**ALABAMA, Central**

**Shelby County**  
3 NE Pelham

10 1222CST 0 0 20K **Lightning**  
One house, on Tall Timber Drive, caught on fire after being struck by lightning.

**Lamar County**  
Sulligent

10 1300CST 0 0 **Hail(0.75)**

**Sumter County**  
Cuba

10 1320CST 0 0 **Hail(0.75)**  
Reported at the 6 mile marker on US 80 in Cuba.

**Sumter County**  
3 S York

10 1325CST 0 0 **Hail(0.75)**  
Reported in the Siloam community, near Highway 17.

**Marengo County**  
2.6 NW Linden to  
Linden

10 1344CST 2.6 150 0 0 24K **Tornado (F1)**  
1348CST

The tornado touched down between State Highway 28 and the railroad tracks, just south of the Chickasaw Bogue River. This location was approximately 1.5 miles southeast of Jefferson Station or 2.6 miles northwest of Linden. The tornado tracked southeastward and paralleled State Highway 28, then moved into Linden. The tornado dissipated near the intersection of State Highway 28 and Shiloh Street in Linden. Numerous trees and scattered power lines were blown down along the path of the tornado. A large tree fell on a home and completely destroyed the home's garage doors. One large light post at a ball field was snapped off. One other home sustained minor roof damage.

**Marengo County**  
4 N Linden

10 1345CST 0 0 **Hail(0.75)**  
Reported in Chickasaw State park.

**Sumter County**  
Cuba

10 1345CST 0 0 **Flash Flood**  
1500CST  
4th Street and 5th Avenue in Cuba became temporarily impassable due to flash flooding.

**Shelby County**  
Alabaster

10 1345CST 0 0 **Flash Flood**  
1500CST  
Flash flooding was reported on Highway 17, in the Maylene Community.

**Tuscaloosa County**  
Fosters

10 1402CST 0 0 2K **Thunderstorm Wind (EG50)**  
Large trees were blown down.

**Lee County**  
Opelika

10 1508CST 0 0 **Hail(1.00)**  
1510CST  
Quarter sized hail fell for several minutes in and around Opelika.

**Lee County**  
Opelika

10 1508CST 0 0 2K **Thunderstorm Wind (EG50)**  
Trees were blown down on Lee Road.

<b>Cloverdale</b>	<b>03</b>	<b>2010CST</b>			<b>0</b>	<b>2</b>			<b>Lightning</b>
	<b>04</b>	<b>2010CST</b>							

A lightning strike injured two females inside their Cloverdale residence located in Lauderdale County. It is unknown if this strike was direct or indirect, but no apparent damage was observed to the residence. The victims were 55 and 18 years of age, complained of general numbness and also pains in their legs. They were transported to a local hospital for treatment

Strong to severe thunderstorms developed during the early afternoon hours along and near an outflow boundary that was draped west-northwest to east-southeast across north Alabama. These storms produced hail up to nickle sized. Later that evening, a linear mesoscale convective system which originated in the Ozarks, moved into northwest Alabama and southern middle Tennessee producing moderate to heavy rainfall and frequent lightning.

## Storm Data and Unusual Weather Phenomena

May 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Number of Persons Injured	Estimated Damage Property	Estimated Damage Crops	Character of Storm
<b><u>ALABAMA, North</u></b>									
<b>Limestone County</b> Countywide	09	1550CST 1615CST			0	0			<b>Thunderstorm Wind (ES70)</b>
Straight-line winds of up to 80 mph knocked down numerous trees and power lines throughout the county as a squall line raced through the area. Up to 2000 residents were without power.									
<b>Limestone County</b> 2 S Salem to 3 SW Elkmont	09	1600CST 1605CST	5	60	0	0			<b>Tornado (F0)</b>
A tornado was produced on the northern end of a strong bow echo segment. The tornado touched down several times along a 5 mile path beginning approximately two miles south of the Salem community, and ending three miles southwest of Elkmont. Several trees were either uprooted or snapped along the path, but no other property damage was observed.									
<b>Limestone County</b> 6 WSW Elkmont	09	1605CST	0.1	30	0	0	20K		<b>Tornado (F0)</b>
A brief tornado occurred within a larger scale bow echo. The tornado produced localized damage by knocking down trees on at least two homes. The downburst with maximum winds of 80 mph knocked down trees on several homes and car ports.									
<b>Lawrence County</b> Courtland	09	1620CST			0	0			<b>Thunderstorm Wind (ES50)</b>
Three trees were knocked down near County Road 150. One of the trees fell on a car and pulled a power line down									
<b>Madison County</b> Harvest	09	1629CST			0	0			<b>Funnel Cloud</b>
A wall cloud and possible funnel cloud were observed near the intersection of Jeff Road and Highway 51.									
<b>Madison County</b> Harvest	09	1630CST			0	0			<b>Thunderstorm Wind (ES50)</b>
Two trees were blown down along Wall Triana Highway. Another tree was blown down across the Harvest Road intersection									
<b>Madison County</b> Hazel Green	09	1633CST			0	0			<b>Funnel Cloud</b>
A funnel cloud was spotted near Brooks Chapel Road and in the community of Bobo.									
<b>Madison County</b> Huntsville	09	1640CST			0	0			<b>Thunderstorm Wind (ES60)</b>
Power lines were blown down along Pulaski Pike north of Sparkman Drive.									
<b>Madison County</b> Hazel Green	09	1645CST			0	0			<b>Thunderstorm Wind (ES60)</b>
A power line was blown down and ignited on fire along Shiloh Road.									
An intense squall line, including one or more bow echoes, tracked into the Tennessee Valley producing fairly widespread wind damage across several northwest Alabama counties. Up to 2,000 residents were without power for several hours due to power lines being blown down. In addition, embedded mesocyclones developed in association with a particularly intense bow echo, producing two weak intensity tornadoes in Limestone County.									
<b>Madison County</b> Owens Xrds	10	0540CST			0	0			<b>Hail(0.75)</b>
The first of three fast moving squall lines to impact the region this day produced isolated large hail, gusty winds and brief heavy rainfall.									
<b>Colbert County</b> Tuscumbia	10	1250CST			0	0			<b>Thunderstorm Wind (EG50)</b>
Powerlines were blown down.

## Storm Data and Unusual Weather Phenomena

May 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Number of Persons Injured	Estimated Damage Property	Estimated Damage Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------------------------------	---------------------------------	------------------------------	--------------------

### ALABAMA, North

Three fast moving squall lines rolled through portions of the Tennessee Valley ahead of an approaching cold front from early morning into the early afternoon hours. The first line produced mostly small hail, brief gusty winds and downpours to most of the area. The second line moved in during the late morning hours producing mainly moderate to heavy rainfall and no reported severe weather. The third line moved through during the early to mid afternoon hours affecting a similar area with isolated wind damage and another dose of heavy downpours and minor ponding of water.

<b>Lauderdale County</b>									
<b>Kingtown to 6 SSE Kingtown</b>	<b>11</b>	<b>1815CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

A tree was blown down.

<b>Lauderdale County</b>									
<b>Lexington</b>	<b>11</b>	<b>1815CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

A tree was blown down.

<b>Madison County</b>									
<b>Hazel Green</b>	<b>11</b>	<b>1927CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

Powerlines were blown down on Bobo Section Road.

<b>Lawrence County</b>									
<b>Courtland</b>	<b>11</b>	<b>1930CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

Trees and powerlines were blown down. Time estimated.

<b>Madison County</b>									
<b>Harvest</b>	<b>11</b>	<b>1938CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

Trees were blown down at Smith-Basser and Yarborough Roads.

<b>Marshall County</b>									
<b>Guntersville</b>	<b>11</b>	<b>2045CST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (EG50)</b>

Trees were blown down.

A strong upper level trough of low pressure over the Great Lakes brought a cold pool of air aloft into the Tennessee Valley creating unstable conditions during the late afternoon and evening hours. At the same time, an upper level shortwave trough and associated west to east jet stream over 100 mph right over the region producing lift. These ingredients resulted in a band of high based showers and thunderstorms producing widespread gusty winds, isolated wind damage, brief moderate rainfall and occasional sudden lightning.

<b>Franklin County</b>									
<b>Russellville</b>	<b>13</b>	<b>1735CST</b>			<b>0</b>	<b>0</b>			<b>Hail(0.88)</b>

Nickel sized hail reported.

 Nickel sized hail reported.

#### Madison County

**3 N Hazel Green**      **13**      **2127CST**                     **0**      **0**                     **Hail(0.88)**  
 Nickel sized hail reported.

#### Madison County

**New Market**      **13**      **2140CST**                     **0**      **0**                     **Hail(0.88)**  
 Nickel sized hail reported.

An intense upper level low pressure system centered near Chicago, Illinois continued to produce a steady and strong northwest flow aloft to the Tennessee Valley. This weather pattern enabled another cold front to drop southeast into the area during the late afternoon and evening hours. Sufficient heating during the day coinciding with cold air aloft and strong deep layer wind shear in the atmosphere produced scattered severe thunderstorms including a couple of supercells which produced large hail. One such cell was documented by a local photographer as what is known as a Low Precipitation supercell, which is quite rare for this region.

#### Jackson County

**Countywide**      **21**      **2020CST**  
**2100CST**                     **0**      **0**                     **Lightning**  
 Very frequent lightning was reported with numerous power outages resulting from lightning strikes to power structures.

#### Jackson County

**Hollywood**      **21**      **2100CST**                     **0**      **0**                     **Thunderstorm Wind (ES50)**  
 Numerous trees and power lines were blown down. Several power outages were reported. Time estimated report.

#### Jackson County

**Stevenson**      **21**      **2100CST**                     **0**      **0**                     **Thunderstorm Wind (ES50)**  
 Numerous trees and power lines were blown down. Several power outages were reported. Time estimated report.

Similar to the previous day, a stationary front remained draped west to east near the Alabama and Tennessee state line. This provided a focus for a cluster of strong to severe thunderstorms which tracked east along the boundary during the evening hours producing strong winds, heavy downpours and frequent lightning across far northeast Alabama and far southern middle Tennessee.

#### Jackson County

**Woodville**      **26**      **1211CST**  
**1214CST**                     **0**      **0**                     **Thunderstorm Wind (EG50)**  
 Power lines were blown down at the intersection of County Roads 21 and 105 and within the Robin Lane subdivision

#### Madison County

**Union Grove**      **26**      **1335CST**                     **0**      **0**                     **Thunderstorm Wind (EG60)**  
 Numerous power poles were blown down creating power outages

### ALABAMA, North

#### Madison County

**Triana**                      **26**    **1510CST**                      **0**    **0**                      **Thunderstorm Wind (EG50)**  
Power lines were blown down.

#### Madison County

**3 W Huntsville**                      **26**    **1513CST**                      **0**    **1**                      **Lightning**  
Lightning struck adjacent to the National Weather Service office on the campus of the University of Alabama at Huntsville. A National Weather Service employee who was on-duty viewed the close flash through an adjacent window and experienced a jolt of electricity while using the telephone. Afterwards, the employee noticed a tingling sensation in his ear, arms and experienced a severe headache through that evening. No apparent damage was observed in the office or on office grounds.

#### Madison County

**Madison**                      **26**    **1520CST**                      **0**    **0**                      **Thunderstorm Wind (EG50)**  
Power lines were blown down.

#### Madison County

**3 SE Harvest**                      **26**    **1600CST**                      **0**    **0**    **20K**                      **Lightning**  
A home was struck by lightning igniting a fire.  
Clusters of strong to severe thunderstorms erupted during the early afternoon hours across much of northeast Alabama and southern middle Tennessee. These storms produced isolated wind damage, vivid lightning, and minor ponding of water on area roads.

#### Dekalb County

**Ider**                      **26**    **1500CST**                      **0**    **0**                      **Thunderstorm Wind (EG60)**  
Trees were blown down in multiple location including a large tree down onto Highway 75.

#### Dekalb County

**2 SW Mentone**                      **26**    **1522CST**                      **0**    **0**                      **Hail(1.00)**  
Quarter sized hail reported on County Road 89 near Mentone.

#### Madison County

**3 N Huntsville**                      **26**    **2220CST**                      **0**    **1**                      **Lightning**  
A woman received minor injuries due to a lightning strike. Other details unknown.  
Two clusters of thunderstorms affected the Tennessee Valley. The first developed over far northeast Alabama during peak late afternoon heating as a weak upper level disturbance tracked southeast. This cluster produced isolated large hail and wind damage. A second cluster of thunderstorms dropped southeast into southern middle Tennessee and far north central Alabama after dark and was responsible for a lightning strike injury.

#### Madison County

**Madison**                      **27**    **2230CST**                      **0**    **0**                      **Thunderstorm Wind (EG50)**  
An isolated severe microburst blew down numerous trees in and near the historic district of downtown Madison.

### ALABAMA, Southwest

#### Escambia County

Brewton	09	1935CST 1945CST			0	0	40K		Hail(2.00)
---------	----	--------------------	--	--	---	---	-----	--	------------

Large hail falling out of a thunderstorm damaged several vehicles in and around the Brewton area. The large hail lasted for about ten minutes. An unofficial weather gage measured a wind gust of 46 MPH during the storm.

#### Choctaw County

Cromwell to Lisman	10	1500CST 1515CST			0	0	5K		Hail(1.75)
-----------------------	----	--------------------	--	--	---	---	----	--	------------

Thunderstorms dropped quarter to golfball size hail between Cromwell and Lisman. The hail lasted for several minutes and some vehicles had their windshields damaged from the hail.

#### Wilcox County

North Portion	10	1600CST 1900CST			0	0			Flash Flood
---------------	----	--------------------	--	--	---	---	--	--	-------------

Several slow moving thunderstorms dropped four to seven inches of rainfall across the north part of the county. Several roads had to be closed for a few hours until the water had drained. An observer in Alberta reported over six inches of rain while five inches was recorded at Millers Ferry. Other than closed roads, no other problems were reported.

#### Choctaw County

North Portion	10	1610CST 1900CST			0	0			Flash Flood
---------------	----	--------------------	--	--	---	---	--	--	-------------

Slow moving thunderstorms dropped five to seven inches of rainfall across the north part of the county. The heavy rains caused several roads to flood. The roads had to be closed for several hours until the water had drained.

#### Wilcox County

Camden	10	1700CST 1704CST			0	0			Hail(1.00)

Talahatta	10	1708CST 1710CST	0.1	30	0	0	15K		Tornado (F0)
-----------	----	--------------------	-----	----	---	---	-----	--	--------------

A weak tornado briefly touched down along County Road 44 near Talahatta Springs. A funnel cloud was reported just a couple of minutes before near Opine. The weak tornado blew down several trees and power lines and damaged the roof of a small meat processing plant. No injuries were reported. Large hail was also reported with the storm.

#### Clarke County

Thomasville	10	1710CST 1715CST			0	0	100K		Hail(2.75)
-------------	----	--------------------	--	--	---	---	------	--	------------

Large hail from a thunderstorm damaged numerous vehicles and several roofs just south of Thomasville. The local EMA director was on the phone with the National Weather Service reporting the hail, when his windshield was busted out by the baseball size hail. The large hail lasted for several minutes and caused widespread damage in the south part of town.

#### Clarke County

Dickinson	10	1731CST 1734CST			0	0	5K		Hail(1.75)
-----------	----	--------------------	--	--	---	---	----	--	------------

Golfball size hail fell from a thunderstorm near Dickinson. The large hail damaged a few vehicles windshields.

#### Monroe County

#### Baldwin County

Daphne	29	1445CST			0	1	15K		Lightning
--------	----	---------	--	--	---	---	-----	--	-----------

A 65 year old female was praying for her families safe return from a Memorial Day trip to the beach when lightning struck nearby. She was standing next to her refrigerator when a ball of lightning exploded out of her kitchen floor. She was knocked to the floor and was found by her family a few minutes later. The lightning appeared to have struck across the street from her home and ran into the house through a water line. The lightning continued into her backyard and ripped open a small trench. Pieces of concrete were scattered throughout the kitchen. She said her dog had tried to block her way into the kitchen only minutes before the strike occurred. She refused to go to a hospital.

#### Baldwin County

Central Portion	29	1530CST 1630CST			0	0			Flash Flood
-----------------	----	--------------------	--	--	---	---	--	--	-------------

Heavy rains from slow moving thunderstorms caused street flooding across the central part of the county. Several secondary roads had to be closed for about an hour due to the flooded roads. Radar estimated that four to five inches of rain fell across the area in about a two hour period.
