Robin Ness
Manager

August 2007

The Crash Analysis and Reporting Unit compiles data for reported motor vehicle traffic crashes occurring on city streets, county roads and state highways. The data supports various local, county and state traffic safety programs, engineering and planning projects, legislative concepts, and law enforcement services.

Legally reportable motor vehicle traffic crashes are those involving death, bodily injury, or damage to personal property in excess of \$500 (for crashes that occurred prior to 9/01/1997) or \$1,000 (for crashes that occurred between 9/01/1997 and 12/31/2003). As of 01/01/2004, drivers are required to file an Accident and Insurance Report Form with DMV within 72 hours when damage to the driver's vehicle is over \$1,500; damage to any vehicle is over \$1,500 and any vehicle is towed from the scene as a result of damage from the accident; if injury or death resulted from the accident; or if damage to any one person's property other than a vehicle involved in the accident is over \$1,500. For more information on filing requirements, please contact DMV.

The Crash Analysis and Reporting Unit is committed to providing the highest quality crash data to customers. However, because submittal of crash report forms is the responsibility of the individual driver, the Crash Analysis and Reporting Unit cannot guarantee that all qualifying crashes are represented; nor can assurances be made that all details pertaining to a single crash are accurate.

Database expansion and refinement implemented in 2002 may result in slight differences between data reported in this publication and similar information reported in prior years.

INTRODUCTION

The State Highway Motor Carrier Crash Rate Tables is a publication in four parts. Its purpose is to assist readers in computing Motor Carrier crash rates and Truck-At-Fault crash rates for specific sections of State Highways. This report differs from the State Highway Crash Rate Tables in that it contains data on Motor Carrier involved crashes only.

Part I, **Results of Analysis**, contains comparative tables as follows:

- Table I compares the crash rates for Total and Truck At-Fault crashes on the State Highway System, by functional classification and urban vs. rural jurisdictions.
- Table II compares crashes, injuries and deaths by month for the last five years.
- Table III reports Motor Carrier crash summaries and rates for all roads.
- Table IV summarizes Motor Carrier crashes vs. Truck At-Fault crashes by highway type for the last five years.
- Table V compares Motor Carrier crash rates vs. Truck At-Fault crash rates on selected highways, for the last five years.
- Table VI ranks Truck At-Fault crashes by cause.
- Table VII summarizes Hazardous Material crashes and Spill / Release incidents by class for years 2002 to 2006.
- Table VIII estimates the societal costs of Motor Carrier crashes.

Part II, **State Highway System References**, contains cross-reference tables of state highways by number, name, and route; a map of the Oregon State Highway System; and a map of the Portland area highway system.

Part III, **Motor Carrier Crash Rates by Highway**, presents the latest three-year history of crash rates by highway, for all Motor Carrier involved crashes vs. Truck-At-Fault crashes. Highways are divided into sections designated by urban boundaries and city limits. Descriptions for each highway segment include beginning milepoint, segment length, number of crashes for the current year, average annual daily truck traffic counts, and crash rates for the current year and previous two years. Summaries appear at the end of each section and at the end of each highway.

Part IV, **Appendix** presents a glossary of terms and abbreviations used in this book.

PART I

RESULTS OF ANALYSIS

TABLE I. 2006 STATE HIGHWAY MOTOR CARRIER CRASH RATE SUMMARY

Table I reports state highway system motor carrier crash rates by federally defined urban and rural areas and functional classification. Mileage and VMT are based on highway system definition and inventory data as of June 2006. For official mileage and VMT, refer to the 2006 Oregon Mileage Report and Transportation Volume Tables, available at <http://www.oregon.gov/ODOT/TD/TDATA/publications.shtml>.

JURISDICTION AND FUNCTIONAL CLASSIFICATION	MILES*	MOTOR CARRIER VMT*	TRUCK CRASHES		TRUCK AT-FAULT	
			CRASHES	RATE**	CRASHES	RATE**

Consumer Inflation Rate

1976 = 6.7%	1982 = 2.5%	1988 = 3.6%	1994 = 2.9%	2000 = 5.9%	2006 = 5.1%
1977 = 7.9%	1983 = 3.0%	1989 = 4.5%	1995 = 9.8%	2001 = 4.4%	
1978 = 10.2%	1984 = 3.7%	1990 = 5.8%	1996 = 4.0%	2002 = 1.4%	
1979 = 13.6%	1985 = 4.0%	1991 = 4.1%	1997 = 3.4%	2003 = 2.5%	
1980 = 10.6%	1986 = 4.0%	1992 = 4.4%	1998 = 1.9%	2004 = 4.8%	
1981 = 8.9%	1987 = 3.0%	1993 = 3.5%	1999 = 5.0%	2005 = 4.9%	

These costs are based upon 1975 cost estimates published by the Federal Department of Transportation and have been adjusted according to the averaged rate of inflation (Portland - CPI) reported by the Oregon Employment Department, Research Section.

PART II

STATE HIGHWAY SYSTEM

REFERENCES

This publication lists highways by State Highway Number, rather than by the more commonly known Posted Route Number. Following are cross-reference tables for facilitating identification of highways by number, name and route. Route numbers may traverse highways in their entirety or in part, and any given highway may carry more than one route. A route number in common with another for less than one mile is not shown.

REFERENCE TABLE I: HIGHWAYS BY NUMBER, NAME AND POSTED ROUTES

HIGHWAY NO.	HIGHWAY NAME	ROUTE NUMBER(S)
1	Pacific Highway	I-5, OR 99, OR 138
1E	Pacific Highway East	OR 99E
1W	Pacific Highway West	OR 10, OR 99, OR 126, OR 126Bus, OR 99W
2	Columbia River	I-84, US 30, US 395, US 730
2W	Lower Columbia River	US 30

PART III

MOTOR CARRIER CRASH RATES

BY HIGHWAY

C O M M E N T S

CRASH RATE FORMULA

The crash rate represents the number of crashes per million vehicle miles traveled (VMT). VMT is calculated by multiplying the highway segment length, average annual daily traffic, and the number of days the segment was open for travel. The rate is computed using the following criteria, where:

- **NUMBER OF CRASHES** = the number of crashes that occurred on the given length of section during the current data year;
- **SEGMENT LENGTH** = the roadway length in miles, to the nearest one-hundredth;
- **AADT** = the average annual daily traffic for the length of section; and
- **NUMBER OF DAYS** = the number of days during the year that the roadway was open for travel.

The formula may be depicted one of two ways:

$$\text{CRASH RATE} = \frac{(\text{NUMBER OF CRASHES}) * 1,000,000}{(\text{LENGTH OF SECTION}) * (\text{ADT}) * (\text{NUMBER OF DAYS})}$$

or

$$\text{CRASH RATE} = \frac{(\text{NUMBER OF CRASHES}) * 1,000,000}{(\text{VMT})}$$

RATES for HIGHWAYS CONTAINING COUPLETS

Some highways contain couplets. A couplet is defined as the two roadways of a divided highway, usually named differently, bearing the same highway number, running approximately parallel to each other, providing for traffic flow in opposite directions, and separated by accessible land. The couplet roadway that bears traffic in the direction of increasing milepoints is considered to be on the **add mileage** side of the highway, and the couplet roadway that bears traffic in the opposite direction is on the **non-add mileage** side of highway. In this publication, the letters "CP" next to a mileage length denotes the non-add mileage side of a couplet. Rates for the individual roadways of a couplet are calculated according to the Crash Rate formula above.

Non-add couplet mileage is used in calculating the weighted average ADT for highway section groupings represented in this publication. However, non-add couplet mileage **is not** included when calculating total miles for the section. Total section mileage represents add mileage only.

SEGMENT CRASH COUNTS

Crashes are attributed to highway segments based on the beginning ("start") milepoint of the segment. Crashes that occur at a segment's end milepoint are attributed to the following segment, which begins with the same milepoint. The exceptions to this rule are segments that end the non-add side of a couplet or Z mileage, and segments that end state jurisdiction, including the final end segment of each highway.

A blank in the 'Crash' column indicates no crashes were recorded for the segment during the current data year. Crashes that occurred at indeterminate ("unknown") milepoints within an urban or rural area are included in the summary for each highway.

EQUATIONS and OVERLAPPING ('Z') MILEAGE

Milepoint equations exist in areas where a highway was shortened due to realignment, somewhere other than at the beginning or ending milepoint. Section lengths displaying a lower number in the Miles column than is calculated by subtracting the begin milepoint from the end milepoint, are indicative of the existence of at least one milepoint equation in that milepoint range, or some combination of equations and 'Z' mileage. See Highway 33, milepoint range 23.18 to 34.32.

Overlapping mileage, also known as 'Z' mileage, is created when a highway is lengthened due to realignment, somewhere other than at the beginning or ending milepoint. Section lengths displaying a higher number in the Miles column than is calculated by subtracting the begin milepoint from the end milepoint, are indicative of the existence of 'Z' mileage in that milepoint range, or some combination of equations and 'Z' mileage. See Highway 33, milepoint range 39.39 to 44.57.

JURISDICTIONAL CATEGORIES

Section breaks occur at urban transportation boundaries, and when entering or exiting city limits. This results in the following four jurisdictional categories:

- **URBAN CITY:** segment falls on or inside urban transportation boundary, and at or inside city limits.
- **SUBURBAN AREA:** segment falls on or inside urban boundary, but outside city limits.
- **RURAL CITY:** segment falls outside urban boundary, but inside city limits.
- **RURAL AREA:** segment falls outside urban boundary and outside city limits.

Data for these areas are summarized for each highway, as are crashes that occurred at indeterminate ("unknown") milepoints within an urban or rural area.

PART IV

APPENDIX

G L O S S A R Y

Many entries below are reproduced from the list of terms defined by the Highway Inventory Database Representatives and approved by the Oregon Transportation Management System Steering Committee.

A

Add-Mileage

All roadways that are not Non-Add mileage. The term "add-mileage" generally applies when milepoints have increasing values in the direction of travel. The term originated from the fact that the direction of increasing milepoints is used for mileage summarization, whereas separate roadways mileposted in the opposite direction are not counted in totals. The Pacific Highway 1, Interstate 5, is the only exception in that the add-mileage is accumulated in the direction of decreasing milepoints.

ADT or AADT

Annual average daily traffic

Alignment

The horizontal and vertical control of a section of roadway or other transportation facility (e.g. multi-use paths, railway, etc.).

At Grade

Used to represent that a feature and a roadway meet at the same elevation.

B

Beginning Milepoint

The milepoint notation, to the nearest 0.01 mile, that describes the location of the beginning of a linear feature or attribute.

C

CMV

Commercial motor vehicle

Common Alignment

Any length of roadway upon which more than one state highway is designated.

G L O S S A R Y

Connection

A street or road, open to vehicular travel, which joins a road from the State of Oregon Highway System to any other road, entity, or another state owned road. A connection is usually much shorter than a spur or frontage road.

Couplet

The two roadways of a divided highway, named differently, approximately parallel with traffic flow in opposite directions and separated by accessible land uses. In I.T.I.S., all couplets are divided highways.

CP

Non-add mileage side of couplet.

Crash

Any motor vehicle collision or non-collision event that results in a fatality, bodily injury, or damage to a person's property. Crashes that are considered "reportable" for the purposes of ODOT's Statewide Crash Data System must meet the criteria described on the initial page of this publication.

E

EBD

Eastbound direction of travel

ECL

East city limits

Ending Milepoint

The milepoint notation, to the nearest 0.01 mile, that describes the location of the end of a linear feature or attribute.

F

FHWA

Federal Highway Administration

Freeway

State highway that meets federal freeway standards.

G L O S S A R Y

Frontage Road

A road secondary to and generally parallel to a highway, providing service to abutting property and adjacent areas and for control of access. A frontage road may or may note be directly connected to the highway it services.

Functional Classification

The federal system by which roads are grouped into functional systems according to the type of service and amount of traffic the facility carries. This system determines the level of federal funding available for maintenance and improvements. Federal functional classification is determined using federal guidelines and is approved by FHWA.

H

Highway

Every public way, road, street, thoroughfare and place, including bridges, viaducts and other structures within the boundaries of this state, open, used or intended for use of the general public for vehicles or vehicular traffic as a matter of right. Some highways are designated by the Oregon Transportation Commission as State Highways – see the definition of State Highway for more information.

Highway Number

See State Highway Index Number.

Hwy

Highway

I

INT

Interchange

Interchange

A system of interconnecting roadways and structures in conjuction with one or more grade separations that provides for the movement of traffic between two or more roadways on different levels.

Intersection

The area where two or more roadways join or cross at the same elevation.

G L O S S A R Y

Interstate Route

A route system that consists of all presently designated freeway routes meeting the Interstate geometric and construction standards for future traffic, except for portions in Alaska and Puerto Rico. The interstate System is the highest classification of arterial roads and streets, and provides the highest level of mobility, at the highest speed, for a long uninterrupted distance. This system is intended for through traffic, has full access control, and has grade separations at major intersections. Interstate Routes are signed routes. All Interstate Routes are state highways.

I.T.I.S.

Integrated Transportation Information System database. ITIS contains descriptive information about Oregon's transportation infrastructure, and is the official source of milepoint information

J

JCT

Junction

Junction

The intersection of two or more state highway roadways.

Jurisdiction

The governmental "entity" that owns the road. A road is said to have federal, state, county, city, private or other jurisdiction.

L

Lane

A portion of roadway, usually indicated by pavement markings, designated for travel by one line of vehicles.

Located Line

A surveyed alignment where a road is planned. The location where highway construction plans have been developed, and the geographic location surveyed for construction, but no paved surface yet exists.

G L O S S A R Y

M

Mainline

Refers to all roadways for a highway, excluding connections and frontage roads.

Milepoint

A given measurement between highway mileposts.

Milepoint Equation

A statement that specifies two different milepoints that exist at a single point on the same roadway. This is a method of accounting for changes in a linear measurement system without re-milepointing the entire roadway. The changes in milepoints are usually the results of new construction.

Municipal

Of or pertaining to the area within the city limits of an incorporated city.

N

NBD

Northbound direction of travel

NCL

North city limits

Non-Add mileage

Roadways with one direction of travel and milepoints that decrease in the direction of travel. The Pacific Highway 1, Interstate 5, is the only exception in that the non-add mileage is accumulated in the direction of increasing milepoints.

Non-Freeway

State highway that does not meet federal freeway standards.

Non-System

Roadway that is not administered by ODOT and not part of the State Highway System.

O

O-Pass

Overpass

GLOSSARY

OR / ORE

Abbreviation for Oregon Route. A route system established by the Oregon Transportation Commission (OTC) in 1932 to facilitate travel on main highways over the shortest distance and the best roads throughout the state. The OTC currently regulates this route system. OR routes are signed routes. Not all OR Routes are state highways. Not all state highways have an OR route number.

Overlapping Mileage

See Z Mileage

O-Xing

Over-crossing

P

Primary

Refers to a state highway that is assigned a Highway Number lower than 100.

R

Roadbed

Completed excavations and embankments for the subgrade, including ditches, side slopes, and slope rounding, if any.

Roadway

I.T.I.S. defines "roadway" as the portion of the highway, including shoulders, intended for vehicular use. The ODOT CAR Unit codes traffic crashes according to the ANSI D16-1.1996 definition, 2.2.28, which distinguishes shoulder areas from roadways, in classifying motor vehicle traffic crash locations.

Route

A designated path through a road network.

Rural Area

Generally, the geographic area that exists outside an urban transportation boundary. For the purposes of this publication, "Rural Area" is a sub-category representing an area that exists outside an urban transportation boundary *and* outside the limits of an incorporated city.

G L O S S A R Y

Rural City

For the purposes of this publication, "Rural City" is a sub-category representing an area that exists outside an urban transportation boundary but at or inside the limits of an incorporated city.

R/W

Right of way

S

SBD

Southbound direction of travel

SCL

South city limits

Secondary

Refers to a state highway having a highway number higher than 99.

Segment

A length of highway between a given set of milepoints.

Signed Route

Any designated route which is signed (e.g. US, OR / ORE, Interstate, scenic byway, historic route, etc.).

Spur

Any State Highway designated as such by the Oregon Transportation Commission, most often prevalently a branch or extension of an existing State Highway.

State Highway

A land-based public way designated by the Oregon Transportation Commission as a highway for the purpose of vehicular travel. The State of Oregon commonly has, but may not have all, right, title, interest, jurisdiction, maintenance and control of the entire area within the highway right-of-way.

State Highway Index Number

An Oregon Transportation Commission approved identifier assigned to a highway. The valid range of identifiers is from 1 to 499. This number is used internally within ODOT, and should not be confused with the Route Number posted along the highway. Reference Tables 1 and 2 of this publication cross-reference the highway index number with their posted route numbers.

G L O S S A R Y

Suburban Area

For the purposes of this publication, "Suburban Area" is a sub-category representing an area that exists *inside* an urban transportation boundary but *outside* the limits of an incorporated city.

System

A shortened term indicating that the subject roadway is a State Highway, under ODOT jurisdiction

T

Temporary Mileage

Milepoints assigned to a temporary traveled route.

Temporary Traveled Route

Roads that are meant to temporarily function as state highways until a replacement state highway alignment is built or dedicated. These roads do not belong to ODOT, but ODOT has legally agreed to maintain them. TTR's can occur because of a detour or highway construction.

Truck Crash

Motor vehicle traffic crash involving at least one commercial motor vehicle.

Truck At-Fault Crash

Motor vehicle traffic crash caused by a commercial motor vehicle driver, or by a commercial motor vehicle mechanical defect.

U

Urban Area

Generally, the whole geographic area that exists at or within an urban transportation boundary. For the purposes of this publication, Suburban Areas and Urban Cities exist within an Urban Area.

Urban City

For the purposes of this publication, "Urban City" is a sub-category representing an area that exists at or inside the limits of an incorporated city and within an urban transportation boundary.

G L O S S A R Y

US Route

A route system established by Congress in 1926 to facilitate travel on main highways over the shortest distance and best roads nationwide. AASHTO currently regulates this route system. US Routes are signed routes. Not all US Routes are state highways. Not all state highways have a US Route Number.

U-Xing

Under-crossing.

W

WBD

Westbound direction of travel.

WCL

West city limits

Z

Z Mileage

Milepoints assigned to a roadway when the roadway has been lengthened due to realignment.
