PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1977 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 285.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 3.92 feet, March 20, 2003
DISCHARGE: 102 cfs, March 20, 2003

MAXIMUM FOR CURRENT YEAR.—

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.--1929, 1984 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 175.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest stage gage is a device that will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.--
STAGE: 20.90 feet, March 19, 1929
DISCHARGE: 19,000 cfs, March 19, 1929

MAXIMUM FOR CURRENT YEAR.--

PERIOD OF RECORD.—1925, 1929, 1970, 1972, 1980 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 184.12 feet above National Geodetic Vertical Datum (NGVD) of 1929.

REMARKS.—A crest stage gage is a device that will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.--
STAGE: 13.40 feet, October 13, 1990
DISCHARGE: 15,800 cfs, October 13, 1990

MAXIMUM FOR CURRENT YEAR.--

2003 Water Year

02227422 CROOKED CREEK TRIBUTARY NEAR BRISTOL, GA

LOCATION.—Lat 31°26'24", long 82°15'03" referenced to North American Datum (NAD) of 1927, Pierce County, Hydrologic Unit 03070202, on County Road 1903, 2.0 miles west of Brisol.

DRAINAGE AREA.—0.42 square miles.

COOPERATION.—Georgia Department of Transportation.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1976 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 155.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 2.72 feet, June 25, 1991
DISCHARGE: 74.0 cfs, June 25, 1991

MAXIMUM FOR CURRENT YEAR.—
STAGE: 1.70 feet, September 6
DISCHARGE: 27.4 cfs, September 6

WATER-DISCHARGE RECORDS

PERIOD OF RECORD.—January 1951 to current year.

GAGE.—Satellite telemetry with a water-stage recorder. Datum of gage is 58.00 feet above National Geodetic Vertical Datum (NGVD) of 1929. Prior to November 8, 1952, a water-stage recorder was installed at a site 1,500 feet upstream, and from November 8, 1952, to September 30, 1975, a water-stage recorder was located at present site at a datum 1.00 feet higher.

REMARKS.—Record good, except for discharges below 10.0 cfs, which are fair.

02227990 SATILLA RIVER TRIBUTARY No. 2 AT ATKINSON, GA

LOCATION.—Lat 31°13'32", long 81°51'10" referenced to North American Datum (NAD) of 1927, Brantley County, Hydrologic Unit 03070201, on County Road 153, 0.3 miles north of Atkinson.

DRAINAGE AREA.—0.38 square miles.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1977 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 47.74 feet above National Geodetic Vertical Datum (NGVD) of 1929.

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 2.63 feet, August 2, 1978
DISCHARGE: 93 cfs, August 2, 1978

MAXIMUM FOR CURRENT YEAR.—
STAGE: <0.80 feet, August 15
DISCHARGE: <7.0 cfs, August 15

02317600 LITTLE RIVER AT GA 376, NEAR STATENVILLE, GA

LOCATION.—Lat 30°42'13", long 83°07'18" referenced to North American Datum (NAD) of 1927, Echols County, Hydrologic Unit 03110202, at GA 376, 5.0 miles west of Statenville.

DRAINAGE AREA.—199 square miles.

COOPERATION.—Georgia Department of Transportation.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1948, 1984 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 85.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 17.36 feet, March 28, 1984
DISCHARGE: 11,000 cfs, March 28, 1984

MAXIMUM FOR CURRENT YEAR.—
STAGE: 12.70 feet, March 11
DISCHARGE: 2,770 cfs, March 11

02327350 OCHLOCKONEE RIVER TRIBUTARY NEAR COOLIDGE, GA

LOCATION.—Lat 31°01'33", long 83°57'32" referenced to North American Datum (NAD) of 1927, Thomas County, Hydrologic Unit 03120002, at culvert on GA 202, 5.5 miles west of Coolidge.

DRAINAGE AREA.—1.81 square miles.

COOPERATION.—Georgia Department of Transportation.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1964 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 200.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

2003 Water Year

02327860 POPPLE BRANCH AT GA 179, NEAR WHIGHAM, GA

LOCATION.—Lat 30°55'36", long 84°20'18" referenced to North American Datum (NAD) of 1927, Grady County, Hydrologic Unit 03120002, at culvert on GA 179, 3.2 miles north of Whigham.

DRAINAGE AREA.—1.71 square miles.

COOPERATION.—Georgia Department of Transportation.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1977 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 245.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—

STAGE: 6.92 feet, February 11, 1986
DISCHARGE: 609 cfs, February 11, 1986

MAXIMUM FOR CURRENT YEAR.—

STAGE: 1.71 feet, April 7
DISCHARGE: unknown, due to backwater conditions from beaver dam

PEAK-STAGE RECORDS

PERIOD OF RECORD.—1994 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 1,080.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. The date of the maximum stage is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum stage for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 8.50 feet, August 20, 1998

MAXIMUM FOR CURRENT YEAR.—
STAGE: 6.32 feet, July 1

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1995 to current year.

GAGE.--Crest-stage partial-record gage. Datum of gage is 950.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 7.51 feet, April 3, 2000
DISCHARGE: 661 cfs, April 3, 2000

MAXIMUM FOR CURRENT YEAR.—

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1987 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 930 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but is not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 5.71 feet, June 27, 1994
DISCHARGE: 239 cfs, June 27, 1994

MAXIMUM FOR CURRENT YEAR.—
STAGE: 4.58 feet, June 17
DISCHARGE: 150 cfs, June 17

02337448 HURRICANE CREEK TRIBUTARY NEAR FAIRPLAY, GA

LOCATION.—Lat 33°35'03", long 84°50'54" referenced to North American Datum (NAD) of 1927, Douglas County, Hydrologic Unit 03130002, at culvert on GA 5, 8.0 miles east of Fairplay.

DRAINAGE AREA.—0.33 square miles.

COOPERATION.—Georgia Department of Transportation.

PEAK-DISCHARGE RECORDS

PERIOD OF RECORD.—1977 to current year.

GAGE.—Crest-stage partial-record gage. Datum of gage is 930.00 feet above National Geodetic Vertical Datum (NGVD) of 1929 (from topographic map).

REMARKS.—A crest-stage gage is a device which will register the peak stage occurring between inspections of the gage. A stage-discharge relation for each gage is developed from discharge measurements made by indirect measurements of peak flow or by current meter. The date of the maximum discharge is not always certain, but is usually determined by comparison with nearby continuous record stations, weather records, or local inquiry. Only the maximum discharge for each water year is given. Information of some lower floods may have been obtained, but it not published within. The years given in the period of record represent water years for which the annual maximum has been determined.

MAXIMUM FOR PERIOD OF RECORD.—
STAGE: 9.46 feet, November 5, 1977
DISCHARGE: 292 cfs, November 5, 1977

MAXIMUM FOR CURRENT YEAR.—
STAGE: 6.94 feet, June 17
DISCHARGE: 147 cfs, June 17
