--- Data not available.

- (1) Rates computed by relating total births to unmarried women, regardless of age of mother, to unmarried women aged 15-44 years.
- (2) Rates computed by relating births to unmarried women aged 40 years and over to unmarried women aged 40-44 years. Rates by race for years prior to 1969 are computed by relating births to unmarried women aged 35 years and over to unmarried women aged 35-44 years.
- (3) Includes races other than white and black.
- (4) Data for States in which marital status was not reported have been inferred from other items on the birth certificate and included with data from the reporting States; see Technical Appendix.
- (5) Based on 100 percent of births in selected States and on a 50-percent sample of births in all other States; see Technical Appendix.
- (6) Births to unmarried women are estimated for the United States from data for registration areas in which marital status of mother was reported; see Technical Appendix.
- (7) Based on a 50-percent sample of births.
- (8) Based on a 20- to 50-percent sample of births.
- (9) Rates for 1990 based on data for 48 States and District of Columbia which reported Hispanic origin on the birth certificate. Rates shown for ages 35-39 years are based on births to unmarried women aged 35-44 years.
- (10) Includes all persons of Hispanic origin of any race.

NOTE: Rates cannot be computed for unmarried non-Hispanic black women because the necessary populations are not available.
