U.S. Census Bureau

American FactFinder

Hawaii General Demographic Characteristics: 2004

Data Set: 2004 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

An * indicates that the estimate is significantly different (at a 90% confidence level) than the estimate from the most current year. A 'c' indicates the estimates for that year and the current year are both controlled; a statistical test is not appropriate.

Source: U.S. Census Bureau, 2004 American Community Survey

Estimates from two years are "significantly different" if their difference is large enough to infer that there was a less than 10 percent chance that the difference came entirely from random variation.

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and
- · For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. (pdf format)

## Explanation of Symbols:

- 1. An '-' entry in an Estimate column indicates that no sample observations were available to compute an estimate.
- 2. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 3. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 4. An 'N' entry in an Estimate column indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
