

## Hawaii

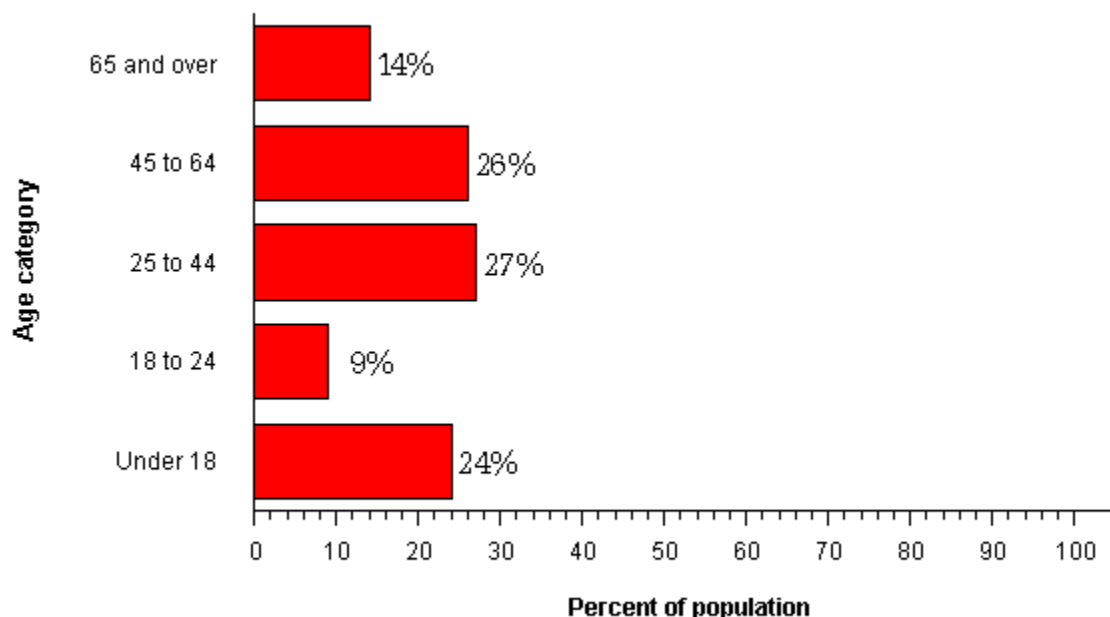

### Population and Housing Narrative Profile: 2004

Data Set: **2004 American Community Survey**

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

POPULATION OF Hawaii: In 2004, Hawaii had a household population of 1.2 million - 620,000 (51 percent) females and 607,000 (49 percent) males. The median age was 38 years. Twenty-four percent of the population were under 18 years and 14 percent were 65 years and older.

**The Age Distribution of People in Hawaii in 2004**

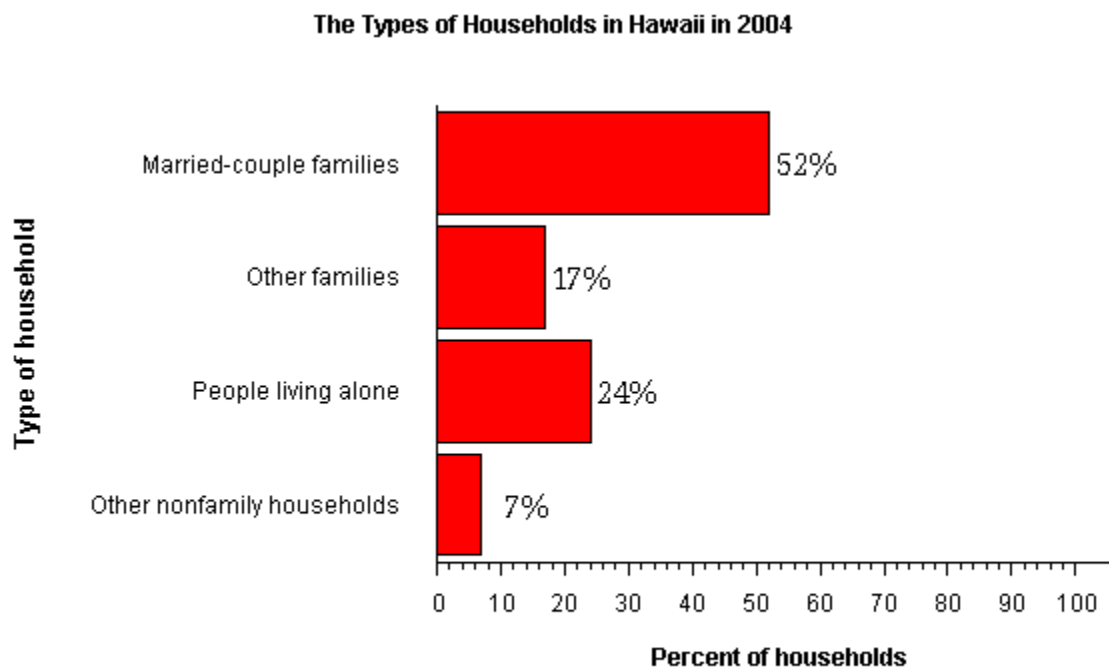

Source: American Community Survey, 2004

For people reporting one race alone, 32 percent were White; 2 percent were Black or African American; less than 0.5 percent were American Indian and Alaska Native; 54 percent were Asian; 11 percent were Native Hawaiian and Other Pacific Islander, and 1 percent were Some other race. Twenty-one percent reported Two or more races. Eight percent of the people in Hawaii were Hispanic. Twenty-three percent of the people in Hawaii were White non-Hispanic. People of Hispanic origin may be of any race.

More information on the age, race, and sex of the US population is available from American Community Survey [Ranking Tables](#).

**HOUSEHOLDS AND FAMILIES:** In 2004 there were 428,000 households in Hawaii. The average household size was 2.9 people.

Families made up 69 percent of the households in Hawaii. This figure includes both married-couple families (52 percent) and other families (17 percent). Nonfamily households made up 31 percent of all households in Hawaii. Most of the nonfamily households were people living alone, but some were comprised of people living in households in which no one was related to the householder.

**DISABILITY:** In Hawaii, among people at least five years old in 2004, 13 percent reported a disability. The likelihood of having a disability varied by age - from 5 percent of people 5 to 20 years old, to 10 percent of people 21 to 64 years old, and to 36 percent of those 65 and older.

More information on the education and disability of the US population is available from American Community Survey [Ranking Tables](#).

**INDUSTRIES:** In 2004, for the employed population 16 years and older, the leading industries in Hawaii were Educational, health, and social services, 19 percent, and Other services (except public administration), 16 percent.

**Employment by Industry in Hawaii in 2004**

**Percent of employed population 16 years and over**

Source: American Community Survey, 2004

Note: The Professional and business services category includes the following industries: Professional, scientific, management, administrative, and waste management services. The Leisure and hospitality category includes the following industries: Arts, entertainment, recreation, accommodation, and food services

**OCCUPATIONS AND TYPE OF EMPLOYER:** Among the most common occupations were: Management, professional, and related occupations, 33 percent; Sales and office occupations, 28 percent; Service occupations, 21 percent; Construction, extraction, and maintenance occupations, 9 percent; and Production, transportation, and material moving occupations, 8 percent. Sixty-three percent of the people employed were Private wage and salary workers; 21 percent were Federal, state, or local government workers; and 9 percent were Self-employed.

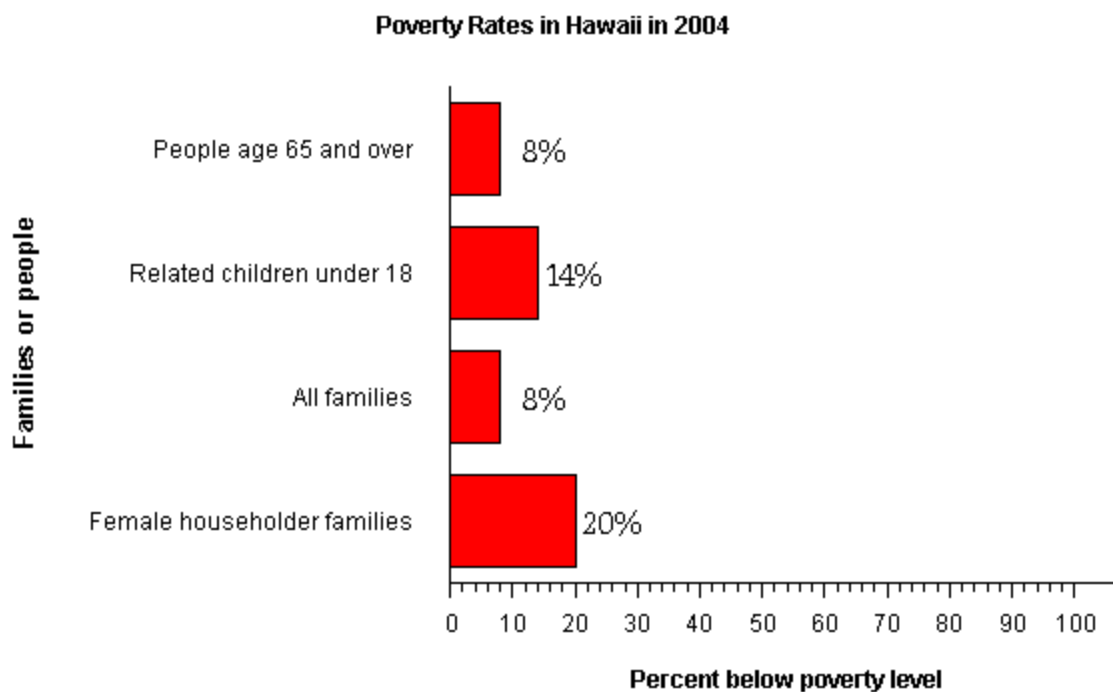

More information on the industries, occupations, and type of employers of the US population is available from American Community Survey [Ranking Tables](#).

**TRAVEL TO WORK:** Sixty-eight percent of Hawaii workers drove to work alone in 2004, 16 percent carpooled, 6 percent took public transportation, and 6 percent used other means. The remaining 4 percent worked at home. Among those who commuted to work, it took them on average 25.8 minutes to get to work.

**INCOME:** The median income of households in Hawaii was \$53,554. Eighty-one percent of the households received earnings and 23 percent received retirement income other than Social Security. Thirty-one percent of the households received Social Security. The average income from Social Security was \$13,606. These income sources are not mutually exclusive; that is, some households received income from more than one source.

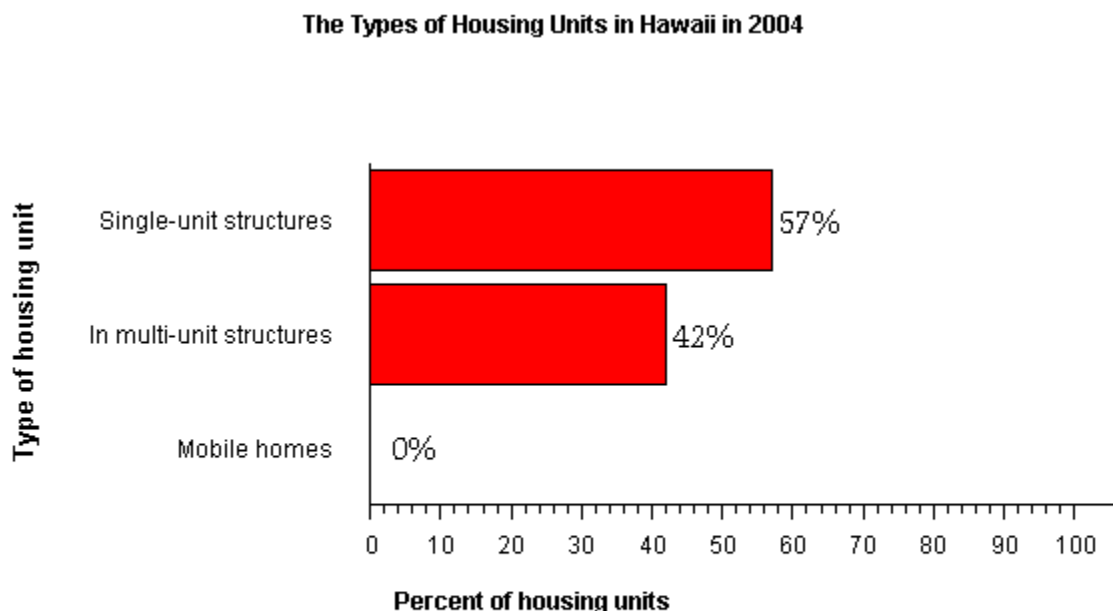

More information on the travel to work and income of the US population is available from American Community Survey [Ranking Tables](#).

**POVERTY AND PARTICIPATION IN GOVERNMENT PROGRAMS:** In 2004, 11 percent of people were in poverty. Fourteen percent of related children under 18 were below the poverty level, compared with 8 percent of people 65 years old and over. Eight percent of all families and 20 percent of families with a female householder and no husband present had incomes below the poverty level.

Source: American Community Survey, 2004

**HOUSING CHARACTERISTICS:** In 2004, Hawaii had a total of 483,000 housing units, 11 percent of which were vacant. Of the total housing units, 57 percent were in single-unit structures, 42 percent were in multi-unit structures, and less than 0.5 percent were mobile homes. Twenty percent of the housing units were built since 1990.

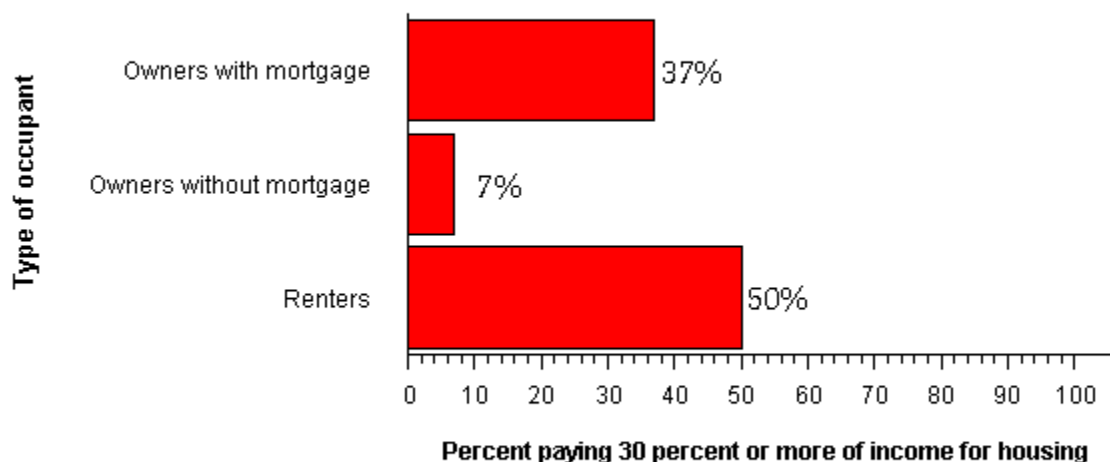

Source: American Community Survey, 2004

**OCCUPIED HOUSING UNIT CHARACTERISTICS:** In 2004, Hawaii had 428,000 occupied

housing units - 252,000 (59 percent) owner occupied and 176,000 (41 percent) renter occupied. Five percent of the households did not have telephone service and 10 percent of the households did not have access to a car, truck, or van for private use. Multi Vehicle households were not rare. Thirty-five percent had two vehicles and another 20 percent had three or more.

**HOUSING COSTS:** The median monthly housing costs for mortgaged owners was \$1,648, nonmortgaged owners \$298, and renters \$871. Thirty-seven percent of owners with mortgages, 7 percent of owners without mortgages, and 50 percent of renters in Hawaii spent 30 percent or more of household income on housing.
