

DEPARTMENT OF HUMAN SERVICES-HEALTH SERVICES
Office of Mental Health and Addiction Services
Mental Health Planning and Management Advisory Council

"MOTION" FORM

Date: February 2, 2006

I move: In order to create a mental health system that nurtures safe and healing environments for both patients and staff, we, the members of PAMAC make the following two recommendations:

- 1) That the Oregon State Hospital Master Plan process systematically incorporate research and planning for both a physical environment and treatment approaches that will create a more safe and healing environment. Specifically, we ask that the master plan look at trauma-informed services, the sanctuary model and other best practices.
- 2) That the PAMAC create a time-limited ad-hoc working committee to research, gather data and make recommendations to the council for increasing the system's capacity for adopting best practices that reduce trauma, reduce seclusion and restraint and increase healing.

Motion Maker: Bob Joondeph

Second: David Romprey

Action Taken: Next step is for the individuals interested in this ad-hoc committee is to meet with Bob Nikkel.
