

thus extend the 24-month interval between the last and next filing to be 30 months. Since the licensee last submitted an update on April 25, 2003, this proposed one-time, 6-month extension would permit the next update to be as late as October 25, 2005. The requirement to reflect changes up to 6 months prior to the date of filing is unaffected by this exemption, and would still apply.

The licensee also requested a permanent schedular exemption to allow filing of all future UFSAR updates up to 12 months, instead of 6 months, after completion of a refueling outage. Thus, accordingly to the licensee's current refueling schedule, this would permit the licensee to file future updates in the fall of odd-numbered years.

3.0 Discussion

In its March 26, 2004, application, the licensee stated that following the schedular requirements of 10 CFR 50.72(e)(4) literally means that the licensee has to file both OCNCS and Peach Bottom Atomic Power Station (PBAPS, owned by the licensee's parent company, Exelon) UFSAR updates in the same time frame (*i.e.*, spring) of odd-numbered years. Such filing schedule for both OCNCS and PBAPS constitutes a hardship for the licensee and its parent company Exelon; additional temporary resources would have to be employed in order to simultaneously prepare both OCNCS and PBAPS updates. Such additional resource expenditure does not contribute to increased nuclear safety.

Pursuant to 10 CFR 50.12, the Commission may, upon application by any interested person, or upon its own initiative, grant exemptions from the requirements of 10 CFR part 50, when (1) the exemptions are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) when special circumstances are present. Section 50.12(a)(2)(iii) of 10 CFR part 50 indicates that special circumstances exist when compliance with a regulation would result in undue hardship significantly in excess of those contemplated when the regulation was adopted, or that are significantly in excess of those incurred by others similarly situated. In the licensee's case, a special circumstance exists because of the hardship described above, and the special circumstance requirement of section 50.12(a)(2)(iii) of 10 CFR part 50 is satisfied.

The requested schedular exemptions are administrative and would not affect plant equipment, operation, or

procedures. The UFSAR is simply a repository document that contains the analysis, assumptions, and technical details of facility design and operating parameters. Until the UFSAR is updated, the recent design and operational changes are documented in the licensee's safety analysis reports, and in the Commission's Safety Evaluations for changes requiring prior approval. Changes to a facility or its operation are effected through processes defined in regulations other than 10 CFR 50.71, such as, 10 CFR 50.90, 10 CFR 50.59, and 10 CFR 50.54. These regulations provide the basis for evaluating proposed changes and ensuring that the changes will not present an undue risk to the public health and safety, and are consistent with the common defense and security. The UFSAR, and its periodic updates, only reflect changes that have already been implemented under various processes prescribed by other NRC regulations such as those cited above. Consequently, extending the due date for the filing of UFSAR updates does not present an undue risk to the public health and safety.

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemptions are authorized by law, will not endanger life or property or common defense and security, and are, otherwise, in the public interest. Therefore, the Commission hereby grants the licensee exemptions from the requirements of 10 CFR part 50, paragraph 50.71(e)(4) for OCNCS. Specifically, the licensee is granted a one-time exemption to delay the next UFSAR update to 30 months after the last update, instead of the 24 months allowed by the regulation, to October 25, 2005, and a permanent exemption to file all future UFSAR updates up to 12 months after completion of a refueling outage, instead of the 6 months allowed by the regulation.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (69 FR 40989).

This exemption is effective upon issuance.
