

American Association of Petroleum Geologists

invites you and your staff to a
briefing for Members of Congress

Third in the "Science, Society, Solutions" series:

Future Energy Resources: Where Will They Come From?

Over the next 20 years, U.S. demand for energy is projected to increase by 32%. Learn how USGS assessments of coal, oil, and gas are providing valuable information to industry and State government in their efforts to help America find energy for the future.

USGS research and data are used to shape policies regarding domestic and foreign energy resources and to manage energy resources on Federal lands.

The Nation requires energy supplies that are secure, uninterrupted, sustainable, and economically and environmentally viable.

Thursday, June 21, 2001

10:00 am - 11:00 am
Cannon House Office Building
Room 311

Refreshments will be served

Sponsored by
Representatives Tom Davis,
