Needs and Uses: The National Environmental Policy Act of 1969 (NEPA) required Federal agencies to evaluate the effects of their actions on "human environmental quality." To comply with NEPA, the Commission adopted rules, 47 CFR 1.1307, which revised the Radio Frequency (RF) exposure guidelines for FCC-regulated facilities. The new guidelines reflect more recent scientific studies of RF electromagnetic fields and their biological effects and are designed to ensure that the public and workers receive adequate protection from exposure to potentially harmful RF electromagnetic fields. The FCC staff uses the information required under section 1.1307 to determine whether the environmental evaluation is sufficiently complete and in compliance with the FCC Rules to be acceptable for filing.

Federal Communications Commission.
