1 worker	10,094	+/-1,598	1,104	+/-491	6,312	+/-1,186	1,702	+/-710
2 workers	8,391	+/-1,392	2,109	+/-790	5,022	+/-1,032	935	+/-553
3 or more workers	3,299	+/-998	256	+/-198	2,624	+/-878	241	+/-333
Female householder, no husband present:	42,916	+/-2,891	5,958	+/-1,290	29,824	+/-2,386	4,374	+/-904
No workers	3,465	+/-877	340	+/-237	2,726	+/-758	345	+/-233
1 worker	19,234	+/-2,192	2,270	+/-702	13,787	+/-1,936	1,651	+/-688
2 workers	13,325	+/-1,778	2,040	+/-691	8,912	+/-1,415	1,348	+/-561
3 or more workers	6,892	+/-1,196	1,308	+/-628	4,399	+/-912	1,030	+/-481

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An "\*\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
