

**Table 907. Solar Collector Shipments by Type, End Use, and Market Sector: 1980 to 2005**

[Shipments in thousands of square feet (19,398 represents 19,398,000). Solar collector is a device for intercepting sunlight, converting the light to heat, and carrying the heat to where it will be either used or stored. 1985 data are not available. Based on the Annual Solar Thermal Collector Manufacturers Survey]

Year	Number of manufacturers Total shipments <sup>1, 2, 3</sup>		Collector type		End use			Market sector		
			Low temperature <sup>1, 2</sup>	Medium temperature, special, other <sup>2</sup>	Pool heating	Hot water	Space heating	Residential	Commercial	Industrial
1980 <sup>4</sup> . . . .	233	19,398	12,233	7,165	12,029	4,790	1,688	16,077	2,417	488
1986 <sup>4</sup> . . . .	98	9,360	3,751	1,111	3,494	1,181	127	4,131	703	13
1990 <sup>4</sup> . . . .	51	11,409	3,645	2,527	5,016	1,091	2	5,835	294	22
1995 . . . . .	36	7,666	6,813	840	6,763	755	132	6,966	604	82
2000 . . . . .	26	8,354	7,948	400	7,863	367	99	7,473	810	57
2003 . . . . .	26	11,444	10,877	560	10,800	511	76	10,506	864	71
2004 . . . . .	24	14,114	13,608	506	13,634	452	13	12,864	1,178	70
2005 <sup>5</sup> . . . .	25	16,041	15,224	702	15,041	640	228	14,681	1,160	31

<sup>1</sup> Includes shipments of high temperature collectors to the government, including some military, but excluding space applications. Also includes end uses such as process heating, utility, and other market sectors not shown separately. <sup>2</sup> Includes imputation of shipment data to account for nonrespondents. <sup>3</sup> Total shipments include all domestic and export shipments and may include imported collectors that subsequently were shipped to domestic or foreign customers. <sup>4</sup> Declines between 1986 and 1990 are primarily due to the expiration of the federal energy tax credit and industry consolidation. <sup>5</sup> Preliminary.
