

Staying Happy and Healthy in Your Spa & Hot Tub

...is the name of a good-reading, good-looking 34 page booklet published by Public Health-Seattle & King County, now in a newly revised and expanded fourth edition that has been commended by the National Spa and Pool Institute.

Here's straight talk from the experts...both those concerned with your health and those who encourage you to relax and enjoy. Topics covered include water temperature, use of alcoholic beverages, health conditions and preventing infection, safety, water disinfection and maintenance, test kits and cleaning.

The booklet is an invaluable aid to every hot tub/spa owner; makes a great gift, and is also useful to those thinking of buying a hot tub/spa. Retailers have found this a helpful aid to customer education and have purchased quantities for distribution and as a teaching tool.
