

Tropical Products: World Markets and Trade

U.S. Exports of Essential Oils by Type

1997 - 2006

*Mixtures of odoriferous substances and mixtures, of a kind used in the food or drink industries.

U.S. Exports of Essential Oils by Country of Destination

1997 - 2006

U.S. exports of essential oils reached a record \$1.05 billion in calendar year (CY) 2006, up nearly 5 percent from 2005, and up 1 percent from the previous record in 2004. The EU is the largest market, accounting for 25 percent of the total in 2006. Canada accounted for a little less than 25 percent of the total. Essential oils are obtained from natural raw materials by distillation or through a mechanical pressing process. These oils are widely used in perfumery, cosmetic, aromatherapy, and pharmaceutical products, and to flavor food and soft drinks. Mint oils are widely used in chewing gum, toothpaste, mouthwashes and in a wide variety of confectionery and pharmaceutical products. Citrus oils are widely used by the soft drink industry, as well as to flavor confectionery and other food products. The term essential is used to indicate that the oils are the fragrant 'essence' of the plant.

COFFEE UPDATES

United States

The value of U.S. imports of coffee and coffee products rose to \$3.3 billion in calendar year (CY) 2006, up 11 percent from CY 2005. Value wise, Colombia accounts for the largest part of the total, whereas on the quantity side, Brazil is the largest supplier. The harmonized system (HS) category of coffee, arabica, not roasted or decaffeinated accounted for 53 percent of the total.

U.S. exports of coffee and coffee products are valued at a record \$451.3 million in CY 2006, up 20 percent from last year. Roasted coffee accounts for the largest category, accounting for 68 percent of the total. Canada is the largest single market for U.S. exports of coffee and coffee products.

Please see the following web site for U.S. trade data

<http://www.fas.usda.gov/ustrade/>

U.S. coffee stocks at the end of January 2007 totaled 5.5 million bags, up 506,310 bags from the December 31, 2006, level.

NATIONAL COFFEE ASSOCIATION'S (NCA) '2007 NATIONAL COFFEE DRINKING TRENDS'

According to the NCA, for the first time since 1990, the percentage of U.S. adults who drink a daily cup of coffee exceeds those who drink a soft drink every day. Out of the nearly 3,000 adults sampled for the survey in January, 57 percent said they drank coffee every day. This is up from 56 percent the year before. For soft drinks, the results were 51 percent this year versus 57 percent last year. See the NCA web site for details on how to purchase the full copy of the 2007 National Coffee Drinking Trends report. www.ncausa.org

Brazil

U.S. ESSENTIAL OILS

U.S. exports of essential oils reached a record \$1.05 billion in calendar year (CY) 2006, up nearly 5 percent from 2005, and up 1 percent from the previous record in 2004. The EU is the largest market, accounting for 25 percent of the total in 2006. Canada accounted for a little less than 25 percent of the total. Essential oils are obtained from natural raw materials by distillation or through a mechanical pressing process. These oils are widely used in perfumery, cosmetic, aromatherapy, and pharmaceutical products, and to flavor food and soft drinks. Mint oils are widely used in chewing gum, toothpaste, mouthwashes and in a wide

variety of confectionery and pharmaceutical products. Citrus oils are widely used by the soft drink industry, as well as to flavor confectionery and other food products. The term essential is used to indicate that the oils are the fragrant 'essence' of the plant.

U.S. imports of essential oils reached a record \$2.5 billion in CY 2006, although the rapid increases of the previous years have slowed. U.S. imports in CY 2006 were up only 2 percent following increases of 21 percent and 57 percent in CY 2005 and 2004, respectively. The largest jump in U.S. imports came in CY 2003 when the value of imports skyrocketed to \$1.3 billion, more than 3 ½ times the previous year's level. Almost all of the increases beginning in 2003 are attributed to new facility in Ireland, which supplied 79 percent of the total in CY 2006. A U.S. soft drink manufacturer opened a new concentrate processing facility in Cork, Ireland in 2003.

While the category of essential oils contains those single essential oils, such as orange oil, lavender oil, rose oil, and mint oils, the single HS code that accounts for 73 percent of the total (in value terms) is 3302101000, "mixtures of odoriferous substances used as raw materials in the food or drink industries."
