

## CHAPTER IX

### FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm resources, farm income, and expenses. Many of the series are estimates developed in connection with economic research activities of the Department.

For convenience the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Economic trends, table 523.

Farm property, table 524.

Population and employment, table 536.

Farm production and distribution, table 544.

Price and income, table 550.

Costs and expenses, table 562

<sup>1</sup> Columns 3, 4, and 5 refer only to land rented from others and operated, so subleased land is not included. Numbers of land rented are comparable in the same year, but definitions change over time. Basic sources are 1969 Census of Agriculture, table 5, p.14; 1974 Census of Agriculture, table 3, pp.1-6; 1978 Census of agriculture, vol. 1, part 51, table 5, pp. 124-127; 1982 Census of Agriculture, vol. 1, part 51, table 48, p. 49; 1987 Census of Agriculture vol. 1 part 51, table 48, p.49; 1992 Census of Agriculture vol. 1, part 51, table 46, p.53; and earlier census volumes as noted. <sup>2</sup>Sum of part owners and owner/tenant. 1900 Census of Agriculture, table 20, pp.308. <sup>3</sup>Assumes lands leased by part-owners is the difference between the average size of full-owner and part-owner farms. Acreage leased by part-owners is this difference times the number of part-owners. 1910 Census of Agriculture, chapter 11, table 1 and 3, pp.97-99. <sup>4</sup>1920 Census of Agriculture, vol. VI, part 1, table 5, p.19. <sup>5</sup>Assumes same proportion of owner and part-owner as in 1910. <sup>6</sup>1964 Census of Agriculture, vol. II, chapter 8, p.757.

<sup>1</sup> Cropland harvested, crop failure, and cultivated summer fallow. <sup>2</sup> Grassland and other nonforest pasture and range.

<sup>3</sup> Excludes reserved and other forest land duplicated in parks and other special uses of land. Includes forested grazing land.

<sup>4</sup> Includes rural transportation areas, Federal and State areas used primarily for recreation and wildlife purposes, military areas, farmsteads, and farm roads and lanes.

<sup>5</sup> Miscellaneous areas such as marshes, open swamps, bare rock areas, and deserts, including urban and other special uses not inventoried.

<sup>6</sup> Approximate land area as established by the Bureau of the Census in conjunction with the 1990 Census of Population.

ERS, Natural Resources and Environment (202) 219-0424. Estimates based on reports and records of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies. Estimates developed for years coinciding with a Census of Agriculture.

<sup>1</sup> Data as of December 31. Data are from Census of Agriculture. <sup>2</sup> Includes wheel and crawler-type tractors. <sup>3</sup> Data for 1974 and after are for self-propelled combines only. <sup>4</sup> Includes corn pickers and picker shellers. <sup>5</sup> Does not include balers, producing bales weighing more than 200 pounds. <sup>6</sup> Data for 1978 and after do not include flail-type forage harvesters. <sup>7</sup> U.S. totals for 1978 are not directly comparable with totals for 1974 or earlier Census years, because they include State-level data from farm operators represented on the Census mailing list, plus estimates from the direct enumeration sample for farms not represented on the mailing list. As a result, figures for nearly all categories are somewhat higher than they would be using the earlier base. n.a. not available.

<sup>1</sup> The farm entrepreneurial population consist of all persons in households where at least one member is employed primarily as a farm operator or farm manager or at least one member received farm self-employment income in the preceding year. <sup>2</sup> Farm operators and managers are those individuals who indicated that their longest job was as a farm operator or manager. <sup>3</sup> Educational attainment applies to persons age 25 years and older.

<sup>1</sup> Beginning in July 1984, three surveys a year were conducted in the 48 contiguous States and Hawaii. In 1989, January was added to the survey program. Data are obtained from establishments for the week that includes the 12th. <sup>2</sup> Includes farm operators doing 1 or more hours of farm work and other unpaid workers working 15 hours or more during the survey week without cash wages. <sup>3</sup> Includes all persons doing farm work for pay during the survey week. <sup>4</sup> Index is not seasonally adjusted. <sup>5</sup> Index discontinued in 1994.

<sup>1</sup> Represents average number of persons 15 years old and over in the civilian noninstitutional population who were employed per week as hired farmworkers. Based on the Current Population Survey microdata earnings file.

<sup>2</sup> Data for 1994 are not directly comparable with data for 1993 and earlier years because of survey redesign.

<sup>3</sup> "Median weekly earnings" is the value that divides the earnings into two equal parts, one part having earnings above the median and the other part having earnings below the median. "Earnings" refers to the weekly earnings the farmworker usually earns at a farmwork job, before deductions, and includes any overtime pay or commissions.

<sup>4</sup> Excludes persons of Hispanic origin.

<sup>5</sup> Educational attainment levels, prior to January 1992, reflected years of schooling completed rather than degrees or diplomas received.

<sup>1</sup> Corn for grain, oats, barley, and sorghum for grain. <sup>2</sup> Wheat, rye, and rice. <sup>3</sup> Crops included in area planted and area harvested are corn, sorghum, oats, barley, winter wheat, rye, durum wheat, other spring wheat, rice, soybeans, peanuts, sunflower, cotton, dry edible beans, potatoes, and sugarbeets. Harvested acreage for all hay, tobacco, and sugarcane are used in computing total area planted. <sup>4</sup> Area for fresh market is area for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Area for processing is area harvested. <sup>5</sup> Includes the following fruits and nuts: Citrus fruits—oranges, tangerines, templets, grapefruit, lemons, limes and tangelos (area is for the year of harvest); deciduous fruits—commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, bananas, nectarines, figs, kiwifruit, olives, avocados, papayas, dates, persimmons, pineapples and pomegranates; nuts—walnuts, almonds, filberts, macadamias, and pistachios.

<sup>1</sup> The market basket consists of foods that mainly originate on U.S. farms bought in foodstores in a base period, currently 1982–84. <sup>2</sup>Indexes of retail cost are components of the Consumer Price Index published by the Bureau of Labor Statistics. <sup>3</sup>Gross return or payment to farmers for the farm products equivalent to foods in the market basket. <sup>4</sup>The spread between the retail cost and farm value is an estimate of the gross margin received by marketing firms for assembling, processing, transporting, and distributing the products. <sup>5</sup>Preliminary.

<sup>1</sup> Marketing year average prices for crops; weighted calendar year average for livestock and livestock products, except chickens, eggs, and hogs, which are on a Nov.-Dec. marketing year basis. Unless otherwise noted, these are averages for marketing season or calendar year computed by weighing State prices by quantities sold, or by production for those commodities for which virtually all the production is sold. <sup>2</sup>Preliminary. <sup>3</sup>Parity prices are for January of the year shown as published in the January issue of Agricultural Prices. <sup>4</sup>Previous year. <sup>5</sup>Average local market price for wool sold excluding incentive payment. <sup>6</sup>Average local market price for mohair sold excluding incentive payment. Texas only prior to 1988. <sup>7</sup>Crop year begins with bloom in one year and ends with completion of harvest the following year. Prices refer to the year harvest begins. Thus the prices shown for 1994 relate to the citrus crop designated as 1994-95 in the production reports. <sup>8</sup>Equivalent packinghouse-door returns for California, Oregon (pears only), Washington, and New York (apples only), and prices as sold for other States. <sup>9</sup>Equivalent returns at processing plant-door. <sup>10</sup>Equivalent returns at packinghouse-door. <sup>11</sup>Weighted average of co-op and independent sales. Co-op prices represent pool proceeds excluding returns from non-cranberry products and before deductions for capital stock and other retains. <sup>12</sup>Equivalent per unit returns for bulk fruit at first delivery point. <sup>13</sup>Average price as sold. <sup>14</sup>FOB shipping point when available. Weighted average of prices at points of first sale when FOB shipping point price not available. <sup>15</sup>Prices are in-shell basis except almonds which are shelled basis. <sup>16</sup>Includes some processing. <sup>17</sup>Simple average of States weighted by estimated Jan. 1 head for U.S. average. <sup>18</sup>Sold by farmers directly to consumers. <sup>19</sup>Marketing year average price is per pound; parity price is per ton.

<sup>1</sup> These indexes are computed using the price estimates of averages for all classes and grades for individual commodities being sold in local farm markets. In computing the group indexes, prices of individual commodities have been compared with 1990–92 weighted average prices. The resulting ratios are seasonally weighted by average quantities sold for the most recent previous 5-year period. For example, 1994 indexes use quantities sold for the period 1988–92. Then, the 1990–92 indexes are adjusted to a 1910–14 reference. <sup>2</sup> Fresh market for noncitrus, and fresh market and processing for citrus. <sup>3</sup> Ratio of Index of Prices Received to the Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes, and Farm Wage Rates. <sup>4</sup> Preliminary.

<sup>1</sup> Starting in 1991, all expense estimates are based on the Farm Costs and Returns Survey (FCRS), except livestock and poultry purchased, interest, dairy assessment fees, depreciation and other consumption of farm capital, and certain components of net rent to nonoperator landlords. Estimates for 1988–90 were derived using interpolation factors between prior 1987 estimates and the new 1991 results. FCRS data for 1991 and later years use revised nonresponse and undercoverage procedures that make them significantly different from previous estimates. <sup>2</sup> Includes bulbs, plants, and trees for replanting. <sup>3</sup> For farm business use only. Final estimates subtract federal and State refunds or excise taxes from total expenditures. <sup>4</sup> Estimated outlay necessary, at current prices, to replace capital equipment that has been used up or destroyed during the year. <sup>5</sup> Includes contract labor, hired labor cash wages, including insurance and retirement; Social Security and other wage taxes paid by employers; and perquisites. <sup>6</sup> Includes taxes levied on farm real estate and personal property. <sup>7</sup> Interest charges payable during the calendar year on outstanding farm-mortgage debt. <sup>8</sup> Starting in 1991, interest on nonfarm-purpose debt, based on data collected in the Farm Costs and Returns Survey is subtracted from total interest expenses. For 1988–90, the proportion of nonfarm-purpose interest to total interest was interpolated between zero in 1987 and the percent of total in 1991. <sup>9</sup> Includes cash receipts for forest products received by nonoperators starting in 1987. These forest products are not necessarily taken from land that is part of a farm operation, nor do these landowners necessarily rent land to operators. <sup>10</sup> In all years, includes interest on nonreal estate debt; electricity; repair and maintenance of farm capital; machine hire and customwork; marketing, storage, and transportation; miscellaneous livestock purchases; livestock rental fees; health and breeding services and supplies; grazing, custom feeding, irrigation water and dairy assessment fees; farm supplies, tools, and noncapital equipment; other general production expenses; motor vehicle registration and licensing fees; telephone, water, and other farm business management expenses. Net insurance including motor vehicles, which equals gross insurance less indemnities, is included in 1985–86. For 1987 and later years, gross insurance including motor vehicles is included and indemnities are part of farm-related income.

<sup>1</sup> In dollars per operator household. Data for 1988–90 are expanded to represent only the farm operator households surveyed in USDA's Farm Costs and Returns Survey; beginning in 1991, data represent the total number of farms and ranches in the contiguous United States. <sup>2</sup> Farm income to the household equals self-employment income (net cash farm income, less depreciation, adjusted for the share received by the senior operator household in multiple-household farms) plus amounts that operators pay themselves and family members to work on the farm, income from renting out acreage (1990–92), and net income from a farm business other than the one being surveyed. In 1993, income from renting out acreage is included in income from interest, dividends, transfer payments, etc.
