PRESENTER BIOGRAPHIES
18th Annual Derivatives Securities and Risk Management Conference
April 11 – 12, 2008
L. William Seidman Center - Hove Auditorium - Arlington, Virginia
Sponsored by Federal Deposit Insurance Corporation's Center for Financial Research
Cornell University's Johnson Graduate School of Management
University of Houston's Bauer College of Business

Vikas Agarwal is an Assistant Professor of Finance at Georgia State University's J. Mack Robinson College of Business. Vikas received his Ph.D. in finance from the London Business School. He holds a Research Associate position at EDHEC Risk and Asset Management Center, France. He is also a Research Fellow at the Centre for Financial Research, University of Cologne, Germany.

His broad areas of research interest include investments and asset pricing. His current research focuses on various issues related to hedge funds including characterization of risks, performance evaluation, determinants of money flows and risk-taking behavior, and impact of managerial incentives on performance in the hedge fund industry. His research has been published both in academic and practitioner journals including Review of Financial Studies, Journal of Financial and Quantitative Analysis, Journal of Investment Management, Journal of Alternative Investments, Foundations and Trends in Finance, and Journal of Asset Management. His research has been cited and discussed in the financial press and magazines including Euromoney, Financial Times, International Herald Tribune, New York Times, and The Wall Street Journal.

David Bates is Professor of Finance at the University of Iowa, and a Research Associate of the National Bureau of Economic Research. He received an S.B. in mathematics from M.I.T., an M.P.A. from Princeton University, and an M.A. and doctorate in economics from Princeton. From 1988 to 1996, he taught at the Wharton School of the University of Pennsylvania. His research primarily involves developing, estimating, and testing option pricing models, with applications to currency and stock index options. More recently, he has been developing time series methods for estimating stock market volatility and crash risk. His articles have appeared in various academic journals, including the Journal of Finance, Journal of Econometrics, and Review of Financial Studies. Further information is available at his Web site, http://www.biz.uiowa.edu/faculty/dbates.

Tobias Berg is a PhD candidate at the Department of Financial Management and Capital Markets, Technische Universität München. He received a diploma in economathematics from the University of Marburg in 2004. His current research interests include risk management and asset pricing with a particular focus on risk

premia on equity and credit markets. In his current research, he investigates the link between credit risk premia and the equity premium.

Sudheer Chava is an Assistant Professor in the Finance Department at Mays Business School, Texas A&M University. His research interests are in Credit Risk, Banking, Corporate Finance and, Empirical Asset Pricing. His work has been published in leading finance academic journals such as Journal of Finance, Journal of Financial Economics and Review of Financial Studies. Dr. Chava received his M.B.A from Indian Institute of Management, Bangalore and his Ph.D from Cornell University.

Anna S. Chernobai is currently an Assistant Professor of Finance in the Martin J. Whitman School of Management at Syracuse University, New York. Her research interests are operational risk in financial institutions, default risk, econometrics, mathematical finance, and applied probability and statistics. She is the author of a book titled "Operational Risk: A Guide to Basel II Capital Requirements, Models, and Analysis." She received her Ph.D. degree in Statistics and Applied Probability in 2006 from the University of California at Santa Barbara. She also holds an MA degree in Economics and Finance from the Warwick Business School, the University of Warwick, and an MA degree in Economics from the University of California at Santa Barbara.

Michael Gordy is a senior economist at the Federal Reserve Board. His current research focuses on credit risk pricing, and on the design, calibration and computation of models of portfolio risk. Michael is recipient of Risk's 2004 Quant of the Year and GARP's 2003 Financial Risk Manager of the Year, and serves as an associate editor of the Journal of Banking & Finance, the Journal of Credit Risk, and the International Journal of Central Banking. Michael received his Ph.D. in Economics from MIT in 1994.

Alexandre Jeanneret is currently a visiting scholar at Harvard University (KSG) as a PhD student in Finance from the University of Lausanne and the Swiss Finance Institute. His research has a primary focus on credit risk. The goal of his recent papers is to explain the dynamics of sovereign credit risk in emerging markets and to analyze the causes of default crises. His research at Harvard investigates the link between exchange rates and default risk and proposes new types of debt instrument to limit the risk of financial distress. Before starting a PhD in Finance, he has completed his graduate studies in Economics at the University of British Columbia (Vancouver, Canada) and worked as an equity analyst at MSCI Barra and the Pictet Bank (Geneva, Switzerland).

Tim Krehbiel joined the faculty of Oklahoma State University in August of 1989 and is currently Professor, Finance and Director, Master of Science in Quantitative Financial Economics Program. He previously served on the faculty of Western Illinois University. Dr. Krehbiel earned his Ph.D., M.S. (Economics, 1987) from Purdue University, West Lafayette, Indiana and B.S. (Economics 1981) from Illinois State University. In 2004 he

earned his Financial Risk Manager certification from the Global Association of Risk Professionals.

Weiping Li earned his BS from Dalian Institute of Technology in 1982, and earned his Ph.D in Mathematics from Michigan State University in 1992. After graduation, he worked at Yale, Berkeley and visited Institute for Advanced Study, Mathematical Sciences Research Institute, Isaac Newton Institute for Mathematical Sciences, The Institut des Hautes Etudes Scientifiques and the Chern Institute. He joined the faculty of Oklahoma State University in 1995, and is currently Southwestern Bell Professor and Professor of Mathematics.

Chayawat Ornthanalai is a PhD and job market candidate in finance at the Desautels Faculty of Management, McGill University. He also holds a B.Eng in mechanical engineering from McGill University. Prior to his study in finance, he worked on several research projects for Defense Canada where he studied the dynamic of blast wave from condensed explosives. His research interests lie in the area of asset pricing, derivatives, and financial econometrics. His current research agenda includes (1) developing a discrete-time asset pricing model based on time-changed Lévy processes (2) investigating the role and mechanic of risk premia that are implicit in option prices, and (3) studying the nature of jumps and crashes in the financial market. His research on component volatility model for option valuation is to appear in the Journal of Financial Economics.

Christophe Pérignon is an Associate Professor of Finance at HEC School of Management - Paris. He holds a Ph.D. in Finance from the Swiss Finance Institute. Prior to joining HEC, he was an Assistant Professor of Finance at Simon Fraser University in Vancouver, Canada and a Post-Doctoral Fellow at the University of California at Los Angeles (UCLA). His areas of research is empirical asset pricing and risk management. His research has been published in the Journal of Financial Economics, Journal of Financial and Quantitative Analysis, and Journal of Business.

Ehud I. Ronn is a Professor of Finance at the University of Texas at Austin and Director of the Center for Energy Finance Education and Research at the McCombs School of Business. Dr. Ronn obtained his B.Sc. and M.Sc. in Economics at the Technion, the Israel Institute of Technology, and his Ph.D. in Finance from Stanford University. He has published research on investments, interest rate instruments and energy derivatives in the academic and practitioner literature. He is the editor of Real Options and Energy Management: Using Options Methodology to Enhance Capital Budgeting Decisions published in 2002 by Risk Books, London. Prior to joining the University of Texas at Austin in July 1988, Dr. Ronn was a faculty member of the business schools at the University of California, Berkeley, and the University of Chicago. While on a two year (1991-1993) leave of absence from the University of Texas, Dr. Ronn served as Vice President, Trading Research Group at Merrill Lynch & Co. In Nov. 2004, Dr. Ronn was

one of fifty individuals selected by Energy Risk Magazine to the "Energy Risk Hall of Fame."

Jean-Guy Simonato is a professor of finance at HEC Montréal in Canada. His research interests include numerical methods applied to finance, option pricing in the GARCH framework, and credit risk.

Ronald Sverdlove received his A.B. in Mathematics from Princeton University. He then attended Stanford University, where he received a Ph.D. in Mathematics and an M.A. in Music. After teaching Mathematics at Southern Illinois University, the Claremont Colleges, and the University of Notre Dame, he joined RCA Laboratories (later Sarnoff Corporation) as a Member of the Technical Staff. Upon leaving Sarnoff, he studied Finance at Rutgers Business School, Newark and New Brunswick, earning the Master of Quantitative Finance, MBA, and Ph.D. in Management, specializing in Finance. He has taught Finance at Rutgers and both Finance and Management Science at Rider University. He currently holds the position of Assistant Professor of Finance at the C. W. Post Campus of Long Island University. Dr. Sverdlove has published twelve papers in Mathematics and one in Finance. His research interests are in Fixed Income Securities, Empirical and Theoretical Corporate Finance, and Credit Risk Modeling.

Monika Trapp received her undergraduate degree in Business Mathematics from the University of Trier (Germany). She completed graduate studies in Mathematics and Finance from the London School of Economics and Political Science (UK) and the University of Ulm (Germany). She is expected to finish her PhD in Business Administration at the University of Mannheim (Germany) in the fall of 2008. In the past she has served as a Visiting Researcher in the Department of Banking Supervision at Deutsche Bundesbank. Presently she is a Research Assistant to the Finance Department at the Business School of University of Mannheim (Germany).
