

2007
Oregon County and State
Agricultural Estimates

Special Report 790-07, revised February 2008

2007 Oregon County and State Agricultural Estimates

Oregon Agricultural Information Network (OAIN)
Extension Economic Information Office
Department of Agricultural & Resource Economics
Oregon State University

This report provides a quick overview of Oregon's recent crop and livestock production. The following pages include 2007 preliminary estimates for production and value and revised estimates for 2005 and 2006. Preliminary or first estimates are revised as needed when updated information is received. All data reported here were in our database as of January 22, 2008. We collect only farmgate level estimates. No marketing charges or government payments are included in our price estimates.

At our website—<http://oregonstate.edu/oain>—you can review and download the publicly available numbers that are periodically updated in our database. This publication, and earlier versions, also are on that website; click on **AG SUMMARIES (SR 790)** on the right side of our homepage. Click **CHARTS** for statewide and county charts.

To see any of the public portions of the database, on the homepage click **OAIN DATABASE**. No username or password is required; just click on **NEXT** below the login boxes. You then can bring up formatted reports on the menu provided or click on **USER DEFINED REPORT/QUERY** to create your own tables.

Our intent is to protect confidential data within the database by combining them with other commodities in county, regional, or statewide summaries. Our definition of confidentiality is similar to that of the Oregon Agricultural Statistics Service, USDA: any data that represent fewer than three producers or one producer with 60 percent or more of the identified production are confidential.

The estimates we provide are obtained from a team of about 70 OSU Extension & Research faculty, statewide, who are knowledgeable about selected crop and livestock production in the counties that they serve. These numbers reflect their best judgment on commodity production, prices, and usage patterns over time. The estimates represent overall annual values. We recognize that their choices for aggregating data may shift the gross farm sales ranking of specific commodities and sectors.

Some commodities—for example, livestock forages—frequently are produced for on-farm use. A single price estimate is made for each county's production regardless of whether it is sold in an open market or consumed in producing other commodities. The estimated value of production reflects the entire value of the commodity, whether it is sold or consumed on-farm. The percent of sales for the commodity is also estimated. That percentage is multiplied by the estimated value of production to derive the estimated value of sales. Thus, for commodities that are primarily consumed on-farm in other enterprises, the value of production would be significantly higher than the value of sales.

We acknowledge the special efforts of Robert Clark, Dixon Creek Software, Corvallis, OR. He created the OAIN system software which allows us to collect and disseminate data electronically. Mr. Clark continues to provide technical support and upgrades.

Agricultural Commodity Sales Oregon, 2007p

2007p Sales (\$000) by Commodity

Field Crops	231,579
Grains	370,750
Grass & Legumes	507,734
Hay & Forage	370,673
Nursery & Greenhouse Crops	901,588
Small Fruit & Berries	136,744
Small Woodlots & Christmas Trees	340,356
Other Specialty Products	148,110
Tree Fruit & Nuts	287,531
Vegetables & Truck Crops	225,861
All Crops	\$3,520,926
Cattle & Calves	710,959
Dairy Products	443,313
Other Animal Products	101,511
Poultry	116,533
All Livestock	\$1,372,316
 All Crops & Livestock	 \$4,893,242

p=preliminary. Values are in thousands of dollars (e.g., 10,000 = \$10,000,000).
