Managed by Brookhaven Science Associates
for the U.S. Department of Energy

June 20, 2003

Mr. Scott Mallette
Director, Operations Management Division
U. S. Department of Energy
Brookhaven Group
Upton, NY 11973

Dear Mr. Mallette:

SUBJECT: NPDES - Discharge Monitoring Report (DMR) for May 2003

Included as Attachment I, please find the DMR for the month of May 2003. Chemical analyses for the reported parameters are conducted by NYS Department of Health certified laboratories. As of May 1, 2003, the BNL Analytical Services Laboratory is now performing the metals and volatile organic compound analyses on all SPDES samples. Copies of the analytical reports are contained in Attachments II and III. Field measured parameters (pH, settleable solids, flow) are recorded and/or measured by the Plant Engineering Division, Sewage Treatment Plant Operators or the Environmental Services Division, Field Sampling Team.

Review of the analytical data shows that all parameters met their respective SPDES effluent limitations this reporting period. Collection and analysis of the SPDES permit samples are performed in accordance with the guidelines of the BNL Quality Assurance program. These guidelines include the routine calibration of instruments, standard operating procedures for collection and analysis of samples, use of standard methods of analysis, and validation of the contractor analytical data by the BNL analytical services laboratory. Brookhaven National Laboratory personnel collected all samples. A Quality Assurance inspection is performed periodically on contractor laboratories. The Quality Assurance documentation is available from the Environmental Services Division and Plant Engineering Divisions. Based on this information, we believe the values reported on the DMR are representative of the effluent from the BNL during the month of May 2003.

On June 18, 2003, acrylic latex paint was discovered discharging from the rainwater downspouts of a trailer attached to Building 830. The paint had been applied to the building's roof on June 17, 2003, and had not cured before being exposed to rainfall that evening. R. Sorrentino of the NYSDEC was contacted to determine if any further action was needed. As a result the Laboratory has agreed to remove any residual material from the downspouts. This will be coordinated through the Plant Engineering Waste Management Representative.

Although it is no longer necessary for BNL to include copies of the laboratory analysis when submitting the DMR, we are including them in the package submitted to you for record-keeping purposes. You do not have to forward the analytical reports to the NYSDEC-Region 1 or SCDHS when submitting the DMR.

Please sign each page of the computer generated DMR where indicated and transmit it to the New York State Department of Environmental Conservation and the Suffolk County Department of Health Services no later than June 28, 2003. If there are any questions regarding the information contained on the DMR or the analytical data packages, please do not hesitate to contact R. Lee at extension 3148 or M. Allococo at extension 3166.

Sincerely,

George A. Goode
Environmental & Waste Management Services
Division Manager

GAG/MA:car

Attachment I: Discharge Monitoring Report for May 2003.

Attachment II: Analytical Results from H2M Labs, Inc. and the BNL Analytical Services Laboratory for samples collected on 5/5/03 and 5/8/03 from Outfall 001.

Attachment III: Analytical Results from H2M Labs, Inc. and the BNL Analytical Services Laboratory for samples collected from Outfalls 002, 002B, 005, 006A, 006B, 008, and 010.

Brookhaven National Laboratory
SPDES Permit No. NY0005835
Discharge Monitoring Report for May 2003
Discharge Monitoring Report Notes:

1. Since flow records are maintained on a weekly or monthly basis, the flow rate provided is the daily average.
2. Flow is estimated based upon an instantaneous flow measurement and the assumption that flow continued for the entire day (i.e., 1,440 minutes).
