

S1902: Mean Income in the Past 12 Months
 Data Set: 2006 American Community Survey
 Survey: 2006 American Community Survey
 Geographic Area: Hawaii

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Subject	Total	Margin of Error	Mean income (dollars)	Margin of Error
HOUSEHOLD INCOME				
All households	432,632	+/-4,384	77,805	+/-1,528
With earnings	82.1%	+/-0.7	75,651	+/-1,561
With interest, dividends, or net rental income	31.8%	+/-0.9	14,648	+/-1,645
With Social Security income	29.7%	+/-0.7	14,575	+/-275
With Supplemental Security Income (SSI)	3.6%	+/-0.4	7,353	+/-532
With cash public assistance income	3.5%	+/-0.5	4,032	+/-438
With retirement income	22.2%	+/-0.8	22,311	+/-845
FAMILY INCOME BY NUMBER OF WORKERS IN FAMILY				
All families	301,102	+/-5,471	87,638	+/-1,956
No workers	12.3%	+/-0.8	46,619	+/-3,460
1 worker	26.9%	+/-1.2	62,544	+/-3,561
2 workers, husband and wife worked	32.5%	+/-1.2	103,308	+/-3,337
2 workers, other	11.5%	+/-0.9	81,941	+/-4,560
3 or more workers, husband and wife worked	11.0%	+/-0.7	136,768	+/-10,103
3 or more workers, other	5.8%	+/-0.6	120,957	+/-6,066

Subject	Total	Margin of Error	Mean income (dollars)	Margin of Error
PER CAPITA INCOME BY RACE AND HISPANIC OR LATINO ORIGIN				
Total population	1,285,498	*****	27,251	+/-507
One race--				
White	26.3%	+/-0.2	36,963	+/-1,258
Black or African American	2.2%	+/-0.2	27,832	+/-2,859
American Indian and Alaska Native	0.3%	+/-0.1	31,971	+/-12,450
Asian	39.9%	+/-0.8	27,940	+/-781
Native Hawaiian and Other Pacific Islander	8.7%	+/-0.3	19,049	+/-1,300
Some other race	1.1%	+/-0.2	29,343	+/-8,855
Two or more races	21.5%	+/-0.9	17,193	+/-963
Hispanic or Latino origin (of any race)	7.8%	*****	18,216	+/-1,930
White alone, not Hispanic or Latino	24.6%	+/-0.1	37,888	+/-1,299
PERCENT IMPUTED				
Household income in the past 12 months	28.5%	(X)	(X)	(X)
Family income in the past 12 months	29.6%	(X)	(X)	(X)
Individual income in the past 12 months	21.9%	(X)	(X)	(X)

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
