World Coffee Production in 2007/08 Down 12.5 Million Bags From Previous Year

World Coffee Exports in 2007/08 Down From 2006/07 Due to Drop in Supplies

World production of coffee in 2007/08 is forecast at 118.9 million bags (60 kilograms or 132.276 pounds), down 12.5 million bags, or 9 percent, from the revised 2006/07 level. Most of the reduction is attributed to Brazil, where coffee production in 2007/08 is forecast at 36.2 million bags, versus 46.7 million bags the previous year. Brazil's drop in coffee production will mean lower forecast exports of coffee in 2007/08. World exports of coffee in 2007/08 are forecast at 93.7 million bags, down 4.2 million bags, or 4 percent from the 2006/07 level. Brazil's exports of coffee in 2007/08 are forecast at 24.0 million bags, down from 28.3 million in 2006/07.

World coffee stocks in 2007/08 in producing-exporting countries are forecast to decline to a low level of 16.8 million bags, mainly the result of lower supplies in Brazil. This is the lowest level of stocks recorded in the USDA database dating back to 1960/61.

Coffee prices have weakened somewhat recently, but are still significantly above the historic lows of 2002. The monthly average New York spot price for Brazil's arabica coffee (as reported by the International Coffee Organization, ICO) was \$.9966 per pound in May 2007, down from \$1.0084 per pound in April, and down from \$1.1199 per pound in January 2007. However, these prices are significantly above the May 2002 level of \$.4519 per pound.

Note: FAS will no longer publish **Spice Prices** after this issue.

COFFEE UPDATES

World production of coffee in 2007/08 is forecast at 118.9 million bags (60 kilograms or 132.276 pounds), down 12.5 million bags, or 9 percent, from the revised 2006/07 level. Most of the reduction is attributed to Brazil, where coffee production in 2007/08 is forecast at 36.2 million bags, versus 46.7 million bags the previous year. Vietnam's coffee production is also forecast to fall to 17.7 million bags in 2007/08, down 930,000 bags from the previous year. Colombia's coffee production is forecast to increase slightly in 2007/08 to 12.4 million bags.

Brazil's drop in coffee production will mean lower forecast exports of coffee in 2007/08. World exports of coffee in 2007/08 are forecast at 93.7 million bags, down 4.2 million bags, or 4 percent from the 2006/07 level. Brazil's exports of coffee in 2007/08 are forecast at 24.0 million bags, down from 28.3 million in 2006/07.

World coffee stocks in 2007/08 in producing-exporting countries are forecast to decline to a low level of 16.8 million bags, mainly the result of lower supplies in Brazil. This is the lowest level of stocks recorded in the USDA database dating back to 1960/61.

Coffee prices have weakened somewhat recently, but are still significantly above the historic lows of 2002. The monthly average New York spot price for Brazil's arabica coffee (as reported by the International Coffee Organization, ICO) was \$.9966 per pound in May 2007, down from \$1.0084 per pound in April, and down from \$1.1199 per pound in January 2007. However, these prices are significantly above the May 2002 level of \$.4519.

Brazil

Brazil's coffee production for marketing year (MY) 2007/08 (July-June) is 36.2 million bags, down 22 percent, or 10.5 million bags, compared to the previous year. Arabica production is forecast at 25.65 million bags, a 29-percent decline from the previous season while robusta production is forecast at 10.55 million bags, similar to last year. The significant reduction in production is a consequence of expected lower yields in the arabica-producing regions, a result of the biennial production cycle. Overall, arabica trees show average fruit development and harvest started in May. The lower arabica production is a result of: trees being mostly in the off-year of the biennial production cycle; in spite of good crop management, plants are somewhat stressed by the very high 2006 production; and the

blossoming for some regions was somewhat delayed due to poor rainfall during August-September 2006. Robusta production should remain stable as a consequence of good weather that prevailed in the growing regions and good crop management due to favorable prices, especially in the state of Espirito Santo. The robusta harvest season began in March-April.

Vietnam

Vietnam's coffee production for 2007/2008 is forecast to decline 5 percent, or 930,000 bags, to 17.7 million bags due to expected dryer conditions. The government continues to encourage farmers in marginal-growing areas to replace coffee with crops better suited to the soil. However, in the face of current high prices, farmers continue to expand their robusta cultivation, and where possible, also arabica production.

Vietnam exports a significant portion of its coffee production. As the result of the drop in coffee supplies in 2007/08, Vietnam's exports of coffee are forecast at 16.8 million bags, down from the preliminary estimate of 17.6 million bags during 2006/07. Vietnam currently exports coffee to about 70 countries. Germany is consistently the largest market for Vietnam's coffee, followed closely by the United States.

Colombia

Colombia's coffee production in 2007/08 is expected to increase from the previous year by 200,000 bags, to 12.4 million bags. The growth in production is mainly the result of a tree renovation program and expanded planted areas of coffee in the southern region of Colombia. Colombia's coffee production growth has been sustained over the past several years mainly due to the coffee-tree renovation program, developed between 1998 and 2004, under FEDECAFE, which brought around 400,000 hectares into renovated production. FEDECAFE is now planning the second coffee-tree renovation program over the next five years. Under the new program, FEDECAFE is expected to renew approximately 60,000 hectares per year. The program will increase coffee production only marginally until the year 2010, when the new trees will be in full production. It is estimated that at the end of the program in 2013, Colombia will add another 3 million bags to total annual coffee production.

In 2007/08, Colombia is expected to increase coffee exports to 11.7 million bags, from 11.3 million bags the year before. The United States continues to be the single-largest market for Colombian coffee. Japan and Germany were the second- and third-largest markets for Colombian coffee exports. Colombia's production of value-added coffee products continues to grow. FEDECAFE is expanding its freeze-dried coffee production by about 30 percent, which will increase coffee processing by up to 500,000 bags of coffee. Of the total forecast for 2007/08, Colombia is forecast to export 10.8 million bags of green coffee, 100,000 bags of roasted coffee (green-bean equivalent, GBE) and 800,000 bags of soluble coffee (GBE).

Mexico

Mexico's coffee production during 2007/08 is forecast at 4.5 million 60-kilogram bags, an increase of 7 percent over last year. This increase assumes favorable weather and ample moisture in production areas. However, early reports from producers from around the country, not just in coffee-production areas, are citing highly variable, and somewhat unfavorable, weather so far this year. The Mexican coffee sector is in the first year of a 10-year plan to stimulate domestic coffee consumption, and de-emphasize efforts to sell on international markets. Currently 70 percent of Mexican coffee is exported, and 30 percent is consumed domestically. Industry leaders have set a goal of reversing these numbers, with 70

percent of Mexican coffee to be consumed domestically, and 30 percent to be directed to the export market.

United States

U.S. coffee stocks at the end of April 2007 totaled 5.8 million bags, up 41,821 bags from the March 31, 2007, level.

1/ Coffee marketing year begins October in some countries and April or July in others. Exportable production represents total harvested production minus estimated domestic consumption. Countries with the result of zero (0) may indicate domestic consumption equal to production or a country that imports more coffee than they export, in which case they are not regarded as having exportable production. 2/ One bag = 132.276 pounds. Green Bean Equivalent.

Note: The United States includes Puerto Rico and Hawaii.

1/ Decaffeinated is not separate from regular and soluble coffee, but is included in both the latter types.

2/ Winter Coffee Drinking Study was not conducted.

3/ Starting in 1997, data reported are for respondents 18 years of age or older. Prior to 1997, data are reported for respondents 10 years of age and older. Data for 1999-2007 reflect consumption of regular, soluble, and decaffeinated coffee as well as gourmet coffee beverages. Data before 1999 reflect consumption of regular, soluble, and decaffeinated coffee only.
