Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Rebuilding Plan for Red Grouper in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of a Secretarial amendment; request for comments.

SUMMARY: NMFS, acting through the Gulf of Mexico Fishery Management Council (Council), has prepared Secretarial Amendment 1 to the Reef Fish Fishery Management Plan (Secretarial Amendment 1) that would establish a 10-year stock rebuilding plan for red grouper in the Gulf of Mexico. Secretarial Amendment 1 would also establish biological reference points and stock status determination criteria for red grouper consistent with the requirements of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). In addition, Secretarial Amendment 1 would establish measures designed to protect other shallow-water grouper, deep-water grouper, and tilefishes from any potential shifts in

fishing mortality that might occur as a result of the red grouper rebuilding plan. The intended effect of Secretarial Amendment 1 is to end overfishing and rebuild the red grouper resource consistent with the requirements of the Magnuson-Stevens Act.

DATES: Comments must be received no later than 4:30 p.m., eastern time, on March 8, 2004.

ADDRESSES: Written comments on Secretarial Amendment 1 must be sent to Phil Steele, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702. Comments may also be sent via fax to 727-570-5583. Comments will not be accepted if submitted via e-mail or Internet.

Copies of Secretarial Amendment 1, which includes an environmental assessment, an initial regulatory flexibility analysis, and a regulatory impact review are available from NMFS at the address above.

FOR FURTHER INFORMATION CONTACT: Phil Steele, telephone: 727-570-5305, fax: 727-570-5583, e-mail: Phil.Steele@noaa.gov.

SUPPLEMENTARY INFORMATION: The reef fish fishery in the exclusive economic zone of the Gulf of Mexico is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Council and is implemented under the authority of the Magnuson-Stevens Act by regulations at 50 CFR part 622.

Background

In October 2000, NMFS declared that the Gulf stock of red grouper had been overfished and was undergoing overfishing. This determination was based on the results of a 1999 red grouper stock assessment and subsequent analysis by the NMFS Southeast Fisheries Science Center and the Council's Reef Fish Stock Assessment Panel. Subsequently, a 2002 stock assessment found that, although overfishing is still occurring, the stock is in an improved condition and is no longer overfished. However, the stock has not yet reached the biomass level that is capable of producing MSY on a continuing basis (B_{MSY}). Therefore, measures to end overfishing and a rebuilding plan to restore the stock to the B_{MSY} level in 10 years or less are still necessary.

Provisions of Secretarial Amendment 1

Secretarial Amendment 1 proposes to establish a 10-year red grouper rebuilding plan, structured in 3-year intervals, that would end overfishing
