STANDARD DATA DICTIONARY**

DATA DIAGRAM

Section Overview

The diagrams contained in this section are graphic representations of the data flow in the Performance Reporting Information System. All of the data and data validation tables are represented by ellipse's. Arrows indicate the flow of data from one table to another and/or relationships between tables (i.e. the Services table is a child of the Episode table which is a child of the Subject table). Rectangular text boxes indicate the origination points of data coming into or going out of the system
