

2005 SUMMER PROPER/ REDZONE SPECIAL SAFETY INITIATIVE

"BEST PRACTICES"

- **Develop Standard Operating Procedures (SOP) for tramming remote-controlled continuous mining machines. Develop a procedure for tramming either facing the rear or front of the machine.**
- **Train the section crew in the SOP for normal face mining and a move from place to place and ensure that it is followed. Develop standard cable handling procedures during these moves.**
- **Tram mining machine from a safe location i.e. out of the red zone to avoid pinch points.**
- **Assure that all persons are in the clear and out of the red zone before tramming with remote controls.**
- **It is NOT safe to stand in the middle of the machine when it is tramming.**
