I Find This Order. You can find this Order on the FAA Air Traffic Plans and Publications Web site at http://www.faa.gov/airports_airtraffic/air_traffic/publications/, and the FAA employees' Web site at https://employees.faa.gov/tools_resources/orders_notices/.

4. What This Order Cancels. JO FAA Order 7400.8N, Special Use Airspace, dated February 16, 2007, is canceled.

5. Effective Date: February 16, 2008.

6. Background. Actions establishing, amending, or revoking regulatory and non-regulatory designation of special use airspace areas, in the United States and its territories, are issued by the FAA and published throughout the year in the *Federal Register* or the National Flight Data Digest. These actions are generally effective on dates coinciding with the periodic issuance of the National Aeronautical Charting Office navigational charts. For ease of reference, the FAA is providing this compilation of all regulatory and non-regulatory special use airspace areas in effect and pending as of December 28, 2007.

7. Request for Information. For further information, contact the Airspace and Rules Group, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 267-8783.

8. Additional Information. FAA Order JO 7400.8N was the final printed version available for distribution. FAA Order JO 7400.8 is available at the FAA Web site. Electronic dissemination facilitates faster and easier accessibility to this and other guidance materials and enhances the

Part I – Regulatory Special Use Airspace Areas

Subpart A - General

§73.1 Applicability.

The airspace that is described in Subpart B and Subpart C of this part is designated as special use airspace. These parts prescribe the requirements for the use of that airspace.

§73.3 Special Use Airspace.

- (a) Special use airspace consists of airspace of defined dimensions identified by an area on the surface of the earth wherein activities must be confined because of their nature, or wherein limitations are imposed upon aircraft operations that are not a part of those activities, or both.
- (b) The vertical limits of special use airspace are measured by designated altitude floors and ceilings expressed as flight levels or as feet above mean sea level (MSL). Unless otherwise specified, the word "to" (an altitude or flight level) means "to and including" (that altitude or flight level).
- (c) The horizontal limits of special use airspace are measured by boundaries described by geographic coordinates or other appropriate references that clearly define their perimeter.
- (d) The period of time during which a designation of special use airspace is in effect is stated in the designation.

§73.5 Bearings, Radials, and Miles.

- (a) All bearings and radials in this part are true from point of origin.
- (b) Unless otherwise specified, all mileages in this part are stated as statute miles.

THIS PAGE INTENTIONALLY LEFT BLANK

Subpart B – Restricted Areas

§73.11 Applicability.

This subpart designates restricted areas and prescribes limitations on the operation of aircraft within them.

§73.13 Restrictions.

No person may operate an aircraft within a restricted area between the designated altitudes and during the time of designation, unless he has the advance permission of:

- (a) The using agency described in §73.15; or
- (b) The controlling agency described in §73.17.

§73.15 Using Agency.

- (a) For the purposes of this subpart, the following are using agencies:
 - (1) The agency, organization, or military command whose activity within a restricted area necessitated the area being so designated.
 - (2) [Reserved]
- (b) Upon the request of the FAA, the using agency shall execute a letter establishing procedures for joint use of a restricted area by the using agency and the controlling agency, under which the using agency would notify the controlling agency whenever the controlling agency may grant permission for transit through the restricted area in accordance with the terms of the letter.
- (c) The using agency shall:
 - (1) Schedule activities within the restricted area;
 - (2) Authorize transit through, or flight within, the restricted area as feasible; and
 - (3) Contain within the restricted area all activities conducted therein in accordance with the purpose for which it was designated.

§73.17 Controlling Agency.

For the purposes of this part, the controlling agency is the FAA facility that may authorize transit through or flight within a restricted area in accordance with a joint-use letter issued under §73.15.

§73.19 Reports by Using Agency.

- (a) Each using agency shall prepare a report on the use of each restricted area assigned thereto during any part of the preceding 12-month period ended September 30, and transmit it by the following January 31 of each year to the Manager, Air Traffic Division in the regional office of the Federal Aviation Administration having jurisdiction over the area in which the restricted area is located, with a copy to the Director, Office of Air Traffic System Management, Federal Aviation Administration, Washington, DC 20591.
- (b) In the report under this section the using agency shall:

- (1) State the name and number of the restricted area as published in this part, and the period covered by the report.
 - (2) State the activities (including average daily number of operations if appropriate) conducted in the area, and any other pertinent information concerning current and future electronic monitoring devices.
 - (3) State the number of hours daily, the days of the week, and the number of weeks during the year that the area was used.
 - (4) For restricted areas having a joint-use designation, also state the number of hours daily, the days of the week, and the number of weeks during the year that the restricted area was released to the controlling agency for public use.
 - (5) State the mean sea level altitudes or flight levels (whichever is appropriate) used in aircraft operations and the maximum and average ordinate of surface firing (expressed in feet, mean sea level altitude) used on a daily, weekly, and yearly basis.
 - (6) Include a chart of the area (of optional scale and design) depicting, if used, aircraft operating areas, flight patterns, ordnance delivery areas, surface firing points, and target, fan, and impact areas. After once submitting an appropriate chart, subsequent annual charts are not required unless there is a change in the area activity or altitude (or flight levels) used, which might alter the depiction of the activities originally reported. If no change is to be submitted, a statement indicating "no change" shall be included in the report.
 - (7) Include any other information not otherwise required under this part which is considered pertinent to activities carried on in the restricted area.
- (c) If it is determined that the information submitted under paragraph (b) of this section is not sufficient to evaluate the nature and extent of the use of a restricted area, the FAA may request the using agency to submit supplementary reports. Within 60 days after receiving a request for additional information, the using agency shall submit such information as the Director, Office of Air Traffic System Management considers appropriate. Supplementary reports must be sent to the FAA officials designated in paragraph (a) of this section.

Part II – Nonregulatory Special Use Airspace Areas

Subpart A - General

General.

Horizontal Limits. The horizontal limits of special use airspace are defined by geographic coordinates or other appropriate references that clearly describe their boundaries.

Vertical Limits.

- a. Vertical limits are established as necessary to contain the planned activities.
- b. Within areas solely containing aircraft operations, altitudes at or above 18,000 feet MSL are expressed as flight levels. Within areas containing other than aircraft operations, altitudes at or above 18,000 feet MSL are expressed as feet above mean sea level (MSL).
- c. Below 18,000 feet MSL, altitudes are expressed to the nearest 100 feet. Above 18,000 feet MSL, altitudes/flight levels are to the nearest 500 feet.
- d. Procedures for determining the floor of special use airspace vary according to area type and are contained in the appropriate chapters in Handbook 7400.2 Procedures for Handling Airspace Matters.
- e. Ceilings are expressed as flight levels or feet above MSL. Unless otherwise specified, the word "to" an altitude or flight level means "to and including" that altitude or flight level. If the vertical limit does not include the altitude or flight level, the ceiling is expressed as "to but not including."

Times of use. Times of use are expressed in the local time of the using agency using the 24-hour clock.

Controlling agency. An FAA or military facility is assigned as the controlling agency. This is not applicable, when the airspace will not be joint use.

Using agency. Normally, the using agency is the agency, organization or military command whose activity established the requirement for the special use airspace. An ATC facility may be the using agency for joint use areas when the facility is specified in a letter of procedure as having priority for use of the area.

Subpart B – Military Operations Areas

Definition.

A Military Operations Area (MOA) is airspace established outside positive control area to separate/segregate certain nonhazardous military activities from IFR traffic and to identify for VFR traffic where these activities are conducted.

Activities.

MOA's are established to contain certain military activities such as air combat maneuvers, air intercepts, acrobatics, etc.

Subpart E – National Security Areas

Definition.

A national security area (NSA) is airspace of defined dimensions established at locations where there is a requirement for enhanced security or ground facilities. The purpose of such national security areas is to request pilot cooperation by voluntarily avoiding flight through the NSA. When circumstances dictate a need for a greater level of security, flight in NSA's may be temporarily prohibited by regulation under the provisions of 14 CFR Section 99.7, Special Security Instructions. Such prohibitions will be issued by FAA Headquarters and disseminated via the U.S. NOTAM System.
