

February 14, 2003

Mr. Scott Mallette
Director, Operations Management Division
U. S. Department of Energy
Brookhaven Group
Upton, NY 11973

Dear Mr. Mallette:

SUBJECT: NPDES - Discharge Monitoring Report (DMR) for January 2003

Included as Attachment I, please find the DMR for the month of January 2003. Chemical analyses for the reported parameters are conducted by a NYS Department of Health certified contractor laboratory. Copies of the analytical reports are contained in Attachments II and III. Field measured parameters (pH, settleable solids, flow) are recorded and/or measured by the Plant Engineering Division, Sewage Treatment Plant Operators or the Environmental Services Division, Field Sampling Team.

Review of the analytical data shows that all parameters met their respective SPDES effluent limitations this reporting period. Collection and analysis of the SPDES permit samples are performed in accordance with the guidelines of the BNL Quality Assurance program. These guidelines include the routine calibration of instruments, standard operating procedures for collection and analysis of samples, use of standard methods of analysis, and validation of the contractor analytical data by the BNL analytical services laboratory. Brookhaven National Laboratory personnel collected all samples. A Quality Assurance inspection is performed periodically on contractor laboratories. The Quality Assurance documentation is available from the Environmental Services Division and Plant Engineering Divisions. Based on this information, we believe the values reported on the DMR are representative of the effluent from the BNL during the month of January 2003.

Although it is no longer necessary for BNL to include copies of the laboratory analysis when submitting the DMR, we are including them in the package submitted to you for record-keeping purposes. You do not have to forward the analytical reports to the NYSDEC-Region 1 or SCDHS when submitting the DMR.

Please sign each page of the computer generated DMR where indicated and transmit it to the New York State Department of Environmental Conservation and the Suffolk County Department of Health Services no later than February 28, 2003. If there are any questions regarding the information contained on the DMR or the analytical data packages, please do not hesitate to contact R. Lee at extension 3148 or M. Allocco at extension 3166.

Sincerely,

E. A. Zimmerman, CEP, REM, CEA, CESM
Interim Division Manager

EAZ/MA:cr

Attachment I: Discharge Monitoring Report for January 2003.

Attachment II: Analytical Results from H2M Labs for samples collected on 1/6/03 and 1/9/03 from Outfall 001.

Attachment III: Analytical Results from H2M Labs for samples collected from Outfalls 002, 002B, 005, 006A, and 006B.

EC62ER.03

Brookhaven National Laboratory
SPDES Permit No. NY0005835
Discharge Monitoring Report for January 2003
Discharge Monitoring Report Notes:

1. The reported concentration is estimated at less than the method detection limit but greater than the instrument detection limit.
2. The flow monitoring equipment at Outfall 002B malfunctioned in early January and had to be removed from service for repair on January 23, 2003. No other monitoring equipment, such as water supply meters, was available to estimate the monthly flow. Therefore, the amount of actual flow recorded for December 2002 was entered as the estimated flow for January because there wasn't a change in process during this time frame.
3. There was no discharge from Outfalls 008 and 010 during this reporting period.
