U.S. Department of Labor

February 28, 2007

Characteristics of Minimum Wage Workers: 2006

According to Current Population Survey estimates for 2006, 76.5 million American workers were paid at hourly rates, representing 59.7 percent of all wage and salary workers.¹ Of those paid by the hour, 409,000 were reported as earning exactly \$5.15, the prevailing Federal minimum wage. Another 1.3 million were reported as earning wages below the minimum.² Together, these 1.7 million workers with wages at or below the minimum made up 2.2 percent of all hourly-paid workers. Tables 1-10 present data on a wide array of demographic and socioeconomic characteristics for hourly-paid workers earning at or below the Federal minimum wage. The following are some highlights from the 2006 data.

-- Minimum wage workers tend to be young. About half of workers earning \$5.15 or less were under age 25, and about one-fourth of workers earning at or below the minimum wage were age 16-19. Among employed teenagers, about 8 percent earned \$5.15 or less. About 1 percent of workers age 25 and over earned the minimum wage or less. Among those age 65 and over, the proportion was about 2 percent. (See table 1 and table 7.)

-- About 3 percent of women paid hourly rates reported wages at or below the prevailing Federal minimum, compared with under 2 percent of men. (See table 1.)

-- About 2 percent of white, black, and Hispanic hourly-paid workers earned \$5.15 or less. Among Asian hourly-paid workers, about 1 percent earned the Federal minimum wage or less. For whites, women were twice as likely as men to earn \$5.15 or less. (See table 1.)

-- Never-married workers, who tend to be young, were more likely to earn the minimum wage or less than married workers. (See table 8.)

-- Among hourly-paid workers age 16 and over, nearly 4 percent of those who had less than a high school diploma earned the minimum wage or less, compared to 2 percent of those who had a high school diploma (with no college), and 1 percent of college graduates. (See table 6.)

-- Part-time workers (persons who usually work less than 35 hours per week) were more likely than their full-time counterparts to be paid \$5.15 or less (about 6 percent versus 1 percent). (See table 1 and table 9.)

-- By major occupational group, the highest proportion of workers earning at or below the Federal minimum wage was in service occupations, at about 7 percent. Nearly three in four workers earning \$5.15 or less in 2006 were employed in service occupations, mostly in food preparation and service jobs. Fewer than 1 percent of hourly-paid workers in management, professional, and related occupations and in natural resources, construction, and maintenance occupations earned at or below the prevailing Federal minimum wage. (See table 4.)

-- The industry with the highest proportion of workers with reported hourly wages at or below \$5.15 was leisure and hospitality (about 13 percent). About three-fifths of all workers paid at or below the Federal minimum wage were employed in this industry, primarily in the food services and drinking places component. For many of these workers, tips and commissions supplement the hourly wages received. (See table 5.)

-- Among the states, Alabama, Arkansas, and Oklahoma had the highest proportion of hourly-paid workers earning at or below \$5.15 (nearly 4 percent). California and Minnesota had the lowest proportion earning the minimum wage or less (less than 1 percent). It should be noted that some states have minimum wage laws establishing minimum wage standards that exceed the Federal level of \$5.15 per hour. (See table 2 and table 3.)

-- The proportion of hourly-paid workers earning the prevailing Federal minimum wage or less has trended downward since 1979, when data first began to be collected on a regular basis. (See table 10.)

Source: U.S. Department of Labor, Bureau of Labor Statistics. Bureau of Labor Statistics' data on minimum wage earners are derived from the Current Population Survey (CPS), a nationwide sample survey of households that includes questions enabling the identification of hourly-paid workers and their hourly wage rate. Data in this summary are 2006 annual averages.

¹ Data are for wage and salary workers, excluding the unincorporated and incorporated self-employed, and refer to earnings on a person's sole or principal job.

² It should be noted that the presence of a sizable number of workers with reported wages below the minimum does not necessarily indicate violations of the Fair Labor Standards Act, as there are exemptions to the minimum wage provisions of the law. Indeed, the relatively large number of workers with reported wages below the minimum in 2006 includes about 250,000 hourly-paid workers reported as earning exactly \$5.00 per hour; to some extent, this *may* reflect rounding in the responses of survey participants. The estimates of the numbers of minimum and subminimum wage workers presented in the accompanying tables pertain to workers *paid at hourly rates*; salaried and other non-hourly workers are excluded. As such, the actual number of workers with earnings at or below the prevailing minimum is undoubtedly understated. Research has shown that a relatively smaller number and share of salaried workers and others *not* paid by the hour have earnings that, when translated into hourly rates, are at or below the minimum wage. However, BLS does not routinely estimate hourly earnings for non-hourly workers because of data concerns that arise in producing these estimates. For further information, see Steven Haugen and Earl Mellor, "Estimating the number of minimum wage workers," *Monthly Labor Review*, January 1990.

Table 1. Employed wage and salary workers paid hourly rates with earnings at or below the prevailing Federal minimum wage by selected characteristics, 2006 annual averages

¹ Detail for the race groups (white, black or African American, and Asian) will not sum to totals because data are not presented for all races. In addition, persons whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as race.

² The distinction between full- and part-time workers is based on hours usually worked. These data will not sum to totals because full- or part-time status on the principal job is not identifiable for a small number of multiple jobholders.

NOTE: Data exclude all the self-employed, both unincorporated and incorporated.

Table 2. Employed wage and salary workers paid hourly rates with earnings at or below the prevailing Federal minimum wage by census region and division, 2006 annual averages

Region and division	Number of workers (in thousands)				Percent distribution				Percent of workers paid hourly rates		
	Total paid hourly rates	At or below \$5.15 per hour			Total paid hourly rates	At or below \$5.15 per hour			At or below \$5.15 per hour

NOTE: Data exclude all the self-employed, both unincorporated and incorporated.

The four major regions and nine census divisions of the United States are as follows:

Northeast:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont

Middle Atlantic: New Jersey, New York, and Pennsylvania

Midwest:

East North Central: Illinois, Indiana, Michigan, Ohio, and Wisconsin

West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota

South:

South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia

East South Central: Alabama, Kentucky, Mississippi, and Tennessee

West South Central: Arkansas, Louisiana, Oklahoma, and Texas

West:

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming

Pacific: Alaska, California, Hawaii, Oregon, and Washington

Table 3. Employed wage and salary workers paid hourly rates with earnings at or below the prevailing Federal minimum wage by State, 2006 annual averages

State	Number of workers (in thousands)				Percent distribution				Percent of workers paid hourly rates

NOTE: Data exclude all the self-employed, both unincorporated and incorporated. Users are reminded that these data are based on a sample and are therefore subject to sampling error; the degree of error may be quite large for less populous States. It is not possible to clearly determine whether workers surveyed in the CPS are actually covered by the Fair Labor Standards Act (FLSA) or by individual State minimum wage laws. Thus some workers reported as earning an hourly wage of \$5.15 may not in fact be covered by Federal or State minimum wage laws. Also, there are a number of States that have minimum wages that exceed the Federal minimum wage. At the same time, the presence of a sizable number of workers with wages below the prevailing Federal minimum wage does not necessarily indicate violations of the FLSA or applicable State laws, because there are numerous exclusions and exemptions to these minimum wage statutes. Dash indicates no data or data that do not meet publication criteria.

Table 4. Employed wage and salary workers paid hourly rates with earnings at or below the prevailing Federal minimum wage by major occupation group, 2006 annual averages

Occupation	Number of workers (in thousands)				Percent distribution				Percent of workers paid hourly rates

¹ The comparability of historical labor force data has been affected at various times by methodological and conceptual changes in the Current Population Survey (CPS). For an explanation, see the Explanatory Notes and Estimates of Error section of the February 2007 and subsequent issues of *Employment and Earnings*, a monthly BLS periodical.

² Data for 1990-91 and 1996-97 reflect changes in the minimum wage that took place in those years.

NOTE: The prevailing Federal minimum wage was \$2.90 in 1979, \$3.10 in 1980, and \$3.35 in 1981-89. The minimum wage rose to \$3.80 in April 1990, to \$4.25 in April 1991, to \$4.75 in October 1996, and to \$5.15 in September 1997. Data exclude all the self-employed, both unincorporated and incorporated. The presence of a sizable number of

workers with reported wages below the minimum does not necessarily indicate violations of the Fair Labor Standards Act, as there are numerous exemptions to the minimum wage provisions of the law. Indeed, the relatively large number of workers with reported wages below the minimum in 1998-2005 includes some hourly paid workers reported as earning exactly \$5.00 per hour (about 1.4 million in 1998, about 900,000 in 1999, about 600,000 in 2000, about 500,000 in 2001 and in 2002, about 350,000 in 2003 and in 2004, 300,000 in 2005, and about 250,000 in 2006); to some extent, this may reflect rounding on the part of survey respondents.
