Increased local purchasing	—	yes

Aloha Plastic Recycling, Inc., started business in 1993 on the Island of Maui. It is committed to increasing the diversion of plastics from the State's landfills and to continuing efforts to educate residents about the value of recycling.

Aloha Plastic Recycling, Inc., sorts and processes recycled plastic received from various sources throughout the state. They accept all clean, usable plastics collected throughout Maui County, as well as specific plastic types shipped from Oahu, Kauai, and the Big Island.

In fiscal 1997, *Aloha Plastic Recycling* recovered approximately 2% of the 10,000 tons of plastic

waste generated in the County of Maui (0.2% of total annual plastic waste statewide). Of the 225 tons of plastic recovered, about half was converted into marine timbers, picnic tables, park benches, car stops, and dimensional lumber for fencing, decking, and landscape applications. Their payroll during this period exceeded \$160,000 for non-officers.

Aloha Plastic Recycling, Inc., helps reduce landfill use and manufactures value-added products from waste materials. Their products displace imports and circulate Hawaii's dollars back into the local economy. Demand for *Aloha Plastic Recycling, Inc.*, products creates jobs in the manufacturing sector and has a beneficial effect on the future of Hawaii.

Intech, Inc., began in 1989 and incorporated in 1990. Intech is committed to recycling through their shredding services and Hawaiian manufactured products from post-consumer waste paper.

Intech produces Oil Change Boxes for disposal of waste motor oil using finely milled recycled paper as the absorbent. Oil Change Boxes are sold through local distributors.

Intech also operates a secure shredding service. Their products are made from shredded office paper, old newspaper, and cardboard. In 1996, *Intech* recycled more than 540 tons of old records, using 60 tons of waste paper to manufacture their products. The grant received from CHC was used in part to expand their utilization of waste paper to over 1,300 tons annually.

Hawaiian Earth Products, Ltd., is committed to educating and informing individuals and communities about the do's and don'ts of green waste recycling and composting. Started in 1992, they produce high-quality soil conditioners, composts, and soil blends to replace the use of chemical fertilizers in Hawaiian soils.

Hawaiian Earth Products, Ltd., collects 1,500 to 2,000 tons of green waste every month (about 21,000 tons a year) that formerly went to landfills. This material is composted, mixed, and bagged to produce products marketed under the name Menehune Magic through local garden shops.
