Digital Video Log (DVL)

On line only

This is a still photo log that can be played consecutively like a video. All state highways are available. It was not developed for the public, there is a lot of insider stuff like Z and Y mileage, which you can ignore. The video is from a driver's perspective in the right travel lane and does give a reasonable view of bike lanes and shoulders. The highways are referenced by an internal ODOT numbering system, not the common route numbers; Highway 34, for example is No. 27 in DVL parlance. The instructions contain a link to the cross reference table.

Instructions: http://egov.oregon.gov/ODOT/HWY/BIKEPED/docs/digital_video_log.pdf
